4.1.8 The inclusion of Ash and Tongham as 'countryside beyond the Green Belt' in the New Local Plan has the effect of changing a rural area into an urban one. I am referring in particular to Amendments 1-9 Ash and Tongham i.e. additional land parcels at A28 and A29. This means that Ash Green Road could potentially be surrounded by new developments on all sides. To the north, the development at Ash Manor would destroy a gap between Ash Green (historically a village in its own right separate from Ash) and to the south in Drovers Way, development would back on to properties on that road. Housing density would be exceptionally high and urban sprawl would spread from Ash Station up to the southern end of White Lane, taking into account existing developments in planning (at White Lane/Hazel Road). The creation of the Ash and Tongham Urban Area appears to be swamping us and it seems to me that small sites have been selected in an indiscriminate manner which does not protect and preserve the rural and historical character of Ash Green.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Ash Vale is full. Apart from the Keogh barracks site, which is brownfield anyway, there is no more room in Ash Vale for any further developments.

Unfortunately the proposals put forward in the plan indicate that any remaining green area in the Ash Wharf ward (which isn’t much) is designated to be built over with great swathes of Ash South and Tongham going the same way. The only saving grace is the proposal at policy P2 (4.3.17) to extend the Green Belt boundary between Ash Green village and the Ash South and Tongham urban area to prevent coalescence. However disappointingly there is nothing proposed to
prevent further coalescence of Ash South and Tongham, the latter until recently having been an entirely separate village. In fact it still retains its own Parish Council. It would have been pleasing to have seen some attempt made to allow Tongham to retain its own individual identity and not just for Ash South and Tongham to be amalgamated as part of the urban sprawl which the area is fast becoming. It appears that what the plan is indicating is that the urban area of Ash South and Tongham (which includes the fast dwindling green space remaining in Ash Wharf ward) will ultimately begin from Harpers Road and extend right through Ash and Tongham almost as far as the Blackwater Valley relief road.

Specifically with reference to Harpers Road there has until now been a small community of residences which are part of Ash but which are somewhat separate from the main urban area – a sort of tiny “village” on the outskirts of the Parish. It would appear that this small pocket of individuality will ultimately be lost if this part of the strategic site at A29 remains as it stands. Whilst it could be argued that this should not stand in the way of development it is disheartening that this housing microcosm could not be protected to some degree.

Until the advent of the NPPF the Ash area maintained some protection from development having been designated as Countryside beyond the Green Belt. Once the NPPF came into existence the protection ceased to have any meaningful application and Ash and Tongham became the target for a multitude of development applications (see below).

This letter is a direct objection to the 2017 house building plans in the Ashgreen, Ash and Tongham area. We understand the need for new housing within these areas; unfortunately the numbers proposed are monstrous.

This is also a letter of rejection to the moving of the Ashgreen boundary just to incorporate the council quota in new builds in the Ash- Tongham boundary. The use of Ashgreen just to make the council house building plan add up is frankly comical. Ash, Tongham and Ashgreen are all separate communities and do not need to be merged just to serve the council or governments planning requirements.

Ashgreen is regarded by all un-sundry as a beautiful rural part of this area, with buildings of Historical importance as well as areas of natural beauty .Ash Manor, a historical farmstead of three listed buildings including a medieval hall house. Ashgreen has not neglected the need for new housing. The main requirement for any expansion of Ashgreen is the fact that any building work undertaken is moderate and within the keeping and character of the area.

The four main objections to the council housing plans are;
• The number of houses proposed.
• The moving of the boundary to accommodate the council numbers.
• The lack of any plans regarding the infrastructure such as roads, schools, and other amenities required to make a housing project of this size safe, viable and of benefit to the present community.
• The Flooding. This could be an issue. The residents of Ashgreen already deal with huge amounts of coming of the A31 the Hogs Back. Recently a bund has been constructed to relieve any flow of water from the hills looking down on Ashgreen. New builds in great numbers and in areas surrounding Ashgreen could in future have a detrimental effect on the houses and surroundings of Ashgreen.

So these are our four main reasons for opposing the build.

Point 1

A suicidal number 1750 of houses being built in and around one of the busiest transport hubs in the South of England. Access to the A31 -331-A3-M25 and M3 are all heavily congested and frequently at a standstill due to accidents and the volume of traffic. So traffic from these main roads will regularly use White lane, Foreman Road and Ashgreen road which are narrow roads, without foot paths and are used for a cut through to get towards Guildford Hospital etc. This could be an additional 3700 cars on these rural roads and would be dangerous and very unsafe.

Point 2

We have a deep contempt to the council’s underhand movement of the boundary that they can justify to the government that the planning proposals for this area are on track this is scandalous.

Point 3

To build the number of houses proposed and with no plans for the infrastructure within this area we feel is crazy. All the main roads are heavy with traffic virtually every day from early in the morning. You plan to build in an area where of all roads leading to the main transport links are totally unsuitable for purpose. The roads in and around Ashgreen are narrow mostly without footpaths and are also used by cyclists, walkers and horse riders. Placing such a large number of new homes in an area with already overloaded roads, a lack of schools, surgeries and other important amenities is a recipe for disaster with no planning of any kind for the infrastructure.

Point 4

We live in Drovers Way Ashgreen we have been here thirteen years our garden is never dry even at the hottest time of the year we feel the building of so many houses could cause a problem with the natural flow of water coming of the hogs back. The building of so many houses could lead to areas of Ashgreen having problems with flooding because the water cannot run its natural course. The Ashgreen bund has recently been built to alleviate any potential flooding problems so why would you want to build so many houses with the possibility of causing potential flooding problems.

Our Conclusion

The high number of new houses proposed for the Ashgreen, Ash and Tongham are totally unreasonable because of some of the points highlighted in this letter. As we understand things there are no proposals for building in Normandy why? This is an unjust and unfair plan by the council to destroy the lives liveyhoods and a reasonable way of life in ASHGREN, ASH AND TONGHAM.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am responding to the local development plan, with particular focus on Ash and Tongham. You plan to build 2000 dwellings, most on previously rural land, causing an increase of about a third in the population of this settlement. This is too much for the settlement to accommodate and will impair the quality of life of those already living there.

Your infrastructure plans are mostly vague aspirations, uncosted and undated, despite the fact that building work has already commenced on several hundred homes.

1. Primary education.

You state that 1-2 extra forms of entry will be needed, most likely at Ash Grange school as it is nearest to the bulk if the new development. As FOEs have to be whole numbers, this means turning a 1 FOE school to a 3 FOE school. Has the feasibility and cost of this been seriously considered? What consultations have taken place? Who will pay? This is a matter of some urgency as the classrooms have to be built and staffed before the first children arrive, which will be within the next 3 years. I would also mention potential difficulties with parent parking, already a problem in the area near the school. If instead you added one of the FOEs to the Walsh school, you would have the same issues at that school.

2. NHS General practices.

Your (almost illegible) map of GPs in the borough shows none in the western part of the borough, despite the existence of a large practice in Ash Vale (the only one in the area). Can this practice deal with a 30% increase in patients? Will they use the land offered in the Ash Lodge Drive development? How much will it cost? Who will pay? The Ash Vale practice has poor access, with very limited parking, and is not on a bus route. It is also too far from the proposed new developments for people to walk.

5. Sustainability

Ash scores highly on sustainability because it has the necessary community infrastructure for its current population, but this infrastructure is at full capacity, so will need significant investment to deal with the large number of extra homes. The sustainability score should reflect this. Where is the funding for all this infrastructure work?

The policy of Guildford Council towards development in Ash and Tongham is developer-led, not community-led. The developers can gobble up the green fields without having any responsibility for the impact on the community. The Council are playing catch-up with vague and unfunded plans. Given that development on several hundred houses has already started, the council need to get its act together.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

The scale of the proposed development under Policy A29 is unsustainable in terms of local infrastructure and amenities. Manor Road is already heavily congested during the morning and afternoon school runs. Residents from the new housing developments wishing to commute to local employment centres or to local stations for commuting further afield will find the congestion on the roads leading out of the development sites unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I wish to OBJECT to any development on Greenbelt area proposed by the Guildford Borough 2016 Local Plan.

The main reason for my OBJECTION are:

The detrimental effect these developments will have on transport, local roads and safety. I think of Ash and Tongham areas: the local roads won't absolutely be able to cope with the inevitable increased volume of traffic nor will the other public transports.

Considering the last 2 years degradation of Railway services due to increasing number of uses from the area i think both roads an railways are beyond their limit and most infrastructure work in this area are very very poor.

The increase in pollution and flooding risk.

The definitive loss of areas of high environmental and ecological value. Sites such as Blackwell Farm and the Hog's Back should be safeguarded as AONB not destroyed forever.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. Any increase in traffic along the A323 is totally unacceptable. Any plans that are eventually implemented must have access elsewhere as this road is already up to capacity, especially if there are problems on the A3. This area is still rural and inhabitants need to be able to walk safely along footpaths and cross the road.
2. I have no objection to the rerouting of the road over the railway line provided there is a footbridge at Ash station and there is no other building in the area. With more local traffic the problems will just be rerouted. Why not reroute the road to accommodate a bridge over the existing road?
3. The addition of office accommodation near Ash station might be handy for commuters but it would just add to the traffic chaos. Presumably this would again hit the A323, or Ash Hill, which is always busy in the rush hour.
4. Drainage continues to be an issue in the area, with flooding in parts.
5. This is all Green Belt land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I would like to comment on the Draft Local Plan 2017 (Reg 19) as follows and relate to the proposed extensive development in Ash, Tongham and Ash Green.

Of particular concern is extensive development to the east of Ash and north of Ash Green, and I note that Ash Green has effectively been split into two parts, the northern part (north of the disused railway line) now being subsumed into Ash. Subterfuge on a grand scale.

It is at this point I would like to introduce page 2 from the NPPF. (attached file)

Observations

1. Just how will this plan deliver any of the 3 goals described above. Concreting over valuable green spaces, some of which is arable land, is not going to satisfy any of the three dimensions. In the 2013 Guildford Borough Settlement Hierarchy study Ash Green ranked last - score 31 for Sustainability and score 15 for Functional ranking. Meanwhile Normandy and Flexford scored 5 and an 1 respectively in the same study. Ash Green had a population in this study of 593 and Normandy and Flexford 1794, both 2011 figures. Looking at the proposed development sites A27, A28 and A29 represents a environmental disaster on a grand scale. A29 incorporates part of Ash Green into what is a massive dense urban expansion, totally out of character and sympathy with the existing housing stock. The density of the proposed housing is on a scale that is more suited to inner cities. Tomorrows ghettos in the making. Taking into account the housing proposed around Ash Manor, Ash Green Road and the sites A27 and A28, Ash Green will more than double in size, whilst Normandy and Flexford emerge from this environmental disaster free of any significant development, despite the earlier plan having made provision for some housing which would have "spread the load".

2. When this proposed environmental catastrophe is complete I just wonder who is going to held to account. Not only will this monstrous scheme load the environment for the foreseeable future just how are the basic needs of water, drainage, air quality, services and recreational space to be provided. That most of the area in north of Ash Green is an effective sump to which precipitation drains has not been mentioned. That the soil is predominantly clay with poor infiltration is also conveniently ignored. That run off water will find its way to the Blackwater river, and though a SUDS system might help, the shear density of the housing and geography will make this very challenging indeed. What about the rail crossing on the A323 at Ash that is effectively closed for 23 minutes in every hour. The proposed road over bridge for the rail line is a mere proposal. Until this is realised then any development should be "on-hold" because the traffic load will simply overwhelm the carrying capacity of the road system. Ash Green Road will become the biggest rat run in Surrey, all because the planners at Guildford did not plan. With 1850 + houses planned in the ATUA and Ash Green how is the water supply going to be guaranteed. Add in the 4000 + homes in Aldershot that will be built in the same time frame and this will add a considerable burden to the water supply. Where are the additional 750 million litres of potable water to be obtained?

3. What about the transport system and the choke points. A31 for example. Miserable at Farnham and Guildford at peak hours. Same for A331 at the A31 and M3 junctions. A323, a total disaster with multiple choke points. A3 in Guildford; a nightmare now, and even worse nightmare in the making. The rail network. Try getting seat at peak times. It is at full capacity now, how will it cope in the future. Since neither Ash, Tongham and especially Ash Green has limited employment opportunities any person living in this location has to travel to a place of work. That means loading the transport system for which there are limited options now and even more limited options in the future.

4. If we look at the future needs for social services, medical services, schools and recreational space these proposals fall well short. There is an acute need for housing suitable for elderly people yet this scheme pays scant attention to the issue. Land plots A28 and A29 would better serve the borough and be more sympathetic with the local area if development were restricted to provision of housing and green space for the elderly. This could be a mix of sheltered and and purpose built housing. Current residents in Ash, Tongham and Ash Green have few options to downsize and stay in the area (see 2.2.1 of Draft Local Plan). Providing options to do this will release a variety of properties to the market.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Draft Guildford Borough Local Plan – Consultation Response.

We write as residents of Ash Wharf having attended the public exhibition at the Ash Parish Centre on Saturday 30th September 2014 and subsequently have examined the emerging local plan in this consultation. It is of considerable relief that the Borough Council has finally decided to progress with a new Local Plan, some 10 years after the Planning and Compulsory Purchase Act (2004) first introduced the Local Development Framework style of development plans. The current Guildford Borough Local Plan is woefully out of date and not consistently compliant with the National Planning Policy Framework (NPPF) so any new local plan will be welcomed. However, even after almost 12 years of potential works and drafting, the consultation draft on the Local Plan appears rushed and unduly politically influenced.

• As residents of the greater Ash settlement area, we have identified the following issues that have not so far been addressed by the Council in the draft plan and which, if strategically approved at this stage, will leave little scope for further input or changes in approach. We have identified the following areas of concern:
  The Level of residential development to be provided in Ash and the lack of co-ordinated approach to development both in site specific terms and as part of the duty to co-operate with other local authorities
  The impact of development on the local highway network
  The inappropriate provision of Sustainable Alternative Natural Greenspace (SANG) so close to the Ash Ranges

Each of these points are addressed in more detail in the remainder of this letter.

Residential Development

Ash is in the position of being located on the Guildford, Rushmoor, Waverley and Surrey Heath borders. In its Core Strategy, Rushmoor Borough Council has already identified a large housing development in the Aldershot Military Town. Waverley is currently working on a new draft Core Strategy Local Plan having fundamentally failed the test of the duty to co-operate with other Authorities. This same duty of co-operation appears to be missing from the draft Guildford Local Plan. It is clear that Waverley Borough Council are focusing considerable development onto Badshot Lea. With the planned development at Aldershot and then the suggested housing allocations at Ash and Tongham which have been published in the draft Guildford Local Plan, there appears to be little, if any, consideration of the cumulative impacts on this cross border location.

We suggest that the Council has taken the easy and politically safe option to force high amounts of development on the Ash area and we urge the Inspector to give this apparently unjustified approach some proper consideration when examining the emerging Local Plan for soundness. The promise of additional Green Belt in the Ash/Tongham area is a token gesture aimed at distracting local residents of what the main plans are for the area.

Local Highway Network

The SA identifies the current issues on the road around the existing pinch point of the level crossing at Ash railway station. This regularly causes traffic to tail back almost a mile to the Guildford Road/Pirbright Road junction on the A323. This part of the highway network is already well beyond capacity (as identified within SCC’s Transport Assessment, January 2014 which makes up part of the evidence base for the Local Plan) and therefore any additional traffic will exacerbate the existing problem unless there is a co-ordinated approach to future local infrastructure provision which, in our opinion has to include a new bridge over the railway between the developments to relieve the traffic demand on the existing level crossing.

There are also no guarantees that the highway impact of the proposed Ash housing development can be mitigated and, unless this can be proved otherwise, the LPA could find themselves in the position of not being able to deliver on its housing allocations. Unfortunately, the more likely event is that the LPA will conclude that the houses have been strategically allocated and therefore must be delivered regardless of what associated infrastructure is offered.
The evidence base for the draft Local Plan should be used as a tool to assess what the impact of the proposed allocations should be and then the LPA should assess and plan for the mitigation before any acceptance that the housing allocation should be pursued and formally allocated. This process has fundamentally failed in this instance and the LPA has not completed sufficient work to establish that they can sustainably deliver the quantum of development proposed in Ash.

It is further noteworthy that the settlements in the east of the Borough have no road links identified as being over capacity. All the links over capacity are those where the development is being proposed. We have already alluded to the probable reasons for this.

Allocation A30 suggests a road bridge over the railway at Ash Station, something our earlier representations focused on. This is essential if significant residential development is to be allocated. The suggestion is another 30 seconds per vehicle without mitigation – effectively gridlock. However, how is it going to be delivered? S123 of the CIL regulations refer to pooling and the restriction to 5 sites to contribute towards a pot of S106. On the basis that multiple sites in Ash are going to be allocated, S106 will not be able to deliver the road bridge with genuine concerns that individual developer/land owners will seek to pass-the-puck to prevent paying for the new infrastructure. If the time to produce this local plan is taken as an indicator, the Council cannot rely on CIL to deliver the road bridge in the near future. Surrey County Council’s Strategic Highway Assessment Report (June 2016), 4.5.3 confirms that the mechanism for mitigation must be agreed at Examination Stage. We agree with this, it cannot be left to the developers to deliver the infrastructure. If the footbridge and road bridge are going to be delivered as an allocation of its own right, then how is this to be delivered? It needs to be linked to the development themselves otherwise they could easily fall to the wayside and not be delivered.

Ash Hill Road will reduce to Level E (number 24 northbound). The information is unclear as to what is being proposed to mitigate against this. Again, referring back to 4.5.3, this should be agreed prior to the EIP otherwise there will be no mitigation.

The A323 (Guildford Road) and B411 (Ash Hill Road) suggest traffic signals yet “they are unable to be represented in the strategic SINTRAM”. Why not? This is not explained. It appears an unwillingness to model this.

The A323 Guildford Road in Ash has a Ratio of Flow Capacity (RFC) of 1.18 and a corresponding level of service F (the lowest value possible). In the scenario 3 “do something (2031) the RFC goes up to 1.35 with development appropriate mitigation. This is not providing a do-nothing situation. It is inappropriate to put added stress on a road with and RFC of 1.18 in the first place, let alone with no commitment to mitigation.

If you are putting this much development in Ash, then top of the priority list is understanding the highways implications of the proposal. For instance, as another example, the A323 and A342 junction is forecast to have a 112 second delay increase per vehicle. There appears to be no understanding from the Council of the implications of this level development, let alone how it will be mitigated.

Schools

Ultimately 2,300 new homes are proposed within 1 mile of each other at Ash, Flexford and Normandy. Whilst a new Secondary school is proposed in Normandy/Flexford, no new primary/junior schools appear to be proposed. This is essential with the existing primary schools full in the local area.

Conclusion

We are not against the principle of new residential development in the Ash area and understand that all settlements potentially have a duty to provide more dwellings. That is why it seems unreasonable and unjustified in planning terms that the Borough Council is clearly focusing as much development outside Guildford itself and the affluent villages to the east of the Borough with the focus on development to the western end of the Borough. This is being done with no evidence of satisfying the duty of co-operation with the neighbouring boroughs and clearly following political desire to focus development in the east of the Borough. This has apparently unduly influenced the draft plan to the extent that strategic housing sites are being suggested for allocation in the Local Plan without the appropriate evidence base to back up their allocation or even prove that the impacts of development have been considered. On this basis, it is highly likely that an Inspector will find the draft Local Plan unsound on submission. The LPA has had 10 years to do the required background work and it is alarming that they would be willing to strategically allocate 1200 houses without properly identifying how these will be mitigated on a road network which the Council’s own evidence base shows cannot take any
more traffic at peak times. The commitment to the new road bridge at Ash Station is weak and there appears little chance of it being delivered as an allocation in its own right. Developers should fund the whole bridge and there should be no reliance on Network Rail or Surrey CC.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Land north of Grange Road, Ash

Thakeham Homes wishes to recommend the site for residential development and as such supports the inclusion of the site within the housing site allocation ‘A29 Land to the south and east of Ash and Tongham’ in the Pre Submission Local Plan. The red line location plan for the site has been appended to this representation at Appendix 1.

Figure 1. Extract from Pre Submission Local Plan, showing the site within strategic allocation A29.

Availability

The NPPG provides the following guidance in regard to considering whether a site is available for development:

“A site is considered available for development, when, on the best information available, there is confidence that there are no legal or ownership problems, such as unresolved multiple ownerships, ransom strips tenancies or operation requirements of landowners. This will often mean that land is controlled by a developer or landowner who has expressed an intention to develop”

NPPG Paragraph 021 Ref. 3-020-20140306

As highlighted within this representation, the site is controlled by Thakeham Homes Ltd and we will be actively engaging with the council over the coming months prior to submission of a full planning application for residential development. Thakeham is current progressing a reserved matters application for the adjacent site to the north for the delivery of 26 dwellings (Planning application ref 16/P/00663) following the grant of outline consent in December 2013.

Thakeham has a proven track record for delivering a number of high quality residential schemes across Surrey, Sussex and Hampshire and will be seeking to deliver circa 20 dwellings on the site with a view to commencing development on site at the earliest opportunity.

Suitability

The NPPG provides the following guidance when considering whether a site is suitable for development:

“Sites in existing development plans or with planning permission will generally be considered suitable for development although it may be necessary to assess whether circumstances have changed which would alter their suitability”

NPPG Paragraph 019 Ref. 019-20140306

The site is located on the eastern edge of Ash village and is within walking distance of the various local amenities of Ash High Street. The Ash and Tongham Urban Area falls on the top tier of the settlement hierarchy and is therefore considered to have a range of services and facilities to meet the needs of the existing community as well as providing key services for surrounding smaller villages. The site has good transport links, with a railway station within walking distance of the site, and there is good access to bus links from Grange Road on the south western corner of the site.
The site has been submitted to and included within the Land Availability Assessment and promoted to the Local Plan, which acknowledges its suitability for residential development.

It is therefore evident from the proposed allocation and the supporting evidence including the LAA, that the site is considered suitable for development within the meaning of the NPPG.

**Achievability**

In determining whether a site is achievable for development, the NPPF provides the following guidance:

“A site is considered achievable for development where there is a reasonable prospect that the particular type of development will be developed on the site at a particular point in time. This is essentially a judgement about the economic viability of the site and the capacity of the developer to complete and let or sell the development over a certain period”

NPPG, Paragraph 021 Ref. 021-20140306

Given the acute housing need within the Borough and the proposed inclusion of the site within a strategic allocation in the Pre Submission Local Plan, it is considered that there is a reasonable prospect of residential development being achieved on site by 2021.

As stated above, Thakeham has a proven track record for delivering schemes of a similar size and scale throughout Surrey, Sussex and Hampshire, and has the capacity to deliver the development of the site to provide much needed new homes within the first 5 years of the plan period.

**Deliverability**

For the reasons above, the site is considered to be available, suitable and achievable, and therefore deliverable in accordance with the NPPG. As such, we consider that the site could provide much needed housing development within the plan period and support the proposed strategic allocation A29 Land to the south and east of Ash and Tongham.

**Conclusions**

In conclusion, we consider that an increase in housing land supply is required if the plan is to be consistent with national policy and therefore ‘sound’ with respect to the NPPF.

With regard to the expected shortfall of circa 2,000 dwellings by 2017/18, it is our view that at least a further 400 dwellings per annum are required in the first 5 years of the plan period, to enable the Council to meet its OAN prior to larger strategic sites coming forward in accordance with the housing trajectory in the LAA. In addition, we consider that the plan should account for market signals and the duty to cooperate, to ensure a robust and realistic housing land supply.

Given the issues discussed within this representation, it is our view that the council should work proactively to identify and include additional housing site allocations in sustainable locations in the towns and villages and areas of least constraint. This would allow the Council to bring forward housing more quickly in the early years of the plan period in a way that fits the overall strategic vision of the Local Plan.

We have sought to demonstrate within these representations that the site is achievable, suitable and deliverable for residential development which could be delivered within the first 5 years of the plan period. As such, we wish to support the proposed allocation under Policy A29 for development to the south and east of Ash and Tongham, including this site.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

This letter constitutes Persimmon Homes Thames Valley's formal response to the above consultation. As part of the Persimmon Group, Persimmon Homes represents one of the largest house builders in the UK and is a significant stakeholder in the Borough with a vested interest in its long-term future.

We have made a number of comments, but reserve the right to make further comments as appropriate. We are keen to work with the council moving forward.

The comments within this letter relate to our interests at Foreman Road, Ash, which lies on the edge of Ash. The Site has the potential to accommodate circa 120 dwellings.

We have set out some general comments below and have then looked to answer the specific questions raised by the council.

Overview of the site

The site allows for an extension to the existing Ash settlement boundary and provides an excellent opportunity to accommodate new homes. Development of the site, in coordination with the provision of a potential pedestrian crossing to the railway line to serve the area would provide betterment to the local area. The site comprises one large field of approximately 4 hectares and is a grass field bordered by mature vegetation, including scrub, tree belts and mature individual trees. The Site is identified within two specific policies of the plan, namely A29 and A30. Specific comments on both policies will be set out within these representations.

Persimmon Homes have an option agreement with the landowners. The site is available, suitable and deliverable for residential development in the short term (0-5 years).

Question 1: The evidence base and submission documents

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

Guildford BC planning context & housing numbers

Guildford BC is currently in the process of producing a new Local Plan which is to cover the period 2013 - 2033 and guide development within the borough and is to be compliant with the National Planning Policy Framework (NPPF). This representation is in response to the Regulation 19 consultation phase for the pre-submission version of the draft Local Plan. Persimmon Homes are pleased to have been given the opportunity to make representations on this concerning the Site and general planning matters within the Borough. Persimmon are also pleased that Guildford BC has acknowledged the significant challenges that the borough faces in delivering sufficient housing to meet its needs. The previous interim housing figure of 322 dwellings per annum agreed on May 2012 did not take account of up to date assessments of housing need and therefore was not NPPF compliant. The reliance on this figure has meant that Guildford BC has significant under-delivered on their housing requirements over the past five years as shown in the below table:

As the housing completions above show, Guildford has not only been under delivering against the now up-to-date Objectively Assessed Need (OAN) but there has also been consistent under-delivery against the interim housing target, which also needs to be factored into an emerging housing target moving forward.

The most recently produced Annual Monitoring Report (AMR), published in October 2015 for the period 2014/2015 showed that net completions of dwellings in the borough for this period was 242 and that the majority of homes completed in this period are on sites of under 20 homes. As the AMR notes "the number of new homes completed this year (2014/15) is still lower than required to meet our objectively assessed need...contributes to a growing deficit of new homes". The recommendation within the AMR following this states that "housing provision is currently restricted by the lack of available and deliverable development land in the borough....delivery rate is only likely to increase when larger
areas of land are suitable and available for development”. This shows the necessity for suitable and available sites to be considered and this should apply to all sites within the borough that meet this criteria. Persimmon Homes have control of the Site through an option agreement with the landowners and the Site is available for development. The council also consider the site to be suitable for development, having identified it within the proposed submission Local Plan.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Ash and Tongham

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to object to the plan for new homes in Ash on the land behind Ash Manor school.

There is not enough facility's in the area such as doctors, schools and main road links. The road network in the area is already sub standard and constantly having delays. The schools are already full.

It must not happen and I wish to register my objection

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Ash and Tongham

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to object to the GBC Local Plan 2016 Policy Numbers A27, A29, A46.

1. Loss of countryside in Ash and Tongham.
Loss of Green Belt in Normandy. Extra traffic, more congestion, more parked vehicles at local shops, more demand for important services (e.g. doctors, hospital).

2. Congestion caused by Ash railway station A323, whereby the frequency of trains with closure of the gates sometimes for 10-15 minutes, making long queues especially at peak travelling times.

3. The difficulty for pedestrians of crossing the A323 Guildford Road, Ash / Normandy border, as invariably traffic does not keep to 30 and 40 MPH limits and the pedestrians crossing does not serve this area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/1599  Respondent: 15434753 / Hilary Clements  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Ash and Tongham

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to strongly object to the policies which will directly affect me and my family.

These are namely Ash & Tongham (Policies A27, A28 and A29) and Normandy (Policy A46)

My address is [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998], so I am right in between these 2 areas of development

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2016  Respondent: 15466657 / Yvonne Farmer  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Ash and Tongham

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

On personal note I am concerned about site allocation A29 - Specifically parcel of land directly to the north of field way, Tongham

My concern is that if property is built in this vicinity I will lose privacy to my home and garden area. I would also like to see TPO’s placed on trees bordering my property.

General concerns on large number of additional properties within Ash and Tongham area. Presently Tongham has a good community spirit feel that Tongham will become part of a large conurbation with Ash / Ash Green and Ash Vale. Understand need for additional housing but at what cost to us and future generations in this area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

In response to the proposed plan targeting Ash and Tongham areas, I strongly disagree with the construction of 1750 new homes being built. I object to policy numbers A27, A28, A29 and to the map on page 301 (offices) because of the loss of countryside and amenity, along with the roads in this area not being able to cope with all the extra traffic that would because by this. There will be an increased numbers of parked cars which will increase congestion levels around this area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

I am writing to object to the proposals to move this part of Ash Green into the Tongham ATUA. I believe like many others that the location around Ash Manor, including its fields and historic buildings are part of the character of Ash Green. This will be lost if the area boundary is moved to include us in the tongham ATUA with its plans for 17

I fully agree with the amendment which states that thought instead should be given to protecting the intrinsic character of Ash Green, preserving the role it plays in maintaining the separate identity of Ash, Ash Green, and Tongham. In particular I feel that the provision of a green buffer separating the new development and the properties fronting onto Ash Green rd, Foreman rd, and White Lane will do much to preserve the rural character of Ash Green.

There is concern also that not enough thought has been given to the protection of the Ash Manor site itself which is of considerable heritage importance. In particular views of it from the approaches from White Lane must be preserved.

Further concerns over how the transport infrastructure needed for these new developments is to be implemented should be addressed, namely The Street in Tongham, and the A331/A323 intersection, and also the A31/White lane junction. Until these are resolved there should be no development on A29 permitted.

My view then in regard to these concerns is that Ash Green must not be included in the Ash & Tongham Urban Area, and therefore that the ATAU boundary must not extend south of Ash Green road and Foreman road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

The traffic measurement figures for the Ash and Tongham proposals do not reflect the day to day traffic levels for the roads during the morning and evening peak, in light of recent changes by Rushmoor borough Council to traffic signals in Aldershot.
The Addendum to Guildford Borough Proposed Submission Local Plan “June 2016” Strategic Highway Assessment Report, states that conclusions of the SHAR 2016 is that:

“The results show that for Scenario 5, which represents the quantum and distribution of development proposed in the Proposed Submission Local Plan together with the key highway schemes, there will not be a severe impact on the local and strategic highway network” (p.62), and that,

“Nevertheless, the results of this assessment indicate that should the RIS schemes not be forthcoming then the residual cumulative impact of the Proposed Submission Local Plan on the highway network could be considered severe”

Certainly for the proposed developments in and around ash, in particular the Ash Lodge Drive development will have a significant impact on already saturated road network.

Recent changes to traffic signal timings and synchronisation in Rushmoor borough at the junction of North Lane and Ash Road has had a serious impact of traffic movements and journey times to the east of the borough boundary with traffic during morning and evening peak periods impacting Ash Street, the A331 and all of the local road network around Tongham, Ash and the A31/A331 junctions.

Traffic figures provided in the consultation documents are woefully inadequate and one has to question their validity, how they have been derived and the period during which they were obtained. on the 27th June, for less that 24 hours, a series of traffic monitoring cameras were deployed in and around Tongham, the A31 and the Manor Road / Ash Street junction (Greyhound Roundabout). The purpose of the cameras was not clear (Turning movements, origin / destination journey information, traffic counts etc.) however, what benefit could be derived from any data which is gathered in a period of less than 24 hours. Also, many of the senior pupils at Ash Manor school would not have been at school as this is during the exam period. any results from these video surveys will be worthless and of no value.

It is the case every day that the schools are open that traffic along Ash Street, Manor Road, Shawfield Road and Aldershot Road are brought to a complete standstill due to the volume of traffic. This is primarily due in the morning to parents taking children to school, as parking facilities at the local schools are non-existent. Additional homes in this area will only increase this burden on the local roads even with the developers contribution as the required infrastructure and services need to be overhauled, root and branch and minimal developer contribution will not address the real needs; they are merely a gesture.

Policy A29: Land to the south and east of Ash and Tongham Capacity of the site has been increased from 1,200 to 1,750 homes. No major impact on traffic impacts from those reported in the SHAR 2016.

The overall scale of growth in this strategic location for development has remained consistent but the capacity of the allocation for this site policy has been increased from 1,200 to 1,750 homes. The site policy now includes the various planning permissions in this area that have not yet commenced. There are no implications for the SHAR 2016 of this change.

With regards the additional 550 homes in this policy A29, how is the impact on the highways being mitigated? Detail is lacking and to what improvements are being proposed and how the benefits of any improvements have been forecast and measured.

How is it that land has cannot be removed from the Green Belt in other areas of the borough to meet housing needs. Why are locations such Clandon, Ripley, Bramley and Shackleford not sites designated for development. They have much better access to the Strategic Road Network. Is it because GBC wish to move the developments as far as possible away
from the showcase of their prized town centre and hope that the residents of those new developments will work and shop across the border in Hampshire? It strikes me that the Borough Council is Cherry Picking those areas which shall and shall not be removed from Green Belt protection based upon the class of the residents, their likelihood of complaining and the desire for the borough to remain a certain political hue.

Policy P3: Countryside

4.3.29 Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough’s second largest urban area. Given its relative sustainability, countryside to the south and east of the urban area is allocated as a strategic location for development.

How has the sustainability of such large developments been calculated? The area is barely sustainable at the moment. What mitigations are proposed to improve an already poor level of sustainability and deliver improvements not only for the existing population of the area but for those who seek to move in to the new development.

What liaison has GBC had with Rushmoor BC to ensure that the overall developments of the two authorities do not destroy the environment and irreparably ruin an already difficult way of life for countless residents?

Local Plan, Page 212, Item 6. Why have the residents of Ash Green Road now been lumped in with Ash and Tongham. This seems ridiculous and only serves not only to upset and annoy the local residents, but also to put the borough planners in a poor light (not that it is looking to good so far).

The proposal for the bridges at Ash Level Crossing has been badly thought through. It is as if the BC is trying to make journeys through the area as difficult as possible to ensure travelers avoid the area. This is not always the case and people will have to live with this poor decision forever.

Local Plan, Page 330, What about Ash Walsh Schools. They are closer to the Ash Lodge Drive development and places here are in greater demand than Ash Grange. This needs a serious rethink.

Local Plan, Page 333. If Ash Manor school is to be expanded, serious improvements need to be made to the road infrastructure throughout Tongham, Ash and Ash Green. The values quoted in the report for developer contribution will, in no way, be enough to accommodate the expansion at these schools.

LRN21 New Road bridge and crossing at Ash
The change from Developer Contributions to Developer Funded for consistency through the IDP is noted.
While no justification has been provided as to the need for a new bridge crossing, should GBC pursue this aspiration, it is evident that the additional pressure on this crossing is likely to come about as a result of increased movements on the North Downs Line, and strategic road / junction closures and as such the identified mitigation is not solely development related. Therefore, in our opinion for consistency with other strategically driven infrastructure schemes included in the IDP, the wording should be amended to allow for some funding to come via the Local Growth Fund.
LRN21
New Road bridge and crossing at Ash

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

In 1932 we were described as Ash Green in Estate Agents particulars, Frimley Health NHS , list us as Ash Green, Land Registry, Durham, the official Property Register state we are Ash Green,

1996 Guildford Borough Council, Director of Environment address us as Ash Green.

The Pension Service, Dept for work & Pensions address us as Ash Green. The Co-operative Energy, address us as Ash Green.

HM Customs & Excise, address us as Ash Green.

1999 Guildford Borough Council, address us as Ash Green.
1995 Browns Estate Agents address us as Ash. Green The Post Office address us as Ash Green.
The Inland Revenue address us as Ash Green Sky address us as Ash Green.
South East Water address us as Ash Green.
DVLA address us as Ash Green.

I somehow think and believe that we live in Ash Green !! NOT Ash !

And yet I see in later correspondence 2007 and 2015 that Guildford Borough Council start addressing us as Ash. This seems to be a calculated preparation to influence the change in boundaries at this present time, definitely premeditated.

An unauthorised sign ASH GREEN has been erected on the approaches to the bridge on White Lane, just to confuse matters ! I wonder who put up this unauthorised sign ??!

Tongham, Ash, and Ash Green are historic villages, but Ash Green is rural not urban.

It is imperative that these villages have green space between them and not for them to be lost in an urban sprawl.

Ash Manor and its associated buildings are grade ll listed ( an application has been made to Historic England for an upgrade in listing) It is officially listed as a " Palace" and. Fortified Manor House with "Earthworks", owned by a Saxon Lord And several Kings of England, from Edward the Confessor and it was Edward ll who lived in the Manor House and was responsible for digging the Moat, with Drawbridge, followed by Edward III, Richard II, Henry IV, Henry V, Henry VI, later Henry VIII and Edward VI . It's approaches and setting are significant and MUST be protected. This is our Heritage !

and the field north of Ash Green Road, not only has two Roman roads meeting , but it is the site of the original Ash Green from whence the village got its name. This field is ASH GREEN !

The roads in the immediate area are narrow country lanes with no footpaths, and cannot sustain increase of motor transport. The area is rural and cannot in anyway support an urban settlement.

I respectfully ask that the boundaries stay as they are and not to be played with just to suit requirements. It's impractical and immoral !

Attached documents:

Comment ID: pslp173/625  Respondent: 17462113 / Ian Whitby  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Ash Green

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

- “4.3.29 Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough’s second largest urban area. Given its relative sustainability, countryside to the south and east of the urban area is allocated as a strategic location for development”

I object to several implications of this statement:

- The Local Plan lists Ash, Ash Vale and Tongham separately but then proceeds to speak of the “Ash and Tongham urban area” as if Ash Green were part of this. Ash Green is distinctly separate and has an entirely different, rural character from the “Ash and Tongham urban area”.

- The boundary of Ash Green has been redrawn by the local Plan to suit the planners ambitions. Ash Green includes Ash Grange, Drovers Way and Ash Green Road. Although it may be convenient for an ambitious planner to suggest that these areas are within the “Ash and Tongham urban area” they are not and never have been. The Deeds of my house very clearly state that it lies within Ash Green. There is a clear separation of these 2 areas and the buffer zone between them should be maintained to retain the rural character of Ash Green, Ash Manor, Ash Green Road and Drovers Way. It is not acceptable to join these areas and lose the area’s rural character.

- There are very few amenities or services in the “Ash and Tongham urban area”. Ash has one secondary school and a number of heavily subscribed primary schools. There are 3 shops in Ash, a petrol station and 1 pub. Tongham has a similar number. To suggest that “Given its relative sustainability…” is fanciful. The “Ash and Tongham urban area” is not well served with services and amenities and adding additional houses before first providing such services would create a sprawling urban area with no community heart or social centre.

- “4.3.30 We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identify of Ash and Tongham.”

Ash Green is not mentioned in this statement. Ash Green already has a separate identity very different from Ash or Tongham. Ash is characterised by its housing estates (either council or private) and its acres of identical houses. Ash Green is characterised by Ash Grange, Ash Manor and individual houses dating from the 1900s with unique Edwardian or Victorian features.

The Borough’s responsibility is to maintain the uniqueness that already exists. A green buffer zone maintained between Ash and Ash Green is essential to ensure this.

- “4.3.30 We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identify of Ash and Tongham.”

See point above - namely, that the Borough’s responsibility is to maintain the uniqueness that already exists. A green buffer zone maintained between Ash and Ash Green is essential to ensure this.

<td>I’m writing to strongly object to the proposal to remove Chilworth from the ‘green Belt’. The whole point of the green belt was to prevent ‘urban sprawl’ and once removed the village would have no protection against development. The traffic problems getting in and out of the village currently are a nightmare so adding even more houses would render it virtually impassable at certain times of the day. People move to the Surrey villages because they want to live in and enjoy the countryside and they pay a premium to do so., it’s very short sighted to think that by allowing development on the green belt and concreting over the countryside that people come here in large numbers to enjoy will somehow enhance the area, shame on you for even considering it. **Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Chilworth

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I feel passionately that Chilworth should remain in the Greenbelt, my main concern being once this status has been changed there is no protection against development. With each new home built, there would be 2 plus extra cars travelling along the A248, causing even further congestion through Chilworth, with cars turning towards Shalford at Rice’s corner. At present the traffic from two schools (that causes grid lock between 7.45 and 9am), plus the new housing that has already taken place in Chilworth in recent years, would be greatly added to. There is also the planning for 1,800 homes at Dunsfold Park, creating even more traffic for our villages. At present both New Road and Dorking Road Chilworth have major parking problems, with cars parking up on pavements, caused by both schools, The Percy Arms Public house (whose car park cannot cope) and the parking restrictions at the Station. Travelling through Chilworth is like negotiating a chicane, apart from the danger to pedestrians crossing roads, it also causes gridlock at certain times of the day. By increased housing and more vehicles these problems can only worsen. The Drs surgery in Wonersh, where the majority of residents of Chilworth are registered would also be put under extra strain, as would both schools.

You have to live in Chilworth to fully know the extent of the problem and for this reason are deeply disagree in taking Chilworth out of the Greenbelt.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I very strongly object to our beautiful villages being removed from the protection of the Green Belt.

Any development within them will cause major disruption to our heavily congested roads, already restricted by parking on pavements, verges, as well as narrowing the high way.

Our schools, hospitals and infrastructure cannot support this. We need to fight for any green space and countryside for relaxation and health to combat our working lives for the health of our children.

There must be other suitable sites for development where the traffic is not an issue. Guildford and its villages have a large number of schools and stations creating huge rush hour problems, especially for those trying to access Royal Surrey Hospital and other major routes.

Hope all the above are taken into consideration.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The Tillingbourne Valley with its string of villages is a geographical gem in its own right. It is located within the Surrey Hills AONB and within an AGLV. The scenic quality of this sensitive rural landscape and the need for it to be protected has been recognised since 1958. This is reinforced by the fact that the whole of the Surrey Hills AONB falls within the Metropolitan Green Belt. This has the strategic role of checking development sprawl, safeguarding the countryside from encroachment, and providing areas where outdoor recreational activities can take place and wildlife habitats be maintained. The views from the valley at Chilworth are spectacular, with the Chantries and St. Martha’s hill to the North, and the wooded high ground of Albury Heath and Blackheath to the South.

Chilworth is an ancient settlement with a fascinating history centred around the delightful Tillingbourne, which was the source for water-powered mills from Abinger Hammer to Shalford. These produced gunpowder, paper and wire over many centuries. The Surrey Hills AONB Board has received HLF funding to study the Tillingbourne Valley which has a largely forgotten but Nationally significant landscape heritage. The village communities in the valley are researching and recording an amazing history which will enhance the attraction of the Surrey Hills AONB to a wider public.

It is therefore vital that the heritage villages in the Tillingbourne Valley continue as discrete entities which are not allowed to coalesce through linear development. It is essential that all the villages including Chilworth remain within the Green Belt so that inappropriate development is prevented and the openness of the countryside is protected with its views to and from the AONB. Hence the Parish Council are very strongly opposed to taking the village of Chilworth out of the Green Belt.

Another major concern is the possible use of land at Old Manor Farm (Site reference 2286) for 20 new dwellings. This is Green Belt land in an AGLV, adjacent to a Conservation Area and outside the Settlement Boundary. The access to this site by a very narrow, single track, un-made up, un-adopted lane, totally unsuited for additional traffic. There are no
other access routes to the site. This would be an entirely inappropriate development. The land should remain open and within Chilworth’s Green Belt.

**Comment ID:** PSLPA16/1696  **Respondent:** 11182081 / Robert Jones  **Agent:** Kiely Planning Limited (Colin Kiely)

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Chilworth

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Proposed Submission Local Plan Strategy and Sites June 2016**

We are instructed by Mr R Jones to submit the enclosed response to the Proposed Submission Local Plan. This representation relates specifically to the proposed settlement boundary to Chilworth with particular reference to the boundary in the vicinity of Tangley Mere (see plan extract below). We believe that the land outlined on the enclosed plan and shown below in the context of the settlement should be included within the defined boundary and thus removed from the Green Belt.

[IMAGE 1]

Tangley Mere is a large detached house situated in extensive grounds located on the south side of New Road. As can be seen from the enclosed Ordnance Survey there is a notable gap in development along the south of the Road. We consider this ‘open frontage’ to New Road should be included within the settlement boundary of Chilworth, thus enabling its future development.

In terms of the principle of additional development within Chilworth, as confirmed by the Settlement Profiles Study July 2013:

“Chilworth has a number of key community services and facilities which makes it one of the more sustainable villages. Subject to suitable sites being available, there is scope for a rural exception site to provide affordable homes for local people and potential for an extension to the village.”

(see Page 18)

Advice regarding the definition of Green Belt boundaries is set out at Paragraph 85 of the NPPF that states:

When defining boundaries, local planning authorities should:

- ensure consistency with the Local Plan strategy for meeting identified requirements for sustainable development;
- not include land which it is unnecessary to keep permanently open;
- where necessary, identify in their plans areas of ‘safeguarded land’ between the urban area and the Green Belt, in order to meet longer-term development needs stretching well beyond the plan period;
- make clear that the safeguarded land is not allocated for development at the present time. Planning permission for the permanent development of safeguarded land should only be granted following a Local Plan review which proposes the development;
- satisfy themselves that Green Belt boundaries will not need to be altered at the end of the development plan period; and
- define boundaries clearly, using physical features that are readily recognisable and likely to be permanent.

In relation to the above, the Local Planning Authority has confirmed that the settlement of Chilworth is sustainable and can accommodate additional housing in a manner consistent with the NPPF. In addition we see no reason why the land,
the subject of this representation, is necessary to keep permanently open. Finally, the proposed alteration of the Green Belt boundary sought would retain a clear, defensible boundary. As can be seen from the OS plan, the site is bounded by a large pond to the east which would provide a clear defensible boundary.

- With respect of whether it is necessary to keep the land ‘open’ we consider the impact of development on the five purposes of the Green Belt below and conclude:
  - It would maintain the separation of between to Blackheath (to the south) and Albury (to the east)
  - It would not conflict with the need to safeguard the countryside from encroachment. In this regard the land beyond the site would continue to form part of the Green Belt where future development (in a manner that conflicts with the purposes of the Green Belt) would be prevented.
  - Would not harm the setting of Chilworth.

Finally, it is accepted that the development of the site is constrained by mature trees and vegetation, however we consider this will assist in ensuring that any future development is of a low density maintaining a sylvan setting thus ensuring no harm arises to the character and appearance of the site or surrounding area. Furthermore, the Council have policies in place to ensure that any future development is satisfactory in relation other matters of planning importance including impact on the landscape. These considerations would need to be considered in relation to any future planning application.

We trust you will take the above comments into consideration and should you require any further information please do not hesitate to contact us.

I object to the proposal to inset Chilworth Village from the Green Belt. As it is located in the North Downs, surrounded by the Surrey Hills AONB, and includes the heritage site of Chilworth Gunpowder Mills, Chilworth needs to stay in the Green Belt to protect it from inappropriate development and urban sprawl. There is no justification for insetting it.

The Local Plan refers to only removing areas from the Green Belt for ‘exceptional circumstances’ and I can’t see any justification in the case of Chilworth, as future development would impact on the overlooking Surrey Hills AONB.

I have viewed the new proposals under the GBC local plan 2016 and I am writing to object to the removal of Chilworth Village from the Green Belt.

Although I appreciate the council is under pressure to find new land to accommodate further housing I believe there is plenty of brown field sites still available to develop.

The loss of green belt status will make a materialistic difference to the Village of Chilworth which has successfully accommodated new developments at Haywards Corner and Titan Sheds.

I'm am particularly concerned about the potential to develop the fields at the end of Manor Lane. This site lacks adequate access and all previous plans have tried to accommodate an unacceptable high level of housing which will impact negatively on this local beauty spot not least the historic Meadows Cottage.

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

I feel very strongly Chilworth should remain in the green belt. This status being lost would increase development in the village. During school drop off/pick up time the village is flooded with traffic, cars parked excessively along the roads and Tillingbourne school area is especially bad. Any future building development would hamper this even more with most houses having at least two vehicles as public transport in these rural parts is poor.

In addition to this, the main exit from Chilworth at Rices corner is grid locked morning and evening, many accidents have also happened here over the last few years.

I feel very strongly Chilworth should remain in the green belt.

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )
I have seen the new proposals, under the GBC local plan, 2016, and write to object to the removal of the village of Chilworth from the Green Belt. We have already had 2 new developments, in this area and further development between the Tillingbourne River, and the railway in the field beyond Manor Lane, would be very unsuitable. This is a historic, and rural valley, which would be permanently spoilt by high level housing.

The extra traffic generated would add to the growing danger to pedestrians, especially children & the elderly in Blacksmith Lane, a narrow lane with no pavements.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Chilworth
I would like to object to the proposal in the Guildford Local Plan 2016 to remove Green Belt protection from Chilworth:

1) Chilworth has already had many new houses built in recent years. Further expansion risks destroying the rural nature of the village, which Green belt protection helps to maintain.

2) Expansion at the edges of the village will gradually remove the buffer between Chilworth and the neighbouring villages of Shalford and Albury, resulting in an eventual conurbation with Guildford.

3) The existing traffic levels along New Road are excessive, resulting in high levels of air and noise pollution to those houses along the road. Further development will exacerbate this to unacceptable levels.

I believe that only by retaining Green Belt protection for Chilworth and its surrounding villages can these problems be controlled.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<tr>
<td>Dear Sirs</td>
</tr>
<tr>
<td>I would like to raise an objection to the removal of Chilworth from Greenbelt status so enabling future development of housing in the village to go ahead unrestricted.</td>
</tr>
<tr>
<td>I strongly object to this on the following grounds;</td>
</tr>
<tr>
<td>Chilworth already suffers from severe traffic flow especially at peak travel times (early morning/early evening) so any additional housing built on green field sites in Chilworth would make this situation far worse.</td>
</tr>
<tr>
<td>The main road running through the village is often extremely congested as it is the main route to connect to the A25 from all of the local villages in the area (e.g. Shalford, Bramley, Chilworth &amp; Wonersh).</td>
</tr>
<tr>
<td>There is inadequate road infrastructure to accommodate further housing as it stands.</td>
</tr>
<tr>
<td>There is also a distinct lack of parking on New Road &amp; this is already exacerbated when the Tillingbourne School is in term time &amp; parents are collecting &amp; dropping off their children for school.</td>
</tr>
<tr>
<td>There is already heavy demand on the local schools for child places which would only get worse if additional houses were built in the village. Local children are not automatically accepted at the two Chilworth schools due to overdemand on places.</td>
</tr>
<tr>
<td>The proposed sites earmarked for losing Greenbelt status would mean that fields would be lost to the village &amp; this would have a detrimental effect on the feel of the village &amp; the wildlife these areas support as well as removing playing fields which the local community can currently use.</td>
</tr>
<tr>
<td>Additional housing will also place an extra stress on the already overstretched local doctors’ surgery at Wonersh which currently supports the residents of Chilworth as well as other local villages such as Wonersh, Shalford &amp; Bramley.</td>
</tr>
</tbody>
</table>
In the past several years there have already been extra houses built in Chilworth where the local garage on New Road was removed & built upon & a residential care home was closed in favour of a modern flat complex being developed.

All of this proposed development would have a negative feel on the village & would remove part of the rural character of the village. Chilworth is a historic village & part of the Surrey Hills & should be preserved as such for future generations to enjoy.

In summary, I object to Chilworth being removed from Greenbelt status & wish to file my objection.

We have lived in Chilworth for nearly forty-seven years, during that time we have seen the village expand with more houses being built we really don’t want any more. The traffic gets really bad through the village, it would be even worse if more houses were built, let’s keep Chilworth as it is, a country village.

I do not believe that Chilworth should lose it’s GreenBelt status.

Currently Chilworth is gridlocked twice a day during school term time due to the amount of traffic that reduces movement to single line traffic. Furthermore the Blacksmith Lane road through to Guildford is also inundated with traffic as parents use this road to take their children to schools in Guildford. Chilworth also has an enormous amount of through traffic from the A248. If there is to be large scale building of houses on either side of the village this will only magnify the problem even more. The infrastructure cannot absorb any more traffic, or an increase of population, without completely destroying the village.

The Green Belt must be preserved and not destroyed by unsightly new building projects. The current infrastructure cannot cope with any more expansion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am writing to register my objection in the strongest possible terms to the plan to remove Chilworth and Shalford from the green belt.

I have just in the last few days become aware of a deadline – which I understand is midnight tonight, please correct me if I’m wrong - to respond to this plan and so have had little time to understand this aspect of the plan and research and organise appropriately. I do no recollect receiving any correspondence from GBC to inform me of this deadline. Neighbours have also made similar comments about correspondence.

I have lived in Chilworth for 18 years. I moved here because of the particular nature of the area: it has a particular semi-rural feeling and a strong community spirit. Any building of mass-produced housing would completely change the nature of the area.

Chilworth for example has two well-regarded schools which have no scope for increased intake. The inevitable result of which would be a reduction in their hard-earned and deserved reputations.

This is in a community that has a trunk-route – the A248 – running through it that is obviously used as the main road link from the Blackwater valley dual-carriageway to the A25.

However the road network itself is completely inadequate for the population that is already here and for the traffic that already passes through it. During peak traffic periods there is considerable congestion and very lengthy delays along the A248 and the B2128 which feeds in turn to the congestion along the A281 into Guildford. Travelling at peak times to work is very difficult and must contribute significantly for example to decreased working productivity and to CO2 and toxic nitrogen-compound emissions in the area. Both schools are on the A284.

In addition the quality of the roads themselves are disgracefully inadequate due to years of neglect.

The idea of adding to these substantial existing problems with further population increase is unthinkable.

Finally for now this plan is strongly opposed by the overwhelming majority of residents in Chilworth and Shalford and in a democratic and representative society we have a right to expect elected representatives to support our views – I assume therefore GBC will do so. Perhaps this is why there was no need to inform residents of the referenced deadline.

Attached documents:
Myself and my family have just recently moved to Chilworth and what brought us here was the amazing greenery and wildlife, buy taking away the green belt we will lose this (especially where we live!) By building houses (in an already busy village) the impact of what would be increased traffic down New Road, Dorking Road, Christmas Hill and Shalford will be such that it will be almost impossible to drive to Guildford, Cranleigh or Godalming during what already is an extremely busy rush hour! The safety of our children down these roads I think will also be compromised because of this increased traffic.

I wish to register my objection to the removal of the green belt from the villages of Chilworth and Shalford. Having lived in Chilworth for over 10 years and presently in Guildford town centre, I feel the green areas we are so lucky to have in this area should be protected.

I do understand the need for housing as I am in that bracket of needing a house in the area that I have grown up, but I feel this should be considered development. Preferably making use of areas which have had a building of some sort or disused site etc. Once green belt areas are developed there is no going back.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to object to the plans to the insetting of Chilworth and the removal of Green Belt status on grounds of
1. Loss of countryside in the beautiful Tillingbourne valley.

2. Intolerable increase in levels of traffic through small communities.

3. Loss of individual character of Surrey villages

I have been a resident in Chilworth for twenty years, having been attracted here by the specific character of the village, namely a single string of houses lining New Road (A248). This enables wonderful access to walking on many footpaths in the lovely unspoilt countryside along both sides of the Tillingbourne valley, including the Down's link, of which many locals and visitors to the area take full advantage.

The unique character of the village has recently been more widely appreciated with the essential clearing work of the heritage site at the old Gunpowder factory works, around which the village originally sprung up. Much money, time and effort has gone into the reclamation from thick undergrowth of the old works and a newly installed information trail is designed to encourage more visitors to come and enjoy the historical significance of our village, once famous throughout Europe. It really is a picturesque setting alongside the Tillingbourne river, with views to St Martha's hill and church having been opened up. A launch event is scheduled for September.

However, since moving here, I have witnessed a steady increase in the amount of traffic on New Road, which peaks at school dropping off and picking up times due to Chilworth infant school and the Tillingbourne middle school situated at either end of the village, both of which are popular schools locally. This causes long queues through the village. There really is no other way for the traffic to go, apart from along New Road. Due to a programme of infilling over recent years, with the development around Chilworth station and St Thomas's Close among others, the increase in traffic has been inevitable such that new residents complain that Chilworth, once a quiet little village, now has a real traffic problem.

Encouraging more visitors to the old Gunpowder works, though welcomed by the locals many of whom have been involved as volunteers in clearing the area, will further add to this traffic congestion.

The loss of Green Belt protection in the area surrounding Chilworth would be devastating, leading to the possibility of Chilworth being subsumed into Blackheath, Albury, Shalford or Wonersh and an intolerable increase in traffic through these small communities. Each of these villages has it's own specific identity and charm, the loss of which would be seriously detrimental to the overall beauty and attractiveness of the Surrey Hills.

I urge the planners and Guildford Borough Council to reject this plan.

The maps have different ratios, which can be rather misleading in terms of comparing one with another.

The map for Compton suggests that the dotted pink line is the boundary line for the village when in fact this is just the village settlement area. The wider village includes Priorsfield Road and The Avenue and Down Lane and parts of New Pond Road and the Hog's Back and Blackwell Farm, all of which are missing. Common land should ideally be marked up. Blackwell Farm is currently shown on a map called 'Guildford Urban' which of course does not exist and hence this could be misleading.

2. I **object** to the Settlement Boundary which has been imposed on East Clandon without any consultation. This imposition provides no protection to further development outside of the settlement boundary (Policy P2 para 4.3.25) and is deemed by me as being unnecessary in an already tightly developed ancient and rural conservation village with high archaeological merit. I demand that this proposal be removed as it will endanger the openness of the Green Belt, the views in and out of the AONB (protection of the AONB Policy P1) and the character of our village.

</thead>
</table>

**Erosion of Green Belt**

The extensive and systematic erosion of Green Belt is unlawful and unacceptable: the insetting of the Horsleys in Green Belt to allow development of some 500 homes, and the land grab for Gosden Hill Farm are examples of this. The NPPF states that Green Belt can only be used in exceptional circumstances. “Unmet housing need is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development on a site within the Green Belt”.

(National Planning Policy Guidance 06 03 2014) and also by the Inspectorate for Planning. This housing demand estimate of 652 homes p.a cannot justify GBC landgrabbing tracts of agricultural and Green Belt land (as with Gosden Hill Farm, Effingham & Send). Our Green Belt is designed to protect Guildford from urban sprawl and makes our area such a delight to live in, and such a delight for visitors and our wider tourism industry. It is recognised that in some areas, small and limited incursions /development in Green Belt may be needed. This can only be justified once all other brown field and non-Green Belt sites have been used.

**Proposed Settlement Boundary for East Clandon**

The proposed (but not recommended by the Local Plan) new Settlement Boundary for East Clandon: I object to the proposed Settlement Boundary for our village. This would potentially allow infill development in an already very compact and beautiful village, and one that is a conservation village of historic note, dates back to the Domesday Book and beyond, and is a leisure and tourist attraction along the Surrey Hills AONB.

You should also note that East Clandon lies entirely in Green Belt, parts are in AGLV and AONB and will be included fully in the AONB once the AONB boundaries have been processed by Natural England (NE). The NE propose to extend the AONB to include East Clandon conservation village along with both National Trust properties - Hatchlands and Clandon Park. Further, as you have noted, East Clandon is low on your sustainable village ranking, having no shops or local services. Because of its
compactness, it is therefore not suitable for further development as a rural local centre.

Finally, the proposed settlement boundary for East Clandon offers 'no material benefit to the village', and as a resident of the village I am against such a move. I hope that these and other views from residents in the borough are properly considered and the DLP is amended to take them into account. There seemed to be little appetite to listen to the comments of residents at the televised council meeting earlier this year. The attitude of the GBC needs to become more flexible regarding consultation.

Objections to the Guildford 2016 Local Plan

I have lived in East Clandon for over 10 years and am appalled by the proposed Local Plan.

I object to the 2016 Draft Local Plan as a whole and in particular I object to the specific issues (listed below). I believe that this deeply flawed Local Plan will have a direct and detrimental effect on the lives of my family and other residents of East Clandon and an even greater detrimental impact on our neighbouring villages of West Clandon, Ripley, West and East Horsley. It erodes the openness of the Green Belt and endangers the beauty and views in and out of the Surrey Hills AONB.

I object to the Settlement Boundary which has been imposed on East Clandon without any consultation. This imposition provides no protection to further development outside of the settlement boundary (Policy P2 para 4.3.25) and is deemed by me as being unnecessary in an already tightly developed ancient and rural conservation village with high archaeological merit. I demand that this proposal be removed as it will endanger the openness of the Green Belt, the views in and out of the AONB (protection of the AONB Policy P1) and the character of our village.

Availability

This submission confirms the availability of the land. The landowners, the Trustees of The Clandon Estate, for the Earl of Onslow, and the existing golf course operator are in agreement that the land is available and would be developed as proposed, should the site be identified in the Local Plan process.

There are no other owners or occupiers of the land. Both parties are committed to delivering the site and substantially commencing development within the first five year period of the DLP.

Lord Onslow and the Trustees also propose a continuing, long term involvement in the management of Onslow Park. It is proposed that all common parts, including community spaces and a substantial part of the housing stock proposed, would be retained by the Estate and managed for future generations. The aim in large part, is to help create a sense of place and belonging for the community with a commitment to the long term management and quality of the environment, infrastructure and facilities.

Construction

It is proposed that the development would commence within the first 5 year period of the Local Plan and would be likely to contribute up to 200 homes each year over a 5 year period. It should be noted that this corresponds to the period of least supply within the Local Plan trajectory, which is below OAN for the first noted that this corresponds to the period of least supply within the Local Plan trajectory, which is below OAN5 years of the Plan from the date of likely adoption.

As many of the homes will be either affordable homes or private rented stock, the development can proceed at a faster rate than may often be considered if constructed through more traditional methods which are dependent on the rate of market sale.

It is also proposed to adopt a contractor led approach to the delivery of such housing, using modern methods of site fabrication which facilitates a quicker delivery on site.

The provision of a proportion of serviced self-build plots offers a further delivery route for part of the supply.

Sustainable Design and Construction

The ability to use off site construction techniques also means that the sustainability of the design and performance of the homes and buildings provided will meet the highest specification and result in sustainable, low carbon living that reduces energy and resource demands, delivers low fuel bills and running costs for residents and a low carbon footprint, tackling the effects of climate change.

Infrastructure

The site is not dependent on significant up front infrastructure requirements that would prevent or slow housing delivery.

A suitable vehicular access exists from the existing park and ride and golf course junction onto the A25 Epsom Road and this would be utilized as the principal site access. A secondary access and egress is proposed to supplement this also onto the A25. This submission is supported by a Transport Feasibility Study 2016 that sets out the proposed accessibility and transport implications of the development proposed, in conjunction with the development options identified in the Submission Local Plan and Infrastructure Delivery Plan.

While some localized off-site improvements are required as a result of existing projected growth on the highway network, these are already identified in the IDP as part of the Local Plan proposals and would be supported, where necessary by additional contributions from the development of Onslow Park under both CIL and s106 obligations.

The site is well located as an extension of the existing urban area to access a full range of goods and services and benefits from easy walking, cycling and bus services. Aside from minor, localized improvements to facilitate enhanced connections between the site and the surrounding footpath and cycle network, there are not wider requirements that would add to the commitments in the Local Plan.
The expansion of the park and ride within the site to double its capacity significantly enhances the ability of the site to remove existing car journeys entering Guildford from the A25 to the east and offsets a significant proportion of vehicle movements.

The provision of additional and enhanced community facilities as part of the garden village proposals increases the level and quality of services available to the existing community within Guildford in an accessible and inclusive manner. This includes the sports hub, the primary and secondary schools, community facilities and community parkland, all within easy reach of the existing urban area, and extending to the Downs beyond.

4.0 JUSTIFICATION

In general the overall approach identified within the Local Plan is supported, that in order to meet the needs of the Borough and its residents, a range of housing, employment and other facilities are required over the period of the Plan and that these must be provided for in line with those needs in order to maintain and provide for a prosperous, vibrant and growing economy with access to high quality housing and a full range of services for all members of the community. At the same time, this must be balanced with the maintenance and enhancement of the built and natural environment of the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I wish to register my objection to your Local Plan and specifically to the Gosden Hill proposed development and its effects on the surrounding area.

I was brought up in West Clandon, attended Kindergarten there, went to school in Guildford and had my first jobs in the town. Both my brothers attended school in Ripley. My mother still lives in, and we all still regularly visit, the same house that she and my father purchased 56 years ago in 1960. It was a village without much traffic and the whole area was very green and wooded.

A huge increase in traffic is one of the obvious changes in that time and the Gosden Hill Development would increase the already huge numbers of cars dramatically. In my own street in Sussex, there has been a threefold increase in cars in the past few years and soon to be more with teenagers learning to drive, and the same will happen on any development. The Street in West Clandon is narrow and winding and already busy as a through road. It is not suited to large amounts of traffic. The A3 is a very busy road and even 20 years ago when driving to Clandon from London there were invariably delays, often long. Just a few years ago, we were witness to an accident at Burnt Common roundabout as a car with hit by a lorry, lifting the car off the ground.

With regard to services at Gosden Hill, even now providing enough water to houses presents problems without extra housing developments. Disposal of waste water and sewerage and the provision of electricity and gas will be a strain on overburdened resources. The Grid struggles at times already to provide enough electricity.

The Green Belt, which is being destroyed, was created to provide a green lung around towns so that people could get fresh and healthy air. This is needed more and more as the population increases and more countryside disappears under housing schemes.

I understand that an industrial unit is also intended at the same site – one sees these buildings left empty for years on end and I feel that building another cannot be necessary.

If the Gosden Hill development proceeds, it will damage entire surrounding areas with the knock-on effect of more cars crammed onto already log-jammed roads, the need for but lack of healthy air and green spaces, and the destruction of land for any future agriculture.

I would, therefore, urge you to reconsider your proposals. Set out below are further objections in more detail.

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objections to specific policies and matters within the Plan.

I object to the fact that GBC have not met the requirements of the NPPF Paragraph 155 which imposes an explicit obligation to have early and meaningful consultation. This has not been met in a number of areas by GBC. We have not had a meaningful consultation on imposing a settlement boundary on East Clandon, on the absence of meaningful economic and population growth figures for Guildford showing various scenarios with high, medium and low growth scenarios being offered.

I demand that there should be a significant challenge to the GBC scenario planning and the housing and growth numbers should be revised and especially in the light of uncertainty and change which will accompany Britain’s withdrawal from the EU.

Re: Effingham Residents Association’s Regulation 19 Comments on GBC Draft Local Plan

This letter contains Effingham Residents’ Association’s comments on the draft GBC Local Plan under Regulation 19.

The Effingham Residents Association exists to safeguard and promote the interests of the residents of Effingham. All Effingham Residents are considered members of the Association. There are 1,054 households in Effingham and we have only four residents who have asked not to be members. These comments are based on our members’ views and are largely taken from two surveys of members of the Residents’ Association in August 2014 and July 2016, with the number of respondents 349 and 244 respectively. Summaries of the responses to these questionnaires are attached as annexes.

We are very supportive of a Local Plan being agreed as we appreciate that there are major disadvantages in only having a Local Plan dating from 2003. However, we have some major concerns about some of the policies in the draft Local Plan as they affect Effingham.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Protecting Policies

We support Policy P1 to protect the Green Belt, but are concerned about parts of Policy P2. In particular, our recent survey of Effingham residents showed that 64% were against the insetting of Effingham. According to the NPPF and as quoted in the draft Plan:

“villages whose open character makes an important contribution to the openness of the Green Belt should be included in the Green Belt.”

It can well be argued that Effingham’s open character contributes to the openness of the Green Belt,

particularly on the northern side, where the older part of the village has open views to the green fields to the north, which significantly contributes to the importance of Effingham’s Conservation Area as confirmed by Historic England.

We understand that insetting would allow some limited development in the village, although we would point out that Effingham has had a higher rate of development over the last ten years than the average for the borough (6.6% against the Borough average of 5%). The same result could be achieved by a limited extension of the settlement area.

If Effingham is to be inset we believe that the proposed boundaries of the inset contain a number of anomalies and technical errors, a number of which have been pointed out to us by residents and which they have commented on in their responses to you. We understand that the inset boundary has to be where there is existing development and must follow natural boundaries that are likely to be permanent. We would therefore like a detailed review of the proposed boundaries, including ours and individual residents’ comments on them.

There are certain areas in the proposed inset that we feel are inappropriate according to the guidelines and should be excluded. These are:

1. The centre of the Conservation Area as it is open to the green fields to the north, including St Lawrence Church, Brown’s and Brown’s Field.
2. The Howard of Effingham School, or at least its playing fields to the east side which form an important green gap between Effingham and Little Bookham and have been classified as on high sensitivity Green B The current
proposed inset boundary on the south side of Howard of Effingham Playing fields does not following any natural physical feature.
3. The Allotments, especially as they lack permanent natural boundaries
4. Grove House, especially as it has no physical natural boundary on its western bound
5. The small field used as recreational space for Middle Farm Place, especially as it has no permanent natural boundaries.

The following possible minor anomalies have also been pointed out to us which mainly concern the proposed inset not following permanent natural or property boundaries. This list may not be exhaustive.

1. Inset not following property boundary at 69 Strathcona Avenue
2. Inset not following property boundaries at 1 Beech Close and Orchard Well
3. Inset not following property boundaries from Yew Tree Walk to 4 Middle Farm Close (line appears to go through the middle of a building)
4. Inset not following property boundaries at Moonshine, Effingham Common Road, and all along Lower Road (Old Village Hall, and Sir Douglas Haig cut by inset boundary).
5. Inset not following property boundaries in Barnes Wallis Close
6. If Browns Lane is to be included which we dispute, the inset should run along the west side of Browns Lane and not the east side.

We are also concerned about the intention to remove the land of the former Wisley Airfield from the Green Belt (also in A35). Many Effingham residents objected to the recent planning application on many grounds, but those which they felt would badly affect Effingham were the increase in traffic congestion on local roads which are already dangerously under pressure and the inadequate access to public transport of the proposed development. The proposal for the proposed development’s residents to use Effingham and East Horsley railway stations is untenable as they are already over used. The station car parks are unable to cope with current demand and unable to be extended. The proposed bus service would not be sufficiently used to mitigate against this as has been shown on similar developments. All new large developments should have new train stations and car parking facilities where the nearest ones are at capacity.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Effingham

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the current local plan for the following reasons: I am a resident of West Horsley and work in neighbouring Bookham. My daughters attend schools in Effingham and use the school bus to get to and from school. I believe the increase in housing would place a huge burden on local schools, infrastructure and other essential local services. As it is the local schools are in huge demand as is the doctors surgery. The village roads through the village flood regular during heavy rainfall, as do other areas and it does appear to be on the increase. Our beautiful village must stay as it is and the treasured and important Greenbelt which surrounds and is part of must continue to be cherished and respected. I believe the vast majority of the local residents do not want these changes inflicted upon them.

I hope this email helps to dismiss the proposed changes once and for all.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

We have had an opportunity of reviewing the Council’s proposals in respect of the draft local plan (Strategy on Sites 2016) our main comments relate to the impact of the local plan insofar as it relates to the village of Effingham. Accordingly our comments are with reference to:

1. Policy P2: insofar as it relates to Effingham/Green Belt; and
2. The extent of the Inset boundary of Effingham proposed in the draft local plan (Page 338).

3. **Policy P2 Green Belt (page 49)**

We are concerned with the concept of “limited infilling” and having regard to the proposed designation of Effingham within the local plan as an inset village. We consider that it is important that the inset boundary truly reflects as a matter of fact on the ground, the extent of the relevant village. In our view, the inset boundary insofar as it relates to Effingham, should consider incorporating within that inset boundary all land which is on the ground, within the village and to exclude from the inset boundary any lands which are plainly currently outside the existing village boundary or indeed do not comprise “infilling” in the context of the NPPF, within the current confines of the village boundary.

We are aware of the five essential characteristics of Green Belt which are advocated by the NPPF.

1. **Effingham Inset Boundary (Appendix F), (Page 338 Proposed Submission of Local Plan)**

The attached plan illustrates the extent of the proposed new inset boundary surrounding Effingham village beyond which is to be designated Green Belt.

We would wish to object and for representations to be made, for those parcels of land which are numbered 1-6 on the attached plan (and coloured yellow) to be excluded from the Inset Area of the village for the following reasons:

- **Parcel 1** (Extension of part of Howard of Effingham School)

This land is plainly not within the village and also, still contributes to the fundamental aim of the purposes of the Green Belt (as advocated by the NPPF) in that:

- it prevents urban sprawl and coalescence of Effingham towards Bookham;
- it checks the unrestricted sprawl of the village beyond its natural boundaries;
- it safeguards the countryside (it being opposite to open green space (Effingham Lodge Farm) and adjacent to a continuation of green space with the adjoining land within Mole Valley’s boundary).

If ever it is considered that this land was suitable for redevelopment for the benefit of the school or otherwise, then there is no reason why an application could be considered for development in Green Belt but having the need to prove exceptional circumstances (page 83, NPPF) justifying the development of Green Belt land. There is certainly no prima facie justification for this land’s inclusion within the inset boundary/village boundary of Effingham. Furthermore, it is not advocated in the LAA as land contributing towards the Council’s housing supply. Accordingly it should be removed from being within the Inset Boundary.

- **Parcel 2** (Open Space amenity land at the rear of Middle Farm Place)

This was transferred to the Council for open space purposes by the developer of Middle Farm Place back in 1991 by way of a Section 106 planning gain. This parcel also includes the three adjacent dwellings adjoining Oreston Lane.

This land should be excluded as whilst it is a village amenity, it is open space and also checks the unrestricted sprawl of the western boundary of the village westwards where there exists a clear current delineation of the village boundary. It is also advocated to be removed from the inset boundary in order to preserve the setting and character of the village and safeguard the countryside. The maintenance of the village delineation on its western boundary should be retained in its current position to avoid a “creep” into Home Farm and the reduction of this open farm land and visually and historically important aspect to the village, particularly when seen on entering the village from Horsley on the A246. This boundary/delineation alone sets the scene for the village in its current environment.

- **Parcel 3** (Agricultural land/buildings at Home Farm) and **Parcel 5** (Existing Allotment Gardens)

The comments relating to the Middle Farm Place amenity area (Parcel 2) are equally applicable in respect of Parcels 3 and 5 in terms of ensuring a check on the unrestricted sprawl of the village from its current western boundary delineation. It is not a coincidence that Parcels 2, 3 and 5 are owned by the local authority although their justification to be included within the Inset boundary is completely unwarranted and does not reflect the extent of the village ‘on the ground’. The comments relating to Parcel 2 are reiterated in relation to Parcels 3 and 5 terms of the need to safeguard the...
countryside, preserve the setting and character of the village and to check the unrestricted sprawl of the village from its current western boundary.

- **Parcel 4 (the Barn)**

For similar reasons as stated above in relation to parcels 2, 3 and 5, the inset boundary should not be extended into the countryside by permitting this land to be included within the inset boundary and therefore potentially developed.

Our concerns about the ability to develop this land (it is stated as being one of the sites referred to in the LAA as being available) are set out later in this e-mail. However, notwithstanding that it is and comprises a walled garden, it is still an important contribution towards safeguarding the countryside and the sprawl of the western boundary of the village into the existing countryside. Accordingly, we strongly object to its inclusion within the inset boundary.

- **Parcel 6 (Brown’s Land Field)**

This land has been the subject of recent publicity as being included within the recent Howard of Effingham planning application for housing. It was robustly refused by the local planning authority for development. We are at a loss to explain as to why it has been included as “safeguarded land” within the inset boundary on the premise that it is, in accordance with the local plan policy, being safeguarded “to meet the development needs beyond the plan period”. It is our view that for the purposes of this plan, this land should be removed from within the inset boundary. If, following the expiry of the plan period, a new local plan is introduced and it is considered meritorious at that time that this land be included (whether for housing supply reasons or otherwise) then that will be for a matter of public scrutiny and review on a democratic basis at that time. Currently, this land forms an immediate green aspect when exiting the crossroads at the A246 and the swathe of open land afforded by the KGV playing field. It also is an instrumental aspect of the use by Effingham and Leatherhead Rugby Club which is an important amenity and economic driver for the maintenance of KGV which remains a highly significant and very important aspect and amenity of Effingham village generally.

- **Land Edged Pink**

Notwithstanding the objections above referred relating to the exclusion of certain areas within the proposed inset area of Effingham village within the initial draft local plan, we are also at a loss to explain why an important aspect of the village has not been included within the inset boundary.

We strongly advocate that the land shown edged pink on the attached plan should be included within the inset boundary. First, it is an intrinsic part of the village comprising St Lawrence School, a former convent, adjacent church and the adjacent British Legion (the latter being a relatively poor quality part of the village but nevertheless part of the village). All of this land “in the ground” forms part of the village! How can the authority advocate including parcels 1-6- none of which are “on the ground” in the village but seek to continue to exclude the land coloured pink which in our view within the fabric of the village, being less than 50 yards to the two village pubs in the village (and in the inset boundary!)

The land coloured pink on the attached plan also includes a small piece of land adjacent to the St Lawrence Primary School Playing Fields, which is wedged between the school playing field and Effingham Common Road, immediately opposite the Leewood Way development. This land is shown hatched blue on the attached plan (Lyon’s Field).

Arguably, this land already comprises “limited infilling” permitted under green belt policy. This land is locally known as “Lyon’s Field” to which we draw reference later in this e-mail as to why it should be included on grounds of suitability and availability. We consider the land shown edged pink on the attached plan is and contributes far more towards the village and is an inherent part of the village than those areas which we have sought to advocate removal. We also advocate the inclusion of that part of the land shown coloured pink and hatched blue as part of the inset plan on the basis that this land can be or could be provided for housing to meet Effingham’s housing requirements in the plan period as advocated by the Emerging Effingham Neighbourhood Plan.

We strongly advocate that the inset boundary is extended to include the land shown coloured pink for the reasons above stated.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Further to the local plan submission I would fully support the Church Street, Effingham site, even though it is in greenbelt, it would seem a very sensible infill site. Regarding the other allotted sites I notice Lyons Field, Effingham Common Road has been missed off. Surely this is a site which would again give good infill and ease the burden of housing?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I note with interest regarding Effingham's local plan. I would fully support the Church Street, Effingham site, it seems a good infill site. The glaring omission would be Lyons Field, Effingham Common Road, to me presents an ideal opportunity to ease the housing problem within Effingham.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I am writing with my comments on the draft Local Plan for Guildford under Regulation 19. These mainly concern Policy P2 and Effingham where I live.

I very much support the main thrust of the plan and, in particular, support the concept of “insetting”. I believe that a limited amount of new build is desirable but that this should not be to the detriment of the Green Belt. I understand that according to the NPPF, that where boundaries are changed in the Green Belt, they should not include land which it is necessary to keep permanently open and should be defined using physical features that are readily recognisable and likely to be permanent.

I was therefore rather baffled to find that Manor House Lane had been excluded from “insetting” in the latest plan. My understanding is that it had been recommended for inclusion for inserting in the Green Belt and Countryside Study, 2014 and in the EAB Draft. The reasons I think that it should be included are:

? “Insetting” should be designed to protect the Green Belt from development spreading into it, but it should include as much of the village’s centre as possible so that it defines a small, continuous residential area.
Manor House Lane is very much a part of the perceived settlement area of the village of Effingham as noted in the Green Belt and Countryside Study, 2014. To be excluded suggests we are a peripheral group of houses outside the village, which is not the case, as we are a continuous part of the village perceived settlement area from Guildford Road/A246.

The more logical boundary for “insetting” would be to include Manor House Lane as it is a clear continuation of the settlement on Guildford Road with no natural permanent boundary separating it from it. The houses in Manor House Lane have clear physical boundaries on the other three sides. It is defined by rows of mature trees on two sides (one to the west bordering King George V and one to the south bordering Manor House School) and by the road with a row of mature trees on the eastern side to Little Bookham. These are clear boundaries of physical features that are readily recognisable and likely to be permanent as required under the NPPF and noted in the Green Belt and Countryside Study.

Manor House Lane seems to have been excluded from the proposed inset area when it was decided to exclude the King George V playing fields. These are well used, and enjoyed playing fields, which it is sensible to exclude from the inset area although they are protected from development by the trust establishing them. However, this should not exclude Manor House Lane from being inset as it has its own separate, physical boundaries as noted above and thus does not affect the openness of the Green Belt around it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am writing in reference to the local plan for housing development in Effingham and in particular to the revision of its settlement/inset boundary as detailed on page 338 of the local plan.

I am objecting to the revision of the inset boundary to include those areas marked in yellow.

In particular:

1. The amenity land at rear of Middle Farm Place is designated open space and there is no need to include it in the settlement as this increases the 'crawl' of the village westwards.
2. The land immediately behind the houses in Middle Farm Close has no access is part of the conservation area and is adjacent to farm land.

4/5. The inclusion of this land enables the urban 'crawl' westwards as stated above. Regarding the proposed allocation of the Barn (no 4) for housing, this is a barn of historic interest and from an access feasibility point of view can only accommodate a max of 5-7 residences. Any site allocation for such purpose should reflect a proper feasibility assessment on highway grounds.

In terms of land which could be accommodated within the settlement which at present are not, are the lands shown edged blue. These lands are in the main already developed and are intrinsic to the village configuration, particularly St Lawrence school and the Red House and British Legion. The only potential issue is the vacant land known as Lyons Field adjacent to the school, which is a natural extension to the village boundary and is arguably infill in any event, being bordered on 3 sides by development and on the other by the school playing fields.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I am writing in reference to the local plan for housing development in Effingham and in particular to the revision of its settlement/inset boundary as detailed on page 338 of the local plan.

I am objecting to the revision of the inset boundary to include those areas marked in yellow.

In particular:

1. The amenity land at rear of Middle Farm Place is designated open space and there is no need to include it in the settlement as this increases the 'crawl' of the village westwards. It is also an important part of the Middle Farm Place children's' recreational area and is constantly used for ball games etc.

2. The land immediately behind the houses in Middle Farm Close has no access and is part of the conservation area and is adjacent to farm land.

4/5. The inclusion of this land enables the urban 'crawl' westwards as stated above. Regarding the proposed allocation of the Barn (no 4) for housing, this is a barn of historic interest and from an access feasibility point of view can only accommodate a max of 5-7 residences. Any site allocation for such purpose should reflect a proper feasibility assessment on highway grounds.

Maps, Appendix H, Page 12, Effingham

Would you kindly review the inset boundary proposal to the east of Effingham village. The proposed inset boundary to the east of the village is still unclear. I suggest the boundary comes up Browns Lane and Church Street until it reaches footpath FP118. This footpath, which goes to the north of the St Lawrence Church and to the south of the Howard of Effingham School joins up with the rest of the Submission LP proposed inset boundary at the north west of the KGV fields.

This follows a much more clearly defined and permanent boundary – based on roads and footpath FP118. If this changed boundary were applied it would be clear and defensible over the plan period and avoid confusion in the future.
The proposal to redevelop the Howard of Effingham School is unjustified. The school has confirmed that it does not plan to change its catchment area, and can only be described as oversubscribed when demand from outside the catchment area is taken into account. A new school is therefore clearly not a strategic need and as such should not appear in the Local Plan, which by definition is a document of strategy. It is important to note that the record of the meeting on 31 March between EPC and GBC shows that Cllr Mansbridge stated that any proposal for redevelopment of the School would NOT be included in the Local Plan.

As ratepayers of Effingham and Guildford Borough Council (GBC) we enclose our formal objection to key elements of the 2016 draft Local Plan.

Our objections focus on the proposals impacting Effingham, Wisley and The Horsleys in particular and to the extremely high number of homes suggested as needed across Guildford.

As a general principle we find the plan, much like the draft of 2014, to run contrary to the original aims of the National Planning and Policy Framework (NPPF) and clearly at odds with the promises of green belt protection offered by all parties including the Conservatives and Liberal Democrats prior to the most recent general election.

We object in the strongest terms to the insetting of small villages including Effingham, believing this to be unjustified and unsound.

Our key objections are referenced according to the draft plan documentation policies and sections as noted.

Reference 16/P/01397 Fairlands Farm

I also object to this application.

Again the land is Green Belt. The reason given for dropping the nearby Liddington Hall and Fairlands sites from the Draft Local Plan was because of the "high sensitivity Green Belt". The same should apply to the Fairlands Farm site. The arguments in the application that there are "highly exceptional" reasons is nonsense. The community benefits are slight and Fairlands already has a thriving community centre and playing fields. The community benefits are arguably greater as the development exists today. To argue that Guildford does not have five years of housing supply is to disregard the Regulation 19 consultation that ends this month. The legislation cannot have intended to allow this sort of opportunism.

I also object on the grounds of increased traffic as per my objection to the Keens Lane development.

I confirm that I am happy for my comments to be made public & require an acknowledgement of this objection.

1. Site 118. Land adjoining Fairlands. Safeguarded

This land is located within the Green Belt and meets the following purposes of the Green Belt which are to: check the unrestricted sprawl of large built-up areas; to prevent the coalescence of Fairlands with the town; to assist in safeguarding the countryside from encroachment; to preserve the setting and special character of our historic town. Very special circumstances would be required to justify the loss of such sites given their proximity to Whitmoor Common SPA, SSSI, LNR.

The safeguarded land could provide for just over 500 houses and two traveller pitches almost doubling the existing size of this satellite suburb and would completely change the character of Fairlands leading to the urbanisation and destruction of the village environment.

The local road network is already at capacity. The A323 experiences significant delays during the rush hour with a particular pinch point at Rydes Hill roundabout. These delays represent a significant loss of income in terms of the local economy. The cumulative impact of development in Aldershot, Farnborough, Ash, Tongham, Normandy and Pirbright will greatly exacerbate the existing problems.

Any development at Fairlands would increase vehicle movements on the A322 which would have a detrimental impact on air quality which in turn would have a detrimental impact on Whitmoor Common, SPA, SSSI, LNR.
C15, the road that runs through Wood Street Village, which is already used as a rat run to the Research Park, University, Hospital and Tesco is at capacity. Any development at Fairlands would have a knock-on impact on the traffic using the road through Wood Street Village.

Both Wood Street Infant School and Worpleson Primary School are already oversubscribed – the proposed expansion of Worpleson Primary School to 540 places will only address the existing need. St Joseph’s has been expanded and Stoughton Infants is being expanded to deal with existing need.

Whilst primary school places are being increased at St Joseph’s School, Aldershot Road to take account of current demand, there will also need to be an increase in senior school places. The proposed site in Salt Box Road is inappropriate.

There is only one way in and out of the Estate. There is a significant increase in the volume of traffic entering and leaving the Estate during school drop off and collection times. The road network within the Estate could not possibly cope with the increase in traffic that a new development would bring.

The existing sewerage system cannot cope – major sewage leaks have been experienced on Broad Street Common (SNCI) twice in the last 12 months. On days when there is sudden, heavy rainfall raw sewage leaks into the gardens in St Michael’s Avenue.

The water table in this area is very high, whilst the land itself is low lying. Surface water flooding in Fairlands is an issue that is recognised within the Surrey Flood Risk Strategy and the Guildford Surface Water Management Plan. Any additional development would make the risk of household flooding worse.

Fairlands is located at the end of a particularly long power transmission network. Due to overhead lines and the length of the network the Estate suffers from frequent power outages. We do not believe that the existing network could cope with a housing development here.

Such a development would have a detrimental impact on Littlefield Common SNCI, which provides habitat for a number of protected species including nightjars and bats.

This particular land contributes to a vital wildlife corridor which links Whitmoor Common SPA/SSSI, Chitty’s Common, Rydes Hill, Common, Broad Street and Backside Commons to the Hogs Back AONB.

There are remnants of the cultural landscape associated with the medieval Royal Deer Park within the Rydes Hill/Fairlands rural-urban fringe. It is important that the separation of Fairlands from the historic settlement of Wood Street Village is maintained. Large scale development at this location would be wholly inappropriate.

There is an existing problem with the no right turn out of the Estate being abused. Any increase in the number of vehicles using the entrance would correspondingly increase the risk of a serious or even fatal accident occurring on the A323.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
The Fairlands and Liddington Hall and Gravetts Lane Community Association (FLGCA) was formed in the 1950s to represent the interest of the people of Fairlands, Liddington Hall, Gravetts Lane, Holly Lane and the Aldershot Road between these locations. The officers of the Association are elected annually by the residents.

In September 2013, following a meeting to discuss the Issues and Options consultation initiated by Guildford Borough Council, a meeting of over 200 local residents unanimously voted to form an action group, as a section of FLGCA. This group subsequently became known as FLAG.

1.2 FLAG

Since 2013 FLAG has been extremely active in representing our residents. We have held 5 public meetings at various times during the process. We have also canvassed our residents, and we are able to report 95% positive support having spoken with 228 residences with 218 in favour of FLAG representing their wishes and objecting to the threat of development around Fairlands, with only three against the representation and in favour of development.

Our mandate to represent the residents of our area of benefit was renewed at the AGM of July 2015.

1.3 September 2014 Response

FLAG responded to the consultation in September 2014 with a twenty-two page comprehensive response. Whilst some of our objections and comments have been addressed many of the themes still exist in the new plan.

As a consequence some of the content from our original response is repeated here.

2.1 Summary

We recognise the huge amount of effort that has been expended on this version of the Plan and are grateful to the Council staff for all their hard work. Whilst residents are pleased that the inappropriate developments in Fairlands and Liddington Hall have been removed from the Plan, we find there is enough in the Plan that requires us to object to it as a flawed document overall. We summarise our objections as follows:

We object very strongly to the scale of growth predicted in this plan, driven by the Strategic Housing Market Analysis, a figure that is neither transparent nor scrutinised.

Overall, we must object to the policies in this plan as we believe:

Policies in this plan are couched in imprecise language and, with a presumption in favour of development, this will not enable the policies to prevent inappropriate development.

Monitoring of the policies is weak and ineffective, often not even monitoring resources that policies are required to protect.

There is insufficient housing in the plan for low wage and key workers. Affordable housing is simply NOT affordable in our area due to the high cost and there is an insufficient allocation of social housing.

Infrastructure is currently insufficient to support the existing population. Whilst the CIL may go some way to mitigating new development, it cannot, and will not, be used to rectify current problems.

We object to the Thames Basin Heath Protection Policy in particular, this is ineffective with irrelevant monitoring.

2.2 Growth

There is concern over the aggressive growth predicted in this version of the plan, particularly in view of the recent referendum results. Whilst we are currently undergoing a period of uncertainty, there is an almost unanimous reduction in projections for economic growth, at least in the short term.
Nowhere is this growth constrained in any way, although the plan can be constrained by lack of infrastructure or for preservation of the Green Belt.

2.3 Policies

These will be dealt with in the body of this document, but overall we find the language to be imprecise, monitoring to be ineffective or entirely development biased.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/579  Respondent: 8957441 / Hazel Cleasson  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Fairlands

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Inset Villages: - Whilst I am pleased the land around Fairlands Village is no longer safeguarded I am concerned that Fairlands is now to be inset from the Green Belt. Fairlands will have Green Belt on 3 sides - the fourth is the Aldershot Road. Leaving Fairlands vulnerable to future expansion and possibly effectively merging with Perry Hill Ward. "In accordance with the NPPF (para 84), any site allocations should be directed to those villages that are inset (rather than washed over) The potential development areas are identified on the basis that should exceptional circumstances warrant amending the Green Belt boundary in order to accommodate growth that could not be suitably provided elsewhere, development here would not harm the main purpose of the Green Belt. If allocated, the inset boundary surrounding the village would be extended to incorporate the site."

Infrastructure: - I object that GBC seem to be pursuing a "cart before the horse" mentality. Our roads are already at breaking point. A minor prang/accident in one area has an immediate ripple effect over many miles which invariably results in a mass gridlocking of all arterial roads. Until the issue of our road systems is resolved any increase in housing numbers will cause even greater congestion problems than we already have.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am instructed by my client, Mrs D M Lavender, the owner and occupier of [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] to submit representations on her behalf regarding specific proposals contained in the local plan that impact upon her property. Representations have previously been submitted on her behalf in response to the Council’s SHLAA consultation, the consultation response indicating that the land comprising the residential curtilage to No.24 ts available
and suitable for future residential development. A copy of the submitted SHLAA plan identifying the site is attached hereto.

Mrs Lavender fully supports the Council’s proposals to include Fairlands as one of 14 villages to be excluded from the Green Belt with a defined settlement area boundary, as shown on the Fairlands Plan comprising part of Appendix F, extending along the west side of the Aldershot Road, to include the entire garden area to No.24 within the settlement area.

Overview

Please treat this as a written representation to the consultation on the School Travel Plan referenced above.

We (Miller Developments) are promoting a proposal for residential development on land (Hook Farm and Hunts Farm – formerly identified in the Green Belt and Countryside Plan as H8C) south of Worplesdon Primary School and the existing Fairlands community.

Our proposals would enable the delivery of the Travel Plan’s objectives / targets and secure the main Traffic Mitigation Measures recommended in the Surrey County Council (SCC) report requested by Worplesdon Parish Council (WPC), the Fairlands, Liddington Hall and Gravetts Lane Community Association (FLGCA) and Cllr Keith Witham (SCC) in January 2015.

Background

Having attended the meeting of SCC’s Planning and Regulatory Committee on 25th March 2015 when the decision was made to grant planning permission (for the construction of new 2 storey teaching block comprising 8 classrooms and extension to existing school hall following removal of two existing modular buildings; extension of playground onto existing parking area and provision of new car park) we noted that the officer’s report to the committee made reference to the objections received from local residents: “mainly on grounds of the effects of the additional traffic generated by the development exacerbating current problems of congestion and on-street parking”.

We are aware that whilst officers considered the highways / transport impact of the proposal could be mitigated through the imposition of conditions – including the School Travel Plan – Councillors asked for an informative to be added to the decision notice, formally noting that consideration is given to the provision of a controlled pedestrian crossing on the A323 Aldershot Road at Fairlands, and making clear that they support the ongoing investigation and development of this project as a potential contributor to reducing school-related traffic in the area. Securing a crossing across the A323 is also a key objective / target of the proposed Travel Plan.

We also note the Planning and Regulatory Committee’s decision, on 10th December 2014, to defer consideration of the school’s application due to one of the then proposed traffic mitigation measures no longer being available. At a subsequent meeting on 7th January 2015 between representatives of Worplesdon Parish Council (WPC), the Fairlands, Liddington Hall and Gravetts Lane Community Association (FLGCA), SCC (Highways, Planning and Property) and Cllr Keith Witham (SCC) alternative mitigation options were discussed. At this meeting it was agreed that a number of possible mitigation options should be investigated. A “Report on Traffic Mitigation Measures” was then prepared which formed part of the background papers to the subsequent decision to grant planning permission.
As the report to the committee on 25th March 2015 set out, one of the potential options was “a new vehicular access from Aldershot Road to the school via Hunts Farm or Hook Farm”, however, the aforementioned Report on Traffic Mitigation Measures made clear that, “SCC is not in control of the land adjacent to FP 447 in order for this to be developed into a road”. The report went on to confirm that:

“N.B. During this investigation SCC Property has been made aware of a potential future residential development on the property south of the school that could provide alternative access. However, this project / land is out of our control and is too early in the viability stages to be considered as a feasible mitigation measure for this school expansion.”

Consequently, it concluded that neither this nor other options to mitigate the potential increase in traffic arising from the proposed school development “are considered viable at this time”. Accordingly, paragraph 68 of the officer’s report stated that there is “little that can be realistically and reasonably done” due to “the isolated position of Fairlands”. This is despite acknowledging that the existing number of pupils at the school currently causes localised difficulties on the highway network at drop-off and pick-up times and that it is also clear that the increase in enrolment by 120 children would exacerbate the current situation. Nevertheless, the officers concluded that the school has been proactive in addressing the issues of traffic congestion and parking, especially in the preparation of the School Travel Plan and involvement with the Living Streets Programme, but there remain unresolved issues which still require a long-term solution.

**Our proposals and their alignment with the School Travel Plan**

In light of all the above, and the continuing local concerns about the impact of the school’s expansion on the existing Fairlands community, we consider that our proposals for a development at Hook Farm and Hunts Farm represent the only realistic prospect of addressing the objectives / targets in the School Travel Plan (including the informative agreed by Councillors last March) and delivering the main Traffic Mitigation Measures as set out in the report requested by WPC, FLGCA and Cllr Witham in January 2015. Given that the school (which was originally intended to accommodate 240 pupils) is increasing from 420 to 450 this coming September, with further uplifts to 540 in the coming years, the need for such measures to be implemented is ever more pressing.

As you will be aware, Guildford Borough Council (GBC) is currently preparing the next iteration of its Local Plan, ahead of a Regulation 19 consultation in June. To aid the Council’s deliberations on site allocations, we (Miller Developments) have submitted a detailed brochure for their consideration, in support of our proposals for land at Hook Farm and Hunts Farm. As this document sets out, our plans offer a unique opportunity to solve the congestion issues within Fairlands at school drop off and pickup times.

In preparing this submission, we have spoken with the School’s Headteacher, Alistair Parsons, who is also the author of the School Travel Plan. We support his endeavours to implement the plan and particularly wish to assist him in progressing Objectives 4, 5 and 6, and Target 5 relating to the delivery of these objectives. These objectives and our corresponding proposals are set out below.

<table>
<thead>
<tr>
<th>Travel Plan Objective</th>
<th>Our Proposal</th>
</tr>
</thead>
<tbody>
<tr>
<td>Open discussions with Surrey County Council or relevant planning authority for a crossing to be provided across the A323 to enable families to safely cross the A323 and enable walking and cycling to school from the Rydes Hill, Stoughton and Queen Elizabeth Park areas.</td>
<td>Our brochure explains how a new traffic light controlled junction on the A323 Aldershot Road at Gravetts Lane could provide an alternative access to the school, offering a safer environment for pedestrians and cyclists with dedicated crossing points. Vehicle speeds along the Aldershot Road would also be reduced to the benefit of highway safety. We are in discussion with SCC Highways about these proposals.</td>
</tr>
<tr>
<td>Increase the amount of parents, pupils and staff travelling sustainably on the journey to / from school is increased.</td>
<td>This would be achieved as a result of the vastly improved pedestrian, cycle and vehicular routes that would be enabled by our development, including the new direct access route between the A323 Aldershot Road and the Primary School (see paragraph 13 below) which would allow for separate, safe use by motorists and non-motorists alike.</td>
</tr>
</tbody>
</table>
Open discussions with Surrey County Council or relevant planning authority for an all year round usable Pathway to be built between Wood Street Village and Fairlands Estate to allow families to cycle or walk between the two communities and to support the increased numbers of families travelling from Wood Street Village to Fairlands.

Our brochure sets out a willingness to deliver the objective for an all year round route (for cyclists and pedestrians) from Wood Street Village utilising the existing footpath that runs south to north between Hook Farm and Hunts Farm to Fairlands / the Primary School.

Target 5 of the School Travel Plan states:

“Contact Surrey County Council or relevant planning authority to discuss; installing time plates for the school Zig Zag lines, a crossing over the A323, a permanent pathway between Wood Street Village and Fairlands, regular maintenance of pathways and vegetation along the A323 by October 2016.”

We would be pleased to work constructively with the school (and SCC as the education authority) in helping to achieve this target. As paragraph 16 below makes clear, our development would enable the funding for these significant improvements, at no cost to SCC.

Meeting the aspirations of the Report on Traffic Mitigation Measures

With our proposal for a new vehicular access from Aldershot Road, across Broad Street Common, we can exceed the objectives of the School Travel Plan and put in place a long-term sustainable solution in line with the aspirations of the Report on Traffic Mitigation Measures; thereby addressing the concerns of WPC, FLGCA and others.

As the proposed new access road would require the use of land which is currently designated as Common Land, we are in active dialogue with SCC officers about this. Whilst SCC previously advised that such mitigation was not deliverable as they did not control the required privately owned land, we would ask that this opportunity is now revisited as we are prepared to make the adjacent land available for this purpose.

A long-term alternative to parking restrictions

On a related matter, we are aware that on 8th December 2015 the Guildford Local Committee considered proposals for a Parking Order to mitigate the effect of school traffic on a number of roads in Fairlands, but chose to defer making a decision until 23rd March 2016 “to allow for further discussions with local borough and county councillors and other interested parties”. We understand that whilst there are mixed views locally about the desirability of such parking orders being put in place, they are likely to be agreed next month given the increase in pupil numbers at the school this coming September. Therefore, whilst the Parking Order may be a short term answer, a better solution would result from the new access arrangements proposed as part of our development. Such an approach would allow the parking restrictions to be subsequently removed, thereby addressing the concerns of those residents who do not wish to see them put in place.

The way forward

We support the proposed School Travel Plan and would ask that SCC approves it as the relevant planning authority. However, it is clear from our recent discussions that there is no standalone funding available to support the significant measures which are required, and therefore the only realistic prospect of delivering (and exceeding) the Plan’s objectives would be by supporting a residential development at Hook Farm and Hunts Farm (with the highway improvements being funded via a Section 106 agreement required as part of the conditional permission).

Given that our proposed development would offer such significant local benefits (as outlined above) which align with the objectives of SCC, the Primary School, WPC, FLGCA and local residents, we are asking Guildford Borough Council to take these into account when reviewing which sites should be allocated for residential development in the Local Plan. We are aware of a number of sites in the Worplesdon parish (and elsewhere in the Borough) being promoted for residential development, but none of them offer the scale of highway and community benefits associated with our proposals.

In light of all the above, we would ask that the applicant (SCC), in seeking approval for the School Travel Plan, makes representations directly to GBC setting out how the objectives of the Plan could be enabled through the allocation of Hook Farm and Hunts Farm for residential development. As GBC intends to publish its draft consultation document on...
the proposed Local Plan in April, there is limited time available to promote the benefits that would flow from this potential allocation.

I will arrange for a copy of our brochure (setting out more details of our plans) to be forwarded to you in the near future.

Planning Reference 16/P/01397 - Fairlands Farm

I also object to this application.

Again the land is Green Belt. The reason given for dropping the nearby Uddington Hall and Fairlands sites from the Draft Local Plan was because of the "high sensitivity Green Belt". The same should apply to the Fairlands Farm site. The arguments in the application that there are "highly exceptional" reasons has no substance and should be discounted. The community benefits are arguably greater as the development exists today than for the proposed development. To argue that Guildford does not have five years of housing supply is to disregard the Regulation 19 consultation that ends this month. The legislation cannot have intended to allow this sort of opportunism.

I also object on the grounds of increased traffic and infrastructure pressure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. INTRODUCTION

1.1 Guildford Borough Council (GBC) is producing a new Local Plan to cover the plan period 2013 to 2033 and guide development within the borough whilst also complying with the principles and wider national policies identified within the National Planning Policy Framework (NPPF).

1.2 These representations are made as part of the Regulation 19 to the public consultation for the Proposed Submission Local Plan.

1.3 The representations relate to Land to the west and south west of Fairlands – ‘Land adjoining Fairlands, Guildford’ which was identified in the former Draft Local Plan Document as a ‘safeguarded’ site under Site Allocation 1. The site has not been taken forward as an allocation in the Proposed Submission Local Plan.

1.4 This statement provides a site summary and a review of Policy 2 of the borough wide strategy. It then addresses reasons why the land at Fairlands should be allocated for housing development in the Submission version of the Local Plan, covering issues such as housing requirements, the 5 purposes of the Green Belt and the questionable deliverability of large scale strategic sites that have been included in the Proposed Submission Local Plan.
2. Site Summary

2.1 The land to the west and south west of Fairlands has been identified on the map below:

Image 1: Site Location plan

2.2 The land adjoining Fairlands, Guildford’ was identified in the former Draft Local Plan Document as Site Allocation 11

2.3 The site was also identified in Volume III of the Green Belt and Countryside study as providing opportunities to accommodate development without significantly compromising the purposes of the Green B. The parcels of land identified as H8-A/H8-B (former allocation 118) have a capacity of circa 500 dwellings. The site is well related to existing services such as a local service centre, a doctor’s surgery and bus routes located within Fairlands, which is a residential area in character. The site provides the opportunity for a natural extension to the residential area of Fairlands on a contained site which is surrounded by defensible boundaries and tree cover.

2.4 This site is deliverable and available now. It is within a single ownership and as it was last in agricultural and equestrian use there are no constraints to the site coming forward for residential development. The site is achievable, it is capable of being delivered within five years and is entirely viable.

2.5 Fairlands uniquely is capable of accommodating an on-site SANG to mitigate the impact of any development upon the Thames Basin Heaths. The developable area is shown edged red on Image 1 and the proposed SANG land is edged blue and hatched. We have discussed this with Natural England who have advised that this could be bespoke SANG land to support the development.

2.6 There is an existing access to Littlefield Manor and the land shown hatched brown on Image 1 will be used as a principle access road to the development land from the A323 Aldershot Road.

2.7 Fairlands is a sustainable settlement, with a number of services including a school, doctor’s surgery, post office, community centre and shops. Fairlands is located just 2 miles from Guildford, providing access to a range of quality services and infrastructure. It is therefore a wholly sustainable location for development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

4) Additional Objection

I object to the continued inclusion in the Local Plan of site A35 (land at the former Wisley Airfield, now known as Three Farm Meadows) Wisley Property Investments Ltd’s outline planning application for development of 2,100 dwellings on Site A35 was unanimously rejected by GBC’s Planning Committee in April 2016, after some 14 months of consideration (and various extensions and amendments). Serious concerns about this site and the proposals were raised by a broad number of authoritative sources across the UK, including Highways England, Surrey County Council, Thames Water, National Air Traffic Services and the Environment Agency.

It is very clear indeed to me that development along the lines proposed in the Draft Local Plan 2016 is completely unsustainable and a betrayal of the Green Belt concept. I, together with many residents do recognize the need for a limited amount of additional housing, but not on the scale set down in the Draft Local Plan. Such homes building, represents inappropriate development in the Green Belt.

There is no alternative for Guildford Council but to

1) investigate the errors in the West Surrey SHMA which if found to be correct will bring a significant drop in the number of homes required to 2033.
2) amend the Local Plan to make greater use of brownfield/previously used land rather than target rural villages for removal from their current ‘washed over’ Green Belt status.
3) identify credible, evidence-based plans for sustainable development sites in the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

2. I OBJECT to the proposed development on the former Wisley Airfield. Despite further proposed amendments (as part of the current appeal) they do not alter the fact that this is a wholly inappropriate development for this site the impact, of which, will be devastating for the surrounding communities in, and outside, the borough. The proposed development cannot possibly meet true sustainability objectives.

3. Despite proposed changes to the Local Plan, I OBJECT to what I see as disproportionate development. The local area (including the Horsleys, Wisley Airfield, Gosden Hill Farm and Ripley/Send/Burnt Common) appears to be taking a major proportion of the borough's total proposed housing development. The area does not have the infrastructure (road, rail, schools, medical facilities, sewage systems, etc.) to support such development numbers. The sheer volume of such developments (in the rural/semi-rural east of the borough), combined with proposals in other local authorities, will only add to the gradual coalescence of the London suburbs with towns, villages and other settlements to the south west of the capital.

<tr>
<td>• The A35 strategic proposals; and</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• The potential for a standalone housing allocation at Ockham Lane</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Mr & Mrs Matthew’s land ownership is identified on the attached land ownership map at Appendix A. The site is bounded to the west by Hatch Lane, beyond which is residential land; to the east by a driveway leading to a dwellinghouse and farm buildings; and to the north by a farm beyond the existing boundary.

The site is situated in fairly close proximity to Guildford town centre, and benefits from good railway links, with Effingham Junction Train Station located just over 2 miles from the site providing a direct service to London Waterloo and Guildford stations. It is also situated just over one mile from the A3 via car.

Housing Need and the Green Belt

The submission is made on the basis of broad support for the Council in preparing a revised Local Plan which has been necessary in order to meet the requirements of the National Planning Policy Framework (NPPF), which states that Local Planning Authorities (LPAs) should positively seek opportunities to meet the objectively assessed development needs of their area. There are potentially significant implications for the Council if it does not have an up-to-date Local Plan, as it will become more susceptible to speculative planning applications. As highlighted by the Housing and Planning Bill, local authorities are required to have a Local Plan in force by March 2017; otherwise applicants will be able to submit planning applications directly to the Secretary of State for determination, and in addition the Secretary of State will have the power to prepare Local Plans for these LPAs.

In accordance with the NPPF and NPPG requirements the Council, in preparing its Local Plan, must first identify the objectively assessed need for the local area. In this regard, Mr & Mrs Matthews support the Council’s intention to identify a plan to deliver what it considers to be its current objectively assessed local need of 693 homes per annum. As set out within the NPPG ‘Household projections published by the Department for Communities and Local Government should provide the starting point estimate of overall housing need’ [Reference ID: 2a-015-20140306]. We initially note that the recently released (July 2016) 2014-based DCLG Household Projections highlights a national increase to 214,000 households per annum over the period from 2012 to 2037, up from 210,000 in the 2012 projection. Furthermore, the most recent 2014-based household projections for Guildford now average 570 per annum in the plan period 2013 – 2033, compared with the demographic need in the SHMA, derived from the 2012-based household projections of 517 per annum in this period.

In addition, it is significant that the London Plan (2015) indicates that a minimum of 42,000 dwellings per annum is to be met in Greater London, although the 2013 Strategic Housing Market Assessment (SHMA) identifies a need for 49,000 (2015-2036) per annum. Pertinently, the Inspector in finding the FALP sound, called for wider engagement with local planning authorities beyond the GLA’s boundaries (which could include Guildford for example), in accommodating the Capital’s growth.

In summary, we note there remains robust and increasing need for housing within the region but acknowledge that Guildford as a Borough is heavily constrained by Green Belt, particularly within the eastern part of the Borough. Green Belt boundaries should only be reviewed in exceptional circumstances by LPAs when reviewing Local Plans, as established at Paragraph 83 of the NPPF and in this respect Mr & Mrs Matthews welcomes the Council’s commitment to review Green Belt boundaries in recognition of the Council’s consideration of its identified housing need. Accordingly, we would highlight our support for the proposed removal of The Site from the Green Belt, as proposed within the draft Policies Map.

Comments on Policy A35– Wisley Airfield

We would like to take this opportunity to confirm our support for this draft allocation, which provides the strategic level of growth required to make a significant contribution to the Council’s proposed housing targets, as well as providing associated infrastructure to accommodate this level of development.

We welcome the positive and pro-active approach taken by the Council to planning to meet what it considers to be its development needs, as required by the NPPF.

Land to the north of Ockham Lane– Standalone Allocation
Notwithstanding the above, we are also promoting The Site as a standalone allocation.

Firstly, we note that The Site has now been included within the Wisley Airfield Allocation which confirms that the Council considers The Site can perform a housing delivery function. However, the site is also considered suitable for allocation for housing in its own right, irrespective of the wider proposals at Wisley Airfield, for the following reasons:

- As recognised by the Sustainability Appraisal for the submission draft Local Plan, the wider site for Policy A35 performs well as a location for growth, noting that it avoids the need to place pressure on landscapes designated as being of larger-than-local importance or the most sensitive Green. In this respect, we note that the site (located within area C18 of the Green Belt and Countryside Study by Pegasus Planning Group in 2013), was considered to meet only two of the Green Belt purposes set out at Paragraph 89 of the NPPF.

- The Green Belt and Countryside Study highlights that Potential Development Areas have been identified as potentially suitable to accommodate new development, located to the north of Ockham (sites C18-A and C18-B) which is in close proximity to The Site. Whilst these two land parcels at sites C18-A and C18-B do not include The Site, we would highlight that they share very similar characteristics with it, in terms of capacity, location to the north of Ockham Lane and containment by existing buildings, and with very similar access to local services and transport links. In this respect, the site would be capable of delivering up to 50 dwellings as part of a suitable extension to the existing settlement at Ockham, which features a number of existing services, and access to the strategic road network, with the A3 and M25 in close proximity. The development could make a significant contribution to the Council’s housing requirements (potentially including affordable housing requirements), and make financial contributions to the provision of Suitable Alternative Natural Greenspace. Any development would be high quality, and would be designed sensitively with due regard to the proximity to the nearby Conservation Area.

- As identified by the assessment of the Potential Creation of a New Settlement at Wisley Airfield, the proposed Wisley Airfield site would provide the opportunities to deliver permanent and defensible Green Belt boundaries, including at The Site adjoining Ockham, in accordance with NPPF. In addition, the Green Belt and Countryside Study also confirms that land parcel C18 provides an opportunity to accommodate appropriate development without significantly compromising the purposes of the Green Belt.

- We note the airfield had been subject to a planning application, which was refused in April 2016 and which The Site did not form part of (LPA ref: 15/P/00012). However, the comments within the assessment of the ‘Potential Creation of a New Settlement at Wisley Airfield’ identifies that the southern parts of the draft A35 allocation, within which The Site is located, are the least environmentally sensitive.

- The site fronts onto Ockham Lane so there are opportunities for provision of a suitable access. The site is entirely within Flood Zone 1 so is appropriate in flood risk terms.

- The site is deliverable and developable in the short, medium, or long term.

In summary we welcome the inclusion of draft allocation for Policy A35 and removal from the Green Belt, for which Mr & Mrs Matthews’s land is included. However, for the reasons set out in this letter it is considered that Mr & Mrs Matthews’ site to the north of Ockham Lane is also suitable for an allocation in its own right and should be considered on this basis.

Thank you once again for the opportunity to respond to the Council’s Proposed Submission Local Plan consultation exercise. We would be very grateful for confirmation that these representations have been received.

Mr & Mrs Matthews respectfully requests that the Council notifies Strutt & Parker, on its behalf, of the future arrangements for the Examination of the Local Plan. Moreover, Mr & Mrs Matthews wishes to take this opportunity to formally request the right to appear at all stages of the Examination in Public.

Comment ID: PSLPA16/672  Respondent: 15253409 / Rupert and Sara Trevelyan  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Policy P2

We support proposed Policy P2 which allows limited infilling in the Green Belt within the identified settlement boundaries of villages including Gomshall.

Paragraph 84 of the NPPF states:

"When drawing up or reviewing Green Belt boundaries local planning authorities should take account of the need to promote sustainable patterns of development. They should consider the consequences for sustainable development of channelling development towards urban areas inside the Green Belt boundary, towards towns and villages inset within the Green Belt or towards locations beyond the outer Green Belt boundary".

Gomshall is a sustainable location, given its existing access to sustainable public transport (buses and railway station) and a number of local services within the village including a village hall, public houses and local shops. It is considered that Policy P2 which allows for infill development within the villages washed over by the Green Belt is in accordance with Paragraph 84, as it will direct development to sustainable locations, such as Gomshall.

We note that the Council has provided a definition of limited infilling in paragraph 4.3.26, which provides three circumstances which would be defined as limited infilling:

- Development of a small gap in an otherwise continuous built-up frontage;
- Small-scale redevelopment of existing properties within a built-up frontage; and
- The infilling of small gaps within built development.

We suggest that the third criteria is reworded to read 'the infilling of small gaps within the identified settlement boundary'. The re-wording of this policy would confirm that development within the settlement boundary is acceptable in principle and would be in accordance with the NPPF's presumption in favour of sustainable development, given that Gomshall village is a sustainable location for development.
Gomshall Proposals Map

We support the amendments to the proposals map for Gomshall and the amended identified boundary for the village which now includes the whole of the residential curtilage of Weybrook. It is considered that the proposed boundary is in accordance with paragraph 85 of the NPPF which states that when defining boundaries, local planning authorities should define boundaries clearly, using physical features that are readily recognisable and likely to be permanent.

As noted above, the site is in a highly sustainable location, proximate to services and facilities within Gomshall and as such it is considered to be an appropriate location for small-scale, residential development within the identified settlement boundary. The large undeveloped area to the rear of the existing dwelling offers an opportunity to provide infill, residential development in a sustainable location within the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/676  Respondent: 15253409 / Rupert and Sara Trevelyan  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Gomshall

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The whole village of Gomshall is washed over by the Green Belt, however, we consider that the land to the rear of Weybrook is suitable for development and does not meet the five purposes of the Green Belt set out in paragraph 80 of the NPPF:

• to check the unrestricted sprawl of large built-up areas;
• to prevent neighbouring towns merging into one another;
• to assist in safeguarding the countryside from encroachment;
• to preserve the setting and special character of historic towns; and
• to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

We set out our justification for the suitability of the site for development below.

Firstly, the site does not check the unrestricted sprawl of large built-up areas. Gomshall lies around 10 km to the south-east of Guildford and is therefore distinct from large built-up area. The site itself is to the north-east of Gomshall, beyond which is open countryside with some agricultural premises. The land to the rear of Weybrook does not check the unrestricted sprawl of a large built-up area and therefore does not meet the first purpose of the Green Belt.

Secondly, Gomshall remains distinct from the surrounding villages of Shere (to the west) and Peaslake (to the south). As noted above, to the north of the site is open countryside and there are no neighbouring towns for some distance, as such it is not considered that the site meets the second purpose of the Green Belt.

Thirdly, the Green Belt seeks to safeguard the countryside from encroachment. The site is within the residential curtilage of Weybrook, to the rear of the Tillings cafe/restaurant and now within the proposed settlement boundary for Gomshall. The site is not a countryside location and therefore it is not considered that the site meets the third purpose of the Green Belt.

Fourthly, it is the purpose of the Green Belt to preserve the setting and character of historic towns. The Council has not specifically noted the historic character of Gomshall, the village has not been designated as conservation area and as such it is not considered that the Green Belt in this location fulfils this purpose of the Green Belt.

Fifthly, the Green Belt should assist in urban regeneration by the recycling of derelict and other land. Given the scale of the site it is considered that any development will meet a need for housing within the rural area of the borough, close of
public transport
links. The site is not of sufficient scale to impact the regeneration of urban sites within the borough.

We would be grateful for written confirmation that these representations have been received and duly made, as part of this consultation exercise. We would be happy to discuss proposals for residential development at Weybrook, Gomshall in due course.

Proposed Submission Local Plan Regulation 19 representations (2016 and 2017)

Comment ID: PSLPA16/718  Respondent: 8570273 / Fiona Curtis  Agent: Fiona Curtis

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Guildford Urban Area

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The maps have different ratios which can be rather misleading in terms of comparing one with another.

The map for Compton suggests that the dotted pink line is the boundary line for the village when in fact this is just the village settlement area. The wider village includes Priorsfield Road and The Avenue and Down Lane and parts of New Pond Road and the Hog's Back and Blackwell Farm, all of which are missing. Common land should ideally be marked up. Blackwell Farm is currently shown on a map called 'Guildford Urban' which of course does not exist and hence this could be misleading.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Appendix H Maps

194. The introduction of a "Village Boundary" to an area described as "Horsleys - East Horsley (south)" is an unacceptable weakening of planning restrictions in this gateway to the It includes two areas of countryside - Wellington Meadow which is managed as a wildflower meadow and known for its special biodiversity - and private chalk grassland fields on the south-western side. These fields belong to residents of Chalk Lane and, in some cases, the boundary between field and garden is no longer evident on the map. At least one of these fields, under favourable management, has nine species of orchid recorded and several rare invertebrate species. The invertebrate species include at least two that are not recorded at The Sheepleas SSSI close by as far as I am aware. A colony of the Small Blue butterfly, which is a Surrey Biodversity Action Plan species,persists in one these fields but became extinct on the SSSI many years ago. The Greater Butterfly Orchid, Platanthera chlorantha, reaches population densities that are unlikely to be achieved on the publicly accessible Sheepleas SSSI.

196. I can see no justification for including these areas within the new designation of "Village Boundary" - the purpose of which is to encourage "limited infilling" in the Green Belt.

197. One of the roads within the "Village Boundary" is Chalk Lane - an ancient sunken drove road now surfaced as a single lane It is tree-lined with the branches meeting over the lane and creating a picturesque "green tunnel" that can a lso serve as a corridor for the movement of dormice (which move in the tree canopy). Traffic using this lane has to pass oncoming vehicles by using residents' driveways. Adding further residences that would use this lane makes no sense whatsoever.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
This refers to a map disassociated with this document and fails to provide a version number, location or name of the file. There are, at least, 220 separate documents associated with this plan. There should be an electronic link to this map. Either within the main document, or leading to a website where it can be found (see above in section 4).

The ‘Green Belt Boundary’ on the assumed map, at Local Plan Appendix 7, fails to identify the ‘prime’ boundary of Guildford Town itself. By implication there is no ‘Green Belt boundary’ around the Guildford urban area. Thus making this map incomplete and unsound.

The base map fails to identify with any accuracy where these lines are, and fails to provide hyperlinks to the associated Policies (areas) identified on the map. Reference A25 bears no resemblance to Sites C1 and C2 on the Green Belt Traffic Light map provided at Reg. 18.

The map fails to identify the Site of Archeological Interest behind Pimm’s Cottages, Burpham Lane in Burpham, which is a registered historic site and also designated Local Green Space Land in the Burpham Neighbourhood Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

We write on behalf of our client, Ashill Land Ltd, to submit representations to the draft Local Plan (submission version) to support residential development at the site at Keens Lane/Tangley Lane, Worplesdon. A site location plan identifying the land is enclosed at Appendix A.

Ashill has previously made representations to draft Local Plan consultations including the Issues and Options document (Autumn 2013) and draft Local Plan (Summer 2014). These representations support the release of the land from the Green Belt and the allocation for residential development to contribute towards the Council’s strategic housing land allocation. Our representations to the draft Local Plan (submission version) are detailed within the following sections of this submission.

In addition to the above, Ashill have engaged with Guildford Borough Council (GBC) through pre-applications over the last year and the development of land at Keens Lane and Tangle Lane Worpleston. In addition, Surrey County Council (SCC) has been consulted with regards to highways. Both GBC and SCC have been supportive for development of the site for housing.

Background to the Site

The site is 5.25 ha in size and is currently used as arable farming land. Built development on site comprises horse stables and agricultural buildings which are ancillary use. The boundaries of the site to the north and east are characterised by existing hedgerows and a bridleway. Adjacent to Keens Lane and Tangle Lane are residential areas which form part of Guildford Urban area. Residential dwellings are located on Keens Lane and Tangle Lane in the south west corner of the site. The site is located at the edge of the Guildford Urban Area to the north west of the town centre. It lies to the north of...
Keens Lane and is in close proximity to Gravetts Lane and the A322 which is approximately 200m away. To the north of the site is open farmland and the settlement of Worplesdon and to the north-east is Whitmoor Common which forms part of the Thames Basin Heath SPA. To the east and south of the site are existing residential areas. To the west is residential dwellings and agricultural land. The site is adjoined by development on the east, south and west and partially to the north. It is within short walking distance of a range of local amenities and services on Worplesdon Road approximately 450m away. Bus stops are located on Worplesdon Road and Cumberland Avenue (route 26, 27, 28 and 91) and are located within approximately 400m in walking distance of the site. This connects the site to Guildford town centre and the wider employment, leisure and retail services.

Summary of Representations and Recommendations

We submit these representations on behalf of Ashill Land Ltd, with particular interest to their site at Keens Lane, Tangley Lane at Worplesdon. The representation is submitted in support of residential development at this site for the following reasons:

1. The Strategic Housing Market Assessment (SHMA) identifies a low Objectively Assessed Need (OAN) per annum for the Guildford area;
2. The Land Availability Assessment (LAA) confirms the housing target over the plan period and per annum for Guildford which uses the base OAN but is low given the deficit against housing need;
3. The 5 year housing land supply relies on a number of extant planning permissions to be delivered within the period to meet the housing need;
4. The overall housing targets included within draft policy S2 ‘Borough Wide Strategy’ need to reflect the housing need provided within the evidence base;
5. The site has been classified as ‘medium sensitivity’ in the Green Belt Review and thus appropriate for release for development.
6. The site is adjacent to the settlement boundary and is suitable and sustainable site for housing development.
7. The site is the only medium sensitive site in the Green Belt Review in the Guildford Urban Area.
8. The site is suitable and deliverable to offer a significant amount of new housing to contribute towards the council’s housing need within the first 5 year period.
9. We support the requirements of the allocation (A22) but the residential development can be maximised to a minimum of 150 dwellings.
10. We support the requirements of the allocation (A22) to incorporate a residential care home to be provided within the 400m Thames Basin Heaths SPA buffer.
11. We request that the opportunity for self-build plots is removed from the allocation (A22) as there is little evidence to support this requirement.

The representations, on behalf of our client, to the draft Local Plan (submission version) with regards to the above are set out in the following paragraphs.

Housing Numbers and Evidence Base

**SHMA June 2016**

The West Surrey SHMA (June 2016) provides an evidence base for the housing policies and targets included within the draft Local Plan and identifies the OAN. The SHMA covers the boroughs of Guildford, Waverley and Woking. The NPPF highlights the Strategic Housing Market Assessment SHMA as a key piece of evidence in determining housing needs. Paragraph 159 in the Framework outlines that this should identify the scale and mix of housing and the range of tenures which the local population is likely to need over the plan period that:

- Meets household and population projections, taking account of migration and demographic change;
- Addresses the need for all types of housing, including affordable housing and the needs of different groups in the community; and
- Caters for housing demand and the scale of housing supply necessary to meet this demand.
The SHMA identifies across the housing market area based on the ONS 2012-based SNPP that there is a need to deliver 1,352 dwellings per annum. Specifically within Guildford there is an OAN for 517 dwellings per annum for the plan period between 2013 – 2033. Taking into account further adjustments such as economic growth, affordability and student growth, the OAN for Guildford has been increased to 693 dwellings per annum. It should be noted that this projection provides a starting point for housing need and is a minimum requirement.

The identified OAN is low for the Guildford area given the factors assessed within the SHMA, specifically with regards to the forecasted population increase which has been identified to increase by 15% by 2033 in the borough and the significant need for Guildford to increase housing to support the growing economy. Therefore the housing target prescribed in Policy H1 ‘Homes for All’ should be reviewed in light of the above and increased substantially to reflect the current need and should be set as a minimum requirement.

The OAN highlights the baseline which is considered in the Strategic LAA and the Five Year Housing Land Supply, the analysis with regards to Land at Keens Lane, Tangle Lane is detailed within the following paragraphs.

Strategic Housing Land Availability Assessment May 2014

Guildford Borough Council published their Strategic Housing Land Availability Assessment (SHLAA) in May 2014 noting an overall target of 13,240 dwellings over the proposed plan period. The total figures of 13,420 equates to 652 dwellings per annum. The draft Local Plan cited a 5 year deliverable figure of 1,394 dwellings over the plan period which equated to 279 dwellings per annum. This was however; considerably lower than the 652 dwellings per annum projected by the SHLAA published in May 2014. As part of the evidence base for the current draft Local Plan, the SHLAA has been updated to a LAA to incorporate a number of factors which are detailed within the following paragraphs.

Land Availability Assessment May 2016

As part of the evidence base for the Local Plan (proposed submission), a Land Availability Assessment (LAA) has been published (May 2016). This provides evidence to support the ‘draft Local Plan Policy S2’ which identifies the provision of 13,860 dwellings over the plan period. This equates to 15,116 (net) taking into consideration those sites which currently have achieved planning permission. The overall provision from the 2014 figures has increased by 412 dwellings following an update to the LAA. This increase is low given the identified factors and deficit of required housing within the borough.

This LAA supersedes the SHLAA (2014) and has identified sites by the following:

- Sites and broad locations with potential for development for housing and economic development over the plan period;
- Assessment of the development potential; and
- Assessment of their suitability for development and the likelihood of development coming forward.

The LAA notes that planning permissions were granted for no significant strategic sites and of only 20 or more dwellings. This highlights the low level of both consent and delivery and the inability to meet the current housing need within the borough. Therefore, the current low level of delivery contributes towards the overall deficit within the borough and the housing target prescribed in draft policy S2 ‘Borough Wide Strategy’ should be increased to allow more homes to be delivered over the plan period and meet the OAN.

It should be noted that in the borough over 1,471 dwellings have planning permission but have not yet been built (as of February 2016), this highlights a low level of deliverability of permissions within the borough. These generally include smaller sites and the site at Ash and Tongham (398 dwellings 12/P/01973), of which conditions are being discharged for implementation. Of these the Council anticipate that only 1,408 dwellings will be delivered in the next 5 years. The council have discounted the rest and anticipate these to be delivered in the period of 11 – 15 years. It should be noted that there is a reliance on historic permissions to be delivered in the plan period, particularly within the first 5 years. We promote greater flexibility in the draft policy S2 ‘Borough Wide Strategy’ to ensure that a higher number of dwellings can be delivered over the plan period.

Five Year Housing Land Supply
The LAA confirms that the first five years of the plan that 3,583 dwellings will be delivered. This equates to 717 dwellings (net) per annum. The council have set targets for each of the years within the 5 year period from 2018 – 2023 for between 500 - 700 new dwellings per annum. It is noted that the housing numbers takes account and relies on the deliverability of a number of extant permissions. This totals 1031 dwellings over the 5 year period.

It should be noted that given the undersupply of housing during the current plan period during the first five years of the plan there will still be an overall cumulative deficit of – 912 dwellings. Furthermore, of the total 5 year housing land supply, 1,342 have already been granted planning permission but have not yet started on site. Therefore there is a reliance on the extant permissions to be implemented and delivered. The deliverability and viability of these sites and their inclusion within the 5 year housing land supply can be questioned and ultimately highlights that the 5 year land supply targets per year are low and should be increased. This follows a similar trend to the old SHLAA (May 2014) and is highlighted by the minor increase in the target from 652 to 717 dwellings to be delivered within the first 5 years per annum. This equates to a 9.9% increase in provision which is low when considered against the current poor delivery of housing and deficit In Guildford.

In summary, the council could not demonstrate an adequate 5 year housing land supply with the SHLAA (May 2014). Although there has been an update to this by way of the LAA (May 2016) and SHMA, there is still a significant shortfall and net additional dwellings required which has been confirmed through the analysis of the figures above. Therefore, there is a need to increase the provision per annum within the first 5 years by at least 20%, this is in accordance with the National Planning Policy Framework which states that local planning authorities should “identify and update annually a supply of specific deliverable sites sufficient to provide five years’ worth of housing against their housing requirements” plus a buffer of 5 per cent, or 20 per cent where there has been a record of persistent under delivery. This should further be reflected in draft Policy H1 ‘Homes for All’ and the housing provision increased.

Land at Keens Lane/Tangley Lane, Worplesdon

The site is assessed within the LAA as a proposed extension to an urban area which is currently within Green Belt. The assessment confirms that the provision of new homes at this site would contribute towards meeting the housing numbers in the Local Plan and contribute towards achieving sustainable, inclusive and mixed communities. We fully support these conclusions of the LAA. In addition, it is identified that the provision of a nursing or residential care home (C2) would help meet the need for such accommodation within the borough. The LAA concludes that this site is available for development and development for residential dwellings and a care home can be realistically delivered within 5 years. Therefore, the subject site of these representations is deemed to be suitable, available and achievable to contribute towards the housing need within the borough. This is fully supported by GBC and our client.

Recommendation of amendments to Draft Policy S2 ‘Borough Wide Strategy’

Policy S2 ‘Borough Wide Strategy’ states that “during the plan period (2013 – 2033), we will make provision for 13,860 new homes, 37,200 – 47,200 sq m of office and research and development (B1a and b) floorspace and 4.7 – 5.3 hectares of industrial (B1c, B2 and B8) employment land to help meet the needs for new homes, support the economy and supply 3,200 additional B class jobs”.

The annual housing targets drafted within this policy are detailed below:

(see attachment)

Following a detailed review of the evidence base to support draft Policy S2 ‘Borough Wide Strategy’ we propose the following amendments to the draft text and the annual housing targets:

“During the plan period (2013 – 2033), we will make provision for a minimum of 13,860 new homes, 37,200 – 47,200 sq m of office and research and development (B1a and b) floorspace and 4.7 – 5.3 hectares of industrial (B1c, B2 and B8) employment land to help meet the needs for new homes, support the economy and supply 3,200 additional B class jobs”.

**Release of the Green Belt for Development**

*Background to the Green Belt Review 2014*

The National Planning Policy Framework (NPPF) states that the fundamental role of Green Belts is to prevent urban sprawl by keeping land permanently open, identifying the essential characteristics of Green Belts as their openness and their permanence.

The NPPF states that Green Belt boundaries should only be altered in exceptional circumstances such as through the preparation or review of a Local Plan. Paragraph 83 details that when reviewing green belt boundaries, local authorities should take account of the need to promote sustainable patterns of development. Furthermore, the NPPF advises that local authorities should channel development towards urban areas inside the Green Belt boundary, towards towns and villages inset within the Green Belt or towards locations beyond the outer Green Belt boundary.

A Green Belt review was undertaken by Pegasus Planning Group on behalf of Guildford Borough Council in February 2013 and updated in 2014 to positively plan for the release of land to meet the identified housing need. This forms part of the evidence base of the draft Local Plan and supports the proposed site allocations. The Borough was categorised into various land parcels. Paragraph 84 of the NPPF advises that when defining boundaries of the Green Belt, local authorities should:

- Ensure consistency with the Local Plan strategy for meeting identified requirements for sustainable development;
- Not include land which it is unnecessary to keep permanently open;
- Where necessary, identify in their plans areas of ‘safeguarded land’ between the urban area and the Green Belt, in order to meet longer-term development needs stretching well beyond the plan period;
- Make clear that the safeguarded land is not allocated for development at the present time. Planning permission for the permanent development of safeguarded land should only be granted following a Local Plan review which proposes the development;
- Satisfy themselves that Green Belt boundaries will not need to be altered at the end of the development plan period; and
- Define boundaries clearly, using physical features that are readily recognisable and likely to be permanent.

The Green Belt review assessed a number of sites across the Borough for potential development sites to yield up to 9,000 dwellings over the plan period. This review tested environmental constraints, sustainability and accessibility of various
sites. Therefore it is considered necessary to release appropriate Green Belt land for housing and we support the release of the site which is subject to these representations.

Release of Land at Keens Lane/Tangley Lane, Worplesdon from the Green Belt

The site at Keens Lane and Tangley Lane formed part of the potential development area defined as J3. J3 includes the site specifically and a wider area to the north of the site. The Green Belt review confirms opportunities to accommodate appropriate development at the site without significantly comprising the purposes of the Green Belt. This wider site is highlighted on the accompanying ‘Potential Development Areas surrounding Urban Areas and Villages Plan’ as a ‘potential development area surrounding an urban area’. Furthermore Appendix 2 of the Green Belt review details the sensitivity assessment in terms of Green Belt purposes of the identified sites across the Borough.

Land at Keens Lane/Tangley Lane is identified as a ‘medium sensitivity site’ on the urban edge of Guildford. It should be noted that the parcel that this site falls into is the only medium sensitivity parcel immediately surrounding the Guildford Urban Area. The council have been advised by the Green Belt review to guide development to those sites which are ‘low sensitivity’ and ‘medium sensitivity’. It is therefore considered to be the most sustainable Green Belt release within the Borough.

We therefore support the release of Land at Keens Lane/Tangley Lane from the Green Belt to deliver housing considering its location on the edge of the urban settlement and medium classification; all other sites in Worplesdon have been assessed as high sensitivity and inappropriate to release, therefore our site is the only site identified.

Site Allocation

Worplesdon

The land north of Keens Lane is identified in the draft Local Plan (submission version) to deliver circa 150 high quality new homes and a 60 bed care home. A number of factors support this proposal which accord with paragraph 14 and paragraph 85 and 89 of the NPPF regarding sustainability and the boundaries of Green Belt land. This includes;

1. The sustainable location of the site on the northern edge of the Guildford Urban Area including its close proximity to local amenities including local shops, employment opportunities and education facilities;
2. There are no environmental constraints on the site regarding flooding and development is restricted within the 400m buffer of the SPA to the 60 bed care home is proposed. This is deemed an acceptable use within the buffer of the SPA;
3. Ecological appraisals have been undertaken for the site and have confirmed future development would not cause any significant ecological impact on the conservation status of wildlife and habitats;
4. The development of the site will not impinge on the five tests of the Green Belt as set out in paragraph 89 of the NPPF;
5. The site offers the opportunity to provide high quality residential dwellings and contribute to the housing supply;
6. There is an existing natural and defensible boundary located on the northern part of the site which would protect the Green Belt to the north;
7. The future residents that will occupy the dwellings will enhance the localised economy;
8. The proposed vehicle and pedestrian access routes are sustainable and will not have a detrimental impact on the existing highways network; and
9. The site provides a natural extension to the Guildford Urban Area.

It can therefore be concluded that the site provides a sustainable opportunity to contribute towards housing need within Guildford. The site is a natural extension to Guildford Urban Area and has the capacity to bring forward a significant number of high quality dwellings and care home and ultimately contribute to the housing supply.

This is further supported by Guildford Borough Council who have promoted the site for housing within the ‘Strategy and Sites’ allocation draft policy document in September 2014 and the site was deemed appropriate for development within the Green Belt Review. Therefore the proposal is in accordance with paragraph 14 and paragraph 89 of the NPPF to meet longer-term sustainable development needs within the Borough.
Details of the Allocation (A22 ‘Land north of Keens Lane’)

The detailed allocation and Policy ‘A22 ‘Land North of Keens Lane, Guildford’ confirms that the site is allocated for approximately 140 homes (C3) and a care home (C2) with approximately 60 beds. In addition, a number of the requirements regarding environmental constraints are detailed including, the distance of the Thames Basin Heaths SPA. Whilst we generally support the allocation at the site we believe there is capacity to accommodate a minimum of 150 homes and a 60 bed care home given the surrounding residential context and the location on the edge of the urban area. Furthermore, as detailed above this site is the most sustainable for delivering housing within the first 5 years of the plan period and therefore, the draft policy should maximise on this.

In addition, given the low OAN identified in the SHMA and subsequent housing target per annum which forms part of the 5 year housing land supply, it has been confirmed that this site is viable, suitable and deliverable for housing development and therefore its capacity should be maximised within the draft local plan. The allocation notes an opportunity to provide self-build plots; however, no further justification is given within the draft local plan to support this. We note that the SHMA identifies a very low level of interest in self-build plots in the Borough and there is currently not a register publically available. Furthermore, the LAA (2016) confirms and identifies four strategic development sites to require the inclusion of self-build plots, these include the following:

- Gosden Hill Farm, Merrow Lane, Guildford (LAA site 46)
- Blackwell Farm, Hogs Back, Guildford (LAA site 311)
- Land at former Wisley airfield, Ockham (LAA site 53 and 54)
- Land to the south of Normandy and north of Flexford (LAA site 368)

Land at Keens Lane and Tangley Lane should therefore not include the requirement to provide these plots within future housing development without adequate justification. Whilst the principle of self-build plots is supported by our client, there are implications that this requirement could incur on this specific site including; maximising the number of dwellings delivered, lack of a coherent design approach and the deliverability and viability of completing the future development within the defined plan period of 5 years. We would therefore recommend that this requirement is removed from the allocation.

We note that the subject site of these representations is identified to incorporate development of a residential care/nursing home (C2) for 60 beds and this is considered to be delivered within the first 5 years of the adoption of the Local Plan. We support this allocation and the requirement for this to be located within the 400m Thames Basin SPA buffer zone.

Proposed amendments to draft site allocation (A22 ‘Land north of Keens Lane’)

Following a detailed review of the evidence base to support draft site allocation (A22 ‘Land north of Keens Lane’ we propose the following amendments to the draft text:

“The site is allocated for a minimum of 150 homes (C3) and a care home (C2) with approximately 60 beds”.

In addition the ‘self-build plots’ should be removed from the allocation ‘opportunities’.

We are generally in support of the plan and its attempt to achieve greater housing delivery, however the suggested alterations would support GBC to ensure that that the housing targets are delivered. Furthermore, through engagement with GBC and SCC, it is clear that there is support for this site to come forward in the immediate term for housing.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:  attachment 1234.doc (39 KB)
Apart from exceptional circumstances which should be considered on a site by site bases being assessed against the purposes of the Green Belts view NPPF ss 80, no consideration has been given as to why the existing Green Belt boundaries are not capable of enduring beyond the plan period.

The inclusion of Gosden Hill Farm in the Guildford Urban Area undoubtedly extends the sprawl of Guildford. A58 is only separated from A25 by Nutbourne Fruit Farm, the dual carriage A3 and [unclear text], and from a43 by A247 Clandon Road and the horses along it. Virtually the whole of the land from A43 through Ripley to the gates of Ockham Park are developed apart from a small amount od land between Kiln Lane and Blore Heath off the B2215.

The development on A48 effectively extends the sprawl of the large built up area of Guildford to Ripley, Clandon and Send.

In Redhill Aerodrome [2015] 1 P&CR 3, Sullivan LJ said that 'far from there being any indication that placing the presumption in favour of sustainable development at the heart of the framework is intended to effect a change in Green Belt policy, there is a clear statement [in footnote 9] to the contrary.'

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**ABSENCE OF POLICY ON RIVER WEY**

I object to the omission of a policy for the River Wey which was included in the previous local plan. The existing policy G11 from 2003 Local Plan should be included so that development within the River Wey corridor will only be permitted provided that:

- It protects or improves the special character of the River Wey and the Guildford and Godalming Navigations, in particular their visual, setting, amenities, ecological value, architectural and historic interest;
- The special character of the landscape and townscape in the corridor is protected or improved;
- Views both within and from the corridor which contribute to this special character are protected or improved;
- Where appropriate, public access is provided to and along the River and the Navigations.
- The Nature Conservation value of the site is protected or improved.

Keens Lane is currently in the Green Belt but the draft plan moves the urban boundary to exclude it from the green belt. I am extremely concerned about this for a number of practical reasons - not to mention the enormous impact it will have on the environment and the wellbeing of those who live here and enjoy the countryside and all its benefits.

I wish to object to the 2016 Draft Local Plan with the proposed loss of the Green Belt, particularly between Burpham and Ripley, with the proposed developments on Gosden Hill farm and in Send effectively making a continuous series of estates so that we no longer have villages. We in Burpham have already had large developments on the two farms in our village and the inevitability of further increase in traffic in the centre of our village and in Clay Lane is too much!

I refer to the submission we made last Nov – a copy of which is attached for ease of reference. We have had no response to the points raised and having looked at the latest draft local Plan issued for consultation we can see no evidence that there has been any coherent integrated plan for traffic in the area in conjunction with Surrey County Council and in particular proposals to ease both traffic flow and traffic impact on residents of Compton. Without such plans we consider it inappropriate to proceed with large scale additional housing development in the area.

***************************************************************NOV 2015

We have registered on the MasterPlan consultation website but the questionnaire isn’t really designed to record our the feedback on specific aspects of traffic and infrastructure, so please accept this as our contribution to the public consultation process.

We have looked at the Guildford Town Centre Masterplan and welcome the general aims of enhancing the provision of commercial and residential accommodation to meet future changing needs, to substantially improve the linkage and use of the area between the town centre, the station and the river and to overcome the traffic problems. It is a much needed plan to ensure the ongoing success of this wonderful town.

Our one major concern is that all the extensive studies to alleviate the very difficult traffic problems, concentrate on the impact within the town and there is no assessment of, or weighting to, the consequential impact of each option in the surrounding area. We may be mistaken but we cannot find how these proposals fit within a plan for the wider area that addresses both traffic flow and traffic impact on residents and users of that area – as you have rightly done for the Guildford centre.

If the current preferred options for the Guildford Masterplan are adopted, through traffic will have to find alternative routes. For east/west traffic we believe this will mean yet further traffic flows along the B3000 which is the principal east/west route south of Guildford for vehicles with end destinations in Godalming, Guildford and areas to the east or west of Guildford. This is a truly frightful prospect for the village of Compton.
Compton is part of your Borough and is also your responsibility. It is far smaller than Guildford but is another precious asset of the Borough with its many listed buildings, historic church, Loseley Park, Watts Gallery and its setting in the beautiful Surrey Hills. Yet it feels that the huge damage to the village caused by the massive increase in traffic in the last 30 years is never addressed by local or county government – we suspect it just ends up on the “too difficult” pile.

The statistics are well known and recorded through the two VAS speed alert units. In the region of 6 million vehicle movements a year – one every 2.4 secs during rush hour – through a rural village! The 30 mph speed restriction is almost universally ignored except when the weight of traffic forces it or we are doing a community staffed Speedwatch session. Top speeds through the village are consistently recorded at over 50 mph.

The sum total of government help for the village over 30 years has been the laying of quiet road surface in part of the village which was then ripped up a few years later and the absurd installation of rumble bars right outside cottages in New Pond Road which had to be removed at considerable expense. The parish paid for the vehicle activated speed warning signs and data collection box.

Population levels in SE of England are estimated to increase and levels of traffic are not going to reduce. Basing a Guildford solution on an assumption that changes in modes of travel will result in a major traffic flow reduction feels illusory. In deciding on the Guildford Masterplan please do so together with a coherent integrated plan for traffic in a much wider area in conjunction with Surrey County Council. If the best long term solution is a major infrastructure project for this area of the SE, please do not discard it on the grounds of cost- rather why not present it to the new National Infrastructure Commission? Andrew Adonis has a proven track record in delivering long term education and transport projects where he can see the benefits and there must be a great case for helping Guildford and area to further build on its success as a key town in the south east whilst easing the traffic impact on villages.

It would be appreciated if you could acknowledge receipt of our consultation response.

Guildford Draft Local Plan 2016
I am writing to object to the 2016 Draft Local Plan, mainly because of the disproportionate impact some of these proposals will have on the residents of Burpham.

The proposed development at Gosden Hill Farm will generate a lot of additional traffic through Burpham and the proposed new 4 way junction at Burnt common will not alleviate Burpham’s traffic problems as has been claimed. There is no provision for specific infrastructure improvements to either the A3 or local roads, where there is already an acknowledged deficit. The “Highways England” review of the A3 should be completed first. As everyone seems to agree that a “tunnel” would be a good idea, the proposed route of this should be taken into account before any houses are built at Gosden Hill.

The plan, if put into practice will merge all the villages along the A3 from the Hog’s back to the M25. This will result in a significant loss of Green Belt land and generate even more traffic in Burpham (and the A3/M25 junction) which already suffer from severe delays at peak times.

Has any thought been given to the existing water/drain infrastructure, which is in a precarious state? If Gosden Hill goes ahead, where will waste and foul water go, as the present sewage system cannot cope now?

The proposed new housing site allocations at Wisley, Slyfield, The Horsleys, Gosden Hill, Garlick’s Arch and Send will generate 6,000 homes, over 40% of the total number proposed. As these are all within a few miles of Burpham, this is
disproportionate and unacceptable to the residents of Burpham. There is a lack of evidence for the alleged housing need numbers – 693 a year, more than double the previous figure of 322. Also, in light of the recent “Brexit” vote I think this definitely needs to be looked at again. I also think that the local plan consultation period has been

Having been a resident of Burpham for 34 years I am amazed that the local plan is even being considered when all one needs to do is look at the general traffic chaos that occurs most mornings and evenings in and around the Burpham area, added to this the general traffic going to and from the Aldi store only adds to the general gridlock. To add to this
already chaotic traffic situation the proposed Gosden Hill development would really be the height of madness in an already overpopulated area of Guildford. Please, please think what you are committing a wonderful part of Surrey to, i.e. constant traffic congestion and added pollution. This area is already at saturation point, do not make it worse.

We strongly object to the 2016 Draft Local Plan.

We are concerned that there will be a significant loss of areas currently designated as green belt particularly in Burpham. It seems that you want to merge local villages along the A3 into one, this will be detrimental to the area.

It appears that you plan to build 693 new homes a year. I believe this is more than double the figure given in 2012. Where is the justification for this. Burpham, Gosden Hill, seems likely to get a disproportionate amount of new housing/ development and yet there is no provision for improving the road links and amenities. Burpham is already burdened with high levels of traffic, if your plan went ahead we would come to a standstill!

I believe there has been some discussion about building a tunnel to serve the Gosden Hill development, this would improve the traffic situation but we still feel that the Gosden Hill development is too large and is not in keeping with the area.

It also appears that the consultation time on such a complex development is rather short.

Is this draft plan still viable given the current political and financial situation?

I am particularly concerned at the huge increase in housing proposed for the part of the borough near where I live (Burpham) and the loss of Green Belt as a consequence.

Of particular concern is the lack of attention to the necessary infrastructure given the very large increase in demand it would create, particularly in relation to highways. The already seriously overstretched roads in Burpham where there are frequent major traffic problems already need much greater attention including enhancement of the Burpham junction with the A3 to 4 way if there is to be any significant development in the area. An enhanced junction at Burnt Common will not overcome this problem.

I am writing to object to the 2016 Draft Local Plan. Burpham already struggles with traffic issues on a normal day and by increasing the number of houses and cars, the area won't be able to cope. Also the local schools are over subscribed at the moment so will new schools be built or increased in size to accommodate the increased children. What is the point of a green belt if not to protect the environment and wildlife if you build on it and destroy it. The green areas are what make Guildford so attractive. Also burpham has no south access to the A3 so there will be even more traffic trying to get through. Let's keep Guildford it own town and not merge it with all the surrounding ones.

As a member of Guildford community I would like to voice my strong objection to the proposed Guildford Borough Development Plan. Across town center and Guildford urban area there are proposals to build a total of 6,900 new homes, as outlined in the document.

Our city has currently about 66k residents. Adding nearly 7,000 new homes would provide stress on our already stretched infrastructure and would have a hugely detrimental effect on the quality of life. To mention a few: congested roads (decreased productivity, adverse health impact), difficulty to accommodate pupils (esp. in secondary schools) and elimination of the green belt and recreation spaces. Our bus system is already delivering poor service due to significant delays caused by downtown congestion. In the light of lack of alternatives and very poor bike-lanes network, I believe the quality of life in Guildford will hugely deteriorate and the plan to expand Guildford by well over 30% in population is highly irresponsible.

I would like to therefore demand sharp reduction in the number of proposed homes to be built in Guildford and provide residents with strategic plans related to enhanced infrastructure with consideration to current and foreseen population number.

I am writing to object strongly to the Guildford Local Plan.

I am dismayed to see the local plan for Guildford containing so many new housing sites. There appears to be a serious lack of understanding as to the impact that such quantities of new housing will have to my area, Burpham and the wider Guildford region…(afterall, just putting a new Aldi store in Burpham has generated traffic carnage at times).

- There is already a woeful lack of infrastructure (road capacity, schools, shops, doctors surgeries etc)
- No doubt you will again not prescribe decent levels of parking per household which will again blight the existing and new areas
- All the green spaces will be sucked out of the area, causing more car journeys to get out of the 'town', plus untold damage to wildlife and flood risk etc
- Do you really need all of the housing now, afterall the economy is going to slide off a cliff now the Tories have allowed a Brexit vote…
- Where will the people come from to buy such houses, if T.May gets to be PM and is negotiating on the residency status of 2million+ EU citizens and they end up leaving won’t we have too many unoccupied houses already that could be used?
- This is massively over developing the area – a total of 14,000 new homes are proposed, a whole new town effectively!

There are many more concerns, this appears to be a whole bucket list of crazy plans on one document. I am all for development and new houses, but really, 14,000!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I wish to object very strongly to GBC’s draft local plan June 2016.

The plan is flawed and unsound and yet again it would appear GBC has not and does not listen to local people’s fears of the sheer decimation of the green belt let alone the utter gridlock such a plan will have on Burpham and surrounding villages. GBC went ahead and allowed Aldi to build a store even though local people objected to the plan and it is causing havoc on the already congested London road. We didn’t need the store and the site would have served a better purpose if kept as a family pub/restaurant. I have lived in Burpham for over 30 years and have witnessed the building of several housing developments in the area. This has had an impact on the volume of traffic through Burpham from Guildford direction and from the exit slip road from the A3 either heading for Woking and beyond or Guildford.

- I object to the specific plan relating to my village, West Horsley. It seems utterly incredible that GBC could propose such a plan for a village which is probably the most rural village after East Clandon. Not only is the proposed increase of 385 houses over four sites unbelievable but it is also an increase of 35% which is more than any other location. Whilst I understand that any Neighbourhood Plan has to fit into the Borough Local Plan, a recent survey of the whole village showed that residents felt that only 40 houses were needed [or could be coped with sustainably- no shop, no Post Office, difficult parking in East Horsley, railway station parking at capacity and limited Bus Service] in the same period. Even allowing for the GBC needs, this shows just how distorted the numbers are in Local Plan.

- I object to the unacceptable density of the proposed housing for West Horsley. This is far higher than the current density and it is likely to lead to houses totally out of character with the existing village and no sustainability in terms of schooling, drainage, roads capacity, shops and public transport.

- I object to the early exhibition of a SANG in Longreach, West Horsley by a Company, Greenreach Ltd, which is totally owned by developers. How dare the GBC support the concept of this exhibition when we have many wonderful areas of country for recreation? To put this artificial plan forward before the Local Plan has completed its consultation is disgraceful, especially since it has been created by Developers who clearly expect the GBC to favour them.

Development of these four sites is expected to put 445 new homes in a relatively small area of East and West Horsley, this is excessive and disproportionate, the density is inappropriate for the villages and I object to these policies.

Paragraph 2.22 of the draft Local Plan (Key Facts about the Borough: infrastructure) acknowledges that road and rail networks and local facilities in village settlements are facing increasing pressure. It is anticipated that smaller allocated sites will provide the majority of housing supply in the first five years so it can be expected that planning work will start immediately following the implementation of the Local Plan. An East and West Horsley traffic management and environmental improvement scheme is listed in the Infrastructure Delivery Plan (IDP) for delivery by Surrey County Council (SCC) between 2019 and 2023 but no details are given. Comprehensive information is needed now to explain how the Council intends to deal with the consequences of additional development so that residents can make informed comments.

Paragraph 1.23 of the IDP states that new or improved infrastructure to support development should be available when it is first needed; paragraph 5.25 states that the Horsleys are likely to be impacted by new housing planned for the first five years of the Plan and that primary school places will be available in Clandon and Ripley, SCC officers consider it most suitable to fill those schools before looking at expansions at other primary schools in the area; when the strategic aim is
that primary schools should be within walking distance this statement will be a disappointment to the community and it does not inspire confidence in the Council’s ability to deliver other pledges in the Plan.

PLANNING POLICY EAST & WEST HORSLEY

This is to lodge my objections to the proposed future development of East & West Horsley.

Whilst I accept more housing is needed in the country I do not think we should have this much in East & West Horsley. A lot of people worked very hard in years gone by to obtain Green Belt status for this area and now it would appear to be taken away. We who have lived here for many years and do not want our villages turned into Surbiton.

Many of the green fields proposed are water logged in the winter, With housing built on them where will the water go ?. The local roads get flooded now due to the building that has happened in the last forty years.

Any development that takes place will need the infrastructure to be in place before building. In the past the infrastructure has not been developed enough. The Medical Centre is not big enough, to obtain an appointment with a doctor of your choice in less than a week is very difficult. The car park is often full. The East Horsley Village Hall car park has a notice to say only parking if on Village Hall business.

Yesterday I tried to park at the doctors, the car park was full, two ladies were on duty at the village hall stopping parking if you were not attending the village hall. I therefore could not go to the doctors. The parking at the East Horsley shops is very difficult. There is not enough at the present time, when the camp site is occupied in the Spring and Summer months it is worse. All this is now, what will it be like if this development is allowed?

I notice in the proposed housing there will be Affordable Housing. Can you tell me what is affordable ? If the housing are more than £300,00 young local people working locally would not be able to afford them and this surely is what the idea is and what the developer would hope to get the local people on his side.

The local schools are already over subscribed. The nursery school at the Raleigh School is full until the end of 2014. The Raleigh and the Howard of Effingham Schools is full and not everybody who applies can get in.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I would like to place on record my comments and concerns regarding the New Local Plan.
Over 60% of the proposed new houses are to be built in the Metropolitan Green Belt. In my view this represents a massive incursion into the Green Belt within the borough which is completely contrary to its whole concept. It was of course established by law to be the lungs of London and to prevent urban sprawl. It should be open and permanent and not subject to inappropriate development except in very special circumstances. I understand that Government advice is quite clear that housing need alone is not an adequate ground for building in the Green Belt. I therefore object to this proposed invasion of the Green Belt.

I also object to the proposed removal of East and West Horsley from the Green Belt. One result of this would no doubt be to make back garden development easier. This would lead to a creeping urbanisation of the two villages from within which would eventually destroy or severely harm their existing semi-rural nature. This characteristic is one reason why many residents chose to live here in the first place. No exceptional circumstances have been put forward to justify the insetting and the adjustment of the settlement boundaries.

It seems to me that West Horsley has been singled out for special attention and I object to the proposals for our village. The main development site proposals (all in the Green Belt and outside the existing settlement boundary) if agreed and implemented would add up to 385 new dwellings in the village, an increase of 35% on the current number. The resulting housing density would be drastically higher than the current level and would fundamentally alter the character of the village for the worse. Policy D4 stated that proposals for new development within an inset village will have particular regard to the distinctive settlement pattern of the village and the important relationship between the built environment and the surrounding landscape. What is being proposed for West Horsley, a small semi-rural village with 43 listed buildings seems to me to be quite contrary to this policy. It would be completely overwhelmed by development on the proposed scale and its existing character significantly damaged. There were a very large number of objections to similar proposals in the 2014 draft plan and these appear to have been almost completely ignored in drawing up the latest proposals.

Another key issue here is that the local infrastructure is already under considerable strain. 385 new dwellings could mean an increase in village population of over 1000 people and one has to ask where the extra children would go to school or where any of them would obtain medical care. The primary school is full and the medical centre struggles to cope with existing demand. The draft plan does contain a proposal to expand the medical centre in East Horsley, but only within a 5 to 15 year time scale. This could be long after the new houses have been built.

Local public transport is very limited and the residents of these new dwellings would be heavily dependent on the use of private cars. The local roads are already in places in distinctly poor condition. One example is East Lane which carries a considerable volume of both through, school and local traffic and Northcote Road which leads to the Raleigh primary school. I have reported the badly broken surface of East Lane to SCC Highways, but little so far seems to have been done to improve matters. I also regularly have to report large potholes in Northcote Road (which do usually get patched up, but open up again within months). I question whether the local road network could realistically cope with the increased traffic levels.

Some of the new inhabitants would no doubt want to commute towards or into London by rail. It is doubtful whether the existing service could accommodate many more commuters, as trains in the rush hours are already very crowded. In addition the car park at Horsley station is close to full on weekdays. Furthermore car parking for the Station Parade shops is quite often full or close to capacity.

I was surprised and dismayed to note that the proposed 2000 dwelling development of the Wisley Airfield site has been included in the draft plan. This has of course already been refused planning permission by the Borough Council. Many of the transport infrastructure factors in the Horsleys mentioned above would be considerably exacerbated if this were to go ahead. Inevitably the numbers using Horsley Station would increase and traffic levels would rise still further as the inhabitants and those providing services to them drove to and from the new settlement through the two villages. I therefore wish to object to the inclusion of the Wisley Airfield in the draft plan.

Site A38 (Land to the west of West Horsley) is designated for 135 new houses. This would load both East Lane and Long Reach with considerably more traffic than at present. As mentioned above East Lane is already a busy road in poor surface condition in places. Long Reach is a narrow unclassified road with some sharp blind bends towards its northern end and is not well suited to significantly to increased traffic volumes. Almost every Saturday in the season there are a large number of cars parked on the verge by those using Horsley Football Club grounds and Tom’s Field. This reduces it to a single lane.
The map for this site shows its eastern boundary as the end of the back gardens of the houses on the western side of Northcote Road. It needs to be noted that Bens Wood, which I understand is likely to be proposed as a SANG, extends to the south along the back of some of these houses. Permissive access is available to Bens Wood from all properties backing onto it and this is a valuable local feature. This part of the Wood would be destroyed and access lost to the rest if the entire site were to be built up. Bens Wood is also an important wildlife habitat as well as being an asset to the village and the development of Site A38 would inevitably have an adverse impact on this natural environment. I therefore object specifically to the inclusion of this site in the draft plan.

In conclusion I readily accept that the borough needs more housing, but I fell very strongly that this should be provided in a far more sensitive, measured, balanced and sustainable way than proposed in the draft plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The presence of the Bens Wood nature reserve and its pond has improved the environment and the amount and variety of wildlife species has increased greatly. There are now far more animals and especially birds including migrants, woodpeckers, owls, buzzards and red kites which give interest and pleasure to local residents who walk in the area. The noise and disturbance caused by large scale building works nearby will frighten away this wildlife from the whole of the wood.

The amendments made in the latest draft unfortunately do nothing to allay my concerns and I must therefore maintain my objections. The proposed scale of new building still does not in my view represent sustainable development for the Horsleys and would irretrievably change the semi rural nature of the villages. I also have little confidence in Surrey County Council’s ability or willingness to provide a suitable road system – I refer particularly to East Lane West Horsley whose surface is badly damaged in several places and which would have to carry a considerably increased volume of traffic if the proposed developments were to go ahead.

Guildford Borough Proposed Submission Draft Local Plan: strategies and sites June 2016 Submission from West Horsley Parish Council to Consultation (Regulation 19)

West Horsley Parish Council, in response to Question 5 of Guildford Borough’s Consultation Questionnaire wishes to be represented at the Examination in Public regarding:

1. Green Belt boundary changes and proposed ‘inserting’ of villages from the Green Belt.
2. The use of an unconstrained OAN figure of 693 homes per annum throughout the Plan Period.
3. The non-sustainability of the proposed development sites A37 to A41.
4. The unsoundness of the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: [WHPC Draft Local Plan response letter July 2016.pdf](#) (240 KB)
WHPC OBJECTS to the Proposed Submission Draft Local Plan: strategies and sites June 2016

West Horsley Parish Council (WHPC) has reviewed the Proposed Submission Draft Local Plan: strategies and sites, published by Guildford Borough Council (GBC) for a 6 weeks public consultation to 18th July.

WHPC requests that the objections and comments contained in this Submission are put to the Inspector appointed by the Secretary of State to review the Guildford Borough Submission Draft Local Plan: strategies and sites following this Regulation 19 Consultation. The Parish Council will appoint and retain a representative to speak on its behalf at the Examination in Public on the following issues:

1. Proposals for new Green Belt boundaries and the ‘insetting’ of villages from the Green Belt.
2. The use of an unconstrained OAN figure of 693 homes per annum throughout the Plan Period
3. The unsustainable characteristics of proposed development sites A37, A38, A39, A40 and A41.
4. The unsoundness of the Local Plan..

Part 1 of this Report sets out the Parish Council’s comments and objections to the proposed Policies.

Part 2 presents the Planning Assessment Relating to Sites A37, A38, A39, A40 and A41 prepared by the Parish Council’s planning consultant ADN Planning Ltd. WHPC endorses the Planning assessment conclusion that all five sites should be removed from the Draft Local Plan. The proposals to bring in new Green Belt boundaries within the village must be withdrawn as no ‘Exceptional or very special circumstances’ have been presented by the Borough to justify their removal from the Green Belt

The Appendix section includes 3 other documents referred to within this Submission.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Settlement Boundary changes in West Horsley

Report page: 13

WHPC view: Objects Strongly

In brief: Development sites A37 to A41 have been determined unsustainable. Thus there is no justification for the proposed new boundaries of which many are not defensible.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

SITES POLICIES (referenced A1 to A67)

The proposed West Horsley development sites A37 to A41 are reviewed in Part 2: Planning Assessment Relating to Sites A37, A38, A39, A40 and A41 prepared by ADN Planning Ltd, the Parish Council’s appointed consultant.

CONCLUSIONS

West Horsley is a rural village with some 1120 homes and just under 3,000 residents, whose Parish Council and residents do not share the same vision for the future of the Borough, as put forward in the Draft Local Plan by Guildford Council.

GBC’s desire to pursue a ‘Forced Growth’ policy results in highly aggressive, poorly justified and questionable targets being set for economic growth and housing development in the Borough. The excessive targets – particularly the proposed 25% increase in housing stock – will add to the current heavy strain on overloaded infrastructure in the already over-stretched county of Surrey.

Guildford is a constrained borough by the reality of having 89% of its land classified as permanent Green Belt and an out-of-date road network already suffering over capacity at peak times.

The Proposed Submission Draft Local Plan, if approved, particularly in respect of the excessive housing growth proposed (more than any other Surrey Borough by a considerable margin) will have a permanently damaging impact on the Metropolitan Green Belt across the Borough, particularly on the eastern side where West and East Horsley are located. The test of “exceptional circumstances” that might justify allocating Green Belt land, thereby creating new Green Belt boundaries, for development in a Local Plan has not been rigorously and transparently applied at a strategic level. In reviewing the proposals to put forward new Green Belt boundaries and locate new development on unsustainable sites, it appears to this Parish Council, Guildford Borough decided, at some point, not to be guided by and observe the National Planning Policy Framework. Local Plan Policy P2 which starts with, “We will continue to protect the Metropolitan Green Belt…against inappropriate development” does not fool any of the parishes in the Borough.

Additionally the Sustainability Appraisal does not seem to fit with the concept of Sustainable Development as written in the National Planning Policy Framework, to the extent that it is questioned whether it complies with those requirements.

WHPC submits that it is quite achievable for realistically prepared and identified development needs to be accommodated in Guildford’s urban areas and villages. The NPPF Plan Making - Local Plans paras 150 to 157, sets out clear advice on objectives and procedures a Local Authority should adopt. WHPC was not asked by Guildford Borough to take part in “Early and meaningful engagement and collaboration with neighbouring, local organisations…is essential” (NPPF 155). WHPC believes no parish council was invited to engage in early essential collaboration - a serious flaw for a Borough with 23 Parish Councils.

West Horsley totally rejects the housing proposals to add 385 more dwellings to the village housing stock (a grossly disproportionate 35% growth) on unsustainable sites in the first 5 years of the Plan Period.

WHPC is concerned that GBC have, without proper scrutiny, adopted an inflated OAN of 13,860 homes as a housing target for the Plan Period without any application of constraints as required by the National Planning Policy Framework and National Planning Policy Guidance. The Parish Council subscribed, with other parish and residents organisations, to funding A Review of the West Surrey SHMA as it relates to the Objectively Assessed Housing Needs of ‘Guildford”, June 2016 prepared by Neil McDonald. This Review, included in Appendix 1, found significant errors in the OAN West Surrey SHMA, the effect of which, if accepted as correct, would lower the OAN to 510 homes per year from the 693 homes per year adopted, without constraint, by Guildford Borough. The findings of Neil McDonald’s thorough and substantive Review, if correct, mean the Proposed Submission Draft Local Plan 2016 is UNSOUND.

West Horsley Parish Council on behalf of all its residents calls upon Guildford Borough Council to:
1. have the West Surrey SHMA completely checked either by a joint working party comprising Neil McDonald (for parishes and residents groups), 4 Borough Councillors (one from each political group), under the chairmanship of a retired judge or similar independent professional or by an appointed independent expert who is accepted by all the interested parties.

2. review and re-assess its growth and housing policy objectives rather than force through the Council a Local Plan which unequivocally does not have the support of the majority of residents in Guildford Borough.

3. remove all five West Horsley Sites A37 to A41 from the Proposed Submission Draft Local Plan and re-assess proposals to create new Green Belt boundaries, the effect of which would remove the village from being ‘washed over’ by the Metropolitan Green Belt.

Sites in East and West Horsley

There is considerable concern locally that Effingham, the Horsleys, Ripley, Wisley and the Ockham and Hatchford areas are protected from unwarranted development. But the changes to settlements that would have most effect on the Cobham area in terms of increased traffic and call for amenities, if the draft Local Plan were implemented, would be the Horsleys. Implementing proposals for Sites A36-41 would destroy the nature of the villages that make up the Horsleys. The new building suggested for these villages is excessive and disproportionate relative to the rest of the borough. It has to be asked why it is suggested that the Green Belt is sacrificed here where the protection of the Metropolitan Green Belt is highly relevant when on the other side of the borough in the Ash and Tongham areas the draft Local Plan looks to expand the Green Belt.

The reclassification of East Horsely to a Rural District Centre would allow less desirable uses such as factory outlets, warehouses, clubs etc. to be the subject of applications for planning permission. Development in these villages should not be other than from small windfall sites

As a resident in both West and then East Horsley for many years I wish to record my Strong OBJECTIONS to the current Plan for the area as a whole and my Villages in particular.
My main reasons are as follows:-

1) The vast increase in houses proposed, of various types, bears no relationship to the very modest needs of this virtually rural area.

2) The proposal to adjust the Green Belt area, attacks the original grand concept in its development as a “breathing space” for London.

3) The Horsleys have an important heritage status and lie within the Surrey Area of Outstanding Natural Beauty.

4) The Villages already suffer from the overload of their Schools, Shops, Doctors Surgeries, Roads and Parking. It is ALWAYS the case that such vital facilities are the very last to be increased within Housing Developments of the scale proposed.

Any change to aspects such as these would affect the everyday life of current and potential new members to an unacceptable degree, in my view.

Please give my opinion consideration in your proposed study of Plan

A39 East Horsley
A38, A40, A41 West Horsley

Object

EPC objects to the over-development of our neighbouring parishes of East and West Horsley. These four proposed site selections will add approximately 445 housing units in what is presently Green Belt. We see this as over-development of these two neighbouring villages. There is also the impression that land is being inset from the Green Belt for the sole purpose of meeting housing targets, and not for the reasons allowable for insetting set out in the NPPF. If development of
these areas of land is permitted it will lead to the increasing erosion of the Green Belt between the Effingham/Bookham boundary and Guildford.

There are over 120 Effingham residents who live within the East Horsley settlement area and these residents will be particularly impacted by the increased traffic these site selections will generate. Many residents believe the narrow rural roads in the area are inadequate to support, safely, the construction traffic that will use these roads over many years.

When I heard you were producing a further Local Plan I had hoped you might at least reduce the number of houses to be built. But no, the number of houses planned in my area has increased horribly. This seems a far cry from democracy and more like a war of attrition. These are my objections and deep concerns:

1. Potential influx of people on such a grand scale. I live five minutes’ walk from Effingham Junction Station and crossing the roads in the morning rush hour with my dogs is hazardous enough as it is. These people will need cars to get around and to park.
2. Our side road is used as a traffic overflow for commuters who already have crowded trains and insufficient spaces in the stations car park. Car parking itself will be a problem beside Horsleys shops, medical centre etc.
3. We also have many potholed and old roads are liable to flooding from overflowed drains. Increased traffic will do no favours to the state of these roads which were never constructed to deal with such an increased volume of traffic. One-way systems generated by the Wisley Airfields loathsome development or any widening of the roads will spoil the environment of those who live here.
4. How can our Horsley Medical Centre cope with added patients and Guildford Hospital too?
5. Health itself will be affected. Air pollution from traffic is already above the legal limit on Junction 10 of the M25
6. You take no account of where incoming children are going to be educated in the Horsleys.
7. You propose to use our precious Green Belt to accommodate 65% of new houses here. Our population value our green areas for recreational purpose and it is part of the charm of this locality

I understand that Sadiy Khan, the new mayor of London, has instructed his planners not to approve development and green belt land within the M25. I do wish you had a more sensitive approach to Guildford’s planning. We already have housing stretching from here to Central London. Surely you do not need to extend this plague of concentrated development to beautiful Guildford? I would have thought it worthwhile to preserve green space in our area for Londons enjoyment too.

I wholeheartedly OBJECT to your local plan more STRONGLY than ever. You are violating the area totally failing to protect your current population from being overcrowded and suffering the consequent effects of pollution and distress. Cramming Wisley Airfield with a concentration of housing worthy of tower Hamlets is VILE. Perhaps when Brexit comes into full force we wont need so many new homes on this crowded island. Frankly you need to think again before your votes seek to have more Green Belt protection on the council.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I write to comment on your local plan for the Horsleys. I know that you have spent time, money and energy preparing the plan. Once built on, the soil, plants and wildlife large and small will be destroyed, perhaps for ever.

We need green spaces for plants to photosynthesise and keep the air that we breathe free from pollution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am writing to make a formal objection to the Guildford Local Plan 2016 under the public consultation.

The whole consultation appears to be based on figures which have been kept secret from the public, so how can there be any transparency in the whole process? The first line of Policy P2 states “we will continue to protect the Metropolitan Green Belt against inappropriate development” and then the policy looks at totally changing the green belt boundaries and a massive and inappropriate development therein, so there is an initial and gross contradiction in the plan.

Much use is made of the word sustainable in the local plan. My Oxford English Dictionary gives the meaning as “which conserves an ecological balance by avoiding depletion of natural resources or that can be sustained” Please advise how once green belt land is built upon, how it can be sustained? Answer is it can’t – once the green belt is gone it’s gone for ever. If there is going to be a massive growth in population how is the increased population going to be fed if agricultural land is built upon? Besides the recent referendum vote for Brexit from the EU must cast doubt on many of the assumptions made for population and employment forecasts.
I object to the removal of West Horsley from the green belt by the extension of the 2003 Local Plan Settlement boundaries – there is no justification for this extension.

The alteration of the green belt is only allowed under “exceptional circumstances” and these have not been demonstrated in the plan – the inclusion of more housing to meet an unproven need is not an exceptional circumstance – I therefore object to this alteration.

There is no expansion of many local facilities and infrastructure commensurate with the proposed addition to the total housing numbers. The roads in West (& East) Horsley are already very busy, very badly maintained, mostly unlit and with very poor drainage, again with little or no maintenance. There is a drain in School Lane which is full of silt and has been for the 8 years I have lived in West Horsley. The building of more homes with drives and paved areas will only exacerbate the problem and result in greater water run off every time there is rain. Ripley Lane is impassable except by boat after any heavy rain, so how is more traffic in the area going to be able to use it?

The expanded village will not have the infrastructure to support it. There is now no Newsagent or Post Office, and the only other village shop is due to close in the autumn. There is a very limited bus service through the village on weekdays only. The medical centre is in East Horsley and is already at capacity. Existing residents must perforce use their cars to travel to East Horsley for the shops or railway station. This is without the massive increase in housing numbers planned. The village schools are again full and there is no mention in the local plan about new schools to cater for the likely increased demand.

The proposed housing developments are at a much greater density than the existing housing. Current small scale developments have to be in keeping with the area & street scene, so why are new ones on such a higher density?

What West Horsley does need, and has been proven is about 20 affordable homes. This was proven by The West Horsley Parish Council Housing survey and local plan in 2014. All that does get built in the area are 4 and 5 bedroom executive homes, usually following the demolition of a perfectly useable smaller home, which brings in a 2 (or more) car family placing extras strain on the village infrastructure. The WHPC survey indicated that there is little scope for older people to downsize, or for starter homes for children born and brought up in the village.

The whole process is very undemocratic and GBC are simply ignoring the wishes of the local population. The plan has been re-issued in virtually the same format as the previous one, and all previous objections have been ignored in the current consultation. It appears to be a copy of the strategy of the remain camp from the Brexit or Scottish Independence referenda – if you don’t achieve your desired result, try again until you do.

I therefore strongly object to the 2016 Local Plan

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Green Belt is not argued. If implemented it will destroy the character of the villages, the infrastructure is already overloaded and there are no plans for improvement in line with the proposed increase in housing. The inflated number of houses has been generated by a mathematical model which has not been made available by the sub-contractor, consultant and Guildford Borough Council and cannot therefore be justified.

Beyond the Horsleys. Around the Horsley boundaries there are other sites such as Wisley where huge developments are also proposed. Understand that this Wisely proposal was turned down by the Council unanimously about six weeks before this latest plan was published. Then why is it still in the plan? The council was absolutely right to refuse it there being so many reasons apart from why do we need all these houses? The total lack of infrastructure being another big reason. Horsley and Effingham stations could not cope and that is if they could get to the stations on the roads that can't cope. We have no desire to see traffic lights in our villages either. Move south along the totally overcrowded A3 to Gosden Farm and another huge proposal. They are talking about a new station but will there be the trains to service it? The A3 will not be able to cope, of that there is no doubt because almost every day now there are jams trying to get through Guildford, and if you are in Guildford trying to join in the A3 going south it's a nightmare! All these infrastructure problems for any development must be in place before a development can proceed, but they do not have to proceed as with the Horsley Plan and the incorrect housing numbers, that probably applies to the other Parishes as well.

I write to express my objection to the proposed new Local Plan.

I object, in the strongest possible terms, to the principle of removing West Horsley from the Metropolitan Green Belt. This suggestion above all must be withdrawn from the local Plan. Future generations would see this proposal as a dereliction of Surrey’s duty to protect the health and well-being of the London area and its population.

Having lived in the West Horsley area since 1979 and worked locally I feel I have enough experience of the surrounding area to appreciate the serious detrimental effect the proposed developments would have.

• Our local “infrastructure” is already overstretched.
• Our roads cannot cope with even a small fraction of the likely increase in vehicular movements.
• Our parking areas within the current villages (East and West Horsley) are strictly limited.
• Our population is made up of a high percentage of “retired” folk for whom the car is often the only method they have for getting around the villages so competition for parking places would affect their social mobility with disastrous effect.
• Our local primary school is heavily oversubscribed and may well need to be rebuilt on a new site in an attempt to satisfy the current demand for places.
• Our water table is high in parts of the area and considerable flooding may occur in some of the proposed new developments.
• Our medical services would have to be doubled in size to cope with the likely doubling of our population. A new parking area could not be provided at the current centre in East Horsley and consulting rooms etc. for medical staff would be inadequate for the increased population.

Along with the proposed new housing developments and major infrastructure projects other areas would have to be found for improvements to pavements, road widening, improved junctions, new sewers, services and drains, new parking areas at the railway station at shops and at village halls and at churches.

Our roads cannot cope today with current population/traffic demands and have to be used as "car parks." With more vehicles trying to use the roads bottle-necks will occur at dozens of places around the villages which were never meant to cope with such numbers.

In my opinion the local plan is applying sticking plaster to try to stem the flow of blood from a major wound.

I’d like to suggest that a way forward be found which would begin with a proper comprehensive plan which begins with the infrastructure necessary to cope with the undoubted need for housing in the area. Building houses wherever one can find a piece of land is NOT the way to cope with today's housing crisis.

I cannot believe that people with professional planning skills and experience cannot see the folly of the proposed local plan.

Surely "cramming a quart into a pint pot" cannot be a serious planning proposal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• The removal of East and West Horsley villages from the Green Belt. The value of having the Green Belt is immense and to keep areas free of bricks and mortar. The reason we have lived in the area for so long is because we value open spaces and the freedom to walk unhindered in a green, open environment, rather than suburbia which the Horsleys would become.

• The number of properties proposed 533 (with an additional 60+ houses on smaller sites) – an increase of 35% on the current number of homes – is so out of proportion in a village community with inadequate infrastructure – that it is ludicrous and ill thought out.

• The Horsleys do not possess the infrastructure for such intense development: in fact, to date we barely cope. The state primary school in West Horsley is always oversubscribed; parents have great difficulty in getting their children into the nearest state secondary school at Effingham; the doctors’ surgery always has waiting times for appointments, drainage in the area is completely inadequate and during periods of heavy rain the system does not cope – raw sewerage is seen floating down our neighbour’s drive and into the road from overflowing drainage system. Traffic is a nightmare and parking near the station and local shops is inadequate and for the increased population proposed with an additional 533 homes and resulting cars, it would become unbearable to travel.

• I would specifically mention the proposed 120 houses at Ockham Road North. We live on this road (the B3029) which has a 40 mile speed limit – I would suggest at least 50% of traffic exceeds this limit all the way from its junction with the A3 to East Lane (where it becomes 30mph). From our driveway to proceed onto this road can prove ‘hair raising’ with bends in the road giving very limited sight lines. The likelihood is that with an additional 120 homes and the prospect of two cars (at least) per household progressing onto this road safety would be a great factor.

• I would also add from a personal viewpoint, I have lived here for almost 60 years with an open environment of trees, fields and open skies. I do not wish for a view of bricks and mortar.

• I would like to know why West Horsley is to be saturated with new building 35% in proportion to its existing number of houses, whereas those in Guildford Town equates to 11% and the Ash/Tongham region 16%.

• There should be more consideration given to building on brown field sites within the Borough and to definitely leave the Green Belt protected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am of course more concerned with the proposed developments in the villages of east and west Horsley partly because that is where I live but equally because the proposal to combine the two and remove them from the green belt would open the door to much further construction leading eventually to a virtual new town. The Horsleys would suffer the greatest percentage increase (35%) totally out of keeping with the area and overwhelming all of the local services.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/3631  Respondent: 8601793 / Roy Proctor  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
In addition I would observe that the existing infrastructure in the East and West Horsley area - in particular the roads and drainage - are not functioning in an acceptable manner at the present and the prospect of the addition of the potential number of houses in the villages and close by, with the addition of 2,000 at Ockham, 400 at Burnt Common and 2,000 at Gosden Hill Farm requires more than a passing reference to "traffic management" as a solution to the impractical outcome of adding these large numbers of vehicles. I object to the strategic site proposals indicated and to the larger land areas within the villages.

**Guildford Local Plan – Strategies and Sites June 2016**

Thank you for the opportunity to respond to the Local Plan. I am responding by letter as there are many points which do not fit well into the sections of the questionnaire.

I am very disappointed that the views of myself and a very large number of others from the Horsley and other rural areas surrounding Guildford made during the consultation period following the ‘2014 Draft Plan’ have not been addressed. The Green Belt area of the villages surrounding the urban areas of the Guildford borough is one of its greatest assets. The current plan will destroy the nature of these villages.

I strongly object to the current plan for the following main reasons :-

‘Green belt’ and Area of Outstanding Natural Beauty (AONB) - The ‘Green Belt is precious. There are five legal reasons for the ‘Green Belt’ and the Surrey ‘Green Belt’ meets them all. The National Planning Policy Framework requires any change in Green Belt boundaries to demonstrate very exceptional circumstances. These ‘exceptional circumstances’ have not been demonstrated. Also I strongly object to the proposed changes in the settlement boundary and the concept of ‘insetting’. The only reason for this would be to allow even further development. This is not a valid reason to change the boundary.

Scale of development – An increase of over 385 potential new dwellings is included in the draft plan for West Horsley which currently has just over 1,100 dwellings. This represents an increase of over 35% which is totally disproportionate to the size of the village, and at a density that is significantly above the village at present. This would result in a significant detrimental change in the nature and character of the village. This increase is vastly above the increases in most other areas of the borough. The increase in the urban area of the borough is only planned to be 11%. The pressures on the infrastructure would be completely unmanageable (see further comments below).

Timing/Speed of development – I object to the plan that all of the 385 (35%) increase in proposed dwellings are planned to be built within the next 5 years and before the ‘Brown Field’ sites in the urban areas are developed. This will allow no time for any improvements in infra-structure and cause irreversible damage to the Horsleys.

Evidence Base for housing needs – The construction of the plan is conceptually flawed as it is based on a supply of land put forward by land-owners/developers. It is not based on a balanced view of the housing needs of the urban area and individual villages. It does not take into account the impact of Britain exiting the EU.

The plan would allow the continued development of large four/five bed-roomed houses on developments of twenty dwellings. However, there is also a natural ‘ratchet’ effect that results in the current stock of homes constantly getting
larger as extensions are added and we do not need any more large dwellings. The plan does not address in any detail a better way of prioritising smaller homes for first time buyers and for those downsizing.

**Sustainability and transport** - Allowing significant development in the rural areas of the borough will exacerbate the accepted transport pressures in the area as there will be few jobs in these rural areas causing additional commuting to the urban areas. This would be minimised by more effective development in the urban areas.

**Urban areas and ‘brown field’ sites** – Developments should be made in the current urban and ‘brown field’ sites first before irreversibly destroying green field sites – especially as there is such a large range and uncertainty in the projections of the number of homes needed. The current plan is to develop the easier ‘Green Belt’ areas first and then focus on the ‘Brown Field’ sites. This is the wrong way around. The plan does not effectively exploit the use of the current ‘brown-field sites’, particularly within the urban area of Guildford. For example there is significant scope to enlarge and build more multi-story car-parks in the urban areas which would allow more residential developments.

**Infrastructure** - Current infrastructure in the area is already struggling and needs to be addressed before any additional developments. This Guildford draft plan is meaningless without any Infrastructure Delivery Plan.

The increases in housing proposed in the plan would dramatically increase pressure on schools, medical facilities, roads, railways, drainage, parking etc. In particular, the state primary school is already at capacity, with no room for expansion, and the station car park is virtually full during weekdays. Car parking around the shopping areas is already very restricted, and often full, with little scope for expansion.

There is no evidence in the plan that any required changes to the infrastructure would be in place before any increase in housing/development. This should be addressed in detail within the plan.

**Flexibility** - The plan needs to have significant detail in the short term (5 years) and be very flexible, with a feedback mechanism, in the longer term (6 years and beyond) to allow for i) the uncertainty in the numbers of homes etc. needed and ii) for impact of developments made to be assessed.

For the reasons above I strongly object to the current plan and ask you to reconsider all the proposals concerning Horsley to apply constraints that relate to the very individual village characteristics of West Horsley and change the plan to incorporate a consensus of the views expressed by all Horsley residents and the West Horsley Parish Council.

I have familiarised myself with the Draft Plan (CD disc version) and have attended the Council’s exhibition held at East Horsley Village Hall on Tuesday 21st June 2016. I would like to make the following representations;

1. I wish to object, most strongly, to the Council’s Green Belt policy in relation to the removal of Green Belt land for housing development. In particular I am concerned about the proposed release of the open fields known as Allocation Sites A38, A39, A40 and A41 in West Horsley. My objections are that the Council’s proposal is contrary to Government advice contained within the National Planning Policy Framework 2012;
• Paragraph 79 states that “the Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence”.

• Paragraph 82 states that “New Green Belts should only be established in exceptional circumstances”. Therefore if existing Green Belt land is sacrificed for housing, the quantum of Green Belt will reduce and will not be replaced.

• Paragraph 83 provides “Once established, Green Belt boundaries should only be altered in exceptional circumstances. The Council has not demonstrated “exceptional circumstances” but states that the shortage of available housing land is an exceptional circumstance. The problem is that Green Belt land, which is not Previously Developed Land (PDL), should be regarded as sacrosanct and should only be released as a very last resort and after the re-use of Brownfield and PDL has been exhausted. GBC has made no real attempt to survey and review the availability of Brownfield and PDL but, instead, has targeted Green Belt land predominantly in single ownership, as this is easier to deliver. Good town planning is not about easy deliverability and knee-jerk solutions. This is “lazy” planning and should be rejected.

• Paragraph 87 says “As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances. Insufficient “special circumstances” have been advanced by GBC to justify the release of previously undeveloped Green Belt, which still serves its original purpose as Green Belt land.

• The proposal is also contrary to paragraph 88 of the NPPF, which states that exceptional circumstances will not exist unless the harm caused to the Green Belt is outweighed by other considerations. I do not agree that a shortage of housing land is to be considered as an exceptional circumstance but, even if I am wrong, the harm to Green Belt is not outweighed by other considerations.

• Paragraph 89 states that a local planning authority should regard the construction of new buildings as inappropriate in Green Belt.

• In summary the proposal to release Green Belt land is contrary to Government advice and there are, in fact, two distinct tests. Firstly GBC has to prove “exceptional circumstances” to change the boundaries of the Green Belt and secondly it has to prove “exceptional circumstances” to justify inappropriate development.

1. There is case law concerning “special circumstances” and, in particular, whether a housing shortage is a “special circumstance” of sufficient weight to justify the release of Green Belt. I list below the relevant synopsis;

• In Hunston Properties Ltd [2013] EWCA Civ 1610; [2014] JPL 599, it was held that;

On the facts, the Inspector was obliged to find a housing shortfall. However, the weight to be given to such a housing shortfall (and whether it constituted ‘very special circumstances’ for the purposes of NPPF 87) was a matter of planning
judgment. The weight to be attached to the shortfall may, as a matter of planning judgment, be reduced where a shortfall is inevitable due to a district being subject to policies, which restrict development (such as AONBs, National Parks or Green Belts).

- Further it was held in R (Lee Valley Regional Park Authority) v Broxbourne Borough Council [2015] EWHC 185 (Admin) that;

“A shortfall in housing land supply can, as a matter of policy, be a very special circumstance, although the occasions when it is likely to suffice by itself to warrant the grant of permission for housing development in the Green Belt are expected to be few and far between”.

- The case of R (Luton Borough Council) v Central Bedfordshire Council [2015] EWCA Civ 537 it was stated that;

…”paras. 87-88 of the NPPF provide guidance regarding the approach to be adopted if there is a proposal for development of an area within the Green Belt set out in a local plan: “very special circumstances” have to be shown. This is a stricter test than that in para. 83 in respect of changing the boundaries of the Green Belt in the local plan.”

As can be seen none of the case law to date supports the development of new housing in the Green Belt.

1. The proposal to build 385 new houses will swamp the small village of West Horsley, which in 2011 had 1,111 homes in the Parish. This is a 35% increase. There is insufficient infrastructure in terms of roads, parking, public transport, medical provision, education and schooling, drainage and sewerage. This is contrary to paragraph 47 of the NPPF, which requires local planning authorities set out their own approach to housing density to reflect local circumstances.

1. The Council has not done enough to encourage the re-use of Brownfield and Previously Developed Land (PDL). For example, application 16/P/00783 relating to Oldfields Field Yard concerns the proposed re-development of a builder’s yard and buildings for residential housing in the Green Belt. The property benefits from an Established Use Certificate for B1, B2 and B8 and sui generis uses to include scaffolding yard, car servicing, restoration, motor repairs and storage. Consequently, the Green Belt use has already been lost and the aim of providing permanent open land to prevent urban sprawl can no longer be maintained. Notwithstanding GBC’s alleged housing land crisis, this application was refused. One of the reasons for refusal was that the applicant had not demonstrated any “special circumstances” to justify the inappropriate development.

It seems to me to be inconsistent and inappropriate to refuse the re-use and redevelopment of PDL in the Green Belt and to propose the release of Green Belt in the Local Plan, which is open in character and has never previously been developed.
1. There is no precedent for releasing existing Green Belt land where its original aims and functions are still being met. The original Green Belt legislation and particularly circular 42/55 only envisaged and to a limited scale the “infilling” and “rounding off” within the Green Belt and existing towns and villages should not be allowed to expand any further.

1. I would like to challenge the Council’s Evidence Base as paragraph 47 of the NPPF states that local planning authorities should provide sites sufficient for 5 years supply of housing land with an additional 5% buffer to allow for choice and competition in the market for land. Where there has been persistent under delivery this buffer should be increased to 20% This means that GBC is required to identify deliverable housing land for the next 6 years and not for the whole Local Plan period to 2032. LPAs are then required to identify and update annually a supply of specific deliverable sites.

1. I would like to write in support of GBC’s proposal for “insetting” (i.e. removing from the Green Belt) the existing settlement areas. I do not agree that the village boundary should be enlarged but I do think that it serves no planning purpose for the established built environment to be retained in the Green Belt.

Where the function and purpose of Green Belt has already been lost it makes no sense to determine planning applications by reference to Green Belt policy. A case example is planning reference 14/P/00484 in Mount Pleasant where the surrounding area was a linear pattern of development either side of the road but located in the Green Belt.

The Guildford Borough Local Plan 2003 allows for limited infilling within identified settlements where the land is substantially surrounded by existing development. This is only partly consistent with the NPPF. The main distinction being that the NPPF does not support the restriction of development to land that is “substantially surrounded by development”.

Further paragraph 85 of the NPPF states that when defining boundaries, local planning authorities should not include land, which it is unnecessary to keep permanently open. Here the land in question cannot be kept permanently open because it is already developed.

In paragraph 86 the NPPF sets out that a village should be included in the Green Belt if its open character makes an important contribution towards the openness of the Green Belt. However, if the character of the village needs to be protected for other reasons such as conservation or development management policies, then it should be excluded from the Green Belt.

The removal of the Green Belt designation from the existing settlements (without their extension) would comply with the Central Government advice contained in the NPPF and would allow sensible brownfield redevelopment to help alleviate the housing land shortage.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

2 West and East Horsley

I object to the over-development of West Horsley in particular.

We feel we are being punished for exposing the illegal activities of GBC’s former Planning Officer, Monika Juneja.

GBC’s Leader and Chief Executive never apologised for their support of this former Councillor, neither did she apologise for the threats she sent in emails and in the local paper, when she knew she had broken the law. Indeed she still continued to protest her innocence even after conviction.

Her legacy has left the Borough with HER megalomaniac intent to ruin our environment.

West Horsley does not want to be a dormitory town.

Sites A36-41 will completely change the feel of the village, ruining what is at present a large natural green break between houses.

The planned number is far too great for a small village.

The planned number is far greater than anywhere else in the Borough

The wastewater(sewerage) system will not be able to cope.

The surgery is full and would be very difficult to enlarge

The carparks are full

Schools are full
Children cannot walk to Ripley or Effingham for alternative schools and there is no bus service to Ripley, neither are the roads safe for cycling.

There are no proposals for improving the roads.

If the Wisley site is also developed there will be a further 2000+ houses using the same facilities.

The proposal to build 120 houses at Waterloo farm will make the present Camping Site unusable as a rural facility.

Flooding is a regular problem down Ripley lane and Ockham Road North, both of which have been closed several times during the past year.

Traffic travels on The Street in West Horsley and Ockham Road North (both 30mph zones) at up to 80mph, and regularly travels at recorded speeds of 52mph. Traffic has doubled on these roads in the last 15 years. There are no speed cameras or traffic calming measures. Pavements are narrow and impossible to widen. Both roads are narrow and cannot reasonably be expected to regularly accommodate a further 1500 cars.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. Sites in East and West Horsley

I OBJECT in particular to including Sites A36-41 (East and West Horsley). This is a back-door way to create a mega-village – essentially, a soulless new dormitory town. The Horsleys feel victimised by this plan, which has been masterminded by Council leaders representing Ash and Tongham at the other end of the borough, where (in a flagrant case of political double standards) the Green Belt is actually being extended under Policy P3.15

Whatever their merits as development sites, the 6 Horsley sites should not be considered individually but for their cumulative impact on the contiguous villages of East and West Horsley.

Building 533 new houses on these 6 sites, plus at least another 90 on small sites is (a) excessive in absolute terms and (b) disproportionate relative to the rest of the borough. It will destroy the rural character of these communities.16

Under the plan, rural West Horsley will take 35% of new homes, urban Ash and Tongham 16% and Guildford urban area only 11%. The total number of homes in West Horsley will increase by 35%, which is disproportionate when measured against the overall increase in housing across the borough and particularly in Guildford town. If the Council have justifiable reasons to transform a particular community so radically, the plan should present a case rather than putting forward site proposals as a fait accompli.

These sites will put unsustainable strain on local facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewage, surface drainage and shops. For instance:
• Thames Water have advised the Council that the current wastewater network will not cope and that the foul drainage system all the way to the treatment works North of Ripley will need to be upgraded.

• Guildford Council’s Education Review says “expansion options may need to be considered for primary” education in the Horsley area within the first 5 years of the plan, but Surrey County Council have no plans to do so. The Raleigh School is already full. The private Glensk and Cranmore schools are also at or near to full capacity. The suggestion that schools in Ripley can be used contradicts the plan’s stated intention to reduce traffic on the A3 and strategic aim that primary schools should be within walking distance.

• The plan’s Infrastructure Schedule (Appendix C) imagines an “East Horsley and West Horsley traffic management and environmental improvement scheme between 2019 and 2023 by Surrey CC” but gives no details. This scheme is just wishful thinking. The proposed housing can only harm the local environment, not “improve”

The harmful impact of these sites is magnified by the proximity of the so-called Wisley Airfield site (Three Farms Meadow), with over 2,000 new homes only 2 miles away (see below).

The density of new housing on the 6 Horsley sites is inappropriate, being greater than anywhere in the locality at present.

Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries for which the plan presents no arguments. Contrary to NPPF paragraph 79, this will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.

Collectively, these 6 sites militate against NPPF paragraph 81’s encouragement of access to the Green Belt and its amenity and recreation value. This has been a success story in the Horsleys, with the creation of an amenity wood and community garden, the purchase of adjacent fields (on the eastern side of Ockham Road North) by local residents in order to preserve their open aspect, well-maintained pitches for local football and cricket clubs, public tennis courts, open space for a high-quality campsite (at Waterloo Farm) used by many foreign tourists and the approval of plans for a “Theatre in the Woods” – making West Horsley the only village in Surrey with an opera house. The open nature of West Horsley determined that a long portion of the 2012 Olympic cycle races passed through the village. This route has since been adopted by cyclists as a permanent asset, including the annual

2. Councillor Paul Spooner and his predecessor, Councillor Stephen Mansbridge
3. Even some property developers complain about the Council’s bias in favour of oversized developments, g. Dandara, whose relatively small Green Belt site on the A245 (Epsom Road) in West Horsley is not considered in the plan.

Prudential cycle race. These and future examples of “positive planning” depend on protecting the Green Belt to maintain the openness and attractiveness of the local landscape and avoiding the urbanisation and traffic congestion that Sites A36-41 will bring.

By surrounding Waterloo Farm campsite with 120 new houses, Policy A40 on land to the North of West Horsley will make this rural tourism amenity unviable. This may accord with developers’ plans, since the site would then be vulnerable to infilling with yet more housing.

Site A40 is subject to an unacceptable flood risk from a combination of a high groundwater table and the lack of surface water run-off. This is flat, clay land on the downhill side of the Horsleys where floodwater from new development will accumulate and back up onto existing properties nearby. I can provide photographs proving how badly these fields already flood at present. These problems will only get worse with the increase in extreme weather events associated with climate change. The “appropriate mitigation” suggested in Policy A40 exists only as an abstract notion. It should not overrule the need for Green Belt “exceptional circumstances”.

Policy A40 underestimates the problems of safe access and egress. Firstly, Ockham Road North was closed for several weeks in 2014 because of flooding, and still floods regularly. Secondly, access problems are not confined to flooding and are not addressed by the proposal to extend the existing 30mph zone past the site entrance. Repeated attempts made by Ockham Road North residents to extend this zone have been turned down by the local authorities, Highways England and Surrey Police, even though data collected in 2015 show that traffic has doubled over the last 15 years and that the average speed in the 40mph section of this road is 52mph, with maximum recorded speeds of over 80mph. No traffic calming measures have so far been achieved. Additional housing will add to several hazards along this stretch of road, including:

- Its use by pedestrians, especially children (using the Raleigh and Glenesk schools and catching school buses to Guildford and Howard of Effingham), pensioners living in the string of bungalows at the northern end of the road, and visitors from the Waterloo campsite who are unfamiliar with the area.
- The existence of a narrow footpath on only one side of the road in any one spo The layout means that walking half a mile between Green Land and East Lane requires crossing the road twice.
- The road’s increasing use by recreational cyclists (see above).
- Its winding nature, poor sight lines (especially when interrupted by summer vegetation) and dangerous, concealed driveways. Most of these were built in the 1930s. Some have been widened but many are too narrow for modern traffic. Since a deep ditch runs along most of the road, vehicles have to swing out dangerously when entering or leaving.
- The prospect of additional traffic, including 19,000 HGV movements (90 a day over a long period) if Surrey County Council approves the Drift Golf Course’s planning application to re-landscape its site using bulk waste transported from London.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I am writing to express my objections to the new Guildford Local Plan with regard to East and West Horsley on the following points:

I object to the proposed removal of the Horsleys from the Green Belt, I do not believe that 'exceptional circumstances' have been demonstrated. I also believe that all Green Belt areas should be conserved at all costs. To allow the Green Belt to be eroded is a slippery slope and we should be looking to conserve all of the Green Belt for our future generations; In light of the above, I also object to the proposed extension of the boundaries of the settlement areas of the Horsleys, since it would enable developments on currently undeveloped 'green' sites.

The proposed housing numbers are unrealistic and would place a severe burden on the existing infrastructure to the Horsleys. These are rural narrow roads that are already unable to cope with current traffic. I have to regularly wait 2 weeks for an available doctor's appointment, increasing the population density would inevitably lead to an even longer wait time.

I therefore also object to the proposed development at Wisley airfield, since local infrastructure is ill-equipped to cope with this scale of development, including local schools, medical facilities, road quality, transport links and local drainage.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I wish to object to the 2016 Draft Local Guildford Plan for the following reasons:

1. Failure of the Local Plan to properly represent local needs or the needs of the Borough generally

A questionnaire produced by West Horsley Parish Council identified a local need for only 20 No. affordable homes.

The effect of these proposed developments will be only to draw in more people from outside the area and impoverish the quality of life for those of us who already live here.

The number of houses being put forward has been assessed purely on empiric calculation and the Local Plan is being driven by a biased GBC planning executive committee, which puts its own members’ self interest before the interest of those who elected them. Furthermore, the figures cannot possibly be representative of accurate projected demand, not least because of the likely reduction of immigration following Brexit. The assessment is flawed and must be rejected.

2. Unauthorised removal of West Horsley from the Green Belt

By the guidelines set down by central government, and restated by successive government ministers, there should be no relaxation of Green Belt boundaries unless there are exceptional circumstances.

This condition is not being satisfied for any of the proposed development sites (A36, A37, A38, A39, A40, A41).

The use of brown field sites is also a stated intention of central government - an option not fully explored by GBC.

For these reasons, the proposed West Horsley development sites must be rejected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I wish to OBJECT to the proposed local development plan.

The plan does not site any required exceptional circumstance or other justification to alter the existing Green Belt boundaries.

The Horsleys have a rich & varied mix of established LOW housing density settlements, with a considerable number of historic buildings.

The proposed development would introduce an element of HIGH density development, which would alter the character & outlook of the villages.
No allowance appears to have been made for the impact of these developments on the existing infrastructure. The infrastructure is already "creaking at the seams" without increased development.

This plan in it's existing form is totally inadequate & includes far too many houses. It really should be reconsidered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<td>I refer to the New Local Plan dated 6th June 2016. Once again, I write on behalf of myself and others who feel VERY strongly about this. My family have lived in the Horsleys for 4 generations and we have owned many houses over the years. The reason why we have made this area our home is simply because we enjoy living here, it offers green spaces and a friendly safe environment. We cannot understand why GBC wise to completely change the nature of these villages. To even consider building 533 new homes is just ridiculous. To take us out of the Green Belt is unthinkable. To bring in Travellers Sites criminal. The Horsleys cannot cope with this number of new homes.......we do NOT have the infrastructure. Our roads, schools, Doctors, cannot cope now! Also consider more noise, lights, damage to the natural environment, flooding, drains etc. This is on top of GBC'S favour of building 2,100 new homes at Wisley Airfield which is only 2 miles away!!! I ask you to please consider the future of these villages and the mess that will be created if this number of new homes are built. <tr>
<td>Sites in East and West Horsley: I OBJECT to the inclusion of Sites A36-41. These sites should not be looked at individually but at the cumulative impact they will have on the two villages, but in particular West Horsley. Under the Plan the very rural West Horsley would have its housing stock increased by 35%, this is wholly disproportionate when set against the increases proposed for urban Guildford and Ash &amp; Tongham. The infrastructure in the villages cannot support a further 593 houses, the local schools are already oversubscribed and medical centre is overstretched. The drainage already has difficulty coping with the roads regularly flooding and being impassable when there is heavy rainfall. It is noted in the site descriptions except A36 there is &quot;surface water flood risk&quot; and in the case of A39 the flood risk is “fluvial and surface water”. Building on open Green Belt agricultural will only exacerbate the problem. In the &quot;Land</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Availability” survey it refers to the “Horsley flood hotspot” when discussing the sites referred to. There will no shop in West Horsley from October 2016, the parking at East Horsley, to be designated a “District Centre” is already full to capacity. As is the station car park at Horsley Station, whatever the hope is to encourage cycling and walking on a cold, wet winter morning and evening people will use their cars and 593 extra households would suggest at least that number of extra cars on roads.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I live in West Horsley and I am writing with my objections to the Guildford Borough Proposed Submission Local Plan.

Permanent loss of greenbelt never to be retrieved for our progeny

The current green belt and surrounding policies have worked well in preserving the nature of this area. The proposed changes will turn the Horsleys into a residential area getting on for half the urban area of Guildford - by comparing the area enclosed by the proposed green belt boundary. Horsley and particularly West Horsley with it's open spaces along East Lane has a very different character from the urban spoke that runs through Ewell, Epsom, Leatherhead and out through Fetcham and the Bookhams towards Horsley. Horsley is the first place along this spur that is properly surrounded by countryside with a village and not suburban feel, This is wholly down to the restriction previous authorities have placed on development. The Horsleys serve the Surrey hills immediately to the south, an area of outstanding natural beauty. This is significant generator of tourist trade for the village. The change in character will have a huge impact. For example, we have a Camping and Caravan Club site in Horsley. Part of the proposal is to build a large area of housing to the north and east of Waterloo farm where the camp site is located. Can you imagine the change in the approach road to the site, from a drive between open fields consummate with the rural feel of the area, to a drive through a housing estate. The council have failed to demonstrate the exceptional circumstances necessary to remove the proposed sites in Horsley from the Green Belt.

Sadly the focus of the plan appears to be on green field sites as cheaper option for developers over the many brown field opportunities in the borough.

An unsustainable growth in the population of the Horsleys

The proposed plan, is grossly disproportionate both in the proportion of Guildford's housing allocation landing on the Horsley area, and in the size of increase in housing numbers in West Horsley (35% in West Horsley). To the residents this looks like a piece of exploitative opportunism on the part of developers and councillors - many sites already being under option.

I am very concerned about the infrastructure in the area and it's ability to cope with the population we have now.

Inadequate Junior Schools Provision

The schools have no capacity left to accommodate more children and the Raleigh Primary School has not enough real estate to take on more pupils without having to build on the school field which is valuable for physical recreation, an increasingly important part of the curriculum to encourage healthy lives.

Inadequate Senior Schools Provision
We already have had the nightmare of parents being told places are not available in local senior schools and the prospect of having to take their children many miles to school - bad for the children, the community and the local transport systems. A jump in population will make this situation unmanageable.

**Inadequate Roads and Parking**

The roads in the area are already busy and often in a poor state of repair. The area around the junctions between Nightingale Avenue, East Lane and Ockham Road are seriously congested in the morning as children are being dropped at both the Raleigh and Glensesk Schools. The proportionate increase in cars and traffic in the village would be unsustainable and completely out of character with the current rural nature of the village. Many of the residents would catch the train to work. Horsley station car park is already full on week days and would need expansion to support the new commuters.

Medical facilities too are stretched currently and could not cope with the extra population. The car park is often full and people use the few extra spaces available at the village hall. More people would again dictate the provision of extra facilities.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

**Comment ID:** PSLPA16/1199  **Respondent:** 8711841 / Rosmarie Roberts-Kunz  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

**Do you consider this section of the document; complies with the Duty to Cooperate?**

( ), **is Sound?**

( ), **is Legally Compliant?**

I OBJECT ESPECIALLY TO 6 POLICIES: A36, A37, A38, A39, A40 & A41:

- Amount of new housing far exceeds local need.
- Housing density excessive when compared with existing development.
- It would transform the Horsleys into a sizable town, something for which no case is made.
- Collective impact of these 6 sites on a small part of the borough not considered. Should not be treated as isolated, separate sites.
- Total amount of building involved disproportionate with the amount of planned development elsewhere the borough, especially less sensitive urban areas not protected by Green Belt.
- Sites unsustainable, since key infrastructure is lacking and no adequate provision is made to increase it – e.g. poor wastewater capacity, lack of schools, absence of traffic management plan, flooding.
- No account taken of additional impact of Wisley Airfield site on Horsleys.
- Extension of settlement boundaries too permissive. The Horsleys are characterised by streets with development along only one side of the road. Policies allow too many adjacent green fields to be developed by squaring off boundaries and claiming they don’t contribute to Green Belt “openness”.
- Green Belt gap with neighbouring settlements hugely narrowed, especially if Wisley Airfield is built on.
- Policies will harm compliance with NPPF 81 – e.g. by making cycling (including Prudential cycle races) too dangerous, ruining the rural setting of Waterloo Farm campsite, destroying the ambience of Grange Park Opera’s new “Theatre in the Woods”.
- Policy A40 especially unviable because of high water table and poor drainage, leading to regular winter flooding.
- Safe access and egress at Site A40 unachievable, owing to flooding, high speed limits, poor sight lines, narrow access to existing properties, inadequate pavements for elderly and schoolchildren, increasing use by recreational cyclists etc

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
1. I consider removal of Horsleys from Green Belt both immoral & possibly illegal.

2. No provision has been made for new wider roads to carry extra traffic.

3. No plans for extra schools, doctors surgeries

4. Parking is already difficult - where are the plans/ideas for possibly 500-1000 more spaces

5. The young cannot afford housing now - what plans for affordable NON EXPANDABLE houses

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to all sites in West Horsley for over 5 homes. There is insufficient infrastructure planned. It is impossible to deliver sustainable housing sites of this size in the countryside.

I object to the insetting of West Horsley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Sites A36-41 (East and West Horsley). This is a back-door way to create a mega-village – essentially, a soulless new dormitory town. The Horsleys feel victimised by this plan, which has been masterminded by Council leaders representing Ash and Tongham at the other end of the borough, where (in a flagrant case of political double standards) the Green Belt is actually being extended under Policy P3.15

Whatever their merits as development sites, the 6 Horsley sites should not be considered individually but for their cumulative impact on the contiguous villages of East and West Horsley, the green belt is meant to stop villages from
conjoining.

Under the plan, rural West Horsley will take 35% of new homes, urban Ash and Tongham 16% and Guildford urban area only 11%. The total number of homes in West Horsley will increase by 35%, which is disproportionate when measured against the overall increase in housing across the borough and particularly in Guildford town.

These sites will put unsustainable strain on local facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewage, surface drainage and shops.

By surrounding Waterloo Farm campsite with 120 new houses, Policy A40 on land to the North of West Horsley will make this rural tourism amenity unviable. This may accord with developers’ plans, since the site would then be vulnerable to infilling with yet more housing.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/4042  Respondent: 8727105 / Emma Pernet  Agent:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

If East & West Horsley are taken out of the Green Belt then I believe it would be much easier for developers to build new homes which would very quickly destroy the quality of living in Horsley. The existing infrastructure in Horsley cannot cope with the existing number of residents so any increase in housing would again be detrimental to the community.

Comment ID: PSLPA16/904  Respondent: 8728577 / Peter Williams  Agent:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposed local plan for the following reasons:

1. **Green Belt and the Countryside (Policy P2) and Surrey Hills Area of Outstanding Natural Beauty (AONB) (Policy P1)**
   1. Policy P2 states that the Metropolitan Green Belt will continue to be protected against inappropriate development. I object to the village’s removal from the Green Belt by insetting and extending the 2003 Local Plan Settlement Area boundaries.
   2. No exceptional circumstances are made for the new boundaries.
   3. The Green Belt study and Countryside Study is flawed. Wet Horsley’s defined settlement boundaries (2003 Plan) do not need to be extended.
   4. The parish has a rich and varied mix of low density housing and a good number of historic buildings. It sits on the north side or the North Downs (partly within the Surrey Hills AONB) and is a magnet for visitors, particularly walkers and cyclists, throughout the year.
5. The key evidence document (Guildford Borough Economic Strategy 2013-2031) makes no case for the large increase in housing in West and East Horsley, nor for that matter, in the neighbouring villages.
6. The proposed new economic development sites are proposed for the opposite side of the borough. Any increase in housing should be close to them.

2. Presumption in favour of sustainable development (Policy 1), Borough-Wide Strategy (Policy S2), Homes for all and affordable homes (policy H1, H2)

1. Policy S2 calls for 13,800 new houses to be built during the plan period of 2013-2033. This number is excessive and unsustainable in the villages surrounding Guildford, particularly in West Horsley.
2. Substantial expansion of the village is not sustainable. There is a single small shop, no post office, and a very restricted bus service. This is inadequate for the proposed increase in housing.
3. The density of development proposed is much higher than the current level and will be out of character with the varied mix of type and layout in the village.
4. There is already a deficiency in the local infrastructure; there is a lack of schools and shops; drainage is overloaded; parking is in short supply and the station car park in East Horsley is often full.
5. The need for the proposed number of homes to be constructed during the first 5 years is completely unproven. The West Horsley Parish Council and Surrey Community Action Housing Survey: May 2014 identified a need for some 20 additional affordable homes to cater for young people and local elderly people who wished to remain in the village by down-sizing to smaller homes.

3. Sustainable Transport for new development (Policy i3)

1. The practicalities of delivering secure travel plans have not been properly considered. The elderly, disabled, or those with small children, are best served by developments in towns and close to extensive amenities, including health care. The Policy states that developers ‘will be expected’ to propose and secure travel plans; this is a far cry from ‘be required to deliver’.
2. Access to essential facilities (this is not mentioned in the written policies, although there are vague references in the infrastructure policies section)
3. The green grocer may retire this year leaving the village with no shop. Plus parking outside the shop is, in any case, very limited.
4. Parking is very limited in East Horsley where most residents go to use the library and the shops. The proposed increase in population will make movement through, and parking in, the village much more difficult.

4. Schools (schools are mentioned in the definition under Policy I1)

1. There is already a shortage of state primary school places in the village. The Raleigh School has been oversubscribed for several years.
2. Secondary school places at the Howard of Effingham School amongst others are limited and necessitate a significant bus or car journey to attend.
3. The private schools of Glenesk and Cranmore are busy and generate significant traffic from other parts of the county for parents to deliver and collect their children. There is heavy traffic on the A246 and Ockham Road North as a result at the start and end of each day.

5. Medical facilities (Infrastructure Delivery Plan refers to a possible extension of Kingston Avenue Medical Centre)

1. The doctors’ surgery is already busy and it is difficult get appointments now. An increase in patients will adversely affect the level of service.
2. A major extension of the Royal Surrey Hospital will be needed to deal with the increase of population (which is in excess of the Government ONS forecasts).

6. Roads and transport infrastructure (mentioned in the definitions of Policy I1)
There are frequent trains to London and Guildford, but the station car park is normally full on weekdays. There is no scope of extension of the car park.

The large increase in population planned will overload the station and the roads serving it.

Because of the village’s location and the distant location of jobs and amenities, most households have at least 2 cars. The proposed housing will increase traffic on the already inadequate roads, prolonging journey times, increasing local air and noise pollution, and increasing risk of traffic accidents.

The road surfaces and drainage are already in a very poor state of repair and will deteriorate even more rapidly.

7. Waste water infrastructure (mentioned in Reasoned Justification under Policy I1)

1. Sewage is known to overflow in the Ockham Road and Green Lane areas
2. Guildford Council has been advised by Thames Water that drainage network is unlikely to be able to cope with the increased demand of the proposed population increase. The foul water drainage system connecting West Horsley to the treatment works north of Ripley will require upgrading, for which Thames Water advises 2-3 years lead-in subsequent to any planning permission.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attacked documents:
This is a substantial number of homes for a small village to absorb and will change the character of the village significantly.

West Horsley’s Neighbourhood Plan survey estimated that we might require as many as 20 new homes.

A37 Bell & Colville site being on the main road with public transport links could meet the village requirement by limiting to 20 homes not 40.

Regarding the other plots of land under consideration, I believe that either plot A38 at Manor Farm or Plot A40 Waterloo Farm would have the least impact. However the number of houses proposed is excessive.

Consideration could perhaps be given to relocating the village hall to Manor Farm area where the public tennis courts and football club are situated.

Long Reach Sang Area Object

Why do we need a public park in this area of rolling acres of beautiful countryside? An extension of public footpaths and bridleways would be far more beneficial.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp173/300  Respondent: 8729569 / Carolyn Kimpton  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

It is with relief that the number of new homes proposed in the Green Belt

In West Horsley has been reduced. However, I strongly object to the following proposals in the current plan:-

1. Insetting West Horsley from the Green Belt The historic village of West Horsley with 41 listed buildings and set in glorious open countryside is in danger from the proposed development plan and insetting of becoming linked with East Horsley and creating Town Horsley. The character of West Horsley would be destroyed and should be preserved for future generations to enjoy. The West side of West Horsley is extraordinarily beautiful with rolling acres, copses, natural springs and streams meandering through the quintessential English open countryside and should be preserved at all costs. We are grateful to you and your team for removing the land between the back of Silkmore lane and Ripley Lane. This area should be considered for inclusion in the Surrey Hills area of outstanding natural beauty and be within the village's conservation area. The open countryside is not only valued and enjoyed by locals but by visitors from nearby towns and cities and overseas.

2. Village Boundary West Horsley

We object to the straightening up of the village boundary at the back of Silkmore Lane/Ripley Lane (image left) to allow building on this land would be of huge detriment to the character of the village and the pastoral scene enjoyed by all residents and visitors alike for the sake of lining the pockets of a property developer. The open fields are enjoyed by so many with the public footpath leading across the fields beyond to Ripley Lane and visitors to Hatchtands House and parkland.

Orchard Cottage is a prime example of how ruthless property developers can be in putting their own interests before t hose of the whole community. See image below of the house that replaced the pretty Victorian cottage- an absolute monstrosity which blights the countryside and is seen for miles and of a size and architectural style totally inappropriate for the village, partic larly given its open location. Why was this ever allowed? This could happen to the acres of land
that you propose to include into the village settlement area by straightening the village boundary. Please seriously reconsider extending out the village boundary. Thank you.

3. Sustainability for West Horsley
It appears that nothing has been put forward since last year's consultation to improve the sustainability of West Horsley development sites and thus meet national policy requirements.

4 New Homes - these should be built in the towns where there is work not in the countryside. Apartments and social Housing is required particularly in Guildford. Shopping space is not a priority for Guildford town centre with the increasing trend for shopping online etc. Housing is.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

This email registers my strong objection to the proposed Local Plan, particularly as respect to the Horsleys. I note in horror that you propose to withdraw the villages from the Green Belt and, entirely wrongly and as a “flag of convenience” for your Plan, redefine them as semi urban. I am sure you are well aware of the Planning Practice Guide but, since your Plan seems to ignore at least part of them, they are set out below for your convenience.

Once established, Green Belt boundaries should only be altered in exceptional circumstances,

When considering any planning application, local planning authorities should ensure that substantial weight is given to any harm to the Green Belt. ‘Very special circumstances’ will not exist unless the potential harm to the Green Belt by reason of inappropriateness, and any other harm, is clearly outweighed by other considerations.

I recognise that there is a housing need in the Borough. I also recognise that Guildford has to respect the NPPF. Further, I recognise that certain of the brown field sites proposed in the Horsleys - Thatcher’s Hotel and Bell and Colvill - have some measure of rationality in terms of size and scope.

However, I totally disagree that destruction of Green Belt and extraordinary levels of proposed development in two villages (which would indeed become semi urban if your ill thought out Plan is executed) is in any way necessary at this juncture.

You make it plain in your presentation that your considerations were first for urban development, then for brownfield sites, then for areas of infill and finally for Green Belt. This again makes sense.

It is, however, at this point, that it stops making sense because it was represented clearly to me by the planning officer that this is, of course, a whole Plan. In other words, you are seeking to pass the Plan in its entirety. Once accepted, you will be seeking quick wins. What will be quicker than building on green fields?! So much easier than an urban development. When challenged, the planning officer agreed with my assessment. In other words, the nonsense about Green Belt being the last to be considered is totally misleading. In fact, it will likely be the FIRST to be developed. That is a travesty.

It may well be that we need the number of houses in the Borough by 2033 that we envisage today, but equally it may well not. Such is the political uncertainty that realistic projections are well nigh impossible. To build on Green Belt way, way ahead of any necessity to do so is borderline criminal vandalism. The Council is perfectly well aware that, once the Horsleys are removed from the Green Belt, there will be a deluge of planning applications which, given the extraordinary
scale of your awful current Plan, will be almost impossible to resist. The utter ruination of two wonderful VILLAGES (that is what they are) would be an appalling misuse of your power.

I urge the Council to think again. The Plan absolutely MUST be altered to a structure whereby housing is built in the same order as was assessed: urban, brown field, infill and finally, and only when absolutely necessary AT THAT TIME AND NOT BEFORE, Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

wish to register objections to the local plan job 13,860 new proposed houses, as not sustainable.

>>> There will be damage to local communities, these will not be villages any more.

>>> We need to check unrestricted sprawl of large buildup areas, We need

>>> to protect our Green Belt land and fields.

>>> We live here because it is a village and surrounded by green fields and farmland.

>>> We like the village atmosphere, knowing our neighbours and meeting them in our villages, being part of a small community.

97% of comments are against this policy, and the damage to local communities, there will not be any villages any more, an unrestricted sprawl of large built up areas.

We need to encourage development of urban land.

Leave some of our villages in Green Belt areas, we must preserve our countryside for future generations.

>>> I OBJECT

>>> To the huge influx of traffic this planning will cause.

>>> Our little country roads cannot cope with the traffic as it is. The condition of our local roads is Appalling! Pot holes everywhere, causing dangerous driving, trying to avoid the holes, damaging cars.

>>> We have narrow country roads, not suitable for hundreds more ‘large family cars’.

>>> We don’t want yellow/white lines all over our village and road signs, which are quite unnecessary, which will only increase with your planning proposals.

The footpaths are few and far between, and narrow. We don’t want huge expansion of roads and paths to accommodate thousands more people just because they will have thousands more cars!

>>> I OBJECT

>>> To the lack of facilities suitable for thousands more people using our Doctors Surgery.
We cannot get an appointment within a week as it is, there is nowhere to expand the Surgery, are you planning to build another?

The local hospital The Royal Surrey is overcrowded already, there is nowhere else for us in our villages fro go To the influx of thousands more families with school age children, when our local junior school, The Raleigh, is full and they want to move to a larger site now! If they took one of your sites and you took over their 2 sites, at least the planners would have a few hundred more houses and the school would be able to accommodate more new children, but only a few! Not the hundreds you propose to bring into our little villages.

We cannot accommodate these new children into the local Senior schools either. Where do you propose to build these new schools?

We are villages, people want to move here, as we did because of the quiet, the fields, the village atmosphere, and the safety of a village.

I OBJECT

there is no infrastructure which has been confirmed.

The flood plans in these areas get flooded every winter. West Horsley is known for being a flood plain area, totally unsuitable for hundreds more houses.

Thames Water has advised that the current wastewater network is unlikely to support the demand from all these developments!

I OBJECT

To the overcrowding at our shops, we have two little parades of shops for the use of the two villages, not thousands more people using them. There is only limited parking, only one little supermarket, Budgens, and no access to any larger Supermarket.

The train does not take us into Cobham centre, only Stoke D’Abernen, miles away from the Cobham town centre, how do all these new people get to ships?

We have no bus which has a regular timetable to Cobham, our nearest town, there would have to be in place public transport regularly into Cobham and Guildford.

I OBJECT

To the state of our roads when thousands more people will be using them. The Drift, which is a narrow lane from West Horsley to Effingham, is already used by lorries, coaches from the schools, and many local businesses, it is full job potholes from constant use, how is that going to cope?

All our roads are narrow, we are a village, the drainage is already a problem through the village every winter.

BROWNFIELD ARE BEING IGNORED

We need more houses in the centre of towns, not out in our villages, therefore using more cars, more pollution, more congestion on our already crowded roads.

Recycle derelict and urban land.

No exceptional circumstances have been disclosed to Green Belt boundaries should not be changed through the planning process

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to all the above plans as they are an attack on the local green belt and are based on unsubstantiated housing needs.

I also object on the grounds that they are a disproportionate development in our area of the borough.

They do not take into consideration the lack of schools and medical facilities but above all they will have a devastating effect on the A247. Plans already agreed – ie the Send Marina, and the additional houses on the Vision Engineering plot will be more than enough to bring this road to rush hour standstill and the Tannery Lane crossroads, already difficult for large commercial vehicles will become an even more hazardous accident spot. Plan A42, the Clockbarn Nursery development will be especially detrimental at that spot.

The short section of the A247 between the Burnt Common roundabout and the new north & south A3 slip roads will have to absorb all this new local traffic but it will also attract those who currently go through Ripley.

A traffic survey of current levels would surely confirm that there are certain times of the day when we can take several minutes to gain access to the road.

I most strongly object to the inevitable increase in air pollution and noise.

It is sad to think that we would have to endure even higher levels of both when in our gardens, any further increase will be a threat to health and too much to bear.

To me it is transparently obvious that all the developments are blatant attempts to make money at others expense. The people behind them will make money by making all the local residents’ lives less enjoyable. Traffic problems are already bad. It is difficult to leave the house and turn left in the morning. Turning right would be unthinkable.

If the plans are allowed to go ahead this will be a triumph of greed and conspiracy of greedy people against the common good.

As an elderly person I am sad to read of the over development of these green villages! I have lived here for many years and it is an oasis in what I thought was Green Belt. I have put up With very poor drainage even flooding and so without a huge infrastructure more houses are going to cause much flooding. The pressure on these roads and and villages will change the area into another Woking,
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

DISPROPORTIONATE NUMBERS OF NEW HOUSING IN EAST HORSLEY I OBJECT to 533 new houses. This is a disproportionate number for this part of the borough. 23% of the Plan's new housing is in the area of the Horsleys, Ockham, Ripley and Send, a rural area that has only 0.3% of GBC population. The infrastructure will collapse under the strain and chaos will ensue.

SITES

1. SITES IN EAST AND WEST HORSLEY

I OBJECT to Sites A36 to 41 inclusive. They will effectively destroy these historic villages. New housing will put an intolerable strain on facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewerage and surface drainage to name but a few. The housing density is inappropriate and far greater than anywhere in the locale at present.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Dear Sir, I write in connection with the consultation period which I understand ends on Mon 18 July. I am open to new housing in the Horsley villages but would like to register my strong objection to a number of changes the proposed Local Plan sets out…

1. I cannot understand the value to anyone in extending the boundary of the village. I called Guildford Borough Council Planning Department today to make sure I could understand the logic behind this but nothing material was forthcoming & so I strongly object to this change.
2. Overall the proposed combination of Thatcher’s, Bell & Colvill, Manor Farm, Ockham Road & East Lane developments anticipates more than 500 new homes. Without new infrastructure (schools, roads etc) this is simply too many for the local infrastructure to absorb.
3. The Thatcher’s proposal is simply dangerous for the local community – there is already a congested junction here & adding 40+ residents here will be a real danger for the community.

I would be happy to discuss my comments with an officer from Guildford Borough Council,

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Site References A36, A37, A38, A39, A40, A41 (The Horsleys) and A35 (Wisley Airfield) I object to the proposal to build some 2,600 homes at these locations for the reasons stated above.

I support those aspects of the Plan in favour of genuine Sustainable Development (S1), strong protection of Surrey Hills AONB (P1), and protection of the Green Belt (P2, provided it is protected in both the letter and spirit of the law)

However, I maintain my objections to the aspects of the revised plan that I believe are inaccurate, unnecessary and unwelcome. I urge the independent Planning Inspectorate to challenge the assumptions and proposals in the draft plan, and to insist on its revision which I consider to be in both the local and national interest,

Re: Guildford Borough Proposed Submission Local Plan (“Draft Local Plan”) – reply to consultation

I am writing to OBJECT to the Draft Local Plan (DLP). I OBJECT to many of the proposals in the latest Plan but the fact that I have not specifically objected to a policy set out in the Plan should not be taken as my agreement to that policy.

General observations

As a resident of West Horsley my over-arching objection to the DLP is the fact that if the DLP is adopted it will result in houses being built on land which is part of the Green Belt. In my view this negates all that the Green Belt represents, namely an area around London designed to prevent over development. The Green Belt was instituted precisely to prevent the kind of development being proposed by the DLP.

I draw your attention to the letter dated 18th June 2014 from Nick Boles MP (Parliamentary Under Secretary of State (Planning) to our MP, Sir Paul Beresford, in which the Minister states that the Government has an on-going commitment to national Green Belt protection, reflecting what Ministers have regularly told Parliament. The letter states that the national policy on the Green Belt is set out in the National Planning Policy Framework (NPPF). The NPPF makes clear that “most development in the Green Belt is inappropriate and should be approved only in very special circumstances. Planning guidance, updated in March 2014, also states that “unmet housing need (including traveller sites) is unlikely to outweigh the harm to the Green Belt to constitute the very special circumstances justifying inappropriate development in the Green Belt”.

I also commend to your attention the paragraphs from the NPPF referred to in that letter which state that when plan-making, Local Plans should meet objectively assessed needs, unless specific policies in this Framework indicate development should be restricted; these policies include the Green Belt and AONB. My emphasis.

Furthermore Paragraph 17 of the NPPF notes that “the core planning principles that underpin plan-making include both protecting the Green Belts and recognising the intrinsic character and beauty of the countryside”.

There are other paragraphs referred to in the letter which point to the need to retain the Green Belt as currently defined. Paragraph 80 notes the various purposes of the Green Belt in particular assisting in safeguarding the countryside from encroachment.

I am happy to provide a copy of this letter in the (unlikely) event you have not had the opportunity to peruse it.

Insofar as the DLP proposals involve building additional houses on greenfield sites within the Green Belt they drive a coach and horses through the objectives of the Green Belt.

OBJECTION: Insetting of villages and moving of greenbelt boundaries
The removal of the village of West Horsley from the protection of the greenbelt is to be deplored and I OBJECT to this proposed action. Furthermore I object to the moving of the existing green belt boundaries to take land outside the greenbelt when currently it enjoys green belt protection. In my view the latter proposal borders on deceitful being intended to facilitate development in the existing greenbelt as it frees what is currently protected greenbelt land from protection. I can see that in some limited cases it is sensible to move the boundary to ensure that part of a person’s garden is either wholly inside or wholly outside the boundary but I do not agree that whole fields should be taken outside the greenbelt boundary as they then become targets for developers. Accordingly, if one takes Silkmore Lane as an example, the existing greenbelt boundary protects all the green fields to the west of the Lane but if the greenbelt boundary is moved as proposed, a large area of the fields will lose their greenbelt protection. That is also the case behind allocated site A37 where the effect of moving the greenbelt boundary is to open up more of site A37 to development.

**OBJECTION:** The GLP Housing proposals lack proportionality.

Research by West Horsley Parish Council indicates that the majority (about 75%) of housebuilding proposed by GBC will take place on Greenbelt land in the Eastern and Western rural areas of the Borough. The remaining 25% of building will take place on brownfield and urban land in Ash and Tongham together with Guildford town centre. This use of greenfield land instead of using brownfield land is disproportionate. I object to this “skewing” of building on previously greenfield sites when it is not clear that brownfield sites in rural areas have been given sufficient prominence. It is well known that developers prefer to build on greenfield land and I suggest that GBC are deliberately choosing greenfield sites (in the greenbelt) in order to facilitate developers at the expense of the lives of residents.

A further **OBJECTION on the grounds of proportionality** is that the proposals from GBC will involve an increase of 35% of new homes in the village of West Horsley. A huge increase in itself but again disproportionate when compared with the much smaller increase in housing in Ash & Tongham (16%) and Guildford Town (11%). Putting those percentages into figures, it is worth noting the enormity of GBC’s plan – 533 houses on large sites in the Horsleys, 60 houses on small sites in the Horsleys, 2000 houses on Wisley Airfield, 400 houses on Burnt Common and 2000 houses at Gosden Hill Farm (on the A3 this side of Burpham).

This makes a total of 4,993 houses within a 5-mile radius of Horsley, not including many smaller sites in nearby villages!!! At the moment there are 2808 houses in the Horsleys (EH 1697, WH 1111). The implications of these numbers are staggering and in my view show the lack of proportionality in the proposals. As a former lawyer I suggest that these numbers alone make the proposals in the plan capable of being challenged in Court.

**OBJECTION:** The housing numbers put forward by GBC are not accurate and are far in excess of what may be required, especially in a “post-Brexit” environment.

It seems to me that the starting point for deciding how many houses should be built is the figure determined by the objectively agreed housing need (OAN). Work carried out by GL Hearn on behalf of GBC to calculate the OAN came up with a figure of a housing need of 693 houses per annum over the period of the Plan. However the work by the Consultancy, NMSS, commissioned by the Guildford Residents Association has come up with a figure of 510 houses per annum. This figure is significantly less than the figure advanced by GBC. If the NMSS figure is more robust than the GL Hearn figure, I suggest that further work needs to be done by GBC to arrive at a figure for OAN on which we can all agree.

The housing figures being used by GBC have never been the subject of proper debate by Councillors nor “stress-tested” by other independent consultants. The Leader of the Council does not appear to countenance the fact that the GL Hearn figure is wrong or indeed needs review.

Such work that has been done (see Councillor David Reeves letter with attached report) to Councillor Paul Spooner of 4th July 2016, indicates that a much lower figure for new houses than GBC propose, is required. This work is consistent with the work done by NMSS.
OBJECTION: Roads and Transport Infrastructure: Sustainable transport for new developments

The expansion of the houses in the village of West Horsley by a figure of 35% is not sustainable. There is only one shop, no post office and a very limited bus service through the village on weekdays only – the village cannot accept high volumes of new housing development of the scale of that proposed.

Even with the present levels of housing there is excessive traffic travelling through the village at peak times. The areas around the schools (Raleigh, Glenesk and Cranmore) are particularly busy with the “school run”. The proposed increase in development will put even more pressure on schools and medical services which are already stretched.

There is no mention of the provision of additional schools, roads and transport for West Horsley which development on the scale proposed requires.

Whilst Horsley station has frequent trains to London and Guildford 7 days a week there is an inadequate number of parking spaces at the station with the car park often being full during the week. An increase of housing in the villages of East and West Horsley will increase pressure on station parking and traffic movements to and from the station. Getting to the station is difficult at the best of times as Glenesk school is on the main road leading to the station and people dropping off children at the school frequently block the road thereby adding to the traffic congestion. An increase in development will only make this situation worse.

The number of extra cars on the roads which would result also means an increase in undesirable exhaust emissions.

Affordable homes

The proposed development of 385 homes on the allocated Green Belt sites at much higher densities than currently exist in the village settlement would be totally out of character with the existing mix of different housing styles and layout of the village.

The so-called need for new houses in West Horsley is not proven – the 2014 Housing Survey carried out by the West Horsley Parish Council showed a limited need for up to 20 affordable homes for local people who want to remain in the village. Those are young people and also older people who want to downsize to a smaller property. The definition of “affordable housing” is that the price of an “affordable house” should be 80% of the market value. Given that the average price for houses in the Horsleys must be close to £1 million, it is difficult to see how building even “affordable housing” in the Horsleys is going to solve the housing shortage.

Where are the jobs?

I note that GBC has not identified any jobs for West Horsley. When I looked at GBC’s maps at the Horsley Cricket Club event in 2014, I noticed that the jobs were west of Guildford. It seems to me that housing should be concentrated in the areas where there are jobs. Building houses in West Horsley will exacerbate the traffic congestion and pollution as workers will need to drive from the villages to get to work. Furthermore, residents who work away from their homes will create dormitory clusters which will be of little value to the village.

Jobs – chicken and egg

As I understand the reasoning behind the need for more housing and what drives the housing numbers, is the quest for more economic growth. But there is a fundamental flaw in the GBC thinking which is that a proportion of the jobs identified by GBC comes from the construction of the new houses. And it is these jobs which are responsible for increasing the figures quoted as Objectively Assessed Housing Need. A true “chicken and egg” situation.

Who gets the benefit of these proposals?

It is not clear to me why this plan has been drawn up in the way it has. It is difficult to see a more destructive approach to our countryside. I suggest that the only people who will benefit from the developments proposed by GBC are the developers!
No one in the villages will benefit one iota! Quite the contrary – our lives will be made a misery both while the development takes place and when it is finished. There is nothing in the DLP which gives me or my family any benefit whatsoever. I am left with the clear impression that this whole exercise is being done for the glorification of the Council and to help developers make money. Indeed, the whole thrust of the Council’s policy is wrong – we should be developing business and jobs in areas of the country which require regeneration and whose infrastructure can handle increased development.

**Conclusion**

I very much hope that you will take my objections into account when you consider why and whether it is necessary to build on green field sites which will break up the Green Belt as it is currently drawn.

I am not opposed to all development but I feel strongly that if you build on the countryside as we know it, future generations will no longer have it to enjoy. Once it is built on it is gone forever.

Please let me know if I can be of further assistance.

</tr>
</tbody>
</table>
This is completely unacceptable to everyone that lives in East and West Horsley, we treasure our village environment and it is completely unnecessary to seek to increase our village, by over 500 residential units against an existing supply of circa 1,000 residential units.

I have not met anyone in these villages who are in agreement with amending the green belt and it is simply unacceptable that this is even being considered.

It will have a devastating effect on our homes and our lives. Any consultations on these plans and the objection of local people should not be ignored.

You will be quite aware that the Horsley villages do not have the infrastructure or facilities for its population to be doubled. The one school is oversubscribed and it is already impossible to get an appointment at the medical centre.

The identification of the various sites has been undertaken in an incredibly unprofessional way with little thought to access/egress, topography or risks of flooding.

I therefore strongly object to your proposals. I would also stress the following:-

- Exceptional circumstances are required for any changes to Green Belt boundaries;
- Unmet housing need is not such a circumstance;
- Green Belt and AONB are reasons for not meeting objectively assessed housing need;
- These issues have been drawn to the Planning Inspectorate's attention.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I am writing to express the strongest opposition to the proposals, set out in the recent Guildford Borough Council Draft Local Plan document, to support development of 533 new houses in Horsley, of which 385 will be within West Horsley. Additionally, I oppose the extension of the village boundaries for East and West Horsley, and removal of the village areas within these boundaries from the protection of the Green Belt. In addition, I object to the inclusion of the Wisley Airfield site as a potential development site.

I believe that the proposals are extremely misguided, and would be highly damaging to the existing communities of East and West Horsley. In addition, they are strongly opposed by the residents of the area, and therefore the plans are at odds with the localism agenda.

I am a Chartered Surveyor with 15 years experience in commercial real estate and over 4 years experience working in urban regeneration. As such, I have a clear professional understanding of the issues involved and also of the economics of development. I have lived in West Horsley for over six years and intend to be a long term resident, and therefore am deeply concerned about the proposals set out in the draft plan.

My opposition can be summarised under the following headings, which I will consider in turn:

1. Concern over overall level of housing development for Guildford Borough.
2. Disproportionate housing development for West Horsley, compared with other settlements in the Borough.

---

**Disproportionate Level of Housing Development in West Horsley.**

Not only do I oppose the level of green field housing development for the Borough as a whole, I also feel that the levels of housing proposed for West Horsley are disproportionate. The draft plan proposes 385 houses in major sites at West Horsley, with another 148 in close proximity within East Horsley. Additional "infill" developments are also proposed. West Horsley is a parish of 1,111 homes, but there are only 723 houses within the main settlement area of West Horsley (ie within the village boundaries). Therefore, the proposals for major sites alone would add 53% to the housing stock of the village, and 35% to the housing stock of the parish as a whole.

This is grossly disproportionate and beyond the level proposed for other settlements around the Borough- and particularly for Guildford itself, which does not seem to be taking its fair share of the proposed development.

West Horsley Parish Council has carried out a Housing Need Assessment, which showed a requirement for just 20 affordable homes. The proposals are therefore totally out of line with the requirements of the local community.

**Effect of the Proposals on West Horsley.**

I believe that the plans would have a severely detrimental effect on the character of the village. Given the profits to be made by housing development within Surrey, once sites are designated for future development, that development will surely be brought forward quickly, and to the maximum density permitted.

Specific comments are as follows:

- Several of the proposed development sites (particularly Manor Farm, ref A3 8/ID 15 and East Lane, ref A41/ID 2063) would have the effect of contributing to a merged settlement of East and West Horsley, when I believe that the open character of the countryside here should be protected by safeguarding the countryside along East Lane, Long Reach and Green Lane which continues to separate the two settlements and which contributes to the rural character of West Horsley. I understand that there is a proposal for the Raleigh School to develop a new site on the East Lane site, which again I object to for the same reason of impact on rural character.

- The suggested density of housing is totally out of character with the rest of West Horsley. Building to this increased density is partly inappropriate in the peripheral locations which are planned for development.

- The proposed development sites are on the outer edge of the village and so would reasonably be expected to generate considerable additional traffic, as the development will be some distance from the station and the centre of the village. Anyone who has spent any time in and around the village could tell you that the network of rural roads and lanes which surround the village simply do not have the capacity to serve this level of...
proposed additional development, and any extension of the road network would not only destroy the character of the village, but also the surrounding roads which would continue to pass through Green Belt land.

- I have strong concerns over the capacity of infrastructure such as drainage and sewerage.

- Localised flooding and poor surface water drainage is already a significant problem in the Since moving to the area I have witnessed first-hand flooding along Ockham Road North, Green Lane and Ripley Lane. This has occurred on one or more occasions each winter in recent years and therefore is clearly not a ‘once in a decade’ or ‘once in a lifetime’ event. The fields planned for development must play a role at present in helping to drain this area, and additional development would both remove this drainage capacity and create additional issues of surface drainage.

- Additional development of any significant scale will cause significant strain on the village school and doctors surgery (the later located in East Horsley), which are running close to capacity. Adding extra capacity to these services cannot easily be resolved, even if possible through entirely developer funded schemes, without fundamentally altering the geographic make-up of the village as there is little or no land in the core of the village to accommodate any additional services. Developing these facilities on the periphery of the village (which as noted above is now proposed for a potential extension of the Raleigh School) would once again fundamentally alter its character and position in its rural context.

- East and West Horsley are thriving villages, which do not need artificial support through rapid expansion of population.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Views of the Local Community in West Horsley.**

The strength of feeling throughout the village against the proposed relaxation of the planning guidance is considerable. This opposition is shared by all of the local residents that I have spoken to, as well as by the West Horsley Parish Council.

I believe that the views of those who have chosen to make their homes within the community should be paramount when making decisions which will have such a radical and irreversible impact on the village.

Indeed my view is supported by recent planning guidance which supports greater involvement of local communities in the planning process. If localism is to mean anything, Guildford Borough Council should be listening to the views of the local community whose lives and wellbeing would be so adversely affected by the plans.

Removing East and West Horsley from the Green Belt, and encouraging additional development on such a scale would exclude and ignore the strong feelings of the local community.

**Conclusion.**

In summary, I strongly oppose the current drafting of the Guildford Borough Council Local Plan in relation to West and East Horsley. In particular, I oppose the removal of West Horsley and East Horsley from the Green Belt, the extension of the village boundaries beyond their current extent, and plans for 533 houses across the two villages (of which 385 are planned for West Horsley), all of which are at unsuitably high densities, out of keeping with the current character of the villages.
So far as I am aware, no 'exceptional circumstances' have been put forward, let alone proved, in order to justify this development in the Green Belt.

I feel that the plans for West and East Horsley contained within the Local Plan are inappropriate, and ill-considered and would be deeply damaging to our community.

I urge you to listen to the views of the local community and also to place more value on the exceptional quality of the rural spaces and villages of the Borough.

Comment ID: pslp173/652   Respondent: 8768161 / Adam Johnson   Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - West Horsley North

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the level of housing development proposed for West Horsley. Not only do I oppose the level of green field housing development for the Borough as a whole, I also feel that the levels of housing proposed for West Horsley are disproportionate. The draft plan proposes 295 houses in major sites at West Horsley, with another 100 in close proximity within East Horsley. Additional "infill" developments are also proposed. West Horsley is a parish of 1,111 homes, but there are only 723 houses within the main settlement area of West Horsley (ie within the village boundaries). Therefore, the proposals for major sites alone would add over 40% to the housing stock of the village, and 26% to the housing stock of the parish as a whole. This is grossly disproportionate and beyond the level proposed for other settlements around the Borough - and particularly for Guildford itself, which does not seem to be taking its fair share of the proposed development.

West Horsley Parish Council has carried out a Housing Need Assessment, which showed a requirement for just 29 affordable homes. The proposals are therefore totally out of line with the requirements of local residents.

I object to the plans which would have a severely detrimental effect on the character of the village.

Specific comments are as follows:

- I continue to object to West and East Horsley being inset from the Green Belt. This proposal has not changed since the 2016 consultation.
- The suggested density of housing is totally out of character with the rest of West Horsley. Building to this increased density is particularly inappropriate in the peripheral locations which are planned for development.
- The proposed development sites are on the outer edge of the village and so would generate considerable additional traffic, as the development will be some distance from the station and the centre of the villages. The network of rural roads and lanes which surrounds the village simply do not have the capacity to serve this level of proposed additional development, and any extension of the road network would not only destroy the character of the village, but also the surrounding roads which would continue to pass through Green Belt land.

- The proposed development site at Manor Farm (ref A38) would have the effect of contributing to a merged settlement of East and West Horsley. I believe that the open character of the countryside here should be protected by safeguarding the countryside along East Lane, Long Reach and Green Lane which continues to separate the two settlements and which contributes to the rural character of West Horsley.
- I have strong concerns over the capacity of infrastructure such as drainage and sewerage.
- Localised flooding and poor surface water drainage is already a significant problem in the area. Since moving to the area I have witnessed first hand flooding along Ockham Road North, Green Lane and Ripley Lane. This has occurred on one or more occasions each winter in recent years and therefore is clearly not a "once in a decade" or "once in a lifetime" event. The fields planned for development must play a role in helping to drain this area, and additional development would both remove this drainage capacity and create additional issues of surface drainage.
- Additional development of any significant scale will cause significant strain on the village school and doctors surgery
(the later located in East Horsley), which are running close to capacity. Adding extra capacity to these services cannot easily be resolved, as there is little or no land in the core of the village to accommodate any additional services. Developing these facilities on the periphery of the village would once again fundamentally alter its character and position in its rural context.

• East and West Horsley are thriving villages, which do not need artificial support through rapid expansion of population.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I would like to register my heartfelt objection to your "new local plan" for East and West Horsley.

1) Our 2 villages are over crowded already. We have congestion on our narrow roads through the villages especially at certain times of the day when schools open and close. With the 533 proposed new houses we could have at least 1000 more cars trying to use the Ockham Road, East Lane and The Street, as well as the A246.

2) Commuters cannot find parking spaces at the station already and it is often difficult to park at the shops.

3) Our medical centre is already over stretched with several weeks waiting time to see a doctor

4) Our 2 local state schools are full to capacity - where are all the poor children going to find school places and how, as our Borough Council, can you sort that out?

5) In addition to all this there is a proposal to build 2000 houses on Wisley airfield.

6) Have any of the planners given any thought to how all this could cause flooding, pollution, not to mention ruin the lives of the people who already live here?

7) Finally, we were promised categorically by the Government that the Green Belt would be [text unreadable]. I was at a meeting when Paul Beresford made that promise. What has happened to that promise?

It is with a very heavy heart that I find myself yet again having to complain and object to the most unbelievably stupid proposals featured in the current Proposed Local Plan.

We are a Green Belt village. It is then, by definition, a rural village. The idea of removing us from the Green Belt is hideous and wholly unjustified. Quite apart from the significant environmental impact of such an event, there can be no justification for it based on the flawed evidence on which this proposal has been made.

It seems there is a need, if the plan is to be believed, for huge numbers of houses to be built in our village. A recent local survey (taken in 2014) found, in fact, that we had a need for possibly no more than 20 or 30 houses (max) of one and two bedrooms. Possibly including a handful of three bedroomed homes too. I acknowledge that such development might indeed have to happen. But we might, surely, be able to find areas of brown-field sites within our village to allow such building to have minimum impact on our community.

Our need is for a small number of SMALL homes. Guildford has consistently ignored the small swelling principle which has exacerbated our local situation. Small dwellings have been allowed to be knocked down to be replaced by five bedroomed “Des Res”. Our small dwelling stock has been “raped” and with it some of our architectural history and all for greedy development of which we have no need.

Given that we are situated at a convenient distance from London, ANY housing would be instantly swallowed up by those who wish to move out of the city to live in a quieter, more rural environment. Of course, the rural environment would be gradually whittled away and within the six years in which it is proposed to build 600+ in our village, we would no longer be rural, but distinctly urban. The proposal is ill-conceived and foolish. indeed it is environmentally criminal.

Such development, were it allowed to happen, would be change enough but given that our roads are very dangerous because of serious surface damage and too many motorists, the whole area would become a nightmare in which to move around. There is no mention of infrastructure in the plan except that it might be something that developers would be expected to contribute to in return for the right to build. No mention either of flood control. We suffer considerably from long lengths of road which become flooded and impassable with even a modest rainfall. If we have flash flooding, it is sometimes impossible to move in or out of the village.

Our schools are just about able to cope with the current population of our village and so it is with the medical centre and the car parking in the station in the adjacent village of East Horsley.

Movement through the village is difficult at peak times. Walking is not a safe option especially for unaccompanied young children because the pavements are irregular, uneven and very narrow. There is no way of widening either road or pavement and absolutely no possibility of introducing safe cycling routes.

An obvious answer would be better public transport, but that is not an option either, since subsidies to bus companies have been reduced and we have but a skeleton bus service which is absolutely useless to the work force as the buses do not in any way coincide with times when the work force needs them.

Much mention is made of the need for “Affordable Housing”. In the mind of many, this equates with cheaper housing. How can this be when affordability is based on 80% of the average house price, which in this area is somewhere in the region of £375,000/ £400,000 ?! Anyway, the rules which demand that developers should provide a percentage of
“Affordable Housing” in any development are far too flimsy and vague and left to the pleading power of greedy developers.

Despite the pages of dense prose and miles of “difficult to get your head around” statistics, there is no doubt whatever that this Local Plan is ill-considered, ill-conceived, inaccurate and flawed. It is wholly unacceptable that the very council which should be protecting the environment for its residents is now turned major facilitator of a cruel destruction of the kind of landscape and lifestyle that makes our borough desirable as a tourist and visitor destination. We stand to see our borough scarred beyond recognition, and we will also find our economic wellbeing seriously damaged.

The greatest insult of all is that this proposed plan is to be inflicted upon us by a Conservative council, whose government pledged to protect the Green Belt!!!!!!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I totally disagree for the plan to remove the Horsleys from the Green Belt. There is no corresponding plan for infrastructure and this is currently over-loaded as it is. This means schools, roads including speeding cars and the lack of Surrey CC money to do anything about any of it. The rail station car park is full.

The proposals are totally out of kilter in terms of proportionate increase.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to object to the Local Plan proposals for West Horsley on the following grounds:

1. Objection to Removing West Horsley from the Green Belt

The Local Plan states the “we will continue to protect the Metropolitan Green Belt” yet the Local Plan is taking West Horsley out of the Green Belt. West Horsley is a distinctive rural village and its green belt status is essential to ensuring the character of the village remains.

What is the exceptional circumstance for removing the village from the green belt as required under government guidelines? It cannot be justified on the basis of unfulfilled housing. There is no explanation as to why West Horsley has been chosen to be removed and no justification for doing so.

1. 2. Objection to the Number of Houses being built in the 4 Proposed Sites (Policy A41/Policy A40/Policy A38 and Policy A37)
The Local Plan has suggested a 35% increase in housing for West Horsley by 2022. What is the justification for this?

The Guildford Borough Economic Strategy document makes no case for locating large numbers of new homes in West Horsley – this is a village with no shops, no post office, no petrol station, no train station, no medical centre and a very limited bus service. It also offers no employment opportunities for residents. The National Planning Policy Framework requires that new residential development must be limited in quantity by the availability of infrastructure and local facilities – this policy has been ignored in the Local Plan.

The density of houses on the proposed sites is completely out of keeping with the rest of the village and will change the character of the village forever. The National Planning Policy Framework requires that new residential development must respect the character and density of housing in the area – this policy has been ignored in the Local Plan.

My house is currently backed by open fields and looks over open fields. If the new plan is implemented I will have 135 homes built at the bottom of my garden and 90 across the road from my front door – this will be like living in a completely different community in a different area of the country and is a step too far. It definitely will not be respecting “the character and density of housing in this area”.

1. Specific Objection to Policy A41

I am horrified that the Local Plan has included this new site with a proposal to build 90 homes on the open fields (green belt land) of West Horsley (Policy A41).

This new site – Policy A41 – is one of the most important rural aspects of the village and if allowed to continue will totally destroy the character of West Horsley. West Horsley is a rural village and one of its main features is that on the entry roads to the village (mainly Long Reach in this instance) there is a vista across fields as there is only development on one side of the road. These fields do not abut the currently defined village settlement on any side and so cannot be considered an extension of the settlement or infill at all. I cannot understand why this piece of land would have been picked for development at all as it does not satisfy any of the criteria for development. If allowed to develop 90 homes on a current site of open fields surrounded by undeveloped countryside it makes a mockery of the consultation process and the government’s guidelines on building in the green belt.

I trust you will take these objections seriously and reconsider your plans for West Horsley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The village of West Horsley in particular will not cater for large numbers of extra houses being added to it. There is only one over-subscribed State Primary School, a heavily over-subscribed Health Centre and youth facilities are few. The infrastructure of roads is already poorly maintained and certainly will be unable to cope with much more traffic without considerable change. Changes would be difficult since there is linear development of housing along many of the roads preventing widening.

The increase in the provision of low cost housing maybe a worthy ideal in theory but in practice it would put even greater pressure on the health and educational facilities of the village since these families would be the very ones most likely to use the educational facilities in particular. At least if the housing were of the more typical market range in Horsley the numbers would be less and the use of facilities would be less onerous.

The land in the Northern section of West Horsley (A40) is a most unsuitable site for development.

The southerly portion of it is in fact used and rented by me for my sheep and I have maintained it for the 20 years I have lived here in the house that was the former farmhouse attached to this land.

I can verify that this land is poorly drained and that the inclusion of this in Flood Zone 1 (low risk) is potentially an under assessment of the risk to it. Every year I have lived here the fields, particularly towards the northern sector of the half I use are both splashy and muddy for many winter months. I have attached photos showing a quite typical outcome of heavy rains, and these are in the southern sector where my house is.

You will note that my front drive that leads off the end of Nightingale Avenue receives the bulk of the run-off water from the road and many of the gardens. The field clearly acts as a sump and drainage area for this to soak away and infiltrate but development of the fields would aggravate that very drainage effect creating further problems for my garden, and possibly house, and ultimately others in the lower portion of the road.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I am writing to object to the local plan, and the proposed development in East and West Horsley.

- **Green Belt** - the proposed policy re the green belt is totally inappropriate. The Green belt forms the cornerstone of the region, and should be used a basis of planning. We should be celebrating it, it is one of the highlights of the region, not trying to destroy it. The villages are a huge part of that, and there should be no removal of the villages, particularly the Horsleys, from the Green Belt. No ‘exceptional circumstances’ concerning this have been demonstrated, and I totally oppose the plan to inset the villages.

- **Extending the boundaries of the settlement area is unjustified.** No sound, evidence-based reasons have been given for this, and this seems only to be used to earmark land for a totalement inappropriate amount fo additional development.
  - The Horsleys offer a rich and varied mix of well established low housing density settlements with a considerable number of historic buildings.
  - Positioned on the north side of the North Downs, partly in the Surrey Hills AONB, it attracts a considerable number of recreational visitors (walkers and cyclists) through the seasons each year.
  - This is also a reason why many of the residents have chosen the area in the first place, and the proposals would destroy the communities and countryside loved and nurtured by residents.
• I believe the evidence for the proposal is flawed.
  ◦ For example, the key Evidence document 'Guildford Borough Economic Strategy 2013-2031' makes no case for locating large numbers of homes in West and East Horsley or neighbouring villages.
  ◦ Station Parade is designated as a “District Centre” This classification results form a complete misreading of the character and nature of facilities in the (very small) vilage centre, and would inappropriately target the area for future urban development. I think some of the figures, eg the number of post offices used to come to this conclusion were just wrong.
  ◦ The inflated number of houses proposed, flows from a Strategic Housing Market Assessment, the modelling of which is not revealed to the public, nor I believe to GBC. The target is then further inflated by GBC to give a population growth over 2/3 higher than official national population estimates for population growth in the Borough. Can you review these numbers?

• Flooding: The site behind Ockham Road North in East Horsley is partially a level 3 flood risk area, and local residents are well aware of how much standing water there is in their gardens after rain. Building on such land will only exacerbate the problem. We already know what happens to local roads when it rains – the drains can’t cope.

• Pollution: The large increase in volume of traffic will cause an increase in nitrogen dioxide and particulates in the environment – already a cause for concern in several areas in the Borough.

• The impact on infrastructure and facilities, which are already stretched to breaking point, does not appear to have been considered.
  ◦ Local Road Network: The impact does not appear to have been considered, for example int he case of the Wisley Airfield the SCC report states that “consequently, it indicates that further thought may have to be given to managing traffic in this area as part of a transport assessment should the development be progressed”. Surely the infrastrure and any changes need to be considered before signing off a development proposal.
  ◦ Traffic and parking: Assuming that every new house has at least 2 cars, this means potentially 6,000 more cars within a three mile radius of the villages. The impact on local roads will be tremendous. Parking at Horsley & Effingham junction stations (which are already full), at the shops, at the medical centre and at the village hall will all be affected.
  ◦ Schools: Local schools are already at capacity – where will newcomers go to school? No extra places are planned in the Horsleys, and the school places proposed at Wisley Airfield will not planned until many years into the project.
  ◦ Medical facilities: Similar situation to the schools.

The total number of houses proposed in the Horsleys, over 500, is on such a vast scale compared with the size of the villages currently. Surely, a reexamination of the number and proposed sites is required. If it wasn’t so sad, it would be laughable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
This is totally unfair for everyone that lives in East and West Horsley, I love my village and it is completely unnecessary to seek to increase our village by over 500 residential homes. These proposals will have a massive detrimental effect on our homes and our lives. All the initial consultation on the strategy and the various objections appear to have been ignored.

East and West Horsley as villages do not have the facilities for their population to be doubled. Our school is oversubscribed and so is our medical centre.

I therefore strongly object to your proposals.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I have lived in Horsley for most of my life and I am writing to object to the above proposed local plan and in particular to the proposals for future housing in West Horsley involving taking land out of the green belt.

This is unacceptable to all who live in West Horsley, we love our village environment and we are not prepared to accept an increase of potentially 400 residential homes, a massive increase in the size of our village.

No-one in the village wants this nor does anyone living locally want the village removed from the Green Belt, it is unacceptable and undemocratic that this is even being considered.

This will have a terrible effect on our homes and our lives. You need to listen to the views of local people, it is our village and we are not going to accept these proposals.

West Horsley as a village does not have the infrastructure or facilities for its population to be increased like this. The school is full and it is impossible to make an appointment at the medical centre.

The identification of the various sites has been undertaken in a cavalier unprofessional fashion with no thought to access/egress, topography or risks of flooding.

I therefore strongly object to your proposals.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Policies A37, A38, A40 and A41. There are four policies proposed for development sites in West Horsley involving the potential construction of 405 homes in total and resulting in an increase in the village housing stock of 36%. All of these four sites are currently in the Green Belt. This proposal is totally excessive for a small rural village. It will lead to the total destruction of the character of this pretty and historic village and pose an enormous strain on local infrastructure. Accordingly, I OBJECT to these four policies.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I wish to make the following comments and objections on the above-mentioned Local Plan:

1. The reduction in the proposed number of new homes in West Horsley, at 90, is an insult to all those who previously objected to the Guildford Local Plan. It does nothing to reduce the very large number of dwellings proposed on Green Belt.
2. The eastern side of the Borough is now scheduled to take an even greater proportion of new homes in the Green Belt.
3. It is totally unacceptable that Guildford is choosing not to constrain its overall housing growth, as many other Councils have done, to protect Green Belt. The objectively assessed housing target will mean that, at the end of the Plan Period, Guildford has grown by nearly 25%, nearly double the Office for National Statistics prediction for the growth of Guildford.
4. Nothing has been put forward since last year's Consultation to improve the sustainability of the West Horsley development sites and thus meet National policy requirements. The local infrastructure will not be capable of coping with the extra volume of traffic and demand for services arising from the proposed new dwellings.
5. Flawed evidence continues to be relied upon to justify overexpansion.
6. More homes are needed on brown field sites in Guildford town centre, which is where these are needed, rather than on Green Belt around our villages.
7. Finally, **I OBJECT MOST STRONGLY TO NO CHANGES BEING PROPOSED SINCE THE 2016 CONSULTATION TO INSETTING WEST AND EAST HORSLEY FROM THE GREEN BELT.**

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I wish to strongly object to the proposals in the Local Plan for the Horsleys, particularly West Horsley. The very slight reduction in the number of proposed houses in West Horsley is welcome but it is insignificant compared to the number still proposed in the Local Plan for Green Belt land in West Horsley.

2. Guildford Borough Council's new Local Plan doesn't address the reduction in the objectively assessed housing target as many other councils have done in order to protect Green Belt. It has not listened to the opinions of Surrey residents who object most strongly to the number of proposed houses to be built on the Green Belt.

3. The belief that local residents will adopt cycling or walking rather than their cars to travel to the local facilities is a fallacy. Cycling on many of our local roads is a risk and for many walking is not always an easy option. The Local Plan 2017 still doesn't address the problems of lack of infrastructure such a large number of proposed houses in West Horsley would necessitate.

4. I object to no changes having been proposed since the 2016 consultation to insetting West and East Horsley from the Green Belt.

*Our elected Government has continued to inform the public that our Green Belt is safe in their hands. Our Guildford Borough Council has shown us this not the case as by insetting West and East Horsley it would allow more houses to be built without objection as they wouldn't be built on Green Belt.*

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I wish to express my objection to the Guildford plan proposals for West and East Horsley on the following grounds:

1. The developments would require the green belt boundaries to be changed which is totally contrary to Policy P2: Green Belt and the Countryside which states that the green belt will be protected against “inappropriate development” and I argue with my points below that the development proposals are inappropriate.
2. The density of the proposed developments is totally out of character with the rest of the villages – being much higher than the existing density and the number of proposed homes would swamp and forever alter the character of the existing villages.
3. The road network cannot cope with the volume of traffic at rush hour – adding this number of houses would cause complete gridlock. In addition the state of the roads would become far worse due to the inevitable increase in traffic once the houses are built. The heavy lorries which will come during the building phase will also cause considerable further damage.
4. There is insufficient school space at nursery, primary and secondary levels. The Raleigh School is already looking for a new site as it is too small for the existing children in the village and special provision has had to be made for Horsley children to attend the Howard secondary school. Any news homes will just make a bad situation worse.
5. Medical and dental facilities: - the current provision is too small for the existing communities. It is very hard to get a Doctor’s appointment and almost impossible to get on a list for a National Health Service Dentist. Additional homes would put extra stress on the existing facilities
6. The existing bus service is barely adequate – more homes will not alleviate the issue, just compound it
7. Shops and local services – West Horsley has but one shop and no provision is made in the plans for additional shops and services alongside the hew homes. The parking for the shops and services in East Horsley could not cope with the influx of new homes/residents.
8. The waste water facilities would be unable to cope with any additional homes – it can’t cope with the number of homes that are already in the village, overflowing in Oakham Road North Green lane area.
9. Some of the proposed sites have inadequate surface water drainage – the land gets flooded. Building on land liable to flooding is frankly ridiculous.

In summary the development is inappropriate and the infrastructure would not be able to handle the additional homes / population and should therefore be rejected

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I would like to object to the local plan and specifically the plan proposed by Dandara and their proposal to place a number of homes on the field adjacent to the A246. I feel that this is wrong for the following reasons

- impact on the local schools i.e Cranmore, Raleigh and the Howard. Currently the A246 is used as a route to all of these and in the morning is heavily congested with school traffic, by allowing these houses then the traffic will be delayed making the lives of both the school children and commuters suffer.

- the area is already deemed as both a green belt and outstanding natural beauty. By allowing it then is this going to allow other people who live up Shere road to place disproportionate increases on their houses.

- this will result in the loss of the green belt and outstanding natural beauty for all of Shere road including Sheapleas.

- access onto the A246 will cause chaos as the influx of around 120 cars, assuming that each house has 3, to the already congested road will delay all commuters.

- water supply is currently provided from a tank at the top of the hill and the extra would cause an unnecessary burden on the infrastructure
- there are also slow worms on the site. As you should know these are protected and the land they are resident on is therefore protected.

General to a number of these proposals

- unsupportable burden on the current drainage which is currently creaking

- the school places, there does not seem to be any plan to increase the number of school places in either primary or secondary. As the council has already turned down the planning by the Howard what is the plan?

- the support services such as the medical facilities are inadequate and the extra houses will result in these to cease to function, currently it is difficult to get an appointment to see a doctor, about 1 week, and almost impossible to get an appointment with your registered doctor. This means that you need to explain the symptoms multiple times for those who suffering with a long term illness.

- there does not seem any reason why boundaries of the Horsleys are due to increased barring to allow further development.

- the shops in the centre of east horsley have been falsely classified as a District Centre and would be inappropriate for the development proposed, the result of this is that the inhabitants would need to go the Cobham or Burpham for shopping therefore creating extra traffic.

- there appears to be a Strategic Housing Market Assessment (SHMA) with some mathematical model which we are unable to see and do not believe that the local borough knows how it produced the numbers.

- the density suggested will result in the Horsleys being of a greater than other proposals.

- there does not seem to be any mention of using brown field sites which should be the first consideration.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/3478  Respondent: 8801953 / Sarah Relf  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Finally, I object in particular to development of sites A36 to A41 (East and West Horsley). Building 533 new houses on these sites, plus at least another 90 on small sites is excessive and disproportionate relative to plans for the rest of the borough. The total number of homes in West Horsley will increase by 35%. The rural character of both villages will be destroyed. The Horsleys feel victimised by this plan, which has been engineered by Council leaders representing Ash and Tongham, at the other end of the borough, where, in an astonishing case of political double standards, the Green Belt is actually being extended under Policy P3! Under the plan, rural West Horsley will take 35% of new homes, urban Ash and Tongham 16%, and Guildford urban area only 11%. Such an increase will put unsustainable strain on local facilities and infrastructure, including public transport, parking, schools, medical facilities, sewage, surface drainage and shops.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/309  Respondent: 8802433 / Caroline Russo  Agent:
I am writing to object to the planned proposal for the development of West Horsley as set out in the Guildford Plan. I have been resident in West Horsley since February 2013 and have a 9 year old daughter at The Raleigh School. West Horsley is a delightful village where residents made us feel welcome when moving here.

I grew up in Essex in an area that was within the Green Belt - it was like West Horsley a delightful village surrounded by farmland. The area was removed from the Green Belt and has over the past 15 years been developed and built on removing character, history and atmosphere. The original residents have gradually relocated as my old village is now a commercialised sprawl and extension of local Urban towns. I do not want to see this happen to West Horsley!

Looking at the planned number of homes in the proposal I cannot understand how local infrastructure of Roads, Public Transport, Doctors, Schools, Drain and Sewerage systems can support this number of houses. The roads in West Horsley are narrow and subject to frequent flooding. In several locations there are no pavements or only one side of the road is paved making walking or using a buggie dangerous. This is acceptable based on the current number of residents but should you increase the population of West Horsely as per the plans how do you intend to cater for local residents 'traffic' to the local shops, schools and station etc.

I accept there is the need for some affordable housing within the area for local residents but feel that the proposed addition of 385 houses to be build within a few square miles will make West Horsley into a 'New Town' taking away the attributes that make it special. I cannot comprehend why it would not be more suitable to build this number of houses on a site nearer to an urban town i.e. Guildford where some of the infrastructure is already in place i.e. roads, public transport etc.

I really hope that you take my objections along with the objections of all Horsely residents into consideration before taking the decision to build in our village - a decision that once made and carried out cannot be retracted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
regenerating northern counties, making these areas more affluent and attractive to business, drawing development away from the South and alleviating the pressure around London.

There is no need for so much housing to be built in and around cities such as Guildford. The development needs to happen across the country to redress the balance between north and south and heal the seismic rift in the population which currently exists.

The proposals outlined in Guildford Borough's latest Local Plan for development on Green Belt land cannot and must not be permitted to proceed. The damage caused to villages and natural environments would be irreparable. Development should be restricted to existing brownfield sites and, as I have already stated, spread out across the country.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** PSLPA16/2439  **Respondent:** 8803073 / Elisabeth Stanford  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

As a resident of West Horsley I would like to object to the planned removal of the Horsleys from the Green belt. The "exceptional circumstances" required before taking this action have not been demonstrated.

The proposed number of houses for West Horsley is completely out of proportion with the current size of the village, with 385 new homes being built in West Horsley- a 35% increase on the current housing number of 1,111.

The whole character of the village will be completely change forever, plus the infrastructure is not present to support this number of new people and cars. Local and roads are already overloaded, schools are already full, drainage is inadequate.

Whilst agreeing that some new housing is required in West Horsley, this massive development is not the answer and I hope that you will consider the feelings of local residents.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** PSLPA16/630  **Respondent:** 8804321 / Debbie Drury  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object most strongly to the proposal to remove West Horsley and East Horsley from the Green Belt. The Green Belt was created to form a lung for our increasingly crowded cities and to create space between villages to allow them to maintain their character; to build on it would be an entirely retrograde and irrevocable step.

West Horsley, where I live, seems to be a target for development to a far greater extent than other areas in the Guildford Plan and I can see no legitimate reason for an increase of housing in this area of at least 35%. Most of this proposed development would lie outside the current settlement areas and would have an immense and detrimental impact on what is, currently, a rural and peaceful village on the edge of an Area of Outstanding Natural Beauty. The village contains a substantial number of historic buildings, particularly in the Conservation Area, many of which are listed and have no
foundations and the inevitable increase in traffic caused by building on this scale would without doubt cause major
problems for many of these ancient buildings. Additionally, if the Wisley Airfield development goes ahead (despite
being unanimously refused I understand that this is, extraordinarily, still a serious possibility), the suggested road scheme
would inundate the Horsleys with traffic turning the area into a racetrack.

The proposed number of houses suggested for West Horsley is entirely unsustainable and will entirely change the
character of this village. Nor does there appear to be any provision for our already overstretched infrastructure: we have
a junior school which is bursting at the seams, a doctor's surgery which is totally overstretched, drains which cause
regular problems due to over capacity and flooding issues on the roads (The Street and Ripley Lane in particular are
frequently impassable in the winter), we have a derisory bus service and a station car park which is full by 9am each day.
Add to this the fact that West Horsley's Post Office has closed and the shop is shortly to follow it and you have a picture
of a village which is not suitable for non drivers and which would not in any way be able to accommodate the numbers of
new inhabitants suggested by the plan.

I have objected twice before in writing to the local plan consultations, as I know have thousands of others. There seems
to be no attempt by the planners to listen to these opinions as they just rehash with the same ideas. As I said in my
previous letter, I believe GBC planners should look more closely at the idea of 'urban regeneration' which is suggested in
the National Planning Policy Framework. Small scale development could be acceptable in the village of West Horsley -
more affordable housing is needed and some homes for the growing population of older people. What we do not need is
a high density housing which is developer driven in order to turn a large profit. Concreting over the countryside cannot
be sustainable or sensible and must not be allowed to happen.

I am absolutely opposed to the local plan with which we have been presented.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp173/239  Respondent: 8804929 / Helen Beckett  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

I refer to the proposed planning in West Horsley, the extent of which is entirely unacceptable.

The latest plan indicates 295 new homes for The Horsleys. This level of new housing would COMPLETELY change
the character
of the village, not to mention the impact it will have on its infrastructure.

Green Belt

You seem determined not to respect the green belt. How can you possibly consider removing these villages from the
green belt??

We moved to West Horsley nearly four years ago and chose this area specifically because we wanted a village
environment to bring up our daughter.

We wanted to get away from traffic and congestion and enjoy the green belt around us.

I object to no changes being proposed since the consultation in 2016 with regards to insetting West and East Horsley from
the green belt. You appear to be ignoring the
overwhelming objections that were made last year!

The proposed development of homes on green belt sites at much higher densities than currently exist would be totally out of character with existing housing. It is **also unsustainable in terms of drainage, road capacity, schools, shops, medical facilities, parking and public transport.**

**Traffic**

**The increase in traffic in West Horsley will be intolerable** with the proposal of these new households. It is already congested during school times and this will have a massive impact on our day-to-day lives.

Many of these potential residents will be driving in and out of Horsley to use the station and shops. **We simply DO NOT have the capacity for additional parking at Horsley Station and local shops. The Station car park is currently full every weekday as it is. It will become impossible to use the train as there is no alternative parking.**

**Schools**

**There is only ONE state primary school in West Horsley and NO state secondary schools.** The Raleigh School is already oversubscribed and many children living in West Horsley were NOT offered places at their local school in the last few years. There is already a problem here with a lack of places and this already needs resolving WITHOUT increasing the number of homes. How do you propose to deal with this??

**Medical services**

It is already difficult to get an appointment at Kingston Avenue Medical Centre, **the ONLY surgery in East and West Horsley. You cannot dilute this service any more.**

**Drainage and Flooding**

There are known sewage overflow problems in Ockham Road North and Green Lane. There will be serious capacity issues with the sewer network in the village going right through to the treatment works if the large numbers of dwellings proposed are constructed.

The amount of flooding experienced a few years ago meant many main roads were closed for weeks on end. We were forced to use small lanes to exit the village. By doubling the number of cars in the village, this issue will be exacerbated.

**I am disappointed that, despite the many objections to your plans, you STILL continue to ignore the overwhelming feedback from local residents.** It is us, the current residents, who will have to live alongside these new developments and put up with the vast increase in local traffic and demand for public transport, schools, medical facilities and parking, etc.

Why don't you plan more apartment homes in Guildford Town Centre rather than additional retail units?

**Your plans will have a HUGELY negative impact on our day-to-day lives.**

I trust that you will finally listen and review your plans substantially.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

 Attached documents:
Having read the council’s Local Plan Strategy document and seen the proposals for building up to 593 houses in The Horsley in the next 5 years, I would like to raise my strong objections and concerns.

Extension of the Horsleys Settlement Boundaries - No sound reasons are apparent in the broader document as to why the settlement boundaries should change apart from the desire to build additional housing.

Housing – My objections are based on the points below;
• The very large number of new build houses identified for West Horsley would negatively transform the village beyond recognition as it would increase the village size by over 35%. This is significantly higher than any other area in the borough.
• The housing density envisaged per site appears significantly higher than is presently the case in the village. This is totally out of keeping with the existing character and layout of the village that comprises low density housing with a considerable mix of ages and housing styles
• The need for so many houses in Guildford Borough, never mind West Horsley, has not been proved in the Consultation documents
• Why are Brownfield sites not being used ahead of taking land out of the Greenbelt for housing development? Surely this should be the more sustainable priority?

Housing number calculation - The mathematical model used by the consultants used to derive the high number of house requirements in the SHMA has not been revealed. It surely cannot be acceptable that affected areas such as the Horsleys should just accept data without being able to test that data for accuracy or applicability?

Infrastructure – My objections relating to the Horsleys’ broader infrastructure are further magnified by the proposal to build over 2000 houses on the former Wisley Airfield.
• Roads – Traffic generation from the proposed new housing would be considerable particularly as most households would have two to three cars. The present narrow lanes in and around the Horsleys would not be able to cope without major redevelopment. Additionally the private schools in the area are well supported by families living in Guildford and other villages. These private schools produces significant traffic problems on Ockham Road North and the A246
• Drainage and sewage – Road drainage is a continued concern that will be exacerbated by the runoff from the additional housing. Winter road flooding is an ongoing problem. Additionally, there may be a serious under capacity of existing sewers and the treatment works to cope with the large numbers of dwellings proposed

Village facilities
• West Horsley has very limited facilities with only a single small shop at the southern end of the village with very limited parking
• I object to the shopping parade in East Horsley being defined as a “Rural District Centre”. It presently suffers from severe parking constraints and the facilities are too limited in scope to deal with a sizable increase in the local population

Schools – My objections relate to the following;
• A lack of state primary school places in the village. The Raleigh school which serves both East and West Horsley is full every year
• Secondary school places are limited in number at the Howard of Effingham School and other secondary schools are a greater travelling distance from the village. Any rise in population will severely impact issues like road traffic
• Glenesk and Cranmore are both private schools. However the fees would be well beyond the means of many of the new homeowners putting additional pressure on schools like the Raleigh

Medical
• I object strongly that the only Doctors Medical Practice that serves all of East and West Horsley plus areas beyond the villages will be placed under even more pressure. It is always extremely busy and appointments difficulty to get

Transport – My objections in this regard surround the limited transport infrastructure
• Horsley station - parking at this station is limited and often full on a weekday. An
increase in village population will increase pressure on station parking and traffic movement to / from Horsley station. There is no land available for more parking
• West Horsley’s bus service through the village is extremely limited.
• The bus service operating from Guildford to Leatherhead travels along the A246 at the southern end of the village and really is only of use to residents living within a maximum of 8 to 10 minutes walk from the bus stops at the Bell & Colvill roundabout

Of significant concern to me is how much further land would the village have to sacrifice in terms of new road layouts, additional parking spaces and enlarged facilities such as schools, shops, medical facilities to cater for this population growth?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: PSLPA16/730  Respondent: 8806305 / Laurence Cook  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

2. Sites in East and West Horsley

I OBJECT in particular to including Sites A36-41 (East and West Horsley). This is a back-door way to create a mega-village – essentially, a soulless new dormitory town.

Whatever their merits as development sites, the 6 Horsley sites should not be considered individually but for their cumulative impact on the contiguous villages of East and West Horsley.

Building 533 new houses on these 6 sites, plus at least another 90 on small sites is (a) excessive in absolute terms and (b) disproportionate relative to the rest of the borough. It will destroy the rural character of these communities.

Under the plan, rural West Horsley will take 35% of new homes, urban Ash and Tongham 16% and Guildford urban area only 11%. The total number of homes in West Horsley will increase by 35%, which is disproportionate when measured against the overall increase in housing across the borough and particularly in Guildford town. If the Council have justifiable reasons to transform a particular community so radically, the plan should present a case rather than putting forward site proposals as a fait accompli.

These sites will put unsustainable strain on local facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewage, surface drainage and shops. For instance:

• Thames Water have advised the Council that the current wastewater network will not cope and that the foul drainage system all the way to the treatment works North of Ripley will need to be upgraded.
• Guildford Council’s Education Review says “expansion options may need to be considered for primary” education in the Horsley area within the first 5 years of the plan, but Surrey County Council have no plans to do so. The Raleigh School is already full. The private Glenesk and Cranmore schools are also at or near to full capacity. The suggestion that schools in Ripley can be used contradicts the plan’s stated intention to reduce traffic on the A3 and strategic aim that primary schools should be within walking distance.
• The plan’s Infrastructure Schedule (Appendix C) imagines an “East Horsley and West Horsley traffic management and environmental improvement scheme between 2019 and 2023 by Surrey CC” but gives no details. This scheme is just wishful thinking. The proposed housing can only harm the local environment, not “improve” it.

The density of new housing on the 6 Horsley sites is inappropriate, being greater than anywhere in the locality at present.
Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries for which the plan presents no arguments. Contrary to NPPF paragraph 79, this will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.

Collectively, these 6 sites militate against NPPF paragraph 81’s encouragement of access to the Green Belt and its amenity and recreation value. This has been a success story in the Horsleys, with the creation of an amenity wood and community garden, the purchase of adjacent fields (on the eastern side of Ockham Road North) by local residents in order to preserve their open aspect, well-maintained pitches for local football and cricket clubs, public tennis courts, open space for a high-quality campsite (at Waterloo Farm) used by many foreign tourists and the approval of plans for a “Theatre in the Woods” – making West Horsley the only village in Surrey with an opera house. The open nature of West Horsley determined that a long portion of the 2012 Olympic cycle races passed through the village. This route has since been adopted by cyclists as a permanent asset, including the annual Prudential cycle race. These and future examples of “positive planning” depend on protecting the Green Belt to maintain the openess and attractiveness of the local landscape and avoiding the urbanisation and traffic congestion that Sites A36-41 will bring.

By surrounding Waterloo Farm campsite with 120 new houses, Policy A40 on land to the North of West Horsley will make this rural tourism amenity unviable. This may accord with developers’ plans, since the site would then be vulnerable to infilling with yet more housing.

Site A40 is subject to an unacceptable flood risk from a combination of a high groundwater table and the lack of surface water run-off. This is flat, clay land on the downhill side of the Horsleys where floodwater from new development will accumulate and back up onto existing properties nearby. I can provide photographs proving how badly these fields already flood at present. These problems will only get worse with the increase in extreme weather events associated with climate change. The “appropriate mitigation” suggested in Policy A40 exists only as an abstract notion. It should not overrule the need for Green Belt “exceptional circumstances”.

Policy A40 underestimates the problems of safe access and egress. Firstly, Ockham Road North was closed for several weeks in 2014 because of flooding, and still floods regularly. Secondly, access problems are not confined to flooding and are not addressed by the proposal to extend the existing 30mph zone past the site entrance. Repeated attempts made by Ockham Road North residents to extend this zone have been turned down by the local authorities, Highways England and Surrey Police, even though data collected in 2015 show that traffic has doubled over the last 15 years and that the average speed in the 40mph section of this road is 52mph, with maximum recorded speeds of over 80mph. No traffic calming measures have so far been achieved. Additional housing will add to several hazards along this stretch of road, including:

- Its use by pedestrians, especially children (using the Raleigh and Glenesk schools and catching school buses to Guildford and Howard of Effingham), pensioners living in the string of bungalows at the northern end of the road, and visitors from the Waterloo campsite who are unfamiliar with the area.
- The existence of a narrow footpath on only one side of the road in any one spot. The layout means that walking half a mile between Green Land and East Lane requires crossing the road twice.
- The road’s increasing use by recreational cyclists (see above).
- Its winding nature, poor sight lines (especially when interrupted by summer vegetation) and dangerous, concealed driveways. Most of these were built in the 1930s. Some have been widened but many are too narrow for modern traffic. Since a deep ditch runs along most of the road, vehicles have to swing out dangerously when entering or leaving.
- The prospect of additional traffic, including 19,000 HGV movements (90 a day over a long period) if Surrey County Council approves the Drift Golf Course’s planning application to re-landscape its site using bulk waste transported from London.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Proposed Submission Local Plan: Strategies and Sites 2016 – West Horsley

I am writing to express my very strong objections to the proposals set out for West Horsley.

First; I object to the proposal to remove any part of the village from the Green Belt.

Second; I object because the sum of all the proposals is seriously out of proportion (adding nearly 40% to the village) and will put all local amenities and infrastructure under severe pressure.

Proposals A37 to A 41 taken together would increase the number of houses in the village by nearly 50% and would alter its rural nature. The average proposed density is about 7 houses per acre which is a suburban, rather than a rural, density.

There is very limited employment in the village and the road and rail routes to employment elsewhere are already reaching capacity.

The same is true of the schools provision and the plan does not appear to include land for any new school.

Parking facilities are already inadequate. Extra demand will swamp them and lead to unwelcome, unruly and obstructive parking on the local roads and streets which will further amplify our traffic problems and sour community relations.

Is there an ‘objectively assessed’ need for so much development? Does it define the types and quantities of housing needed?

Other proposed local developments – there are major schemes proposed in Wisley, Effingham and Bookham and these are all likely to add significant extra through traffic to our already crowded roads and parking facilities.

The traffic implications of these proposals are clear - and they are clearly unacceptable.

Site A40 is remote from most village amenities and most residents will use a car to reach them – so this development would probably add another 500 – 1000 daily vehicle movements on and off busy Ockham Road North at the inadequate Green Lane junction.

Sites A38 and A41. These two sites, in particular, will seriously impact the rural nature of the village. They are also remote from most village amenities and most residents will use a car to reach them – so this development would probably add another 1000 – 2000 daily vehicle movements on and off East Lane. Much of this will use the junction with Ockham Road North. Currently traffic at this difficult junction can approach 1000 vehicle movements per hour in rush hour – and at this level it is already fully loaded and queuing occurs.

Site A39 has the advantage of proximity to shops, station and surgery but 100 new houses are still likely to generate several hundred daily vehicle movements to and from Ockham Road North – access presumably being close to the railway bridge. This is a hazardous location, particularly at rush hour, when there is a high volume of fast moving two way traffic on this relatively narrow road.

Walking from here is also hazardous because;

1. the footway is narrow and fast moving north bound traffic is often running within a few inches of the kerb line. Pedestrians have been struck by passing vehicles!
2. On wet days the road acts as an extra storm water drain and pedestrians are liable to drenching spray from vehicles passing very close to them.

A public footway running north from this development and away from Ockham Road North and through Weston Lea to East Lane and the Raleigh and Glenesk primary schools would be welcomed by many.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp173/247  Respondent: 8806369 / Alasdair Macmillan  Agent: 
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I have strong objections as follows;

- ONS predictions suggest that the proposed degree of expansion is not necessary
- The proposed number of houses to be constructed to the east of Guildford has gone up significantly since the 2016 proposal. There are also possible developments in Effingham, the Bookham area of Mole Valley DC, and at Wisley and taken together these will overload all local roads and other infrastructure.
- There is no proposed change since the 2016 Consultation to insetting East and West Horsley from the green belt. This is very unpopular and likely to change the character of the area.
- The concentration of new houses proposed for West Horsley will create significant extra traffic on East Lane and Ockham Road North. These roads are already overloaded at some times of day and walking or cycling along them is often hazardous.
- The concentration of new houses proposed for West Horsley will overload other local infrastructure – particularly schooling and the Medical Practice.

I feel that these proposals could change the character of West Horsley from rural to suburban and I object strongly to that.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/297  Respondent: 8806497 / Sandra Macmillan  Agent:

<td>There are NO exceptional circumstances or justification for removing much of West Horsley and other villages from the Green Belt. W. Horsley has many listed and historic bldgs. and a 'country feel' which is why most people who live in the area do so. The roads and infrastructure are already at full capacity as indeed are most of this part of the S.E.. Witness the appalling misery on the M25 and A3, &amp; Cobham roundabout. If you had a vital journey (say to the airport) you would not take the chance by using the main roads. Even the 'rat-runs' are getting impossible. This is seriously affecting the quality of life in the area, for which GBC is largely responsible. The parking in the villages is already insufficient, and there are long queues for the Surgeries. A&amp;E in G'ford is already often unable to cope. The Green Belt was sensibly devised to control urban sprawl, and it is at times like these that it should be strengthened. There is often flooding on local roads, and one sees people driving round wasting fuel etc. to cope with these problems.</td>

The cumulative impact on these development sites would immense. The number of houses proposed is excessive & disproportionate in relation to the rest of the borough. It will destroy the rural character of the communities.

These sites will put unsustainable strain on already stretched local facilities & infrastructure, including, public transport, parking, schooling, medical facilities, sewage, surface drainage (already prone to flooding) & shops.

**Draft Local Plan: Strategies and Sites June 2016**

I’m writing to set out my objections to the above plan as follows

- Here in Green Lane we have had raw sewage spewing from the manhole cover in inclement weather presenting a health risk. If the 120 extra houses off Green Lane/Ockham Road North were built this would be much worse. I note again that after last week’s rain the manhole cover in Green Lane appears to be caving in again.
- Thames Water has advised Guildford Borough that the area’s wastewater network is unlikely to be able to support the demand anticipated from all the proposed developments.
- There is a continuing lack of state primary school places in the village. The Raleigh school which serves both East and West Horsley is full every year and this has been the situation for many years. I understand Cranmore and Glensk are also nearly full (not that private education would be an option for those in “affordable” housing).
- Secondary school places are limited in number at the Howard of Effingham School and other secondary schools involve a much longer journey of time and distance from the village to reach them, indeed 11 years ago we were doubtful about getting our son into the Howard.
- Where are all these extra people going to work? There would seem few employment opportunities in the immediate area and limited transport links elsewhere – very limited parking at Horsley and Effingham station and a long, dark walk for some, particularly the proposed 120 houses at the site nearest this address.
- Shouldn’t government be concentrating on brownfield development as a priority rather than ruining the green belt and all the social, health and wildlife benefit the green belt brings. There should be no need to build on any green fields if brownfield (previously developed) land is used efficiently. (That does not mean garden-grabbing!).
- As a working man, I find it extremely difficult to get any convenient appointments at the Horsley Medical Centre – how will it cope with an even larger village population?
- Due to the lack of public transport in this area, owning a car is vital, so each new household would have at least one car which would congest the local roads (already in poor condition) even more.

All in all, this is an unsatisfactory plan for the village and representation should be made to keep East & West Horsley firmly in the Green Belt and resist this excessive housing plan.

All of the above would apply in the event of the ridiculous development at Wisley Airfield should go ahead. How can this even be considered in the Local Plan if it was recently rejected.

Perhaps Parliament should consider the effects of net migration in the UK and honour its pledge to reduce this – that would cut the need for so many houses and reducing the Green Belt!

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
I am writing to raise my concerns about the local plan for the Horsleys. The scale of new housing is disproportionate to the village, and would add to the current problems with overloaded infrastructure: roads, parking, schools, the medical centre. All of these are problems at the moment, so it is not realistic to suggest that the village can cope with a further 600 new homes.

The Horsleys are villages, with a unique village character and the plan would destroy this. Furthermore the Horsleys are currently in the green belt and I don't believe it is correct to change this status.

Finally the Wisley development would also have a huge knock on impact on our infrastructure, in particular roads and parking.

I object to the principle of loading such a high amount of additional housing into this green belt area, and I think more work should be done to reconsider whether all these homes are necessary, and to look at brownfield and urban sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

BUT IF a large number of houses are still to be built in the village then I believe your current proposed sites are clearly wrong. Three of the sites in West Horsley (A37, A38 and A40) should be removed and all proposed housing should be on one large site between sites A39 to the east, A41 and Lollesworth Lane to the west, East Lane to the north and the railway line to the south. The old wood on the site should largely be removed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object very strongly to the Guildford Plan, for these reasons:-

1. a) The removal of West Horsley from the Green Belt is unlawful, and morally indefensible.
2. b) The proposed new Settlement Area for the village would considerably widen the village boundaries. This would encourage even further development in the future.

3. c) The proposals are for 385 new homes in a village of 1,111 homes, an increase of 35%.

4. d) The infrastructure in the village is already under severe strain:-
- the Raleigh primary School is already at more than full capacity and simply could not find space on its site for an additional entry form.
- the Horsley station carpark is already full on weekdays, with commuters' cars,
- the roads are choked at school times along Ockham Road North by Glenesk school,
- and it is almost impossible to turn out of the Street at the Bell & Colvill roundabout near Cranmore School,
- after heavy rain the Street in West Horsley is impassable due to floodwater under the railway bridge, and Ripley Lane runs with water like a river

1. d) We are told that there is an urgent need for new homes for key workers, for young people who wish to stay in the village where they have grown up, and for opportunities for the elderly to downsize within their village.

   BUT West Horsley house prices are much higher than the national average. How can the proposed new homes be made affordable? Is some shared ownership scheme proposed? Will there be a points system to determine who is eligible for these new homes? Will a certain percentage be reserved for key workers?

The Guildford Plan proposals for West Horsley cannot be supported by the existing infrastructure. There is absolutely no guarantee, in a free market, that the new housing would go to those for whom it is intended.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I write with comments on the new plan.

Whilst I do appreciated the need for some new housing within the Horsleys I believe that the redefinition of the Green Belt does not recognise the limitations imposed by the access routes particularly via the already over used B2039 north/south. This is the only route to Horsley Station where new home owners are highly likely to use for employment. This area is already congested and often difficult to use.

At the recent planning application for Wisley Airfield it was clear that this and other nearby sites at Waterloo Farm, Manor Farm, East Lane and Ockham Road North are unsuited to any significant development that adds to the already limited access via the B2039.

For this reason I do not oppose the developments proposed at Bell Colville or Thatchers Hotel given their proximity to the A246.

Wisley Airfield site needs to be resolved first as a less concentrated development of say 200 homes could provide the key to the plan. Perhaps also a site for the expanded Howard of Effingham releasing their existing site adjacent to the A246 for housing?

Not a bad idea?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Why cannot the new builds be made on brown fields.

If we build so many more houses in this area we will be losing part of England that will be beneficial to generations to come. We have many visitors from other parts of Britain and the world who come to this area and cannot believe that we will allow it to be changed forever.

Small villages must be allowed to stay in the Green Belt instead of becoming urban areas to the large towns.

I worry about the infrastructure; how will the villages cope with sewage and water, the disruption on our small roads with any building works will be dreadful for the community, forcing people to take longer routes to work and to their homes, foul noise and pollution.

I strenuously object to the Guildford Local Plan 2016 for both East and West Horsley.

As a resident of West Horsley I believe that for the following reasons the Council need to rethink its proposals for the Horsleys

Once again those responsible for the development and approval of the Local Plan have failed to demonstrate that the very clear guideline that development of Green Belt land should be restricted to exceptional circumstances has been followed. This is particularly apparent in the case of West Horsley where the proposal to build 385 new homes on the Green Belt in a community of just over 1100 existing homes is clearly inappropriate and demonstrates a blatant disregard for the guidelines and the clearly expressed wishes of the inhabitants of the village. It represents an increase 35% which is the highest percentage increase of any community in the whole of the borough and is grossly unfair when (even if the need for the number of new homes in the borough was correct) these could be more evenly distributed throughout the borough. The timescale of just 5 years in which they should be built further demonstrates the total disregard for the feelings of the village and the disruption they would cause.

The proposal document fails to give a credible explanation of how the calculation of new homes required was made. To most outside of the Council it appears to be significantly overstated, one estimate being that the proposal represents a population increase 70% in excess of official national estimates. In the case of West Horsley the Parish Council survey identified the need for less than 30 homes to meet the requirements of local residents. Given the scale of objections made to the original proposals one would have expected a much better rationale for the need for so many new homes in this particular locality which is being so heavily targeted. None has been provided.

In addition the plan proposes an additional 148 homes in East Horsley, the adjoining village where most the local community amenities are situated. This together with the planned development of Wisley Airfield, and the developments at Ripley, Send and Burpham totals over 5,000 new homes in a relatively small wedge of land between the A3 and the A246 will destroy vast sections of Green Belt and Metropolitan Belt land to the North East of the borough. This imbalance is unacceptable and should be re-examined.
Unfortunately the problem is multiplied by the inadequate reasons as to why the Settlement areas for the villages of West and East Horsley should be changed. One can only conjecture that it is a device which will allow further land for future development as housing within the extended borders.

The proposals make little reference to how the local infrastructure is to be improved to cope with this enormous percentage increase in the population. The size of the individual sites means that there will be little or no assistance available from developers and even if budgets for drainage, schooling provision, parking facilities, road improvements, medical services, shops and community buildings etc were made available this would swallow up even more of the Green Belt which only compounds the problem. This scale of development is unsustainable particularly within the very short time frame proposed.

It would appear that the Borough Council is intent on destroying the character and beauty of this ancient village. The National Panning Policy Framework requires that new residential development MUST respect the character and density of housing in the area. Guildford Council seem determined to ignore this requirement and proceed with plans that are unsupportable by the infrastructure and facilities in the village.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

Please take the following as my official response to the draft Guildford Plan 2016:

**Disproportional Development of West Horsley**

This plan calls for an increase of at least 35% in the number of houses in West Horsley, almost exclusively on Green Belt land. This is entirely out of proportion with all other areas and will result in West Horsley totally losing its rural character. A 35% increase will completely change the character of one of Surreys rural villages with the few remaining ancient dwellings. It will simply become another built over area. It certainly does not have the infrastructure, road system, health or schooling to cater for such an increase.

**Green Belt**

The overwhelming majority of new housing is proposed on existing Green Belt land. Brownfield sites are being reserved for retail/commercial. This is exactly the opposite of national guidelines.

**Previous plan**

The revised plan seems to have completely ignored all previous comments. the number of houses in West Horsley has actually gone up.

<th>RE: GUILDFORD BOROUGH COUNCIL - LOCAL PLAN: STRATEGY AND SITES.</th>
</tr>
</thead>
<tbody>
<tr>
<td>I write further to the publication of the above document and write to express my objection to elements of its contents.</td>
</tr>
<tr>
<td>My principle overarching objection is the proposal to take a number of Surrey villages out of the Green Belt, and East and West Horsley in particular. This proposal in particular will have &quot;urbanisation&quot; implications far beyond those envisaged by the mantra that more houses must be built in the Borough. Whilst I fully accept the need to provide additional housing in the Borough, I do not agree with the drastic actions of removing the Green Belt status in order to be able to provide large scale developments that would otherwise be subject to far greater planning scrutiny.</td>
</tr>
<tr>
<td>I object to your proposal to remove a number of classic Surrey villages that currently give the area its charm, beauty, character, history and overall appeal is outrageous.</td>
</tr>
<tr>
<td>1. I object to your proposal to remove the 1-Iorlseys from the Green Belt. The Green Belt was established for a very defined purpose by statute. It was designed to prevent urban sprawl and to a large extent has succeeded in doing this. It is there for the benefit of not just our generation but those that succeed us. This area not only contains many areas of Outstanding Natural Beauty but also Sites of Special Scientific Interest. The Green Belt enables these areas to be protected in order that the Guildford/ Leatherhead/ Dorking area does not become a suburban sprawl such as Hersham/ Weybridge/ Walton on Thames.</td>
</tr>
<tr>
<td>1. Large numbers of people visit the Surrey Hills area because of its stunning beauty, villages and leisure opportunities. These visitors in turn support many businesses both large and small whose livelihood depends upon the area retaining its rural charm. You simply have to remember that these people are your citizens, your ratepayers and your electorate and changing the nature of their environment will potentially destroy the uniqueness of their businesses.</td>
</tr>
<tr>
<td>1. I object to the volume of housing, and associated density of construction, which is currently proposed in the Horsleys is completely out of keeping with their village setting. The proposal to build 180 houses in East Horsley and 411 in West Horsley is completely disproportionate to the housing stock currently in existence. There has not been any detailed study undertaken proving the need for this level of housing in these locations, the size and style of the proposed houses or the impact on the surrounding infrastructure.</td>
</tr>
<tr>
<td>1. I object to the proposals as many of these sites do not reflect the level of infrastructure in place to support such a volume of housing, from schools to medical facilities, shops, bus services, train station parking and drainage. We have seen how many villages in the area have been blighted by the bolt on Council Estates of the post war years - dumped on village back land with no regard to the architectural merits of the development, the local amenities on offer or the employment of the proposed residents. Each site should be considered on its own individual merits under the existing planning regime which has been designed to protect the environment of our rural life and given its particular circumstances.</td>
</tr>
<tr>
<td>1. I object to the proposal to build 100 houses on site A39 in East Horsley as it is fundamentally flawed. The plan already recognises that the site is in a flood plain and notes that the flood risk needs to be reduced and that accordingly there is to be no greater flood risk to anywhere. Surely by interfering with the flood plain in this location can only transfer the flood plain impact somewhere else? That may be downstream of the site or onto adjoining properties. If there is no interference with the flood plain at the site doesn't become viable for 100 houses. The existing proposal by Cateby Land to develop 100 affordable homes here simply does not sit comfortably with any sustainable, accessible or employment rationale. It is building the wrong types of houses in the wrong place.</td>
</tr>
<tr>
<td>1. I also do not believe that the Council has given sufficient regard to where all these new inhabitants are going to work. There is little or no employment in these villages, there is very little bus transport, the railways are currently crammed in rush hour with no room for extra capacity and the station car parks are not big enough to cater for more cars. And yet how are people meant to get to work in Guildford, Woking and London as the primary employment centres? The answer will be by car, whether this be by way of a short journey to the station</td>
</tr>
</tbody>
</table>
(where they will end up parking on the streets) or a full journey into Guildford (which is already rammed in rush hour). I cannot see how this can sit comfortably with the Council’s Green agenda. The Council certainly will not be able to force the bus and train companies to extend their services as these are now privately owned businesses operating for profit.

1. I object to the Council’s failure to unlock the development potential of brownfield sites and the volume of currently unoccupied residential properties in the Borough should be given a greater priority in the search for developable land and before ruining the environment, livelihood and well-being of a unique area of Britain.

Remember, there will be no opportunity to undo any development resulting from these proposals. You will not be able to wind back time.

I re-iterate my unreserved objection to the proposals as set out in the above document.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** PSLPA16/1129  **Respondent:** 8821025 / Karen McQuaid  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

Allocation A36-A41 – East and West Horsley

I **OBJECT** to the inclusion of these sites. It seems that the plan is to create a mega-village and residents of the Horsleys feel victimized. The 6 sites should not be considered individually but for their cumulative impact on the villages which are closely connected.

Building 533 new houses on these 6 sites is excessive in and disproportionate relative to the rest of the borough. It will destroy the rural character of the villages.

These sites will put unsustainable strain on local facilities including public transport, parking, schooling, medical facilities, sewage, surface draining and shops. The proposed housing can only harm the local environment and not improve it.

Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries for which the plan presents no arguments. Contrary to NPPF paragraph 79, this will contribute to creeping urbanisation by weakening the Green Belt corridors separating the Horsley from neighbouring settlements.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Comment ID: PSLPA16/1929  Respondent: 8824513 / Ken MacIntyre  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to object to the entire draft local plan, particularly as it affects West Horsley, its residents and countryside. It is extremely frustrating and disappointing that the overwhelming objections to the previous draft plan, not only from residents but also from our elected representatives, have been ignored, with just 66 houses removed from the previous proposal. No evidence has been produced to support the increase in housing and population which underpins the proposals. The methodology of the Strategic Housing Market Assessment on which the plan is based is a secret, not known apparently even to the Council and has resulted in a population forecast 70% higher than national forecasts.

It is unacceptable that public policy be shrouded in commercial secrecy and therefore the SHMA should be categorically rejected. Proposals with profound long term consequences for our village should not be produced without the ability to challenge and scrutinise them in detail. This lack of transparency means that residents are fully justified in being suspicious about the motivations and interests behind the draft plan.

No ‘exceptional circumstances’ as national planning policy requires have been found to justify removing West Horsley from the Green Belt and building on Green Belt land. The proposed sites closest to where I live cover all but 40 of the proposed houses at a density much greater than the existing settlement and are out of character with the area. We face the prospect of 5 years’ of living in the middle of a building site without evidence or justification for such a massive change. It feels like we are being besieged by greedy developers.

Other reasons in support of my objection include:

- The existing infrastructure of roads (which were designed for the age of the horse and cart) parking, transport, water, drainage and sanitation are inadequate for the population as it is now so would not cope with a 35% increase in the population.
- The local medical centre, shops and schools are already stretched.
- The car park at Horsley railway station is already full on weekdays with no capacity to increase the number of spaces. The station entrance is always congested at peak times with cars collecting and dropping off rail passengers.
- Expansion of the peripheral areas of the Borough would have a detrimental effect on Guildford town centre adding to the congestion and pressure already experienced in a centre designed for a population of 8,000.
- Housing and population expansion which ignore water supply and consumption cannot be sustainable given that the South East is an area of severe water stress.

My objection includes the other large proposals such as the 2,000 house development at Wisley Airfield which despite being rejected by the Planning Committee only this year is included in the draft plan. This makes no sense.

The draft plan must be withdrawn and replaced by transparent plan based on sustainability and national planning guidelines.

Comments on: Guildford Borough Proposed Submission Local Plan – Strategy and Sites June-July 2016 Consultation

I wish to comment on the strategy set out in the revised consultation document and the potential development proposals for the sites in East and West Horsley. I STRONGLY OBJECT to the proposals, which would:

- take East and West Horsley out of the Green Belt - Major Development Sites in West Horsley are all on current Green Belt Land.
- Increase housing in West Horsley by up to 385 extra homes in the next 5 years, resulting in a housing density significantly higher than the present – infrastructure to support this is inadequate, and it will completely change the character of the village
- considerably enlarge the two village Settlement Areas – without justification, and potentially leading to further, unsustainable, future expansion of housing.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPA16/1625  Respondent: 8826145 / William Hewlett  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

8. I object in detail to the application of the policies to Site Allocations: A36, A37, A38, A39, A40 & A41:

- The amount of new housing far exceeds local need, and the housing density is excessive when compared with existing development.
- The proposed building would transform the Horsleys into a sizable town, and no case for this is made.
- There is no support for this in the local area, and the collective impact of these 6 sites on a small part of the borough are not considered – the six should not be treated as isolated, separate sites.
- The total amount of new building is out of scale with the planned development elsewhere in the borough, especially less sensitive urban areas not protected by Green Belt.
- The sites are unsustainable: key infrastructure is lacking, and there is no adequate provision is made to increase it – e.g. poor wastewater capacity, lack of schools, absence of traffic management plan, flooding.
- The extension of settlement boundaries is too permissive, allowing possible claims that the area does not meet Green Belt “openness”.
- The Green Belt gap with neighbouring settlements is hugely narrowed.
- Site allocation A40 is especially unviable because of high water table and poor drainage, leading to regular winter flooding. Safe access and egress at Site A40 is unachievable, owing to flooding, high speed limits, poor
sight lines, narrow access to existing properties, inadequate pavements for elderly and schoolchildren, increasing use by recreational cyclists.

9. Summary

The above summarises some of my concerns about the basis and assumptions of the Local Plan, specific objections about the Green Belt, and the approach being taken for East and West Horsley (and other villages). Please would you ensure that all these aspects are considered in your finalisation of the Plan?

My Major Objections

We must not lose the green belt it was made for a purpose that has not changed I have not seen any “EXCEPTIONAL CIRCUMSTANCES” demonstrated that are required before taking this action

I do not object in principle to affordable housing in reasonable numbers but the scale of this proposal is alarming

There is no infrastructure planned----- our schools are full the medical centre is full the water companies have already said they will not cope

Where will all these extra people work there is no local work

How will they get to any work we have no transport to speak of and the train car park is full at times and no room to expand

The roads are inadequate they are village roads and already full especially at weekends with many cyclists making them dangerous How many of these cyclists need to be injured or killed

The number of pot holes and bad surfaces on most of the local roads already will only increase with extra pressure of traffic

All these extra house holds would have an enormous impact on our village

I have already objected once to this proposal but it seems no-one is listening and all we are doing is making way for greedy developers

There is also the development proposed for wisely airport which would completely ruin the villages and the environment and strand a number of housed holds without cars as there is no transport that end of the villages and the roads too narrow for double traffic

All the above objections apply

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. When I look at the map identifying the proposed developments in the North-West periphery of Guildford ie sites 60, 61, 62, 63, 64 and 65 it is clear that you are allowing Guildford to sprawl outwards thereby substantially diminishing the green space separating Guildford from the outlying villages. This is precisely what the Green Belt was designed to prevent. With the exception of site 63 (Slyfield) I therefore object to all these developments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Secondly I object to the proposal to remove the villages of East and West Horsley from the Green Belt and the relaxation of the rules to allow this. The Green Belt was put in place to limit the growth of London and where it still exists, as around these villages, it has achieved that aim. It has also protected important countryside which if built on will be lost forever. I do not believe the “exceptional circumstance” required to remove the villages from the Green Belt have been demonstrated. Proposing to build on Green Belt land will not provide affordable housing for those that need it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object most strongly to the proposed developments within the Local Plan, in particular in and around East and West Horsley.

1. The existing Green Belt policy has been completely ignored, with no apparent discussion with local groups.

1. The amount of additional housing proposed is far in excess to that which would blend in with the present environment. The roads in this area are narrow and in poor condition and will not be able to cope with the increased traffic which any development will inevitably produce. Parking near the shops will be impossible and Schools will not be able to cope with the additional pupils. Over development on this scale will damage local communities forever. The attraction of these villages will be replaced by congestion and pollution.

1. I understand Brown Field Sites are available within the Guildford area and should be used for housing in preference to the Green Field Sites.

In conclusion, I ask you to revise the housing numbers, and to amend the Local Plan to maintain the existing character of the Horsley’s.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I again object to this new Plan insofar as it affects West Horsley:

Although the number of new houses has been modified the new number is still far too many to reasonably maintain the village character.

The density of new houses is about twice the density that exists and will totally transform the nature of West Horsley. Your planning objectives require you to maintain the general character of villages so planned new housing density should be halved to bring it more into line with existing

Halving the density will also reduce the pressure on existing infrastructure and amenities which are already at capacity. The current Plan is therefore not sustainable but halving the number of new houses MAY be sustainable. To my mind it is a question of balance.

I also object to the removal of West Horsley from the Green Belt, the logic for so doing is flawed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
In regard to the proposed extension of the West Horsley village boundary into green belt land on the West side, **I would like to register my strong disapproval.**

If allowed, this extension would potentially allow development onto agricultural land that would seriously encroach onto the open outlook over a designated conservation area and National Trust land.

It is also an area susceptible to water flooding and so would adversely affect all existing houses in this immediate area.

I write to express my total opposition to the Horsleys and surrounding villages being removed from the Green Belt at a time when pollution is as high if not higher than seventy years ago when the Green Belt was conceived to act as the "lungs" for London. Traffic on the M25 and A3 is frequently at a standstill with diesel and petrol fumes pumping out and similarly on local roads at peak times. Now is not a time to be surrendering our wonderful green spaces so carefully protected over the years.

Irrespective of concerns over pollution it is irresponsible to plan such major housing development without proper consideration for improved infrastructure to support this growth. As things stand I see no evidence to suggest that such essential supporting planning has been considered. The Horsleys and surrounding villages cannot possibly cope with such large scale as that proposed.

With the Government now having a re-think about population growth post Brexit should GBC not be doing the same?

- The village of West Horsley fined Settlement Area boundaries (ref. 2003 Local Plan) DO NOT need to be
- The Green Belt and Countryside Study is
- I oppose the village's removal from the Green Belt by insetting and extending the 2003 local Plan Settlement Area
- The key evidence document "Guildford Borough Council Economic Strategy 2013 - 2031" makes no case for locating large numbers of homes in West or East Horsley.
- Any village expansion is unsuitable as there is only one small shop, no post office and a very limited weekday only bus servi
The homes building proposals are totally unsuitable in terms of schooling, medical services, water supply, drainage, roads capacity, shops parking in East Horsley and public

There are no more school places left in the State Primary School which serves both West and East Horsley and this has been the situation for the past few The Raleigh School is now seeking to move to larger premises in order to expand and lose the twice daily school run with parking clogging up a small residential road when even the parents have parking difficulties let alone the residents

The private schools in Horsley are well attended with many pupils travelling in by car which only adds to the worsening traffic situation.

The Medical Centre is always very busy with residents experiencing difficulties in obtaining their preferred appointments and a car parking

Car parking at East Horsley shops, Station, Library, Post Office and the Medical Centre is now becoming more and more Any increase in the area, particularly the large population addition proposed will make parking and movement into and through the village a real problem which has not been given any consideration under this plan.

The entire infrastructure is already at bursting point and no details of any proposals for West Horsley have been found in any of the Local Plan

Dear Sirs, we were very surprised and disappointed despite the council having unanimously rejected building 2000 houses on Wisley Airfield, the draft plan still includes the Airfield and Three Farm Meadows as a strategic site.

1. We object to building on Green Belt
2. We object to an enormous increase in traffic
   1. To an enormous increase of children needing school places
   2. To pressure on doctors surgery
   3. To consequential lack of preventing pollution and possible flooding to pressure on 2 train stations
3. We object to the ruining of the lives of existing residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to 4 of the 6 proposed development sites numbered included in A36-41 which either intentionally or inadvertently will create a town at the cost of losing two separate villages. Quite why GBC should have selected West & East Horsley in this way, as compared with the exceptionally generous treatment of most other areas is, at best, exceptionally disappointing.

Whatever their merits as development sites, the 6 Horsley sites should not only be considered individually but for their cumulative impact on the contiguous villages of East and West Horsley.

Building 533 new houses on these 6 sites, plus at least another 90 on small sites is (a) excessive in absolute terms and (b) disproportionate relative to the rest of the Borough. It will destroy the rural character of these communities and put unsustainable strain on local facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewage, surface drainage and shops. The open nature of West Horsley was a significant factor that led to the 2012 Olympic cycle races passing through the village and this same route has since been adopted by the annual Prudential Ride 100 Cycle Ride. Furthermore, the housing NEED in both West & East Horsley (per recent research) is for SMALL houses / FLATS so that (a) young people can get onto the housing ladder and (b) older residents can downsize.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I am writing to voice my objections to the Local Plan. I live in West Horsley.

**OBJECTION 1: REMOVAL OF WEST AND EAST HORSLEY SETTLEMENT AREAS FROM THE METROPOLITAN GREEN BELT**

I strongly object and am horrified that the revised draft Local Plan proposes to remove West and East Horsley from the Metropolitan Green Belt. Building on the Green Belt will have a devastating impact on the environment, beauty and well-being of wildlife and people who live in the area. The Green Belt is sacrosanct and if building is allowed, the Green Belt and quality of life in this area will be forever compromised.

**OBJECTION 2: FLOODING**

In the storms two years ago, there was flooding in West Horsley. Roads were impassable for weeks for pedestrians, cyclists and cars. Further building in the area will only exacerbate the problem especially as more impermeable surfaces are constructed that impede water from soaking into the ground and the current drain system cannot cope with the existing housing population.

**OBJECTION 3: PARKING**

Parking is already constrained in the village. Currently, builders, visitors, people making deliveries, etc., park on pavements, obstructing the use of pavements by pedestrians and cyclists. This creates creating potential dangers because pedestrians and cyclists are having to go onto the road as the pavements are blocked by cars and trucks.

As a West Horsley resident for the last thirty years I am writing to you as I am very disturbed by the proposal to take the Horsleys out of the Green Belt. In addition the proposals to infill parts of the village look unsustainable.

I believe West Horsley currently has approximately 1110 homes and the proposal is to use Green Belt areas and to increase the size of West Horsley by 35%. This will transform Horsley from a traditional village to a town stretching its current infrastructure to intolerable limits. Also some of the proposals seem to suggest housing developments different in character to the rest of the village.

Essential facilities such as shops, medical centre etc will not be able to cope with the additional volumes. Roads, especially the A246, are in a poor state of repair and are subject to heavy congestion at peak times.

I urge you to seriously consider the implications for the current residents before proceeding with the proposal to increase the size of the village so dramatically.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing with regard to the proposal to remove the villages of East and West Horsley from the Green Belt which I strongly disagree with. This sets a dangerous precedent and leaves the surrounding countryside in a vulnerable situation for the future development.

The plans for the development of East and particularly West Horsley have not been thought through. It appears no thought has been given to the existing infrastructure when deciding almost 500 homes can be built increasing the population by at least another 2000. If this development is allowed plus the Wisley development is adopted this increases this area by a few thousand and one can hardly believe this is to fulfil the needs of local people.

1. The existing schools cannot cope at present without the increase in future children needing education.
2. There is no mention of how the existing health centre could cope with such a large influx in the population when it is not always easy to get an appointment. An extra burden will also be placed on the already over-burdened Royal Surrey Hospital.
3. The trains during commuting times are already busy and neither would the parking facilities at the station be able to cope with extra cars. Parking in the village is already difficult for shoppers, and visiting the library, without the extra traffic being increased.
4. The local roads were never intended to cope with today’s heavy traffic. I first complained about the state of East Lane, in particular the entrance which is a disgrace, in March of last year and little if anything has been done.
5. We also suffer from flooding in wet weather and neither the drains or sewers can cope now without the increase in population envisaged.

It is far easier and more profitable for developers to build on green fields rather than brownfield sites. Development on the scale envisaged will destroy these two villages forever as well as losing valuable countryside I do hope careful consideration will be given to the above points before development on the scale proposed is allowed to go ahead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

SITE ALLOCATION

At present there are four sites in West Horsley included as sites allocated for development within the Proposed Local Plan. Two further sites are being proposed for East Horsley, one of which immediately abuts the West Horsley parish boundary, which will no doubt primarily utilise the same local resources and infrastructure.

The four sites allocated within West Horsley are:
1. Policy A37 – Land at and to the rear of Bell & Colvill, Epsom Road, WH (40 homes / 1.4 hectare / 28.6 dwellings per hectare)
2. Policy A38 - Land to the west of West Horsley (Manor Farm, between East Lane and Long Reach) (135 homes / 8.4 hectare / 16.1 dwellings per hectare).
3. Policy A40 - Land to the north of West Horsley (Waterloo Farm at rear of Ockham Road North) (120 homes / 8 hectare / 15 dwellings per hectare).
4. Policy A41 - Land to the south of West Horsley (on East Lane) (90 homes / 4.8 hectare / 18.8 per hectare).

This is a total of 385 homes on 22.6 hectares, at an average density of 17 per hectare.

Furthermore, Policy A39 - Land near Horsley Railway Station (off Ockham Road North and at rear of Heatherdene) (100 homes / 5.7 hectare / 17.5 per hectare) is immediately abutting the West Horsley Parish boundary, however it is not in West Horsley (as referred to incorrectly on page 125 of the Proposed Submission Local Plan) but is actually in East Horsley.

I would reiterate that I am not opposed to new housing in West Horsley per se; however this scale of potential development in and around West Horsley is, in my opinion, excessive. I would strongly question the need for the inclusion of all four sites and certainly not at the densities proposed.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Comment ID: PSLPA16/2153  Respondent: 8836257 / Nicola Smith  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I would like to register my strongest possible objection to the Draft Local Plan proposed by Guildford Borough Council. This includes proposed development of an estimated 533 new houses in the current Green Belt designated villages of East & West Horsley.

I also strongly oppose the potential loss of the Green Belt designated status for the Horsleys.

I would like to remind the Councillors that during the previous election campaign in 2015 - it was explicitly stated by the Conservative Party that any development in the Green Belt should only happen under "exceptional circumstances", none of which appear to have been met in this case, especially with brownfield sites in Guildford still available for development.

This scattergun development proposed on the Green Belt agricultural land within the Horsleys includes extension of the village envelope, development in a conservation area and excessive numbers of houses that the local infrastructure simply cannot support, as well as a loss of the fundamental character of the Horsleys which are currently small villages and not designed to cope with these increases in population.

Whilst I understand there is increased pressure on Guildford local council to provide more local housing (to meet an ever changing target), the sheer number of houses proposed across multiple sites in the Horsleys is too high.

Where are the impact assessments and surveys of potential expected road traffic increase (the local roads and pavements are already in poor condition - how will they cope with the additional number of cars, not to mention the traffic delays which are already bad during rush hour?); local schooling (already oversubscribed), doctor's surgery and parking requirements; increased water-usage and power consumption estimates; additional parking space needs at the train station (which is already full); increased noise and reduced air-quality; and environmental considerations that would
support such a large development. They have not been provided because they do not exist - increasing housing numbers on such a large scale would create far more problems for the village than would be solved by just housing people.

Squeezing clusters of houses on open land which makes up part of the landscape in and around the Horsleys is a poorly masked plan to maximise house development numbers with minimal consideration on the impact of the infrastructure, local community and the environment.

Considerably smaller clusters of housing have been integrated carefully and over time with success, without overburdening the infrastructure, such as Frenchlands Gate.

In conclusion, I strongly object to the local plan.

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to object strongly against the proposed plan to build houses in West and East Horsley.

The sites are in green belt.

Infrastructure is totally inadequate: drainage, parking, roads, shopping, schools, medical centre if all already full.

No way can we accommodate extra cars in East Lane or in the village.

I want the green fields around Greta Bank to remain green fields and not converted in housing estates. I want my peaceful surroundings to remain and country field.

What the ……… is so special about Ash and Tongham?

I object to the Guildford Local plan 2016

I object to the fact that Ash and Tongham have 16% of the proposed new homes compared to 35% in West Horsley – why?

At the moment the congestion caused in our little road is horrendous created by the Raleigh school.
In the Winter the amount of surface water from East Lane causes our ditch to fill to capacity when we have all these new homes – where are the cars going – our whole village will be completely overwhelmed.

The loss of our green belt status is critical.

We do not want more homes, people, cars on this place – 435 homes to the north of the railway line compared to 40 to the south.

I have lived here for 66 years – nearly all my life – I have seen a new small housing estate built on what was rough land – the cuckoos used to sing all day – beautiful – now cars, school and people.

We pay high prices to live in West Horsley – the area attracts Londoners for the countryside and attractive homes. We pay for the beauty of the Green Belt, the attractive homes and the countryside – keep it that way.

Once gone, gone forever.

Get your act together.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** PSLPA16/3357  **Respondent:** 8839297 / David Mackay  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

I would like to object to the Draft Local Plan: Strategies and Sites June 2016 for the following reasons:

**Policy P2 Green Belt**

I **object to the removal of East and West Horsley from the Green Belt** as this will permit developments which will not be in the character of the existing villages and adversely impact on their rural and peaceful nature, particularly:

- Increased density of housing
- Town centre style facilities eg bars and pubs, night clubs and large retail developments

The additional facilities and additions that the villages require such as improved schooling, infrastructure and medical facilities together with a controlled expansion of housing can be provided without the loss of Green Belt status.

**Sites A38, A39, A40 and A41 - Development Sites in West Horsley (North)**

The Plan is proposing the addition of 533 homes in East and West Horsley, 445 will be in West Horsley (North) on the above sites. Of these sites, I would like to see sites A38 and A41 removed from the plan for the following reasons:

- The addition of this number of homes will constitute a rapid and excessive increase within a small area and will over-load the infrastructure and facilities in the area. In particular:
  1. Local primary and secondary schools which are over-subscribed
  2. Medical facilities – there is only one medical practice serving both East and West Horsley
  3. Existing roads which have limited capacity and are already congested in peak periods. In particular, East Lane narrows at Waterloo Farm Cottage to a single track road.
4. Horsley station car park usage has increased in recent years and it is close to full Monday – Thursdays. There is certainly not the spare capacity to accommodate additional vehicles from the proposed new housing.

5. Sites A38, A40 and A41 are located further than walking distance from shops, railway station and medical facilities. Residents from these developments will cause a significant increase in traffic levels in the area.

   - They will not satisfy Policy S1 by providing “a sustainable development improving the economic, social and environmental condition in the area”.
   - Development of A41 will result in the loss of rural views along East Lane and Lollesworth Lane and create a dangerous precedent for further infilling. The Plan describes the site as “visually enclosed by hedgerows”. This is misleading as the hedgerows are intermittent and there are fine views from both roads of the enclosed field and surrounding woods over and through the hedgerows. The views from Lollesworth Lane are particularly important to me as this road is the start of a number of countryside walks. Loss of these views is wholly unwarranted and unjustified.
   - The construction of such a large number of properties (relative to the number of existing houses) will not meet Policy H1 which requires housing density to “respond to local character, context and distinctiveness”. Inevitably the new housing would have a different architectural style and, as required by the plan, have a much higher density to existing housing which would adversely affect the existing, semi-rural appearance and character of the village. The reason that West Horsley is attractive is precisely because of the current density of housing.

To sum up, I object to the following aspects of the Draft Local Plan: Strategies and Sites June 2016:

   - Policy P2 - Loss of green belt status for East and West Horsley
   - A38 and A41 - Development on these sites should be removed from the plan.

B.vii. Policies A37, 38, 40, 44 & 45 – My Objections
I am writing to express my concern at and objections to the Council's latest proposals for housing development in East and West Horsley.

Unacceptable density, strains on local services and necessary improvements to infrastructure to support such overdevelopment seem once again to have been ignored by the Council.

The plan does not appear to explain how the figure of an additional 385 homes in West Horsley and a further 100 homes in East Horsley has been arrived at; one must therefore assume that this is an arbitrary target set by the Council which is not supported by any particular study or data analysis. It certainly cannot be extrapolated from information supplied by local residents in answer to a local survey. This density of additional housing is completely out of proportion to the current number of dwellings and it seems that West Horsley in particular has been singled out for a percentage increase in housing far higher than anywhere else in the borough.

The Green Belt appears to have fallen victim to supposed housing needs even though GBC policy states "We will continue to protect the Metropolitan Green Belt against inappropriate development". This is surely a case of GBC flouting their own key policies and extending the 2003 Local Settlement Plan Area Boundaries at will. I strongly object to the Horsleys being removed from the Green Belt; this would be the thin end of the wedge with further encroachment becoming a certainty once the precedent has been set. Once lost, what hope is there of Green Belt being restored? Brownfield sites seem somehow to have been overlooked by GBC in their quest to fulfill whatever housing quota has been imposed by central government.

With just one shop, West Horsley relies on the shops, station and services in East Horsley which will mean huge pressure on East Lane/ Ockham Road South, stretches of road which already suffer gridlock at certain times of day. Our local roads are in appalling condition, the Raleigh School is overflowing with pupils, Horsley station car park is full every weekday and the doctors' surgery is struggling to cope with the current number of patients. The Council has apparently been advised by Thames Water that the area's wastewater network is unlikely to be able to support the demand from all the proposed extra development. Despite all of this the Council's plan makes no specific reference to policies for addressing these most basic requirements and how they will be improved / funded to deal with the massive extra demand. Or will that mean a resort to hefty rises in future council tax?

Considered development with low density / low numbers of new homes is understood as a requirement for many areas in the borough; what is proposed for the Horsleys does not meet any of those criteria.

I object most strongly to the current proposal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am writing to express my concerns at the Borough's latest plan as it affects West and East Horsley. I refer also to East Horsley since, while I am resident in West Horsley, my nearest shops and doctors' surgery are in East Horsley, I pass through East Horsley daily on the way to work and regularly use the facilities in East Horsley.

I support the idea that new homes are needed in the borough but I am very concerned over a number of factors within the current Borough plan.

1. The number of planned homes in West Horsley.

1.1 The 35% increase, some 385 homes, particularly being built over a short period (5 years), is disproportionate to the Borough as a whole (eg Tongham 16% and Guildford 11%).

1.2 The number of homes does not reflect the actual needs of local people - currently local people have suggested that an increase of 20 or more homes would be useful. However I acknowledge that perhaps 100 homes, split between sites, would be appropriate overall.

1.3 It appears that the plan has not fully considered all brownfield sites in the area before proposing to build on the Green Belt. I understood this to be a requirement of government policy.

1.4 While the number and percentage of proposed new homes are themselves excessive, the proposed concentration of homes on the plots is also excessive (eg 19dph), nearly double the typical current concentration and therefore out of character with the rest of the village.

1.5 Smaller potential sites have not been taken into consideration or have been left out of the plan.

1. The removal from the Green Belt

2.1 The plan proposes that West Horsley is removed from the Green Belt. This appears to be contrary to or a means to circumvent the Borough’s own policy “We will continue to protect the Metropolitan Green Belt against inappropriate development”.

2.2 There is no justification given to the proposed removal in relation to the National Planning Policy Framework which requires that development on the Green Belt should only be carried out under very special circumstances.

2.3 The Borough plan does not show that all other reasonable alternatives have been considered.

1. The infrastructure

3.1 The current road infrastructure is insufficient, taking into account the use of the local roads as ‘short cuts’, the number of state schools (noting that the Raleigh School is planning to expand and relocate) and public schools, with many roads in poor condition (eg East Lane, The Drift). The current increase in traffic, some due to current small scale building, plus the extensive proposed building work will further damage the roads. There is no indication that there will be major investment in road schemes to coincide with the proposed development.

3.2 The plan appears not to have referenced any traffic survey carried out to establish the current situation or what the effects of the new populace and associated services required (eg delivery lorries, rubbish collection etc) would be. No consideration appears to have made in the plan of the 40% plus increase in traffic in the area to the roads, pedestrians, horse riders and cyclists.

3.3 Particular pinch points such as the junction of East Lane/ Ockham Road, Shere Road junction with A246 and East Lane single lane section, appear not to have been considered.
3.4 While flood risks of the proposed housing plots have been considered, the current regular flooding of roads in the area and appears not to have been considered in any detail or the likely increase due to run off from new properties and inadequate drainage systems.

3.4 There appears to have been limited consideration of the need for additional sewage treatment facilities.

3.5 There has been some consideration of the need to extend the current doctors surgeries but this is vague and makes no reference to improving access and parking which is already insufficient.

3.6 There appears to have been no consideration of the current pressure on local hospitals, and A & E departments in particular.

3.7 There appears to have been no consideration of the current limitations of shops and associated parking in West Horsley.

3.8 There appears to have been no consideration of parking or access at Horsley station.

I urge the Council to take the above points, and the various points raised by other residents, into account and to modify the plan. The plan should provide for some new homes, but a proportionate number in suitable locations, spread out, on small plots, at appropriate concentrations, and with details provided of the plans for investment in the infrastructure before the homes are completed.

Surely, if this process was followed there should be no need to remove West Horsley from the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Thatcher’s Hotel site could be a possibility for a small development for the same reasons. I would be strongly against the East Lane, Waterloo Farm and Manor Farm sites being developed as these are clear visible green belt areas. The Ockham Road North site near the Station could be an infilling possibility as it is so near the railway and the shops. These are the absolute maximum for the two separate villages of East and West Horsley, as schools, village parking, medical services are already very full. I hope that you will grant approval for the Opera House at West Horsley Place as this will be an added amenity to the Borough and will help ensure the survival of West Horsley Place and its Garden. It is important to preserve what is left of the green field area to the south of the A246.

I am writing to object strongly to the new local plan published by Guildford Borough Council.

I object to the change in the Green Belt status which brings in a newly identified “village boundary”. Our little villages of East and West Horsley will become very large villages, almost towns, if your proposals for over 500 new houses on Wisley Airfield go ahead. These villages are in the Green Belt to prevent them growing and becoming part of outer London. There does not seem to be any plan for additional schools and doctors surgeries

The Raleigh School, the only state primary school in the 2 villages is full to capacity. Where are all the extra children going to be schooled?

There is only one doctors surgery, where are the new people going to be registered? Our surgery is already full to capacity.

Our little lanes in the area cannot support extra traffic. The roads are full of pot holes and there is no pavement in some areas.

We do not have the infrastructure for over 500 new dwellings, let alone over 2000 on the Wisley airfield site.

There is no room for cars to park at the stations. There are already cars parking in local streets because the car park at Effingham junction is full.

In short, East and West Horsley cannot cope with over 500 new dwellings nor over 2000 at Wisley Airfield. These villages area in the Green Belt and need to remain in it to preserve our open spaces for generations to come.

I sincerely hope that Guildford Borough Council will re-assess it’s own policy objectives rather than force through the council a local plan which clearly does not have the wider support of the residents of Guildford Borough.

I am writing to oppose the proposed plans of removal E + W Horsely villages from the Green Belt.

Also against the proposed 4 sites for building 385 houses.

My reasons are:

The Horsleys have a rural feel and if taken out of the green belt will become urban and alter the village feel.

The density of housing will only add to the road congestion and the infrastructure is already stretched.

Schooling is not adequate even now.

There are drainage issue even now but extra housing will exasperate the situation.

There are other areas, like Guildford town who only have proposed 11% increase as opposed to horsley 35%. This isn't fair!

Having just spent the weekend in Norfolk I see no reason why should have a changed environment dramatically when there is ample space for a new town in Norfolk.

So I am opposed vehemently to the proposed local plan for W+ E Horsley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I want to object in the strongest possible way to the Guildford Borough Proposed Submission Local Plan: Strategies and Sites.

The Green Belt was introduced to protect villages like East and West Horsley to ensure the urban sprawl of London and surrounding towns had an outer limit and green ‘lungs’ surrounding. I have lived in Horsley all my life and want to continue to live here and raise my family in the semi rural environment we love. I am totally opposed to removing the village from the Green Belt and do not believe there is ANY justification for doing so – indeed the plan does not even include any ‘exception circumstances’ which would support such a change.

West Horsley is characterised by mixed housing all at low density with many historic buildings (including the one I live in which is over 100 years old and used to be the doctors surgery) and should be maintained with very limited in-fill development to preserve the character of the village and ensure the population can be adequately serviced by the local amenities.

The proposal to build 385 new high density homes is madness – the schools, road infrastructure, medical facilities are already at capacity. There are no local jobs so people moving here would need to commute and we are already the last station to Waterloo where you are (almost) guaranteed a seat – it’s a very long stand for 45 minutes to London with no seat from here and adding more people will make the commute unbearable for many of us.

The key evidence document ‘Guildford Borough Economic Strategy 2013-2031’ makes no case for locating large numbers of homes in West and East Horsley – back to my point about jobs – as we strive to reduce our impact on the environment it seems totally counter intuitive to site lots more families away from towns (with jobs) and away from robust and accessible transportation lines. The local survey on the need for homes identified the need for 20 affordable homes to enable local people to stay in the village – this should absolutely be prioritised.

As mentioned, I feel am perfectly placed to give a view having lived in Horsley all my life (baring a short spell in Burpham!) – I have chosen to bring my family up in this lovely village. Villages such as East and West Horsley are what England is rightly famous for and should be protected and loved for future generations. Once spoilt with over development you can never re-create/turn back the time to restore.

Please, please do not destroy my village by taking it out of the greenbelt and building high density housing.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I have been a resident of West Horsley for the last 18 years and have lived in the Horsleys all my life. Horsley is a village that is recognised nationally as being one of the best places to live in this country due to it’s heritage, open spaces and for the style of living it affords the lucky folk that live here. I am extremely concerned and very strongly object to the fact that Guildford Borough Council propose to inset West and East Horsley from the Green Belt, and that there have been no MEANINGFUL changes to their proposals since the 2016 consultation.
The council has ignored the mass objections from over 30,000 residents. This is totally unacceptable. Local views must be considered and the heritage of Great Britain, renown internationally for having quaint villages, must be maintained for future generations. The whole of the South East cannot be allowed to be slowly merged into one enormous conurbation with no clear boundaries or communities.

Nothing to my knowledge has been put forward since last year’s Consultation to improve the sustainability of the West Horsley development sites. Every home on the proposed West Horsley development sites will need a minimum of one car, and in reality will most likely have at least 2 cars per household. The village and current infrastructure is full!

To reiterate, I strongly object to the fact that Guildford Borough Council propose to inset West and East Horsley from the Green Belt, and that there have been no changes to their proposals since the 2016 consultation regarding proposed developments and supporting infrastructure.

Similarly, the near 600 proposed homes on farmland in West Horsley is not necessary. I am not anti development per se and we all have to do our bit ( I don't object to the plans for Thatchers Hotel or the Post office site) but ask for sensible and responsible actions from our Council by removing such a huge threat to this beautiful part of the country.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

In relation to my own area, the Horsleys, the boundaries of the villages would be extended and the area within those boundaries removed from the green belt. In addition, the proposed development of 2000 houses at Wisley two miles away has been retained. At the same time it is claimed that the villages would retain their rural character. This flies in the face of common sense.

I don’t doubt that more housing is needed and that achieving this while balancing the needs of the population and the interests of residents is a difficult task. The plan as it stands might satisfy developers and the Government Inspector but it is a pedestrian document which fails to achieve a satisfactory balance for residents, actual and prospective, and displays little in the way of the innovative ideas and lateral thinking which are needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Guildford Boroughs new 2016 - Proposal to remove green belt status from East and West Horsley

I write to OBJECT IN THE STRONGEST POSSIBLE TERMS to the above proposals, for the following reasons:

The purposes of a green belt are:

Prevent development

Allow homes and corridors for wildlife

Protect the natural environment

Improve air and water quality

Protect the unique character of rural communities

Ensure people have access for educational and recreational purposes.

The validity of these purposes remains and no proposals have been made to offset each of these requirements in the event that the green belt is stolen.

The present nature of these villages is green and rural I do not believe that drastic changes should be made.

The proposal to create development potential for an additional 533 properties would be an overwhelming change to the nature of the villages in terms of land use and population. Effectively this would be infill on a huge scale, quite out of keeping with the traditional nature of English villages.

The current infrastructure can barely cope with the needs of the existing community.

Power, water and sewage services can only just about cope.

The GP service is running at full capacity

There are no spare school places.

There are virtually no employment vacancies for such a large number of additional newcomers within the villages, leading either to unemployment or additional commuting requirements. The present bus service (passing through East Lane) is not adequate to provide a timely commuter service, and it doesn't run at weekends

What changes (2016)/further amendments (2017) do you suggest should be made to the document? 

Attached documents:
Having looked at available information and reading the Local Plan I would like to make the following comments:-

The proposal to remove the Horsleys from the Green Belt would be a detrimental step and damaging to the local environment, leaving the whole area at risk of even more development than that currently proposed and put the current facilities of nature walks and recreation ground also at risk. Plus I do not believe that the "exceptional circumstances" needed to remove the area from the Green Belt have been demonstrated.

Station Parade being classified as a District Centre is puzzling and I can only surmise that the facilities on offer have been totally misunderstood for this classification to have been even considered, leading me wonder if this is being done in order that it will allow for further urbanisation.

I can find no sound reasons from the proposed plans as to why the settlement area boundaries need extending, unless this is a bid to make future development easier and I object strongly to this proposal.

Local infrastructure is already at breaking point - schools over subscribed, GP Surgery over stretched, drainage insufficient and roads unable to cope with current traffic and continually needing repair. Residents in Kingston Avenue already experience problems with cars parking all day, often by commuters, making it difficult if not impossible to either park outside their own homes or to get in or out of their driveways. If one then adds to this the gridlock that is the A3/M25 junction which has for years now been unable to cope with the volume of traffic either entering the M25 at Junction 10, but also the motorway itself is daily unable to cope with the volume traffic. Any further development can only have a further catastrophic negative impact. The argument that there are several local train stations does not hold water as passengers need to be able to drive to the stations, be able to park for the day, let alone find space on the already over-crowed trains. All this infrastructure also faces greater pressure still from other proposed developments, not only in this borough, but those in neighbouring boroughs that feed into the A3/M25 and that use the same train routes into London.

To plan an increase in households in this village by what seems to amount to 30%+ seems totally out of proportion to other areas. Surely this is more than the estimated population growth - and where are the jobs that these increased householders will need in order to afford these new houses?

In conclusion, whilst accepting there is a need for some expansion of housing, any proposed development should be small and in keeping with the character of the rural village that is the Horsleys - possibly on sites such as Bell and Colvill, OR the Thatcher's.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Sites and Policies A35 to A41

Although none of the five East Horsley sites that are identified in the Borough’s Land Availability Assessment affect me directly, the indirect effect will be substantial since development of all, or any, of them will have an immediate and adverse effect on the items listed by the East Horsley Parish Council in its comments on Policies I1, I2 and I3.

I, therefore, strongly support and endorse the objections raised by East Horsley Parish Council to these Policies.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1) I strongly object to no changes being proposed since the 2016 Consultation to Insetting East and West Horsley from the Green Belt. The logic in attempting to effectively remove East and West Horsley from Green Belt is seriously flawed.

2) The eastern side of the Borough is now scheduled to take an even greater proportion of new homes in the Green Belt.

3) It is totally unacceptable that Guildford is choosing not to constrain its overall housing growth, as many other Councils have done to protect Green Belt. The objectively assessed housing target, though reduced since 2016 to 12,466 homes, will by 2034 (the end of the Plan Period) mean that Guildford has grown by nearly 25%. This is nearly double the Office for National Statistics prediction for the growth of Guildford.

4) Flawed evidence continues to be relied upon to justify overexpansion.

5) The reduction in the number of new homes proposed in the Green Belt after the 2016 Consultation, is welcomed (90 in West Horsley, 1100 in Normandy and Flexford) but does not go far enough in reducing the still very large number of new dwellings proposed on Green Belt.

6) Guildford town centre needs more apartment homes NOT more shopping space. Online retailing is driving major change in ways of shopping – many reports published stating this.

7) Nothing has been put forward since last year’s Consultation to improve the sustainability of the West Horsley development sites and thus meet National policy requirements. Every home on the West Horsley sites will need a minimum of one car to enable residents to get to shops, medical centre, library and Horsley Station, regardless of how much pressure is applied to adopt cycling and walking as the preferred means of travel.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

My objections above apply to the whole Local Plan, and specifically to the Horsleys and Wisley.

I object to the proposal to build at the so-called Thatchers’ Hotel. This proposal has recently been turned down by the Borough Council and so should not even be in the Proposed Local Plan. We are short of hotels in the area and there should be no change of use. The land to the south of the hotel is Green Belt and should remain so. The entrance on to the A246 is between two right-angled bends, each of which is a junction itself. One has very poor sight lines and the other is a very busy, often congested junction.

I object to the proposed Ockham Road North development. It has major problems of access. There is a Nursery and Pre-Preparatory School very close by and another, much larger Primary School in the vicinity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I appreciate the need for more housing, especially 'affordable housing' but to vandalise The Horsleys is a step too far. I see plans for up to a massive 593 new homes but no plans for the necessary infrastructure improvements (eg about 1000 new cars in the villages!) and plans with guaranteed funding for new schools, doctors' surgeries and other vital facilities. As it stands, the character and facilities of the villages stands to be destroyed by the plan which one might have expected to take account of the needs and desires of the present and future residents above all else.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

This is an ill thought out and obnoxious scheme totally out of scale in this rural area.

1. I object most strongly to the removal of Green Belt status from the Horsleys and the enlarged village boundaries.
2. I object to the additional 500 or more houses that would consequently be built on Green Belt land. This will suburbanise the area and eventually lead to urban development all the way from Epsom to leatherhead and Guildford.
3. I object to the development of the Wisley Airfield which will have a massive impact on our area.
4. I object to new roads which will have to be built to accommodate the traffic generated by this scheme.
5. I object to large numbers of cars which will have to use station car parks which are already full. People will have to seek employment away from this residential area.
6. I object to the vast increase in traffic which will lead to an increase in nitrogen dioxide particulates in the environment.
7. I object to building in the Ockham Road North area. It is a level 3 flood risk area and building there will make flooding a real possibility.
8. I object to a huge development on this scale which will place an unacceptable burden on schools and medical facilities
9. I object to the designation of station parade as a “district centre”. This is appropriate in Beckton in East Landon but not here.

This whole scheme must be abandoned. It is too big and will destroy this Green Belt area which we have enjoyed for so long.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Additionally for all the reasons outlined above about infrastructure shortcomings around Horsley and in particular the proximity to the A3 and junction 10 of the M25 these proposals are unacceptable.

I previously lived at Elm Corner on the edge of the airfield (the entrance to which is directly opposite the entrance the RHS garden) and gaining access to the A3 (for just the half a dozen or so dwellings there) was challenging then with the sheer volume of traffic pouring off the M25 onto the A3 southbound and then coming off at the Ripley/Ockham roundabout - even if access is transferred to the Ripley roundabout, unless the roundabout itself was altered to give access onto the southbound A3 (as it should originally have been built) this will be problematical/challenging - the roundabout is already congested in the morning and Ripley itself is often congested due to the Newark Lane access issues. Additionally the noise and pollution from junction 10 was intrusive before the motorway services were built, now it is almost unbearable. Public transport links are virtually non-existent and, as previously mentioned, potentially hazardous to cyclists, so each dwelling will require at least one car, which then places further stress on an already overburdened situation.

I appreciate that there is huge political pressure to increase residential housing in Surrey and you will have a huge amount of correspondence to deal with in connection with the 2016 Borough Plan, however I hope that you will take my objections into account and that ultimately you will be able to find a more sympathetic, less intrusive solution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/3464  Respondent: 8857057 / Dawn Childs  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to removing the Horsleys from the Green Belt - this would change the character of the village beyond belief and need. This would threaten a unique area of the countryside, wildlife and be detrimental for all those currently residing within the villages.

I object to the boundaries being extended as this will be a direct attack on the open farmland and make developments ripe for the picking and lay us open to these encroaches on the countryside.

Infrastructure is already overloaded within the village. The doctors can barely cope, the roads are a rat run for those cutting through to the motorways. The train station car park is bursting and the village simply cannot absorb greater population growth.

I believe that the alleged housing requirements is hugely inflated and way beyond national growth patterns. There are vast areas of brown field sites throughout the whole South East that should be utilised prior to green belt areas coming under threat.

I have lived in West Horsley all of my life and already seen it grow hugely, please do not let this growth start having a detrimental impact on the village, the people already here and the beautiful countryside and wildlife.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: PSLPA16/3142  Respondent: 8857537 / Tony Heaney  Agent:  
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. The proposals to remove The Horsleys from the Green Belt. The exceptional circumstances required in order to take such action have not been demonstrated.
2. The designation of Station Parade in East Horsley as a District Centre. The nature of the village centre and its facilities have clearly been totally misunderstood. If implemented, this proposal would lead to targeting the village for inappropriate urban development in future.
3. Extensions to the Horsleys settlement areas. This proposal has no sound reasoning attached to it, and looks like it is there just to extend the available land for future development.

The infrastructure in the Horsleys is barely adequate for the current population with full schools, stretched medical and transport facilities and little scope to improve them.

In conclusion, It seems very much that the proposals for development around The Horsleys are so much out of line with those for other similar areas of the Borough that it appears that some very deliberate targetting is taking place to make someone's life easier.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

22 POLICIES A36 to A41
22.1 I object to the changes to Policies A36 to A41 (East and West Horsley)
22.2 The number of potential development sites has been reduced by two (A36 and A41, representing a total of 138 dwellings). This leaves four sites (A27-40) which still represent a total of 395 new dwellings.
22.3 Marginal changes such as these would still leave 70% of all new development in the borough built on Green Belt sites. No “exceptional circumstances” or any other justification is advanced for this strange imbalance.
22.4 The deletion of two Horsley sites fails to correct the issue of relative overdevelopment in East and West Horsley, which is both excessive in absolute terms and disproportionate in relation to the rest of the borough.
22.5 No attempt is made to assess the cumulative impact on the Horsleys – either of the four sites now proposed, or of Site A35 (Three Farms Meadow, alias “Wisley Airfield”), with over 2,000 new homes only 2 miles away. This piecemeal approach leaves the future of the Horsleys at the mercy of ad hoc planning applications, which is the opposite of what a Local Plan should intend.
22.6 The new plan Policies put greater emphasis on the need for adequate facilities and infrastructure to underpin development. But this is not reflected in any new wording on the Horsley sites, thus leaving most local objections unaddressed. Again, this defect curtails the plan’s usefulness as a practical planning tool at a site level and undermines its credibility among residents.
22.7 The plan fails to mention most of the known sustainability issues and infrastructure constraints affecting the Horsley sites, including public transport, traffic, road safety, parking, schooling, medical facilities, sewage, flooding/surface drainage and shops. These were fully set out in responses to last year’s public consultation.

22.8 The density of new housing on the four Horsley sites too is inappropriate, being greater than anywhere in the locality at present.

22.9 Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries. The plan presents no arguments for this which, contrary to NPPF paragraph 79, will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.

22.10 Collectively, the four Horsley sites breach NPPF paragraph 81’s encouragement of access to the Green Belt and its amenity and recreation value. This has been an outstanding success story in the Horsleys, as detailed in response to the last consultation. Assets include a dense public footpath network, parish parks, sports fields, a campsite of international standard, Britain’s newest rural opera theatre and the popular Olympic cycle route. These examples of positive planning depend on a Local Plan that protects the Green Belt, maintains its openness and beauty and avoids urbanisation and traffic congestion. Sites A35-41 are hostile to this.

2 Sites in East and West Horsley (sites A36-41)

I object. The council leaders representing Ash and Tongham (where the Green Belt is actually being extended) are pushing a disproportionate allocation to this area which will create a mega-village and ruin what is currently two lovely villages. The number of homes in West Horsley, a rural village will increase by 35% which is also I understand 35% of new homes in the plan with urban Guildford taking only 11%.

The infrastructure and schools, doctors, shops can't take the strain of this together with the c. 2,000 houses planned at Wisley airport.

It would damage local tourism

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

East and West Horsley
I object to including sites A36-41 (East and West Horsley) in the local Plan. There can be no conceivable justification for the extension of the Green Belt as it applies to the areas represented by Council leaders (in particular Ash and Tongham), whilst at the same time building 533 new houses (and at least another 90 on smaller sites) on 6 sites in East and West Horsley, within what is now the Green Belt. It follows that I also object to taking East and West Horsley out of the Green Belt.

Putting that iniquity to one side, this increase in rural West Horsley (where I live) by 35% is plainly out of keeping, both in number and density, with the countryside and the village. It is disproportionate when measured against the overall increase in housing across the Borough, and particularly in Guildford Town. No case is put forward for such radical transformation of a community. Plainly, the developments in the Horsleys should not only be considered as individual sites, but also for their cumulative impact on the contiguous villages of East and West Horsley and their rural environment.

This increase in housing would inevitably put an unsustainable strain on local facilities and infra structure, including public transport, parking (including at the station, shops and medical centre), schooling, medical facilities, sewage, surface drainage and shops.

In respect of waste water, I understand that Thames Water has advised the Council that the current network will not cope and that the Plans will require a wholesale upgrading of the foul drainage system all the way to the treatment works North of Ripley. This is not provided for in the Plan. Indeed, the time that would be necessary (let alone the cost) would render the Plan in its current form unworkable.

Furthermore, Guildford Council's own education review states that "expansion options may need to be considered for primary education in the Horsley area within the first 5 years of the Plan". However, Surrey County Council has no Plans for this, and the Raleigh School is already full. There are private schools, Glenesk and Cranmore, but they are also at or near to full capacity and, in any event, local Planning should not create a situation where only private schools can provide education for the additional pupils in the locality. Using schools in Ripley contravenes the requirement for primary schools to be within walking distance. In any event, considered in tandem with the proposals for Wisley Airfield, the lack of additional schooling will result in an influx of pupils to Ripley with which the school could not cope, without even considering overflow from Horsley. There is a lack of joined up thinking.

Moreover, the density of new housing on the 6 Horsley sites is inappropriate. Planning appeals (in particular on Ockham Road North) have confirmed that densities of the sort envisaged are unacceptable.

The sites in the Horsleys are not permissible under NPPF. They contravene Paragraph 79 as they will contribute to creeping urbanisation along the Green Belt corridors separating the Horsleys from the neighbouring settlements. They militate against the requirements of Paragraph 81 of the NPPF relating to Green Belt amenity and recreational value. On the other hand, there has in the past been much positive in the Planning for the Horsleys at local level. An Amenity Wood and Community Garden have been created, local residents have purchased adjacent fields in order to preserve the open aspect, there are flourishing football, cricket and tennis clubs, with the associated requisite space, tourism is encouraged by the high quality camp site at Waterloo Farm, and Plans have been approved for a "Theatre in the Woods", a unique opera house which, together with East Horsley's unique theatre (the Nomad), funded by Lottery money, will promote the Horsleys as a centre for the arts.

The open nature of West Horsley resulted in the 2012 Olympic cycle races passing through the village, a route since adopted by cyclists as a permanent asset, including the annual Prudential Cycle Race. The enormous increase in the throughput of traffic resultant upon the Plans put forward in the local Plan will be a danger to cyclists.

I also object to Policy 40, which is entirely inadequate to address the problems of safety on the local roads. It is ironic that attempts to expand the 30 mile per hour zone in Ockham Road North have repeatedly been turned down by local authorities, Highways England and the Surrey police, notwithstanding data showing a doubling of traffic over the last 15 years, with an average speed of 52 miles per hour in what is a 40 miles per hour limit.
The additional housing anticipated in the Plan will result in traffic volume that these roads cannot sustain. Ockham Road North and South would become main thoroughfares, which they are not built to support, whilst at the same time incurring heavy use by pedestrians. This includes children attending the Raleigh and Glenesk Schools, and those catching school buses to Guildford and Effingham, pensioners who live adjacent to both Ockham road North and South and the tourists who walk from Waterloo Farm campsite. Footpaths are narrow or non-existent and there is no space to construct or widen them. The roads are unlit, winding in nature and have poor sightlines with concealed driveways (including my own). Drainage ditches run along the side of the road, resulting in vehicles swinging out into the road and crossing the central line when entering or leaving their properties.

Public transport is virtually non-existent by road, and by rail the commuter use will increase with the additional households requiring additional parking spaces which are not provided for (the current parking being inadequate for the proposed additional housing in the Horsleys, let alone the substantial commuting proportion of the proposed additional 2,000 houses at Wisley). In respect of the proposed Wisley development, it is fanciful to suppose any station other than Horsley, being the most convenient station, will be used by commuters (the same applies to the proposed Wisley Airfield site referred to below). It is also fanciful to suggest that commuters will cycle to the station in anything other than very small numbers, still less so from the proposed Wisley Airfield site. As pointed out above, the traffic hazard in doing so will also militate against cyclists.

In stark contrast to the provisions of the Plan, the West Horsley Parish Council and Surrey Community Action Housing Survey carried out in May 2014 identified a limited need for some 20 affordable homes for local people who want to remain in the village - i.e for young people or for elderly people who wish to downsize to a smaller home. Obviously, when elderly people downsize this has a trickle down effect, releasing properties through the housing chain as well. Moreover, such developments for the elderly would not incur the problems that beset the current draft local Plan. Elderly people are not commuters. They would not be making 4 journeys a day (to and from the station). They would not have 2 cars per house, increasing to 3 or 4 as children get older. They would, of course, require medical services to a greater degree than other individuals, but on the other hand there would only be 1 or 2 per household rather than 3, 4 or more. For the latter reason also, there will be less of a strain on utilities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<td>1. I strongly object to the significant increase in the numbers of homes proposed to being built in East and West Horsley (35% more homes). Total amount of new building out of scale with the planned development elsewhere the borough, especially less sensitive urban areas not protected by Green Belt. The number of homes is disproportionate to the size of the village and will have a significant impact on infrastructure and village amenities. I travel to both London and Reigate with work. The Ripley junction with the A3 is already always congested and a 15 mile journey will often take over an hour the majority of which is sat on the mile stretch from Ripley to the M25 interchange. Likewise on the trains the line from Horsley to Waterloo is always over crowded with the majority of commuters having to stand. This train line would not support such a huge increase in population within the Horsley’s.</td>
</tr>
<tr>
<td>2. I strongly object to the amount of building in the green belt in the Guildford Borough plan. The greenbelt is a precious commodity for our borough and country. Once gone it can never be replaced. I raised this as a concern previously and it does not appear that there has been any recognition of the views of the residents from the last consultation and I have still not seen any exceptional circumstances provided by Guildford Borough. On the same note I also object to the recent proposal to build a new primary school off of East Lane for the same reason. This is precious green belt land. The school works well now to support the village and can</td>
</tr>
</tbody>
</table>
accommodate the number of children that require a place. I note in the 2016 reception intake that children living in Ripley managed to obtain places at the school.

3. **I strongly object to the change in character of the Horsley’s.** There is no local support for this plan, the villages will change into towns due to the size of the developments, the amount of housing proposed far exceeds the local need and no consideration has been made on the collective impact of the 6 sites and the proposed Wisley development. This is an excessive amount of building for this area when compared to the rest of the Borough, which also has more brownfield sites that could be developed and do not appear to have been considered.

**Comment ID:** PSLPA16/1958  **Respondent:** 8859265 / Jeremy Sharland  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **Sound?** ( ), **is Legally Compliant?** ( )

I am writing to lodge my objections to the new Guildford Local Plan. I am a resident of West Horsley and I am very concerned about the impacts of the new Local Plans’ proposals.

I object to the proposal to remove the Horsleys from the Green Belt as the exception circumstances have not been proven, as is required to remove land from the Green Belt. Further, the proposals for the extension of the boundaries of the settlements is not based upon a robust case and therefore I object to this proposal.

The local primary school in Horsley, the Raleigh school, is already oversubscribed, stretched to capacity and there is already limited outdoor play space for the children. Any increase in numbers of children at the school will have detrimental impact upon the teaching, sport and wellbeing that the school can offer to its pupils.

Further, the local roads around the school are already heavily overloaded at school drop off and pick up time and the roads often become impassable for local residents at this time. Increasing homes in and around the Horsley villages will put further strain on these roads as the homes are located too far away for parents to walk to school with their primary school age children and they will be forced to use their cars.

There is insufficient public transport for the children to uses buses to travel to school either. Therefore object to the increase in proposed housing capacity in the Horsleys for the reason that it will have a detrimental impact upon the Raleigh school, local roads and the quality of life of people living near the school.

The roads around the Horsleys, most notably from Ockham to East Horsley, The Street and the roads from East Horsley to Effingham junction including Forest Road and The Drift, are also very heavily trafficked at commuting hours and school drop off and pick up time.

Extra housing in the Horsleys and the proposed 2,000 homes at the former Wisley Airfield will place significantly more pressure on the roads. The majority of the proposed housing development sites in the Horsleys and the former Wisley Airfield Development site are too far away for people to walk children to the Raleigh school or for commuters to walk to Horsley Station or Effingham Junction Station and therefore the majority of new residents will use their cars. I object to the proposed increase in housing development due to the increased strain on the already congested rural road network.

Flooding is also a major problem where we live in West Horsley. Where The Street passes under the railway line in our village (before The Street becomes East Lane), most years since we have lived here this section of road has flooded rendering it impassable for cars. The impact upon us and other residents in the village has been children arriving late for
school, commuters missing their trains to London, missed refuse collections and damage to property including both land
and cars.

A number of the proposed housing development sites I Horsley are located in the catchments of streams that cause this
flooding. For example, the Bell & Colville site is situated just uphill from a stream that runs north parallel with The
Street. This stream turns into a torrent after heavy rain and it floods directly onto The Street. Development at Bell and
Colville with add to this water discharge by removing permeable natural surfaces.

Thank you for reading about my objections to the New Guildford Local Plan 2016 proposal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

I live in West Horsley and am writing to express my grave concern about the current proposal to remove the Horsleys
from the Green belt and to increase the current number of dwellings at Thatchers, Manor Farm, Bell&Colvill, Ockham
Road and East Lane by 533 in total.

There are three main reasons why I consider the plan ill-advised:

1. a) There is a similar plan to develop Wisley airfield to add 2,000 houses - only a few miles away. This will
obviously create an overspill of people and traffic into our villages and use the already overloaded infrastructure
(see below);
2. b) We should cherish the green and open spaces that we have and consider other options to build the houses
required to meet the shortfall, e.g. the re-generation of existing urban areas, higher-rise apartment blocks in or
near to town centres and other brownfield development opportunities. Only then should greenfield sites be
considered as a serious option. The current proposal to develop the green belt in/around the Horsley area is not
the right way, and if this decision goes ahead it can never be undone.

1. c) The current infrastructure that is in place in Horsley (parking, schools, train station, doctors etc) is already at
stretching point. For example, the limited car parking provided at Horsley train station means that the car park is
full by 8am on a weekday morning. Similarly, the A246 is gridlocked from the traffic lights at Effingham, as far
back as Thatchers on a weekday morning. The proposed increase in village population is simply not compatible
with this current infrastructure. The plans that I have seen make no consideration of this requirement to make
serious investment to upgrade all infrastructure correspondingly. Where will the extra train capacity, parking
capacity (both at the train station and the shopping areas) come from? I have similar concerns in respect of other
infrastructure, schools, doctors’ surgeries, shops, roads, other public transport options etc, as well as those areas
that are less visible, sewage and water systems.

There is so little green belt remaining in the south of England that I think it is outrageous to even consider reducing or
removing this beautiful landscape that no only improves the environment but also attracts tourists and economy to the
area. I urge you to re-consider including the Horsleys in the development plans.

Thank you for taking the time to read this objection

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I wish to register my OBJECTION to the Borough's new local plan of 2017, particularly in respect of its impact upon the Horsleys.

Despite the Borough's past promises to protect the green belt this has clearly been ignored in the current local plan, as HAVE the wishes of the people.

Although two of the redevelopment sites have been removed four remain, the largest being the redevelopment of Wisley airfield. This is, as has been said many times, a wholly unsuitable site and the grounds for its unsuitability are well documented.

The encroachment into the green belt around the borough in this already heavily populated area is a big mistake and is not a fitting legacy for the council. Once the green belt is lost it is lost for ever. It must be protected for the sake of future generations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT ESPECIALLY TO 6 POLICIES: A36, A37, A38, A39, A40 & A41:

• Amount of new housing far exceeds local need.
• Housing density excessive when compared with existing development.
• Would transform the Horsleys into a sizable town, something for which no case is made.
• No local support.
• Collective impact of these 6 sites on a small part of the borough not considered. Should not be treated as isolated, separate sites.
• Total amount of new building out of scale with the planned development elsewhere the borough, especially less sensitive urban areas not protected by Green Belt.
• Sites unsustainable. Key infrastructure lacking. No adequate provision is made to increase it – e.g. poor wastewater capacity, lack of schools, absence of traffic management plan, flooding.
• No account taken of additional impact of Wisley Airfield site on Horsleys.
• Extension of settlement boundaries too permissive. Horsleys characterised by streets with development along only one side of the road. Policies allow too many adjacent green fields to be developed by squaring off boundaries and claiming they don’t contribute to Green Belt “openness”.
• Green Belt gap with neighbouring settlements hugely narrowed, especially if Wisley Airfield is built on.
• Will harm compliance with NPPF 81 – e.g. by making cycling (including Prudential cycle races) too dangerous, ruining the rural setting of Waterloo Farm campsite, destroying the ambience of Grange Park Opera’s new “Theatre in the Woods”.
• Policy A40 especially unviable because of high water table and poor drainage, leading to regular winter flooding.
• Safe access and egress at Site A40 unachievable, owing to flooding, high speed limits, poor sight lines, narrow access to existing properties, inadequate pavements for elderly and schoolchildren, increasing use by recreational cyclists etc.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

a) The alarming number of houses proposed. This is the largest number is almost 70% higher than the official national estimates for population growth in the Borough. This development will have an appalling affect on several sections in the area.

b) The 'exceptional services' required before taking this action. No sound reason has been given for the proposed changes to the extended boundaries and have not been demonstrated.

c) The infrastructure is already over loaded. i.e. Schools, Medical facilities, Drainage, Roads and Car Parks etc. There are no possible means of improvement.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/752  Respondent: 8862401 / Kieran Salter  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to object to the local plan.

There are many areas of the plan that concern me but the complexity of the process naturally works against the average person in the street like myself. It is hard to conclude that there is not some method in said process in that regard.

On that basis i cannot fight all the points. So i will list some concerns that i see in my domain but i would register here that they likely apply across all areas affected by the plan.

I OBJECT ON THE FOLLOWING GROUNDS

1. Moving the Horsleys out of the greenbelt.
I have in my life chosen both urban living and rural living.
Both have their merits but the beauty is that we have a choice.
The Horsleys are attractive to me at this time because they are in the green belt and all the benefits that that gives.
In time i will move back to urban living to secure all the benefits that that can bring but your intentions remove the democratic right i have to make that choice.
2. Proposed development of Thatchers Hotel.
There is just no confidence in the Authorities locally at their ability or willingness to respect the mood of dwellings in the villages.
Time and again approval is granted for developments that have met with huge groundswell of local opposition.
The rights of the individual are ignored.
The initial plans shown on this development show complete disregard for the local mood, image, trends.

3. The shortfall in local services.
I was unable to get my son into the Howard school due to a shortfall of places.
This despite having lived in the village for 25 years.
I wouldn't go through the pain process to try and get my younger son in in two years time.
So, a fairly basic problem there.
The ability to get in to the Doctors surgery without using an emergency slot is challenging at best and often a lot worse than that.
The state of the local roads is just appalling as is the roadside maintenance clogging up footpaths.
And seriously you want to grow the population.

So there you have it and quite frankly i have not even mentioned Brexit and the likely implications on population growth.
At the very least a pause is required to watch the impact over the next few years but again i object because the Plan seems flawed at many levels.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I write concerning your development plans for The Horsleys.

It is such a concern that you are planning for so many new homes in this area.

How can an area designated as green belt just be changed to a new village boundary to make room for more houses?

The infrastructure of the Horsleys just will not be able to cope with all the extra people. There doesn’t seem to be any provision for additional parking for the East Horsley shops, medical centre and especially the Kingston Avenue sports area – the result will be more parking on roadside verges causing mothers with prams/pushchairs having to use the road.
We have constant water drainage problems resulting in appalling potholes in the main roads of Ockham Road and East Lane and heaven knows what the result of the building of all these new houses will be on this problem. Will there be another school to cope with the extra children – I no longer have school age children but am aware that not all local children can get into our local primary school as it is now.

I am sure you will be receiving many letters regarding your plans and hope that whoever is responsible for all this will give due thought to the issues that will be raised.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I wish to protest against the local plan proposals and in particular the proposed developments in West Horsley.

West Horsley is a pretty village which receives a considerable number of recreational visitors through the seasons each year who are undoubtedly attracted by its setting in a rural environment. Building 385 new houses on four large sites in the village, plus at least another 50 on small sites within six years would alter for ever the rural character of what had been a small village.

There is no evidence of which I am aware for locating such a large number of homes in West Horsley. I accept there is a need for further housing in the the area and that there should be some development in the Horsleys but what is proposed is not only disproportionate but would have the inevitable effect of ruining the village and causing irreparable damage to the Green Belt.

Why has West Horsley has been singled out for such a huge increase in size? It will be a massive 35% extra houses in one village.

The rest of the borough will increase by a far lower percentage and in particular Guildford town is scheduled to have an increase in size of only 11%.

Surely there are brown field sites in the town which could accommodate many hundreds of new houses in a location which is far more suitable for young families.

A development of this size in West Horsley will put unsustainable strain on local facilities and infrastructure and in particular public transport, parking, schools, medical facilities, sewage, surface drainage and shops.

**Transport and parking**

An increase in village population will increase pressure on station parking, (often full in the morning with commuter traffic) and traffic movements to and from Horsley station and an increase in school children getting getting to school in West Horsley or going to Guildford and Leatherhead. The volume of traffic generated from the proposed new housing estates will be considerable and the impact on the local roads, which already struggle to cope with adverse weather conditions, will be significant. It will also impact on the traffic flow on the A3 in and around Guildford which can be a considerable problem at morning and evening school times. The bus service to and from West Horsley is inadequate.

**Schools**

There are as far as I am aware no plans whatsoever to provide the necessary schools to cope with such an increase in population. The Raleigh School is already full and the private Glenesk and Cranmore schools are also at or near to full capacity. The suggestion that schools in Ripley can be used will only increase traffic and surely we all want children to walk to school if possible. Anyway how could the Ripley schools cope with the numbers? The secondary school situation is already critical. The Howard of Effingham is well oversubscribed and is struggling to cope on a site which it outgrew many years ago and I am unaware of any proposal from Surrey County Council to cope with the present situation let alone that which would arise if these plans were to go ahead.

As there is also a plan for another 148 houses in East Horsley, this would also add to the difficulty of getting children into a local school.
Medical Facilities

Kingston Avenue Medical Centre which serves all of East and West Horsley and surrounding areas is already extremely busy and residents experience difficulty in making appointments.

Amenities

With only one small shop in West Horsley which is due to close in September, no post office, an extremely limited weekdays-only bus service through the village, there is no infrastructure which could begin to support the proposed high volumes of new housing development.

Character and Density

The developments proposed are at much higher densities than currently exist in the village settlement and will be totally out of character with the existing mix of different housing styles and layout of the village.

Green Belt

Finally and not least the first line of Policy P2 states, “We will continue to protect the Metropolitan Green Belt against inappropriate development.”.

It seems that this development is not at all in line with this statement.

A survey of the residents of West Horsley conducted in 2015 showed that they are totally opposed to the village's removal from the Green Belt by insetting and extending the 2003 Local Plan Settlement Area boundaries. I of course accept that their views cannot dictate planning policy, but such a strength of feeling should surely only be ignored if there is cogent evidence to justify it. No exceptional circumstances or other justification is made for the new Green Belt boundaries that will result from the proposed removal of West and East Horsley from the Metropolitan Green Belt.

To allow these plans would be to ruin a village which has real character and which provides a defined community in the increasingly urban spread along the fringes of the North Downs. Once done it cannot be undone and I ask that the proposal be reviewed and the village is allowed to retain its identity due to the many reasons given here.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
dwellings per hectare. Residential gardens make a vital contribution towards biodiversity, provide wildlife corridors, and
furnish those open spaces which are vital to the character of the greenbelt. Please visit the rural villages of East and West
Horsley and see how the Green Belt has preserved the rural character and openness of the villages.

I object to the proposed change to the ‘washed over’ status of the villages of East and West Horsley.

Settlement boundaries, GBC are proposing to make a number of changes to the settlement boundaries of East and West
Horsley and so expand the settlement area, all as set out in the Proposals Map. Clearly this change does not protect
natural green belt boundaries but merely brings additional parcels of land including agricultural fields within the
settlement area in order to provide more housing land. However, under NPPF rules this is not a sufficient justification for
changing a Green Belt boundary.

I object to the proposed change to the ‘settlement boundaries’ of West and East Horsley.

GBPSLP Development sites;

Four sites (A37, A38, A40 and A41) in West Horsley are allocated in the Proposed Submission, and two smaller sites
(≤15) identified in the Land Availability Assessment, LAA.

Two sites (A36 & A39) in East Horsley sites are identified in the Proposed Submission Local Plan and four smaller sites
(≤15) in the Land Availability Assessment, LAA.

A36, Thatcher’s Hotel, my chief concern is over the number of houses proposed for this site - approximately 48
dwellings, many of which are on currently designated Green Belt land. This grassland area currently provides an east to
west wildlife corridor between Wellington Meadow and westward into Horsley Tower’s parkland and beyond.
Furthermore, the number of dwellings gives an implied gross housing density of 37 dwellings per hectare, which is
exceptionally high for this restricted location bounded on two sides by a major road intended to provide large scale
transport links.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing because I object strongly to the Local Plan for West Horsley. The number of houses in your proposed plans will completely change the nature and character of the village. It will lead to many more thousands of cars on our local roads some of which are narrow, flood easily and are poorly maintained.

Your plan involves building on and reducing the Green Belt land which has always been protected for very good reason. If your plans for the area succeed, West Horsley and all of the surrounding areas will become urban sprawl spreading out from Guildford. This area does not have the infrastructure required to cope with the scale of the developments. West Horsley has one local Infant & Junior School which is full to capacity. There is one medical centre in East Horsley. From September there will be no local shops requiring a journey to either East Horsley or elsewhere. Again this will increase the traffic on our local roads.

The Street has become a rat run for traffic and at peak times carries the traffic to two private schools.

This building will put additional strain on the A3 which is already heavily congested and the M25 which is completely congested for the majority of the day.

At weekends and even during the week, the roads are used by many hundreds of cyclists. At times it is impossible to overtake them and this causes frustration and delay. The whole area receives hundreds of visitors enjoying the local green spaces and consequently additional traffic. The burden that will be placed on local recreational facilities such as Sheepleas which is already heavily used at weekends will overwhelm the nature and the character of such a beautiful resource.

The local plan offers no solution to these issues and seems intent on fulfilling a need for additional housing without considering the problems that already exist or solutions to the problems this will create. The need for housing should not override the need to protect the Green Belt land.

The proposed development at Wisley to build another 2000 homes has not been removed from the local plan causing great concern, again for the pressures on our infrastructure and the huge increase in volume on main and local roads.

The scale of building new homes in West Horsley should be kept to a level which respects the infrastructure and local facilities (A requirement of The National Policy Framework).

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

With reference to my previous letters on the subject of GBC plans for housing developments in East and West Horsley, which I draw your attention to and repeat all my objections and reservations contained therein.

Further I object to East and West Horsley being removed from the green belt. The councillors we voted for promised to protect the Green Belt, especially in East and West Horsley.

There is no mention regarding the provision of the infrastructure (schools enlarged medical centre parking facilities etc)-that will be necessary to cope with the increase in population and the absence of available space to cope with the additional traffic and parking facilities.

I object to the building of houses on land to the north of west Horsley on which 120 houses are proposed – this land is a flood zone area and was so designated but subsequently removed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I wish to lodge objections relating to the Guildford Borough Council New Local Plan 2016 in respect of:

- the scale of the house building programme that appears to be excessive;
- the proposal to build some 65% of developments on land that is currently Green Belt: and,
- the infrastructure proposals that are inadequate even to meet the needs of what is required at present, let alone developments proposed in the Local Plan.

My rationale for the objections listed above is articulated in the letter sent by East Horsley Parish Council Local Plan Response dated 13 June 2016 to which I respectfully direct your attention. Their letter contains additional observations that address many other particulars contained in the Local Plan and these, too, I endorse.

Please consider all that East Horsley Parish Council has stated in their Response to represent my views also, and include these in your survey of responses as emanating from my address too.

I observe with deep misgivings the totality of house-building that is proposed for the corridor that follows roughly the line of the A246 Guildford to Leatherhead road insofar that if authorised this volume of dwellings within and between villages will change for ever the character of the land in which I reside, and it will turn a rural environment into one that is essentially urban. If permitted, this Plan would ruin all that I and many others enjoy about residing in this village (East Horsley).
I therefore object most strongly to plans: to remove from East Horsley: the protection currently provided by its inclusion in the Green Belt, to extend the existing boundaries of the Settlement Area, and to describe it as a 'District Centre'.

I am writing to object to the Proposed Submission Local Plan: Strategies and Sites June 2016 particularly the negative impact it would have on West Horsley.

I am totally against the removal of West Horsley from the Green Belt and the scale of the proposed developments. Your plan suggests a 35% increase in the number of houses in this village which would totally change the rural nature of the community and overwhelm the infrastructure which is already under strain.

The local road system is in appallingly bad condition and would need very major upgrading to cope with the massive increase in population planned. I do not see any realistic prospect of this happening.

Local schools are already full or nearly full and could not cope with the planned population increase. Surrey CC apparently do not plan to provide any additional local school places but blithely expect parents to drive their youngsters to schools out of the village putting a huge extra strain on the already inadequate road network.

There is a drainage problem already in West Horsley and concreting over large areas of currently undeveloped land will cause huge extra problems.

This plan makes a mockery of your own Green Belt and Countryside policy and demonstrates contempt for the quality of life of the residents of West Horsley.

The current Guildford Plan has been very poorly thought through and I urge you to scrap it in its entirety.

In response to your call for comments on the draft Local Plan I wish to submit the following:

The Key Evidence document 'Guildford Borough Economic Strategy 2013-2031 makes no case for locating large numbers of homes in West and East Horsley or neighbouring villages. The number of new houses proposed for West Horsley is totally out of proportion to the existing number of dwellings and totally disproportionate to the number of new homes allocated to other villages. No reason has been provided for this level of new houses to be allocated to West Horsley. It is even more illogical considering that most new employment opportunities are to the west of Guildford. (West Horsley is east of Guildford)

The development of 385 homes on the four proposed sites is at much higher densities than currently exists in the village settlement and will be completely out of character with the existing mix of different housing styles and layout of the village.

Infrastructure such as schools, medical facilities, drainage, both surface and foul, road capacity, shops, parking, are already stretched. Adding another third to demand would make the situation intolerable. The proposed homes building programme is totally unsustainable. This is especially so as there is no absolute requirement for additional infrastructure to be in place before the proposed development takes place. The surface drainage is already inadequate to deal with heavy rain.

I suggest that the proposed plans should be rejected.

From looking at the latest plans I feel strongly that no consideration to the village infrastructure has not been taken into consideration.

Travel no regular us service and a station that has a very small car park facility that has no more room to grow. The local children have to rely on school buses to get them to an oversubscribed school and an increase in property would add to the heavily used A246 and village roads already this was very apparent when some roads in Horsley were closed and traffic was directed.

The local school is oversubscribed and the local secondary Howard that asked to move to an adequate site was refused.

There is no true village centre and an increase in properties would not find adequate services with a doctors practice struggling to meet demands.

Also the road systems on the proposed sites are poor and would cause traffic congestions. Also very surprised to receive a flyer from Dandara through our door saying how they are intending to build houses at the bottom of Shere Road which has never been mentioned in the plan before!!!! the school Cranmore already causes congestion and this would add to it.

We are told that this road is in the Surrey Hills AONB and the land around here is home to slow worms which are a protected species.

Overall I do not feel that the villages are capable of accepting the changes and to take them out of the green belt would affect the area which has got AONB attached to it, not adequate infrastructure and schools and roads to support these unnecessary changes.

Objection to The Guildford Borough Proposed Submission Local Plan – Strategy and Sites Consultation June 2016

I object to the proposed insetting of the green belt in the West Horsley Area for the for residential properties. It would have a long-term detrimental effect on the quality of life in the village and surrounding area.

The proposals are not sustainable. The green belt will be adversely affected. The long-term impact has not been modelled or considered.
The transportation and communication links would be severely affected resulting in detrimental effect to the environment.

The local state school is over-subscribed and therefore families moving in to the area in larger numbers than is sustainable by the natural ebb and flow into and out of the area would not receive schooling for their children in the local catchment area.

Sewerage and drainage is a specific issue that the Council has been advised on and no further plans or investment has been developed to overcome these issue.

The Green Belt boundaries should only be altered in exceptional circumstances and Guildford Borough Council proposals do not present exceptional circumstances. There is not enough detail in the proposals for the impact on infrastructure, schooling, health and well-being, environmental impact

The proposal does not represent a sustainable approach to housing need for the area

The wider area proposals again do not appear to have a coordinated approach

The proposal is weakened by the lack of vision for the significant investment and community building required in adding such large numbers of housing units to an essentially rural village area

Guildford Borough Council has not sought to consult or manage the relationship with West Horsley Village as to what sort of development might be appropriate for the village and the mix of residential units that the village might need. The proposal does not represent an organic, sustainable approach to housing need but rather sacrifices for future generations the right to enjoy the amenity and environmental benefits that being within the green belt affords. The increase in the number of residents living in West Horsley Village arising from the development would overwhelm local services such as the health centre, the local school (full) and drainage features. Indeed, GBC has not sought to consult and coordinate the approach amongst the parishes such as Ripley, Send, Wisley and around to achieve sustainable development. Rather it is taking a chance on

The proposal to site large scale high density residential development in the West Horsley Village comparison to are far in excess of what the local infrastructure can accommodate. The local roads, health facilities and schools are already at full capacity.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**
Given the current size of East and West Horsley, the areas identified for enlargement of the settlement areas and village boundaries are disproportionate in the extreme. Proportionately more houses are proposed for West Horsley than anywhere else in the borough. Developing even one site to its declared potential based on target housing density would have a significant and negative effect on the village services and character. Development of all sites would rapidly increase the number of homes in West Horsley by over 35% very likely doubling the population which would destroy the existing character and put pressure on transport and societal facilities that cannot be managed. The sites are on the outliers of the village so they will inevitably increase the use of car(s) even for facilities in the village. There are very few shops in West Horsley and most people use the shops in East Horsley. However to describe East Horsley as a “Rural District Centre” is incorrect. The shops (with limited parking) meet essential needs but are small and have limited opening hours with the exception of Budgen’s food store - which cannot be described as “supermarket”. These shops are appropriate for the villages of East and West Horsley as they now are. The shops in West Horsley are meagre with even more limited opening hours and even more limited parking (5 cars in total at most).

Sites identified in West Horsley are agricultural land and once lost that land cannot be reclaimed. The sites are important for wildlife, the open character of the village as well as some being close to areas designated as SSSI, SPA or SNCI. Land and roads in West Horsley are prone to flooding especially those on the lower lying side of the villages such land alongside Ockham Road North. The site there near Waterloo Farm and surrounding properties has a very high water table and development of that land will impact on the drainage of surrounding land and property in wet weather and on water retention in times of drought – conditions which the consultation admits will become more challenging. Wildlife there is abundant with common and less common wildlife seen.

1. Potential Sites for Development in East and West Horsley.

The proposals for West Horsley are abhorrent and would vastly increase village size with loss of character. Too many homes for a village without the necessary roads/infrastructure constitute a major and needless assault on protected Green Belt land.

The proposed 500 new homes would overwhelm the villages and their facilities.

Local schools are oversubscribed and barely cope with the existing population. Existing schools create high volumes of traffic at peak times with considerable congestion on narrow village roads. At one point East Lane is not wide enough to allow 2-way traffic.

The draft local plan is ill-considered and not supportable.

Proposed site A40 is very wet and prone to flooding after rain. Doubtless this would be much worse and would impact upon nearby properties and roads if development is allowed to take place. I note that the consultation document recognizes this problem but nevertheless the site remains as one for potential development.

Site A40 also surrounds a very popular and highly rated campsite with 130 pitches. The site is chosen by campers because of its quiet, sheltered and rural location with a lake and wildlife including deer and interesting birdlife. Development of site A40 would have a profoundly negative impact on this environment and lead to the decline of this local business.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

The plan entails the removal of East and West Horsley from the Green Belt and the allocation of seven sites for the building of 533 houses. The removal of areas from the Green Belt can only take place in exceptional circumstances but evidence of such circumstances is not given in the plan nor is justification of the perceived excessive number of new houses.

The amenities of the area could not cope with the subsequent increased population. The schools and health facilities are already struggling to meet existing demand. The local roads are overcrowded and without scope for improvement.

The proposed building of 2000 new houses on the former Wisley Airfield would further impinge upon the road and rail facilities.

The proposed New Plan 2016 will destroy the beauty and character of the area riding roughshod over the provision of the Green Belt legislation thereby defeating the very purpose of it's creation.

I object most strongly to the proposed plan submitted by Guildford Borough Council, riding roughshod over the published commitment to protect the Metropolitan Green Belt against inappropriate development. Why would West Horsley be expected to increase it's number of new homes by such a large percentage compared with Ash & Tongham and Guildford? We simply do not have the infrastructure to cope, already our Medical Centre in East Horsley is stretched, an appointment to see a nominated doctor can take well over a week. School places are at a premium, East Lane continues with flooding during the winter months and we have barely two buses a day to Guildford, there seems no consideration to service our existing requirements before embarking on the madness of this proposed plan. If it were to proceed it would be the ultimate destruction of these to important rural villages and the destruction of our cherished environment to the eternal shame of our council. I urge you to reconsider your plans and forgo short term gains and reflect on the harm that future generations will inherit.

The infrastructure of the area is already overloaded. The demand for places at local schools exceeds capacity. The health centre is under extreme pressure to meet the needs of existing patients. The roads were made to accommodate horse drawn traffic, they are already overloaded and there is no realistic way in which capacity may be increased.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to comment on the new Guildford Local Plan with specific reference to the Horsleys.

The main objections are listed on the attached paper and with which I totally agree.

I would underline two objections in particular. Firstly the Green Belt should be totally protected, not only for the benefit of local residents, but also for visitors from urban areas, Secondly the infrastructure in place at present is wholly inadequate. Ancient drainage facilities can hardly cope at present, roads and car parks are overloaded and medical facilities would not be able to cope - it is hard enough now to get an appointment. I think brownfield sites should be the priority for new housing and that protection of the Green Belt is essential.

Major Objections and Concerns for the Horsleys:

• Proposal to remove the Horsleys from the Green Belt

The "exceptional circumstances" required before taking this action have not been demonstrated.

• Extension of the boundaries of the Settlement areas of the Horsleys

No sound reasons have been given for the proposed changes, which seem to be aimed solely at increasing the land available within the settlements for future additional development.

• Infrastructure already in overload.

The local Schools are full. Medical facilities stretched. Drainage is inadequate, roads and car parks are overloaded with little or no scope for improvements.

• Station Parade is designated a «District Centre”

This 'classification' results from a complete misreading of the nature of the facilities in the village centre and would inappropriately target the area for future urban developments.

--Development of over 2,000 houses at Ockham village (former Wisley Airfield)

The impact on the Horsley villages of such a huge mixed housing, retail,commercial, traveller and schools development, under 2 miles away, would be enormous.

The plan also includes extensive developments at Burnt Common (400 houses & commercial developments) and Gosden Hill Farm, Burpham (2000 houses & mixed use developments).
Major doubt concerning housing numbers

The inflated number of new houses proposed arises from a Strategic Housing Market Assessment (SHMA) that was generated by a consultant's mathematical model which is not revealed in the plan. Nor, apparently, to Guildford Borough Council, GBC.

This SHMA target housing number is then further increased by GBC to give a population increase which is almost 70% higher than the official national estimates for population growth in the Borough.

The scale of this increase has alarming results e.g. an increase of up to 35% in existing West Horsley households - greater than any other single area in the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
village at times to shop and children’s clubs such as football and cubs etc are already over-subscribed and have long waiting lists.

The local survey on the need for homes identified the need for 20 affordable homes to enable local people to stay in the village – I am happy for this to be implemented. I believe the siting of mass housing developments in West Horsley is more to do with monetary reward for developers as selling prices will be maximised in West Horsley as opposed to existing Brownfield sites, and not sound planning logic.

I have lived most of my adult life in West Horsley and because of the rural character of my village I have chosen to bring my family up here. If the proposed development is allowed to progress our village will be spoilt with high density development and once instigated it will be impossible to restore the charming character of this typical English village.

I feel very strongly that the proposals are flawed from a planning perspective, and are being undertaken for the wrong reasons namely for developers profit.

Please, please do not destroy my lovely village by removing it from the Green Belt and over-developing for the reasons noted above. This density of housing will ruin the current character of West Horsley forever.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I have lived with my wife and family in West Horsley for the last 18 years and am extremely concerned in respect of the proposed developments. Horsley is a lovely village that is recognised nationally as being one of the best places to live in this country due to open spaces, countryside, and heritage. I am extremely concerned and very strongly object to the fact that Guildford Borough Council propose to inset West and East Horsley from the Green Belt, and I consider that no meaningful, substantive, or effective changes to their proposals have been included since the 2016 consultation.

I believe the council has ignored the mass objections from over 30,000 residents. It feels as the intention is to gradually wear us down and this is totally unacceptable. Local opinions must be considered and the heritage of the Horsleys, should be maintained for future generations.

In my opinion nothing has been included since last year’s Consultation to improve the sustainability of the West Horsley development sites. Each new home on the proposed West Horsley development sites will need a minimum of one car, and probably two or more per household and I consider this will cause real safety issues for our children using the local roads. If you know and live in the village it is clear that the current infrastructure and amenities are fully utilised already. The schools, shops, medical centre, roads, parking and Horsley Station are already full to capacity and the proposed development plans will cause major issues for all of the above services.

In summary, I strongly object to the fact that Guildford Borough Council propose to inset West and East Horsley from the Green Belt, and that there have been no substantive or effective changes to their proposals since the 2016 consultation regarding proposed developments and supporting infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

POLICIES A37, A38, A40 & A41, located in West Horsley

I OBJECT to POLICIES A37, A38, A40 & A41, given the scale of the development proposed in West Horsley, the inevitable destruction of its village character and the impact on infrastructure across West and East Horsley. The LAA identifies six sites in West Horsley for potential development, the four largest having allocation policies within the Proposed Submission Local Plan. The total housing number arising from these six sites is 405 homes in total. For a village which had 1,124 dwellings at the 2011 Census, this represents a proportional increase of 36% over the plan period, an enormously high proportion by any standards.

The four policy sites are all located within the Green Belt and I consider these proposed movements in settlement boundaries to be invalid. These proposals are also contrary to the principles of the Metropolitan Green belt. It is also totally contrary to the opening statement of Local Plan Policy P2 that “We will continue to protect the Metropolitan Green Belt” It seems that in West and East Horsley at least the draft Local Plan is doing exactly the opposite.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The four policy sites are all located within the Green Belt and I consider these proposed movements in settlement boundaries to be invalid. These proposals are also contrary to the principles of the Metropolitan Green belt. It is also totally contrary to the opening statement of Local Plan Policy P2 that “We will continue to protect the Metropolitan Green Belt” It seems that in West and East Horsley at least the draft Local Plan is doing exactly the opposite.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

As a resident of East Horsley village I have studied the above and my objections, with comments, are as follows:

1. I am totally opposed to the removal of the Horsleys from the Green Belt and do not agree with any extension of the boundaries of the Settlement areas of the Horsleys. This would also have a detrimental effect on the habitat of wildlife, flora and fauna.
2. The highly inflated numbers of proposed new housing within the Horsleys is unnecessary and unacceptable and would alter the present strong characteristics of both villages to their detriment.
3. Both villages are currently struggling with overburdened and inefficient infrastructure. The schools and surgeries are now oversubscribed, the parking facilities at the village halls, surgery and shops are already insufficient - for example the Horsley U3A has approx 650 members and it is impossible for the vast majority of members to park at the Village Hall to attend meetings.

The village roads are overcrowded and in poor condition and the drainage is in an exceedingly poor state and little appears to have been done to rectify these conditions. The Ockham roads North and South are currently overused by huge trucks and lorries - very recently there was a lengthy closure of both roads due to a truck striking the railway arch.

1. Station Parade being designated a District Centre is absurd - totally inappropriate.
2. The possible development of the former Wisley Airfield so close to the Horsleys would have an enormous impact, any such development I strongly object to.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I have been a resident of West Horsley for over 18 years, and I would like to register my very strong objections to the Guildford Local Plan, and specifically the plans as they apply to the villages of East and West Horsley; including the development of some 500-600 new houses in the Horsleys, and a further 2000 houses within two miles of the villages. The impact on the villages would be catastrophic and irreversible.

With Brexit now clearly under way, surely it would also be far more sensible to reassess the need for housing in the south-east in several years time. There could be a mass exodus of jobs from London to other European capitals meaning that we would have 'ghost towns' with much empty housing instead of thriving communities and the demand for housing less not greater.

I have read the various documents explaining the details of the Local Plan, and it is clear that you are likely to be overwhelmed with letters of objection. It is very apparent that whole parts of the plans have either not been thought through, and indeed significant areas appear not to have been addressed in any way. It seems that there has been a very superficial attempt to create a solution that is clearly impractical, unworkable, and objectionable on various counts.

I am shocked to read about the proposals to alter established boundaries in, what appears to be, an attempt to make the plans work where they are currently unworkable under existing and long established village boundaries. It is my understanding that any change in Green Belt boundaries should demonstrate exceptional circumstances. I see no exceptional circumstances to justify the proposed arbitrary changes to the Green Belt. Furthermore West Horsley seems to have been 'victimised' in these proposals on an unbelievable scale. While the village of Ash, for example, has virtually 'escaped' any similar devastating plans for housing developments on such a huge scale.

If it were to be shown that in fact the destruction of the Horsley villages, along with Ockham and their local countryside can be justified legally by simply re-writing the laws governing the Green Belt, then I would further object to the plans on the grounds of a severe lack of infrastructure, either currently available or planned.

I drive to my place of work each day from West Horsley to Cobham. My route 18 years ago used to less than 15 minutes; most days it is now closer to 30 minutes or longer to travel less than 7 miles. It is clear that the local road structure is completely unsuitable for today's level of traffic and to compound the problems with significant more traffic seems to be verging on complete madness. The local roads and A3 and junction 10 of the M25 will be gridlocked for significantly more proportions of each day. It is imperative that the Authorities take immediate and major action to relieve the congestion that is currently choking our roads without adding to the problems with more housing as this would inevitably result in a significant increase in commuter vehicles as a result of these 'plans'.

This is, of course only one area where the infrastructure is totally overwhelmed. Many people, more qualified than me will explain the equally, or probably even more important, impossible situation with regards to schools, medical facilities, shops and public transport and other aspects of local infrastructure. None of these appear to have been adequately addressed.

There are obvious and real reasons why the plan to 'adjust' the village boundaries and cancel large areas of Green Belt to accommodate a 35% increase in local households does not work. In addition the loss of recreational amenities, both for local people and the considerable number who travel, particularly from London would be disastrous. There appears to be a determination to extend the boundaries of the built up area of London through the Horsleys, past Guildford and beyond. Our Green Belt is precious. It is what protects London from urban sprawl; it preserves air quality; it prevents flooding; it is the city’s playground. It is for us to conserve and protect it. I understand that there are five legal purposes for Green Belt as I am certain you are aware, and the area around East and West Horsley is particularly critical in meeting all of these criterial:

- To check the unrestricted sprawl of large built up areas
- To prevent neighbouring towns merging into one another
- To assist in safeguarding the countryside from encroachment
- To preserve the setting and special character of historic towns
- To assist in urban regeneration by encouraging the recycling of derelict and other urban land.

The concept of limiting urban sprawl, and the requirements for the establishment and maintenance of the Green Belt have apparently been disregarded or completely ignored in the new Guildford Local Plan. I urge you to reconsider this objectionable, unworkable and irreversible plan that will result in the loss of the villages and countryside in which we live.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
My response to Guildford Borough Council’s Proposed Submission Local Plan: Strategy and Sites

I totally reject the plan to remove West Horsley and other villages from the Green Belt. Section 86 of the National Planning Policy Framework states “if it is necessary to prevent development in a village because of the important contribution which the open character of the village makes to the openness of the Green Belt, the village should be included in the Green Belt”.

The villages that the plan intends to remove from the Green Belt make a terrific contribution to the Green Belt as anyone well acquainted with the villages round Guilford would know.

There is quite a bit of land held by developers in West Horsley which one supposes is why West Horsley has been targeted for development? A Borough Council has the responsibility to protect rural communities from the sort of mass development proposed in the plan, not to endorse it.

If sites A39 and A41 were built on there would be a marked change in the nature of this area around the railway line; at present it is countryside, it would become urban.

If site A40 was built on, particularly to the north of the lane, there would be a clear encroachment into the countryside. The same applies to the north of site A38.

The traffic through East and West Horsley is already very heavy. The fumes at the junction of East Lane and Ockham Road North already provides a serious health hazard for small children, the pavement being so narrow. West Horsley is a village with occasional pavements, none of which are suitable for a wheelchair or two children sitting side by side in a double buggy. To suggest that a village already at bursting point can sustain the sort of development proposed, an increase of thirty five percent, is preposterous. The development of brown field sites in the past has been good and one would hope that would continue.

In one part of the plan it is stated that brown field sites should be built on in preference to fields but in another that the borough intends to grant planning permission to build on the sites in West Horsley early on, none of these are brown field sites. Brown field sites come up sporadically and are not so easy to develop; neither of these excuses should be used to build on fields without very careful thought. A brown field site, can in the fullness of time be changed back, a field once built on is lost forever.

As the proposal to build a small town at Wisley goes against almost every statement in the NPPF it is difficult to understand why it is still being proposed. I oppose this on the basis of excess traffic with its consequential pollution and traffic jams and the curtailment of free movement of wildlife across one of the last remaining truly rural area of West Surrey.

Councillor Spooner says “We consider that exceptional circumstances exist across the borough. These are the requirement to provide sufficient land for market and affordable housing and employment development with the significant adverse consequences of not doing so”. There is much of England where unemployment is a problem, it is not in Guildford.

Guildford has been acting as a dormitory town for London for years, this along with an expanding undergraduate population that has never been properly catered for plus development of the business park etc mean that the borough is
already saturated with people and cars. Removing more of the countryside, as at Burpham, diminishes everyone’s wellbeing.

To minimise traffic any plan should focus on people living as close to work as possible generally this will be in Guildford which already has excellent bus services and a main line station. The countryside should be left for everyone to enjoy wherever they live. In the past councils have respected this it is very sad that the majority of the present Guildford Borough Councillors appear not to.

The Surrey villages and surrounding countryside provide an area for walking and, since the Olympics, have hosted an exceptional amount of cycling. The villages provide cyclists with access to the Surrey Hills and planners need to be aware of the need to keep all road users safe. Every extra adult living in a Surrey village is an extra car on already too busy roads so allowing the potential of hundreds of houses to be built in these rural villages seems to be very irresponsible. Such a potential would exist if the villages were to be removed from the Green Belt.

The plan should show a much more imaginative use of land for residential purposes in Guildford itself, as it is only here that there is the infrastructure to reduce journey times and car usage. As the NPPF states brown field sites should not be being held back from residential development in the hope of future commercial use. This appears to be happening in Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to express my strong objections to the local plan as it affects my local community of West Horsley, along with East Horsley and Wisley.

The enormous level of house building along with destruction of Green Belt protection is utterly abhorrent and must not be allowed to happen. Once this starts, it will set a very dangerous precedent, and will certainly continue in the future. Is it really your intention to start the process of joining London to Guildford?

I have seen no possible justification for this ridiculous level of building and loss of protection for our lovely countryside with its wildlife.

The area is made up of small communities and this will erode that enormously turning the Horsleys, Ockham and Wisley into an unpleasant sprawl.

It appears that the continued attempt to build on countryside and not brownfield sites is merely to pander to developers who want to make easy profit. We have a good range of wildlife some of which is very sensitive to traffic, such as barn owls. They need protection.

The local services are stretched to the limit already with schools and medical services at capacity. Our local roads are in a pathetic state of disrepair, and the extra traffic will further aggravate this problem. Where are these people going to work? The extra people will undoubtedly lead to more strain and a total loss of the character of this lovely area.

PLEASE PLEASE PLEASE STOP.

I write to object to

1. the number of houses proposed to be built in West Horsley, particularly the development of Site 41 on East Lane.
2. the removal of West and East Horsley from the Green Belt, this was created for a reason, for the mental and physical health of those living and working around London. It would be an outrage to change this ruling.

I would like to OBJECT to West Horsley and East Horsley being removed from the greenbelt in the way that the council proposes in order to allow development on the sites proposed. As things stand currently at the Medical Centre in East Horsley it is already difficult to make an appointment. The one local state primary school shared by East and West Horsley is oversubscribed and there is no state secondary school in the villages. The car parking spaces in East Horsley around the shops, healthcentre and at the station can prove challenging at the best of times. West Horsley itself currently has one food convenience store, two Public Houses and a newsagent. There has been no Post Office since August 2013 so I fail to see how you can classify it as a medium sized village. I feel that local social, shopping, educational, healthcare and policing services will be overwhelmed by the proposed plans for development. There is no infrastructure plan whatsoever in the local plan in order to accommodate the increase in housing which I find scandalous.

I OBJECT to the draft local plan as it will destroy the ruralness of the area. In the villages of West & East Horsley the density of houses to be built on the proposed sites is totally out of keeping with the existing houses in the villages. This will mean that the proposed sites will have an urban estate density which is out of character with the low density rural character elsewhere in the villages. In West Horsley alone it has 41 listed buildings in it which gives the village appeal. Our heritage needs to be considered. This proposed plan would have a huge effect both visually and environmentally on the ruralness of this area. Tourism brings advantages to the area such as boosting the local economy. One of the reasons that tourists visit is because the countryside is rural and attractive and appreciated by walkers as well as cyclists. If the roads were developed to accommodate the proposed increase in development I believe tourism would lessen and the risk of injury to cyclists and pedestrians would increase.

I OBJECT to the draft plan due to the dangers that it may lead to. The pavements in parts of East and West Horsley i.e on The Street leading up to the two local stores, and on Ockham Road South are very narrow and unsuitable for wheelchairs and prams etc. The main routes through the villages are narrow with poor road surfaces and the increase in traffic that development would bring would bring inherent dangers to car users and pedestrians alike.

I OBJECT to the draft local plan as I feel there are unsuitable public transport facilities to meet the increase in population. It is naive to think that most people would walk or cycle to work or to the train station in East Horsley from
the village and neighbouring West Horsley due to the distances needed to travel and the safety issues to take into
consideration. Again this would put huge demands on the road network, increase the carbon footprint and decrease the
air quality. Existing public transport in the villages is very limited which makes it difficult to get around without a car.

I OBJECT to the draft local plan as I feel that the roads in East & West Horsley tend to flood annually making the roads
impassable often even in a 4x4. Development would only increase this risk as surface water would not be able to drain
away so readily.

The Horsleys appear to have a larger number of Potential Development Areas than most other villages within the borough
which appears unfair. In addition to the planned development sites in the Horsley’s there are plans for 2000 houses at
Gosden Hill on the A3, 400 houses at Garlicks Arch, a site of ancient woodland, and a new town at the old site of Wisley
Airfield. All these sites are on green belt and will mean that there is urban sprawl along the A3 corridor and appears to be
an unbalanced allocation of development in one area of the borough. West and East Horsley will grow by over 40% by
2031 according to the draft Local Plan. Most of this will occur in the first 5 years of the Guildford Plan period. This is
much much greater than other areas of the borough and will totally destroy the villages as we know them.

I OBJECT to the Horsley’s defined settlement boundaries being changed and the villages being “inset” therefore allowing
development on current greenbelt land and conservation areas. There are no exceptional circumstances apparent to build
on the green belt. Housing need alone should not constitute as exceptional circumstances.

I OBJECT to the local draft plan as it stands. There is unsubstantiated evidence as to how the housing figures have been
ascertained. Indeed the councillors have rejected several proposals such as the new development planned at Wisley
Airfield and yet they remain in this 2016 draft local plan.

I OBJECT to greenbelt land being destroyed for housing needs. 70% of the proposed development across the borough is
on existing greenbelt or countryside. I believe that the council needs to consult the residents in order to produce a
document which recommends a more suitable level of development which will protect our villages and surrounding
countryside for generations to come. **Once the greenbelt is lost it is gone forever. The NPPF 79 said that greenbelt
land should be open and permanent.** Sustainable development means that it ensures better lives for ourselves and not
making worse lives for future generations.

I feel that as the plan stands in its current format future generations lives will be made worse for the reasons stated in this
letter and for those reasons I OBJECT to the plan. The scale and position of future development sites needs to be much
more sensible in order for the Local Plan to be more practical and realistic.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
primary and secondary schools (and the planning application to rebuild the Howard was rejected), the doctors surgery, parking at the shops, while several roads like the Drift are badly worn struggling to cope with the volume of traffic as it is. In addition I understand the drainage infrastructure would not support an additional burden.

The scale of the proposed new housing at a 35% increase on the existing village is completely out of line with the proposals for other areas. Why should West Horsley be singled out for such an increase particularly when it is self evidently harmful to the Green Belt?

The National Planning and Policy requires that new development must make due allowance for the character and density of housing in the proposed area and be suitably supported by infrastructure and local facilities. This is very clearly not the case here.

The proposed plan should be rejected and rethought.

**Comment ID:** PSLPA16/4359  **Respondent:** 8891489 / Danielle Mcclements  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I wish to object to the local plan on the following grounds:

**I object to the removal of East Horsley and West Horsley from the Green Belt.**

I would like to protest most vehemently at the proposal to remove villages from the Green Belt, in particular East and West Horsley. No 'exceptional circumstances' have been demonstrated. The National Planning Policy Framework (NPPF) requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Unmet housing need is NOT an exceptional circumstance in law. We moved to the area precisely because of the village character. Removing their Green Belt status will leave the flood gates open for development and once built upon, the green countryside will never ever return.

In this new draft local plan, 65% of new houses in the Borough are to be built on land that is currently in the Green Belt. This is not acceptable.

The Green Belt was set up for the very reason of preventing the green and beautiful countryside being built over. Any removal of Green Belt status is the thin end of the wedge - once the protection is gone, bit by bit the land will be built over, and eventually London will spread and sprawl over it all, urbanised and built up.

**I object to the extension of boundaries of the settlement area of the Horsleys**

No sound reason has been given to justify this. The only possible outcome of this is more land which includes field and open spaces is then vulnerable to being built upon, further destroying the nature of the villages.

**I object to Station Parade being designated a district centre**

**Development of over 2000 houses at former Wisley Airfield.**

We have objected previously to an application to build a new village here and were very pleased when Guildford Borough Council turned this down. We again object to this for the following reasons:

Building thousands of new homes here will:
Increase:
- traffic and congestion
- traffic accidents
- pollution
- pressure in rail services
- pressure on parking in the already crowded village of Horsley
- pressure on local, already oversubscribed,
- pressure on local, already oversubscribed, doctors, hospital and other health services

The idea of shutting Old Lane access from the A3 is preposterous. It is a well used route; and the long and winding detour is inconvenient, and will result in even more CO2 and other pollutants in the atmosphere, at a stage in history when we have realised the harm these do to our bodies and the environment, and are collectively and actively seeking to reduce, not increase them.

There are only two (not 9) railway stations (Horsley and Effingham Junction) within five road miles of the site and these are only reachable via narrow, unlit country lanes and have car parking already at near capacity.

Any widening of local roads would require further destruction of trees, and natural habitat.

Thames Water has identified an inability of the existing waste water infrastructure to accommodate the needs of this application. Effingham Junction, Ockham and the Horsleys already suffer badly from flooding problems. The development may lead to sewage flooding.

**Overloaded infrastructure**

The building of 593 new houses in the in the Horsleys within five years would seriously change the character of the villages for the worse, and lead to even more pressure on the already oversubscribed services, particularly the school and doctors' surgery. It is often difficult to park in East Horsley village to visit the shops, and also at the village hall and doctors' car parks. The main village shop Budgens often has long queues. The train station has insufficient parking for its users, with no room from expansion. Doubling the population of the villages would render the already crowded trains a nightmare.

The streets around The Raleigh School are chaos at drop off and pick up time. Given the geography, even if the school expanded its classrooms, there is no more room for parents to stop in the cul de sacs around, and parking on East Lane is obstructive and dangerous.

Similarly Ockham Road North is always blocked by users of Glenesk School in the morning and afternoon, as there is nowhere for parents to stop except in the small forecourt. It is not possible to park along Ockham Road North as it is too narrow and no pavements on one side. Passing traffic is therefore blocked by cars waiting to enter the school grounds. Hundreds of additional houses built would spell significantly more chaos.

There is simply not enough room in these villages for hundreds of extra houses. Yes, there might physically be spaces for the houses, but there is definitely not the space or infrastructure nor employment for the thousands of new inhabitants.

I **OBJECT** to 4 of the 6 proposed development sites numbered included in A36-41 which either intentionally or inadvertently will create a town at the cost of losing two separate villages. Quite why GBC should have selected West & East Horsley in this way, as compared with the exceptionally generous treatment of most other areas is, at best, exceptionally disappointing.

Whatever their merits as development sites, the 6 Horsley sites should not only be considered individually but for their cumulative impact on the contiguous villages of East and West Horsley.

Building 533 new houses on these 6 sites, plus at least another 90 on small sites is (a) excessive in absolute terms and (b) disproportionate relative to the rest of the Borough. It will destroy the rural character of these communities and put unsustainable strain on local facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewage, surface drainage and shops. The open nature of West Horsley was a significant factor that led to the 2012 Olympic cycle races passing through the village and this same route has since been adopted by the annual Prudential Ride 100 Cycle Ride. Furthermore, the housing NEED in both West & East Horsley (per recent research) is for SMALL houses / FLATS so that (a) young people can get onto the housing ladder and (b) older residents can downsize.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
1. There are no “exceptional circumstances” demonstrated to justify removing the Horsleys from the Green Belt and once removed it would not be possible to return the area to the Green Belt in the future.

2. The extension of the boundaries of the Settlement Areas is appalling. This is an inappropriate and contrived device to try to show that there aren’t that many of us in the Areas and to justify the increase of housing as a consequence.

3. The infrastructure of the Horsleys is at bursting point as it is. There are hardly any roads. The ones that we have are inadequate. Peak times are a nightmare at a number of junctions and they wouldn’t be particularly assisted by traffic control. The roads leading to the A3/M25 would be totally blocked. The geography of the area lends itself to local flooding which would be made much worse by any additional building and run off.

   Schools and Medical Facilities are over subscribed and were unable to accommodate our family or others.

4. The local shops are not a “District Centre” by any stretch of the imagination.

Re: Guildford Borough Proposed Submission Local Plan:

: strategy and sites: June 2016 (The Guildford Plan)

I object. I object to the boundaries of East and West Horsley villages being greatly enlarged, the areas inside these new boundaries being removed from the Green belt and to the development of 533 new homes in the villages. This totally fails to recognise that development of this scale in this rural area is unsustainable. The roads, schools, medical facilities, water and all infrastructures are already at full capacity and would not cope with such a development. If the National Planning Policy Framework is followed this development would not be allowed.

I object. I object that Green belt areas are targeted for development when there are brownfield sites within the urban area which if suitably developed would meet housing needs and give people better access to workplaces.

I object. I object to the need for affordable housing being used as a reason to remove protections on Green Belt and areas of outstanding natural beauty when the 40% of affordable housing proposed will be beyond the means of low paid workers. This defeats the reason for plundering green belt and other protected areas.

More thoughtful social housing plans in existing urban areas would fulfill the need far better.

I object. I object to the total disregarding of the detailed and well researched objections submitted after the first Guildford Plan was proposed when it was previously announced that local concerns and objections would be addressed. Instead nothing has changed and no attempt has been made to resolve the immense impact that these proposals would have on the infrastructure and consequently the character of the Horsley's. This is a betrayal of the standards I would expect from an elected body.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/3385   Respondent: 8892705 / R.B. and S.E. Davis   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North
• I object to the above Plan which proposes an increase of 35% to the number of homes in West Horsley village. The existing local transport, road network and infrastructure systems are struggling to meet current needs and would not be able to cope with this proposed major development. The Plan fails in all respects to address the impact of the development on the village. Furthermore, the Plan does not recognise the significant adverse affect on West Horsley of the proposed developments in the adjoining villages of East Horsley and Ockham. The Plan does not comment on any of these matters and by the omission is incomplete since the consequences are highly significant to all the villages. The Plan is unsustainable.

• The Guildford Plan for the development of West Horsley is based on four sites and gives a total of 385 new houses. Near Horsley railway station, on a site adjacent to the West Horsley Parish boundary, a further 100 homes are proposed in the village of East Horsley. The housing density proposed for each site is much higher than that which currently exists in the villages and will be totally out of character. The National Planning Policy Framework calls for the respect of character and density of housing of new residential developments in the area. Furthermore, it requires that the housing is limited in quantity by the availability of infrastructure and local facilities. The proposed development of these sites is therefore inappropriate and unsustainable.

• I object to the significant enlargement of the West and East Horsley village boundaries as given in the above Guildford Plan. Furthermore, I object to the proposal to remove the village areas inside these boundaries from the Green Belt. Neither justification nor explanation for these changes is provided in the Plan. The Green Belt is protected as a matter for National and Local policy. In the National Planning Policy Framework it is stated “As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances.” There are no very special circumstances which justify the above changes as proposed in the Plan. The proposed changes are totally unacceptable and should not be implemented.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I wish to object in the strongest possible terms to the removal of West Horsley and East Horsley villages from the Green Belt under the Proposed Submission Local Plan : Strategies and Sites June 2016, by insetting and extending the 2003 Local Plan Settlement Area boundaries.

The Green Belt and Countryside Study is clearly flawed and there is no need for the currently defined Settlement Area boundaries to be extended.

The planned density of new homes is far too high for the village to support as well as being out of character without a sustainable infrastructure of drainage, road capacity or public transport.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I am 30 years old and have been a resident of West Horsley for all my life. I am a qualified construction manager and work for one of the country's biggest construction companies. I therefore feel I am positioned to make valid comments of the Proposed Submission Local Plan: Strategies and Sites June 2016.

In the first instance, the 385 proposed number of homes is wholly out of character and fat too large to be required or sustainable by the current infrastructure. I would comment that the basis calculation from which the demand for this quantum of housing emerges appears to be incorrect.

the requirement that West Horsley suffers insetting and consequent removal from the Green Belt is wholly unnecessary and again based on the flawed Green Belt and Countryside Study. I very much object to this proposal.

It is furthermore clear from published details that the current drainage and waste water infrastructure could not cope with the scale of building proposed in West Horsley let alone the roads and transport system.

I accordingly must close by registering my wholehearted objection the Proposed submission Local Plan: Strategies and Sites June 2016.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am writing to register my objection to the above plan.

My reasons for objecting are:

1. Removing Green Belt status from the Horsleys will result in high density building developments that are out of keeping with the nature of the villages and detrimental to the character of the villages. There is no justification for this action.
2. The inevitable increase in population arising from the development of new homes within the area will further stress the already failing water and sewer utilities; will overstretch the capacity of the already fragile infrastructure - doctors, state schools, parking, road and rail public transport; and will lead to higher traffic density, an increased number of road accidents, and higher levels of air pollution.
3. The Strategic Housing Market Assessment model, on which the number of new houses required is based, has not been made public and the results appear highly dubious and certainly not a basis for critical planning decisions.
4. The plan will greatly increase the population of young people in an area where local employment opportunities are already low and unlikely to increase as a result of the plan.

Having lived in East Horsley for over 30 years I have seen the increasing erosion of the Green Belt and experienced the already obvious stresses and strains on the infrastructure over this period.

It is the responsibility of the local planners to ensure that these existing problems are addressed and resolved, not greatly exacerbated by removing the constraints that currently exist.

I wish my objections to be noted when this unsatisfactory and highly flawed plan is considered.

Objections specific to West Horsley:-

While there is obviously some modest scope for further appropriate housing development in West Horsley - and the Parish Council has identified a need for approximately twenty affordable homes - I strongly object to the suggestions for West Horsley in this Local Plan for the following reasons:-

1. The infrastructure - schools, medical facilities, roads, parking, drainage etc. are already at breaking point. There is nothing in these proposals about how the insufficiencies would be addressed, what it would cost if feasible and who would be accepting liability to pay for it.

2. There is a duty of care on the part of GBC Planning Department towards existing residents which has been comprehensively ignored in drawing up this Plan for consultation.

3. The character of West Horsley village would be completely ruined by development on the scale envisaged. The number of dwellings proposed is preposterous in relation to the size of the existing village and the proposed densities would be totally out of character with the built environment. There are no precedents for flats and townhouses in West Horsley. Planning Policy Guidelines have again been completely ignored.

4. Any development on the newly identified site A41 on East Lane opposite Greta Bank would be unthinkable. This is an unbroken rural vista of fields, trees and sometimes horses, enjoyed by thousands who make their way along this thoroughfare, especially at peak times.

5. It appears that GBC foresees the best economic development opportunities as lying on the opposite side of Guildford to West Horsley. Why then is huge development of West Horsley such a good idea?

Needless to say I also object to massive development on the site of the former Wisley airfield.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. We object to the plan which proposes to increase the number of homes within West Horsley by 35%.
2. We object to the plan which proposes that over 70% of new housing to be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.
3. We object to the disproportionate allocation of housing in this particular part of the borough.
4. We object to the detrimental impact on transport, local roads and road safety. The roads within the villages of West and East Horsley are already worn and full of potholes and are in need of resurfacing (along with the pavements) – more cars, vans and lorries on these roads are going to cause even more problems.
5. We object to the plan due the increased volume of car traffic. The proposed developments would result in an estimated 1,000 additional cars on the local roads.
6. We object to the plan as there is a lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.
7. We object to the plan as the local facilities are already stretch (i.e. doctors, dentists, etc). More people moving into the area, without another doctor’s surgery being added, would cause so many more problems with obtaining appointments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I strongly object to the number of proposed new developments in the plan for East and especially West Horsley. In West Horsley you are proposing an approx. 35% increase in the number of houses which will ruin the village:

- Proposed housing densities are much higher than currently exist and will be completely out of character with the existing village
- Expansion on this scale is not sustainable – the existing infrastructure (schooling, doctors, parking, traffic, public transport, drainage) cannot support it
- West Horsley is a beautiful village, partly in an area of AONB and this development will ruin it and it will therefore cease to attract large numbers of tourists and visitors for walking and cycling etc
- Like many other residents of the village I am opposed to the village being removed from the greenbelt by insetting and extending settlement boundaries. Green belt is there to protect villages like West Horsley. Before we know it, Horsley will be like Walton– just one sprawling line of housing.
- Green belt land should be protected and no exceptional circumstances have been made for developing greenbelt in the Horsleys
- The local schools are already completely over subscribed

In addition I have seen no evidence to support the fact that so many more houses are needed in West Horsley and the Green Belt and Countryside Study which I read seems completely flawed.

Commenting on a specific site which is the plot of land to the south of the A246, bordering the A246 and to the west of Shere Road and also bordering Shere Road – Dandara have an option on this land are our trying to seek approval for housing development. I am against developing this plot for the infrastructure problems (listed above) and because it would be completely wrong as having open space and farm land next to roads is an important aspect of feeling in the country ie that is why this plot is currently greenbelt.
1. Notwithstanding the above, with regard to my own locality:-

• For reasons previously stated, I OBJECT to the insetting proposed for East and West Horsley the sole purpose, of which, is to enable significant housing. The increase in housing proposed (some 600 dwellings overall - OLP plus other "minor" potential developments with some 400 plus in West Horsley) is excessive and will fundamentally change the character of both villages, placing unsustainable pressure on the local infrastructure. As far as West Horsley is concerned it is difficult to equate the DLP's proposals with the planning authority's Settlement Hierarchy statement that West Horsley is unsuitable/or substantial growth. A proposed circa 40% increase in housing stock within the village (no doubt to be followed by further development if greenbelt status is lost) is, in my view, substantial and excessive.

• I OBJECT to the proposal to develop a "new town" of some 2,100 dwellings on the former Wisley. The consequence of this, coupled with the developments proposed for the Horsleys, will have a devastating impact on the immediate locality, increasing the number of homes by nearly 80% of current homes and releasing significant numbers of additional cars into an area that consists largely of narrow country roads. The local infrastructure cannot accommodate such a dramatic increase in housing/vehicle numbers and local facilities, particularly the railway stations of Horsley and Effingham Junction, would be overwhelmed. Similarly, medical and educational facilities will be adversely affected, at least until additional facilities are developed. The whole nature and character of Ockham and the Horsleys will be destroyed if this proposal proceed.

• Of the developments proposed for East/West Horsley, I PARTICULARLY OBJECT to:-

• The proposal for some 100 houses on site. Any access to this site will require demolition of a house(s) fronting Ockham Road North. Such access will compromise traffic and pedestrian safety, releasing traffic from the development onto a minor (but extremely busy) road with poor sight lines and with only narrow footpaths for pedestrians (including young children on the way to local schools), who are obliged to walk no more than 1-2 feet from passing traffic, including very heavy lorries and goods vehicles most of which, I might add, break the limit. Additionally, the site is subject to severe flooding, and abuts Lollesworth Woods, which are designated a Site of Nature Conservation Importance. Although these woods are private property, it is inevitable that the nature of the woods, the flora and fauna, will be irreparably harmed by the inevitable incursions by inhabitants of any development of this site.

• Site A4 L (90 houses), which looks as if a blindfolded planner has just put a pin in it. It is difficult to imagine a more inappropriate site. A housing development here will destroy what is a significant stretch of rural pasture with woodland behind, which provides an unbroken rural seen and feel between two separate parts of West Horsley.

4.4 Finally, I OBJECT to the proposed designation of Station Parade, East Horsley as a "Rural District Centre" which, by definition, opens the village to uses which are wholly inappropriate.
I OBJECT to the 2016 Draft Local Plan in its entirety:

To proceed with house building on this scale within already overpopulated village areas would totally destroy the fragile rural aspects we have been careful to try and preserve for so many years.

There is no proven demand for anything like this level of new housing from the existing community and this has been demonstrated by the results of a survey carried out by West Horsley Parish Council only last year. Any demand for such expansion is founded upon developers' determination to make money, GBC councillors' self interest and a total disregard from local and central government towards electors' wishes.

The Green Belt was established for the purpose of maintaining rural space and to prevent urban sprawl. It is not there for transient local government councillors to arbitrarily tamper with this provision. They have not been given this authority.

I wish this letter to be passed to the Planning Inspector carrying out the forthcoming review of the 2016 Draft Local Guildford Plan and I expect any conclusions drawn from local correspondents to be acted upon accordingly. Clearly, Guildford Borough Council cannot be trusted to deal with this issue.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I am writing to voice my concerns about the above project which I have done many times before.

I object to the plan for the following reasons:

1. The proposal to remove my village - West Horsley - out of the green belt has not been properly considered. Once the action is taken it will have huge effects and yet the decision has been taken lightly without due consideration of the long term consequences.

2. Our village infrastructure is already at maximum capacity. Our schools are full, the station car park and the trains are oversubscribed leading to terrible travel conditions in rush hour and the roads are already busy. How can we cope with the impact of more people?

3. The drainage system needs to be improved at the moment - how will it cope with more houses and people. It won't.

1. Any new housing won't be affordable for anyone apart from the richest - my sons will never be able to live in this village when they require their own homes.

2. If the Wisley development goes ahead all the above problems will be magnified.

This is not a good plan. It requires far more planning about what happens afterwards and I have seen no plans that cover this at all.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2304  Respondent: 8896865 / John Patterson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am very concerned by the plan outlined in the SSIO document for many reasons outlined below. Firstly I would like to object to East and West Horsley being defined as ‘semi-urban’. It is not a semi-urban area but very definitely a rural area although the plans outlined in this document including the removal of green belt status and the extension of the village boundaries would condemn it to becoming semi-urban and destroy the countryside that the ‘green belt’ has so far protected for future generations. What a catastrophe if we are the ones to allow it to be destroyed for ever and let it join the smothering urban hell that England is becoming.

1. The loss of the ‘green belt’ will be irreversible and catastrophic for the future of our countryside, once built on the area can never be reclaimed and it will just be the start of a continual erosion of rural England. We need to protect from the greedy development of urbanisation.

2. The density of housing proposed by this plan is just not in character with this area and I’m not convinced is actually needed locally - indeed there has been no assessment of the housing need. The local employment opportunities are not readily available but tend to be in the Guildford or Leatherhead area so anyone moving to this planned housing will need to travel by car to access it as local transport is poor and sporadic and limited. In fact during the first 10 years of the plan 75% of the housing locations are outside the Guildford town centre and urban area.

3. This increase in housing will mean a huge increase in local population that will have a hugely detrimental effect. Firstly the huge increase in traffic will not be sustainable by the current network. Already the narrow lane running the length of East Horsley (Ockham Road North and South) is an accident waiting to happen, for example when large construction lorries are passing through especially where the road narrows to almost a single lane (outside Conisbees and after Station Parade), currently two cars passing at these points have to slow down otherwise wing mirrors collide. Will the council accept responsibility for any accidents that occur due to the increased traffic especially during times of heavy construction?

4. With this increased traffic will come the need for extra parking especially at the station, Bishopmead shops, Station Parade shops, village halls and doctors surgery which are already heavily over subscribed, does the council propose to also make large areas available for parking?

5. To support the rural label the street lighting is also not of a semi-urban area. There is very little street lighting through East and West Horsley, only occurring occasionally along Ockham road and East Lane. This would also need to be considered with a large and ever increasing population and alter completely the rural village atmosphere.

6. The increase in population and traffic will have a detrimental affect on the air quality and carbon emissions in this rural area also destroying the countryside and health of the local population.

7. These two villages cannot sustain the necessary increase in pressure on the infrastructure that would occur with regard to sewers and treatment works for this level of increase in population. Plus there is already flooding in many areas around the two Horsleys and between Horsley and the A3 at Ockham.

8. The current facilities such as the Doctors and schools are already at bursting point with local people struggling to get appointments at the one surgery that supports East and West Horsley. The Raleigh School is full and cannot expand physically any further and sending children further afield will only of course increase the heavy traffic at a peak time.

9. The horrific idea of abandoning the ‘green belt’ and developing even further into the surrounding countryside is a crime to those of us who treasure our English countryside and want to preserve it for future generations. Where will the greed of development end? Until we are one huge urban hell with no agricultural land left? This plan will mean the loss of important habitats e.g. SNCI and compromises SPA/SSSI which can never be
recovered - this is a crime of huge proportions and I hope those of us who protest will be able to protect it from the selfish encroachment of humanity.

10. Finally the proposed development at the Wisley Airfield is out of all proportion and will have a huge impact on the local area and its facilities. It will hugely increase the traffic around and off the A3 with increased greater demands on the roads through Ripley and Horsley. Also increasing the demands on the local facilities such as the doctors and schools. It will overburden the whole surrounding area to bursting and also destroy a wild and diverse natural habitat.

I am very disappointed in this plan to destroy the character and natural countryside of our local area and feel very let down by the Guildford Borough and local councils in even proposing it and especially removing the green belt status. Many have said that the pressure is from Central Government to provide housing – at what cost? Are we to provide housing for the whole of Europe? Is it our countryside and rural areas to be sacrificed? Will no-one stand up and protect our country traditions. During the cycle races through Surrey which passed through our villages, even Boris Johnson commented ‘who knew Surrey so was so lovely’, if your plan is implemented it will no longer exist.

I have lived in Horsley for 12 years now and have always lived in Surrey, from the age of 13 I lived in Effingham. My partner grew up here and both our parents live in the village. I would like to think that our children could also live here if they chose to and the housing would be available and affordable for them.

Saying that, I strongly oppose to the amount of houses (533, with possibly +60 more) that are being proposed in the plan.

Both of my sons attended both the local primary and secondary school, however, we went through the whole process of appeal when the catchment area boundary was moved. We were faced with having to send my son to a school over 8 miles away, instead of our local school The Howard of Effingham. We went through the upsetting experience of appeal with many other to get him into this school – the result was the school putting a whole extra class of 30 children for that year group. Both schools are severely oversubscribed every year, where will the extra children from the proposed houses go?

This obviously will apply to our local Doctors surgery, where already we find ourselves waiting two weeks for an appointment. The extra cars that each house owner will have – at least 2, means potentially 6,000 cars within a 3 mile radius of the villages – how will our roads cope? I commute 3 days a week into London, the station car parks are already full.

It states that Station Parade in Horsley is designated a “District Centre” – this suggests that the area is urban – potentially allowing the area to be targeted for future, further developments – I oppose this.

The proposed greedy housing development at Wisley Airfield suggests upgrading the current A3 junction- I cannot believe that this is even being considered. I can only think that this will have an enormous impact on our roads though the villages, not only with the increased volume, but also pollution.

I cannot pertain to understand the drainage system our villages use, but I know that with the building of 7 houses (since we moved here) in close proximity to our house has resulted in drainage problems for us and our neighbours. I believe that flooding will be an issue with the proposed developments, with such a demand on our drains.

As I said I would love for the next generation and the next one after could see a future ahead of them living in our villages, I understand the need for affordable housing, but the proposal to remove us from the green belt to build hundreds of houses will destroy our village completely. Residents have been made aware of a Strategic Housing Market Assessment (which apparently was not revealed in the plan – or to the Council) whose target housing number is almost 70% higher than the official national estimates for population growth in the Borough, resulting in a possible increase of upto 35% in existing West Horsley households. This is greater than any other single area in the Borough, why?

I can only see that it is Guildford Borough Council’s failure to ensure that other sites and brownfield sites are used first and using the Green belt is not in this instance an exceptional circumstance – there are other available sites that could and should be built on, before attacking this area of outstanding beauty.

I thank you for taking the time to read this and implore those that make these decisions, to reconsider destroying our beautiful villages and the destruction of the green belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing to object to the guildford local plan for development. I am particularly making reference to West And East Horsley as this is where I reside and therefore know the villages well.

I object on the following grounds

Traffic and parking

-------------------

I object as the traffic through West Horsley is already extremely busy and many of the roads are now too narrow to take the large lorries and cars at the same time. The parking at the shops is almost impossible now and small businesses will suffer if you cannot quickly pull up and shop. The other day I tried to take my grandson to the swings at the East Village hall and the car park was totally full so unable to stop.

Pavements

----------

I object to more houses being built in the area as the pavements are too narrow and dangerous to walk along with a pushchair. If more houses are built there will undoubtedly be more cars in the immediate area.

Flooding

----------

I object to more houses being built in West Horsley as the drains cannot cope at the moment when it rains. Obviously the infrastructure of drainage was done many years ago when there were fewer houses. My garden for one floods very easily when there is rain and if there is more houses it will certainly impact on drains and drainage.

Medical Centre

----------

I object to more houses being built due to the fact that the Medical Centre is already under pressure and if more residents live in the area it will be even harder to get an appointment.

I object as I feel the proposal will dramatically change the character of our village for ever.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
It would be foolish to pretend that there is not a need for more housing, particularly in the South East. However it is difficult to understand the size of the numbers apparently deemed necessary in Guildford Borough and it appears equally difficult to obtain any clear answer as to how they were arrived at.

Whatever the number finally built over the next 15 years, I would argue strongly that it should not be allowed to change for ever the character of existing settlements.

West Horsley is currently a village of some 1,100 homes. These are a mix of various styles and ages, including a number of historic buildings. Most importantly it is LOW DENSITY housing. The number of houses suggested for the proposed sites for development within the village would be completely out of keeping with the current village.

The proposed numbers of new homes (385 on 4 sites) represent a 35% increase on the current size of the village. There are almost no facilities within West Horsley. The last shop in the village is likely to be lost later this summer. The state primary school is fully subscribed every year. Almost all the needs of residents are met in East Horsley: doctor, bank, library, shops and station. Already the traffic and parking situation is almost at capacity there. For the majority of people, the development sites proposed for West Horsley cannot be considered within walking distance of these facilities, so that will mean many, many more cars on already busy local roads and nowhere to put them when they reach their destination.

A major worry with this amount of possible development is the provision of adequate waste water and sewage management. Thames Water has advised Guildford Borough that the current wastewater system is unlikely to cope with the demand from these developments and the foul drainage system from West Horsley to Ripley treatment works will need to be upgraded. This is likely to need 2 to 3 years to complete. AFTER development planning permission is granted. Sewage, roads, transport, schools - what thought has really been given to the infrastructure that is needed for development on the scale proposed, infrastructure that should come first not later?

West Horsley does not want or need this number of new homes. Yes, a serious case can be made for a few limited developments, particularly smaller, more affordable housing for younger buyers and for older residents wanting to 'down-size' whilst remaining in the area (and thus releasing some larger homes for families without the need for new build).

As I understand it, the National Planning Policy Framework (NPPF) requires that new residential development MUST respect the character and density of housing in the area and be limited in quantity by the availability of infrastructure and local facilities. This plan appears to ignore these rules entirely.

Preserving the Green Belt

The NPPF, para 37, reads "As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in VERY SPECIAL CIRCUMSTANCES." What are these 'very special circumstances' that the Council feels justifies its plan? How has it happened that nearly two thirds (64.6%) of the total number of homes proposed by the Guildford Plan are to be built in the Green Belt? It may well be far more attractive to developers if they can be offered pristine greenfield sites, no expensive demolition or cleaning up, but where is the emphasis on using up brownfield land and regenerating run down areas (even at the loss of a little profit). Are too many of these more urban sites being reserved for commercial development rather than housing? Would it be very cynical to think this housing plan to use Green Belt sites has been 'developer led'?

The plan to take villages (generally, not just West Horsley) out of the green belt seems a very retrograde step. Once this protection starts to be lost, then what incentive is there not to nibble away at it as and when the Council thinks fit?

Please think again. Do not spoil West Horsley and many other similar villages in the Borough by taking them out of the Green Belt and burdening them with development they cannot sustain and that will change them for ever.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

It appears that the draft Local Plan has now been revised to feature once more a straight boundary to the very large sloping field to the south west of Silkmore Lane. It had been argued that a straight boundary would make it easier to ensure that no intrusion into the field (and thus into the Green Belt) would take place in the future.

This has been widely regarded as a pointless move, an infringement in itself on the Green Belt for no valid reason - a rather feeble suggestion that the Council might somehow be ineffective in preventing intrusion into the Green Belt as it stands - and a measure which, if adopted, would leave open the probable building in the freed-up space of yet more houses to spoil the serenity of this lovely shallow valley.

We recommend that this particular proposal be struck out of the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

With regard to the Guildford local plan, I am writing to strongly object to the proposals for such radical changes.

West Horsley is an area already under pressures. Local schools are popular but oversubscribed. The road system here is out-worn with the amount of traffic using it. Our medical centre is extremely busy and appointments not always easy to come by,

Parking facilities are stretched. The station parking seems to be very stretched - often no certainty to a parking space there. East Horsley provides adequate everyday shopping, but again, parking is deficient and could not deal with large increases of people and traffic.

Intrusion into the Green Belt by unsettling will add over 30% to the present number of homes in West Horsely. Unacceptable, surely. Insupportable for reasons already cited, a complete change imposed on our village, on its character and its style and its residents, whether elderly, young, family, groups, all residents of their already busy but pleasant area.

Such changes, proposed to occur in a short time span are the reason for my strong objection.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I would like to strongly object to the new plans for West and East Horsley and please see the comments below.
We have lived in this area for over 40 years and cannot believe the disruption that this new plan would cause.

1. Development of over 2,000 house village at former Wisley Airfield would have a major impact on the Horsley villages of such a mixed housing, retail, commercial traveller and schools development, less than 2 miles away would be enormous.
2. Infrastructure is already overloaded. The schools are full and medical facilities stretched.
3. Problems of finding parking places at the station and shops which at certain times is very, very difficult.
4. An extra 25,000 cars on our roads which are already very congested and this would also mean much higher levels of pollution.
5. Some of our roads are liable to serious flooding and the extra traffic would make this problem much worse.
6. We have some beautiful countryside in this area with probable damage to the flora and fauna if this development happens.

Comment ID: PSLPA16/2005  Respondent: 8900481 / John Burgess  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. Notwithstanding the above, with regard to my own locality:-

   • For reasons previously stated, I OBJECT to the insetting proposed for East and West Horsley the sole purpose, of which, is to enable significant housing. The increase in housing proposed (some 600 dwellings overall - DLP plus other "minor" potential developments

   - with some 400 plus in West Horsley) is excessive and will fundamentally change the character of both villages, placing unsustainable pressure on the local infrastructure. As far as West Horsley is concerned it is difficult to equate the DLP's proposals with the planning authority's Settlement Hierarch y statement that West Horsley is unsuitable for substantial growth. A proposed circa 40% increase in housing stock within the village (no doubt to be followed by further development if greenbelt status is lost) is, in my view, substantial and excessive.

   • I OBJECT to the proposal to develop a "new town" of some 2,100 dwellings on the former Wisley. The consequence of this, coupled with the developments proposed for the Horsleys, will have a devastating impact on the immediate locality, increasing the number of homes by nearly 80% of current homes and releasing significant numbers of additional cars into an area that consists largely of narrow country roads. The local infrastructure cannot accommodate such a dramatic increase in housing/vehicle numbers and local facilities, particularly the railway stations of Horsley and Effingham Junction, would be overwhelmed. Similarly, medical and educational facilities will be adversely affected, at least until additional facilities are developed. The whole nature and character of Ockham and the Horsleys will be destroyed if this proposal proceeds.

   • Of the developments proposed for East/West Horsley, I PARTICULARLY OBJECT to:-

   • The proposal for some 100 houses on site Any access to this site will require demolition of a house(s) fronting Ockham Road North. Such access will compromise traffic and pedestrian safety, releasing traffic from the development onto a minor (but extremely busy) road with poor sight lines and with only narrow footpaths for pedestrains (including young children on the way to local schools), who are obliged to walk no more than 1-2 feet from passing traffic, including very heavy lorries and goods vehicles most of which, I might add, break the speed limit. Add itionally, the site is subject to severe flood ing, and abuts Lollesworth Wood s, which are...
designated a Site of Nature Conservation Importance. Although these woods are private property, it is inevitable that the nature of the woods, the flora and fauna, will be irreparably harmed by the inevitable incursions by inhabitants of any development of this site.

- Site A41 (90 houses), which looks as if a blind folded planner has just put a pin in a It is difficult to imagine a more inappropriate site. A housing development here will destroy what is a significant stretch of rural pasture with woodland behind, which provides an unbroken rural scene and feel between two separate parts of West Horsley.

- Finally, I OBJECT to the proposed designation of Station Parade, East Horsley as a "Rural District Centre" which, by definition, opens the village to uses which are wholly inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am an East Horsley resident and I would like to state my objection in the strongest possible terms to the developments proposed for East and West Horsley and Effingham as well as the removal of these villages from the Green Belt. I have stated my reasons for objecting below.

**Loss of Greenbelt Land:** Although I understand there is a need for increased housing nationally, as well as locally, I would have thought that the preservation of the Green Belt outweighed this requirement. If we do not act now to preserve the Green Belt I can see that in time these areas will be swallowed up by increased development into the Greater London area. The Green Belt is essential for preserving the ‘gap’ between Greater London and Surrey. Surely any need for new houses, should first be put onto the numerous Brownfield sites in Guildford itself before any encroachment of the Green Belt is even considered. Other options for development to the west (Onslow Village) and east (Burpham) of the existing town also seem preferable as those areas are not currently in the Green Belt and at least existing infrastructure and transport links to local businesses are already largely in place. To make such an increase in these small villages, would change their character irrevocably for the worse.

**Traffic and Parking:** Currently the roads in these villages are small, often without pavements in many roads. There would be a huge increase in traffic in these areas with currently very limited public transport and the existing train stations with car-parks are already full to capacity. The village shops, medical centre and village hall have limited parking, and again, any increase in traffic would only exacerbate this problem.

**Flooding:** This is already a problem in many areas, and this would only increase with increased building. The site behind Ockham Road North in East Horsley is partially a level 3 flood risk area, and local residents are well aware of how much standing water there is in their gardens after rain. We already know what happens to local roads when it rains – the drains can’t cope.

**Schools:** The existing state schools are already oversubscribed, and again, traffic jams are already bad in the times of the school runs. : No extra places are planned in the Horsleys, and the school places proposed at Wisley Airfield will not planned until many years into the project.

**Medical Facilities:** These would be affected in the same way as the schools.

**Pollution:** The large increase in volume of traffic will cause an increase in nitrogen dioxide and particulates in the environment – already a cause for concern in several areas in the Borough.
Transport: Misery for commuters, nowhere to park and full trains at commuting times.

Local Road Network: In respect of the proposals for development at Wisley Airfield and for an upgrade the current A3 junction at Burntcommon to a full 4-way junction, SCC traffic modelling anticipates increased use of Guileshall Lane, Hungry Hill Lane and Tithebarns Lane for traffic accessing the A3 at Burntcommon in order to travel to Guildford and beyond. The SCC report states that “consequently, it indicates that further thought may have to be given to managing traffic in this area as part of a transport assessment should the development be progressed”. It appears that the Plan is proposing a strategic site at Wisley Airfield without even knowing what improvements to the local road infrastructure will be required. If that is the case for Wisley Airfield, then it is almost inevitably true for the proposed developments in East and West Horsley as well and I find this extremely worrying.

It is paramount that GBC should make every effort to retain the present character of the area and address economic and housing requirements without impacting the Green Belt.

**Comment ID:** PSLPA16/3374  **Respondent:** 8900769 / Andrew Frackiewicz  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

1. I strongly object to the overall proposal to remove the villages listed in the above document from the Green Belt, in particular East Horsley, West Horsley, Ockham & Ripley. This is fundamentally against the principles that our countryside is protected from building on and to ensure that there is a balance between houses and open spaces. The Green Belt we have in the Guildford area and particularly around East Horsley, West Horsley, Ockham and Ripley preserves/protects the environment, air quality, helps to prevent flooding and provides open countryside for all to share.

2. I strongly object to the removal of Wisley Airfield and the land surrounding it from the Green Belt. Again this is an open area which should be protected against the developer.

3. I strongly object to the proposal to designate Wisley Airfield as an area for building some 2000 new houses. This is Green Belt land and must remain so.

4. A part of any local plan should be to use up all brownfield sites first, whether immediately available or at a later date, before any other land for housing is considered. There are areas in the Guildford area where there are unoccupied pieces of land, derelict offices and industrial areas. In Guildford itself the areas around Walnut Tree Close and Slyfield spring to mind but all other such areas which need re-generation must be identified and used for housing needs before any other land is considered. Developers must be made to use brownfield land and not just proceed with what they see as a 'cheaper' option, i.e. the development of green fields.

5. The land held by Surrey University should be released for housing for students and accommodation built upon this land. If students were accommodated on this land, the housing that they currently occupy in the Guildford area would become free and allow other people to live there or allow development of new houses. Again this must be implemented before any Green Belt land is developed.

6. I believe that the housing requirements have been over-stated. There is no visibility on how the currently proposed numbers have been arrived at and a further aspect is that the allowance for migration is probably over-stated given the government's latest policies both pre-Brexit and post-Brexit.

**Specific Comments**

1. I most strongly object to the proposal to remove the Horsleys from the Green Belt and for extending the boundaries of the Settlement areas of the Horsleys, thus possibly leading to a substantial number of new homes being built. The public facilities are already at full capacity. The doctors surgery is always full and appointments are generally difficult to obtain unless one is prepared to wait for a few days. There is no bus service worth mentioning as there is only the odd bus at times between 9:30 a.m and 4:00 p.m. The only practical way to reach East Horsley is by car and parking is already difficult, therefore additional vehicular traffic arising from more people living in the vicinity or coming to East Horsley could not be catered for and would be chaotic for the residents already living there. Further more there is no available land to provide for additional facilities, other than a few empty shop units.

2. I object to the Settlement Boundary Local Plan 2003 for East Horsley being re-drawn in the 2016 Plan. The lines as designated in 2003 should remain.

3. The infrastructure in East Horsley and West Horsley is already over stretched. For instance in East Horsley we have had Thames Water checking the sewers as they have concerns about their capacity. When we have heavy rain we have flooding - refer to government maps which places part of East Horsley on the 'Flood Plain'. The roads around East & West Horsley are already very busy and in many places 2 cars travelling in opposite directions struggle to pass - never mind any larger vehicle. Examples of this can be found on Oakham Road South between Bishopsmead shops and the railway station.

**Proposed Areas for Housing**
1. East Horsley - I have no objection in principle to use the Thatcher's Hotel Site for housing provided the density is reduced and that adequate road access provisions are constructed due to the already very busy and dangerous access situation onto the main A246 road.
2. West Horsley - I have no objection in principle to use the Bell & Colville Garage Site for housing.
3. The remainder of East & West Horsley - As well as the Green Belt issue I mention at the start of my letter, I object to increasing the size of these villages by some 500 additional houses, mainly the additional designated housing area in West Horsley. This would destroy the character of both East & West Horsley. In addition to adding the 500 or so houses, such an increase would severely impact East Horsley since West Horsley has no facilities to speak of, i.e. no shops, surgery, bank, library, etc. Therefore more people would travel to East Horsley and further increase the parking problem there. There is a primary school (Raleigh) which is shared with East Horsley but I understand that this is full and certainly the secondary school at Effingham is full. So again any significant increase in people living in East & West Horsley would probably swamp the schools facilities we already have in this area.
4. Wisley Airfield - I strongly object to any form of building here as I mention above. This is an area of Green Belt land with no infrastructure and non-existent transport facilities other than road access. The reasons for unsuitability and rejection of this area for potential development are well documented in the recent rejection by GBC Planning of a planning application for access to this site. The Wisley site must be removed from the Local Plan. Access from this site to the A3 is very poor and already the junction is at capacity at peak travel periods. In addition rail transport is already at full capacity on the train line into London and the car parks at nearby stations are fully utilised. The large increase of vehicular traffic and people from houses built at Wisley could not be absorbed by the current infrastructure and public facilities.
5. The recent proposal for housing at the Effingham School site was recently rejected by GBC. Surely if this proposal was rejected then the conditions for building more houses in the Horsleys & Ockham are even less favourable due to the more restricted infrastructure and transport availability and roads which generally are only lanes.
6. Onslow Estate Housing - Why has this proposed area not been listed for housing? I understand from the local press that GBC do not wish to take up the offer for this large area to have housing. It has good access to the A246 and is close to Merrow shops and public transport including buses and the park & ride which provides good access to Guildford town centre.

Other Comments

1. In order to achieve a better balance in the housing stock GBC should implement a strict policy to ensure that the demolition of small houses including bungalows and the resulting construction of replacement houses of a much larger size be immediately prohibited. Whilst current policy appears to favour the developer the removal of smaller housing stock reduces the number of properties to which people can downsize to and obviously if there are no such smaller houses available in the area that people wish to continue to live in then they will just remain in their larger homes and not free up existing houses for growing families.

In conclusion I would ask that Guildford Borough re-consider this plan. It would appear that many of the comments and views raised by local people in the previous consultation appear to have been largely ignored, certainly as far as the Horsleys, Ockham & Ripley villages are concerned.

The objective of adding some 14,000 new homes, which I understand represents a net increase of some 25% to the housing stock of Guildford Borough over the next 20 years, appears grossly overstated given the nationally projected population increase of 15% over the same period. I have to question whether employment in the area; infrastructure including roads and public transport; facilities such as hospital, medical and schooling; will increase by a similar amount. If not then it surely is illogical to start to plan for so many additional houses.

East & West Horsley as well as Ockham are village communities and I wish them to remain so. My plea is that 'brownfield' sites in the Guildford area should be the starting point for any additional housing and Guildford Borough Council being an elected body together with the local Councillors should all be fighting for the wishes of the citizens who have elected them.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
This letter is my response to your invitation to comment on the above-named document, which has been studied recently. On 22nd November 2013, I wrote to you about the previous Green Belt & Countryside Study/Local Plan Strategy Sites Issues & Options. The current document offers some improvements on the earlier draft, including the welcome removal of the previously proposed development site which included Lollesworth Wood.

Nevertheless, the present PSLP still contains proposals which I find unacceptable. First of these is the continuing proposal to inset virtually the whole of West Horsley from the Green Belt. In my view this proposal remains unacceptable for the following reasons:

1. West Horsley in particular (as well as East Horsley to an even greater extent but partly for different reasons - see further below) appears on the Guildford Borough Key Diagram (page 13 of the PSLP), as a sea of white (i.e. land no longer to be Green Belt) set in a much larger sea of green representing "countryside". It is clear that the proposed treatment of West Horsley does not measure up to the requirements of the National Planning Policy Framework (NPPF) generally, but in particular to those of paragraph 83.

2. From the North part of West Horsley there are exceptional open views towards the Sheepleas (the nearest part of the Surrey Hills Area of Outstanding Natural Beauty - ANOB), as well from the ANOB towards the North into West Horsley. Clearly these much-prized views will be damaged by any significant development in any part of West Horsley. Further, West Horsley is the main access point for the public on foot & by car to the ANOB from the North (at West Horsley church and Shere Road).

   1. In particular, the new Strategic Development site A41 in the PSLP is particularly objection able in this regard, as its' effect will be to compromise (destroy) views to and from West Horsley, more than other Strategic Development sites proposed for the Horsleys.

Turning to East Horsley's proposed development as a District Centre, this is beset by problems, particularly as regards the area of East Horsley Station Parade. Already this has too little short-term and long-term parking, both at the railway station and increasingly for the local shops. Other services, particularly medical and educational are quite clearly already insufficient.

The new housing developments proposed for both East and West Horsley in the PSLP will alone overload the proposed District Centre, but the possibility of a larger development at the Wisley Airfield site can only exacerbate this situation, since Horsley station would be the obvious access point for Wisley residents, (in particular London commuters) to the railway. (Residents of the proposed Gosden Hill Farm and Send housing developments might be attracted to a new Merrow Station, but this will be no help to Wisley, and will, in any case, lead to increased over-crowding at later stations, given the likely limit to additional train capacity which could be run on existing tracks). Furthermore, there are no proposals to develop the area around Effingham Junction station, which would be slightly closer to Wisley (if built) than Horsley.

All in all, it appears that the adoption of the current proposals for excessive housing concentration in the Eastern areas of the Borough of Guildford in the current document can only lead over time to the complete destruction of the Green Belt in the Horsley area, and most probably to a major transport disaster.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North 

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Like many residents of West Horsley and those other villages within the Guildford Borough affected, I view the proposed removal of green belt status with considerable dismay.

Before, commenting on that aspect and the relevant policy statement (P2) I wish to make some general observations.

First, it appears that GBC has taken no account of the objections raised by residents at the time of the consultation in 2014 and has ridden roughshod over those concerns.

This is evident in the statement made in the commentary to Policy S1 ("Presumption in Favour of Sustainable Development"). At paragraph 4.3.16, whilst acknowledging the requirement of the NPPF not to amend green belt boundaries save in exceptional circumstances, GBC states:-

"We consider that exceptional circumstances exist to justify amendment of green belt boundaries in order to facilitate the development that is needed and promote a sustainable pattern of development"

On further reading, however, it can be seen that the above statement is wholly self-serving. Exceptional means exceptional, not just what a particular council decides to choose as a place on which to build some houses.

GBC has clearly misinterpreted the NPPF. That it and other councils across the land are engaging in similar misguided approaches in this area was recognised in the recent (April 2016) report of the House of Commons Communities and Local Government Committee, the report concluding:-

"...at present we do not believe that there is sufficient guidance available to local authorities on whether it is appropriate for green belt land to be used to meet housing needs”.

In the case of the 2016 plan it seems that decisions are being taken either without proper thought or just based on the flawed 2014 plan.
Having made the effort to read both the NPPF and some of the key documents prepared in support of the current proposals, the impression is that it is at best a selective and at worst a deliberately flawed interpretation of the NPPF which is informing the formulation of Guildford's planning policy at this critical time.

1. In the NPPF "Local Plan" is defined as "The plan for the future development of the local area, drawn up by the local planning authority in consultation with the community." In the case of the draft local plan it is said in the foreword by Cllr Spooner that the policies and site allocation of the plan "are informed by an up-to-date, extensive and robust evidence base". However in the case of the recommendations stated under Policy P2 GBC is still basing its strategy on the Guildford Borough Green Belt and Countryside Study: Volume IV", a document which was prepared in February 2013 by a third party commercial concern, namely Pegasus Planning Group Ltd. ("Pegasus").

The use of a February 2013 document can hardly be described as "up to date".

Furthermore, the findings reached by Pegasus in that report are not robust in any way. Quite the opposite: they are subjective. I have no objection to outsourcing by local authorities of the provision of services. There is no case, however, for the contracting out, as GBC has done, of such a key area of policy formulation as this. I note that in the "Ministerial foreword" to the NPPF it is observed that "people have been put off from getting involved because planning policy has become so elaborate and forbidding-the preserve of specialists, rather than the people in communities".

In the case of GBC it seems that it is such specialists and their client-serving interpretations of the NPPF that will be holding sway, regardless of the views of the people in the communities affected.

1. According to the NPPF, "the fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open". The word "open" in this context is not defined, but what it clearly means in the context is "not built on". This is clear from paragraph 86 of the NPPF.

This paragraph states that a village should be included in the green belt "if it is necessary to prevent development in a village primarily because of the important contribution which the open character of the village makes to the openness of the Green Belt". Taking the meaning of "open" as stated above, i.e. unbuilt up, it is reasonably clear what the NPPF is aiming at. That is to say, where a village is not particularly built up and is situated in surroundings that are not built up then it should stay in the Green Belt.

1. It seems that in their assessment of what is considered to be or not to be "open" or "of open character", the Pegasus study is both misguided and in many respects, just plain wrong.
2. That a piece of land is "open" or whether or not a particular village has an "open character" is a question of fact. It seems that the Pegasus study, on which it appears so much of the current proposals are based, takes a somewhat irrational approach to the answering of this test: for example declaring that a village is not demonstrating "openness" where there are trees growing. As stated above, open means not built on: the fact that trees are growing on land does not mean that it is not open. Actually quite the opposite.
3. When the Pegasus study states that "it was considered, in principle, that for the open character of a village to contribute to the openness of the wider Green Belt it would need to be appreciable or visible from Green Belt land" it makes an assumption that has no support from the NPPF. Where in the NPPF is there any mention of "visibility" as the required proof of satisfaction of the condition stated in paragraph 86?
4. On a closer analysis it can be seen what was driving Pegasus to reach the skewed conclusions that it did back in 2013. Paragraph 82 of the NPPF states that the "general extent of Green Belts across the country is already established". And that "New Green Belts should only be established in exceptional circumstances, for example when planning for larger scale development such as new settlements or major urban extensions". I see no mention in any of the documents so far produced of any intention to create such "larger scale development".
5. In the following paragraph it is allowed for local authorities in their preparation of the local plan to "consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period." Pegasus, it seems, have seized on this reference as the carte blanche for the extension of green belt boundaries, thereby paving the way for the "insetting" (newspeak for expansion and building over) of villages within such greater boundaries. It does seem rather odd that there
should be talk of expanding the green belt boundaries with the objective of ensuring greater permanence/
identifiability, when any of us who live in this area know very well that the green belt, and its policy of
prevention of creating any built structure, begins at the end of one's garden, where the open fields begin.

6. In the case of the village in which I live, i.e. West Horsley, this is a village which as the Pegasus study observes
exhibits a low proportion of development to open land. As stated above, that a village is surrounded by open
land is one of fact. Living as I and many residents of West Horsley do with views of open and unbuilt over
countryside I find extraordinary the Pegasus conclusions (at p 73) that "the majority of the village is considered
to exhibit an enclosed character due to tree cover and topography surrounding the village". Equally bizarre is
the Pegasus conclusion that "open (i.e. unbuilt on) areas within the village do not appear continuous with
surrounding open (i.e. unbuilt on) land beyond the village." For me and for many of those who live here it is the
enduring connection to the sights, sounds and natural habitats that such open land provides that marks West
Horsley's essential character, that is, the unbuilt up nature of the village and its surroundings.

7. In conclusion, there is no objection to the formulation of planning policy that follows the letter and the spirit of
the NPPF. However, the impression that is given from the draft plan and many of the documents on which it is
based is of a deliberate and, at best, erroneous misinterpretation of the key elements of the NPPF by Guildford
BC and its paid advisers.

8. There are many other reasons to criticise the draft plan in respect of its intended permission for such large scale
development as it does, eg lack of infrastructure, schools etc. The main objections however are those which I
have stated above. It worries me considerably to see such disregard of the public opinion expressed in 2014 and
the deliberate misinterpretation of policy guidelines. Such intellectual dishonesty is offensive and I therefore
object to the relevant policy P2 for this reason.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Will harm compliance with NPPF 81 – e.g. by making cycling (including Prudential cycle races) too dangerous, ruining the rural setting of Waterloo Farm campsite, destroying the ambience of Grange Park Opera’s new “Theatre in the Woods”.

• Policy A40 especially unviable because of high water table and poor drainage, leading to regular winter flooding.
• Safe access and egress at Site A40 unachievable, owing to flooding, high speed limits, poor sight lines, narrow access to existing properties, inadequate pavements for elderly and schoolchildren, increasing use by recreational cyclists etc.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I would like to register my concern with a number of the proposals laid out in the proposed Local Plan, which I feel will have lasting detrimental consequences for West Horsley and the surrounding countryside.

My concerns are as follows:

The proposed scale of development in West Horsley will result in dramatic permanent change to the character of the area, and is unsustainable given the local infrastructure. The local schools are over-subscribed and full every year; the doctors surgery in East Horsley is invariably busy today and appointments hard to come by; the roads (especially Ockham Road North/South and East Lane) are very busy at peak times; and the basic services, especially sewerage/drainage, are already incapable of dealing with the current demand as the widespread flooding that invariably accompanies periods of heavy rainfall in the village shows (further development will mean more surface water runoff, and more immediate demand on outdated sewers and storm drains which in turn will mean more flash flood episodes around the village).

Additionally, there is no proven case for the supposed demand for such a large number of houses in this area. West Horsley Parish Council’s own analysis suggests that approximately 20 properties would be needed in order to meet demand from local people otherwise unable to stay living in the village - a development of that scale and for that explicit purpose would be entirely understood, but what is proposed is anything but. It is unreasonable to expect a few villages in the Borough (of which West Horsley is the most extreme case) to take a share of the burden of future development that is wholly disproportionate to the scale of those villages today, when the equivalent number of houses added to already well-established urban centres (e.g. Guildford) would result in far less significant change to the character of the area.

Removing the Horsleys from the Green Belt is fundamentally unjustified and contrary to the stated Government policy (see Hansard ref. Queen’s Speech, 5th June 2014). GBC’s need to find space for housing does not constitute an “exceptional circumstance” that could in principle otherwise justify the deletion of the Green Belt designation. Removing the village(s) from the Green Belt will lead to further urban sprawl and the unique character and community of East and West Horsley, as well as that of much of the surrounding countryside, will be lost forever to future generations. It is furthermore key to note that the National Trust aspire to pursue the further northward extension of the current Surrey Hills AONB to cover this area, which provides recognition at the most significant level of the importance of the rural nature of this region.

The scale of the proposed Wisley Airfield development is hugely out of keeping with the local area, and a development of that magnitude will have an unsustainable impact on our shared infrastructure, not least on the A3 which already experiences long tailbacks at peak times around the Ockham Park and M25 junctions (which will be those most burdened
by the addition of such a large, new town on the airfield site) and on the already overcrowded South West Trains railway service from Horsley into London and Guildford.

I trust that you will take this opportunity to revise these points in the Local Plan, and insodoing ensure that future generations are able to benefit from the rurality of this area as much as previous generations have done.

Ref proposed new Guildford plan to permit building in and around the Horsleys

I wish to object to this plan for the following reasons

- Removal of the Horsleys from the Green Belt and building on the Green Belt land comprising Wisley Airfield cannot be permitted unless there are ‘very special circumstances’. Government guidelines confirm that ‘unfulfilled housing need’ does NOT qualify as a ‘very special circumstances’. Furthermore removal of these areas from the Green Belt is totally against its rules to prevent metropolitan encroachment
- The volume of building proposed will overwhelm the current infrastructure of medical, education, drainage, roads, car parking, etc. with little or no scope for improvement. Drainage is already a problem in the Horsleys during heavy rainfall. This will inevitably become worse with the result of development as more land becomes impermeable.
- The volume of building proposed will overwhelm the current utilities of water, sewage, gas, telephone and electricity especially at Wisley Airfield where these services do not exist and must be provided from scratch.
- The developments will put thousands of additional cars on roads which are incapable of carrying them. The roads are currently, in the main, twisting country lanes unsuited to heavy traffic and in a small number of cases single lane with passing places. The main route through the Horsley’s, Occam Roads North and South are, in places extremely narrow and do not permit simultaneous passage of a large vehicle and car going in opposite directions. These narrow places occur at current housing locations and frequently where there are extremely narrow footpaths only on one side of the road. Currently lorries and cars mount the paths or swerve into drive way entrances to permit passage. The roads and pathways cannot be widened without compulsory purchase from a significant number of owners. The thousands of additional cars will significantly increase the risk of accident causing injury and sadly probable death. There is already a black spot just outside Cobham that will see an increase in traffic if these developments go ahead.
- The concept that large numbers of proposed residents will cycle to and from shops, schools, railway stations, medical centres, sports facilities, etc. thereby reducing congestion, is flawed. Yes some will but the vast majority will not and the few that will cycle will increase the risk of serious accident. Further there is no evidence that the current fashion in cycling will continue indefinitely.

The number of houses proposed comes from an assessment generated by a consultant’s mathematical model which has not been revealed even to Guildford Borough Council. There is no evidence that this mathematical model is correct or that the software used has been fully proven to produce correct output with a sufficiently wide range of input data. **Is the organisation that produced and uses this model certified as complying with the appropriate level of the UK nationally accepted Software Quality Assurance scheme of TickIT or similar scheme?**

The Consultant’s unproven output has been further increased by Guildford Borough Council to give an anticipated population growth almost 70% higher than the official national estimates. **The whole question of population growth and therefore housing need, requires very detailed analysis and review, especially as we are now we are in Brexit and have good reason to expect a reduction in immigration.**
Firstly I am totally opposed to East and West Horsley being removed from the Green Belt as there is no justification for this status to be changed and the Key evidence document ‘Guildford Borough Economic Strategy 2013-2031’ makes no case for siting large numbers of new homes in this area.

There are no exceptional circumstances for West Horsley’s Defined Settlement Area boundaries to be extended and the incredibly important Green Belt be developed - once it is gone it is gone and the whole purpose of the Green Belt is to prevent the disappearance of our hugely valuable countryside.

West Horsley village amenities would not cope with the increased influx of people using the one small village shop, no post office and a limited bus service, not to mention the increased volume of traffic. Nor would the amenities of East Horsley be able to cope with the limited shopping facilities, already crowded train service let alone the further proposals to build 2,000 houses at Wisley aerodrome which would likely also also use and rely upon both East and West Horsley’s facilities.

The area attracts a lot of walkers and cyclists throughout the year as we are at the foot of the Surrey Hills and also have a great deal of historic buildings. It is well renowned for being a beautiful area which we have a duty to preserve, the proposed housing development would be totally out of character with the general character of the area and ruin it forever which is entirely unacceptable and unnecessary.

As previously mentioned the area could not sustain the proposed amount of new homes due to the lack of services, but equally as important the lack of drainage which is a real problem in the area at present (with flooding occurring in both summer and winter, often severe), not to mention the added need for more school places at the local school which is always at full capacity. The increased need for parking spaces would also make using the villages and parking for the Raleigh school incredibly difficult. The doctor’s surgery would also be impacted negatively, it is already difficult enough to get an appointment and sometimes impossible to park at the surgery due to large volumes of traffic.

To summarise, the area simply cannot cope with the amount of new homes provided with lack of services, parking spaces, insufficient school places, the extra burden on the doctors surgery and local hospital, inadequate drainage and is totally at odds with the character of the area in general. These are all very serious considerations which will severely impact the Horsleys but above all the Green Belt simply has to be protected.

I seriously question why the proposed sites are being considered when there is an existing and highly sustainable local town, namely Guilford, where there is a fully workable and tested infrastructure, undeveloped brown sites, the space to do so and it is NOT the Green Belt.

I trust my comments will be taken seriously and the due amount of consideration is used when making this crucial decision.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the removal of West Horsley and East Horsley Villages from the green belt.

Insetting and altering green Belt Boundaries will severely change the nature of the area and does not admit to any exceptional circumstances that would necessitate any change of the current boundaries.

There are 5 legal purposes for Green Belt, and West Horsley meets them all:

- To check the unrestricted sprawl of large built up areas
- To prevent neighbouring towns merging into one another
- To assist in safeguarding the countryside from encroachment
- To preserve the setting and special character of historic towns and villages
- To assist in urban regeneration by encouraging the recycling of derelict and other urban land?

I object to the proposed building on all sites and especially A39,A40 and A41.

The density of the building does not conform to the current established settlement, the increased traffic and necessary provision is not identified or

The density of building will impose greater burden on an already overflowing infrastructure. The plan makes no mention of any intentions to address any points regularly mentioned in all communications with residents and the Borough Council.

The MEDICAL CENTRE, SCHOOLS, ROADS and INFRASTRUCTURE ARE AT THE LIMIT OF THEIR CAPACITY

HAVE YOU STILL NOT VISITED WEST HORSLEY?

I object to the effect that the Plan will have on the Protection of the Surrey Hills and areas of outstanding beauty.

During wet weather, at any time of the year, OUR LOCAL ROADS ARE FLOODED, often IMPASSABLE AND POTHOLED as a result of erosion and unsuitable traffic.

The TRAFFIC CONGESTION IS AT A STANDSTILL DURING PEAK TIMES and throughout the day regularly obstructed by oversized vehicles that make 2 way traffic very difficult.

Recent damage, by an over height vehicle, to the rail bridge resulted in the temporary closure of access to East Horsley along Ockham Road, redirected all traffic through unsuitable lanes and did damage to road surfaces and borders.

I object to the pressure that the Plan and significant increase in residents will put upon transport.

The current provision is congested, insufficient and inadequate and unable to absorb more demand.

Public Transport provides a limited bus schedule and 4 trains per hour.

Walking to shops, trains and schools is a safety risk as pavements are narrow, uneven and incomplete.

Parking is very limited and congested at all times of day.

The proposed developments will continue to pressurize the safety of movement around the village and increase the risk of injury and accident.

The local plan offers no details for improvements in drainage, traffic, standards of roads, pavements, parking and public transport.
I object to the proposed change in nature of our rural environment and the change in use of use of agricultural land.

I think that Brexit demands that the UK becomes increasingly self sufficient and takes control of its business. Irreversible decisions that influence our National self-sufficiency are unacceptable. A commitment to agriculture would improve the status of our farmers, our provision of foodstuffs and create a sound economic situation.

The delicate balance of Flora and Fauna, erosion and pollution is under threat.

As a reflection of the local regard for Horsley and the maintenance of its character, groups have purchased land to preserve the countryside.

Erosion of verges and ditches as a result of flooding and unusual weather conditions has been a feature of recent weather patterns. The effect of concreting over Green Belt land will serve to reduce the natural drainage system and drive the water into the existing drains, that are already overflowing.

Infrastructure is expensive and GBC admit to there being limited funding for renovation and provision for upgrades. Drive along our lanes in a storm to witness the current deterioration, with so many of our roads in urgent state of repair.

DO YOU CONTINUE PLANNING FOR OUR FUTURE FROM AN IDEALISTIC PLAN DEVISED IN A CONFERENCE ROOM?

West Horsley is a village, in the green belt, surrounded by countryside and a diverse natural environment.

Which, under the NPPF, should be retained where inappropriate development is, by definition, harmful to the greenbelt.

64.6% of new homes will be built on the Green Belt

Pollution, destroyed natural environment, hedges, habitat and trees, foul water drainage will have disastrous effects on the greenbelt and areas of special interest.

West Horsley is surrounded by areas of special and outstanding environmental importance and justly protected by the Green Belt.

Our Green Belt is precious. It protects London from urban sprawl; it preserves air quality; it helps prevent flooding; it is the city’s playground. It is for us to conserve and protect it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

To conclude:

Our drains, our water supply, our medical facilities, schools and our roads cannot cope at present, and will continue to be overloaded with the proposed number of new homes. Building this number and density of homes will lead to increased flood risk here and downstream (along the Wey and Thames). The planned development on Green Belt is therefore unsustainable, unrealistic and unwise. And contradicts all expert advice and legislation.
For these reasons, I continue to strongly object to the Local Plan.

Objection to the Local Plan to Develop West Horsley

Please register and record this letter as a formal objection to the proposed Local Plan Development of West Horsley and East Horsley.

The Horsleys, and West Horsley in particular, are not able to support housing development of upward of the 533 houses on the proposed main sites as the existing village sized infrastructure is already stretched beyond an effective level of service.

The Local Plan as it is presented is not able to justify itself on a number of issues and the following information forming the basis of Guildford Borough Councils submission needs to be questioned for accuracy and integrity at a legal level.

1. Development within the Existing Green Belt.

The proposed Green Belt use by extending the 2003 Local Plan Settlement Area is flawed immediately in Policy P2 of the Green Belt and Countryside submitted documents. This states the Metropolitan Green Belt will be protected against inappropriate development and no justification has been put forward for exceptional circumstances to overrule Policy P2.

The proposed Green Belt Development must not be allowed to stand as a major driving force of the Local Plan.

Insetting proposals of the existing village settlement boundary lines has to be stopped as it a) contravenes the existing Insetting of Boundaries policy of 2012 and b) only sets a future precedence for further insetting whenever a developer can get hold of a suitable piece of land.

1. Sustainable Development.

Policy S1 assumes the Local Plan will be a Sustainable Development.

This assumption will not stand up to scrutiny when lack of local schools, shops, parking, road capacity, public transport, emergency services, drainage, medical, dental and loss of a rural community spirit and wellbeing are taken into account.

The physical services above are unable to successfully support the village at present.

Gas, water, electricity and sewage main services are also inadequate to sustain the proposed number of dwellings/persons. There is no plan to use or introduce zero emission or carbon neutral systems or biodiversity controls under BREEAM Regulations that are part of Planning Regulations.

1. Housing Density

The forecast for the housing requirement for the future is inaccurate and cannot be substantiated due to a closed door policy by the relevant consultants.
The local population cannot be expected to accept or believe the required house quantities put forward by SHMA especially as recent audits have identified errors in calculations and outdated data being used.

The secretive nature of this aspect of the Local Plan is misleading and must not be tolerated by Guildford Borough Council during this stage of the consultation process.

Please address this issue immediately to prevent it leading to a ‘weapons of mass destruction’ scenario. Without true facts, the Local Plan is not acceptable.

There is also no official confirmation that every available brown field site has been fully utilised in the overall plan. Why not?

1. Global Warming Effects.

The torrential storm conditions that have occurred recently and are going to occur more and more frequently due to Global Warming, will have a major detrimental environmental impact on the Horsley area. Being a ‘spring line village’ at the foot of the North Downs escarpment and with much of the land in and around the village being flat, of low permeability and prone to water logging due to clay and bands of solid chalk, there will always be a surface water drainage problem in wet weather.

The village is presently classified as being in the Thames Basin Lowlands and the Local Surface Water Management Plan already highlights persistent problem areas in the village as ‘Horsley Hot Spots’.

These surface water problems, and associated sewage capacity issues will be amplified just by adding dwellings to the sewage system and paving over large areas of currently open land thereby creating new water run off capacity concerns that have not been addressed in the Local Plan.

Anyone who has witnessed the surface water gushing up out of the roadside drains in the village will appreciate the above.

Sewage and surface water problems are inevitable with any sizable housing development but local residents must not be expected to take future flooding as a guaranteed consequence of large high density housing schemes

In conclusion, there is not sufficient housing needs evidence, there is not a sustainable infrastructure or a credible Green Belt removal justification to allow the proposed Local Plan development of Horsley village to proceed.

Please, in the sincere interests of local residents, critically review the Local Plan for the village, maintain the existing Green Belt and protect the environment and community spirit of the village for future generations. There are proven health and wellbeing benefits to living in a rural environment which has a knock on effect of reducing the demand on the stretched hospital and medical practices. Has this been taken into consideration?

This alone is reason enough to not develop the village into a town.

Community spirit or community breakdown also needs to be high on the agenda.

RE: OBJECTION to proposed local plan to build extra housing in East and West Horsley (Thatcher’s Hotel Site, Bell & Colvill Garage, Manor Farm Site, Ockham Road North & East Lane, & Wisley Airfield Site)

As a local resident living in East Horsley, close to many of these proposed sites of development, I would like to make you aware of why I believe these plans would have a serious negative impact on our village.

This is land in the Green Belt outside the settlement boundary.

- The Green Belt should protect countryside from sprawl by keeping land permanently open
- The core characteristics of Green Belt land are openness and permanence which we would lose if these developments were to go ahead
- This sort of development sets a precedent for the future, leading to the gradual corrosion and eventual disappearance of the green belt altogether
- No exceptional circumstances have been demonstrated in order to waive the status of Green Belt and so by default this application must be rejected.

Infrastructure: These plans would have a huge adverse impact on our already over-stretched infrastructure.

i) Parking: There are only 2 railway stations within 5 miles of the proposed housing sites, both of which have car parking at near capacity. It is already almost impossible to park at both stations after 9am.

ii) Doctors’ surgery and schools: Our doctors’ surgery and local schools are already stretched to full capacity and there’s no way they could accommodate residents of another 500 houses without serious negative impact on all of the existing residents.

iii) Impact on traffic and highway safety: We live on Ockham Road and are already terrified of letting our children anywhere near the main road as it is so dangerous. We can’t even walk along the pavement to the shops with them as it is a particularly narrow road, and we have already seen the volume of traffic increase hugely in recent years. A mother pushing a pram was recently knocked down and concussed as a van met another vehicle coming the other way. Introducing more traffic into our village would be a nightmare. The A3 and local section of the M25 are both stretched to full capacity and the number of traffic accidents would undoubtedly rise significantly (as would air pollution) if we were to put another 500 cars onto those roads.

Policy D4: I object to this policy largely because the council’s plan is intended to provide new affordable housing in Guildford, but East and West Horsley are way outside Guilford. Not least, this creates an increase in road traffic on what are already incredibly congested roads.

Policy P3: (4.3.33) ‘National planning policy states that we should recognise the intrinsic character and beauty of the countryside and support thriving rural communities within it. I object to this statement as the planned developments in East and West Horsley and Wisley airfield most certainly contradict it, for the reasons I stated above.
Policy P1 – Surrey Hills area of outstanding natural beauty: ‘...will be conserved and enhanced to maximise its special landscape qualities and protect it from inappropriate development’. I object strongly to this policy as it’s simply not what is happening. East and West Horsley are part of this area of outstanding natural beauty and you’re proposing to take away the protection the greenbelt offers to them, thereby diminishing the importance of our precious countryside.

I sincerely hope that you will take this and all of the other thousands of objections seriously and refuse the application for development on these greenbelt sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North 
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to object to the proposal to take the Horsleys out of the Green Belt and to build on land around the Horsleys and surrounding area. I believe that there should not even be a discussion on this; the Green Belt was created for a reason and should be considered sacrosanct. People move to this area for the peace and quiet of the countryside and any significant construction should take place on Brownfield sites. If building on the Green Belt is allowed to go ahead a precedent will be set and our country’s beautiful countryside will eventually cease to exist. The unethical/immoral back door methods of extending village boundaries and taking villages out of the green belt is a blatant attempt to get around the building rules. Rather than constantly building without thinking, the problem of housing should be tackled by looking at the core issues that have caused the need to expand out of London; the many properties owned by foreign investors that stand empty from one year to the next, the problem of immigration, basing everything around London as I believe Princess Anne suggested, if only a few new houses were built in every village in the UK it would solve the housing problem. But there is a fixation with London!!) etc. With regards to the substantial number of houses supposedly required in the area, should it not be the responsibility of the elected council to determine the amount required anyway; not outsider companies as is apparently the case? In addition, whenever any building work is done it seems to be for luxury houses and not affordable houses anyway which then take up the space that could be used for affordable housing. Local people in the Horsleys should be given priority for any housing built in the area; building work should not be taking place in this area to accommodate an overflow from Guildford where, for example, the University of Surrey have not built the accommodation previously promised and allowed, thereby causing students to take up housing in the rest of Guildford etc. Furthermore, construction would not stop at houses as more public buildings/services would have to be built to deal with the larger capacity of people; for example, already there are not enough local school places and children are having to be ferried to schools further afield and it can take a month to get a doctor's appointment at the medical centre, not to mention the extra traffic on the already pothole riddled roads of Surrey. I do hope that you will stop and think about the core issues and the consequences of your actions rather than blindly continuing to build on our beautiful countryside.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
1. Any changes to the current Green Belt status of the Horsleys is unacceptable. 'Exceptional circumstances' have not been demonstrated and this is just a cynical move to allow development to take place. Taking any of the Guildford villages out of the Green Belt is unacceptable. The Green Belt was created as the lungs of London and it is more important than ever that we guard it as the overflow from London drives the concrete sprawl destroying the south East.

I wish to object to the above plan in that it contains the proposal to remove the Horsleys from the Green Belt by the procedure known as insetting.

In particular the plan proposes development site A37 for the election of forty homes located adjacent to west horsley street and the A246.

This would increase the density by approximately 35% which is more than three times that proposed for Guildford town itself!

The existing facilities in West Horsley are already over stretched in terms of traffic, schooling, sewage and water, flooding and infrastructure.

Guildford Borough Proposed Submission Local Plan June 2017 Consultation

I write regarding the above proposal. Although there has been a reduction in the number of new homes to be built on the Green Belt, it still is not enough.

I strongly object to no changes being proposed since the 2016 consultation to insetting West and East Horsley from the Green Belt.

I write to object to the Draft Local Plan ("DLP"), and in particular the proposals as they apply to East and West Horsley.

1. I object to changing the status of the land currently within the Metropolitan Green Belt. Our Green Belt is precious and it is for us to converse and protect it for future generations. Removing land from Green Belt status is a once-for-a-time decision, not to be taken lightly, and the National Planning Policy Framework (NPPF) underlines this by requiring that any change of Green Belt boundaries must demonstrate exceptional circumstances. Unmet housing need is not an exceptional circumstance in law. The very existence of the Green Belt/AONB is a reason for not meeting objectively assessed housing need (i.e. such protected land is a legal constraint against any such development), yet about 65% of all the housing development proposals within the DLP relate to land currently within the Metropolitan Green Belt. No exceptional circumstances have been demonstrated, including as to the removal of Wisley Airfield from the Green Belt.

2. I object to the idea of East Horsley being inset from the Green Belt instead of maintaining its current "washed over" status. This proposal would change the nature of this area of countryside forever. Contrary to the suggestion in the DLP, East Horsley is set in a rural location with the character of a rural village. Over a third of the land within the village boundary is woodland, and the gardens attaching to the majority of the houses are relatively large, making an additional contribution to the openness of the area. Furthermore, the current open spaces provide important habitat for local wildlife that would be lost under the development as proposed. Inset of East Horsley would destroy this character and eventually merge historic and separate villages in the area, such that they would lose their distinctive character and simply add to the urban sprawl that predominates in nearby unprotected areas.

3. The proposal to designate Station Parade as a district centre demonstrates a total misunderstanding of the facilities within the village centre and the nature of the shops and businesses currently here; I object to this proposal as being inappropriate for the area, adversely affecting existing businesses and opening the way for future unsuitable development.

4. I object to the lack of justification for the housing requirements set out in the DLP, which are based upon an undisclosed mathematical model which has been further increased by GBC to result in a population increase set at 70% above the official national estimates for the Borough.

5. I object to the lack of any reflection within the DLP of the different social or affordable housing needs across the Borough; the proposals as they stand, including in relation to East and West Horsley will require affordable housing to be included in developments whether or not such properties are needed to house those locally employed or are otherwise appropriate to those in need of social and affordable housing.

6. I object to the proposals set out regarding infrastructure for the area as being inadequate. Our existing infrastructure is already under strain with no account being taken of this current situation quite aside from dealing with the additional burden the infrastructure would be required to bear under the proposed number of new homes.

7. The proposed developments will add to existing congestion, for example, the proposed development at Wisley will impact negatively on traffic to and through Effingham and Horsley, particularly at peak times. Our narrow and winding roads already regularly block up whenever there is a problem on the A3 and/or M25 and the additional interchange at Burnt Common will simply encourage this. Land proposed for development in both East and West Horsley is subject to flood risk; the Environment Agency has acknowledged the importance of retaining greenfield sites in managing flood risk generally.

8. Users of our Medical Centre regularly have trouble obtaining a prompt appointment due to the number of patients registered, and have trouble parking in order to attend when they do do have an appointment. Our local primary and secondary schools are already full to capacity and with waiting lists; if children are required to travel further afield for their schools their transport adds yet further congestion to already busy roads that were never designed for the weight of traffic they now carry, and the spreading of children into schools across a wide geographical area impacts negatively on their community involvement. These issues will only get worse with an increase in housing numbers locally and the DLP fails to deal either with adequate numbers of school places or these wider implications.

I ask the council to note these objections, and act upon them by rejecting the Draft Local Plan as currently formulated.
I wish to object to the “Local Plan” for the following reasons.

There are no proven “exceptional circumstances” for removing the Horsleys from the Green Belt. The amount of housing proposed is above and beyond local requirements and there is no reasonable proof that any extension of the settlement area is required.

The local infrastructure is already overloaded. No plans on how the problems of Schools, drainage, increased traffic and public transport which would be created by the “Plan” appear to have been addressed. To refer to Station Parade as a “District Centre” is a complete and probably deliberate misreading of the nature of it’s facilities. The roads in and out, the lack of parking and public transport renders any future plans for urban development unreasonable.

The impact of the proposed “village” at Wisley on the surrounding villages would be catastrophic. Commuter traffic would be concentrated on the already chaotic A3 - M25 junction, the inadequate road systems in the surrounding villages and a poorly served public transport system.

To increase housing by the amount proposed would have devastating effects on local villages and their infrastructures, especially West Horsley where a 35 percentage is proposed.

Again as with the last local plan I would urge the Council to reject and rethink what is obviously a developer led project which has nothing to do with the needs of the local population, present or future.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I write as a resident of East Horsley and object to the above on the following grounds:-

The exceptional circumstances required to remove the Horsleys from the Green Belt have not been demonstrated. If Sevenoaks District Council can meet housing requirements without encroaching on the Green Belt why cannot GBC.

Extension of the Settlement areas of the Horsleys will lead to further inappropriate development and could harm wild life habitats.

The magnitude of impact on existing infrastructure which is already overloaded; narrow roads in the village frequently virtually one-way unless you want to lose door mirrors, the parish council and highway authorities show no interest in maintenance of our roads in safe state, width boundaries unattended, road markings or lack of is puzzling, which is
compounded by the inability to control through traffic. The Horsleys are not in a suitable state for the development planned.

Impact on environment. Horsleys at present are a very valuable asset in the Borough's portfolio with an above average input of wealth into the Borough. The disproportionate and over development planned can only destroy the balance of the exceptional and advanced planning of the Horsleys in the 1920's which is the envy of Boroughs throughout the Country. The possible development of the former Wisley airfield site so close to the Horsleys would have an enormous detrimental impact to which I would most strongly object.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Specific Sites in Local Plan

As an East Horsley resident:-

- I am not opposed to development of Site A36 and Site A37. I believe these are supportable development sites.
- I am opposed to development of Site A39 as the site is currently in the Green Belt and in a flood zone area.
- I am opposed to development of Site A38, A40 and A41 as all three currently sit in the Green Belt and will completely swamp West Horsley village.
- I am opposed to development of Site A35, former Wisley airfield. This site is a large area of current Green Belt which provides protected open space near the M25 and is a barrier to outward development from London. Creating this new settlement would cause irrevocable harm to the Green Belt. It would also overwhelm local roads (from a traffic perspective) and local facilities/services (shops, health centre, railway services, schools). The site has no grounds for inclusion in the Local Plan as it was subject to a recent planning application (15/P/00012) which was unanimously rejected by the Planning Committee.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing in reference to the Guildford Borough local plan proposal for West Horsley village and I strongly object. I have outlined below my reasons for objection and would hope these will be carefully and sympathetically considered.

I live at [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] with my partner, five year old son and dog. We have lived in the village for nearly 10 years and specifically chose here for its rural setting, close community, green open spaces, good schools and
efficient rail and road access to London.

My first objection, which is the umbrella under which all my other objections fall, is that the Horsleys should not be taken out of the green belt. The green belt is put in place for a very good reason - to help prevent urban sprawl, protect agricultural activities and the unique character of rural communities. Green belt areas help preserve unique landscapes which offer so many benefits to the urban population and preserve the unique character of smaller historic villages, like Horsley. It prevents them from becoming suburbs of larger urban centres and from merging with neighbouring towns. This access to open space provides not only a number of recreational opportunities but educational too.

The Horsley parishes offer exactly this. Taking us out of the green belt will significantly increase the density of housing, taking away its character and causing overcrowding on all of our village necessities and infrastructure - medical centre, schooling, railway station, post office (which has already decreased from two to one), road quality and functionality. We do not have efficient enough public transport facilities to cope with such a huge increase in population. It will also greatly impact on flooding, which is already a serious problem in the Long Reach, East Lane and The Street areas, to name but a few.

Our son currently attends The Raleigh school, which we chose for its very high achieving yet nurturing qualities. It doesn't have the most impressive outdoor facilities but it is certainly efficient enough and highly successful for a village school. However, it is attended by children from many neighbouring towns and villages which in turn has made its facilities seem inadequate as numbers are expanding. The council, therefore, should put some serious thought into why they've allowed this to happen and how the intend to put a stop to this problem. An expansion of the school would increase traffic having a considerably negative effect on the safety of our children on the roads walking or cycling to school.

Overall the proposal of increasing homes in West Horsley by 35% is ludicrous. It would be a complete re-development of a village, in order to support this surge in residents, would cost a fortune with all the additional infrastructure.

As I mentioned at the beginning of my letter, we chose to live in West Horsley for the quality of life it offers us. The people residing in both West and East Horsley covers a wonderful array of ages and I think this says an awful lot about the benefits and joys of living in an area of natural beauty and a close community.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
protect the Metropolitan Green Belt against inappropriate development" when the draft Local Plan does nothing of the sort. The NPPF requires "exceptional" circumstances for changing the present Green Belt boundaries but there are none to be found in the Local Plan in its present draft to justify the multiple changes proposed to the Green Belt boundaries around the villages.

The draft Plan provides for more new housing than before and would add some 384 new houses to West Horsley over the period of the Plan - an increase in housing of 35% in the one village. West Horsley is a parish in which housing is at a low density and in which there are a number of historic buildings of significant interest. There is no evidence in the Guildford Borough Economic Strategy 2013-31 document to support the location of such a large number of houses in the Horsleys or nearby villages. It is even less comprehensive given that the economic development site proposals are on the other side of the Borough - unless it is intended for commuter occupation, which then throws the spotlight on the lack of proposals for improvement of transport links and supporting infrastructure.

The sites allocated for development within West Horsley are wholly inappropriate for development. Each must be challenged for its adverse impact on the village, whether on economic, social or environmental scale.

I object to the Local Plan proposals for insetting the Horsley's from the Green Belt and the extension of the village boundaries at the same time. Each proposed development site needs to be removed from the Local Plan for reassessment.

Sustainability

Policy S2 in the Local Plan proposes a total of 13800 new houses for the Borough although, of these, only 12698 have been allocated. As stated above, West Horsley has been allocated 384 new houses. In West Horsley there is one small shop near the A246 with very limited parking nearby. It is reported that it may close later this year. There is no Post Office and only a limited bus service. Most of West Horsley therefore relies heavily on East Horsley for shopping and public transport in the form of trains, which means that much traffic relies on East Lane for access to these facilities.

The density of new houses proposed for the four sites in West Horsley is much higher than elsewhere in the village and, given the likely layout, will be wholly out of character with the existing settlement and actually contribute to the irreparable damaging of that character.

They will impose an almost impossible burden on existing services and amenities from school places to medical services, from drainage to sewerage, from parking at the shops and railway station to public transport capacities. The roads in the two Horsley parishes are in large part narrow lanes, which simply do not have the capacity to carry a greatly increased number of vehicles. There is no justification given for imposing a far greater percentage volume of new housing in West Horsley than on other villages in the Borough or within Guildford itself. The main artery running through the village of West Horsley to East Horsley, The Street and East Lane, is already busy such that, at certain times, the junction with Ockham Toad North becomes almost impassable. The developments proposed can only exacerbate these volumes of traffic and increase the times of day when this junction becomes ever more difficult.

It is difficult not to conclude that the Local Plan merely aims in this regard to tick the box marked 'housing numbers' rather than to provide any serious appreciation of actual need or sustainability.

Quite apart from the sites proposed with West Horsley, there is one on the boundary with East Horsley and within that parish for which 100 houses have been allocated. Access appears to be from the Ockham Road just by the railway bridge, which gives rise to visions of impenetrable traffic at what is already a pinch point on that road, all of which will also affect West Horsley in a major way. Equally, the proposal to include in the local Plan the site at the former Wisley Airfield just up the road at Ockham with its proposals for 2068 houses will have, if ever realised, ill have untold knock on effects on sustainability across the Horsleys.

The housing numbers proposed in the Local Plan come from a Strategic Housing Market Assessment generated from a mathematical model devised by consultants the basis of which is not explained in the Plan or supporting documents and apparently has not even been disclosed to the Borough Council either. This housing target has then been increased by the Borough Council to project a population increase 70% higher than the official national estimate for the Borough. This clearly needs further assessment and enquiry as well as explanation and clarity.
West Horsley Parish Council carried its own survey of housing need with Surrey Community Action Housing in 2014 and identified a need for 20 affordable homes for local people who want to stay in the village. There is nothing in the Local Plan which indicates that, if any housing is built in either of the Horsleys in accordance with its proposals, it will be of the kind actually required by the villages.

The recent proposal for the creation of a SANG in Long Reach in West Horsley (not in the Local Plan as such) would hardly compensate for the loss of real amenity and countryside resulting from further development in the immediate area. Managed space in the form of what amounts to an urban park does not replace actual countryside that has been built over.

I object to the lack of provision for sustainability, be it in housing, transport or in other aspects of the current draft of the Local Plan.

**District Centre**

The designation of East Horsley Station Parade as a District Centre, which would open it to wholly inappropriate forms of development for a village centre is a misunderstanding of the nature and scale of Station Parade and its place in East Horsley.

**Transport**

The proposed density of new housing in the parishes of West and East Horsley will impose an almost impossible burden on the present road network, much of which consists of narrow country lanes, and on public transport. Parking at East Horsley station is virtually full now as are the trains at peak times. The bus service is fairly rudimentary. If the proposal for the former Wisley Airfield ever goes ahead there is a prospect of near gridlock on the roads, insufficient parking at the station and at the shops in East Horsley. There is nothing in the Local Plan which proposes any positive development to meet increases in population - only pious wishes. The idea that developers will be expected to propose and secure "travel plans" for each development and contribute to transport arrangements is so weak as to be laughable. We need positive plans to meet any such population increase as part of any development strategy.

I object to the Local Plan in its present form for lack of clear transport proposals.

**School Places**

There is a distinct lack of school places in West Horsley. The Raleigh School is full every year and there is clearly no room for the likely number of children that would require places if the proposed developments come to pass. Even if the school moves site, as has been proposed, this is not going to happen in sufficient time to solve the places problem and in its own way will add to the other problems under discussion - especially road traffic. Howard of Effingham places are limited and, in any event, create transport requirements. Places at the two private schools in The Horsleys are well patronised and all the schools already have their own traffic problems for the villages.

There is no specific provision in the Local Plan for an increase in school places and is deficient in the respect. I object to this lack of policy, which is a necessity if increasing the population in the villages

**Medical Facilities**

The existing practice in East Horsley is almost at capacity. The planned population increase exceeds Government ONS forecasts and the knock on effect across the Borough means that some enlargement of the Royal Surrey Hospital will also soon be necessary. The Infrastructure Development Plan only refers to a possible extension to the medical practice in East Horsley.

This is not joined up thinking in any way and if developments are to be proposed, I object to the lack of policy in this area.

**Drainage**

The size of developments proposed will impose a burden on the current drainage infrastructure. This does not work well now - I understand that there have already been sewerage overflow problem in the Ockham Road North/Green Lane area.
Surface water drainage across the West Horsley Parish is already overloaded when ever there is a heavy downpour and any prolonged rain brings flooding very quickly. More development will create more surface water run off and add to the problems. A serious upgrade across the two villages will be necessary if these developments are to take place.

I understand that Thames Water has already advised Guildford Borough Council that the area's waste water network is unlikely to support the demand anticipated from all the proposed developments. I further understand that the foul drainage system from West Horsley to the treatment works north of Ripley will need to be upgraded to cope. Thames Water requires a 2-3 year lead time to deal with this after it has obtained the necessary planning permissions to do the work.

I object to the lack of any positive proposals in this area of infrastructure. It is not plausible to propose the developments set out in the Local Plan without providing for the requisite improvements to infrastructure.

I object strongly to the draft Local Plan in its current form as it affects the Horsleys for the reasons stated.

Proposed Gargantuan Development of West Horsley (70% plus)

My objections are as follows-

No exceptional circumstances have been demonstrated in order to allow you to take the Horsleys out the Greenbelt.

Extension of boundaries of settlement areas of the Horsleys -no good reasons have been given for these proposed changes which appear to be aimed at increasing land available within the settlements for future excessive development.

All our infrastructure is already on overload, local schools are full, medical facilities seriously stretched. drainage inadequate, car parks and roads already overloaded with next 10 no room for improvement.

Development of 2,000 houses in Ockham would ruin this beautiful area and the impact on the Horsleys of such a massive mixed housing, retail, commercial, travelers and schools development, so close would be enormous.

Doubts about housing numbers -I understand this envisages an increase of 70% higher than the official national estimates for population growth in this borough. This is very worrying.

Wildlife- their habitat is going to be seriously reduced. Bees for example, are falling in numbers and they are vital to human existence.

Trains to London are already overloaded and insufficient in number to take the number of commuters that need the service.

It is vital that we have countryside close to London for the Londoners to visit and enjoy. Given that one in five of us could have mental illness in our lifetimes, green open spaces are vital to us all to give us a sense of peace and tranquility. This was mentioned on a BBC programmer -a certain study group has stated the extreme importance of our green open spaces.
Farming - I believe that our fields will be needed for food in future years, and once built on, will then not usable for such purpose for some time. I say this in connection with climate change and the various disasters around the world which seem to be increasing in frequency. I gather the likelihood is that this trend will continue and we are bound to be affected at some point, however far in the future that might be.

Brownfield sites in Guildford - I gather there are many unused, including several sites on Walnut Tree Close. This is a shame given its proximity to Guildford Station.

This is democracy - Government by the people for the people. Please listen to us.

Now that Brexit has taken place, numbers of immigrants are likely to be reduced and we should be very careful about how much development we allow, in case we end up with an oversupply of housing. We also need to remember this is an island, and not a continent.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to strongly OBJECT to the Proposed Submission Local Plan and frankly struggle to find any difference to the draft Local Plan which was submitted in 2014 and rejected. Based on the following reasons:

• I strongly object to the destruction of the Metropolitaln Green Belt which disqualifies out of hand 65% of the proposed developments in the Local Plan, specifically the Wisley Airfield proposal and housing developments on land behind Ockham Road North near Horsley Station as well as sites in West Horsley

• I object to Paragraph 4.3.13: Proposal that the rural village of East Horsley be inset from the Green Belt and no longer 'washed over'

• I object to Paragraph 4.3.16 and Proposals Map: Settlement Boundary changes in East Horsley which GBC are unnecessarily proposing to expand the settlement area

• I object to Kingston Meadows being removed from the Green Belt. Instead of jeopardizing the community value offered by Kingston Meadows Guildford Borough Council may wish to consider ways to enhance its value by building a community swimming pool providing local youth employment and skills training.

• I object to Local Plan Response 13.06.16 to exclude Effingham Junction Station from Public Transport Interchange status; Effingham Junction station is clearly at an important interchange on the Guildford to London mainline; it is indefensible that it be excluded from Public Transport Interchange status.

• I object to Local Plan Response 13.06.16 6. INFRASTRUCTURE POLICIES: Existing infrastructure in East and West Horsley is inadequate to cope with existing demand and until 150 new school places as well as additional playing fields
are available at the Raleigh School, expansion of the East Horsley Medical Centre is provided and the upgrading of existing drains, roads, pavements and cycle paths is completed any consideration of new development in East and West Horsley should be halted. Relying on developers Section 106 to contribute to infrastructure and make available affordable housing within developments has not been a successful policy in the past. Once planning permission has been given developers have been allowed to get out of their contractual obligations and Guildford Borough Council has failed to monitor and enforce developer obligations.

I sincerely request that GBC review its own policy objectives which are completely out of step with Borough resident feedback rather than force through the Council a Local Plan which clearly does not have the wider support and interest of the residents of East and West Horsley and the larger Guildford Borough.

I am writing to comment on the Guildford Plan which was published on 6 June 2016.

I have lived in West Horsley for the past 12 years.

I object to the Plan for the following reasons

1. You are planning to build too many houses in West Horsley without the necessary infrastructure.
2. We already have inadequate roads in and around the village which are too narrow in many parts, some with deep potholes which do not get repaired and too narrow to allow the larger vehicles to pass one another without reversing to a wider part of the road.
3. Lack of car parking at Horsley and Effingham Junction stations and outside the village shops.
4. Lack of schooling both primary and secondary. All of the local schools are already oversubscribed.
5. The medical centre in Horsley is already struggling to meet the demands of the existing population.
6. There is a lack of public transport with infrequent buses to and from Guildford and Leatherhead.
7. I understand that 65% of the new homes which you propose would be in the Green Belt.

Please accept this email as my objection to Guildford Borough Council's Draft Local Plan. I would like to object to the plan on the following grounds.
1 - Developments around East and West Horsley will mean an increase in traffic that the road system will not be able to deal with. The roads are already in bad condition and regularly flood and increased traffic will make this worse and be dangerous.

2 - Increased traffic around East and West Horsley and because of the Wisley Airfield development will cause increased pollution.

3 - Developments around East and West Horsley will put too much strain on local facilities, for example doctors and school places, there are simply not enough surgeries or schools to cope! Added to this parking at Horsley and Effingham stations is already under a lot of pressure and neither car park will be able to cope with the cars added from new developments in the area.

4 - Taking East and West Horsley out of the green belt will lead to irreversible damage to the local environment and wildlife.

Please take these views and my specific objections on the above points into consideration when deciding about the local plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

My wife and I object to the new Guildford Local Plan for many reasons. Firstly the infrastructure of the Horsleys is already overloaded with full schools, an overstretched Medical Centre, a very limited bus service that only runs on weekdays and increasingly busy roads which sometimes flood.

Removal from the Green Belt destroys local quality of life and opens the doors to future development that could mean we become a suburb of Guildford or Woking. The destruction of the Green Belt is something that the Conservative Party said that they would not do but here they are going back on their promises.

The number of homes proposed will mean a 35% increase in the current housing number of 1,111 and is totally out of proportion with the size of West Horsley. The village has no post office and soon will have no local shop which will place further pressure on shopping and parking facilities in East Horsley.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I recently reviewed the new local develop plan for the Guildford Borough and wanted to write highlighting my objections. The specifics of which relate to a number of fundamental areas, notably:-

**Road Congestion / Traffic**

I object to the number of houses the council are planning to add into the Horsleys, which I feel is disproportionate to the size and capacity that the local roads can accommodate. Approximately 533 new house are to be built (Thatcher’s site, Bell & Covill Garage, Manor Farm site, Ockham road North and East Lane), which means approximately 1,000 new additional cars will be added to the morning and evening rush hour traffic. The traffic, congestion, pollution (noise and air) will have a significant impact on the local villages and will have a significant negative impact on the health and wellbeing of the community, not to mention the condition and costs to maintain the local roads. Similarly this also applies to the increase in traffic that will be using the A3 and M25 at the respective junctions

**Unnecessarily Damaging the Green Belt**
I object to the developments proposed for the Horsley and the Wisely airfield in particular on the basis that it permanently damages the green belt which is irreversible once completed. Despite the fact that the Wisley airfield development was rejected previously, again it appears in the new development plan. I find this unacceptable and is not something I can support.

I also question and object the Borough’s long term strategic intent i.e. in terms of building pockets of 2,000 houses which strongly implies that residents can expect there to be further developments in between sites. This causes an even larger concern with regard to the feasibility of the Borough’s plan. It would appear that destroying the green belt permanently has not been fully reviewed or duly considered by the Borough.

**Lack of Available Resources & Amenities**

I object to the Horsley developments as they are insufficient local resources available to support the addition of 533 new house and on average 1,600 new residents (3 people per household) i.e. insufficient train, doctors, shopping, etc. In fact it was only this morning that Eagle radio news announced that the Borough does not have sufficient schools to meet the current demand of new pupils let alone the addition of new residence.

I would respectfully request that you consider my objections as detailed above and that the Council seriously consider revising the plan accordingly.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** PSLPA16/2958  **Respondent:** 8916545 / Jilian Walton  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

Having reviewed the latest plans by Guildford Borough Council I wish to raise the following concerns over the proposed development in West Horsley and East Horsley.

Firstly I will say, I do believe that there does need to be some small development nearer to the train station and shops for people to downsize but are able still able to retain their independence and remain in the village that they have lived in for many years. There also needs to be some development for the young I believe we do need to have a balanced community. That being said there seems to have been little thought into the following.

**Infrastructure**

- I currently live on Ockham Road North and the properties back onto those of Nightingale Avenue the gardens here are frequently under water, there is a proposal to build properties on some spare land near here, but the only proposal in the plan is for the builders to ensure that the drainage is sorted for the new properties there is no proposal on in the local plan document on how you will deal with the current drainage to ensure the current properties do not suffer from flooding, this needs to be resolved before building commences.
- Currently all the proposed sites are a significant distance from the station, which is the main means of transport for those without cars or those working in London or Guildford. There is no proposal on additional buses or an additional station in West Horsley to deal with peoples transport needs. The car park at Horsley station struggles to cope with current needs and given the distance of the proposed developments from the station there will be a greater demand for parking. You propose to have a shuttle bus from the site at Wisely but this will only serve people there and not deal with the extra demand from additional housing within Horsley.

**Housing and facilities**
With the additional housing there seems to have been no consideration as to additional facilities required i.e. shops, schools, Doctors, these are already overstretched in the area.

There is no evidence in the plan as to why there needs to be such an increase in the local housing needs. The plan also does not support its proposed additional housing needs with the facilities it will require, such as schooling and Medical facilities.

Village character

Such a significant increase in the properties will have an impact on the current character of the village. As will the removal of the greenbelt status and extending the boundaries.

Before extending and removing the Green belt status of any village within Guildford Borough there needs to be consideration on how the brown field sites can be used. Many of the villages have charm and character and it will be a shame to see this lost without firstly identifying the actual needs of each village, its current infrastructure, and its facilities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I am writing to object to Guildford Borough Council's proposed Local Plan as a resident of West Horsley. I am concerned about the impact so many new houses will have on the infrastructure and culture of the village. I also believe that under no circumstances should villages be removed from the Green Belt, there would also be a detrimental effect on the environment as a result. There is no need for so much housing to be built in and around cities such as Guildford, especially when its satellite towns have neither the school places, health systems, amenities and utilities to cope.

The proposals outlined in Guildford Borough's latest Local Plan for development on Green Belt land cannot be permitted to proceed for these reasons.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I strongly object to the inclusion of the Normandy greenfield site(s) and its developer led proposal for the 1000 or so new properties.

Whist progress needs to be made, It is grossly unfair on the village to subject the residents (the people you represent) to the desecration of the villages current character.

As a newer member to the village, I have been overwhelmed by the beautiful - often under rated character of the village.
So do not wish for a developer to lead Guildford down this one way street and ultimately Normandy to become an urban sprawling mass of houses as the planning floodgates are opened.

Schooling

I also object to the placement of a large secondary school in the village, it's extremely out of character for the area, I have a young baby who will eventually go to secondary school. Whereby a train or bus to an existing secondary school is, and will not be an issue for us.

Road System

I also object on the matter that the local road system is already saturated to capacity. I suspect many of the potential purchasers of the new homes will commute, with the likely hood of at least two cars per household. This is likely to subject the current and new residents to major traffic issues. Which the council will need to resolve at their expense rather then the developers (that certainly won't be cheaper then a new school).

The main roads are so narrow that a car generally can't pass a cycle without crossing the centre line on the main routes, which is almost impossible anyway when rush hour traffic ensues.

It is sometimes quicker for me to get to London Waterloo then drive a few miles down the road. Which is to say the least, incredible!

This is only going to be made much worse with more cars on the road and no significant overhaul to the infrastructure (who will pay for that?).

Finally:

These large scale (developer led) housing proposals are not what Guildford needs. I believe Guildford is quite different to other urban towns, and is locally unique due to its greater swathes of Greenbelt land which washes over the area. Why on Earth turn it into another urban mass of houses and destroy its identity forever more.

I am sure with additional effort and collaboration a better solution for all would prevail, not just because a developer is building a free school...

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2549    Respondent: 8917793 / Alan Pickup    Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I have the following specific OBJECTIONS to the New Local Plan:

1. I OBJECT to the proposal to remove East and West Horsley from the Green Belt. The exceptional circumstances needed to justify such a fundamental and adverse change for the Horsleys have not been demonstrated and only Guildford Borough Council's perceived unfulfilled housing needs appear to support the proposal.

2. I OBJECT to the proposal to extend the boundaries of the Settlement areas within East and West Horsley. No sound reasons have been given for the proposed changes which seem to be aimed solely at increasing the land available within the settlements for future additional development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I strongly object to the plan to remove the villages of East and West Horsley, Wisley Airfield and the surrounding villages and areas from the Green Belt. There are no "exceptional circumstances" which justify this action and I oppose the planned big increase in house building and population in the area for the following reasons:

1. The infrastructure is inadequate to cope with the increased population. Existing roads are narrow and many are without pavements. The roads are already congested at rush hours and the station car parks at Horsley and Effingham stations are full on weekdays. The Medical Centre struggles to provide timely appointments and parking there already overflows.

2. The character of the villages would be totally destroyed not only by the planned big increase in population but by the probable development of infrastructure that would be necessary to support it. Bigger roads, parking areas, medical services, schools, shops, etc. would turn the villages into towns.

3. I object to the proposed designation of Horsley's Station Parade as a "District Centre" as it is likely to lead to further urbanisation.

4. Loss of The local green belt area provides great amenity for visitors and the local population for walking, cycling, bird watching, camping and caravanning etc. The Horsley area is close to the North Downs and visitors enjoy the open country and the existing pretty "Lovelace" villages.

5. The local area provides a "green Lung" for London similar to the large London Parks developed by our ancestors. We cannot allow London sprawl to destroy the pretty local villages and lovely open areas that bring joy to so many. What is the point of the well thought out green belt designation if it can be removed so easily?

6. "Brexit" should reduce population growth but if the Government continues to allow uncontrolled population growth it should be sited away from the south east. Brownfield sites within the urban area of Guildford should be the first to be developed if necessary and then areas to the west, away from London sprawl, if absolutely essential.

I trust that the plan to remove the Horsley villages, Wisley Airfield and surrounding areas from the green belt will now be dropped.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the number of proposed new developments in the plan for East and especially West Horsley.

In West Horsley you are proposing an approximate 35% increase in the number of houses which will ruin the village:

- Proposed housing densities are much higher than currently exist and will be completely out of character with the existing village
- Expansion on this scale is not sustainable – the existing infrastructure (schooling, doctors, parking, traffic, public transport, drainage) cannot support it
- West Horsley is a beautiful village, partly in an area of AONB and this development will ruin it and it will therefore cease to attract large numbers of tourists and visitors for walking and cycling etc
- Like many other residents of the village I am opposed to the village being removed from the greenbelt by insetting and extending settlement boundaries. Green belt is there to protect villages like West Horsley. Before we know it, Horsley will be like Walton – just one sprawling line of housing.
- Green belt land should be protected and no exceptional circumstances have been made for developing greenbelt in the Horsleys
- The local schools are already completely over subscribed

I have seen no evidence to support the fact that such a large amount of houses are needed in West Horsley and the Green Belt and Countryside Study which I read seems completely flawed.

Commenting on a specific site which is the plot of land to the south of the A246, bordering the A246 and to the west of Shere Road and also bordering Shere Road – Dandara have an option on this land are our trying to seek approval for housing development. I am against developing this plot for the infrastructure problems (listed above) and because it would be completely wrong as having open space and farm land next to roads is an important aspect of feeling in the country ie that is why this plot is currently Greenbelt.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
Most of all, the character of the village would be changed for ever into that of a town which is not fair on the people who live here and choose to live in a village.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1) I believe taking Horsley out of the green belt is fundamentally wrong and not justified. The 'exceptional circumstances' have not been demonstrated.

2) Infrastructure here is already bursting. It is always difficult to make a doctors appointment, primary and secondary schools are oversubscribed (our local secondary school The Howard of Effingham has just been refused in their planning application to upgrade their pitifully old and inadequate facilities.) Roads and drainage are disgraceful. They cannot withstand any increase in traffic as they cannot meet our current need.

3) The huge number of new housing proposed in the plan would completely change the face of our village. It would be ruinous to destroy a village such as Horsley which has a rich village heritage and is even in the domesday book.

4) I question the validity of the housing numbers themselves. They appear to be vastly inflated and would result in west Horsley (where I live) increasing by up to 35%!

I do hope Guildford council sees sense and rejects the plan in its current state,

We have previously written to object to the proposed development at Ockham but we did not include my objections to the proposed housing developments in East and West Horsley. These villages are currently in the Greenbelt and there is no reason why they should be removed from the Greenbelt. They are small, semi-rural villages and the scale of the proposed developments are inappropriate for this location. There could possibly be an increase of a third in size of current population which would have a negative impact on the local environment and effect the quality of village life. Our local services such as the medical centre, school, train station parking are already stretched. Drainage is a real concern as in recent winters there has been widespread flooding. The rural lanes cannot cope with a further increase in traffic and have previously been damaged by heavy vehicles.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I live at [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] with my husband Tom and our daughter. I am writing to express my very serious concern with the proposal to remove the Horsley villages from the Green belt and to increase the current number of dwellings by 40% over the next 5 years. Changing the village boundaries and stealing space from green belt cannot be reversed. The serious compromise to the beauty of our village, plus the devastation of green spaces belies this flawed plan.

We moved to West Horsley in 2012 in search of beautiful countryside, a community we could raise a family in and a functioning infrastructure. Moving from South London, we were already very familiar with the long waits for doctors appointments and rumoured competitiveness for school places even though this did not trouble us at the time as we didn't have children. We found Horsley unaffected by too many demands on local services, due to lower population density, fewer houses and much less traffic.

The proposal to exit the Horsleys from the green belt and to build on open land I find lacks any considered effort and is an 'easy' option. The demand new houses will put on local schools, the doctors surgery and the village roads is going to seriously compromise what is acceptable for current inhabitants of the Horsleys. It's not safe and is too large a compromise with the current village amenities and resources.

In my opinion we should preserve the greenbelt and green open spaces and reconsider existing urban areas in need of regeneration instead. There is no shortage of existing brownfield sites. This must work in tandem with an improved plan for infrastructure.

For West Horsley I fear the proposal is flawed on the following grounds:

1. The Potential Development Areas (PDA) identified in West Horsley would be at odds with the existing exceptional character and geography of the village.
2. The infrastructure simply can't cope. The extra housing means an increased number of households weighing heavily on the few resources we have in the village. The doctors surgery and the Raleigh school are prime examples of public services already stretched. State secondary school places are also already strained in neighbouring Effingham and Guildford. I before more households move to the new buildings.
3. I fear that higher levels of traffic will make getting around the village a misery. Increased queues at school pick up or drop off time and more cars on the roads in general is a danger to our youngsters. Parking at the station would be impossible, train services would become cramped and bus travel cannot be relied upon as an alternative.

Please consider this objection alongside others you will no doubt have received. My main concerns belie the infrastructure and the green belt. What is done to the green belt cannot be undone. Once this precious land is spoilt, our children can no longer enjoy it, and we will be forced to explain why we squandered this precious natural beauty before we exhausted all other options.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

As a resident of Guildford for over 60 years, I write to object to many aspects of the Draft Local Plan as set out in this letter. Having seen the previous Draft Local Plan published some two years ago, I find it very disappointing that the NEW Local Plan (published on 6th June 2016) fails to take account of the serious defects identified in the previous plan. Indeed what was said about many aspects of the previous Plan. Indeed what was said about many aspects of the previous plan seem not only to have been ignored but the situation has been exacerbated by further unacceptable proposals such as the removal of the green belt protection from areas in East and west horsley and the late inclusion of proposals to develop even more areas such as Garlicks arch at Send (site A43). These are unwarranted attacks on the currently widely supported Green Belt policy.

Turning to the local situation in the Horsleys, I would have thought it would have been abundantly clear that the present local services would be overwhelmed by an increase of some 35% in the current number of properties. Not only would this affect current residents but it would be a source of extreme difficulty and frustration to those 'new' residents 'lured' into the area by these new housing developments, only to find a wholly unsatisfactory situation with regards to services and infrastructure that could easily have been avoided by a more enlightened policy towards additional housing provision. Aside from the lack of adequate services, the infrastructure would be inadequate for housing development on the scale envisaged particularly roads such as East Lane and Ockham Road North. I find it remarkable that the planned development alongside the railway on land behind houses in Ockham Road North (A39) seems to completely fail to recognise the potentially extremely dangerous situation that will arise when vehicular traffic emanating from 100 properties attempts to enter the busy Ockham Road North with Railway Bridge abutments allowing very restricted traffic visibility looking southwards (it is difficult to envisage a more obvious way of creating an accident 'black spot'). The traffic situation in Ockham Road North (a busy road linking the A3 Trunk Road with the A246) already gives cause for concern, particularly with the presence of Glenesk School and associated traffic. It was for these reasons that it was found necessary, a few years ago, to install a 'traffic calming' platform at the junction of East Lane/The Drift with Ockham Road North and why it was decided not to grant Planning Permission for 'Back filling' developments that would have increased traffic entering/leaving Ockham Road North (for further details see Planning Applications 03/P/02143, 02144 and 05/P/01191 etc).

Besides the completely unsatisfactory nature of the proposed development in Ockham Road North (A39) to which I object most strongly (see previous paragraph), the overloading of services and inadequate infrastructure applies equally to Manor Farm (A38), Waterloo Farm (A40) and East Lane (A41). I also object to the proposal to build over 2,000 homes on the site of the former Wisley Airfield (A35) which would be an inappropriate intrusion on the Green Belt and overwhelm local services (including the road network) already functioning at maximum capacity.

In considering the proposals in the Draft Plan it is relevant to examine the basis for this 'perceived' need for more housing and I understand that official population forecasts are available (I assume based on information produced by the Office of National Statistics) but those producing the Local Plan have chosen to ignore these figures in favour those from dubious mathematical modelling produced by a 'Strategic Housing Market Assessment'. The suggested needs relating to the latest Draft Local Plan must be viewed in the light of this apparent overestimate of 70% in the estimated population growth in the Borough. In any event, whatever the level of accommodation planned, I am strongly of the opinion that there is a need...
to preserve the Green Belt and support the 'National Planning Policy' which 'recognises the intrinsic character of the
countryside and supports thriving rural communities within it'. As they stand, the proposals will, in my view, irretrievably
damage the local environment and its undoubted appeal not only to residents but also to tourists for whom it is one of the
prime attractions and destinations in the South East.

I trust that you and the Council Officials concerned will see fit to revise the Draft Plan in the light of these comments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2919  Respondent: 8926561 / Lindy Bomford  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

• I object to the proposal to remove the Horsleys from the Green Belt

The "exceptional circumstances" required before taking this action have not been demonstrated.

• I object to the extension of the boundaries of the Settlement areas of the Horsleys

No sound reasons have been given for the proposed changes, which appear to be aimed solely at increasing the available
land within the settlements for future additional development.

• I object because the infrastructure is already overloaded

Local Schools are full. Medical facilities stretched. Drainage is inadequate, roads and car parks are overloaded with little
or no scope for improvements. Large increases in the volume of traffic will cause an increase in nitrogen dioxide and
particulates in the environment – already a cause for concern in this area.

• I object to Station Parade being designated a “District Centre”

This 'designation' results from a misreading of the nature of the facilities in the village centre and would target the area
inappropriately for future urban developments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/3811  Respondent: 8926689 / Sarah Douglas  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the draft local plan for the following main reasons:

Take away our beautiful villages -The local people love, look after and are proud of our beautiful villages in East and
West Horsley. I volunteer to help lead a local Brownie group and one of the things the parents and children get involved
in is local litter pick-ups, because we care for our environment. The activities and customs in the villages are steeped in
English history and culture, we have formed our own allotment for example for which villagers volunteer hours to grow and share local produce.

These huge developments are being **IMPOSED** on the local people by the borough council and developers. Taking our villages **out of the green belt** with over **40 listed properties**, building on **ancient woodland** and taking away the **beautiful landscapes** I believe **UNETHICAL**. Is this really **acceptable and justified**? Is this what we want to teach our children?

I accept that we need new **AFFORDABLE** housing in Britain, but the Guildford plan proposes a **35% growth in West Horsley alone** and as affordable means up to **80%** of the local average value, that would mean new homes could cost over **£800,000 in the Horsleys**.

**WHY THE HORSELEYS?**

I WANT TO KNOW THAT THERE IS NO BETTER ALTERNATIVE.

I OBJECT TO THE SIZE OF DEVELOPMENT - Even half this proposed number of new houses would **SWAMP** the Horsleys with cars and people. Plans for further shopping facilities do not resolve this amount of extra residents and cars.

CURRENTLY AT PEAK TIMES AND WEEKENDS IT IS DIFFICULT TO GET A PARKING SPACE NEAR THE SHOPS IN EAST HORSLEY.

The Guildford plan would impose an unsupportable burden on drainage, infrastructure, schools, roads, medical facilities, parking, shopping queues and public transport.

**THE NATIONAL PLANNING POLICY FRAMEWORK (NPPF) REQUIRES THAT NEW RESIDENTIAL DEVELOPMENT MUST RESPECT THE CHARACTER AND DENSITY OF HOUSING IN THE AREA AND BE LIMITED IN QUANTITY BY THE AVAILABILITY OF INFRASTRUCTURE AND LOCAL FACILITIES.**

**IS THIS REQUIREMENT BEING MET? THE GUILDFORD PLAN SURELY DOES NOT MEET THIS REQUIREMENT.**

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**Comment ID:** PSLPA16/3879  **Respondent:** 8926913 / Lois Elam  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to submit my objection to the ruination of West Horsley by the obscene extent of development proposed.

The scale of the proposal is out of proportion to the size of West Horsley and seems to be much greater than any other area.

Specific concerns are:

1. Destruction of the green belt which also appears to contradict the Green Belt and the Countryside (Policy P2). The proposed developments are NOT appropriate. The greenbelt MUST be retained. The reasons for its existence still stand.
2. There are NO exceptional circumstances to remove West Horsley from the green belt
3. Given Brexit, the whole plan for housing numbers should be revised down
4. Housing density is not in keeping with the rest of the village
5. There is not sufficient infrastructure to support so many new homes - insufficient bus services, insufficient parking at Horsley station, no capacity at local schools and doctors surgeries. There are huge issues with drainage already in the area. The roads will become over used and unusable. There are no concrete commitments from developers to invest in the level of road and transport networks that would be required to accommodate this level of extra homes.
6. I have not seen any proof that West Horsley needs all these houses. It will turn a lovely semi rural spot into a noisy, congested area and where will it stop? when it finally joins up with Guildford and Woking?
7. NO village should be destroyed in this way - stop trying to turn semi rural areas into urban areas.
8. With the Wisley developers still hoping to get their proposals through, the whole area could be changed beyond recognition and not for the better. It will just become a little London.
9. The proposals are slapdash and seem driven by a vendetta against West Horsley.
10. Stop allowing the developers to dictate what happens to our towns and villages. They will walk away rich and laughing, the rest of us and this country will be poorer in so many ways.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

But not only these factors, because furthermore all main roads in The Horsleys are only ‘lanes’, unlike nearby urban areas like Cobham only 4 miles away in Elmbridge, or Woking about 9 miles away and Merrow and Burpham about 6-8 miles away in Guildford. Also street lighting is very minimal in The Horsleys in comparison to these nearby urban areas and pavements are absent or inadequate on several of the major roads, which as mentioned above are only lanes anyway. The road widening and pavement construction that would be needed to improve the infrastructure to support your development proposals would not only be difficult to achieve because of the existing layout restrictions and would require demolition or significant destruction of existing landmarks, which would be unacceptably detrimental. Also existing facilities in The Horsleys are currently very basic, sufficient to support the existing small communities of the 2 villages but insufficient for the large increase in population that you are proposing with your housebuilding plans. For whilst Horsley is fortunate in having a station, its location in East Horsley is too far to walk to from most of West Horsley, as well as some of East Horsley, and local bus services are very minimal and unlikely to increase because their uptake is sporadic. The larger village of East Horsley has a good parade of shops at Station Parade and a smaller one at Bishopsmead, but in both cases the shops are only of a very local type, so I contest your designation of Station Parade as a District Centre. It is not sufficient to cater for the week’s entire shopping needs or social requirements, with larger shops and supermarkets located several miles away in neighbouring towns (Cobham, Guildford/Burpham, Woking, Leatherhead etc), which most people need to visit several times a week. West Horsley has even less, just 2 or 3 shops. People who currently choose to live in these villages are therefore of an independent nature, who don’t expect or need everything to be on their doorstep and are able, with the current level of infrastructure, to travel several miles outside of the 2 villages to seek the amenities and facilities they need such as big supermarkets, swimming pools or leisure centres, cinemas and other entertainment venues, fashion shops, senior schools, other social facilities etc. Increasing the population of the 2 villages with the numbers of houses you propose to solve a general housing shortage in the Borough isn’t well-thought out in terms of the above factors since it could result in people being drawn into the neighbourhood for a much-needed house without considering that they would then feel very isolated and unhappy stranded in what they might perceive as a quiet and boring environment since the trend today is very much towards town living and being surrounded by good facilities. This not only applies to your proposals for East and West Horsley but very relevantly to your huge proposal for the former Wisley Airfield. Even with your proposals for local shops and a village community centre this cannot replicate the facilities available in a long-established urban area and your proposed Wisley New Town will feel isolated and ‘in the middle of nowhere’. This will impact more on children and young adults but young mothers may be affected too where
they had been used to a bigger support structure around them in a larger community and it is important to bear this in mind because general well-being is a very important issue and boredom amongst teenagers can also have a very negative effect on a community. Non-drivers would be particularly affected since we do not know what public transport improvements your plan would be implementing, but a network of buses would certainly be needed for Wisley. Far better for us to provide housing for people who specifically want to live here because they like rural communities and I am in favour of building houses to cater for people who were brought up here and want to remain near their parents, or for elderly people who need to downsize as well as new people who have done all their research and chosen to live here because it is specifically a lifestyle they want and are happy to live in a small, quiet area with limited facilities and infrastructure compared to an urban area. But not for large numbers of people in bigger developments who will be artificially attracted here. We also need to consider that an increase in road usage in the villages as a result of these proposals is a potential problem not just because of the existing road infrastructure (which is a major aspect) but also environmentally because we are already very congested in this particular section of the A3/M25 where pollution levels are frequently registered as unacceptably high. Increased traffic volumes are potentially hazardous with Ockham Road North and South being particularly narrow yet will have to bear the brunt of this increase, Ockham Road North has had a drainage problem at its section near the approach to the A3 for a few years now, Ockham Road South is very narrow and would need to be widened for safety reasons, usage of Old Lane (particularly from any development on Wisley Airfield) would significantly increase yet it is currently a dangerous road where accidents on the sharp bend at the A3 end are not uncommon and the crossroads at the Black Swan Pub at Hatchford/Ockham is a potential black spot. And as mentioned before, pavements are absent along much of these roads and street lighting is either absent or minimal.

I can’t see that the exceptional circumstances required for these proposals have been demonstrated and there is no good reason to extend the boundaries of the settlement area of The Horsleys. I urge Guildford Borough Council Planning to cancel the proposal to create a 2,000 house development with retail/school/commercial at Wisley Airfield and rethink the usage of the site and significantly reduce the proposals for housebuilding in East and West Horsley to a number that can cope with the limitations of the environment and infrastructure and match demand from people who want to live here for all the right reasons, environmentally and socially, not as a result of a Strategic Housing Market Assessment (SHMA) whose basis for these numbers appears to be unclear and unjustified. It is vital environmentally that East and West Horsley should retain their rural status in the Green Belt. There are plenty of urban areas lying nearby so why destroy the character of these villages or we’ll end up one huge urban sprawl? Please let some rural villages survive in Surrey, particularly these in view of their geographical location between the Surrey Hills and Sites of Special Scientific Interest at Wisley and Ockham Commons.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I feel that the intended additional 593 houses in the Horsley area are a ridiculous increase in relation to the amount of current residential housing. The current infrastructure is already overloaded and I cannot see how current provisions will be able to support such a dramatic increase in housing over the next 5 years. I feel it would be irresponsible to place such additional pressures on the locals schools and medical facilities.

I was under the impression that the green belt only to be overturned in "exceptional circumstances". I feel that these exceptional circumstances need to be outlined clearly to the local community as I do not feel that this has been done. I also feel that the plan has not considered how the increase in population and traffic will affect the Sheepleas nature reserve and site of specific scientific interest. Should the proposed plan be accepted how would these concerns of mine be addressed?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/4236  Respondent: 8927297 / Amanda de Haast  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

There is no need to move the settlement area boundaries of West Horsley as proposed in the insetting of the two parts of the village and there is no case for siting large numbers of new homes in the Horsleys - new business/employment opportunities lie elsewhere in the county. There is no justification for removing West Horsley from Green Belt. and I believe none of its residents want this.

In West Horsley the infrastructure is not capable of accommodating any more homes - there will be no shops (as of the Autumn), the schools (both Private and Public) are full/stretched, the EH Medical Centre struggles to meet appointments. There are serious drainage issues that would need massive large sums of investment to meet, the roads are already overloaded, in third world condition and were never designed/laaidout to cope with the volume we currently experience. There is no capacity for further car parking at either the shops or stations, and an extremely limited bus service. As far as I understand the only housing need we have in West Horsley is for downsizers and affordable for both young and the elderly. To claim that there is a need to increase the Horsleys housing by close to 35% is totally unproven and unsubstantiated. There are enough problems and issues meeting our current infrastructure needs, let alone those required by an increased population.

Throughout the documentation there are numerous generalizations, vague statements and comments of no substance and until each policy can be explained and justified this Local Plan should be rejected.

I object to the Proposed Submission Local Plan at every level.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/4106  Respondent: 8928961 / Sue Reeve  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
The only possible reason I can see for Guildford Borough Council proposing to remove any villages from the Green Belt is to remove any objection for development for Green Belt reasons.

East Horsley, where I live, is known far and wide as the “historic Lovelace Village”, how will removing it from the Green Belt satisfy the NPPF guidelines to “preserve the setting and special character of historic towns and villages.”

West Horsley, our adjoining village, has a wealth of very old houses, one going back to 1380 and many more timber framed buildings similarly old. How can removing West Horsley from the Green Belt be possibly justified?

I strongly object to the insetting boundary defined for the Horsleys

The proposed insetting boundary for both East and West Horsley does not follow the settlement boundary. Instead it encompasses green fields and recreation areas which in time would be ripe for development. This is a travesty. In particular:

- the area identified as site A39 and Kingston Meadow south of the railway line, should not be included in the insetting boundary. Both these sites have excellent defensible boundaries as a large watercourse runs along their eastern boundaries.
- Pennymead Lake and attached recreation ground should be excluded.
- The pastureland at the end of Norrels Drive and adjoining Ridings Wood (a semi-ancient natural woodland with nationally rare hawfinches) should be excluded.
- Site A41, West Horsley: The insetting boundary defined by the draft Local Plan is completely wrong at this point and there is the perfectly good defensible boundary of East Lane to stop these fields being included.

**Sustainability**

I strongly object to the lack of sustainability in the draft Local Plan.

Much weight is given in the NPPF document of addressing the sustainability of any development that will take place.

**East & West Horsley and the surrounding areas**

The draft Local Plan wants to commit East Horsley and West Horsley to at least 533 houses. There has been no provision for additional infrastructure in either village whatsoever.

Schools: There is one local primary school which serves East & West Horsley, The Raleigh School, which is already oversubscribed. 533 houses would create at a minimum, say 200 primary pupils almost half a school’s worth. Where will they be educated? The Howard of Effingham School is the local secondary school which serves the Horsleys, Effingham, Bookham and parts of Fetcham. It is already full. There are no proposals for a secondary school which could accommodate any additional students form the Horsleys.
Doctors – the surgery in East Horsley serves not only East and West Horsley, but East Clandon, Effingham and Ockham and probably Downside. The surgery is already extremely busy. How on earth will it cope with a huge influx of patients – potentially thousands. There are suggestions in the Plan that this will be expanded but not in the short term.

Village parking:

- Station Parade – already well used and no space to expand.
- Station Parking at Horsley and Effingham Junction – already full and no place to expand.
- Medical centre – parking is already inadequate at the surgery.
- Village Hall – generally full and misused by commuters using the trains.

Road systems in East and West Horsley:

The building of 533 houses in the Horsleys will introduce at least 1,000 extra local cars. The draft Local Plan wants to promote walking and cycling as part of its sustainability package. The local roads have been described by John Furey, Head of SCC Highways, as lanes NOT roads. They have evolved from the time before the station was even built in East Horsley and the north/south route through the village is very narrow for the most part and already unsuitable for the weight of traffic it takes. Cyclists will certainly be put off by speeding traffic on these narrow roads – particularly at rush hour. Footpaths, where they exist, are far narrower that statutory guidelines suggest (and no room to widen) and are in poor condition and are difficult for all but the ablest amongst us. They are difficult for mums with buggies or toddlers (too narrow and uneven) and impossible for disabled users. Commuters will only walk in dry weather as flooding and uneven path surfaces make for very wet journeys during and after rainfall.

Drainage:

Drains cannot cope with moderate to heavy rainfall in many parts of Horsley notably along the main pedestrian approaches to the village centre in East Horsley. Flooding occurs locally in several places.

House prices.

The draft Local Plan states: “Pursuing sustainable development requires careful attention to viability and costs in plan-making and decision-taking”. The draft Local Plan states that 40% of the housing should be affordable housing. As I have said before, this is not possible in areas of extremely high property prices. East Horsley regularly appears in the press as one of the most expensive villages in Britain. West Horsley while property prices are slightly lower, is still a very expensive village to live in. I would expect any person looking for affordable housing would not consider a figure £350,000 for a 2 bedroom property affordable.

The only way in which the Guildford Borough Council could address the sustainability of affordable housing would be by developers building houses controlled by housing association or similar ownership and the draft Local Plan should make this plain. Also once given planning permission, for a development which includes low cost housing, the developer should not be allowed to back track and say after the event that it would not be viable for them to build smaller houses – as has happened in the past. Any planning permission granted should make this very clear and only be allowed to go ahead if this ruling is adhered to.

General comments about other proposed development sites
West Horsley

I object to the planned building of at least 385 houses in West Horsley because it is disproportionate to the current size of the village (over 35% increase). It would swamp West Horsley. West Horsley is defined as a large village – this is because it is spread out but has very few amenities. The local primary school (The Raleigh) serves both East & West Horsley and is full already. There are two pubs and one small grocery store which is about to close down. The village is rural in nature. Areas to the north of East Lane have already been more heavily developed.

• A small infill development of affordable homes could be on site A38, but the number of homes proposed for this area is certainly too much.
• A40 A small infill development part of the proposed site between Green Lane and Ockham Road would be acceptable but not the overwhelming numbers proposed. Access onto the B2039 which is narrow and has poor site lines is difficult. The campsite which adjoins this site is popular and a very good asset to the village, especially given the many local tourist attractions. Any development on A40 would have to be sensitive to the ambience of the camping grounds.
• Site A41. This pasture land should not be developed at all. It is part of the rural area in the village, close to very old and historic Grade 2* listed buildings and adjoins ancient woodland.
• Site A37 – I don’t object to a small development on this site but it should be in keeping with the area in which it stands.

POLICIES A37, A38, A40 & A41, located in West Horsley

The LAA identifies six sites in West Horsley for potential development, the four largest having allocation policies within the Proposed Submission Local Plan. The total housing number arising from these six sites is 405 homes in total. For a village which had 1,124 dwellings at the 2011 Census, this represents a proportional increase of 36% over the plan period, an enormously high proportion by any standards.

The four policy sites are all located within the Green Belt. One is a partly brownfield development but the other three sites are all open fields used for agriculture and all lie within the current Green Belt at the edge of the Settlement Area. The reasons presented by the consultants, Pegasus, in the Green Belt & Countryside Study to justify these settlement boundary movements appear to us highly questionable and in no way to meet the requirements of the NPPF that such boundary movements are only to be made in ‘exceptional circumstances’. These movements clearly represent a deliberate pushing back of settlement boundaries in order to provide more greenfield sites for housing development. As such, we consider these proposed movements in settlement boundaries to be invalid.

These proposals are also contrary to the principles of the Metropolitan Green belt. West Horsley represents one of the first ‘lines of defence’ against London urban encroachment outside of the M25 circle. Yet these policies will eliminate a significant part of this defence as they seek to expand the boundaries of this village and fill-in every bit of green space within this rural setting.
It is also totally contrary to the opening statement of Local Plan Policy P2 that “We will continue to protect the Metropolitan Green Belt” It seems that in West and East Horsley at least the draft Local Plan is doing exactly the opposite.

Given the scale of the development proposed in West Horsley, the inevitable destruction of its village character and the impact on infrastructure across West and East Horsley, EHPC OBJECTS to the site allocation policies A37, A38, A40 and A41.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I write to strongly object to a number of policies and sites described in this draft local plan. I list my specific objections below.

Firstly, I must say I found your statements that this latest draft has taken account of the many comments received on the last effort totally disingenuous. From my reading of this draft hardly any comments relating to West Horsley were listened to let alone taken on board. Also, I am aware of the two independent reports on the methodology and modelling of the housing needs assessment and note that both demonstrate that your assessment is well over-stated. The need is for a much lower figure than the SHMA currently states. This means that the basis upon which the Council has developed the draft local plan is fundamentally flawed and therefore unsafe.

Secondly, West Horsley is very rural, picturesque and within the green belt. It has seen some development over the years but this has been done sensitively, in individual or very small amounts thus retaining the character and rural nature of a village. I therefore find your intention to remove West Horsley from the green belt totally unacceptable and OBJECT strongly. The plan to put 35% of the Borough’s housing need in this village which is small (currently 1120 dwellings with a population of 2828) that is served by narrow lanes, frequently floods and has such limited infrastructure that the school and medical centre are already heavily oversubscribed and parking at the train station an impossibility on week days, ridiculous and ill-judged. Reference is also made to housing being affordable. As the definition for “affordable housing” is 80% of average market value in the area, this would translate to circa £750,000 in this village which I strongly suggest is not affordable in the terms envisaged in your plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Having written in September 2014 to object to the original Draft Local Plan, I am deeply concerned about the 2016 Plan which seems virtually unchanged and containing the same flaws. Namely:
- The wholesale removal of rural villages, in particular Ripley, Wisley, Clandon, Send and E & W Horsley, from the Green Belt;
- The monster house building proposals at Wisley, already rejected by the GBC as unsuitable, Burnt Common, Gosden Hill and Blackwell Farm;
- As well as the proposed 385 new homes in my village, West Horsley, which is completely disproportionate to the 1,100 existing homes in the village - an expansion of the size of the village by nearly 40%;
- The evidence for this scale of new housing number, namely 14,000, is just not there; nor is the infrastructure in terms of shops, schools, doctors' surgeries, railways and car parks.

The proposals in this Plan are completely disproportionate and unjustified, and are a disservice to the need for a properly controlled expansion of our housing stock in the UK. I hereby register my objection to the 2016 Draft Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp173/275  Respondent: 8930529 / Marianne Hooley  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - West Horsley North
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I note that the overall housing growth forecast on which the plan is based is now reduced, but it is still stating a growth assumption of nearly 25%. This is far more than that of the Office of National Statistics for Guildford.

The removal of rural villages such as Ripley, Wisley, The Clandons and The Horsleys from the Green Belt still remains.

Whilst the number of new homes proposed for The Horsleys is reduced, it seems to me that 500 new homes for West Horsley is still a large number. Increasing housing by a third more for this village would drastically affect the character of the village and its infrastructure.

The Wisley Airfield proposed development for 2,000 homes is still on the plan. This again would affect the local infrastructure around the area massively.

I therefore register my objection to the Proposed Submission of the Local Plan on the above grounds. I hope that my objections to the plan are properly addressed. The Plan as it stands does a disservice to our local communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/4361  Respondent: 8931105 / Elizabeth Murphy  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to proposals in the above document, specifically:

The proposal to remove the Horsleys from The Green Belt. The Green Belt is central to the essential character of the Horsleys. The exceptional circumstances required by the NPPF have not been demonstrated, necessary to permit such development in the Green Belt. The villages are rural in character, one of the main reasons Surrey is so attractive, and should remain in the Green Belt.
When I looked at the June 2016 draft of the Local plan, I was very disappointed. Very few changes had been made to the earlier draft of the plan in the light of the many hundreds of consultation responses you received including my own. What is the point of local consultation when you are just 'going through the motions' and have - so it appears - fixed views on what the outcome will be?

I maintain my strong objection to removing the villages of East and West Horsley from the Green Belt. As I have said before the existence of the Green Belt has not hampered the development of the villages in the post-war years, and I believe that suitable creative planning policies could be devised to continue this organic development of the village while maintaining appropriate standards consistent with the existing character of the villages.

I therefore object to the Local Plan because of the proposed removal of the villages from the Green Belt.

I reside at [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998]

I have several objections to the Guildford Plan. The following are the most significant;

1. I oppose the unjustified removal of the village from the Green Belt by inserting and extending the 2003 Local Plan Settlement boundaries.
2. The development of 385 homes on the 4 proposed sites will result in much higher densities than exist at present and will be out of character with the existing layout and housing styles.
3. The building proposals will be unsustainable with regard to schooling, roads capacity, shops, drainage, access to healthcare, and car parking in the Horsleys. Insufficient thought has been given to infrastructure problems, in particular, roads, transport and waste water. Car parking is already a problem at the Medical Centre, East Horsley Station, and shops. East Horsley Station car park is normally full on weekdays and the car parks are used not only by residents of the Horsleys but also by people from outlying locations. The proposals are likely to make car parking more difficult if not impossible for local residents.

| If Guildford Borough Planning department was of a mind to develop and plan the development of the borough and region in a meaningful and positive way it would start with planning improvements and expansion of the infra structure. If the planning department was a business it would fail as it has not thought through or planned for the development it is proposing. The way it is going about the plan will lead to the Borough trying to develop without sufficient income to
service the plans. The proposals do not demand that developers contribute meaningful sums to the infrastructure development.

I object to the plan as the housing density proposed is much higher than anywhere in the parishes. The parishes need smaller starter homes so that younger people/our own children can live in the area in low rise properties with gardens.

I object to the proposed plan for its impact on the green belt and in particular on the Surrey Hills ANOB, which abuts and is part of the parishes of East and West Horsley.

I object to the plan as Guildford Borough Council has not demonstrated joined up policies for car parking, access to shopping areas, development of local shopping opportunities rather than their reduction. There has to be access to shops and parking availability to increase footfall. This is necessary while transport locally is geared to the motor car. Busses are like trains they cannot go everywhere so many people will not use them and then they are uneconomic.

I also object to the plan as I am concerned as to where new residents and future generations will work. We are all different and we all enjoy our own space. Myself and my husband chose Horsley as a place to live 20+ years ago and we have been fortunate to be able to bring our family up in a beautiful Green Belt area and have used local schools, clubs, medical etc. It would be such a shame to change the current beautiful village environment. Green space is important for the mind and wellbeing and should be available for us all to enjoy, whether it be living in it or visiting for enjoyment/recreation. Once it’s gone, it’s gone!

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1. Inappropriate Developments outside the present Horsleys settlement boundaries

I object to the proposals for development beyond the present settlement boundaries in East and West Horsley (policies A36, A37, A38, A39, A40, A41) on each of the following grounds:

- It is not demonstrated that any Green Belt development is necessary in the Horsleys, for the reasons set out above.
- The construction of between 533 and 623 new homes within as little as 5 years in the Horsleys (which currently comprise less than 2,700 homes) represents a disproportionate allocation on one local community of the new development burden imposed by the Plan.
- The developments will overload existing primary and secondary schools in the area, as there is no firm provision in the Plan to increase school
- The housing densities proposed on the sites are out of keeping with the existing neighbouring semi rural
- The increased local population will place added strain on local recreation spaces and open country and it is not clear that the half-hearted provision of associated local SANG will in fact discourage new residents from exercising their right to go onto the nearby Thames Basin Heaths Special Protection Area, to the detriment of the rare species it
- It is proposed that around 40% of the housing be affordable The Horsleys are not a suitable location for large settlements of social housing given the lack of local employment opportunities, the poor local public transport, the long walking distances to the closest shops and medical facilities, and the distance to major centres such as Guildford and Leatherhead.
The Horsleys are in a flood area and any large-scale developments will adversely impact on the ability of the land to absorb heavy rainfall. Building on open land in the vicinity will only worsen these problems.

A 30% increase in local housing will overwhelm the Horsley Medical Centre which is already operating at or beyond capacity – it can take 3-4 weeks to get a GP. It is unclear whether sufficient expansion is possible at the site given its proximity to a Designated Open Space (Kingston Meadow) and to the nearby storm drain. Car parking capacity at the Village Hall and Medical Centre is already insufficient to meet demand, and Kingston Avenue is frequently congested by overflow car parking.

Similarly the 30% increase in housing will place unacceptable strain on local public transport – the infrequent bus services to Guildford and Leatherhead, and the train services to Guildford and No increase is possible in car parking at Horsley Station (due to lack of land), in train size (due to platform limits) or in rush hour train frequency (due to capacity constraints at Clapham Junction).

The 30% increase in housing will exacerbate road congestion problems on local roads and particularly the B2039 Ockham Automatic traffic surveys by Surrey County Council on the B2039 regularly report peak hour traffic flows approaching 80% of the peak traffic flow on the main A246 – this on a minor road which in places is too narrow to permit two HGVs to pass safely and is too narrow even to justify its B-road classification according to Department of Transport standards. There is no practical scope to widen the road or provide alternative routes for the significant increases in car traffic and heavy traffic which will result from placing high density housing development on the outskirts of the villages.

None of these developments can therefore be regarded as ‘sustainable’ and they should be withdrawn from the Plan for the reasons given above.

I strongly object to the proposal to add 385 new homes within the parish of West Horsley and further I object to the proposal to build 100 homes in East Horsley close to the railway near to East Horsley Station, but adjacent to parts of West Horsley.

I object to the proposals on the grounds that the villages do not have the infrastructure to service the homes proposed; that is insufficient water, electricity, gas and sewerage. In addition there is no provision for extra school places, at all levels the schools are over subscribed, nor plans to expand medical provision. The current road network is based on roads which remain country lanes, founded in the days of horse and cart, are narrow, without safe pedestrian footpaths and because of the increasing heavy use are even now breaking up.

If Guildford Borough Planning department was of a mind to develop and plan the development of the borough and region in a meaningful and positive way it would start with planning improvements and expansion of the infrastructure. If the planning department was a business it would fail as it has not thought through or planned for the development it is proposing. The way it is going about the plan will lead to the Borough trying to develop without sufficient income to service the plans. The proposals do not demand that developers contribute meaningful sums to the infrastructure development. Crazy!

I object to the plan as the housing density proposed is much higher than anywhere in the parishes and while the parishes do not need more large 4-5 bed houses, but smaller 2-3 , particularly 2 bed maisonettes, and terraced houses so that
younger people can live in the area, with green space between the blocks to maintain the garden feel of the parishes. In
some locations, perhaps near railway embankments 4-5 floored blocks of flats of interesting design could be built.

It is time that Guildford Borough acknowledged that a good part of the housing need could be met by the development of
high rise buildings in the centre of Guildford, such as the railway redevelopment proposals. Other areas are also suitable.
As towns develop into cities their centres go up. Centres of the Guildford suburbs could also rise higher to perhaps 5/6
storeys.

I object to the plan as Guildford Borough Council has not demonstrated joined up policies for car parking, access to
shopping areas, development of local shopping opportunities rather than their reduction. There has to be access to shops
and parking and parking availability to increase footfall. This is necessary while transport locally is geared to the motor
car. Busses are like trains they cannot go everywhere so many people will not use them and then they are uneconomic.

I object to the proposed plan for its impact on the green belt and in particular on the Surrey Hills ANOB, which abuts and
is part of the parishes of East and West Horsley.

I also object to the plan as there is no or little indication of where the new residents will likely find employment to enable
them to live in the new houses planned. The Railways are already at capacity as are the local trunk roads and there is no
surplus parking space at any of the local railway stations. As we are likely to continue to use the motorcar for personal
transport and with buses rather like trains in that they only travel on limited routes the current plans will increase
pollution in the atmosphere and increase Global Warming.

These local plan proposals have not been well thought out and must be rejected.

Detailed comments relating to West Horsley

I approve the removal of Site 41 from the plan but the total of 295 homes proposed for the village is still substantially
excessive. It would destroy the rural nature of the village and overwhelm its infrastructure.

I object in particular to Policy A37. Bell & Colvill already have permission for nine houses on the site of their workshop
and adjacent property; this is reasonable as it is brownfield land and provides homes of a size needed in the village. The
proposal in the plan to expand this onto adjacent Green Belt land and increase the number of homes to 40 is totally
unacceptable. It would involve high density development in a conservation area within 500m of at least five listed
properties. I object most strongly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/1489  Respondent: 8962369 / Barbara Nourhan  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North
West Horsley should be kept within the Green belt for the following reasons:

1. It is within the flood plain of the Hogs back and suffers severe flooding when heavy rain occurs, we hence need to restrain building and allow open green space to absorb the water.
2. The local population has no demand for large houses with developers making profits, sometimes with the promised, often ignored, of providing infrastrcture. The only demand in W.H. is for small houses for Down – Sizing for older people and young village people to live in and not to provide for immigrants from London and who will not be part of village life but work in London and commute daily on the congested and polluted A3 and M25 or over loaded trains.
3. The demand for housing is in London where many properties are empty and owned not for living in but as investment or to provide safe havens for foreigners when life in their own countries becomes difficult. West Horsley is an historic village with ancient woodland many listed buildings, both medieval and more modern heritage
4. Open land is required for agriculture grazing horse riding, rural activities, cycling (W.H. is on the route for the well-known prudential cycle race). Being near the famous RHS Wisley gardens WH continues the Green Lung needed for wild life such as cuckoos swallows barn owls etc.
5. The green belt was instigated to stop urban sprawl which is exactly what is proposed now by GBC in its local plan. The recent referendum shows that people will react in the end when the establishment ignores the wishes of the majority. West Horsley and the surrounding villages say no,no,no to building in the green belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

We have been without internet for three days now: I am reduced to having to Send this 'snailmail'.

I object most strongly to the content of this new local plan. I have lived in the A.O.N.B of West Horsley parish for over 32 years and have special knowledge of the area. I have read the objections of West Horsley Parish Council to the plan, and those of the Horsley countryside preservation society (H.C.P.S) most carefully and fully endorse them. I shall not repeat all their well grounded objections here. West Horsley is an ancient, rural village in London's Green Belt, with two attractive pubs and an ancient network of public rights of way, enjoyed by outsiders, It also has over 40 listed buildings. Most councillors and planners will be completely oblivious to the amenity value of the whole village.

Beatrix Potter, the children's Peter Rabbit author, frequently stayed where I live with her favourite uncle, Sir Henry Roscoe and his wife Lucy Potter. The latter, gave the land to build West Horsley's village (see the plaque there). A huge number of tourists and visitors (and horses and cyclists) pass through this lovelace farming hamlet at 600 up. I often stop them. Nearly always they have come up here from the village itself, the railway stations or the sheepleas. Situated as it is between Horsley Railway station to the east and East Clandon to the west, our village is a vital gateway to the Surrey Hills Area of Outstanding Natural Beauty.

Look at any road map and your will see the largely uninhabited area between the A246 to the north and the A25 to the south: West Horsley leads to it.
This is exactly what the Green Belt is for: for the enjoyment of others. It is not pure Nimbyism which leads to the general outrage with which G.B.C's ignorant proposals have met.

Though now conservative councillors can in all conscience vote against the Green Belt, and in favour of “insetting” is a mystery. It seems to me that the top echelons of GBC are in thrall to developers, land speculators and all while the main body of decent councillors have become mindless sheep. Will GBC be back in Private Eye etc as a rotten borough? I hope not.

Now that West Horsley is to be the site of a prestigious opera house (Grange Park) at West Horsley place- landed even by the Head of S.C.C- surely it is not right to fill up this village with 35% more homes?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• I found little evidence that there are concrete plans to address the capacity of local schools, car parks, medical facilities and other public amenities that the residents of Horsley rely on. The local roads are already in a very poor state in many places as it is.
• The scope of the proposed development at Wisley will impact the traffic (access to/from the A3) and local amenities enormously.
• The rationale behind the number of new homes proposed for West Horsley seems very opaque and ill thought through – it will completely change a rural village into a mini-town.

I do hope that you will listen to people’s concerns and revise the plan again. Many of us accept that new homes are needed but at the expense of changing the face of established communities so utterly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
9. In addition to the houses in West Horsley a further 140 are proposed for East Horsley, 400 at Ripley and over 2000 at Wisley Airport. These will all impact on West Horsley and alter the nature and character of the villages in this beautiful part of Surrey causing congestion ion and pollution.

10. On most of the sites proposed there are many mature trees which contribute greatly to the environment and beautiful aspect of this lovely old established village and many of these would inevitably be filled to the detriment of the GREEN BELT.

I would further like to point out that the Council's claim, in its own newspaper "ABOUT GUILDFORD" Summer 2016, that the plan seeks to give protection to the Green Belt making use of brown field sites first is A SHAM and this relates to WEST HORSLEY AND THE WHOLESALE DESTRUCTION OF ITS GREEN BELT LAND in particular.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Specifically, I am concerned and want to register my objections to the following:

1. **Removal of the villages from Greenbelt status:** The exceptional circumstances required before removing an area from the Green Belt has not be sufficiently demonstrated and the plans go against the recent instruction for areas within the M25 from Sadiq Khan for “no development on Green Belt land to be approved”. In a world were it is widely known that man is having a detrimental impact on the environment, why would we want to exacerbate and further contribute to the downward trend leaving a poorer world for our future generations to inhabit.

2. **Scale of proposed housing:** The inflated number of new houses proposed would give a population increase which is almost 70% higher than the official nation estimates for population growth in the borough. The scale of this increase is alarming - an increase of 35% in existing West Horsley households - greater than any other single area in the borough.

3. I object to the inadequate proposals around infrastructure which accompany the proposed substantial increase in housing in the borough. Specifically,

   1. **Traffic and Parking:** There is the potential for an additional 6000 or more cars within a 3 mile radius of the villages. This will make the already busy, narrow roads and lanes even busier, increasing the chance of accidents with people flying through the village at speed. The stations, shops and medical centre are already at capacity for parking and will not be able to cope with the additional volume. Finally, the very poor condition of our roads, which already cause damage and additional upkeep to our vehicles, will only increase due to volume and use.

   2. **Schools:** Local schools are already at capacity and no extra places are planned as part of the Local Plan development proposals. We live just 1 mile away from The Raleigh School in West Horsley and struggled to get our daughter into the village school due to the already high demand. Where do you propose all the additional children go to school?

   3. **Medical facilities:** The local doctor’s surgery is already at capacity and no extra facilities are planned as part of the Local Plan development proposals. With an increasingly elderly and very young population, sufficient medical facilities are critical.

   4. **Transport:** The commuting trains to London are already full and recent issues across the rail networks will only increase and affect more and more of us as commuter volume of use increases.

OVERALL I STRONGLY OBJECT TO THE PROPOSED SUBMISSION LOCAL PLAN
As a resident in the village of West Horsley, I have carefully reviewed the Proposed Submission Local Plan which Guildford Borough Council has published for public consultation. My comments and objections are set out in this email.

Specifically, I am concerned and want to register my objections to the following:

1. I object to the scale of the proposed house building programme in the area, which is considerably larger than the previous plan proposed back in 2014 and over double that proposed back in 2003. The volume of houses proposed in this Local Plan would transform the character of the borough from mainly rural/Green Belt to urban.

2. I object to the inadequate proposals around infrastructure which accompany the proposed substantial increase in housing in the borough. Specifically,
   1. **Traffic and Parking:** There is the potential for an additional 6000 or more cars within a 3 mile radius of the villages. This will make the already busy, narrow roads and lanes even busier, increasing the chance of accidents with people flying through the village at speed. The stations, shops and medical centre are already at capacity for parking and will not be able to cope with the additional volume. Finally, the very poor condition of our roads, which already cause damage and additional upkeep to our vehicles, will only increase due to volume and use.
   2. **Schools:** Local schools are already at capacity and no extra places are planned as part of the Local Plan development proposals. We live just 1 mile away from The Raleigh School in West Horsley and struggled to get our daughter into the village school due to the already high demand. Where do you propose all the additional children go to school?
   3. **Medical facilities:** The local doctor’s surgery is already at capacity and no extra facilities are planned as part of the Local Plan development proposals. With an increasingly elderly and very young population, sufficient medical facilities are critical.
   4. **Transport:** The commuting trains to London are already full and recent issues across the rail networks will only increase and affect more and more of us as commuter volume of use increases.

3. I object to the Local Plan as it does not consider the impact on the Guildford Green Belt. 65% of new houses planned for the borough are to be built on Green Belt land. This goes against the recent instruction from Sadiq Khan for “no development on Green Belt land to be approved within the M25”. The proposed development programme will be sure to leave no rural communities for generations to come to enjoy and be part of which is criminal.
Yet again I write to express my horror at the Guildford Local Plan 2017 with regards to its effect on East & West Horsley and Ockham. It is utterly stupid to consider the vast quantity of housing you are recommending in your plan which will ruin our lives, yes that is most people's view. Do you not take notice of 300,000 objections to expansion into the Green Belt, which you already have? Clearly little notice is taken of objections and "common sense" has not been used. Please please do give more thought to your proposals. You know that the infrastructure of these areas was not built to take what we already have, let alone what you now propose. It seems pointless to go into detail as one gets the feeling that it not given proper consideration. The long and short of it is that this area is not suitable to take the proposals that you are considering. I and a vast number of people are strongly against it, please do give it more practical and sensible consideration.

I am concerned about the number of houses that are wanting to be built in West Horsley, where I live with my family. I understand that some houses have to be built as it's working progress but not an extra 420! I'm concerned with the extra number of cars which will be on the road and the pollution, the roads aren't made for lots of cars, East Lane is in desperate need of being resurfaced, the turning by Ockham Road.

Where are all the extra children going to go to school? there are no places at the Raleigh and the Howard of Effingham. Drs appointments? The trains are already full, where are all the extra passengers going to go?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

• I object to the proportionally large scale proposed development of West Horsley. An approximate increase of 35% , greater than any other single area within the borough. It would make more sense to increase the population in less sensitive urbanised areas where the infrastructure, especially transport and employment are to be found and brownfield sites can be used.
• You are incorrect to split West Horsley in two – it is one village with a separate character to that of East Horsley.
• The facilities in the village (West Horsley), such as they exist, (one shop, no Post Office, a very limited bus service, an oversubscribed primary school) cannot support a high number of new homes.
• East Horsley cannot be described as Rural District Centre on the basis that it has a ‘large supermarket’. Budgens is treated as a small shop or convenience store ( less than 280m2) under the terms of the Sunday Trading Act 1994. Did the consultants visit the place?

**Green Belt**

I am appalled at the proposal to remove land from the Green Belt. This is against policy. The conservatives stood at the last election on a green belt protection pledge.

The manifesto says: “ - ensure local people have more control over planning and protect the Green Belt” That says it all.

There is no valid exceptional circumstance to make removing land from the green belt acceptable.

**Infrastructure**

- Our **roads** could not cope with an increase of so many extra cars due to so many new houses.

- Our amenities are for a small village. **Parking** at the shops would become a nightmare?

- Our **Railway Station** would not cope with such an increase in parking requirement.

- Our **Medical centre** is barely large enough to deal with the current population.

- Our **bus service** is already very poor.

**Flooding**

I believe there is plan to build on the area which suffers from flooding. The roads in this area already flood easily. **Building here can only make matters worse.**

**Schools**

The **Raleigh School is too small** for such a population increase. I believe there is a plan to move the school to another site. I believe this is also a flawed plan. If anything, the Raleigh should stay where it is and a plan is required to build another school if required.

The loss of Green belt is NOT ACCEPTABLE.

I am not in favour of the draft Local plan

General Observations about West Horsley

• There is a lack of state primary school places in the village, so if particularly social housing were built, where would these children attend school?

• Secondary school places are limited, we were under threat of our child attending the Bishop David Brown rather than the Howard when he was 11!

• Cranmore and Glensesk parking and traffic cause many traffic problems at various times of the day and on certain evening and weekend open days and events without more children attending.

• The Medical Centre in East Horsley serves both East & West Horsley and as a working couple we have extreme difficulty in getting an appointment to see any doctor early or late in the day, let alone our own GP. How would this cope with some 385 extra households in West Horsley let alone those planned for East Horsley?

• There is virtually no public transport through the village – from our property it’s a good half mile walk to the nearest bus stop along an unlit road, this would apply to the site earmarked for 120 homes near the Ockham Road North.

• The bus service to Guildford stops only at Bell & Colville roundabout so is pretty inaccessible to most villagers.

• There is limited parking at East Horsley station for those wishing to commute.

• Most households would have 2, if not 3, cars which would put an intolerable strain on the roads.

• Drainage – this is poor in the area, anyone walking along Ockham Road North on a rainy day will know the footpaths are puddle ridden and heaven help you when a car passes.

• As previously mentioned, the manhole covers lift in wet weather – in Green Lane we have had raw sewage spill over the road in inclement weather presenting a health risk. If the 114 extra houses off Green Lane/Ockham Road North were built this would be much worse.

• We have few facilities within West Horsley, with just a couple of shops and very little parking.

• West Horsley residents need to use East Horsley’s facilities e.g. shops, library, doctors and there is limited parking there too.

• The additional housing would no doubt bring with it a huge amount of extra traffic and currently the roads in the village are already ptholet bound in many places, with no sign of repairs being made.

All in all, this is an unsatisfactory plan for the village and representation should be made to keep East & West Horsley firmly in the Green Belt and resist this excessive housing plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
1. **OBJECT** to the proposal to inset East Horsley from the Green Belt. The proposal to inset East Horsley from the Green Belt will be detrimental to the rural character of the village and should be dropped. The specific changes proposed are not justified under the National Planning Policy Framework rules. The local infrastructure is also already overloaded and will not be able to cope with the large number of new houses proposed.

2. I strongly oppose and **OBJECT** to the proposal to remove Fangate Manor from the Green Belt and include it within the Settlement Boundary. There are no exceptional Planning circumstances to justify removing Fangate Manor from the Green Belt, and changing the Settlement Boundary does not in any way enhance the defensible nature of the Settlement Boundary. It merely involves moving the boundary from one hedgerow to another, but leads to the loss of Green Belt and agricultural land.

**Re: Objections to new Guildford Local Plan**

We have lived in West Horsley for over 25 years and write to object to the new Guildford Local Plan as follows:

1. The exceptional circumstances required to remove the Horsleys from the Green Belt have not been demonstrated.

1. Our infrastructure is already overloaded with too many cars on our roads, stretched medical facilities etc.

1. In particular, the Ramada (Thatchers) Hotel development will rob the villages of much needed hotel beds and destroy an important building which has long been an important part of the character of the Horsleys.

1. It appears that the Bell & Colville development at least maintains the garage building, another important local icon which must be protected. However, the traffic around the Bell & Colville roundabout is particularly bad with long queues and the addition of a further 40 homes and 40+ cars accessing the road at that point will make a bad situation worse and should, therefore, be rejected.

1. As we understand it a company called Dandara are lobbying to have the fields to the south of Epsom Road reinserted for development. We should be strongly opposed to such a move which would represent a dangerous incursion of additional development into an area where it is critical for further major building to be avoided if the Horsleys are to maintain any semblance of rural character and the Surrey Hills are to be protected.

As a resident of West Horsley I would like to object to the Local Plan 2016. My reasons are listed below:

**HOUSING**

I note that the Horsley’s have various sites marked for new housing totalling approximately 533 in number. Can anybody tell me why the Horsley’s, especially West Horsley, has been unfairly targeted for development? I understand that 40% of these homes have to be affordable. I would like to ask the question — what price is affordable in the Horsley’s when most of the homes in the village are in excess of national average figures? Developers are loathe to build affordable housing as their profit margin is low. The need for all of these affordable homes is not proven. The West Horsley Parish Council and Surrey Community Action Housing Survey in May 2014 identified a need for only 20 affordable homes within the village. It prompts me to ask how the figures for new housing are reached!

It would be a better alternative to build **small** new developments with a slightly different mix of houses on brown field land.

The proposed Wisley airfield development of in excess of 2000 homes would add to the sprawl and I anticipate a conservative estimate of 5000 to 6000 residents moving onto this site, flooding the roads. How is the entire infrastructure of the villages going to be able to cope with such large numbers?

The National Planning Policy Framework requires that new residential development **MUST** respect the character and density of housing in the area and be limited in quantity by the availability of infrastructure and local facilities.

The same policy states that “As with Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in **very special circumstances**.”

This leads me on to the

**INFRASTRUCTURE**

Our village is made up of mainly narrow country lanes not suitable for the number of cars that would be on the roads if all of the new building was to go ahead. The roads are not suitable for major traffic and are often flooded. Thames Water has advised Guildford Borough Council that it may not be able to support the demand for all of these developments and that the foul drainage system works would need to be upgraded in order to cope. Could someone please let me know if the developers are going to pay towards this cost or are we as Guildford council tax payers having to pay for something that very few of us want or need.

The local schools are full; traffic levels at certain times of the day are excessive. At school times the Raleigh school causes major congestion and parking problems and is an “accident waiting to happen.”

The only Doctors’ surgery in Horsley is full and the small local shops not easily accessible due to the limited parking. Transport links within the village are poor, buses commencing at 9am and running every hour. New houses would mean hundreds of additional cars using the lanes to access the M25 and A3. Has anyone looked at junction 10 on the M25 not just at peak times but also during the day? The roads are at a standstill and cannot cope with more traffic especially if the Wisley Airfield were to be developed with 2100 houses. Horsley railway station car park is normally full and as there is very little employment within the area, it is quite clear to see that most people need to travel by car or rail as the bus service is not suitable.

**GREEN BELT**

In setting of the villages would create an urban sprawl of housing and would be an extension of Guildford/Leatherhead. The villages would be “no more” but become large towns. The Green Belt is precious, should be protected and villages not inset. To remove most of the Borough’s Villages from the Green Belt would change the nature of this area of countryside forever and would eventually merge historic and separate villages. It would be an environmental outrage.

The Green Belt preserves air quality, prevents flooding and is a joy to those that live in large towns and thus should be for us to conserve and protect it.
The residents of West Horsley are opposed to the village’s removal from the Green Belt by insetting and extending the 2003 Local Plan Settlement Area boundaries. There are no exceptional circumstances for building on the Green Belt as the Guildford Borough Economic Strategy 2013-2031 states that “there is no case for large numbers of homes in West or East Horsley or neighbouring villages.”

There is brownfield land available in the town centre which is being earmarked for commercial development rather than for housing. This is enough to meet our real needs for affordable local homes. There are enough vacant commercial sites to cope with genuine business need, and we have enough retail capacity already, so urban brownfield/derelict land should be used for housing.

For all of these reasons I must once again state that I object to the Local Plan 2016.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPA16/4211  Respondent: 9066625 / Kate Palmer  Agent: 

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to oppose the above plan and what it means for the Horsleys.

As a resident of West Horsley I am horrified at the thought of building another 385 houses. We moved here because it was in the green belt, we moved here because of the beautiful countryside, a wonderful place to raise our children. To build a further 385 houses will completely change this village, making it a very different place to that of when we moved here. It will lose its wonderful community feel, a huge reason why we want live here.

My understanding is that there needs to be 'exceptional circumstances' to take us out of the green belt. Everyone in the village is wondering what these are? To my knowledge none have been communicated. This opens up our village to any number of problems with developers ruining our countryside, taking away such beautiful countryside enjoyed by so many in the village and outside of it.

If these plans did get through, surely there would have to be further plans to support this many houses, increasing further building. Our school is one example, the village already suffers with waiting lists for the Raleigh school. My family personally suffered when our son could not get into the school for two years, we live just over a mile away and were forced to use a school out of the village. Building these houses will have a huge impact on the school and local children will suffer. Building another school will not help, it's just more building and more houses on the original sight!

The medical centre is already stretched. Roads will hugely suffer.

Building these houses will be devastating to myself and my family. It is wrong for the Horsleys to be removed from the Green belt.

Furthermore, the development of over 2000 houses in Ockham will also put a huge strain on our village

I know you will have received so many emails repeating what I have said. I am sure many can quote all the facts and figures in a better way than myself. What is important is that almost everyone in this village is against this plan proposing such an alarming increase in housing

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
This is a proposal that will have a hugely significant effect on West Horsley and I strongly object for the following reasons:

This village is no longer a quiet rural backwater. There are heavy volumes of traffic and the existing roads are badly maintained and can barely cope. A 35% increase in the existing number of houses will obviously lead to significant further difficulties.

The general infrastructure is now stretched to capacity. The medical centre can barely cope, the railway carpark is full at peak times.

There is no additional capacity at the Raleigh school nor any of the other local state schools.

 Guildford Borough Council must stand up to Central Government and reject this plan otherwise West Horsley will be irreparably damaged.

Enough serious damage has already been caused by infills and the construction of dwellings which are entirely unsympathetic to their surroundings. An outstanding example of this is the vulgar monstrosity constructed recently behind Charles Cottage in Silkmore Lane.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
In addition to the tragedy that would the the removal of the Horsleys from the Green Belt, the following is also true:

- an increase of housing by 385 homes is totally out of any sensible proportion.

- schools and station car park (and even the village centre car parks) at at maximum capacity now and a big increase in houses will cause huge problems in these areas.

- the proposed sites in the villages are a much higher density than the village is now, and therefore not in keeping with the village feel.

That said, I understand some level of development is necessary and I have made suggestions in my previous letter. 40 houses maybe, not 400!

Please focus on opportunities to develop in and around the towns and keep our borough villages great and green! Any other approach would be a disgrace.

I object to the building of new houses proposed in West and East Horsley (and the Wisley airfield for that matter) on the following grounds.

1. our daughter is 9th on the waiting list for our nearest Horsley school (The Raleigh). How much worse will it get?
2. I often cannot park at Horsley station. How much worse will it get? This is a commuter belt. You will make it impossible for people to live and work here.
3. We moved to the area for green fields, amenity space and fresh air. We chose not to live in Suburbia. You are proposing to allow the beginnings of urban sprawl.
4. As a Geography graduate, who studied Ebenezer Howard's 'Garden cities of Tomorrow' I am a real believer in Green Belt's as a mechanism for preventing the aforementioned urban sprawl, which allows amenity for city dwellers, (London) as much as for those who live in the villages and settlements within the green belt. Just because Govt allows building in the Green Belt, does not mean councils should be so short-sighted. The green belt helps sustain the AONB of the Surrey Hills in this area.
5. There are more appropriate sites, which are closer to towns, or more built-up and would be less radically affected by building works.
6. Traffic along the busy roads of the Street, Ockham Road N and S, and the roads through Clandon would increase - they are already fast and over-congested given the number of properties which are directly accessed from them - and the number of cyclists who choose this area for their sport.

7. There is a need for affordable housing. The houses in the Horsley's, on the open market, would soon not be affordable. This is a wealthy area and inappropriate to meet that need.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I write to register my objections to the above.

1. I wish to object to West Horsley being removed from the Green Belt as it is and ANOB and part of the Surrey Hills.

1. I would like it noted that in Policy P2 it states "We will continue to protect the Metropolitan Green Belt against inappropriate development". I believe that the proposals are inappropriate development.

1. As a former resident of Northcote Crescent, West Horsley and a victim of sewage flooding I am well aware of the failings in the local drainage system and to my knowledge none or very little has been done to improve this. As such there is no capability to take more waste away from any new development in the area.

1. Also living by The Raleigh School I know that there is no more capacity to expand on the current site to accept a bigger intake.

1. Transports links are very limited and as many roads merge into one lane in East and West Horsley at some point they would be unsuitable to take more cars let alone more buses.

1. Few roads have pavements so for those walking safety would be compromised by more vehicles on single lane local roads.

1. Our local shop is closing, one of the reasons being the lack of parking for customers and no prospect of increasing parking, another of our essential facilities gone, along with our local Post Office in West Horsley.

1. Long waiting times at Horsley Medical Centre, these would only increase with a larger patient list. It would also effect to those needing the Royal Surrey Hospital and other medical services as waiting times would therefore be longer as more people living in the areas.

1. I do not believe that so many houses are needed and believe that a limited amount of affordable homes may be required for the young and elderly of West Horsley. A conclusion made by The West Horsley Parish Council and Surrey Community Action Housing Survey: May 2014.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/3475  Respondent: 9096129 / Jane Wilkes  Agent:
I am writing to object to the new Guildford Local Plan currently out for consultation. My objection relates to the plans in respect of East and West Horsley and is as follows:

- I do not believe that there are any exceptional circumstances which would warrant removing these 2 villages from the Green Belt;
- I do not believe that the village boundaries should be enlarged; and
- I am strongly opposed to the proposed 500+ new homes as the existing infrastructure is already overloaded and will not be able to cope with the additional demands that would arise eg schools, transport, doctor's surgery etc and furthermore this number of new homes is such a significant increase on the existing number that the character of the village would inevitably change for the worse.

I therefore strongly object to the proposals for West and East Horsley contained within the Proposed Submission Local Plan: Strategies and Sites June 2016.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT

To the influx of thousands more families with school age children, when our local junior school, The Raleigh, is full and they want to move to a larger site now! If they took one of your sites and you took over their 2 sites, at least the planners would have a few hundred more houses and the school would be able to accommodate more new children, but only a few! Not the hundreds you propose to bring into our little villages.

We are villages, people want to move here, as we did because of the quiet, the fields, the village atmosphere, and the safety of a village.

I OBJECT

there is no infrastructure which has been confirmed.

The flood plans in these areas get flooded every winter. West Horsley is known for being a flood plain area, totally unsuitable for hundreds more houses.

Thames Water has advised that the current wastewater network is unlikely to support the demand from all these developments!

I OBJECT
To the overcrowding at our shops, we have two little parades of shops for the use of the two villages, not thousands more people using them. There is only limited parking, only one little supermarket, Budgens, and no access to any larger supermarket.

The train does not take us into Cobham centre, only Stoke D'Abernen, miles away from the Cobham town Centre, how do all these new people get to ships?

We have no bus which has a regular timetable to Cobham, our nearest town, there would have to be in place public transport regularly into Cobham and Guildford.

I OBJECT

To the state of our roads when thousands more people will be using them. The Drift, which is a narrow lane from West Horsley to Effingham, is already used by lorries, coaches from the schools, and many local businesses, it is full of potholes from constant use, how is that going to cope?

All our roads are narrow, we are a village, the drainage is already a problem through the village every winter.

BROWNFIELD ARE BEING IGNORED

We need more houses in the centre of towns, not out in our villages, therefore using more cars, more pollution, more congestion on our already crowded roads.

Recycle derelict and urban land.

I OBJECT

to the proposed planning of hundreds of houses in the West Horsley and East Horsley villages.

I wish to register objections to the local plan job 13,860 new proposed houses, as not sustainable.

There will be damage to local communities, these will not be villages any more.

We need to check unrestricted sprawl of large buildup areas, We need to protect our Green Belt land and fields.

We live here because it is a village and surrounded by green fields and farmland.

We like the village atmosphere, knowing our neighbours and meeting them in our villages, being part of a small community.

I OBJECT

To the huge influx of traffic this planning will cause.

Our little country roads cannot cope with the traffic as it is. The condition of our local roads is Appalling! Pot holes everywhere, causing dangerous driving, trying to avoid the holes, damaging cars.

We have narrow country roads, not suitable for hundreds more ‘large family cars’.

We don’t want yellow/white lines all over our village and road signs, which are quite unnecessary, which will only increase with your planning proposals.

I OBJECT

To the lack of facilities suitable for thousands more people using our Doctors Surgery.
We cannot get an appointment within a week as it is, there is nowhere to expand the Surgery, are you planning to build another?

The local hospital The Royal Surrey is overcrowded already, there is nowhere else for us in our villages for go.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

As a lifelong resident of West Horsley having been born and educated in the area, I wish to register my personal objection to the Proposed Submission Local Plan: Strategies and Sites June 2016.

The proposal is for far too many homes for a village that is already at the limits of a sustainable infrastructure. The schools in West Horsley were full when I went there some years ago with road access for cars being difficult and public transport being inadequate.

The possibility that part of West Horsley could be removed from the Green Belt by using the now known to be incorrect Green Belt and Countryside Study is wholly inappropriate and I object to this as being totally unnecessary.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy A41/Policy A40/Policy A38 and Policy A37

The Local Plan has suggested a 35% increase in housing for West Horsley by 2022 and only 11% for Guildford Town. Why is this? The village has no shops, no post office, no petrol station, no train station, no medical centre and a very limited bus service. It also offers no employment opportunities for residents. The National Planning Policy Framework requires that new residential development must be limited in quantity by the availability of infrastructure and local facilities – this policy has been ignored in the Local Plan.

The density of houses on the proposed sites is completely out of keeping with the rest of the village and will change the character of the village forever. The National Planning Policy Framework requires that new residential development must respect the character and density of housing in the area – this policy has been ignored in the Local Plan.

Removing West Horsley from the Green Belt

What is the exceptional circumstance for removing the village from the green belt as required under government guidelines? It cannot be justified on the basis of unfulfilled housing. There is no explanation as to why West Horsley has been chosen to be removed and no justification for doing so. The Local Plan states the “we will continue to protect the
Metropolitan Green Belt”yet the Local Plan is taking West Horsley out of the Green Belt. West Horsley is a distinctive rural village and its green belt status is essential to ensuring the character of the village remains.

Please take my objections seriously and reconsider your plans for West Horsley.

Guildford Borough Council – Proposed Submission Local Plan

As a long time resident of West Horsley and earlier of Ockham, I write to Object to the proposals set out in the above proposed local plan as they affect The Horsleys, Ripley, Send and Ockham.

I strongly object to the proposed removal of West and East Horsley from the green belt. The villages are well into the green Belt, are not adjacent to any non green belt urban areas and it would be incongruous to have Areas of Outstanding Natural Beauty (AONB) within or adjacent to urban areas.

I strongly object to the proposal to add 385 new homes within the parish of West Horsley and further I object to the proposal to build 100 homes in East Horsley close to the railway near to East Horsley Station, but adjacent to parts of West Horsley.

I object to the proposals on the grounds that the villages do not have the infrastructure to service the homes proposed; that is insufficient water, electricity, gas and sewerage. In addition there is no provision for extra school places, at all levels the schools are over subscribed, nor plans to expand medical provision. The current road network is based on roads which remain country lanes, founded in the days of horse and cart, are narrow, without safe pedestrian footpaths and because of the increasing heavy use are even now breaking up.

If Guildford Borough Planning department was of a mind to develop and plan the development of the borough and region in a meaningful and positive way it would start with planning improvements and expansion of the infra structure. If the planning department was a business it would fail as it has not thought through or planned for the development it is proposing. The way it is going about the plan will lead to the Borough trying to develop without sufficient income to service the plans. The proposals do not demand that developers contribute meaningful sums to the infrastructure development. Crazy!

I object to the plan as the housing density proposed is much higher than anywhere in the parishes and while the parishes do not need more large 4-5 bed houses, but smaller 2-3 , particularly 2 bed maisonneutes, and terraced houses so that younger people can live in the area, with green space between the blocks to maintain the garden feel of the parishes. In some locations, perhaps near railway embankments 4-5 floored blocks of flats of interesting design could be built.

It is time that Guildford Borough acknowledged that a good part of the housing need could be met by the development of high rise buildings in the centre of Guildford, such as the railway redevelopment proposals. Other areas are also suitable. As towns develop into cities their centres go up. Centres of the Guildford suburbs could also rise higher to perhaps 5/6 storeys.

I object to the plan as Guildford Borough Council has not demonstrated joined up policies for car parking, access to shopping areas, development of local shopping opportunities rather than their reduction. There has to be access to shops
I object to the proposed plan for its impact on the green belt and in particular on the Surrey Hills ANOB, which abuts and is part of the parishes of East and West Horsley.

I also object to the plan as there is no or little indication of where the new residents will likely find employment to enable them to live in the new houses planned. The Railways are already at capacity as are the local trunk roads and there is no surplus parking space at any of the local railway stations. As we are likely to continue to use the motorcar for personal transport and with buses rather like trains in that they only travel on limited routes the current plans will increase pollution in the atmosphere and increase Global Warming.

These local plan proposals have not been well thought out and must be rejected.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
local Primary School and there are annual arguments over catchment areas between the local villages just to get children into the nearest Secondary Schools. The proposals do not address these problems adequately they would just make them worse and mean parents would have to drive their children to schools many miles away. What about hospital and Dr surgery?

The increase in housing will also strain the services infrastructure, local sewage and drainage requirements are overloaded as can be seen after a heavy downpour water floods over Ripley Lane and The Street between the Railway Bridge and Long Reach due to many natural springs in the area. Localised flooding will of course be compounded by the proposed new homes the plans take no account of this.

A couple of years ago heavy construction lorries were employed at Jury Farm for a couple of months in Ripley Lane and the Road was structurally damaged as a consequence and has still not been satisfactorily repaired. Building in the local area on the scale proposed will never be made good by the construction companies lining up to build on nice Green Field Sites.

I note that in the latest version of the local plan that the Station Parade in East Horsley has been designated a District Centre which is incorrectly identifying the village facilities in order to justify inappropriate development of the area.

I urge the Council to-

a) Think again on a local scale and consider what is actually needed by the people living in the borough.

b) Go back to Central Government and seriously question the whole premise of this notional housing requirement. Do we really need so many houses in such a small area? when it will only compound the pressure on local facilities and have a major negative impact on the local environment, adversely affecting the quality of life of all those currently living around Guildford

I am sure that there is plenty of room for new housing and properties that could be refurbished in other parts of the country, without the impact to sensitive environmental and designated Green Belt or conservation areas where effort should be put to regenerate both jobs and industry supported by investment in affordable housing.

I really hope you take us serious and try to find a solution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I believe that the Government's housing pressures do not justify reducing the Green Belt any further and certainly not to the extent contemplated by the Local Plan especially in West Horsley. It's not just a question of allowing new houses on greenfield land but also whether the local infrastructure and amenities would be able to cope without destroying the whole character of the villages concerned. Once an area has been changed for the worse by erosion of the Green Belt it can't be changed back.

Surely there must be other areas outside the Green Belt that can be used to satisfy the Government's housing needs without burdening the local villages and their infrastructure. Shouldn't the Council be prioritizing the protection of the Green Belt and the interests of the existing residents who want it maintained?

*The local roads will simply not be able to cope with the increased traffic especially in the rush hours when there are already considerable traffic jams caused by commuters and parents taking their children to and from school. Ockham Road North and South and The Street/ East Lane would be totally inadequate to deal with the extra traffic.

* The car parking at Horsley Station and in the main shopping parade in East Horsley (that also serves West Horsley and Ockham) is barely adequate for the existing residents and could not cope with additional cars thus resulting in parking chaos.

*The Horsley Health Centre is already under considerable strain.

  - Where would all these new residents work? There are not enough job opportunities locally. Therefore, most of them would be using the A3 or Horsley Station. The A3 is already a nightmare in the rush hours and as mentioned there would be no parking available at the Station even if they could get through the traffic jams to get there. I am talking about an appalling congestion situation here.

  - Where would all the additional children go to school? At present there is less than adequate provision of school places for the local children who are in competition with children from outside the area for the places available. We need extra provision at all levels of the children's education, nursery, infant, junior and senior schools not just an extension of the Howard of Effingham school which caters for senior pupils only.

*The water and sewage drains are already in a poor state and would not be able to cope with the additional demands on them.

*Housing needs in this area have not yet been proven and certainly not to the extent to warrant a major intrusion of this scale on the Green Belt.

*I must also mention the proposed Wisley Airfield Development. Most of those residents will also use the A3 or Horsley or Effingham stations causing further congestion, air pollution and damage to the environment.

In conclusion I am appalled that the Council should even be considering a major increase of the population levels in villages like West Horsley, Bookham, Ockham and Effingham and the development of Wisley Airfield which alone will have a tremendous knock on effect on these villages particularly Ockham and East and West Horsley.

I have reviewed the sites and development that have been identified in the Horsleys and have serious concerns over the following impacts that will be had on the two villages:

1. The area is greenbelt land (and adjacent if not within the Surrey Hills AONB), where it is required that “exceptional circumstances” should be the only reason that would allow this development to take place. No evidence has been provided of how “exceptional circumstances” have been met and it is difficult to see how this is the case. A nature area of great natural beauty will be taken away forever with these new large developments going ahead.

1. Plenty of opportunities exist elsewhere within the commuter belt (and inside the M25) where housing needs can be met with far less impact on an area of such natural beauty. These areas ad sites should be used prior to ruining the countryside in the UK which is constantly being put under threat before more appropriate sites are considered.

1. The development would ruin the nature of this AONB and green belt. It would be forever changed. Local flora and fauna, which are already so greatly under threat in England, would be placed under further pressure to relocate further afield or otherwise die off.

1. The infrastructure in the Horsley’s is not sufficient to deal with this level of development

The local school (Raleigh) is not able to support even the villages as they currently stand. We live in West Horsley and the catchment area does not even extend to our home. We have a 2 year-old daughter that will be applying for a school in a year’s time and will not fall within the area currently and will already need to look for schools outside our village. There are already 2,000 houses to be built in Ockham (Wisley airfield) which will put pressure on road and rail transport and other infrastructure in the area as it is, even before the Horsley developments have been considered. The roads are busy enough already and are narrow and will not be able to cope well with the huge influx in traffic that will be created.

If houses are to be developed, a new school, traffic lights, wider roads and other infrastructure would need to be planned for implementation at the same time as the completion of the houses if the plan were ever to even go ahead to reduce frustration and annoyance within the local community.

5. The increase in households proposed of up to 35% is the highest in the borough and in an area that would have the most detrimental impact on the AONB. This would more than likely make it unsustainable and the quantity of housing far exceeds the needs for the local area by some 70% over the official national estimates for population growth in the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
a large number of extra homes in West Horsley or elsewhere. For the purpose of this letter I am only concerned with the
Horsleys.

Furthermore the above strategic planning document makes no case for an extra 100 homes in East Horsley. And why the
Horsleys, given that new economic development sites are a long way from here on the other side of the Borough?

The 385 extra homes will further compound the 'planning' errors committed while I have lived in West Horsley. The last
40 years have seen significant infilling which has left West Horsley like a large housing estate with only 2 significant
non-farming businesses, and a couple of pubs. During this time, apart from a little tinkering, there have been no
significant infrastructure changes, and none are proposed now. The needs of the occupants of the proposed homes will
put an unsupportable burden on our roads, schools, medical facilities other infrastructure facilities. I therefore wish to
objet to the plans on this ground.

It is obvious from comparing the site sizes with the number of homes on each that the proposed homes will be both out of
keeping and of a significantly higher density than the current stock of housing in West Horsley. The whole character of
the place will change. Again, I wish to object.

I am most upset at the proposed funding of the Green Belt to enable Green Belt land in West Horsley to be built upon. The
intention of the Act was that Green Belt land would be protected from development in perpetuity. No exceptional
circumstances or other justification have been cited for this proposed 'insetting'. Please register my objection on all
these grounds.

From all the above you might conclude that I oppose all change for it's own sake. I do not. I accept that over time, West
Horsley will expand. If it is done organically, over time, and to meet proven needs, then so be it. What I do object to is
the spoiling of the place by increasing the housing stock by some 35%, almost overnight, to meet unproven need.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/673  Respondent: 9412065 / Stephen Bray  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

1.0 INTRODUCTION

1.1 I have been a resident of West Horsley since 1992, the year my son was born, and for many years we lived in
Northcote Crescent next door to Raleigh School which my son attended for the full 7 years from Reception right through
Key Stage Two at age 11. I have since 2004 lived in Ripley Lane on the northern perimeter of the village, and my son has
now graduated through university with a masters degree and is in full time employment.

1.2 I have become increasingly concerned and dismayed at the apparent recent and continuing disintegration of the
village of West Horsley as an entity in its own right, and at its becoming more and more reliant on its near neighbour East
Horsley for essentials such as a Post Office, a newsagent, and a convenience store, all of which it has recently lost or is
about to lose. West Horsley-ites have long had to rely on The Medical Centre and Horsley railway station, both situated in
East Horsley, and both villages have recently lost all high street bank branches other than Lloyds also in East Horsley.

1.3 West Horsley is very much a village in its own right, separate and distinct from East Horsley by virtue of its history
and its semi-rural nature, points amongst others which were made by West Horsley Parish Council in its application to
Guildford Borough Council to be a Designated Neighbourhood Area in 2014, and which was accepted.
1.4 My concerns are now compounded by the prospect of a substantial number of new homes being sited in the village, but I also very much feel that the Local Plan should now be taken as an opportunity to improve this situation, with particular emphasis on community needs, spatial connections and inf

2.0 LOCAL PLAN POLICIES

2.1 S1 - Presumption in favour of sustainable development:

2.1.1 I very much support the principle of a sustainable development policy generally, and in West Horsley specifically, which would assist in addressing my concerns for this village in particular as stated above. Key to this is “to secure development that improves the economic, social and environmental conditions in the area”.

2.1.2 My present perception, however, is that the allocation of some 5 key sites for a substantial quantity of new housing within the village, without the attendant proposals for such as community needs, facilities and infrastructure to serve what will be a substantially increased population, would thus over-burden those facilities which do remain and place yet more reliance on the neighbouring village of East Horsley.

2.1.3 There is undoubtedly, in my view, a critical need to look at West Horsley as an inset village as being a place in design and townscape terms, bearing in mind the developments proposed.

2.1.4 The following sections in this consultation response attempt to potentially address these issues with some positive suggestions.

2.2 S2 - Spatial development strategy:

2.2.1 Whilst I applaud and support the statement of intent, I see no evidence in the draft Local Plan of a spatial development strategy for West Horsley itself. Again, the following sections in this consultation response attempt to potentially address these issues with some positive suggestions.

2.3 H2 - Affordable homes:

2.3.1 With both a young adult son and ageing friends and relatives, I absolutely support this policy from both ends of the spectrum - to see a minimum of 40% affordable homes being provided as part of a substantial housing development, and 70% of those being made available for rent, would I feel very much serve the need for local youngsters to stay in West Horsley and for the older generation to downsize and stay in the village.

2.4 H3 - Rural exception homes:

2.4.1 On the same premises, I wholly support this policy which seeks to secure affordable homes in West Horsley for young people and the older generation alike, in perpetuity.

2.5 P2 - Green Belt, limited infilling:

2.5.1 Again I support this policy in the interests of West Horsley, there are to my certain knowledge a selection of suitable sites available in and around the present village settlement boundaries which are not presently allocated for potential housing, but which would meet this criteria.

2.5.2 These additional sites would also be available to provide affordable homes, and/or on a rural exception basis, and to potentially provide community facilities as I have put forward later in this consultation response.
2.6 **E9 - Rural local centres:**

2.6.1 I question that West Horsley is not nominated as a rural local centre, certainly it has the capacity to be so if a sufficiently sustainable development plan is in place as per the comments I have made elsewhere in this consultation response.

2.7 **D1 - Making better places:**

2.7.1 The development of sites within West Horsley containing 25+ new homes to be inclusive of a mix of uses, to promote a sense of community, and to provide facilities and services is a policy I will wholly supp

2.7.2 Similarly I will support the creation of meeting places, play and recreation areas, and public spaces, complimentary to acceptable housing developments in West Horsley.

2.7.3 I do not presently see that the objective of facilitating and promoting walking, with short walking distances to and from facilities, is sufficiently addressed in the plans for West Horsley. Again, the following sections in this consultation response attempt to potentially address these issues with some positive suggestions.

2.7.4 Ease of access, promotion of a healthy lifestyle, and safety for pedestrians and cyclists are laudable objectiv I do not, however, see them sufficiently addressed in the plans for West Horsley, and there follow some suggestions to potentially address these issues.

2.7.5 There is, in my view, a critical need for a study of West Horsley as a village to go hand in hand with individual site developments The injection of investment into the village should enable positive improvements to be effected to the wider environment, to be achieved through Section 106 agreements. Such improvements are likely to make otherwise potentially controversial developments more acceptable to local people.

2.8 **D3 - Historic environment and heritage:**

2.8.1 West Horsley benefits from a wealth of history and heritage as I discuss in the following sections of this consultation response That there is a proposed policy to recognise this has my wholehearted support, but the proposed development of West Horsley should specifically take the opportunity to reclaim and embrace its past.

2.9 **D4 - Development in inset villages:**

2.9.1 I generally support this policy on a sustainable development basis as before discussed, and in particular the designation of West Horsley as an inset villag

2.9.2 However, the special character of West Horsley, with its north and south settlements either side of the railway line, needs to be looked at carefully to make the most of this opportunity.

2.10 **I3 - Sustainable transport for new developments:**

2.10.1 I support this policy, but see little evidence of its application in the case of West Horsley. I believe it to be fundamental and crucial, particularly in a semi-rural setting such as West Horsley, that there is infrastructural provision made for walking and cycling, which is very much the national drive towards a healthier and safer lifestyle in this the 21st century.

3.0 **TOPIC PAPERS AND STUDIES**

3.1 I generally support the changes in the application of Green Belt policies in West Horsley, as set out in the Topic Paper Green Belt and the Countryside, provided that the policy of sustainable development is pursued to its full measure.

3.2 Paragraph 120 of the Topic Paper Housing Delivery refers to West Horsley (north) as a large village, but it has not been accorded Rural Service Centre status - it is suggested that it instead relies on East Horsley which has been accorded this status. Whilst this is indeed presently the case, it is to be lamented for reasons discussed elsewhere in this
consultation response. The application of a sustainable development policy which treats West Horsley as its own entity would lessen the reliance of West Horsley residents on the facilities of East Horsley, and thus the burden on the latter’s infrastructure and facilities.

3.3 Of particular relevance and importance in the consideration of the development of West Horsley is paragraph 4.117 of the Topic Paper *Housing Delivery*. To quote verbatim:

Development around villages “can be a sustainable option so long as careful consideration is given to the choice of location, where it can enhance or maintain the vitality of rural communities ... it is important that we consider smaller sites, such as those around villages, which are able to deliver in the early years to ensure that whilst much of our supply is backloaded, we are nevertheless making a concerted effort to boost the sustainable supply of housing in the early years”.

Allied with this objective must be that it is “a sustainable option”, but sustainable it will not be in the apparently present absence of wider considerations of local community needs and infrastructural links.

4.0 HISTORICAL DEVELOPMENT OF WEST HORSLEY

4.1 The 2014 application by WHPC sets out the historical background of the village, which has a traceable history back to 1036AD, and which boasts still remaining buildings going back to the 15th, 16th and 17th centuries. The illustration on the cover page is actually a 19th century map, before the construction of the railway line (which effectively split the village into a north half and a south half), and the following illustration is that same map with the then spine of the village - Silkmere Lane, The Street, and Ripley Lane - highlighted upon it:

[IMAGE 1]

4.2 With the arrival of the railway line came the development of the separate village of East Horsley, also the schism between the north and south sections of West Horsley, as illustrated below:

[IMAGE 2]

4.3 To finally arrive at what is essentially the present built landscape as illustrated below:

[IMAGE 3]

WEST HORSLEY VILLAGE STRUCTURE

5.1 Although a single community, the now two settlement halves of West Horsley are separated on the ground by the presence of the railway line. Its impact on the ground is minimal, it is set within cuttings and largely shielded from view by woodland and trees as broadly illustrated by the satellite view shown below, but its role in the townscape has previously been greatly overstated - assessment from a map necessarily gives a two-dimensional viewpoint, but it does not form a significant boundary.

[IMAGE 4]

The railway line is only perceived to divide the village, and it is this perception that has resulted in the previous definition of the village boundary from a 2D perspective. Given that there are a number of existing houses north of the railway line between Ripley Lane and Silkmere Lane, as well as the substantial facility afforded by Horsley & Send Cricket Club, a more appropriate village boundary here might be the HSCC access road.

5.2 West Horsley is generally well served by sports and recreation facilities, including Horsley & Send Cricket Club off Ripley Lane and Horsley Football Club off Long Reach, and there is a hard court tennis court beside HFC which is available for public use now free of charge. All these facilities serve both junior and adult levels, although there is little
recreational facility for senior citizens who might, for example, benefit from the provision of such as a crown green bowling club.

5.3 There is presently no safe pedestrian link between the two halves of the village, and no dedicated cycle route at all. In townscape terms, there is poor village definition without a clear boundary. With its proposed status as an ‘inset’ village within the Green Belt, there is now a great opportunity to provide new definition, also new facilities, with Silkmore Lane resuming its historic role as a spine of the village, and potentially adding an east/west pedestrian and cycle link along the north side of the railway, linking north and south.

5.4 Re-establishing this link could give a basis for new and sustainable development. The area between the two halves of the village could be used to create a central place with facilities for both areas. The existing location of HSCC could be appended with new community facilities, even retail uses to replace those being lost elsewhere in the village.

6.0 ACCESS AND MOVEMENT

6.1 Pedestrian movement is presently restricted by the lack of footpaths, that which do exist do not provide a satisfactory network within and between residential areas, see the illustration below. Consequently, there is poor access to local facilities, most trips demanding the use of a car. Pedestrian routes should be safe and within a pleasant environment.

[IMAGE 5]

6.2 Public transport is somewhat limited, there is a main service along the A246 at the southern end of the village, but an hourly bus service (438) which passes through West Horsley presently runs only on a Monday-Friday basis. Horsley railway station allows good accessibility to London Waterloo and Guildford, but is situated some 2 miles away from the outskirts of West Horsley village.

6.3 Bicycles are generally restricted to main roads, with no dedicated cycle routes in the village. This is somewhat paradoxical in light of West Horsley being part of the 2012 Olympics road race route towards Box Hill, which has as such brought a surge of visitors and interest in cycling to the area, plus the Prudential road race now passes through on an annual basis. It also flies in the face of an otherwise national initiative to encourage cycling as a valid alternative means of transport. As an example, pupils are encouraged by The Raleigh School to cycle there and back but this noble endeavour is frustrated by not being properly or safely facilitated by the local infrastructure. It would be also highly desirable to provide dedicated cycle routes from the residential areas to the railway station for commuter use.

7.0 SITE ALLOCATIONS IN WEST HORSLEY

7.1 Given the approach it is now proposed be adopted with the inclusion of West Horsley as an inset village, there exists an opportunity to look at an even wider range of potential sites giving housing development opportunities than has presently been identified, together with allied community facilities and infrastructural links so to achieve sustainable growth. Linking the settlements of north and south West Horsley by pedestrian and cycle routes indicates the possibility of developments such as on land adjacent Horsley & Send Cricket Club. There are, indeed, a number of possible sites with existing road access offering the opportunity for immediate development.

7.2 Site A37 - Bell & Colvill

7.2.1 The only presently allocated site in the southern half of the village, there is a pedestrian walkway down The Street heading north into the heart of the village, but no dedicated cycle route. The existing network of footpaths, etc immediately north of the site and east of The Street offer a good facility down to the railway bridge at the southern end of East Lane, thence there is a well-used public way across to East Horsley and the railway station. The northern half of West Horsley is not nearly so well served.

7.3 Site A38 - Manor Farm:

7.3.1 This site is located in the north half of the village, linking with Long Reach to the west and East Lane to the south - however, Long Reach presently has no pedestrian walkway, and neither road has a dedicated cycle way.
7.4 Site A39 - Ockham Road North:

7.4.1 Although strictly being in East Horsley, this site is also on the north side of the railway line, and is directly adjacent to Horsley station. Areas of West Horsley would greatly benefit from a foot/cycle path running alongside this site on the northern side of the railway line to afford easy and safe commuter access to Horsley station.

7.5 Site A40 - Waterloo Farm:

7.5.1 At the northern periphery of the village, this site has a northern link to Green Lane which could feasibly be improved to afford a safe and pleasing route for walkers and cyclists down to Long Reach and Ripley Lane beyond. The southern boundary backs onto Nightingale Crescent and Northcote Crescent but with no way through towards Horsley station, whereby the only feasible direct route is along the busy Ockham Road North, having a pavement on one side but again with no dedicated cycle way.

7.6 Site A41 - Lollesworth Farm:

7.6.1 It is now understood that The Raleigh School have elected to relocate onto this site, which will consequently be unable to accommodate the projected housing provision, but which may free up the existing Northcote Crescent site for some limited housing development. Nevertheless, it would now seem pressing that alternative housing site(s) be found.

7.6.2 This site benefits from close proximity to Lollesworth Lane on the north side of the railway line, a well-trodden pedestrian walkway with its bridge over the railway line, thence down to East Horsley and the railway station. It is, in my view, of critical strategic and infrastructural importance that as much of the northern side of the railway line passing through the village as is possible is utilised as a pedestrian/cycle route, with Lollesworth Lane (opposite the junction of East lane and Long Reach) acting as a fulcrum point between the north and south parts of West Horsley.

8.0 SUMMARY

8.1 In conclusion, I do broadly support the objectives of the draft Local Plan, but only subject to parallel consideration and implementation of a sustainable development policy running alongside the proposed housing developments in West Horsley, and specifically in address of the following critical factors:

- Approved developments must be sustainable, and which improve the economic, social and environmental conditions in the village.
- Community needs, facilities, and infrastructural links must be accommodated, with a view to self-sufficiency of the village insofar as is feasible.
- There must be a comprehensive spatial development strategy.
- Approved developments must contain a high ratio of affordable.
- Pedestrian and cycle links across and between the two halves of the village, which are fundamental to a healthy and enjoyable lifestyle.
- The preservation and restoration of the history and heritage of the village, and ideally the re-creation of the historic village centre.

Proposed Submission Local Plan: Strategy and Sites 2016

Please find enclosed a copy of my formal consultation response as regards the above, which has also been sent via email.

I have been a resident of West Horsley since 1992, the year my son was born, and for many years we lived in Northcote Crescent next door to Raleigh School which my son attended for the full 7 years from Reception right through Key Stage Two at age 11. I have since 2004 lived in Ripley Lane on the northern perimeter of the village, and my son has now graduated through university with a masters degree and is in full time employment.

I have become increasingly concerned and dismayed at the apparent recent and continuing disintegration of the village of West Horsley as an entity in its own right, and at its becoming more and more reliant on its near neighbour East Horsley for essentials such as a Post Office, a newsagent, and a convenience store, all of which it has recently lost or is about to lose. West Horsley-ites have long had to rely on The Medical Centre and Horsley railway station, both situated in East Horsley, and both villages have recently lost all high street bank branches other than Lloyds also in East Horsley.

West Horsley is very much a village in its own right, separate and distinct from East Horsley by virtue of its history and its semi-rural nature, points amongst others which were made by West Horsley Parish Council in its application to Guildford Borough Council to be a Designated Neighbourhood Area in 2014, and which was accepted.

My concerns are now compounded by the prospect of a substantial number of new homes being sited in the village, but I also very much feel that the Local Plan should now be taken as an opportunity to improve this situation, with particular emphasis on community needs, spatial connections and infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/1458  Respondent: 9412065 / Stephen Bray  Agent:

TOPIC PAPERS AND STUDIES

I generally support the changes in the application of Green Belt policies in West Horsley, as set out in the Topic Paper *Green Belt and the Countryside*, provided that the policy of sustainable development is pursued to its full measure.

Paragraph 4.120 of the Topic Paper *Housing Delivery* refers to West Horsley (north) as a large village, but it has not been accorded Rural Service Centre status - it is suggested that it instead relies on East Horsley which has been accorded this status. Whilst this is indeed presently the case, it is to be lamented for reasons discussed elsewhere in this consultation response. The application of a sustainable development policy which treats West Horsley as its own entity would lessen the reliance of West Horsley residents on the facilities of East Horsley, and thus the burden on the latter's infrastructure and facilities.
Of particular relevance and importance in the consideration of the development of West Horsley is paragraph 4.117 of the Topic Paper Housing Delivery. To quote verbatim:

Development around villages *can be a sustainable option so long as careful consideration is given to the choice of location, where it can enhance or maintain the vitality of rural communities ... it is important that we consider smaller sites, such as those around villages, which are able to deliver in the early years to ensure that whilst much of our supply is backloaded, we are nevertheless making a concerted effort to boost the sustainable supply of housing in the early years*.

Allied with this objective **must** be that it is "a sustainable option", but sustainable it will not be in the apparently present absence of wider considerations of local community needs and infrastructural links.

**HISTORICAL DEVELOPMENT OF WEST HORSLEY**

The 2014 application by WHPC sets out the historical background of the village, which has a traceable history back to 1036AD, and which boasts still remaining buildings going back to the 15th, 16th and 17th centuries. The illustration on the cover page is actually a 19th century map, before the construction of the railway line (which effectively split the village into a north half and a south half), and the following illustration is that same map with the then spine of the village - Silkmore Lane, The Street, and Ripley Lane - highlighted upon it:

With the arrival of the railway line came the development of the separate village of East Horsley, also the schism between the north and south sections of West Horsley, as illustrated below:

**WEST HORSLEY VILLAGE STRUCTURE**

Although a single community, the now two settlement halves of West Horsley are separated on the ground by the presence of the railway line. Its impact on the ground is minimal, it is set within cuttings and largely shielded from view by woodland and trees as broadly illustrated by the satellite view shown below, but its role in the townscape has previously been greatly overstated - assessment from a map necessarily gives a two-dimensional viewpoint, but it does not form a significant boundary.
The railway line is only perceived to divide the village, and it is this perception that has resulted in the previous definition of the village boundary from a 20 perspective. Given that there are a number of existing houses north of the railway line between Ripley Lane and Silkmore Lane, as well as the substantial facility afforded by Horsley & Send Cricket Club, a more appropriate village boundary here might be the HSCC access road.

West Horsley is generally well served by sports and recreation facilities, including Horsley & Send Cricket Club off Ripley Lane and Horsley Football Club off Long Reach, and there is a hard court tennis court beside HFC which is available for public use now free of charge. All these facilities serve both junior and adult levels, although there is little recreational facility for senior citizens who might, for example, benefit from the provision of such as a crown green bowling club.

There is presently no safe pedestrian link between the two halves of the village, and no dedicated cycle route at all. In townscape terms, there is poor village definition without a clear boundary. With its proposed status as an 'inset' village within the Green Belt, there is now a great opportunity to provide new definition, also new facilities, with Silkmore Lane resuming its historic role as a spine of the village, and potentially adding an east/west pedestrian and cycle link along the north side of the railway, linking north and south.

Re-establishing this link could give a basis for new and sustainable development. The area between the two halves of the village could be used to create a central place with facilities for both areas. The existing location of HSCC could be appended with new community facilities, even retail uses to replace those being lost elsewhere in the village.

I am writing to protest regarding the proposed local plan which will affect West Clandon. I live on The Street (A247) in West Clandon and this road is already full to capacity. If this proposed plan goes through we will have grid-lock as the A.247 cannot take any more traffic. The road is very narrow in places, which necessitates trucks having to mount the pavement to pass each other and there being a school close by, means a major accident is very likely, especially when parents are attempting to accompany their children to school. The infrastructure needs to be put in place before such a plan can be instigated.

You are proposing to build 2,100 houses at Garlick Arch and Gosden Hill as well as a further 2,000 at Wisley etc., etc. Each of those properties will have at least two cars, possibly more and therefore the roads will become impassable. The A.3 is already at a standstill on a daily basis but is expected to take on even more traffic. You are proposing to build an Industrial site on the Burnt Common areas – this will mean yet more heavy duty vehicles using both the A.3 as well as the A.247.

I fully appreciate more homes are required but these need to be built on brown field sites and to be affordable to the younger generation and not Executive type homes. This is an area of Outstanding Natural Beauty and needs to be maintained as well as the Green Belt which appears to be slowly eroded by such plans. Infrastructure needs to be a priority before any of these proposed plans can be instigated and I implore you to give this priority consideration.

Comment ID: PSLPA16/3199  Respondent: 10430401 / St John the Evangelist (Mark Woodward)  Agent:
I OBJECT ESPECIALLY TO 6 POLICIES: A36, A37, A38, A39, A40 & A41: • Amount of new housing far exceeds local need. • Housing density excessive when compared with existing development. • Would transform the Horsleys into a sizable town, something for which no case is made. • No local support. • Collective impact of these 6 sites on a small part of the borough not considered. Should not be treated as isolated, separate sites. • Total amount of new building out of scale with the planned development elsewhere the borough, especially less sensitive urban areas not protected by Green Belt. • Sites unsustainable. Key infrastructure lacking. No adequate provision is made to increase it – e.g. poor wastewater capacity, lack of schools, absence of traffic management plan, flooding. • No account taken of additional impact of Wisley Airfield site on Horsleys. • Extension of settlement boundaries too permissive. Horsleys characterised by streets with development along only one side of the road. Policies allow too many adjacent green fields to be developed by squaring off boundaries and claiming they don’t contribute to Green Belt “openness”.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I have read some of the documents on your website and it appears to me that some of the articles are written assuming that the decision has been made to house many more people than can be sustained in the area.

It is surely self-evident that traffic in the area cannot be increased without significant degradation of the living standards of the current population.

Two examples will clearly demonstrate this. The first is the commuter trains that head to London every morning and return every evening. Your staff, since they are based in Guildford, will not have experienced the overcrowding that is apparent every day of the week. Delays are frequent and the trains inadequate - among other things they do not have air-conditioning.

No doubt your response will be that the platforms are being extended and will be able to accommodate more passengers. My view is that, with the extended platforms, the current commuter traffic can be accommodated; not increased traffic resulting from all the additional houses that are planned.

Secondly, it appears from your plans that road traffic will be alleviated by the realignment of roads around the A3 / M25 junction. This is a complete fallacy. I travel on the road from Horsley to Cobham every weekday morning and find that 90% of the time the M25 heading clockwise is backed up and unable to move around 7:30 in the morning. What hope is there to improve this situation if the A3 / M25 junction is improved. This will do nothing to improve the traffic flow on the M25 which is already a dangerously crowded road at rush hour.

There are many other objections that I have and I feel that the views of the majority of current residents are being rode roughshod over by studies that purport to claim that the expansion of housing in the area will be achieved with minimal disruption.

I therefore submit my objection to these schemes in the strongest terms to ensure that the countryside is preserved and we do not all end up in continuous traffic jams and dangerously overcrowded trains.
I look forward to hearing that these plans are stopped in the near future and also look forward to your reply to confirm that you are of a similar view.

I wrote in 2014 to explain the reasons why I am very concerned about the number of houses planned for the area around the Horsleys. I have copied the email below.

Please note that I have also attached an article from the New Civil Engineer magazine which is the magazine of the Institution of Civil Engineers.

It highlights the problems encountered locally on the M25 at present and shows how the reliability of travel is declining year on year. Adding more houses in the area will only make the problem worse.

Finally, please explain why I need to write a second time on the same subject. You surely have the email below on record.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

As a resident of West Horsley I am writing to object strongly to the proposed development of East and West Horsley.

This plan is far too ambitious. To increase the size of West HOrsley village by 35% is quite unrealistic. There is not enough infrastructure - medical centre, schools, meeting halls, shops, parking spaces and in particular the roads could not cope with l00s more cars and people. Whatever development takes place, a much better public transport system would be needed as the increased population would be gridlocked.

I urge you to take a much harder look at these plans.

Re: Proposed Submission Local Plan: Strategies and Sites June 2016

I am writing regarding the above, to strongly object to the following:

1. The removal of West & East Horsley villages from the green belt by insetting.
The implication of which will completely change the character, balance and nature of these villages for ever, losing historic value and precious green belt. There is no 'exceptional' justification for building on this green belt.

1. The proposal of high density housing within West & East Horsley, is a staggering increase of over 35% more However, there is no evidence of improved infrastructure. Already these villages combined have only one overcrowded medical centre, one over subscribed under 11’s academy school and badly potholed roads. The inevitable increase in cars on the roads, will not only further damage the road surfaces and create traffic congestion, but parking for the shops and railway station will become a nightmare. The drainage in the Horsley's is barely coping at the moment, and it is understood from Thames Water that further housing developments, will be unlikely to cope and the foul drainage system will need to be upgraded.

1. West Horsley appears to have a disproportionately high % increase in housing (35%), compared to other locations eg: Ash & Tongham 16% and Guildford Town 11%. This coupled with the 2000 homes proposed on the former Wisley Airfield site, which has reappeared in The Guildford Plan, will have a totally unreasonable and unjust impact on the Horsley villages.

I urge you to please give my comments consideration, by keeping West & East Horsley villages within the green belt and not redefining the boundaries, to avoid unsuitable, unnecessary and unsustainable housing developments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/4242  Respondent: 10627457 / Graeme Morrison  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I agree that a modest amount of additional housing is needed in the Horsleys and in the Guildford borough and that a better mix of properties is needed, in particular, more properties for first time buyers and for those wishing to downsize.

However, I object strongly to the scale of extra housing proposed in the Draft Plan because this is based on what I believe to be some fundamentally flawed calculations and a complete lack of understanding of the environment of the Horsleys.

The Environment of the Horsleys

The Horsleys are ill equipped to cope with significant development as any rational analysis will quickly expose.

1. a) The road network

East and West Horsley can only be accessed on restricted roads

From the South

Ockham Road South is restricted so that a lorry and car cannot pass at Lynx Hill and the road remains narrow into the village.

The Street has limited access at the Bell and Colville roundabout and near Edwin road it is reduced to single file traffic.

From the North

Ockham Road North is a narrow country road which can’t take two lorries passing.

Old Lane is narrow, with a number of hazardous bends and a difficult junction into Cobham road.
From the West

The road from Cobham is the best route into Horsley but it is restricted at the railway bridge on Forest road. This road takes a lot of traffic as it is the access road from Horsley to supermarkets at Cobham.

From the East

A series of narrow roads provide access from Burntwood but none is capable of sustaining significantly increased traffic.

b) Retail Structure

The retail environment at Station Parade consists of 25 premises plus 3 at the bottom of Cobham Way, including a library, post office, chemist, 5 restaurant/cafes, butcher, baker and 2 mini supermarkets. The largest of these units are approximately 170-200 sq. m. There is no room for expansion of retail premises nor for the provision of extra parking places. This cannot be expanded or developed to a worthwhile retail centre. Bishopsmead, to the south of East Horsley is much smaller and similarly constrained. West Horsley has virtually no retail presence.

c) Infrastructure

There is already pressure on school places, doctors surgeries and parking. The Horsleys cannot sustain a significant increase in demand. In addition, there is limited space for expansion of any of these facilities.

d) The Geography of the Horsleys

The Horsleys lie just north of the A246 which runs to the north of the North Downs. Rainfall on this area flows north and causes periodic flooding in heavy rain. There are frequent problems with storm drains flooding in the Horsleys. Green belt land in and around the Horsleys is needed to absorb this water run off. Further building will exacerbate this problem.

I object to the proposed in-setting boundary to replace the Green Belt around East and West Horsley. This new boundary includes some valuable green community space such as Kingston Meadow (by EH Village Hall) and Horsley Tennis and Cricket Club which will then be vulnerable to future development. These spaces are valuable amenities and are an essential part of the life of the village.

I object to the lack of understanding of the infrastructure constraints of the proposed new households on the Horsley villages and to the absence of any effort to deal with them

If around 2,600 new houses were built in the Horsleys, Ockham and Wisley airfield this could easily result in around 5,000 more cars within a three mile radius of the villages.

Traffic

This would have a huge impact on local roads which as outlined above have little scope to be widened (e.g. pinch point at Lynx Hill on Ockham Road South and the restricted area on East Lane) or otherwise altered to cater for such an increase.

Although it is proposed to upgrade the current A3 junction at Burntcommon to a full 4-way junction. SCC traffic modelling anticipates increased use of Guileshall Lane, Hungry Hill Lane and Tithebarns Lane (all not suitable for increased traffic volume) for traffic accessing the A3 at Burntcommon in order to travel to Guildford and beyond.

The SCC report states that “consequently, it indicates that further thought may have to be given to managing traffic in this area as part of a transport assessment should the development be progressed”.

A local plan when proposing new housing on a substantial scale must surely plan for the implications of increased traffic both on the major roads such as the A3 and the minor village roads. The current draft local plan has not given such issues enough consideration

Parking
Parking at Horsley & Effingham junction stations (which are already full), at the shops, at the Horsley medical centre and at the village hall will not be able to cope with this additional demand.

Flooding

The site behind Ockham Road North in East Horsley is partially a level 3 flood risk area, and local residents are well aware of how much standing water there is in their gardens after rain. Building on such land will only exacerbate the problem. Other areas of the Horsleys are also flooded when it rains because the drains are inadequate. Substantially more houses will exacerbate the problem but no attention has been paid to drainage in the local plan.

Schools and medical facilities

Amenities

Local schools and medical facilities are already at capacity.

No extra school places are planned in the Horsleys and the school places proposed at Wisley Airfield will not be planned until many years into the project. 2600 new houses could easily mean 2600 children looking for school place!

I trust the Council will review its Local Plan basing it on a model which is available for inspection and with more attention to the infrastructure implications and use of brown field sites rather than destroy our Green Belt - a precious amenity gifted to us by visionaries from the past.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/838  Respondent: 10641953 / Wiesia Taylor  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I also OBJECT to policies A37, A38, A40 and A41. These involve the excessive expansion of West Horsley, an increase in its housing by 36%. West Horsley is one of the first lines of defence against urban sprawl by the London conurbation. And GBC wants to rip up the rules on protecting the Green Belt to put up some more housing here. This is fundamentally wrong and I OBJECT to it.

My conclusion is that GBC have put a huge effort into creating a monster here which nobody wants except for Guildford’s planning department and maybe a few of Guildford’s councillors who campaigned at the last local election on the basis of protecting the Green Belt. Doesn’t look like it to me, so I OBJECT TO THE LOCAL PLAN,

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I OBJECT in particular to including Sites A36-41 (East and West Horsley). This is a back-door way to create a mega-village – essentially, a soulless new dormitory town. The Horsleys feel victimised by this plan, which has been masterminded by Council leaders representing Ash and Tongham at the other end of the borough, where (in a flagrant case of political double standards) the Green Belt is actually being extended under Policy P3.\[1\]

Whatever their merits as development sites, the 6 Horsley sites should not be considered individually but for their cumulative impact on the contiguous villages of East and West Horsley.

Building 533 new houses on these 6 sites, plus at least another 90 on small sites is (a) excessive in absolute terms and (b) disproportionate relative to the rest of the borough. It will destroy the rural character of these communities.

Under the plan, rural West Horsley will take 35% of new homes, Ash and Tongham 16% and Guildford urban area only 11%. The total number of homes in West Horsley will increase by 35%, which is disproportionate when measured against the overall increase in housing across the borough and particularly in Guildford town. If the Council have justifiable reasons to transform a particular community so radically, the plan should present a case rather than sneaking in site proposals as a fait accompli.

These sites will put unsustainable strain on local facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewage, surface drainage and shops. For instance:

- Thames Water have advised the Council that the current wastewater network will not cope and that the foul drainage system all the way to the treatment works North of Ripley will need to be upgraded.
- Guildford Council’s Education Review says “expansion options may need to be considered for primary” education in the Horsley area within the first 5 years of the plan, but Surrey County Council has no plans to do so. The Raleigh School is already full. The private Glenesk and Cranmore schools are also at or near to full capacity. The suggestion that schools in Ripley can be used contradicts the plan’s stated intention to reduce traffic on the A3 and strategic aim that primary schools should be within walking distance.
- The plan’s Infrastructure Schedule (Appendix C) imagines an “East Horsley and West Horsley traffic management and environmental improvement scheme between 2019 and 2023 by Surrey CC” but gives no details. This scheme is just wishful thinking. The proposed housing can only harm the local environment, not improve it.

The harmful impact of these sites is magnified by the proximity of the so-called Wisley Airfield site (Three Farms Meadow), with 2,100 new homes only 2 miles away (see below).

The density of new housing on the 6 Horsley sites is inappropriate, being greater than anywhere in the locality now.

Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries for which the plan presents no arguments. Contrary to NPPF paragraph 79, this will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.

Collectively, these 6 sites militate against NPPF paragraph 81’s encouragement of access to the Green Belt and its amenity and recreation value. This has been a success story in the Horsleys, with the creation of an amenity wood and community garden, the purchase of adjacent fields (East of Ockham Road North) by local residents in order to preserve their open aspect, well-maintained pitches for local football and cricket clubs, public tennis courts, open space for a high-quality campsite (at Waterloo Farm) used by many foreign tourists and the approval of plans for a “Theatre in the Woods” – making West Horsley the only village in Surrey with an opera house. The open nature of West Horsley determined that a long portion of the 2012 Olympic cycle races passed through the village. This route has been adopted by cyclists as a permanent asset, including the annual Prudential cycle race. These and future examples of “positive planning” depend on protecting the Green Belt to maintain the openness and attractiveness of the local landscape and avoiding the urbanisation and traffic congestion that Sites A36-41 will bring.

\[1\] Councillor Paul Spooner and his predecessor, Councillor Stephen Mansbridge.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I would like to record my objections to the following items:-
The Horsleys being removed from Green Belt as 'the exceptional circumstances' required have not been demonstrated.
Changes to boundaries of the Settlement boundaries.
The proposals to build the additional 533 houses is totally unrealistic without schools, medical facilities, roads and car parks being extended and there is no scope for most of this.
Development on the former Wisley Airfield. The development would cause an enormous impact on the Horsleys bringing so much more traffic into the already overloaded and narrow roads. Also the lack of drainage would cause even more traffic congestion. We have currently an increasing number of vehicles that are too large, this can only result in more accidents and damage occurring.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to lodge my objection to the above proposal for the following reasons.
Firstly in broad principal I believe the Green Belt is more necessary now than when first implemented as without it, there will eventually be no distinction between town and country as the urban sprawl continues unabated and our countryside is lost forever.

Secondly, in more specific terms, I object to the proposed building of over 500 houses in Horsley as the infrastructure simply cannot cope with such an increase in population. In the winter of 2014/15, in order to walk my dogs locally in Green Lane, I had to wade through raw sewage spilling out onto the road for weeks as the sewers overflowed because they could not cope. A proposed build of 120 homes nearby would obviously cause this to be a permanent and unacceptable problem. Such a large development would also adversely effect the character of the existing village, which seems to have been conveniently overlooked.

The village shops and library already have times when there are no vacant parking places, and many residents do not have access to these amenities apart from using a car.

The doctors surgery in Kingston Avenue (the only GP service in Horsley) obviously struggle to give out appointments within a reasonable length of time already, as I have rung them for an appointment quite recently only to find the soonest they could offer one was in 9 days.

Ockham road north is already very difficult to drive out into or from houses alongside it due to limited vision, narrow width and bends, so any increase in traffic volume which would effectively turn it into an A road instead of a B road would make it even more dangerous.

I would like to point out that finding land on which to build is only a part of a development plan – the infrastructure must be in place to accommodate it, which isn’t the case in Horsley

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

*Attached documents:*

**Comment ID:** PSLPA16/4485  **Respondent:** 10708513 / John Carroll  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

**As a resident of East Horsley I strongly **object** to much of the the Proposed Submission Local Plan in respect to East and West Horsley.**

I question the Borough housing targets set out in Policy S2. I therefore accordingly **object** to Policy H2.

I **object** to the proposal to inset East Horsley from the Green Belt and request that this proposal be dropped from the Local Plan.

I also **object** to the proposed East Horsley boundary change which cannot be justified.

I **object** to the proposal to designate roads south of the A246 as being within the identified boundary of East Horsley village and to allow limited infilling within this area.

I believe that the failure to address the inadequacies of the existing infrastructure to meet the current needs of East Horsley is already a serious deficiency in the Proposed Submission Local Plan and I **object** to the infrastructure proposals on these grounds. I also strongly **object** to the proposals for the East Horsley infrastructure in that they do not meet the stated objective of providing a timely infrastructure to support the proposed developments.
I consider that the proposed western movement of the East Horsley settlement boundary needed to bring site A39 within the settlement area as unjustified and contrary to NPPF rules. If this boundary movement is invalid, as I believe, then this site remains a part of the Metropolitan Green Belt, as such and with no ‘very special circumstances’ to justify housing development on it I object to Policy A39.

I strongly object to the site allocation policies A37, A38, A40 and A41.

These four policy sites are all located within the Green Belt. One is a partially brownfield development but the other three sites are all used for agriculture and all sit within the current Green Belt at the edge of the Settlement Area. The reasons presented by the consultants to justify these settlement boundary movements appear to me unfounded and in no way meet the requirements of the NPPF.

These boundary movements clearly represent a deliberate pushing back of settlement boundaries in order to provide more greenfield sites for housing development. As such, I consider these proposed movements in settlement boundaries must be reconsidered.

These proposals appear contrary to the principles of the Metropolitan Green Belt.

I also strongly object to Policy A35.

I object to the proposal to to remove Wisley Airfield from the Green Belt and the enormity of the proposed development of it, due to the strain it will place on existing infrastructure and amenity.

I object to Policy E2 insofar as it omits to confer "public transport interchange" status on Effingham Junction Station without good reason.

Obviously I appear to strongly object to many aspects of the Proposed Submission Local Plan which although I appreciate has had much time spent compiling and revising, still fails to address the ‘objective’ in a manner acceptable to the majority of residents affected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I write to register my strongest objections to the Local plan proposed by Guildford Borough council for excessive housing development in the Horsley village area and I do so for several reasons.

I object to the fragrant disregard to Green Belt restrictions, which will substantially affect the rural setting of the village, the wildlife and outlook, viewed from the Surrey Hills, an area of outstanding beauty. I regard this plan as an outrageous large scale rape of the countryside, which will be irreversible and ruin the village in a number of ways.

The proposed plans will substantially increase the village population and in the process over burdening already stretched local services and infrastructure. Parking is already a problem at Horsley and Effingham stations and likewise at the local shops, the narrow roads (dangerously narrow in parts) will not cope with any increase in traffic, driving through or around the village. The Influx of parents driving their children to our local schools, which are at full capacity, already causes major traffic disruption at school times. The medical services are already over burdened without adding to village population. Drainage is already under pressure and will not cope with the proposed increase in housing, likewise problems with drainage of surface water.

Worst of all, High density of new housing will dramatically effect and unbalance the environment and character of the beautiful villages of West and East Horsley, negatively impacting use of village halls, playing fields, shops and other village Facilities and we will suffer from over crowing. The proposed buildings plan will ruin the quality of quiet village life on a massive and disproportional scale and it is simply unacceptable.

If Wisley Airfield were to be developed, as has been proposed, it would only magnify the above problems for the Horsley’s many times over, which naturally I also strongly object to.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
 OBJECTION & COMMENT TO 2016 GUILDFORD DRAFT LOCAL PLAN

I object to the above plan and I am very disappointed that the Green Belt in West Horsley is so under threat and that an increase of 35% of new homes has been proposed by the Guildford Plan, greater than any other single area in the Borough.

We moved to West Horsley fourteen years ago, mainly because of the rural aspect of the area and a lot of this is going to disappear. Over these fourteen years the local schools have become full, the local doctor’s surgery is only just managing to cope, the roads are often flooded and potholes left unattended.

The railway station car park is often full from early morning; the car park behind the shops in East Horsley is extremely busy. East Lane, a major road through West Horsley has no lighting. East Horsley is also marked out for substantial development on two sites, one very close to the local shops and the other on a very busy road by a dangerous bend.

I fear if all this building takes place, West Horsley will never be the same again by any stretch of the imagination.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

 Sites

I OBJECT. The NPPF states that most development in the Green Belt is inappropriate. Planning guidance issued in March 2014 states that unmet housing need (including for traveller sites) is unlikely to outweigh the harm to the Green Belt enough to constitute “exceptional circumstances”. There is therefore no justification for removing the Horsleys and other villages from the Green Belt and building housing on Green Belt land.

The number of houses proposed for East and West Horsley (533 in total) is disproportionate to the present sizes of the villages. The houses would be at a much greater density than the present houses – for example, the Planning Officer’s report for a road in East Horsley describes it as “[a] semi-rural residential area comprising a series of essentially two storey medium to large properties on medium to large plots. The properties are generally set away from the boundary lines”. Any new development of the numbers and areas proposed would inevitably be quite different and would destroy the special character of the villages.

Problems with lack of infrastructure have already been described above (Policy I1). Schools are already full, the Medical Centre is full, mains water pressure is low, foul drainage is inadequate (I could go on). Parts of East and West Horsley are subject to flooding on a regular basis, and at least one site (A40 – Waterloo Farm) has been proposed on a flood-prone area.

Ockham Road North, which would be the means of access to site A40 (and is also one of the main routes from the Wisley Airfield site – A35) is narrow, winding and dangerous. Cyclists are at risk from the heavy goods traffic and during the winter the road has been closed due to flooding. It is also subject to ice. The pavement is on one side of the road (but changes from side to side – an additional hazard for pedestrians).
There are brownfield sites within a short distance of Guildford town centre which would be just as suitable for housing. An application to build flats in Walnut Tree Close was refused because of potential flooding problems although it is difficult to see why if building on a flood plain in Horsley is acceptable, building in Walnut Tree Close is not.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing again to object to the volume of building that is proposed to be built around East and West Horsley villages. Also no houses should be built on land that comes within the Green Belt.

The local infrastructure could not cope with the amount of development proposed. The roads, schools, doctors surgery and the station car park are overflowing.

I know that the planned properties to be built on the land at Wisley airfield are not included in the Horsley plan but it will also have a detrimental effect on our roads etc.

Our roads are very narrow and not in great condition so more traffic along them would cause more accidents in this already crowded area. Because of the Olympic route for cyclists we have a great many riders around our roads that also cause a dangerous problem.

I do not object to the odd small development of small affordable housing and encourage the Council to make more developers build more of this type of property.

I DO hope that Guildford Borough Council will reconsider this new plan and keep this area the joy that is to live in.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/3365  Respondent: 10782625 / Heather Alexander  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT ESPECIALLY TO 6 POLICIES: A36, A37, A38, A39, A40 & A41:

• Amount of new housing far exceeds local need.
• Housing density excessive when compared with existing development.
• Would transform the Horsleys into a sizable town, something for which no case is made.
• No local support.
• Collective impact of these 6 sites on a small part of the borough not considered. Should not be treated as isolated, separate sites.
• Total amount of new building out of scale with the planned development elsewhere the borough, especially less sensitive urban areas not protected by Green Belt.
• Sites unsustainable. Key infrastructure lacking. No adequate provision is made to increase it – e.g. poor waste water
capacity, lack of schools, absence of traffic management plan, flooding.

• No account taken of additional impact of Wisley Airfield site on Horsleys.
• Extension of settlement boundaries too permissive. Horsleys characterised by streets with development along only one side of the road. Policies allow too many adjacent green fields to be developed by squaring off boundaries and claiming they don’t contribute to Green Belt “openness”.6
• Green Belt gap with neighbouring settlements hugely narrowed, especially if Wisley Airfield is built on.
• Will harm compliance with NPPF 81 – e.g. by making cycling (including Prudential cycle races) too dangerous, ruining the rural setting of Waterloo Farm campsite, destroying the ambience of Grange Park Opera’s new “Theatre in the Woods”.
• Policy A40 especially unviable because of high water table and poor drainage, leading to regular winter flooding.
• Safe access and egress at Site A40 unachievable, owing to flooding, high speed limits, poor sight lines, narrow access to existing properties, inadequate pavements for elderly and schoolchildren, increasing use by recreational cyclists etc.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Thank you for your letter of the 200 June, inviting a response to the publication of the Local I:--

I gather that, taking the Two Horsleys, East and West, together, sites for a further 533 houses are designated in the plan, and there would be, presumably, a number of other single sites in addition.

Were these developments to proceed, we can say goodbye to the Horsley we know and love and I register my opposition. Particularly the density of what is proposed, far in excess of anything currently existing, would irretrievably change the character of the village.

I also understand that, with the boundaries of the villages being enlarged, they are to be taken out of the green belt, a move to which I am wholly opposed

I am amazed to see that, despite its having been unanimously rejected by the council, the development at Wisley Airfield has re-appeared in the plan. It is totally pointless to have discussions about the proposals for East and West Horsley, without, at the same time discussing these far larger and totally overbearing developments, because whatever additional facilities are built there, the impact on the Horsleys will be far larger than anything in the local plans.

As you are already aware, the A3 is already drastically over burdened and daily comes to a standstill often by 4.30 in the afternoon. To even consider a development at Wisley before this dire situation has been remedied, is foolish beyond measure. This apart, the traffic along Ockham Road North would be greatly increased, as would use of Horsley station itself.

I am, as you will have gathered, totally opposed to the airfield development and I speak as a resident of some 49 years.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

With reference to your letter of the New Local plan which will influence planning decisions in the Borough, and will have a massive impact on East and West Horsley. I wish to object most strongly.

East and West Horsley have always been in the Green Belt and should continue to remain so. Both villages’ roads are overflowing now with traffic schools are full also the doctors surgeries (and the royal Surrey).

We do not need more houses or more residents.

I have objected to these plans before and wish to make even stronger objections again.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/1917   Respondent: 10798913 / Michelle Scott   Agent: 

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am a resident of East Horsley village and have been for the past 9.5 years. My husband and I moved out of London because we wanted to live in the countryside and wanted our children to be brought up in a quiet village without the pollution, noise or close proximity of others as you would expect in a town or city.

It has been brought to my attention that Guildford Borough Council have put forward an amended Local Plan proposing to build over 2000 houses on Wisley Airfield, nearly 600 new houses in East and West Horsley and to take East and West Horsley completely out of the Green Belt.

I do not agree to any proposal to take the Horsleys out of the green belt. It is essential that green belt land is maintained at all costs for the sake of flora and fauna. The beauty of the Horsleys is the countryside that surrounds it. It is vitally important to protect the beauty of our green land and the natural habitats it protects. Wisley Airfield is on your Guildford Borough Sites of Nature Conservation Importance and is therefore one of the areas you have promised to protect from Developers. I understand that the "exceptional circumstances " required before taking this action have not been met.

I further object to any attempt to extend the settlement boundaries of the Horsleys or to the re designation of the Station Parade as a District Centre.

In my view it is not possible for the existing infrastructure in the villages of Ockham,West and East Horsley to accommodate the increased volume of housing proposed. In particular:

1. The villages have narrow roads which will not accommodate constructions traffic and traffic from the increased population.
2. The rail services are already strained with commuters having to stand to Waterloo on certain trains.
3. Existing problems with flooding and sewerage systems will be exacerbated
4. The doctors' surgery will not be able to cope with any increased population numbers.
5. The local school in West Horsley could not accommodate any further increases in population. I also object to the proposals being made for a new primary school to be built on existing greenbelt land.

Please do not go ahead with any of the proposals for new housing in the Ockham, West and East Horsley villages as this will only destroy the character of the villages I love so dearly.
I object to the removal of West Horsley Village from the Green Belt on the following grounds:

- The Local Plan is taking West Horsley out of the Green Belt yet the Local Plan Policy 2 contains the statement "we will continue to protect the Metropolitan Green Belt" - this statement is contradicting the proposal.
- West Horsley is a distinctive rural village in a rural setting with many historic buildings and The village's green belt status is essential to ensuring the character of the village remains.
- Government guidelines require exceptional circumstance for removing the village from the green belt which cannot be justified on the basis of unfulfilled housing - what is the exceptional circumstance for this proposal?
- There is no explanation as to why West Horsley has been chosen to be removed from the green belt and no justification for doing so.

2. Objection to the Number of Houses being built in West Horsley

I object to the 4 Proposed Sites - Policy A41/Policy A40/Policy A38 and Policy A37

- The Local Plan has suggested a 35% increase in housing for West Horsley by 2022 and yet only a 11% increase in Guildford town. What is the justification for this?
- The Guildford Borough Economic Strategy document makes no case for locating large numbers of new homes in West Horsley - this is a village with no shops, no post office, no petrol station, no train station, no medical centre and a very limited bus. It also offers no employment opportunities for residents.
- The National Planning Policy Framework requires that new residential development must be limited in quantity by the availability of infrastructure and local facilities - this policy has been ignored in the Local Plan.
- The density of houses on the proposed sites is completely out of keeping with the rest of the village and will change the character of the village forever.
- The National Planning Policy Framework requires that new residential development must respect the character and density of housing in the area - this policy has been ignored in the Local Plan.
• About 10 houses on East Lane (mine included) currently back onto and look out onto open fields green belt land. Policies A38 and A41 allow 135 homes to be built directly behind these houses and 90 directly across the road from these houses- this will completely change the character of the village

• The proposal for the 4 sites do not respect “the character and density of housing in this area”.

1. **Policy A41**

I specifically object to the Proposed Site - Policy A41

• **The Local Plan has included a new site - Policy A41 with a proposal to build 90 homes**
  - This site is open fields green belt land and the land is one of the most important rural aspects of the village
  - The Policy will irrevocably destroy the character of West Horsley village as one of its most important rural features is that on the entry roads to the village (mainly Long Reach in this instance) there is a vista across fields as there is only development on one side of the road
  - The fields included in Policy A41 do not satisfy the criteria for development- they do not abut the currently defined village settlement on any side and so cannot be considered an extension of the settlement or infill
  - Development on a current site of open fields in green belt land surrounded by undeveloped countryside is in breach of the government's guidelines on building in the green belt
  - Residents on East Lane have previously had their planning applications refused on the basis that it interferes with the green belt contained in Policy A41- why has this now changed?

I urge you to consider these objections seriously and reconsider your plans for West Horsley under the Local Plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I strongly object to the plans to build 595 new houses in the Horsleys and also the development of over 2,000 houses on the former Wisley Airfield. I moved to this area 20 years ago precisely because I wanted to live in a small rural environment. It was not an inexpensive choice, but I decided to spend my hard earned money to purchase a house in a location that I loved. Building such a large number of houses in and around Horsley Village will completely change the character of the village. In addition, it will create new problems such as over-crowding on the local train service and associated parking area. This plan does not take into consideration the welfare of the individuals who already reside in the Horsleys.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Scale of the Proposed Developments:
The 593 houses in East & West Horsley will further aggravate the already overstretched infrastructure. The road through East Horsley (Ockham Road North & South) is inadequate even now, and cannot be upgraded. Normal cars have to slow down to pass each other in certain parts, and climb onto the pavement when a truck passes through.

And you want to add further traffic to the area?!!

I understand that there are plans for 2,000+ new dwellings plus considerable related infrastructure on the Wisley Airfield, only two miles from East Horsley. I am of the opinion that the Horsley area will not be able to absorb the increased population, traffic and pollution in the area.

It is not realistic to assume that the new town will restrict itself to the Wisley Airfield area. Their daily routine will spill into the surrounding areas including East Horsley. We do not have sufficient facilities, schools, surgeries and other services. Gas, electricity and telephone services in the area are already operating at full capacity on very old pipes, wires and exchanges. Local roads are too narrow and winding to take the existing traffic, and there is insufficient parking anywhere, even in front of most homes. The local roads were built in the 1930s or before, and are mostly no more than narrow lanes where cars have to slow down to pass each other. The access roads to East Horsley are narrow and winding and are not sufficient to handle even today’s traffic.

The scale of the proposed development is way out of proportion and way out of character to the existing infrastructure and the space available in this small, picturesque old village. The new town will completely destroy the special character of our historic village.

Station Parade a “District Centre”?

There is a clear misunderstanding of the nature of the facilities in our village centre, it would be completely inappropriate to target the area for future urban development. Please, get out of your offices and come and see the village in action on any normal week day and week end, see how the facilities, roads, drainage etc are already overstretched. As a certain tennis player often said: You cannot be serious with these proposals!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am horrified to hear of the massive proposed house building projects in and around West Horsley and the wider Surrey area. I wish to register my strongest objection to the multiple proposed sites but particularly what's planned to happen around East Lane in Horsley.

These proposed developments will change rural nature of West Horsley Village, and the visual amenity to all of us who currently live here.

I understand there is a local policy to protect the Metropolitan Green Belt against inappropriate development.

I object to removing the Horsleys from the Green Belt. - I can see no exceptional circumstance to justify this action.

Our Roads and services Infrastructure is already overloaded. -

The village suffers from a high water level in the ground and at times water logged fields overflow onto the roads in for example East Lane and the Street in West Horsley. If the fields are built on this will compound surface water problems. This is a particular concern as we seem to have more rain in recent years.

The surrounding roads including A3 and M25 often get gridlocked and many drivers including me have given up on them and started using our village roads as a cut-through instead. So adding 100's of new families into the area will add perhaps 1000 extra cars onto local roads.

The Street and East lane have narrow sections and suffer congestion at either end particularly with drop-offs at Glenesk and Cranmore schools.

The increase in traffic will cause longer queues and congestion and increase risks of road safety and accidents to residents on foot and bikes, and the drivers themselves. The local roads are in a terrible state and more traffic will make things worse.

The increase in population will overload already stretched resources such as a doctors surgery already stretched to the limit and shops and parking. The planned population increase (in excess of Government ONS forecasts) for the Borough will require a major extension of the Royal Surrey Hospital to cope.

The state schools eg Raleigh and Howard of Effingham are overloaded already, so as far I can see there is no planning if infrastructure roads, resources and amenities to support the development.?

These proposed developments each change the local area where they are planned They are over-bearing, out-of-scale or out of character in terms of its appearance compared with existing development in the vicinity.

I am also concerned that taken together these developments have an adverse effect on Nature conservation in the area.

West Horsley Parish is one of a rich and varied mix of well established low housing density settlements with a considerable number of historic buildings. There are a considerable number of recreational visitors (walkers and cyclists) through the seasons each year.

Overdevelopment: Policy S2 states that provision will be made for 13,800 new homes over the Plan Period 2013 to 2033. The number of homes is too high and unsustainable in Guildford’s villages. The Site Allocations list totals 12,698.

Village expansion is unsustainable. With only one small shop, no post office, a very limited weekdays only bus service through the village, it is clearly unsustainable for the proposed high volumes of new housing development.
The development of 385 homes on the 4 proposed sites are at much higher densities than currently exist in the village settlement and will be totally out of character with the existing mix of different housing styles and layout of the village. The homes building proposals are unsustainable in terms of schooling, drainage, roads capacity, shops, parking in East Horsley (shops and station), public transport.

The Key Evidence document ‘Guildford Borough Economic Strategy 2013-2031 makes no case for locating large numbers of homes in West and East Horsley or neighbouring villages.

The need for so many houses to be built in West Horsley over the first 5 years of the Plan period 2018 to 2033 is totally unproven. The West Horsley Parish Council and Surrey Community Action Housing Survey: May 2014, identified a limited need for some 20 affordable homes for local people who want to remain in the village.

Traffic generation from the proposed new housing estates will be considerable. Most households in rural areas as a necessity have 2 cars, many having 3. Journey times on local roads will increase significantly.

There are known sewage overflow problems in the Ockham Road North / Green Lane area. Thames Water has advised Guildford Borough that the area’s waste-water network is unlikely to be able to support the demand anticipated from all the proposed developments. The foul drainage system from West Horsley to the treatment works north of Ripley, will need to be upgraded to cope. Thames Water advise ‘a 2 to 3 years lead-in period’ to install the necessary waste water network and treatment capacity after planning permission for a development is granted.

I appeal to Guildford Borough Council to wake up to their responsibilities to protect their residents and the environment, from this massive reckless plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

---

**Site Policies**

**General Comment**

GBC’s proposed Local Plan proposes:

- 533 houses on large sites in East and West Horsley (The Horsleys)
- 60 houses on small sites in The Horsleys
- 2000 houses on Wisley Airfield
- 400 houses on Burnt Common
- 2000 houses at Gosden Hill Farm (on the A3 near Burpham)

This makes a total of 4,993 houses within a 5-mile radius of The Horsleys, not including many smaller sites in nearby villages.

At the moment there are 2808 houses in The Horsleys (EH 1697, WH 1111).
Thus I calculate that the plan represents:

- A 21% increase in housing stock within The Horsleys.
- A 178% increase in housing stock within a 5-mile radius of The Horsleys.

I can find no argument in the document 'Guildford Borough Economic Strategy 2013-2031 for locating such large numbers of homes in The Horsleys or neighbouring villages. Rather the majority of the Strategic Employment Sites proposed in Policy E1 are over 5 miles away from them.

There are serious shortcomings with, and deficiencies in the infrastructure, of The Horsleys currently as I have stated above under Policies I1, I2 and I3. The housing growth for The Horsleys set out by GBC in the Proposed Local Plan will merely exacerbate this problem.

In addition these policies run contrary to NPPF paragraph 17 which specifically states that planning should be about “empowering local people to shape their surroundings”. As I have said earlier, but it bears repeating, comments on local social media sites and discussions with inhabitants of East Horsley lead me to conclude that Site Policies A35-A41 do not shape the surroundings in the way local people would wish. There seems little doubt that the local populace feel victimised by GBC’s policies when The Horsleys will be required to build, in percentage terms, twice the amount of housing than Guildford urban area.

I OBJECT therefore to Site Policies A35-A41.

POLICIES A37, A38, A40 & A41, located in West Horsley

These policies propose a total of 405 dwellings from these six sites. The 2011 Census showed West Horsley had 1,124 dwellings at that time. This represents an increase of 36% over the plan period, a very high proportion by any standards.

These four sites all currently lie within the Green Belt. Development on them requires settlement boundary movements. As I have stated in the objection to Policy A39 above, the NPPF is quite clear that every movement in settlement boundaries must be justified by ‘exceptional circumstances’. I do not believe these policies demonstrate any such circumstances and are therefore unjustified and contrary to NPPF rules. If this boundary movements are invalid then these sites remains a part of the Metropolitan Green Belt. Therefore the housing development proposal would be invalid.

I OBJECT to Policies A37, A38, A40 and A41 as they do not demonstrate the exceptional circumstances required to move the settlement boundaries.

We are amazed at the proposals for development in The Borough particularly in relation to the Horsleys and the old Wisley Airfield to which we strongly object.

Firstly we question the basis upon which the need has been calculated, which is further brought into question by our exit from the EU.

Secondly the infrastructure in the area is already overloaded with traffic during the rush hour and it has become dangerous to cross Ockham Road on foot several older people being put at risk, at such times.

This Country is experiencing progressively higher amount of rainfall and local roads are regularly flooded causing more potholes and the dangers associated therewith also making it almost impossible for pedestrians to use the pavements without getting soaked by passing traffic.

At rush hour the A3 is already suffering with serious -delays and jams particularly at the Ripley, M25, Cobham junctions any further increase in traffic (which is inevitable if the proposed developments go 1 ahead) would bring gridlock with all the knock on effects.

Furthermore the proposals take the villages out of the Green Belt, thus making a farce of the whole object of the belt itself: which is totally unacceptable.

People have settled in this area because of its country atmosphere quietness and its general village feeling which will all be destroyed by the proposed developments. People have paid a premium price for their houses in the μ.rea and-who is going to compensate all the residents for the inevitable decrease in property values? ·

The car parking availability at local stations is fully developed, platforms have already been extended and there is very little room for expansion, which will be necessary if the proposals are carried out.

We enclose herewith an article which we trust you will read and note it's relevance and importance.

East and West Horsley proposals.

Unthinkable to remove these precious, tranquil villages from the green belt.

West - the number of proposed houses here would change the very nature of the village forever.

The Narrow lanes without footpaths are completely unsuitable for the proposals.

Imposes an unsupported burden on the current infrastructure and services, totally unsuitable.

Enforces draconian development proposals totally unbalanced and unsustainable dramatically changing the character of West Horsley.
Objections to Guildford Borough Council's new Draft Local Plan

I strongly object to the proposal to remove the Horsleys from the Green Belt and to the proposal to extend the boundaries of the settlement areas.

I object to the increased number of houses projected to be built on land currently in the Green Belt, more than double the number proposed per year in a previous plan. The impact on the local infrastructure, already struggling, would be disastrous.

There is already too much heavy traffic on the narrow roads; parking at the stations, shops, medical centre and village hall is at times already impossible. Drainage is inadequate, water pressure at times pathetic.

The increase in the local population would cause too much pressure on the schools, medical facilities and other services.

I also object to the proposal to build 120 houses behind Ockham Road North, land already subject to flooding. It would be irresponsible to aggravate the problem.

I object to the proposed removal of the former Wisley Airfield from the Green Belt and the subsequent development proposed which would have an enormous adverse effect on the whole area, including critically the management of traffic at the A3 junctions.

I object to the whole creeping development stretching from central London to the Horsleys destroying the local countryside so essential to the wellbeing of the population. There are plenty of brown field sites which could be considered for development with far less detrimental effect on the country as a whole.

I trust these objections will be fully and responsibly considered in the consultation.

Guildford Borough Proposed Submission Local Plan: Strategies and Sites June-July 2016 Consultation

I am a long term resident of West Horsley. An extra 385 extra homes in West Horsley, which is an increase of some 35% on existing, without any improvements in infrastructure, will cause huge problems in the area. As it is, existing schools, medical facilities, road an transport systems, together with drainage and sewage systems to name but a few, are struggling to cope with current strains put on them. What is proposed is insupportable and I wish to object.

The proposed extra 385 homes in West, and 100 in East Horsley, are at variance with the key Evidence document "Guildford Borough Economic Strategy 2012-2031." Why? Because it does not argue in favour of locating large numbers of homes in either The Horsleys or neighbouring villages. I object to the proposal for this reason also.

Furthermore, simple arithmetic tells me that such a large number of houses on such relatively small sites will be both out of keeping and of a much higher density that the rest of West Horsley. Please register my complaint on these grounds.

The West Horsley Parish Council & Surrey Community Action Housing Survey: May 2014 indentified a limited need for about 20 affordable homes to enable local people to stay in the village; principally young people and elderly people wishing to downsize. The need for so many houses to be built in West Horsley over the initial 5 years of the Plan period 2018-2033 is totally unproven. Again I wish to register an objection.

I am totally opposed to any change in, or ‘insetting’ of, the Green Belt, so as to permit the proposed developments because no exceptional circumstances have been cited in justification. Again, will you please register my objection. It must be said that if acceptable representations had been made for ‘insetting’ the Green Belt, then I might take a different view.

You will see from the above that I am totally opposed to the proposal to build an extra 385 homes in West Horsley - and for that matter an extra 100 in East Horsley. Please add my name to the list of objectors.

<tr>
<td>I am writing to raise my objections and comments re the above, in particular in respect of its impact on the Horsley and neighboring villages, as follows:</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
1. I strongly object to the proposed removal by "insetting" of West and East Horsley villages from the Metropolitan Green. This appears to be indiscriminate and is entirely inappropriate and with no justifiable basis. The Green Belt is established by national legislation for the preservation of the countryside and should only be used for development as a last resort in very exceptional circumstances. I am also concerned by the excessive proposed use of Green Belt for development in general, and consider that greater use should be made of brownfield and redevelopment sites before encroaching on Green Belt land for development.

1. I object to the density and timing of new housing proposed for West Horsley and East Horsley villages. The main proposed Horsley new development sites amount to 533 new homes which is a staggering high increase on existing homes (35% increase in West Horsley) and at a much higher density out of character with the village. This level of development would massively and irreversibly impact on the rural nature of the villages, and is simply unsustainable in terms of the capacity of the local infrastructure (roads, drainage etc) and amenities. The extent of proposed new housing for the Horsley villages is disproportionately high as compared with the Borough as a whole. The proposed timing (between 2018 and 2022) is also inappropriate as non-Green Belt sites should be used first.

1. I object to the massive scale of development (2000 homes) proposed for the Wisley. This is entirely inappropriate for a Green Belt and, especially when combined with the proposed new housing developments in East & West Horsley, would completely overwhelm the nearby infrastructure and villages and including Horsley, Ockham and Ripley.

West and East Horsley villages have a rich historical mainly agricultural heritage, and are characterized by its mix of very old and newer houses surrounded by and interspersed with farmland and woodland. The open character of the Horsley villages makes an important contribution to the openness of the Green Belt hence in accordance with the National Planning Policy Framework (NPPF) the villages should remain within the Green Belt. It is noted that the NPPF requires new developments to respect the character and density of existing housing and be limited in quantity by availability of infrastructure and local facilities.

The local infrastructure is already stretched to capacity by high volumes of traffic, and the Council struggles to keep up with maintenance of roads and draining as it is. The proposed developments would utterly overwhelm the existing infrastructure, whilst severely and permanently damaging the rural character of the area.

I am concerned by the overall strategy in the Plan of proposed extensive use of Green Belt for development. The primary need for affordable and social housing is clearly in an round Guildford as opposed to the rural areas, yet the plan seems to focus on large scale Green Belt development instead of regeneration and development within Guildford itself. This approach seems fundamentally wrong and would inevitably lead to increased urban sprawl and spoiling of the borough.

It is unclear why it is proposed to remove the Horsley villages from the Green Belt, whilst at the same time creating new Green Belt around Ash and Tongham. This is clearly inconsistent.

I would also question the need for the very high rate of new housing proposed for Guildford Borough overall, being far in excess of actual recent population growth, and see no justification for driving such a dramatically increased rate of population growth in the Borough. My understanding of the need for new homes in the Horsley villages is only for a relatively small number of smaller and affordable homes.

Overall I consider the Plan to be unbalanced in inappropriately using Green Belt for development rural areas, which would be unsustainable in terms of local infrastructure, in preference to first making use of brownfield and redevelopment sites to meet housing needs. The Plan also overplays the need for economic development in rural areas.

Councillor Paul Spooner recently stated that "we have also listened to the what you said in the last consultation" 1. It is disconcerting that after very extensive and constructive comments and objections raised by local residents to the Draft Local Plan published for public consultation in 2014, the proposed New Plan is if anything even worse than before for the Horsley villages.
I trust my objections and comments will be taken into consideration, in particular in retaining the Horsley villages within the Green Belt, and scaling back the proposed Horsley and Wisley developments to a sustainable level appropriate for Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am writing in response to Guildford Borough Council's new Local Plan.

I most strongly object to the removal of East and West Horsley from the Green Belt and feel it would be disastrous for the character of both villages. Green Belt should mean Green Belt and should not be made available for development.

I object to the number of houses suggested being built in the villages due to the fact that schools, doctors and parking are already at breaking point. The roads would become even busier and they were not built to sustain so much more traffic.

If you are going to build in the Horsleys then I would suggest a residential home, a day centre or something like it for the people of the Horsleys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

As a local resident, I am writing to object most strongly to some elements of the new local plan.

The Horsleys are rural villages and have no infrastructure suitable for 533 new houses and their occupants. The local primary school is already over-subscribed and parking in the village, particularly at the station, is limited.

The Green Belt was set up to protect such places for future generations, it should never be open to negotiation.

I do accept that we have a need for more houses, particularly so called “affordable” properties and those for older residents, but going by recent developments, the houses that will be built in this area will be in the upper price bracket, and as such will not alleviate any housing problems that the wider area may have.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2895  Respondent: 10846497 / Malcolm Folley  Agent: 

Section page number 267 of 599  Document page number 384
Increasing the population of West Horsley by such vast numbers would eradicate the character and charm of what is – and should remain – a traditional village. This letter is to highlight my grave concerns for the future of West Horsley, its inhabitants and the environment.

The scale of this plan is unsustainable for a multitude of reasons:

* The infrastructure is already fraying at the edges. Our roads, through West Horsley and East Horsley, are congested at peak times of the day as commuter and school traffic has become significantly increased in recent years.

*The Raleigh School in West Horsley is full with no room on the site for expansion. The Howard of Effingham Secondary School, traditionally the school that children from West Horsley transfer to at the appropriate age, is also at maximum capacity.

*At school times, when parents deliver or collect their children from the Raleigh Primary School, or the preparatory schools, Glenesk and Cranmore, it is not an exaggeration to describe East Lane, Ockham Road, Northcote Road, Northcote Crescent and Nightingale Crescent as chaotic. It does not bear thinking about how worse these roads would become in the event of an influx of housing on the scale being considered.

*Traffic increases from the proposed new housing estates will exacerbate an already critical overload of cars in the village.

*This congestion then spreads to all the adjacent roads. Furthermore, the state of these roads, and all others within the two villages, are narrow with poor or limited paving. In places, in West Horsley, there is barely room for two four-by-four vehicles to pass; and the presence of trucks, which are seen with greater frequency as our villages are used as cut-through between the A3/M25 and the A246 Guildford-Leatherhead road, causes traffic to slow to a halt. This is also placing pedestrians at risk.

*Also, there are several points in East Lane, in West Horsley, that are repeatedly flooded through the winter. In essence, the pressure on our roads and drainage is at a worryingly fraught level today.

*Parking is already an issue, too. The station car park, serving both villages, is almost full on most days from Monday-Friday. Parking at the three parades of shops is also regularly overloaded.
*The Horsley Medical Centre is operating at what appears to be maximum capacity – again parking to keep an appointment at the surgery is already a game of chance. Other issues are at play here. Like the Medical Centre, the schools have limited scope, or no scope at all, for building development and are at full capacity.

*To this end it is incumbent on the Local Plan that the unsatisfied demand for housing first needs to be established to be a genuine local demand for people born in the locality, or who need to live in the locality as a consequence of their local employment; or are existing residents needing to downsize or upsize.

*In West Horsley, we have watched a succession of smaller, and therefore ‘affordable’ properties, be granted planning permission by the Guildford Borough Council allowing them to be rebuilt into substantially larger, and therefore hugely more expensive homes. Where has the coherent thinking been behind that policy, I wonder?

*I wholly object to the unwritten expectation that all the villages on the A3 corridor will, sooner rather than later, become an urban sprawl linking this area to the suburbs of south west London.

*The importance of maintaining the Green Belt to prevent the urbanisation of Surrey’s rural communities, like West Horsley and East Horsley, is paramount. Our legacy should not be to leave behind a landscape to resemble a concrete jungle – which I fear will be the consequence of the scale of the proposal drawn up by Guildford Borough Council.

*If we are to protect the Green Belt for future generations we need to ensure it is only lost after strict examination against laid down criteria and after all suitable Brown Field are fully utilised.

*Our environment is attractive and of national importance for flora, fauna and geographical issues.

*Erosion of verges and ditches is already a threat caused by flooding and unusual weather patterns of late. The effect of concreting over the Green Belt land will further reduce the natural drainage system and drive water into existing drains that are already at risk of overflowing.

*Our concern about the Cayman Island registered company's promotion on the former Wisley Airfield will have unimaginable and irreversible consequences on all the villages surrounding the site, obviously including West Horsley.

A traditional village life has been maintained throughout our 33 years in residence with strong clubs and associations, as well as an abundance of local businesses, and producers of food local to the area.

There is limited employment within the Horsleys, and the bus service is one designed to meet the needs of ageing, rural community inhabitants; not those seeking to work in Guildford or Woking, for example. The rail service is already
heavily used throughout the week – and the railway station is substantial distance from much of the housing in West Horsley.

It is the duty of our generation to maintain the natural beauty – and significant importance – of villages like West Horsley for the generations of the future. We think we are doing a decent job of that. After all, history has shown that the constructions of 1960’s style development of cheap housing created more problems in rural areas than it solved: rising crime, unemployment, and communities without a soul.

Once farmland has been commissioned for development, we have arrived at a point of no return.

This plan destroys the very essence of Surrey – so attractive not only to those of us living here in West Horsley, but for those that relish the chance to visit and enjoy the Green Belt that has been part of our heritage for a century.

I repeat: this Local Plan proposed by Guildford Borough Council is inappropriate and should be condemned for the damage and destruction that would be wreaked upon West Horsley killing a village that is vibrant, well-maintained and cherished by those who live here.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I am absolutely appalled to hear that in certain areas of Horsley that the green belt has already been changed, once this has happened and carries on our green and wonderful land will be lost forever.

I am totally against any encroachment on the green belt.

I was at the meeting held in your offices about the Wisley Airfield when it was completely outed I now see it has again been included in the plan. It is ridiculous in so many ways and would completely ruin this area forever, for a start the amount of traffic and the roads would be impossible.

The nearest station car parks are already filled to capacity. This is just a total profit making idea for a few people who live in The caymen Islands with no care about the residents who live here and what about you the council? I would have thought it was your duty to protect the local people who by the way pay a lot of money in council tax.

I a resident who lives in Old Lane am really annoyed this has been allowed to carry on and take time money and energy from the council.

I reiterate I would like to know exactly who these people are in the Caymen Islands as they seem to have an agent acting for them I think we should have a right to know.

I feel very strongly about any green belt loss and will oppose it with all my strength.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The six development sites listed on the new plan amount to a total of 533 new houses, I am trusting these houses will be affordable housing to enable the younger generation to move back into this area. At the moment every house being built consists of four or more bedrooms, we need smaller homes – not all cramped together either.

Planning for Thatcher’s Hotel I do strongly object to for the following reasons:-

Firstly, The Claudel Hotel, Epsom Road is now a nursing home

Secondly, Bookham Cetange Hotel is residential care

Thirdly, Preston Cross Hotel will also be nursing care homes which leaves only one hotel for the whole area, I do feel this Hotel could still have a future, it has quite a lot of history going back to the days of a tea-room, a lot more thought needs to be put into this, I’m sure someone could make it into a thriving business

Your papers also contain comments on the type of housing that you would wish to see in the Horsleys. Here again your approach is flawed as 533 new homes of the type you describe would be wholly out of keeping with the village. It is an observable fact that many Horsley houses are large and on large plots and that is why people have bought them. Furthermore, you reflect this fact in the heavy Council tax bills we pay from which Horsley residents derive few benefits.

You need a major re-think and a concentration on the more than adequate brownfield sites in the Borough.

We have particular objections to:

Removing Horsleys from Green Belt status.

Changing the settlement boundaries in the Horsleys.

Planning with no regard to the infrastructure necessary.

I write to object to the Local Plan for East and West Horsley.

I believe that the Horsleys should remain as Green Belt. The exceptional circumstances required before taking this action have not been demonstrated.

There are no sound reasons for the boundaries of the settlement areas to be changed.

Infrastructure in Horsley is already overloaded. Local schools are full, drainage is inadequate, roads and car parks are overloaded.

Station Parade should not be designated as a District Centre. The nature facilities in the village centre have been misread.

**RE GUILDFORD BOROUGH PROPOSED SUBMISSION LOCAL PLAN:STRATEGIES AND SITES 2016**

I am writing to object to the local plan for the Horsleys. My oppositions are as follows:-

485 additional dwellings-How many extra residents will this mean Another 1,500?

Added to the proposed development of Wisley airfield of another 2100 dwellings and around 8000? It appears this plan is to cram as many people as possible into this area, whilst destroying much of the environment.
If the Horsleys are taken out of the Green Belt, I feel it will lead to extra development in the future. Finally, the present infrastructure will not support this plan. The Medical Centre will be under severe pressure. The schools will be full to overflowing (as they are already). No shops in West Horsley (remaining shop due to close next month) leading to extra pressure on East Horsleys parking for shops and station. The roads, which are for the most part country lanes, will be horrendous, with traffic. The drainage system will be unable to cope. There will be tremendous impact on the wild life. I do not object to a reasonable number of new affordable homes in the Horsleys, as I realise there is a need for them, but this local plan does not take into account the cost to the environment, or to the taxpayers.

Having attended my local meetings to review the updated plans for the expansion of the available housing stock in the Horsleys I have some serious reservations. The housing density per allocated plot in no way reflects the current density per area in West Horsley. How can this be considered a balanced approach? If using the formula for housing expansion that would normally be applied to a town means that the intention is really to turn the Horsleys into a small town then please come clean about the intended outcome.

Some of us that have left towns to find the joys of living in a village community will have to accept the fact we are being driven out to find ourselves another village to live in until the dreaded developers arrive on our doorsteps again in the future. Mentioning the greenbelt seems of little point either.

Throwing the "lungs of London" away doesn't seem of any concern to anyone with their greedy hands in the housing money pot. Schooling and Doctors places will need expansion. This is very "undefined" as a strategy at present. As for the removal of all of the extra human waste, both bodily and refuse, this seems to be far off in the distance with all of the focus just on "Build, Build, Build". Has anyone done a risk analysis, forecast projection, or even a plan???

In more specific terms I object strongly to the proposed development of 533 houses on six sites in the Horsleys. East Horsley is an attractive independent rural village and not an extended suburb of the South West area of London. It must remain that way. As before, you are very light on the increased infrastructure that will be needed to accommodate

1) an additional 700 cars on narrow poorly maintained roads, some without pavements

2) an additional 150+ children in local primary schools that are absolutely full already
3) an additional 3000 people for medical care when the local Medical Centre is full already.

Where is the thought through strategy taking into account the interests of the existing residents of the area who you are meant to represent?

You also ignore the adjacent East Horsley Conservation Area when you propose the development at Thatchers Hotel. I object to this and the other development proposals in the Horsleys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

After reading through the Guildford Plan proposals my objections to this are based on the fact that without the protection of the existing green belt area, once the first section of land is built on there will be no protection left for the complete infill of the remaining area. This will turn Horsley villages in to an urban zone with the resulting damage to both the natural environment and quality of life for the existing residents. The pressure from the increase in the local population will also have serious knock on effects on the nearby North Downs area which is classified as an area of outstanding natural beauty. One section of this AONB is the Sheepleas which is already suffering from an exponentially increasing number of visitors due to its proximity to the existing village. To turn this area in to what will be essentially a large town will cause huge pressure on the environment leading to a decline in quality of life for all people in the area including the newcomers and the destruction of its many rare and varied species of wildlife.

The effect on the existing roads and infrastructure has not been taken in to proper consideration. The roads in this area are in a disgraceful condition due to lack of investment both from local and national government. In years when there is little rain this area gets very short of water and suffers hosepipe bans and although some of the water is supplied from boreholes in the North Downs supplementing them with abstraction from the local rivers would be difficult without the risk of them drying up completely in drought conditions. This country still has a duty to take into full account all of these problems before rushing into a reckless decision to build houses in unsuitable areas such as Horsley and the surrounding villages. The local roads such as the A3 and A246 which are the main roads used by commuters to their places of employment, and schools for their children are already overloaded or become gridlocked in rush hour and this will only become much worse if these proposals go ahead.

Whilst it is acknowledged that the South East of England is a desirable place to reside due to its proximity to the Capital. It is unsustainable in the short term to even consider building huge numbers of houses in this area. Housing and jobs are required in other parts of the country which have high levels of poverty, social deprivation and unemployment. The South East in general is exhausting its supplies of natural resources such as the supply of sustainable drinking water due to over abstraction and adding to this problem would be very unadvisable. The local sewerage works are already close to capacity and the problems arising from untreated effluent entering the rivers during flood conditions would have a serious effect on the ecology of the local rivers and streams. This problem was serious on the river Wey catchment during the late 1970s when it became much polluted with raw untreated sewage. We will be destined to repeat this if we increase the number of houses to the levels proposed in this ill though out plan. The local council need to reconsider the whole of these proposals as they could cause irreparable harm to the whole area which would be impossible to overcome once the damage is done. It is recognised by the majority of right thinking people that sometimes limited infill is necessary in order to provide a few houses for local residents to stay in the local area if they have family connections, but this proposal will destroy the whole fabric of the local community and destroy the villages in this area forever.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I am writing to object to the proposal under the local plan to remove the Horsleys from the green belt.

This would be totally unsuitable and a dangerous precedent. If it were to be agreed, I can foresee you or your successors in 10 years time being pressured to take further sites out of the green belt and then more still until eventually only a few pockets would be left. Future generations would be faced with the worst urban sprawl that the post-war planners had tried their utmost to prevent.

I also object to any proposal to build hundreds of new houses in east and (particularly) West Horsley. The problem is the infrastructure. The doctors surgery can take few, if any, new patients and the school have barely enough places for the existing children in the area. Any proposal for new houses running into hundreds must include new medical facilities and new or enlarged schools.

There is also the problem from heavier traffic on our narrow, often winding, and already hazard-strewn roads, which serve the villages. In addition, parking will become an increased problem with hundreds of new people in West Horsley coming into East Horsley for shops, station, etc. This will all make life far from ideal for the newcomers and lasting residents alike. Please do not allow developers to proceed with these proposals as they currently stand.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• The roads in the adjoining areas of Ripley, Ockham and the Horsleys struggle even now to cope with the demands placed upon them and are quite unsuitable to carry the considerable amount of additional traffic required to construct the developments and service them in use.
• The single track access to some sites (e.g. site A40) is wholly unsatisfactory and the significant infrastructure changes all around the district required to facilitate the developments are not proposed with consequential damage to the local amenities, undesirable levels of noise, pollution and nuisance.
• Neither too is it proposed to enhance all the other infrastructures necessary to support a significant increase in the local population (e.g. public transport, shopping, schools, medical services and utilities).
• The extent of developments proposed (notably in the Horsleys and surrounding areas) is significantly and disproportionately higher than other areas in the borough; it is also planned for these to be at a very much higher level of density than the locality presently supports which will place an unsustainable burden on the local community.
• The proposals lie near an area of great beauty, and near sites of ‘Interest for Nature Conservation’ and a site of ‘Special Scientific Interest’
• The proposals will detrimentally and irreversibly affect the rural character of the local areas of Wisley, Ripley, Send, Ockham and the Horsleys.
• The damage to the amenity presently enjoyed by visitors and the local community for walking and rambling, cycling, horse riding and general enjoyment of the natural charm of the area will have an adverse effect on the economy of the area.

I trust these matters will be given the most serious consideration before these wholly unpalatable and undesirable proposals go any further and that they are recognised for the considerable social and environmental threat that they pose. I ask that they be rejected as totally unsatisfactory.

As a resident of East Horsley I write to object to your target in the Draft Local Plan of at least 533 more houses in East and West Horsley, and to possible developments at the former Wisley Airfield.

Whilst a small amount of infilling in the villages may be acceptable, the sheer numbers under consideration cannot be accommodated without a massive improvement in the local infrastructure (roads and footpaths, parking, public transport, telecoms, flood prevention, schools, medical services, etc.) which would further destroy the character of these rural villages.

I am writing to save the character of our Horsley village from future development.

I do not think the village areas should be removed from the Green Belt.

I am objecting to the building of a further 533 new houses in The Horsleys.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

I wish to inform you that I am deeply concerned about the massive increase in the number of developments planned for the village of West Horsley. The residents have no idea how this figure was achieved and Paul Spooner is unwilling to discuss. We have been informed on numerous occasions that the green belt policy would not be effected and sadly this promise has been ignored. With the present plan proposed we do not have the schools GP surgeries Car parks Transport.

I had to go to London last week and could not find a parking space at the station.

Our roads are in a disgraceful condition some as bad as third world countries. Yet the council have made little attempt to re surface or repair potholes. What will they be like with the use of more traffic. We will be sinking and not driving.

Horsley has severe problems with flooding and this has caused a lot of problems over the years.

I am surprised as property prices are so expensive in Horsley how any affordable houses can be achieved.

Finally no consideration has been given to the residents of Horsley. I feel during construction process which will be going on the noise dust traffic will have a profound effect on peoples quality of life, with an increased respiratory conditions due to pollution etc. We pay a high council tax to leave in this area and we do have a say at what is going on

The draft proposed housing plan is completely unrealistic and not acceptable

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

I have been reading about the local plans for the Horsleys and Wisley Airfield and have various objections which I hope you will consider:

- I appreciate you have to build new houses but the number in the planning proposal is too vast. It needs to be reduced greatly.
• East and West Horsley needs to remain within the Green Belt for our generation and for our future generations to protect the heritage of the area.
• The impact of the number of houses on our roads, schools, medical services, utilities etc is too great. The current facilities will not be able to cope.
• I know there is a lot of opposition and I don't feel the planners are taking notice and ploughing ahead without considering the huge concerns.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/4096  Respondent: 10870913 / Douglas Clarke  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

We are writing to you in order to voice our concerns and objections to the building proposals and changes which will we believe will be damaging our village life and destroy the character of our villages forever.

Our family moved to West Horsley 10 years ago. We moved from a really busy area (Walton-on-Thames) which has grown considerably since we first moved there in 1976, and We have witnessed the change in what was a ‘small town’ into an extremely busy large town, and not all for the better! This now seems to be the ‘future’ for The Horsleys.

• We moved to West Horsley village specifically for the green belt which surrounds us, this is now to be eroded, and you are taking us out of the green belt area! and the reasoning is for ‘exceptional circumstances’ which has not really been made clear.

We cannot believe that this type of development is being considered when in fact you have neglected (for many years) the current state of our roads in the village and I am especially referring to East Lane. We pay considerable council tax rates which have not been reflected in your surfacing and upkeep of the surrounding roads, and yet you:

• Propose an infrastructure for future development of the area which will certainly overload the capacity of the village (you can’t even keep the current roads in good repair so I cannot say I have much faith in the council!) This proposal will overload our villages.
• Many streets flood when we have torrential rain in the area and the drainage is inadequate at best – so with additional housing this will be a major problem.
• What will happen to our parking facilities in the village with all these extra cars (perhaps two per household).
• The GP surgery will be overloaded.
• Your estimated new housing numbers arising from a SHMA do not exactly match up to what appears to an inflated number of new houses needed which has grown considerable from your original plan. I understand that this is 70% higher that the official national estimate for population growth in the Borough. WHY!
• What effect this will have on the services in the villages. West Horsley households is estimated to increase by 35% this appears to be higher than any other single area in the Bourough. WHY!
• The development of 2,000 housing forming a village on the former Wisley Airfield will be enough in itself to overload our Horsleys.
• What will happen to East Horsley Village Centre if it is to be designated a ‘District Centre’ I fear this will make us very vulnerable for even future development. We will no longer be two villages but a small town, as you have also decided to blur the boundaries of the villages.

We do hope that our fears and those of our family and other residents will be taken into consideration before you demolish our villages; our way of life and extend the boundaries of the Settlement areas of Horsley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Local Plan for West and East Horsley

I write yet again to express my objections to the local plan which has been put forward by the Guildford Borough Council. Especially in the proposed removal of East and West Horsley for the Green Belt area and the extension of the boundaries of the settlement areas of the Horsley’s.

Overall I understand that there is a need in the borough for new homes and do not oppose development providing it is in keeping, in proportion and does not fundamentally change the character of the area. It is obvious to me that the current plan for East and West Horsley is neither in proportion nor in keeping with the character of the local area.

Why the planners believe that this is reasonable and will not destroy what is a classic village, is beyond me.

Surely it would be much better to focus the development in Guildford which already has good infrastructure and amenities? The brownfield areas of Guildford should be utilised first, where high density building fits and would be desirable. Expanding the boundaries of Guildford, where people have elected to live in a town, would not fundamentally change the character of the area. This could then be supplemented by smaller developments spread out throughout the villages of Guildford Borough, which would not have the detrimental effect that the proposed large developments in Horsley and Ockham would have.

My concerns regarding the plan are as follows:

- Why are you planning to build on the green belt when not all brownfield areas have been utilised and other less contentious areas are available for development? Losing the green belt means this land is lost for ever and opens the door to never ending expansion. Should we prepare for a large retail park is built next on the outskirts of the village?
- The building of such high density houses in the village in quite a concentrated area will destroy what is a quiet and rural village, which has been in existence for hundreds of years. These developments clash in style and density to the existing character of the village and will change the village forever. These developments equates to an increase of approx. 35% in the number of the existing West Horsley households, an increase larger than any other in the Guildford Borough.
- Nowhere in the plan is there any provision for any additional infrastructure. With 533 houses, based on current demographics, will mean a huge leap in demand for public services which cannot cope. These will include:
  - No singular development is large enough to ensure the developers invest in any of the infrastructure of the area.
  - Schools place both Primary and Senior: If 50% have 2 children, where are the 533 additional school places going to be when the schools are already heavily oversubscribed?
  - Transport and parking: If 40% of homes have a commuter to London (212 people), where are they going to park? There is no room at the station car park and here is one bus every two hours! In addition, at peak time the trains are already very busy.
  - Drainage: Although an element of investment has been made to improve drainage in West Horsley the roads still flood. The already fragile drainage just will not cope and we will have road closures for weeks again into the village.
  - Roads: The roads in the village are not build to carry more traffic, a 20% plus increase in traffic will not only lead to significant congestion but damage to the environment. Currently the roads ar ein poor condition and deteriorating, how will it support the doubling of traffic around the village?
• Lighting: There are approx. 235 new homes planned for on or just off East Lane, with the increased proportion of children in the area the roads will be highly unsafe as there is no street lighting and completely inadequate foot paths.

• Medical: The doctor’s surgery is already bursting at the seams, if the mix of older people and families, as I would expect, moving to the new homes this is going to going to result in much more than 20% increase in patients.

• The Ockham development with 2000+ homes is almost going to double the number of homes, while there has been limited mention of infrastructure, this has not extended to the impact on road and load public transport network which will be swamped by the additional traffic.

Again it appears that the plan has been made, which is lacking in detail and thought for the current village feel. While these developments may help the housing shortage, it will destroy the villages of East and West Horsley by over-developing them and irreversibly changes the character of them forever.

I trust that you will take my views and that of the other local residents into serious consideration when finalising the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPA16/2807  Respondent: 10871425 / Tim Collins  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the size of size of the development proposed

The need for nearly 14,000 proposed new houses is not supported by evidence based research or scientific study. The figures supplied by the council are flawed in many respects and to this day serious questions are yet to be answered on the validity of the model used to calculate the area’s housing need.

I am especially concerned about the damage that will be caused to small local communities, in particular, West Horsley, East Horsley, Normandy, Ockham, Ripley, Send and Clandon. The number of new houses proposed for these villages is out of all proportion to the existing settlements.

I object to not protecting the Green Belt

The Green Belt concept was put in place to protect the countryside and provide space and enjoyment for all. To infringe on the Green Belt between the borough’s existing settlements will lead to a merging of towns and villages, removing open space and robbing future generations of our beautiful rural areas.

Over 70% of the proposed development is on Green Belt and flies in the face of the principle of the Green Belt. I’m extremely suspicious of the motives of the local council in their pursuit of this ill conceived plan and more so the ‘exceptional circumstances’ justification

I object to the congestion that development will cause to the local village roads and the lack of planned road infrastructure

The A3 and the village roads around Horsley are already congested. Many of the roads in Horsley are narrow, without pavements for pedestrians. To add more vehicles into the mix would have a damaging effect on the character of our rural areas.
I object to the expansion of commercial land in the urban area losing the potential for further housing.

There are sites available in Guildford Town Centre earmarked for further commercial and retail development which could instead support affordable small houses and flats for young buyers, close to the town’s amenities and existing infrastructure. The council have not demonstrated a need for further retail space when increasing numbers of shoppers are buying on line and the need for first time buyer’s properties is much greater.

I object to Brownfield sites not being re-developed for housing

Existing Brownfield sites and unoccupied properties must be developed for housing rather than reducing the size of our Green Belt.

I object to development without improvements to local infrastructure

Local facilities eg doctors, schools, transport facilities in Horsley are already stretched. Any development planned must take account of required improvements to local infrastructure. The number of homes currently planned for West and East Horsley is entirely unsustainable.

I would support limited new development in West and East Horsley, WITHIN the existing village boundaries and on existing developed sites like the Ramada Thatcher’s Hotel (Ref A36, ID 2044) and the Bell and Colvill Garage (Ref A37, ID 16) as long as the local infrastructure is improved to cope.

I would NEVER support the building of homes on the Green Belt and I object to the village boundaries being extended to increase the availability of land for housing. However, I would support the building of a new Raleigh School in East Lane (Ref A41, ID 2063) as I believe this need to be exceptional (the current site is not sustainable for the existing population of the village) and there is no other local site previously developed which would be large enough or suitable for a new school.

I urge the council to revise the local housing needs and amend the Local Plan so that development of Brownfield sites is undertaken and the Green Belt protected for future generations.

1. I object to the proposed extension of the boundaries of the settlement areas of the Horsleys because I do not believe that any sound reason for this to take place has been given.
2. I object to the increase in pressure on our local infrastructure. The local schools are full, it is virtually impossible to get a doctors appointment without a wait of at least several days, roads and car parks are already in poor condition and overloaded.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

SITES. I object to all policies involving building in the Greenbelt as NO EXCEPTIONAL circumstances have been shown, excessive numbers of houses have been proposed, and the clearly expressed views of residents have been ignored. I especially object to Policies A36, A37, A38, A39, A40, A41. The number of houses far exceeds local needs, and the density is excessive. There is no local support for these. The COLLECTIVE IMPACT of these together with the WISLEY development has NOT been considered. Key infrastructure is lacking. There is no adequate provision made to increase the waste water capacity. There is a lack of schools, and health centres. The doctor’s car park is always full. Most of the local roads are narrow with no pavements or only a single one. Already we are frequently forced to drive onto the pavement when lorries are driving through the village. Cycling is very dangerous and we have many cyclists coming from London at the weekends and during the week practising for the Prudential road race, or just for the pleasure or cycling the Surrey Hills.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing again to register my continued and very strong objection to your plans for housing development in the Horsleys in response to the Proposed submission local plan: strategies and sites June 2016. As a long standing resident of West Horsley, I continue to be appalled by your plans for our village and the surrounding countryside. My objections
are:

- Housing Numbers - our village infrastructure cannot meet the proposed additional number of dwellings. Our drains, our water supply and our roads cannot cope with the proposed number of new homes. Building this number of homes will lead to significantly increased flood risk - we already suffer from this issue now. In addition, more cars, means more pollution, and more queuing for local amenities.

- Negative impact on services. Our local schools are already full so local people would have to send their children outside the area to go to school. That is unacceptable. Our medical centre is full, one has to wait for an appointment if you are ill. Building more homes in the village will make this worse. That is unacceptable and ill thought through.

- Green Belt - This proposal would fundamentally change the character of the village. My understanding of The National Planning Policy Framework is that it requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Unmet housing need is not an exceptional circumstance in law. So the Green Belt boundaries should not be changed. To remove most of the Horsleys (and other villages in the Borough) from the Green Belt would change the nature of this area of countryside forever and would eventually merge historic and separate villages. This is outrageous and unacceptable.

Brownfield Sites - there is considerable land available in Guildford which could be used for housing (e.g. Surrey University, vacant commercial sites, derelict land. This should all be used up before any consideration is given to destroying the character of our village(s).

In summary, you have got this wrong. The NPPF requires that any new residential developments respect the character and density of housing in the area and should be limited by the availability of local infrastructure and facilities. For the reasons I have given above, you are not complying with the policy framework. I continue to object to the plan.

My wife and I have lived in West Horsley for a combined 35 years and we wish to provide you with our comments on the Local Plan.

Overall, while we accept that more houses need to be built in the Guildford Borough, we believe very strongly that the Proposals are way beyond what is reasonable and will place an enormous strain on the existing infrastructure in East and West Horsley.

For example, to highlight just a few **EXISTING INFRASTRUCTURE CHALLENGES:**

- It is already impossible on occasions to find a parking place at Horsley Station and Effingham Station on a work day. There is no public transport available as an alternative to get to the Stations.
- Driving along the B2039 between the A246 and the centre of East Horsley village is already often very difficult with the large number of wide vehicles and part of the road is only wide enough for one vehicle, requiring lorries frequently having to drive along the pavement. The pavement is itself narrow in parts and we know of pedestrians who have been hit by passing vehicles.
- The Horsley Medical Practice is already at over-capacity.
- Car parking within East Horsley is already at capacity and there appear to be no alternative sites for car parking allocated or available.
GENERAL COMMENTS

• We agree with the response from East Horsley Parish Council – EHPC Response to GBC Local Plan – which has already been sent to you.
• We believe it is wrong to remove the villages from the Green Belt. We moved to Horsley and brought up our family here in order to live in a Green Belt area. If that is removed, we will never get it back either for existing residents or future generations.
• It is wrong to enlarge the village boundaries.
• It is completely wrong to plan for up to 533 new houses in the Horsleys.
• The proposed development of Wisley with 2,068 houses has been long debated. We object to the proposed development there as it would generate an enormous amount of traffic in the Horsley area and create even more pressure on the existing infrastructure. Again, beautiful countryside will be lost to development.
• It is wrong that 65% of new houses in the Borough will be built in the Green Belt – the Council must find more appropriate sites.
• If this Local Plan is approved, the Horsleys will become just another area of concrete and buildings in a continual stretch of development from London and to the south west beyond the M25. This will result in more pollution and lower quality of life for existing and future residents.

We look forward to hearing in due course that the proposed Local Plan has been thrown out – as the vast majority of residents in the Horsleys wish to happen.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

As a resident of Horsley for many years, I am now extremely worried about your plans to nearly double the size of our village. My worries are as follows:

1. The proposal to remove the Horsleys from the Green Belt is a disaster. The Green Belt was designed to benefit not only the villages surrounding it but also the city of once this land has been built on we can never go back, no matter what the consequences of this foolish decision. Only in the very exceptional circumstances when all other solutions have been exhausted should we even contemplate diminishing the Green Belt.

2. The local infrastructure as it stands can barely deal with current demands from the existing population of the Our schools are full and many parents are having to send their children out of the village to be educated which also increases the already heavy traffic on our narrow roads. With regard to our roads, they are narrow, in poor condition and in many places do not have the luxury of pavements alongside them. With further increased traffic pressure this is going to make it even more dangerous for any parents and children who choose to walk to and from school rather than sit in the queues of traffic. With extra houses come extra cars that need to park as well as travel on the roads. In Horsley parking is extremely limited especially for the commuters who use the railway station. Even if most of the new residents wish to travel by train how are we going to extend the car parking facilities? More residents will only increase the need for extra parking for people to attend the village hall, the doctors surgery and the local shops (the few that we have!) Road side parking is not an option and the local car park is very small.

3. The local development at Wisley airfield if it goes ahead will certainly impact on our village as the residents from this development will surely wish to use Horsley Station which again doubles or even trebles the traffic problems in Horsley.
4 I doubt that we really need such a large increase in the number of houses in this. We certainly don't need more 4 and 5 bedroom houses for current needs but you are trying to lure the people from London here to line the developer's pockets. If any houses need to be built, we need serious numbers of 1, 2 and 3 bedroom properties, some of high end spec to attract a number of elderly residents who currently are living in very large houses and would like to downsize to more compact but never the less extremely nice houses. We also need small houses for the younger people to enable them to live in the area in which they have been brought up in a property that they can afford.

5 In Horsley we have one medical centre to cope with all the needs of the residents of the village. How are they going to cope with a large increase of patient numbers? Also all the extra developments in surrounding villages are going to mean that our local hospital, The Royal Surrey is going to face huge problems in the not too distant future.

6 Surely you should be looking at developing any Brownfield sites within the Guildford area before invading the Green Belt!!

I wish to register my strong objection to the local plan, which will have a severely detrimental impact on our neighbourhood. I object in particular to -

1. The density of proposed additional housing in East and West Horsley. To add 593 houses to already overcrowded schools, medical facilities and the railway will have a major negative impact on the daily life of local residents.

2. The proposal to remove the Horsleys is outrageous. No "exceptional circumstances" have been demonstrated. The Council has a duty to protect the Green Belt for future generations.

3. No sound reasons have been given for the proposed extension of the settlement areas of the Horsleys.

4. The development of the Wisley airfield site in Ockham would have an absolutely massive impact on the area, entirely changing the environment for existing residents and blighting daily life for all concerned. Public facilities are already overloaded. The heaviest impact would fall on the most vulnerable, especially the elderly.

The local plan would, in short, destroy the village community and turn the area into yet another bleak commuting dormitory.

Thank you for the opportunity to comment on the Local Plan.

I am very disappointed that the points that I raised on the July 2014 draft plan have not been addressed.

Whilst I understand the need for more houses the scale of increase is totally out of proportion to the size of West Horsley village. West Horsley has around 1,100 houses - the plan to increase this by 35%, and within the 5 year plan will destroy the village and change it into another urban sprawl.

More houses are needed in the urban areas where people work not in the country which results in additional commuting which will only worsen the pressure on all the infrastructure services and particularly the roads. The plan does not address these issues and it is crucial that it does.

My main concern is with regard to the roads and parking. At peak times they are currently inadequate and will become totally congested with the likelihood of a further 800+ cars in the village associated with the planned new housing. Car parking is already very difficult and there is very little scope for further parking or road improvements. The station car park

is also inadequate and often at capacity. The paths are already narrow and very dangerous in places, particularly along the main Ockham road and East Lane.

Some additional housing is needed but this is not more of the large four/five bedroomed houses that have been built over the past few years. There needs to be more smaller housing for first-time buyers and for those 'downsizing' such as the housing of Weston Lea, and this needs to be with easy access to the local shops and services.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
4. The Raleigh school in West Horsley has insufficient room for children from the Horsleys at all levels, with children from outside the immediate area compounding the difficulties. More homes in Horsley will make matters even worse. The site for the Raleigh school is extremely cramped and the school is currently feeling forced to search for an alternative site. With any greatly increased population in the village the relocated school is likely to end up oversubscribed once more. Any new homes will just make a bad situation even worse.

5. The current provision of Medical and dental facilities are seriously stretched - they are insufficient for the existing communities. It is extremely problematic to get a Doctor’s appointment when most needed and almost impossible to get on a list for a National Health Service Dentist. Additional homes would put extra stress on the existing facilities.

6. West Horsley has just one shop; the other was closed and converted into flats. No provision has been made for additional shops and services alongside the new homes in the local plan. The shops at Station Parade, East Horsley are mainly visited by car by the local residents and people from the surrounding countryside. The parking at these shops is limited, in addition some people consider it perfectly alright to park on the double yellow lines outside the supermarket causing blockages and impeding junctions - the traffic situation at peak times is already unsuitable, parking for the shops and services in East Horsley could not cope with the influx of new homes/residents.

7. Although it is possible to walk along the Ockham Road along the pavement to visit the shops this is not a the rural experience expected of Horsley but one of a walk along a busy road of vehicles passing close and at times faster than they should. This road is insufficiently wide for two larger vehicles to pass and often wing mirrors of these vehicles overhang the pavement very close to pedestrians. I am aware of one pedestrian who was hospitalised as a result of being struck by a wing mirror whilst on one of these pavements and one of my children has been struck by a car wing mirror whilst walking along the pavement on the Ockham road. The greater increase in volumes of traffic generated by the proposed development and afterwards with the increase in vehicles heading for the village will make it even less likely that people will be safe on these pavements.

8. The waste water facilities would be unable to cope with any additional homes – it can’t cope with the number of homes that are already in the village, overflowing in Ockham Road North, Green lane area.

9. Some of the proposed sites have inadequate surface water drainage as it is – the land gets flooded. Building on such land is just asking for the houses to be flooded.

Roads:

The roads in West Horsley would struggle to cope with the increase in traffic. For example, The Street is the only entry into West Horsley from the A246. It is narrow in places and it would not be possible to widen it and it can be very difficult to pass large vehicles such as lorries, tractors, buses and school buses, which frequently use this road.

Pedestrian traffic does not fair any better. In most cases it would not be possible to widen pavements. The increased traffic levels would be hazardous for pedestrians. Traffic will increase considerably as a result of the proposed housing estates. Most houses have 2 cars and some have 3. Journey times on local roads will increase considerably. No detail on roads and transport infrastructure in West Horsley has been found in any of the Local Plan documents.

I have written before about the various proposals issued so far for the local development plan, especially concerning the East and West Horsley area where I live.

My views have not changed.

Whilst I understand the need for modest and appropriate development, I do OBJECT to:

- The overall extent of the currently proposed development (500+ houses in the 2 villages) and the impact on us of 2000 houses on Wisley Airfield.
- The fact the current infrastructure (roads and other services) cannot cope now with the loads placed upon it, and no clear plans to enhance these in the future
- The loss of green belt land around the villages. These village boundaries should NOT be extended.
I have worked extensively in recent years for the local community (including running the Horsley Community Bus), and have gained a strong sense of the preferred way forward for this area, which is NOT the way implied by the present proposals.

Please TAKE STEPS to keep this as a RURAL area before it is too late

We would like to make the following comments on the new Guildford local plan.

We object to the proposal to remove the Horsleys from the green belt.

The local infrastructure such as local schools and medical facilities are already over stretched. Roads and car parks are overloaded especially the Ockham road south. We see no reasons for the extension of the boundaries of the settlement area of the Horsleys.

We object to the proposal to build over 2000 houses at the former Wisley Airfield as its less than 2 miles away from the village.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am a resident of East Horsley and wrote in detail with my objections to the 2014 Local Plan. My concerns remain considerable and are summarised below:

The "exceptional circumstances" which need to be demonstrated before removal from the Green Belt have not in fact been demonstrated. Similarly the extension of the defined settlement boundaries have not been justified but appears to be an attempt to by-pass planning control for future unspecified additional development.

The existing roads (in particular the very narrow stretch of the Ockham Road North between Pennymead and the junction with the A246 by the Duke of Wellington pub) are already dangerously overused by the current volume of cars and large lorries (often from the construction trade) and an increase of a projected 6000 cars (based on 2 cars per household if permission is granted for all the proposed new developments) will inevitably lead to an increase in accidents and deterioration of already dilapidated and constricted roads, which cannot physically be widened to make them safer. It has become increasingly difficult to park in the village, either in marked bays or even the car parks, and this lack of parking will be exacerbated by the disproportionate increase in new housing.
The current infrastructure is already at breaking point in East and West Horsley - the village state and private schools are over subscribed and it is already very difficult to see a GP promptly at the village medical practice. The increase in pollution from the extra houses and car emissions will increase asthma symptoms and other allergies also leading to an increased use of and strain on the Medical Centre and its staff. An increase of 35% in the number of West Horsley households will place a further strain on the inadequate drainage and will worsen the already significant flooding that occurs regularly on East Lane and beyond the Barley Mow pub.

The increase in housing, demolition of existing long standing landmark sites in the Horsleys and removal of the green belt status is fundamentally changing the nature of a rural Surrey village, that current residents have chosen to live in: the Chown houses and Lovelace historic buildings will be detracted from and, in time demolished no doubt to make way for lucrative new developments. Horsley Towers will lose its setting as houses are built adjacent to it and Thatchers hotel is demolished, leaving the historic Chown frontage looking out of place surrounded by modern houses. The disproportionate number of houses is changing a village into a suburb of Guildford and, without the fields and green spaces for which it is renowned, it will soon morph into urban sprawl and the treasures of the National Trust at Hatchlands and Clandon Park will be mere islands in a suburban landscape which few outside the area will wish to visit.

There is a much stronger economic, infrastructure and social case for building houses on such a vast scale on the University side of Guildford, which is in need of redevelopment, no green space will be sacrificed and where existing transport links are strong and appropriate already.

I sincerely hope the views of local, long-standing residents of the Horsleys will be given due consideration and that further consultation locally will take place before the character of the village is corrupted in perpetuity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Schools and Medical facilities - local schools are already at capacity. Has any thought been given to where all these new children will go for their schooling? No extra places are planned in the Horsley's and any new places on the Wisley site will not be available for many years into the project. The same question has to be asked about medical facilities - where are the new home owners going to go to see a doctor or dentist?

Flooding - why has a site (site behind Ockham Road North) been chosen which is partially a level 3 flood risk when it is known what happens after prolonged rain. Generally everyone knows that the drainage system in this area cannot cope - please come and see the local roads after heavy rain.

Pollution - the great increase in traffic volume which will result from the proposed new housing will cause an increase in nitrogen dioxide and particulates in the environment. This is already a serious concern for certain areas in the borough. How can you allow such a situation to get worse?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

As a resident of West Horsley I have taken great interest in the proposed developments outlined in the Guildford Submission Local Plan. After careful consideration I wish to make the following objections.

Firstly, the roads in the surrounding area are, at present, not fit for purpose. They require an enormous amount of investment to even bring them up to a reasonable condition for the present traffic but the amount of people and vehicles which the plan would bring to the area would result in further deterioration and in places, particularly during rush hours, complete gridlock. The prime example of this is the junction at the end of East Lane, Ockham Road and the Drift.

Secondly, the area A39 is to be built on land which allows houses at present in the area, to be free of standing water during inclement weather. Whilst I am hopeful that future planners would be aware of that, will it be taken into account? Experience tells me not to assume! The proposed development would be affected badly without doubt.

Lastly, I have grandchildren who also live in the area and attend local schools. Knowing the state of the system at present, where will the "new" schools for the "new" pupils be built because schools locally are up to capacity, or are the planners intending to use other schools not within the district to take the overflow? The resultant traffic from the movement of these children will add to the problem hugely.

The doctors surgery will be overwhelmed, the local shops unsupported as there will be no parking and I could go on. The general lack of common sense and thought about the people of the area is staggering. I hope some good sense will prevail and the plan will be completely revised.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
The proposed expansion of West Horsley village is unsustainable. With only one small shop, no post office, a very limited weekdays only bus service through the village, it is clearly unsustainable for the proposed high volumes of new housing development. The development of 385 homes on the four proposed sites are at much higher densities than currently exist in the village settlement and will be totally out of character with the existing mix of different housing styles and layout of the village. The homes building proposals are unsustainable in terms of schooling, drainage, roads capacity, shops, parking in East Horsley (shops and station) and public transport.

The need for so many houses to be built in West Horsley over the first 5 years of the Plan period 2018 to 2033 is totally unproven. The West Horsley Parish Council and Surrey Community Action Housing Survey: May 2014, identified a limited need for some 20 affordable homes for local people who want to remain in the village, i.e. for young people and for elderly people who wish downsize to a smaller home.

There is a continuing lack of state primary school places in the village. The Raleigh School which serves both East and West Horsley is full every year and this has been the situation for many years. Secondary school places are also limited in number at the Howard of Effingham School and other secondary schools involve greater travel times and further distances. Glenesk and Cranmore private schools are well supported by many families living in Guildford and other villages up to 14 miles away. Each of these private schools during term time, receives high volumes of traffic going to and from the schools at the beginning and end of the school day, on Ockham Road North and the A246, respectively, already causing congestion.

Kingston Avenue Medical Centre, serving all of East and West Horsley and areas beyond, is always extremely busy and residents experience difficulty in making appointments. The planned population increase (in excess of Government ONS forecasts) for the Borough will require a major extension of the Royal Surrey Hospital to cope.

Whilst Horsley station has frequent trains to London and Guildford 7 days a week, the station car park is normally full on weekdays. An increase in village population will increase pressure on station parking and traffic movements to and from Horsley station to drop off and collect travellers to London and school children going to Guildford and Leatherhead.

The increased level of traffic from the proposed new housing estates will be considerable. Most households in rural areas as a necessity have 2 cars, many having 3. Journey times on local roads will increase significantly.

There are known sewage overflow problems in the Ockham Road North/Green Lane area. Thames Water has advised Guildford Borough that the area’s wastewater network is unlikely to be able to support the demand anticipated from all the proposed developments. The foul drainage system from West Horsley to the treatment works north of Ripley, will need to be upgraded to cope. Thames Water advise ‘a 2 to 3 years lead-in period” to install the necessary waste water network and treatment capacity after planning permission for a development is granted.

It is for these reasons that I strongly object to the GBC Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Having studied the "Draft Guildford Borough Local Plan – Strategy and Sites, June 2016” I write to you in objection to a number of the policies, herein stated below.

**Policy H1: Homes For All, Policy H2: Affordable Homes**

I object to the above policy. The proposed development of 531 homes over Green Belt sites in West Horsley is out of proportion with the current number of houses in the village. This is also completely out of character with the village with regards to style and layout, and is unsustainable on existing services and amenities. The village is served by one local convenience store, a part time newsagents, and one small MOT garage.

There is a very limited bus service, which runs through the village, and Horsley Station is already a busy commuter station hitting capacity for car and bike parking. The only school in the village, The Raleigh, is already oversubscribed and additional population would mean existing residents would be further stretched for places meaning traveling to other villages/towns for schools.

In addition, the West Horsley Parish Council 2014 Housing Survey indicated a requirement for merely 20 affordable houses for the young or elderly wishing to enter the housing ladder or simply down size. This contradicts the proposed 531 houses for the village.

**P2: Green Belt and the countryside**

I object to the proposal to remove West Horsley from the Green Belt. There appears to be no justification for insetting these Areas from the Green Belt so I object to West Horsley's Defined Settlement Area boundaries being extended. According to the National Planning Policy Framework, in order to build on Green Belt sites, there must be "exceptional circumstances". There are none stated for this particular case.

Building into the Green Belt area will change the character of West Horsley village. Land and green space will be lost, create damaging environmental changes, all of which increase the risk of West Horsley morphing into another busy, densely populated, concrete, suburban town. Building into the Green Belt area will change the environment with adverse, damaging and permanent affect and will have impact on the Surrey Hills AONB, which attracts a great number of visitors each year.

**Policy D4: Development in urban areas and inset villages**

I object to new developments in inset village, due to the fact the volume of proposed houses will not compliment nor respect the existing grain and pattern of the areas. The layout and scale will be completely disproportionate to the existing scale of the village. It will also have an overwhelm,ing negative impact on the amenities and residents of the existing buildings.

**Policy A37: Land at and to the rear of Bell and Colvill, Epsom Road, West Horsley**

40 homes is unsustainable and unbalanced for this delicate and attractive environment in West Horsley village.

**Infrastructure and delivery**
The increased population would bring with it increased village traffic, higher requirements for public transport, and oversubscription for the local school which already runs to maximum capacity.

The volume of traffic through the village will be damaging on the noise levels and air quality, add increased risk and dangers on the roads, and will further add to the damage on the tarmac the residents already experience on East Lane. Both drivers, cyclists and pedestrians safety will be compromised. The children’s nursery Footprints on Longreach and the primary school on Northcote Road will be highly impacted with the increased volume of traffic with the proposed sites around East Lane. Plus, journey times would increase with the increased traffic on these narrow village roads.

The existing facilities already feel the pressure of the village population: the medical centre in East Horsley struggles to make appointments for the local residents; the drainage infrastructure already has a capacity issues, with overflow problems in the Ockham Road North/ Green Lane area; and the rail station runs to capacity with a daily full car park.

Thank you for considering my appeal and objections and I look forward to the response in the near future.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I have yet to see Guildford Planning authority give a justifiable case and evidence of such exceptional circumstance, to use so much Green Belt land. I see no evidence that clearly shows that all brownfield and other sites have been completely scrutinised to the nth degree and that there is no other options to consider.

Guildford Borough Plan seems to believe that they can just change the Green Belt boundaries thus removing the status of areas of Green Belt to aid developments which are opposed by local committees it is supposed to protect and serve.

Thus this makes the proposed Policy 10: Green Belt and the countryside and Policy 8: Surrey Hills Area of outstanding Natural Beauty and the study's flawed. There is no sound case in changing due to exceptional circumstances the green belt boundaries.

Changing the Green Belt boundaries and developing large numbers of homes around Villages that have only a finite resources of limited shops, schools, transport links, roads and public services will change the character of many villages.

Clearly expansion plans to the villages of East and West Horsley are unsustainable and putting more pressure on Areas of Natural Beauty.

Policy 9: Villages & Major previously develop sites and policy 18: Sustainable Transport for new developments.

Where is the Evidence or Studies of "Can these villages sustain such growth without plans to improve the infrastructure required" If not where is the infrastructure upgrade plan.

I believe also in the plan there will be homes for all and affordable homes. Which is a good thing but the large amount of homes indicated on three Green Belt sites at a high density plan will change the character of the village. It will also put an ever increasing strain drainage, roads, schools, transport links, shops and parking. I also wondered how affordable this homes will actually be in this area.

I believe the number of homes for this area is over subscribed and that infrastructure should be vastly improved before any such numbers are though about. Even the telecoms and broadband services are under strain and that super fast Surrey is still struggling to offer fast broadband to all its homes. All the schools seem to be full in the area. The infrastructure is clearly not going to be able to sustain the growth.

From the points and comments above to Guildford Borough Councils Local Development Plan for East and West Horsley I therefore object to all developments in the area proposed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/3994    Respondent:  10915681 / Karen Bushnell    Agent:
Document:    Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to object to various points in the latest Guildford Borough Council local plan.

1) My first objection is to the proposed removal of the villages of East and West Horsley and other borough villages from the Green Belt. This would appear to be in contradiction to your section Policy: Pt 3 Our Vision and Ambition. This states "To protect and enhance the environment .......". The Green Belt is not Guildford Borough Councils to give away as it is for the benefit of existing and future generations of Londoners as well as local residents. I agree with Guildford Greenbelt Group that once it is gone it is gone forever.
2) I particularly object to the extent of proposed development of 533 new houses within the Horsley's. Our roads are already congested at peak times, it is difficult to park by our village shops, our Medical Centre and local schools are over stretched. We are unable to accommodate an increase in our population of this size.

I am writing to object to your local planning policy. My objection is to the 2016 Draft Local Plan

- I object to all erosion of the Green Belt
- I object to any “in setting” (ie removal) of any villages from the Green Belt
- I object to the disproportionate amount of development in one area of the borough.
- I object to the limited consultation period
- I object to last minute inclusion of new sites with less than 2 weeks’ notice. This is a devious way of conducting business
- I object to the lack of any evidence for the alleged housing need numbers
- I object to the lack of immediate provision for new schools
- I object to the lack of any immediate provision for doctors surgeries
- I object to the 40 houses and two travellers pitches at Send Hill. This land is not fit for anyone to live on as it is landfill land and I believe has asbestos buried in it
- Also who on your council would have travellers pitches next to their houses? The truth is none! Examine your consciences please

I am writing to strongly object to the new Local Plan and in particular the proposal to remove the Horsley’s from the Green Belt.

I can see no sound reason for the Horsley’s being included in an urbanisation of land outside the M25. This is wholly inappropriate and unjustified. The Horsley’s have from early times been a rural village and in the 1920’s developed into a rural retreat with dormitory accommodation for London business workers.

The village infrastructure is unable and unsuited to support any further expansion.

1. The transport links are at capacity
   1. The trains into London are full to capacity well before they reach their destination at commuter times and the train companies keep extending the travel times to London in order to meet the timetable.
2. The train station car park is full to capacity already and there is no scope for increasing capacity.
3. The M25 from junctions 8 to Heathrow and beyond to the M40 are some of the most congested roads in the country and increasing housing supply at or near junction 10 at the Horsley’s, Wisley, Burpham and Clandon is wholly inappropriate and ill conceived.
4. The Local roads are unsuitable for increased capacity. The B2039 Ockham road north and South is already too narrow for existing traffic with pinch points at Bishopsmead Parade, Conisbee’s butchers and just south of Station Parade and before Forest Road on Ockham Road South where traffic is reduced to single file if a lorry or coach is on the road. Furthermore the Rail Bridge on Ockham road south has recently been the subject of a Lorry collision as it is a low bridge.

2. The Village infrastructure is already stretched to capacity.
   1. The local state schools are at capacity the Raleigh and the Howard of Effingham. There is no longer a guarantee that parents resident in the Horsley’s wanting their children to attend these schools are able to get them enrolled.
   2. The Medical centre is already at capacity and there is inadequate parking for patients.
   3. The local shops on Station parade have insufficient car parking capacity for existing residents and there is no room for expansion of parking facilities.

3. The proposed increases in capacity have not been thought through correctly. A 35% increase in housing capacity exceeds the increase of any other borough. This combined with the proposed developments in neighbouring areas of Wisley, Burpham, Clandon and Effingham is wholly inappropriate and unsustainable for both Local infrastructure and the National M25 that serves the area. We do not need to urbanise our Greenbelt and gridlock our countryside, when high speed rail networks can spread the population expansion away for the already overcrowded South East.

I strongly object to the Local plan for 2016.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

My husband and I have lived at the above address since 1987, our two children have attended the Raleigh primary and Howard of Effingham secondary schools, we are both busy in village activities and I am now in receipt of a pension after 15 years as a teaching assistant at the Raleigh School.
Suffice to say I am appalled at the Guildford Borough Proposed Submission Local Plan: strategy and sites: June 2016 which proposes a new site for 90 homes opposite Greta Bank which is in addition to the 385 previously proposed in the Horsleys. Accordingly, I would like to raise my objections to this large expansion in village population, particularly in West Horsley, on the following grounds:

1. Both local state primary and secondary schools are at capacity with no guarantee that children living in West Horsley will be able to attend in the future. Extra stress on these high performing schools from additional numbers without increased resources and extra facilities will lower standards. In addition, the transport of young children to other schools in other places will diminish the quality of the children's educational experience and add to existing road traffic problems.

2. The Horsley Medical Centre already has difficulties in providing early appointments with doctors for patients with medical issues so additional villagers, both young and old, would make the situation The alternative of attending the A&E Department at the Royal Surrey County Hospital only transfers the problem elsewhere on an already over-stretched NHS.

3. The Street and East Lane are already congested with early morning road traffic due to on-street parking, a single lane chicane and numerous school There is thus the serious risk of injury to schoolchildren and cyclists from increased traffic at a time when drivers can be tempted to rush to their early morning destinations.

4. Flooding on The Street and East Lane is already a problem after heavy rain The loss of natural drainage with land use change and additional household waste water will aggravate this problem.

1. The inhabitants of West Horsley currently enjoy "green" areas and a relatively tranquil environment which make important contributions to their quality of life Both would be diminished by the proposed development. In particular, the loss of the green space to the south between The Rectory and the railway bridge and to the north between Long Reach and the railway bridge should be strongly resisted because, unlike other proposed sites in the Horsleys, these fields do not abut the currently defined village settlement on any side so should not be considered an "extension of the settlement or 'infill'".

It is disappointing that, despite a recent survey in which almost all respondents agreed that "West Horsley should retain the open aspect and strategic natural space along East Lane, The Street, Ripley Lane, Epson Road and Long Reach, which reinforce the village's rural nature", and several representations to GBC Planning department, the GBC not only persists but has actually enlarged the area of land proposed for new housing in the village.

This letter is a plea to respect our wishes for significant revision to this latest proposal. No boundaries should constrain the argument, even to the extent of having the GBC challenge the basic need for adversely affecting the historical character of West Horsley and other Surrey villages with the Government. Why are there not proposed restrictions on ownership of second homes to release additional housing from the current stock? Why are brownfield sites not being effectively developed first? Why, at the national and regional levels, is there not an effective policy for some control of immigration and the population in small local areas? Addressing such questions would help to reassure the villagers of West Horsley that, whatever the proposal, there would at least be a sound basis for accepting some adverse effects on our quality of life. At present there is none. The proposed Plan should be withdrawn.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
into the village. The Street has limited access at the Bell and Colville roundabout and near Edwin road it is reduced to single file traffic. From the North Ockham Road North is a narrow country road which can’t take two lorries passing. Old Lane is narrow, with a number of hazardous bends and a difficult junction into Cobham road. From the West The road from Cobham is the best route into Horsley but it is restricted at the railway bridge on Forest road. This road takes a lot of traffic as it is the access road from Horsley to supermarkets at Cobham. From the East A series of narrow roads provide access from Burntwood but none are capable of sustaining significantly increased traffic. b) Retail Structure The retail environment at Station Parade consists of 25 premises plus 3 at the bottom of Cobham Way, including a library, post office, chemist, 5 restaurant/cafes, butcher, baker and 2 mini supermarkets. The largest of these units are approximately 170-200 sq. m. There is no room for expansion of retail premises nor for the provision of extra parking places. This cannot be expanded or developed to a worthwhile retail centre. Bishopsmead, to the south of East Horsley is much smaller and similarly constrained. West Horsley has virtually no retail presence. c) Infrastructure There is already pressure on school places, doctors surgeries and parking. The Horsleys cannot sustain a significant increase in demand. In addition, there is limited space for expansion of any of these facilities. d) The Geography of the Horsleys The Horsleys lie just north of the A246 which runs to the north of the North Downs. Rainfall on this area flows north and causes periodic flooding in heavy rain. There are frequent problems with storm drains flooding in the Horsleys. Green belt land in and around the Horsleys is needed to absorb this water run off. Further building will exacerbate this problem. SPECIFIC OBJECTIONS 1. I OBJECT to the basis on which the housing requirements have been calculated. As they are not transparent they lack credibility. 2. I OBJECT to the final target housing number (based on a mathematical model which has not been disclosed) which is almost 70% higher than the official national estimates for population growth in the Borough.

I OBJECT to the lack of understanding of the infrastructure constraints of the proposed new households on the Horsleys villages and to the absence of any effort to deal with them. If around 2,600 new houses were built in the Horsleys, Ockham and Wisley airfield this could easily result in around 5,000 more cars within a three mile radius of the villages. Traffic This would have a huge impact on local roads which as outlined above have little scope to be widened (e.g. pinch point at Lynx Hill on Ockham Road South and the restricted area on East Lane) or otherwise altered to cater for such an increase. Although it is proposed to upgrade the current A3 junction at Burntcommon to a full 4-way junction. SCC traffic modelling anticipates increased use of Guileshall Lane, Hungry Hill Lane and Tithebarns Lane (all not suitable for increased traffic volume) for traffic accessing the A3 at Burntcommon in order to travel to Guildford and beyond. The SCC report states that “consequently, it indicates that further thought may have to be given to managing traffic in this area as part of a transport assessment should the development be progressed”. A local plan when proposing new housing on a substantial scale must surely plan for the implications of increased traffic both on the major roads such as the A3 and the minor village roads. The current draft local plan has not given such issues enough consideration Parking at Horsley & Effingham junction stations (which are already full), at the shops, at the Horsley medical centre and at the village hall will not be able to cope with this additional demand. Flooding The site behind Ockham Road North in East Horsley is partially a level 3 flood risk area, and local residents are well aware of how much standing water there is in their gardens after rain. Building on such land will only exacerbate the problem. Other areas of the Horsleys are also flooded when it rains become the drains are inadequate. Substantially more houses will exacerbate the problem but no attention has been paid to drainage in the local plan. • Schools and medical facilities Amenities Local schools and medical facilities are already at capacity. No extra school places are planned in the Horsleys and the school places proposed at Wisley Airfield will not planned until many years into the project. 2600 new houses could easily mean 2600 children looking for school place! I trust the Council will review its Local Plan basing it on a model which is available for inspection and with more attention to the infrastructure implications and use of brown field sites rather than destroy our precious Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. Sites in East and West Horsley

I OBJECT in particular to including Sites A36-41 (East and West Horsley). This is a back-door way to create a mega-village—essentially, a soulless new dormitory town. The Horsleys feel victimised by this plan, which has been masterminded by Council leaders representing Ash and Tongham at the other end of the borough, where (in a flagrant case of political double standards) the Green Belt is actually being extended under Policy P3.15

Whatever their merits as development sites, the 6 Horsley sites should not be considered individually but for their cumulative impact on the contiguous villages of East and West Horsley.

Building 533 new houses on these 6 sites, plus at least another 90 on small sites is (a) excessive in absolute terms and (b) disproportionate relative to the rest of the borough. It will destroy the rural character of these communities.

Under the plan, rural West Horsley will take 35% of new homes, urban Ash and Tongham 16% and Guildford urban area only 11%. The total number of homes in West Horsley will increase by 35%, which is disproportionate when measured against the overall increase in housing across the borough and particularly in Guildford town. If the Council have justifiable reasons to transform a particular community so radically, the plan should present a case rather than putting forward site proposals as a fait accompli.

These sites will put unsustainable strain on local facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewage, surface drainage and shops. For instance:

- Thames Water have advised the Council that the current wastewater network will not cope and that the foul drainage system all the way to the treatment works North of Ripley will need to be upgraded.
- Guildford Council's Education Review says "expansion options may need to be considered for primary" education in the Horsley area within the first 5 years of the plan, but Surrey County Council have no plans to do so. The Raleigh School is already full. The private Glenesk and Cranmore schools are also at or near to full capacity. The suggestion that schools in Ripley can be used contradicts the plan's stated intention to reduce traffic on the A3 and strategic aim that primary schools should be within walking distance.
- The plan's Infrastructure Schedule (Appendix C) imagines an "East Horsley and West Horsley traffic management and environmental improvement scheme between 2019 and 2023 by Surrey CC" but gives no details. This scheme is just wishful thinking. The proposed housing can only harm the local environment, not "improve" it.

The harmful impact of these sites is magnified by the proximity of the so-called Wisley Airfield site (Three Farms Meadow), with over 2,000 new homes only 2 miles away (see below).

The density of new housing on the 6 Horsley sites is inappropriate, being greater than anywhere in the locality at present.

Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries for which the plan presents no arguments. Contrary to NPPF paragraph 79, this will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.

Collectively, these 6 sites militate against NPPF paragraph 81's encouragement of access to the Green Belt and its amenity and recreation value. This has been a success story in the Horsleys, with the creation of an amenity wood and community garden, the purchase of adjacent fields (on the eastern side of Ockham Road North) by local residents in order to preserve their open aspect, well-maintained pitches for local football and cricket clubs, public tennis courts, open space for a high-quality campsite (at Waterloo Farm) used by many foreign tourists and the approval of plans for a "Theatre in the Woods"- making West Horsley the only village in Surrey with an opera house. The open nature of West Horsley determined that a long portion of the 2012 Olympic cycle races passed through the village. This route has since been adopted by cyclists as a permanent asset, including the annual

"14 E. Gallagher Homes v Solihull Metropolitan Borough Council [2014] EWHC 1283
"15 Councillor Paul Spooner and his predecessor, Councillor Stephen Mansbridge.
"16 Even some property developers complain about the Council's bias in favour of oversized developments, e.g. Dandara, whose relatively small 

Prudential cycle race. These and future examples of "positive planning" depend on protecting the Green Belt to maintain the openness and attractiveness of the local landscape and avoiding the urbanisation and traffic congestion that Sites A36-41 will bring.

By surrounding Waterloo Farm campsite with 120 new houses, Policy A40 on land to the North of West Horsley will make this rural tourism amenity unviable. This may accord with developers' plans, since the site would then be vulnerable to infilling with yet more housing.

Site A40 is subject to an unacceptable flood risk from a combination of a high groundwater table and the lack of surface water run-off. This is flat, clay land on the downhill side of the Horsleys where floodwater from new development will accumulate and back up onto existing properties nearby. I can provide photographs proving how badly these fields already flood at present. These problems will only get worse with the increase in extreme weather events associated with climate change. The "appropriate mitigation" suggested in Policy A40 exists only as an abstract notion. It should not overrule the need for Green Belt "exceptional circumstances".

Policy A40 underestimates the problems of safe access and egress. Firstly, Ockham Road North was closed for several weeks in 2014 because of flooding, and still floods regularly. Secondly, access problems are not confined to flooding and are not addressed by the proposal to extend the existing 30mph zone past the site entrance. Repeated attempts made by Ockham Road North residents to extend this zone have been turned down by the local authorities, Highways England and Surrey Police, even though data collected in 2015 show that traffic has doubled over the last 15 years and that the average speed in the 40mph section of this road is 52mph, with maximum recorded speeds of over 80mph. No traffic calming measures have so far been achieved. Additional housing will add to several hazards along this stretch of road, including:

- Its use by pedestrians, especially children (using the Raleigh and Glenesk schools and catching school buses to Guildford and Howard of Effingham), pensioners living in the string of bungalows at the northern end of the road, and visitors from the Waterloo campsite who are unfamiliar with the area.
- The existence of a narrow footpath on only one side of the road in any one spot. The layout means that walking half a mile between Green Land and East Lane requires crossing the road twice.
- The road's increasing use by recreational cyclists (see above).
- Its winding nature, poor sight lines (especially when interrupted by summer vegetation) and dangerous, concealed driveways. Most of these were built in the 1930s. Some have been widened but many are too narrow for modern traffic. Since a deep ditch runs along most of the road, vehicles have to swing out dangerously when entering or leaving.
- The prospect of additional traffic, including 19,000 HGV movements (90 a day over a long period) if Surrey County Council approves the Drift Golf Course's planning application to re-landscape its site using bulk waste transported from London.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Extension of boundaries of settlement areas of the Horsleys....no sound reason has been given for the proposed changes.

INFRASTRUCTURE. . . There is no scope to improve the width of our roads, they are already being ruined by large lorries using them. The schools, medical centres, shopping areas are already overloaded.

DISTRICT CENTRE for station parade...this classification would be an entirely ridiculous reading of the nature of the facility. The traffic up and down Kingston avenue is impossible at present, let alone if it was increased to a District Centre.

2000 houses on former Wisley Air field / 2000 houses Gosden Hill Farm...... The impact on the Horsleys of these developments would be HUGE . There is no infrastructure to support them and no way that roads drainage can be extended. Are there plans for more schools, medical facilities, shop etc?????? Public transport would need increasing, Horsley station is already overloaded.

I hope you will consider these objections

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The proposed development of 533 homes on Green Belt sites, at much higher densities than currently exist, would be
totally out of character with the existing houses and village layout. These developments would also be unsustainable in
terms of drainage, roads capacity, schools, medical facilities, shops, parking and public transport.

LAND AT FORMER WISLEY AIRFIELD

The proposal to build approximately 2000 homes at this site is in effect the creation of a New Town in the Surrey Green
Belt. This development would be a severe contravention of Metropolitan Green Belt policy and would have a major adverse impact across a widespread area, including East Horsley.

CONCLUSION

I object to the Proposed Submission Local Plan. The Council should be directed to amend the Local Plan by using
brownfield and previously used land for housing instead of encroaching on Green Belt land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
3. Housing need in the Horsleys

The number of houses planned over the next twenty years at the 6 main sites in the Horsleys is 533. (At least 90 further houses could also be developed on smaller sites, according to the Horsley Countryside Preservation Society.) Development on this scale would damage irretrievably the semi-rural character of the Horsleys, the principal attraction of these villages for their existing residents and taxpayers, to whom the Council is sup posed to be accountable. The main centre of employment and future economic growth in the Borough is Guildford itself, yet the Horsleys (and other surrounding Green Belt villages) appear expected to take a disproportionate share of expected new housebuilding.

Approximately 65% of the planned new housing is to be built on Green Belt land. Ade quate consideration of reasonable alternatives, such as focussing on high density develop ments within the curtilage of Guildford itself, does not appear to have been undertaken. The Plan is therefore not compliant with NPPF (para 182.)

I object to the plans to building more houses in the Horsley and Ockham area - we need to preserve the Green Belt.
We don't need any more houses as we are overloaded already with cars, shops, station, doctors and schools- We cannot cope with a whole influx of more houses- our needs are already too busy.
I have lived in Horsley for over 50 years and have seen the expansion of all these facilities- more would be impossible.

My wife and I are resident at [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998]
The B 2039 Ockham Road North/South is already being used like an A road! The structure of the road is not suitable for the current volume of cars, heavy goods vehicles and coaches which has increased dramatically since we arrived here in 2017. If 500+ new houses are built in the Horsleys alone the result will be unbearable. If the so called Wisley Airfield plan was also allowed the result would be absolute chaos.
Our local schools, the Horsley Medical Centre, the Horsley railway station car park and the parking facilities at the 2 shopping areas are already operating at maximum capacity.
There do not appear to be any proposals which would address these problems.

The inclusion of these sites in the proposed local plan is therefore contrary to Policy 13 (Suitable Transport for new developments) and Policy 11 (Infrastructure and Delivery).

We write with reference to the new local plans for further housing in East & West Horsley ('The Horsleys'). The plans, as we understand them, are for the Horsleys to have 533 new houses introduced into the area as well as 2,000 new housing development of the Wisley Airfield. Should our understanding be correct then you are looking to introduce 2,533 new houses into an area spanning 3 miles around The Horsleys.

We are unsure if you have experienced the congestion on the A3 between Guildford and the M25 (JJO) junction turn off at Wisley. The congestion starts from 6.30am in the morning until around 9am and then starts again from 4.30pm until around 7pm with the tail back on some days going back a couple of miles. The A3 and the surrounding area are already experiencing difficulties in handling the existing traffic volumes which will only increase with the proposed new housing.

Outside of the traffic congestions mentioned above we are of the belief the following impacts will be felt to the area:
1. Further road blockage around the surrounding areas of The Horsleys.
2. A further taxation on the children capacity and resources of the local schools.
3. Reduced parking spaces (which has already become a problem).
4. Additional pollution to the area.
5. An impact to the Green Belt status of the area.
6. More accidents in the area.
7. A further drain on the NHS resources in the area (which are already stretched).
8. The potential devaluation of house prices.

We were attracted to the Horsley area some 10 years ago because of its' accessibility, beauty, schooling availability and the local community & village. We have seen a number of changes over the years most of which have been negative, we believe what you are proposing will be of further detriment to the place we originally fell in love with and will negatively impact our young family.

We oppose your plans and wish our objections to be noted.

DEVELOPMENT IN EAST AND WEST HORSLEY

The proposal to develop nearly 600 houses in East and West Horsley would place an unsustainable burden on the local facilities and infrastructure including schools, roads and other essential local facilities needed by the community. Many of these are already being used at full capacity. Also as was clearly demonstrated at the start of 2014 when the area experienced flooding including road closures, any additional development would exacerbate these problems. The designation of Station Parade as a “District Centre” falsely represents its status and seems designed to justify other proposals in the Local Plan. The resignation is spurious and should be rejected.

We also note that the target outlined represents a 25% increase in the housing stock of the borough, which is in excess of the Office of National Statistics (“ONS”) projection of a population increase of 15% for Guildford Borough over this same period.

The proposal to change the Settlement Boundaries to include additional housing must therefore be rejected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2986  Respondent: 10947105 / Brenda Shaw  Agent:

We object to the Proposed Submission Local Plan which Guildford Borough Council GBC has now published for public consultation on the grounds articulated and submitted by East Horsley Parish Council, the East Horsley Action Group, Guildford Green Belt Group and Horsley Countryside Preservation Society, which we fully support.

We are concerned that the infrastructure proposals are inadequate even to meet the needs of what is there at the moment, let alone the proposed developments in the Local Plan. The current infrastructure and facilities around the Horsleys barely cope with current demand to support the local population and it seems that the proposed changes to infrastructure will do little if anything to ease this, let alone cope with an increased population resulting from the excessive number of new houses proposed in the area.

The roads and pavements in the Horsleys area are inadequate, the roads are narrow and there are no pavements along large stretches of roads. For example, the Ockham Road (North and South) is one of the main roads in the Horsleys; this road and the pavements are already dangerous due to the road and pavement widths and the large number of large vehicles (lorries, vans, buses etc) which travel at speed along this road. The proposed alarming increase in housing will only exacerbate this dangerous situation.

The Local Plan's proposed increase in the number of new houses in the Horsleys is quite alarming and the resulting increase in population cannot be supported in this area.

We sincerely request that GBC radically re-assess its own policy objectives rather than force through the Council a Local Plan which clearly does not have the wider support of the residents of Guildford Borough.

I would like to object to the planning proposals for new housing in Horsley.

It seems that the local plan does not make the necessary inclusions for the local infrastructure. Schools, doctors, parking facilities etc. It is just housing. The infrastructure is already pushed to the limits. This situation is only going to make it worse.

The green belt should also be protected. It is very important to the future of our children and their children's children.

Also with the current drainage and flooding issues already encountered, more housing is only going to make this worse.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to place my strong objection to the Proposed Submission Local Plan: Strategies and sites: June 2016 which includes removing East and West Horsley villages from the Green Belt by "insetting". As a permanent resident of West Horsley for almost 5 years I am very unhappy about the proposal of losing the green belt status that made us want to live here in the first place. Within P2 there is no declaration of support for protecting the Green Belt contrary to NPPF and government statements and there has clearly been no evaluation of the value of local Green Belt as an asset. The excessive level of development proposed is in breach of views expressed in the last consultation and Conservative party manifesto commitments in last election.

The existing village infrastructure has NO capacity for extra housing and the additional people/vehicles that brings - the roads are already too busy, many in need of significant repair due to extent of use (for example East Lane) and many (in
particular Ockham Road North) experience significant flooding when there is any continual rain indicating drainage is already at capacity. Additional housing with paving/driveways etc made way for by removing fields, trees, vegetation will only exacerbate this further. There is no way the existing roads can be expanded to take additional capacity - the majority already have housing plots and narrow pavements on both sides. The local primary school is already at capacity and I have no interest in additional schools being added - I want my children to be able to attend the existing reputable local village school and further down the road the Howard.

I OBJECT in particular to including Sites A36-41 (East and West Horsley). The Horsleys feel victimised by this plan, which seems to have been masterminded by Council leaders representing Ash and Tongham at the other end of the borough, where (in a flagrant case of political double standards) the Green Belt is actually being extended under Policy P3.[3]

Whatever their merits as development sites, the 6 Horsley sites should not be considered individually but for their cumulative impact on the contiguous villages of East and West Horsley. It is crazy to consider them independently and the must be considered as a whole.

I consider that building 533 new houses on these 6 sites, plus at least another 90 on small sites is (a) excessive in absolute terms and (b) disproportionate relative to the rest of the borough. It will destroy the rural character of these communities.[4]

Under the plan, rural West Horsley will take 35% of new homes, urban Ash and Tongham 16% and Guildford urban area only 11%. The total number of homes in West Horsley will increase by 35%, which is disproportionate when measured...
against the overall increase in housing across the borough and particularly in Guildford town. If the Council have justifiable reasons to transform a particular community so radically, the plan should present a case rather than putting forward site proposals as a fait accompli. Basically the plan is dumping a disproportionate quota of the borough’s housing need on the Horsleys.

These sites will put unsustainable strain on local facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewage, surface drainage and shops. For instance:

- Thames Water have advised the Council that the current wastewater network will not cope and that the foul drainage system all the way to the treatment works North of Ripley will need to be upgraded.

- Guildford Council’s Education Review says “expansion options may need to be considered for primary” education in the Horsley area within the first 5 years of the plan, but Surrey County Council have no plans to do so. The Raleigh School is already full. The private Glenesk and Cranmore schools are also at or near to full capacity. The suggestion that schools in Ripley can be used contradicts the plan’s stated intention to reduce traffic on the A3 and strategic aim that primary schools should be within walking distance.

- The plan’s Infrastructure Schedule (Appendix C) imagines an “East Horsley and West Horsley traffic management and environmental improvement scheme between 2019 and 2023 by Surrey CC” but gives no details. This scheme is just wishful thinking - another fairy tale. The proposed housing can only harm the local environment, not “improve” it.

The harmful impact of these sites is magnified by the proximity of the so-called Wisley Airfield site (Three Farms Meadow), with over 2,000 new homes only 2 miles away (see below).

The density of new housing on the 6 Horsley sites is inappropriate, being greater than anywhere in the locality at present.

Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries for which the plan presents no arguments. Contrary to NPPF paragraph 79, this will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.

Collectively, these 6 sites militate against NPPF paragraph 81’s encouragement of access to the Green Belt and its amenity and recreation value. This has been a success story in the Horsleys, with the creation of an amenity wood and community garden, the purchase of adjacent fields (on the eastern side of Ockham Road North) by local residents in order to preserve their open aspect, well-maintained pitches for local football and cricket clubs, public tennis courts, open space for a high-quality campsite (at Waterloo Farm) used by many foreign tourists and the approval of plans for a “Theatre in the Woods” – making West Horsley the only village in Surrey with an opera house. The open nature of West Horsley determined that a long portion of the 2012 Olympic cycle races passed through the village. This route has since been adopted by cyclists as a permanent asset, including the annual Prudential cycle race. These and future examples of “positive planning” depend on protecting the Green Belt to maintain the openness and attractiveness of the local landscape and avoiding the urbanisation and traffic congestion that Sites A36-41 will bring.

By surrounding Waterloo Farm campsite with 120 new houses, Policy A40 on land to the North of West Horsley will make this rural tourism amenity unviable.

Site A40 is subject to an unacceptable flood risk from a combination of a high groundwater table and the lack of surface water run-off. This is flat, clay land on the downhill side of the Horsleys where floodwater from new development will accumulate and back up onto existing properties nearby. I can provide photographs proving how badly these fields already flood at present. These problems will only get worse with the increase in extreme weather events associated with climate change. The “appropriate mitigation” suggested in Policy A40 exists only as an abstract notion. It should not overrule the need for Green Belt “exceptional circumstances”.

Policy A40 underestimates the problems of safe access and egress. Firstly, Ockham Road North was closed for several weeks in 2014 because of flooding, and still floods regularly. Secondly, access problems are not confined to flooding and are not addressed by the proposal to extend the existing 30mph zone past the site entrance. Repeated attempts made by
Ockham Road North residents to extend this zone have been turned down by the local authorities, Highways England and Surrey Police, even though data collected in 2015 show that traffic has doubled over the last 15 years and that the average speed in the 40mph section of this road is 52mph, with maximum recorded speeds of over 80mph. No traffic calming measures have so far been achieved. Additional housing will add to several hazards along this stretch of road, including:

- Its use by pedestrians, especially children (using the Raleigh and Glenesk schools and catching school buses to Guildford and Howard of Effingham), pensioners living in the string of bungalows at the northern end of the road, and visitors from the Waterloo campsite who are unfamiliar with the area.

- The existence of a narrow footpath on only one side of the road in any one spot. The layout means that walking half a mile between Green Land and East Lane requires crossing the road twice.

- The road’s increasing use by recreational cyclists (see above).

- Its winding nature, poor sight lines (especially when interrupted by summer vegetation) and dangerous, concealed driveways. Most of these were built in the 1930s. Some have been widened but many are too narrow for modern traffic. Since a deep ditch runs along most of the road, vehicles have to swing out dangerously when entering or leaving.

- The prospect of additional traffic, including 19,000 HGV movements (90 a day over a long period) if Surrey County Council approves the Drift Golf Course’s planning application to re-landscape its site using bulk waste transported from London.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I'm writing to state my continued rejection of the proposed local plan by Guildford Borough Council, with specific reference to the East and West Horsley borough.

My objections centre around a number of key themes:

- **The Greenbelt status of East and West Horsley**
  - *I am completely opposed to the removal of West Horsleys Greenbelt status by the method of 'insetting' and the subsequent extension of the Local Plan Settlement area boundaries (2003).*
  - The **Greenbelt status of West Horsley** is one of the key reasons people live here - we are located approximately 8 miles from Guildford, 8 miles from Leatherhead and 8 miles from Dorking - if I wanted to live in an urban centre dwelling I would, and i would choose one of those large towns. I actively choose to live in the Greenbelt and moved to West Horsley 4.5 years ago (from Guildford) for the precise reason that the Greenbelt was first created - because the green area and countryside act as my daily 'lungs' to a working life in the metropolis of London.
  - There are **no exceptional circumstances**, nor is it clear what GBC propose those circumstances to be, in order to justify new Greenbelt boundaries. I cannot see any reason why the Greenbelt areas are being targeted, outside of developer pressure.
  - It is clear that expressed views of residents are being ignored - whether in previous consultations (2014) that I understand are not presented to the Independent Planning Inspector, or in council elections where the emergence of newly formed resident parties (Guildford Greenbelt Group), or finally in General Elections where the local Conservative MP - Paul Beresford had to acknowledge that the Greenbelt was
of higher concern to constituency members than the economy (http://www.dorkingandleatherheadadvertiser.co.uk/general-election-2015-meet-candidates-vying-votes/story-26017300-detail/story.html). At what point will GBC listen to its residents?

- Finally, the Guildford Borough Economic Strategy 2013-2031 makes no case for proposed housing development in large volumes within East or West Horsley or even the surrounding villages. I understand this to be a Key Evidence document and urge it to be considered as such.

- **Infrastructure (Policy I1 - Infrastructure and Delivery)**
  - **Schools.** The current state Primary school (The Raleigh) is oversubscribed, with an annual intake of 60 new pupils a year. Whilst an excellent school it has already reached the limits of its current site, and having been over-subscribed for many years it is clear that the current policy for state school primary education is inadequate today, let alone with proposed expansion, and certainly not at the levels suggested by the Local plan as part of the insetting process. Within the village there are also two private schools that cater for primary school education and they both operate with high class numbers. Furthermore, there is a significant traffic issue caused today by all three schools within the area - there is insufficient parking for the Raleigh and the Glenesk school, and Cranmore school causes traffic volume issues and jams on the A246. With regards to senior schools the Howard of Effingham also operates at capacity, and there are no plans to develop that school (planning permission for expansion has been rejected) or to build an additional facility. Furthermore the villages of both Effingham and Bookham are also subject to Local Plan initiatives and proposed housing, which will increase the capacity issues on the Howard and potentially even move West and East Horsley out of the catchment area for the Howard of Effingham. Indeed the current situation is so dire that I question where on earth GBC propose the current children in the village will be going to school for the next 5/10/15 years? I am yet to see a plan to cope with the current turnover of home sales as older generations downsize to young families moving out of London, all of which is adding pressure to existing school facilities and without any housing development.
  - **Medical facilities.** The Doctors surgery in the village (Kingston Avenue Medical Centre) is full! It is very difficult to get an appointment in advance with a typical waiting time of at least two weeks. Emergency appointments entail waiting for up to three hours for a slot to open, in the winter this situation can typically be worse with an increase in young children/older residents requiring increased attention. The local hospital is based in Guildford (the Royal Surrey) and is also a medical facility under stress. Whilst an excellent hospital it manages high numbers today but would be expected to manage a huge population increase should the multiple developments in the Local Plan (not just the Horsleys) go ahead. The medical facilities operate under duress within todays population, the proposed Local Plan development would prove too much, and there are no plans for increased facilities.
  - **Train.** Within the last 5 years there has been a significant shift in the commuter patterns on the stopping service that runs from Horsley to London or Guildford. There is a marked increase in the number of commuters who access the train at both Clandon and Horsley, which means the trains capacity is typical full by the time the train has passed through Cobham and Stoke D’Abernon. Whilst anecdotal evidence it appears that the villages on this train line (Clandon, Horsley, Effingham and Cobham) are all undergoing a demographic shift as older residents move out of the area and young families who require commuter access to London are replacing them. The station at Horsley is currently manned for half a day (till 1pm) on weekdays, it has no toilet access after 1pm on weekdays and none on the weekend, it has no wheelchair or buggy access to Platform 1 (which serves London) and the car park facility is full every weekday. If you also consider that Horsley station is situated on the 'Suburban' line, there is also an issue with the service - the trains do not have toilet facilities, this means that a typical journey (45 mins fast train or 53 mins standard train) can entail 1-1.5 hours of travel with no toilet access once combined with a walk or drive commute (as the husband of a wife who has experienced two pregnancies whilst also commuting to work in London I can assure you that this is not a laughing matter), there is also no air conditioning on the trains, and finally - the Suburban line always has to give way to the faster ‘A’ line (which serves Guildford, Basingstoke and Woking), you can see that the current train service is not suitable for large scale development. And certainly not the development of an additional 35% of new homes when compared to the current number of homes.
  - **Road.** Some of the B roads around West and East Horsley are some of the worst road surfaces I have ever known. Indeed, the junction of East Lane and Ockham Road South may be the very worst (in East Lane), and this is one of the roads that serves both the Raleigh and the Glenesk primary schools - indeed it is only a matter of time before there is an accident (car or bike) that is attributable to the road...
The village also has a problem with speeding drivers - the Ockham Road is used as an access road to the A3 and as such sees high volumes of traffic, at high speeds, during commuter hours. The railway bridge serving the station has also suffered lorry strike multiple times in the last 3 years, even with updated visibility measures that were added in the last two years. Increasing traffic volumes with the addition of new housing will only serve to exacerbate all of the existing issues that are faced on the road.

- **Flooding.** Every winter the village experiences some flooding issues, most notable on the Ockham Road exit onto the A3/Ripley roundabout and also on East Lane in between two of the proposed development sites (A38 and A40). The development of the A38/A40 sites will remove natural flood countermeasures and exacerbate surface water run-off and only further impact the safety of the road during the winter, but the proposed development will also increase the volume of traffic in the village and create further issues across all sites that experience flooding and high water run-off.

- **Sustainable development.**
  - The proposed development of 385 homes on the 4 proposed sites are at much higher density levels than the current village settlement, and will have a big impact on the character of the village, not to mention the infrastructure points addressed above.
  - **Sustainable transport (Policy i3).** Developers are only expected to propose travel plans for development, and contribute to transport arrangements for the able and disabled. This is completely unacceptable - as detailed above the current transport infrastructure is under pressure and will not be able to cope with development, either during the work or after. It is completely unacceptable for GBC to propose that local residents (already opposed to the Local Plan) must suffer disruption and chaos to travel during the works, and then 'put up' with reduced transport infrastructure post the development. There is clearly no intention within the Local Plan to force developers to pay for infrastructure development.
  - **Village expansion is unsustainable.** With limited shopping facilities, limited public transport facilities (bus network and train/train station facilities), limited public parking (already under pressure) high numbers of young families in the area it is simply inconceivable that the village has the capacity to undergo expansion, limited or significant. I see no case for Policies S1 in favour of Sustainable development.

Finally, I note also that the development of Wisley Airfield continues to feature in the Guildford Local Plan, with a proposed 2,000 houses on that site. Located under two miles from the Horsleys it is impossible to see how GBC plans to develop either, or both, of the proposed settlements without significant impact on the Horsley villages as per all of the points above. Wisley Airfield will also contribute to huge traffic issues on the A3/M25 junction (10), notwithstanding the issues that already exist - I invite the Planning Inspector, and the GBC Councillors, to start queuing from the A3 onto the M25 during rush hour every weekday morning - the queue starts at 7am and doesn't abate until after 8.30am. Furthermore I would ask that the Inspector request information from the Highways Agency on the number of times a year that they have registered delays between Junction 9 and 12 due to the high volume of traffic joining/exiting the M25 onto the A3.

The development of Wisley airfield is also unsustainable for all of the reasons mentioned above - that development will also impact the Horsleys. I also struggle to see how it can be justified when only 15% of the airfield is designated as brownfield site.

I hope that the Independent Planning Inspector will be able to view and validate the concerns I raise above, and I hope that the Local Plan is rectified as required and the proposed housing developments are moved to areas that are more suitable, preferably not part of the Greenbelt and in parts of Guildford where the infrastructure can sustain population growth.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I am only commenting on the plan for the Horsleys where I live.

Not one scheme appears to allow any improvement to the main roads, which are little more than the lanes of years ago.

Development will only put money in the pockets of the builders, and will not solve the housing shortages. Any housing will cost beyond the reach of most people, so occupants will probably work in London, using the train, with inadequate parking at stations.

If ‘affordable’ houses are built will still no be affordable by most people of working age. They will probably go to the buy to rent market.

It would be better to build council houses going to locally listed families, with local jobs.

Parking, Schools, roads, Doctors and Hospitals are all stretched to the limit at the moment.

The sensible policy would be to encourage work and housing prospects in the rest of the country, and allow Guildford to remain more or less as it is now, and not spoil the existing green belt for future generations.

Large numbers of ‘save the green belt’ signs are now appearing, so it is obvious that these policies are against the wishes of the majority of local people.

Just commenting briefly on the town centre and the ‘pop up shops’. Nobody is rushing to provide a proper development on this site. How about a ‘pop up road widening and a ‘pop up’ parking area?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
local State schools are full. We also have the possibility of a huge increase in demands on local services from related
development in the borough which will spill into our living space such as at the Wisley Airfield. There will also be a need
for more trains to cope with increased users - something which Southern Rail seem unable to cope with already.

-The Green Belt: It does not seem to me that this should happen as per Policy P1 & Policy P2 - The first line of Policy P2
states, “We will continue to protect the Metropolitan Green Belt against inappropriate development.” No exceptional
circumstances or other justification is made for the new Green Belt boundaries that will result from the proposed insetting
of the two parts of the village from the Metropolitan Green Belt. This is a precious Area Of Outstanding Beauty and
every effort should be made to stop it from being over run with infilling and commercial development which will
ultimately benefit a favoured few rather than the massive number of people who currently live and travel to this area to
enjoy the surroundings.

As a longstanding resident in the area I am very concerned at the lack of detailed thought regarding the points above and
also that the place where I live with my family and love for all the characters that it has would be changed dramatically
by these proposals.

I am writing to express my strong views against the above proposed local plan.

In general terms I cannot understand how the plan for proposed new homes has 64% of them in the Green belt

At this level it suggests you have given up trying to protect the green belt. You must be able to do better than this!

Additionally, there is no clear rationale as to how the volume of new homes to be built (13,800) was arrived at. With a
decision as important as this, it is not enough to say that ‘we commissioned independent consultants to conduct a survey’.

What was the methodology? We should be able to see their report – surely there is nothing to hide?

Turning to my own area, West Horsley, I cannot understand why West and East Horsley need to be removed from the
Green Belt except for the reason of jamming in an unacceptable volume of houses.

To plan to increase the houses in West Horsley by 35% and at a denser level than the existing housing stock obviously
affects the character of the Village. But this is about much more than aesthetics:

1. Education: The Raleigh Primary School is already full and so is the Howard of Effingham Secondary School.

The Surrey County Council has produced no plans for increasing school places in the Horsleys.

1. Infrastructure: The local roads can barely support the existing level of traffic and parking spaces are already
inadequate.

1. Drainage: Thames Water has already advised GBC that their current wastewater network will be unlikely to
support the extra housing load.

2. Medical Facilities: Kingston Avenue Medical Centre struggles to serve the Horsleys already and residents
complain about the difficulty in obtaining appointments. The planned population increase can only exacerbate
this problem.
There seems to be no thought applied to how these problems will be resolved and they would only arise if the Guildford Plan goes through as currently shown. Unless solutions to these very real problems are found now, I do not see how this level of additional housing can be justified in the Horsleys.

I hope that you take these arguments into consideration.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I live in West Horsley and once again I object to the Guildford Local Plan on a number of grounds but in main to the ridiculous and unjustified number of houses at 13,860 with a completely unjustified increase in houses near to and within the Horsley's:

i.e. 533 houses on larger sites, with 60 on smaller sites;
over 2000 houses at Wisley Airfield, already rejected but still INCLUDED in the plan;

This is just about DOUBLING the size of the horsely’s with absolutely no new infrastructure. The current roads FLOOD regularly, the roads are terrible to drive on, the drainage cannot cope, there is no real transport links, schools, doctor’s surgeries are full. All of this against a plan which proposes taking the villages out of the green belt for no other reason than concreting them over. Planning regulations do not allow for this except in EXCEPTIONAL circumstances and taking the villages out of the greenbelt to build on them is not a valid reason.

I OBJECT to the number of cars that would obliterate the local roads, using an average of 2 cars per house this is nearly 6,000 extra cars in a village with extremely poor roads, drainage, infrastructure. The plan makes no provision for improvements.

I OBJECT to the plan on the grounds of the level of pollution introduced by these extra cars, houses etc.

I OBJECT to the plan on the grounds of the infrastructure will increase flooding where we already have flooding every year.

I OBJECT to the plan on the grounds that there is no provision for extra school places within the Horsleys in the plan despite swamping us with extra houses.

I OBJECT to the plan on the grounds of the lack of facilities proposed such as doctor’s surgeries, public transport.

I OBJECT to the plan on the grounds of transport - no real increase in public transport and the train into London each morning is now already almost full with standing room only from a few stations from Horsley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am a resident at [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] West Horsley, Surrey, and have lived at this address for over nine years having lived within the county for close to 40 years.

I strongly object to the proposed plans for building within the West Horsley village, the scale and density is completely out of keeping with the density of the village housing currently and will fundamentally over crowd and negatively impact the character and setting that the current villagers enjoy and are entitled to.

The village does not have the infrastructure to cope with a 35% increase in housing, drainage is poor with frequent flooding, there is almost no public bus service with transport primarily to and from London resulting in a dormitory increase rather than local jobs and enterprise.

The NPPF requires that plans MUST respect character and density and these proposals clearly do not and they should be rejected in there entirety.

For these reasons the villages should not be removed from the green belt and the plans do not offer sufficient justification for such a reclassification having failed to prove 'very special circumstances'; there are alternatives as outlined below.

The increased housing would be far better placed in and around GUILDFORD itself, transport links exist, public amenities, park and rides, large supermarkets and local schools. Increases in GUILDFORD homes would add a positive dimension to the local businesses in the city, increase enterprise and job creation as the infrastructure would be able to cope.

There appears to be a disproportionate burden being placed on West Horsley with a 35% increase in homes whilst Guildford itself has a plan for 11%, this would appear to fly in the face of common sense and the actual situation on the ground with regard to suitability. The actual fully costed proposals to build this volume of homes in West Horsley, once infrastructure is accounted for, will be far higher than in Guildford and that's before the loss of the village and its unique character is accounted for. In this time of austerity the council would be wasting public funds that should be spent on essential and much needed services elsewhere.

Based on my daily experience living in the village I would make the following observations:

1. The roads are already overcrowded and cannot take additional traffic.
2. The station car parks are at capacity now.
3. Village parking is at capacity now
4. Surgery is at capacity now.
5. Schools are at capacity now.

In summary the proposals do not take into account how the current population will be impacted NOR how the proposed new residents would have to deal with the inadequate setting they would find themselves in.

It therefore serves neither of the core stakeholders it is intended to.

The Raleigh School

The proposed move and redevelopment of this school should be opened to a public consultation.

In my view the school, whilst very good, has lost sight of its core purpose which is to serve its local community rather than have children driven in from Cobham and other towns further afield. If these children were educated in their own towns there would be no over crowding issues at the Raleigh. The issue for the council is to address educational needs where people live rather than increasing traffic and cost to all by not proactively dealing with the problem at source.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to this policy.

The above sites are within the designated Green Belt area.

Per NPPF, “inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances”. The proposed developments are inappropriate by their scale and nature, especially within Green Belt. It will make the Horsleys a town, not a village, so perhaps, the Council should think of consulting the residents on a proposal to change the status first.

There is nothing in the above policy proposals to demonstrate the required “exceptional circumstances”.

The proposed increase in the housing stock is considerably above of the current level of 15% population increase. Our infrastructure and local facilities and amenities are already under a lot of strain, our roads are not able to cope with any further increase in traffic - all of which need a considerable investment even without the proposed developments. If the Council struggles to find the funds now, what state of these would be following a dramatic jump in the population resulting from the proposed developments?

The proposed developments will make an irreversible footprint on the environment, forever destroying the natural beauty that is so much cherished and enjoyed by everybody who lives or visits our area.

While I appreciate the need for new dwellings, available brownfields should be allocated to meet this need in the first instance. The proposed plan however has not demonstrated sufficient consideration of the available brownfield sites potential.

I am very concerned that the local authorities, having already held a consultation in 2014 resulting in a high number of registered objections, still continue with the outlined proposals in what appears to be a single-minded and dictatorial style of approach. I strongly object to all proposed developments in policies A36-A41 and hope that my voice will be heard.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the local plan because it will completely change the character of this historical village for the worse.

I object to the local plan as the infrastructure of the village cannot support this amount of development. The drainage is already problematic and there has been no consideration for this.

I object because the doctors is always busy and it is difficult now to get an appointment and there is barely enough parking when I do go.

I object because the Raleigh School and The Howard School are already at full capacity.

I object because the local pre-school nursery is not able to provide any more than two days a week for my daughter.

I object because parking for the local shops is always a challenge, often having to drive round and round to find a space.

I object to the local plan because there is already traffic congestion in the village at peak times.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Having looked at the proposals put forward by Guildford Borough Council in the new Draft Local Plan, I would make the following points and objections regarding the plans to develop sites at:

Thatchers Hotel, East Horsley (ref A36, ID 2044)
Ockham Road North, East Horsley (ref: A39, ID 240)
Bell & Colvill Garage, West Horsely (ref: A37, ID 1 6)
Ockham Road North, West Horsley (ref: A40, ID 975)
Manor Farm, West Horsley (ref: A38, ID 1 5)
East Lane, West Horsley (ref: a 41, ID 2063)
Wisley Airfield site

My concerns and objections to the proposals to develop these sites are as follows:

**Loss of Green Belt land**

The Green Belt is a very precious resource and without the strong protection it offers against most forms of development, the countryside will be consumed by urban sprawl and the character of our village and surrounding area will be irreversibly eroded. Allowing development in the Green Belt assumes that this land is only valuable if built on, a flawed assumption in my view. Maintenance of the Green Belt is needed now more than ever.

**Traffic and parking**

The negative impact on local roads will be tremendous. Parking at Horsley & Effingham junction train stations is already full on most days. There is very little parking for the shops along Station Parade and Bishopsmead at present. Parking for the Horsley Medical Centre and at the village hall is likely to be impossible.

**Pollution**

The large increase in volume of traffic will cause an increase in nitrogen dioxide and particulates in the environment – already a cause for concern for health and to the environment in several areas in the Borough.

**Flooding**

The site behind Ockham Road North in East Horsley is partially a level 3 flood risk area. Building on such land will only exacerbate the problem. Local roads already flood when it rains as the drains are unable to cope.

**Schools**

Local schools are already at capacity and yet no extra places are planned in the Horsleys, and the school places proposed at Wisley Airfield are not likely to be available until many years into the project as far as I understand.

**Medical facilities**

I assume the Horsley Medical Centre is already at capacity as we are often quizzed by the receptionists as to whether or not we are full-time residents of the Horselys. Students (as part-time residents) are already treated particularly badly due to the existing overcrowding of this facility.

**Transport**
The Draft Local Plan is likely to give rise to misery for commuters, with nowhere to park and full trains at commuting times. It is bad enough now, let alone if the 500+ houses under consideration for the Horsleys and the 2000 houses at Wisley Airport are approved and built.

**Enormous scale of building programme**

I am very concerned about the enormous scale of the proposed building program which seems to overestimate the rise in population in the area within the 2013-2033 time scale when compared to the Office of National Statistics projection for the same period. This would also lead to years of living in the midst of a building site with all the heavy trucks, road congestion, noise pollution and disruption that this would involve.

I trust you will take my views into consideration.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the proposed local plan for the following reasons:

I object to the village’s removal from the Green Belt or extending the 2003 Local Plan Settlement Area boundaries.

West Horsley’s settlement boundaries don’t need to be extended.

We have a rich mix of low density housing and historic buildings. It sits partly within the Surrey Hills AONB and is enjoyed by visitors, such as walkers and cyclists.

Housing should be near economic development sites on the opposite side of the borough.

The key evidence document (Guildford Borough Economic Strategy 2013-2031) doesn’t make a case for a large increase in housing in West or East Horsley.

13,800 new houses (built between 2013 and 2033) in the villages surrounding Guildford, particularly in West Horsley, are excessive and unsustainable.

In West Horsley we have one small shop, no post office, and a very restricted bus service. This is inadequate for the proposed increase in housing. Already you can’t park outside the shop half the time!

Local infrastructure can’t cope as it is; there is a lack of schools and shops; drainage is overloaded; parking is in short supply. The station car park in East Horsley is often full already and will just lead to people parking on the sides of the roads, many of which are narrow. This would entirely spoil the look of the existing rural nature of the village. We do not want all our roads lined by cars!

There is no proof that this number of homes to be constructed during the first 5 years is needed. The West Horsley Parish Council and Surrey Community Action Housing Survey: May 2014 said that 20 additional affordable homes to cater for young people and local elderly people who wished to remain in the village by down-sizing to smaller homes would be required. There are enough smaller sites where this can happen.
Guildford Council hasn’t shown to my satisfaction that a large number of houses can’t be built in the town centre/brownfield sites instead. It’s clearly cheaper for developers to build on greenfield sites and this is an utterly unacceptable reason for West Horsley to be taken out of the Green Belt.

Developers have been asked to propose facilities for the elderly, disabled, or those with small children, (best served by developments/transport within towns and close to extensive amenities, including health care) which is not the same as ‘will be REQUIRED to deliver’.

The Raleigh School has been oversubscribed for several years.

Pupils attending the Howard of Effingham School (which has very limited places) have to make a significant bus or car journey to get there.

There is already heavy peak-time traffic to the two private schools of Glenesk and Cranmore.

It’s already difficult to get an appointment at the doctors’. An increase in patients will just make this even worse.

There are trains to London and Guildford, but the station car park is normally full during the week. It won’t be possible to extend the car park. Why build houses out in the country if people have to then get a train into Guildford? Build the houses in Guildford in the first place!

Because of the West Horsley’s location most households have at least 2 cars. The proposed housing will increase traffic on the already third-world roads, which are in a shocking state as it is.

Sewage often overflows in Ockham Road and Green Lane.

Thames Water has told Guildford Council that drainage network probably won’t be able to cope with any increased proposed population increase demand. Apparently the foul water drainage system connecting West Horsley to the treatment works north of Ripley needs upgrading and Thames Water suggests 2-3 years lead-in following planning permission if given.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing with reference to the 2016 Draft version of the Local Plan. In particular I would like to **object** to the proposed expansion in the Horsley’s.

- **Congestion** – The A3 ad M25 are already at capacity at peak times. Any increase in housing will exacerbate the congestion in and around the Horsley’s.
- **Local Facilities** – the local facilities cannot take any additional capacity. There are limitations at the local primary and local senior schools. The Horsley doctor’s surgery already has a problems servicing the existing community. There is also already a major problem with parking. I don’t believe that there is any infrastructure plan to accommodate the increase in housing – how can that possibly work?
- **Safety** – the roads cannot accommodate an increase in traffic – there are already significant problems with pot holes and with narrow pavements it would be an issue with people’s safety. There are a huge number of cyclists passing through who are already at risk and any additional traffic will put them in even more danger.
- **Roads** – there is a significant issue with flooding in and around the area.
- **Greenbelt** – why do you have to build on greenbelt and why are you not finding a site where you could create a new town with all the amenities required?
- **Out of character** – the density of the proposed new developments means they are significantly out of character with the existing villages.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

I am writing to provide you with my views on the draft local plan as part of the current consultation. A large number of elements of the plan are, as far as I can tell, inconsistent with a number of national level and local policies and I would like the Council to consider these as part of the further development of the plan.

**Size and density of proposed developments**

The 2011 census indicated that West Horsley comprised of 1111 households. The proposed development in the local plan table summary on page 125 includes 485 new households in West Horsley – a 44% increase. Within this, the northern end of West Horsley village has approximately 400 households and the local plan includes 445 new households – an increase of over 110%. The current housing density within West Horsley settlement boundaries is around 10 dwellings per hectare, while the local plan assumes a housing density of 14-20 dwellings per hectare – up to a 100% increase in density. Needless to say, doubling the number of houses and doubling the density of housing would completely change the character and day-to-day life of this area of the village, permanently destroying the current community and way of life.

As such, the proposed development in the local plan is a proportionally very large increase in housing, and at a much higher density than the existing village. Both of these elements contradict the National Planning Policy Framework 2012 (NPPF) in many of its policies. One specific major example is policy 9 – villages and major previously developed sites – which states that development should be commensurate to the size, character and function of existing settlements.

I believe that the local plan therefore needs to see a very significant reduction in the number of proposed new houses in West Horsley and a significant reduction in the proposed housing density in order to be consistent with national guidelines.
I understand that the borough does need to increase housing stock and support this aim, as long as it is done in a way that is fair and appropriate to the local areas impacted; however this is not the case across the borough and certainly in West Horsley. It is very clear from the plan that the development level is not fair in the case of West Horsley – for example there are 5 development sites (A37 – A41) and 485 homes proposed for West Horsley as opposed to 1 site (A36) and 48 homes, on an existing built area, for East Horsley, which is a bigger and more dense village currently with 1,343 homes. The existing parish settlement boundaries clearly separate East and West Horsley and therefore the two should not be considered together, these boundaries are the basis for previous and existing development, infrastructure, etc and are demonstrated in the council tax levies which are separately administered for East Horsley and West Horsley. It is also not appropriate for the local plan to redefine settlement boundaries unilaterally to support proposed development.

The plan overall in section 2.3 provides figures showing an 18% increase in population is expected over 22 years across the borough, but East Horsley is expected to contribute a 3.5% increase in homes over 15 years while West Horsley is expected to contribute a 44% increase in homes over 15 years, and the northern portion of West Horsley a 110% increase in homes over 15 years: this huge disparity is clearly unreasonable, and unacceptable to residents and should be unacceptable to Council Representatives too.

**Green belt re-designation**

The local plan is built on the premise that the area to be developed in West Horsley will be removed from the green belt. However, the NPPF and related parliamentary directives state that re-designation of the green belt is only permissible in exceptional circumstances, and that meeting housing targets cannot be considered exceptional. Furthermore, West Horsley is an attractive village with much history and character – it is visited by many cyclists and walkers for this reason and this is a major reason for the decision of many residents to live in West Horsley – and therefore removing parts of West Horsley from the green belt is in contravention of the elements of the NPPF which specifically state that villages with character make an important contribution to the green belt. The plan itself, in section 4.3.12, acknowledges that villages with open character contribute to the green belt, and it could certainly be argued that West Horsley has an open character in this way, especially those sections of West Horsley that are marked for possible development. I do not believe that any part of West Horsley can justifiably be removed from the green belt for these reasons, and I do not believe that the local plan makes a supportable case for this re-designation.

**Sustainable development**

The NPPF states that development must be sustainable, and elements of the local plan do not seem consistent with this ethos. Specifically, the area of Policy A38 contains a number of elements that conflict with the message of sustainable development:

1. The site currently contains a growing and high quality nursery school which provides both employment for a large number (approx. 30) of primarily young women and also provides an essential service for village residents. Without this business, the character of West Horsley would change significantly, valuable jobs would be lost or removed from the village, and some residents would be forced to travel by car to other villages and/or move away from the village as a high quality nursery school is an essential part of their lives and the ability for both parents to work, which provides local and national tax income. I note that the plan includes a general statement that the nursery would be maintained, however it is not possible that the current character of the nursery – next to a farm and open space, which children crave – will survive amongst 135 homes of up to a high density. The plan must ensure the nursery school is maintained, and further that it has room to grow to accommodate new residents (especially required under this plan), with safe access and maintenance of its countryside character
2. Policy A38 also contains good agricultural land and as such a principle of sustainable development would favour other sites such as brownfield sites in urban areas over this one
3. Policy A38 also contains a grade II listed farmhouse

**Infilling**

The five proposed development sites in West Horsley are generally of very large size when compared to the existing settlements, and are not consistent with national and local approaches of limited, sustainable infilling of settlements. In addition to the issue of size, the boundaries and shapes of the proposed sites A38 and A41 in particular can clearly not be described as infill, as in both cases parts of the proposed site are only bounded on two sides by existing parts of the
village – the northern and north western portion of site A38 and nearly all of site A41. The Northern and north western portion of site A38 appears totally unsuitable for development based on infilling with high density housing, as in most places it is only bounded on one side by existing houses, which are of low or very low density, and if the farm house and nursery are preserved as stated, the whole northern end of this development area will be separate from the southern infilled end and should justify it’s own case for development – which it clearly cannot on the grounds of infilling.

SANG space

The local plan includes the re-designation of ‘Bens Wood’ in West Horsley to SANG space, and this availability of amenity space is an important part of the proposed developments in West Horsley – without sufficient amenity space the developments are not permissible. However, this re-designation of Bens Wood as SANG appears to be a unilateral statement which does not appear to be justified or appropriately approved, and requires a full assessment of current usage to assess spare capacity. As this area is also already well used as an amenity space and the spare capacity is not sufficient for the proposed development in the local plan (as the proposed development requires SANG space greater than the total size of Bens Wood even if it were totally unused), I believe that the local plan should not be agreed on the basis of Bens Wood being designated as SANG until a full assessment is carried out, and that the size of development area or number of proposed houses should not be agreed until the spare capacity has been established, and the proposed number of houses is appropriately reduced. A unilateral presumption that Bens Wood can be considered sufficient SANG for the scale of development in the local plan appears to be totally incorrect and will result in failure to secure sufficient SANG space for development later in the planning process.

The additionally identified SANG space in West Horsley (SANG8 in the appendices) is currently farmland which has recently been acquired, likely tactically by developers to support their plans. It would require redesignation from valuable agricultural use. The proximity of SANG8 to Area A38, which is extended way beyond an infill, as stated above, appears to possibly be a way to provide developers with sufficient housing space to develop to that they can fund the significant costs of a SANG development. This negative cycle of development requiring more and more room is greatly to the advantage of developer profits and greatly to the disadvantage of local residents, who see even more housing being developed just to provide funding for a SANG space to justify a base level of housing to be developed.

Facilities and Transportation

The scale of development proposed in West Horsley is enormous compared with the current scale of the village. This proposal would require a full study of many elements of facilities and transportation, and it is likely that many of these elements would cause significant challenges for development. These include, but are not limited to:

- **Primary schooling** – the Raleigh school has little room for expansion and is already oversubscribed. I believe that one of the development areas for housing proposed in the plan directly conflicts with a possible new site for the school which of course makes doing both impossible
- **Secondary schooling** – there are no secondary schools available in either West or East Horsley as it is, with long car journeys, buses, and capacity issues with the Howard of Effingham school, which itself is already over capacity and seeking a new home. Having so much housing in an area with no local secondary school does not seem sustainable
- **Pedestrian facilities** – in West Horsley, many roads do not have pavements or have small pavements, and most streets are not lit
- **Roads and parking** – traffic is already significant in the Horsley station area, roads are small and often not of good quality (for example, Long Reach); parking is an issue at Horsley station, Effingham Junction station (which would be totally overwhelmed by any development at Wisley Airfield) and the shops in both East Horsley and particularly West Horsley. Some high use roads such as East Lane and the Drift are inappropriate for additional traffic, with dangerous narrow sections which already cause blocks and accidents
- **Transport** – three of the four proposed development sites are not within walking distance of Horsley train station and no/few regular buses are available, meaning a sharp increase in road usage throughout the village from the proposed developments

Policy A38
This proposed development area provider for 135 homes in the North West Part of West Horsley, a huge increase compared to the current housing in the immediate area, which is approximately 130 homes between the relevant sections of Long reach, East lane, and Northcote Road. This huge increase in a small area with a close local community would entirely change the character of this area, especially with the density of housing which will need to be high to accommodate the number of homes. It will also cause problems for infrastructure, surface water flood risk, and green infrastructure. This development area is in addition to others sited very close such as A39, A40, and A41, which will compound these negative effects.

Conclusion

Many parts of the local plan for West Horsley appear to have significant, and in some cases, insurmountable, issues for the proposed development. In particular, West Horsley is a small village which would see massive expansion of a size and scale and density that is totally inconsistent with the existing settlement, and this expansion would also cause many issues with infrastructure and amenity space, much of which is already stretched. In short, the local plan does not appear to provide anywhere near the sufficient justification for removing parts of a village with significant character, in the case of West Horsley, from the green belt and for including developments which could be in part be challenged as to whether they are sustainable or consistent with national planning guidelines. West Horsley is a village with an open character, by which definition should be maintained in the green belt according to the local plan itself – however the proposed development sites in this plan will themselves destroy the open character of the village, in particular by more than doubling the housing in the northern end of West Horsley. It is entirely inappropriate and inconsistent with national guidelines for the plan to deliberately destroy the open character of a green belt village, as this proposed plan would.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Firstly I am totally opposed to East and West Horsley being removed from the Green Belt as there is no justification for this status to be changed and the Key evidence document ‘Guildford Borough Economic Strategy 2013-2031’ makes no case for siting large numbers of new homes in this area.

There are no exceptional circumstances for West Horsley’s Defined Settlement Area boundaries to be extended and the incredibly important Green Belt be developed - once it is gone it is gone and the whole purpose of the Green Belt is to prevent the disappearance of our hugely valuable countryside.

West Horsley village amenities would not cope with the increased influx of people using the one small village shop, no post office and a limited bus service, not to mention the increased volume of traffic. Nor would the amenities of East Horsley be able to cope with the limited shopping facilities, already crowded train service let alone the further proposals to build 2,000 houses at Wisley aerodrome which would likely also also use and rely upon both East and West Horsley’s facilities.

The area attracts a lot of walkers and cyclists throughout the year as we are at the foot of the Surrey Hills and also have a great deal of historic buildings. It is well renowned for being a beautiful area which we have a duty to preserve, the proposed housing development would be totally out of character with the general character of the area and ruin it forever which is entirely unacceptable and unnecessary.

As previously mentioned the area could not sustain the proposed amount of new homes due to the lack of services, but equally as important the lack of drainage which is a real problem in the area at present (with flooding occurring in both summer and winter, often severe), not to mention the increased need for more school places at the local school which is always at full capacity. The increased need for parking spaces would also make using the villages and parking for the Raleigh school incredibly difficult. The doctor’s surgery would also be impacted negatively, it is already difficult enough to get an appointment and sometimes impossible to park at the surgery due to large volumes of traffic.

To summarise, the area simply cannot cope with the amount of new homes provided with lack of services, parking spaces, insufficient school places, the extra burden on the doctors surgery and local hospital, inadequate drainage and is totally at odds with the character of the area in general. These are all very serious considerations which will severely impact the Horsleys but above all the Green Belt simply has to be protected.

I seriously question why the proposed sites are being considered when there is an existing and highly sustainable local town, namely Guilford, where there is a fully workable and tested infrastructure, undeveloped brown sites, the space to do so and it is NOT the Green Belt.

I trust my comments will be taken seriously and the due amount of consideration is used when making this crucial decision.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
My wife and I live in Weston Lea and will be directly affected by The Guildford Plan. Our home, our views and our social lives will be greatly impacted by the imposition of The Guildford Plan and, in our view with no beneficial consequence to the residents of Horsley.

The Green Belt status is imposed for the purpose of controlling urban growth and in order to maintain agriculture, forestry and outdoor leisure. Its purpose is to prevent unnecessary urban sprawl and can and will be resisted vigorously.

The objectives of The Guildford Plan is clearly based on economical gain for the council and will bring no benefit to residents and visitors to this part if Surrey. The construction of extra homes will impose on the countryside views that West and East Horsley have to offer. It will increase traffic flow and population and diminish the exquisite characteristic of each part of the village.

I am sure you are aware of the consideration you must pay to the National Planning Policy Framework which states that The Green Belt ensures; access to the countryside, outdoor sport and recreation, retention of landscapes, improvement of damaged land, nature conservation and retention of agriculture. It is design to prevent; the sprawl of built up areas and the merging of neighbouring towns. It is also designed to safeguard the countryside from encroachment and preserve the setting and character of the town.

The proposals thus far have indicated a clear desire for financial gain alone. The economical cost of The Guildford Plan must also be considered. These will include; the unsustainable burden on the drainage system, the road networks, medical services, schools, parking and public transport. There is no proposal to support and expand these areas and if there are, no doubt the cost of such things will be borne out in our council tax charges. In my view, these areas are already overwhelmed evidence by the over populated schools and medical facilities.

From my perspective, my view of the countryside and forestry will be removed and replaced with a development site resulting in the brick work of the newly constructed homes. The impact on my light will not be known until planning permission is applied for by which time, we as the residents will have already lost this beautiful Green Belt Land.

Horsley was not given so much Green Belt status for it to be removed by a council suffering financial difficulties at a time of economic downturn. Finances and the increasing of profit is clearly outweighed by the need to preserve and protect nature and character and thus the proposed changes should be refused.

I hope that my representations are considered favourably and a response is provided as soon as possible.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
The Guildford Council always inform us that they do not have the resources for repairing the roads, how is increasing the amount of cars using the roads going to help this. East Lane and the Street has not been repaired for several years. All we get is the odd pot hole filled in when it reaches a depth of six inches and becomes dangerous but the general road service of both these roads is breaking up.

The council states that the train service will be used. With Southern cutting 341 trains, how long will it be before that situation affects South West Trains and the roads become more congested?

All of this pays a big part in the health of the current occupants with pollution reaching levels that our government are trying to reduce.

Since the last major floods, drainage has been improved, but Ripley Lane still floods on a regular basis. With the addition of more houses many of the underground streams will have their flow compromised and more flooding will be the result. Would you wish Surrey to become another Somerset?

We have been informed that the council has plenty of brownfield sites that could be regenerated but the council seems determined to ignore these.

Every time the people of Guildford and surrounding areas show their objection for building on Green Belt land the more determined the council appears to ignore their wishes.

In conclusion we strongly object to the Local Plan in that it does not give enough thought to the current residents standard of living, inflicting hardships that when moving into the area they never thought they would have to endure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
further increase in traffic - all of which need a considerable investment even without the proposed developments. If the Council struggles to find the funds now, what state of these would be following a dramatic jump in the population resulting from the proposed developments?

The proposed developments will make an irreversible footprint on the environment, forever destroying the natural beauty that is so much cherished and enjoyed by everybody who lives or visits our area.

While I appreciate the need for new dwellings, available brownfields should be allocated to meet this need in the first instance. The proposed plan however has not demonstrated sufficient consideration of the available brownfield sites potential.

I am very concerned that the local authorities, having already held a consultation in 2014 resulting in a high number of registered objections, still continue with the outlined proposals in what appears to be a single-minded and dictatorial style of approach. I strongly object to all proposed developments in policies A36-A41 and hope that my voice will be heard.

I have attended a presentation at East Horsley Village hall and discussed the impact of the local plan with several of your officers who were there. The only amendments to the rejected Wisley airfield project was a slight expansion of the area with no increase in additional housing To which I strongly object.

The other development issues in the local plan are still the same as before. You want to cram houses into some fields (533 I counted) in East and West Horsley, plus 2200 at Wisley and Ripley is under siege as well. I have protested in the past, but as this is a theoretical amendment, I am objecting again. Sites 38, 39, 40, and 41 are unsuitable. The village is small and the roads are narrow. The required lorry and construction traffic will jam the entire area for years and once it is completed will overwhelm the local facilities. You cannot get a doctor’s appointment for several days at the moment and another 1500 residents certainly won’t help and that’s without the Wisley Development. Local schools are already under pressure and Secondary schools particularly. There is no provision for road improvement in Horsley.

The Ockham Road North development by the railway bridge will put hundreds more cars a day onto a difficult road, with narrow pavements, single file in places and significantly increase the risk of a pedestrian being struck by a passing car or lorry wing mirror. The road also floods easily and regardless of flood risk controls in building, the water will continue to fall and has to go somewhere. You can’t just keep adding to a 1930’s infrastructure. The whole thing needs to be rethought if you are doing something like this. I did note that none of the Council representatives live in the area!!!

The other 2 proposals in West Horsley are also overkill. You may have noticed that there is a stop and go bit of road where it is too narrow for cars to pass and only one lane can go at a time. East Street is certainly not suitable for an increase in traffic of this magnitude.

The final proposal in Ockham Road North is at least a bit further out, but still adds a significant volume of traffic to an already over busy road. I have live there for 27 years and the traffic increase is amazing in that time. It frequently takes several minutes to get out of my driveway and of course there is the mother’s jam at Raleigh and Glenesk schools.

In addition I have repeated the very well thought out objection to the Wisley Airfield below and there is nothing significant in the new plan which changes that situation
Specific Sites in Local Plan

As an East Horsley resident:

- I am not opposed to development of Site A36 and Site A37. I believe these are supportable development sites.
- I am opposed to development of Site A39 as the site is currently in the Green Belt and in a flood zone area.

I am opposed to development of Site A38, A40 and A41 as all three currently sit in the Green Belt and will completely swamp West Horsley village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2349  Respondent: 11009281 / David Foot  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

In the earlier drafts of the Plan, no options were presented on this proposal and you appear to have ignored the huge number of objections made on this matter at the earlier stages of this consultation. The character of the East and West Horsley villages as it exists today is a direct consequence of the protection afforded by their Green Belt status for more than 50 years. Generations of central government and local authority officials and politicians have respected this highly successful post-war planning policy mechanism. Its existence has not prevented organic development of the villages over the years, but has enabled this development to take place in a controlled way. It is surely not beyond the imagination of your Council to make proposals for continued organic development of the villages by appropriate provisions and shaping of policies within the Green Belt rules.

I object to the introduction of a new planning designation that would allow "limited infilling" within an extensive area to the south of the A246 in East Horsley. This might have been acceptable in the context of a more imaginative approach to planning (see comment above) but if you are determined to remove the Green Belt status of the village, then it makes no sense to pick away at the edges.

In the context of the above, you will not be surprised to hear that I also object to the Sites Policies set out in the Local Plan, more particularly in respect of the numbers of houses envisaged for building on each site. If the Green Belt designation of the two villages is to be removed, then all the sites listed for the two villages will have an inappropriately high density of housing, not consistent with the existing character of the villages. To take one example, the proposal to put 48 houses on the Thatcher's hotel site is far too high a density, being more than twice that of adjoining housing. Furthermore, this site is currently occupied by a busy hotel that brings many visitors to the village. This is our only hotel in East Horsley. How can it be consistent with your Economic policy to remove our one and only healthy hotel business? I object to the inclusion of the Thatcher's Hotel site.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/4503  Respondent: 11010081 / Julian Colborne-Baber  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

West Horsley sites:

With respect to the four sites located in West Horsley:

(i) Policy A37 – Land at and to the rear of Bell & Colvill, Epsom Road, WH (40 homes / 1.4 hectare / 28.6 dwellings per hectare)

(ii) Policy A38 - Land to the west of West Horsley (Manor Farm, between East Lane and Long Reach) (135 homes / 8.4 hectare / 16.1 dwellings per hectare).

(iii) Policy A40 - Land to the north of West Horsley (Waterloo Farm at rear of Ockham Road North) (120 homes / 8 hectare / 15 dwellings per hectare).

(iv) Policy A41 - Land to the south of West Horsley (on East Lane) (90 homes / 4.8 hectare / 18.8 per hectare).

Whilst I am not opposed to new housing in West Horsley per se; the scale of this proposed development in West Horsley is excessive and as set out above not reflecting need in any way. In particular I am most strongly opposed to site A41. This site is critical to West Horsley’s semi-rural identity and character and it is vitally important that this open green aspect is maintained through what is, in so many ways, the centre of the village. Adoption of A41 would enable this open space to become the only development of any significant depth along the whole of the southern side of the East lane / The Street corridor and would severely compromise this ‘green gap’ between the northern and southern parts of West Horsley.

This is contrary to at least two of the five essential purposes of Green Belt as defined at NPPF paragraph 80 (namely to check unrestricted sprawl and to assist in safeguarding the countryside from encroachment – functions which this part of the Green Belt, including this site, is recognised as performing at paragraph 8.2 of the Guildford Green Belt and Countryside Study).

This site had not previously been include as a potential development site within previous draft versions of the emerging Local Plan and assessment of this site, in background studies forming the evidence base for this Site Allocation, is based on incorrect information.

Two key incorrect bases are:

1. In the Guildford Borough Land Availability Assessment (LAA) 2016 – Page 388 in respect of site reference 2063 (‘the site of East Lane’) it states under ‘summary of land designations’ – “Green Belt adjoining settlement boundary”. This is incorrect. Unlike any of the other three sites proposed in West Horsley, this site currently has no boundary that adjoins the village Settlement boundary as defined in the GBC Local Plan 2003.

2. Also, The Guildford Borough Green Belt and Countryside Study produced by Pegasus Planning Group, Volume III – Appendix VI – Sustainability Walking Distance Plans for Land Surrounding the Villages refers to the above site, plus the field beyond that the Council now propose removing from the Green Belt (together with a section of Lollesworth Wood) as site D. All assumed walking paths to (i) Nearest Local Centre, (ii) Healthcare Facility and (iii) Railway Station are presuming that access could have been gained to Lollesworth Lane via the undesignated (save that it has been proposed to be removed from the Green Belt) field to the south and fronting
Lollesworth Lane. This field is currently used for grazing sheep and is owned by Mr & Mrs. Richard Wills of Lollesworth Farm and they have advised me and others that they would not permit such access route across their field, therefore the assumption used by Pegasus Planning Group is incorrect and may well have a material effect on their conclusions.

Furthermore, any development on A41 would not be consistent with the distinctive settlement pattern of the village and the important relationship between the built environment and the surrounding landscape (i.e. development on one side of the route only). In my opinion, it will harm important views of the village from surrounding landscape (from Lollesworth Lane) and from within the village of local landmarks (of Lollesworth Wood), contrary to Policy D4 of the Proposed Local Plan.

Allocation of the site will not “promote sustainable patterns of development” and the wildlife / environmental amenity loss of this site is likely to result in a significant detriment to the village’s character. Furthermore it will cause harm to the biodiversity and natural environment of the adjoining Lollesworth Wood SNCI. Indeed, this is contrary to Sustainability Objective 1 of the Sustainability Appraisal framework set out at Table 4.1 of the Guildford Borough Local Plan Sustainability Appraisal.

Policy I4: Green and blue infrastructure; states that “Permission will not be granted for proposals that are likely to materially harm the nature conservation interests of local sites unless clear justification is provided that the need for development clearly outweighs the impact on biodiversity.” Local Sites are earlier defined in the policy as including Sites of Nature Conservation Importance (SNCI).

Furthermore, there is no reason at all for the amendment to the Greenbelt behind the field beyond site A41 other than to prepare for a potential second phase development in the next Local Plan and surely it cannot be considered to be justified by “exceptional circumstances” when no alternative use is currently proposed and its current and historic use is as pasture?

I strongly object to the alteration of the Greenbelt around A41 and the field beyond and to the inclusion of A41 in the Local Plan.

Across any of the adopted sites in West Horsley, careful consideration must be given to the proposed density of any future developments. The current proposed density is not appropriate for such rural and semi-rural village location and are out of character for the village as it currently largely comprises low density housing, with a considerable mix of ages and housing styles.

West Horsley struggles with inadequate medical, schooling and retail facilities with poorly maintained rural lanes.

Public transport is currently inadequate with no link to train times to enable residents to travel to work in a more environmentally friendly way. The proposal to increase the population of West Horsley with so many new homes will only exacerbate the currently woeful situation of crammed car parks and clogged lanes.

The fact that several village shops have been allowed by Guildford Borough Council to be developed into flats and small bungalows demolished to make way for 4 and 5 bedroom homes, gives little confidence that the proposals for preserving the historic environment, protecting the countryside and creating sustainable facilities will be honoured.

The Guildford Plan policies are totally inappropriate for this rural village and I urge you to reconsider this proposed submission.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I write to detail my objections to the Guildford Borough Council (GBC) Local Plan 2016.

My comments are frequently linked to my own locality, since I clearly have most experience there. However, it seems that GBC wishes to pursue a policy of forced growth across the whole borough, without the support of the residents, based on the ineffective experiences of objecting to the GBC Local Plan 2014.

Whilst I am a resident of West Horsley, my property shares borders with East Horsley, and my comments often therefore refer to both villages, since proposals to both are pertinent.

Unbalanced Development

Having reviewed the areas for proposed development I object to the unbalanced distribution of the sites across the borough. The sites seem to be focused on the north eastern side of Guildford, swamping existing rural villages and
destroying large areas of countryside without planning for the necessary infrastructure that everyday life requires. In particular, an increase of 35% housing in West Horsley is excessive.

**Loss of Green Belt**

I wholeheartedly object to the use of current Green Belt land for development via the plan. The establishment of Green Belt was for the protection of the countryside for future generations. There has been no exceptional circumstance established for the removal of, or alteration to, boundaries of East or West Horsley from the Green Belt.

In addition GBC claims in it's own publication "About Guildford" Summer 2016 (pg4) that following feedback the total number of development sites on green belt has been reduced. This is most certainly not the case in East and West Horsley.

**Traffic and road network**

The roads in and around East & West Horsley are in poor condition and very narrow in places, and unable to support the current level of traffic using them. They are certainly not capable of increased usage and I object to any development that generates additional traffic. This is supported by the recent incident of a lorry getting stuck under the railway bridge at Horsley station, where Ockham Road North and South meet. The incident caused disruption to the rail system and roads for multiple days. It would be dangerous and foolhardy to develop the area A39, noted on Map Horsleys (East Horsley) page 348 of the plan, creating additional traffic on such constricted roads.

In addition my journey to work at The Royal Surrey County Hospital using the A3 is frequently hampered by slow or stopped traffic, particularly around the Burpham area. I object to excessive development within the Borough when the main roads are unable to support the existing level of traffic.

**Parking**

There is insufficient parking at the West Horsley parade of shops, West Horsley Village Hall, East Horsley Village Hall, Horsley station and Station Parade in East Horsley. I object to the excessive local development proposed in the local plan, both around East and West Horsley villages and the Wisley Airfield site which would compound the matter due to increased numbers of car users.

**Flooding**

I object to development that increases waste water in East and West Horsley. The water drainage systems in the area are unable to cope with the current level of waste water. The local roads are often flooded in winter, and increasingly at other times of the year also. My daughters walk along Ockham Road North to access the station for their journey to school. During periods of wet weather I am often forced to drive them in the car, as the road is so flooded it becomes impassable on foot. Development that increases both traffic and waste water in this area (such as site A39, pg348) would have an extremely detrimental effect.

In addition my back garden, which borders the proposed site A39 pg348, is often flooded in winter, and with a recent period of wet weather even in June. The winter streams are not able to cope with the current amount of water from the field and I object to any development of this site that will increase run off.

**Schools**

The Raleigh School is already at capacity, and unable to accommodate more children. This is also the case for the Howard of Effingham. I object to development in East and West Horsley and Wisley Airfield that will create additional schooling requirements.

**Medical facilities**

The current medical facilities at Kingston Avenue in East Horsley are at capacity and difficult to access. I object to any development that increases demand on these services.
In conclusion, the GBC Local Plan 2016, does not provide the community with a plan that fits with the needs of its residents, and should be dismissed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Guildford Borough Council Proposed Local Plan**

I am writing to object to the Local Plan proposed by Guildford Borough Council.

I am opposed to the village's removal from the Green Belt by insetting and extending the 2003 Local Plan Settlement Area boundaries. No exceptional circumstances or other justification has been made for the new Green Belt boundaries that will result from the proposed insetting of the two parts of the village from the Metropolitan Green Belt.

Policy S2 states that provision will be made for 13,800 new homes over the Plan Period 2013 to 2033. The number of homes is too high and unsustainable in Guildford’s villages.

The proposed expansion of West Horsley village is unsustainable. With only one small shop, no post office, a very limited weekdays only bus service through the village, it is clearly unsustainable for the proposed high volumes of new housing development. The development of 385 homes on the four proposed sites are at much higher densities than currently exist in the village settlement and will be totally out of character with the existing mix of different housing styles and layout of the village. The homes building proposals are unsustainable in terms of schooling, drainage, roads capacity, shops, parking in East Horsley (shops and station) and public transport.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPA16/3654  **Respondent:** 11014145 / John Brown  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing in response to the proposals set out for West Horsley in the 2016 Guildford Draft Local Plan. My concerns focus upon the strains that would be imposed upon an already creaking infrastructure in this area, and the erosion of the Green Belt.

The detailed arguments relating to the impact upon the various elements of the infrastructure have been well rehearsed elsewhere. Suffice it to say that transport (road, rail and parking), medical, educational and shopping facilities are already under considerable strain. The increased volumes of traffic that would arise from the proposals have the potential to generate considerable hazards to local schools, pedestrians and junctions. The Raleigh School is oversubscribed and the Medical Centre is inundated. The addition of a significant number of new dwellings to the area would be unsustainable.
As I understand it the Green Belt may only be challenged in exceptional circumstances. No-one would view building on the Green Belt in West Horsley an exceptional circumstance when there are viable options for additional housing throughout the borough.

The scale of the proposed developments in the Horsleys would have a detrimental impact on the rural characteristics that define life in this Surrey village. Any development needs to be proportionate in scale and not be at the expense of the quality of life of those of us already resident here.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

2 Sites in East and West Horsley (sites A36-41)

I object.

The council leaders representing Ash and Tongham (where the Green Belt is actually being extended) are pushing a disproportionate allocation to this area which will create a mega-village and ruin what is currently two lovely villages.

The number of homes in West Horsley, a rural village will increase by 35% which is also I understand 35% of new homes in the plan with urban Guildford taking only 11%.

The infrastructure and schools, doctors, shops can't take the strain of this together with the c. 2,000 houses planned at Wisley airport.

It would damage local tourism.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I object to the proposed building of 533 new houses in East and West Horsley (an increase of 35%). This amount of housing will completely change the rural character of the villages. The high density proposed would not reflect the existing character of the area and would create suburban housing estates in this rural setting. There is no justification for developing Green Belt land, except in very special circumstances. No ‘special circumstances’ have been put forward by the Council. We need to protect the Green Belt and stop our countryside from being destroyed. This is particularly true of the proposed development at Sites A41, A39, A38 and A40.

It will also place huge pressures on: local schools, doctors surgery, drainage infrastructure, road network, parking at local shops and rail stations. The Council has not considered the infrastructure needed to service this level of development,
Despite the fact that the National Planning Policy Framework states that new residential development must respect the character and density of housing in the area and be limited in quantity by the availability of infrastructure and local facilities.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The environmental impact of the vast number of new residents commuting in and out of the area would put a massive additional burden on the existing road networks and transport infrastructure that is already buckling under the weight of lack of investment or maintenance by Guildford County Council – Have you tried driving down ‘Long Reach’, ‘Ripley Lane’, ‘The Street’, ‘East lane’?

New residents on the proposed scale would put an unsustainable strain on the local schools – I remember what a struggle I had getting my son into the local Primary School and there are annual arguments over catchment areas between the local villages just to get children into the geographically nearest Secondary Schools. The proposals do not address these problems adequately they would just make them worse and mean parents would have to drive their children to schools many miles away putting further strain on the inadequately maintained road system and further increase pollution of the local environment.

The increase in housing will also strain the services infrastructure, local sewage and drainage requirements are overloaded as can be seen after a heavy downpour water floods over Ripley Lane and The Street between the Railway Bridge and Long Reach due to many natural springs in the area. Localised flooding will of course be compounded by the proposed new homes the plans take no account of this.

It should also be noted that during the building of these new houses what is left of the local roads will quite literally be destroyed, a year ago heavy construction lorries were employed at Jury Farm for a couple of months in Ripley Lane and the Road was structurally damaged as a consequence and has still not been satisfactorily repaired. Building in the local area on the scale proposed will never be made good by the construction companies lining up to build on nice Green Field Sites. It will be the local Tax payer that picks up the bill and endures the years of misery during and following the extensive construction.

West and East Horsley is also a green belt area and the Surrey Hills an Area of Outstanding Natural Beauty (AONB) and as such must be protected. As a residents of West Horsley I totally oppose the village’s removal from the Green Belt or the change in its status. The Green Belt and Countryside Study is flawed with no sound case whatsoever for justifying changes to the Green Belt boundaries laid down many years ago by national legislation. The evidence document
‘Guildford Borough Economic Strategy 2013-2014’ makes no case for siting large numbers of additional homes in West and East Horsley or neighbouring villages.

In summary I am totally opposed to the proposal of hundreds of homes on Green Belt areas in West and East Horsley and indeed the villages around including Ockham and Wisley which is a planned population growth well in excess of the Government 2014 forecasts. This would be totally out of character with the existing mix of different housing styles and layout in the village and would be unsustainable in terms of infrastructure, such as drainage, road capacity, schools, shops, parking and public transport and the supposed need for so many houses over the Plan period is not proven. Indeed, West Horsley’s own Parish Council through a 2014 Housing Survey is able to confirm a limited need for up to 20 affordable homes for local people who want to remain in the village, i.e. for young people and for elderly people wishing to downsize to smaller homes.

The additional plan to build over 2000 homes in Ockham on the former Wisley Airfield, less than 2 miles away puts an utterly unsustainable strain on the infrastructure of West and East Horsley and all the surrounding small villages, not to mention a detrimental effect on the day-to-day village life for current residents. The Plan also infringes my understanding of Government policy to protect the Green Belt and I attach a letter from Brandon Lewis MP dated, 17th February 2014 regarding Ministerial Guidance on the Green Belt. Finally, these plans are being considered before other Brownfield sites are prioritised, which are stated to be more sustainable in order to avoid the irreparable damage to the Green Belt.

The Plan is ill judged, unnecessary and unproved and will damage a Green Belt area of outstanding natural beauty and affect the lives of current residents who are already having to tolerate poor roads, lack of state school provision, congestion and poor local and council services, and poor infrastructure.

The New Local Plan

Objections to proposals Ref. 36, 37, 38, 39, 40, & 41

Nicholas Proctor of 12 Holmwood Close, East Horsley, Surrey KT24 6SS

I am extremely concerned about the extent of the proposals in your Local Plan as they affect our villages and the apparent attack on the Green Belt. My main objection is that your Plan will irrevocably change the character of the Horsley villages. I have lived in East Horsley for all my life and it is very understandable why it is such a sort after place to live. People are prepared to pay a premium for houses in this quiet rural setting. Other specific objections are as follows:

The dramatic rise in both houses and population of the villages by approximately 20% will overload an already stressed infrastructure. There is always a waiting period of about two weeks to get a doctor’s appointment. The local schools are oversubscribed. The Raleigh currently has about 30% of its students coming in from Effingham and Bookham. The Local Plan makes no provision in the Horsleys, as I could read, for the buildings that would be required to deliver services to new residents e.g. doctors surgery, schools, etc. The train service up to London is already over stretched in the rush hours. Often people further up the line have to wait for a later train because the carriages are completely full with people standing. This general overcrowding of the area on, roads, trains, etc. has a damaging effect on people’s wellbeing and general happiness. Although these are difficult to measure they are vitally important to the quality of people’s lives.

The effect so many more people from outside the village will have on the culture of the village. The Horsleys will become a small town. The development plans go against the protection of The Green Belt that was designed to protect rural villages and stop urban sprawl. It is extremely important for Surrey to retain its villages to make it an attractive area for people to live and visit. It is part of what makes South East England a jewel in the crown of this country.

There has been a significant rise in the volume of traffic over the last ten years or so. Very little has been done to address this issue and another 1000 cars (assuming about 2 cars per new dwelling) will be horrendous. It will also mean more potential for accidents. Many of the residents are elderly and find it difficult coping with so much traffic.

The expansion of the village has already meant that the local wildlife has suffered a loss of habitat. There are more dead animals on the roadside than there ever used to be. As a village gets more like a town there is more night time traffic which is more hazardous for the animals. This is currently before adding another 1000 or so vehicles.

If more housing is required it would seem more sensible to me to locate additional dwellings in and around the towns where those people are likely to work. This has the benefit of using existing brown field sites and cutting commuting traffic and so pollution.

Overall I believe this Local Plan is fundamentally flawed as far as the Horsleys are concerned. It might seem an easy option to build in the countryside at first but the effect on this area of outstanding natural beauty would irreparably destroy the area for the residents and the people that visit the villages.

Thank you for taking on board my objections.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
As a resident of West Horsley, I would like to record my objection to the current version of the Local Plan, as outlined on your website.

My specific concern is the number of new houses that are proposed in or around the villages of East and West Horsley resulting in an increase of up to 35% in West Horsley households. This concern stems from the following observations:

- Where is the proven demand for houses in the village, from people who need to work here?
- If none, where then would the people living in these houses work? If not locally then each household would need one or more cars to transport the occupants to work.
- Queues on the A3 northbound in the morning, from Ripley to the M25, are already severe at rush hour.
- Similarly, queues southbound on the A3 towards Guildford, and on the slip roads into the town, are also high.
- Emissions and pollution from vehicles using these stretches of road will not be reduced if more people try and use it.
- There is less than adequate existing drainage in East Lane, Ripley Lane and The Street, all of which flood when there is exceptional or heavy rainfall. Building additional houses can only reduce the capacity of the ground to absorb rainfall.
- The existing schools and medical facilities are already stretched: we experience lengthy delays in getting a routine doctor's appointment at the Medical Centre.

I have no objection to selective development on underutilised sites but value the Green Belt in which I live and would like to see it remain as such.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I would like to voice my objections to the building of an unacceptably large number of new homes which Guildford Borough Council's draft local plan proposes to sanction in the parishes of East and West Horsley.

In 2014 a previous draft plan proposed to remove the green belt status which the two villages enjoy.

It was abolished after central government intervened to make it clear that green belt status could only be taken away from a village if "exceptional circumstances" could be established to justify doing so. To my knowledge no "exceptional circumstances" have ever been established and yet the new plan again attempts to remove the Horsleys' green belt status and facilitate the building of almost 600 properties in the villages immediately, followed by an unspecified and unlimited number of additional houses or flats thereafter.

600 is a very large number of extra properties for the two villages and, if built, would put great pressure on the limited amenities we currently enjoy (doctors and dentists surgeries, school places and the provision for care for the elderly etc.) That situation would be further exacerbated by the 2000 houses proposed for Wisley airfield just a couple of miles distant.

The villages lack the infrastructure to cater for so many new residents. Yet if more roads are built or widened and fields concreted over, the rural character of our community will be lost. In effect the plan's proposals put the cart before the horse by first removing the green belt status and then cramming in sufficient development to justify having removed it.
Finally, I seriously doubt that Guildford Borough Council can point to where, over the whole of Surrey, the new residents would find enough jobs to meet their needs. And even if they could all find work in London travelling there is very expensive. There is therefore a real danger that many new residents will discover that there is no work for them locally but that anything they can find in London does not pay enough to meet cost of travel to get to it. They would be marooned.

I believe that the local plan arises from a requirement placed on local authorities by central government to get more homes built to meet a national shortage. The objective is right but in my submission it is a mistake to build so many homes in areas such as the Horsleys which lack both infrastructure and employment. To do so would prove highly detrimental both to the new residents the existing community.

I also object to the Local Plans proposal for 400 dwellings in West Horsley. There is still a flagrant disregard of Green Belt land that was introduced to stop urban sprawl. The reduction in the number of homes proposed in the Green Belt initially is a good thing but it does not go far enough.

There appears to be no change to Guildford’s projected housing growth of almost 25% by 2035. The Office of National Statistics is almost 50% less for the same period, yet figures based on this huge discrepancy surely cannot be justified for development of this size

I object to no changes being proposed since the 2016 Consultation to insetting West and East Horsley from the Green Belt. There is need for new dwellings but on a much more considered approach that is in line with the Parish Council’s development plans and sympathetic to the current infrastructure and feel of the villages.

Nothing has been proposed since last years Consultation to improve the sustainability of the West Horsley development sites and thus meet National policy requirements.

The existing infrastructure is stretched under current demand for its services. The local primary and secondary schools have had plans for necessary rejected, the run off for sewage and drainage is low meaning localised flooding occurs in extended rainy periods and sewage pipes get blocked.

Local train station carparks are full at peak times and buses and other large vehicles travelling east through the village stop the traffic due to lack of room for cars to pass the same stretch of road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I wish to lodge my strongest opposition to the totally disproportionate and wholly unjustified Guildford Borough Council's plans to dramatically increase the population size of West Horsley village.

To increase a village population by in excess of 30% without any thought to the infrastructure and the additional strain placed on already strained local services, roads, schools/education, transport, drainage is outrageous!

The impact of 450 + new homes and circa 900 additional cars that will be added to the village roads, will seriously change the character of the village and will put lives at risk, whether this is local children who cycle or walk to School or the many hundreds of cyclists who use these Country roads as part of their regular road training route.

Numerous surveys conducted by parish council and local groups show a need and tolerance for no more than 50 - 100 new homes. Such numbers could be accommodated in around and within existing housing areas and if planned and executed sensitively, will have hopefully minimal impact on the character and practical functioning of the village.

Please reconsider your proposal for 450+ new homes in West Horsley and take a more measured approach in line with feedback expressed by the existing residents.

The people of West Horsley are not being unreasonable. We understand that some increase in housing stock is needed, as current residents wish to stay on in the village and new and young people wish to join our community. However, to increase the population of West Horsley by the numbers of people and cars you propose would destroy the character and effective functioning of the village for both existing and future residents.

The state of the existing roads is testament to the fact that insufficient funds have been made available for many years on repairing potholes and or sorting out the continual flooding and surface water drainage issues. Increasing the housing by the ridiculous numbers proposed will see an already creaking infrastructure crumble and fall apart completely!

I sincerely hope that you will reconsider your proposals as they stand and that we can arrive at numbers which the West Horsley residents can embrace as a positive outcome for an organically evolving village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLPA16/2155  **Respondent:** 11027265 / Jonathan Ingram  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

I strongly object to the proposals in the Draft Local Plan for the following reasons:

I live in East Horsley and find the roads to be very dangerous with even the current amount of traffic let alone if we get more traffic due to the increased population in Horsley and the surrounding areas. I notice there is a development proposal at the Thatchers Hotel on the Guildford Road East Horsley. This area of road is particularly dangerous as it has a blind corner and a sharp bend and many people having to turn right out of Ockham Road South onto it, all within the space of about 50 metres.

I object to all the proposals at the sites in West Hosley and East Horsley for the reasons of the local transport infrastructure simply not being able to cope with the huge demand the increased numbers of population will place upon them. In particular the stretch of the A3 from the M25 junction at Ockham past Wisley, past Burpham and all the way along to Guildford experiences many collisions. A new junction will increase numbers of traffic on this dangerous road.

In addition as a daily commuter into London from Horsley station I do not see how this small village station can cope with the increased demand from literally potentially thousands of extra commuters every morning and every evening.
travelling to and from the proposed sites in The Horsleys and at Wisley Airfield Ockham. The new Guildford Local Plan states expressly that regarding Effingham Junction station it is “not considered sequentially preferable or sustainable to direct office development to these locations”. See extract below. If it is not considered an adequate station where will the commuters residing at and office workers working in Wisley Airfield Ockham get the train to and from? Surely not Horsley as this will be having to cope with extra commuters from the 535 proposed new homes in the Horsleys.

4.4.17 For the purposes of the sequential assessment the train stations at Clandon, Chilworth, Gomshall, Shalford and **Effingham Junction**, will not be considered to be transport interchanges because of their locations within the Green Belt, AONB or the isolated nature of the station away from the village or centre. We do not consider that it is sequentially preferable or sustainable to direct office development to these locations.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Comments specific to Horsley Villages area**

As a resident of the Horsley Villages (I specifically use this description since, despite the language and descriptions used in the Plan, it is very difficult to overstate how closely East and West Horsley are connected and interdependent on each other, a point which is not full recognised in the documentation) my comments largely relate to the policies in the plan which would affect this area.

I am aware that there is a general pressure for new housing stock to meet many different needs and supporting facilities. National planning guidance advises that villages should only be included in the green belt if the open character of the village makes a contribution to the openness of the green belt. West Horsley clearly has a different character to East Horsley and it should continue to be ‘washed over’ by the Greenbelt. With regard to East Horsley I appreciate that the ‘open character’ is less obvious, however whilst removing the green belt wash over for East Horsley within the existing settlement boundary might be one way of contributing to the additional housing required I think the addition of several areas specifically for development (by way of an amended settlement boundary and specific designation of these areas for development) will so radically change the nature of the village that this cannot be what as envisaged by a simple removal from the green belt wash over. Also I cannot accept that all of sites identified for development in East and West Horsley need to be included in the plan. Whilst it is true that the plan is intended to cover a long timeframe, and not all development would take place at one time, GBC will be making decisions which in the longer run would irrevocably change the character of the Horsley area if the plan were to be implemented as it is currently drafted.

The inclusion of all the areas identified would also put intolerable pressure on existing local facilities. I am sure GBC will be getting plenty of feedback from other Horsley residents, which I would also echo, to say that the primary school, health and parking facilities within the East and West Horsley area are already operating at capacity. There is no mention of including additional primary schools or health centres in the potential usage of these sites – the addition of the proposed housing density across all these sites with no such additional provision of school places or health care is bordering on the irresponsible and dangerous, and would indicate that GBC whilst obsessed with planning for housing has not rationally considered its other duties to the residents of the borough.

I quote from my previous letter in the consultation period

“At present the descriptions of the possibly uses for the areas in West Horsley only relate to housing and do not include uses for public facilities such as schools and health resources, surely this cannot be right? The consultation document at a general level indicates that appropriate resources would be approved in planning terms in the future, but I feel if an area
of land were to be approved for use in a public way such as this, then it should be being brought forward for consultation now. In the Horsley area it is clear new health facilities and a new primary school facility at the very least would be needed if all the areas were adopted.”

As I say, no attempt has been made to address these points in the published draft plan and I feel GBC has failed in its duty to East and West Horsley residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/1906  Respondent: 11032225 / Graeme Markwell  Agent:  
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I would like to express my opposition to the Guildford Local Plan for the following reasons:

• The character off the area will be adversely impacted through noise and pollution
• There are not enough essential amenities available for such a population influx, in particular the availability of accessible school places would be impacted
• The Green Belt Boundaries were created to protect the characteristics of this area of outstanding natural beauty and moving them is immoral
• Local wildlife will be adversely affected
• The roads and streets will become much more hazardous places as many use them inappropriately, contravening the speed limit.
• The increased volume of traffic will lead to more road traffic accidents and the potential of children being killed road traffic accidents are the most significant cause of unintentional injury for young people.
• Healthcare services will be adversely affected by increased numbers it is already very challenging to secure an appointment with a GP

It is my sincere belief that the plans as they stand will reduce the quality of life of residents currently living in and around the Horsley's.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

After living in Horsley for 29 years I am strongly opposed to the changes that are proposed in the local plan for both East and West Horsley and the surrounding villages. I work in gardening and agriculture and am especially opposed to the changes the plans have on the land.

I strongly object to the proposed changes the plan would have on the Horsley and surrounding villages. These will uncharacteristically change the villages with a significant amount of history and heritage to make them resemble towns.
I hope these objections are listened to and that the Guildford Borough local plan is reconsidered to make better use of brownfield sites to protect the green belt, specifically in the Horsley’s and surrounding villages. I would like my 2 children and their families to be able to grow up and enjoy the beautiful village environment I was lucky enough to have in my childhood.

I write to object to the Proposed Submission Local Plan: Strategies and Sites June 2016 (the Local Plan).

I also write to fully support the written submission by West Horsley Parish Council written on this topic.

I also write to complain that this plan, which has been touted as written after listening the last consultation does not appear to have addressed any of the concerns raised by residents in the area I live.

I also wish to point out that, as I understand it, all previous correspondence is classed as "null and void", and that this is entirely disrespectful to the citizens of the borough who took time and effort to previously address the issued in the previous local plans. It is clear and apparent that the process is made as difficult, arduous and repetitive, to break down local opposition, whilst developers simply see this process as a step to doing business.

**Comment ID:** PSLPA16/3530  **Respondent:** 11034305 / Susan Stewart  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

- The proposal to remove Horsley from the Green Belt cannot be justified. No exceptional circumstances or justification has been made. The Green Belt and Countryside Study is flawed.

- The proposal to extend the boundaries of the settlement areas has not been properly thought through. It appears that the reason behind this is solely to increase the amount of land available for development. The residents of West Horsley are totally opposed to the village’s removal by insetting and extending the 2003 Local Plan Settlement Area.

The boundaries do not need to be extended.

- West Horsley Parish is one of a rich and varied mix of well-established low density housing settlements with many historical buildings. Positioned on the North side of the North Downs, partly in the Surry Hills AONB, it attracts walkers and cyclists all year round.
The Key Evidence Document GB Economic Strategy 2013-2031 makes no case for locating large numbers of homes in either East or West Horsley or neighbouring villages.

- The scale of the increase in housing is disproportionate to the village. It would mean an increase of 35% of households within the village, greater than any other single area in the borough. Can Guildford Borough Council (GBC) tell us why we have singled out for this massive increase. 385 new houses could not be accommodated without extensive investment in roads, schools and medical facilities. Our local school is already full and oversubscribed. Drainage is inadequate and we suffer from flooding after each period of heavy rainfall. It would also alter the very heart of our village. With only one small shop, no Post Office, limited bus service, it is clearly unsustainable for the proposed high volumes of new housing. The development of these homes would be of a much higher density than already exists and would be totally out of character with the existing mix of homes.

- Thames Water has advised GBC that the areas waste water network is unlikely to be able to support the demand anticipated from all the proposed developments.

- The inflated number of houses arises from a Strategic Housing Market Assessment (SHMA) that was generated from a theoretical model which has not been revealed to the public or indeed to GBC. The SHMA target housing numbers is then further increased by GBC to give a population increase which is almost 70% higher than the official national estimates for population growth in the Borough. The need for so many houses to be built in West Horsley is totally unproven.

- The West Horsley Parish Council and Surrey Community Action Housing Survey identified the need for some 20 houses for local people who wished to remain in the village.

- I am also very concerned about the proposals to build a new town at Ockham, (Wisley Air Field), the extensive developments at Burnt Common and Gosden Hill Farm. The impact on our village of such huge developments under 2 miles away would be enormous.

I have lived in West Horsley for 30 years. I have enjoyed the semi-rural atmosphere and the strong community spirit that ties the residents together. There has been some new housing and other developments within the village during this time, but it has been with due regard to the environment and the protection of wildlife habitats and done in a sympathetic way as to maintain the character and minimise the impact on the very fabric of our way of life.

I urge GBC to reconsider these drastic proposals and listen to the concerns of the people of West Horsley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I am writing to STRONGLY OBJECT to proposals made in the Guildford Borough Proposed Submission Local Plan. Removal of Horsley from the Green Belt.

The Planning Policy Framework states that land should only be taken out of the Green Belt in exceptional Circumstances. The prime reason for the Green Belt being the protection of the countryside from urban sprawl. With continuing pressure for development this remains even more important today. There is also a requirement to safeguard the countryside from
encroachment. Horsley is a village set in attractive countryside. The Green Belt designation is required to maintain the character of the village and the area, not just for the residents but also for the many visitors walkers, cyclists, golfers from London and the rest of the UK and abroad who come here to enjoy the countryside and stay at the campsite and local hotels.

The allocation of over 533 houses in The Horsleys is excessive and disproportionate and will detrimentally affect the character and appearance of the villages. This is not just the housing estates themselves but the cars (at least an extra 1000), congestion generated, the pressure on the existing local infrastructure: primary and secondary schools, doctors, sewerage, surface water, parking at the shops and stations. The Horsleys will become a congested urban area.

The loss of Green Belt protection, by ‘insetting’ would mean a presumption in favour of development. This would lead to pressure to develop every small parcel of open land in the area. No provision has been made to protect existing open areas such as Nightingale Crescent, Kingston Meadows, play area adjacent to West Horsley village hall, land adjacent to West Horsley Motors on The Street and Weston Lee playing fields, to name a few, should they be removed from the Green Belt.

There is no justification for altering the development boundary – the villages need to continue to grow slowly and incrementally so that it does not put adverse pressure on services and the local infrastructure.

Brownfield sites must be developed before any Greenfield sites are considered.

Infrastructure

The NPF requires that new residential development must respect the character and density of housing in the area and be limited in quantity by the availability of infrastructure and local facilities.

The proposed amount of development is not sustainable

- There is no extra capacity at the local primary or secondary schools.
- The doctors surgery can not cope with current demand
- Existing flooding problems will be exaccerbated
- Foul water sewers regularly overflow
- Parking at the station and local shops is at capacity
- Mobile phone reception and broadband connections are poor
- An extra 1000 cars will lead to huge amounts of extra traffic on narrow country roads.
- The proposed densities will be out of character with the area

Guildford Borough Council is proposing a large percentage increase in the housing stock in Horsley with NO consideration whatsoever on the affect on the local infrastructure.

Proposed Development Site A41

The proposed development of this site would be seriously detrimental to the character and rural appearance of West Horsley. This land is open countryside and adjoins a group of old buildings, some of which are listed, along the historic bridleway of Lolesworth Lane. It is important that the setting of this group of buildings is maintained so that social history of West Horsley is not adversely affected. Development here would set a seriously undesirable precedent, whether it is for houses or a school.

Proposed Development Site A40
Of particular concern is the triangle of land to the south west of Waterloo Farm, which backs on to the campsite and the rear gardens of properties in Nightingale Crescent. This site was originally a paddock, but has now been absorbed into the grounds of Waterloo Farm, an old farmhouse, which although not listed is over 150 years old. The proposed development would seriously affect the character and setting of this historic building and would create a piece of suburban back land development.

This site is restricted by a main sewer running along the western boundary (along the fence adjacent to the campsite). Other sewers from Nightingale Crescent, cross the site and feed into this main sewer. The existing main sewer can not always cope. We have lived at 36 Nightingale Crescent for 16 years and the sewer which runs through no 38 has backed up twice causing raw sewage to flood into our rear garden.

Nightingale Crescent slopes down to this site and surface water sewers also cross the site and drain into the lake in the camp site. Our garden together with the proposed housing site and the campsite are often waterlogged and regularly flood. Please see attached photos.

Housing development will further increase these problems by generating additional surface water run off.

One of the reasons for refusing outline planning permission for the erection of three detached dwellings (access only to be considered). R14/P/000012 on 27 Feb 2014 was:

The proposed development of three dwellings has the potential to increase the risk of flooding in a area with a high risk of surface water flooding. No information has been submitted to demonstrate how the development would successfully mitigate against flooding. This is contrary to policy and G1(6) of the Guildford Borough Local Plan 2003 (as saved by CLG Direction on 24/09/07) and guidance contained in the National Planning Policy Framework.

Given that development would be constrained, its inclusion for a small number of houses would not outweigh the value it has in maintaining the rural character and setting of Waterloo Farm.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Further to my objection letter sent on 10 July 2016. I would like to make it clear that I strongly object the proposed development on Sites A38, 39, 40 and 41. The loss of Green Belt is totally unjustified and the impact on open countryside, ancient woodland, flooding, the setting of historic buildings and the local roads and infrastructure is unacceptable.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

In response to the Guildford Borough Proposed Submission Local Plan: strategy and sites: June 2016 (The Guildford Plan) published by the Guildford Council on 6th June 2016 I strongly object to developing new sites and building new housing in West Horsley and East Horsley villages including all the sites proposed in the local plan:

• A37 by the Epsom Road;
• A38 Land along East Lane from Northcote Road to Long Reach;
• A39 Land in East Horsley by the Horsley rail station;
• A40 Land at rear of Ockham Road North;
• A41 Land along Lollesworth Lane in between East Lane and railway

To begin with it is extremely disappointing that the Guildford Council has completely ignored objections previously received from residents of the villages in response to the last local plan consultation ending in September 2014 and published Proposed Submission Local plan with intention of building 385 new homes in West Horsley, an increase of 35% on the current number of homes with just a slight change in the identification of specific sites for this proposed development.

Once again as resident of the village I strongly object to this proposal.

The main reason against development of these sites is that the proposed strategies will remove the villages of East Horsley and West Horsley from the Green Belt, which is against the fundamental concept of the Green Belt as it is supposed to be the policy that immutably keeps the areas designated as the Green Belt out of projected development to retain these areas as undeveloped to surround neighboring areas.

The requirement for increase in housing is not and cannot be considered the reason for removing the villages from the Green Belt as in order to do so the potential to build in the areas which are not classed as the Green Belt has to be completely exploited which is clearly not the case in the Guildford Borough. In the Policy P2 of the Guildford Plan there is absolutely no justification for changing Green Belt boundaries that have been set up by the national legislation. According to planning and Greenbelt policy, Green Belt land can only be built in in exceptional circumstances, there are absolutely no "exceptional circumstances" outlined in the local plan to justify this encroachment in whatever form onto Green Belt land. Hence, I object to this policy statement.

The area near East Horsley and West Horsley villages is classed as Area of Outstanding Natural Beauty and attracts many visitors from London to spend time in the picturesque countryside of Surrey Hills which villages of East and West Horsley are part of. The village of West Horsley has low density housing set up with a considerable number of traditional English cottages, which contribute to the countryside character of the area. New housing in the village, especially at the density proposed will completely destroy the character of the village and will make it look like a suburban area of London or Guildford. This is particularly the case if building affordable homes in the village of West Horsley is considered as these type of housing is always high density and makes a drastic change to the outlook and demographics of the area. It is
completely wrong to change the outlook of the village just because more housing has been identified as needed based upon a floored and intransparent SHMA which is then being imposed upon the villages by Guildford council. The effect will be to make the Horsleys a small town rather than a village. The concept of limited infilling that the Guildford Borough Proposed Submission Local Plan is discussing in Section 4.3.24 - 4.3.27 of Policy P2 Green Belt is absolutely ridiculous as building of additional 385 homes in West Horsley and 100 homes in East Horsley can not be considered as limited infilling (It is 35% increase on the current number of homes!!!).

Building new houses in the villages of West Horsley and East Horsley is against Protecting Policy P1 of The Guildford Plan as the areas of Surrey Hills and nearby villages have to be preserved as areas of outstanding natural beauty. This proposal is also against National Planning Policy Framework which clearly states that "inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances".

There are no special circumstances that justify such massive development in the Green Belt areas as development on brown sites in Guildford borough has not been done to full potential. It is inappropriate that 64.6% of all proposed new homes are to be built in the Green Belt. There is absolutely no justification for this.

The discussion of Policies P1 (Surrey Hills Area of Outstanding Natural Beauty) and P2 (Green Belt) is self contradictory in the Guildford Borough Proposed Submission Local Plan document as it talks of necessity to preserve such areas and at the same time very badly justifies exceptions and limitations to the rules which is unacceptable.

Building new houses in the villages of West Horsley and East Horsley is against the Protecting Policy P1 of the Guildford Plan as the areas of Surrey Hills and nearby villages have to be preserved as areas of outstanding natural beauty. This proposal is also against the National Planning Policy Framework which clearly states that “inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances”.

There are no special circumstances that justify such massive development in the Green Belt areas as development on brown sites in Guildford borough has not been done to full potential. It is inappropriate that 64.6% of all proposed new homes are to be built in the Green Belt. There is absolutely no justification for this.

The discussion of Policies P1 (Surrey Hills Area of Outstanding Natural Beauty) and P2 (Green Belt) is self contradictory in the Guildford Borough Proposed Submission Local Plan document as it talks of necessity to preserve such areas and at the same time very badly justifies exceptions and limitations to the rules which is unacceptable.

The next argument against development of new homes in the villages is due to limitations of current infrastructure. The village cannot be expanded with any new housing developments as the infrastructure in the village is already exploited to its full potential.

- The schools are oversubscribed in the The Raleigh school has been full every year for a number of consecutive years. There are not enough secondary schools apart from Howard of Effingham School (which has limited capacity) within the area.
- The doctors surgery is operating at its full capacity and it is often difficult to get an appointment already with the current population in the villages.
- West Horsley village mainly depends on the infrastructure of East Horsley as it does not have its own post office, has only one shop and therefore additional housing proposed for West Horsley village will not be sustainable.
- New housing will create an immense burden on the drainage system in the villages and roads network, which in some places is not wide enough for cars to pass each other.

Current wastewater system will not be able to support these proposed developments. The proposed developments are all located within the “surface water hotspots” as identified within the Local Plan itself.

Public transport in the village is non-existent. There is only one bus which runs only on weekdays and on a very limited schedule and cannot be considered as a means of transport to rely on to get to work either in Leatherhead or Guildford.

The car park at the train station is full during the day and will not be able to accommodate more cars. The roads (Ockham Road, East Lane and The Street) will become busy traffic roads instead of semi-busy village roads in case new housing is built in the area.

Based on the above it is clear that this does not comply with Policy S1: Presumption in favour of sustainable development. In order to keep the area sustainable there should on the contrary be no additional housing development in the area as local services and infrastructure are already at breaking point.

The National Planning Policy Framework (NPPF) requires that new residential development MUST respect the character and density of housing in the area and be limited in quantity by the availability of infrastructure and local facilities. Although Guildford Borough proposed Local Plan talks about sustainable development there is no consideration for development of infrastructure in the villages of East and West Horsley.
It is clear that potential new residents of West Horsley and East Horsley villages will have to be employed either in London or Guildford town. The fact that there is no public transport system in place to support alternative commuting options is discussed above. Furthermore economic development of Guildford Borough for the foreseeable future does not require additional housing to be built in West or East Horsley. None of the strategic employment sites mentioned in Policy E1 (office B1a and Research & Development B1b Strategic Employment Sites, Guildford Town Centre employment core, Surrey Research Park, Guildford Business Park, London Square, Cross Lane, 57 and Liongate Ladymead) are near the Horsleys hence it would make much more economic sense to find solution for building new houses close to new economic development sites and not in the Green Belt area.

It is clear that one of the main incentives for building new housing in the villages is opportunity of selling new houses at premium as the villages are within commuting distance to central London. Hence with regard to "fairness", how is it possible to support this plan, which prioritizes profits for housing developers, and landowners (who most likely either do not live in the area, or will move away from the building based on their windfall profits), and imposes costs (financial and lifestyle) on those who live in the community? The balance of houses have been identified as for 40o/o of the developments to be "affordable homes", there is absolutely no reason to suggest that the residents of the Horsley's have a need for over 200 affordable homes. Surely it makes more sense for houses to be built in areas which are sustainable, in areas with appropriate infrastructure, and close to the local area in which people who buy the houses work?

Having discussed above the arguments why additional housing will become an unsustainable burden for the existing infrastructure and unfairness of development on the Green Belt which is both unbalanced and unsustainable I would like to reiterate my main objection that there is no justification for removal of the villages from the Green Belt. I strongly oppose the removal of the villages from the Green Belt also because it sets up a vicious precedent to exploit the opportunity and destroy the area of outstanding natural beauty in the future beyond the timescale discussed in the current local plan.

The suggestion in the local plan to create new areas of the Green Belt between Ash Green village and the Ash & Tongham urban area to compensate for the removal of the villages of West and East Horsley is not enough. There is no need to destroy certain areas of the Green Belt to create others.

Why should Guildford Council enforce the construction of new homes, in areas which are unsustainable, where infrastructure is insufficient, in areas where the local community objects, changing the face and demographics of villages in order to generate profits for house builders, and enable the council to declare it can meet an unjustified housing demand?

I once again would like to reiterate that I strongly object building of new houses in the areas discussed in the Guildford Borough Proposed Submission Local Plan: strategy and sites: June 2016 in the villages of East and West Horsley particularly as I am against removal of the villages from the Green Belt. I trust that my opinion and my comments will be considered.

• All the proposed policies far exceed the local need.
• The proposed density is far higher than any existing locally or in Guildford, it is more reminiscent of London.
• The proposals are tantamount to the formation of a sizeable new town in the Horsleys. There is no justification for this.
• There is no local support for these policies.
• The collective and cumulative impact of these 7 sites has not been properly considered or assessed.
• The proposed developments are completely out of scale with existing and planned building elsewhere in Guildford.
• The sites are unsustainable. The vital improvements in infrastructure are missing (water, sewage, anti-flood provision, traffic management, schools, health, telecommunications)
• The Wisely Airfield site was rejected by the councilors and yet it is included in this proposal. Why? Things have not changed since the refusal and additionally, no account is taken of this proposed site on the Horsleys.
• The changes in the settlement boundaries are far too sweeping and the squaring off or regularizing activities will suck in many adjacent fields. The plan cannot maintain that this means they don’t contribute to the openness of the Green Belt.
• If Wisely Airfield were to be built on, the Green Belt space set between the neighbouring villages will become much smaller and is contrary to the entire raison d’etre of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

General observations in objecting to the local plan:

• There is a lack of primary and secondary schooling in West Horlsey and the surrounding villages. The Raleigh and Howard of Effingham (both state schools) are already oversubscribed with may local children unable to get places. Local private primary and secondary schools are also full (or near to full) capacity. No provision has been made in the local plan for new schooling or increased facilities for existing schools. With the proposed level of housing, the schooling crisis will be more important than ever, but will continue to remain unaddressed.
• Kingston Avenue Medical Centre serves both East and West Horsley, as well as the surrounding villages. It is near impossible to get an appointment within a one week timeslot and further development to the area will make this even worse. Again, there is no provision for new medical facilities in the village, despite an additional 385 homes being proposed.
• Horsley train station serves both East and West Horsley. It is impossible to park on a weekday and there are no other suitable parking areas in the village. The addition of 385 homes in West Horsley, as well as 2100 homes
on Wisley Airfield, without increasing the size of the station, or improving accessibility is going to cause immense strain.

- Traffic generation from the proposed new housing in West Horley and the new settlement in Ockham is going to have a significant impact on our roads. Being in a rural setting, every household has at least one to two cars, possibly three. The proposed levels of development are going to cause immense strain on the local roads, already in a poor state of disrepair. Many roads are small, winding lanes, unsuitable for heavy traffic or large loads.

There is a known waste water/sewerage problem in the Ockham Road North / Green Lane area. No provisions have been made to improve the waste water infrastructure, which is deplorable, given the proposed increased housing numbers in the area. Thames Water has advised Guildford Borough that the area’s wastewater network is unlikely to be able to support the demand anticipated from all the proposed developments.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the draft local plan for a number of reasons set out below related to the Horsleys

- **Green Belt**: The Plan does not justify the “exceptional circumstances” as required by the NPPF to remove areas of Horsley from the Green Belt by changing settlement boundaries.
- **Infrastructure**: The local infrastructure is already overloaded and no planning thought appears to have been given to the provision of additional roads, schools, medical facilities and drainage/sewerage.
- **District Centre at Station Parade**: This is inappropriate given the nature of the facilities in the village.
- **Ockham Three Farms Meadow**: 2000 isolated houses are proposed there. There are many arguments for objecting to this site being in the Plan at all given that a planning application has already been rejected, however the development will have a considerable negative impact on the Horsleys particularly if the promised infrastructure facilities do not materialise, as is often the case under “viability” pressure from developers.
- **Disproportionate housing development in Horsley**: The planned allocation of housing in the Horsleys is utterly disproportionate to the size of the village – a 35% increase in existing West Horsley households and on Green Belt land. This compares to 11% increase in Guildford Town where opportunities for brownfield development remain to be explored. A fairer and balanced allocation of new housing is required.
- **Suspicious basis to the numbers of houses required**: There remains considerable suspicion that a flawed model has been used for the estimation of numbers. Suspicions sustained by the lack of openness of the model used for the calculations – this model has not even been exposed to the GC councillors. Particularly in the light of Brexit, these numbers require justification and revision.

I OBJECT to the Draft Plan and request that it is radically redrafted to account for existing law, national policies and the wishes of current residents.

Disproportionate development in the Horsleys

**I object.** The planned allocation of housing in the Horsleys is utterly disproportionate to the size of the village – a 35% increase in West Horsley properties and on Green Belt land. This compares to an 11% increase in Guilford Town where opportunities for brownfield development remain to be explored. A fairer and balanced allocation of new housing is required. These proposals will destroy the rural character of the villages. This is at least unfair and feels persecutory, particularly when the west of the Borough (Ash and Tongham) is allocated so few properties. The cumulative effect of so many houses on the Horsleys must be taken into account. If there are reasons for the current allocation of housing, these should be argued and justified in the Plan rather assumed. The density of new housing on the proposed Horsley sites is inappropriate, and greater than anywhere in the locality.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to object to the above plan in relation to “The Horsley’s Development Sites”.

My reasons for this are as follows:-

- Whilst some development of new housing, assuming a broad mix of affordable through to upper end, is desirable to meet demand the proposal for up to 593 new dwellings in the Horsley’s is out of balance compared to the existing housing stock.
- No justification of the “exceptional circumstances required” has been established within the local plan to remove the Horsley’s from the Green Belt.
- Development outside the existing settlement boundaries should only be considered once all suitable sites within the current settlement boundaries have been utilised.
- The local plan does not provide an infrastructure proposal to support even a modest increase in housing stock. For instance the Horsley Medical Centre is close to capacity and would not be able to accept registration for new patients on anything like the scale proposed.

With reference to the proposed changes to the Horsley area;

I am very concerned about the extent of the housing proposal in the Horsley area and the removal of the Horsleys from Green Belt land.
Primarily, I am concerned about the network of roads and public facilities, which would come under extreme pressure, should more houses be permitted. The roads are not suitable for heavy vehicles and increased traffic. Most local roads suffer with drainage and pothole issues, without additional vehicles using them.

The local facilities, including the doctor’s surgery, would not cope with more than 500 additional families. (Over 2,500 families if I include the 2,000 houses proposed for the Wisley Airfield) There is already limited availability for appointments, without any proposal for extending the surgery and it’s car park, to cover the additional people, who would wish to use it.

Parks and carparks are also stretched. The Station Parade is always busy, as is the train station car park. Without additional space for the additional shoppers / commuters, there would be restricted access for current residents to use the facilities.

Finally, I understand that building on Green Belt areas is only to be undertaken in exceptional circumstances, which the plans do not demonstrate. The plans will fundamentally alter the complete dynamic of what is an exceptionally friendly and supportive community and I hope you take these factors into consideration when deciding on the fate of our village.

REMOVING THE HORSLEYS FROM THE GREEN BELT

I OBJECT to this proposal.

Policy P3 states that “We will continue to protect the Metropolitan Green Belt, as shown on the proposals map, against inappropriate development. In accordance with national planning policy, the construction of new development will be considered inappropriate and will not be permitted unless very special circumstances can be demonstrated.”

What “very special circumstances” have been demonstrated that warrant taking the Horsleys out of the Green Belt? The Plan’s projected housing numbers are flawed, whilst the roads, schools and doctors’ surgeries are already overloaded.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is utterly implausible.

Furthermore, the Green Belt is not the Council’s to give away, and once it is gone it is gone forever.

EXTENDING SETTLEMENT BOUNDARIES OF THE HORSLEYS

I OBJECT to this proposal.

There are no concrete reasons why these areas should be extended – other than a sneaky plan to carve out more land for future development.

OVERLOADED INFRASTRUCTURE

I OBJECT to this inevitable result of the Local Plan.
It is obvious that not a single member of the Local Plan’s drafting team has visited the Horsleys in recent years. Roads are full of potholes from the sheer volume of traffic, drains do not work and roads flood repeatedly, schools are oversubscribed and trying to get an appointment at the doctors’ surgery is next to impossible.

How can anyone even dream of making this scenario worse by the addition of new households?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/3799  Respondent: 11041953 / Elizabeth Baxter  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to express my opinions on the above document and its proposals.

I object to the imposition of an unsupportable burden on the drainage infrastructure, the schools, the roads’ network, the medical services, and the parking in the shopping areas. None of these seem to be addressed in the plan.

I object to the high density and large volume of housing planned, as they are unbalanced and will change the nature of the village quite out of character.

I object to the extra volume of traffic that will inevitably follow such a large expansion.

Since the National Planning Policy Framework requires that new residential development must respect the character and density of housing in the area and take into account the infrastructure and local facilities I cannot see how the Plan caters for this.

The Green Belt was set up in law to provide for the maintenance and care of an area of countryside between villages to maintain not only the countryside but also the individualism of the villages. If this is changed then the spread of conurbations will clearly mean the Surrey area ends up being a further extension of the London suburbs.

The well being of the countryside is paramount to the health, economy and lifestyle of many thousands of people now and in the future in Surrey. The loss of habitat will be irreversible and has huge consequences for the ecology of the remaining countryside.

I would be particularly upset to see the development of land in the Northern section (A40) of West Horsley that is alongside our house and is where we keep our sheep.

This provides much character and green space for the wildlife in the area.

The land is commonly under water when there is substantial rain as shown below and housing development would exacerbate those problems.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

RESPONSE TO GUILDFORD BOROUGH COUNCIL (GBC) DRAFT LOCAL PLAN 2014
I object to the proposals. The scale of development would put significant strain on local infrastructure and services and completely change the character of West Horsley. GBC’s plans to remove land from the Green Belt goes against national planning policy and prioritises ease of development over preserving the environment of the borough for future generations.

POLICY S2: BOROUGHWIDE
STRATEGY: Object
● No evidence is provided for the 13,860 new homes. The need for the proposed 533 extra homes in East and West Horsley seems to be down to the availability of landowners willing to sell their greenfield land for development rather than any consideration that West Horsley is the right place to build this number of homes.
● Brownfield sites must be developed first before any land is removed from the Green Belt.

POLICY P2: GREEN BELT AND THE COUNTRYSIDE: Object
● As our MP, Sir Paul Beresford was told by the Parliamentary Under Secretary of State (Planning) in his letter of 18 June 2014 in relation to the last draft local plan, “most development in the Green Belt is inappropriate and should be approved only in very special circumstances … unmet housing need is unlikely to outweigh the harm to the Green Belt to constitute the very special circumstances justifying inappropriate development within the Green Belt. … Green Belt boundaries should only be altered in exceptional circumstances.” Nothing central government has said since has done anything to alter this position. Unmet housing need is not an exceptional circumstance.
● The Green Belt is precious and must be protected for future generations.

POLICY I1: INFRASTRUCTURE AND DELIVERY: Object
● Developments at West and East Horsley and at Wisley Airfield will place considerable strain on already stretched infrastructure, including transport, education, medical services, parking and shops. Local school, childcare, medical and transport facilities are already overcrowded.
● The Draft plan does not provide enough detail on how further strains on resources will be met. No information is provided about how increases in traffic produced by these developments will be managed to protect the health of residents and their safety on the road.

POLICY I3: SUSTAINABLE TRANSPORT FOR NEW DEVELOPMENTS: Object
● The developments in West Horsley will increase car use, which is contrary to sustainable transport policies.

In conclusion, I object to the removal of land from the Green Belt. There are no exceptional circumstances presented to justify this. Development in West Horsley will completely change the character of the village and put more strain on already stretched local infrastructure.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/2321  Respondent: 11043041 / James Withers  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

SITES IN EAST AND WEST HORSLEY: Object
● The plan proposed that East and West Horsley take 35% of the new homes proposed in the borough. This is a
disproportionate number and will have a significant impact on the area and its infrastructure.

- No details are given for the infrastructure planned to deal with this number of new homes.
- The density of new housing proposed is greater than anywhere locally.
- The plan presents no argument or exceptional circumstances for extension of settlement areas into the green belt.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to oppose The Guildford's proposed Local plans: strategies and sites June 2016. I have lived in West Horsley for over a decade and I am strongly against the plans to change the nature of the village and the surrounding countryside. The National Planning Policy Framework states that any new residential development should be in keeping with the current character and density of housing in the area. This plan does not meet that criteria and it also does not make allowances for how the current infrastructure and local facilities will be able to cope with all the additional people moving into the area.

My specific concerns include:

Education
Currently both the Raleigh and Howard of Effingham schools are full. Local children should be able to go to their local school and not have to travel outside of the village.

Housing Density and the results of this
The infrastructure will not be able to cope with the proposed additional number of houses. There are already issues with drainage when we have heavy rain and Thames Water has advised your council that the current wastewater network will not be able to support the proposed housing developments. Congestion and increase of traffic on roads is also a major concern and will not be helped by children having to travel to school outside of the local area because of the aforementioned issue with over subscribed schools.

Green Belt
I refer again to the point re: changing the whole character of the village which would happen if this plan goes ahead. The National Planning Policy Framework says any change of Green Belt boundaries should demonstrate exceptional circumstances. The law does not state that unmet housing need is an exceptional circumstance. Therefore, the Green Belt boundaries should not be altered. This development would cause irreparable damage to the Horsleys and the surrounding villages and is completely unacceptable. It would be much better to use brownfield sites before destroying the beautiful countryside in the green belt that makes the villages here what they are.

I strongly oppose the Local plan and do not believe that you are complying with the NPFF. Given the overwhelming feeling of local people against this plan I hope you will not seek fit to implement it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I want to object to the Draft Local Plan (refs A36, A39, 90, 353, 2177, A37, A38, A40, A41, 2292, 350, 1219, 1275, A35, A37, A38, A40, A41, 2292, 350, 1219, 1275, A35, A37, A38, A40, A41, 2292, 350, 1219, 1275, A35) affecting the Horsleys on the following grounds:

- Traffic and Parking - our streets are already congested. It is very difficult to park at the Parades on Ockham Road and due to the sheer volume of cars, it is often difficult to see people crossing the road with the consequential accident risk this has. Adding to this pressure and risk with more households which bring at least 2 cars per household on average is simply non-sensical given the potential accident dangers that could follow;

- Pollution - the large increase in the volume of traffic will cause an increase in pollution levels which is already a concern in our area.

- Flooding - the area already suffers from flooding and building in this area will only exacerbate the situation. The soil and drains already cannot cope.

- Schools - local schools are already at capacity. Where will the children of incoming families go to school? Even if the schools were to be expanded, or new schools built, the standard of education for which the area is known will suffer adversely which will ultimately impact the desirability of the area for families. Hence, the development will not lead to families residing the area if the schools are not up to scratch, and therefore the development will not achieve what it set out to.

- Medical facilities - similar point to schools.

- Transport - road and rail links are already busy, if not congested. Our transport infrastructure will be under enormous strain by increasing the numbers of users with the result that there will be failures, poor service, misery for those that travel and ultimately, make this area unattractive for people to move to. Hence, the development will not achieve what it set out to do.

- Green belt land - developing on our countryside will slowly erode the beauty of Britain. There is a reason why Britain is so attractive to live in and this is in part due to the countryside we have here. To build in our countryside will only destroy this beauty and ultimately, make our country and in particular, this part of the country, unattractive.

Villages and Major Previously developed Sites, sustainable Transport for new development

West Horsley is one village and always has been, its not west Horsley south and west Horsley North, where did you get this from? Settlement boundaries exist and do not need to be extended you give no good reasons for this and no exceptional circumstances have been presented. West Horsley only has one small shop, no post office, limited bus service during weekdays only

Homes For all/ Affordable Homes
We don’t have the roads/parking for this increase in traffic, the school is already full to brimming. There is no evidence that we need this many new homes, our own west Horsley survey showed we need 20 properties for local people who want to remain in village (downsizes/ young people). 434 homes in 3 greenbelt sites at much higher densities than currently exist would be totally out of character with existing mix.

green Belt, surrey Hills AONB

I am opposed to you removing the green belt in east and west Horsley. Guildford Borough Economic Strategy 2013-31 doesn’t make any case for siting large numbers of homes in west and east Horsley

WEST HORSLEY,

And generally

At The train station the car park is already full quite often, where would the extra commuters park? Potentially 1200 extra cars in the village? No way

The drains on Ockham road north often get blocked, and back up, there are major problems and another 604 homes in the villages will lead to major problems. The drains have a lot of broken bricks in them I have heard and cannot take any more capacity

All the Traffic stopping at glenesk school is a proven bottleneck in the morning. The private schools already generate far too much additional traffic through the village first thing and last thing, building all these extra homes will make it gridlock in the mornings and afternoons

The Raleigh school is full in northcote crescent, and doesn’t have room for any more classrooms or kids. Any more cars going down there for drop off would cause gridlock

At The Medical centre East Horsley, parking is already impossible and almost as hard as getting an appointment, it can’t take any more patients in my view and the small road to it cannot take any more cars

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to express my grave concern about the proposed plans for development and removal of the Horsleys from the Green Belt.

My major concerns and objections are as follows:

1) The residents of West Horsley are totally opposed to the village's removal from the Green Belt.

2) West Horsley's Defined Settlement Area boundaries do not need to be extended at any point and no “exceptional circumstances” or justification for insetting these Areas from the Green Belt have been evident.

3) No sound reasons have been given for the proposed changes, which seem to be solely aimed at increasing land available within the settlements for future additional development.

4) The local infrastructure is already in overload. The local schools are full, medical facilities are stretched, the drainage is woefully inadequate and the traffic is already at high levels with roads in a dreadful state of repair.
5) The density of housing in the proposed development sites is several times more than the density of present dwellings.

6) Brownfield sites are not being developed ahead of these proposed new sites.

7) 2 versions of the Greenbelt Purposes Assessment were produced, in February 2013 and April 2014. Between the 2 versions, the score for contribution to the greenbelt was reduced for all sites in West Horsley without any explanation as to why. This seems a deliberate manipulation to the scores in order to downgrade to a low Green Belt sensitivity.

Please consider the above comments before the consultation period ends.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

1) I object to the proposed changes of the settlement boundaries of the Horsleys into the Green Belt

2) I object to the proposed removal of the extended village areas from the Green Belt

3) I object to the proposed large housing development sites given that other avenues have not been considered and the local infrastructure cannot support these sites.

4) I feel that it is wholly unacceptable for Guildford Borough Council not to be protecting the Green Belt and putting short term gain before it's preservation for future generations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/4398  Respondent: 11045665 / Graham Bannister  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

There is no way that our already overstretched infrastructure can support the additional population the proposed development will bring in. The roads in the area have not been maintained in recent years and would not support the another in flux of thousands of new vehicles not to mention the destruction caused by heavy goods traffic. Developers traffic has already damaged many of the roads locally.

Schools and medical facilities are already close to breaking point. How are they expected to support a potential 30-40% increase in demand.

I have lived in this village for most of my life. I have watch the village expand slowly. I believe that the huge amount of the proposed development that is planned for this area will decimate this village.

I oppose the removal of the Horsley’s from within greenbelt. The local plan is potentially vague and duplicitous there appears to be very little boundary to the level of development that could happen here. For example, I note that the few
shops a centre of the village is designated as a district centre. Horsley is not district it is a village, not only does this suggest that Little attention has been paid to the nature of our community but I also understand it opens the door to further urbanisation and development. I am opposed to the reclassification of this area.

The proposal for building houses within only very few miles of this community, at Wisley airfield, Garlick’s arch, burnt common and Gosden Farm is appalling. This would eradicate all semblance of village life and potentially merge all local villages into Guildford and create a sprawling mass of unaffordable housing.

There is no denying that housing is sorely needed in this country but it needs to be planned carefully with all of the needs of existing and future communities taking into account. There is nothing to suggest that any of this has been considered in the current plan. There is a general lack of transparency there is language used that is vague an ambiguous. There is no explanation for why developers need to build only on virgin Green Field sites besides the obvious one that it’s much cheaper for them to do so. There is little to suggest that any of the housing will be affordable. There is very little to suggest that any new investment will be found to create an infrastructure that would support the huge increase in population and traffic. There is very little to suggest that any of this development Will benefit anyone except those investing the development. As I understand development in Wisley is being operated by an overseas company, so even the profits made from such rash development would not find their way to help the people of this country.

I appreciate you taking the time to read this letter. It serves as my complete opposition to the new local plan. I hope that you consider the points I’ve raised as this is a once-in-a-lifetime opportunity there is no turning back once this beautiful countryside has been destroyed it cannot be returned. Please do not continue with this Plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I am a homeowner in West Horsley and concerned on the potential impact to our village adding in a further 385 homes, some 35% increase on the current housing stock. I fully appreciate we live in the south east of England and further housing is needed but surely a more balanced approach with consideration to the existing infrastructure / services and built environment of the village is required before the Horsley’s become part of the urban sprawl along the A246.

One of my biggest concerns is that of impact on local essential facilities such as schools, doctors, shops of which there is limited detail. My son has only by the skin of his teeth got a place at the local state school which is a joke being less than a mile away. If all the new homes were built I doubt this would have happened which is ridiculous for a small village. Getting appointments at the doctors is very difficult at short notice and there is no provision for improvement of the current medical facilities. Infrastructure is already poor and congestion would dangerously increase and be a hazard for all users – the pavement provision is very poor and I often have to walk in the road with my two children in our pushchair.

Letter objecting to the proposed submission Local Plan: Strategies and Sites June 2016

I want to voice my objection to the proposed 385 new homes being built in West Horsley in the Guildford development plan. For the village this would mean a 35% increase on the current housing number of 1,111. This is a small village, which does not have the capacity to accommodate an additional 700 cars, another 2000 people all who need healthcare, and schooling and infrastructure to support this level of immigration. As the proposed plan is to build these by 2022, this will radically alter the village and it is unsustainable. This proposal in isolation might not be too bad if we didn't take into account the additional 2000 houses proposed at the Wisley site, which was refused in 2016 by the planning office, the 148 houses proposed for East Horsley, and the large development of 2000 houses just down the road at Gosden farm in Burpham. What you are proposing to do is a travesty; Surrey will no longer be the green belt area it used to be if this plan is allowed to go ahead.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I would like to object to the following elements of the Draft Local Plan: Strategies and Sites June 2016

- Policy P2: The removal of East and West Horsley from the Green Belt
- The construction of additional housing in West Horsley (sites A38 and A41)

The main aim of Green Belt is to prevent urban sprawl by keeping land permanently open. Developing sites A38 and A41 will undoubtedly contribute to urban sprawl. They are open expanses of land which give views of woodland and surrounding countryside and should not be altered in any way.

Whilst I understand the need for more housing I object to the high number of houses proposed. West Horsley seems to have a disproportionately high number of houses proposed. This will put an enormous strain on local facilities and infrastructure including:

1. The local primary school is already oversubscribed and the local secondary school for the Horsleys, (Howard of Effingham) also serves Effingham and Bookham and is already at full capacity.
2. There is one medical centre serving the Horsleys and it is extremely busy. Building such a large number of new homes in the villages will put too much pressure on the surgery.
3. There will be increased pressure on the rail service. The parking area at Horsley Station is small, always full on weekdays and has no room for expansion. There is an infrequent bus service through the villages and it is not a practical option for getting to work.
4. There will be a large increase in traffic in and around the village, especially when sites A38 and A41 are enough of a distance from the shops/medical centre and station to suggest people will drive rather than walk/cycle. Ockham Road and East Lane are busy, especially at peak times and are in a poor state of repair already.
5. There are areas in the village which suffer with flooding after heavy rain. Clearly the drainage infrastructure is already under strain and will not cope with so many additional houses.
6. The current state of pavements in the villages are inadequate – not continuous in some places – and are certainly not in a fit state for an increased numbers of residents.
One of the reasons our villages are so attractive and pleasant for both residents and visitors is the rural setting. Changing the density of housing and increasing the number of houses so drastically will change the appearance and feel of the villages forever.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/3270  Respondent:  11051649 / Andy Lewis  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Existing villages such as the Horsleys have insufficient infrastructure to provide for the development proposed.

I totally object to the need to expand the villages and I OBJECT to the plan to create new settlements such as that proposed at the Wisley Airfield site. The plans do not have the good road, rail, shopping, education, health and leisure facilities to support the new settlements such as Wisley Airfield.

Moreover, it seems perverse in an age of fundamental shift from physical to virtual (internet) shopping, that GBC are still considering massively increasing the area for retail. Some of the areas earmarked for unnecessary shopping facilities could be far better used to meet the perceived housing need and allow protection of the environment that this draft LDP seeks to change for the worse for ever.

Plans proposed have not considered the infrastructure and are fundamentally unwise

Notwithstanding that these plans go against statutory direction, there are additional reasons why many of the consultants’ proposals are flawed. Real concerns of sustainability and viability, together with almost no real impact studies, show that these plans are constructed to meet a political agenda, rather than rational assessment that would have discounted them. I OBJECT to the plans for the following reasons:

- Flooding

In recent years, flooding has become a severe national problem. In the 5 years we have been in East Horsley, there has been significant flooding on the roads each winter. The water table is high, and the drainage system is quite obviously incapable of handling run-off. Removal of more trees and fields to create dwellings will only exacerbate the problem.

- Transport

Many of the proposed villages for development sites struggle already with road and rail infrastructure. For example East and West Horsley, and the Wisley airfield site, are served by the Guildford via Cobham branch line, which is already creaking at the seams at rush hour. With existing population levels, the morning trains are often full after Effingham Junction, even though 10 car trains have been introduced to cope. It is totally impractical to add significant numbers of commuters to our current load. Moreover, the car parking at Horsley and Effingham Junction is barely adequate now. The rail link is simply so congested that it is impossible to contemplate building 3000 new homes in the Horsley/Wisley area to feed into the currently stretched system, let alone the homes in Merrow that will also make commuters lives a misery on the Cobham line.

In terms of roads, they are narrow and struggle with the existing capacity. The major access link is onto the A3, and Old Lane would be completely overwhelmed by the proposals. While there is, this time, indication of junction modification on the A3 at Burntcommon, it is apparent that even SCC are unaware of whether this can be sufficient in any way. It certainly doesn’t appear to be serving the Wisley site. Hence, for transport reasons, it is totally unacceptable to be recommending such a massive and unsustainable development.
Even if additional access were provided at the Ockham Junction, not all traffic would use that exit – at least 50% would use the Old Lane access either to the A3 or to Horsley/Effingham. Planning to build nearly 3000 new homes at Wisley Airfield, Send and the Horsleys, would yield more than 6000 new cars in the area. This is totally impractical and would overwhelm the existing infrastructure, consisting as it does of very narrow rural lanes. Therefore I OBJECT to the draft plan on the basis of the road and rail infrastructure being total inadequate for the planned development.

GBC should also look very closely at the horrendous traffic problems round the Wooden Bridge area of the A3 and the A25 at Ladymead that occur every working day, and recognise that additional traffic from increased housing would be a disaster.

- Schools and Medical centre

Simply unable to cope with more demand.

### Fundamentally Flawed Assessment of East Horsley parade of shops as a Rural District Centre capable to support increased levels of trade from new developments

East Horsley’s parade of small shops is characterised as being 3rd largest in the whole of the Guildford area in terms of size and facilities!, after Guildford town centre and then Ash Vale. This belies that fact that it is no more than a small village facility and certainly not a Rural District Centre (which requires more than 30 retail outlets and we appear to have about 25). Road and rail infrastructure is insufficient; car parking insufficient; space available insufficient to allow any further retail development (if any were contemplated – and it should not be contemplated). Such designation implies relaxation of planning restrictions that would forever change the nature of our village, and I OBJECT to East Horsley shopping parade being classified as a Rural District Centre.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to object in the strongest terms to the local plan for Horsley.

I have lived in East Horsley for over 21 years and it is a lovely place to live and work.

I am in no doubt that if any of the proposals contained within the local plan are followed through then we will lose what makes the Horsleys a vibrant and complete community.

We are a village, and we act like a village and it is worth holding on to this.

Removal from Green Belt
What is the point of the Green Belt if it can be removed on a whim? What are the exceptional circumstances that have been demonstrated for this to apply. I would appreciate a response on this point.

Settlement Boundaries.

This decision too seemed to have no basis. There is scope to build additional houses within the boundary (in much lower numbers) and it is vital that we retain the Horsleys as a distinct village.

Infrastructure

There is no doubt that the infrastructure within the village cannot cope with the number of additional houses proposed. The parking at the station is full to overflowing, there is constant heavy traffic already on our narrow roads - particular problems on Ockham Road South and the drainage system fails every time we have a heavy shower. I do not have personal experience of local schools but I understand they are full and that medical facilities are stretched. We have quite a lot of older people in Horsley and they are a greater burden on the Health Service and deserve to be treated quickly.

Station Parade

The erroneous designation of Station Parade as a District Centre seems to have happened because somebody pressed the wrong button on their calculator. We have a collection of village shops - no more - and the village is not equipped to cope with the development proposed.

Villages at Ockham and Burnt Common

The impact of these proposed developments on our village would be enormous - extra traffic before and after complete and the demand for facilities within the village.

Concern over Housing numbers

It is hard to believe that there is sufficient demand within our area for so many houses. No one objects to "infill" but this is a major change in the shape of our village which seems to have been decided on against all the evidence. Is it true there is sufficient brown field land within Guildford to build a large proportion of these homes? I would appreciate a response to this.

I am concerned that some local businesses are being sacrificed in order to build houses that we do not need. Two local businesses are about to disappear as a result of the new Opera House (construction traffic is already a problem).
While most younger residents work in London there are many middle aged and older people who work locally. It is one of the joys of living in Horsley that friends and neighbours are truly part of the local community. It is important that we retain this balance.

As a local resident I object to the 533 houses being proposed.

The impact on both West and East Horsley does not seem to have been considered or at least any plans put in place to handle the additional population.

The station car park is already full every day – where will the additional cars park? There is no space for the car park to be extended.

As mentioned above, the roads are already very busy, particularly with speeding drivers. This will get worse, particularly with the rush to get a parking space.

The medical centre is brilliantly run but how can they be expected to cope with an additional 533 families? What plans are in place to deal with this?

If the other large developments are allowed also such as Wisely airfield, this will have the same impact on the Horsleys.

As I have said before, I am not an expert and cannot comment on the planning policy but it seems to me that there must be other more sensible options that wouldn’t cause such a huge feeling of betrayal by Guildford Borough Council. Surely smaller numbers of houses on the plots and not removing the Horsley from the Green Belt would have been a better option. There must be other brown field sites elsewhere which would be better and not in the Green Belt. And the house prices are so inflated in the Horsleys that the intended purchasers will never be able to afford them anyway.

I hope my comments will be taken into consideration

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am writing to object most strongly to your proposed plan to carry out extensive housing development in the Guildford area, particularly in the Horsleys.

West Horsley's defined Settlement Area boundaries (ref 2003 Local Plan) DO NOT need to be extended. West Horsley Parish is one of a rich and varied mix of well-established low housing density settlements with a considerable number of historic buildings. Positioned on the north side of the North Downs, partly in the Surrey Hills AONB, it attracts a considerable number of recreational visitors (walkers and cyclists) through the seasons each year.

The number of proposed new homes will swamp the village of West Horsley and change its nature irrevocably. Village expansion is unsustainable. With only one small shop, no post office, a very limited ‘weekdays only’ bus service through the village, it is clearly unsustainable for the proposed high volumes of new housing development.

The development of 385 homes on the 4 proposed sites are at much higher densities than currently exist in the village settlement and will be totally out of character with the existing mix of different housing styles and layout of the village. The homes building proposals are unsustainable in terms of all the above not to mention parking in East Horsley shopping areas and particularly at Horsley station which is virtually full on a daily basis and of course, public transport.

The planned development on Green Belt is therefore unsustainable.

Now that the Council has acknowledged the ‘West Horsley Neighbourhood Area’ (which it did on 8 September 2014 - The West Horsley Neighbourhood Area follows the boundary of West Horsley parish) following an application by West Horsley Parish Council and a six week consultation, it is hoped that the Council will listen to and acknowledge the views of the parish council in future planning matters.

The need for so many houses to be built in West Horsley over the first 5 years of the Plan period 2018 to 2033 is totally unproven. The West Horsley Parish Council and Surrey Community Action Housing Survey: May 2014, identified a limited need for some 20 affordable homes for local people who want to remain in the village, i.e. for young people and for elderly people who wish downsize to a smaller home.

If this is a “Local Plan” which was has been subjected to extensive consultation and vociferous objection by the electorate of Guildford Borough, why is Guildford Borough Council (GBC) perusing this as it is so clearly unsupported by locals. Are you reacting to and being dictated to by central government? It seems so.

Surely the purpose of a Local Plan is to meet local needs and objectives as set out in the Neighbourhood plan, not those handed down from Westminster.

The planning officers and councillors of GBC have signally failed to listen to the concerns about the destruction of the green belt in West Horsley. The draft local plan would result in the urbanisation of this small hamlet. The infrastructure of both the Horsleys, East and West, would not cope with more than a small increase in housing numbers.

In conclusion, I urge GBC to revise the housing number to a more realistic and required number, and to amend the Local Plan to utilise brownfield or previously used land rather than green field sites. There are plenty of brownfield and previously used land sites within the Borough.
I have read the voluminous reports purporting to the above and have several significant objections:

**There are too many homes being proposed to be built too fast for a village without the necessary infrastructure to cope with such an expansion.**

1) I am totally opposed to the West Horsley village’s removal from the Green Belt by insetting and extending the 2003 Local Plan Settlement Area boundaries. There are NO exceptional circumstances other than in a developer’s eyes…!

The policy states that provision will be made for 13,800 new homes over the Plan Period 2103 - 2033; this is far too high and is unsustainable in Guildford's villages.

2) The Key Evidence document makes no case for locating the proposed large numbers of homes in West and East Horsely villages.

3) Village expansion in particular in West Horsley is unviable; there is only one small shop (which is under sale negotiations at the moment and is not guaranteed to remain as a shop), no Post Office, a very limited weekdays only bus service through the village. It is clearly unsustainable to accommodate the high number of homes proposed. The development of 385 propose homes on the 4 sites is with much higher densities than currently exist in the village and will be totally out of character with the existing mix of housing and layout of the village. Also, the need for so many house to be built in West Horsely over the first 5 years of the Plan Period is not proven; the West Horsley Parish Council identified a limited number of about 20 affordable homes for local people (the younger and older residents) who wish to remain in the village.

4) The homes proposal do not take into account the tremendous effect that such a large number of homes and people, as proposed in the Plan Period, will have on an already creaking local infrastructure, in the terms of schooling, drainage, roads capacity and maintenance, shops, parking (in East Horsely - the shops and the station) and public transport, or rather lack of it…!!

5) On another point Policy i3 states that developers would be expected to propose and secure travel plans for their developments and contribute to transport and arrangements for the disabled - my experience proves that this is lacking and therefore the policy lacks teeth to impose rather than expect.

6) There is a continuing lack of clarity as to schools in the area and the influx of large number of home and therefore families with children will worsen this situation. The Raleigh school serving East and West Horsley want to move and expand but this is only preliminary at the moment and will take several years to build and complete - otherwise it is FULL. Schools in the area (Glenesk and Canmore) also currently provide major difficulties for the road transport system at certain times of the day!! the Definitions and Policy ! Infrastructure and Delivery mentions “schools”; but it is rather vague in the extreme…!!

7) medical facilities at the Kingston Avenue Medical Centre, serving East AND West Horsley, are already stretched and residents experience difficulties in making timely appointments. The planned increase would swamp the current facilities…!!

8) Roads and transport Infrastructure, while again mentioned in the Definitions and Policy: Infrastructure and Delivery, there is no specific mention for West Horsley….While there is a reasonable frequency of trains to London and Guildford during the 7 day week, the station carpings is normally full on weekdays, and certainly an increase in the population of the size envisaged would have an unbearable pressure on the station parking and indeed traffic movements in general for work, schools and shopping. Car ownership in village areas tends to be two cars, or even three, meaning journey times on local roads will increase significantly.

9) There are current, known sewage overflow problems in the Okham Road North/ Green Lane and East Lane areas, Also, Thames Water has advised that the area’s wastewater area in unlikely to support the demand anticipated from all the proposed developments. They advise it will take 2-3 years’ construction to install the drains/pipes etc AFTER planning permission has been granted.
All in all, this does not appear to have been properly thought out for modern times and modern living with significant chances of environmental and social disaster. It is simply too many homes for villages without the necessary infrastructure to cope, and vague in setting out developer’s responsibilities at the outset; the developers will be able to make significant amount of money/profits in high value housing area without due though for the local community(ies).

I trust that these comments will be taken into account when decisions are being considered.

**Re. The Guildford Plan**

I am concerned, and unhappy, about The Guildford Plan.

I object to the proposal to remove Green Belt land from the Horsleys. I also object to the idea of ‘insetting’ the Horsleys. I object too to the proposal of SANGs.

I have major concerns and objections to the proposal to remove East and West Horsley land from the Green Belt. Residents are very worried.

I oppose the proposals to develop Green Belt land for residential development.

There are no justifications for extending settlement areas.

West Horsley's Defined Settlement Area boundaries do not need to be extended. There are not any reasonable, justifiable, nor proven with acceptable evidence, “exceptional circumstances” for insetting these Areas from the Green Belt.

The Horsleys do not have suitable infrastructure for large scale development.

The provision of properties for first time buyers is not a reasonable excuse for building large scale, high density housing on land that should remain as undeveloped green belt land. The Horsleys is not a first time buyers destination of choice. Any argument for creating first time buyers housing is short sighted. Housing would quite easily increase in price very quickly and in just one sale along it could be far higher than a proposed ‘first time buyers’ property, making such an argument utterly ludicrous.

Local schools are full. The current idea that The Raleigh school could be rebuilt is wholly unacceptable as it is being proposed that it be rebuilt on green belt land. The Raleigh School is being used a pawn in the Guildford Plan’s proposals.

The village shops at East Horsley have been incorrectly classified. They are not a significant commerce hub. The village shops are a small row of stores and amenities. As such, they serve the village well, but they are not a significant commercial destination and do not support the proposal of the increased population set out by The Guildford Plan.

The density in the proposed development sites is of a density out of keeping with the Horsleys and is of a density that would have an unacceptable negative impact on the infrastructure.
It is not shown in the Guildford Plan that Brownfield sites are being developed ahead of Green Belt sites. Green Belt sites must only be used for development in exceptional circumstances. There are no proven exceptional circumstances for the developments proposed in the Guildford Plan.

I am very worried that the scores attributed for the sites in West Horsley have been reduced from the first version of the Greenbelt Purposes Assessment to the second version, in order to deliberately manipulate the area to a low Green Belt sensitivity area. This is very worrying. No explanation has been given, It appears that underhand tactics are at play and the Guildford Plan is not to be trusted.

I am concerned and object to the proposals to build on Green Belt land at Long Reach. There is an area of this land that directly backs onto existing residential properties and the existing residential properties would have a loss of privacy by having the Green Belt land developed to their boundaries.

The density of housing being proposed at Long Reach is of an unacceptable high density. The land at Long Reach should remain as Green Belt land.

It has been proposed in the Guildford Plan that Benswood would act as an alternative greenspace. Benswood is already green and the area being proposed for development at Long Reach is already green. How can the development of a Green Belt area be justified by suggesting that it can be replaced by another area that is itself already Green Belt? It is a simple fact of mathematics that ‘two minus one = one’. The Guildford Plan makes the most bizarre proposals that ‘two minus one = no difference, just alternative’. This is an outrageous con and I object to it.

Green Belt land must be protected and persevered. Once it is gone it is gone forever. We must not be the generation that selfishly sold off land and took away the Green Belt. We must preserve and protect the Horsleys Green Belt land for future generations.

Please consider the above comments as concerns and objections to The Guildford Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<td></td>
<td></td>
</tr>
<tr>
<td>• The following comments relate to my local area that features in Sites A36-41 (East and West Horsley):</td>
<td></td>
<td></td>
</tr>
<tr>
<td>o The latest version of the plan reduces the number of development sites here by 2, but 4 remain, representing 395 new homes. This is too many in absolute terms, and disproportionate in relation to the rest of the borough. In my view, the plan is unsound in failing to assess the aggregate impact of these sites, along with the 2,000 homes planned for Site A35 only 2 miles away, in effect leaving the Horsleys as vulnerable to piecemeal planning applications as they are without a local plan in place. By not setting any development boundaries, the “plan” fails to plan this important part of the borough’s future size or shape in a useful or meaningful way.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>o The inspector needs to be aware that Horsley residents believe this is the result of political bias on the part of a Council leadership overwhelmingly representing the other end of the borough, who wish to push development away from their own wards.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>o The plan fails to mention most of the known sustainability and infrastructure problems affecting the Horsley sites, which were fully explained in the public responses to the 2016 consultation. These include public transport, traffic, road safety, parking, schooling, medical facilities, sewage, flooding/surface drainage and shops.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
o The density of new housing on the four Horsley sites is too high, being greater than anywhere in the locality at present.

o Sites on the edge of existing development in the Horsleys trespass on surrounding open countryside and require big extensions in settlement boundaries. The plan presents no arguments for this which, contrary to NPPF paragraph 79, will promote creeping urbanisation by squeezing the corridors separating the Horsleys from next-door settlements – one of the main reasons the Green Belt exists.

o Taken together, the 4 Horsley sites conflict with NPPF para. 81’s encouragement of access to the Green Belt and its amenity and recreation value. This has been an outstanding success story in the Horsleys, as detailed in response to the last consultation. Assets include a dense public footpath network, parish parks, sports fields, a campsite of international standard, Britain’s newest rural opera theatre (opened this summer) and the popular Olympic cycle route. In order to survive, these assets require a local plan that protects the Green Belt, maintains its openness and beauty and avoids urbanisation and traffic congestion. Sites A35-41 are inimical to this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/285  Respondent: 11077313 / Samantha Crone  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

In particular the proposed development of green belt sites in and around the village of East and West Horsley.

I would like to express the following objections and concerns:

• This would involve building on green belt land which is protected from development by national legislation. Exceptional circumstances must exist for development of this land to be justified. No exceptional circumstances have been demonstrated.

• Loss of green belt land will increase the risk and extent of localised flooding by decreasing the ability of surface water to drain away. The changes in our climate, as we have recently witnessed, have meant an increase in rainfall and flooding. Decreasing the ability of surface water to drain away by building on green belt land will exacerbate this problem.

• In particular, the houses in Nightingale Avenue and Nightingale Crescent, West Horsley, will be at high risk of flooding if the proposed development goes ahead. Due to the incline of the land, surface water naturally drains onto the land proposed for development at the rear of Ockham Road North.

• Flooding in this location would be further increased by sewage overflow problems, which are already an issue in the Ockham Road North/Green Lane area. The proposed development would increase the volume of sewage in the sewer network resulting in a serious capacity issue

• Such a rapid large increase in population density in East and West Horsley cannot be supported by the current infrastructure or amenities.

1. The local schools are at full capacity. The village primary school, The Raleigh School, is already heavily oversubscribed and cannot fully accommodate the existing number of children in the village.

1. The village medical practice would also be unable to cope as it is already very busy and difficult to get an appointment.
1. Parking in the village is currently difficult. The proposed development would worsen the situation.

1. The existing narrow roads cannot cope with the increase in volume of traffic which would be inevitable with such a population increase.

1. The current traffic on the A3 is very congested, particularly at peak times, as is the M25 around the A3 junction. The proposed development can only exacerbate these problems as there is very little industry or businesses in the immediate vicinity and residents of the development will have to travel to work, or at least travel to the nearest railway station, which themselves have inadequate parking for current usage levels.

- Such a large increase in population density in a small village would drastically change the character of the village and has not been demonstrated to be necessary or desirable for this location.

In considering these objections I would be grateful if you could answer the following questions:

What special circumstances exist to justify building on green belt land in this instance?

What is the justification for such a large increase in population density in the small village of Horsley?

What provisions would be made for schooling, medical care and other such essential services and amenities?

What changes would be made to the infrastructure to accommodate these developments?

Would more green belt land be destroyed for access roads and/or facilities to be put in place?

What would be done to address the issue of flooding which would be increased due to loss of drainage onto green land and an increase in sewage in the sewer network?

What are the proposals to address the issues of increased traffic and congestion?

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
My objections to your proposal to build so many houses in the Horsley area are:

The houses are not going to be affordable for our young people to buy and that is our only need in this area is one and two bedroom houses, flats and bungalows for our elderly, I do not want the Raleigh school to move and to be rebuilt, I do not want the Raleigh school to get any bigger. I want the Horsleys to stay in the green belt.

You don’t take into consideration the extra traffic and air pollution, you don’t seem to care about ripping out hedges and felling trees and woods. You don’t care about our wildlife that need all of these things just to try and survive these days is a struggle for them. These are my reasons to saying no to this development in my area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/4074   Respondent: 11079137 / K C Smith   Agent:

I am writing with regard to the proposed Draft Local Plan Strategies and sites June 2016.

I have many concerns regarding this new plan the most unacceptable aspect of the proposal is the proposed increase in housing for West Horsley. The proposed 35% increase in 6 years is clearly ludicrous. No plans for local infrastructure have been shown. The roads are already overcrowded and the drainage systems are at bursting point. The village designation as a Rural District centre is also inappropriate. The proposed increase in housing will make the local amenities unuseable due to the fact that I already struggle as disabled drivers to park. I also struggle to receive doctors appointments as the surgery is oversubscribed.

The parish council offered a sensible proposal i.e. a limited need for some 20 affordable homes for local people who want to remain in the village, i.e. for young people and for elderly people who wish downsize to a smaller home. This would enable the current community spirit and ethos to remain and allow the village to thrive as a part of proper rural England. This would then respect the NPPF policy which requires that new residential development must respect the character and density of housing in the area and be limited in quantity by the availability of infrastructure and local facilities.

I note also that the designated green belt land which I have always been assured would remain as such, has now become prime building land. I understood in 2014 that it is possible, under exceptional circumstances to change green belt land to enable development. I now understand that this will be obtained by “Insettting”

Can the council demonstrate that all of the required process has been adhered to and recorded and that these circumstances legally allow such re-designation.

Can the council also confirm that all possible brown-field sites have been prioritised for development prior to the green-field being used?

With regard to the proposed development at Manor Farm. I am extremely concerned about the extra road traffic this proposed development of some 135 homes would produce. New residents needing to use the A3 to Guildford or London will chose the shortest route to the main road. This will create traffic down the narrow Long Reach road, which includes a very sharp blind bend towards its North most end. This could easily result in a future accident.
I live in Northcote Crescent and already have problems with our garden flooding during periods of high rainfall. The Manor Farm development lies on land higher than where I am. The large area of impermeable land that will be created by the development will without doubt contribute to this problem.

With regard to the surface water run off from this development at present this runs into a pond at the back of the proposed Waterloo farm proposed development. The area of land around Ockham Road North in this area is already a high risk flood area. These two proposed developments will also add to this problem unless a very major surface water alleviation project is to be undertaken. I look forward to seeing the promised hydraulic modelling which is only the start of design development work. The feasibility of this flood alleviation work, together with a design and budget costs should be investigated prior to consideration for actual residential development. Normal SUDS schemes will not be sufficient to alleviate this problem which needs to be sorted now let alone following extra new development.

In summary our concerns are as follows:

- Inadequate flood prevention planning for Northcote Crescent and Ockham Road North.
- Inadequate road access for long reach to A3 links.
- Inadequate facilities at station parade shops and surgery.
- Inadequate school facilities in area.
- Inadequate consideration for the use of brown field sites.
- Inadequate exceptional circumstances to change green belt land to enable development.
- Inadequate consideration for population growth prediction figures.
- The complete lack of consideration for the National Planning Framework requirements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Objections to Guildford Borough Council Proposed Local Plan (June 2016)

I have lived in West and East Horsley since 1984 and object to the level of development proposed for the Horsleys in the draft Local Plan for the following key reasons:

1. Proposal to remove the Horsleys from the Green belt: the ‘exceptional circumstances required before taking action have not been demonstrated.
2. Extension of the boundaries of the settlement areas of the Horsleys: no sound reasons have been given for the proposed changes.
3. Infrastructure is already overloaded: local schools are full, medical facilities are stretched, drainage is inadequate, roads and car parks are overloaded and there is little or no scope for improvements.
4. Station Parade is designated as a ‘district centre’: this designation results from a misreading of the nature of the facilities in the village and would inappropriately target the area for future urban developments.
5. Development of over 2,000 houses at Ockham (Wisley Airfield) under two miles away: the impact of such a huge development on the Horsleys will be huge.
6. Major doubt concerning housing numbers: the estimates of housing requirements used are not soundly based with a disproportionate impact on the Horsleys.

I trust that these objections will be fully considered in the consultation on the Guildford Borough Local Plan.

It is clearly a complex matter which requires an appreciation of the quality of life enjoyed by many thousands of people in the Horsleys. This is at the heart of the very existence of the Green Belt and is what the Plan ignores. The Plan provides no basis for the removal of the Horsleys from the Green Belt. You have simply not proven the "exceptional circumstances" required.

Objections to draft Local Plan and proposed development in East and West Horsley. Policy P2: Green Belt and the Countryside / Policy P1: Surrey Hills Area of Outstanding Natural Beauty (AONB)

The first line of Policy P2 states, “We will continue to protect the Metropolitan Green Belt against inappropriate development.”

We in this country and this county have spoiled many of our villages and towns by over development uncompromising housing built in a sprawl without consideration as to facilities and infrastructure and community. The ‘Green Belt’ saved
some of our towns and villages and has meant that there are still many attractive places to live but we now seem set on spoiling those for the next generation. It is no surprise that areas that are not over developed or spoilt by sprawling housing estates and clogged up roads are popular places to live. Surely we must strive to replicate the kind of towns and villages people want to live in rather than spoiling what we have remaining by over development. The Green Belt is key to preserving attractive places to live and prevent overdevelopment and I totally object to changing Green Belt Boundaries which were laid down many years ago by national legislation. Guildford Borough Council have made no sound case to justify changing the boundaries and I cannot believe ‘planners’ have not learn from the errors of the past which instigated the concept of the Green Belt in the first case.

There are no exceptional circumstances or other justification made for the new Green Belt boundaries that will result from the proposed insetting of the two parts of the village from the Metropolitan Green Belt and as such the Green Belt & Countryside Study is flawed.

West Horsley's defined Settlement Area boundaries (ref 2003 Local Plan) DO NOT need to be extended. West Horsley is positioned on the north side of the North Downs, partly in the Surrey Hills AONB, it attracts a considerable number of recreational visitors (walkers and cyclists) through the seasons each year and if the area becomes more urban and the character changed it will not be enjoyed by our visitors let alone the residents.

In our villages we have convenience shops which are convenient because they are accessible. It is still possible to pop to the shops as parking is available and the traffic manageable. Further development in the village will hinder parking and drive local people to use larger out of town supermarkets as the convenience and ease of access of the local shops diminishes. This scenario is well documented in other area where local shops actually suffer and decline because of development. The Guildford Borough Economic Strategy 2013/2031 makes no case for siting large numbers of residential homes in West and East Horsley and I would argue on the contrary it may well have a negative impact on the local businesses that exist.

The villages infrastructure with narrow roads limited shops parking cannot sustain extensive additional housing. The village will be spoilt by the kind of high density housing proposed which will ruin the attractiveness and character of the village. The need claimed for so many extra houses has not been proven.

We chose this village to live and bring up our children because of the semi rural fee. This is our home and it is not easy to up sticks and move into more rural surrounds not least because of the prohibiting stamp duty rates but also because of the ties we now have in the village. However the development proposed will alter the character and feel of the village for ever and mean it is no longer the kind of village we choose to live in, a different more urban environment will be forced upon us.

All the local facilities are over burdened including library, medical facilities, station and parking, schools. The villages cannot cope with significant additional housing on Green Belt, even the infill which has been allowed and is being permitted at an alarming rate has impacted the availability of essential local facilities without adding significant additional housing on the Green Belt.

The roads become clogged and key times and additional traffic will cause gridlock. The roads are narrow country lanes with narrow pavements not built to sustain significant volumes of traffic and in many cases there is no opportunity to widen and make it safe for pedestrians and car users.

The Secretary of State has stated and re emphasised that it has to be very special circumstances to justify inappropriate development in the Green Belt and yet Guildford Borough Council have made no case for the special circumstances.

Removing our villages from the Green Belt must not be allowed to occur, we have a duty to preserve the village and country side for our children.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am writing to express my absolute objection to the latest revamp of the Guildford Local Plan.

It is clear that on many levels, you have yet again refused to listen to residents and continue to promote a wholly inappropriate and unacceptable plan.

I have been resident in West Horsley for 21 years and moved here specifically because it was in the Green Belt. It is my understanding that for any authority to remove Green Belt status, “exceptional circumstances” must be demonstrated. This is not the case with the current plan as no “exceptional circumstances” have been given and the proposed extended boundaries appear to be aimed simply at increasing available land for future development.

There seems to be major doubt concerning the inflated and unrealistic number of new houses proposed by a Strategic Housing Market Assessment, calculations from which, are not in the plan and do not seem to be available to Guildford Borough Council either. The target housing number arrived at by the SHMA is further increased by Guildford Borough Council, to a figure that is almost 70% higher than that suggested by official national estimates for population growth in the borough.

385 new homes are being proposed in West Horsley alone between 2018-2022, which is an increase of 35% on the current number of homes. This is greater than any other single area in the borough and imposes an unsupportable burden on drainage infrastructure, road network, public transport, parking facilities, medical services and schools.

Our 1 remaining Primary school is full and has been for years, the nearest secondary school (which is a half hour bus drive for my children) is also at full capacity, however, there seem to be no plans for creating further school places for children from the Horsleys.

Our roads are in an appalling state and cannot even cope with the current number of vehicles using them, let alone, potentially, an extra 770 cars if we allow 2 per household, which is not unusual nowadays. Every single household in my road has 2 or more cars.

Drainage in the village is an issue and The Street regularly floods during periods of prolonged rain. Apparently, Thames Water has advised Guildford Borough Council that the current drainage network will not be able to cope with the anticipated demand from the proposed new developments.
There seems to be a visible lack of any plans for new drains, roads, schools, Doctor’s surgeries etc, and this is before we even mention the new development of 2000 houses proposed on the former Wisley Airfield, despite the planning application being unanimously refused by the full planning committee this year.

Finally, the National Planning Policy Framework states that any new residential development must respect the character and density of housing in the area and must be limited in quantity by the availability of infrastructure and local facilities. Clearly, this advice is being flagrantly disregarded by Guildford Borough Council with the current proposed local plan for west Horsley.

This current draught of the local plan is unrealistic and unsupportable and does not warrant the time and resources being spent on it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the removal of West and East Horsley from the Green Belt by “insetting” and extending the 2003 Local Plan Settlement Area boundaries for no apparent and justifiable reason.

I object to the removal of 12 other villages from the Green Belt. No exceptional circumstances have been identified by GBC that would allow the use of Green Belt land for a large amount of house building.

I object to the number, density and sustainability of new housing in The Horsleys. Most of the roads in The Horsleys are narrow, many have no pavements. I frequently have to stop and reverse to allow a bus or lorry to pass, or mount the pavement where there is one. When two lorries meet, it often creates a traffic jam, as they struggle to pass one another. This is especially the case in Ockham Road South. Our roads are narrow, rural roads, which cannot be widened and it will surely not be long before a pedestrian is injured by a car or lorry mounting the pavement.

Neither West nor East Horsley offers the prospect of employment, therefore the occupants of these proposed new houses will need to drive or take the train, mainly one assumes to London or Guildford. This will result in many more vehicles on the roads, adding to air pollution. Moreover, by mid morning each weekday, the Horsley Station Car Park is usually completely full, so that parking will become impossible for many of those wishing to commute to London. The Proposed Local Plan makes no provision for additional parking at Horsley or Effingham Junction, nor is there any room for such. Neither does it make any attempt to ease the already severe congestion on the A3 and M25.

GBC apparently voted unanimously against the large scale development on land at the former Wisley Airfield site, yet it remains in the Local Plan. If these houses are built, the parking facilities at Horsley and Effingham stations will be completely overwhelmed and there will be severe congestion from cars attempting to drop off and pick up commuters.

Already, it can be very difficult to park in East Horsley in order to shop, visit the hairdresser or borrow a book from the Library. East Horsley Village Hall has insufficient parking when there is a big meeting in the hall, so all available parking in the village is used by those attending.

It is already impossible to park at the Medical Centre at busy times, so where will all the proposed new residents park and, given how busy our doctors are now, how will it be possible to provide for the vastly greater number of appointments that will be needed to serve a much enlarged population?

I object to the fact that East, and particularly West Horsley, are being asked to take a far greater number of new houses in proportion to the existing number of houses than anywhere else in the borough. Moreover the proposed density of houses planned is far greater than the density of existing housing in the villages.

I object, as stated earlier, to the fact that The Horsleys and 12 other villages are being insetted from the Green Belt, while in Ash and Tongham, new Green Belt is to be created. There is surely more employment opportunity in that part of Guildford Borough.

The Horsleys are attractive to developers because they are such lovely villages to live in. Although a proportion of these houses are supposed to be affordable homes, it is difficult to discover what the cost of an affordable home in The Horsleys would be. There is undoubtedly a need for a small number of smaller homes for local downsizers and young people wishing to stay in or return to their home village. This was established in a survey carried out by West Horsley Parish Council in 2014. Nevertheless, it is unlikely that the demand would be great or the price low enough. If developers can show that there is insufficient demand for affordable homes, they are then allowed to opt out and build expensive and more profitable homes instead. That is the attraction of building houses in The Horsleys, rather than in the urban area or on the other side of the borough.

1 INTRODUCTION

1.1 This planning appraisal has been carried out by Batcheller Monkhouse on behalf of Mr and Mrs Neilson, to provide an up to date site assessment of land at Oakland Farm, Green Lane, Ockham Road North, West Horsley in the context of the Guildford Borough Proposed Submission Local Plan.

1.2 The land at Oakland Farm has been identified for allocation in the Guildford Proposed Submission Local Plan as part of a wider site referred to as Land to the North of West Horsley, under policy A40. The purpose of this report is to address why this proposed allocation site should continue to be included in the final version of the Local Plan and why the site should be removed from the Green Belt.

1.3 This document provides a brief description of the site, designations and restrictions, a brief review of key considerations raised in the Proposed Submission Local Plan and an assessment of the contribution to the purposes of the Green Belt. The previous representations which were submitted to the Council in March also included an assessment of the site in relation to competing sites also identified as housing allocations in the Draft Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Development within West Horsley. I think West Horsley should yield a parcel of Green Belt land for appropriate development. 40-homes to the rear of the Lotus dealership would seem an ideal site (A37) and/or one of the infill sites A39 or A40.

Sites A39 and A41 do not appear to be "infill" sites so I would not support any plans in the next 10-years to build on these Green Belt sites.

In summary

GBC should make full use of land within the urban settlements and Council land before allowing development within the Green Belt.

The construction of purpose built whole communities within the Green Belt, such as Wisley (and Dunsfold) should be supported within their respective site boundaries and subsequent "development creep" avoided.

Whole scale areas within villages should not be removed from the Green Belt but communities should be encouraged to yield current Green Belt sites for development and I believe one or two of three sites in West Horsley should be made available. Less than 200 additional properties and the impact should be absorbed by the community, any more than 200 houses will have a detrimental impact on the community and services.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Expansion of the village settlement boundary vs Local Plan 2003 (see attached maps)

- Together with the insetting policy, the proposed expansion of the settlement boundary vs LP 2003 would remove additional undeveloped green spaces from the Green Belt, rapidly hastening village expansion and encroachment on the neighbouring countryside. There is no supportable basis for this expansion which contradicts the NPPF policy that local planning authorities should “define boundaries clearly, using physical features that are readily recognisable and likely to be permanent” and the above government objective to safeguard the countryside from encroachment.

- I want to specifically highlight the area to the east of The Street currently outside the settlement boundary, including the Village Green and neighbouring undeveloped land which contributes to the village’s rural character, which would not be best served by being included in the settlement.

I challenge the village expansion as a whole and the area of the West Horsley Village Green/neighbouring fields specifically

1. C) Strategic Site Allocations (A38-41)

- 445 houses are proposed on four ‘strategic sites’ within West Horsley in addition to an undefined number of ‘windfall’ small site completions. Excluding the large site at Normandy, this represents 50% of the total proposed housing within inset villages despite representing only 20% of the current population.

- The proposal places a disproportionate burden of future housing provision on West Horsley relative to other villages, the impact of which would be a significant loss of village character and stress on amenities and roads which could be better addressed through a broader distribution of strategic sites across the borough.

In closing, I fully recognise the need for sustainable housing development within the borough to meet the current and future needs of its residents, but believe we must do so while also safeguarding our countryside and the rural nature of the villages which make this area unique.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:  
- **zzzzzzzzzzzz.png** (2.5 MB)  
- **zzzzzzzz.png** (571 KB)
of the village. The homes building proposals are unsustainable in terms of schooling, drainage, roads capacity, shops, parking in East Horsley (shops and station), public transport

- The need for so many houses to be built in West Horsley over the first 5 years of the Plan period 2018 to 2033 is totally unproven. The West Horsley Parish Council and Surrey Community Action Housing Survey: May 2014, identified a limited need for some 20 affordable homes for local people who want to remain in the village, i.e. for young people and for elderly people who wish downsize to a smaller home.

The exceptional circumstances require before taking action to remove the Horsleys from the green belt have not been demonstrated at all.

In conclusion I would as that you revise the housing number and amend the local plan to use brownfield land rather than our now dwindling green belt areas

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**My Local Village (West Horsley) and Surrounding Area**

Above I have focused on Guildford wide issues. Below I will focus on issues very specific to where I live. However when looking at issues in my location it appears that there is very little detail or consideration of problems and issues that the Local Plan could raise. If the plan is approved and the houses built, those issues will then have to be solved. Rather than consider those issues now and come to a sensible solution now we will be faced with a series of disasters for which dramatic solution will have to be found. This is inappropriate and unnecessary.

As it is clear that in my area a number of these exist (surface water flood identified but no solutions identified, 35% increase in housing, but no schooling provided, existing traffic jams not identified, etc) then it is reasonable to assume there are many more of these issues in other areas of the borough which I will not be aware of as they are not local to me.

In addition there are so-called solutions to other problems/issues identified in the plan that are just a few words with no substance behind them whatsoever. I will give some examples below. In several of these cases I have sought further information from the Council and there isn’t any further detail. Saying there will be a traffic management system, or a SANG is of no use whatsoever if there are no details. It doesn’t have to be comprehensive at this stage, but it has to be more than a few words!

We need to know what the problem is and an outline of the solution as otherwise it could be that an insolvable problem is being created or a problem created that can only be solved by a very damaging solution.

When it comes to the Wisley site the interface with the A3/M25 and the impact on surrounding villages could be catastrophic yet very glib solutions are provided or missed altogether.

The plan gives an impression that the council has been told it will build ‘x’ number of houses, has accepted it and creates a plan to fit the numbers regardless of how damaging or impractical it is.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I am writing to object to the local plans for the Horsleys. The numbers of houses planned are excessive, and the changes to the green belt are not in the best interests of the village.

The Green Belt is critical to the Area's quality of life, and we urge you not to remove the current protection which for example the Horsleys enjoy. It opens up any chunks of land for possible house building including the land adjoining High Park Avenue. It is not just the Horsleys under threat – but also Ockham/Wisley, Ripley, Send, West Clandon and Effingham, on this side of the Borough.

Surely there are better brown field sites which could satisfy demand. The worst possible solution is to use or change the green belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I'm disappointed to hear of the changes Guildford Boroughs intends to implement to the area which will adversely affect the area.

My wife, kids and I recently bought a house and moved to the area because of it's quiet, small village and beautifully untouched country surrounds. With the new proposal the existing character will be lost among other things.

- The existing services and amenities will not be able to sustain such an increase in residents.
- The existing schools are already oversubscribed, this would strain them even further and at the risk of lower their standards/rating.
- The local GP is already oversubscribed, with appointment waiting times from 1-3 weeks, they will not be able to cope.
- The train service will become more congested and inevitably more expensive.
- There is already not enough car park space at Horsley train station.
- The existing roads are already in disrepair with very poor maintenance and will only get worse.
- The village will not be able to cope with the additional traffic and parking space requirements.

I cannot think of any reason why it would be good for us and any of the other residents of the area to bring this change into effect and allow further development.

For the record I contest the changes and this NEW Local plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

|---|---|
| Of particular concern to me and my family is that a more local level the proposals include: |
| • At least 148 more houses in East Horsley. |
| • At least 385 more houses in West Horsley. |
| • Both villages to be taken out of the Green Belt. The new boundary, (called the in-setting boundary) extends the old settlement boundary and includes some fields and open spaces. This means that if they aren’t already identified in the plan for development that they too, are vulnerable to future development. Eg Kingston Meadows (by East Horsley Village Hall) is included inside the insetting boundary – despite being a valuable green space. Why? |
| Similarly Horsley Tennis & cricket club at the end of Pennymead Drive is also inside the insetting boundary. Why? |
| **What changes (2016)/further amendments (2017) do you suggest should be made to the document?** |

| Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( ) |
| I am writing to strongly object to the “new” local plan. As far as I can tell, there is nothing ‘new’ regarding this plan so far as West Horsley and the Wisley Airfield development proposals are concerned. |
| It has been my long-held belief that GBC have continuously targeted West Horsley as a key development site – and we have done well to resist such continuous development attacks on our village and the surrounding area. Yet again, GBC want to remove West Horsley formally from the Green belt; develop over 500 new homes and support a ‘new town’ build on the Wisley Airfield – less than 2 miles from the West Horsley boundary. |
| This area cannot sustain such large-scale development. Its infrastructure is still Victorian in it capability. Plumbing; pipes; road width; flood defences all point to a bygone time of the 1920’s. Two lorries on Ockham Road North travelling in opposite directions cause havoc. They simply cannot pass without mounting pavements and crashing continuously into the railway bridge, which happens approx. 3 times a year. |
| Schools cannot cope with existing demand, neither can the 1 Doctors surgery. |
| The railway station and parking and pick-up/drop-off routines will be interesting with, possibly, the addition of 1,000 extra cars and 2000 commuters. |
| The road quality in the area now mirrors Beirut on a bad day back in troubled times. |
| The absolutely baffling thing to me is the fact GBC are clearly taking a well-trodden path and a ‘line of least resistance’ in regurgitating these well-worn proposals. The lack of imaginative research to accommodate the genuine housing need on existing brown-field sites in the wider area is startling in its incapability; willingness and desire to plan effectively within the Borough. The political manoeuvrings to eliminate any real powerful say of the elected Guildford Greenbelt Group from any Committee of meaning and the exclusion of this elected Group of Councillors from any real debate shows a complete disrespect to us, the Public you are supposed to serve. |
| The scale of your development proposals in the Horsley area and Wisley beggars belief and demonstrates a level of disdain of previous very public objections. |
You should hang your heads in shame GBC.

Your Local Plan from a Horsley and Wisley perspective is a complete disaster. Over 500 proposed new homes and 2,000 in a new town build within 2 miles is a recipe for disaster for the area. An area you have clearly wanted out of the Green Belt for the last 24 years we have lived here.

Your previous deceit; arrogance and utter disdain of the wishes of the people who live in this area over that time borders on a campaign of ruthless arrogance. A vote of ‘no confidence’ in you; the Local Plan and the architects of such nonsense is long overdue.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I strongly object to the proposed housing developments planned for West Horsley.

The village of West Horsley already struggles with peak time traffic, local school places, village parking, station parking, doctors availability etc etc. The planned addition of 1,111 homes in our small village will increase the population by approximately 4000 people, adding at least 2000 additional cars to our local environment. This will adversely change/ruin the appearance and character of our village forever.

I also believe that ignoring the green belt will be at our peril. We need to protect our green areas or lose our air quality for the whole of the South East of England. There are so many brown field sites that should be considered first before riding rough shod over the green belt policy.

Personally, I moved to Surrey from London due to price pressure. This is something that people have to accept, we can't keep building just to allow our children to live in the area they were raised. This housing won't help matters in that respect. As soon as they are built, they will reflect Surrey house prices, making them unaffordable to young people. The North - South divide is set to widen with this type of housing policy. The Country is in danger of tipping up with the Weight of housing and population in the SE compared to other parts of the country.

The proposed developments are far too large to 'fit in' and would destroy our village way of life. Can these developments be spread more evenly around the county of Surrey, in smaller scale, consequently reducing impact on Surrey citizens?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I write to register my objection to the current plan to overdevelop the villages of East and West Horsley endangering their status as villages and trying to turn them into small towns.

Primarily my objections are as follows:

**Infrastructure**

The roads in the Horsleys are coping with considerably more traffic than they were designed for.

In particular East Road/The Street running through West Horsley between the A246 and Ockham Road is frequently congested with cars queuing back along the road at both ends, worse at busy times of the day.

Ockham Road from The Drift intersection up to the station is particularly busy with business and school traffic.

These roads are now too busy to be safe for young cyclists who should be able to cycle to school in a so-called village.

Ripley Lane and The Drift are in poor repair as are stretches of East Road/The Street and further heavy traffic will be detrimental.

The junction with the A3 at the Wisley roundabout is already dangerous with cars queuing back to the roundabout at busy periods and drivers taking unacceptable risks to get into the middle and outside lanes of the northbound A3 to avoid the queues up to the junction with the M25.

There are few buses through the villages. Each new house is likely to have at least one, and probably two cars.

Has anyone thought of the impact all this extra traffic will have on air quality or doesn’t our health count?

There appears to be no evidence to support consideration for additional parking in the villages, at the station, shopping paraes or the village halls for all these additional residents.

**Drainage and surface water**

Housing plans recently have run into difficulties with the disposal of surface water. Additional foundations can only encourage further surface water to gather. On roads this often causes drivers to swerve into the oncoming traffic to avoid stretches of deeper water. Furthermore surface water on the roads is not safe for cyclists, nor pleasant for pedestrians.

Has anyone thought of the stress so much additional housing will cause to the waste water systems?

**Education & Healthcare**

When we arrived in West Horsley 20 years ago we couldn’t get our children into the village school. A recent telephone call to the secretary of The Raleigh confirmed it is still the case that local children frequently have to travel many miles to school. I find there are no plans to increase provision for schooling within the Horsleys. How are new families to be accommodated without causing further traffic upheaval?

We already have to be ‘ill by appointment’. It has been impossible to get an appointment with one’s chosen doctor within one week, and often much longer. In the holiday months one can wait considerably longer to see one’s chosen GP and often the wait for a physio referral is upwards of six weeks.

East and West Horsley are VILLAGES, among the last remaining examples near London. They are not dormitory offshoots of Cobham and Guildford which is what they will become if these plans are allowed to go through.

**Comment ID:** PSLPA16/330  **Respondent:** 15185153 / Olivia Stuart  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Please note that I object, very strongly, to the following:

- Lack of evidence of the housing need in the borough;
- Removal of villages from the Green Belt allowing increased development into the future;
- The proposed erosion of the Green Belt in any way, shape or form; The really short time frame for consultation of the Draft Local Plan;
- The council ignoring the many suitable brownfield sites within the borough which could be used for future development;
- The lack of proposed new infrastructure and facilities to cope with the needs of those already living in these areas, without increasing the demand by intensifying the housing;
- I object to the lack of immediate provision for new schools, GP surgeries etc. locally;
- I object to the potential six main development sites contained in the Draft Local Plan which are located in and around the Horsleys.

It is already hard to get see a doctor, to get a school place, or to travel around the area because of so much traffic, so why make things any worse within our uniquely beautiful local village? The roads are already too dangerous for me to cycle on because there are so many cars, without adding to these by building lots of smaller developments all over the place - why not concentrate on the bigger brownfield sites?

Please ensure that my comments are available for the Independent Inspector.

I grew up in West Horsley and visit every week with my parents who live there. I use the shops, hairdressers and restaurants on a regular basis. It is very clear to me that the proposals in the Guildford plan are not thought through properly and totally unsustainable.

I am opposed to removing the village from the green belt. The Council do not appear to be adhering to its own policies in considering removal from green belt. It is vital to protect the balance of houses and green space for the sake of the inhabitants and the future sustainability of the area.

The proposal to build high volumes of housing would destroy the village due to the volume of people and transport and this would impact on air pollution, health and wellbeing of residents. The village layout and infrastructure cannot sustain such high volumes of housing. It would change a pleasant area into a stressful, busy thoroughfare squashed densely into a small area; placing a strain on sewerage, parking, shops and access to Doctors and schools.

I live in Shere Road West Horsley. I have lived here for over 50 years.

I am sending you a list of some of the very strong objections to your housing proposals for West Horsley.

I came to live in a village, not a town.

Once you have taken away the Green Belt it will have gone for good.

Where do the extra children go to School?

What about Doctors surgeries? They are already too busy.

The roads are in a terrible state as it is. Double the traffic and a cyclist is going to get killed by riding into one of the many potholes.

There is not enough car parking facility now. Where are all the extra cars going to park?

Why do you want to spoil beautiful countryside?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? (), is Sound? (), is Legally Compliant? ()

I would like to focus on various aspects of the proposed local plan. I have lived here for 59 years.

I am particularly concerned about the following:-

(a) Very many of the inhabitants of the Horsleys bought property here because it is in the Green Belt; I want the Green Belt to be preserved for future generations.

(b) without knowing the precise statistics it is likely some 20% to 25% of the current population in the Horsleys are older than 60. Most of us live in houses with many bedrooms and I feel would like to downsize without moving outside the Horsleys if there was a greater availability of smaller houses or bungalows : if therefore new houses are to be built most of them in my opinion should have no than three bedrooms.
(c) it is not clear to me what provisions are being made for increases in services such as doctors' surgeries, school places, parking sites etc and who will bear the cost of developing such infrastructural needs: it strikes me all the focus in the new local plan is on the sites for new houses.

(d) I am totally against the development of a satellite town at Wisley which would have a huge impact on the Horsleys because of its proximity.

I would be grateful if all the above considerations are taken into account.

As a resident at the above address for 29 years, I wish to make a strong objection to “The Guildford Borough Council’s Proposed Submission Local Plan: strategy and sites” and, in particular, to the proposals for Policies A36, A37, A38, A39, A40 and A41.

Firstly, I object to the proposed Plan on principle because:

Policy P2: Green Belt and the Countryside/Policy P1: Surrey Hills AONB. No “exceptional circumstances” have been demonstrated for removing West Horsley from the Green Belt by insetting and extending the 2003 Local Plan Settlement Area boundaries. The Green Belt & Countryside Study is flawed and the Key Evidence document “Guildford Borough Economic Strategy 2013-2031” makes no case for locating 385 new homes in West Horsley.

Policies S1 Presumption in favour of Sustainable Development, S2 Borough Wide Strategy, H1 Homes for all and H2 Affordable Homes. The addition of 385 new homes for West Horsley across four sites represents an increase of 35% on the existing number of houses which is unsustainable (only one small shop, no post office and very limited bus service) and is totally unproven and inappropriate (The West Horsley Parish Council and Surrey Community Action Housing Survey: May 2014 only identified a need for about 20 affordable homes for local people).

Secondly, I object because insufficient provision has been made to improve the following essential infrastructure:
1. The Raleigh School has been full for many years and places at the Howard of Effingham School are limited with long commutes for children forced to attend other secondary schools. Relocating and building ever larger local schools does not necessarily enrich the children’s educational experience during their formative years.

1. The Horsley Medical Centre is always very busy with delays before seeing a doctor. The alternative of attending the A&E Department of the Royal Surrey County Hospital only aggravates the problems of an over-stretched NHS.

1. The Street and East Lane are already congested with early morning road traffic due to on-street parking, a single lane chicane and numerous school buses. Ockham Road North and the A246 are similarly busy. There is thus the serious risk of injury to school children and cyclists from increased traffic at a time when drivers can be tempted to rush to their early morning destinations.

1. Car parking at Horsley Railway Station on weekdays is normally full of early morning commuters to London. This makes it very difficult/impossible for people to travel by train anywhere later in the day causing problems of increased road traffic and is in conflict with the Government’s policy to reduce carbon dioxide emissions.

1. Flooding on The Street, East Lane and Ripley Lane is already a problem after heavy rainfall. There are also known sewage overflow problems in the Ockham Road North/Green Lane area. The loss of natural drainage with land use change and additional household waste water will aggravate these problems.

This letter is a plea that Guildford Borough Council withdraw the proposed Plan, scale down the scope/content and seek alternative sites and solutions to the provision of large numbers of additional homes in West Horsley and surrounding villages. The Government’s advice is clear – the housing need alone is not adequate grounds for building on the green belt and any major new development must take account of any need to upgrade the necessary infrastructure. The GBC should reconsider and revise the Plan before proceeding any further.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/440  Respondent: 15207809 / Colin Rugless  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I would wish to make the following comments in respect of the Plan:

I consider the local infrastructure completely inadequate to accommodate the number of properties that are being proposed.

Parking in East Horsley is already difficult and at both Horsley and Effingham stations commuters now often have to park on the roads or, in the case of Horsley, down by the community centre.

The surgery in Horsley is already overloaded and it can take weeks to get an appointment with ones own GP.

School places are simply not available.

I also fail to understand how changing the boundaries can be allowed when this is a deliberate attempt to build on green-belt land, which is supposed to be protected.

The idea of 2000 homes at Wisley must be a joke ! 3000 extra cars and 5000 more people.
**OBJECTIONS TO GUILDFORD BOROUGH PROPOSED SUBMISSION LOCAL PLAN EAST & WEST HORSELEY (JUNE 2016)**

I object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2016).

These are my main reasons are…

I object to the Local Plan as the following development proposed is not sustainable (Policy S1)

At least 148 more houses in East Horsley. At least 385 more houses in West Horsley.

I further object to both villages to be taken out of the Green Belt. The new boundary, (called the in-setting boundary) extends the old settlement boundary and includes some fields and open spaces. This means that Kingston Meadows (by East Horsley Village Hall) is included inside the insetting boundary – despite being a valuable green space. Horsley Tennis & Cricket club at the end of Pennymead Drive is also inside the insetting boundary.

This is totally unacceptable. I object to not protecting the Green Belt (Policy P2)

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT ESPECIALLY TO 6 POLICIES: A36, A37, A38, A39, A40 & A41:

- Amount of new housing far exceeds local need.
- Housing density excessive when compared with existing development.
- Would transform the Horsleys into a sizable town, something for which no case is made.
- No local support.
- Collective impact of these 6 sites on a small part of the borough not considered. Should not be treated as isolated, separate sites.
- Total amount of new building out of scale with the planned development elsewhere the borough, especially less sensitive urban areas not protected by Green Belt.
- Sites unsustainable. Key infrastructure lacking. No adequate provision is made to increase it – e.g. poor wastewater capacity, lack of schools, absence of traffic management plan, flooding.
- No account taken of additional impact of Wisley Airfield site on Horsleys.
- Extension of settlement boundaries too permissive. Horsleys characterised by streets with development along only one side of the road. Policies allow too many adjacent green fields to be developed by squaring off boundaries and claiming they don’t contribute to Green Belt “openness”. 6
- Green Belt gap with neighbouring settlements hugely narrowed, especially if Wisley Airfield is built on.
- Will harm compliance with NPPF 81 – e.g. by making cycling (including Prudential cycle races) too dangerous, ruining the rural setting of Waterloo Farm campsite, destroying the ambience of Grange Park Opera’s new “Theatre in the Woods”.
- Policy A40 especially unviable because of high water table and poor drainage, leading to regular winter flooding.
- Safe access and egress at Site A40 unachievable, owing to flooding, high speed limits, poor sight lines, narrow access to existing properties, inadequate pavements for elderly and schoolchildren, increasing use by recreational cyclists etc.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
field sites available for development.

I would ask that the council consider my objections and avoid destroying the Borough's green belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

2. Sites in East and West Horsley

I OBJECT in particular to including Sites A36-41 (East and West Horsley). This is a back-door way to create a mega-village-essentially, a soulless new dormitory town. The Horsleys feel victimised by this plan, which has been masterminded by Council leaders representing Ash and Tongham at the other end of the borough, where (in a flagrant case of political double standards) the Green Belt is actually being extended under Policy P3.15
Whatever their merits as development sites, the 6 Horsley sites should not be considered individually but for their cumulative impact on the contiguous villages of East and West Horsley.

Building 533 new houses on these 6 sites, plus at least another 90 on small sites is (a) excessive in absolute terms and (b) disproportionate relative to the rest of the borough. It will destroy the rural character of these communities. "16

Under the plan, rural West Horsley will take 35% of new homes, urban Ash and Tongham 16% and Guildford urban area only 11%. The total number of homes in West Horsley will increase by 35%, which is disproportionate when measured against the overall increase in housing across the borough and particularly in Guildford town. If the Council have justifiable reasons to transform a particular community so radically, the plan should present a case rather than putting forward site proposals as a fait accompli.

These sites will put unsustainable strain on local facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewage, surface drainage and shops. For instance:

- Thames Water have advised the Council that the current wastewater network will not cope and that the foul drainage system all the way to the treatment works North of Ripley will need to be upgraded.
- Guildford Council's Education Review says "expansion options may need to be considered for primary" education in the Horsley area within the first 5 years of the plan, but Surrey County Council have no plans to do so. The Raleigh School is already full. The private Glensk and Cranmore schools are also at or near to full capacity. The suggestion that schools in Ripley can be used contradicts the plan's stated intention to reduce traffic on the A3 and strategic aim that primary schools should be within walking distance.
- The plan's Infrastructure Schedule (Appendix C) imagines an "East Horsley and West Horsley traffic management and environmental improvement scheme between 2019 and 2023 by Surrey CC" but gives no details. This scheme is just wishful thinking. The proposed housing can only harm the local environment, not "improve" it.

The harmful impact of these sites is magnified by the proximity of the so-called Wisley Airfield site (Three Farms Meadow), with over 2,000 new homes only 2 miles away (see below).

The density of new housing on the 6 Horsley sites is inappropriate, being greater than anywhere in the locality at present.

Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries for which the plan presents no arguments. Contrary to NPPF paragraph 79, this will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.

Collectively, these 6 sites militate against NPPF paragraph 81's encouragement of access to the Green Belt and its amenity and recreation value. This has been a success story in the Horsleys, with the creation of an amenity wood and community garden, the purchase of adjacent fields (on the eastern side of Ockham Road North) by local residents in order to preserve their open aspect, well-maintained pitches for local football and cricket clubs, public tennis courts, open space for a high-quality campsite (at Waterloo Farm) used by many foreign tourists and the approval of plans for a "Theatre in the Woods" - making West Horsley the only village in Surrey with an opera house. The open nature of West Horsley determined that a long portion of the 2012 Olympic cycle races passed through the village. This route has since been adopted by cyclists as a permanent asset, including the annual

"14 E. Gallagher Homes v Solihull Metropolitan Borough Council [2014] EWHC 1283

"15 Councillor Paul Spooner and his predecessor, Councillor Stephen Mansbridge.

"16 Even some property developers complain about the Council's bias in favour of oversized developments, g. Dandara, whose relatively small Green Belt sites on the A246 (Epsom Road) in West Horsley is not considered in the plan.

Prudential cycle race. These and future examples of "positive planning" depend on protecting the Green Belt to maintain the openness and attractiveness of the local landscape and avoiding the urbanisation and traffic congestion that Sites A36-41 will bring.
By surrounding Waterloo Farm campsite with 120 new houses, Policy A40 on land to the North of West Horsley will make this rural tourism amenity unviable. This may accord with developers' plans, since the site would then be vulnerable to infilling with yet more housing.

Site A40 is subject to an unacceptable flood risk from a combination of a high groundwater table and the lack of surface water run-off. This is flat, clay land on the downhill side of the Horsleys where floodwater from new development will accumulate and back up onto existing properties nearby. I can provide photographs proving how badly these fields already flood at present. These problems will only get worse with the increase in extreme weather events associated with climate change. The "appropriate mitigation" suggested in Policy A40 exists only as an abstract notion. It should not overrule the need for Green Belt "exceptional circumstances".

Policy A40 underestimates the problems of safe access and egress. Firstly, Ockham Road North was closed for several weeks in 2014 because of flooding, and still floods regularly. Secondly, access problems are not confined to flooding and are not addressed by the proposal to extend the existing 30m ph zone past the site entrance. Repeated attempts made by Ockham Road North residents to extend this zone have been turned down by the local authorities, Highways England and Surrey Police, even though data collected in 2015 show that traffic has doubled over the last 15 years and that the average speed in the 40mph section of this road is 52mph, with maximum recorded speeds of over 80mph. No traffic calming measures have so far been achieved. Additional housing will add to several hazards along this stretch of road, including:

- Its use by pedestrians, especially children (using the Raleigh and Glenesk schools and catching school buses to Guildford and Howard of Effingham), pensioners living in the string of bungalows at the northern end of the road, and visitors from the Waterloo campsite who are unfamiliar with the area.
- The existence of a narrow footpath on only one side of the road in any one spot. The layout means that walking half a mile between Green Land and East Lane requires crossing the road twice.
- The road's increasing use by recreational cyclists (see above).
- Its winding nature, poor sight lines (especially when interrupted by summer vegetation) and dangerous, concealed driveways. Most of these were built in the 1930s. Some have been widened but many are too narrow for modern traffic. Since a deep ditch runs along most of the road, vehicles have to swing out dangerously when entering or leaving.
- The prospect of additional traffic, including 19,000 HGV movements (90 a day over a long period) if Surrey County Council approves the Drift Golf Course's planning application to re-landscape its site using bulk waste transported from London.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
West Horsley has a rich and varied mix of well established low housing density settlements with a considerable number of historic buildings. It is a pretty village which receives a considerable number of recreational visitors through the seasons each year who are undoubtedly attracted by its setting in a rural environment.

It is of note that the Key Evidence document 'Guildford Borough Economic Strategy 2013-2031 makes no case for locating large numbers of homes in West and East Horsley or neighbouring villages.

The sites proposed cannot be considered individually but must be considered for their cumulative impact on the area.

Building 385 new houses on these 4 sites, plus at least another 50 on small sites will destroy the rural character of this community.

I fail to understand why West Horsley in particular has been singled out to increase in size by 35% when the rest of the borough will increase by a far lower percentage and in particular Guildford town is scheduled to have an increase in size of only 11%.

A development of this size will put unsustainable strain on local facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewage, surface drainage and shops.

There are as far as I am aware no plans whatsoever to provide the necessary schools to cope with such an increase in population.

The Raleigh School is already full and the private Glenesk and Cranmore schools are also at or near to full capacity. The suggestion that schools in Ripley can be used contradicts the plan’s stated intention to reduce traffic on the A3 and the strategic aim that primary schools should be within walking distance.

The secondary school situation is already critical. The Howard of Effingham is well oversubscribed and is struggling to cope on a site which it outgrew many years ago there seems to be no proposal from Surrey County Council to cope with the present situation let alone that which would arise if these plans were to go ahead.

There are other reasons why the proposed village expansion is unsustainable. With only one small shop which is due to close in September, no post office, a very limited weekdays only bus service through the village, there is no infrastructure which could begin to support the proposed high volumes of new housing development.

The development of 385 homes on the 4 proposed sites are at much higher densities than currently exist in the village settlement and will be totally out of character with the existing mix of different housing styles and layout of the village.
An increase in village population will increase pressure on station parking and traffic movements to and from Horsley station and an increase in school children going to Guildford and Leatherhead.

The volume of traffic generated from the proposed new housing estates will be considerable and the impact on the local roads, which already struggle to cope with adverse weather conditions, will be significant.

Kingston Avenue Medical Centre which serves all of East and West Horsley and surrounding areas is already extremely busy and residents experience difficulty in making appointments.

For all these reasons I implore you to agree that the need for so many houses to be built in West Horsley is totally unproven and unrealistic.

**GREEN BELT**

The first line of Policy P2 states, “We will continue to protect the Metropolitan Green Belt against inappropriate development.”.

A survey of the residents of West Horsley conducted in 2015 showed that they are totally opposed to the village's removal from the Green Belt by insetting and extending the 2003 Local Plan Settlement Area boundaries.

I of course accept that their views cannot dictate planning policy, but such a strength of feeling should surely only be ignored if there is cogent evidence to justify it.

No exceptional circumstances or other justification is made for the new Green Belt boundaries that will result from the proposed insetting of West and East Horsley from the Metropolitan Green Belt.

West Horsley's defined Settlement Area boundaries (ref 2003 Local Plan) do not need to be extended and should not be.

*What changes (2016)/further amendments (2017) do you suggest should be made to the document?*

Policies A37, A38, A40 & A41, located in West Horsley

The LAA identifies six sites in West Horsley for potential development, the four largest having allocation policies within the Proposed Submission Local Plan. The total housing number arising from these six sites is 405 homes in total. For a village which had 1,124 dwellings at the 2011 Census, this represents a proportional increase of 36% over the plan period, an enormously high proportion by any standards.

The four policy sites are all located within the Green Belt. One is a partly brownfield development but the other three sites are all open fields used for agriculture and all lie within the current Green Belt at the edge of the Settlement Area. The reasons presented by the consultants, Pegasus, in the Green Belt & Countryside Study to justify these settlement boundary movements appear to us highly questionable and in no way to meet the requirements of the NPPF that such boundary movements are only to be made in ‘exceptional circumstances’. These movements clearly represent a deliberate pushing back of settlement boundaries in order to provide more greenfield sites for housing development. As such, I consider these proposed movements in settlement boundaries to be invalid.

These proposals are also contrary to the principles of the Metropolitan Green Belt. West Horsley represents one of the first ‘lines of defence’ against London urban encroachment outside of the M25 circle. Yet these policies will eliminate a significant part of this defence as they seek to expand the boundaries of this village and fill-in every bit of green space within this rural setting.

It is also totally contrary to the opening statement of Local Plan Policy P2 that “We will continue to protect the Metropolitan Green Belt” It seems that in West and East Horsley at least the draft Local Plan is doing exactly the opposite.

Given the scale of the development proposed in West Horsley, the inevitable destruction of its village character and the impact on infrastructure across West and East Horsley, I OBJECT to the site allocation policies A37, A38, A40 and A41.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Although none of the five East Horsley sites that are identified in the Borough’s Land Availability Assessment affect us directly, the indirect effect would be substantial since development of all, or any, of them would have an immediate and adverse effect on the items listed by the East Horsley Parish Council in its comments on Policies 11,12 and 13.

We therefore strongly support and endorse the objections raised by East Horsley Parish Council to these Policies.

As a resident of West Horsley I write to you to object to aspects of the Guildford Borough Proposed Submission Local Plan (Reg 19) 2016 draft which is currently under public consultation.

Having reviewed the submitted document, I am very concerned at the potential implications for the rural village of West Horsley, and challenge the following key points:

1. A) Policy P2: Removal (‘insetting’) of the village from the Green Belt

   - This policy directly contradicts the government’s objective in the NPPF to “assist in safeguarding the countryside from encroachment”, and that “once established, Green Belt boundaries should only be altered in exceptional circumstances”. Normal population growth does not constitute exceptional circumstances which would justify removal of Green Belt status with the associated loss of rural character of the village.

   - Under the NPPF policy #86, “If it is necessary to prevent development in a village primarily because of the important contribution which the open character of the village makes to the openness of the Green Belt, the village should be included in the Green Belt.”

   West Horsley strongly meets these criteria, being characterised by low housing density, open countryside views and bordering directly onto both National Trust and AONB lands, and should remain in the Green Belt with its existing boundaries intact.

   The policy as it stands seeks to justify excessive development in areas where it simply cannot be justified - with an inequitable distribution of over 8000 homes proposed to be built within the Green Belt compared with only 1135 in urban Guildford, it will destroy the character of the countryside and eliminate green space that should be protected in perpetuity.

1. B) Expansion of the village settlement boundary vs Local Plan 2003

   - The current proposed expansion of the settlement boundary vs LP 2003 would remove additional undeveloped green spaces from the Green Belt, rapidly hastening village expansion and encroachment on the neighbouring countryside. There is no supportable basis for this expansion which contradicts the NPPF policy that local planning authorities should “define boundaries clearly, using physical features that are readily recognisable and likely to be permanent” and the above government objective to safeguard the countryside from encroachment.

   - I want to specifically highlight the area to the east of The Street currently outside the settlement boundary, including the Village Green and neighbouring undeveloped land which contributes to the village’s rural character, which would not be best served by being included in the settlement.
I challenge the village expansion as a whole and the area of the West Horsley Village Green/neighbouring fields specifically

1. C) Strategic Site Allocations (A38-41)

- 445 houses are proposed on four ‘strategic sites’ within West Horsley in addition to an undefined number of ‘windfall’ small site completions. Excluding the large site at Normandy, this represents 50% of the total proposed housing within inset villages despite representing only 20% of the current population.

- The proposal places a disproportionate burden of future housing provision on West Horsley relative to other villages, the impact of which would be a significant loss of village character and stress on amenities and roads which could be better addressed through a broader distribution of strategic sites across the borough.

  - The need for so many houses to be built in West Horsley over the first 5 years of the Plan period 2018 to 2033 is totally unproven. The West Horsley Parish Council and Surrey Community Action Housing Survey: May 2014, identified a limited need for some 20 affordable homes for local people who want to remain in the village, i.e. for young people and for elderly people who wish downsize to a smaller home.

In closing, I fully recognise the need for sustainable housing development within the borough to meet the current and future needs of its residents, but believe we must do so while also safeguarding our countryside and the rural nature of the villages which make this area unique.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Re: Guildford Local Plan Dear Sir

I am writing to object to a number of points relating to the East Horsley, West Horsley and Ockham sections of the Guildford Local Plan.

Having originally replied to the earlier version of the Guildford Local Plan, as did many others, I had presumed that some fairly major changes would have been made to this version, in response to the criticism received. However I see little change in this version and indeed nothing that makes the plan more acceptable. It would appear to be another HS2 style project where the locals comment are considered of little importance! But here we go again.

The Horsleys and Ockham are small villages which have always been mainly Green Belt, a factor which to date has not prevented reasonable development, even though infrastructure failures continue to occur.

These three villages are seen as cash cow developments which always feature millionaire type properties that make the best profit for the developers but that do little for the young residents who have aspirations of living in the villages where they grew up. An element of so called affordable housing is usually included in the original plans but by the time the estates are built many of the affordable houses have been taken out of the equation by developer donations to other Council projects while those left which are often seen as too expensive for the affordable market and therefore after requests from the developers to the council they are often allowed to be sold to the normal market place.

The local roads between and connecting the three villages are all country lanes with access to the A3 extremely busy at certain times of the day, made worse by regular jams on the A3.
Road drains throughout the villages are constantly having to be cleared as the old pipework is regularly collapsing and/or being blocked by mud etc.

Public transport for the area is mainly by Main Line trains with two stations both located in East Horsley, these are Horsley and Effingham Junction stations which take huge numbers of residents off to London each day. Both stations have car parks but these are filled to capacity every day.

The East Horsley Doctors Surgery is stretched to breaking point with some people having to wait up to two weeks for an appointment.

The local schools are all sought after and feature both private and public, with the public schools well over subscribed.

The development of a further 2,500 plus homes in this area will only exacerbate the above problems and change the villages for the worse.

Removal of the Horsleys from the Green Belt and/or the extension of the boundaries of the settlement areas of the Horsleys is an obvious ruse to allow even further development of the area in future years without further need to come back to seek support from the residents.

I therefore totally object to your proposals:

- To remove the Horsleys from the Green Belt,
- To extending the boundaries of the Settlement areas around the Horsleys
- To the creation of 2,000 house village at Ockham
- To the creation of 533 houses across the Horsleys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The total housing number arising from these six sites is 405 homes in total. For a village which had 1,124 dwellings at the 2011 Census, this represents a proportional increase of 36% over the plan period, an enormously high proportion by any standards.

It is also contrary to the opening statement of Local Plan Policy P2 that “We will continue to protect the Metropolitan Green Belt” It seems that in West and East Horsley at least the draft Local Plan is doing exactly the opposite.

Given the scale of the development proposed in West Horsley, the inevitable destruction of its village character and the impact on infrastructure across West and East Horsley, I object to the site allocation policies A37, A38, A40 and A41.

**Document:** 525
I am at present enjoying one of my very frequent visits (2 or 3 per annum) to my parents in West Horsley, in company with my 2 children- unfortunately due to work pressures my husband has to be elsewhere. Together with my 3 sisters I was brought up in West Horsley so I have high regards for it. I am not at all happy by what I have read about the above, and wish to protest.

The Green Belt Act 1948 established green belts in perpetuity. They cannot be moved at will by planners as is proposed here. Legislation requires that new housing has to be of a similar character and density to what is there at present. Common sense dictates that there be adequate roads, schools, medical facilities and draining etc to accommodate any huge increase in population brought about by a large increase in housing in an area.

From what I have seen, none of these conditions has been fulfilled. Therefore the proposed developments should not go ahead. Please register my objection.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT in the strongest possible terms to the above plan. It will impose a huge burden on drainage infrastructure, schools, the local roads, medical services, shopping, parking facilities and public transport and at the same time alter the whole character of the West Horsley area and its surrounding villages. At the same time the plan does not address the provision or even consider the need for expanding local services. While not opposed to limited brownfield development I do OBJECT to changes to the current Green Belt. These are not necessary or desirable and there is too little attention given to the use of brownfield sites in Guildford city areas.

I particularly OBJECT to the method whereby this plan has regurgitated inaccurate, badly researched and unjustified information and is an obvious ploy to get around the previous objections voiced within West Horsley and, indeed, in all the villages affected.

I OBJECT to being forced to undertake this exercise again and that my previous OBJECTIONS have been put aside. This cannot be democratic.

I OBJECT to Policy Q: Green Belt and the Countryside: Surrey Hills Area of Outstanding Natural Beauty (AONB)

I am totally opposed to the plan affecting all the Guildford Villages and to West Horsley’s removal from the Green Belt by insetting and extending the 2003 boundaries. There are no exceptional circumstances or other justification for the new Green Belt boundaries that will result from the proposed insetting. This study is flawed.

The West Horsley Parish is well established with low housing density settlements with a considerable number of historic buildings and the Council fails to make a case for locating large numbers of homes in the Horsley or neighbouring villages.

I OBJECT to the Polices S1 Presumption in favour of Sustainable Development, Borough Wide Strategy, H1 Homes for all, H2 Affordable Homes.

No accurate or acceptable case has been made for provision for 13,800 new homes over the period 2013 to 2033. The number of homes is too high and unsustainable in Guildford’s villages. The current infrastructure is strained and at breaking point and there are no plans for addressing the infrastructure.
The proposals for West Horsley are clearly unsustainable for the proposed high volumes of new housing development.

I OBJECT to the development of 385 homes on the proposed sites in West Horsley. The proposals are at much higher densities than currently in the village and will be totally out of character with the existing mix of different housing styles and the layout of the village.

I OBJECT particularly to the proposals for site A40 in that this is the area I know best. The A40 site is unsuitable for development and the Guildford Council has several times rejected applications to build on the site. It has a high water table, is prone to flooding in even medium rain fall and in high rainfall there are problems with flooding of the roads and the overflow of sewage. The work to make such a site suitable for development, even for a third of the homes specified would be out of proportion to any return on capital invested.

The drainage affects are acknowledged by the water authorities who point out that the downstream effects are sizeable and probably uneconomic.

Importantly this is an area of calm, peace and quiet within the green belt and I am reliably informed that there are several species of orchids growing and the land is full of wild life which needs preservation.

The development proposals throughout the village- and also in terms of the knock on effect of the Wisely Airfield proposals- is unsustainable in terms of schooling, drainage, roads capacity, shopping and Rail Station parking, and lack of public transport.

The roads are already at capacity and breaking up under the strain. Traffic uses Ockham Road North as a cut through/rat run when the A3 and M25 are busy or blocked (frequently these days) and this is acknowledged by Surrey County Council roads authority.

There is a major strain on schooling in the area and on medical services. There are few jobs in the area and the practicalities of commuting to London or, indeed to Guildford are heavily affected by the plan.

The strain on the current rail service is obvious and it all but impossible to park at the Horsley rail Station where the parking even after extension works is problematical.
I OBJECT on the grounds that there is no proven need for so many houses to be built in Horsley. It is totally unproven and risks the formation of a dormitory township devoid of infrastructure that could manage such an influx of people and cars.

Any forecast of housing needs is also rendered out of date by the current Referendum related to immigration which will lead to a much lower demand for housing in the future.

It is my understanding that in West Horsley the recent survey of the village in 2014 identified a limited need for only 20 affordable homes.

Guildford Council’s plans are highly suspect and need investigating in depth. Inquiries should be made into the reasons for the document which, for example, must have been completed before the democratic decision, widely applauded, to refuse planning for the Wiseley Airfield site proposal. Yet this proposal appeared again in the council’s plan. The allocation of developments to the various villages is dubious.

Why build on the Green Belt when there is room and land for development within the immediate area of the town of Guildford where it is likely there could be an increased demand.

The National Planning Policy Framework requires that new residential development must respect the character and density of housing in any areas and be limited in quantity by the availability of infrastructure and local facilities.

I couple with that the need and the desire of the people of the area to preserve the GREEN BELT.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am a resident in West Horsley I want to comment on the 2016 new Local Plan.

The plan has identified 4 main sites in the village for housing development with a total of 385 new houses. As we have nearly 1000 existing houses this would mean an increase of about 40%. I am objecting to this very large and unsupportable increase in houses in the village. I appreciate the need for additional houses in the Borough and that our village, and indeed other villages, should take its fair share which should be about 3%, that is 30 new houses. These additional houses could be built without affecting the infrastructure of our community. A 40% increase would put an unsustainable strain on roads, schools, medical services, and drainage.

I also strongly object to the proposal to build on the Green Belt land around our village. Our fair share of 30 new houses could be built within the existing village settlement boundary without any need to build on Green Belt land.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I should like to write to express my opinion on the proposed development within the village of West Horsley. Having lived in the village now for 18 years I have experienced the pressures that are already on the services, roads, parking, schools and medical services. An increase in the number of homes of 35%, which is proposed, would put a phenomenal strain on all the above services with the roads especially being unsuitable for such a large increase in the inevitable number of cars and service vehicles that would be required. Many of the roads could not be widened or improved to cater for such an increase in traffic flow. Mentions in the plan do not include the detail of how developments of services within the village will be managed.

In recent years the area has become a magnet for cyclists travelling into the area from a considerable radius because of its rural roads and villages. This is encouraged locally and governmentally. With more traffic on the roads, the potential for accidents will be magnified dramatically.

Of particular concern is the suggestion that West Horsley will be removed from the Green Belt, despite earlier promises that the Metropolitan Green Belt would be protected. The settlement boundaries do not need to be extended if proper use is made of the already available land and a proportionate number of houses (2%) agreed as West Horsley’s share of the number of homes requiring to be built. The number of houses actually required for people choosing to live in the village is very far short of the proposed submission as demonstrated by the neighbourhood plan. (20 affordable homes)

Finally, but of great concern to the villagers, is the strain that will be put on the drainage system. Already sewage overflow problems occur in the neighbourhood and the network would certainly not cope with the demands of so many new homes.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I have seen a copy of the latest draft of the local plan and realised that my house will be deeply affected. I understand that GBC members are discussing this latest draft on Wednesday 13th April and I urge you to take account of my views.

I live in the house with my brothers and parents, it is the house where my father grew up and we all expected at some time, that there would be houses on the fields behind us as it is an obvious infill between houses. My grandfather planted trees in preparation for this hideous event. My parents said when the first draft came out that it would be awful living through the building of 135 houses behind us, but we would live with it. Your new plan shows that the field in front of my house would also have 90 houses on it. Can you imagine living through being sandwiched between the building of 225 and the having to live with your new view, as well as another 220 houses in the village? It would be ok if you were
moving into these houses as you would have never known the village any different, but for my family who has lived in Horsley for over 40 years it will be a horrendous and life changing event. I expect you know that there is one state primary school in the village; The Raleigh (my father went there) but this school is already full and people want to move to the area to get in the catchment area. The same goes for The Howard which is our state senior school, what would happen to all these people who move here? I often walk my dog to the village in the mornings and 9.5 times out of 10 the doctor’s surgery car park and the doctors is full. The village itself is lovely but has a limited supply of things to do. The football club and tennis club is a major part of my family’s life as it is where we can all play sport and socialise. Both these clubs have a very long waiting lists and what would happen to all the people that want to join these clubs?

445? Houses are planned to be built in Horsley along with the 2828 houses that were recorded in the 2011 census. All of the new houses would be built on green land which most people thought you weren’t allowed to do, but you must be able to if you are. The population of Horsley (2011) was 2828 I do not know how many new residents you will plan to have, but I can tell you that Horsley is not big enough to hold all these people. On average (2011 census) 62.2% of the houses in Horsley have two or more cars (there were 2055 cars in total). I don’t know if you have ever driven around the village but the roads are awful, with huge potholes that nothing seems to be done about. Surely if you build all these new houses you will have to fix the roads as they would only get worse with around 890 new cars on the roads (this is based on the fact that your 445 houses would each have two cars.) this would be adding over 30% of the cars on the road and therefore changing Horsley in to a loud and dangerous place to live.

Overall, as well as looking at facts and figures, I would like you to consider the personal affects that your plan will have on the local people. For my family it would mean living through a tedious, noisy and dirty time when the houses are being built, and then having to face the facts that this once quiet and beautiful village has turned into a loud cramped area and to have lost its green belt. I’m sure you would not like these events to happen to your family and I know that the houses will make money but they would mean dropping Horsley’s rural and village atmosphere and it would ruin many family’s opinions of their village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**SITES**

1. **Sites in East and West Horsley**

I OBJECT in particular to including Sites A36-41 (East and West Horsley). This is a back-door way to creating a megavillage – essentially, a soulless new dormitory town.

Building 533 new houses on these 6 sites, plus at least another 90 on small sites is (a) excessive in absolute terms and (b) disproportionate relative to the rest of the borough. It will destroy the rural character of these communities.

Under the plan, rural West Horsley will take 35% of new homes, urban Ash and Tongham 16% and Guildford urban area only 11%. The total number of homes in West Horsley will increase by 35%, which is disproportionate when measured against the overall increase in housing across the borough and particularly in Guildford town. The need for so many houses to be built in West Horsley over the first 5 years of the Plan period 2018 to 2033 is totally unproven.
The West Horsley Parish Council and Surrey Community Action Housing Survey: May 2014, identified a limited need for some 20 affordable homes for local people who want to remain in the village, i.e. for young people and for elderly people who wish downsize to a smaller home.

These sites will put unsustainable strain on local facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewage, surface drainage and shops. For instance:

- Thames Water has advised that the current wastewater network will not cope and that the foul drainage system all the way to the treatment works North of Ripley will need to be upgraded.
- Local Schools such as The Raleigh School and the Howard of Effingham are already full and oversubscribed. The plan’s stated intention to reduce traffic on the A3 and its strategic aim that primary schools should be within walking distance will not be met.
- The plan’s Infrastructure Schedule (Appendix C) imagines an “East Horsley and West Horsley traffic management and environmental improvement scheme between 2019 and 2023 by Surrey CC” but gives no details. The proposed level of housing can only harm the local environment, not “improve” it.

The harmful impact of these sites is enhanced by the proximity of the so-called Wisley Airfield site (Three Farms Meadow), with over 2,000 new homes only 2 miles away, which will, amongst other things, affect and further damage the local roads, with ever increasing pot-holes.

Collectively, these 6 sites militate against NPPF paragraph 81’s encouragement of access to the Green Belt and its amenity and recreation value. This has been a success story in the Horsleys, with the creation of an amenity wood and community garden, the purchase of adjacent fields (on the eastern side of Ockham Road North) by local residents in order to preserve their open aspect, well-maintained pitches for local football and cricket clubs, public tennis courts, open space for a high-quality campsite (at Waterloo Farm) used by many tourists and the approval of plans for a “Theatre in the Woods” – making West Horsley the only village in Surrey with an opera house. The open nature of West Horsley determined that a long portion of the 2012 Olympic cycle races passed through the village. This route has since been adopted by cyclists as a permanent asset, including the annual Prudential cycle race. These and future examples of “positive planning” depend on protecting the Green Belt to maintain the openness and attractiveness of the local landscape and avoiding the urbanisation and traffic congestion that Sites A36-41 will bring.

By surrounding Waterloo Farm campsite with 120 new houses, Policy A40 on land to the North of West Horsley will make this rural tourism amenity unviable. This will all accord with developers’ plans, since the site would then be vulnerable to infilling with yet more housing.

Finally, 40% of the development will be classified as affordable (80% of the market value.) Affordable for whom I ask? Certainly not affordable for a great number of people including first time buyers and will not be responding to local need as demonstrated by The West Horsley Parish Council and Surrey Community Action Housing Survey: May 2014. The Key Evidence document Guildford Borough Economic Strategy 2013-2031 makes no case for locating large numbers of homes in West and East Horsley or neighbouring villages

The first line of Policy P2 states, “We will continue to protect the Metropolitan Green Belt against inappropriate development.”

There is no justification for the proposed large-scale inequitable development within West Horsley, especially the removal of the Green-Belt status, changing beyond all recognition, the rural village settlement which will impact negatively on a whole range of really important matters, some of which have been alluded to earlier on. I would agree to some development but not of this magnitude.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The draft plan indicates that West and East Horsley are to be removed from the Green Belt. This is a throwback to the 1940s when there was a plan to urbanise the villages and build a new town - the final decision to build at Crawley saved the Horsleys.

The current plans seem to indicate that 385 new homes would be built in West Horsley and a further 100 on the plot A39. I understand that East Horsley will have an additional 148 homes built.

I do not believe the roads, parking, drainage and schools will be able to cope. Should just 100 of the proposed new homeowners in the Horsleys wish to commute then the station car parks at Horsley and at Effingham Junction will not have the capacity - at present they are virtually full by 9.00am.

There must be some building but ideally for the benefit of the local community, be they properties for starter homes or for the elderly to downsize. We do not need a further influx of residents from London - particularly with the parking capacity at the stations.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I strongly object to proposed developments of East and West Horsley in Guildford Borough Council’s Draft Local Plan. The numbers of new homes is out of proportion and is based on out of date population data as the basis for the plan.

The infra-structure is not in place; there are no more secondary school places, the current train station car park is full by 08.30hrs and the morning commuter trains are crammed.

Ref: Proposed Submission Local Plan: Strategies and Sites June 2016

As resident home owners living in West Horsley we have reviewed the contents of the Guildford Borough Proposed Submission Local Plan: strategy and sites document and wish to register our objections with regards to: Green Belt and the Countryside (Policy P2) and Surrey Hills Area of Outstanding Natural Beauty (AONB) (Policy Pl):

OBJECTIONS/CONCERNS:

1. We object to the village's removal from the Green Belt by insetting and extending the 2003 Local Plan settlements Area As such the Green Belt & Countryside Study is flawed.
2. We feel that West Hosley's defined Settlement Area boundaries (ref 2003 Local Plan) DO NOT need to be
3. In the Key Evidence document "Guildford Borough Economic Strategy 2013 2031" makes no case for locating large numbers of homes in West and East Horsley or neighbouring villages, therefore, why are changes been considered?
4. 13,800 new homes over the Plan Period 2013 to 2033 is too high and unsustainable in Guildford's villages.
5. The current village size of East and West Horsley is not adequate to support an increase in homes. The development of 385 homes on the 4 proposed sites are at much higher densities than currently exist in the village settlement and will be totally out of character with the existing mix of different housing styles, historic buildings and layout of the village and, therefore, we feel this is inappropriate development within the Green Belt. The West Horsley Parish Council and Surrey Community Action Housing Survey: May 2014,identified a limited need for some 20 affordable homes for local people who want to remain in the village, ie for young people and for elderly people who wish to downsize to a smaller home.
6. Access to essential facilities, such as road and transport infrastructure, parking, medical facilities, schools, waste water infrastructure, sewage infrastructure would be greatly impacted if development of the size currently proposed is granted.

On top of the Local Plan proposals there are other planning applications that require consideration/objection eg. Land adjacent Cranmore Lane, including Goodhart-Rende! Community Hall and the development of Bell & Covill which all impact on the village settlement area.

Please give due consideration of our objections/concerns when reaching a decision.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
2. Sites in East and West Horsley

I OBJECT in particular to including Sites A36-41 (East and West Horsley). This is a back-door way to create a mega-village – essentially, a soulless new dormitory town.

Whatever their merits as development sites, the 6 Horsley sites should not be considered individually but for their cumulative impact on the contiguous villages of East and West Horsley.

Building 533 new houses on these 6 sites, plus at least another 90 on small sites is (a) excessive in absolute terms and (b) disproportionate relative to the rest of the borough. It will destroy the rural character of these communities.

Under the plan, rural West Horsley will take 35% of new homes, urban Ash and Tongham 16% and Guildford urban area only 11%. The total number of homes in West Horsley will increase by 35%, which is disproportionate when measured against the overall increase in housing across the borough and particularly in Guildford town. If the Council have justifiable reasons to transform a particular community so radically, the plan should present a case rather than putting forward site proposals as a fait accompli.

These sites will put unsustainable strain on local facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewage, surface drainage and shops. For instance:

- Thames Water have advised the Council that the current wastewater network will not cope and that the foul drainage system all the way to the treatment works North of Ripley will need to be upgraded.
- Guildford Council’s Education Review says “expansion options may need to be considered for primary” education in the Horsley area within the first 5 years of the plan, but Surrey County Council have no plans to do so. The Raleigh School is already full. The private Glensk and Cranmore schools are also at or near to full capacity. The suggestion that schools in Ripley can be used contradicts the plan’s stated intention to reduce traffic on the A3 and strategic aim that primary schools should be within walking distance.
- The plan’s Infrastructure Schedule (Appendix C) imagines an “East Horsley and West Horsley traffic management and environmental improvement scheme between 2019 and 2023 by Surrey CC” but gives no details. This scheme is just wishful thinking. The proposed housing can only harm the local environment, not “improve” it.

The density of new housing on the 6 Horsley sites is inappropriate, being greater than anywhere in the locality at present.

Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries for which the plan presents no arguments. Contrary to NPPF paragraph 79, this will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.

Collectively, these 6 sites militate against NPPF paragraph 81’s encouragement of access to the Green Belt and its amenity and recreation value. This has been a success story in the Horsleys, with the creation of an amenity wood and community garden, the purchase of adjacent fields (on the eastern side of Ockham Road North) by local residents in order to preserve their open aspect, well-maintained pitches for local football and cricket clubs, public tennis courts, open space for a high-quality campsite (at Waterloo Farm) used by many foreign tourists and the approval of plans for a “Theatre in
the Woods” – making West Horsley the only village in Surrey with an opera house. The open nature of West Horsley determined that a long portion of the 2012 Olympic cycle races passed through the village. This route has since been adopted by cyclists as a permanent asset, including the annual Prudential cycle race. These and future examples of “positive planning” depend on protecting the Green Belt to maintain the openness and attractiveness of the local landscape and avoiding the urbanisation and traffic congestion that Sites A36-41 will bring.

By surrounding Waterloo Farm campsite with 120 new houses, Policy A40 on land to the North of West Horsley will make this rural tourism amenity unviable. This may accord with developers’ plans, since the site would then be vulnerable to infilling with yet more housing.

Site A40 is subject to an unacceptable flood risk from a combination of a high groundwater table and the lack of surface water run-off. This is flat, clay land on the downhill side of the Horsleys where floodwater from new development will accumulate and back up onto existing properties nearby. I can provide photographs proving how badly these fields already flood at present. These problems will only get worse with the increase in extreme weather events associated with climate change. The “appropriate mitigation” suggested in Policy A40 exists only as an abstract notion. It should not overrule the need for Green Belt “exceptional circumstances”.

Policy A40 underestimates the problems of safe access and egress. Firstly, Ockham Road North was closed for several weeks in 2014 because of flooding, and still floods regularly. Secondly, access problems are not confined to flooding and are not addressed by the proposal to extend the existing 30mph zone past the site entrance. Repeated attempts made by Ockham Road North residents to extend this zone have been turned down by the local authorities, Highways England and Surrey Police, even though data collected in 2015 show that traffic has doubled over the last 15 years and that the average speed in the 40mph section of this road is 52mph, with maximum recorded speeds of over 80mph. No traffic calming measures have so far been achieved. Additional housing will add to several hazards along this stretch of road, including:

- Its use by pedestrians, especially children (using the Raleigh and Glenesk schools and catching school buses to Guildford and Howard of Effingham), pensioners living in the string of bungalows at the northern end of the road, and visitors from the Waterloo campsite who are unfamiliar with the area.
- The existence of a narrow footpath on only one side of the road in any one spot. The layout means that walking half a mile between Green Land and East Lane requires crossing the road twice.
- The road’s increasing use by recreational cyclists (see above).
- Its winding nature, poor sight lines (especially when interrupted by summer vegetation) and dangerous, concealed driveways. Most of these were built in the 1930s. Some have been widened but many are too narrow for modern traffic. Since a deep ditch runs along most of the road, vehicles have to swing out dangerously when entering or leaving.
- The prospect of additional traffic, including 19,000 HGV movements (90 a day over a long period) if Surrey County Council approves the Drift Golf Course’s planning application to re-landscape its site using bulk waste transported from London.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

We have recently moved to Horsley from neighbouring Effingham and we are frankly shocked to see the proposals for housing throughout the whole of our area.

Whilst we understand that there is a need for housing this plan seems excessive and will effectively destroy these old villages just creating an urban sprawl.
There also seems no forethought regarding infrastructure. At the moment there is only 1 doctors surgery which supports both the Horsleys and Effingham, (always very busy and difficult now to get an appointment) and only 1 secondary school which again supports over 2000 pupils and despite its good reputation is way too large to give proper pastoral care to individual pupils. All these extra homes puts increased pressure on services already full to capacity. The council can’t seem to cope with what we already live with. The roads are in a poor state and verges and common land are not properly or regularly maintained.

We are totally against removing green belt.

Comment ID: PSLPA16/1014  Respondent: 15328769 / Anne Cox  Agent:

**Document:**  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

In West Horsley, the facilities that are available i.e limited public transport, schooling and as I understand, no shops available (from September 2016) would not be able to sustain the number of houses that are proposed.

Furthermore, it seems that there are no plans available as yet for the infrastructure- drainage is inadequate now on the roads in the village.

In East Horsley, again there is inadequate parking now for the use of the shops and station, and the extra houses in both villages, will make it impossible to make appointments at an already very busy Medical Centre.

Finally, how will our sewage and waste water system cope?

None of the points seem to have been considered or explained.

I therefore strongly object to this present plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Comment ID: PSLPA16/1040  Respondent: 15341153 / Peter Singer  Agent:

**Document:**  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object most strongly to the Horsley villages being taken out of the Green Belt. Many promises have been made to preserve the Green Belt and it should be. It is a rural area and the character of the villages should be maintained.

The Horsley villages have already, during the last few years, had considerable infilling and large areas of new houses built resulting in considerable congestion on the narrow roads, particularly at peak times. It is already almost impossible to park to shop in the village, and the overflow car park is constantly full.
The station car park is also nearly full now, and with the additional houses planned commuters would not be able to park there.

The filter roads off the A3 already have huge tailbacks at peak times, and the pollution levels at the M25 Junction 10 at Wisley are already well above recommended safety levels.

The proposed number of houses to be built would mean a huge strain on the infrastructure, and cause a different way of life for the residents who do not want this. The further possibility of development at Wisley airfield is a complete horror as it would ruin the areas of outstanding natural beauty all around it.

Please reconsider the Local Plan.

My arguments against this work are as follows.

Firstly the one junior school we have is full to capacity.
Doctors Surgeries are full with waiting time for appointments.
Our roads are too narrow to take anymore lorries or cars, its not safe to walk to the village anymore.
Roads flood every year and building more houses on green belt will make it far worse, the rain water has nowhere to drain away from the roads.

Already there are dangerous pools of water which accumulate and more building will exasperate this situation.
Our village is too small to accommodate all the additional planned houses.

Please think again.

You say that 40% will be affordable houses, nowhere are we told how much these houses will be.
You should state a level at which these affordable houses will be sold.

I object to removing the Horsley's from the green belt. Our country is very overcrowded already, particularly in the southeast and the green belt was created by some foresighted government to protect the environment around London for all. It should therefore be sacrosanct. It serves as London's lung. We have seen how other policies supposedly to cut carbon emissions by encouraging people to buy diesel cars has now been proven to have made London one of the most polluted cities in Europe. How short sighted governments can be to reach so called targets!

I am writing regarding the revised local plan you have recently published which, despite its volume (no doubt designed to befuddle those who elect you), appears to wholly ignore earlier feedback and to contain fatal flaws.

Firstly, as regards likely population demands, your projections (such as they are) need to be re-visited in the light of Brexit. Your proposal for up to 533 new homes in the Horsleys with possibly another 2,000 on the Wisley site (under two miles away) would represent a disgraceful urbanisation of what is still a predominantly countryside area, with little thought given to the infrastructure consequences and certainly no guarantees that these will all be addressed in advance of any building.

Your papers also contain comments on the type of housing that you would wish to see in the Horsleys. Here again your approach is flawed as 533 new homes of the type you describe would be wholly out of keeping with the village. It is an observable fact that many Horsley houses are large and on large plots and that is why people have bought them. Furthermore, you reflect this fact in the heavy Council tax bills we pay from which Horsley residents derive few benefits.

You need a major re-think and a concentration on the more than adequate brownfield sites in the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/1069  Respondent: 15345025 / John Weaver  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North
To sum up, the proposal to build over 533 homes at a density significantly above that currently in the Horsleys on green belt sites would permanently destroy the character and appeal of the village and place an intolerable strain on local roads, the Raleigh school, the medical centre, and access to local shops and services. It also completely ignores the views expressed by the local population in the West Horsley Neighbourhood Plan survey in 2014.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

---

Nothing has been put forward since last year's Consultation to improve the sustainability of the West Horsley development sites and thus meet national policy requirements. Every home on the West Horsley sites will need a minimum of one car to enable residents to get to shops, the medical centre, library, and Horsley Station, regardless of how much pressure is applied to adopt cycling and walking as the preferred means of travel.

I object to no changes being proposed since the 2016 consultation to removing East & West Horsley from the green belt.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

---

I OBJECT most strongly to the removal of EAST and WEST HORSLEY from the GREEN BELT. A ring of GREEN around London was meant to PREVENT LARGE SCALE URBANIZATION of GREATER LONDON.

I further object to the incredibly large number of houses allocated to EAST and WEST HORSLEY making the two closely linked villages totally unrecognizable from what they are today, with many very old houses, and most of the rest built to reflect and fit in with semi-rural surroundings. I have lived in Surrey for 60 years, 36 in West Horsley, and there has already been considerable development, but not on the scale now proposed, from SEMI-RURAL to URBAN.

Surely further use of BROWN-FIELD sites in GUILDFORD which is now a City and already has many high-rise buildings could be accomplished with careful planning.

Roads, schools, hospitals, public transport (both rail and road), water supplies and sewerage will be adversely affected and will need to be enlarged and up-dated causing considerable disruption to two small villages.

So many extra properties will bring a significant number of extra cars - local traffic is already considerable in the morning rush-hour and also from mid-afternoon when schools close, through to the evening rush-hour.
Many local people and visitors enjoy WALKING and CYCLING in this area, both for recreation and to observe the considerable amount of wild-life - which if this URBANIZATION proceeds will not be available for future generations.

Many areas of this country would welcome housing development and new businesses to provide JOBS and good housing - THERE IS NO SHORTAGE OF JOBS in LONDON and the SOUTH EAST.

I understand that we cannot stand still completely, but please not on so LARGE a scale, and certainly retaining the precious GREEN BELT - once it is gone we cannot ever have it back.

7. I OBJECT especially to Policies A36, A37, A38, A39, A40 and A41: all of the proposed Horsley sites for all the reasons stated in my introduction. I am aware of no local support for these plans. The amount of new housing proposed far exceeds local need. The proposed density of construction is too high (approx. 37 dwellings/hectare at A36) compared with existing development (approx. 8 dwellings/hectare around that site). The sites proposed are unsustainable with no supporting plans for enhanced services e.g. wastewater, schools, traffic management, flooding. No account is taken of impact of suggested Wisley Airfield site development The insetting lines suggested seem arbitrarily drawn and do not feel at all in keeping with the actual spaces on the ground e.g. some streets have houses on only one side so to develop opposite would be ruinous. Policies A37, A38, A40 and A41 require moves to the Green Belt, which I fundamentally disagree with and are contrary to Local Plan Policy P2 which states “we will continue to protect the Metropolitan Green Belt.”

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to OBJECT to the Proposed Submission of the Guildford Local Plan: Strategies and Sites June 2016 as it is in its current format.

I have tried to be objective as this is of historical, environmental and social importance. I have read the local press, looked at the GBC website, videos and Plan (very hard to read and scrutinise), been to local meetings and spoken to local people to get a balanced view.

I was brought up in Walton-On-Thames where my parents still live so I have called this area home for the past 40 years. A year ago I returned to Surrey with my husband and young son to live in West Horsley. I was fortunate to be brought up in the area and very happy to have been able to return here now.

We moved here to be close to family and friends, enjoy the more rural aspects of life and leave the hustle of London. However having known the area so long I am aware of the problems the area faces already such as severe congestion,
over crowded trains, enormous infilling of housing (radically changing the look and feel of the area, especially Walton and Weybridge), over stretched schools and health facilities. I am a nurse and I am very aware of the existing pressures on local health facilities.

My three main objections to the Local Plan are therefore:

• Erosion of the immensely precious Green Belt by redefining the boundaries; “the essential characteristics of Green Belts are their openness and their permanence” (Department for Communities & Local Government) both of which will be irrevocably lost if this Plan goes ahead. I feel that the “exceptional circumstances” needed to justify this environmentally devastating change have not been demonstrated by the Guildford Borough Council Local Plan.

• A very worrying lack of provision of infrastructure in the Plan to cope with the disproportionate scale of the proposal. Health, education, transport, sewerage are all currently under pressure and not convincingly addressed in the proposal. For our village, West Horsley, the Guildford Plan does not even consider the need for extra local services but the schools, the GP, the roads, the car parks are full, the bus service basic, the roads suffering severely from potholes and the area is subject to flooding and sewerage problems.

• The scale and density of the proposed plan is alarming which has not been satisfyingly explained in the GBC Plan. GBC has not revealed how it has arrived to the conclusion that such expansion and development is needed. In which case how can such potentially environmentally catastrophic changes even be put forward? How does this comply with Government guidelines?

From a far more local perspective, i.e living in West Horsley I am extremely alarmed at the density and scale of the proposed Green Belt change in the Horsleys and the density of permitted housing proposed. Why on earth is there a proposal for a 35% increase in new housing for West Horsley (the highest % than any other borough) when the allowance for surrounding villages is so much lower and for Guildford Town centre only 11%? I understand that Guildford University has available land for building and yet this is somehow being protected? Surely building there would be of greater local use than farther afield villages for university and hospital workers?

Furthermore the density of housing proposed in the Horsleys is not in keeping with the current local density of housing which will permanently change the community feel and look. The Key Evidence given in the Guildford Borough Economic Strategy 2013-31 does not explain the need or demand for this huge increase in housing, i.e 148 houses in East Horsley and 385 houses in West Horsley. And this number does not take into account any potential future developments once the villages are taken out of the Green Belt.

With regards to the surrounding villages and areas I am also very alarmed at, and object to, the scale and number of proposed sites which are all within the vicinity of the A3 dual carriageway: Wisley Village (2068 houses), Garlick’s Arch, Send Marsh, Ripley (400 houses), Gosden Hill Farm (2000 houses). This road and surrounding roads struggle daily to cope with heavy congestion. The proposals will only worsen this and the pollution increase yet further. With scarce and unreliable local transport and hence heavy reliance on private cars how can this proposal be realistically sustainable?

The proposed Wisley Airfield village (or more correctly new town) is incredibly close to Ockham, Ripley and the Horsleys. The repercussions on the Horsleys and the already over subscribed schools and GPs will be immense. I object strongly to this large scale development and understand that again the local infrastructure will not cope with this new town.

I have also been concerned to read that despite 20,000 objections to the 2014 Plan the New Plan 2016 is barely different and in fact the number of houses to be built per year is more than in 2014 Plan.

I wholeheartedly hope that local objection will force this Plan to be rejected on the grounds of un-sustainability, excessive scale, environmental repercussions, density, lack of infrastructure, lack of demand and most importantly the unrecoverable loss of precious Green Belt protection.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

I wish to register OBJECTIONS to the Proposed Submission Local Plan in respect of its impact on East and West Horsley.

**GREEN BELT**

No sound case has been made for justifying changes to Green Belt Boundaries laid down by national legislation.

The National Planning Policy Framework requires any change in Green Belt boundaries to be the result of exceptional circumstances. No exceptional circumstances have been demonstrated.

**PROPOSED HOUSING DEVELOPMENTS**

The proposed development of 533 homes on Green Belt sites, at much higher densities than currently exist, would be totally out of character with the existing houses and village layout. These developments would also be unsustainable in terms of drainage, roads capacity, schools, medical facilities, shops, parking and public transport.

**LAND AT FORMER WISLEY AIRFIELD**

The proposal to build approximately 2000 homes at this site is in effect the creation of a New Town in the Surrey Green Belt. This development would be a severe contravention of Metropolitan Green Belt policy and would have a major adverse impact across a widespread area, including East Horsley.

**CONCLUSION**

I object to the Proposed Submission Local Plan. The Council should be directed to amend the Local Plan by using brownfield and previously used land for housing instead of encroaching on Green Belt land.

Do you consider this section of the document complies with the Duty to Cooperate? (), is Sound? (), is Legally Compliant? ()

I object to any sites in West Horsley for any site with 5 or more houses. No planned infrastructure and will create an urban sprawl into neighbouring Ockham East and West Horsley.

I object to the allocation of manor Farm allocation A38

I object to the allocation of bell and colville allocation A37

I object to the allocation land at Ockham road north, West Horsley, allocation A40

I object to allocation of land at Ockham Rd north, allocation A39

I object to the allocation of Thatcher’s hotel East Horsley, allocation A36

I object to the allocation of land at East Lane West Horsley, allocation A41

I object to the insetting of town from the green belt

I object to the insetting of West Horsley

I object to the insetting of Ripley

I object to the insetting of West Clandon

I object to the insetting of Send

There is plenty of land for development in urban area that should be used rather than determinate further.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
OBJECTIONS TO GUILDFORD BOROUGH PROPOSED SUBMISSION LOCAL PLAN EAST & WEST HORSLEY (JUNE 2016)

I object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2016). These are my main reasons are...

I object to the Local Plan as the following development proposed is not sustainable (Policy S1)

At least 148 more houses in East Horsley. At least 385 more houses in West Horsley.

I further object to both villages to be taken out of the Green Belt. The new boundary, (called the in-setting boundary) extends the old settlement boundary and includes some fields and open spaces. This means that Kingston Meadows (by East Horsley Village Hall) is included inside the insetting boundary – despite being a valuable green space. Horsley Tennis & Cricket club at the end of Pennymead Drive is also inside the insetting boundary.

This is totally unacceptable. I object to not protecting the Green Belt (Policy P2)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I write further to the publication of the above document and write to express my objection to elements of its contents.

My principle overarching objection is the proposal to take a number of Surrey villages out of the Green Belt, and East and West Horsley in particular. This proposal in particular will have "urbanisation" implications far beyond those envisaged by the mantra that more houses must be built in the Borough. Whilst I fully accept the need to provide additional housing in the Borough, I do not agree with the drastic actions of removing the Green Belt status in order to be able to provide large scale developments that would otherwise be subject to far greater planning scrutiny.

1. I object to your proposal to remove the Horsleys from the Green Belt. The Green Belt was established for a very defined purpose by statute. It was designed to prevent urban sprawl and to a large extent has succeeded in doing this. It is there for the benefit of not just our generation but those that succeed us. This area not only contains many areas of Outstanding Natural Beauty but also Sites of Special Scientific Interest. The Green Belt enables these areas to be protected in order that the Guildford/Leatherhead/Dorking area does not become a suburban sprawl such as Hersham/Weybridge/Walton on Thames.

2. Large numbers of people visit the Surrey Hills area because of its stunning beauty, villages and leisure opportunities. These visitors in turn support many businesses both large and small whose livelihood depends upon the area.
retain its rural charm. You simply have to remember that these people are your citizens, your ratepayers and your electorate and changing the nature of their environment will potentially destroy the uniqueness of their businesses.

1. I object to the volume of housing, and associated density of construction, which is currently proposed in the Horsleys and is completely out of keeping with their village status. The proposal to build 180 houses in East Horsley and 411 in West Horsley is completely disproportionate to the housing stock currently in existence. There has not been any detailed study undertaken proving the need for this level of housing in these locations, the size and style of the proposed houses or the impact on the surrounding infrastructure.

1. I object to the proposals as many of these sites do not reflect the level of infrastructure in place to support such a volume of housing, from schools to medical facilities, shops, bus services, train station parking and we have seen how many villages in the area have been blighted by the bolt on Council Estates of the post war years - dumped on village back land with no regard to the architectural merits of the development, the local amenities on offer or the employment of the proposed residents. Each site should be considered on its own individual merits under the existing planning regime which has been designed to protect the environment of our rural life and given its particular circumstances.

1. I object to the proposal to build 100 houses on site A39 in East Horsley as it is fundamentally the plan already recognises that the site is in a flood plain and notes that the flood risk needs to be reduced and that accordi ngly there is to be no greater flood risk to anywhere else. Surely by interfering with the flood plain in this location can only transfer the flood plain impact somewhere else? That may be downstream of the site or onto adjoining properties. If there is no interference with the flood plain at the site doesn't become viable for 100 houses. The existing proposal by Cateby Land to develop 100 affordable homes here simply does not sit comfortably with any sustainable, accessible or employment rationale. It is building the wrong types of houses in the wrong place.

1. I also do not believe that the Council has given sufficient regard to where all these new inhabitants are going to. There is little or no employment in these villages, there is very little bus transport, the railways are currently crammed in rush hour with no room for extra capacity and the station car parks are not big enough to cater for more cars. And yet how are people meant to get to work in Guildford, Woking and London as the primary employment centres? The answer will be by car, whether this be by way of a short journey to the station (where they will end up parking on the streets) or a full journey into Guildford (which is already rammed in rush hour). I cannot see how this can sit comfortably with the Council's Green agenda. The Council certainly will not be able to force the bus and train companies to extend their services as these are now privately owned businesses operating for profit.

1. I disagree with the Council’s housing projection of a need for 693 houses per year (identified in the SHMA) for the period 2013-2033 when an independent report prepared by NMS for Guildford Resident's Association in June 2016 identifies that the Objectively Assessed Housing Need is nearer to 51. This reinforces my view that the statistical basis for the draft Local Plan is fundamentally flawed.

1. I object to the Council's failure to unlock the development potential of brownfield sites in the Borough and the volume of currently unoccupied residential properties in the Borough should be given a greater priority in the search for developable land before ruining the environment, livelihood and well-being of a unique area of Britain.

Remember, there will be no opportunity to undo any development resulting from these proposals. You will not be able to wind back time.

I re-iterate my unreserved objection to the proposals as set out in the above document.

<tr>
<td>My wife and I have been residents in West Horsley since 1958 and our 3 children attended local schools. During this time we have witnessed increased traffic on the roads due to housing infilling. This has caused queueing during busy periods at junctions such as East Lane into Ockham Road and difficulties in parking when shopping in the village etc. It is quite obvious that West Horsley has reached the limit for sensible development and the proposals for building large numbers of additional houses would be quite out of scale with the existing infrastructure.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
There appears to be no justification or planning behind the proposals which seem to be driven by developers rather than planners. There are certainly no exceptional circumstances to justify removing the Horsleys from the Green Belt and, as far as I am aware, no justification has been put forward by Guildford Borough Council.

If there is a need for so many houses in Surrey, surely it would be far better to build a new town situated well away from existing settlements otherwise much of the character of Surrey's attractive villages will be spoiled for ever. I find it astonishing that Guildford Borough Council should have left these proposals to be assessed by outside consultants rather than using its own knowledge and expertise in co-ordination with local residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/1369  Respondent: 15397729 / G B Harris  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Here we go again - being asked to send in our response to a proposal to build umpteen houses in a village that, frankly, neither WANTS nor NEEDS them. I understand our West Horsley Parish Council says it needs 20 houses. I am sure they know what is required for our village yet we are told we need hundreds - this is crazy. We are a small village, people who have moved here have done so because they want to live in a small village. We chose to live here 40-odd years ago for that very reason.

Quite apart from the fact that we do not want all this extra housing it would be impossible to sustain them. To summarise:-

INFRASTRUCTURE SCHOOLS:

Drains are at their maximum capacity Raleigh, the State primary school, is always full. Traffic to and from the private schools, Glenesk and Cranmore is enormous

PARKING:

The car park at E Horsley Medical Centre (also serving W Horsley) is more often than not totally full and getting a medical appointment is always difficult.

Parking for the shops in E Horsley we only have 1 shop in W Horsley) is more often than not totally full. The station carpark is full on weekdays.

GREEN BELT MOST IMPORTANT OF ALL

BUILDING OF HOUSES SHOULD NOT BE ALLOWED ON GREEN BELT LAND

I quote from section 9 of the NPPF, which sets out the fundamental aim of green belt policy

"The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open, the essential characteristics are their openness and their permanence"

It also makes clear that the construction of new buildings should be regarded as "inappropriate " for the green belt

My husband works in the property sector, and his business relies upon development. I am certainly not opposed to the idea of sustainable, reasonable development - but the proposed plan will ruin the Horsleys, destroy the beauty of the surrounding Green Belt and makes no provision for the obvious strains on services and infrastructure that such development would cause.

**I OBJECT STRONGLY TO** Policies A36, A37, A38, A39, A40, A41

- The number of houses being proposed is ridiculous, and will completely turn our beloved village into an ugly, urban sprawl.

- The congestion of new people and buildings will be unsustainable with our current infrastructure as well as schools and facilities

As stated, we moved from London out to the Horsleys less than a year ago, so that we could raise our children in the peace and beauty of our new home and its surrounding spaces. This proposal will completely ruin the "feel" of the entire area and would break the hearts of many loyal residents, including mine.
Many thanks for your time.

---

I am writing to comment on and object to the Local Plan.

In particular, I am concerned about a number of the proposals as they impact East and West Horsley (the "Horsley's") and the surrounding area.

Quite apart from the fact that it is absolutely clear that the residents are totally against the Horsley's being removed from the Green Belt, the proposal to increase the number of dwellings in West Horsley by around 35% is excessive in the extreme.

In this regard, I understand that the National Planning Policy Framework must take account of and respect the character and density of housing in the area of new residential development and the quantity of new dwellings be limited by the availability of infrastructure and local facilities.

Many residents like me have made their home in the Horsley's attracted by the village atmosphere but the high density developments proposed for West Horsley would forever change this.

In the 30 years I have lived in West Horsley I have seen a steady increase in the numbers of new residents moving to this area.

In doing so, services such as the Medical Centre have already become so busy that it is often difficult to make an appointment. Parking at the Medical Centre is also at a premium.

Access to parking in the area of the East Horsley shops is already often extremely difficult with the current volume of shoppers and traffic and the Horsley railway station parking facilities, once adequate, are generally pretty full.

Furthermore, the car park at Effingham Junction Station, which in the past could be used as an alternative to Horsley Station, is regularly full.

The proposed developments will result in traffic movements becoming significantly greater following the inevitable increase in the number of vehicles on the road. Consequently, traffic using the local roads are likely to come to a grinding halt at the times when travellers are attempting to get to or return from the local railway stations to get to work or school.

It must be clear to anybody that the increase in population resulting from the proposed developments would generate a huge increase in traffic in the area which would be significantly exacerbated by any development of Wisley Airfield.

I believe that the road capacity in the Horsley's is totally inadequate to support these plans.

I understand there are other issues which have been raised by the local Parish Councils which include concerns about road and transport infrastructure for West Horsley as well as concerns about the existing pressure on sewage and the local wastewater network's ability to support the demand from the proposed developments.

It seems to me that Guildford Borough Council has simply decided to remove the Horsley's from the Green Belt and build an inappropriate and excessive number of houses in West Horsley without any justification.
Given the scale of the proposed development in West Horsley which would lead to the unnecessary end of village life and an adverse impact on the infrastructure across the Horsley's I object to these proposals in the strongest terms.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/1457  Respondent: 15410849 / G Reid  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am most concerned over the proposals contained in the Guildford plan in relation to West Horsley, and would cite the following among my main concerns:

I am very much against the higher density of the proposed new homes in West Horsley which would spoil the whole character of our village.

It is clearly unreasonable that any major increases in the number of homes in West Horsley should be considered without major parallel improvements to- and expansion of much necessary infrastructure - much of which is already operating under severe pressure.

I cannot see any valid reason or any 'very special circumstances' as to why West Horsley should be taken out of the Green Belt and am opposed to any such measure.

I also have real concerns as to the validity of many of the assumptions upon which the Guildford plan is based - particularly in relation to West Horsley.

I trust the above points are sufficient to illustrate my opposition to the currently proposed plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/1460  Respondent: 15411041 / V Reid  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am opposed to many aspects of 'The Guildford Plan' concerning West Horsley - especially to the following.

1) I was shocked at the proposed removal of West Horsley from the Green Belt, particularly in the absence of any stated "exceptional circumstances" to justify such a main change to our village.

2) I object to the disproportionately high increase in the number of proposed new homes in West Horsley compared to similar areas in the Guildford Plan.
3) Local facilities- such as the medical centre, schools of public transport- all already overstretched- would NOT be able to cope with any significant increases in the population of West Horsley.

I could easily, yet again, add to the above objections to the plans, but would urge you to reconsider and amend it in the light of objections such as those noted above.

I am writing to you to to inform you of our objection to the proposed housing development in the Horsleys and surrounding area.

I support the need for new housing, however, this proposal is badly thought-out and will see the first steps of destroying valuable greenbelt land in this area. This scheme would be more suited to the brownfield site sat and around Guildford/Woking where it can easily combine with the town centre facilities, especially with regards to water and sewage treatment.

Traffic, especially heavy goods vehicles, has increased rapidly over the past 10 years and this will continue when the development goes ahead. These are small country lanes with no traffic flow management, the road traffic accident will have to go up.

Public transport is limited in this area with no bus routes and only 2 Railway Stations at Horsely/Effingham Junction. Station car parking at both of these stations is now at full capacity, also morning peak rush hour services on the trains are also heavily congested.

These 2 proposed Roundabouts located near Old lane will make traffic more heavily congested and will deteriorate the quality of life for the residents near to them. Also the Constant noise and inconvenience to the residents during and afterwards the installation of the Roundabouts.
Very little thought and planning for the nearby residents who will have to tolerate the increased noise and pollution (noise and air pollution) that the construction this housing scheme will bring forever to this place in rural Surrey.

These are my objections to this proposed scheme and please put them on the record.

I am writing to inform you that I wish to object to the proposal of Building Houses (593) in the Horsley’s, one of my main objections is to remove the Horsley’s from the Green Belt – Such a decision and action would be a disastrous act of stupidity because an increase of homes would mean an upheaval for most residents to the environment such a development would cause.

Village roads cannot cope at the best of times, let alone a further increase of traffic which in turn cause more pollution to this green village.

Re DRAFT LOCAL PLAN

I write to object to the Draft Local Plan (DLP) and in particular the proposals as they apply to East and West Horsley and the surrounding area.

I regularly visit my daughter and her family in East Horsley, and consider that the proposals for development and in relation to the road infrastructure in the area will have a significantly bad impact on traffic flow through, and access to the village. The roads are narrow and winding and already suffer from regular congestion, particularly if there has been an accident or breakdown on the M25 or A3.
The proposed new interchange at Burnt Common will simply encourage more vehicles to attempt to bypass any traffic jams by using the local roads. Such traffic is also likely to cause problems with speed and risk-taking, which increases the danger for pedestrians and cyclists, including children walking or cycling to and from school.

Additionally, the proposals in relation to the Wisley Airfield site and other local housing developments will add significantly to local road use, particularly at peak times. The DLP envisages some 533 new houses in the Horsleys, plus in excess of 2000 new houses on the Wisley site, the likelihood is that the majority of these new homes will be households running at least 2 vehicles. There are already difficulties at Effingham cross-roads, Effingham Junction and in getting into Cobham, all of which are regular routes for commuters and for the school run. The local roads are not capable of absorbing an addition 5000 or so vehicles without adding substantially to the delays and congestion in the area and decreasing the safety of all road users.

I object to changing the status of the land currently within the Metropolitan Green Belt. The National Planning Policy Framework (NPPF) requires that any change of Green Belt boundaries must demonstrate exceptional circumstances. No exceptional circumstances have been demonstrated within the DLP, and to change the status of current Green Belt land would change the character of the area for ever, to the considerable detriment of the Borough as a whole and the local communities.

Please take these points into account and reject the Draft Local Plan as inappropriate for the area. A new Draft should be put forward which properly takes these factors into account.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

I object to the removal of the Horsleys and the Former Wisley Airfield (FWA/TFM) from the Green Belt. The later site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the Horsleys and FWA/TFM from the Green Belt.

I object to the housing number from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent. I understand that plan includes a figure which is almost 70% higher than the official national estimates for population growth in the Borough. The scale of this increase has alarming results for example an increase of up to 35% in existing West Horsley households - greater than any other single area in the Borough.

The infrastructure in the Horsleys and Ockham are already in overload. The local schools are full and the medical facilities are in inadequate and roads and car parks are overloaded with little or no scope for improvements.

I object to the disproportionate allocation of housing in the immediate localities of Ockham, Ripley, Send and the Horsleys.

I object to the threat the Local Plan poses to the historic rural villages of Ockham and the Horsleys and the blight on properties. These are villages would change considerably with 2,000+ dwelling development at Wisley and the additional housing proposed on the Horsley sites.

I object to the detrimental impact on transport, local roads and road transport. I specifically object to:

1. The assertion that the Wisley development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
2. The increased volume of car traffic. A proposed development of around 2,600 homes in the Horsleys and Ockham would result in an estimated 5,000 additional cars on the roads.
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the Wisley site would add additional congestion at the M25/A3 junction as well as local roads.
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

8. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the FWA/TFM site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

9. I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, particularly at the M25/A3 junction, is in excess of EU permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

10. I object to the fact that the proposed plan does not meet the needs and desires of local communities.

11. I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd. 's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
I trust that these objections will be fully considered and Allocations A35, A36, A37, A38, A39, A40 and 41 are removed from the Local Plan with immediate effect.

Objections to Guildford Borough Council Proposed Local Plan (June 2016)

I object to the draft Local Plan for the following key reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Horsleys and the Former Wisley Airfield (FWA/TFM) from the Green Belt. The later site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the Horsleys and FWA/TFM from the Green Belt.

3. I object to the housing number from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent. I understand that plan includes a figure which is almost 70% higher than the official national estimates for population growth in the Borough. The scale of this increase has alarming results for example an increase of up to 35% in existing West Horsley households - greater than any other single area in the Borough.

4. The infrastructure in the Horsleys and Ockham are already in overload. The local schools are full and the medical facilities are in a poor state. Drainage is inadequate and roads and car parks are overloaded with little or no scope for improvements.

5. I object to the disproportionate allocation of housing in the immediate localities of Ockham, Ripley, Send and the Horsleys.

6. I object to the threat the Local Plan poses to the historic rural villages of Ockham and the Horsleys and the blight on properties. These are villages would change considerably with 2,000+ dwelling development at Wisley and the additional housing proposed on the Horsley sites.

7. I object to the detrimental impact on transport, local roads and road traffic. I specifically object to:
   1. The assertion that the Wisley development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
   2. The increased volume of car traffic. A proposed development of around 2,600 homes in the Horsleys and Ockham would result in an estimated 5,000 additional cars on the roads.
   3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
   5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the Wisley site would add additional congestion at the M25/A3 junction as well as local roads.
   6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.
8. I object to the fact that insufficient consideration has been given to the environmental and ecological value of the FWA/TFM site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

9. I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

10. I object to the fact that the proposed plan does not meet the needs and desires of local communities.

11. I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd.'s (WPI) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and Allocations A35, A36, A37, A38, A39, A40 and A41 are removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/1630  Respondent: 15439329 / P Darrell-Smith  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

For the reasons as listed by the Horsley Countryside Preservation Society, will you please ensure that this OBJECTION is duly recorded by your council of by subsequent Independent Inquiry.

Major Objections and concerns for the Horsleys:

• Proposal to remove the Horsleys from the Green Belt.
The "exceptional circumstances" required before taking this action have not been demonstrated.

• Extension of the boundaries of the Settlement areas of the Horsleys.
No sound reasons have been given for the proposed changes, which seem to be aimed solely at increasing the land available within the settlements for future additional development.

• Infrastructure already in overload.
The local Schools are full. Medical facilities stretched. Drainage is inadequate, roads and car parks are overloaded with little or no scope for improvements.

• Station Parade is designated a "District Centre".
This 'classification' results from a complete misreading of the nature of the facilities in the village centre and would inappropriately target the area for future urban developments.
• Development of over 2,000 house village at Ockham (former Wisley Airfield)

The impact on the Horsley villages of such a huge mixed housing, retail, commercial, traveller and schools development, under 2 miles away, would be enormous. The plan also includes extensive developments at Burnt Common (400 houses & commercial developments) and Gosden Hill Farm, Burpham (2000 houses & mixed use developments).

• Major doubt concerning housing numbers

The inflated number of new houses proposed arises from a Strategic Housing Market Assessment (SHMA) that was generated by a consultant's mathematical model which is not revealed in the plan. Nor, apparently, to Guildford Borough Council, GBC.

This SHMA target housing number is then further increased by GBC to give a population increase which is almost 70% higher than the official national estimates for population growth in the Borough. The scale of this increase has alarming results e.g. an increase of up to 3 5% in existing West Horsley households - greater than any other single area in the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: [LP2016- P Darrell-smith.pdf](108 KB)
4. Although reduced from the previously planned numbers, the current PSLP figures equate to 384 new houses in West Horsley, a rise of 35% compared to the existing 1,111 households in the village, and as I understand it, the new developments are scheduled to be implemented in the early years of the New Plan. Taken with the other development sites proposed for the Eastern side of the Borough, this is sure to put excessive pressure on local services including roads, and other infrastructure.

Turning to East Horsley's proposed development as a District Centre, this is beset by problems, particularly as regards the area of East Horsley Station Parade. Even today, this area has too little short-term and long-term parking, both at the railway station and increasingly for the local shops. Other services, particularly medical and educational, are also already over-burdened. Alone, the new housing developments proposed for both East and West Horsley in the PSLP would overload the proposed District Centre, but the possibility of a larger development at the Wisley Airfield site can only exacerbate this, since Horsley station would be the obvious (or only feasible) access point to the railway for London commuters (and other users) from Wisley. The proposed new Merrow station might attract residents of the proposed Gosden Hill Farm and I Send housing developments, but it will not help Wisley, and would, in any case, lead to increased over-crowding at later stations, given the likely limit to the additional train capacity which could be run on existing track; and because there are no proposals to develop the Effingham junction area (which is marginally closer to Wisley).

All in all it seems that the adoption of the current proposals in the PSLP for excessive housing concentration in the Eastern areas of the Borough of Guildford will lead, over a short time period to the complete destruction of the Green Belt in the Horsley areas, the overwhelming of services in general, and possibly to a major transport disaster. Please reconsider the PSLP proposals; specifically, reject Strategic Development Site A41; drop the proposal to indent West Horsley from the Green Belt, review the adoption of East Horsley as a District Centre.

<td>RE: GUILDFORD BOROUGH COUNCIL -LOCAL PLAN: STRATEGY AND SITES.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>I write further to the publication of the above document and write to express my objection to elements of its contents.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>My principle overarching objection is the proposal to take a number of Surrey villages out of the Green Belt, and East and West Horsley in particular. This proposal in particular will have &quot;urbanisation&quot; implications far beyond those envisaged by the mantra that more houses must be built in the Borough. Whilst I fully accept the need to provide additional housing in the Borough, I do not agree with the drastic actions of removing the Green Belt status in order to be able to provide large scale developments that would otherwise be subject to far greater planning scrutiny.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>1. I object to your proposal to remove the Horsleys from the Green Belt. The Green Belt was established for a very defined purpose by statute. It was designed to prevent urban sprawl and to a large extent has succeeded in doing this. It is there for the benefit of not just our generation but those that succeed us. This area not only contains many areas of Outstanding Natural Beauty but also Sites of Special Scientific Interest. The Green Belt enables these areas to be protected in order that the Guildford/Leatherhead/Dorking area does not become a suburban sprawl such as Hersham/Weybridge/Walton on Thames.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>2. Large numbers of people visit the Surrey Hills area because of its stunning beauty, villages and leisure opportunities. These visitors in turn support many businesses both large and small whose livelihood depends upon the area retaining its rural charm. You simply have to remember that these people are your citizens, your ratepayers and your electorate and changing the nature of their environment will potential ly destroy the uniqueness of their businesses.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
3. I object to the volume of housing, and associated density of construction, which is currently proposed in the Horsleys and is completely out of keeping with their village. The proposal to build 180 houses in East Horsley and 411 in West Horsley is completely disproportionate to the housing stock currently in existence. There has not been any detailed study undertaken proving the need for this level of housing in these locations, the size and style of the proposed houses or the impact on the surrounding infrastructure.

4. I object to the proposals as many of these sites do not reflect the level of infrastructure in place to support such a volume of housing, from schools to medical facilities, shops, bus services, train station parking and drainage. We have seen how many villages in the area have been blighted by the bolt on Council Estates of the post war years - dumped on village back land with no regard to the architectural merits of the development, the local amenities on offer or the employment of the proposed residents. Each site should be considered on its own individual merits under the existing planning regime which has been designed to protect the environment of our rural life and given its particular circumstances.

5. I object to the proposal to build 100 houses on site A39 in East Horsley as it is fundamentally flawed. The plan already recognises that the site is in a flood plain and notes that the flood risk needs to be reduced and that accordingly there is to be no greater flood risk to anywhere. Surely by interfering with the flood plain in this location can only transfer the flood plain impact somewhere else? That may be downstream of the site or onto adjacent properties. If there is no interference with the flood plain at the site doesn't it become viable for 100 houses? The existing proposal by Caterby Land to develop 100 affordable homes here simply does not sit comfortably with any sustainable, accessible or employment rationale. It is building the wrong types of houses in the wrong place.

6. I also do not believe that the Council has given sufficient regard to where all these new inhabitants are going to. There is little or no employment in these villages, there is very little bus transport, the railways are currently crammed in rush hour with no room for extra capacity and the station car parks are not big enough to cater for more cars. And yet how are people meant to get to work in Guildford, Woking and London as the primary employment centres? The answer will be by car, whether this be by way of a short journey to the station (where they will end up parking on the streets) or a full journey into Guildford (which is already rammed in rush hour). I cannot see how this can sit comfortably with the Council’s Green agenda. The Council certainly will not be able to force the bus and train companies to extend their services as these are now privately owned businesses operating for profit.

7. I disagree with the Council’s housing projection of a need for 693 houses per year (identified in the SHMA) for the period 2013-2033 when an independent report prepared by NMSS for Guildford Resident’s Association in June 2016 identifies that the Objectively Assessed Housing Need is nearer to 510. This reinforces my view that the statistical basis for the draft Local Plan is fundamentally flawed.

8. I object to the Council’s failure to unlock the development potential of brownfield sites in the Borough and the volume of currently unoccupied residential properties in the Borough should be given a greater priority in the search for developable land before ruining the environment, livelihood and well-being of a unique area of

Remember, there will be no opportunity to undo any development resulting from these proposals. You will not be able to wind back time.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
My principle overarching objection is the proposal to take a number of Surrey villages out of the Green Belt, and East and West Horsley in particular. This proposal in particular will have “urbanisation" implications far beyond those envisaged by the mantra that more houses must be built in the Borough. Whilst I fully accept the need to provide additional housing in the Borough, I do not agree with the drastic actions of removing the Green Belt status in order to be able to provide large scale developments that would otherwise be subject to far greater planning scrutiny.

1. I object to your proposal to remove the Horsleys from the Green Belt. The Green Belt was established for a very defined purpose by statute. It was designed to prevent urban sprawl and to a large extent has succeeded in doing this. It is there for the benefit of not just our generation but those that succeed us. This area not only contains many areas of Outstanding Natural Beauty but also Sites of Special Scientific Interest. The Green Belt enables these areas to be protected in order that the Guildford/Leatherhead/Dorking area does not become a suburban sprawl such as Hersham/Weybridge/Walton on Thames.

2. Large numbers of people visit the Surrey Hills area because of its stunning beauty, villages and leisure opportunities. These visitors in turn support many businesses both large and small whose Livelihood depends upon the area retaining its rural charm. You simply have to remember that these people are your citizens, your ratepayers and your electorate and changing the nature of their environment will potentially destroy the uniqueness of their businesses.

3. I object to the volume of housing, and associated density of construction, which is currently proposed in the Horsleys and is completely out of keeping with their village status. The proposal to build 180 houses in East Horsley and 41 in West Horsley is completely disproportionate to the housing stock currently in existence. There has not been any detailed study undertaken proving the need for this level of housing in these locations, the size and style of the proposed houses or the impact on the surrounding infrastructure.

4. I object to the proposals as many of these sites do not reflect the level of infrastructure in place to support such a volume of housing, from schools to medical facilities, shops, bus services, train station parking and drainage. We have seen how many villages in the area have been blighted by the bolt on Council Estates of the post war years - dumped on village back land with no regard to the architectural merits of the development, the local amenities on offer or the employment of the proposed residents. Each site should be considered on its own individual merits under the existing planning regime which has been designed to protect the environment of our rural life and given its particular circumstances.

5. I object to the proposal to build 100 houses on site A39 in East Horsley as it is fundamentally The plan already recognises that the site is in a flood plain and notes that the flood risk needs to be reduced and that accordingly there is to be no greater flood risk to anywhere else. Surely by interfering with the flood plain in this location can on ly transfer the flood plain impact somewhere else? That may be downstream of the site or onto adjoining properties. If there is no interference with the flood plain at the site it doesn't become viable for 100 houses. The existing proposal by Cateby Land to develop 100 affordable homes here simply does not sit comfortably with any sustainable, accessible or employment rationale. It is building the wrong types of houses in the wrong place.

6. I also do not believe that the Council has given sufficient regard to where all these new inhabitants are going to go. There is little or no employment in these villages, there is very little bus transport, the rail links are currently crammed in rush hour with no room for extra capacity and the station car parks are not big enough to cater for more cars. And yet how are people meant to get to work in Guildford, Woking and London as the primary employment centres? The answer will be by car, whether this be by way of a short journey to the station (where they will end up parking on the streets) or a full journey into Guildford (which is already rammed in rush hour). I cannot see how this can sit comfortably with the Council’s Green agenda. The Council certainly will not be able to force the bus and train companies to extend their services as these are now privately owned businesses operating for profit.

7. I disagree with the Council's housing projection of a need for 693 houses per year (identified in the SHMA) for the period 2013-2033 when an independent report prepared by NMS for Guildford Resident's Association in June 2016 identifies that the Objectively Assessed Housing Need is nearer to This reinforces my view that the statistical basis for the draft Local Plan is fundamentally flawed.

8. I object to the Council's failure to unlock the development potential of brownfield sites in the Borough and the volume of currently unoccupied residential properties in the Borough should be given a greater priority in the search for developable land before ruining the environment, livelihood and well-being of a unique area of

Remember, there will be no opportunity to undo any development resulting from these proposals. You will not be able to wind back time.
I re-iterate my unreserved objection to the proposals as set out in the above document.

We would like to register our objection to the proposed New Local Plan. Fifty seven years ago, we moved to the lovely village of West Horsley and over the years have seen it grow, however, it has basically remained a village,

If the proposed developments go ahead, it will become a town, without the infrastructure to support it. If we had wanted to live in a town to raise our family, we would have done so,

It is of great concern to us that these developments will increase the population significantly and without due concern to the Green belt which was set up to prevent the spread of towns particularly around London,

As a regular visitor to friends in West Horsley, I write to object strongly to the proposals, particularly to the destruction of large areas of Green Belt despite all the undertakings and assurances that they will be preserved except in very special circumstances.

West Horsley has kept its character as an attractive country village thanks mainly to the Green Belt around and within it. The areas of past development are mostly well separated, so that there are hardly any areas more than a few hundred yards from original woodland, fields, meadows or parkland. The plans propose a huge increase of over 1/3 in the number of homes in West Horsley.

Particularly inappropriate is the proposal to build 135 houses on the Manor Farm site (referenced Policy A38), good agricultural land in the Green Belt. It would bind together two existing areas of housing, causing continuous development for over 1 km between the Ockham Road and Long Reach.

Building 225 houses on the Manor Farm (referenced Policy A38) and East Lane sites (referenced Policy A41) in the Green Belt would greatly increase traffic on the narrow East Lane towards Horsley Station and the shops in East Horsley (West Horsley has only one small shop). East Lane is already heavily used despite being a narrow lane with a one-way section in it; it is frequently flooded and it has been in a VERY bad state of repair for many years, as has The Drift beyond it leading on to Effingham and the east.

As well as the roads, the drainage, medical facilities and schools in the area are all struggling to meet the existing demands on them, yet it seems that no consideration is given to any of these essential things in the Plan.
I believe that the Plan has ignored the existing character of the Village and the availability of facilities of all kinds and I strongly object to the Proposals.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I Object to development of sites A36, A37, A38, A39, A40 & A41 in Horsley because:

- These sites are much too large in proportion to the size of East and West Horsley (additional 533 houses)
- These sites represent a disproportionately large amount of the borough's housing "needs"
- These sites are close to the proposed Wisley development and so together represent a vastly disproportionate development of the area.
- They would change the appearance of the green belt in and around Horsley which contradicts the councils aim of protecting the green belt
- The local roads and pavements are very narrow and increasing traffic both during and after construction would increase the risk of traffic accidents both involving cars and pedestrians many of whom are children.
- Considerable objection to these sites was made following the last draft plan by These objections should be considered and not just objections at this stage otherwise the Council could be accused of trying to "wear down" opinion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I'm writing to object to the local plan for West Horsley. The scale and density proposed is incredible and needs to be urgently amended. The country has just voted for brexit, to a large extent, to curb migration and population growth. It would be aweful to build over such beautiful land on the pretences of population forecasts set before Brexit. Without migration our natural birth rate will lead to a shrinking population. Once you build on the greenbelt like this you never get it back.

The density of housing proposed is significantly higher than existing housing. We need suitable family housing to support swathes of young people unable to buy family houses. Families dont want to live in shoeboxes. Prices can come down if supply and demand balance changes, that is how to make houses affordable rather than building small houses nobody wants.

The local school is already full. What is the plan for that? The station car park already full, what is the plan for that? The peak time trains for London are already full with people standing all the way to london, what is the plan for that? The a3 junction with the m25 is grid lock at morning and afternoon peak, what is the plan for that?
Objection to the Draft Guildford Local Plan for The Horsleys

I am writing to object to various components of the proposed Guildford Borough local plan with regards to the Horsleys as follows:

I oppose the removal of East and West Horsley from the Green Belt as well as oppose the insetting and extending the settlement area boundaries and associated building of several hundred new houses on field and woodland in this village in an area of outstanding natural beauty.

I oppose the extent of the developments proposed on the basis that the volumes of houses are well above the requirement to support population increases, nationally and in the surrounding area.

East and West Horsley do not have the infrastructure to support the current village population let alone several hundred additional homes in the villages. The situation is as follows:

- One small village shop serving all of West Horsley with residents having to travel (mostly by car) to East Horsley
- No post office following its closure in recent years
- No bank or cash machine
- No doctors surgery as such the overstretched East Horsley Medical Centre is utilised where appointments at short and long notice are hard to come by
- No secondary school as such the oversubscribed Howard of Effingham School is the preferred school for the villages. There is no suggestion of a reasonable alternative to the Howard should housing across Guildford and Mole Valley increase as the county and borough councils would like
- Not enough state primary school places. The Raleigh School is already oversubscribed on an annual basis with village children missing out each year.
- Limited bus service
- Limited volume of passengers able to travel from Horsley Station (car park is often full on weekdays as it is without the additional traffic from additional households and thousands of new homes at Wisley.
- Increased risk of flooding due to the development of fields and woodland

Village roads cannot support an increase in traffic from several hundred new homes and those at Wisley. There are already issues with speed and volume of traffic as well as the quality of the roads

564
I object to the proposed development in the Horsleys.

* Overcrowding of junior and secondary schools in the local areas and not enough teachers for the present ones.
* Doctors surgery not large enough and the doctors are already stretched with attending to patients.
* Not enough car parking spaces in the village.
* Sewage drains will be unable to cope with extra effluence.
* Station car park unable to cope with extra cars.

**RE: GUILDFORD BOROUGH COUNCIL - LOCAL PLAN: STRATEGY AND SITES.**

I write further to the publication of the above document and write to express my objection to elements of its contents.

My principle overarching objection is the proposal to take a number of Surrey villages out of the Green Belt, and East and West Horsley in particular. This proposal in particular will have "urbanisation" implications far beyond those envisaged by the mantra that more houses must be built in the Borough. Whilst I fully accept the need to provide additional housing in the Borough, I do not agree with the drastic actions of removing the Green Belt status in order to be able to provide large scale developments that would otherwise be subject to far greater planning scrutiny.

1. Your proposal to remove a number of classic Surrey villages that currently give the area its charm, beauty, character, history and overall appeal is outrageous.

   1. I object to your proposal to remove the Horsleys from the Green Belt. The Green Belt was established for a very defined purpose by statute. It was designed to prevent urban sprawl and to a large extent has succeeded in doing this. It is there for the benefit of not just our generation but those that succeed us. This area not only contains many areas of Outstanding Natural Beauty but also Sites of Special Scientific Interest. The Green Belt enables these areas to be protected in order that the Guildford/Leatherhead/Dorking area does not become a suburban sprawl such as Hersham/Weybridge/Walton on Thames.

   1. Large numbers of people visit the Surrey Hills area because of its stunning beauty, villages and leisure. These visitors in turn support many businesses both large and small whose livelihood depends upon the area retaining its rural charm. You simply have to remember that these people are your citizens, your ratepayers and your electorate and changing the nature of their environment will potentially destroy the uniqueness of their businesses.

   1. I object to the volume of housing, and associated density of construction, which is currently proposed in the Horsleys is completely out of keeping with their village status. The proposal to build 180 houses in East Horsley and 411 in West Horsley is completely disproportionate to the housing stock currently in existence. There has not been any detailed study undertaken proving the need for this level of housing in these locations, the size and style of the proposed houses or the impact on the surrounding infrastructure.
1. I object to the proposals as many of these sites do not reflect the level of infrastructure in place to support such a volume of housing, from schools to medical facilities, shops, bus services, train station parking and drainage. We have seen how many villages in the area have been blighted by the bolt on Council Estates of the post war years - dumped on village back land with no regard to the architectural merits of the development, the local amenities on offer or the employment of the proposed resident. Each site should be considered on its own individual merits under the existing planning regime which has been designed to protect the environment of our rural life and given its particular circumstances.

1. I object to the proposal to build 100 houses on site A39 in East Horsley as it is fundamentally flawed. The plan already recognises that the site is in a flood plain and notes that the flood risk needs to be reduced and that accordingly there is to be no greater flood risk to anywhere else. Surely by interfering with the flood plain in this location can only transfer the flood plain impact somewhere else? That may be downstream of the site or onto adjoining properties. If there is no interference with the flood plain at the site then it doesn't become viable for 100 houses. The existing proposal by Cateby Land to develop 100 affordable homes here simply does not sit comfortably with any sustainable, accessible or employment rationale. It is building the wrong types of houses in the wrong place.

1. I also do not believe that the Council has given sufficient regard to where all these new inhabitants are going to work. There is little or no employment in these villages, there is very little bus transport, the railways are currently cram med in rush hour with no room for extra capacity and the station car parks are not big enough to cater for more cars. And yet how are people meant to get to work in Guildford, Woking and London as the primary employment centres? The answer will be by car, whether this be by way of a short journey to the station (where they will end up parking on the streets) or a full journey into Guildford (which is already rammed in rush hour). I cannot see how this can sit comfortably with the Council’s Green agenda. The Council certainly will not be able to force the bus and train companies to extend their services as these are now privately owned businesses operating for profit.

1. I object to the Council’s failure to unlock the development potential of brownfield sites and the volume of currently unoccupied residential properties in the Borough should be given a greater priority in the search for developable land before ruining the environment, livelihood and well-being of a unique area of Britain.

Remember, there will be no opportunity to undo any development resulting from these proposals. You will not be able to wind back time.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Proposed Submission Local Plan - Site Policy A35 and Site Policies A36, A38, A39, A40 and A41.

I am writing to OBJECT to the Proposed Submission Local Plan in relation to the above Site Policies for the following reasons:

1. Traffic

I live in a house just off Ockham Road South, on the bend just to the south of the shops, so I am familiar with the current traffic which uses Ockham Road South and Ockham Road North (together “Ockham Road”).

Ockham Road is the route between the Wisley Roundabout and the A246, and as such takes traffic from the M25 and the A3 to the south towards Dorking, Horsham and areas to the south of Guildford, and vice versa. There is therefore a substantial number of HGVs using this road, which was never designed to carry heavy traffic. Along a substantial part of its length it is difficult if not impossible for an HGV or a bus to pass a car going in the opposite direction. Outside my house, the road is so narrow that there is no centre white line, and even cars have difficulty passing each other.

More recently, with a substantial increase in the number of cyclists in the Surrey Hills area, their presence on the narrow roads in the Horsleys contributes to the difficulty in maintaining safe and smooth traffic flows.

If the above policies are approved the traffic flow along Ockham Road will be very substantially increased. 493 new houses in the Horsleys and a further 2,000 houses in Site A35 (former Wisley Airfield) will all have to use Ockham Road for access, and would have a substantial effect on not only Ockham Road but also on the Wisley roundabout, which is already very busy. It is not unreasonable to assume that on completion of all of the above developments there would be at least 3,400 additional cars using Ockham Road.

The inclusion of these Sites in the proposed Local Plan is therefore contrary to Policy I3 (Sustainable Transport for New Developments) and Policy I1 (Infrastructure and Delivery), since there are no proposals which seek to address this problem.

2. Infrastructure

It is generally accepted that the local schools and the Horsley Medical Centre are functioning at the limit of their capacity, and cannot cope with further local development such as is now proposed in the draft Local Plan. It is also the case that the Horsley Station car park is fully utilised during weekdays, and cannot provide further parking facilities for commuters.

Whilst the Proposed Submission Local Plan does indeed envisage the provision of additional schools and a new surgery on Site Policy A35 (former Wisley Airfield), these will only become available if/when this site is fully developed. Consequently, there can be no guarantee that they will be available when the five Horsley sites (and other nearby sites) are developed - and this is likely to happen within a very much shorter time frame.
There do not appear to be any proposals which provide for additional parking facilities required in the neighbourhood of Horsley Station, nor any assurance or means whereby the provision of extra medical facilities or schooling can be secured so as to be available on completion of the proposed developments in the Horsleys. Whilst an obligation on developers to pay CIL would provide partial funding, action needs to be taken and money needs to be spent before development takes place.

In the absence of a fully thought-out proposal the inclusion of the above sites in the Proposed Submission Local Plan is premature, and is contrary to Policy I

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The notion that you can increase the number of households by 35% by way of the proposed developments is hard to comprehend particularly when there seems to have been little or no recognition in "The Guildford Plan" of the effect such a huge increase will undoubtedly have on the infrastructure and services.

I think that it is fair to say that the vast majority of people living in the County of Surrey accept that there is a need for more housing, particularly affordable housing but proposals on the scale set out in the Plan are way in excess of what is acceptable and sustainable.

In view of my observations set out above I strongly object to the proposals set out in the "The Guildford Plan" and urge the Council to have a serious rethink about the sizes/numbers of developments proposed and come up with a much more realistic Plan which will meet the aspirations of your electorate living in The Horsleys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp173/286  Respondent: 15455905 / Michael Stone  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - West Horsley North  
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Having expressed my concerns previously I am writing as a concerned parent of a West Horsley resident regarding the latest changes made to the Guildford Borough Proposed Submission Local Plan June 2017 consultation.

My overriding concern is that it would appear that no change is being proposed with regard to the idea of insetting West and East Horsley from the Green Belt thus risking the beautiful countryside of the two Parishes being swallowed up by the Metropolitan Sprawl. The reduction in the number of new homes being proposed for West Horsley is to be welcomed but there appears to be little evidence of a realistic reduction in the overall number of homes being proposed or indeed introducing a fair balance in the number of new homes in the Borough - at present it appears that the Eastern side of the Borough is being targeted with an unfair proportion of new homes compared with the Western side. There also appears to be no proposal to introduce commensurate infrastructure upgrades e.g. medical, educational and transport services to cope with the increased number of residents. The proposed Wisley Airfield redevelopment is a step too far.

It is also puzzling that like a lot of other Borough and District Councils in Surrey the number of new homes proposed in the Guildford Borough Plan well exceeds the numbers required by HM Government.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/4534  Respondent: 15456385 / Steven Colborne-Baber  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North  
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The housing numbers projected by the Council have not been substantiated by the Council, in spite of many requests, so the West Horsley Parish have carried out their own survey, that clearly suggests the figures to be wrong. The Green Belt must be retained as it stands today and each Planning Proposal should be judged on it's own merits. I voted Conservative when they came to office and they vowed to preserve the Green Belt, therefore I expect them to stand by that promise.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I am writing to object to the Local Plan. I live in West Horsley where the pressure on our locals schools, Doctors and other such amenities is huge. We do not have the infrastructure to support these plans. Please note my objection to this plan on these grounds.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Re My Objections to the new Guildford Local Plan are as follows;

-I do not believe the Council have demonstrated that ‘exceptional circumstances’ exist to justify ‘The Horsleys’ being removed from the Green Belt.

-I am not aware of any plans to materially improve the infrastructure re drainage, medical facilities etc to take account of the proposed increase in population.

-No sound reasons have been given for the proposed extension of the boundaries of the settlement areas of the Horsleys.

-The excessive number of new houses (593 new houses in the Horsleys within 5 Years of adopting the plan) proposed arising from a Strategic Housing Market Assessment(SHWA) that was generated by a consultant’s mathematical model, which is not revealed in the plan, nor apparently to Guildford Borough Council(GBC). I think this raises major doubts concerning the inflated number of new houses proposed by the SHWA and further increased by GBC.

I hope the Council will take my concerns into account during this consultation period.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
A39, A38, A40, A41

East Horsley, West Horsley:

I object to the over-development of East and West Horsley. These four proposed site selections will add approximately 445 housing units in what is presently green belt. This as over-development of these two neighbouring villages, with land being inset from the green belt for the sole purpose of meeting housing targets and a further urbanisation of the green belt between Leatherhead and Guildford. Site selections A39, A40, and A41 seem to have no logic, they do not follow easily identifiable boundaries and seems to be created for the sole purpose of artificially creating sites for development in the green belt. Sites 39 and 41 seem only to have development on one or two sides and are in open green belt and inappropriate for development.

I am writing to tell you of my objections to the plans for more houses to be built in East and West Horsley. Firstly the Prime minister and conservative government said, on more than one occasion, “No ifs, no buts, no infringement into the green belt.

Furthermore, the plans contain no provision for new schools or medical facilities, both these are already over crowded.

I ask you to stick to your word and refuse these plans. The prime ministers also said that the ideal was to build whole new towns, in new areas with the requisite facilities

Is it right that 30% of new homes are built in brownfield sites and 70% in Green Belt?

West Horsley is still a village but in great danger of becoming an urbanisation

The infrastructure is totally inadequate. I cannot park my car now at the station after 10am in the morning

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am so sad for the village of West Horsley where I lived and was brought up.

The high density proposals will be an enormous burden on the infrastructure and the plan does not appear to address the provision for schools, surgery, roads, parking etc etc etc. A real worry

The proposed housing developments in West Horsley would completely overwhelm the village. Drainage would be a major concern as it is inadequate at present.

Similarly road and school capacity, station and village car parking capacity, doctors surgery and shops capacity would all be overwhelmed.

The proposed developments would be as out of place here as they would be in Send, the Clandons and Ockham village.

Any Major developments would be better placed in the west of the borough – Normandy, Ash and Tongham, where there is much more open land

I would like to register my objection regarding the impact of Guildford Borough Council’s current Draft Local Plan and in particular object to its impact on West/East Horsley and its immediate environment and its disregard for the existing designation of Green Belt Protected Areas for which I believe no valid case has been made or exceptional circumstances proven.

I think the demand for housing is artificially fuelled by people living longer and by the high level of immigration into the country. You should be building retirement homes not housing estates and the effects form the second issue needs to be look up following the country’s decision to leave the European Union.
I also object to the proposed changes to the village settlement boundaries in particular where there is no proposal to build new houses, I can not imagine what reason could there be? It is obviously a hidden agenda to permit further building in these areas at a later date without having to obtain separate approval in the future.

I should also like to state that the extent and number of new houses proposed in the Horsley’s, area is totally out of proportion to any local requirement, there is no industry or business case for increased housing on this scale which I think is about 40% increase in West Horsley’ if new housing is required it would be better to site it close to where that need really is.

The vast number of new residents commuting in and out of the area would put a massive additional burden on the existing road networks and transport infrastructure that is already buckling under the weight of lack of investment or maintenance by Guildford County Council – Have you tried driving down ‘Long Reach’, ‘Ripley Lane’, ‘The Street’, ‘East lane’ in winter? When flooded and is waisting on the sides.

Where are do the new residents on the proposed of houses are taking the children to school? It would put an unsustainable strain on the local schools. When we moved to this area 12 years ago we struggle getting our son into the local Primary School and there are annual arguments over catchment areas between the local villages just to get children into the nearest Secondary Schools. The proposals do not address these problems adequately they would just make them worse and mean parents would have to drive their children to schools many miles away. What about hospital and Dr surgery?

The increase in housing will also strain the services infrastructure, local sewage and drainage requirements are overloaded as can be seen after a heavy downpour water floods over Ripley Lane and The Street between the Railway Bridge and Long Reach due to many natural springs in the area. Localised flooding will of course be compounded by the proposed new homes the plans take no account of this.

A couple of years ago heavy construction lorries were employed at Jury Farm for a couple of months in Ripley Lane and the Road was structurally damaged as a consequence and has still not been satisfactorily repaired. Building in the local area on the scale proposed will never be made good by the construction companies lining up to build on nice Green Field Sites.

I note that in the latest version of the local plan that the Station Parade in East Horsley has been designated a District Centre which is incorrectly identifying the village facilities in order to justify inappropriate development of the area.

I urge the Council to-

a) Think again on a local scale and consider what is actually needed by the people living in the borough.

b) Go back to Central Government and seriously question the whole premise of this notional housing requirement. Do we really need so many houses in such a small area? when it will only compound the pressure on local facilities and have a major negative impact on the local environment, adversely affecting the quality of life of all those currently living around Guildford

I am sure that there is plenty of room for new housing and properties that could be refurbished in other parts of the country, without the impact to sensitive environmental and designated Green Belt or conservation areas where effort should be put to regenerate both jobs and industry supported by investment in affordable housing.
I really hope you take us serious and try to find a solution.

OBJECTIONS TO GUILDFORD BOROUGH PROPOSED SUBMISSION LOCAL PLAN EAST & WEST HORSLEY (JUNE 2016)

I object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2016).

My main reasons are…

I object to the Local Plan as the following development proposed is not sustainable (Policy S1)

At least 148 more houses in East Horsley. At least 385 more houses in West Horsley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Outlined below are my objections to the Guildford Local Plan.

? West Horsley is defined by Guildford Council as a Green Belt Village.

? Policies in the Governments National Planning Framework (NPPF) require that new building is regarded as inappropriate in the Green Belt.

? These Policies also say that only limited infilling with Housing is appropriate.

? Neither of these policies support substantial new development in the green belt.

? The Councils Proposals total some 500 new dwellings in the green belt, which is clearly contrary to the above policies.
Previous objections to the Local Plan by West Horsley residents have been totally ignored by the council, who have shown no community engagement in producing the current plan with the increase in housing and the expansion of the village contrary to their wishes.

In producing the new Local Plan larger sites are proposed west of Guildford to reduce the pressure on the green belt. No benefit is evident to the residents of West Horsley from this reappraisal and in fact an increased requirement for housing in their green belt is proposed.

The existing roads, schools and health facilities have no plan for funding set out in the plan to address 500 new houses.

Several of the new sites proposed extend the built area out into the countryside, which is clearly damaging to the Green Belt where any new building is regarded as inappropriate in government policy.

The council are proposing new village boundaries which extend the built area outwards into the green belt, again clearly damaging to the Green Belt where any new building is regarded as inappropriate in government policy.

The proposed new development has been focussed on West Horsley with no Special Purpose being defined as required by policy to promote development in the green belt.

The protection of Birds in the special protection area near Wisley requires special consideration within 5 km. All of the sites in West Horsley and the site at Wisley Airfield are within this 5km. Any new development requires the possible effect on the birds to be addressed by the provision of alternative open space to draw residents away from Wisley. Effingham Common has been identified to serve this purpose but in order to be usable for this purpose it requires a public car park which it has not got. Common Rights and planning permission issues may well stop this ever coming forward. This puts in doubt the feasibility of the sites in the long term.

For all of the above reasons I object to the Local Plan and request that the minister addresses the green belt points and confirms that West Horsley remains a green belt village, recognises the uncertainty relating to the protection of the birds and that as a result removes the pink coloured sites as development sites from the plan.

I write to object to the Local Plan.

As a teacher, I have a full-time job and so do not have the time or resources to respond to such a dense document. Where is the simplified version that ordinary people can understand?

It is not right that the plan prioritises development in green belt land when there is sufficient brownfield sites elsewhere in the Borough. Most people coming to the Borough wish to be close to urban centres, not stuck in rural dormitories, requiring smaller 2 or 3 bed accommodation, far more suited to an urban environment.

Also, in Horsley, the schools are full. Where are new families going to be educated? I would also point out that in and around Horsley, there is simply not the infrastructure to support the proposals, such as schools, transport, drainage, shops etc.

The proposal for Wisley Airfield will simply create a housing ghetto.
All in all, a shoddy, badly thought-out document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing in response to the Guildford Borough Proposed Submission Local Plan: strategy and sites, June 2016. I object to the above plan.

I am a West Horsley resident, and have been my whole life. I am very concerned about the proposals. My parents moved here for the community life, and I fear that this lifestyle will be lost if the plans are approved, as the number of residences proposed will significantly change the character of West Horsley as a village.

The sites proposed in West Horsley are currently within established Green Belt. The policy on protection for the Green Belt is contained in section 9 of the National Planning Policy Framework, which sets out the fundamental aim of Green Belt policy. Policy on development in Metropolitan Green Belt is set out in paragraphs 79 – 92 of the NPPF. Inappropriate development is, by definition, harmful to Green Belt and the NPPF states that it 'should not be approved except in very special circumstances'. No 'special circumstances' have yet been explained or detailed.

Local planning authorities are advised to 'regard the construction of new buildings as inappropriate in Green Belt'. The Framework also states that a Green Belt review should only happen in 'exceptional circumstances'. This concept is further elaborated as being 'for example when planning for larger scale development such as new settlements or major urban extensions'. The Green Belt in Surrey is established with detailed boundaries; therefore 'exceptional circumstances' must be demonstrated to necessitate the change to its boundaries. Again, no 'exceptional circumstances' have yet been explained.

There are identified Brownfield sites in the borough which have not been seriously considered in the borough plan.

Policy P2 of the Guildford Plan states that Guildford Borough Council 'will continue to protect Metropolitan Green Belt against inappropriate development.' The expansion of West Horsley village is unsustainable for a few reasons.

The only entry to West Horsley from the A246 is The Street, which is narrow in places, and not in the best condition. The road surface would only get worse with increased traffic flow. It can be difficult to fit wider vehicles down certain parts of the road, and the necessity for more large vehicles to travel down it (increased bus services to serve more residents; more lorries carrying supplies to build houses) would not improve the situation.

Additionally, the roundabout connecting the A246 to The Street is very busy during school drop off and pick-up times, as Cranmore School is just off the roundabout. With increased volumes of traffic, the back up would only worsen, increasing journey times, not only for West Horsley residents, but for people trying to get from Guildford to Leatherhead and vice versa.

In West Horsley, there is only one small shop and no post office, and there is no where to expand the amenities to serve a larger population. East Horsley has many more shops which have always been well-used, but there are only limited parking spaces. Station Parade is populated by locally-owned and run businesses and these businesses could lose valuable custom if people cannot park close by.

Horsley railway station has always been a very busy station. The car park is usually full on week days. Unless it is expanded it will not support such a large increase in vehicles - at an exhibition about the proposed development of Wisley...
airfield, it was explained that there were no plans to expand it. There would also be increased traffic to & from the station to drop off & pick-up travellers including students going to schools in Guildford and Leatherhead.

The Medical Centre in East Horsley supports residents of both East and West Horsley, and it is currently at capacity - it cannot support the new patients that will move to the area should these plans go ahead. As well as extending the building (for which there is no space), more doctors would be required to care for residents.

In short, improving the village's infrastructure needs to be seriously considered before the building of more houses can be considered.

I support development - especially affordable and smaller houses, as I hope to one day be able to by a house of my own - but I do not support it at the cost of the community life I have been lucky enough to grow up in.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I strongly object to the Guildford Plan Proposals and Strategy site : June 2016

This small villages amenities only just copes with the residents it has. There are two small schools here , with very limited parking as it is . On rush hour morning traffic can tail back from Ripley Village High Street up to the Ockham motor way slip road.

The flooding would be of much greater risk too. As the proposals for three detached dwellings :R14/P/00012 on 27February 20014 Was refused. Such a High density development would put a big strain on local services and parking , Swamping our village changing its whole character

As a regular visitor to the Borough, I wish to submit my objections to the Local Plan.

My daughter and family live in the area, having moved to be nearer my son-in-law’s family who have lived there since the 40s. I have been visiting Horsley since the 90s and during this time the village has expanded immeasurably. The proposed development within the local plan would not change the Horsleys and the local villages for the better. I object to
the proposed housing development as it is not sustainable and will have an adverse effect on the surrounding communities, on East and West Horsley in particular. I object to the 35% increase in housing proposed in West Horsley: such a level of development would change the village forever and would simply not fit in with the character of the village and the current density of housing. Horsley simply cannot absorb this scale of development.

Traffic in the village has become a real issue in recent years and any significant developments in the area would be unacceptable and incur unsustainable pressure on roads and infrastructures. I have grandchildren in the village who can no longer ride their bikes on the roads for fear of a serious accident. The roads are simply not wide enough to accommodate the current traffic, and further congestion would be a disaster. I object to the local plan to build nearly 14,000 new homes in the borough as the additional traffic and congestion would be an accident waiting to happen, not to mention its adverse effect on air quality, which is already poor.

My experience of the local medical provision and schools indicates that little capacity is currently available and the proposed development would put increased pressure on already buckling health and education systems. With regards to education in particular, the local Raleigh School has waiting lists in every year group and as such could not accommodate additional children. The site has no room for expansion and yet plans for a new school are not indicated within the local plan.

I also strongly object to allowing development on green belt land. Green belt exists for reasons drawn up by UK law, including restricting urban sprawl, preserving the boundaries of neighbouring villages, safeguarding the countryside and preserving historic towns and villages like Horsley. Environmental issues are real and we must consider the long term impact of reckless building on precious green belt areas. All the development in Horsley will be on green belt land. How can this be a balanced plan?

Finally my understanding is that there needs to be an identified need for the level of housing, but a total of 14,000 houses planned over a 15 year timeframe during the period 2016-2031, is flawed and as yet not explained. The cited figure of a 35% increase in housing in West Horsley, much higher than in other areas, is not sustainable and must be revised.

As it currently stands, I object to the local plan for the reasons cited above.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/1951  Respondent: 15462433 / Lesley Keable  Agent: 

Document: Proposed Submission Local Plan: strategy and sites June 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to object to the proposed submission local plan: strategies and sites June 2016. As a long term resident of West Horsley I am concerned about the impact on this village.

I understand the National Planning and Policy requires that new development must make due allowance for the character and density of housing in the proposed area and be suitably supported by infrastructure and local facilities. The scale of the plans for West Horsley make it a wholly unsuitable site for the scale of the proposed development, being a 35% increase in the number of houses.

West Horsley is unsuitable as it is

- a village of character and history, which would be irretrievably damaged by very large scale development on the scale proposed
- it is set amidst Green Belt land, large areas of which would be lost or affected, with currently a low density of housing whereas the proposed development areas would be of much higher density.

- the local roads are often largely rural in nature - often narrow, poorly maintained and with no footpaths in many areas. They already struggle to cope with the current traffic let alone a very substantial increase.

- the other infrastructure I and my family use or have used is already running at capacity whether it be the primary and secondary schools both of which are beyond their capacity (the Howard having being refused recent planning permission to build a larger school opposite the current one) the doctors surgery, the sports clubs, the station and the shopping facilities where parking is a problem now etc.

I also object that the scale of the proposed new housing at a 35% increase on the existing village appears to be so out of line with the proposals for other areas. Why select West Horsley for such an increase particularly when it's village infrastructure is so ill equipped to support it and it is self evidently harmful to precious Green Belt land? What exceptional reasons can be advanced for the destruction of this high quality Green Belt land?

I am also aware of the reasons why nearly 14,000 new homes are required in the area, or how this number has been arrived at. Whilst accepting that nationally new homes need to be built and this area of Surrey needs to take its share the scale of the local plans is simply not sustainable, and in an age where government funding is scarce, probably the more so post Brexit, it is impossible to imagine the necessary supporting infrastructural funding will be found.

For all the above reasons, and the many more that will be advanced by more informed residents and local bodies more familiar with the national and local planning regulations, I oppose and reject the local plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I would like to please register my objections to the proposal to remove the Horsleys from the Green Belt for the following reasons:

- The 'exceptional circumstances' required before taking this decision have not been demonstrated.
- No sound reasons have been given for the proposed changes, in particular the local infrastructure is overloaded - for instance the local football club is full and hence children have to travel elsewhere to play football. Similarly, medical services and car parks are operating at capacity.
- The potential development of thousands of new houses on Wisley Airfield is simply baffling given the complete inability of the local resources and infrastructure to cope - for instance have you ever tried to park at Effingham Junction Station? How do our narrow roads cope - is the Council proposing to upgrade roads, stations and build new facilities to cope with more than doubling the number of houses?
- The Horsleys have already outgrown the facilities, so proposing large numbers of new houses ignores the ability of the Horsleys to absorb them, for the sake of developers profits - note that the Wisley Airfield developers are a Cayman Islands company, presumably to avoid paying UK tax!

I ask that you please conduct a much more rigorous assessment of the proposal, which I believe will confirm the points above.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I am writing to object to proposals contained in the Guildford Borough Council New Local Plan 2016. I am a resident of West Horsley and I am really concerned about the impact of the significant level of proposed new development on our community and on our quality of life.

I am particularly concerned about the likelihood of increased flooding in our village as a result of this proposed development. Our local road, The Street in West Horsley, has a major flooding problem and development in West Horsley to the south of the railway line will just add to this flooding problem. I therefore object to the housing development proposals due to the likely impact on flooding. Since we have lived in West Horsley we have seen no improvement in the Council’s ability to deal with this flooding problem so I am very concerned that it will simply get worse with more housing developed in the area.

My children both attend the local primary school, the Raleigh School in West Horsley. It is already clear to me that the school’s infrastructure can barely cope with the existing number of children. With around 400 pupils already at the school, by way of examples, the playground and playing fields are far too small and when there are class assemblies, there is often insufficient room for all parents who turn up to fit into the assembly hall to watch their children.

When dropping off my children in the morning and picking them up in the afternoon, it is often a real problem to park near the school. Cars of parents are often parked on the pavements in the narrow roads surrounding the school which forces parents and children to walk into the roads to get to school, this is very unsafe and is not satisfactory. I object to any further housing development in the Horsleys due to the increased pressure that this will add to the Raleigh School and the surrounding roads.

I further object to the proposed level of new Housing development in the Horsleys due to the added strain this will place on our community of sports and social clubs. Many of our local sports and social clubs are over-subscribed and there are waiting lists to get our children into these clubs. This already means that many local children miss out on sport and social activities that they so very much want to do. More housing will make this problem worse and force children to join clubs further afield which will damage our community.

The proposed level of new housing development in the Horsleys will require a substantial number of heavy goods vehicle movements during the construction phases, which will last for years. The condition of many of our roads including The Street, East Lane and Long Reach in West Horsley and Ockham Road North, Ockham Road South and The Drift in East Horsley are already dreadful in many places and this is both dangerous (cycles and cars swerving) and costly in the damage that it causes to our vehicles and cycles.

Significant HGV movements that will be needed to facilitate these developments will make this position far worse. Since we have lived in West Horsley (over 4 years) we have seen no improvement in the condition of our local roads, but in fact a clear deterioration. In addition to the damage to our roads that HGVs will cause, I am also very concerned about the safety of community, especially children, in living in close proximity to these very large vehicles. Our roads are simply not large enough to cope with these large trucks, existing cars, the many cycles and many of the pavements are very narrow which is especially dangerous for older people and children. I therefore object to the housing proposals in the Horsleys due to the damage to our roads and pavements that it will cause and the very real safety risk to our communities.

I also object to the increased levels of pollution and dust that will be caused by HGV movements and the construction process itself in delivering hundreds of new homes in the Horsleys. My daughter has allergies to dust and airborne pollutants and I am very concerned that this will become worse in our villages if significant development occurs. I do not want us to become prisoners in our own homes.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

The local plan has suggested a 35% increase in housing for West Horsley by 2022 and only 11% for Guildford town.

The village has no shops, no post office, no petrol station, no train station, no medical centre and a very limited bus service. It also offers no employment opportunities for residents. The national planning policy framework requires that new residential development must be limited in quantity by the availability of infrastructure and local facilities- this policy has been ignored in the Local plan.

The density of houses on the proposed sites is completely out of keeping with the rest of the village and will change the character of the village forever. The national Planning policy framework requires that new residential development must respect the character and density of housing in the area- this policy has been ignored in the local plan.

I am writing to voice my grave concern for the proposed housing developments taking place around The Horsley's. I am totally opposed to the village’s removal from the Green Belt by insetting and extending the 003 Local Plan Settlement Area boundaries. est Horsley Parish is one of a rich and varied mix of all established lb housing density settlements with a considerable number of historic buildings. Positioned on the north side of the North Downs, partly in the Surrey Hills AONB, it attracts a considerable number of recreational visitors through the seasons each year. This added to your proposed circa 3,000 additional houses ill ensure the Village infrastructure falls apart.

I live in London but come to visit my grandparents in West Horsley as often as I can when I am on holiday. It is a lovely village and so peaceful to come away from all the noise and traffic in Ealing where I live. I love to go walks with my cousins who also live in the village and see the horses in the fields. My Granddad and Grandma have told me that you want to build lots and lots of houses which will mean more cars and I think this will spoil the village which is really beautiful.

Where I live young people have plenty of things to do and there are tubes and buses which can take you where and when you want to go such as to friends, school, cinemas, shops clubs and other activities but West Horsley hardly any buses and none at weekend. Have you thought what all the extra children who would come to live in West Horsley would do unless their parents had cars and would be prepared to take them to places where they wanted to go to? Also where would they go to school since my grandparents have told me that the school in the village is already full and so is the senior school in the next village.

I love to visit and enjoy being in the country, but if I had to come to live in this village after you had built all those extra houses then I do not think I would be very happy since there would not be much for me to do.

I believe that the local plan for the Horsleys is a terrible idea. Not only will the roads not be able to cope, and the train station being too small with no room to expand, but this will be building on the green belt which the elected government promised to protect. There are plenty of brown sites available to build on and so this is simply unacceptable.

...
I wish to object to the number of new houses proposed in the new Local Plan. I think that integrating the huge number of new residents would be almost impossible as the local facilities such as the Medical Centre, Schools, and indeed the roads themselves, are already under great pressure. Some things like car parking at the Railway Station cannot be made bigger as there is no space available.

I also feel that any building that does take place should be infill building, and not seen from the roads through the village, as this would not alter the look of the village too dramatically.

I am also against your suggestion that we should be removed from the Green Belt as I believe this would in time lead to extensive building on our open fields and green areas.

I know that we must have some new homes built but not in the numbers you are suggesting.

As a resident of West Horsley I would like to register my objection to the new Guildford Plan.

I object to the proposal for the following reasons;

• I feel that tinkering with the green belt boundaries, to extend land available for building houses, is a travestying
misuse of power
• The Green Belt was agreed to protect the beautiful countryside and the unique character of villages such as East
and West Horsley and preserve it for future generations I object to this misuse of power.
• The local infrastructure is unable to cope with the proposed number of new residents; schools and primary
healthcare would all be affected by an increase in the population negatively impacting on the well-being of
residents.
• Current residents have difficulty securing places for their children in primary schools.
• The number of vehicles using local roads is currently pushing the boundaries of acceptability and increase would
quickly tip the balance creating danger for children, young people and other vehicles.
• The kind of machinery needed for extensive building increases the dangers, in particular Tipper Trucks
employed to remove earth are often driven very dangerously and at great speed.
• The roads are already in need of repair; damage caused by the increased volume of building related traffic would
be devastating.

I believe the New Guildford Plan lacks probity and does not concede any ground to the residents concerns registered in
past consultations.

I am writing to STRONGLY OBJECT to the proposed changes to Green Belt area.

I am particularly concerned with the over development proposed for the Horsleys, Send, Ripley and the proposals for the
Wisley Airfeld.

Such overdevelopment will change the character of the area beyond all recognition. The proposed removal of the
Horsleys from the Green belt would leave the area to the mercy of developers.
The green belt is essential to maintain an area where agriculture, forestry and outdoor leisure pursuits can flourish. This is exactly what has happened here and with the ever increasing outward pressure from London, it is even more important that the countryside is preserved for all to enjoy.

Brownfield sites in the surrounding towns should be developed before open countryside is decimated.

The ensuing increase in traffic along wholly unsuitable narrow lanes will lead to a increased likelihood of accidents with the many cyclists enjoying this area.

Huge demand will be placed on local services which are already stretched.

It will turn this part of Surrey into another anonymous urban sprawl.

With greater creativity and thought, I am sure a balance can be achieved between the needs for housing and preserving the countryside for future generations.

I strongly object to our villages being taken out of the Green Belt. This is an area of outstanding beauty for all to enjoy including those who live in towns.

The infrastructure is not there for increased use of poorly maintained roads. Overfull schools, shortage of car parks.

The drainage is poor with flooding in many places when it rains heavily.

I do wonder whether people from planning actually come and look at the area in question.

Objections to Guildford Borough Council Proposed Local Plan (June 2016).

We wish to register our objection to the draft Local Plan. More specifically, we wish to object to the removal of East and West Horsley from the Greenbelt and to the proposed developments in these villages and the surrounding areas for reasons outlined further below.

The Local Plan fails to take due consideration of the detrimental impact such extensive development will have on transport, local roads and road safety. The proposals will have a
materially negative impact on the quality of life for existing residents. We specifically object to:

(i) Traffic and parking: Assuming that every new house has at least 2 cars, this means potentially 6,000 more cars within a three mile radius of East and West Horsley. For example, parking at Horsley & Effingham junction stations (which are already full), at the shops, at the medical centre and at the village halls will all be affected.

(ii) The significant increase in traffic will cause severe congestion on the local narrow rural roads (which are already busy). This will be exacerbated by wide vehicles including increased bus and HGV movements.

(iii) The increased traffic will pose a danger to local cyclists and pedestrians given that there is an absence of cycling paths and lack of pedestrian footpaths (and no space to provide them).

(iv) The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

(v) The large increase in volume of traffic will cause an increase in nitrogen dioxide and particulates in the environment - already a cause for concern in several areas in the Borough.

(vi) Local Road Network: In respect of the proposals for development at Wisley Airfield and for an upgrade the current A3 junction at Burntcommon to a full 4-way junction, SCC traffic modelling anticipates increased use of Guileshall Lane, Hungry Hill Lane and Tithebarns Lane for traffic accessing the A3 at Burntcommon in order to travel to Guildford and beyond. The SCC report states that "consequently, it indicates that further thought may have to be given to managing traffic in this area as part of a transport assessment should the development be progressed". It appears that the Plan is proposing a strategic site at Wisley Airfield without having given due consideration to the improvements which will be needed to the local road infrastructure. If that is the case for Wisley Airfield, then it is almost certainly true for the proposed developments in East and West Horsley as well.

We object on the grounds that local primary and secondary schools are already at capacity with no immediate plans for expansion. No extra places are planned in the Horsleys, and the school places proposed at Wisley Airfield are not planned until many years into the project.

We object on the grounds that the East Horsley Medical Practice is already operating at (or close to) capacity and there are no provisions in the plan for addressing this.

Flooding: The site behind Ockham Road North in East Horsley is partially a level 3 flood risk area, and local residents are well aware of how much standing water there is in their gardens after rain. Building on such land will only exacerbate the problem. Furthermore, the existing drainage system cannot cope, evidenced by the river which materialises on Ockham Road North following heavy rain.

We object to the removal of East and West Horsley from the Greenbelt. Taken together with other sites such as the former Wisley Airfield (also known as Three Farm Meadows), Greenbelt status serves a vital role in protecting against urban sprawl from London. Under the National Planning Policy Framework, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

We object to the disproportionate allocation of housing in this particular part of the borough. More than 23% of the Plan's new housing is proposed for the immediate localities of Ockham, Ripley, Send and the Horsleys.

We object to the fact that insufficient consideration has been given to the environmental and ecological value of the former Wisley Airfield site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI). Serious concerns about this site have been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

We object to the continued inclusion of the former Wisley Airfield/Three Farm Meadows site - where the planning application has already been unanimously rejected by GBC's
Planning Committee. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's planning application was unanimously rejected by GBC on 6th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. We would also note that the projections for economic and population growth were formed before the "Brexit" referendum result was known. Given the potential impact the result is expected to have on the economy and population growth (including migration), we object to developments which fundamentally alter the nature of the local area while relying on outdated projections which possibly now need to be significantly revised downwards.

To whom it may concern,

As a resident of West Horsley I would like to strongly object to the proposed plan to build additional houses on the green belt in and around Horley.

The character of the village would be total changed and we have too few green areas near London as it is and no more should be lost to housing when there are other options available.

Kind regards,

I often stay with my sister Anne at the above address and have done so for the last 30 years. It is a true pleasure to roam around this lovely area of Surrey. So green and verdant. A true gem.

I was upset to hear of the proposed building by Guildford Borough Council to build so many houses in the Horsley area. Over 2000 on Ripley Airfield and over 500 in the Horsley area.

I find the situation appalling to even consider. My reasons are:-

The local roads will not be able to sustain another 4000 cars

The trains to London will have to board another 1400 people
Where are 1400 people going to park their cars?

There is no local Bus service

The local schools will not be able to take another 2000 children

I am told by locals that the local Medical Centre are full to capacity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I Object to your local plan as currently proposed for the Horsleys

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I have read your proposed local plan and particularly the suggestions with regard to East and West Horsley – including Wisley airfield.

I fully understand the need for a steady increase in new housing to meet the demands of a growing population. But your plan seems far too aggressive in its proposal to increase the size of settlement areas such as East Horsley and to effectively take the village out of the green belt. Based on previously declined proposals for Wisley airfield I fail to see how you could find a workable proposal to put a new town on this site without the essential amenities – it would become a strange ghetto.

The Horsleys should contribute to meeting the need for increased housing in the borough. But this should be done in a way that is sensitive to the current environment and without any need to remove green belt ‘status’.

I Object to your local plan as currently proposed for the Horsleys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I would like to object to the housing plan for the Horsley’s
For taking Horsley out of the greenbelt, lack of planned infrastructure and doubt over the proposed housing numbers

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2348  Respondent: 15485729 / Rica Jepsen  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

I wish to object to the above proposed Local Plan which affects the Horsleys.

My reasons for objection are as follows:

1. Both West Horsley and East Horsley villages will be removed from the Green Belt and there is legal no justification for this approach to be adopted.
2. The proposed new homes to be built within a very short space of time will increase the burden on the existing infrastructure including inadequate roads, car parking, local schools and medical facilities. In addition, there is also inadequate drainage to deal with wastewater and surface water and many places suffer flooding when there is heavy rainfall.
3. The density of the proposed development appears to concentrate on three major development sites in West Horsley which will completely destroy the rural village effect of West Horsley. I have lived in West Horsley since 1979 and I have specifically chosen to stay in West Horsley where there are open fields retaining the rural feel of the village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2367  Respondent: 15486817 / O.J. Howe  Agent:

I am 29 years old and have lived in Horsely most of my life and I write to object to the above proposed new local plan and what you propose to do with taking land out of the green belt to create additional housing in West Horsely of up to 385 homes.

This is totally unfair for everyone that lives in the village- what right do you have to propose a plan that does not account for the views of the local residents?

These proposals will have massive detrimental effect on our homes and our lives. All the initial consultation on the strategy and the various objections appear to have been ignored.
West Horsley as a village does not have the facilities for the population to be increased by this amount. The school is oversubscribed and so is the medical centre.

I therefore strongly object to this proposal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am a resident in West Horsley and I wish to inform you of my very strong objection to this village and surrounding areas being taken out of the Green Belt. The plans for development will destroy everything that makes the Horsleys a wonderful place to live. I moved to the area last year purely on the basis of the setting of the village, the community, the relatively small population and of course the beautiful countryside.

I previously lived within the M25 with its large estates, pollution, high levels of traffic and crime. I certainly do not want Horsley to go the same way, which would be inevitable if removed from the green belt.

The village is already struggling to provide for its current residents i.e. parking at the doctors surgery is always very difficult, schools over-subscribed and some of the roads are in a dangerous state (East Lane being a prime example)

I STRONGLY OBJECT to Horsley being removed from the Green Belt and to the proposed planning developments.

Please do not destroy one of only a few areas of outstanding beauty. I fully appreciate the need for more housing and for it to be affordable housing, but I think it more appropriate to expand already existing urban areas rather than destroy country villages

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2392  Respondent: 15495265 / Stephen McGuckin  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I object to the inclusion of Sites A36 to A41 (East and West Horsley)

The Spatial Vision proposes… ‘To protect the existing character of the borough through the clear distinction between urban and rural areas and safeguarding the natural, built and historic environment.’ Furthermore, the Spatial Vision promises that the…. ‘Preferred location for this development is existing brownfield sites’

Please explain how the proposed development of 533 new homes in these small villages will maintain a clear distinction between the urban and rural, will safeguard the natural, built and historic environment and utilises existing brownfield sites.

Of course when the development of 2000 new homes at Wisley Airfield only two miles away is included then Guildford Borough Council will have created a new urban area which will have destroyed the character of the existing villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I would like to take this opportunity to express my views of your proposed developments in the village in which I live (West Horsley) and it's surrounding areas.

I, like many other villagers moved here (30 years ago) deliberately because of the green belt and the village settings. Over the years I have seen modernisations and developments of the area but I feel extremely strongly about this latest proposed plan due to its size - East & West Horsley and the other villages detailed in your scheme would become more like towns than villages without adequate infra structure in place nor the ability to extend or develop the necessary infra structure to meet the proposed requirements. The effect on the roads -lots of them currently in poor condition with pot holes therefore the impact of heavy machinery to construct the developments alone would be extremely detrimental to the roads, then combine this with the extra traffic long term due to volume of people, would create chaos especially in current bottle necks, created by previous expansion, at peak times especially. The roads around the villages are narrow and many of them built up on either side yet some of the developments in the proposed plan intend to increase traffic on these, turning them into main throughfares as opposed to the country lanes to gain access only to the houses they were constructed for and in some instances with a knock on effect on roads adopted by the residents; totally unacceptable!. The safety of drivers, pedestrians and cyclist will be put at risk due to the proposed volume of vehicles- some roads have no pavements, the bends in the roads make it hazardous as it is for drivers and cyclist alike (whose numbers have hugely increased, more so recently, if these developments go ahead it will be an accident waiting to happen. Rarely a day goes by now without hearing one of the emergency services dashing along the A246 this has only come about in recent years due to the increases of population. Some of the sites chosen for development are on busy bends and even of the approaches are not directly on these roads they will clog up the narrow village roads leading up to them!

The schools are already enlarging their buildings to accommodated expected increases in current numbers and their sites are restricted to how much if any further development would be possible. The village school has been sold for housing in the past so even this will not be an option for taking some year groups of pupils. The entrances to both the Raleigh and The Howard of Effingham are in a built up area that currently struggles to cope with the increased volume!

As for the knock on effect on the other amenities/services such as the Doctors surgeries, shops, library, car parking to enable use of the amenities, railway travel and utilities it will be put a tremendous strain on already overburdened services.

I would therefore request that the proposed plans for the villages are carefully reconsidered for the above mentioned reasons and would ask that the nature of our chosen villages are not allowed to be destroyed/changed for ever.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

In response to the new local plan 2016 for the Horsley development sites, I would like to strongly object for the following reasons.

1. **The greenbelt**: Removing green spaces and removing this area from the green belt is a *permanent, irreversible* action that will impact us and many generations in the future. This will destroy the beauty, and be a real tragedy for the
environment, particularly considering there are many brownfield sites in the country that one could use for development. An entire new infrastructure will need to be created to cope with the massive increase in homes - this could therefore happen elsewhere, where no natural beauty will be needlessly destroyed.

I do understand that there is a need for housing, but cannot fathom why it needs to be here. Particularly considering my next point:

2. Infrastructure: The Horsleys cannot realistically cope with the proposed increased population: the narrow roads, limited parking, sewage systems, drainage, the already full train station parking lot, to name just a few. Where would an additional (minimum of) 533 cars go?

3. Schooling: A significant personal objections is that I live within 2 miles of the local school and my child cannot get in, due to it's increasing over subscription. By no stretch of the imagination will Horsley be able to school any more children. This is a great pity as it stands already. Why would we want to make this any worse??

4. This is a peaceful village: with a wonderful sense of community, a treasure so uncommon in today's world. People move and stay here to enjoy and appreciate the quieter village lifestyle. The development of chain stores and other facilities would ruin it for the existing and proposed homes.

I hope that you will kindly consider these points.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing with respect to the GBC draft Local plan which I strongly oppose.

I strongly disagree with building on Green belt land.

In no way would the current infrastructure support the number of houses proposed in East and West Horsley. Horsley station is already congested. The medical centre is barely sufficient for the number of people already living here. The Raleigh school is bursting at it's seems. The roads could not cope with such a traffic increase.

I appreciate the need for housing however, I think it is important that we protect the green belt for generations to come. I love London but I chose to move out to the Horsleys to give my children green open spaces and the chance to be brought up within a small rural community.

I sincerely hope that you take account of this letter, and of the many other people who I know are unhappy with your local plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/4337  Respondent: 15498273 / Naomi Salmon  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North
Please find below my objections to the Guildford Local Plan.

West Horsley is defined by Guildford Council as a Green Belt Village.

Policies in the Governments National Planning Framework (NPPF) require that new building is regarded as inappropriate in the Green Belt.

These Policies also say that only limited infilling with Housing is appropriate.

Neither of these policies support substantial new development in the green belt.

The Councils Proposals total some 500 new dwellings in the green belt, which is clearly contrary to the above policies.

Previous objections to the Local Plan by West Horsley residents have been totally ignored by the council, who have shown no community engagement in producing the current plan with the increase in housing and the expansion of the village contrary to their wishes.

In producing the new Local Plan larger sites are proposed west of Guildford to reduce the pressure on the green belt. No benefit is evident to the residents of West Horsley from this reappraisal and in fact an increased requirement for housing in their green belt is proposed.

The existing roads, schools and health facilities have no plan for funding set out in the plan to address 500 new houses.

Several of the new sites proposed extend the built area out into the countryside, which is clearly damaging to the Green Belt where any new building is regarded as inappropriate in government policy.

The council are proposing new village boundaries which extend the built area outwards into the green belt, again clearly damaging to the Green Belt where any new building is regarded as inappropriate in government policy.

The proposed new development has been focussed on West Horsley with no Special Purpose being defined as required by policy to promote development in the green belt.

The protection of Birds in the special protection area near Wisley requires special consideration within 5 km. All of the sites in West Horsley and the site at Wisley Airfield are within this 5km. Any new development requires the possible effect on the birds to be addressed by the provision of alternative open space to draw residents away from Wisley. Effingham Common has been identified to serve this propose but in order to be usable for this purpose it requires a public car park which it has not got. Common Rights and planning permission issues may well stop this ever coming forward. This puts in doubt the feasibility of the sites in the long term.

For all of the above reasons I object to the Local Plan and request that the minister addresses the green belt points and confirms that West Horsley remains a green belt village, recognises the uncertainty relating to the protection of the birds and that as a result removes the pink coloured sites as development sites from the plan.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**
I OBJECT to the disproportionate amount of development in this small area of the borough; The area surrounding East and West Horsley will attract in excess of 5000 new homes, which accounts for over thirty-six percent of development. The area is predominantly rural in structure, nature and environment and does not have the infrastructure to cope.

I OBJECT to the disproportionate increase in housing in West Horsley. The local plan proposes an increase of thirty-five percent for a rural village, this is totally out of character. The density suggested by the council is not in keeping with the current environment, almost double the levels within the majority of the village.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to object to the proposed local plan for the Horsley villages. I live in East Horsley and object on the following points:

1. **Removal of the Horsleys from the Green Belt** – The Green Belt was put in place to stop towns and villages running into huge unbroken settlements. I feel it is wrong for our council to over-turn a national environmental protection scheme to meet inflated housing quotas. The removal of the Horsleys is an arbitrary decision with no logical basis and is a needless destruction of a historic village. The national plan states that Green Belt land may be removed in ‘exceptional circumstances’ No exceptional circumstances have been presented within the plan to justify this act. Building on Greenfield sites in the UK is significantly cheaper than developing Brownfield sites and the decision to build large tracts of houses rather than infilling or developing these smaller sites is purely economic. Developing smaller sites is good for the local economy, supporting local developers and generating sustainable jobs in the local area. Large developments will import labour and export profits.

2. **Significant changes to the character of the village** - The plan aims to build 593 new houses within the Horsleys and a further 2000 between the Horsleys and the A3 at Wisley Airfield. The national plan definition for Green Belt infill states that gaps in housing within villages can be in-filled and villages can be expanded so as not to alter their character. I have no objection to this sensible approach to development within the village and recent developments including the development near the Horsley railway station have been in keeping and at a scale which does not alter the village character. The proposed plan would irreversibly alter the character of the village, increasing the number of houses and population by over 50%, turning what is a busy and thriving village into a gridlocked satellite town with insufficient amenities and infrastructure.

3. **Infrastructure concerns** – Despite living in East Horsley only a short distance from the Raleigh school, my oldest son was ineligible for a place in reception, as the school was filled from a catchment less than a mile from the school. If we have an additional 600 houses, or roughly 600-1200 children, the pressure on places will be even more extreme.

Ockham Road south, the major thoroughfare of East Horsley is already overloaded and leads to significant queues at rush hour to get through the village and onto the A246. This leads to people taking huge risks to get onto the 246, as they are so fed up they pull out just in front of oncoming traffic. It is a major accident waiting to happen. Also, the road is so narrow that when a bus and a lorry meet on this road, it all comes to a grinding halt which results in significant congestion and pollution in the village. The plan aims to build an additional 3000 homes within a 3 mile radius of the Horsley’s and the current road system is just not able to cope with this additional load. There is no indication of how construction would occur (how many additional lorries)!

---
Horsley station car parks are already full and cannot deal with increased numbers. Trains to Waterloo are full and adding an additional station and houses will just add to this issue. There is not sufficient capacity on the Guildford-Surbiton-Waterloo rail network to cope with the additional housing. It only takes one late train on a weekday morning to cause chaos on this route leading to dangerous overcrowding of trains and platforms. I do not see this addressed in the plan at all and therefore it lacks understanding of basic infrastructure needs.

Adding slip roads to the A3 will further increase congestion. The junction with the M25 is a dangerous intersection and adding a slip road in this area will cause additional accidents with traffic filtering onto congested inner lanes with

1. **Major doubts concerning housing numbers** - The inflated number of new houses proposed arises from a SHMA that has not been shared as part of the local plan. This SHMA target housing number if further increased by GBC to give a population increase which is almost 70% higher than official national estimates for population growth in the borough. There is simply no need for the number of houses projected.

1. **Flooding** - During the heavy winter rains we have experienced over the past couple of years the Horsley area has suffered with terrible flooding, which particularly affect the main roads though the village which all flood. With additional building and additional cars, this issue and the congestion it causes will get much worse. Storm water management in the area is at capacity and I have personally witnessed backup of sewer systems and the forcing off of drain covers due to the lack of capacity for rain events. This causes polluted discharge into the local rivers from the sewer system leading to long term environmental damage. The increased housing will further reduce the permeable surface, even considering modern paving and surfacing technology. Much of this excess peak flow will end up in local streams and rivers and significantly increases the risk of flash floods, maybe not in our borough, but certainly in those downstream.

1. **Designation of East Horsley as a ‘District Centre’** - I understand that a district centre can be described as 'a LARGE group of shops, together with supporting non-retail facilities and services. They normally feature not less than 50 units'. We are a village with a handful of shops and therefore should not be classed as a district centre. The parking in the village for shopping consists of a single row of spaces in front of the shops and an area for around 4 cars to the side of the Budgens store. This area is already congested and increasing demand by 50% would cause gridlock in the village.

1. **Plan omissions** - Within the local plan I would expect to see a vision for sustainable growth which includes the infrastructure required to support the proposal and the impact on peoples health and the environment. The current plan is about meeting housing quotas which are at the top end of forecasts, with no thought for the impact of the proposal on the environment or on the people living in these areas. There is no clear plan on how capacity for water, waste water, and electricity will be met and the impacts to storm water management within the borough and the incidental impacts to other boroughs such as Elmbridge and Mole Valley through increased instantaneous river volumes. I would like to see average traffic volumes and speeds forecast in the plan and the resulting impact to air quality and life expectancy for local residents especially those suffering from COPD and asthma. The implementation of this plan will lead to higher incidence of environmentally triggered respiratory disease and will decrease the overall appeal of living in the Guildford area. If you envisage the future with this plan implemented in the Horsleys you will see a grid-locked, polluted suburb where there was once a very pleasant community.

Horsley and the surrounding areas are quiet rural villages and we are FULL. The roads in Horsley are constantly being repaired due to all the pot holes caused by too much traffic.

The Medical Centre is full, the schools are full and the trains are full during rush hour. There will be insufficient parking space and our Bus service is inadequate.

Objection to Horsleys Draft Local Plan and removal of Horsleys from the Green Belt

I object to the proposed development of the Horsleys for the following reasons;

- The road and rail infrastructure would not cope with an increase traffic. The local roads are already water logged and full of pot holes and are not developed enough for any more traffic. The access to the A3, should the Wisley proposal go ahead, would be impossible at peak times of the day.
- The infrastructure within the Horsleys is not capable of withstanding a huge increase to it’s current population. Namely, the doctor’s surgery and car parks within the village would be over subscribed. Although, my family does not use the local school, I would imagine this to be full to capacity too.
- There is no reason to remove the Horsleys from Green Belt status. No exceptional circumstances have been given and as such, the Horsleys should remain Green Belt.
- The proposed percentage increase to such a small village, appears excessive and alarming and would affect the core of the village life itself. I have lived in the village for almost seven years and my above concerns are because of the personal and local knowledge, built up over this time.

I hope you take my concerns into consideration.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

It is fundamental that there are no grounds for East and West Horsley to be taken out of the Green Belt. I object to the extension of the settlement boundaries by the redrawn insetting boundary. These can only be to try and make more land available for what has been shown to be inappropriate development and included in an enormous document so that they will probably be missed by residents. I particularly object to the inclusion of Kingston Meadows, land owned by GBC and previously dedicated as open space for the use and benefit of the community. No change to the settlement boundary has been justified. I object to the inclusion in the Plan of six large housing sites in the two villages (A36 - 41). They should be removed from the Plan as they are contrary to the Green Belt and to include them preempts proper decision making.
In addition I draw your attention to the very serious existing problems in the village with infrastructure - roads, flooding and drainage, sewage, etc - and facilities - schools, doctors, failing businesses, no useful buses, to mention just a few. For these reasons a large increase in housing is not feasible. It would also destroy the character of the village. For all the reasons given above, I am against any additions to housing in East and West Horsley.

I object to the revised Settlement Hierarchy with another meaningless tick box exercise. East Horsley is not a rural district centre within any ordinary meaning of the phrase. People do not come from outlying area to East Horsley for shopping or work, they go to Guildford, Dorking, Leatherhead or other urban areas, including Surbiton, Kingston and London. East Horsley is not suitable for town centre type developments and I object to these policies (E8).

I am writing to object in the strongest possible terms to your proposal to increase the number of houses in the villages of West and East Horsley by about 500.

My reasons for objecting are firstly the local infrastructure is already severely overloaded and more importantly there is no land other than Green Belt available.

Should this plan go ahead the pleasant village life experienced in these two villages will be carelessly wasted all for what will at be at best a brief respite from further creaping urbanisation.

For the above reasons I urge you to reconsider your Local Plan proposals and resubmit them to better reflect the wishes of your local constituents.

I object to the extension of the boundaries of the settlement areas of the Horsleys - no sound reasons have been given for this proposal.

I strongly object to the proposal to develop Green Belt land for housing, particularly sites A37, A38, A39, A40 and A41. All of which play an important part in the character of the Horsleys, in terms of the green and leafy environment. The requirement for this many new houses in the Horsleys has not been demonstrated.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I have grown up in Horsley and strongly object to the new plans for increasing the number of housing to the area and removing us from the green belt. The green belt was put in place to protect rural areas from development so I find it bizarre that such intensive urbanisation is being purposed in an area that has previously been categorised as an region worth conserving. The roads are already overcrowded and, at peak times, fail to cope with the volume of traffic and size of larger veichals. This issue will be magnified if these plans go through. Doctors surgeries and schools are already struggling with numbers.

Moreover, many people from the city move out to places, such as horlsey, to escape from busy city life and enjoy the picturesque surroundings found in the Green belt. Not only is it a stunning location for city workers to set up a family life, but Surrey's countryside is often used as day trips for Londoners. Small villages such as Shere, which recieve many tourists due to its classic English village feel, will no longer posses they're traditional charm but be transformed into heavily developed and overcrowded centres; no longer appealing to tourists. We don't want london to end up like cities in America, such as LA, which expanse over huge areas with no clear Center and boundaries.

I don't want to see this beautiful area be ruined so strongly object to these new plans.

I am writing to you to express my views and concerns regarding your plans for building development in East and West Horsley.

Having been born and living in West Horsley for 48 years, I have noticed many changes over the years in regards to a lack of smaller housing and infrastructure.

Though I believe there is a need for housing, I also believe your quantities of houses and time scales are far to brutal (ie: an increase of 35% I believe) for the current infrastructure ie: Shops, Roads, schools, doctors appointments, parking etc.

I think a more prudent approach to new houses and building timescales will allow problematic local issues to arise in a more controllably fashion, and therefore will be resolved more easily.

Which in turn will be less traumatic for current residents and future one

<td></td>
</tr>
<tr>
<td></td>
<td>I am writing to raise objections to the proposals set out in the above document. In particular, the proposals for sites A41 and A38 in the 'Sites' section of the Plan, appear to be at odds with Policy P2 (p42) and with the Council's obligations to retain local distinctiveness and to conserve and enhance the natural environment (as set out in the National Planning Policy Framework NPPF).</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Site A41 is an area of sheep-grazed pasture adjoining an area of ancient semi-natural woodland to the east and south.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>The area is very clearly an integral part of the green belt landscape of sheep and cattle grazed pasture, with blocks of deciduous woodland, which forms a coherent landscape that stretches to the North Downs AONB. Policy P2 (p42) of the Plan allows for limited infilling, but the proposals for site A41 aren't infilling anything other than the landscape of woodland and pasture.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>In addition, the ancient semi-natural woodland which adjoins A41 is listed on Natural England's priority habitat inventory, which shows the locations of habitats of principal importance (which can be viewed here: Magic Map Application.) The site is already in poor condition due to illegal construction of cycle tracks and jumps, which is denuding the characteristic flora of ancient woodland. All public bodies have a duty to conserve habitats of principal importance under the Natural Environment and Rural Communities Act. The Plan does not articulate how the Council intends to discharge this duty. In fact the Plan does not even register the nature conservation interest of the site.</td>
<td></td>
</tr>
</tbody>
</table>
Site A41 suffers from similar issues. Whilst an argument could be constructed that the southern part of the site might constitute limited in-filling, the northern part of the site clearly extends the village boundaries and intrudes once more into the blocks of woodland and pasture that make up the characteristic green belt landscape.

As the largest proposed development in the West Horsley area (135 homes), the site seems completely out of proportion to the surrounding village. Longreach is a tiny lane, and the area has a rural character. Construction of 125 house would appear to be at odds with Policy D1 as set out in the plan. D1 states that all new developments will:

1. be designed to facilitate and promote walking, providing a high quality environment for pedestrians, and where possible allowing short walking distances to amenities
2. promote and reinforce local distinctiveness to create a sense of place, with innovative architecture encouraged and supported in the appropriate context

Site A41 will simply create more journeys. It is too far to walk to the shops or to the station. In addition, the area is locally distinctive because it is rural. 125 house will change the character - the site will lose its distinctiveness.

I am writing to express strong disapproval of the plans to remove West and East Horsley villages from the Green Belt and to build 485 new homes here.

We moved to West Horsley 6 years ago, as we were looking for a semi-rural location in which to bring up our young family, with all the benefits of low traffic, outdoor amenities and countryside, a small village school and a village community feel. The Horsley's are characterised by varied housing and buildings of historic value, with small green pockets of land in between, including ancient woodland and pastures. Green spaces are never far away. Under the current proposals, this would be irretrievably lost.

In addition, I do not believe that the infrastructure - the roads, drainage, schools, shops, parking, GPs, existing amenity areas - could cope with a 35% increase in housing over 5 years. The huge increase in the numbers of cars would destroy the quiet feel of the village and make travelling around and through the village very difficult and time consuming.

I accept the need for some more housing locally, but this needs to be in keeping with its Green Belt location and the size and character of the village.

I am writing with concerns regarding proposals for the Horlsey Villages. These are some points I would like to make.
• Why have GREENBELT in the first place when you just take it away without making ‘the exceptional circumstances’ for doing so more clearer and you do what you want anyway?
• Why is West Horsley to increase 35% more - making it larger than any other single area in the Borough to be expanded?
• The Proposals will eradicate the two villages beyond recognition and this will be gone forever!
• What effect will all these proposed housing have on the roads – lets face it you do not keep the current ones in good repair – we can count on around two further cars per households so our villages will not be villages anymore.
• The effect on our GP surgery will be immense.
• 2,000 houses being built in Ockham will have a significant impact in The Horsleys in itself.
• Why is the SHMA target for housing been increased by Guildford Borough Council?
• Parking for the station will be overloaded.
• Why blur the boundaries of the two villages?
• THE VILLAGES WILL BE GONE FOREVER DESTROYING THE CHARACTER OF THE AREA COMPLETELY.

I hope that these concerns will be seriously looked into.

I have been a resident at the above address for 39 years.

My objections are:-

1. The proposal to remove the Horsley’s from the Green Belt seems arbitrary. Exceptional circumstances are prescribed for this action and so far none have been put forward.
2. The infrastructure in East Horsley in particular is only just adequate at the present time. Parking in shopping locations are over crowded, station parking is very congested, medical practices are overburdened and the roads are dangerously busy. In East Horsley several years ago such was the concern for the elderly or handicapped villagers crossing Ockham Road South that a crossing light was installed at significant cost. Since then traffic has increased and with a higher density population traffic will be a significant danger to pedestrians in the area. No plan has been produced to show how to deal with these serious infrastructure problems.
3. The Thatchers Hotel site (48 properties) on a bend on the A246 will cause dangerous congestion on an already very busy road during the rush hour.
4. Proposed infills near St Matins Church on Ockham Road South will completely change the character and the environment in a village setting that will be destroyed.
5. Station Parade to be designated a District Centre seems to be a proposal that lacks all sense. The facilities at the location are fully stretched. I do not feel that the planners have fulfilled their responsibilities to fully understand the nature of the facilities in our villages centre. If this proposal happens a sensibly size village will be turned into an urban sprawl. This will totally change the environment in which I had selected to live.

6. May I have an acknowledgement that this has been received.

I want to OBJECT to what is planned all around West Horsley in the Guildford Local Plan.

As young citizen of this area and country my voice must be heard.

What is proposed is an utter disgrace and shows a total lack of understanding of the areas needs and totally disregards local opinions. At least we live in a democracy so I can have a say.

I have lived here for 15 years and have seen how the village operates and has grown to a point where local facilities are full; Roads, Schools, Drs, Dentists, Car parks and there is NO capacity for more houses/people.

- Our village schools are full, the addition of three more in villages not near us, will not service the increased numbers if the plans go ahead;
- In Horsley cars are already parked dangerously on our roads – often making two way traffic difficult, and this will become all the more so with more cars/buses etc).
- Parking is difficult already – for example our train station is already full – and our small station cannot service more people.
- And drainage is an issue.
- Our doctors are already too busy to cope with daily life of the current inhabitants.
I also dispute the number of proposed houses needed for Guildford’s development: I believe the numbers are significantly higher than official estimates for population growth in the borough.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to voice my strongest objections to the proposed plan to build on West Horsley’s Green Belt. Whilst I fully understand the need for more housing in the area for the ever increasing population, I would beg you instead to use “brown field sites” and conversions of existing, unused properties in order to preserve our precious and vital Green Belt landscape. The vast number of proposed houses would simply massacre this area of outstanding natural beauty and the pressure from developers must be fought with all possible strength, integrity and respect for our fragile natural environment. The village would be destroyed forever by such a massive strain on it’s resources, both natural and social.

I urge you, please, to stand by your previous pledge to protect the Green Belt and to find alternatives that respect the precious beauty and character of the area so that it is protected for generations to come.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to you about my objections to the proposed Guildford Borough Council Local Plan 2016. I consider it relevant, as a resident of West Horsley, to state my opinions on this matter.

**Removal of the Horsleys from the Green Belt**

Firstly, I object to the Horsleys being withdrawn from the Green Belt. The Green Belt was established for the main reason of preserving England's rolling hills and green pastures for generations to come. Horsley is a rural village and was even given the name "horse meadows" as a result of it being so green and agricultural. It should be kept this way to protect its rich heritage. By removing it from the Green Belt, it would would no longer be the country village that we know and love and I strongly object to this.

**Over-population**

Secondly, our villages are at maximum capacity. The suggested developments will put further strain on public transport, such as the trains at Horsley station, which I object to.

Furthermore, I object to there being insufficient parking space in the villages if vehicle numbers increase.
I also object because drainage will become more of an issue when already congested main roads become even more flooded than they presently are due to an increase in water waste and sewage.

**Infrastructure overload**

Tying in with overpopulation, our public services will completely overflow as they are not being suitably developed to meet the needs of a 35% increase in housing.

I object because children will be forced to go to school further afield because there is no space locally.

Residents will receive poor healthcare because the medical clinics are full and so I object to this as well.

I object because the road traffic will be even worse and the community buildings will be busier than ever.

In conclusion, I object because the large number of new houses being proposed in this plan is unsustainable, unsuitable and certainly unwarranted in the Guildford boroughs, particularly the Horsleys, for the reasons I presented in this letter.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I would like to raise my concerns for the planning proposals that you will be hearing for the Horsleys.

My reasons for concern are:

1) Schooling - schools are already full.
2) Medical centre is full to capacity.
3) Sewage farm at Wisley would need to be enlarged.
4) The roads and carparking would need adjusting for the amount of housing that has been proposed. Carparking at the station already overflowing.
5) Proposed housing on Ockham Road North would cause danger by the bridge.
6) I agree that some housing does need to be carried out but this must take into consideration affordable housing for local families and single people.
7) Please leave the Green Belt as it is.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing to you to express my concern about the proposed development plans for and the (over) development of the Horsleys, and surrounding areas.

1. I strongly object to the proposal to remove the Horsleys from the Green belt. The reason I chose to live here is precisely the fact that it is a green belt area and nature reserve for local wildlife. I do not believe that there are any circumstances requiring to reduce the greenbelt area, and no sensible rationale/reason has been demonstrated to warrant proceeding with such a proposal.

2. The defined land boundaries for existing settlement areas should not be increased. We should not consider the creation of any new settlement areas for any kind of developments within the greenbelt or village boundaries.

3. Our infrastructure is already overloaded. We have had multiple electricity supply failures over the years. It can be difficult to park in the villages for local shopping, even during non-busy periods. Our medical centre is already operating beyond its capacity. The drainage is also a problem and even in my own home, inadequate at times. Adding further housing or developments to our infrastructure may likely completely overwhelm it.

I understand that there are proposals to designate Station Parade as a ‘District Centre’. This is not appropriate and is a fundamental misunderstanding of what the nature of the facilities in the village centre are. This may open up the area to urban development in the future. I do not agree with and I oppose the designation of Station parade as a ‘district centre’.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I herewith write to vehemently object to the Proposed Submission Local Plan: Strategies and Sites June 2016. The number of proposed new homes is too high and unsustainable for Guildford’s villages.

I object on the following grounds:

I object to the erosion of the Green Belt. By extending the boundaries of the village mentioned in 2003 Local Plan Settlement Area, the village has been removed from the Green Belt. This is in conflict with the statement in Policy P2, “We will continue to protect the Metropolitan Green Belt against inappropriate development.”

I also object on the grounds that the village and surrounding areas do not have sufficient infrastructure to support such developments.

-Schools and doctors’ surgeries are at/near maximum capacity

- Roads, bus services and trains into London are already under immense strain.

- Surface water drainage is already a problem and would become hazardous if the problem became worse.

As a resident of West Horsley, I object to the targeted 35% increase in current village housing by 2022. This is clearly inconsistent with the likely population increase over this period and the need for so many houses to be built in West Horsley over the first 5 years of the Plan period 2018 to 2023 is totally unproven. The Parish Council has identified a limited need for some 20 affordable homes for local people who want to remain in the village, i.e. for the young and elderly.

West Horsley, a small, Greenbelt village can simply not sustain this development.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attended documents:

Comment ID: PSLPA16/3867  Respondent: 15583457 / Claire Parker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I also object to the development of up to 385No homes within the Parish along with the 100No homes along the West Horsley Parish Boarder near the station. I believe the number of proposed new homes is too high and unsustainable for Guildford’s villages. I feel the village and surrounding areas do not have sufficient infrastructure to support such developments... Schools and doctors’ surgeries are at/near maximum capacity. Roads, bus services and trains into London are already under immense strain. Utilities and public highways are under strain, with numerous pot holes in roads and surface water issues which cause floods during heavy rains. Waste water systems are under pressure and Thames Water have already highlighted the fact that their systems will not cope with the developments proposed as they currently stand.

In West Horsley, we have already lost our small green Grocer at the southern end of the village, so we need to travel to East Horsley to do general shopping, where parking and access is already an issue.

No exceptional circumstances have been stated to remove the vilalge from the greenbelt and I cannot see any concrete evidence of any requirement to build such large developments within the village as the Parish Council has only identified a limited need for some 20 affordable homes for local people who want to remain in the village, i.e. for the young and elderly.

West Horsley, a small, Greenbelt village can simply not sustain this development.

I sincerely hope that our villages will be protected from these development proposals.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attended documents:

Comment ID: PSLPA16/2989  Respondent: 15583649 / Sheila Attridge  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I especially OBJECT to policies A36, A37, A38, A39, A40 & A41:

- The amount of new housing far exceeds local need.
- Housing density would be excessive when compared with existing development.
- The plan would transform the Horsleys into a sizable town, something for which no case is made.
- There is no local support.
- The collective impact of these 6 sites on a small part of the borough is not considered. These should not be treated as isolated, separate sites.
- The sites are unsustainable. Key infrastructure is lacking, and no adequate provision is made to increase it - eg poor wastewater capacity, lack of schools, absence of traffic management plan, flooding.
- No account has been taken of additional impact of Wisley Airfield site on Horsleys.
- The extension of settlement boundaries is too permissive. The Horsleys are characterised by streets with development along only one side of the road. The policies allow too many adjacent green fields to be developed by squaring off boundaries and claiming they don’t contribute to Green Belt “openness”.

- The Green Belt gap with neighbouring settlements would be hugely narrowed, especially if Wisley Airfield is built on.
- Policy A40 is especially unviable because of high water table and poor drainage, leading to regular winter flooding.

I am writing in connection with the New Local Plan published on 26th June 2016

Main Objections and Concerns in respect of East and West Horsley

Removal of both Horsleys from the Green Belt. No exceptional circumstances have been detailed.

Extension of the boundaries of the Settlement areas of the Horsleys. No reasons given to the above.

Current infrastructure is already a disgrace. Roads are incapable of managing existing traffic volumes. Car parks at local stations are full. No scope to widen roads in either of the Horsleys. The local schools are full and waiting times at medical centres are long.

The revised development of 2000 houses at the old Wisley Airfield will have an enormous impact on the Horsleys. An extra 4000 vehicles will raise pollution levels dramatically and create gridlock on the current potholed road system. The plan also includes large developments at Waterloo Farm, Manor Farm, Ockham Road North, East Lane, Thatcher's Hotel and Bell & Colvill.

**West Horsley**

I object to Policy A37 as this site, proposed by GBC for 40 houses (many times the existing density of the village), would be an inappropriate development in a **Conservation Area within 500 metres of at least 5 listed houses**. House no 20 The Street, and its land has been added to this site (called the Bell and Colvill site) since the publication of the 2015 Draft LP, but is not shown on the new DLP as a change. What value, if any, would Conservation areas have, if GBC allows building in this area?
Also, note that permission has already been granted for 9 houses on the former Bell and Colvill workshop, small show room and 3 cottages, all perfectly acceptable as this is a brownfield site, the rest is not.

I approve of the decision to remove site 41 in West Horsley from the DLP.

I approve of the decision to remove the Thatchers Hotel site from the DLP.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

Dear Sir/Madam,

I STRONGLY OBJECT to the Guildford Local Plan Proposal.

I am a resident of West Horsley and I OBJECT to the local area being removed from the Green Belt zone, and the consequent residential homes and estates being built.

I am a new resident to West Horsley, after my family paid a premium to move to a beautiful semi-rural environment surrounded by natural scenery. I have just moved from an already overdeveloped and high density area. I have witnessed the pressures that overpopulated areas cause, such as increased:

- **CRIME**
- **TRAFFIC**
- **POLLUTION** (Increased CO2 emissions, light pollution)
- **OVERCROWDED PUBLIC TRANSPORT**
- **INSUFFICIENT PARKING IN THE VILLAGE**

I STRONGLY OBJECT to Horsley being removed from the Green Belt and to the proposed planning developments.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I currently work in the borough and on reading the local plan i was appalled and its lack of important detail and its glossy presumption of predetermined facts.

I work in some of the local villages that would be affected by the proposal and am shocked at the harm i see this plan doing, i am generally on the road during school drop of time and think the amount of traffic on small country roads such
as in East Horsley as positively dangerous, just last week i saw a group of children have a narrow escape whilst waiting to catch the bus to the Howard, the increase in traffic associated with the local plan brings the likelihood of fatalities all the closer the fact there have not been any yet is extremely fortuitous, for this mainly and other obvious facts such as lack of amenities, public services i object to the plan as it stands.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/3599  Respondent: 15587041 / Martin Goodchild  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? (  ), is Sound? (  ), is Legally Compliant? (  )

The plans indicate a further 173 homes in East Horsley and 420 in West Horsley, a total of 593. This results in an approximate increase of households of 10% in East Horsley and 35% in West Horsley. This will substantially increase the volume of traffic in the village not least when added to the likely number of motor vehicles if the proposed Wisley airfield development also takes place. It will also put a strain on the village facilities such as schools, the medical centre and the stations all of which are at capacity now.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/3956  Respondent: 15587041 / Martin Goodchild  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? (  ), is Sound? (  ), is Legally Compliant? (  )

1. New homes in the Horsleys:

The plans indicate a further 173 homes in East Horsley and 420 in West Horsley, a total of 593. This results in an approximate increase of households of 10% in East Horsley and 35% in West Horsley. This will substantially increase the volume of traffic in the village not least when added to the likely number of motor vehicles if the proposed Wisley Airfield development also takes place. It will also put a strain on the village facilities such as schools, the medical centre and the stations all of which are at capacity now.

In summary it appears to me that the proposals for new homes in the Horsleys and at Wisley Airfield have been poorly thought out with little regard for the Metropolitan Green Belt rules. There has been a complete failure to consider the impact on the infrastructure and environment across a widespread area, the strain on local facilities and the fact that the proposed developments are totally out of character for the rural area of this part of Surrey.

I would therefore urge Guildford Borough Council not to countenance any development at the Wisley Airfield site and to considerably reduce the planned housing increase in the Horsleys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/3143  Respondent: 15587489 / Thomas Batterbury  Agent:
I live in West Horsley and object to the Guildford local plan. I strongly OBJECT to West Horsley and the surrounding area being taken out of the green belt.

This will undoubtedly lead to even more houses being built in the future, increased population density and over crowded spaces. We paid a premium to move to this lovely area and do not want to watch it turn into a less desirable area.

I commute to central London 5 days a week, the trains are already very busy with the current train service, which quite simply would not be able to cope with a larger number of commuters.

**Guildford Borough Proposed Submission Local Plan: strategy and sites: June 2016**

I am writing to make comment on the above in respect of West Horsley.

The proposed number of new dwellings proposed for the 4 parish development sites (385) is excessive and would result in an increase of 35% on the current number of homes. I object to this most strongly as it will change the character of the village entirely and without any increase in infrastructure cause a dramatic strain on local service such as roads, schools and medical facilities. There would be an increase of at least 1500 residents and probably 1000 cars and this seems in complete contradiction to Strategic Policy S1: Presumption in favour of sustainable development.

Of particular concern is the current level of flooding in the village which should be covered by Policy 11 waste water infrastructure in which West Horsley is not mentioned. The gullies in this part of the village were recently cleared which is a good thing but the result of this in the following storm downpour was that the water cleared by the gullies then shot out of the manhole in Ripley Lane like a tropical waterfall causing the road to flood. What effect would an extra 385 dwellings and their waste water have on this infrastructure?
There is no evidence of the need for this number of homes in West Horsley. Local surveys show that there is the need for a small number of affordable homes for local people not large estates. The proportion of dwellings proposed for the green belt areas is disproportionate to those proposed for brownfield sites in Guildford itself which are much more sustainable being served by Public Transport, employment and other facilities. It is a mark of shame that GBC appears incapable, and has been for many years, of facilitating development of the vast tracks of derelict land it owns in and around North Street which could provide large numbers of dwellings for young people and others who may wish to downsize as well as families.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

/ I OBJECT to the building & development of new houses in the A3 corridor.

2/ I OBJECT to the very idea of Garlick’s Arch (Ripley/Send/Burnt Common) being developed any more.

3/ I OBJECT to any proposal that will increase Traffic in the local area – it is already like Piccadilly Circus at times.

4/ I OBJECT to any proposal that removes/reduces the sacred green fields and common land in the Ripley/Send/Clandon/Burnt Common areas.

5/ I OBJECT to the limited consultation period.

6/ I OBJECT to ALL erosion of the Green Belt.

7/ I OBJECT to the last minute inclusion of new sites with less than two weeks notice.

8/ I OBJECT to any new Exit/Entry roads of the A3 at Burnt Common – this can only make things worse.

9/ I OBJECT to any schemes that change the fundamental ‘rural countryside’ feeling of Wisley, Ripley, Send, Clandon etc.

10/ I OBJECT to the lack of immediate provision for new schools.

11/ I OBJECT to the lack of any immediate provision for Doctors Surgeries.

12/ I OBJECT to the lack of any evidence for the ‘fictitious’ alleged ‘housing need’ numbers.

13/ I OBJECT to the disproportionate amount of development in one area of the Borough.

14/ I OBJECT to ANY proposals that will turn Ripley/Send/Clandon/Burnt Common into a Goldsworth Park/Knaphill/St Johns look-a-like.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/3165  Respondent: 15587969 / F Bell  Agent:
As a long term resident of West Horsley, I would like to submit my strong objection to the Draft Local Plan for Guildford. West Horsley is currently a semi-rural barrier to the onward urban sprawl which has relentlessly paved over Surrey. There are actually fields here and country walks for all to enjoy including people who I know who come down from London to walk here. I can see no justification for the following:

- removing West Horsley from the Green Belt
- building another 35% more houses - this is way, way too much although I fully accept the need for some new housing
- building on fields!

To do the above would permanently destroy one of Surrey's remaining rural villages beyond recognition.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I am writing to strongly object to proposals in relation to four Development sites in West Horsley village as laid out in The Guildford Plan. My reasons for objecting to the proposals are that I believe that the proposed addition of 385 homes is wholly inappropriate and would not be sustainable within the boundaries of our small village due to the local infrastructure. Such high density housing will inevitably result in more vehicles moving around the village which will cause more traffic congestion, noise and pollution. Currently:

- The population of West Horsley is increasing. This is due to the ongoing trend throughout the village of demolition of many single storey dwellings, typically with 2/3 bedrooms, which are being replaced with large 4/5 bedroom properties, as well as people extending existing properties to provide extra bedrooms. Most households have at least 2 cars per household, with larger houses and extended properties this is likely to increase to at least 3 or 4 cars per household.
- The roads and lanes in West Horsley are narrow in parts and are already very busy, especially at peak times. East Lane is not passable by two way traffic in parts (there are some traffic management measures in place) and this, coupled with the increasing number of parked cars on East Lane and The Street means there are regularly queues of cars waiting to pass through from one end of the village to the other. The problem is compounded by heavy vehicles (diggers, grabbers etc.) and lorries which are constantly moving around the village and parking in the streets and lanes to service the high level of building work to which I have previously referred.
- I commute to London on a daily basis via Horsley station. The station car park is regularly full to capacity on weekdays and I have recently witnessed stressful situations where people cannot access parking spaces. Increased residents will ultimately result in extra commuters who need use the station car park. There will simply be nowhere for them to park. Station Approach, which is the short, narrow, steep road that leads to the car park is already dangerously busy at peak times with cars, cyclists and pedestrians all trying to access or leave the station at the same time. This results in congestion at the bottom of Station Approach with vehicles trying to get on to Ockham Road North which is already very busy with moving traffic. There have recently been several accidents at this junction.
- There is also the concern about potential further strain on the village environment when Grange Park Opera takes up residency at West Horsley Place. This will inevitably cause traffic congestion, more noise and pollution, albeit at specific times through the year, but on top of nearly 400 extra planned homes within such a
small area, I feel these proposals will impose an unsupportable burden on the entire infrastructure of not only West Horsley, but also of neighbouring East Horsley.

- The proposals also completely go against the National Planning Policy Framework which states that new residential development must respect the character and density of housing in the area and be limited in quantity by the availability of infrastructure and local facilities.

My worry is that the current proposals will result in West Horsley village becoming effectively strangled by traffic congestion and overcrowding and be negatively impacted which will result in its character being changed for future generations. Finally, I would like to add that I am totally opposed to the proposal to remove West Horsley from the Green Belt by insetting and extending the 2003 Local Plan Settlement Area boundaries as I believe this would alter the genuinely rural nature of the village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp173/509  Respondent: 15588225 / Martin Barry  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to strongly object to proposals in relation to the Development sites in West Horsley village as laid out in The Guildford Local Plan. My reasons for objecting to the proposals are that I believe that the proposed addition of some 395 homes is wholly inappropriate and would not be sustainable within the boundaries of our small village due to the local infrastructure. Such high density housing will inevitably result in more vehicles moving around the village which will cause more traffic congestion, noise and pollution. Currently:

- The population of West Horsley is increasing. This is due to the ongoing trend throughout the village of demolition of many single storey dwellings, typically with 2/3 bedrooms, which are being replaced with large 4/5 bedroom properties, as well as people extending existing properties to provide extra bedrooms. Most households have at least 2 cars per household, with larger houses and extended properties this is likely to increase to at least 3 or 4 cars per household. The proposal to support self build housing on the sites will no doubt follow this trend
- The roads and lanes in West Horsley are narrow in parts and are already very busy, especially at peak times. East Lane is not passable by two way traffic in parts (there are some traffic management measures in place) and this, coupled with the increasing number of parked cars on East Lane and The Street means there are regularly queues of cars waiting to pass through from one end of the village to the other. The problem is compounded by heavy vehicles (diggers, grabbers etc.) and lorries which are constantly moving around the village and parking in the streets and lanes to service the high level of building work to which I have previously referred.
- I commute to London on a daily basis via Horsley station. The station car park is regularly full to capacity on weekdays and I have recently witnessed stressful situations where people cannot access parking spaces. Increased residents will ultimately result in extra commuters who need use the station car park. There will simply be nowhere for them to park. Station Approach, which is the short, narrow, steep road that leads to the car park is already dangerously busy at peak times with cars, cyclists and pedestrians all trying to access or leave the station at the same time. This results in congestion at the bottom of Station Approach with vehicles trying to get on to Ockham Road North which is already very busy with moving traffic. There have recently been several accidents at this junction.
- I am also confused by the removal of the site of the Thatchers Hotel complex as a potential site for development when it has infrastructure and access to the main Portsmouth Road already. If there is to be some limited development in the Horsleys why not do it here as an existing site rather than build on areas of local beauty and greenery with no appropriate access to main roads.
The proposals also completely go against the National Planning Policy Framework which states that new residential development must respect the character and density of housing in the area and be limited in quantity by the availability of infrastructure and local facilities.

My worry is that the current proposals will result in West Horsley village becoming effectively strangled by traffic congestion and overcrowding and be negatively impacted which will result in its character being changed for future generations.

Finally, I would like to add that I am totally opposed to the proposal to extend West Horsley village boundary into the Green Belt land especially around the west side of Silkmore Lane. This will effectively grant development rights on the paddocks in the area behind the lane. This will be another erosion of the beautiful landscape which many people including walkers and cyclists enjoy in this part of our rural village.

1. wish to register my strong objection to the local plan in the Horsley area, which will have a severely detrimental impact on our neighbourhood. I object in particular to -
2. The density of proposed additional housing in East and West Horsley. To add 593 houses to already overcrowded schools, medical facilities and the railway will have a major negative impact on the daily life of local residents.
3. The proposal to remove the Horsley Green Belt is outrageous. No "exceptional circumstances" have been demonstrated. The Council has a duty to protect the Green Belt for future generations.
4. No sound reasons have been given for the proposed extension of the settlement areas of the Horsleys.

Objection to Guildford Local Plan – Impact on East and West Horsley Villages

As a resident of East Horsley (see below), I am writing to object in the strongest possible terms to the proposed Guildford Local Plan, which would, if implemented as proposed, have a very harmful effect on East and West Horsley Villages.

My objections are as follows:

Proposal to remove the Horsleys from the Green Belt: The ‘exceptional circumstances' required before taking this action have not been demonstrated.
Extension of the boundaries of the settlement areas of the Horsleys: No sound reasons have been given for the proposed changes, which seem to be aimed solely at increasing the land available within the settlements for future additional developments.

Station Parade’s designation as a ‘District Centre’: This ‘classification’ results from a complete misreading of the nature of the facilities in the village centre and would inappropriately target the area for future urban developments.

Traffic and parking: Assuming that every new house has at least 2 cars, this means potentially 6,000 more cars within a three mile radius of the villages. The impact on local roads will be tremendous. Parking at Horsley & Effingham junction stations (which are already full), at the shops, at the medical centre and at the village hall will all be affected.

Local Road Network: In respect of the proposals for development at Wisley Airfield and for an upgrade the current A3 junction at Burntcommon to a full 4-way junction, SCC traffic modelling anticipates increased use of Guileshall Lane, Hungry Hill Lane and Tithebarns Lane for traffic accessing the A3 at Burntcommon in order to travel to Guildford and beyond. The SCC report states that “consequently, it indicates that further thought may have to be given to managing traffic in this area as part of a transport assessment should the development be progressed”. It appears that the Plan is proposing a strategic site at Wisley Airfield without even knowing what improvements to the local road infrastructure will be required. If that is the case for Wisley Airfield, then it is almost inevitably true for the proposed developments in East and West Horsley as well.

Pollution: The large increase in volume of traffic will cause an increase in nitrogen dioxide and particulates in the environment – already a cause for concern in several areas in the Borough.

Flooding: The site behind Ockham Road North in East Horsley is partially a level 3 flood risk area, and local residents are well aware of how much standing water there is in their gardens after rain. Building on such land will only exacerbate the problem. We already know what happens to local roads when it rains – the drains can’t cope.

Schools: Local schools are already at capacity – where will newcomers go to school? No extra places are planned in the Horsleys, and the school places proposed at Wisley Airfield will not planned until many years into the project.

Medical facilities: Similar situation to the schools.

Loss of Green Belt land: Sadiq Khan, new Mayor of London, has instructed London planners not to approve development on Green Belt Land within the M25. If we continue to build on our countryside it won’t be many decades before we have none left. Creeping development has led to almost continuous housing from Central London to Effingham. Is this to carry on to Guildford and beyond? (1,700 houses are planned for the Guildford end of the Hogs Back and 1,000 new houses on greenfield sites in Normandy.)

Transport: Misery for commuters, nowhere to park and full trains at commuting times.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT to: the removal of the Horsleys from the Green Belt.

There are no exceptional circumstances, these have not been demonstrated.
To the proposed planning of hundreds of houses in the West Horsley and East Horsley villages.
I wish to register objections to the local plan job 13,860 new proposed houses, as not sustainable.

There will be damage to local communities, these will not be villages any more.

We need to check unrestricted sprawl of large buildup areas,

We need to protect our Green Belt land and fields.

We live here because it is a village and surrounded by green fields and farmland.

We like the village atmosphere, knowing our neighbours and meeting them in our villages, being part of a small community.

I OBJECT To: the huge influx of traffic this planning will cause. Our little country roads cannot cope with the traffic as it is. The condition of our local roads is Appalling! Pot holes everywhere, causing dangerous driving, trying to avoid the holes, damaging cars. We have narrow country roads, not suitable for hundreds more ‘large family cars’. We don’t want yellow/white lines all over our village and road signs, which are quite unnecessary, which will only increase with your planning proposals. The car parking facilities are inadequate and no room for expansion.

I OBJECT To: the lack of facilities suitable for thousands more people using our Doctors Surgery. We cannot get an appointment within a week as it is, there is nowhere to expand the Surgery, are you planning to build another? The medical facilities are over stretched as it is. The local hospital The Royal Surrey is overcrowded already, there is nowhere else for us in our villages to go.

I OBJECTTo: the influx of thousands more families with school age children, when our local junior school, The Raleigh, is full and they want to move to a larger site now! If they took one of your sites and you took over their 2 sites, at least the planners would have a few hundred more houses and the school would be able to accommodate more new children, but only a few! Not the hundreds you propose to bring into our little villages.

We cannot accommodate these new children into the local Senior schools either. Where do you propose to build these new schools? They would then need adequate transportation, so parents cars would not always be on these country roads, emitting yet more pollution!

We are villages, people want to move here, as we did because of the quiet, the fields, the village atmosphere, and the safety of a village. Children need open spaces, greenery, the safety of a village to grow up in.

I OBJECT

there is no infrastructure which has been confirmed.

The flood plans in these areas get flooded every winter. West Horsley is known for being a flood plain area, totally unsuitable for hundreds more houses.

Thames Water has advised that the current wastewater network is unlikely to support the demand from all these developments!

I OBJECTTo: the overcrowding at our shops, we have two little parades of shops for the use of the two villages, not thousands more people using them. There is only limited parking, only one little supermarket, Budgens, and no access to any larger Supermarket.
Station Parade is an inappropriate target in the area for future expansion and development, the only shops we have to walk to.
The train does not take us into Cobham centre, only Stoke D’Abernen, miles away from the Cobham town Centre, how do all these new people get to ships?
We have no bus which has a regular timetable to Cobham, our nearest town, there would have to be in place public transport regularly into Cobham and Guildford.

I OBJECTTo: the state of our roads when thousands more people will be using them. The Drift, which is a narrow lane from West Horsley to Effingham, is already used by lorries, coaches from the schools, and many local businesses, it is full job potholes from constant use, how is that going to cope?
All our roads are narrow, we are a village, the drainage is already a problem through the village every winter.

BROWNFIELD ARE BEING IGNORED
We need more houses in the centre of towns, not out in our villages, therefore using more cars, more pollution, more congestion on our already crowded roads.
Recycle derelict and urban land.

I OBJECT To: The SHMA target housing number, which will then be increased further by the GBC to give a population increase, which is almost 70% than the official National estimates for population growth in the BoroughThis would bring alarming results of an increase of up to 35% in the existing West Horsley households, more than any other single area in the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

• Serious consideration needs to be given to the type of properties built in any development within the Horsley village boundaries: it should not be assumed that 4 and 5 bedroom family houses are the only properties required. The addition of high quality apartments, similar to Maranello House, should be considered to accommodate people in the area wishing to downsize. This would free up larger family properties and increase the population density without destroying Green Belt lands.

I trust my views will be taken into account by the Council when they are considering the Local Plan.

• It is totally unacceptable to consider violating Green Belt lands when the potential for the redevelopment of brown field sites in the county have not been exhausted. Clearly the redevelopment of the Thatcher’s Hotel and Bell & Colvill sites should be encouraged together with improving the existing house stock through infill developments etc providing funds are made available to repair and maintain the existing roads and utilities infrastructure.
• East and West Horsley are both small historic villages that have expanded over the last 50 years; further major expansion will not be possible without destroying the character and ambiance of the area. The current levels of traffic passing through East Horsley is barely tolerable and the social infrastructure is straining at the moment even without further development on Green Belt land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
General Comment

GBC’s proposed Local Plan proposes a total of 4,993 new dwellings within a 5-mile radius of The Horsleys, not including many smaller sites in nearby villages, comprising.

- 533 houses on large sites in East and West Horsley (The Horsleys)
- 60 houses on small sites in The Horsleys
- 2000 houses on Wisley Airfield
- 400 houses on Burnt Common
- 2000 houses at Gosden Hill Farm (on the A3 near Burpham)

Currently there are 2808 dwellings in The Horsleys (EH 1697, WH 1111).

Thus the plan represents the following increase in dwelling places:

- 21% within The Horsleys.
- 178% within a 5-mile radius of The Horsleys.

I can find no reason for building such large numbers of homes in The Horsleys or neighbouring villages given in the document ‘Guildford Borough Economic Strategy 2013-2031. Most of the Strategic Employment Sites proposed in Policy E1 are over 5 miles away from them.

I have commented previously under Policies I1, I2 and I3 on the existing shortcomings with, and deficiencies in, the infrastructure of The Horsleys. The proposed increase in dwellings for The Horsleys set out in the draft local plan will make matters far worse.

These policies also run contrary to NPPF paragraph 17 which specifically states that planning should be about “empowering local people to shape their surroundings”. As I have said earlier under Policy P2 and its attendant paragraphs, but it bears repeating, comments on local social media sites, notice boards by the side of our local roads and so on show the depth of local feeling against these policies. Thus I conclude that Site Policies A35-A41 do not shape the surroundings in the way in which local people would wish. There seems little doubt that the local populace feel victimised by GBC’s policies when The Horsleys will be required to build, in percentage terms, twice the amount of housing than for the Guildford urban area.

I OBJECT therefore to Site Policies A35-A41.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICIES A37, A38, A40 & A41, located in West Horsley

These policies propose a total of 385 dwellings from these four sites. The 2011 Census showed West Horsley had 1,124 dwellings at that time. This represents an increase of 36% over the plan period, a very high proportion by any standards.

These sites all currently lie within the Green Belt. Development on them requires settlement boundary movements. As I have stated in the objection to Policy A39 above, the NPPF is quite clear that every movement in settlement boundaries must be justified by ‘exceptional circumstances’. I do not believe these policies demonstrate any such circumstances and are therefore unjustified and contrary to NPPF rules. If this boundary movements are invalid then these sites remains a part of the Metropolitan Green Belt. Therefore the housing development proposal would be invalid.

I OBJECT to Policies A37, A38, A40 and A41 as they do not demonstrate the exceptional circumstances required to move the settlement boundaries.

**Comment ID:** PSLPA16/3218  **Respondent:** 15589217 / Amelia Young  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

I am writing with regard to the Draft Local Plan for the Guildford Borough, with particular concern for the proposed changes in East and West Horsley. I object to all policies which include development of land situated on the green belt. I believe that the land on the green belt should be preserved for future generations and we should not opt to destroy it before fully examining the consequences and how this will affect the environment in the future.

Recently, I have been learning about brownfield and greenfield sites in my geography lessons at school and I have come to the conclusion that there are plenty of derelict brownfield sites which need redevelopment in the inner city and central business district. This land already has foundations built into it and the infrastructure surrounding it is much more advanced. For example, there are sufficient road networks that are able to deal with an increase in population within that area. Consequently, this would fulfil the need for more housing but leave the green belt untouched. This land is currently neglected and many declining businesses would welcome new residents, giving a purpose to the land.

The original purpose of the green belt was to prevent urban sprawl so that the environment is protected in rural areas, this has resulted in many more benefits. For example, air quality is improved in both rural and urban areas, nature is successfully conserved, and the unique landscape is protected in many rural areas. So then, what are the benefits of destroying this policy? I would argue that yes, this is a very straight-forward way to provide housing for those who need it, however, where will we draw the line? This development can only be temporary and before long, more housing will be needed and therefore more of the green belt will be destroyed. This completely defeats the objective of the green belt and I believe that to prevent this development leading to a slippery slope we must not go ahead with the local plan.

I have noticed on the Guildford Borough Council website that one of the aims of this local plan is to 'protect our most important countryside, landscapes and heritage' however I am at a loss as to how this can be claimed whilst at the same time, both of the Horsleys are to be removed from the green belt altogether along with many other villages in Surrey. The green belt policy was made with thought and consideration, it provides protection for the environment and is often what defines the historic status of many English villages. Therefore I ask you to rethink the plans which have been put forward and what would be best for the country in the long term.

I leave you with my objections, and ask you to remember that building upon the green belt is an irreversible process and therefore more time and effort needs to be put into finding other areas which would be more suitable for fulfilling the
needs of the British population, a plan in which both those who need homes and those who are already homed are satisfied.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I would like to add my name to the countless others ( I suspect ) who are unhappy with your plans for our neighbourhood.

1. I object to the proposal to remove us from the Green Belt.
2. I'm unsure of the reasons why you propose to change either boundaries.
3. Our infrastructure is not suitable, at present for any additional pressure to add to the area is, road routes, schools, surgery practise are already over stretched, no improvement mentioned of these important needs for the community.
4. Wisley Airfield, the impact again of the locality would be enormous for the surrounding area and beyond, the same applies to Burnt Common, also.
5. Thatchers Hotel is the nearest proposed site to where I live and I'm concerned about the road system, already a bad bend and lots of entrances and exits to contend with.

I moved here originally for the quiet, peaceful neighbourhood and I would hate to see that ruined for future generations therefore I feel it's important to add my voice to those who are very unhappy with your proposed proposal.

Objection to Guildford Borough Council Draft Local Plan (June 2016)

I am a student who currently lives in West Horsley and am deeply concerned by the proposed plans and the effect these will have on not only my generation, but generations to come. I am objecting to this plan on a number of grounds which take into account social, economic and environmental aspects; all of which in my opinion will be hugely detrimental to the areas around Guildford and their peoples.

1. **Green Belt.**

   - “The green is a policy for controlling urban growth. The idea is for a ring of countryside where urbanisation will be resisted for the foreseeable future, maintaining an area where agriculture, forestry and outdoor leisure can be expected to prevail.” It is an area which is only able to be removed in ‘exceptional circumstances’ and it is clear that such circumstances have not been met. The green belt is crucial for the local area in providing such facilities
but also for the local ecosystems. Such developments will destroy habitats of local species and the removal of species could potentially lead to trophic cascade- which will be extremely damaging to the area, highlighting the environmental damage. In the long run it is more than likely the local economy will be damaged as a result.

- Therefore the Horsleys must remain in the green belt and I object to the proposal to take them and the Former Wisley airfield (Three Farm Meadows) out of the green belt.

1. **Congestion and Public Transport**

- Having used the local train services for the last 7 years, it is evident that the service provided is not adequate. Trains are often overcrowded and prices are already too high. With the thousands of houses being built this service will only get worse. Prices will rise to fund “improvements” and services will become even more overcrowded. As a student, public transport is crucial for me to get around and with increased demand for these services there is little evidence to suggest they will cope, pointing only to extreme difficulties. I can’t stress enough how important an efficient and sufficient public transport system is for the local economy.

- Similarly the roads around the area of the proposed sites will not be able to cope. Many of the sites are in areas where single track roads are extremely common and any improvements in these will lead to further damage to the ecosystem. However, more importantly, the A3 will not be able to cope. It already struggles and with thousands of more cars in the area there can only be negative consequences. Increased journey times and congestion will mean increased costs to business and could affect locals’ ability to have jobs further away from their homes. There is no sufficient plan as to how the area will cope and this worries me for my future.

1. **Infrastructure and Local services**

- The proposed increase of up to 35% in existing West Horsley is greater than any other single area in the Borough. The proposals for West Horsley are unbalanced and unsustainable and would change the character of the village forever. I object to this. Such character is what attracts people to the area and enables local businesses to thrive.

The local infrastructure would not be able to cope and I cannot see any circumstance in which one can argue that it will firstly, be sufficient and secondly, have a positive effect on the area.

Schools are full, drainage systems are struggling and medical facilities are stretched.

These are only a few of the many issues these plans will create and highlight to me that there has not been sufficient research on the consequences, as anyone with common sense and an understanding of the area would realise that what has been proposed is utterly ludicrous.

As a young individual it angers me how these plans can be proposed and I am worried for the future and sustainability of an area I love living in and hope to do so in time to come.

Further to this, it worries me how little information there is on these plans. Having spoken to my peers many are unaware of what is going on. These peers of mine will be most affected by what is proposed. There needs to be more information for the younger generation without a doubt, the plan is not accessible to people in my age group and needs to be. The fact little information is being pushed towards those of my age and younger shows that something other than the future for our generation is more important.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )
I write regarding the above and ask that the following comments be taken into account when considering the same.

I live in the village of West Horsley and therefore many of my comments relate to the specific issues relating to that village alone.

The Issue

I am aware of Central Government's desire to increase the UK’s housing provision, particularly in the South East, and within this context Guildford Borough Council (GBC) is under pressure to adopt a deliverable Local Plan for the borough for the period until 2031 and with particular reference to housing provision.

Within this context, I believe that the extra housing provision in discussion should ideally be located on existing brownfield sites within the borough and be located as near as possible to the centres of employment. I do not believe that the current document has given sufficient consideration to this issue, seeking instead an over-reliance on the proposed utilisation of the currently designated Green Belt land around local villages, particularly to the east of the borough, to meet such needs.

In my opinion (and this is formulated through extensive research and professional advice taken) this is a fundamental flaw in the Guildford borough Submission Local Plan 2016 (Proposed Local Plan) as it proposes extensive residential development that will be remote from the existing centres of employment or where indicated within the Proposed Local Plan; these being largely on the opposite side of the borough. Such a policy would be counter to the principles of sustainable development and would undoubtedly put further pressure on the already struggling transport infrastructure. I would like to see this approach rejected and the bulk of new proposed housing allocated nearer to the existing and proposed centres of employment, i.e. within and around Guildford town centre/urban area, rather than in the borough’s outlying, and previously protected, villages.

But I also think that semi-rural villages in the borough, such as West Horsley should and be expected to bear some of the brunt of the future housing provision as it is necessary to increase the number of houses within the village, amongst other reasons, for the young to be able to stay within the village and the older residents to have the opportunity to downsize within the village, but any such housing provision must only be allocated having considered many factors, such as: environmental issues (inc Green Belt), housing needs, local character and architecture, transport and highway situations, infrastructure (schooling, doctors, cap parking in and around the village and at the rail stn, ptn development sites amongst others.

I will therefore set out my views on each topic with regard to West Horsley below.

National Planning Policy Framework (NPPF), paragraph 182, advises that a Local Plan can only be adopted if it is sound.

As a matter of government policy, soundness requires a plan to be:

- positively prepared;
- justified;
- effective;
- consistent with national policy.

Within these four heads it should enable, over its plan period, the delivery of sustainable development in accordance with the NPPF.

I have several strong concerns as to whether this is the case within the Proposed Local Plan, as currently drafted, and believe that some of the current policies are not justified nor consistent with national policy, thereby rendering the same unsound without significant revision.
I therefore **OBJECT** to the Guildford borough Proposed Submission Local Plan – Strategy & Sites 2016 as currently drafted.

**ENVIRONMENTAL ISSUES (INC. GREEN BELT)**

In my opinion, the Metropolitan Green Belt and its special natural environment is a defining characteristic of Guildford borough and, indeed, West Horsley.

I believe that there should remain a general presumption that it should be protected. The Green Belt should only be sacrificed as a last resort, as once lost it can never be reclaimed. Many many villages in Guildford borough are still threatened with removal from their long established Green Belt designation, including where I live, the village of West Horsley. Personally, I do not believe that West Horsley’s currently defined Settlement Area boundaries (ref. 2003 Local Plan) needs such a significant extension, as is being proposed, and perhaps only needs a smaller scale review. In this context, paragraph of Policy P2: Green Belt; is in my opinion so badly worded. For GBC to state “We will continue to protect the Metropolitan Green Belt, as shown on the proposals map, against inappropriate development” is not being represented at all in the way they are proposing removing so much of the Green Belt, and I do not agree with the proposals map and its proposed new Green Belt boundary.

The national policy regarding protection for the Green Belt is contained within section 9 of the NPPF. Paragraph 79 confirms that the Government attaches great importance to Green Belts.

The main and probably the most important aim of national Green Belt policy, which is repeated word for word by GBC in item 4.3.11, is to prevent urban sprawl by keeping land permanently open; the essential characteristics of the Green Belt being its openness and permanence.

As the Green Belt in Surrey is long established and has detailed boundaries, “exceptional circumstances” must be demonstrated to necessitate the change to its boundaries. I do not believe that this Proposed Local Plan is an “exceptional circumstance”.

Paragraph 84 of the NPPF advises that “When drawing up or reviewing Green Belt boundaries local planning authorities should take account of the need to promote sustainable patterns of development. They should consider the consequences for sustainable development of channelling development towards urban areas inside the Green Belt boundary, towards towns and villages inset within the Green Belt or towards locations beyond the outer Green Belt boundary”.

GBC states in item 4.3.12 that “national planning policy states that only those villages whose open character makes an important contribution to the openness of the Green Belt should be included in the Green Belt”.

I believe that West Horsley’s open, semi-rural character makes an important contribution to the openness of the Green Belt in this part of the borough. This is the specific and differentiating characteristic of West Horsley over its more ‘leafy’ and more tightly developed neighbour, East Horsley, which I believe GBC and its consultants have failed to recognise or protect.

It is a strong feeling that the semi-rural landscape character of the village is greatly valued by West Horsley residents and is detailed in general terms within the Guildford Borough Council Landscape Character Assessment.

A huge amount of the character of West Horsley is defined by the open views, (via paths, gates, farm entrance openings, bridle ways etc) from the roads either entering or passing through the village settlement.

Throughout the village, stretches of undeveloped countryside on just one side of Ockham Road North, then East Lane, Ripley Lane and Long Reasch, and also The Street boldly reinforce this characteristic. The clearly defined precedent is of the village settlement being on one side of the route and there being open vistas across fields and meadows and paddocks or into woodlands on the other. This should be protected not compromised by any developments.

Also the fact that the main traffic route through the village (along East Lane and The Street) currently benefits from a ‘green gap’ of woods and fields to the north (between The Rectory, roughly opposite Northcote Road to Grovelands Farm, beyond the railway bridge) and to the south (between Roundtree Farm and the listed Railway Cottages, at the
Railway bridge). This natural green area, centred on the Lollesworth Lane and Long Reach junction, is in many ways the real centre of the village.

Clearly Green Belt everywhere is under pressure, but in my opinion, I strongly feel that any linear extensions of the existing settlement boundaries should be strongly resisted.

I therefore believe that the parish of West Horsley’s open, semi-rural, character does indeed make clear and important contribution to the openness of the Green Belt, and therefore I believe that, under national planning policy it should remain “washed over by” the Green Belt, rather than being “inset from the Green Belt” as proposed.

Policy on development with the Metropolitan Green Belt is set out in paragraphs 79 – 92 of the NPPF.

Inappropriate development is, by definition, harmful to Green Belt and paragraph 87 of the NPPF clearly states that it “should not be approved except in very special circumstances”. Furthermore paragraph 89 advises local planning authorities to “regard the construction of new buildings as inappropriate in Green Belt”.

Whilst I accept that it is possible for a local planning authority to conduct a review of Green Belt land and consider redefining boundaries which add or take away Green Belt land in order to meet these “very special circumstances”, paragraph 83 of the NPPF states, “Local planning authorities with Green Belts in their area should establish Green Belt boundaries in their Local Plans which set the framework for Green Belt and settlement policy. Once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. At that time, authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period.”

This paragraph clearly sets out that a Green Belt review should only happen in “exceptional circumstances”. This idea is further explained on in paragraph 82 as being “for example when planning for larger scale development such as new settlements or major urban extensions”. The proposals for West Horsley are neither a NEW SETTLEMENT NOR A MAJOR URBAN EXTENSION.

I note that within item 4.3.16 GBC states that “We consider that exceptional circumstances exist to justify the amendment of Green Belt boundaries in order to facilitate the development that is needed and to promote sustainable patterns of development.” - in my opinion these are absolutely not EXCEPTIONAL CIRCUMSTANCES and therefore I am requesting that this sentence is removed.

I cannot see how GBC have directed sustainable development towards existing urban areas and also have not directed it next towards town and villages already inset with the Green Belt.

Removal of any land from the Green Belt should only be allowed after long and thoughtful consideration of the individual sites concerned. I fear that the proposed ‘wholesale’ removal from being “washed over by the Green Belt” to being “inset within the Green Belt” will forever change the nature of West Horsley and, once lost, the character of our village and many surrounding villages will be changed for the worse forever and will clearly be irreversible, which would be a tragic and very sad loss to West Horsley.

I am therefore OBJECTING to the proposals map and the proposed amendment of the Green Belt boundary around West Horsley in particular. I would ask that the proposals map be rejected, reconsidered and amended.

HOUSING NEED

The target house building programme proposed by GBC represents a 25% increase in the housing stock of the borough, whilst we have been advised that the Office of national Statistics (ONS) projects a population increase of some 15% for the borough of Guildford over the same period, I THEREFORE CANNOT SEE OR UNDERSTAND WHY GBC DEEMS IT SO NECESSARY TO INCREASE THE TARGET HOUSE BUILDING PROGRAMME BY A 25% INCREASE IN THE HOUSING STOCK OF THE BOROUGH.
Without a doubt the proposed increase in the number of new houses required has NOT been proven for the village of West Horsley. In my opinion the Proposed Submission Local Plan in respect of West Horsley is excessive in terms of the potential residential provision currently indicated.

I do not believe that the scale of development proposed, in any way, reflects the actual need, or that it respects the local character and existing built density of the village. But I do strongly feel the Horsleys (both East and West) should have new houses built for reasons already stated (PARTICULARLY FOR THE YOUNG AND OLD) but in a much less excessive way. The necessity for 385 new houses on the four proposed sites is grossly excessive.

The population of West Horsley is circa 2828 – to build 385 houses with an increasing family size per household according to new data from Eurostat (according to a Telegraph article of August 2015) stating that the average of 2.4 children is now growing and there are more four baby families now in Britain than almost all of Europe. If we assume that it is still only 2.4 children per family then 385 houses will equate to circa 1700 people – that is a 60% increase on the already existing population of West Horsley – I cannot comprehend the thought process of GBC if they actually want to increase the population of West Horsley by 60% - the village will quite literally just not be able to cope in anyway whatsoever. If the population was increased by 15-20% then it would be necessary to build circa 130 more houses or circa 33 per the four proposed sites, which would be so much more appropriate and within the desires of circa 95% of the Horsleys (East and West).

I therefore OBJECT to the current site allocation and housing densities proposed for all four sites in West Horsley.

I understand that in March 2014 the Government published a new web-based Planning Practise Guidance (Housing & economic land availability assessment, Methodology – stage 5: Final evidence base, 6 March 2014) to accompany and give further detail about the policies in the NPPF. This guidance set out that unmet housing need in a particular area is unlikely to meet the “very special circumstances” test to justify development within the Green Belt. It states “Unmet housing need is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development on a site within the Green Belt”.

On 4th October 2014, I understand that the Government announced that it had updated its online Planning Practise Guidance. The aim of this was to reaffirm local authorities’ abilities to “safeguard their local area against urban sprawl, and to protect the green lungs around towns and cities”. The Government said that it wanted to make planning policy clear that housing need does not justify the harm done to the Green Belt by inappropriate development.

The new guidance read: “Do housing and economic needs override constraints on the use of land, such as Green Belt? - The NPPF should be read as a whole: need alone is not the only factor to be considered when drawing up a Local Plan. The Framework is clear that local planning authorities should, through their Local Plans, meet objectively assessed needs unless any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the Framework taken as a whole, or specific policies in the Framework indicate development should be restricted. Such policies include those relating to sites protected under the Birds and Habitats Directives, and/ or designated as sites of special scientific interest, land designated as Green Belt, local green space, an area of outstanding natural beauty, heritage coast or within a national park or the Broads; designated heritage assets; and locations at risk of flooding or coastal erosion.

The Framework makes clear that, once established, Green belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan.

Do local planning authorities have to meet in full housing needs identified in needs assessments? – Local authorities should prepare a Strategic Housing Market Assessment to assess their full housing needs. However, assessing need is just
the first stage in developing a Local Plan. Once need has been assessed, the local planning authority should prepare a strategic housing land availability assessment to establish realistic assumptions about the availability, suitability and likely economic viability of land to meet the identified need for housing over the plan period, and in so doing take account of any constraints such as Green Belt, which indicate that development should be restricted and which may restrain the ability of an authority to meet its need.”

On the 19 December 2014 the Planning Minister wrote to the Chief Executive at the Planning Inspectorate about Strategic Housing Market Assessments. This letter set out the relationship between housing figures produced as part of a Strategic Housing Market Assessment and those in a Local Plan and how to take into account constraints such as Green Belt land: “However, the outcome of a Strategic Housing Market Assessment is untested and should not automatically be seen as a proxy for a final housing requirement in Local Plans.

It does not immediately or in itself invalidate housing numbers in existing Local Plans. Councils will need to consider Strategic Housing Market Assessment evidence carefully and take adequate time to consider whether there area environmental and policy constraints, such as Green Belt, which will impact on their overall final housing requirement. They also need to consider whether there are opportunities to co-operate with neighbouring planning authorities to meet needs across housing market areas. Only after those considerations are complete will the council’s approach be tested at examination by an inspector. Clearly each council will need to work through this process to take account of particular local circumstances in responding to Strategic Housing Market Assessments”.

It is strongly of my opinion that the overall extent of development required in the borough necessary to meet the employment and housing needs in the borough, as set out in Policy S2, has not been satisfactorily defined having regard to the methodology summarised above.

The West Surrey Strategic Housing Market assessment (SHMA) assesses an Objectively Assessed Need (OAN) of 633 dwellings per annum “but does not take into account land supply or other constraints to development”, as per paragraph 1.2 of the Guildford Summary Report – October 2015. This figure is acknowledged as including upwards adjustments to support growth in student numbers and higher migration levels than are shown in the 2012-based Population Projections and represents an OAN 23% higher than need calculated through London sensitivity analysis, as per paragraphs 4.1 – 4.2 of the same Guildford summary Report.

Policy S2 of the Proposed Local Plan applies uncritically this OAN figure to identify a housing requirement of 13,860 dwellings for the plan period (20 years at 693 dwellings per annum). There is no evidence to indicate that in defining this figure GBC has undertaken a careful consideration of “whether there are environmental and policy constraints, such as Green Belt, which will impact on their overall final housing requirement” and which indicate that development should be restricted.

In my opinion, the Proposed Submission Local Plan’s proposal to make provision for 62% of this total dwelling requirement on land that is currently Green Belt is simply NOT ADEQUATELY JUSTIFIED OR SUPPORTED WITH SOUND ARGUMENT OR TAKING INTO ACCOUNT GOVERNMENT POLICY REGARDING THE PROTECTION OF GREENBELT AND EXCEPTIONAL CIRCUMSTANCES.

Furthermore, I also understand that GBC will not release details of the methodology used by their third party consultants to arrive at the OAN figures used, which, in my opinion, also makes the likelihood of the Proposed Local Plan being considered unsound in this respect. Given that these OAN figures then play such a fundamental role in many of the Site and Strategy issues (and in particular Site Allocation) I believe that much of the Proposed Local Plan is very much open to challenge, possibly including judicial review.

A disproportionate burden of meeting what GBC has chosen to define as its development needs is also proposed to fall on the more rural east of the borough.
Within this eastern area, West Horsley is then allocated to bear an excessive proportion of this proposed development (as stated above, circa 60% increase of the population of West Horsley), despite the numerous countervailing reasons and objections put forward in previous consultation rounds by many local residents (e.g. narrow roads; areas of flood risk; access to both senior and junior school places; medical facilities, parking availability at the station, etc.) If adopted, the draft plan will put an unsustainable pressure on all local resources and infrastructure.

I would further make the point that the Guildford Borough Economic Strategy 2013 – 2031 made no such case for siting large numbers of residential units within West Horsley. As previously stated, West Horsley is remote from the existing centres of employment and the new Economic Development Site proposals, which are focussed on the opposite side of the borough.

I just cannot understand why it is deemed necessary for such an excessive number of houses to be proposed to be built in West Horsley. To me it seems like total opportunism on behalf of GBC and local and owners which would be massively detrimental to the village of West Horsley.

I therefore **OBJECT to the borough housing targets set out in Policy S2.**

Furthermore, I am also concerned that all of the proposed Site Allocation sites are currently designated for years 1 – 5 of the plan, which I feel would only exacerbate local infrastructure problems.

**CHARACTER OF THE LOCAL AREA**

It is incredibly important that West Horsley’s local character, distinctiveness, history and architecture is clearly defined and then promoted and reinforced within the Proposed Local Plan. Poor or average design or execution within the village just cannot be accepted.

I therefore **SUPPORT Policy D1: Making better places;** where these sentiments are further reinforced by stating that “All developments will: …be laid out to make the best use of the natural features such as trees and hedges and levels, and enhance views into and out of the site….promote and reinforce local distinctiveness to create a sense of place….be expected to use art and materials of a nature appropriate to their setting”

Any new development should work to retain existing natural features and trees, rather than being allowed to clear all existing features to facilitate the standardised approach of volume house builders.

Also, and whilst I object to the principle of ‘inssetting’ so many rural villages and West Horsley in particular, in general terms I can also **SUPPORT Policy D4: Development in urban areas and inset villages.**

Furthermore, I **SUPPORT Policy H1: Homes for all,** particularly the statements under the heading Housing Mix; that states “New development should provide a mix of housing tenures, types and sizes appropriate to the site size, characteristics and location….. and under the heading Density states that ”New residential development is required to make the most efficient use of land whilst responding to local character, context and distinctiveness. Residential densities will vary dependent upon the local area context and character and the sustainability of the location.”

- **SITE ALLOCATION**

At present there are four sites in West Horsley included as sites allocated for development within the Proposed Local Plan. Two further sites are being proposed for East Horsley, one of which immediately abuts the West Horsley parish boundary, which will no doubt primarily utilise the same local resources and infrastructure.

The four sites allocated within West Horsley are:

- Policy A37 – Land at and to the rear of Bell & Colvill, Epsom Road, WH (40 homes / 1.4 hectare / 28.6 dwellings per hectare)
• Policy A38 - Land to the west of West Horsley (Manor Farm, between East Lane and Long Reach) (135 homes / 8.4 hectare / 16.1 dwellings per hectare).

• Policy A40 - Land to the north of West Horsley (Waterloo Farm at rear of Ockham Road North) (120 homes / 8 hectare / 15 dwellings per hectare).

• Policy A41 - Land to the south of West Horsley (on East Lane) (90 homes / 4.8 hectare / 18.8 per hectare).

This is a total of 385 homes on 22.6 hectares, at an average density of 17 per hectare.

ADDED, Policy A39 - Land near Horsley Railway Station (off Ockham Road North and at rear of Heatherdene) (100 homes / 5.7 hectare / 17.5 per hectare) is immediately abutting the West Horsley Parish boundary, however it is not in West Horsley (as referred to incorrectly on page 125 of the Proposed Submission Local Plan) but is actually in East Horsley.

I would reiterate that I am not opposed to new housing in West Horsley per se; however this scale of potential development in, and around, West Horsley is excessive. I would strongly question the need for the inclusion of all four sites and certainly not at the densities proposed.

In particular I would like to STRONGLY OBJECT to the inclusion of Policy A41: Land to the south of West Horsley.

The Policy A41 site is, in my opinion, essential to the village’s semi-rural identity and character and it is vitally important that this open green aspect is maintained through what is, in so many ways, the centre of the village.

If the Proposed Local Plan is adopted, Policy A41 would allow this open space to become the only development (existing or proposed) of any significant depth along the whole of the southern side of the East lane / The Street corridor and would severely compromise this ‘green gap’ between the northern and southern parts of West Horsley.

This is contrary to at least two of the five essential purposes of Green Belt as defined at NPPF paragraph 80 (namely to check unrestricted sprawl and to assist in safeguarding the countryside from encroachment – functions which this part of the Green Belt, including this site, is recognised as performing at paragraph 8.2 of the Guildford Green Belt and Countryside Study).

This site had not previously been include as a potential development site within previous draft versions of the emerging Local Plan and assessment of this site, in background studies forming the evidence base for this Site Allocation, is based on incorrect information.

In particular:

1. In the Guildford Borough Land Availability Assessment (LAA) 2016 – Page 388 in respect of site reference 2063 (‘the site of East Lane’) it states under ‘summary of land designations’ – “Green Belt adjoining settlement boundary”. This is incorrect. Unlike any of the other three sites proposed in West Horsley, this site currently has no boundary that adjoins the village Settlement boundary as defined in the GBC Local Plan 2003.

1. Also, The Guildford Borough Green Belt and Countryside Study produced by Pegasus Planning Group, Volume III – Appendix VI – Sustainability Walking Distance Plans for Land Surrounding the Villages refers to the above site, plus the field beyond that the Council now propose removing from the Green Belt (together with a section of Lollesworth Wood) as site D. All assumed walking paths to (i) Nearest Local Centre, (ii) Healthcare Facility and (iii) Railway Station are presuming that access could have been gained to Lollesworth Lane via the undesignated (save that it has been proposed to be removed from the Green Belt) field to the south and fronting Lollesworth Lane. This field is currently used for grazing sheep and is owned by Mr & Mrs. Richard Wills of Lollesworth Farm who are my direct neighbours and they have HAVE MADE IT ABUNDANTLY CLEAR TO ME THAT UNDER NO CIRCUMSTANCES WHATSOEVER THEY WILL PERMIT SUCH ACCESS ROUTE ACROSS THEIR FIELD, therefore the assumption used by Pegasus Planning Group is incorrect and may well have a material effect on their conclusions.
Furthermore, any development on this site would not be consistent with the distinctive settlement pattern of the village and the important relationship between the built environment and the surrounding landscape (i.e. development on one side of the route only). In my opinion, there will be considerable harm to important views of the village from surrounding landscape (from Lollesworth Lane) and from within the village of local landmarks (of Lollesworth Wood), contrary to Policy D4 of the Proposed Local Plan.

Allocation of the site will not “promote sustainable patterns of development” and the wildlife / environmental amenity loss of this site is likely to result in a significant detriment to the village’s character. Furthermore it will cause harm to the biodiversity and natural environment of the adjoining Lollesworth Wood SNCI. Indeed, this is contrary to Sustainability Objective 1 of the Sustainability Appraisal framework set out at Table 4.1 of the Guildford Borough Local Plan Sustainability Appraisal.

Indeed Policy I4: Green and blue infrastructure; states that “Permission will not be granted for proposals that are likely to materially harm the nature conservation interests of local sites unless clear justification is provided that the need for development clearly outweighs the impact on biodiversity.” Local Sites are earlier defined in the policy as including Sites of Nature Conservation Importance (SNCI).

I cannot think of any reason for this amendment, save for a potential second phase development in the next Local Plan and surely it cannot be considered to be justified by “exceptional circumstances” when no alternative use is currently proposed and its current and historic use is as pasture?

Added to which, if the allocation of this site under Policy A41 is adopted, the prospect of further infilling and extension of the village settlement defined in the 2003 Local Plan on adjacent undeveloped, but currently protected, sites south of East Lane and north of Lollesworth Wood would significantly increase, raising the chances of further subsequent harm to the Green Belt and the purposes for which it has been designated in this area. Development of any nature in this location would result in the greater risk of encroachment and merging between the two built settlements in West Horsley and would fundamentally harm to the existing open and natural character of the village.

The proposed amendment to the Green Belt boundary in this location, resulting from the allocation of the site, does not therefore potentially have sufficient regard to its intended permanence in the long term or its capacity of enduring beyond the plan period. Indeed, in my opinion it is contrary to NPPF paragraph 83.

Added to which and contrary to the guidance of NPPF paragraph 85 it has not been clearly defined using “physical features that are readily recognisable and likely to be permanent”. In my opinion, the proposed revision to the Green Belt boundary in this location has been poorly considered.

I would therefore specifically OBJECT to the amendment of the Green Belt in this area, to both the site encompassed by Policy A41 and to the field and wood beyond Policy A41 site, whereby an adjacent field and part of the Lollesworth Wood (SNCI & Ancient Wood designated) to the south have been removed from the Green Belt.

Finally, if any of the above mentioned five sites (four in West Horsley and one in East Horsley) are ultimately to be included within the adopted Local Plan then very careful consideration should be given to the proposed density of any future developments. I think that it far more appropriate that a density of circa 8-10 homes per hectare and a maximum density of 15 homes per hectare is more appropriate for such semi-rural village locations, and certainly are more in keeping with the village’s existing character and density. The existing village settlement largely comprises low density housing, with a considerable mix of ages and housing styles. The number of houses proposed on each of the potential development sites in West Horsley, and thereby their densities, are completely out of character with the existing village, where a density of around 8-10 homes per hectare is much nearer to the norm.

West Horsley requires a balanced mix of homes to meet the community’s needs. West Horsley will require some smaller scale ‘affordable’ homes, both for young people starting home ownership or independent rental and for more elderly residents who wish to downsize for obvious reasons. I believe that a significant number of the ‘affordable’ housing should be available for shared ownership, enabling younger people and families to gain a foothold on the housing ladder,
which they would otherwise be unable to due to the high cost of local housing. These younger residents would however contribute significantly to the fabric of the local community and would ensure a balanced community of all ages.

**TRANSPORT & HIGHWAY CONSIDERATIONS**

Any traffic generated from the proposed Site Allocation housing sites will further contribute to traffic congestion in the area. The existing road system is only appropriate for a semi-rural village, such as West Horsley; indeed its appearance and scale is one of the characteristics of the village.

Many of the traffic routes are little more than lanes, many with pavements on only one side of the carriageway. With many households now having at least two cars, the potential increase in traffic could overwhelm the existing infrastructure and lead to serious, and potentially life threatening, safety concerns.

No specific proposal as to how GBC intend to address these concerns has been detailed in the Local Plan or the Draft Guildford borough Infrastructure Delivery Plan 2016.

Furthermore, GBC are still championing the creation of a new significant settlement under Policy A35: Land at former Wisley Airfield, Ockham. This is potentially a double whammy for local infrastructure, and in particular local roads, from which it may never recover!

I would therefore **OBJECT** to Policy A35: Land at former Wisley airfield, Ockham.

Is at capacity. There is no adjacent land available for additional car parking provision. A significant increase in the village population will increase the pressure on station car parking and traffic movements to and from the station on already narrow and, at times, congested local roads.

There is currently a regular bus service operating along the A246 between Guildford and Leatherhead, however this is really only of use to residents at the southern end of West Horsley. There is also currently an extremely limited bus service along East Lane and The Street, through West Horsley village, which only operates 2 or 3 times per day between Monday to Friday only. There is no service at the weekends. Any significant development of new homes at this end of the village would necessitate an improvement in this service for it to be in any way considered sustainable.

In Policy I3: Sustainable transport for new developments; GBC proposes that “We will expect developments will contribute...”. The policy as drafted is weak and non-specific and as such has no real specific directive that developers must contribute towards sustainable transport and is open to abuse from developers or housebuilders.

I would therefore ask that **Policy I3: Sustainable transport for new developments should be AMENDED** to state that GBC require this rather than expect them!

**INFRASTRUCTURE**

West Horsley is a small village with few local facilities. There is currently just one shop at the southern end of the village, where local car parking is very limited. Most people in West Horsley already have to travel, largely by car, to East Horsley for their day to day shopping, banking, doctors visits etc. The existing car parking facilities in East Horsley are already at capacity and any increase in the local population will add to the already existing problems. Any new development would not “support the continued viability” of the existing village infrastructure, as has been said by GBC in the past. In my opinion it would only serve to overload the same beyond breaking point.

State educational provision, both at junior (The Raleigh) and senior (The Howard of Effingham) school level, is already under strain and has been a real and sensitive issue for Surrey County Council and the local community for some years. The Raleigh School, which endeavours to serve both West Horsley and East Horsley, is full every year and has been so for decades. Its site is already fully developed and the opportunities for further expansion are limited. The Raleigh has however recently indicated to local residents that it cannot further increase capacity on its existing site and is considering its options for relocating, raising further concern about possible future erosion and harm to the Green Belt.

Secondary school places are already restricted in number at the Howard of Effingham School for children from West Horsley and all other available secondary schools are considerably further afield in either Guildford or Woking. Potential
residential development in Effingham and Bookham would only further increase the problems for local West Horsley children, as children from these developments would, by being closer to the school, have priority. This, however, could push West Horsley children out of its potential catchment, with no currently sustainable local alternative.

I understand that a new junior school and senior school is proposed at the Wisley redevelopment site, although this will not be delivered until well into the plan period and certainly after the currently proposed residential development in West Horsley is well underway or finished.

In the Independent school sector, both Glenesk and Cranmore private schools are supported not just by local Horsley families, but also by many families from Guildford and other surrounding villages, some travelling significant distances. In term time each of these schools contributes to significant local traffic problems on Ockham Road North and the A246 respectively.

The Horsley Medical Centre is already at capacity, as it serves both East and West Horsley, and any additional development would necessitate an expansion of this facility. Possible extension is mentioned in the Draft Guildford borough Infrastructure Delivery Plan 2016 but scant detail, except for envisaged timescale, is given, which is completely unacceptable.

Finally, I also believe that the existing utilities infrastructure in the area would be further stretched, probably beyond acceptable limits.

Surface water drainage along East Lane has been a continual problem throughout the autumn and winter months. The addition of further built environment would just make these problems worse. I understand that Thames Water have already advised GBC that the area’s waste water network is unlikely to be able to support the demand anticipated from all the local developments.

I also understand that there may also be a serious under capacity of existing foul water sewers. The foul drainage system from West Horsley to the treatment works north of Ripley will, I understand, all need to be upgraded to cope with the increased demand. Thames Water has apparently advised GBC that a two or three year lead-in period will be needed to install the necessary waste water network and treatment capacity after planning permission for any significant development is granted. Unfortunately I’m sure that housing developers will not be waiting that period before they want to build / sell their new houses! This is clearly unacceptable and again shows a flaw in the proposals put out for consultation by GBC.

Water pressure in the area is already poor.

I note that GBC states in Item 4.6.1 that “Timely provision of suitable, adequate infrastructure is crucial to the well-being of the borough’s population, and its economy. Guildford Borough Infrastructure baseline 2013 summarises the capacity and quality of existing infrastructure, including planned improvements. Historically infrastructure provision and upgrading has not always kept pace with the growth of population, employment and transport demands, and in parts of the borough some infrastructure is currently at, or near to, capacity or of poor quality.” I have no doubt that West Horsley must fit into this category.

I was pleased to note that Policy I1: Infrastructure and delivery; states its aim as being “To support delivery of this Local Plan, infrastructure needed to support development should be provided and available when first needed to serve the occupants and users of the development...”. However it then goes on to say “where the timely provision of necessary supporting infrastructure is not secured, development may be phased to reflect infrastructure delivery, or will be refused.”

I don’t think that GBC can offer this “timely provision of necessary supporting infrastructure” – it either happens in full when developers commence construction or they are not granted planning permission.

WEST HORSELYS HISTORY

West Horsley has many listed buildings, flint and Lovelace houses and any new developments need to be built in keeping with the existing architechture and not just bland developments from the volume house builders.
CONCLUSION

I fully appreciate that more houses need to be built both for the young and the old but it needs to be measured, proportionate and not excessive (ie not increase the population of West Horsley by 60%) and the Green Belt which is a real asset to West Horsley, the borough, the county and the whole of the UK NEEDS TO BE PROTECTED AS FAR AS IS POSSIBLE. And thus all new housing should be built to a measured quantity (eg 120 houses in total in West Horsley with circa 25 houses on each site) and before any Green Belt avenue is explored existing brownfield sites close to areas of employment must and have to be utilised.I do not believe that the Proposed Submission Local Plan : Strategy and Sites 2016 has completely reviewed the possibilities for residential development on such land. The proven need (OAN) for the full extent of new housing proposed I completely disagree with. The proposed potential development in West Horsley is excessive and inappropriate and over dense and certain locations should be removed.

The inclusion of the proposed allocation to the south of West Horsley under Policy A41 is unsound in that, having regard to the advice at paragraph 182 of the NPPF. Allocation of this specific site and its Policy is neither consistent with national policy, nor is it justified. This proposed allocation site (Policy A41) should be removed from the Local Plan and it should be returned to the protection that its present Green Belt designation gives it. The case for “exceptional circumstances” has not been proven for the proposed change in Green Belt boundary here, and actually the same goes for many other locations in the borough.

- Also the proposed removal of the field and part of Lollesworth Wood to the south of the above site is completely wrong and should be reconsidered and returned to the protection that its present Green Belt designation gives it.. Added to which the field is owned by Mr and Mrs Richard Wills and they absolutely will not give access rights for a footpath through their land.

- I do not accept the case for “exceptional circumstances” has been proven for the proposed change in Green Belt boundary here either.

- High density development in West Horsley is completely inappropriate and a more appropriate level of density (as highlighted earlier) would be right for the village with small houses aswell as apartments for the young and old alike. To finish any significant new housing in West Horsley would need huge improvements in the existing infrastructure (education, doctors, drainage, parking, improvements of the road network).

It seems to me over the next 3-5 years West Horsley is line for a disproportionate no of new houses. If West Horsley sites Policy A37,38,40 and 41 and Policy A39 which immediately abuts the West Horsley Parish boundary are all built out that is just under 500 new houses, where the tarhet is 693 homes per year in the borough for 20 yrs – that is just under 15% of the boroughs quota per year which is clearly grossly excessive for West Horsley to be dealt this blow.

Why are 70% of new homes being proposed to be built on Green Belt or on other countryside. I object to building on the Green Belt because the essential characteristic of Green Belt is its openness and permanence (National Planning Policy Framework paragraph 79)

I object to the scale of new building throughout the borough, which is disproportionate and unjustified, particularly in West Horsley. I think the calculation of housing need is unsubstantiated. The model has not been scrutinised and fundamental assumptions are flawed. The housing target is unconstrained.

I object to the fact that brownfield land would be disproportionately used for commercial development and unnecessary retail expansion. This means Green Belt land is used for housing development unnecessarily.

I object to the fact that new sites have been proposed in this consultation which have not previously been considered, which is not appropriate at this stage.

OVERALL I OBJECT TO THE GUILDFORD BOROUGH PROPOSED SUBMISSION LOCAL PLAN : STRATEGY AND SITES 2016 as large parts are excessive, unsound and technically incorrect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I write regarding the above and ask that the following comments be taken into account when considering the same.

I live in the village of West Horsley and therefore many of my comments relate to the specific issues relating to that village alone.

The Issue

I am aware of Central Government’s desire to increase the UK’s housing provision, particularly in the South East, and within this context Guildford Borough Council (GBC) is under pressure to adopt a deliverable Local Plan for the borough for the period until 2031 and with particular reference to housing provision.

Within this context, I believe that the extra housing provision in discussion should ideally be located on existing brownfield sites within the borough and be located as near as possible to the centres of employment. I do not believe that the current document has given sufficient consideration to this issue, seeking instead an over-reliance on the proposed utilisation of the currently designated Green Belt land around local villages, particularly to the east of the borough, to meet such needs.

In my opinion (and this is formulated through extensive research and professional advice taken) this is a fundamental flaw in the Guildford borough Submission Local Plan 2016 (Proposed Local Plan) as it proposes extensive residential development that will be remote from the existing centres of employment or where indicated within the Proposed Local Plan; these being largely on the opposite side of the borough. Such a policy would be counter to the principles of sustainable development and would undoubtedly put further pressure on the already struggling transport infrastructure. I would like to see this approach rejected and the bulk of new proposed housing allocated nearer to the existing and proposed centres of employment, i.e. within and around Guildford town centre / urban area, rather than in the borough’s outlying, and previously protected, villages.

But I also think that semi-rural villages in the borough, such as West Horsley should and be expected to bear some of the brunt of the future housing provision as it is necessary to increase the number of houses within the village, amongst other reasons, for the young to be able to stay within the village and the older residents to have the opportunity to downsize within the village, but any such housing provision must only be allocated having considered many factors, such as: environmental issues (inc Green Belt), housing needs, local character and architecture, transport and highway situations, infrastructure (schooling, doctors, car parking in and around the village and at the rail stn, potn development sites amongst others.

I will therefore set out my views on each topic with regard to West Horsley below.

National Planning Policy Framework (NPPF), paragraph 182, advises that a Local Plan can only be adopted if it is sound.

As a matter of government policy, soundness requires a plan to be:

- positively prepared;
Within these four heads it should enable, over its plan period, the delivery of sustainable development in accordance with the NPPF.

I have several strong concerns as to whether this is the case within the Proposed Local Plan, as currently drafted, and believe that some of the current policies are not justified nor consistent with national policy, thereby rendering the same unsound without significant revision.

I therefore **OBJECT to the Guildford borough Proposed Submission Local Plan – Strategy & Sites 2016** as currently drafted.

**ENVIRONMENTAL ISSUES (INC. GREEN BELT)**

In my opinion, the Metropolitan Green Belt and its special natural environment is a defining characteristic of Guildford borough and, indeed, West Horsley.

I believe that there should remain a general presumption that it should be protected. The Green Belt should only be sacrificed as a last resort, as once lost it can never be reclaimed. Many many villages in Guildford borough are still threatened with removal from their long established Green Belt designation, including where I live, the village of West Horsley. Personally, I do not believe that West Horsley’s currently defined Settlement Area boundaries (ref. 2003 Local Plan) needs such a significant extension, as is being proposed, and perhaps only needs a smaller scale review. In this context, paragraph of Policy P2: Green Belt; is in my opinion so badly worded. For GBC to state “We will continue to protect the Metropolitan Green Belt, as shown on the proposals map, against inappropriate development” is not being represented at all in the way they are proposing removing so much of the Green Belt, and I do not agree with the proposals map and its proposed new Green Belt boundary.

The national policy regarding protection for the Green Belt is contained within section 9 of the NPPF. Paragraph 79 confirms that the Government attaches great importance to Green Belts.

The main and probably the most important aim of national Green Belt policy, which is repeated word for word by GBC in item 4.3.11, is to prevent urban sprawl by keeping land permanently open; the essential characteristics of the Green Belt being its openness and permanence.

As the Green Belt in Surrey is long established and has detailed boundaries, “exceptional circumstances” must be demonstrated to necessitate the change to its boundaries. I do not believe that this Proposed Local Plan is an “exceptional circumstance”.

Paragraph 84 of the NPPF advises that “When drawing up or reviewing Green Belt boundaries local planning authorities should take account of the need to promote sustainable patterns of development. They should consider the consequences for sustainable development of channelling development towards urban areas inside the Green Belt boundary, towards towns and villages inset within the Green Belt or towards locations beyond the outer Green Belt boundary”.

GBC states in item 4.3.12 that “national planning policy states that only those villages whose open character makes an important contribution to the openness of the Green Belt should be included in the Green Belt”.

I believe that West Horsley’s open, semi-rural character makes an important contribution to the openness of the Green Belt in this part of the borough. This is the specific and differentiating characteristic of West Horsley over its more ‘leafy’ and more tightly developed neighbour, East Horsley, which I believe GBC and its consultants have failed to recognise or protect.

It is a strong feeling that the semi-rural landscape character of the village is greatly valued by West Horsley residents and is detailed in general terms within the Guildford Borough Council Landscape Character Assessment.
A huge amount of the character of West Horsley is defined by the open views, (via paths, gates, farm entrance openings, bridle ways etc) from the roads either entering or passing through the village settlement.

Throughout the village, stretches of undeveloped countryside on just one side of Ockham Road North, then East Lane, Ripley Lane and Long Reasch, and also The Street boldly reinforce this characteristic. The clearly defined precedent is of the village settlement being on one side of the route and there being open vistas across fields and meadows and paddocks or into woodlands on the other. This should be protected not compromised by any developments.

Also the fact that the main traffic route through the village (along East Lane and The Street) currently benefits from a ‘green gap’ of woods and fields to the north (between The Rectory, roughly opposite Northcote Road to Grovelands Farm, beyond the railway bridge) and to the south (between Roundtree Farm and the listed Railway Cottages, at the Railway bridge). This natural green area, centred on the Lollesworth Lane and Long Reach junction, is in many ways the real centre of the village.

Clearly Green Belt everywhere is under pressure, but in my opinion, I strongly feel that any linear extensions of the existing settlement boundaries should be strongly resisted.

I therefore believe that the parish of West Horsley’s open, semi-rural, character does indeed make clear and important contribution to the openness of the Green Belt, and therefore I believe that, under national planning policy it should remain “washed over by” the Green Belt, rather than being “inset from the Green Belt” as proposed.

Policy on development with the Metropolitan Green Belt is set out in paragraphs 79 – 92 of the NPPF.

Inappropriate development is, by definition, harmful to Green Belt and paragraph 87 of the NPPF clearly states that it “should not be approved except in very special circumstances”. Furthermore paragraph 89 advises local planning authorities to “regard the construction of new buildings as inappropriate in Green Belt”.

Whilst I accept that it is possible for a local planning authority to conduct a review of Green Belt land and consider redefining boundaries which add or take away Green Belt land in order to meet these “very special circumstances”, paragraph 83 of the NPPF states, “Local planning authorities with Green Belts in their area should establish Green Belt boundaries in their Local Plans which set the framework for Green Belt and settlement policy. Once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. At that time, authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period.”

This paragraph clearly sets out that a Green Belt review should only happen in “exceptional circumstances”. This idea is further explained on in paragraph 82 as being “for example when planning for larger scale development such as new settlements or major urban extensions”. The proposals for West Horsley are neither a NEW SETTLEMENT NOR A MAJOR URBAN EXTENSION.

I note that within item 4.3.16 GBC states that “We consider that exceptional circumstances exist to justify the amendment of Green Belt boundaries in order to facilitate the development that is needed and to promote sustainable patterns of development.” - in my opinion these are absolutely not EXCEPTIONAL CIRCUMSTANCES and therefore I am requesting that this sentence is removed.

I cannot see how GBC have directed sustainable development towards existing urban areas and also have not directed it next towards town and villages already inset with the Green Belt.

Removal of any land from the Green Belt should only be allowed after long and thoughtful consideration of the individual sites concerned. I fear that the proposed ‘wholesale’ removal from being “washed over by the Green Belt” to being “inset within the Green Belt” will forever change the nature of West Horsley and, once lost, the character of our village and many surrounding villages will be changed for the worse forever and will clearly be irreversible, which would be a tragic and very sad loss to West Horsley.
I am therefore **OBJECTING to the proposals map and the proposed amendment of the Green Belt boundary around West Horsley** in particular. I would ask that the proposals map be rejected, reconsidered and amended.

**HOUSING NEED**

The target house building programme proposed by GBC represents a 25% increase in the housing stock of the borough, whilst we have been advised that the Office of national Statistics (ONS) projects a population increase of some 15% for the borough of Guildford over the same period, I THEREFORE CANNOT SEE OR UNDERSTAND WHY GBC DEEMS IT SO NECESSARY TO INCREASE THE TARGET HOUSE BUILDING PROGRAMME BY A 25% INCREASE IN THE HOUSING STOCK OF THE BOROUGH.

Without a doubt the proposed increase in the number of new houses required has NOT been proven for the village of West Horsley. In my opinion the Proposed Submission Local Plan in respect of West Horsley is excessive in terms of the potential residential provision currently indicated.

I do not believe that the scale of development proposed, in any way, reflects the actual need, or that it respects the local character and existing built density of the village. But I do strongly feel the Horsleys (both East and West) should have new houses built for reasons already stated (PARTICULARLY FOR THE YOUNG AND OLD) but in a much less excessive way. The necessity for 385 new houses on the four proposed sites is grossly excessive.

The population of West Horsley is circa 2828 – to build 385 houses with an increasing family size per household according to new data from Eurostat (according to a Telegraph article of August 2015) stating that the average of 2.4 children is now growing and there are more four baby families now in Britain than almost all of Europe. If we assume that it is still only 2.4 children per family then 385 houses will equate to circa 1700 people – that is a 60% increase on the already existing population of West Horsley – I cannot comprehend the thought process of GBC if they actually want to increase the population of West Horsley by 60% - the village will quite literally just not be able to cope in anyway whatsoever. If the population was increased by 15-20% then it would be necessary to build circa 130 more houses or circa 33 per the four proposed sites, which would be so much more appropriate and within the desires of circa 95% of the Horsleys (East and West).

I therefore **OBJECT** to the current site allocation and housing densities proposed for all four sites in West Horsley.

I understand that in March 2014 the Government published a new web-based Planning Practise Guidance (Housing & economic land availability assessment, Methodology – stage 5: Final evidence base, 6 March 2014) to accompany and give further detail about the policies in the NPPF. This guidance set out that unmet housing need in a particular area is unlikely to meet the “very special circumstances” test to justify development within the Green Belt. It states **“Unmet housing need is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development on a site within the Green Belt.”**

On 4th October 2014, I understand that the Government announced that it had updated its online Planning Practise Guidance. The aim of this was to reaffirm local authorities’ abilities to **“safeguard their local area against urban sprawl, and to protect the green lungs around towns and cities”**. The Government said that it wanted to make planning policy clear that **housing need does not justify the harm done to the Green Belt by inappropriate development.**

The new guidance read: **“Do housing and economic needs override constraints on the use of land, such as Green Belt? - The NPPF should be read as a whole: need alone is not the only factor to be considered when drawing up a Local Plan. The Framework is clear that local planning authorities should, through their Local Plans, meet objectively assessed needs unless any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the Framework taken as a whole, or specific policies in the Framework indicate development should be restricted. Such policies include those relating to sites protected under the Birds and Habitats Directives, and/or designated as sites of special scientific interest, land designated as Green Belt, local green space, an area of**
outstanding natural beauty, heritage coast or within a national park or the Broads; designated heritage assets; and locations at risk of flooding or coastal erosion.

The Framework makes clear that, once established, Green belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan.

Do local planning authorities have to meet in full housing needs identified in needs assessments? – Local authorities should prepare a Strategic Housing Market Assessment to assess their full housing needs. However, assessing need is just the first stage in developing a Local Plan. Once need has been assessed, the local planning authority should prepare a strategic housing land availability assessment to establish realistic assumptions about the availability, suitability and likely economic viability of land to meet the identified need for housing over the plan period, and in so doing take account of any constraints such as Green Belt, which indicate that development should be restricted and which may restrain the ability of an authority to meet its need.”

On the 19 December 2014 the Planning Minister wrote to the Chief Executive at the Planning Inspectorate about Strategic Housing Market Assessments. This letter set out the relationship between housing figures produced as part of a Strategic Housing Market Assessment and those in a Local Plan: “However, the outcome of a Strategic Housing Market Assessment is untested and should not automatically be seen as a proxy for a final housing requirement in Local Plans.

It does not immediately or in itself invalidate housing numbers in existing Local Plans. Councils will need to consider Strategic Housing Market Assessment evidence carefully and take adequate time to consider whether there area environmental and policy constraints, such as Green Belt, which will impact on their overall final housing requirement. They also need to consider whether there are opportunities to co-operate with neighbouring planning authorities to meet needs across housing market areas. Only after those considerations are complete will the council’s approach be tested at examination by an inspector. Clearly each council will need to work through this process to take account of particular local circumstances in responding to Strategic Housing Market Assessments”.

It is strongly of my opinion that the overall extent of development required in the borough necessary to meet the employment and housing needs in the borough, as set out in Policy S2, has not been satisfactorily defined having regard to the methodology summarised above.

The West Surrey Strategic Housing Market assessment (SHMA) assesses an Objectively Assessed Need (OAN) of 633 dwellings per annum “but does not take into account land supply or other constraints to development”, as per paragraph 1.2 of the Guildford Summary Report – October 2015. This figure is acknowledged as including upwards adjustments to support growth in student numbers and higher migration levels than are shown in the 2012-based Population Projections and represents an OAN 23% higher than need calculated through London sensitivity analysis, as per paragraphs 4.1 – 4.2 of the same Guildford summary Report.

Policy S2 of the Proposed Local Plan applies uncritically this OAN figure to identify a housing requirement of 13,860 dwellings for the plan period (20 years at 693 dwellings per annum). There is no evidence to indicate that in defining this figure GBC has undertaken a careful consideration of “whether there are environmental and policy constraints, such as Green Belt, which will impact on their overall final housing requirement” and which indicate that development should be restricted.

In my opinion, the Proposed Submission Local Plan’s proposal to make provision for 62% of this total dwelling requirement on land that is currently Green Belt is simply NOT ADEQUATELY JUSTIFIED OR SUPPORTED WITH SOUND ARGUEMENT OR TAKING INTO ACCOUNT GOVERNMENT POLICY REGARDING THE PROTECTION OF GREENBELT AND EXCEPTIONAL CIRCUMSTANCES.
Furthermore, I also understand that GBC will not release details of the methodology used by their third party consultants to arrive at the OAN figures used, which, in my opinion, also makes the likelihood of the Proposed Local Plan being considered unsound in this respect. Given that these OAN figures then play such a fundamental role in many of the Site and Strategy issues (and in particular Site Allocation) I believe that much of the Proposed Local Plan is very much open to challenge, possibly including judicial review.

A disproportionate burden of meeting what GBC has chosen to define as its development needs is also proposed to fall on the more rural east of the borough.

Within this eastern area, West Horsley is then allocated to bear an excessive proportion of this proposed development (as stated above, circa 60% increase of the population of West Horsley), despite the numerous countervailing reasons and objections put forward in previous consultation rounds by many local residents (e.g. narrow roads; areas of flood risk; access to both senior and junior school places; medical facilities, parking availability at the station, etc.) If adopted, the draft plan will put an unsustainable pressure on all local resources and infrastructure.

I would further make the point that the Guildford Borough Economic Strategy 2013 – 2031 made no such case for siting large numbers of residential units within West Horsley. As previously stated, West Horsley is remote from the existing centres of employment and the new Economic Development Site proposals, which are focussed on the opposite side of the borough.

I just cannot understand why it is deemed necessary for such an excessive number of houses to be proposed to be built in West Horsley. To me it seems like total opportunism on behalf of GBC and local and owners which would be massively detrimental to the village of West Horsley.

I therefore OBJECT to the borough housing targets set out in Policy S2.

Furthermore, I am also concerned that all of the proposed Site Allocation sites are currently designated for years 1 – 5 of the plan, which I feel would only exacerbate local infrastructure problems.

CHARACTER OF THE LOCAL AREA

It is incredibly important that West Horsley’s local character, distinctiveness, history and architecture is clearly defined and then promoted and reinforced within the Proposed Local Plan. Poor or average design or execution within the village just cannot be accepted.

I therefore SUPPORT Policy D1: Making better places; where these sentiments are further reinforced by stating that “All developments will: ...be laid out to make the best use of the natural features such as trees and hedges and levels, and enhance views into and out of the site....promote and reinforce local distinctiveness to create a sense of place....be expected to use art and materials of a nature appropriate to their setting”

Any new development should work to retain existing natural features and trees, rather than being allowed to clear all existing features to facilitate the standardised approach of volume house builders.

Also, and whilst I object to the principle of ‘insetting’ so many rural villages and West Horsley in particular, in general terms I can also SUPPORT Policy D4: Development in urban areas and inset villages.

Furthermore, I SUPPORT Policy H1: Homes for all, particularly the statements under the heading Housing Mix; that states “New development should provide a mix of housing tenures, types and sizes appropriate to the site size, characteristics and location..... and under the heading Density states that “New residential development is required to make the most efficient use of land whilst responding to local character, context and distinctiveness. Residential densities will vary dependent upon the local area context and character and the sustainability of the location.”
SITE ALLOCATION

At present there are four sites in West Horsley included as sites allocated for development within the Proposed Local Plan. Two further sites are being proposed for East Horsley, one of which immediately abuts the West Horsley parish boundary, which will no doubt primarily utilise the same local resources and infrastructure.

The four sites allocated within West Horsley are:

- Policy A37 – Land at and to the rear of Bell & Colvill, Epsom Road, WH (40 homes / 1.4 hectare / 28.6 dwellings per hectare)
- Policy A38 - Land to the west of West Horsley (Manor Farm, between East Lane and Long Reach) (135 homes / 8.4 hectare / 16.1 dwellings per hectare).
- Policy A40 - Land to the north of West Horsley (Waterloo Farm at rear of Ockham Road North) (120 homes / 8 hectare / 15 dwellings per hectare).
- Policy A41 - Land to the south of West Horsley (on East Lane) (90 homes / 4.8 hectare / 18.8 per hectare).

This is a total of 385 homes on 22.6 hectares, at an average density of 17 per hectare.

ADDED, Policy A39 - Land near Horsley Railway Station (off Ockham Road North and at rear of Heatherdene) (100 homes / 5.7 hectare / 17.5 per hectare) is immediately abutting the West Horsley Parish boundary, however it is not in West Horsley (as referred to incorrectly on page 125 of the Proposed Submission Local Plan) but is actually in East Horsley.

I would reiterate that I am not opposed to new housing in West Horsley per se; however this scale of potential development in, and around, West Horsley is excessive. I would strongly question the need for the inclusion of all four sites and certainly not at the densities proposed.

In particular I would like to STRONGLY OBJECT to the inclusion of Policy A41: Land to the south of West Horsley.

The Policy A41 site is, in my opinion, essential to the village’s semi-rural identity and character and it is vitally important that this open green aspect is maintained through what is, in so many ways, the centre of the village.

If the Proposed Local Plan is adopted, Policy A41 would allow this open space to become the only development (existing or proposed) of any significant depth along the whole of the southern side of the East lane / The Street corridor and would severely compromise this ‘green gap’ between the northern and southern parts of West Horsley.

This is contrary to at least two of the five essential purposes of Green Belt as defined at NPPF paragraph 80 (namely to check unrestricted sprawl and to assist in safeguarding the countryside from encroachment – functions which this part of the Green Belt, including this site, is recognised as performing at paragraph 8.2 of the Guildford Green Belt and Countryside Study).

This site had not previously been include as a potential development site within previous draft versions of the emerging Local Plan and assessment of this site, in background studies forming the evidence base for this Site Allocation, is based on incorrect information.

In particular:

1. In the Guildford Borough Land Availability Assessment (LAA) 2016 – Page 388 in respect of site reference 2063 (‘the site of East Lane’) it states under ‘summary of land designations’ – “Green Belt adjoining settlement boundary”. This is incorrect. Unlike any of the other three sites proposed in West Horsley, this site currently has no boundary that adjoins the village Settlement boundary as defined in the GBC Local Plan 2003.
1. Also, The Guildford Borough Green Belt and Countryside Study produced by Pegasus Planning Group, Volume III – Appendix VI – Sustainability Walking Distance Plans for Land Surrounding the Villages refers to the above site, plus the field beyond that the Council now propose removing from the Green Belt (together with a section of Lollesworth Wood) as site D. All assumed walking paths to (i) Nearest Local Centre, (ii) Healthcare Facility and (iii) Railway Station are presuming that access could have been gained to Lollesworth Lane via the undesignated (save that it has been proposed to be removed from the Green Belt) field to the south and fronting Lollesworth Lane. This field is currently used for grazing sheep and is owned by Mr & Mrs. Richard Wills of Lollesworth Farm who are my direct neighbours and they have HAVE MADE IT ABUNDANTLY CLEAR TO ME THAT UNDER NO CIRCUMSTANCES WHATSOEVER THEY WILL PERMIT SUCH ACCESS ROUTE ACROSS THEIR FIELD, therefore the assumption used by Pegasus Planning Group is incorrect and may well have a material effect on their conclusions.

Furthermore, any development on this site would not be consistent with the distinctive settlement pattern of the village and the important relationship between the built environment and the surrounding landscape (i.e. development on one side of the route only). In my opinion, there will be considerable harm to important views of the village from surrounding landscape (from Lollesworth Lane) and from within the village of local landmarks (of Lollesworth Wood), contrary to Policy D4 of the Proposed Local Plan.

Allocation of the site will not “promote sustainable patterns of development” and the wildlife / environmental amenity loss of this site is likely to result in a significant detriment to the village’s character. Furthermore it will cause harm to the biodiversity and natural environment of the adjoining Lollesworth Wood SNCI. Indeed, this is contrary to Sustainability Objective 1 of the Sustainability Appraisal framework set out at Table 4.1 of the Guildford Borough Local Plan Sustainability Appraisal.

Indeed Policy I4: Green and blue infrastructure; states that “Permission will not be granted for proposals that are likely to materially harm the nature conservation interests of local sites unless clear justification is provided that the need for development clearly outweighs the impact on biodiversity.” Local Sites are earlier defined in the policy as including Sites of Nature Conservation Importance (SNCI).

I cannot think of any reason for this amendment, save for a potential second phase development in the next Local Plan and surely it cannot be considered to be justified by “exceptional circumstances” when no alternative use is currently proposed and its current and historic use is as pasture?

Added to which, if the allocation of this site under Policy A41 is adopted, the prospect of further infilling and extension of the village settlement defined in the 2003 Local Plan on adjacent undeveloped, but currently protected, sites south of East Lane and north of Lollesworth Wood would significantly increase, raising the chances of further subsequent harm to the Green Belt and the purposes for which it has been designated in this area. Development of any nature in this location would result in the greater risk of encroachment and merging between the two built settlements in West Horsley and would fundamentally harm to the existing open and natural character of the village.

The proposed amendment to the Green Belt boundary in this location, resulting from the allocation of the site, does not therefore potentially have sufficient regard to its intended permanence in the long term or its capacity of enduring beyond the plan period. Indeed, in my opinion it is contrary to NPPF paragraph 83.

Added to which and contrary to the guidance of NPPF paragraph 85 it has not been clearly defined using “physical features that are readily recognisable and likely to be permanent”. In my opinion, the proposed revision to the Green Belt boundary in this location has been poorly considered.

I would therefore specifically OBJECT to the amendment of the Green Belt in this area, to both the site encompassed by Policy A41 and to the field and wood beyond Policy A41 site, whereby an adjacent field and part of the Lollesworth Wood (SNCI & Ancient Wood designated) to the south have been removed from the Green Belt.

Finally, if any of the above mentioned five sites (four in West Horsley and one in East Horsley) are ultimately to be included within the adopted Local Plan then very careful consideration should be given to the proposed density of any
future developments. I think that it far more appropriate that a density of circa 8-10 homes per hectare and a maximum
density of 15 homes per hectare is more appropriate for such semi-rural village locations, and certainly are more in
keeping with the village’s existing character and density. The existing village settlement largely comprises low density
housing, with a considerable mix of ages and housing styles. The number of houses proposed on each of the potential
development sites in West Horsley, and thereby their densities, are completely out of character with the existing village,
where a density of around 8-10 homes per hectare is much nearer to the norm.

West Horsley requires a balanced mix of homes to meet the community’s needs. West Horsley will require some smaller
scale ‘affordable’ homes, both for young people starting home ownership or independent rental and for more elderly
residents who wish to downsize for obvious reasons. I believe that a significant number of the ‘affordable’ housing
should be available for shared ownership, enabling younger people and families to gain a foothold on the housing ladder,
which they would otherwise be unable to due to the high cost of local housing. These younger residents would however
contribute significantly to the fabric of the local community and would ensure a balanced community of all ages.

**TRANSPORT & HIGHWAY CONSIDERATIONS**

Any traffic generated from the proposed Site Allocation housing sites will further contribute to traffic congestion in the
area. The existing road system is only appropriate for a semi-rural village, such as West Horsley; indeed its appearance
and scale is one of the characteristics of the village.

Many of the traffic routes are little more than lanes, many with pavements on only one side of the carriageway. With
many households now having at least two cars, the potential increase in traffic could overwhelm the existing
infrastructure and lead to serious, and potentially life threatening, safety concerns.

No specific proposal as to how GBC intend to address these concerns has been detailed in the Local Plan or the Draft
Guildford borough Infrastructure Delivery Plan 2016.

Furthermore, GBC are still championing the creation of a new significant settlement under Policy A35: Land at former
Wisley Airfield, Ockham. This is potentially a double whammy for local infrastructure, and in particular local roads, from
which it may never recover!

I would therefore **OBJECT to Policy A35: Land at former Wisley airfield, Ockham.**

Is at capacity. There is no adjacent land available for additional car parking provision. A significant increase in the village
population will increase the pressure on station car parking and traffic movements to and from the station on already
narrow and, at times, congested local roads.

There is currently a regular bus service operating along the A246 between Guildford and Leatherhead, however this is
really only of use to residents at the southern end of West Horsley. There is also currently an extremely limited bus
service along East Lane and The Street, through West Horsley village, which only operates 2 or 3 times per day between
Monday to Friday only. There is no service at the weekends. Any significant development of new homes at this end of the
village would necessitate an improvement in this service for it to be in any way considered sustainable.

In Policy I3: Sustainable transport for new developments; GBC proposes that "*We will expect developments will
contribute* .... The policy as drafted is weak and non-specific and as such has no real specific directive that developers
must contribute towards sustainable transport and is open to abuse from developers or housebuilders.

I would therefore ask that **Policy I3: Sustainable transport for new developments should be AMENDED** to state that
GBC require this rather than expect them!

**INFRASTRUCTURE**

West Horsley is a small village with few local facilities. There is currently just one shop at the southern end of the village,
where local car parking is very limited. Most people in West Horsley already have to travel, largely by car, to East
Horsley for their day to day shopping, banking, doctors visits etc. The existing car parking facilities in East Horsley are
already at capacity and any increase in the local population will add to the already existing problems. Any new
development would not “support the continued viability” of the existing village infrastructure, as has been said by GBC in the past. In my opinion it would only serve to overload the same beyond breaking point.

State educational provision, both at junior (The Raleigh) and senior (The Howard of Effingham) school level, is already under strain and has been a real and sensitive issue for Surrey County Council and the local community for some years. The Raleigh School, which endeavours to serve both West Horsley and East Horsley, is full every year and has been so for decades. Its site is already fully developed and the opportunities for further expansion are limited. The Raleigh has however recently indicated to local residents that it cannot further increase capacity on its existing site and is considering its options for relocating, raising further concern about possible future erosion and harm to the Green Belt.

Secondary school places are already restricted in number at the Howard of Effingham School for children from West Horsley and all other available secondary schools are considerably further afield in either Guildford or Woking. Potential residential development in Effingham and Bookham would only further increase the problems for local West Horsley children, as children from these developments would, by being closer to the school, have priority. This, however, could push West Horsley children out of its potential catchment, with no currently sustainable local alternative.

I understand that a new junior school and senior school is proposed at the Wisley redevelopment site, although this will not be delivered until well into the plan period and certainly after the currently proposed residential development in West Horsley is well underway or finished.

In the Independent school sector, both Glenesk and Cranmore private schools are supported not just by local Horsley families, but also by many families from Guildford and other surrounding villages, some travelling significant distances. In term time each of these schools contributes to significant local traffic problems on Ockham Road North and the A246 respectively.

The Horsley Medical Centre is already at capacity, as it serves both East and West Horsley, and any additional development would necessitate an expansion of this facility. Possible extension is mentioned in the Draft Guildford Borough Infrastructure Delivery Plan 2016 but scant detail, except for envisaged timescale, is given, which is completely unacceptable.

Finally, I also believe that the existing utilities infrastructure in the area would be further stretched, probably beyond acceptable limits.

Surface water drainage along East Lane has been a continual problem throughout the autumn and winter months. The addition of further built environment would just make these problems. I understand that Thames Water have already advised GBC that the area’s waste water network is unlikely to be able to support the demand anticipated from all the local developments.

I also understand that there may also be a serious under capacity of existing foul water sewers. The foul drainage system from West Horsley to the treatment works north of Ripley will, I understand, all need to be upgraded to cope with the increased demand. Thames Water has apparently advised that a two or three year lead-in period will be needed to install the necessary waste water network and treatment capacity after planning permission for any significant development is granted. Unfortunately I’m sure that housing developers will not be waiting that period before they want to build / sell their new houses! This is clearly unacceptable and again shows a flaw in the proposals put out for consultation by GBC.

Water pressure in the area is already poor.

I note that GBC states in Item 4.6.1 that “Timely provision of suitable, adequate infrastructure is crucial to the well-being of the borough’s population, and its economy. Guildford Borough Infrastructure baseline 2013 summarises the capacity and quality of existing infrastructure, including planned improvements. Historically infrastructure provision and upgrading has not always kept pace with the growth of population, employment and transport demands, and in parts of the borough some infrastructure is currently at, or near to, capacity or of poor quality.” I have no doubt that West Horsley must fit into this category.

I was pleased to note that Policy I1: Infrastructure and delivery; states its aim as being “To support delivery of this Local Plan, infrastructure needed to support development should be provided and available when first needed to serve the
occupants and users of the development...”. However it then goes on to say “where the timely provision of necessary supporting infrastructure is not secured, development may be phased to reflect infrastructure delivery, or will be refused.”

I don’t think that GBC can offer this “timely provision of necessary supporting infrastructure” – it either happens in full when developers commence construction or they are not granted planning permission.

WEST HORSLEYS HISTORY

West Horsley has many listed buildings, flint and Lovelace houses and any new developments need to be built in keeping with the existing architecture and not just bland developments from the volume house builders.

CONCLUSION

I fully appreciate that more houses need to be built both for the young and the old but it needs to be measured, proportionate and not excessive (ie not increase the population of West Horsley by 60%) and the Green Belt which is a real asset to West Horsley, the borough, the county and the whole of the UK NEEDS TO BE PROTECTED AS FAR AS IS POSSIBLE. And thus all new housing should be built to a measured quantity (eg 120 houses in total in West Horsley with circa 25 houses on each site) and before any Green Belt avenue is explored existing brownfield sites close to areas of employment must and have to be utilised.I do not believe that the Proposed Submission Local Plan : Strategy and Sites 2016 has completely reviewed the possibilities for residential development on such land. The proven need (OAN) for the full extent of new housing proposed I completely disagree with. The proposed potential development in West Horsley is excessive and inappropriate and over dense and certain locations should be removed.

The inclusion of the proposed allocation to the south of West Horsley under Policy A41 is unsound in that, having regard to the above at paragraph 182 of the NPPF. Allocation of this specific site and its Policy is neither consistent with national policy, nor is it justified. This proposed allocation site (Policy A41) should be removed from the Local Plan and it should be returned to the protection that its present Green Belt designation gives it. The case for “exceptional circumstances” has not been proven for the proposed change in Green Belt boundary here, and actually the same goes for many other locations in the borough.

- Also the proposed removal of the field and part of Lollesworth Wood to the south of the above site is completely wrong and should be reconsidered and returned to the protection that its present Green Belt designation gives it. Added to which the field is owned by Mr and Mrs Richard Wills and they absolutely will not give access rights for a footpath through their land.
- I do not accept the case for “exceptional circumstances” has been proven for the proposed change in Green Belt boundary here either.
- High density development in West Horsley is completely inappropriate and a more appropriate level of density (as highlighted earlier) would be right for the village with small houses aswell as apartments for the young and old alike. To finish any significant new housing in West Horsley would need huge improvements in the existing infrastructure (education, doctors, drainage, parking, improvements of the road network).

It seems to me over the next 3-5 years West Horsley is line for a disproportionate no of new houses. If West Horsley sites Policy A37,38,40 and 41 and Policy A39 which immediately abuts the West Horsley Parish boundary are all built out that is just under 500 new houses, where the target is 693 homes per year in the borough for 20 yrs – that is just under 15% of the boroughs quota per year which is clearly grossly excessive for West Horsley to deal this blow.

Why are 70% of new homes being proposed to be built on Green Belt or on other countryside. I object to building on the Green Belt because the essential characteristic of Green Belt is its openness and permanence (National Planning Policy Framework paragraph 79)
I object to the scale of new building throughout the borough, which is disproportionate and unjustified, particularly in West Horsley. I think the calculation of housing need is unsubstantiated. The model has not been scrutinised and fundamental assumptions are flawed. The housing target is unconstrained.

I object to the fact that brownfield land would be disproportionately used for commercial development and unnecessary retail expansion. This means Green Belt land is used for housing development unnecessarily.

I object to the fact that new sites have been proposed in this consultation which have not previously been considered, which is not appropriate at this stage.

OVERALL I OBJECT TO THE GUILDFORD BOROUGH PROPOSED SUBMISSION LOCAL PLAN: STRATEGY AND SITES 2016 as large parts are excessive, unsound and technically incorrect.

Re: Major doubt concerning housing numbers. The inflated number of new houses proposed arises from a Strategic Housing Market Assessment (SHMA) that was generated by a consultant’s mathematical model which is not revealed in the plan. Nor, apparently, to Guildford Borough Council, GBC. This SHMA target housing number is then further increased by GBC to give a population increase which is almost 70% higher than the official national estimates for population growth in the borough. The scale of this increase has alarming results eg., an increase of up to 35% in existing West Horsley households – greater than any other single area in the borough.

Attached documents:
I write to you to provide my objections to the Proposed Submission Local Plan.

I am a resident of West Horsley and I am deeply dismayed by the scale of the building that is proposed in this area.

The summary for Horsley is:
- Removal of greenbelt land
- 35% additional housing by numbers
- New housing at a significantly higher density than is typical in these villages
- Development completed within 5 years without any proposed increase to supporting local amenities

When reviewing the data to support the proposed plans I find it very difficult to determine what evidence is behind the number and density of the housing proposed for this villages of Horsley. The source of the data to support population growth is absent.

The proposed plans will irrevocably change the Horsley villages. The local plan does not represent a plan that considers the character and sustainability of the village of Horsley.

I strongly urge the independent assessor to visit the villages of Horsley to see first hand how the village is today.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• The proposed scale of development in West Horsley will result in dramatic permanent change to the character of the area, and is unsustainable given the local infrastructure. The local schools are over-subscribed and full every year; the doctors surgery in East Horsley is invariably busy today and appointments hard to come by; the roads (especially Ockham Road North/South and East Lane) are very busy at peak times; and the basic services, especially sewerage/drainage, are already incapable of dealing with the current demand as the widespread flooding that invariably accompanies periods of heavy rainfall in the village shows (further development will mean more surface water runoff, and more immediate demand on outdated sewers and storm drains which in turn will mean more flash flood episodes around the village).

• Additionally, there is no proven case for the supposed demand for such a large number of houses in this area. West Horsley Parish Council’s own analysis suggests that approximately 20 properties would be needed in order to meet demand from local people otherwise unable to stay living in the village - a development of that scale and for that explicit purpose would be entirely understood, but what is proposed is anything but. It is unreasonable to expect a few villages in the Borough (of which West Horsley is the most extreme case) to take a share of the burden of future development that is wholly disproportionate to the scale of those villages today, when the equivalent number of houses added to already well-established urban centres (e.g. Guildford) would result in far less significant change to the character of the area.

• Removing the Horsleys from the Green Belt is fundamentally unjustified and contrary to the stated Government policy (see Hansard ref. Queen’s Speech, 5th June 2014). GBC’s need to find space for housing does not constitute an “exceptional circumstance” that could in principle otherwise justify the deletion of the Green Belt designation. Removing the village(s) from the Green Belt will lead to further urban sprawl and the unique character and community of East and West Horsley, as well as that of much of the surrounding countryside, will be lost forever to future generations. It is furthermore key to note that the National Trust aspire to pursue the further northward extension of the current Surrey Hills AONB to cover this area, which provides recognition at the most significant level of the importance of the rural nature of this region.

• The scale of the proposed Wisley Airfield development is hugely out of keeping with the local area, and a development of that magnitude will have an unsustainable impact on our shared infrastructure, not least on the A3 which already experiences long tailbacks at peak times around the Ockham Park and M25 junctions (which will be those most burdened by the addition of such a large, new town on the airfield site) and on the already overcrowded South West Trains railway service from Horsley into London and Guildford.

I trust that you will take this opportunity to revise these points in the Local Plan, and insodoing ensure that future generations are able to benefit from the rurality of this area as much as previous generations have done.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I wish to object to the removal of West Horsley from the green belt. There appears to be no exceptional circumstances or other justification for the new Green Belt boundaries. West Horsley’s defined current defined Settlement Area boundaries do not need to be extended. West Horsley is a rural village at the foot of the North Downs, partly in the Surrey Hills AONB, extending the settlement area will turn it in to a quite different and more urban place that will detract from the green belt and interfere with views from such places as Sheepleas – with an outlook over an urban area.
Adding to the current settlement in this piecemeal way will just add strain to an already stretched infrastructure – roads, shops, schools and the medical centre. This issue not addressed in the local plan and no evidence is given as to how this change would be sustainable.

The development proposals would also be at a higher densities than the village currently is. This would make the village unbalanced and a totally different place. There is no evidence of the need for 385 new homes in West Horsley. Local surveys show that there is the need for a small number of affordable homes for local people not large estates. The proportion of dwellings proposed for the green belt areas is disproportionate to those proposed for brownfield sites in Guildford itself which are much more sustainable being served by Public Transport, employment and other facilities. Brownfield sites should be developed first before there is an consideration of building on the green belt.

If all developments outlined in the plan were to go ahead Guildford would be left sitting in an urban area surrounded by suburbs rather than at the moment surrounded by a rural hinterland with villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I therefore object to the development on the grounds of its severe impact on local schools.

**Incompatibility of the proposed development of Wisley Airfield with the character of the surrounding area**

I understand that it is part of planning policy that new developments should be in keeping with the local character, context and distinctiveness.

However the proposed development will create a new settlement that will be larger than any other settlement in Guildford Borough, outside of Guildford itself, in an area that is characterised by small developments in a country / rural setting.

Furthermore the density of around 49 dwellings per hectare of the proposed development compares to an overall density of around 8 dwellings per hectare in East Horsley. Clearly the density of the proposed development is out of keeping with that of the surrounding area.

Also, the development includes the building of five-storey apartment blocks. As there are no such buildings in the area, this is obviously out of keeping with the local area.

I therefore object to the development on the grounds that it is entirely out of character with the surrounding area.

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

I have been a resident of West Horsley since 1976. We selected this area for its quiet, rural charm and the last 40 years have not disappointed.

The proposal to take East and West Horsley out of the Green Belt is unacceptable when there are other more suitable and less damaging options; there are brownfield sites in the area and only when all such sites are developed should more sensitive areas be carefully considered. In my view, the development of Wisley Airfield is an obvious unused brownfield site with space, and excellent access, for the creation of a new development with all the infrastructure needed to take the pressure off local schools, doctors’ surgeries and shops. A large development on this site could provide housing needs for 10-15 years.

I feel that the first line of Policy P2 – “we will continue to protect the Metropolitan Green Belt against inappropriate development” should not be treated as a casual remark and should be guarded very responsibly by those who live in and care for this rural and special area. Short sighted and short term solutions to cater for housing needs must not be allowed to damage protect countryside.

**OBJECTION TO “THE GUILDFORD PLAN” – JUNE 2016” (sent by email)**

As a very frequent visitor to see my brother, sister-in-law and nephew who live in West Horsley, I am dismayed at the proposals for future housing developments in the West and East Horsley parishes contained in the “Guildford Borough Proposed Submission Local Plan: Strategy and Sites – June 2016” (The Guildford Plan).

The proposal that you can increase the number of households by 35% is hard to comprehend particularly when there seems to have been little or no consideration in “The Guildford Plan” of the effect such a huge increase will undoubtedly have on the local infrastructure and services.

As a Surrey resident myself, I understand the need for building more affordable housing in the County, but the proposals on the scale set out in the Plan are way in excess of what is acceptable and sustainable.

In view of my observations set out above, I strongly object to the proposals set out in the “The Guildford Plan” and urge the Council to have a serious reconsideration about the numbers and sizes of developments proposed and come up with a much more realistic Plan in keeping with the local infrastructure, services and rural setting.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT ESPECIALLY TO 6 POLICIES: A36, A37, A38, A39, A40 & A41: • Amount of new housing far exceeds local need. • Housing density excessive when compared with existing development. • Would transform the Horsleys into a sizable town, something for which no case is made. • No local support. • Collective impact of these 6 sites on a small part of the borough not considered. Should not be treated as isolated, separate sites. • Total amount of new building out of scale with the planned development elsewhere the borough, especially less sensitive urban areas not protected by Green Belt. • Sites unsustainable. Key infrastructure lacking. No adequate provision is made to increase it – e.g. poor wastewater capacity, lack of schools, absence of traffic management plan, flooding. • No account taken of additional impact of Wisley Airfield site on Horsleys. • Extension of settlement boundaries too permissive. Horsleys characterised by streets with development along only one side of the road. Policies allow too many adjacent green fields to be developed by squaring off boundaries and claiming they don’t contribute to Green Belt “openness”.

Secondly, I specifically **object** to policies A36, A37, A38 A39, A40 and A41. The proposed developments will utterly change, irrevocably, the nature and character of the villages of East and West Horsley.

What is being proposed - more than 500 homes and a 35% increase - changes the Horsley’s from a village into a small town overnight. To my mind this is crazy, insensitive, unjustified and sadly, plain wrong.

Also, the scale of the proposed developments, and % increase in the housing stock, is utterly out of proportion with what is being proposed elsewhere in the Borough.

Over the past years considerable houses have been built, both villages, but at a moderate rate. This has resulted in turning a peaceful place, into a busy and at times a congested and much noisier place to live. Without any major improvements in the roads and services, in particular the amount of car parking available near the shops.

Whilst accepting the need for some continued piecemeal small scale developments, the proposals for the size of developments you propose, are unacceptable if the village is to remain an attractive place to live.

You have not provided the reasons for the removal of the Horsleys from the GREEN BELT, other than your own drive to meet unrealistic Government targets. We are well aware of your proposals for other near by sites, which if proceeded with will place further strain on the roads and other services in this area. Only the other day I could not make a appointment a the Surgery without a six day wait to see a doctor

Section page number  Page 537 of 599  Document page number 654
I would like to register my objections to the proposed draft plan and the removal of East and West Horsley from the Green Belt. Detailed Objections below:

Transport

I object to the draft local plan because of the strain it would put on the rail service. I use the train into London regularly and they are already very crowded before 8.30am in the mornings. The trains would not be able to cope with the increase in passengers with the proposed development. In addition you already struggle to park in the station car park at Horsley and this will only get worse. There is currently nowhere to extend this car park so it will just be nightmare trying to use the train.

Traffic & Parking

I object to the draft local plan because of the increase in traffic and the strain put on the road infrastructure and parking. A lot of local roads are already in a poor condition and increased traffic will put additional strain on them. Parking at Horsley & Effingham junction stations (which is already at capacity), the shops, medical centre and at the village halls will all be adversely affected. I already struggle to park at the medical centre for some appointments and have had to park ‘unauthorised’ at the East Horsley village hall or in a side road.

Doctors Services

I object to the draft local plan because of the strain that will be put on the Medical Centre. It is very difficult to get an appointment at short notice already and the proposed increase in houses and consequently people will exacerbate the situation.

Loss of Green Belt land:

I object to the removal of East and West Horsley from the Green Belt because this is a beautiful area of surrey and if we continue to build on our countryside it won’t be many decades before we have none left. Getting out in the countryside has really good health benefits both mentally and physically, turning East and West Horsley into a built up area will have an adverse affect on the lives of all the people who live here.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Doctors Services

I object to the draft local plan because the doctors’ surgery in East Horsley is already pretty much at capacity and adding more patients would result in unacceptable delays for appointments and service, possibly leading to the threat of life.

Transport

I object to the draft local plan because there simply isn’t capacity on the rail network to satisfy the expected needs of new commuters. The station car park is at capacity and many rush-hour trains are already close to full.

Traffic & Parking

I object to the draft local plan because the size and capacity of the roads isn’t capable of coping with the additional traffic caused by additional housing. Extra local traffic would cause further pot-holes to the already worn roads. Traffic at rush-hour/school times is already causing queuing at main junctions.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I am writing to voice my objections with regards to the proposed plans as detailed below:

1. I object to the Local Plan with regard to the amount of house building that is planned in East and West Horsley. This will have cause irrevocable damage to the community and character of these two villages and the surrounding area. This extra amount of houses is wholly inappropriate for villages of this size.

2. I also object to the extra traffic these plans will bring into the area. Most of the roads around here are quite narrow and not suitable for a large influx of traffic on a daily basis. The Ockham access to the A3 is already congested in the morning and this will only make matters worse, leading to more accidents and hold ups.

3. I also object to the removal of the protection of the Green Belt, for the areas around The Horsleys, Effingham, Ripley, Clandon and Send. This will see the extension of urban sprawl out from Leatherhead and along the A3. Our British Wildlife is already under increasing pressure from changing farming practices and loss of habitat, especially hedgerows and this kind of development will only continue that decline due to more loss of habitat and bio diversity. Plans for house building should be utilising Brownfield sites such as the one at Burnt Common, rather than carving up our Green Belt. Also, the directive from The Government, clearly states that housing need is not sufficient cause to encroach on the Green Belt.

4. I object to this Guildford Borough Wide Strategy of a proposed 13,860 new houses without any constraints. This is wildly different from many other Borough Councils in Surrey. Also, there appears to be a disproportionate amount of development earmarked for this area, as it represents 36% of the total housing planned for the whole Borough and the area around here is only a small proportion of the whole Borough area.

I certainly hope that common sense will prevail and a consideration of what we will lose as a Borough if this erosion of the Green Belt is allowed. If this plan goes ahead the generations to come will suffer from the lack of green space and countryside within easy reach of their homes. Once the Green Belt has gone it can not be replaced, it will be gone forever!

I am horrified at the plans for building in the Horsleys where we have lived for many years. We chose to live here as they are villages, not towns. The Conservatives at the last election promised to keep Horsley in the green belt and protect it. How can we ever trust politicians who renege on their promises? The number of houses that your draft plan says is needed is based on growth that is now not valid as we have left the European Union.

The local roads are now full of traffic and will be unable to cope with lots more cars. The schools and doctors are full. Junction 10 on the M25 is very often blocked - it will be unable to handle significantly more traffic.

We want to continue to live in a village where we can have lots of open spaces to walk with children and dogs. We do not want the spaces filled with lots of rabbit hutch houses with postage stamp gardens. Houses like that are still going to be unaffordable for youngsters.

Why doesn't the government develop less advantaged regions of the UK?

I object to all policies involving building in the green belt. Why were the clearly expressed views of residents in previous consultations ignored?

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I am writing to object to the proposals to remove West Horsley village from the Green Belt by insetting and adding up to 385 homes to four Development sites in the village as laid out in The Guildford Plan.

The proposals as set out in The Guildford plan fail to provide adequate justification or exceptional circumstances for the proposed insetting of West Horsley and will only serve to have a significant detrimental effect on the village and its environment. Also, the proposed addition of 385 homes is completely inappropriate for the size of the village and would not be sustainable for the following reasons:
