Proposed Submission Local Plan Regulation 19 representations (2016 and 2017)

Document part: Question 1 - The evidence base and submission documents
Proposed Submission Local Plan Regulation 19 representations (2016 and 2017)

**Question 1 (2016):** Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

**Question 1 (2017):** With regard to the proposed changes to the plan and evidence produced or updated since 18 July 2016, do you agree that the evidence used for the Proposed Submission Local Plan: strategy and sites (2017) is adequate, up-to-date and relevant?

**Comment ID:** SQLP16/2059  **Respondent:** 8556385 / Guildford Residents Association, EGRA (Amanda Mullarkey)

**Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

**Answer:**

**GRA Comment:** Key parts of the evidence are missing, flawed or based on withheld assumptions. The Strategic Housing Market Assessment overstates housing need, the Green Belt and Countryside Study uses a flawed approach and the Transport evidence is too late and incomplete to be relied upon to inform the Plan.

**Strategic Housing Market Assessment**

The “objectively assessed need” figure of **693 homes a year is too high.**

A professional review by NMSS (see Appendix 1) has concluded that, even basing the calculations on a period of stronger economic and student growth, **the housing need figure should be revised down to 510 homes a year.** It also advises the SHMA method should be changed to consider student housing need separately due to the distorting effect of students on the overall Objectively Assessed Need (OAN) forecast.

The current SHMA inflates the proposed housing figure due to

- failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability, and
- flaws in the method for estimating the number of homes needed to support job growth.

The SHMA needs to be revised, and the proposals based upon it reconsidered, before the Plan can be viewed as ready for submission to an Inspector. In addition, an immediate start should be made on calculating student requirements separately using a consultant with appropriate expertise. It is probable this exercise will reduce the OAN.

Revision of the SHMA to take account of the consequences of the vote to leave the European Union has been proposed by a number of consultees and the Council leader. The NMSS SHMA Review makes an important contribution to the way ahead in several respects by showing that:

- even with a relatively strong pre ‘Brexit uncertainty’ economy, and using a stronger trend period than the one used by GLHearn for migration flows within the UK, the GLHearn OAN figure was too high.
- simply making a few post ‘Brexit uncertainty’ adjustments to economic and demographic need, as currently calculated by GLHearn, would not be an adequate response because their approach to the economic data is flawed and they have not corrected for large errors in the historical data on international migration,
- student flows should be better understood and separated out to avoid distortion of the forecasts and, especially given the significance of flows of international students in Guildford, separate modelling of the student population will become more significant in future.

NMSS has advised that the new projections issued on 12 July 2016 should make little difference in Guildford as the household formation rates on which they are based are not significantly different from the 2012-based set.
It is most disappointing that demographic and economic model assumptions have been withheld by GLHearn so that the whole process cannot be cross checked. This means the OAN taken from their SHMA cannot be substantiated.

Green Belt and Countryside Study

This does not value appropriately the “fundamental aim” of Metropolitan Green Belt or look strategically at options for developing instead in major settlements beyond the Green Belt.

- The way Green Belt is parcelled up and scored is invalid: serving 2 Green Belt functions well is as legitimate as serving 3 to 5 functions. The Green Belt sensitivity analysis is not a valid basis for informing decisions. Eg It could be argued the sweep of open countryside rising up Gosden Hill, as you approach Guildford along the A3, is highly prized. So too is the role of Green Belt in preventing urban sprawl towards the Hog’s Back.
- Proposed removal from the Green Belt of a number of relatively small sites where development of an exceptional nature has taken place, plus adjoining land, has lost sight of the scale at which Green Belt is effective.
- Assessment of which villages to take out of the Green Belt does not adequately consider that villages contribute to the openness of the Green Belt as seen from surrounding AONB.

Transport Evidence

This has been produced very late and is incomplete and untested to the extent that the Plan is not ready for a Regulation 19 consultation.

- It is emerging that the Strategic Highway Assessment shows there will be congestion, even with all the highway schemes in the Plan. Many questions remain unanswered. We assume various inconsistencies are errors (eg 1000 homes on Slyfield generating no extra traffic). More information is needed to understand how much congestion will occur, and where. This has not been provided in time to inform Plan proposals or responses. The analysis points out problems across the network and does not support the claim that the highways network can accommodate the additional demand arising from the Plan.
- The available evidence shows that the Sustainable Movement Corridor is in a preliminary stage of development. The information provided indicates that it cannot achieve its intended objectives along much of its route due to narrow roads and pinch points. The original concept has had to be diluted and impact on other routes, demand and an economic business case are required. The very concept of a single linear route as appropriate for Guildford is unproven.
- Evidence on bus travel is fundamentally compromised because no clear and workable location for a bus interchange is proposed.
- No information has been provided on the demand for and capacity of rail services. The main line to London is already extremely busy in peak periods.
- Information about the town centre as regards traffic, buses and parking is lacking in the Plan. The Plan does not address the traffic issues in the town centre. The Council has announced its intention of implementing the Town Centre Master Plan which includes making better use of the asset of the river. We submit that the Plan should include the protection of a route for a new bridge connecting the east and west parts of the town across the railway to maintain accessibility and to provide greater resilience in this key part of the road network.

For more detail refer to Appendix 2.

[Please Note: Additional transport information has been requested which it was not possible for Guildford BC and Surrey CC to provide in time for this submission. A list of the relevant questions has been submitted. GRA wishes to reserve the right to follow up aspects of this submission where lack of transport information (data or model assumptions) or absence of clarification leads to gaps or errors in analysis and observations.]
Guildford Retail and Leisure Study

This is an improvement but the credibility of the case for massively expanding retail space is undermined by trends in retailing and by the repeated failure to implement the North Street development. The economic value of the green and historic character of Guildford is not adequately considered.

Air Quality and Noise

NO2 emissions need careful monitoring in view of some sites being close to limits, revised estimates of premature deaths, issues with vehicle emission controls and misplaced optimism regarding congestion. Traffic noise from the A3 should also be reported.

Answer: (No)

Question 1: The evidence base and submission documents

West Surrey Strategic Housing Market Assessment: Guildford Addendum Report 2017

The revised “objectively assessed need” figure of 654 homes a year is too high and not based on sound evidence. This GLHearn number is derived from a demographic need for 558 homes a year, a figure which analysis of the evidence shows should be reduced to 404. The economic need assessment uses a flawed methodology.

GRA commissioned Neil McDonald, a respected national expert who used to work for the Government, to undertake a review of the 2015 West Surrey SHMA as it relates to Guildford. This assessment concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure for Guildford should be revised down. Neil McDonald also advised that a separate SHMA should be produced for student housing requirements in Guildford due to the distorting effect of student flows on the overall Objectively Assessed Need (OAN) forecast.

Neil McDonald has now undertaken a review of the 2017 West Surrey SHMA Guildford Addendum Report. See Appendix 1 for a copy of this which forms part of our response. (The Executive Summary is also reproduced in a text box for convenience.) As part of this review of the addendum report, he undertook a more detailed assessment to identify what causes the very large discrepancies between projected population growth in Guildford and actual growth as recorded in the census.

Neil McDonald has concluded that the demographic and economic need figures are fundamentally flawed to the extent that GBC cannot make an informed, evidence based decision on the housing figure. His analysis of the big gap between demographic projections and census figures in Guildford identifies under-recording of students moving away as the most plausible explanation. The ONS recognises that there are significant issues. His analysis also shows that if you correct for this recording error by making plausible adjustments for the outflow of students in the period 2001-15, this reduces the demographically-based estimate of the number of homes needed from 558 to 404 homes a year in the period 2015-34.

Executive Summary

i. This report reviews key elements of GL Hearn's report, “West Surrey Strategic Housing Market Assessment: Guildford Addendum Report 2017” that relate to Guildford’s objectively assessed need for housing (OAN). It follows up an NMSS report in June 2016 on the aspects of the West Surrey SHMA that related to the Guildford OAN.
Producing projections for Guildford is challenging due to the large number of students and errors in the historical data

ii. Guildford presents many challenges to those seeking to project its future population and household growth. This is because it has a large student population and the historic population data for the district contains sizeable inaccuracies. The latter point is clear from the Office for National Statistics’ own data which shows that the population increase between 2001 and 2011 estimated using the ONS’s figures for births, deaths and migration flows (i.e. 15,000) is more than 90% larger than the increase suggested by the difference between the 2001 and 2011 census counts (i.e. 7,800). This is an exceptionally large discrepancy and indicates that there were large differences between how the ONS thought the population of Guildford was changing between 2001 and 2011 and what was actually happening.

It is probable that out-migration from Guildford has been under-recorded and, as a result, the DCLG projections have over-estimated the likely increase in households by a large margin.

iii. A detailed examination of the discrepancies between the various ONS datasets has shown that the only plausible explanation is that net migration into Guildford has been over-estimated, most probably as a result of a sizeable under-recording of migration out of Guildford.

iv. It seems probable that the under-recording of out migration has continued after 2011. This has major implications. In particular, the ONS’s 2015 population estimate for Guildford may be too large and DCLG’s 2014-based population projection may overstate the likely increase in housing by a substantial margin. An alternative calculation making plausible and logical adjustments to the estimated outflows in the period 2001-15 would reduce the demographically based estimate of the number of homes needed from 558 homes a year (2015-34) to 404.

Student housing needs are probably already catered for in the DCLG projections but a much fuller separate analysis is needed.

v. An examination of the DCLG projections for the growth of households of the type and age formed by students renting in the general housing stock in Guildford suggests, contrary to GL Hearn’s conclusion, that those projections include more than enough additional housing to meet the projected growth in the student population. However, there is a need for a fuller analysis which separates out student housing needs from other housing needs as the DCLG household projection methodology is not suited to estimating the needs of students and the inclusion of students in the statistical base used for the projections may have distorted the projections made for non-student housing.

The estimates of the number of homes needed to support forecast job growth need to be re-worked.

vi. The GL Hearn estimates of the number of homes needed to support economic growth are flawed as they use economic activity rates which are different from those used in the job forecasts on which they have based their estimates. This can have a large impact on the estimate made of the number of homes needed to support job growth, sometimes producing absurdly large figure. For example, if, when assessing the housing implications of a jobs forecast, GL Hearn assume that fewer people over 55 will be part of the labour force than was assumed when the forecast was produced:

a. GL Hearn will estimate that a bigger population would be needed to supply the workforce assumed by the forecaster – implying a need for more homes than are necessary.

b. The forecast will not be consistent with GL Hearn’s view of how the labour market will change. Indeed, had the forecaster used GL Hearn’s assumptions they would have concluded that the available labour force will be smaller and as a consequence forecast a smaller increase in jobs.

vii. The SHMA Addendum does not provide sufficient detail of the jobs forecasts for others to re-work the estimates of the homes needed to support economic growth. The unwillingness by some parties to release data assumptions is also an issue. Hence the only option is to invite GL Hearn to redo the analysis.

Affordability adjustment

viii. The earlier NMSS report showed that Guildford did not stand out from other Surrey districts in terms of affordability. It is a highly desirable place to live being surrounded by very attractive countryside yet with both a strong
local employment base and good commuter links to London. Increasing housing supply beyond the numbers suggested by the demographic analysis would not have a noticeable impact on house prices: it would simply attract more be to live in the area.

**Further work is needed before we will have a sound basis on which to estimate Guildford’s housing needs.**

ix. This review has shown that attempting to estimate Guildford’s housing needs using the DCLG projections with little or no adjustment has introduced large errors. Considerable further work is needed before there will be a sound basis on which to estimate Guildford’s objectively assessed need for housing.

x. In view of the desire to make timely progress with the Local Plan, it is proposed that an early meeting is sought with Guildford Borough Council and GL Hearn to discuss these findings and consider a way forward.

The Guildford SHMA needs to be revised, and the proposals based upon it reconsidered, before the Plan can be viewed as ready for submission to an Inspector. We trust that GBC will now pursue this as a matter of urgency.

Neil McDonald proposes a meeting with GLHearn in order for this matter to be resolved in the most timely way possible.

**Housing Delivery Topic Paper**

Paragraph 3.11 should not be construed as suggesting residents’ concerns were met. The sensitivity map still used the questionable approach that land meeting several criteria is more valuable than an area of Green Belt that plays a pivotal role in one respect.

This should refer to Woking applying Green Belt as a constraint and that it would be perverse to harm the Green Belt in Guildford to protect the Green Belt in Woking. Delay in the proposed Woking Site Allocations DPD is not a credible basis for meeting their unmet need in a place that is as constrained as Guildford.

Paragraph 4.10 lists constraints and suggests they were applied but gives no detail to show that they were and how. This is only described later in the context of Woking need. Paragraph 4.11 moves straight to seeking to meet need without setting out that transport, landscape, flood risk and Green Belt constraints represent major issues. These paragraphs should set out clearly at the outset the constraints and their application. You can expand subsequently that initially, as a result of paying insufficient attention to constraints in draft version of the Plan, you had advocated some development that you came to appreciate was unacceptable in planning terms.

Your suggestion in paragraph 4.11 that GBC can work to meet (supposed) need can only be made by not applying Green Belt protection, and by accepting traffic congestion will continue to be a major problem. Yet paragraph 4.11 even proceeds to suggest a big buffer can be provided in addition to an inflated need figure. The only concession is transport constraints in that some development will need to await transport infrastructure later in the plan period. Paragraph 4.12 is also weak, especially in the context of the failure to set out the application of Green Belt as a constraint in the preceding text. The logic behind “prior to removing sites, we first explored whether they could potentially be retained” is perverse. The focus should be on justifying removal from Green Belt not “removal from removal from” the Green Belt! The sites were inappropriate for removal from Green Belt in the first place for sound planning reasons. Similarly, there are strong planning reasons why Green Belt loss cannot be justified at various other proposed development sites within the Draft Plan.

In paragraph 4.15, the deficit from 2015 is overstated because need is overestimated.

Paragraph 4.36 is welcome, especially in view of the very large number of 798 permissions granted in 14/15

From paragraphs 4.39 on Green Belt, please refer to our comments in the Green Belt topic paper.

[See further comments]
**Green Belt Topic Paper**

This document provides the thinking behind relevant plan policies and proposals alongside the Housing Delivering topic paper. The approach to Metropolitan Green Belt lacks appropriate assessment at a more strategic scale.

The Local Context section is inadequate as a basis for applying policy.

Paragraphs 2.10 - We challenge the assertion that the Corporate Plan sets out an overarching local approach to Green Belt and countryside. These corporate objectives were not subject to consultation appropriate for determining planning policy. The current Local Plan is the relevant local policy context.

The fact that there was a boundary review as recently as 2003, the amount of land released at that stage, and the extent to which it has been developed, including how efficiently the land is being used, should be recorded. Green Belt reviews should be infrequent.

Paragraph 2.11 - The reference to our Green Belt being designated to function as part of a wider Metropolitan Green Belt needs expanding. The objective of providing an effective open area around London maintained in perpetuity requires a different scale of strategic approach than would be appropriate had this Green Belt been designed to serve Guildford uniquely. The 1987 Local Plan defined the Guildford part of the Metropolitan Green Belt not the Guildford Green Belt.

The section should also refer to the Mayor of London’s commitment to respecting Green Belt boundaries, including in the London Plan review.

The evidence base section relies on the approach adopted in the Green Belt and Countryside Study. We sustain our previous objection and register concern that remaining flaws in the approach to Green Belt purposes are being carried through into new documents. As a consequence, the new evidence does not value appropriately the “fundamental aim” of Metropolitan Green Belt or look strategically at options for developing instead in major settlements beyond the Green Belt.

Inset villages - Assessment of which villages to take out of the Green Belt does not adequately consider that villages contribute to the openness of the Green Belt as seen from surrounding AONB.

Replacement buildings – We welcome refinement of this policy.

Inset major previously developed sites - Proposed removal from the Green Belt of a number of relatively small sites where development of an exceptional nature has taken place, plus adjoining land, has lost sight of the scale at which Green Belt is effective. We do not agree with the assessment in 4.32 for relatively small sites and consider any planning applications should be considered on a case by case basis as exceptional development rather than pock-marking the designated area with inset sites.

Amending Green Belt boundaries
The way Green Belt is parcelled up and scored is invalid: serving 2 Green Belt functions well is as legitimate as serving 3 to 5 functions. The Green Belt sensitivity analysis is not a valid basis for weighing the value of Green Belt and taking decisions.

Exceptional Circumstances

Paragraph 4.73 - This assessment is contested. The third sentence moves straight from need (based on a flawed OAN assessment) to amending boundaries without consideration of other options. It also refers to unsustainable commuting patterns.

The potential contribution of sustainable commuting should be considered positively. Green Belt is inextricably linked with making good use of the urban area it encircles, and also with commuting. Half of Guildford’s working population commutes outwards and half of the workforce commutes in. The pattern of locations is complex and includes places beyond the Green Belt. Building homes in Guildford will not change that pattern to any significant degree. The key is to make commuting sustainable and it should be embraced as part of Guildford’s strategy just as it is for London.

Paragraph 4.74 – The logic is flawed. It suggests development “would not fundamentally harm the main purposes of the Green Belt”. This is hard to sustain given the main purposes of openness and permanence. It then suggests Green Belt constraint is being applied a little bit and further that in some instances this will take account of how many Green Belt functions a parcel of land serves. The focus should be the strategic importance of each part of the Metropolitan Green Belt. As has been mentioned, Green Belt that serves fewer functions well, eg providing a strategic gap, should be valued.

GRA is concerned that Guildford is allocating more Green Belt sites than it can justify and Green Belt constraint should be applied far more rigorously. The draft Plan is advocating a string of development along the A3 which is inconsistent with achieving a ring of open countryside around London. The minimum possible, least harmful loss of the Green Belt sites should only be considered after all other options have been pursued. That is not the approach that has been taken. Failure to apply Green Belt as a constraint only to be required to assess whether we can meet the unmet need of Woking, which did apply constraints, is perverse.

Local Plan Policy Approach – Paragraph 5.1 is tantamount to an admission that political decisions have been a major driver.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Answer: [Blank]

Transport Evidence and Submission Documents

Assessment of the revised evidence leads to the conclusion that there will be congestion, even with all the highway schemes in the Plan. Many questions remain unanswered and further work is being undertaken. There will be problems across the network and analysis does not support a claim that the highways network can accommodate the additional demand arising from the Plan.

It is becoming ever more evident that the Sustainable Movement Corridor cannot be delivered as proposed or achieve its intended objectives along much of its route due to narrow roads and pinch points. Cycle provision can be improved but along much of the route bus improvements will be confined to a little easing at junctions leaving buses to sit in queues with other vehicles during peak traffic. The impact on other routes needs to be assessed.

Evidence on bus travel is fundamentally compromised because there is still no clear and workable location for a bus interchange to inform the evidence, policies and sites and to provide a basis from which bus routes can be planned.
More generally, uncertainty over transport planning for the town centre continues to be a problem. The Plan does not adequately address the traffic issues in the town centre including a route for a new bridge connecting the town across the railway to maintain accessibility and to provide greater resilience in this key part of the road network.

The following comments are provided by transport expert Richard Jarvis.

**Doc Ref T12a Addendum to 2016 Strategic Highway Assessment Report: high level review of potential key changes in the Guildford Borough PSLP: strategy and sites June 2017**

This presents a qualitative assessment of the effect of the changes made to the 2016 plan on traffic forecasts. Essentially, because the amount of development in the plan has been reduced, GBC’s argument is that things will be better than estimated in 2016.

We can readily agree that where development sites have been removed, notably as in the case of the Normandy/Flexford strategic site, the forecast traffic level will be lower in the vicinity of the development. However, there are some sites where the planned development is now greater than in 2016.

There are also potential changes to plans outside the borough to be taken into account, such as Dunsfold Park, which may have significant consequences for Guildford, as was pointed out by SCC and GBC in their submissions to Waverley in response to that planning application.

The trip rates used in the forecast assume a level of public transport use and an appropriate level of bus services.

On the evidence provided by the SHAR based on the 2031 traffic forecasts using the SCC traffic model, **congestion will be widespread in peak periods across much of the highway network, including on strategic routes. The A3 and M25 are forecast to be at or over capacity. The cumulative effect of the additional traffic generated by the developments in the plan will be to increase congestion, even with the proposed highways schemes in place.**

Interpreting the model results is not straightforward, as was pointed out in response to the 2016 consultation. Table 4.12 is significant – showing the roads with the ten largest ratios of flow to capacity for Scenario 3, which includes all the planned development but not the major strategic route improvements on the A3 and M25. There is no equivalent for Scenario 5 (i.e. with the strategic improvements), but we can infer that all the roads in Table 4.12 will be at or over capacity in Scenario 5.

With regard to the comments on **Policy A6: North Street redevelopment** (page 9), the model used for the Strategic Highway Assessment is not sufficiently detailed to provide a satisfactory assessment of conditions on the town centre road network. This has been recognised by GBC and has led to the commissioning of more detailed analysis using a simulation model. Added to which, there is uncertainty over the highway capacity implications of the Sustainable Movement Corridor in the town centre and possible changes to the town centre gyratory, as discussed in the draft Town Centre Regeneration Strategy, which indicates that the intention is to reduce the capacity of the town centre network. The experimental closure of Walnut Tree Close is already being planned. **Taking into account the demand forecast on the A281, the A322 and A31 in Table 4.12, the consequences of such a reduction will be far-reaching.**

**Policy A26: Blackwell Farm** has been amended and now the proposed development includes a secondary school with up to six form entry. This will add to morning peak hour traffic which was not included in the 2016 modelling. **The SHAR findings indicate that there will be congestion in peak periods on the network that will serve this development. The A3 will be at or over capacity which means that the network will lack resilience, as it does today. The roads connecting to the town centre will continue to be under pressure.** The SMC concept is more advanced on this section than elsewhere, but the effect on capacity has yet to be established. **There will be queuing on the A31 on the approach to the new signalised junction that will give access to the Blackwell Farm site.** The A31 is regarded as a key route by the LEP and LA partners.

The improvement to the A3 is obviously critically important to the Gosden Hill Farm development. We do not have the benefit of analysis of the proposed new slip roads giving access off and on to the A3 S-bound carriageway, nor an understanding of the implications of the SMC for the allocation of highway capacity on the local roads. What is self-evident is that the **pressure on local roads in Burpham is already intense in peak periods, and these roads are not**
suited to carrying large volumes of traffic. Under the plan, congestion is very likely to be worse than today. The proposed Policy A24 Slyfield development will also add demand to the A320 and roads in Jacob’s Well.

The change to Policy A29: Land to the south and east of Ash and Tongham involving more houses means that there will be more traffic locally. While this will not be ‘major’ in terms of the borough as a whole, it will be significant locally. Ash and its surroundings will be impacted by the large Wellesley expansion in Aldershot. It is not clear to what extent the modelling reported in the SHAR allowed for this development. The pressure on the A331 and the roads connecting Aldershot to Guildford and Woking will increase.

The M25 is forecast to be at capacity after the planned improvements have been introduced, as shown both in the SHAR and also in the recently published DfT/HE report on the South West Quadrant. This is relevant to Policy A35 Wisley airfield. It should be noted that RHS Wisley is expanding its facilities with the aim of significantly increasing visitor numbers. The DfT/HE Stage 3 report concludes that the focus should not be on widening the existing road further beyond currently planned schemes but on how to reduce pressures and provide parallel capacity to relieve this part of the network. If the M25 and A3 are at capacity, then the Wisley development will add pressure on local roads that are not well-suited to carrying higher volumes of traffic. This is also relevant to the proposed developments at Burnt Common. The consequences for Ripley are likely to be serious. It is noted that Policy A35 now includes a requirement for mitigation of impacts in Ripley and on surrounding roads, which is some recognition that there will be a problem.

A comprehensive up-to-date analysis is required to inform decision-making. This should include analysis of the mid-term stage of the plan, before the A3 improvement is complete, as well as 2034.

Doct Ref T13 Transport Strategy

Section 1 Overview. The description of existing conditions and challenges is broadly correct and welcome.

Section 2 Surface access to airports. The problem is that the improved A3 will be at or over capacity in peak periods under the Plan, and the M25 SW Quadrant study has concluded that the M25 will be overloaded. So surface access to Heathrow from Guildford will continue to be affected by the weaknesses listed in this section.

Section 3 Rail. This section is welcome. However, it is noted that Crossrail 2 has not yet been secured. We had previously commented information on the demand for and capacity of rail services is needed and that the main line to London is already extremely busy in peak periods.

Section 4 Strategic roads. Surely the strategy should be aligned with the position of Highways England set out in the Topic Paper on Transport, where it is evident that the improvement of the A3 will not be completed until 2026/27, or even 2027/28? The removal of schemes SRN1 and SRN6 from the list of key infrastructure for the plan, and redesignating them as ‘aspirational’, is inconsistent with the safety objectives of the borough and surely of Highways England and Surrey County Council as the highway authority. Under the strategy and the Plan, the issues for Beechcroft Drive and the weaving and merging issues on the existing A3 will not be addressed until halfway through the plan period.

Section 5 Local roads. While welcoming the aspiration to transform the town centre, the traffic implications have not been dealt with in the strategy or the Plan. Section 1 correctly included the issue of “severance of the town and its constituent neighbourhoods resulting from a combination of the A3 trunk road, railway lines and the River Wey”. The case for a new crossing of the river and railway relieving pressure on the Farnham Road railway bridge should be taken very seriously and examined in depth. There is a real risk that a significant reduction in capacity in the town centre, both the gyratory and Walnut Tree Close, and on routes carrying the SMC, will lead to road users transferring to minor roads around the town that are unsuited to carrying more traffic.

The M25 SW Quadrant study report recommends that alternative routes are developed to carry orbital traffic, and this could mean more use of the A31/A331 in Guildford. There are local roads where capacity is already an issue and planned growth will add to problems that are not mentioned in this strategy. The scope of this element of the strategy is not wide enough.
The bus transit strategy is welcome. However, there is insufficient information on the Sustainable Movement Corridor to gauge either what it might deliver and its potential impact on road capacity. The statement under ‘Anticipated improvements’ that the New Sustainable Movement Corridor provides rapid and reliable bus journeys in Guildford urban area and links...’ has not been demonstrated. Consultants have been carrying out studies but the results have not been made public in time to inform this consultation.

A high quality bus station in the town centre is critical for the future of the town.

There is a lack of park and ride on the east of the town and not even an aspiration for future provision.

The active modes strategy is welcome. However, many roads in the borough are two-lane carriageways of restricted width, with little scope for allocating space for cyclists, and this has to be either accepted or addressed over the long term.

Section 6 Air quality. If traffic is going to increase in aggregate, as the forecasts show, even with the measures being proposed, then air quality will continue to be a concern.

Section 7 Road safety. The proposals are welcome, but as stated above, the schemes SRN1 and SRN6 should be reinstated in the Plan for safety reasons.

Section 8 Programme and funding. See comments on Topic Paper: Transport and the Infrastructure Schedule (App C).

Topic Paper: Transport

This is a helpful paper providing context and background to the transport aspects of the Plan.

The fact the new supplementary technical work is planned to be carried out prior to the submission of the plan to the Secretary of State (para 3.18) is welcome, but it would have been better if the results had been available for this consultation.

It is recommended that the wider evidence base should be expanded to include the following:

- Local Enterprise Partnerships and Local authorities: Influencing Strategic Transport in the South East, WSP, 2016
- Surrey County Council: Response to Waverley borough Council on WA/15/2395 Dunsfold Park, Dec 2016
- Guildford Borough Council: Guildford Town Centre Highway assessment –Town Centre Highway Layout Concept Testing, WSP, April 2016

Air Quality Assessment

We welcome this new evidence, especially given revised estimates of premature deaths and health impact, issues with vehicle emission controls and misplaced optimism regarding congestion reduction in 2011.

The air quality effects of anticipated increased congestion on roads around the town centre should be carefully modelled and monitored. The cumulative effects of more development, rerouting buses, traffic displacement including pedestrianisation and interceptor car park expansion should all be considered. For example, York Road continues to be a sensitive site having experienced NO2 exceedances over several years. It has vulnerable school children in the vicinity and is expected to cope with much diverted traffic even though it is already beyond capacity and congested at peak times.

The air quality impact of increased traffic from Dunsfold coming into the gyratory should be monitored.

Traffic noise from the A3 should also be reported.

Attached documents:
Retail and Leisure Study addendum (2017)

The update is welcome but still appears to lag behind the pace of change in retail space demand. In an era when people will seek a mix of technology alongside retail venues that offer an agreeable “leisure experience”, the characterful shops that make use of old buildings can become an increasing draw, an asset that cannot be replicated in many places nationally. For leisure more generally, insufficient attention is paid to environmental character and quality as part of the attraction of Guildford.

In order to inform priorities, evidence should consider the relative merits of adding further retail space, that risks relegating the High Street to a secondary zone, versus using more of sites such as North Street for high tech incubator businesses linked to 5G and for housing. Would confining new shops to the North Street frontage and providing for these other uses (and a bus interchange) behind be more appropriate. If a new department store is added, is an existing one likely to fail?

Land Availability Assessment (LAA) (2016) and addendum (2017)

Green Belt protection, landscape impact, flood risk and transport constraints should be applied to establish more appropriate sites and housing figures. Sites that need safeguarding for future infrastructure requirements such as a tunnel also need adding.

Open Space, Sports and Recreation Assessment 2016

Rural Economic Strategy 2017

We do not consider the range of options assessed in the Appraisal to be appropriate.

The report identifies significant effects.

West Surrey Functional Economic Market Area (FEMA)

Guildford Town Centre Regeneration Strategy 2017
1. There is a failure to correct errors in the historical data for international migration flows. There has been an overestimate of 90% in births, deaths and migration flows in the years between 2001 and 2011. This has been exposed by the two latest censuses. Real numbers versus estimates! Surely this should have caused an adjustment in the OAN?

2. Most residents who live in close proximity to the University know that houses with good gardens, built for families, have become HMOs to accommodate students. This has reduced many neighbourhoods to seedy university dormitories. The Plan makes some recommendation for housing on campus but as the university expands this is inadequate.

3. The plan to include “affordable” houses is wishful thinking. GBC can not enforce their designation of percentage of affordable homes per development as witnessed by the Methodist church development. Where are the plans to build more council houses? These are the only affordable homes.

4. Building more houses to promote growth is a flat contradiction in terms. More housing results in more traffic congestion resulting in man hours lost to employers and more pollution for residents. Huge uncertainty hangs over the practicability of all of the schemes to alleviate Guildford's horrendous traffic congestion. Will money be available to implement these post Brexit?

5. Why have no constraints been applied? The incursion into the Green Belt is unacceptable. The division into Blue and Green Infrastructure can't gloss over this and expressing the loss of green belt land as a percentage is a sham. More houses, more traffic, more pollution less green belt – all in the name of growth. Where does it end? No one wants to live in a ghetto!

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

**Answer:** ()

The Guildford Society remains seriously concerned about the robustness and accuracy of the Strategic Housing Market Assessment.

An independent review commissioned by the Guildford Residents’ Associations has uncovered flaws in both the principal modelling and the application of the numbers in reaching the consultant’s recommendations.

Despite representations prior to and as part of the 2014 consultation, the Settlements Profiles Report falls a long way short of the necessary standard – it is still full of errors and fails to take any sensible account of the 50% or so of the Borough which lies in the Guildford Urban Area.
There is considerably more traffic data sitting behind this draft. It was unfortunate that this was delivered so late, leaving insufficient time to review it fully. The initial studies of it show there to be several fundamental and yet unexplained assumptions about future traffic use. The detail provided so far in relation to the Sustainable Movement Corridor is not sufficient to support or reinforce the wider traffic assumptions for the town centre, local road network and strategic road network.

The Society still has reservations about the approach to land parcelling and consequent findings arising from the Green Belt and Countryside Report. We recognise there is a need to plan to use some Green Belt land to achieve the Plan Objectives (which are in part predicated by the flawed SHMA).

More detail about our concerns about the Evidence Base are in our original submission of 2014 and, where additional emphasis is required, in the submission in response to this Regulation 19 Consultation.

The Guildford Society has reviewed the thousands of pages of the Evidence Base and, to the best of its ability and, with limited (voluntary) resources, has considered the content and context of each.

We have some concerns about documents that are not up to date (for example the Affordable Housing Viability Report (2014) – although we note AECOM have commented in their updated Sustainability Appraisal (2017) that they believe this to still have currency) and some updated documents that we consider to be inaccurate (such as the 2017 Addendum to the Strategic Housing Market Assessment).

Our response are partly linked to the specific policies and paragraphs of the draft plan where they have been amended, and partly in our response to Appendix D, where changes to the evidence base may have altered the effect, efficacy and appropriateness of unamended paragraphs in the plan.

The Clandon Society is the residents’ association of East and West Clandon. We have serious concerns about many elements of the draft Plan.

24A. Question 1: Evidence Base. We do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

- The evidence base documents are self-evidently not up-to-date in that they take no account of the radically changed environment and outlook following the referendum. This is hardly the fault of the Council but is nevertheless a serious flaw.
- The Transport Assessment was published at the same time as the Plan leaving little time for study and analysis. The projections contained appear to be quite inadequate in that 1) they average congestion over 3hr time bands thus materially reducing the impact of congestion and 2) they do not model junctions
- The “Assessment” shows that congestion will worsen significantly over the period of the Plan even if all the proposed infrastructure is built.
- The SHMA attempts to justify an OAN based on a very aggressive desire for growth in the borough. No case is made that such growth is sustainable. The assumptions and estimates are not transparent and have not been adequately scrutinized by Councillors so that people have to take on trust the work of a consultant. In any case events have overtaken the SHMA.
- The number and complexity of the documents in the evidence base make reading, understanding, analysis and assimilation extremely difficult.

**Answer: (No)**

Key parts of the evidence are still missing, flawed or based on withheld assumptions. The Strategic Housing Market Assessment overstates need, the Green Belt and Countryside Study uses a flawed approach, and the Transport Assessment is too late and incomplete to be relied upon to inform the Plan.

The Plan excludes the Town Centre Master Plan, which plays a pivotal role and fails to address the results of infrastructure difficulties, or use these and Greenbelt to constrain the level of development.

The Employment Land Needs Assessment

I object

This document omits many important points that are to be addressed at a future stage. The information is, however, very relevant and necessary and without it the document is weak on evidence. The overview given does not assess the capacity of existing supply to accommodate future growth. The paper acknowledges that almost 9% of commercial premises are empty and this somewhat flies in the face of arguments to vastly increase the volume until the reasons are understood. Around 30% of businesses are considering leaving Guildford (congestion being cited as a reason). There are also issues with planning permissions being granted to convert office space to residential, whilst at the same time it is argued that more offices are needed? The contradictions appear to indicate that policies related to this need firming up and that the evidence is incomplete.

I disagree with 40% of land in the town centre being given over to retail as there is no evidence that Guildford will 'buck the national trend' in terms of declining high-street sales, as has been suggested by Cllr Furniss. Guildford urban area ranks no 1 in terms of being the most sustainable location in the borough and, as housing is a priority, there should be more than 1,172 residences in the town centre.

I object to Policy E4 (expansion of the Surrey Research Park into the Blackwell Farm) The existing Research Park has been built at a very low density (25% plot ratio), which is very low for an urban extension. The majority of existing buildings are 2 storeys giving a developed floor space plot ratio of only 12.5%.

The existing Research Park has acres of surface car parking, which provides it with the opportunity to markedly increase its density without infringing any Green Belt land nearby. Any density increase would be cost effective for the use of all existing infrastructure and would also have the potential to match the existing density of the neighbouring academic buildings on the university campus at Manor Park, which is five times higher.

Together with the existing expansion of 14% through existing consents and the opportunity to increase its density, the Research Park has ample capacity to expand to embrace new demand for B1b uses linked to the university, without utilising additional land.

**Infrastructure**

I object

The infrastructure schedule makes reference to 'improvements' without saying what they are. It includes a junction at the Guildford end of the A31, and another junction at Tongham. No evidence or traffic modelling data is available to demonstrate whether these 'improvements' will indeed improve anything at all given the additional traffic that will be generated by the new developments included in the plan. The Highways Assessment indicates that, even with these 'improvements', the level of congestion on the A3, A31, the B3000 and A25 will leave these roads over capacity and congested.

Constraints should be applied to the housing need/number as a full application of the overinflated number will have a severe detrimental impact on our road network. Smaller housing estates may be more difficult financially, but they would...
have less impact on infrastructure and could be considered where infrastructure already exists. The borough has many acres of surface car parking which, if replaced by multi-storey versions, and combined with current Brownfield sites, would free up enough land to build housing where it is wanted and needed and not on valuable Green Belt. There would be no need to build high-rise style development in Guildford town, which we don't support, but we do believe that buildings of 6-10 storeys (with underground parking) would be in keeping in some urban areas (where they don’t impinge on important vistas). [Some existing buildings already reach 5-7 levels in height].

The traffic maps omit the area south of Guildford borough completely and the lack of detail about impact on the B3000, a strategic route, is highly questionable, particularly as there are no solutions in place to deal with the impact. I am particularly concerned that, after the main highways routes of M25, A25, and the A320, the B3000 will incur the greatest increase in flow as this road is already close to capacity, with tailbacks at peak times. The road is no longer fit for purpose and modelling shows that developments planned, and the introduction of a new westerly route through Blackwell Farm, will severely worsen the situation, whether major work takes place on the A3, or not.

The Highway Assessment

I OBJECT

The strategic highway assessment requires a great deal more work and hence I OBJECT to the inclusion of this as evidence.

The B3000 runs through Compton, a small village with many listed buildings, most of which are very close to the road. The road already carries in excess of 5 million vehicles a year with average flow rates exceeding most A roads. It is the only settlement area in the borough where pollution levels exceed EU regulations and it is close to capacity now, with tailbacks at peak times, which add to the pollution problem. [see legal section]

The study is highly misleading. It refers to a figure of zero additional traffic from scenario 3, which includes the traffic from the strategic sites, one of which is partly in Compton. The assessment does not make it clear that the modelling is extremely limited and only includes impact on developments within the immediate area. Blackwell Farm is excluded from Area 107 (part of Compton) as false boundaries have been set. I believe that the impact from the strategic sites will be far-reaching and will most certainly impact Compton and beyond. Each village needs to be able to see the impact that development will have.

The Highways Assessment concentrates on peak time traffic only and gives no indication of overall volume increases or traffic type using specific routes outside peak hours. Understanding of the overall increase is important, as there is a bridge on the B3000 between Artington and Compton, which has a width restriction and may also require a weight restriction as it needs replacing within the next 2 years and no funding has been set aside for this. Instead Network Rail, SCC, GBC and Waverley BC continue to battle over responsibility for, and scope of, the project.

It appears that traffic data has been collected at different times of the year and over varying time scales in order to provide averages. This method of data collection can underestimate measurements by at least 30%.

Furthermore, I have been told that the person responsible for ratifying traffic data at Surrey County Council (SCC) has been off sick for over a year and that, whilst the daily data boxes continue to collect data, that data has not been collected or analysed for 2015. The data put forward for Compton's B3000 was based on a 3-week period in January and, as this was not representative, we understand it was removed. That said, the year-on-year data is for different periods and different times, varying from a few weeks in winter to longer periods over many months. I would like a more robust approach to traffic data collation.

The cumulative effect of the additional traffic generated by the developments in the proposed submission Local Plan will be to increase congestion, even with the proposed highway improvement schemes in place. More detailed analysis of the junctions and queuing is required. We question the conclusion that the developments would have An acceptable impact on the capacity of the highway networks in terms of the policy test set in paragraph 32 of NPPF'. We do not believe that the impact on the B3000 will be acceptable, as it is already operating beyond capacity, and this situation will be made much worse following the mitigation proposed for the A3.
The Highways Assessment is limited to 30 results. Roads have been omitted from the report and it is unclear whether findings for the B3000 (also referred to as The Street B3000) are in fact from the Street or the roundabout from which there is a feeder road to Godalming via Priorsfield Road.

The table comparing scenarios and the impact on traffic is difficult to decipher. Scenario 1 includes current planning permissions plus Waverley's strategic sites. This shows an increase of just 9 vehicles per hour at peak times on the B3000. The next scenario 2 is the same, but includes GBC's strategic sites. Given that there is a strategic site in Compton of 1,800 homes and another of 1,000 at Normandy, the expectation would be for the volume to be not only higher, but considerably higher. The result is however, ZERO. We understand that this is because the impact measured is only from the immediate area and, as Blackwell Farm has been removed from the village for modelling terms, this does not give a realistic result. The omission of the Town Centre Master Plan and its impact on the roads further diminishes the integrity of this Highways Assessment.

Even without the full impact being understood, it is clear from the scale of development on the west of Guildford (1,800 homes at Blackwell Farm, 1,000 homes at Normandy, 1,300 homes at Ash, 3,800 homes in the Aldershot urban area, 1,200 homes at Borden) that the increase in traffic on the B3000 and other main routes would be severe.

The Highways Assessment shows that as a result of the proposals put forward in this draft of the Local Plan the B3000 will suffer the highest increase in flow rates at peak times (after the M25, A320 and A25. It also reveals that traffic flows would increase if the A3 was widened, as the A3 would then attract more traffic via the B3000. Despite this, there are no solutions planned to mitigate the situation and we are therefore strongly objecting to the level of development and in particular strategic development at Blackwell Farm as outlined in the Local Plan.

The proposal to introduce a new route to Guildford town centre from the west via Blackwell Farm has been ill thought out. The volume of traffic that will use this new ‘rat run’ through the new development and the university campus/business park, has been underestimated. There will be problems for traffic wishing to exit the new development in both directions during peak hours - traffic is frequently queueing for miles along the A31, and the Tesco roundabout is one of the worst bottlenecks in Guildford. The knock-on effect on the Egerton Road/Gill Avenue junction would impede emergency vehicles getting to and from the hospital.

The 4-way junction on the A31 has no detail at all and the concern is that permission in principle will be given to the site in the hope that these problems are surmountable. If they are insurmountable, which I believe they are, then enormous amounts of Green Belt land within the setting of the Surrey Hills AONB will have been sacrificed for nothing. The 4-way junction, if it goes ahead, is likely to be huge and, due to its elevated position, will cause significant harm to the AONB in terms of landscape and light pollution.

The Highways Assessment has many limitations, not least being the absence of the Town Centre Master Plan, which includes potential road closure and re-routing. Compton is likely to be very much affected by any reduction in road capacity in the town centre and it is important that we are presented with the whole the picture.

The Assessment acknowledges that not all impacts of proposed Blackwell Farm development have been modelled and that, due to the emphasis on the A31 and the A3, not all roads were included.

The report concludes that the improvements to the A3 are necessary to maintain adequate flow rates on the strategic network. Further work is needed to determine what impact any widening or junction improvements will have on local roads, and what will be done to mitigate against the increased flows through Compton, particularly given that a section of the B3000 though the Village is anticipated to become an Air Quality Management Area. GBC has resisted requests by members of the PC to have the northern end of The Street made an AQMA , but readings of nitrous oxide in this area are well above EU legal limits.

There is little information about the tunnel but the map indicates that one access / egress point will be in Compton near the A3, although no land has been safeguarded for this purpose. This is likely to have the same impact as the improvements to the A3, i.e. increased traffic (and pollution) through Compton.

The Spatial Hierarchy
The spatial hierarchy, which outlines Guildford's preferred strategy, does not match up with the proposed plan. The hierarchy places Brownfield sites (including those on Green Belt) as a priority, but the Plan has 66% of development on Greenbelt and only 34% on Brownfield. The hierarchy lists Guildford town and urban areas as a priority followed by inset villages and identified Green Belt villages. A relatively small percentage of housing is allocated for Guildford town (the most sustainable location) and Green Belt areas, such as Blackwell Farm, with high sensitivity have been classified as within the 'Guildford urban area' when they are in fact in the open countryside. We are told that only 1.6% of the 89% Green Belt has been earmarked for removal and that the 6% removed via insetting doesn't count as these villages are already developed. If this is the case, why list them in 4.1.16 of policy s2 - Spatial Strategy?

4.18 The preferred options cannot accommodate all that Guildford 'needs'. This is untrue. Two specialist consultants have independently critiqued the OAN and both question the level of uplift and the use of ONS data without full correction for changes and anomalies. They refer to 'double accounting' as the uplift is introduced at several stages and the assumptions that result in the final OAN are not explained. See comments on Strategic Housing Market Assessment (SHMA).

**Strategic Housing Market Assessment (SHMA)**

I Object

The “objectively assessed need” figure of 693 homes a year is too high.

A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, **the housing need figure should be revised down to 510 homes a year** and the SHMA method should be changed to consider student housing need separately due to the distorting effects of students on the figures.

The current SHMA inflates the proposed housing figure due to:

- failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability, and
- flaws in the method for estimating the number of homes needed to support job growth.

It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

Two additional reviews of the SHMA reach similar conclusions, one having been produced by CPRE and the other by Cllr. David Reeve.

**The Land Assessment**

I object

The exclusion of sites of 5 dwellings or fewer from the list might make administration easier, but the addition of these sites plus windfalls and outstanding (but current) permissions gives rise to a higher number of dwellings than is actually needed, Thus reducing justification for release of the Green Belt put forward.

The criteria used to include or exclude sites because of this study lack consistency, with many sites excluded as 'unsuitable' with no further explanation offered (many of which were in the urban area of Ash). The assessment lacks objectivity and detail.

**Green Belt & Countryside Study**

I object

GBC’s Green Belt & Countryside Study does **not value appropriately the “fundamental aim”** of Metropolitan Green Belt or look strategically at options for developing in major settlement areas beyond the Green Belt. It is pointless for
London to apply constraints to protect its Green Belt if areas within it, such as Guildford, choose to ignore this option. It is the same Green Belt and serves the same purposes, all of which are acutely valuable.

The way Green Belt is parcelled up and scored is invalid: serving 2 Green Belt functions well is as legitimate as serving 3 to 5 functions less effectively. The Green Belt sensitivity analysis is not a valid basis for informing decisions. This method also omits purpose one, on the basis that all Green Belt sites encourage regeneration of urban sites. This should not be excluded for it is valid and could even be argued to be particularly valid in areas close to the town. Boundaries used for Blackwell Farm were neither permanent nor defensible.

Proposed removal from the Green Belt of a number of relatively small sites where development of an exceptional nature has taken place, plus adjoining land, has lost sight of the scale at which Green Belt is effective.

Assessment of which villages to take out of the Green Belt does not adequately consider that villages contribute to the openness of the Green Belt, as seen from surrounding AONB.

A key principle of Green Belt is its permanence. The University Consultants stated this 13 years ago when seeking permission to take Manor Farm out of the Green Belt to create Manor Park. They reassured residents that the boundary would not be frequently moved and that Blackwell Farm would be opened up to the public for “informal recreation”. The same Consultant has now repeated this promise in putting forward the University plans to develop on Blackwell Farm, saying that the new boundary would be permanent for at least 25 years!

---

The extent to which the Sustainability Appraisal fails to test the sustainability of the spatial options in a meaningful way casts doubt over whether sustainability has been assessed. The report treats various major development sites in Green Belt, contrary to the importance attached to protecting Green Belt, as “a given”, fails to consider options that constrain development or that make greater use of brownfield or previously released greenfield land, focuses on a range of options that involve developing on even more Green Belt around Guildford.

**Answer:** ()
B3000 -- Omission from Transport Strategy

This road is considered a strategic route, yet it is narrow in places, windy and close to many residential properties. Pollution levels are outside EU legal limits at the A3 end of the village and congestion is a regular feature, suggesting the road is at / has exceeded capacity. Adding to the network will cause gridlock as there are no alternative East West routes, south of Guildford. Consideration must be given to address this, yet no scheme has been outlined in this plan.

Object to the omission

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

We wish to express our concerns over the Draft Local Plan, currently out for public consultation and formally register our objections to what is being proposed very strongly indeed. It has been an extremely elusive and difficult document to try and get to grips with in order to understand the implications for the borough and our locality in particular. While it is essential to have a sound and robust Local Plan in place, the policies being put forward currently appear unsound and unsustainable.

Attached documents:

Comment ID: pslp17q/306  Respondent: 8573793 / Harry Eve  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Answer: (No)

No.

The housing number is still significantly overstated and the Council Executive has refused to reveal the full details of the underlying calculations to those who have requested them. The Scrutiny Committee has refused to scrutinise the SHMA.

As part of the previous consultation I raised a number of issues, questions and requests for further detail concerning the SHAR (2016) and its associated Validation Report. This followed criticisms of the previous SHAR that were not
addressed in the 2016 version. No attempt has been made to address the issues, my questions remain unanswered, and the details have been withheld.

The modelling choices and assumptions made mean that current traffic levels have been severely understated. The result is that forecast traffic levels resulting from the plan are far less likely to indicate levels of congestion requiring roads infrastructure development, and the current infrastructure development plan is just the tip of the iceberg of what would actually be needed. The Council Executive seems willing to plunge Guildford Borough into traffic chaos in pursuit of population growth, rather than face up to reality and apply a traffic constraint.

I note the criticisms raised by Highways England in their representations dated 18 July 2016 and find it extraordinary that GBC were prepared to rely on a high-level strategic model that did not even allow for back-blocking. Any resident of Guildford will be aware of the back-blocking issues that arise in the town.

Highways England is only concerned with the Strategic Road Network and the impacts on the Local Road Network should be a concern for SCC. However, as SCC carried out the modelling exercise it seems clear that, between them, GBC and SCC have no interest in identifying the real roads infrastructure needs that would arise from this aggressive growth plan.

It is not sufficient to say that detailed work on traffic impacts will take place as part of a planning application. Green Belt land will have been released for development, for no good reason other than to remove planning constraints, before viability has been demonstrated. Furthermore the transport assessments carried out by developers are not independent and are aimed at seeking approval. I doubt the ability and willingness of GBC and Surrey Highways to scrutinise them with sufficient diligence.

There was no mandate to carry out a Green Belt and Countryside Study and it is seriously flawed since it suggests the release of Green Belt land without providing genuine justification.

Question 1 The evidence base and submission documents

Unfortunately the evidence used is not wholly adequate, up to date or relevant. This is as much the result of recent external events as matters within GBC's control

The key areas are * cooperation, * housing and *transport.

* COOPERATION

Set originally for reasons stretching far back into mediaeval history, the local authority boundaries do not any longer reflect real market boundaries. The Guildford work, shopping and housing areas stretch over the County boundary into Rushmore and far beyond. For one example, the 'market' pool of cheap housing for Guildford is in Aldershot. The draft shows signs of discussions with Waverley and Woking but little evidence of in-depth cooperation with Rushmore and beyond - instead,

Rushmore and beyond authorities are cooperating with authorities to their west, but not to the east. THE ORIGINAL 1944 SPECIFICATION FOR GREEN BELT POSTULATED THAT EXPANSION

WOULD LEAP THE GREEN BELT. That is Rushmore, not Gosden Hill Farm.
* HOUSING

That the Hearne calculations for housing demand are substantially flawed appears to be a common view, now apparently visibly based on an alternative expert calculation. However, since these original calculations were attached to the Plan documents there has been the major event of ‘Brexit’. It is expected that Brexit will lead to a considerable decline in immigration from the EU, and, since criteria are likely to be tightened, of some immigration from outside the EU. Not so much of a decline as a simple look at the crude national figures, or the relevant pages in Hearne might suggest, but nevertheless a considerable decline is said to be likely. At the same time it is expected that there will be a period of economic stagnation or low growth, which will lead to a decline in the setting up of new households. So it looks as if the Hearne figures will have to be re-visited, regard less of views as to their original validity. It is understood [verbal] that GBC has this in hand. However it would seem to be demonstrably premature to proceed to acceptance in advance of re-visited and agreed figures.

It is customary in estimating work to publish conclusions that give a mean estimate with a sub estimate of upper and lower tolerances. The Hearne tables appear largely not to do this - instead to put forward a single integer estimate refined to the last digit [as eg 693]. This is surprising, and a word of explanation as to the level of accuracy in the head line figures would be helpful.

TRANSPORT

The sections on transport are the most difficult. They are really quite vague, promising events that are not within the ability of GBC or SCC to deliver.

The lead promise is, of course, the improvement of the A3, where all is vague as to exactly what is to be done. It is not clear how much of the road and transport system can be sorted.

But there are many other examples, improvements and changes in the bus and rail services being one.

Bus and rail services are provided at the will of the relevant operators, and a service exists only where the operator anticipates a profit or, in the case of rail, is required by central government. There are a few exceptional bus services that are subsidised, but the relevant Authorities only have very limited funds for this purpose - funds that are being cut and will probably be cut further. Moreover, it seems possible that the Senior Bus Cards will be withdrawn or severely limited, which will reduce the profitability of the existing services further and lead to consequent substantial reductions in the services for all.

Attached documents:

Answer: ()

EPC supports the sites selections in Effingham identified in the Land Availability Assessment (LAA):

- The Bam (Site Ref 1040)
- Church Street Field (Site Ref 99)
162. Local planning authorities should work with other authorities and providers to: assess the quality and capacity of infrastructure for transport, water supply, wastewater and its treatment, energy (including heat), telecommunications, utilities, waste, health, social care, education, flood risk and coastal change management, and its ability to meet forecast demands take account of the need for strategic infrastructure including nationally significant infrastructure within their area.

Water
Thames Water acknowledges in local forums that they have water shortage problems and are considering pumping water from the river Severn on the Welsh border to a yet to be built raw water reservoir of approximately 4 square miles and 100 feet deep in an area adjacent to Abingdon. This water would be pumped into the river Thames for extraction downstream. This project is ‘being discussed’ but currently 3.5 million homes are involved in ‘water saving’ practices due to water shortage in the South East early summer of 2017.

Air Pollution
Air pollution is currently exceeding national and international annual daily average guideline levels of 40μ/m3 along the A3, Ripley Parish Council has the full set of data for Ripley as a base indication of Levels in the Borough.

Roads
Highways England has stated by letter to the Council dated 5th October 2016 that none of the roads proposals mentioned in the local plan have been tested to meet the Design Manual for Bridges and Roads, for the simple reason that there are no firm proposals for any of this road infrastructure at the current time. It is disingenuous for a local plan to be presented to the Secretary of State that makes reference to infrastructure that won’t be provided in the plan period, if at all. The Highways England response supports other statements made indicating their desire to prioritise the Smart M25 then M25 J10 A3 and then the A320 – A31 improvements. Thus, the required infrastructure for Garlick Arch, Gosden Hill and Wisley airfield will not and cannot be constructed within the time frame of the Local Plan, without a complete ‘about turn’ by Highways England. In addition, some early targeted small improvement schemes referenced by the local plan are
not committed proposals and cannot be relied upon to be delivered within the plan period [see Highways England letter 5th October 2016]

Our response to other representations made.

NPPG 155. Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.

The Plan is not future proof in respect of Infrastructure, has been produced in a flawed statutory process using a closed “this is what you are getting approach” with little notice being taken of restrictions to potential proposals, suggesting inadequate infrastructure which simply cannot be supplied within the life of the plan. (Under current funding)
- Highways England from their public statements clearly have no intention of solving traffic problems or providing completed solutions through Guildford within the life of the plan
- Network Rail have no intention of introducing new railway stations –
- Thames Water will struggle to supply water or treat sewage without major and as yet unfound finances.
- The statutory procedure has not been followed. No ‘complete’ plan with catalogue or index document of associated documents exists for members of the public to scrutinise.
- Consultation with the general public has been substantially flawed in that no document has been corrected, no change of planned policies have occurred which reflect responses from the community especially and specifically from the submissions from Burpham residents. Highlighting Traffic lack of infrastructure and pollution effects from Gosden Hill site – GBC Claiming under FOI this detailed information is commercially confidential’ as opposed to the Blackwell Farm and Wisley proposals which have been clearly aired in the public domain.

Thus this plan is fundamentally flawed in its statutory and central government policy approach, its assumptions to sustainability are flawed and will fundamentally reduce the quality of life of those already living in the Borough. This can only be cured by a projected £2 billion (Tunnel, Sewer, Drinking water, General road widening) injection of cash into the infrastructure to provide a sound basis for the next two plan periods up to 2050. Such is the mismatched infrastructure failings to policy proposals.

Attached documents:  BNF_comments_Local_Plan_19_07_17__23_25_table.pdf (5.3 MB)
I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Attached documents:
The Guildford Infrastructure Baseline 2013 sets out the position with regard to Primary Health care Facilities. It refers to the Surrey NHS Transformation Plan 2010 to 2015 which includes the key objective of reducing health inequalities through the provision of GP-led Health Centres and acknowledges that primary healthcare services are generally the first point of contact service, offering frontline services.

All GP practices are now required to belong to a CCG. There are six CCGs covering Surrey, all within the Surrey and Sussex Local Area team (LAT). Three CCGs cover different parts of the Guildford Borough including Guildford and Waverley CCG.

Guildford and Waverley CCG is a group of 21 local GPS surgeries in Guildford and Waverley. It controls a £223 million annual healthcare budget responsibility for the approximately 220,000 people living in the two boroughs.

There are currently a total of 99 GPSs currently practising in 11 partnerships across the Guildford borough with a total of 154,998 patients on their registers. The existing provision equates to one GP for every 1,565 residents. However, provision is not spread equally across the Borough and when examining local list sizes per GP some existing under provision is apparent on surgery- by-surgery basis.

Figure J shows the data on a settlement basis. However this list does not include the Binscombe Medical Centre. This presumably, is because it s not actually located within the borough. Nevertheless, it serves patients from Guildford and should therefore be considered within the Guildford context. This is a key cross boundary issue that does not appear to have been adequately considered.

The Guildford draft Infrastructure Delivery Plan 2016 confirms but does not update the Infrastructure Baseline. It states at paragraph 6.2 that GBC officers have met with representatives of Guildford and Waverley CCG, GPs from across the borough, NHS England, and the Royal Surrey County Hospital chief officers to discuss future health needs of the borough’s population. It goes on to confirm that such work is ongoing and, as clarity is given to proposals, further input is anticipated from Guildford and Waverley CCG and from the GPs practices that will be impacted by the planned housing development.

Paragraph 6.7 of the draft IDP states that: “We will continue to work with NHS England and the relevant CCGs, particularly Guildford and Waverley CCG, the GP Practices, and the Royal Surrey County Hospital, to ensure that health facilities in the borough will meet the health needs of future population, and will continue to work on ensuring that funding and delivery is secured when needed.”

This statement is gratifying and is supported. However, as stated above, it is considered that the cross boundary issues between Guildford and Waverley have not been adequately addressed. A new Centre for Health is required to serve the cross boundary area around Farncombe as set out at Question 6 of this form and an additional allocation should therefore be made to facilitate this.

The plan on page 63 of the IDP shows the GP surgeries within Guildford Borough. This should be renamed as ‘GP surgeries serving patients within Guildford Borough’. That said, one GP surgery is indicated on the borough boundary with Waverley – GP Surgery 10 which is referenced New Inn Surgery. This is incorrect and we believe that what should be shown is the Binscombe Medical Practice

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

**Answer:** ()

Guildford borough Proposed Submission Local Plan: Strategy and Sites Regulation 19 consultation (June 2016)

Thank you for your consultation on the above document. Please find below the comments of the Surrey Wildlife Trust, which are confined to issues concerning the protection of the natural environment, including the conservation of Surrey’s biodiversity. Our most recent communication with you on this matter was our letter of 22/09/2014, where we detailed a range of concerns with the emerging Strategy & Sites document of that time. Some of these have been reflected in the present version now on consultation, but others have not. Overall, we remain concerned that the dependencies of present and future human society on maintaining a healthy and thriving natural environment are reflected adequately in the emerging Guildford Local Plan Strategy & Sites.
National planning policy in the NPPF aims to plan only for *sustainable* future development and economic growth. That sustainability is defined in part, as the ability to clearly demonstrate a contribution to protecting and enhancing the natural environment; including to “improve biodiversity, use natural resources prudently, minimise waste and pollution, and mitigate and adapt to climate change.” The opportunity to clearly articulate the potential for synergies here (as opposed to tensions) is overlooked at various points within the plan (see comment on para. 4.6.31 below), but especially under the definition of ‘sustainability’ in the Glossary at Appendix A.

Our comments are structured to correspond with the questions as set-out in your consultation questionnaire.

**Question 1: The evidence base and submission documents. Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?**

Regarding the accurate characterisation and valuation of the natural environment, the Borough’s Local Wildlife Sites (Sites of Nature Conservation Importance) are still being reviewed. Whilst this latest iteration of the Local Plan Sites & Strategy makes due reference to the importance of the natural environment to Guildford’s economy and the well-being of its occupants, we feel that this is not translated consistently into policy for the various sites allocations.

To reiterate the point made originally in our previous response, Guildford Borough has arguably the clearest responsibility for the conservation of English and UK biodiversity of all Surrey’s boroughs and districts, with a wealth of declining and nationally-restricted wildlife species under its charge; this is still not adequately reflected in the plan (eg. at paragraphs 2.23-5) nor the underlying evidence base.

- c. I object to the vast amount of paperwork involved in the Plan. Its effect is to put off many people from reading it. A concise Summary should have been included. I object to the short period allowed/Regulation used for the Consultation period. The amount of documentation available, combined with the shortened time available to comment - and to be made during the holiday period is contrary to UK democratic principles.

- d. I object to the failure of the controlling Conservative Group on GBC to uphold their Manifesto promise to protect the Green Belt. This promise was included in their election literature in May 2015. They thus have no mandate to implement a Plan involving major intrusions into the Green Belt.

The West Surrey SHMA which determines the "objectively assessed need" for Guildford is flawed for the following reasons:

**517 houses per annum to accommodate Demographic Indicators**
The starting point in establishing housing need due to “demographic indicators” is the SNPP. G L Hearn claim that the 2012 Based SNPP is a robust starting point because it shows a level of population growth that falls roughly in line with a 12 year trend to 2013. The 2012 Based SNPP predicts the population of Guildford to grow to 161,300 by 2031. In actual fact, the linear trend based on 2001-2011 predicts a population of about 156,000, a difference of 5,300.

The ONS 2012 Based SNPP is significantly distorted by an unusual increase in the number of overseas students attending the University of Surrey between 2006 and 2011. This is clearly demonstrated in a number of figures and tables in the report (see Figure 15 on page 50; Table 17 on page 51; Figure 18 on page 53). To establish its projections, the SNPP only looks back over the previous five years. The 2012 Based SNPP is therefore based on population trends between 2006 and 2011, a time which saw the number of overseas students at the university increase by 35% and full time students increase at a rate of 700 per annum.

If you consider natural growth (births and deaths) and net internal migration (movement within the UK), the 2012 Based SNPP forecasts the population of Guildford to decline by 1800 by the year 2031. Therefore the overall projected increase in Guildford’s population to 161,300 in 2031 is entirely due to the projected growth in net international migration of 23,100, of which, according to the ONS, 57% are foreign students who would normally be expected to return home, or move away from Guildford, at the end of their studies.

On page 190 in the SHMA, there is an assertion that overseas students only make up 6% of overall migration. According to the ONS, an analysis of indicative immigration estimates by broad stream (mid-2006 to mid-2010) estimates that the student stream is 57% for those years. Currently 37% of all students at the university are overseas students.

On the 1st December 2015 George Osborne announced that foreign students will no longer be counted as immigrants. The chancellor said that the public is concerned only about “permanent” migrants. “The public’s concern is about permanent migration, people permanently or for many years coming to live in the country. Students come and go”. Daily Telegraph 1 Dec.

International Immigration is based on International Passenger Surveys (IPS) which are carried out only at the border (seaports, airports, channel tunnel). The intentions of immigrants are highly approximate being based on voluntary face to face interviews on only a sample of passengers. IPS data is therefore not reliable enough to be used at Local Authority level. Estimates of net international migration at Local Authority level are therefore based on (1) the number of migrant workers or students applying for a National Insurance Number (2) data from the Higher Education Statistics Agency (HESA) and (3) data from the NHS Patient Registration Data Service. Unfortunately this data does not accurately record when students return home or move away from Guildford as students often neglect to inform their GP, which explains why emigration is often under reported.

Un-attributable Population Change (UPC) is essentially the difference between the forecast population and the actual population as recorded in a census. In Guildford the UPC ran at -717 per annum between 2001 and 2011. The population in Guildford was significantly lower as measured in the 2011 census than had been forecast. It is assumed that this is due to the under reporting of foreign students returning home. Nevertheless, in their “sensitivity tests”, G L Hearn has declined to make any adjustment for UPC. According to Table 22 on page 68 the housing need for Guildford would be reduced to 239 houses per annum if UPC were applied.

The figure on page 183 Appendix B demonstrates that Guildford has an abnormally high proportion of people in the 19-25 age bracket (students) which is to be expected because Guildford is a university town. While this has an impact on internal out-migration, it has a major and disproportionate effect on projected household formations because the 2011 Census measured the term time address of students as being their main place of residence with the assumption that the majority settle in the area and become heads of households, when in reality, being students, they are more likely to return home or move away from Guildford at the end of their studies. According to the Alumni Team at the University of Surrey, only 9% of former students live within the GU postcode, of which a high percentage are likely to have been brought up in the area anyway.

The figure of 517 houses per annum to accommodate demographic indicators appears to be based on the Figure of 496 taken from the 2012 Based Household Projections (see Table 20 page 66) multiplied by a factor of 104.2% to allow for occupancy levels for Guildford based on the 2011 Census (unoccupied houses recorded as...
being 4.2% of total housing stock). The NPPG clearly states that vacant properties should be deducted from housing targets.

25 houses per annum to accommodate Students

- In the report, the justification for adding an extra 25 houses per annum to the OAN to cater for students is because “the University of Surrey expects stronger growth in student numbers going forward than occurred during the period on which the SNPP is based”. In paragraph 4.79 page 72 the report states that “the 2012 Based SNPP is based on population trends between 2006/7 and 2012”. However we have already seen that the period between 2006/7 and 2011 was a time which saw an unusual increase in the number of students attending the university. Table C3 on page 187 shows that the number of students attending the university increased from 10,000 in 2006/7 to 13,500 in 2011/12, an increase of 3,500, which represents an increase of 700 per annum, which is very much higher than the 315 per annum increase the university forecasts from 2013 to 2033. This is also at variance with the University’s published Estate Strategy which states that they plan to grow at 2% per annum. There is therefore no justification for building 25 extra houses per annum to house students. In any event, surely the University has a responsibility to provide adequate student accommodation on campus to reduce the demand for affordable housing in the town. Out of a full time student population of 14,000, there is only provision for 5100 student bed spaces on campus.

How are students counted?

The way students are counted has always been an issue. In the 1991 Census, students were treated as living at their home address. In the 2011 Census, students were counted as being usually resident at their term time address. Overseas students, who had no usual address in the UK, were counted as usually resident in their halls of residence regardless of how long they intended to stay here. This has a distorting effect on the proportion of young people in Guildford and exaggerates projections for household formations.

How is the movement of students monitored?

Internal migration is monitored by (1) the number of migrant workers or students applying for a National Insurance Number (2) data from the Higher Education Statistics Agency (HESA) and (3) data from the NHS Patient Registration Data Service. Unfortunately this data is unreliable in recording when students leave an area because either they fail to un-register from their GP or, when moving abroad, fail to notify the Department of Work and Pensions. The ability to monitor people intending to move away from Guildford to live abroad (overseas students returning home) is even more fraught with difficulties.

120 houses per annum to support Economic Growth

- In the West Surrey SHMA, economic growth for Guildford is taken as 0.9% per annum being the average of three studies (Cambridge Econometrics Employment Projections; Experian UK Local Market Forecasts; Local Authority District Forecasting Model by Oxford Economics). Assuming only one person in employment per household, surely any increase in the supply of housing in excess of 0.9% would more than accommodate the needs of economic growth. One could argue that this is therefore double counting and there is no justification for an additional 120 homes.

- In any event, the impact of economic growth (or decline) for a particular area must be reflected in both the Census and in population projections based on past trends. Therefore the ONS SNPP must already reflect the effects of economic growth. It is therefore misleading and incorrect to make additional allowances in housing need to accommodate economic growth. Economic growth cannot be forecast with any degree of certainty as it depends on so many variables.

31 houses per annum to promote Affordability

- The supply of housing is actually regulated by economic factors, not simply the release of more land. Developers will only build in a rising market when they can afford to borrow money to build and buyers can afford to borrow money to buy - and crucially - when profits are guaranteed. Consider Ebbsfleet in the Thames
estuary, where the government announced plans to build a new “garden city” to provide 15,000 new homes. So far, despite the availability of land, only 100 homes have been built.

- Nor will releasing vast areas of the green belt guarantee to increase the supply of affordable housing. Indeed one could argue that greenbelt land is more likely to generate low density high value housing rather than affordable housing. According to a recent report, the biggest house builders in the UK currently have enough land to build more than 615,000 new homes, equivalent to three years housing supply in the whole of the UK.

Attached documents:

Comment ID: pslp17q/60  Respondent: 8593185 / Niels Laub  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Answer: (No)

The West Surrey SHMA is unsound in two significant ways because (1) overseas students, who are only here on a temporary basis to study, are included in statistics for net international migration which has an inflationary effect on population projections for Guildford and (2) because the term time address of students is taken as their permanent place of residence, the population of Guildford appears to have a very high proportion of people in the 18-24 year age bracket who are assumed to have a high probability of forming new households and settling in Guildford.

The 2011 Census recorded a population for Guildford significantly less than had been forecast. The ONS suggested that this discrepancy (referred to as Un-attributable Population Change or UPC) was probably due to the under-reporting of overseas students returning home. This discrepancy is so significant that, if an allowance for UPC had been applied, the housing need for Guildford to accommodate demographic indicators would be reduced to 239 homes per annum as opposed to 577 homes per annum in the current Local Plan. This problem would be resolved if overseas students were removed from statistics for international migration on the basis that they are only here on a temporary basis to study.

In the 2011 Census, the term time address of students was taken as their permanent place of residence. This means that Guildford appears to have a very high proportion of people in the 18-24 year age bracket who are assumed to have a high probability of forming new households and settling in Guildford when in reality students move away from Guildford at the end of their studies. This problem would be resolved if, for the purposes of projecting household formations, the home address of students should be taken as their permanent place of residence.

Finally, students generally should not be included in statistics for calculating housing need. Students need student accommodation, not housing. One of the problems we have in Guildford is that, because the university has not built enough Halls of Residence, students occupy an estimated 2500 affordable houses in Guildford which are therefore no longer available for key workers such as council employees, hospital employees, teachers, shop assistants etc. At the moment the university only provides accommodation for about 35% of their full time students despite a requirement in the 2003 Local Plan that they should provide accommodation for at least 60%. The University should be required to provide more student accommodation.

Comment ID: SQLP16/1338  Respondent: 8593537 / Normandy Parish Council (Leslie GA Clarke)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: (No)
Normandy Parish Council strongly objects to the Guildford Borough Proposed Submission Local Plan: Strategy and Sites ("Local Plan") and in particular to the allocation of land south of Normandy and north of Flexford for substantial development.

In principle objection to development of this site

The Parish Council opposes the principle of the development of this site:

(1) The site lies within the Green Belt, and has been assessed by Guildford Borough Council (GBC) as having high sensitivity in Green Belt terms, serving to check the southward sprawl of Normandy and northward sprawl of Flexford, preventing the merger of those settlements, and safeguarding the countryside from encroachment (see Green Belt Purposes Assessment, April 2014). Accordingly, given the very significant contribution made by the site to the Green Belt in this area, it should not be developed.

(2) The development of the site would not amount to sustainable development within the meaning of the National Planning Policy Framework. GBC's claim that the approach would be sustainable fails to attach any or any meaningful weight to the environmental aspects of sustainability.

(3) The proposed allocation has not been the subject of any proper assessment of highways impacts. The local road network is incapable of coping with the proposed scale of development and there is no evidence that the necessary highways improvements are feasible or deliverable within the plan period.

(4) The site lies within 1 km of the Thames Basin Heaths Special Protection Area and accordingly requires substantial provision of alternative green space as an avoidance strategy. Preferable sites for development elsewhere could be delivered without such provision.

The development of the site would significantly affect Normandy and the surrounding area and has not been justified in the Local Plan or in the supporting documents. In addition to the principled objections to the development set out above, the Parish Council considers that there have been substantial flaws in the plan-making process to date which go to both the merits and legality of the Local Plan.

Specific criticisms of the plan making process

A sound plan must be based on proper evidence and consistent with national policy. To be lawful, the plan must be promoted on the basis of a proper analysis of the environmental impacts of policies together with an assessment of reasonable alternatives (see Environmental Assessment of Plans and Programmes Regulations 2004/1633 and e.g. Calverlon PC v Nottingham City Council [2015] EWHC 1078 (Admin), per Jay J at (67)).

The history of the Local Plan is known to GBC. The Parish Council wishes to emphasise that in the 2014 plan, it was not proposed that this site be allocated for development. Since then, there has been no further Green Belt review, but there has been a Green Belt Purposes Assessment which identified this site as particularly sensitive in Green Belt terms.

There is no explanation in the published documents of the "exceptional circumstances" (NPPF, 80) that are said to justify release of the site from the Green Belt. The Green Belt Capacity Study does not explain why such exceptional circumstances exist, and nor does the Sustainability Appraisal ("SA"). Extraordinarily, the SA states that the development of the site is regarded as a "given" (6.3.16). The SA acknowledges (in footnote 68, p 131) the greater impacts on the Green Belt in developing sites such as this, but does not explain why such development is nonetheless justified on both environmental grounds and by reference to the exceptional circumstances test.

The SA is open to further criticism through its failure to accord any weight to the Green Belt in analysing various options. This is a significant deficiency which renders the SA unsound and indeed unlawful, since the alternatives are not subjected to proper analysis on environmental grounds.

Further, GBC has consulted on the Local Plan with the proviso that this site should be deleted from the plan should it be demonstrated the provision of a secondary school on the site is not required.
However, there has been no proper assessment of whether alternative sites could accommodate the school, as is clearly required given the "exceptional circumstances" test. GBC's assessment of alternative secondary school sites notes that Surrey County Council's concerns as to remoteness of the site from development are as was only overcome by the new housing provision in the Local Plan i.e. that housing which is proposed on this site. The alternatives assessment fails to identify the land area required for the school, and fails to assess alternative sites on the basis of their contribution (or otherwise) to the Green Belt. This is a fundamentally flawed sequential assessment.

Even if this site is the only possible school site (which is not accepted) then there is no explanation as to why 1,100 houses are required to be delivered in addition to the school, with a materially greater impact on the Green Belt and the environment generally. Part of the justification offered for the selection of this site for a school is that it is close to the proposed housing (together with other development sites). This argument is circular, since if the school is not required in this location then nor is the housing. In any event, this justification does not compare alternative sites on a fair basis, since other sites are rejected for schools on the basis of their Green Belt location. This site also lies within the Green Belt.

The Leader of GBC has suggested that the proposed houses should be regarded as "enabling development". The Parish Council submits that school funding should be achieved through the normal channels and not through the release of Green Belt land to housing development. This suggested cross-subsidy is an unjustified claim (there has been no viability analysis) and in any event is not a proper planning reason for allocating the site for development. The Local Plan is therefore unsound.

**Next Steps**

GBC's consultation on the Local Plan was based on the proviso that policy A46 was to be deleted in the absence of justification for the location of a secondary school at the site.

The Parish Council has seen no proper justification for the location of a secondary school in this Green Belt site. The selection of the site appears to have been justified on the basis that it will be close to the housing identified in the allocation. This makes for an entirely circular argument; the housing is only put forward on the basis of the school, and the school on the basis of the housing.

This cannot amount to an exceptional circumstance for the release of land from the Green Bell. There has been no adequate sequential site assessment for a new secondary school.

In those circumstances, GBC is invited to confirm that policy A46 will be deleted from the Local Plan because the school location has not been justified. The Spatial Strategy should be amended accordingly.

We await GBC's urgent confirmation that the Local Plan will not be proceeding with Policy A46 and that the land in question will remain within the Green Belt.

**Attached documents:** [LP2016-Normandy-L Clarke- Parish.pdf](#) (642 KB)
Evidence

I object to the evidence presented to support the plan as follows: There is no sound evidence in terms of the ELNA 201 which shows an 80% reduction in employment space from the previous ELNA carried out by GBC in 2013. This means that the industrial space at Burnt Common is no longer needed. Housing numbers from the Strategic Housing Market Assessment 2015 (SHMA) are highly questionable; the # of foreign students has been wrongly used to inflate the need. The required 13,860 houses in the local plan is exaggerated. If the population is to grow by some 20,000 in the plan period, we actually need 8000 homes (based on an average of 2.5 persons per home). The Green Belt does not need to be built over. 50% of the new homes could be built on brownfield sites. GBC’s transport assessment was not even available to councillors for the vote taken on 24 May. Infrastructure overload has received scant attention.

Policy P2

I object to the proposal that Send be removed from the Green Belt. Send provides a buffer between Woking and Guildford. If the vulnerable areas proposed are to be included within the village boundaries and removed from the green belt, (the land behind St Bedes and along the Wey navigation) one assumes that there will be a presumption for building on those sites in the future.

Policy A43

I object to the proposal to build 400 houses and 7,000 m sq of industrial use and warehousing at Garlicks Arch. There is no need for any more houses on top of those already proposed for the borough. This site is NEW and not included in the Regulation 18 draft and has not been consulted on previously. It is Green Belt permanently protected by the NPFF which prevents merging of the settlements. There are no exceptional circumstances. The site has particular conservation sensitivity as it is covered in ancient woodland. The proposed industrial development of 7,000 sq m is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous plan. If there is a further need for industrial space, then it should be at Slyfield. A new 4-way interchange onto the A3 at Burnt Common would put substantial pressure on the already overloaded Send Road (A247) as it would be the through route for Woking for traffic leaving the M25 and A3 and the proposed new houses at Wisley and Burpham.

Policy A44

I object to the proposal to build 40 homes and two new travellers pitches to the west of Winds Ridge and Send Hil. This site is new and was not included in the regulation 18 draft and has not been consulted on previously. Development for housing is inappropriate due to its permanent green belt status and the beauty of the site. The subsoil of the existing site contains documented unsafe land fill waste which is currently being vented. The proposal to include 2 Travellers pitches is inappropriate due to the narrow width single track road providing insufficient access to the site.
There appear to be very strong grounds for suspecting the validity of the SHMA on which the Housing Requirement is based and which appears to be inflated by unreasonable estimates of student accommodation requirements. I know the Guildford Residents Association have made representations on this point and their findings appear to hold water. I urge you to review the annual target of 693 dwellings which I believe may be over-inflated.

Comment ID: SQLP16/569  Respondent: 8598049 / Environment Agency (Jonathan Fleming)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: (Yes)

We have comments regarding the evidence base documents:

- Draft Infrastructure Delivery Plan
- Flood Risk Sequential and Exceptions Test

As these are comments regarding the soundness of the Plan we have submitted them in Question 3: Soundness.

Attached documents:

Comment ID: SQLP16/414  Respondent: 8599201 / Richard D Jarvis  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: (Yes)

I have submitted comments on the evidence in statement sent by email. In addition I wish to raise a set of questions on the transport related evidence. These are queries asked during the consultation period which I was advised to submit via this questionnaire.

A Strategic Highway Assessment

A1 In the SINTRAM network, how many kilometres are there of each class of road?

A2 Please provide the totals for trips as follows for the AM and PM peak for 2009, Scenario 1 and Scenario 2

   i) intra-borough  ii) external to borough  iii) borough to external

A3 There are marked differences between peak arrivals and departures in the AM and PM peaks. Table 3.5 shows for Scenario 2 Am pk arrivals of 1,850 and PM peak departures of 3236. Why the large differences? The response by email on 1 July does not answer the question.

A4 Table 4.13 shows outward cross-boundary impacts. Please provide the equivalent for inbound.

A5 Please tabulate link flows and RFCs for Scenarios 1 and 5 for all the links listed in Tables 4.3, 4.4, 4.5 and 4.12, for the AM and PM peaks

A6 Please tabulate junction delays for all the junctions in Tables 4.8, 4.10 and 4.11 for scenarios 1 and 5 for the AM and PM peaks.
A7 In Scenario 5 the RFC for the M25 J10-11 is 1.0 (Table 4.5) what is the link speed for this case? The A3 has an RFC of 1.10 in Table 5. What is the corresponding link speed?

A8 What is the total number of trips (i.e.2009) to which the extra trips in Tables 3.5 were added?

A9 There are no additional trips in Tables in 3.3 and 3.5 for zone 552 Slyfield Residential which is a zone with a large housing development in the Plan. Is it that case that extra trips should be added to rectify an omission?

A10 Does the version of TEMPRo used for external growth take account of the planned development in Rushmoor called Wellesley (Aldershot Urban Expansion)?

A11 The trips to and from town centre zones in Scenarios 1 and 2 show a marginal increase over 2009 in the AM peak, and a reduction compared to 2009 in the evening peak. I have classed the following as 'town centre zones': 133,134,135,136,310,540,541,545,543,544,547,548,549,550. The combined increase in the AM peak trips is 90, and the reduction in the PM peak is -341. This is difficult to reconcile with the scale of growth of the town, including the centre, with increased housing and major retail expansion.

**Comment ID:** SQLP16/523  **Respondent:** 8599201 / Richard D Jarvis  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

**Answer:** (Yes)

The Strategic Highway Assessment Report explains that the distribution of the additional trips generated and attracted to new developments was based on 2011 Census data, with the exception of Wisley Airfield development.

While this is a pragmatic way of dealing with the matter, it is a simplification in that the distribution is not influenced by either the new developments of the traffic conditions on the network.

Topic paper : Transport

[text of attachment reproduced below]

**Doc Ref T12a Addendum to 2016 Strategic Highway Assessment Report: high level review of potential key changes in the Guildford borough PSLP: strategy and sites June 2017**
1. This presents a qualitative assessment of the effect of the changes made to the 2016 plan on traffic forecasts. Essentially, because the amount of development in the plan has been reduced, GBC’s argument is that things will be better than estimated in 2016. We can readily agree that where development sites have been removed, notably as in the case of the Normandy/Flexford strategic site, the forecast traffic level will be lower in the vicinity of the development. However, there are some sites where the planned development is now greater than in 2016. There are also potential changes to plans outside the borough to be taken into account, such as Dunsfold Park, which may have significant consequences for Guildford, as was pointed out by SCC and GBC in their submissions to Waverley in response to that planning application. The trip rates used in the forecast assume a level of public transport use and an appropriate level of bus services.

2. On the evidence provided by the SHAR based on the 2031 traffic forecasts using the SCC traffic model, congestion will be widespread in peak periods across much of the highway network, including on strategic routes. The A3 and M25 are forecast to be at or over capacity. The cumulative effect of the additional traffic generated by the developments in the plan will be to increase congestion, even with the proposed highways schemes in place. Interpreting the model results is not straightforward, as was pointed out in response to the 2016 consultation. Table 4.12 is significant – showing the roads with the ten largest ratios of flow to capacity for Scenario 3, which includes all the planned development but not the major strategic route improvements on the A3 and M25. There is no equivalent for Scenario 5 (i.e. with the strategic improvements), but we can infer that all the roads in Table 4.12 will be at or over capacity in Scenario 5.

3. With regard to the comments on Policy A6: North Street redevelopment (page 9), the model used for the Strategic Highway Assessment is not sufficiently detailed to provide a satisfactory assessment of conditions on the town centre road network. This has been recognised by GBC and has led to the commissioning of more detailed analysis using a simulation model. Added to which, there is uncertainty over the highway capacity implications of the Sustainable Movement Corridor in the town centre and possible changes to the town centre gyratory, as discussed in the draft Town Centre Regeneration Strategy, which indicates that the intention is to reduce the capacity of the town centre network. The experimental closure of Walnut Tree Close is already being planned. Taking into account the demand forecast on the A281, the A322 and A31 in Table 4.12, the consequences of such a reduction will be far-reaching.

4. Policy A26: Blackwell Farm has been amended and now the proposed development includes a secondary school with up to six form entry. This will add to morning peak hour traffic which was not included in the 2016 modelling. The SHAR findings indicate that there will be congestion in peak periods on the network that will serve this development. The A3 will be at or over capacity which means that the network will lack resilience, as it does today. The roads connecting to the town centre will continue to be under pressure. The SMC concept is more advanced on this section than elsewhere, but the effect on capacity has yet to be established. There will be queuing on the A31 on the approach to the new signalised junction that will give access to the Blackwell Farm site. The A31 is regarded as a key route by the LEP and LA partners.

5. The improvement to the A3 is obviously critically important to the Gosden Hill Farm development. We do not have the benefit of analysis of the proposed new slip roads giving access off and on to the A3 S-bound carriageway, nor an understanding of the implications of the SMC for the allocation of highway capacity on the local roads. What is self-evident is that the pressure on local roads in Burpham is already intense in peak periods, and these roads are not suited to carrying large volumes of traffic. Under the plan, congestion is very likely to be worse than today. The proposed Policy A24 Slyfield development will also add demand to the A320 and roads in Jacob’s Well.

6. The change to Policy A29: Land to the south and east of Ash and Tongham involving more houses means that there will be more traffic locally. While this will not be ‘major’ in terms of the borough as a whole, it will be significant locally. Ash and its surroundings will be impacted by the large Wellesley expansion in Aldershot. It is not clear to what extent the modelling reported in the SHAR allowed for this development. The pressure on the A331 and the roads connecting Aldershot to Guildford and Woking will increase.

7. The M25 is forecast to be at capacity after the planned improvements have been introduced, as shown both in the SHAR and also in the recently published DfT/HE report on the South West Quadrant. This is relevant to Policy A35 Wisley airfield. It should be noted that RHS Wisley is expanding its facilities with the aim of significantly increasing visitor numbers. The DfT/HE Stage 3 report concludes that the focus should not be on widening the existing road further beyond currently planned schemes but on how to reduce pressures and provide parallel capacity to relieve this part of the network. If the M25 and A3 are at capacity, then the Wisley development will add pressure on local roads that are not...
well-suited to carrying higher volumes of traffic. This is also relevant to the proposed developments at Burnt Common. The consequences for Ripley are likely to be serious. It is noted that Policy A35 now includes a requirement for mitigation of impacts in Ripley and on surrounding roads, which is some recognition that there will be a problem.

8. A comprehensive up-to-date analysis is required to inform decision-making. This should include analysis of the mid-term stage of the plan, before the A3 improvement is complete, as well as 2034.

**Doct Ref T13 Transport Strategy**

9. Section 1 Overview. The description of existing conditions and challenges is broadly correct and welcome.

10. Section 2 Surface access to airports. The problem is that the improved A3 will be at or over capacity in peak periods under the Plan, and the M25 SW Quadrant study has concluded that the M25 will be overloaded. So surface access to Heathrow from Guildford will continue to be affected by the weaknesses listed in this section.

11. Section 3 Rail. This section is welcome. However, it is noted that Crossrail 2 has not yet been secured.

12. Section 4 Strategic roads. Surely the strategy should be aligned with the position of Highs England set out in the Topic Paper: Transport, where it is evident that the improvement of the A3 will not be completed until 2026/27, or even 2027/28? The removal of schemes SRN1 and SRN6 from the list of key infrastructure for the plan, and redesignating them as ‘aspirational’ is inconsistent with the safety objectives of the borough and surely of Highways England and Surrey County Council (the highway authority). Under the strategy and the Plan, the issues for Beechcroft Drive and the weaving and merging issues on the existing A3 will not be addressed until half way through the plan period.

13. Section 5 Local roads. While welcoming the aspiration to transform the town centre, the traffic implications have not been dealt with in the strategy or the Plan. Section 1 correctly included the issue of “severance of the town and its constituent neighbourhoods resulting from a combination of the A3 trunk road, railway lines and the River Wey”. The case for a new crossing of the river and railway, relieving pressure on the Farnham Road railway bridge and helping to achieve a better environment on town centre roads, should be taken very seriously and examined in depth. There is a real risk that a significant reduction in capacity in the town centre, both the gyratory and Walnut Tree Close, and on routes carrying the SMC, will lead to road users transferring to minor roads around the town that are unsuited to carrying more traffic.

14. The M25 SW Quadrant study report recommends that alternative routes are developed to carry orbital traffic, and this could mean more use of the A31/A331 in Guildford. There are local roads where capacity is already an issue and planned growth will add to problems that are not mentioned in this strategy. The scope of this element of the strategy is not wide enough. The bus transit strategy is welcome. However, there is insufficient information on the Sustainable Movement Corridor to gauge either what it might deliver or its potential impact on road capacity. The statement under ‘Anticipated improvements’ that the New Sustainable Movement Corridor provides rapid and reliable bus journeys in Guildford urban area and links...’ has not been demonstrated. Consultants have been carrying out studies but the results have not been made public in time to inform this consultation.

15. A high quality bus station in the town centre is critical for the future of the town. There is a lack of park and ride on the east of the town and not even an aspiration for future provision.

16. The active modes strategy is welcome. However, many roads in the borough are two-lane carriageways of restricted width, with little scope for allocating space for cyclists, and this has to be either accepted or addressed over the long term.

17. Section 6 Air quality. If traffic is going to increase in aggregate, as the forecasts show, even with the measures being proposed, then air quality will continue to be a concern.

18. Section 7 Road safety. The proposals are welcome, but as stated above, the schemes SRN1 and SRN6 should be reinstated in the Plan for safety reasons.

20. This is a helpful paper providing context and background to the transport aspects of the Plan.

21. The fact the new supplementary technical work is planned to be carried out prior to the submission of the plan to the Secretary of State (para 3.18) is welcome, but it would have been better if the results had been available for this consultation.

22. It is recommended that the wider evidence base should be expanded to include the following:
- Local Enterprise Partnerships and Local authorities: Influencing Strategic Transport in the South East, WSP, 2016
- Surrey County Council: Response to Waverley borough Council on WA/15/2395 Dunsfold Park, Dec 2016
- Guildford Borough Council: Guildford Town Centre Highway assessment – Town Centre Highway Layout Concept Testing, WSP, April 2016

Comment ID: pslp17q/163  Respondent: 8599201 / Richard D Jarvis  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents
Answer: (Yes)

The evidence presented on housing need in GLHearn's Guildford Addendum to the SHMA (March 2017) is flawed. The explanation of why it is flawed is set out in the report prepared by Neil McDonald for Guildford Residents Association - Review of GLHearn's Guildford Addendum, July 2017. (This report has been peer reviewed.) There are strong grounds for revising the OAN downwards, which would have fundamental implications for the Plan.

Comment ID: pslp17q/165  Respondent: 8599937 / Development Planning Consultants (Richard Cooke)  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents
Answer: (Yes)

The evidence base is acceptable.

What is not acceptable is the analysis of that base. In particular the Green Belt and Countryside study assesses GB and its fundamental principles and produces a hierarchy of sites where GB releases might be considered. The policies that you are deriving from this study do not take into account the work of that study. The major releases at Gosden Hill, Wisley, Blackwell Farm and Garlicks Arch will produce a ribbon of development almost the entire length of the Borough. The public perception of the national protection afforded by the London Green Belt (whilst travelling on the A3 for example) will be of a continuous built up zone. The LAA base reflects developer submissions and not an independent planner led assessment of suitable sites.

Attached documents:

Comment ID: pslp17q/480  Respondent: 8601537 / Downsedge Residents' Association (Rosemary Morgan)  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents
Answer: (No)
Downsedge Residents’ Association supports the evidence provided by Guildford Residents Association, namely the “Review of GL Hearn’s Guildford addendum to the West Surrey SHMA”, produced by Neil McDonald (attached alongside this document). In particular, we are concerned that:

- The population forecasts produced by the Office for National Statistics (ONS) significantly over-estimate the district’s population and hence future housing need, due to the under-recording of students leaving Guildford at the end of their studies. The housing need figures have therefore been over-estimated by the use of invalid population forecast.
- Despite the Objectively Assessed Housing Need (OAHN) figure having been reduced from 13,860 homes in total (2013-2033) to 12,426 homes in total (2015-2034), since the earlier draft of the Local Plan, this revised figure, of 654 new dwellings per annum, is still substantially higher than the typical new housing figure achieved for Guildford over recent years.
- This ambitious new housing figure also relies on building on Green Belt land at a number of locations, including the strategic sites of Gosden Hill Farm and Blackwell Farm and a new settlement at Wisley.

- While we were pleased to see some reduction in scope of both the Gosden Hill Farm and Blackwell Farm developments, we were disappointed that the figure for new homes in the urban areas remains little changed at 3,000 units. We would have preferred to see a substantial increase in the use of brownfield sites within the Guildford urban area and a subsequent reduction in the use of Green Belt land, not only in order to protect our valuable Green Belt, but also, to reduce the impact of new housing development on increased traffic congestion (an issue addressed elsewhere).
- While the Plan acknowledges that new infrastructure will be one of the benefits of the new large strategic greenfield sites, we would have preferred to see some improvement in infrastructure take place before the development on these new greenfield sites, in order to address existing issues, especially on transport infrastructure. In relation specifically to transport infrastructure, and the Guildford Borough Transport Strategy, 2017, Downsedge RA has a number of concerns, including:

- If the Dunsfold Park development of 1,800 homes goes ahead, the main access to this site from the north would be the already congested A281, through Guildford town centre. The only improvements to the A281 in the Local Plan are some improvements to the Shalford roundabout (A281 / A248), which are probably required anyway. Downsedge RA would like to see further improvements to the A281 into and through Guildford, in order to reduce the likelihood of increased traffic through Chilworth and into to Guildford via Halfpenny Lane, One Tree Hill Road and Tangier Road (a well-known rat run).
- The traffic on the urban section of the A3 through Guildford regularly blocks to a complete standstill, and when it does so, traffic tends to exit either at the A322/A323 Wooden Bridge Roundabout (northbound) or at the Burpham exit (southbound), causing congestion in and around the north and west of Guildford, and often through much of the town centre. Downsedge RA believes that this issue needs to be resolved.

**Site A16 Land**

**at Gill Avenue**

Do you consider this section of the plan is legally compliant? Yes

Do you consider this section of the plan is sound? Yes

Do you consider this section of the document complies with the Duty to cooperate? Yes

The A2Dominion Group has a ground lease on land within site Policy 16. A2Dominion are supportive of the proposed allocation for Policy A16 and A17. It is a core principle of the Group to continually look to improve their accommodation and services across all of its sectors which include key worker, student, social and market accommodation. Policy sites A16 and A17 provide the potential to provide high quality key worker accommodation for the hospital’s need, and much needed market accommodation. The A2Dominion Group in principle would support collaboratively working with Royal Surrey County Hospital to explore opportunities to improve the existing environment within the site.

A proposal that could incorporate strategically relocating existing key worker accommodation for hospital staff, and indeed potentially increasing the quantum of such accommodation is something A2Dominion wholly support, as it also provides the opportunity to deliver the highest standard of modern accommodation going forward. This is key for attracting and retaining the highest quality of staff for the hospital for the services and care it provides for the local community.

If you are proposing a change to the Proposed Submission Local Plan: strategy Yes No and sites, do you wish to express an interest in participating at the Examination? Yes

Why do you wish to participate at the Examination?

It is important that A2Dominion are represented at the Examination in order to support the identification of the site for development, confirm the land is available and developable to enable the allocation to proceed with confidence and provide evidence on any general matters regarding the site which may arise at the Examination.

**Site A17 Land**

**south of RSCH**

Do you consider this section of the plan is legally compliant? Yes
Do you consider this section of the plan is sound?  Yes

Do you consider this section of the document complies with the Duty to cooperate?  Yes

I wish to record that I object to the plan as a whole and to that part that affects me most covering the Horsleys, Effingham Junction, Ockham.

I objected to the previous plan and this revision seems little different; in some respects worse. First it is not really a plan. It is only part of a plan. There is a bit about the "what", a lot about the where and nothing about the "when", "how" and "who".
1. Fundamental Overall Objection

   • Green Belt and AONB

It has been made clear by the Government that they remain committed to protection of the rural environment. When asked to comment on the National Planning Policy Framework, the Minister of State for Housing & Planning Brandon Lewis MP made the following declaration in a letter dated 10th June 2016 to Richard Knox-Johnston, Chairman of the London Green Belt Council:

“The Framework makes it clear that inappropriate development may be allowed only where very special circumstances exist and that Green Belt boundaries should be adjusted only in exceptional circumstances through the Local Plan process and with the support of Local people. We have repeatedly made clear that demand for housing alone will not change Green Belt boundaries.”

This clear policy statement is not reflected in the draft Guildford Local Plan which calls for housing development not only on a number of sites in the AONB and the AGLV but also encroaches on the Green Belt in a wide range of other locations. CPRE maintains that this is a misguided approach and renders the current proposal unsound. CPRE OBJECTION.

   • Town Centre Capacity

CPRE believes that the draft Local Plan is also unsound because no complete proposal for the Town Centre or for the development of the urban area has been made available in time for this consultation. This is required so that a coherent assessment can be made of the priority given in terms of the extent and type of housing development proposed, its density and location. Town and countryside have to be considered in parallel. CPRE OBJECTION.

   • Green Balance Review of Objectively Assessed Need (OAN)

CPRE Surrey has commissioned Green Balance to review and supply an independent commercial opinion on the validity of the OAN housing figure of 693 given in the GLH Hearn West Surrey Strategic Housing Market Assessment (SHMA)
for Guildford, Waverley and Woking. Their report makes clear that they judge this document to be flawed and the OAN figure for Guildford to be too high. In view of the Green Balance evidence produced, this puts the credibility of the whole draft Local Plan in question. The over estimation of housing need effectively makes the draft Local Plan unsound. CPRE OBJECTION.

Instead of the OAN recommended in the SHMA of 693, an overall reduction is suggested for this figure of 212 which results in a revised OAN of 481. Other areas for further investigation as to the validity of the 693 figure have been suggested. The summary of reductions recommended for the OAN for all 3 districts covered are shown in Table 1 of the enclosed SHMA Review on page 4.

CPRE does not accept that the constraints relating to development in this draft Local Plan have been properly assessed or taken into account. If they were, the OAN would be radically reduced and we estimate that there would be no need to use Green Belt land. GBC has indicated that the OAN figure which GL Hearn has produced takes account of constraints but gives no explanation of how this has been done. This whole topic needs to be investigated further.

CPRE is also not in agreement with the emphasis given to retail sector expansion and office and warehouse development at Guildford at a time of changing conditions in the market-place and a need for more urban housing. CPRE believes that the focus of attention on building in the countryside has been caused by a too high OAN figure and a refusal to allocate sufficient priority to the supply of affordable housing and flats in the town because building development in this category has been sidelined rather than given the attention it requires. CPRE OBJECTION.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

Section 6: Land Availability Assessment (“LAA”) 2016

We have reviewed the LAA being one of the major elements of the Evidence Base and we have the following observations relating to Shalford Parish.

6.1 Sites within Villages: We note that 8 sites have been identified within the LAA which would fall within the existing settlement boundaries of the villages of Chilworth and Shalford and could provide 59 new homes. If the inset proposal goes ahead as planned by GBC these sites will no longer be within the Green Belt and any such planning application will be addressed as and when they arise and we will have to rely on the provisos in Policy D4 to resist any applications which we feel to be unacceptable.

6.2 Land proposed to be inset: There is only one such site within the LAA which arises from the proposed re-drawing of settlement boundaries being Site 2286 Land at Old Manor Farm, Chilworth. We have commented on this in para 5.3.1

6.3 We note that site reference 1264 being land to the rear of Greenhill/Burnside has been discounted due to Suitability Concerns and its designation as protected Open Space in the Plan. This is very much welcomed, but in addition we would equally welcome a decision that this land should retain its Green Belt status outside the settlement boundary.
6.4 We note that site reference 2295 Chinthurst Farm, Chinthurst Lane has been discounted as “not sufficient evidence
base to demonstrate that it is Previously Developed Land”. This is very much welcomed.

6.5 We also note and welcome the substantial number of “discounted sites” listed on page 544 of the LAA

Comment ID: SQLP16/166  Respondent: 8640353 / Julian Cranwell  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission
documents
Answer: (No)

The evidence base is far from adequate. The council is not in possession of the model used to calculate the OAN. Much
of the remainder of the ‘evidence base’ appears to have been cobbled together to support as development agenda, with
insufficient regard to infrastructure needs.

Attached documents:

Comment ID: SQLP16/1310  Respondent: 8640353 / Julian Cranwell  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission
documents
Answer: ()

We object to the paucity of the evidence base. The submission documents are unsound, unreliable and inconsistent

Key parts of the evidence base are flawed or based on withheld assumptions. The current SHMA inflates the proposed
housing figure due to the following factors:

- the failure to correct for errors in the historical data for international migration flows;
- the way it considers students and affordability, and
- the flaws in the method for estimating the number of homes needed to support job growth;
- the treatment of vacant property

The Green Belt and Countryside Study does not value the fundamental aim of Metropolitan Green Belt properly or look
strategically at options for development in major settlements beyond. The way Green Belt is parcelled up and scored is
not valid: serving 2 Green Belt functions is as valid as serving 4 functions. Green Belt is Green Belt, it does not require
assessment or qualification. The Green Belt sensitivity analysis is not a valid basis for informing decisions. Exceptional
circumstances clearly do not exist to justify amendments to Green Belt boundaries as part of the Local Plan process. It is
quite achievable for realistically prepared and identified development needs to be accommodated in Guildford’s urban
areas and villages.

The Transport Evidence has been produced very late and is incomplete, inaccurate and untested to the extent that the Plan
is not ready for a Regulation 19 consultation. It is emerging that the Strategic Highway Assessment shows there will be
congestion, even with all the highway schemes in the Plan. Many questions remain unanswered. E.g. Why would 1000
homes on Slyfield generate no extra traffic? The report only gives average speeds and information needed to understand
how much congestion will occur and where it has not been provided in time to inform Plan proposals or responses. The
available evidence suggests much of the proposed Sustainable Movement Corridor cannot be delivered due to narrow
roads and pinch points. Evidence on bus travel is fundamentally compromised because no clear and workable location for
a bus interchange is proposed. No information has been provided on the demand for and capacity of rail services. The
main line to London is already extremely busy in peak periods. Information about the town centre as regards traffic, buses
and parking is lacking. It is not credible to proceed without this given existing levels of congestion, the number of transport routes that rely on the town centre to cross the Downs, the shortage of crossing points over the railway and river and the fact that narrow roads and steep slopes make Guildford unsuitable for a ring road approach. The Strategic Highway Assessment 2016 is flawed. It is invalid to base this on less traffic growth than the proposed housing growth. The report points to overcapacity use of the A3, M25, A31, A320, Millbrook, Ladymead, Woodbridge Road, York Road, London Road but understates the congestion consequences. Various suggested queue reductions are unexplained.

The consequences of major proposed reductions in road space in the town centre (e.g. closure of Walnut Tree Close, narrowing of Woodbridge Road, reduced capacity of the gyratory) and of developing Burnt Common are not included. More time is needed to assess and refine this crucial 11th hour report which seems incomplete, understates the consequences of traffic overload, shows inconsistencies, and does not supply assumptions or information needed to understand queues at junctions.

The Guildford Retail Study Update lacks credibility and there is no proven case for expanding comparison retail space which is undermined by failure to implement existing retail consents at the North Street development over the last 10 years. The Guildford Retail Study does not take account of changing retail patterns in relation to the threat of the internet and the “clicks and mortar” conflict. The study also assumes a number of logged retail requirements from companies already in liquidation or with national requirements that exclude Guildford. We believe that it was unacceptable to stop monitoring air quality, where NO2 emissions exceed limits, on the unrealistic assumption congestion would reduce. Estimates of premature deaths have doubled and issues with vehicle emission controls have emerged. Traffic noise from the A3 should also be reported.

1. Questions posed by Guildford Borough Council as part of its consultation.

Questions from GBC

24.A. Question 1: The evidence base and submission documents

The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence. The evidence base documents contributing to the preparation of the plan are listed and can be found.

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

**ANSWER**

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.
1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Comment ID: SQLP16/349  Respondent: 8659489 / Helen Bennett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: (No)

The number of new houses proposed in the Strategic Housing Market Assessment has been generated without any visible evidence or explanation. The numbers are vastly inflated and the forecast population increase in the borough as a whole is 70% higher than the official national estimates for the borough. These inflated numbers become even more inaccurate when looking at individual villages: the proposals for the Horsleys, Effingham and Ripley/Ockham far exceed the number of houses required by the local population. The proposed increases in households in these areas can be as high as 35-50%. It will destroy a semi - rural pocket of Surrey. All on false numbers.

Comment ID: SQLP16/324  Respondent: 8687041 / Michael Aaronson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: (No)

The Strategic Housing Market Assessment (SHMA) is deeply flawed, as has been demonstrated by two separate authoritative studies: Councillor David Reeve's analysis published in July 2016 and the independent NMSS report commissioned by the Guildford Residents Association of June 2016. In turn this invalidates the statement of Objectively Assessed Need (OAN) and negates the basis on which so much development is proposed in the Local Plan. I OBJECT to the entire Local Plan's being predicated on a housing number that rests on a flawed methodology. I also OBJECT to the fact that constraints have not been applied to the OAN to arrive at a more rational housing number. I believe the number in the Plan to be grossly inflated as a result and not a sound basis for planning, especially as using this number has such devastating consequences for the Green Belt.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()
Insufficient data on infrastructure analysts in particular traffic movements and journey times in the area immediately surrounding the proposed development sites in East/West Horsley.

Also, given that HS2 and other major capital projects are being put on hold, following recent government cut backs, how can extensive housing development take place whilst A3 upgrading is by no means certain?

**Comment ID:** pslp17q/460  **Respondent:** 8708545 / Nigel Wicks  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

**Answer:** ()

I object to the evidence base as it applies to Policy S2; because it fails to reflect the deterioration in national economic prospects as a result of the EU Referendum and thus overestimates the need for the provision of housing numbers; because it assumes that a high proportion of students will remain in the borough after graduation rather than is most likely moving elsewhere; and because it encourages development in the South East when it is declared government policy for development to be balanced throughout the country and especially in the northern English regions.

I object to the proposed changes to the plan and evidence produced or updated since 18 July 2016, for all the relevant reasons set out in the submissions of the East and West Clandon Parish Councils.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Attached documents:

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base
and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Attached documents:

Comment ID: SLP16/624  Respondent: 8729217 / Karen Stevens  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: (No)

No I do not agree that the evidence used for the Submission draft of the Local Plan Strategy and Sites is adequate or relevant. The Strategic Housing Market Assessment (SHMA), the Strategic Highways Assessment Report (SHAR), the Sustainability Appraisal and the Green Belt and Countryside Study (GB&CS) are all either flawed, provide incomplete information or information that is not properly used to inform the Plan.

SHMA - I support the commentary on the SHMA provided by Neil Taylor (on behalf of the Guildford Residents Association) and Richard Bate (on behalf of CPRE). Furthermore, I do not believe that residents are being consulted properly on Plan when they have no means of understanding how the objectively assessed housing need has been derived. Without the ability to check this figure (and without any assurance that councillors have scrutinised this), it is impossible to know how many sites are required to meet the borough’s need.

SHAR - The SHAR is very thin on detail. There is no clear indication of how junctions will operate (eg the proposed 4-way junction at the top of the Farnham Road (on the A31)), or which routes new roads will take (eg the proposed link road from the A31 to Gill Avenue). No details are provided about how schemes have been costed (eg the A31-Gill Ave link road and the Sustainable Movement Corridor) or about what other alternatives have been considered and why they were ruled out. I fully support the commentary in the Technical Note by traffic consultant RGP on the proposed access to site A26 (Blackwell Farm), which was commissioned by Compton Parish Council.

Sustainability Appraisal - This appraisal appears to be based purely on grounds of walking distance to a selection of nine facilities. Even within this limited appraisal, there are some oddities: the most obvious point of ‘walking distance to a bus stop’ has been omitted on the dubious grounds that everywhere will be served by buses, but the nearly-pointless ‘walking distance to an A-road’ remains in the mix. It isn't clear how the Sustainability Appraisal is being used to inform site selection decisions. Parcel H2 (Blackwell Farm) is ranked 14 overall, in other words it is one of the least sustainable sites, yet it has been put forward for development.

Green Belt and Countryside Study - This study is inconsistent and flawed in its analysis. The sensitivity test it uses for determining how effectively a particular site meets green-belt purposes is simply to count how many of the purposes are met. This is too simplistic and gives little consideration to how well a particular function is met. The study also fails to take into account landscape character or environmental factors such as ancient woodland or the setting to the AONB.

The comments made by a member of Save Hogs Back at the Regulation 18 consultation were ignored.

Attached documents: GBCS Feedback Local Plan (4).pdf (2.3 MB)
Comment ID: SQLP16/536  Respondent: 8729313 / Lisa Wright  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: (Yes)

SHMA- OBJECT. No calculations available. No scrutiny in Council. No constraints applied.

OBJECT- No mention of recent AONB review.

OBJECT- LAA sites added from last consultation.

OBJECT- NO data available for Local Housing Needs Assessment. Nothing about this mentioned at Worplesdon Parish Council so not sure what GBC intend to do?

OBJECT- Retail and Leisure. Guildford do not need more retail space. Retail is declining as people shop online.

OBJECT- No update for Rural Economy, LAA and SNCI data.

On the whole a very shabby collection of rushed work without the dat to support it.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

**Answer:** ()

It is our view that this is not a robust piece of work. Some of the assumptions have been withheld and we would suggest key elements are missing or the assumptions flawed. A prime example heroes that we would suggest that the Housing Market Assumptions exaggerate the demand, The Greenbelt and Countryside Study approach is suspect and the Transport evidence is much too late and lacking in essential features to contribute to a sound and comprehensive local plan.

The OAN has also not been produced to the desired standard and we would suggest that in this regard a figure of 693 dwellings per annum is too high. Again, we would refer you to the work carried out by the GRA whose independent report came up with a figure if 500 dwellings pa which appears to be more realistic. This report also concludes that there were errors in the SHMA. For example the changes in population shift in Guildford are not the same as for other boroughs in Surrey given the student base and that it would be sensible for student movement to have been considered separately.

It is also extremely surprising and certainly disappointing that the current and increasingly poor traffic problems in Guildford, given the forecast population growth, has been given such scant regard in the Submission Plan. There is no doubt, in our mind, that failure to take a more meticulous and well thought through approach to our traffic issues will cause significant constraints in the growth of high skilled jobs and a boost to our economy in the high tech sector. In summary our town’s infrastructure as currently planned, will just not support the growth in future housing. Lastly, whilst on the subject of traffic, we find it hard to understand what, if any measures, are being taken to actively manage “pollution” problems both in terms of emissions and the noise level from the traffic on the A3 which has become an increasing blight to residents.

One of the reasons we chose to live in Guildford was not only the historic nature of the town but also its setting in the Surrey countryside. The plan as currently drawn up will certainly impinge on these desirable characteristics with the Green Belt boundaries being redrawn yet again and insufficient account has been taken of the “fundamental aim” of the Metropolitan Green Belt.

To our mind Guildford is more than adequately provided for in the provision of retail. It is our view that further development in this area should be scrapped in favour of more appropriate residential units in the town centre which would provide a more conducive environment for residents and visitors alike.
The evidence base is in many respects out of date. The SNCI and Landscape Character Assessments both date from 2007. Neither address the critical strategic sites in this local plan. They are therefore almost useless. The HRA was commenced after the first draft was issued and remains superficial and incomplete. Again it does not address the critical strategic sites in the local plan. It sweeps these aside with *ex cathedra* comments that the HRA is not relevant to issues such as the Green Belt. The Thames Basin Heaths document had actually expired - running out in 2014. Instead of re-visiting the issues the Council simply re-dated it. The engagement with Natural England has been superficial - and simply seeks NE's endorsement rather than seeking to form an authentically evidenced and reasoned perspective.

The Green Belt and Countryside Study is out of date. Moreover it was commissioned with an explicit intention to roll back the Green Belt to facilitate the political intention to turn Guildford into a 'growth hub'. The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

2. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.
The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

8/ I object to the lack of definition between this draft and the previous, withdrawn, draft. There is no clear indication of the changes to accommodate the 20,000 comments. The inadequate and often subjective documents tendered are full of inconsistencies such as the Green Belt and Countryside Study. We are given only weeks to study and comment on a huge amount of documents which GBC have had 2 years to prepare.

In summary this local plan takes no account of local needs (especially housing), local responses to the previous plan and disregards the imperatives of the Green Belt policies, the NPPF and Government advise on transparency and clarity. The fundamental premises upon which it is founded are factually incorrect, based on mysterious modelling and do not include any policies which do not fit its solution. To build an effective Local Plan on such poor foundations will ensure its collapse.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: (No)

I do not believe that the evidence base is correctly calculated. The growth predictions for the borough are not in keeping with the rest of the country or the historical growth. There are assumptions that this areas MUST take this amount of growth and I do not agree that this is correct. The greenbelt policy clearly states that it should only be altered in exceptional circumstances and not where demand for housing is the only factor.

Attached documents:

Comment ID: SQLP16/1483  Respondent: 8769793 / Laura Richards  Agent:
I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Surrey Chambers has supported the Borough throughout the process of securing a sound plan. This note is to extend that support by writing to again to re-enforce the Chamber's support for the current pre submission plan in its final Section 19 consultation.

Guildford is an important town in Surrey, termed a growth town by the EM3 LEP, where the University of Surrey and its Park are located that are an important part of the economy. The Borough needs to secure an adopted plan to enable its business community to continue to have a clear planning landscape to ensure that they can lay down Investment plans.

I am writing on behalf of the Chamber to add to our existing support for the Borough in delivery of its plan. In specific terms, this support is for:

- Planning the provision of 13,680 houses across a range of tariffs and tenures
- Improvement of the transport infrastructure in the town
- Help in supporting the educational base in the town
- Provision of additional land for the growth of employment
- Recognition of the importance of the employment base in the Borough which needs support if its strategic role is to be met fully
A plan which

- Meets national planning policy
- Has been subject to intense scrutiny
- Has the support of the elected members of the council
- It is important to put in place a sound plan that can be used by the community at large, organisations such as the LEP and by business themselves to support further investment in the town.

Please register this support, which reflects a broadly held view by business.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

**Answer:** ()

The evidence base is excessive in volume and is inadequately indexed and sign-posted. This makes it difficult to know where potentially relevant material is to be found. This is particularly serious given the short time limit for comments. Most of the material is only to be found on the Council’s website which is effectively inaccessible to anyone who is not fully computer literate which is the case with most older people. The maps are particularly difficult to follow; an example is the Policies Map of page 322 of the Local Plan where the colouring is not clear even in the printed version which cost £25. In order to achieve the meaningful and proactive engagement required under NPPF para 155, the Local Plan and the evidence base should be clear, concise and selective. The way in which the material has been presented makes it difficult even for a lawyer to distinguish the wood from the trees. Following the referendum much of the material is no longer up-to-date.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

**Answer:** (No)

The SHAR is not up to date, the model base years being 2009. Development under the plan would generate significant extra traffic on the A247 through West Clandon, the only road between London Road, Guildford, and the M25 with a bridge over the railway via Cobham. Congestion at the A3/M25 intersection at Wisley causes many vehicles to use the A247 to avoid the M25. There should be a traffic census on the A247.

The Green Belt study (2013-15) states that Send Marsh and Burnt Common has a good bus service; the bus service from there through West Clandon including Clandon Station was reduced in Sept 2016; there are now only six buses a day mostly at two hour intervals. There is no longer a no. 40 bus. Only 100 vehicles leaving 400 houses at Garlicks Arch at AM peak is not audible. (SHAR Take 3.3)

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

**Answer:** ()

1. Housing Numbers
The plan for new houses is based on a flawed assessment based around a Strategic Housing Market Assessment (SHMA) which itself is incorrect. If it were to be enacted it would mean a population increase more than 70% higher than the official national estimates for population growth in the borough. This must be rejected.

Comment ID: SLP16/460  Respondent: 8806849 / Roland McKinney  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: (Yes)

The evidence base is poor, with the results of various studies being produced to favour a pro development agenda, in line with the council's stated policy of "rolling back the green belt". One study that was particularly bad was the Green Belt and Countryside Study by Pegasus, especially Vol IV. The attempt at an update to this following earlier criticism was a charade. It was an entirely subjective report, and for a topic as important as this, objective methods should have been used. Green belt boundaries elected for inset areas were weak, and do not meet the requirements of the NPPF. This report has no place in the evidence base, it should be in the recycle bin.

Similarly, the AECOM report Employment Land needs Assessment was poor. It showed a selective use of statistics, to exaggerate the growth of Guildford's economy. It concentrated on only two employment sectors and barely commented on the predicted substantial decline in employment in retail and the impact this would have on overall employment. Worst of all, it was entirely unambitious in the use of employment land, suggesting Guildford should only use employment land with an average (across the country) efficiency. Guildford needs to be much more ambitious in its use of all land, not just employment land. The addition of 120 houses to the housing target to supply workers for the expected increase in employment in Guildford is a fantasy, and these should be removed.

Another report that was very poor was the SHMA. GL Hearn may have produced a large number of reports on this topic, but it seems this has made them complacent. They paid no attention to the suggestion that the ONS make concerning the use of their projections when producing housing estimates - that the underlying trends be understood. In Guildford's case this should have meant that the increase in student numbers was recognised and this effect removed from their calculations. As GL Hearn did not do this, the result was an estimated housing need which was grossly exaggerated - and to add an additional 25 houses for students to the target showed a complete lack of understanding of the basic numbers, as students were responsible for more than 50% of the population increase over the period measured by the ONS. Finally, the addition of 31 houses to promote affordability shows a total lack of understanding of the housing market. High prices are not just a consequence of supply and demand. In the 10 years, 2001 to 2011, the local supply of houses was greater than the demand for houses in the borough (based on the population increase) but house prices almost doubled during this period. High prices are a consequence of many factors. This report was poor quality.

Overall, the quality of the reports in the evidence base is poor and represents poor value for money - they were paid for by local council tax payers. There needs to be a recognition that reports should be properly scrutinised before they are accepted, or introduced into the evidence base. These poor quality reports should not be the cornerstone of the Local Plan.

Attached documents:

Comment ID: SLP16/703  Respondent: 8808321 / Ian Peacock  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()
I object to the fact that GBC have not met the requirements of the NPPF Paragraph 155 which imposes an explicit obligation to have early and meaningful consultation. This has not been met in a number of areas by GBC. We have not had a meaningful consultation on imposing a settlement boundary on East Clandon, on the absence of meaningful economic and population growth figures for Guildford showing various scenarios with high, medium and low growth scenarios being offered.

I demand that there should be a significant challenge to the GBC scenario planning and the housing and growth numbers should be revised and especially in the light of uncertainty and change which will accompany Britain’s withdrawal from the EU.

1. **Questions posed by Guildford Borough Council as part of its consultation.**

Questions from GBC

24.A. **Question 1: The evidence base and submission documents**

The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence. The evidence base documents contributing to the preparation of the plan are listed in Appendix D and can be found on our website (links open in a new window).

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

**ANSWER**

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

RE: Objections to the Guildford Borough Council Local Plan Proposals for West Horsley

I strongly OBJECT to he current proposals on the following grounds:-

As the country has voted to leave the EU, the Guildford Borough Council's Local Plan proposals are now void as the large numbers of legal immigrants from within the EU will now be greatly reduced. Therefore the evidence base that has been used is now incorrect due to the decrease in the number of people that will settle in this country in the future.

I Object to the 2016 local Draft Plan

I wish to record my strong objections to the Draft Local Plan which is out for public consultation currently.
I cannot comprehend how the council seriously considers that local residents, communities, interested parties are going to be able to read through, analyse and subsequently comment comprehensively on a document in excess of 1,800 pages (which is not user-friendly in the least) within a six week period! This is totally ridiculous and cannot be considered to be a "fair" consultation in my view, particularly given the massive impact that this plan will have on the borough's planning decisions right through to 2033.

Attached documents:

Comment ID: SQLP16/780  Respondent: 8821025 / Karen McQuaid  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

Site 2177 – I OBJECT to the proposed removal of Fangate Manor from the Green Belt and its inclusion within the Settlement Boundary. There are no exceptional planning circumstances to justify removing it from the Green Belt and changing the Settlement Boundary in no way enhances the defensible nature of the Settlement Boundary. It just means moving the boundary from one hedgerow to another and leads to the loss of Green Belt and agricultural land.

There is an ERROR in the Land Availability Assessment dated February 2016, page 299, which shows access to Fangate Manor from Manor Close. Manor Close is a private road and access will not be granted. The road and verges are very narrow and not suited to any growth in traffic.

Comment ID: SQLP16/159  Respondent: 8824833 / Stephen Stuart-Matthews  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: (Yes)

The sources are used in this document are very limited and the data presented in terms of the anticipated visitor demand is consequently weak, out dated and misleading. The dramatic level of growth in visitor numbers to the Guildford area is completely underplayed and the pending severe shortage of hotel rooms outside Guildford town centre is ignored. Consequently the document provides an inadequate basis from which to develop planning policy for hotels outside the centre of Guildford.

The study fails to mention the rapid growth in visitor numbers to the Guildford area from 2011 to 2016 to visit attractions in Guildford and nearby areas. The true and actual picture is one of rapid growth in numbers to visitor attractions with numbers set to double in the decade from 2010 to 2020

For instance visitor numbers for RHS Wisley presented in the referenced document do not go past 2011. Wisley has more visitors annually than all Guildford’s other attractions combined. In 2011 there were as stated about 1.1million visitors to Wisley. In 2015 visitor numbers were actually over 1.7million (see RHS annual report available on line from the RHS). This represents an annual growth rate of 10% for each year since 2011.

No mention is made that Wisley are in fact planning to increase this by another 0.5million over the next 5 years taking this number to 2.2 million as part of RHS development plans. By 2020 the number of visitors will have doubled from that stated in 2011. This has casued and will continue casue increasing demand for hotel rooms outside Guildford a pertinent fact which is not metioned in the docuoment.
Furthermore the report fails to consider that Guildford hotels also host visitors to nearby attractions near to but outside the borough such as the National Trust’s Polesdon Lacey. Polesdon Lacey attracted 346,000 visitors in 2014-2015 a 10% increase over the previous year and is being developed as NTs flagship destination in Surrey.

This overall situation is alluded to but not explicitly documented in The Surrey Hotels Future Study 2015. This study should however be cited as Key Evidence in the 2016 Plan as it is more pertinent evidence than the Visitor Strategy. It states for instance:

- “there is significant market demand and developer interest in the provision of further tourist and business visitor accommodation”
- “the borough is becoming an increasingly popular place to visit, and the number of overnight stays rising, it is vital that more accommodation is provided”
- “the financial and employment benefits associated with tourism and leisure mean that any planning policy supporting the visitor and leisure experience should be closely aligned with the borough’s planned economic growth”
- “there is an undersupply of visitor and business accommodation in Guildford
- “there is market potential and hotel company interest in luxury country, 4*, boutique and budget hotels and serviced apartments in the Guildford area, …there are not thought to be any live development proposals”
- “failure to provide additional accommodation could limit the borough’s ability to host future events and reduce its appeal as a business and visitor destination, thus stemming the growth of the visitor economy. Conversely, the recent trend in conversions of guesthouses and hotels to residential and other uses may worsen the existing undersupply of bed spaces in the borough”.

This information should be updated in the Plan so that key decisions such as whether to allow the conversion of an existing hotel in the north of the borough to housing can be better informed.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Answer: (Yes)

The evidence supporting the forecast demand for housing in Guildford to 2034 is out of date and now significantly overestimates the likely population growth and therefore housing need in Guildford Borough. The cumulative population growth forecast of 15% to 2034 is driven in Guildford (according to the West Surrey Strategic Housing Market Assessment Sep 15) by settlement of international migrants age 20-30 years. Other factors affecting population growth and decline are largely in balance and taken together will not lead to significant overall growth according to the evidence in the report.

This forecast was published before recent changes were made to Government policy on immigration which during the period considered will directly limit the ability of international migrants (especially students) to come to and permanently settle in the UK including in Guildford. If Government immigration targets are wholly or partially taken account of in the Evidence Base then the forecast growth in local population to 2034 should in fact be in the region of 3%-8% total. Consequentially the demand for new housing units is likely to be in the region of 2500 to 7500 and not 12496 as set out in the Plan.
See the attached file which provides comments on the evidence in the West Surrey Strategic Housing Market Assessment September 2015. It provides more detailed comment and quantified estimates of revised population growth forecasts based on the Government’s latest policies for international migration following the BREXIT referendum in 2016 and including the Conservative Government policies as set out in the 2017 election manifesto.

For the above reasons the West Surrey Strategic Housing Market Assessment Sep 2015 is already out of date. The population forecasts therein relating to Guildford must be updated to take account of revised immigration forecasts to Guildford post BREXIT before the local plan can be based on it. The 2015 forecasts used in the local plan are based on immigration patterns arising from Government policies pre BREXIT and pre 2017 election. Therefore as they stand both the evidence and the Local Plan are fundamentally flawed.

[Text of attachment reproduced below]

**Comment on Guildford Local Plan regarding Evidence base for Population from West Surrey Strategic Housing Market Assessment September 2015**

The evidence base underpinning the 2017 GUILDFORD LOCAL PLAN is out of date and fundamentally flawed. The NPPF requires Guildford to base its development plan policies on up-to-date and relevant evidence. The population of 167126 quoted for 2033 in section 2.3 is an over estimate. It is more likely to be in the region of 150,000-156,000 if government targets on immigration are taken into account for the reasons below.

The housing requirement to be met (with 12,496 new homes) in the Guildford 2017 Plan is based on population forecasts set out in the West Surrey Strategic Housing Market Assessment September 2015 (WSSHMA2015) covering Guildford, Waverley and Woking. This report was compiled before the BREXIT referendum took place in 2016 and before the consequent decision ratified by UK Parliament to leave the EU. The report therefore does not take into account the likely impact on Guildford’s population growth of BREXIT or the Government’s subsequent commitment in its 2017 election manifesto to reduce migration into the UK to “the tens of thousands”.

The summary conclusion in table 13 of section 4.12 of the WSSHMA 2015 is that Guildford’s population will grow by 15% in the 20 years from 2013 to 2033. Following the BREXIT decision this projected growth is likely to be a very significant over estimate.

The WHSSHMA 2015 report section 4.24 shows that all of the growth in Guildford’s population can be accounted for by projected levels of international migration, averaging circa 1240 per year (circa 0.9% per annum) for the 20 years from 2013 to 2033. Figure 18 of section 4.27 shows that this is mostly due to net in-migration of people aged between 20 and 30 years old (e.g. students) settling in Guildford. Other effects on the population of Guildford such as natural growth (births less deaths) and internal net out-migration are projected to balance each other out.

The WSSHMA 2015 report’s forecast of population growth due to international in-migration is in line with UK immigration before BREXIT. For example between 2005 and 2015 gross immigration in the UK averaged 0.9% being circa 570,000 per annum on a population of 62 million. The UK Government’s declared target following BREXIT is to reduce immigration to tens of thousands.

If this target is just achieved and immigration falls to an average of 99000 post BREXIT then the growth due to immigration would fall from 0.9% per annum to 0.15% per annum. Even if the Government’s target is only partially met with an immigration reduction to say 300,000 per annum then this would equate to 0.46% population growth per annum. If these national immigration percentages applied to Guildford (as the WSSHMA Sep 2015 report indicates they would) then the cumulative growth in population in Surrey by 2034 for these two scenarios would be:

1. 0% growth by 2034 if Government target met (e.g. gross immigration of 99000 /yr)
2. 6% growth by 2034 Government target partially met (gross immigration of 300,000 /yr).

The Planning Practice Guidance issued by the Government in March 2014 indicates that the “scale and mix of housing ………. should cater for housing demand of the area and identify the scale of housing to meet this need”. Applying this guidance together with BREXIT population growth projections would indicate that Guildford housing need would be between 2500 and 7500 new units over the next 15 years to meet the above growth projections.
Evidence that this reduction in population growth is now happening has come with 1) substantial drop in applications to UK Universities including Surrey University from foreign students in 2017 and 2) with immigration statistics for 2016 showing the first substantial reduction in net migration in the last decade. In summary the requirement for 12500 new homes in the next 15 years is not likely to materialise.

Comment ID: SQLP16/621  **Respondent:** 8826273 / Chris Holliday  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

**Answer:** (Yes)

The Local Plan is primarily built upon the outcome of the "West Surrey Strategic Housing Market Assessment (SHMA), September 2015". From the resulting housing numbers, flow the needs for land, infrastructure, schools, medical facilities etc.

However, it is not possible to assess, analyse or in any way critique the basis for any of this because the SHMA analysis is confidential. This is a ludicrous travesty of the consultation process and a corruption of democracy. Guildford residents are effectively being given an answer, with no opportunity to understand or challenge how it is derived, and then consulted on the detail of how it is to be delivered.

For the above reason, it is not possible for the consultation process to determine whether the needs have been objectively assessed or whether the Plan is sound.

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Of major concern is the calculation and quantification of the number of houses proposed in the Strategic Housing Market Assessment (SHMA): a target number that was generated by an external consultant’s mathematical formula of which no qualification or calculation is to be made available. As if this wasn’t unacceptable enough, the consultant’s unsubstantiated calculation has been further massaged by Guildford Borough Council to such an extent as to provide for a population increase across the Borough which is almost 70% above the official national estimates for population growth. WHY?

Furthermore, these unquantified numbers are obviously pre-Referendum / Brexit calculations and as such now need to be recalculated if they are to be meaningful? Furthermore with Theresa May becoming the new Prime Minister, time MUST be given for her to provide a clear policy statement on her plans for the Green Belt which, hitherto, she has long sought to protect.

GUILDFORD BOROUGH – PROPOSED SUBMISSION LOCAL PLAN: STRATEGY AND SITES 2016 CONSULTATION

I write regarding the above and ask that the following comments be taken into account when considering the same.

The points made in this letter are in addition to the points made by Porta Planning in their separate submission on behalf of myself and a group of neighbours.
As you will note, I live in the village of West Horsley and therefore many of my comments relate to the specific issues relating to that village alone.

**GENERAL**

I am well aware of the Central Government desire to increase the United Kingdom’s housing provision, particularly in the South East of England. I believe that I understand the pressure on Guildford Borough Council (“GBC”) to adopt a deliverable Local Plan for the borough for the plan period and that housing provision will form a significant part of the same.

One of the fundamental questions which remain to be fully addressed and adopted is where the most appropriate locations for such dwellings will be. I believe that such housing provision should ideally be situated in sustainable locations; ideally located on existing brownfield sites within the borough and as near as possible to the centres of employment. I do not believe that the current document has given sufficient consideration to the same, seeking instead an over-reliance on the proposed utilisation of the currently designated Green Belt land around local villages, particularly to the east of the borough, to meet such needs.

I believe this to be a fundamental flaw in the Guildford borough Submission Local Plan 2016 (“Proposed Local Plan”) as it proposes extensive residential development that will be remote from the existing centres of employment or where indicated within the Proposed Local Plan; these being largely on the opposite side of the borough. Such a policy would be counter to the principles of sustainable development and would undoubtedly put further pressure on the already struggling transport infrastructure. I would wish to see such this approach rejected and more new proposed housing allocated closer to the existing and proposed centres of employment, i.e. within and around Guildford town centre / urban area, rather than in the borough’s outlying, and previously protected, villages.

That said I would also accept that it is unreasonable to expect that semi-rural villages, such as West Horsley, be totally excluded from any future housing provision. Indeed to promote the ongoing vitality of a lively, prospering village I would anticipate some, but what is currently proposed by the Proposed Local Plan for West Horsley and neighbouring East Horsley is, in my opinion, unnecessary & unneeded, unsupported by infrastructure and disproportionate in extent.

I believe that any such new housing provision must only be allocated having considered many factors, including:

1. Environmental Issues (inc. Green Belt);
2. Housing Need;
3. Local Character & Distinctiveness;
4. Potential Development Sites;
5. Transport & Highway Considerations;
6. Infrastructure;

I will therefore set out my views on each topic with regard to West Horsley below, for your further consideration.

National Planning Policy Framework (NPPF), paragraph 182, advises that a Local Plan can only be adopted if it is sound. As a matter of government policy, soundness requires a plan to be:

1. positively prepared;
2. justified;
3. effective;
4. consistent with national policy.

Within these four heads it should enable, over its plan period, the delivery of sustainable development in accordance with the NPPF.
I have several strong concerns as to whether this is the case within the Proposed Local Plan, as currently drafted, and believe that some of the current policies are neither justified nor consistent with national policy, thereby rendering the same unsound without significant revision.

I therefore **OBJECT to the Guildford borough Proposed Submission Local Plan – Strategy & Sites 2016** as currently drafted.

**Comment ID:** SQLP16/1749  **Respondent:** 8836129 / Roger Shapley  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

**Answer:** (No)

Response: NO

The evidence base is not up to date or adequate.

The documents of the evidence base were subject to continuous change without notification and it has been impossible in some cases to track the changes in order to identify significant and material change, making it impossible to evaluate if the change makes the document adequate or relevant. The evidence base was and is not ready for public consultation if there is no way to track what was said previously in so many documents of the evidence base, therefore no basis on which to judge adequacy and relevance to the current draft local plan.

For example, GBCS Vol 4 tables of scores for the contribution of each land parcel to the five purposes of the Green Belt showed one basis of evaluation in the version published in February 2013 and where this failed to support the pre-determination of GBC, the basis of evaluation was changed in the version published in April 2014 reducing the perceived Green Belt protection of the land parcels, making it easier to argue for their qualification as land for housing development. This does not make the document up-to-date as the basis of measurement and evaluation has changed; this is ‘moving the goal posts’ not improving ‘up-to-date-ness’.

The Habitats Regulation Assessment and Sustainability Appraisal were released after the plan was approved by the full council on 25 April 2016. The lateness and content demonstrate the inadequacy with which this plan has dealt with environmental matters. Neither document was immediately available on the website, so early responses sent to the council before these were released could not have taken account of the environmental issues. The Sustainability Appraisal is written by a commercial development company with worldwide reach AECOM and fails to be critical in any way and the document reads more like a public relations release.

The draft SHMAA for Guildford has been proved inadequate. A study of the work of GL Hearn in compiling the housing forecasts to provide Objectively Assessed Need [OAN] by NMSS (sponsored by Guildford Residents Associations of which Normandy Action Group is a member) indicates shortcomings in methodology and lack of rigour in assessing available ONS statistics and misinterpretation of market signals. Therefore, any Policy that claims its content as evidence for the Policy is immediately thrown in to question and suggests it is unsound.

The Settlement Hierarchy evidence has been changed three times, with a second questionnaire submitted to Parish Councils to better record available services. Attempts to conflate settlements as defined by 2003 Local Plan settlement boundaries into small, medium and large villages was abandoned after the methodology was revealed by residents for the sham it was. The transposing of the new questionnaire content has been poor, with errors remaining. Now that the new data fails to match the pre-determination required by the council, the evidence has been quietly shuffled aside and not referred to in detail in the current draft. However, it remains in the evidence base.

The whole process has been one surrounded by obfuscation, with residents having to resort to Freedom of Information requests to obtain essential information freely released by other LPAs e.g. what constitutes ‘exceptional circumstances’. This does not bode well for the Proposed Submission Local Plan to be submitted for examination in public.
I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

The evidence base is not up to date or adequate.

The SHMA is inadequate and has been shown to be over inflating the numbers by flaws in the methodology as shown by Cllr Reeve, Guildford Society and Guildford Residents’ Association and by NMSS.

The Settlement Hierarchy - this still has errors.

No Evidence base to support the claims of Exceptional circumstances - a fundamental in the plan with not supporting evidence.
Get it done.

Comment ID: pslp17q/490  Respondent: 8858113 / Ramsey Nagaty  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Answer: (No)

2 EVIDENCE BASE
2.1 I object to the continued poor quality of the evidence base and lack of sound property market research that relates to the local market in Guildford rather than the continued reliance on generic economic capacity forecasts. As a result many of the submission documents providing key evidence are unsound, unreliable and inconsistent.

2.2 Key parts of the evidence base are flawed or based on withheld assumptions.

2.3 The latest SHMA 2017 still inflates the proposed housing figure due to the following factors:

2.4 An independent review by NMSS of the latest ONS population estimates and projections has found compelling evidence that there are substantial errors in past estimates of student migration flows. It is probable that migration flows out of Guildford, both to other parts of the UK and abroad, have been under-estimated by sizeable amounts.
2.5 Owing to the way in which migration estimates are used to construct population and household projections, the errors in past migration estimates are likely to mean that the latest demographically-based housing need estimates by GL Hearn overstate the number of homes needed by over 25%.

2.6 The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

2.7 38,357 sq m of B1c, B2 or B8 use class is a quite sufficient supply for the plan period and does not justify the need for new development of industrial space on the Green Belt in such areas as Blackwell Farm or Burnt Common. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

2.8 The ELNA states “that a large proportion of the net additional floorspace and land requirements for both office/R&D and industrial/storage uses could be met through the permissions which have been consented but which have yet to be implemented. However, there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”

2.9 “There is the possibility that some pipeline developments may not come forward” is patently a weak argument indeed for the proposed industrial development at Burnt Common in the Green Belt and expansion of the Surrey Research Park into the Green Belt at Blackwell Farm when the Research Park at adjacent Manor Farm has unused consents dating back many years and also the substantial latent potential for an increased density of development. The current plot ratio is less than 25%. The reason that the unused consents have not been used up is simple. There is a proven lack of demand.

2.10 Exceptional circumstances clearly do not exist to justify amendments to Green Belt boundaries as part of the Local Plan process. It is quite achievable for realistically prepared and identified development needs to be accommodated in Guildford’s urban areas and villages.

2.11 The Carter Jonas Guildford Retail Study Update 2017 lacks credibility and there is no proven case for expanding comparison retail space which is undermined by failure to implement existing retail consents at the North Street development over the last 10 years. The Guildford Retail Study does not take account of changing retail patterns in relation to the threat of the internet and the “clicks and mortar” conflict. The study also assumes a number of logged retail requirements from companies already in liquidation or with national requirements that exclude Guildford.

Answer: (No)

The strategy in the plan for infrastructure is inadequate as it fails to show how roads in particular will cope with increased traffic in the area; particularly around North East Guildford where more pressure will be put on the A247 through West Clandon, where I live.

The cumulative effect of additional housing at Gosden Hill, Wisley Airfield, the increased light industrial use at Garlycke's Arch and the enhancement of the Newlands corner site will produce massive traffic flow on the A247 through West Clandon which is extremely narrow at a couple of points and reliant on a small hump backed bridge with poor sight lines.

As an employer in Guildford, transport is key to Guildford's continued economic success but there appears to be no detail of improvements provided by Highways England for the A3 in Guildford. It is not right that GBC should provide for additional development when there are no plans for traffic improvement on such a key road.

Answer: ()

I have read the objections to the local Plan submitted by David [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] support, and therefore incorporate, the points that he puts forward. Accordingly, on the basis of the above, and of those points, I confirm that I object to the contents of Policies SL, S2, SL, H2, H3, Pl, P2, P3, P4, PS, E1, E2, E3, E4, E5, E6, E7, E8, E9, D1, D2, D3, D4, 11, 12, 13 and 14.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Answer: (No)
1. I object to the continued poor quality of the evidence base and lack of sound property market research that relates to the local market in Guildford rather than the continued reliance on generic economic capacity forecasts. As a result many of the submission documents providing key evidence are unsound, unreliable and inconsistent.

2. Key parts of the evidence base are flawed or based on withheld assumptions.

3. The latest SHMA 2017 still inflates the proposed housing figure due to the following factors:

4. An independent review by NMSS of the latest ONS population estimates and projections has found compelling evidence that there are substantial errors in past estimates of student migration flows. It is probable that migration flows out of Guildford, both to other parts of the UK and abroad, have been under-estimated by sizeable amounts.

5. Owing to the way in which migration estimates are used to construct population and household projections, the errors in past migration estimates are likely to mean that the latest demographically-based housing need estimates by GL Hearn overstate the number of homes needed by over 25%.

6. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floor space defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floor space to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floor space and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

7. 38,357 sq m of B1c, B2 or B8 use class is a quite sufficient supply for the plan period and does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

8. The ELNA states “that a large proportion of the net additional floor space and land requirements for both office/ R&D and industrial/storage uses could be met through the permissions which have been consented but which have yet to be implemented. However, there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”

9. “There is the possibility that some pipeline developments may not come forward” is patently a weak argument indeed for the proposed industrial development at Burnt Common in the Green Belt and expansion of the Surrey Research Park into the Green Belt which has unused consents dating back many years and also the substantial latent potential for an increased density of development. The current plot ratio is less than 25%. The reason that the unused consents have not been used up is simple. There is a proven lack of demand.

10. Exceptional circumstances clearly do not exist to justify amendments to Green Belt boundaries as part of the Local Plan process. It is quite achievable for realistically prepared and identified development needs to be accommodated in Guildford’s urban areas and villages.

11. The Carter Jonas Guildford Retail Study Update 2017 lacks credibility and there is no proven case for expanding comparison retail space which is undermined by failure to implement existing retail consents at the North Street development over the last 10 years. The Guildford Retail Study does not take account of changing retail patterns in relation to the threat of the internet and the “clicks and mortar” conflict. The study also assumes a number of logged retail requirements from companies already in liquidation or with national requirements that exclude Guildford.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Answer: ()

Transport

It is well known there are a number of Air Quality Black Spots on the current Gyratory system, which is why it should go, but GBC have ignored this problem.
It is well known there are a number of Traffic Accident Black Spots on the current Gyratory system, which is why it should go, but GBC have also almost ignored this problem.

It is well known there are proposal to create Modal Shift to encourage pedestrians and cyclists, but with the current Gyratory system it is extremely dangerous and it is impossible to adapt the current roads, which is why the Gyratory should go, but GBC have almost ignored this problem.

It is well know the Cross-Town traffic movements, morning and evening, frequently result in total, or partial gridlock in the centre of Guildford, lasting several hours morning & evening. Modal shift, however welcome (if ever made possible?) will NOT solve this problem.

Nor will any changes to the A3 by Highways England help. Even if funds come forward, these changes with have little impact on Guildford centre traffic, and are unlikely to be completed until 2026-30 at the earliest.

GVG have suggested one solution, which is to build Guildford town centre bypass and a new rail and river crossing, to supplement the ONLY rail bridge built in the 19th century. Why has this idea been dismissed with distain?

Far too much Traffic Assessment by Highway Engineers is based on the Costs of & Improving Traffic Movements/flows - frequently based on out-of-date information, or inaccurate assessments. These ignore the wider planning benefits of freeing up the centre of Guildford to the OVERALL planning community benefit, in terms of GVA gained and wider community benefits. The Local Plan should have provided full EVIDENCE of the Financial and Social Costs AND Benefits of any road proposals. Where are they?

Pressure of housing in Guildford hinterland & impact on Guildford

Within and around Guildford there are a large number of housing proposals, such as Slyfield, Blackwell Farm, Wisley Airfield, Dunsfold Park Airfield, Burnt Common, Wellesley Aldershot, Godden Hill Farm and many more. The traffic implications, even if only a few new residents use Guildford, are not fully assessed in the Local Plan.

Impact of, and access to a major North Street development

If the is to be a successful re-development (there have be FOUR attempts in 30 years! I know, I've lived in Guildford since 1986) there must be a full appraisal of this proposal on the Local Plan. It seems to be largely silent on this subject

Impact of, and access to, a major New - much larger - Rail Station, Including new rail platforms, the re-built road/rail bridge to take larger trains.

Its well known the number of rail passengers using the station has increased and will increase still further in the next 10/20 years. The Local Plan must PLAN for this, but it is largely silent on this subject. The station is planned to be much larger, with extra platforms, and larger trains. The 19th century road - rail bridge, (the ONLY link between East and West Guildford) is long over due to be replaced, especially as new rolling stock comes into use. Why does the Local Plan ignore all this information?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.
The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as being far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

1.1 We object to the paucity of the evidence base. The submission documents are unsound, unreliable and inconsistent

1.2 Key parts of the evidence base are flawed or based on withheld assumptions.

1.3 The current SHMA inflates the proposed housing figure due to the following factors:

the failure to correct for errors in the historical data for international migration flows;

the way it considers students and affordability, and

the flaws in the method for estimating the number of homes needed to support job growth

the treatment of vacant property

1.4 The Green Belt and Countryside Study does not value the fundamental aim of Metropolitan Green Belt properly or look strategically at options for development in major settlements beyond. The way Green Belt is parcelled up and scored is not valid: serving 2 Green Belt functions is as valid as serving 4 functions. Green Belt is Green Belt, it does not require assessment or qualification. The Green Belt sensitivity analysis is not a valid basis for informing decisions.

1.5 Exceptional circumstances clearly do not exist to justify amendments to Green Belt boundaries as part of the Local Plan process. It is quite achievable for realistically prepared and identified development needs to be accommodated in Guildford’s urban areas and villages.

1.6 The Transport Evidence has been produced very late and is incomplete, inaccurate and untested to the extent that the Plan is not ready for a Regulation 19 consultation.
1.7 It is emerging that the Strategic Highway Assessment shows there will be congestion, even with all the highway schemes in the Plan. Many questions remain unanswered. E.g. Why would 1000 homes on Slyfield generate no extra traffic? The report only gives average speeds and information needed to understand how much congestion will occur and where it has not been provided in time to inform Plan proposals or responses.

1.8 The available evidence suggests much of the proposed Sustainable Movement Corridor cannot be delivered due to narrow roads and pinch points.

1.9 Evidence on bus travel is fundamentally compromised because no clear and workable location for a bus interchange is proposed.

1.10 No information has been provided on the demand for and capacity of rail services. The main line to London is already extremely busy in peak periods.

1.11 Information about the town centre as regards traffic, buses and parking is lacking. It is not credible to proceed without this given existing levels of congestion, the number of transport routes that rely on the town centre to cross the Downs, the shortage of crossing points over the railway and river and the fact that narrow roads and steep slopes make Guildford unsuitable for a ring road approach.

1.12 The Strategic Highway Assessment 2016 is flawed. It is invalid to base this on less traffic growth than the proposed housing growth. The report points to overcapacity use of the A3, M25, A31, A320, Millbrook, Ladymead, Woodbridge Road, York Road, London Road but understates the congestion consequences. Various suggested queue reductions are unexplained. The consequences of major proposed reductions in road space in the town centre (eg closure of Walnut Tree Close, narrowing of Woodbridge Road, reduced capacity of the gyratory) and of developing Burnt Common are not included. More time is needed to assess and refine this crucial 11th hour report which seems incomplete, understates the consequences of traffic overload, shows inconsistencies, and does not supply assumptions or information needed to understand queues at junctions.

1.13 The Guildford Retail Study Update lacks credibility and there is no proven case for expanding comparison retail space which is undermined by failure to implement existing retail consents at the North Street development over the last 10 years. The Guildford Retail Study does not take account of changing retail patters in relation to the threat of the internet and the “clicks and mortar” conflict. The study also assumes a number of logged retail requirements from companies already in liquidation or with national requirements that exclude Guildford.

1.14 We believe that it was unacceptable to stop monitoring air quality, where NO2 emissions exceed limits, on the unrealistic assumption congestion would reduce. Estimates of premature deaths have doubled and issues with vehicle emission controls have emerged. Traffic noise from the A3 should also be reported.

Attached documents:

Comment ID: SQLP16/1870  Respondent: 8893057 / Dianne Garnett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

1.1 We request a confirmation by email from GBC that all of the objections made below are put to the Inspector appointed by the Secretary of State to review the GBC Regulation 19 draft local plan.

1.2 We request that once our objections are fully taken into consideration the draft plan is amended accordingly and re-issued.

1.3 Guildford is a constrained borough by the reality of having 89% of its area zoned as permanent Green Belt and an out of date road network that is already at capacity. We are concerned that GBC have adopted an inflated OAN of 13,860 homes as a housing target without any application of constraints as required under the National Planning Policy Framework and the National Planning Policy Guidance.
1.4 The application of constraints to housing need is a sensible and practical approach to development within the borough and is not only what GBC have done in the past in previous plans but is also what its neighbouring local planning authorities have done.

1.5 The scale of the housing number proposed in this plan, inevitably increases the onus for the plan to be seen to be sound. A substantially lower number of 5,000 homes over the plan period, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

1.6 We are concerned that GBC have failed to grasp the opportunity of following clear government policy to develop in the urban area on previously developed sites. Many of these sites are in their ownership and it would seem a practical and readily achievable alternative which is much more acceptable to local residents.

1.7 In our opinion much of the proposed local plan appears out of date. It is like a voice from the past. Current trends in terms of property development such as the marked decline in town centre shopping centres and the need to create modal shift by developing residential uses close to transport hubs appear to have been overlooked.

1.1 To review a local plan from a standing start is a big task and has required a lot of reading and detailed research. Along the way I have come across well informed opinion from individuals and organisations and I make no apology for including what I believe are correct and clearly expressed statements regarding the wide ranging issues to hand. I would therefore like to give thanks to others for their valuable contributions. However, I have of course referenced all statements made by retained consultants by GRA and CPRE e.g. NMSS and Green Balance.

1.2 NMSS is a consultancy company specialising in housing demographics whose principal is Neil McDonald

1.3 Green Balance is a consultancy company specialising in housing demographics whose principal is Richard Bate

1.4 On matters of road infrastructure, I have relied on comments by Richard Jarvis of the GRA who was previously a highways consultant with WS Atkins

1.5 On matters of property research, development, planning and valuation I have relied on my own skills and experience as a former Chartered Surveyor and Management Consultant specialising in property strategy and research in the public and private sectors. I have also used some material from my review of the Town Centre Masterplan 2015 which I reviewed for the Guildford Greenbelt Group and which can be found on their website.

1.6 References to “local plan” are intended not to be the previous 2003 Local Plan but to be references to the current Regulation 19 draft local plan prepared by Guildford Borough Council.

1.7 GBC refers to Guildford Borough Council

1.8 SHMA refers to the Strategic Housing Market Assessment 2015 prepared by GL Hearn

1.9 OAN refers to the Objectively Assessed Need in relation to housing

1.10 NPPF refers to the National Planning Policy Framework

1.11 CPRE refers to the Campaign for the Preservation of Rural England
1.12 GRA refers to the Guildford Residents Association which comprises over 25 Residents Associations and five Parish Councils

1.13 SSAG refers to the Save Send Action Group which comprises over 500 residents

1.14 ELNA refers to the Employment Land Needs Assessment 2015

1.15 NPPF refers to the National Planning Policy Framework

1.16 NPPG refers to the National Planning Policy Guidance

1.17 VoA refers to the Valuation Office Agency

19. I object to GBC not listening to the local people in 2015 and continuing to impose the same style of Local Plan in 2016

**Attached documents:**
20. I object to GBC’s lack of providing a readable, concise summary and for the continuation of releasing new data after the Plan was published in June 2016

Attached documents:

I believe that much of the evidence provided is seriously flawed

Attached documents:

Reg 19 Consultation objection and right to comment on broader issues

My first objection is to due process. GBC has claimed a reg 19 consultation. As a result it has requested comments only on changes and referenced to the particular clause. This is a breach of due process because substantial/material changes have been made to the Draft Local Plan including a major change to the OAHN as stated by Councillor Spooner, removal of one of four only strategic sites which impacts all strategic sites, changes (increased withdrawal in many cases) to the greenbelt boundaries and in particular A35 with and without consent from owners, incomplete data sets and a requirement from Highways England as a compromise for their withdrawal of major concerns at the impact of the Plan on Highways on the A3 that infrastructure has to be in place before major developments ‘come forward in advance of critical infrastructure’:

All of these changes cannot be considered minor and therefore the request to comment only on the change clause itself is not in accordance with the law. The effect of these attempted changes are that the DLP of 2016 must therefore be considered ‘unsound’ to have caused the major changes and therefore it is not a valid reg 19 consultation.

In that case comments should be allowed to any material aspect of the Plan and not just to particular clauses.

Generally, it is disappointing to note that the Council has given very little weight to either the councils own refusal of the planning application on site A35 or indeed to any of the thousands of representations made by ourselves and other members of the public and statutory bodies.

I am of the view that the current consultation cannot legally constitute a regulation 19 consultation

1. I object to the fact that there has been no clear explanation from the Council as to why they think it is appropriate to have a regulation 19 consultation when the changes made are major, for example the removal of a strategic site and a reduction in the housing number.
2. I object to the fact that there is no clear explanation why the Plan period has changed particularly as this has not been either justified or clearly identified.

III. I object to the Council wasting taxpayers’ and residents’ time and money not following due process and indeed ignoring previous representations.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Attached documents:

I OBJECT TO GENERAL INCOMPETENCE OF PLAN with a lack of specifics mentioned and real analysis of direct impact. I don’t believe there has been a rigorous and definitive published analysis. Specifics are none existent in terms of what infrastructural changes will be required

Attached documents:

Question 1: No - The evidence base and submission documents are out of date, inconsistent, updated and designed to purposefully give an outcome and the core evidence, on which GBC has based all its decisions, the Strategic Housing Market Analysis is not transparent, has clearly not been scrutinised or evaluated. Residents’ genuine concerns regarding the housing forecasts have been ignored. Evidence has been rewritten and updated but it is impossible to keep up with changes because you don’t know where they are. Not all the evidence was ready before The Plan was passed at full council so there was no time for councillors to scrutinise the missing documents. The majority push The Plan to the next stage of the process. This was a disgraceful decision. Residents in my village had to use the Freedom of Information to
request documentation. Every policy in the Plan is pro development and if cast in stone, not one of the policies would succeed in preventing inappropriate development within the Borough.

Attached documents:

**Comment ID:** SQLP16/784  **Respondent:** 8916001 / Ockham Parish Council (Peter Bevan)  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

**Answer:** ()

**Guildford Borough Council’s Proposed Submission Local Plan (published 6 June 2016)**

Ockham Parish Council (OPC) has reviewed the Proposed Submission Local Plan (Local Plan) and considers that:

1. Despite GBC’s claims to the contrary, the Local Plan has failed in a number of key areas to take into account or to answer many valid comments and criticisms submitted by thousands of residents and organisations in respect of e.g. the 2013 Draft Local Plan. This is unacceptable, and raises questions of governance and vested interests.
2. The Local Plan places growth above: the ongoing viability, character and “liveability” of Guildford town centre and neighbouring villages; protection and maintenance of the countryside, the Green Belt, and protected wildlife areas such as the Thames Basin Heath SPA; the adequacy of existing and planned infrastructure; and remedying the chronic traffic congestion in and around Guildford, along the A3, and local rural roads.
3. The Local Plan offers too much land for development, based on a flawed Strategic Housing Market Assessment, and an artificially inflated Housing Target not justified by actual or reasonably projected demand.
4. There are a number of inclusions in the Local Plan which in OPC’s view threaten the soundness of the Plan as a whole on grounds of non or inadequate sustainability, deliverability and need.
5. The purpose of the Local Plan should be to enhance the quality of life of the Borough’s resident population, not to increase those aspects which cause the most dissatisfaction: traffic congestion and pollution are not eased by increasing the amount of traffic; inadequate infrastructure, whether schools, services, or sewerage, is made worse not better by increasing demand; and building houses, schools or other facilities in places furthest from existing areas where people live or work merely increases problems of inconvenience, travel, and development sprawl.

**Answer:** ()

**Comments and Objections to New Draft Guildford Local Plan 2016**

I wish to object to the new Draft Guildford Local Plan 2016;

1 GBC do not seem to have listened to all the people who commented on the 2014 Draft Guildford Local Plan. The 2016 version is still focused like the 2014 plan was, there is no change in strategy.

Attached documents:
I OBJECT to the latest version of the local plan. It looks like the previous one only slightly changed and the main objections to that still apply to this version.

Attached documents:

Priorities

Identify the housing need for the whole area then proportion according to the area characteristics and population

Expand Guildford town giving minimal effect on surrounding villages

Do not use current green belt it is sacrosanct

Use brown land first for housing and shops

Develop around river mixture of leisure and housing

Use multi storey car parks in place of open land car parks

Traffic pinch point of A3 at Guildford to be resolved (tunnel preferred)

Any limited development to retain the existing housing density

Comments on Document

General

- Loss of Green Belt irreversible once lost
- Green belt extremely important to residents
- Proposed density does not reflect existing character (Lovelace Village)
- Housing needs should be spread out so as not to change character of areas

- Few local employment opportunities

- Massive increase in population is not conducive to the village existence

| I note that the quality of evidence remains poor and is in some cases out of date and in most cases inconsistent. For example: I object to the fact that there is no comprehensive list of the evidence base. See below:

It is incumbent on the Council to ensure that the evidence base is readily accessible and completely transparent. I am of the opinion that the evidence is neither easily accessible nor transparent. I object to the use of the 1st Surrey SHMA and the Guildford addendum 2017 as these documents are based on false premises (inflated student number for example) and notes that the review by the independent expert Neil McDonald on behalf of the Guildford Residents’ Association
questions the soundness of the SHMA. I also object to the transport evidence bases including the SHAR 2016 Highways assessment report which has been criticised by Mouchel, amongst many others for using out of date software and it is therefore unreliable. I continue to object to the use of the highly inconsistent Green Belt and Countryside Study and its numerous addenda as this document is subjective, misleading and inconsistent and therefore unreliable. I object to the ELNA and in particular the Carter Jonas study update 2017 which includes “demand” for retail space from companies in administration.

</table>

My general concerns regarding the overall plan are as follows:

I am concerned that such a large, increased, proportion of the anticipated housing requirement is planned to be built in the areas of the borough with the lower LSOA ratings, and that the mix of these houses is such that larger, less affordable houses are to be permitted within those areas, pricing them out of the reach of the local population. This does not satisfy the local housing demand and will instead encourage migration from outside the local areas. This is turn will create a greater demand on the already strained infrastructure.

I object that comments from the local residents and those made through Ash Green Resident’s Association to previous versions of the plan have failed to be included in the current plan. These comments have not only been ignored but the changes to this version of the plan have resulted in an even worse situation for Ash Green.

This version of the plan, with its proposed boundary around Ash Green, is Orwellian in that all the houses are now included in the rural area whilst the open fields and countryside have been included in the Ash and Tongham Urban Area, simply to make more land available for building and ignoring the impact that this will have on the true rural area of Ash Green.
The evidence based used does not support the new boundaries of Ash Green and specifically ignores the historical location of Ash Green, centred on Ash Manor. The Heritage section of the Draft Plan discusses our “rich and varied architectural heritage” but then ignores this when setting Ash Manor outside the boundaries of Ash Green.

The area around Ash Green has very little in terms of a supporting or sustainable infrastructure. The local roads, specifically around Ash Station, Ash Street and the Greyhound Roundabout junction with Manor Road are becoming impassable and the current plan does not include any changes to the infrastructure to support the additional housing around the congested roads.

**Concluding remarks**

EHPC does not share the same vision for the future of Guildford Borough as GBC, although we do recognise that an enormous volume of work has gone into the preparation of the Proposed Submission Local Plan, which is now out for public consultation.

However, after more than 20,000 responses were submitted in 2014 in connection with the previous draft Local Plan, most of them opposed to its proposals, GBC has made relatively few changes from the earlier version and none of any materiality.

At the heart of the problem is GBC’s desire to pursue a ‘Forced Growth’ policy which results in highly aggressive and unjustified targets being set for housing development in the Borough. These excessive targets – the proposed 25% increase in housing stock in particular – create a tremendous strain on both land and infrastructure in an already over-crowded and over-stretched part of the country.

These targets will also have a material adverse impact on the Metropolitan Green Belt across this area, despite all the political promises made to the contrary. The irony of Policy P2 which states that “We will continue to protect the Metropolitan Green Belt” does not fool anybody.

**Accordingly EHPC OBJECTS to the Proposed Submission Local Plan.**

We sincerely request that GBC that radically re-assess its own policy objectives rather than force through the Council a Local Plan which clearly does not have the wider support of the residents of Guildford Borough.

We reserve the right to make further submissions during the course of this consultation.

Attached documents:
12.8 Importantly, the development will support the delivery of a significant infrastructure package which will benefit both its future residents and nearby parts of Guildford and the Borough as a whole. MGH is committed to the delivery of all necessary infrastructure to support the development of Gosden Hill and will continue to work with relevant consultees to agree a more detailed strategy.

12.9 MGH will continue to engage with GBC, SCC and other delivery bodies to review the Infrastructure Schedule provided at Appendix C of the Local Plan and seek to agree costs and funding sources. For the reasons set out above, it is vital that the issue of viability and the significant infrastructure and financial burdens which are indicated for Gosden Hill are carefully considered by GBC as it progresses its CIL Charging Schedule (with consultation due later in 2016).

12.10 MGH welcomes the progress made by GBC in preparing the Local Plan and the intention of the plan being adopted by the end of 2017. MGH intends to participate in the Examination of the Local Plan to present the representations set out above.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Answer: (No)

Question 1: The evidence base and submission documents

Answer: No

Comment: The data underlying the Proposed Submission Local Plan is flawed:

- The SHMA grossly overestimates the housing number.
- Details underlying the SHMA have not been made public.
- The SHMA has not been scrutinised by the Scrutiny Committee.
- Other independent analysis has resulted in a much lower housing number.
- The SHAR grossly understates the current traffic levels and thus underestimates the effect of proposed developments on local traffic infrastructure.

**Answer:** ()

Key parts of the evidence are missing, flawed or based on withheld assumptions. The Strategic Housing Market Assessment overstates need, the Green Belt and Countryside Study uses a flawed approach and the Transport evidence is too late and incomplete to be relied upon to inform the Plan.

I have little confidence that the OAN has been prepared to the highest professional standards and I believe that the figure it produces of 693 dwellings pa is too high. The independent but professionally prepared GRA report confirms my view and indicates that a lower figure of some 500 dpa is adequate to meet even robust growth assumptions. It also points to errors in the SHMA that the Council should have found themselves. The forecast population shifts in Guildford are so different from the other Surrey boroughs that, as the GRA report recommends, it makes eminent sense to consider student movement separately from the movement of other groups in society.

I am amazed that the document does not seek to apply significant constraints to limit overall housing growth, as is clearly demanded by the topography of our town; a gap town surrounded by greenbelt. Our current traffic situation is poor and is limiting the growth that our high tech sector can provide. Yet the transport improvement plans in the Submission Plan do not seem adequate to deal with the current problems and the level of housing growth that is proposed. The proposed level of housing growth is over double the target that has been in place since the year 2000 and our infrastructure development has not kept pace with even that. I am therefore concerned with the adequacy of the safeguards in the Submission Plan to ensure that future infrastructure improvements plans will be in place before future housing development occurs, although I accept that this is what the Council intends.
Tourism is a major industry in our borough and so maintaining the character of the borough is important. The plan intends to move the Green Belt boundaries again, seemingly without adequate consideration as to what it will do the character of our borough. The Green Belt and Countryside Study does not, to my mind, value appropriately the “fundamental aim” of Metropolitan Green Belt or look strategically at options for developing instead in major settlements beyond the Green Belt.

In view of recent technological trends, I believe that the Plan puts too much focus on retail development in the town centre and too little on providing further residential accommodation which would create a more vibrant centre to our town.

Lastly I am not convinced that the Plan adequately addresses current pollution problems in our town, such as air quality and the noise from the A3 that reduces the quality of life of residents from Burpham to Onslow.

No.

The accompanying report points to shortcomings in the Green Belt & Countryside Study as a basis for reviewing Green Belt boundaries and identifying appropriate allocations to meet the objectively assessed need for housing throughout the plan period.

The Land Availability Assessment is not based on a consistent rate of housing delivery that reflects housing requirements and shows a shortfall in housing land supply in the early years of the plan, including the absence of a five-year supply of housing land.

I object to the continued poor quality of the evidence base and lack of sound property market research that relates to the local market in Guildford rather than the continued reliance on generic economic capacity forecasts. As a result many of the submission documents providing key evidence are unsound, unreliable and inconsistent.

Key parts of the evidence base are flawed or based on withheld assumptions.

The latest SHMA 2017 still inflates the proposed housing figure due to the following factors:

An independent review by NMSS of the latest ONS population estimates and projections has found compelling evidence that there are substantial errors in past estimates of student migration flows. It is probable that migration flows out of Guildford, both to other parts of the UK and abroad, have been under-estimated by sizeable amounts.

Owing to the way in which migration estimates are used to construct population and household projections, the errors in past migration estimates are likely to mean that the latest demographically-based housing need estimates by GL Hearn overstate the number of homes needed by over 25%.

The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

38,357 sq m of B1c, B2 or B8 use class is a quite sufficient supply for the plan period and does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

The ELNA states “that a large proportion of the net additional floorspace and land requirements for both office/R&D and industrial/storage uses could be met through the permissions which have been consented but which have yet to be implemented. However, there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”

“There is the possibility that some pipeline developments may not come forward” is patently a weak argument indeed for the proposed industrial development at Burnt Common in the Green Belt and expansion of the Surrey Research Park into the Green Belt which has unused consents dating back many years and also the substantial latent potential for an increased density of development. The current plot ratio is less than 25%. The reason that the unused consents have not been used up is simple. There is a proven lack of demand.

Exceptional circumstances clearly do not exist to justify amendments to Green Belt boundaries as part of the Local Plan process. It is quite achievable for realistically prepared and identified development needs to be accommodated in Guildford’s urban areas and villages.

The Carter Jonas Guildford Retail Study Update 2017 lacks credibility and there is no proven case for expanding comparison retail space which is undermined by failure to implement existing retail consents at the North Street development over the last 10 years. The Guildford Retail Study does not take account of changing retail patterns in relation to the threat of the internet and the “clicks and mortar” conflict. The study also assumes a number of logged retail requirements from companies already in liquidation or with national requirements that exclude Guildford.

Commentary on the Evidence Base

The evidence base supporting the GBLP is understood to comprise:

- Affordable Housing Viability Study (April, 2008)
- Conservation Character Area Appraisals
- Employment Land Needs Assessment (September, 2015)
- Guildford Local Plan Viability and Affordable Housing Study (2014)
- Habitat Regulations Assessment (June, 2016)
- Infrastructure Baseline (July, 2013)
- Infrastructure Delivery Plan (2016)
- Land Availability Assessment (2016)
- Options Growth Scenarios Transport Assessment Report (January, 2014)
- PPG17 Open Space Sport and Recreation Audit (February, 2006)
- Retail and Leisure Study (May, 2014)
- Settlement Hierarchy and Settlement Profiles (May, 2014)
- Strategic Flood Risk Assessment (2016)
- Strategic Highway Assessment Report (June 2016)
- Strategic Housing Land Availability Assessment (SHLAA) (May 2014 Update)
- Surface Water Management Plan (November, 2013)
- Sustainability Appraisal Report (May, 2016)
- Topic paper - Flood Risk
- Topic paper - Environmental Sustainability and Climate Change
- Topic paper - Green and Blue Infrastructure
- Topic Paper - Retail and Town Centre
- Topic paper - Tourism and Leisure
- Topic paper - Duty to Cooperate
- Topic paper - Employment
- Topic paper - Green Belt and Countryside
- Topic paper - Housing Type Tenure and Mix
- Topic paper - Housing Delivery
- Topic Paper - Transport
- Town Centre Vitality and Viability Report (2011)
- Guildford Borough Transport Strategy 2016 (April, 2016)
- Guildford Draft Local Plan: Education Review (May, 2016)
- West Surrey Strategic Housing Market Assessment (September 2015)

The evidence which has been updated/published since the submission of WPI’s representation in September 2014 is indicated in bold and has been referred to in this Representation where appropriate.

Sustainability Appraisal (SA)

WPI strongly supports SA Option 4. This Option includes a mix of sites/allocations based on achieving Objectively Assessed Needs (OAN) plus a reasonable (and justified) buffer of 14%. A buffer over the OAN of 693 dwellings per annum (dpa) (13,860 over the plan period) is entirely justified, as outlined in WPI’s representations on draft policy S2 (Borough Wide Strategy). The SA therefore forms a robust basis to justify the Local Plan; it could and should however be enhanced to provide further justification.

It is not clear why the SA includes analysis of housing completions and commitments, as a planning decision has been made on these sites, and in the case of completions, the relevant development delivered, and hence part of the overall
baseline. The SA has to be based on the plan period, and plan, hence the period 2013-2033. However, it also has to be grounded in the reality that the plan will be adopted in 2017, and hence the SA is principally an assessment of the proposed allocations, which will make up the vast majority, circa 90%, of the OAN (excluding any buffer).

Option 3 (OAN plus 12% buffer) includes Liddington Hall (600 dwellings). This site is not proposed for allocation within the GBLP. Whilst it is appreciated that the option to test Liddington Hall should be included (as part of the assessment of reasonable alternatives), it is the case that the Wisley new settlement can form a credible option for assessments below Option 4, i.e. within OAN plus 12% buffer or less. The Wisley new settlement could form a new Option to be tested alongside:

- GBGB – Ash & Tongham extensions 1,235 dwellings. It is not clear why 1,835 is included in Option 3, as this level of growth is otherwise only triggered with OAN plus 27% buffer (Option 6)
- Send Marsh allocations at 0 (as these are not proposed in the GBLP)
- Liddington Hall at 0 (as this site is not proposed in the GBLP)
- Normandy/ Flexford at 0 (as although this site is a proposed allocation, there is presently no option included which does not assume its none allocation – WPI questions the application of the ‘sequential approach’ in this regard – see paragraph 2.8 onward of this Representation)

With all other variables fixed (as per Option 4) this would equate to a further Option ‘2A’ of 14,744 dwellings (OAN plus 6% buffer).

WPI notes that the analysis of the SA on page 26 is not consistent with the Housing Topic Paper with respect to the Wisley new settlement. In addition, the SA could be enhanced through further option testing with respect to the proposed ‘sequential approach’

The first comment is in respect of the sequential approach. WPI agrees that Brownfield sites and sites within existing urban areas are sequentially preferable locations for growth (noting the capacity constraints in these locations). It is not necessarily the case that all Green Belt around Guildford town should be considered as sequentially preferable to a new settlement option, notably as the new settlement option at Wisley Airfield is partly previously developed land. It is also not clear why Normandy and Flexford has not been included as an option, rather a ‘given’ in all 8 Options. The site is Green Belt, all Greenfield, and would deliver a reduced quantum of development, and hence ‘critical mass’ to the Wisley new settlement. Whilst WPI has no in-principle objection to the Normandy and Flexford allocation, the prospect of it as an option would aid the robustness of the SA.

WPI maintains a technical objection with respect to the wording of the SA regarding the Wisley new settlement (see page 26 of the GBLP). The following is the case, and would better reflect the GBLP inclusion of a new settlement allocation (as per the Housing Topic Paper):

- The only available and realistic location for a new settlement in Guildford Borough is at Wisley Airfield.
- The site contains the largest previously developed site in the Guildford Borough Green Belt (circa 77 acres).
- The site was progressed through a planning application (reference 15/P/00012) directly in support of the emerging Local Plan, to assist with the overall evidence base and demonstrate early delivery. This remains the case and, on the basis of the reasons for refusal, there are now a number of resolvable Key Considerations to enable the delivery of the proposal through planning (see Appendix 1).
- A Local Plan allocation may of course be justified based on the tests of the NPPF, which are not the same as the specific (and detailed) requirements for a planning application.
- There are no matters which call into question the suitability of the site for a new settlement.

WPI understands why the Wisley new settlement is identified as an option, however, it must be tested equally and fairly against other site options, based on the facts, and relative sustainability. In other words, the SA should test further combinations of options. Page 26 must be updated to reflect the available evidence presented in these representations.

WPI has outlined in Appendix 8 analysis of the draft allocations against the wider evidence base, notably the Green Belt & Countryside Study (2014). This objectively outlines the value of each major draft allocation against the defined purposes of the Green Belt (as given by the NPPF). WPI has undertaken this exercise to question the SA’s conclusions of
Low, Medium and High sensitivity, against each draft allocation/development option, in terms of Green Belt sensitivity (see maps Options 1-8). This evidence indicates that the Wisley new settlement should be reclassified as low sensitivity.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Answer: ()

2. Commentary on the Updated Evidence Base

2.1. The evidence base supporting the 2017 Submission GBLP has been updated since the 2016 publication. The current evidence base now comprises the following:

- Air Quality Review of Guildford Borough Proposed Submission Local Plan: Strategy and Sites “June 2017” (June 2017)
- Assessment of Sites for Amenity Value (2017)
- Assessment of Viability of Carbon Emission Targets for New Builds (April 2017)
- Borough, Economy and Infrastructure EAB Report Sustainable Movement Corridor Update (February 2017)
- Employment Land Needs Assessment (2017)
- Guildford Local Plan and CIL Viability Study (2014)
- Guildford Town and Approaches Movement Study: Equality Impact Assessment (March 2015)
- Habitat Regulations Assessment (June, 2017)
- Land Availability Assessment (2016)
- Land Availability Assessment Addendum (2017)
- Open Space, Sport and Recreation Assessment (2017)
- Retail and Leisure Study Addendum (February 2017)
- Strategic Highway Assessment Report (June 2016)
- Strategic Highway Assessment Report Addendum (2017)
- Strategic Housing Land Availability Assessment (SHLAA) (May 2014 Update)
- Sustainability Appraisal (June 2017) and non-technical summary (2017)
- Topic paper 2017 - Flood Risk
- Topic paper 2017 - Environmental Sustainability and Climate Change
- Topic paper 2017 - Green and Blue Infrastructure
- Topic Paper 2017 - Retail and Town Centre
2.2. The evidence is referred to in this Representation where appropriate.

Sustainability Appraisal (SA)

2.3. WPI previously objected to the draft Sustainability Appraisal (SA) (2016 version). This objection is withdrawn, on the basis of the 2017 SA which is now supported.

2.4. In the 2017 SA, the expected housing to be delivered through each site is either referred to as “givens” (i.e. it will come forward) or “variables” (may come forward). Those which are “givens” include housing completions and commitments since the start of the plan period, an assumption for windfall sites and an assumption for rural exception sites (see footnote 38 page 34).

2.5. Wisley Sustainable New Settlement, as identified as project “tier 9” (page 32), with the associated provision of 2,000 dwellings is stated to be “a given”. The change from being regarded as “a variable” from the 2016 SA is strongly supported by WPI and GBC’s comment that there is now a “greater degree of confidence in the potential for a new settlement at the site to be suitable, with the right planning application” is a welcome addition to the SA.

2.6. There is a slight error in the SA in that Wisley Sustainable New Settlement is categorised in two places with two different “tier” numbers. See in particular table 6.3 (page 39) which refers to the site as “tier 8” compared with the detailed text at paragraph 6.6.12 whereby the provision of a new settlement is referred to as “tier 9”. This should be clarified to avoid confusion.

2.7. There are now 8 reasonable alternatives considered in the updated SA, and this has built upon the 2016 SA. WPI supports the inclusion of Wisley Sustainable New Settlement in all of these reasonable alternatives for the delivery of 2,000 dwellings, and the fact that all 8 Options propose to exceed the OAN over the plan period. These 8 options are summarised in Table 2.1.

Table 2.1: Summary of the 8 Reasonable Spatial Strategy Options Assessed in the SA 2017

</table>

2.8. The “given” sites, including Wisley Sustainable New Settlement, contribute to circa 8,317 dwellings of the total provision. The contribution of Wisley Airfield to the given housing contribution of 8,317, is 24%. Evidently, the site is a
fundamental aspect of all growth options for the GBLP and Local Authority area as a whole. This positively reflects the ongoing discussions and proactive work that has been undertaken with GBC over the last 12 to 18 months.

2.9. The remaining contributions for the above 8 options are to come forward through a combination of “variable” sites, notably comprising development sites in the countryside beyond the Green Belt, Green Belt urban extensions to Guildford, or Green Belt urban extensions to villages.

2.10. It is positive to see that GBC are considering all options for growth, taking forward those from the 2016 SA and recommendations to explore alternative strategic options.

2.11. The SA indicates that GBC’s preferred option is Option 1, delivering 9.4% above the OAN. Whilst WPI does support the intention to exceed OAN, particularly in light of their representations made to the Submission GBLP in July 2016, whereby it was suggested a 6% buffer would be appropriate, Option 1 provides the smallest additional buffer above OAN, and GBC fully acknowledges that this is likely to result in unmet need within the wider Housing Market Area (HMA). Subsequently, in order to help address the housing needs of the wider HMA, and as part of the Duty to Cooperate, WPI believe that GBC should consider implementing an alternative Option as part of the GBLP.

2.12. With specific regard to Wisley Sustainable New Settlement, the maps contained within the SA all continue to refer to Wisley Airfield as having a “medium” sensitivity. Although this is based on the Green Belt and Countryside Study 2013, there is no change to correctly reflect the findings that the site is “low to medium sensitivity”. WPI’s representations made to the Submission GBLP in July 2016 clearly emphasised the importance of this being accurately reflected in the SA. WPI continue to recommend this change.

2.13. Chapter 10 of the updated SA includes site specific comments on Wisley Airfield. Where concerns are raised, these have been addressed through technical work undertaken on behalf of WPI, both in respect of the allocation of the site in the Emerging GBLP and in relation to the ongoing appeal at the site. For example, a drawback of Option 1, as noted in the SA, is that Wisley Airfield is regarded as being “particularly sensitive” from a biodiversity perspective. However, technical work has been undertaken, in addition to consultation with Natural England, both of which are then noted in the SA (para 8.2.2) and suitable mitigation measures can be provided. Refer in particular to the Appendix 4 of WPI’s July 2016 representations to the Submission GBLP which contains an Ecology Technical Note and Natural England Consultation Reply. Further details are also provided in Appendix 3, whereby an addendum report, produced by Ecological Planning and Research Ltd (EPR), is contained, which outlines the reasons why the proposed SNCI designation for the entire site is not justified.

2.14. The updated SA includes the assessment for Wisley Airfield. This is reproduced in Table 2.2 below.

**Table 2.2 SA of Wisley Airfield strategic development site**

[see attachment for table]

2.15. It is noted that there is now one less category in the SA, namely, the size of the site. However, other than this change, there is no change between the conclusions of the 2016 and 2017 SA for Wisley Airfield. This is supported.

2.16. In respect of Table 2.2, it is noted that a number of the criterion where Wisley Airfield has scored ‘red’ (negative impact) are addressed by the emerging policy A35.

- **SNCI** – This designation is unjustified as outlined by the available evidence and this representation.
- **Key Employment Site** – large scale employment is not proposed as part of the allocation, however some employment is and thus the SA may better reflect this as a neutral factor
- **Healthcare** – the delivery of a new settlement will have an impact on healthcare, hence the requirement in emerging policy for this designation.
- **District/ local centre** – by definition a new settlement will not benefit from existing centres, The creation of a new village centre (as a local centre) is an integral part of emerging policy
- **Healthcare** – the delivery of a Sustainable New Settlement will have an impact on education, hence the requirement in emerging policy for a new primary/ secondary school, and for nursery provision,
Agricultural land – as demonstrated in evidence, the delivery of Wisley new settlement on WPI land will result in a net loss of Best & Most Versatile Agricultural land of less than 20 hectares

Railway Station – the emerging GBLP, including the Infrastructure Delivery Plan, and emerging policy A35 requires a bus based sustainable transport strategy, which will ensure direct linkages to Horsley and Effingham Junction railway stations. By definition only, is the new settlement not located on a railway line.

2.17. In addition, WPI makes the further Site specific comments on the SA, including those on communities (Para 10.4.4) which refer positively to the contribution to community infrastructure, but negatively regarding the distance from a town centre and potential impacts (excluding possible A3/M25 upgrades). This is further noted in paragraph 10.16.5 where it states that the site does not perform well based on its location, but its scale provides good potential for high quality bus services and cycle routes. Upgrades to the highway network are noted.

2.18. Paragraph 10.8.3 refers to the historic environment but notes that there is good potential to mitigate impacts through site specific policies which have been strengthened following the 2016 SA.

2.19. On housing, see paragraph 10.9.8 which indicates a need for some specialist housing and self-build plots on strategic sites including Wisley.

2.20. A recommendation is included at paragraph 10.19.3 for the site specific policy for Wisley Airfield to ensure that impacts on the SNCI are minimise.

Changes sought

2.21. None of the comments made by WPI go to the heart of the SA, and are made purely as clarifications.

Land Availability Assessment (LAA)

2.22. The addendum to the LAA (2017) includes a new housing trajectory for the plan period. Table 2.3 shows the stated delivery rate for Wisley Sustainable New Settlement. The proposed trajectory identifies strong reliance on the delivery of dwellings from Wisley Airfield in the first ten years of the GBLP.

Table 2.3 Extract from the LAA housing trajectory

[see attachment for table]

2.23. WPI makes no detailed comment on emerging housing or spatial strategy policy S2. The emerging context is of relevance, and highlights the importance of the early delivery of the GBLP.

2.24. The Examination process into the Waverley Local Plan is presently ongoing. The District is relevant as it forms part of the West Surrey Housing Market Area as Guildford (along with Woking).

2.25. The Inspector for the Waverley EiP acknowledged the significant requirement for affordable housing within the HMA, recommending 25% uplift on OAN to reflect affordability pressures.

2.26. In addition, The Inspector has recommended that Waverley should be taking 50% of the unmet need from Woking and has asked for the Council’s housing figure to be increased to 590 dpa. I understand the break down to be as such:

• 396 dpa starting point
• 495 dpa to give a 25% uplift
• + 12 dpa to account for affordable housing need, household formation and London migration
• +83 dpa to meet 50% of Woking Borough’s unmet need

2.27. WPI makes no comment on the issue of unmet need. WPI simply wishes to note that the need to deliver homes promptly in GBC, notably in locations close to Woking (such as Wisley) are therefore of increased relevance. Thus, the wider Housing Market Area should rightly have influence over the proposed GBLP housing trajectory.

Changes sought

• None. It should however be noted that the trajectory which is being promoted by WPI envisages the delivery of dwellings from 2020/21, and a faster build out to 2031/32.

Infrastructure Delivery Plan (IDP)

2.28. WPI notes the IDP as the same as the 2016 version. No further comments.

Topic Paper – Housing Delivery

2.29. The 2017 Housing Topic Paper continues to provide strong and reasoned justification for the allocation of Wisley Airfield, and hence is supported. The Topic Paper is helpful explanation of the emerging GBLP.

2.30. WPI’s comments on this Topic Paper are largely provided in relation to policy ID2. In particular, it is noted that there is limited (if any) location specific evidence to support the proposed targets and strategy for sustainable construction and development, over and above the National Standards Review.

Topic Paper – Blue and Green Infrastructure.

2.31. WPI’s comments on this Topic Paper are provided in this representation with particular regard to the Strategic allocation policy A35 for Wisley Airfield. A supplementary commentary is also provided by WPI’s appointed ecologist Ecological Planning and Research Ltd (EPR) at Appendix 1, which should be read in addition to this representation and the report provided in Appendix 4 of WPI’s representations to the Submission GBLP (July 2016).

3. WPI Updated Position with respect of Representations on the GBLP

3.1. Representations were submitted to GBC in July 2016 in respect of the Submission version of the Emerging Local Plan. A summary table is included (see Appendix 1) setting out these representations and the original changes sought to the emerging GBLP. This is for reference only.

3.2. This Section reviews the changes now proposed through the Focused Amendments Local Plan, in light of the summary table from WPI’s July 2016 representations and additional comments are made by WPI in respect of those proposed changes. WPI’s additional comments and representations on the Focused Amendments are therefore provided in this section.

Table 3.1 Table examining Focused Amendments in light of the changes sought by WPI in the submission Local Plan (July 2016).

[see attachment for table of representations]
It is not clear why completions and existing commitments form part of the assessment. Test a new Option ‘2A’ including the Wisley new settlement, which would represent OAN plus 6% buffer (14,744 dwellings). Amend the SA text with respect to the Wisley new settlement on page 26, to ensure in particular that it is consistent with the Housing Delivery Topic Paper (June 2016) in respect of the positive benefits of the Wisley new settlement. This should make clear that there are no matters which call into question the suitability of the site for a new settlement.

Revise the classifications of Low, Medium and High sensitivity Green Belt, noting that the Wisley new settlement is ‘low to medium sensitivity’.

A New Sustainability Appraisal has been published dated June 2017. Note that reference is made to housing numbers as “givens” and this includes housing completions and commitments since the start of the plan period, an assumption for windfall sites and an assumption for rural exception sites (see footnote 38 page 34). There is no detailed analysis of completions or commitments.

Chapter 6 refers to the locations for development as either “a given” or “a variable”. Wisley New Settlement (tier 9 – page 32) and provision of 2,000 dwellings is “a given”. Para 6.6.12 states that this is an evolution since the 2016 SA where the site was regarded as “a variable”, reflecting the refusal of planning permission. There is now a “greater degree of confidence in the potential for a new settlement at the site to be suitable, with the right planning application”.

There are 8 reasonable alternatives. Wisley is included in all of them as “a given” site delivering 2000 homes. See table 6.3 page 39. Note that tier numbers have slightly changed but reflects whether sites are a given or a variable.

Maps show that Wisley former Airfield has a “medium” sensitivity. Although this is based on the Green Belt and Countryside Study 2013, there is no change to reflect the findings that the site is “low to medium sensitivity”.

Of the 8 reasonable alternatives, GBC’s preferred approach is Option 1 which delivers 13,600 dwellings with a 9.4% buffer over OAN. This is the lowest delivery of all options (see table 6.3 on page 39). The SA recognises that Option 1 meets the Borough OAN but is likely to result in unmet need within the HMA.

In terms of drawbacks on option 1, Wisley Airfield is noted to be “particularly sensitive” from a biodiversity perspective but the technical work undertaken, in addition to consultation with Natural England, is noted (para 8.2.2), this is further explored at paragraphs 10.2.4 and 10.2.5 whereby mitigation to reduce impact on biodiversity, is referenced.

Site specific comments in the SA include those on communities (Para 10.4.4) which refer positively to the contribution to community infrastructure, but negatively regarding the distance from a town centre and potential impacts (excluding possible A3/M25 upgrades).

This is further noted in paragraph 10.16.5 where it states that the site does not perform well based on its location, but its scale provides good potential for high quality bus services and cycle routes. Upgrades to the highway network are noted.
Paragraph 10.8.3 refers to the historic environment but notes that there is good potential to mitigate impacts through site specific policies which have been strengthened following the 2016 SA. On housing, see paragraph 10.9.8 which indicates a need for some specialist housing and self built plots on strategic sites including Wisley. A recommendation is included at paragraph 10.19.3 for the site specific policy for Wisley Airfield to ensure that impacts on the SNCI are minimised. The SA for Wisley Airfield is detailed on page 122.

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

2. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

It seems to me that The Strategic Housing Market Assessment has grossly overestimated the need and I do not feel that sufficient consideration has been given to infrastructure, particularly regarding traffic, to support such huge development.

**Answer:** ()

1. Questions posed by Guildford Borough Council as part of its consultation.

Questions from GBC

24.A. Question 1: The evidence base and submission documents

The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence. The evidence base documents contributing to the preparation of the plan are listed in Appendix D and can be found on our website (links open in a new window).

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

**ANSWER**

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

**Comment ID:** SQLP16/1192  **Respondent:** 9323361 / Paul Holden  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

**Answer:** ()
The previous draft local plan was withdrawn after generating widespread local opposition. Our Mole Valley MP Sir Paul Beresford responded to that; a copy of his comment dated 21 September 2014 is enclosed. His document retains its validity. Sir Paul observed:

“This catalogue of errors and omissions has led to a situation in which the Local Plan as presented has no detectable support from Guildford residents and has managed only to anger and worry so many of those who stand to lose the unique and valuable rural village lifestyle they currently enjoy in the Mole Valley Wards of Guildford Borough”.

Sir Paul's commentary applies to the revised plan as do other submissions in response to the last draft plan (including my own earlier letter which I attach as well). I object to the revised plan generally for all of the reasons cited in my September 2014 letter in respect of certain sites then earmarked.

I object to this new or second Draft Local Plan (as Sir Paul anticipated it) because Guildford Borough Council still has not recognised local feeling and opinion in formulating it. I object to the failure to consult in any responsible way and to the approach taken for all of the reasons recited by Sir Paul which seem to have been ignored in compiling the new or second Draft local Plan.

Comment ID: pslp17q/203  Respondent: 9326433 / Keith Kerr  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Answer: (No)

I object to the revised plan because the evidence base and the submission documents do not take a fair account of what is required to achieve positive and sustainable growth for a better future for all, including following generations. The plan fails to explain how the current failing services will be improved to meet the demands of a larger population.

The infrastructure must be seen to be working efficiently before you start squeezing more homes into an already congested site.

The proposed number of new homes (12,426) does not reflect the will of the current population and the number would appear to be greatly excessive when taking the result of the EU referendum into account.

The number of affordable homes is inadequate for our needs, and the cost of these homes is far to expensive for anyone on an average salary. How can you legally describe them as being affordable?

The alterations to the plan seem to make it easier for developers to build lower quality and less energy efficient homes. Zero-carbon homes can be built and these should be an essential element of your policy. All developers should have to produce detailed construction plans and energy use calculations for their proposed development. This should include the carbon cost for the source and the manufacture of the raw materials used in the construction, the lifespan and maintenance of the homes together with risk assessments for carrying out alterations or demolition. We need this information so that we can be seen to be protecting the future for following generations and making our best efforts to avoid global warming.

Comment ID: SQLP16/1956  Respondent: 10270913 / ECA (Martha Covell)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents
A. This submission

Thank you for requesting our comments on the Guildford Borough Proposed Submission Local Plan: Strategy and Sites 2016. We act on behalf of Top Real Estate Group (TREG Consulting) owners of a potential site off Effingham Common Road and wish the comments in this letter together with the following documents to be taken into consideration in taking this plan forward.

This submission comprises the following:
• Draft Masterplan
• Site Location Plan
• Draft Planning, Design and Access Statement
• A Green Belt Assessment of Effingham Village
• Phase 1 Sustainability Appraisal
• Phase 1 Ecology Assessment
• Transportation Appraisal
• Transport Accessibility report

B. Background

We have been developing proposals for a strategic site in Effingham on a long-term basis and have been a stakeholder in the emerging Guildford Local Plan and Effingham Village Neighbourhood Plan.

Our proposals for the site at Effingham are at an advanced stage and a pre-application enquiry was made in 2015. Details of these proposals are set out in our draft Planning, Design and Access statement.

C. Previous representations

Set out below is a summary of the representations we made to the emerging Local Plan in 2014 and evidence base:

• 1) Guildford Borough Council failed in their duty to co-operate because there is no evidence that they have taken our previous submissions, in particular our SHLAA submission, into account;
• 2) The evidence base is unsound because the methodology adopted for the Green Belt and Countryside Study (GBCS) is inconsistent between different sites and parcels of land and the GBCS and SHLAA conflates the distinctive roles of each;
• 3) The SHLAA is unsound because it has not made an objective and consistent appraisal of each site. Instead it has been informed by the GBCS. This is contrary to the NPPG, which confirms that sites with existing policy constraints should be included and previous constraints should not be accepted;
• 4) The GBCS is unsound because it fails to apply a significance test to the review of various land parcels; the parcels are too large; little weight is attached to the ‘5 purposes of the green belt’ contrary to paragraph 80 of the NPPF; there is an inconsistent analysis of settlements gateways and inconsistent approach to the creation of ‘new defensible green belt boundaries’;
• 5) The Borough Wide Strategy relies on the allocation and development of Wisley Aerodrome, yet this is an isolated location and does not represent a sustainable form of development. The site is a designated SPA and nature conservation area. The open and linear character of the site, does not lend itself to development. The allocation of areas around villages is preferable as these are more sustainable locations for development;

(6) The Rural Exception Homes should be more flexible to accommodate ‘enabling development’ and alternative models of housing delivery, such as ‘community right to build’ and ‘community land trusts’;
• 7) Villages and Major Previously Developed Sites proposes new boundaries to settlements and the green belt, based on inadequate analysis in the GBCS which is unsound;
• 8) Green Belt and Countryside is based on an unsound and inadequate evidence base;
• 9) We object to the allocation of Wisley Aerodrome as it is based on an unsound evidence base;
• 10) We object to the identification of land north east of Effingham Village as a Potential Development Area (PDA) on the grounds that it is contrary to Paragraph 80 of the NPPF, as it serves a number of green belt purposes, contrary to Paragraph 85 of the NPPF as it fails to define a defensible green belt boundary, the development will have a detrimental impact
on the character of the eastern and northern ‘settlement gateways of Effingham’ and the scale of development does not relate proportionally to the scale of Effingham Village and does not represent a sustainable form of development.

D. The Emerging Guildford Local Plan 2016
The following policies of the emerging Local Plan 2016 are relevant to the consideration of the proposals at Upper Leewood Farm:
• Policy S2: Planning for the borough – our spatial development strategy
• Policy H1: Homes for all
• Policy H3: Rural exception homes
• Policy P2: Green Belt
• Policy P5: Thames Basin Heath Special Protection Area
• Policy D1: Making better places
• Policy D2: Sustainable design, construction and energy
• Policy D3: Historic Environment
• Policy D4: Development in urban areas and inset villages
• Policy I3: Sustainable transport for new developments
• Policy I4: Green and blue infrastructure

We specifically have concerns about the following policies:

• Policy S2: Planning for the borough – our spatial development strategy
• Policy H1: Homes for all
• Policy P2: Green Belt

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents
Answer: ()

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:
1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents
Answer: (No)

I object. There is no evidence base for a new secondary school west of Guildford in Normandy/Flexford.

Secondary schools to the west of the borough are under subscribed by approx.700. There are other new secondary schools already approved, the new Technical College, expansions at Guildford County and St.Peters, the new Hoe Valley School. There is a proposal for a 5F secondary school at Rokers, Worpleston.

Even if a further new secondary school was required, it would be better located nearer the borough's centre of population, such as Blackwell Farm.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents
Answer: ()

I object to the methodology of drawing up the plan. Guildford Borough has employed consultants who allegedly have planning experience, but have not taken account of Surrey County Council highway planners views or the costs involved in improving infrastructure, which is currently outside their financial capability

The methodology is also flawed as this plan has been formulated without regard to the Village Neighbourhood plans. Logic would suggest planning is best formed by a bottom up rather than top down approach.

Overall, I OBJECT to this plan. It seems to me that the housing numbers you’re proposing to build are much too high for this area. I don’t understand all of the analysis you’ve presented to justify them, which all looks so complicated that I suspect the authors try to make it deliberately confusing on purpose. But my feeling on this is that GBC have put forward a plan that not many people want, apart from the town planners. If the Government is forecasting population in this area will rise by 15%, how on earth can GBC put forward a plan to increase its housing stock by 25%? Also, given that so much of the Borough is Green Belt, why isn’t this taken into account? The majority of the land for housing is coming out of the Green Belt, which is just plain ridiculous.

I absolutely DO NOT agree that the plan, strategy and sites are based on up-to-date, relevant data or evidence.

The data used by GBC contains anomalies (e.g. base rates of housing need of students which do not provide a stable base for extrapolation) and relies on assumptions which cannot now be used (for instance rates of growth in employment and need for housing in this area). The assumption of housing need behind the SHMA for example had as a driver inward international migration. This MUST now be reviewed and reconsidered given the EU referendum result. There simply will not be such migration and therefore no need to decimate our beautiful countryside by excessive housing development.

The evidence used is wholly inadequate, founded on unsound data and fails to take account of need re: actual housing units required. For instance the figures from the revised West Surrey SHMA (Strategic Housing Market assessment) are misleading and offer an inflated housing target for the Borough of Guildford, in large part because of the transient student population associated with the University. Census data takes term time address as permanent places of residence and housing needs are based on this. Most students will not stay in the area after completion of studies and require housing.

Also GBC proposes to build on Green Belt, and fails to provide evidence of exceptional or special circumstances to justify this WHILST removing Brownfield sites (e.g. A4 and A34). This does not represent adequate planning nor does it provide evidence for their proposals.

LOCAL PLAN 2016 (strategy and sites document).

I am writing as resident but I am also a Send Parish Councillor. I am concerned that this plan is not sustainable, it is not environmentally sustainable, that the evidence base is unsound and that this Local Plan is not compliant with the National Planning Policy Framework (NPPF) guidelines. I have structured my comments on the proposed submission Local Plan 2016 strategy and sites document into three sections: Section 1, comments on the evidence base, soundness of the plan and legal compliance. Section 2, comments on policies. Section 3, comments on sIlCs.

SECTION 1: Comments on the evidence base, soundness of the plan and legal compliance.

I do not agree that the Local Plan is sound, that the evidence base is up to date or that the plan is legal compliant for the following reasons:

1). GL Hearn’s Strategic Housing Market Assessment (SHMA) proposes building 693 Dwellings Per Annum (DPA). However representations made by Tibbalds Planning and Urban Design consultants on behalf of Send Parish Council illustrate that this number accounts for a buffer of more than 20%. In reality this means allocations are made to provide 910 Dwellings Per Annum (DPA) or 131% of the requirement of the SHMA. The housing figures in the SHMA are therefore inaccurate and unreliable.

2). Guildford Borough Green Belt and Countryside Study is tailored around the Settlement Hierarchy Report and the Strategic Housing Market Assessment Report (SHMA). The Settlement Hierarchy is based on a subjective spatial strategy of large/medium and small villages. With regard to the SHMA, have detailed my concerns as in point 1 above.

3). Guildford Borough Green Belt and Countryside Study is used to rule out sites in GBC Flood Risk Sequential and Exception Test (May 2016) but these sites would otherwise meet the GBC Flood Risk Sequential and Exception Test (May 2016). See Appendix I stages 1, 2 and 3.

4). Guildford Borough Council’s Surface Water Management Plan (SWMP) was produced prior to the approval of planning application 14P02289: Land to the north of Tannery Lane and east of Wharf Lane. This planning application required a drainage strategy to mitigate surface water. This development borders site A42 Clockbam Nursery. As the SWMP preceded approval of this planning application the SWMP is now outdated as an evidence base document to manage flood risk as required by the NPPF with regard to A42 Clockbam Nursery.

5) Each and every site in Send Parish has been added since the Regulation 18 consultation, including a major development of 400 homes at Garlick’s Arch and on/off slip roads on to the A3.
6) The introduction of Garlick's Arch and on/off slips roads on to the A3 have been added so late within a Regulation 19 document that statutory consultees such as Highways England have not had a chance to comment.

7) The Transport Assessment was provided during the consultation period and was not available to inform Councillors at the full Council meeting on the 24th May 2016.

8) Councillors have not been able to scrutinize all documentation, including the OAN figure for the SHMA.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents...
### Answer:

As a whole the 2017 plan fails to follow NFFP para 17 core planning principals and does not ‘contribute to conserving and enhancing the natural environment and reducing pollution’. There are fundamental errors made in requirements for housing and employment based on the source documents e.g. SHMA and ELNA. The data sources do not show empirical evidence for the changes in the UK’s housing and economic status after it leaves then European Union. The UK population has voted to make a significant change to the country’s economy and population and the impact of Brexit on the local area must be accurately evaluated or else the entire basis of the local plan is flawed.

The Guildford Borough Green Belt and Countryside Study and SHLAA and LAA are unsound as set out below:

**Strategic Housing Land Availability Assessment AND Guildford Borough Land Availability Assessment**

- We set out our case for consideration of a ‘sustainable mixed use development’ on a green belt sites in Effingham (Land West of Effingham Common Road (Presumed Site Ref. 1408?)) in submissions made to Guildford Borough Council (GBC) on 15th October 2010 and 19th January 2011 (copy of covering letters enclosed in the appendices) as a result of Guildford’s ‘Call for Sites’. In both cases we submitted planning and landscape appraisals, constraints plans, Transport and Ecological Assessments and schematic master plans. We also submitted an assessment of each sites Suitability, Availability and Achievability in line with the SHLAA Practice Guidance. We confirmed that both sites could be delivered within 6 – 15 years and we requested due consideration in the ongoing review of the SHLAA and Green Belt and Countryside Study.

- However the SHLAA failed to include an assessment of the site submitted. We set out further concerns and copied our original submission to GBC in a letter dated 10 September 2013. Yet the updated (2014) SHLAA still failed to include an assessment of this fringe site and the published report offers little robust justification as to why this is the case.

- The Guildford Borough LAA (2016 and Addendum 2017) does include a list of ‘Green Belt, Discounted Sites’. We can only assume that our site is included as Site Ref: 1408 'Land West of Effingham Common Road'?
• Regulation 18 (3) of the Town and County Planning (Local Planning (England) Regulations 2012 places an obligation on GBC to consider all representations to the Local Plan. This states that “in preparing the Local Plan, the planning authority must take into account any representations made to them”. Having reviewed all documentation in detail, our submissions to the SHLAA ‘Call for Sites’ are and remain ‘invisible’.

• Normal practice is for all sites offered in the SHLAA ‘Call for Sites’ to be assessed. This allows an objective and consistent appraisal to be made initially of each site, unconstrained by (but still mindful of) existing local policies. This establishes what land supply there may be available to meet development needs and provides a transparent comparison of options available to meet these needs. This initial appraisal of sites then further be tested for allocation through the Sustainability Appraisal process.

• The SHLAA sets out the sources used to identify sites and confirms that this included information from the Green Belt and Countryside Assessment (GBCA). However the SHLAA itself provides no real justification for the methodology followed and it appears that the GBCS has had an overbearing and unjustified influence on the SHLAA assessment criteria. When we questioned officers directly, GBC provided the following justification for the exclusion of certain sites in the SHLAA by stating (email of 2nd November 2011, Heather Sandell to Martha Covell). ‘Please be aware that the SHLAA is being informed by the Green Belt and Countryside Study. ……”It is not possible to obtain the SHLAA assessment sheets as the work on the SHLAA is still in progress. For sites outside of the village settlements and urban areas, the Green Belt and Countryside Study is effectively the assessment sheet. If sites are not identified in the Green Belt and Countryside Study as potentially suitable for residential development, no further assessment work is required.” A further email on 22 August 2013 states ‘All land in the Green Belt cannot possibly be suitable for development, if it were, it would of course undermine the whole purpose of the Green Belt. We have used our GBCS to test suitability of land suggested to us that is in the Green Belt.’

• The NPPG (6/3/2014) sets out the methodology that should be undertaken in preparing housing and economic land assessments. In relation to Stage 1 ‘How should sites/broad locations be identified? It states: ‘When carrying out a desk top review, plan makers should be proactive in identifying as wide a range as possible of sites and broad locations for development (including those existing sites that could be improved, intensified or changed). Sites, which have particular policy constraints, should be included in the assessment for the sake of comprehensiveness but these constraints must be set out clearly, including where they severely restrict development. An important part of the desktop review, however, is to test again the appropriateness of other previously defined constraints, rather than simply to accept them. Plan makers should not simply rely on sites that they have been informed about but actively identify sites through the desktop review process that may have a part to play in meeting the development needs of an area.’

• Whilst the SHLAA does not allocate sites, there can be no justification for the rejection of sites from further assessment within the SHLAA, based solely on their inclusion within current green belt boundaries, which as the Local Plan Issues and Options version, confirms in paragraph 6.5, establishes the special circumstances to require the green belt boundaries in the Borough to be reviewed. It remains our view that the GBCS and SHLAA evidence conflates the distinctive roles of each and contrary to the purpose of each study.

• On this basis, the Local Plan process fails to comply with Regulation 18(3) and the emerging plan is unsound as there is no evidence that GBC have had regard to any of our submissions and made an appropriate assessment of all sites, including fringe sites. This is contrary to guidance contained within the NPPG.

**Guildford Borough Green Belt and Countryside Study**

• GBC’s methodology is that if sites are not identified in the Green Belt and Countryside Study (GBCS) as potentially suitable for residential development, no further assessment work is required and the site is excluded also form the SHLAA. Hence the Green Belt Study is critical. Despite the significance of the document, GBC have not consulted on the study (unlike Mole Valley who consulted on the GB Review methodology) and the weight that can be attached to it is therefore limited. We object on the grounds that the Council have failed in their legal duty to co-operate in this respect.

• Paragraph 1.3 of the 2013 Summary Report confirms the key requirement of the study is to inform Local Plan options by assessing ‘sustainable locations for green field release’. Whilst ‘sustainability’ is the golden thread...
running through plan making and decision taking process (Paragraph 14 of the NPPF) the methodology adopted
in the GBCS gives little weight to the five main purposes of the green belt as set out in the NPPF (paragraph 80).
• We acknowledge there is no statutory guidance and methodology for undertaking a green belt review. But since
the commencement of the Guildford Green Belt Study in 2009, there has been a considerable quantity of
emerging practice to illustrate a sound approach.
• The Gloucester/ Cheltenham/ Tewkesbury (GCT) Green Belt review for example contains an examination of
practice much of which is endorsed as being soundly based. This review identifies parcels of land for assessment
purposes and then assigns a significance rating to the contribution of each parcel against each green belt
purpose. It makes no further technical assessment.
• This approach differs greatly from the Guildford GBCS, which judged each parcel against the Green Belt
purposes on a Yes or No basis, rather than a comparative rating. It then identifies potential development areas
based on environmental capacity and accessibility, the latter offering no quantifiable evidence. Further more the
parcels of land assessed are large and in themselves have a diverse character. The parcels pay little regard to
physical features that can define green belt boundaries and therefore the assessment is contrary to paragraph 85
of the NPPF and is unsound.
• The approach blurs the distinction between the Green Belt assessment process and decision-making. Such
considerations are better dealt with as part of the testing of potential development areas, when a wider range of
factors can be taken into account within the remit of the sustainability appraisal.
• It is clear that the failure to apply a significance test to the review of parcels in the GBCS has resulted in many
parcels all scoring well in green belt terms and hence undermining the reviews principle purpose. A yes/no
judgment is an unsound approach and ‘scoring’ parcels which the GBCS mistakenly has done, does not enable
any differentiation between the significance of parcels and hence the impact of development on green belt
purposes.
• This is illustrated for example throughout the commentary on Potential Development Areas (PDA) in Volume 1
of the GBCS, which repeatedly states that green belt purposes are not significantly compromised (e.g. Table
1.27 “D10 and E9 provide opportunities to accommodate appropriate development without significantly
compromising green belt purposes). No test of significance has been applied in aggregate to the green belt
purpose of each parcel and hence renders the exercise ineffective and this point is acknowledged in GBCS Vol.
1 paragraph 1.8: “If the high scoring parcels were removed from consideration it would have meant a number of
villages could not have included a PDA...it was considered that to initially exclude villages from being able to
accommodate a PDA as part of this Study may conflict with subsequent spatial strategies identified by the
Council”. Similar points are also made in Volume 3 paragraph 10.2 and 10.3.
• Parcel E9 and the identification of PDA E9-B is a good example of the unsoundness that results from the
approach adopted.
• The Environmental Capacity Analysis for Effingham, as contained within Volume III provides inconsistent
analysis of the settlement gateways and the existing and proposed ‘defensible green belt boundaries’. It states:

‘Open ground is located to the north of Leewood Way and Lower Road. Access to the open ground to the north of
Leewood Way (TREG consulting site) is limited and potential development is considered to conflict with the perceived
settlement ‘gateway’ on Effingham Common Road. Open ground to the north of Lower Road and the horticultural
nursery is framed by mature tree belts and woodland at Thornet Wood’.

• This analysis is incorrect for three reasons, namely:
• (1) the open ground located to the north of Leewood Way (TREG Consulting site) benefits from direct access
off Effingham Common Road and also direct access from some of the rear gardens off Leewood Way;
• (2) The master plan proposals developed by TREG Consulting show that the proposals could preserve and
enhance the ‘perceived settlement gateway’ due to the high embankments, established tree belts and sensitive
design features;
• (3) The mature tree belt to the north, east and west of the Leewood Way site (TREG Consulting site) is not
identified , even though it comprises ancient woodland to the east, a road to the west and a mature tree belt and
embankment to the north. This compares with the Lower Road site , which gives Thornet Wood considerable
weight and allocates it as a potential ‘defensible’ green belt boundary.
  ◦ Secondly the analysis in Volume III identified two ‘settlement gateways’ to the north and east of
Effingham, yet the analysis is given different weight as the site adjacent to the eastern gateway is
identified as a PDA and the site to the north is not. Indeed the analysis of the eastern gateway (Lower
Road) confirms that this gateway plays a more significant role than the northern gateway (Effingham Common Road) as this comprises open ground and is within the Effingham Conservation Area. It states: ‘East: The perceived settlement gateway is located along Lower Road and the A246 Guildford Road to the east of the village…. Open ground to the east of the village maintains separation between Effingham and Little Bookham to the east. This open ground is also located within Effingham Conservation Area’.

- Volume IV of the GBCS starts to define new Green Belt boundaries. Stage 2 ‘Assessing the locations for potential Green Belt defensible boundaries surrounding each village within Guildford Borough’ lists defensible green belt boundaries ‘which provide physical and/ or visual separation to the wider Green Belt’ but the features listed are very inconsistent and the assessment is subjective. For example in the Effingham Assessment, the boundary ‘2R’ is a fence line. But in reality this is a very low fence at the end of residential properties and has been taken down and includes gates in some situations. The edge of the urban area is very ‘raw’ and evident in landscape terms here and this is not actually a very defensible green belt boundary. In contrast, the fence lines and boundary walls near to ‘2B’ on the opposite side of Effingham Common Road have been disregarded. Instead Thornet Wood ‘2A’ a considerable distance to the north, has been taken into account.

- The TREG Consulting site, on the west side of Effingham Common Road has tree belts/ woodland surrounding it to the north, east and west yet these, with the exception of the woodland, have all been disregarded.

- We have also noted inconsistencies in the GBCS e.g. the assessment of development impact on village ‘settlement gateways’. Of the 37 ‘settlement gateways’ identified in the GBCS, only one gateway to the north of Effingham on Effingham Common Road, adjacent to TREG Consulting site, has been assessed for development impact. Either such an assessment (which as we have set out, we consider strays beyond the scope of a GB review) is made against all ‘settlement gateways’ or not at all. As it stands, this is clearly an inconsistent use of evidence and wholly unjustified.

- We have undertaken our own Green Belt Assessment of Effingham based on testing significance and have submitted copies with this representation.

- On the basis set out above, we consider Volumes 1 to 5 of the GBCS are unsound and lack sufficient robust justification for the identification of Potential Development Areas within the Green Belt. To make the GBCS sound we recommend the adoption of the significance test as we have outlined and submitted in reviewing the published green belt recommendations.

Attached documents: 131122 EFFGreenBelt.pdf (1.0 MB)
not valid: serving 2 Green Belt functions is as valid as serving 4 functions. Green Belt is Green Belt, it does not require assessment or qualification. The Green Belt sensitivity analysis is not a valid basis for informing decisions.

Exceptional circumstances clearly do not exist to justify amendments to Green Belt boundaries as part of the Local Plan process. It is quite achievable for realistically prepared and identified development needs to be accommodated in Guildford’s urban areas and villages.

The Transport Evidence has been produced very late and is incomplete, inaccurate and untested to the extent that the Plan is not ready for a Regulation 19 consultation.

It is emerging that the Strategic Highway Assessment shows there will be congestion, even with all the highway schemes in the Plan. Many questions remain unanswered. E.g. Why would 1000 homes on Slyfield generate no extra traffic? The report only gives average speeds and information needed to understand how much congestion will occur and where it has not been provided in time to inform Plan proposals or responses.

The available evidence suggests much of the proposed Sustainable Movement Corridor cannot be delivered due to narrow roads and pinch points.

Evidence on bus travel is fundamentally compromised because no clear and workable location for a bus interchange is proposed.

No information has been provided on the demand for and capacity of rail services. The main line to London is already extremely busy in peak periods.

Information about the town centre as regards traffic, buses and parking is lacking. It is not credible to proceed without this given existing levels of congestion, the number of transport routes that rely on the town centre to cross the Downs, the shortage of crossing points over the railway and river and the fact that narrow roads and steep slopes make Guildford unsuitable for a ring road approach.

The Strategic Highway Assessment 2016 is flawed. It is invalid to base this on less traffic growth than the proposed housing growth. The report points to overcapacity use of the A3, M25, A31, A320, Millbrook, Ladymead, Woodbridge Road, York Road, London Road but understates the congestion consequences. Various suggested queue reductions are unexplained. The consequences of major proposed reductions in road space in the town centre (eg closure of Walnut Tree Close, narrowing of Woodbridge Road, reduced capacity of the gyratory) and of developing Burnt Common are not included. More time is needed to assess and refine this crucial 11th hour report which seems incomplete, understates the consequences of traffic overload, shows inconsistencies, and does not supply assumptions or information needed to understand queues at junctions.

The Guildford Retail Study Update lacks credibility and there is no proven case for expanding comparison retail space which is undermined by failure to implement existing retail consents at the North Street development over the last 10 years. The Guildford Retail Study does not take account of changing retail patters in relation to the threat of the internet and the “clicks and mortar” conflict. The study also assumes a number of logged retail requirements from companies already in liquidation or with national requirements that exclude Guildford. We believe that it was unacceptable to stop monitoring air quality, where NO2 emissions exceed limits, on the unrealistic assumption congestion would reduce. Estimates of premature deaths have doubled and issues with vehicle emission controls have emerged. Traffic noise from the A3 should also be reported.

Attached documents:  Guildford OAN Review.docx (44 KB)  Guildford OAN Review.docx (44 KB)
The evidence base is not up to date or adequate.

The documents of the evidence base were subject to continuous change without notification and it has been impossible in some cases to track the changes in order to identify significant and material change, making it impossible to evaluate if the change makes the document adequate or relevant. The evidence base was and is not ready for public consultation if there is no way to track what was said previously in so many documents of the evidence base, therefore no basis on which to judge adequacy and relevance to the current draft local plan.

For example, GBCS Vol 4 tables of scores for the contribution of each land parcel to the five purposes of the Green Belt showed one basis of evaluation in the version published in February 2013 and where this failed to support the pre-determination of GBC, the basis of evaluation was changed in the version published in April 2014 reducing the perceived Green Belt protection of the land parcels, making it easier to argue for their qualification as land for housing development. This does not make the document up-to-date as the basis of measurement and evaluation has changed; this is ‘moving the goal posts’ not improving ‘up-to-date-ness’.

The Habitats Regulation Assessment and Sustainability Appraisal were released after the plan was approved by the full council on 25 April 2016. The lateness and content demonstrate the inadequacy with which this plan has dealt with environmental matters. Neither document was immediately available on the website, so early responses sent to the council before these were released could not have taken account of the environmental issues. The Sustainability Appraisal is written by a commercial development company with worldwide reach AECOM and fails to be critical in any way and the document reads more like a public relations release.

The draft SHMA for Guildford has been proved inadequate. A study of the work of GL Hearn in compiling the housing forecasts to provide Objectively Assessed Need [OAN] by NMSS (sponsored by Guildford Residents Associations indicates shortcomings in methodology and lack of rigour in assessing available ONS statistics and misinterpretation of market signals. Therefore, any Policy that claims its content as evidence for the Policy is immediately thrown in to question and suggests it is unsound.

The Settlement Hierarchy evidence has been changed three times, with a second questionnaire submitted to Parish Councils to better record available services. Attempts to conflate settlements as defined by 2003 Local Plan settlement boundaries into small, medium and large villages was abandoned after the methodology was revealed by residents for the sham it was. The transposing of the new questionnaire content has been poor, with errors remaining. Now that the new data fails to match the pre-determination required by the council, the evidence has been quietly shuffled aside and not referred to in detail in the current draft. However, it remains in the evidence base.

The whole process has been one surrounded by obfuscation, with residents having to resort to Freedom of Information requests to obtain essential information freely released by other LPAs e.g. what constitutes ‘exceptional circumstances’. This does not bode well for the Proposed Submission Local Plan to be submitted for examination in public.

Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: (No)

The plan fails honestly to define Guildford, which is a part of London's hinterland, refuses to explain the basis on which "housing need" has been assessed, and is attached to dishonest claims to protect the Green Belt. Complexity of argumentation disguises the reality that the Plan clears the way for massive development in the Green Belt.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: (No)

The evidence base has been hidden from the citizenry on the crucial issue of housing need assessment. For Garlick Arch no evidence worth the name has been provided. The recent commitment by the UK Government to exit the EU and to impose substantial controls on migration must fundamentally change any assessment of housing need in the South East.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: (No)

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest 'value creation' areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

2. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents' Association and David Reeve) show it is set far too high and so
cannot be said to be adequate, up to date or relevant. In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account. The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

**Answer:** (Yes)
I object to the plans for which the evidence base appears to have been massaged in order to indicate a robustness which is not there. The figures for the number of houses required are unnecessarily high especially when the so called evidence is being used to support building on green belt land. It begs the question what green belt means to the Council when there appears to be an enthusiasm for building a case to support this.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents  
Answer: ()  
Neither should development be in a scatter-gun fashion with simultaneous developments across multiple sites by several developers. Developments should be approved on an individual site-by-site basis phased to meet demand as it is established. Simultaneous development across multiple sites would create an open property market which encourages occupation by people moving into the Green Belt to live and commuting outside the area. Again your Plan contains no detail on the methodology by which individual sites would be released to developers.

Answer: ()  
In conclusion my objection to the current Local Plan is not based on what it does contain, debatable as that may be, but on what it evidently omits. This Plan is basically a consultancy report which defines a theoretical future demand and one possible means of satisfying this demand. It is devoid of any alternative solutions or any detailed strategy or policies by which future demand may be measured. Even if demand can be quantified it relies very heavily on the vagaries of the current Planning Consent process to provide any level of monitoring or control during the implementation stage. As such it is an incomplete Plan. The availability of suitable housing in the right quantity whilst protecting the Green Belt is too important an issue to be approved on the basis of this Plan. I recommend the Plan be withdraw and that Guildford Borough Council be tasked with expending as much energy and effort on producing detailed proposals for the measurement and management of future developments as they have previously spent on calculating and justifying the demand.

Answer: (No)

Whilst there seems to be broad agreement for the Guildford 'demographic' OAN arrived at by the 2015 SHMA, the increase to this figure to support economic expansion, improved affordability and additional student housing has been vigorously disputed. There is credible analysis questioning the validity of this 'uplift'. As the SHMA is such a key part of the evidence base underpinning the plan some attempt should be made to resolve the differing views prior to submission, rather than just hiding behind an excuse of commercial sensitivity.

Evidence Base and documents:

I do not understand how the figures for the number of properties required for the Borough have been arrived at. The information from the Strategic Market Housing Assessment [SHMA] belongs to Guildford Borough Council but no explanation has been given as to the calculation of figures or the model used. The assessment and calculation process has not been transparent. These figures, however they were arrived at, are now invalidated by Brexit.

I strongly object to the disproportionate amount of development proposed for the east of the borough, the Horsleys, Wisley, Ockham, Ripley and Send. The proposed developments of A25, A35, A36, A37, A38, A39, A40, A41 and A43
do not respect the character and density of housing in the area, a requirement of The National Planning Policy Framework (NPPF).

Comment ID: pslp17q/175  Respondent: 10846625 / Frank Drennan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Answer: ()

The evidence base is deeply flawed, especially the GL Hearn SHMA. Independent analysis by Neil McDonald of NMSS demonstrates that the SHMA conclusions significantly overestimate future housing need in the HMA, especially within the Guildford area.

The 19 page report by NMSS (a copy of which is attached) shows that an indication of the scale of the problem can be obtained directly from the ONS’s own data. Their estimates of births, deaths and population flows into and out of Guildford suggest that the population should have grown by 15,000 between the 2001 and 2011 censuses. The censuses, however, record a population growth of only 7,800. The discrepancy is over 90% of the population change indicated by the censuses.

The analysis in the NMSS report demonstrates that the errors must be in the population flows in age groups in which there are significant numbers of students. They are almost certainly the result of the under-recording of the numbers of students leaving Guildford each year.

If the projections are based on under-estimates of the number of students leaving the district each year, they will assume that people will be living in the area who will in fact have left. This means that they will over-estimate the likely growth in Guildford’s population. The ONS’s projections envisage that the population will grow by 21,700 between 2015 and 2034. However, if the estimates of past migration flows are adjusted to make them consistent with the census figures, this could fall to 13,000. As a consequence, the demographically-based estimate of the number of homes needed would be 400 homes a year (2015-34), not 580.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Answer: ()
Ref: Guildford Borough Transport Strategy 2017

I am a Guildford resident and a professional transport planner, with a consultancy practice on the Surrey Research Park. Having read the 2017 Borough Transport Strategy, my key comments are as follows:

1. I wholly support the proposed A3 Guildford tunnel as the only satisfactory long-term mitigation of the severe road safety, environmental (air quality, noise and severance) and economic (congestion) impacts associated with the existing A3.
2. I support short term measures to improve safety on the A3 through Guildford, but proper noise mitigation measures (i.e. a complete acoustic fence) should also be implemented to protect residents living near the A3.
3. I strongly support measures to improve sustainable modes of travel in and around Guildford town centre, including the reallocation of space to pedestrians, cycles and buses. Please also encourage more use of car clubs in the town.
4. More short and long stay car parking on the edges of Guildford town centre, combined with restricted vehicle movement in some streets, would reduce unnecessary car trips into the town centre. In principle, I would support a town centre congestion charge/road pricing system.
5. More joined-up cycle routes should be implemented to facilitate cycling within and through town centres, whilst wider routes should be available to the more ambitious cyclist between towns.
6. I am unconvinced by what I have read and heard so far in relation to mitigation of transport impacts arising from the proposed Blackwell Farm allocation, particularly in the absence of an A3 tunnel. If it proceeds, the development needs to be genuinely accessible by non-car modes; lip service will not suffice.

I do not believe the SHMA is sound because it counts overseas university students as permanent residents (their permanent address is given as their term time address - clearly the majority return overseas at the end of their course), these students are also counted as part of international migration; and no adequate adjustment has been made for the discrepancy between the 2011 Census and the population forecasts.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents
Answer: ()

I note that in the Revised Local Plan (“RLP”) that there has been a small reduction in the proposed number of houses to be built on the green belt sites, although in the main the sites themselves continue to be earmarked for development at a level which is totally unsustainable for the existing community. I attended a presentation at Tongham and asked numerous questions to the Council staff (Mr Spooner was not present) and was not given any satisfactory responses. There was no presentation at Sutherland Park and this omission is remarkable considering the impact of the Gosden Hill Farm (“GHF”) on the residents of Burpham, of which I am one. As such a resident I know first-hand the impact of an additional 5,000 vehicles (from 2,000 new houses) on the already clogged-up narrow roads, in particular Clay Lane which
under an additional threat from the Slyfield Regeneration Plan. It is clear that the Council is adopting a plan of “housing first, infrastructure second” as there is no clear plan to ease the traffic other than token gestures such as a new station and park-and-ride (which nobody uses anyway).

I ask that the greenfield sites be removed from the plan, not out of NIMBYism but out of a genuine and deep-seated concern over the effect on the existing community.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

Having lived my entire life as a Surrey Resident I am extremely concerned as to the level and extent of development being proposed for Surrey.

Surrey has always been to me a county of outstanding natural beauty -this needs to remain so.

Surrey has beautiful villages clearly defined by separation by areas of fields & woodlands-this needs to remain so.

The proposal for the developments in and around Ripley & Send and the proposal that they should be removed from the Green Belt will urbanise these villages and in effect will morph both Woking and Guildford together.

Our local services, roads and Doctors Surgery cannot deal with any further increase in development.

Comment ID: SQLP16/1399  Respondent: 10868609 / Robert Lockie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

I object to the fact that at the GBC meeting where the vote was taken to put forward the proposed local plan for consultation, in this enormous document, there were many pages blank where ‘TBA’ was the only thing on the page and
councillors were told that these would be sorted out later (or words to that effect). How can councillors, mainly Conservatives, vote for a proposed plan to be put forward when they did not have full facts at their disposal?

Attached documents:

Comment ID: SQLP16/1400  Respondent: 10868609 / Robert Lockie  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents
Answer: ()

- I object to the lack of evidence that Guilford has a need for the housing numbers proposed and that information about how GBC reached this conclusion is not transparent and the even borough councillors have been refused this information. What on earth is going on that it has to be so secret?
- I object that, along the same lines as above the 2015 SHMA assessment should be called into question. The use of numbers of foreign students has been used to add to housing needs and therefore inflates the number of houses needed. If the population is to grow by the amount predicted then only approximately 8000 homes will be needed and not 13860
- I object because, given the above figure of approximately 8000 homes needed 50% of these could be built on brownfield sites
- I object to the lack of sound evidence for expansion given that the ENLA assessment 2015 shows an 80% reduction in employment space from the previous ENLA of 2013: therefore industrial space at Burnt Common would not be needed

Attached documents:

Comment ID: SQLP16/76  Respondent: 10870305 / Rosalyn Vickery  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents
Answer: (Yes)

I object because there has been no local consultation on the latest plans which are radically different to the ones which were proposed and consulted on in 2014.

I also object because the evidence for the number of houses required has not been published and it appears to have been greatly exaggerated.

I also object because the proposals are for building on greenfield sites rather than the brownfield sites that we know are available.

Attached documents:

Comment ID: SQLP16/3  Respondent: 10871169 / Lynn Durbridge  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents
Answer: (Yes)
I object to the evidence given by the GBC with regard to Send and Ripley, there is no longer a need for more industrial space and the supposed number of houses needed has been greatly exaggerated. In fact the Green belt does not have to be built on at all. there are brownfield sites available, I believe this is being pushed through for purely monetary reasons, not for true need and does not protect the environment. The roads through Send cannot cope as it is, the proposed plan would cause a constant gridlock and would be unmanagable. This new proposal is just that, a new proposal and should be treated as such, and should warrant a full consultation under Regulation 18.

Comment ID: SQLP16/1923  Respondent: 10876897 / Norman and Morag Evans  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

I OBJECT to Guildford Borough Council’s Local Plan on the grounds that it represents serious overdevelopment, is based on inaccurate, unscrutinised housing figures, and means a massive, unacceptable destruction of Green Belt land. It would also require a huge amount of infrastructure and attract thousands of extra vehicles, placing undue pressure on local road networks, as well as causing extra pollution.

Furthermore, it would completely change the character of the borough, harm the environment and seriously damage the quality of life for residents. As our local MP has said, the Plan is ‘not fit for purpose’.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

ADDITIONAL Points

We now have Brexit! We do not need to have a continued frenetic pace for provision of housing.

There needs to be a properly fully considered plan which includes full provision for the necessary infrastructure to be in place at the same time, if not before additional housing is approved. It is not only untenable what is currently proposed, it is also highly irresponsible! It is akin to Tony Blair taking us into a war with Iraq before putting plans into place for what happens AFTER the war. Can we sue Guildford Borough Council or all the individual councillors then? The issues that I can immediately think of, but not limited to, are as follows:

I write with regards to the Horsley’s and Wisley airfield development proposals. I understand you used a consultant to come up with the numbers of housing required which did not provide its model of how they came up with their figures. I also understand that the council increased the consultants figures which is almost 70% higher than the official national estimates for population growth in the Borough. I doubt the veracity of these figures you are basing these proposals on and would ask, in light of the BREXIT vote that you reconsider the long term housing needs for the entire Borough.

Answer: (No)

I object to A43 policy at Garlick's Arch.

this is GREENBELT land and is permanently protected by NPPF to prevent merging of settlements.

This site is new and was not consulted upon previously. GBC have not followed correct process re consultation. They have acted in dishonest, underhand manner and one has to wonder what personal benefits some councillors are incentivised by?

there is no evidence that housing and employment space needed at this site.

if it is required at all in the borough - which it isn't - then Slyfield would be more appropriate site - land surrounding Garlick's Arch and Burnt Common is precious GREENBELT land. There are ancient trees and an abundance of precious wildlife.

A new 4 way interchange onto A3 would be disastrous for Send, Ripley and Guildford. The traffic congestion is already problematic and congested and dangerous in peak travel times. Send and Ripley would become more of a through route than they can already cope with. Living off Burnt Common Lane it can already take too long to get onto Portsmouth Road and this area has a lot of families with young children and a large amount of elderly people. Do GBC and the Planning Department want a tragic accident to occur in order for them to see sense and realise this proposal (A43) could result in loss of life and/or serious injury?

Infrastructure overload is ignored in this proposal and GBC are ignoring the many brownfield sites available - please DO NOT DESTROY WHAT IS LEFT OF OUR GREENBELT,

i hope the planning department will rise above the foolishness of some council members backing this plan and make the logical and wise decision to say NO to policy A43.

Attached documents:

Comment ID: SQLP16/2015  Respondent: 10958817 / Steve Wright  Agent:
If this development continues I will leave Guildford.

Finally, the consultation process is a joke. I tried as much as possible to take an interest and to present my view but there is far too much jargon used by all concerned which is not understood by the public i.e. SHMAR, SANG, Safe guarded land which means the opposite, etc. The council do not want consultation they just seem to want to push through their original ideas without any discussion. I haven’t seen any of the comments raised in the first round be incorporated into the new version of the local plan.

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

I OBJECT to the Proposed Submission Local Plan.

The plan proposed a massive amount of housebuilding in the Borough, which will spoil the countryside and the local villages.

Guildford Borough does not need the level of housing development proposed by this plan. The Strategic Housing Market Assessment (SHMA) is flawed.

I object to the proposals to develop many sites that are currently part of the Green Belt. There are no exceptional circumstances for doing this.

I object to the insetting of the villages within the Borough, especially East and West Horsley.

I have grown up in a village in the Borough and I would like to be able to remain here, but the type of housing that will predominate as a result of this proposed local plan will be out of reach to first-time buyers such as myself.

Answer: (Yes)

I am not happy with the proposed number of new housing units to be built in Guildford, as I do not understand how these figures were calculated. Given the inevitable slowing of the economy due to Brexit, these numbers will also be in need of downgrading. So-called affordable housing is very unaffordable for people trying to get on the housing ladder, any claims that such accommodation is truly affordable are suspect. In fact, should the government not be encouraging growth in the other regions and discouraging it here?

Infrastructure has not been addressed adequately. It should be in place first, and not treated as an afterthought. What about the added in-town congestion that the addition of 13000 new dwellings will bring to an already highly congested...
town centre? From every viewpoint, this plan is flawed and built on absurd assumptions, besides being incomplete in its scope.

Attached documents:

Comment ID: SQLP16/1624  Respondent: 11001249 / Lesley Milton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

It is proposed to upgrade the current A3 junction at Burntcommon to a full 4-way junction. SCC traffic modelling anticipates increased use of Guileshall Lane, Hungry Hill Lane and Tithebarns Lane (all not suitable for increased traffic volume) for traffic accessing the A3 at Burntcommon in order to travel to Guildford and beyond.

The SCC report states that “consequently, it indicates that further thought may have to be given to managing traffic in this area as part of a transport assessment should the development be progressed”.

A local plan when proposing new housing on a substantial scale must surely plan for the implications of increased traffic both on the major roads such as the A3 and the minor village roads. The current draft local plan has not given such issues enough consideration.

Answer: (Yes)

I object as Guildford BC has failed to provide sound evidence in terms of the Employment Land Needs Assessment 2015 (ELNA) This showed that the industrial space at Burn Common is no longer needed. That 13860 new houses are required is also an exaggerated figure. The Green Belt does not need to be built on and 50% of new homes needed could be built instead on brownfield sites. GBC's Transport Assessment was not available to councillors for he vote on 24th May whilst infrastructure overload has received little attention.

Other items

Housing and Employment Need - there seems to be an acceptance by GBC of national policy that population growth should be encouraged and accommodated even in areas such as ours, whereas part of their role is to ensure a comfortable and well ordered environment for existing Guildford residents. This national “obligation” should be challenged, to re-direct population growth and associated industry and commerce to other areas of the UK with less dense populations, thereby encouraging the spread of economic wealth to areas where it is needed.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Answer: ()
Transport

- It is unreasonable to seek approval of a local Plan without clarity on the essential issue of transport and roads infrastructure. The Plan indicates that road improvements will happen, but as some sort of evolving feast as directed by SCC and Highways England. This essential ingredient must be clearly defined for a Plan to be considered properly.

- In particular, the Gosden Hill development and its interaction with the A3 is not realistic. The suggestion of on & off slips to the A3 southbound only is ridiculous, and the alternative proposal by Highways England of a possible multi-direction interchange cannot be left to their discretion and to whether or not some funds can be found (because of course they will not). An integrated A3 multi-direction interchange plan must be part of the developers plan.

- The existing Clay Lane northbound access is just not sufficient, bearing in mind the extra traffic that will be generated by the various proposed housing and commercial developments to the north of the town, as well as Slyfield and Gosden Hill. It should also have some consideration of whether access/egress to Gosden Hill could be via the proposed improved interchange at Burnt Common, avoiding the otherwise inevitable increased congestion in Burpham.

- The current daily gridlock of the Burpham A3 exit slip and London Road seems to have been ignored, as is the gridlock caused every Sunday by the Aldi supermarket launching that week’s new special offers – great for their business but a nightmare for local residents trying to drive in Burpham.

- The proposed changes to the Burpham A3 slip to become 2-way and part of the Sustainable Movement Corridor is farcical! There is no suggestion of any attempt to relieve the current traffic volumes causing the congestion mentioned above (and consequent air pollution), but rather it will be even more congested due to:
  - the thousands per day of Gosden Hill traffic movements coming through London Road Burpham to reach Sainsbury/Aldi and the Northbound A3 access
  - the significant extra traffic movements from the all areas this side of Guildford (incl Slyfield, Merrow, Godalming, Cranleigh and Dorking areas) which will come to Burpham to access the A3 southbound via London Road (to avoid having to crawl through the Boxgrove/Woking Road/Parkway/Ladymead routes to get to the existing A3 Southbound access)
  - the potential massive traffic congestion and pollution in the event of an accident on the A3 southbound, or the new Gosden Hill roundabout or within Burpham itself – there seems to be no contingency for this whatsoever

- I support the Council’s enthusiasm for an A3 tunnel, but this potential traffic solution must also be integrated with the Burpham development plan, as the Burnt Common to A320 section of the A3 must be the likely start point for such a development. This cannot be left to just evolve.

Comment ID: SQLP16/1138   Respondent: 11010401 / J M Bates   Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents
Answer: ()

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.
1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Comment ID: pslp17q/265  Respondent: 11012129 / William Lawrence  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Answer: ()

1. Since the release of the Draft Local Plan there have been substantive changes to borough infrastructure, particularly in relation to Burpham, where traffic volume, flows and future predictions have not been assessed.
2. There has been no accurate assessment of pollution levels, particularly in relation to traffic. Since the release of the Draft Local Plan, Burpham has especially seen a massive increase in HGV use, traffic volume and congestion. There has been no corresponding assessment of the impact of the Gosden Hill Farm development upon this activity and no assessment of present and future pollution levels, particularly in reference to WHO guidelines.
3. There has still been no meaningful assessment of current bio-diversity within the borough nor has there been any assessment of the impact of housing and infrastructure development upon this.
4. There has been no accurate feasibility study for the proposed Sustainable Movement Corridor (Burpham). Recent developments have ignored government guidelines and there in insufficient space for this proposal. This project could not be completed without massive use of compulsory purchase powers. (Which Surrey County Council have categorically stated that they would not use).

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

The need for housing projected over the next few years is far lower than GBC are supposedly making provision for. What you are prosing in effect a 35% increase in housing in two small villages which barely have the facilities and infrastructure to cope with the population as it stands. This is unprecedented and far beyond anything proposed elsewhere in the borough. It is completely unreasonable especially since predicted growth in the area is much nearer 15%.

GBC has voluntarily chosen to pursue a policy of aggressive civic and economic expansion which underpins all of the housing policies in the Local Plan. GBC’s target of a 25% increase in housing stock is entirely down to a political choice made by GBC and well in excess of the official statisticians’ forecasts. Why are GBC pursuing this aggressive house building project when there is no proof of demand?

Attached documents:

Comment ID: SQLP16/775  Respondent: 11032705 / Mike Tarrant  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

I object because GBC have exaggerated the need for the 13,860 house currently in the local plan. A population increase of 20,000 in the plan period would require just 8,000 homes based on 2.5 soles per habitat.

Attached documents:

Comment ID: SQLP16/1639  Respondent: 11036289 / Osman Abdullah  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: (No)

This document omits many important points that are to be addressed at a future stage. The information is, however, very relevant and necessary and without it the document is weak on evidence. The overview given does not assess the capacity of existing supply to accommodate future growth. The paper acknowledges that almost 9% of commercial premises are empty and this somewhat flies in the face of arguments to vastly increase the volume until the reasons are understood. Around 30% of businesses are considering leaving Guildford (congestion being cited as a reason). There are also issues with planning permissions being granted to convert office space to residential, whilst at the same time it is argued that more offices are needed? The contradictions appear to indicate that policies related to this need firming up and that the evidence is incomplete.
I disagree with 40% of land in the town centre being given over to retail as there is no evidence that Guildford will 'buck the national trend' in terms of declining high-street sales, as has been suggested by Cllr Furniss. Guildford urban area ranks no 1 in terms of being the most sustainable location in the borough and, as housing is a priority, there should be more than 1,172 residences in the town centre.

I object to Policy E4 (expansion of the Surrey Research Park into the Blackwell Farm) The existing Research Park has been built at a very low density (25% plot ratio), which is very low for an urban extension. The majority of existing buildings are 2 storeys giving a developed floor space plot ratio of only 12.5%.

The existing Research Park has acres of surface car parking, which provides it with the opportunity to markedly increase its density without infringing any Green Belt land nearby. Any density increase would be cost effective for the use of all existing infrastructure and would also have the potential to match the existing density of the neighbouring academic buildings on the university campus at Manor Park, which is five times higher.

Together with the existing expansion of 14% through existing consents and the opportunity to increase its density, the Research Park has ample capacity to expand to embrace new demand for B1b uses linked to the university, without utilising additional land.

Infrastructure

I object

The infrastructure schedule makes reference to 'improvements' without saying what they are. It includes a junction at the Guildford end of the A31, and another junction at Tongham. No evidence or traffic modelling data is available to demonstrate whether these 'improvements' will indeed improve anything at all given the additional traffic that will be generated by the new developments included in the plan. The Highways Assessment indicates that, even with these 'improvements', the level of congestion on the A3, A31, the B3000 and A25 will leave these roads over capacity and congested.

Constraints should be applied to the housing need/number as a full application of the overinflated number will have a severe detrimental impact on our road network. Smaller housing estates may be more difficult financially, but they would have less impact on infrastructure and could be considered where infrastructure already exists. The borough has many acres of surface car parking which, if replaced by multi-storey versions, and combined with current Brownfield sites, would free up enough land to build housing where it is wanted and needed and not on valuable Green Belt. There would be no need to build high-rise style development in Guildford town, which we don't support, but we do believe that buildings of 6-10 storeys (with underground parking) would be in keeping in some urban areas (where they don’t impinge on important vistas). [Some existing buildings already reach 5-7 levels in height].

The traffic maps omit the area south of Guildford borough completely and the lack of detail about impact on the B3000, a strategic route, is highly questionable, particularly as there are no solutions in place to deal with the impact. I am particularly concerned that, after the main highways routes of M25, A25, and the A320, the B3000 will incur the greatest increase in flow as this road is already close to capacity, with tailbacks at peak times. The road is no longer fit for purpose and modelling shows that developments planned, and the introduction of a new westerly route through Blackwell Farm, will severely worsen the situation, whether major work takes place on the A3, or not.

The Highway Assessment

I OBJECT

The strategic highway assessment requires a great deal more work and hence I OBJECT to the inclusion of this as evidence.

The B3000 runs through Compton, a small village with many listed buildings, most of which are very close to the road. The road already carries in excess of 5 million vehicles a year with average flow rates exceeding most A roads. It is the only settlement area in the borough where pollution levels exceed EU regulations and it is close to capacity now, with tailbacks at peak times, which add to the pollution problem. [see legal section]
The study is highly misleading. It refers to a figure of zero additional traffic from scenario 3, which includes the traffic from the strategic sites, one of which is partly in Compton. The assessment does not make it clear that the modelling is extremely limited and only includes impact on developments within the immediate area. Blackwell Farm is excluded from Area 107 (part of Compton) as false boundaries have been set. I believe that the impact from the strategic sites will be far-reaching and will most certainly impact Compton and beyond. Each village needs to be able to see the impact that development will have.

The Highways Assessment concentrates on peak time traffic only and gives no indication of overall volume increases or traffic type using specific routes outside peak hours. Understanding of the overall increase is important, as there is a bridge on the B3000 between Artington and Compton, which has a width restriction and may also require a weight restriction as it needs replacing within the next 2 years and no funding has been set aside for this. Instead Network Rail, SCC, GBC and Waverley BC continue to battle over responsibility for, and scope of, the project.

It appears that traffic data has been collected at different times of the year and over varying time scales in order to provide averages. This method of data collection can underestimate measurements by at least 30%.

Furthermore, I have been told that the person responsible for ratifying traffic data at Surrey County Council (SCC) has been off sick for over a year and that, whilst the daily data boxes continue to collect data, that data has not been collected or analysed for 2015. The data put forward for Compton's B3000 was based on a 3-week period in January and, as this was not representative, we understand it was removed. That said, the year-on-year data is for different periods and different times, varying from a few weeks in winter to longer periods over many months. I would like a more robust approach to traffic data collation.

The cumulative effect of the additional traffic generated by the developments in the proposed submission Local Plan will be to increase congestion, even with the proposed highway improvement schemes in place. More detailed analysis of the junctions and queuing is required. We question the conclusion that the developments would have an acceptable impact on the capacity of the highway networks in terms of the policy test set in paragraph 32 of NPPF. We do not believe that the impact on the B3000 will be acceptable, as it is already operating beyond capacity, and this situation will be made much worse following the mitigation proposed for the A3.

The Highways Assessment is limited to 30 results. Roads have been omitted from the report and it is unclear whether findings for the B3000 (also referred to as The Street B3000) are in fact from the Street or the roundabout from which there is a feeder road to Godalming via Priorsfield Road.

The table comparing scenarios and the impact on traffic is difficult to decipher. Scenario 1 includes current planning permissions plus Waverley's strategic sites. This shows an increase of just 9 vehicles per hour at peak times on the B3000. The next scenario 2 is the same, but includes GBC's strategic sites. Given that there is a strategic site in Compton of 1,800 homes and another of 1,000 at Normandy, the expectation would be for the volume to be not only higher, but considerably higher. The result is however, ZERO. We understand that this is because the impact measured is only from the immediate area and, as Blackwell Farm has been removed from the village for modelling terms, this does not give a realistic result. The omission of the Town Centre Master Plan and its impact on the roads further diminishes the integrity of this Highways Assessment.

Even without the full impact being understood, it is clear from the scale of development on the west of Guildford (1,800 homes at Blackwell Farm, 1,000 homes at Normandy, 1,300 homes at Ash, 3,800 homes in the Aldershot urban area, 1,200 homes at Borden) that the increase in traffic on the B3000 and other main routes would be severe.

The Highways Assessment shows that as a result of the proposals put forward in this draft of the Local Plan the B3000 will suffer the highest increase in flow rates at peak times (after the M25, A320 and A25. It also reveals that traffic flows would increase if the A3 was widened, as the A3 would then attract more traffic via the B3000. Despite this, there are no solutions planned to mitigate the situation and we are therefore strongly objecting to the level of development and in particular strategic development at Blackwell Farm as outlined in the Local Plan.

The proposal to introduce a new route to Guildford town centre from the west via Blackwell Farm has been ill thought out. The volume of traffic that will use this new ‘rat run’ through the new development and the university campus/business park, has been underestimated. There will be problems for traffic wishing to exit the new development in both

Section page number 159 of 321
Document page number 160
directions during peak hours - traffic is frequently queueing for miles along the A31, and the Tesco roundabout is one of the worst bottlenecks in Guildford. The knock-on effect on the Egerton Road/Gill Avenue junction would impede emergency vehicles getting to and from the hospital.

The 4-way junction on the A31 has no detail at all and the concern is that permission in principle will be given to the site in the hope that these problems are surmountable. If they are insurmountable, which I believe they are, then enormous amounts of Green Belt land within the setting of the Surrey Hills AONB will have been sacrificed for nothing. The 4-way junction, if it goes ahead, is likely to be huge and, due to its elevated position, will cause significant harm to the AONB in terms of landscape and light pollution.

The Highways Assessment has many limitations, not least being the absence of the Town Centre Master Plan, which includes potential road closure and re-routing. Compton is likely to be very much affected by any reduction in road capacity in the town centre and it is important that we are presented with the whole the picture.

The Assessment acknowledges that not all impacts of proposed Blackwell Farm development have been modelled and that, due to the emphasis on the A31 and the A3, not all roads were included.

The report concludes that the improvements to the A3 are necessary to maintain adequate flow rates on the strategic network. Further work is needed to determine what impact any widening or junction improvements will have on local roads, and what will be done to mitigate against the increased flows through Compton, particularly given that a section of the B3000 though the Village is anticipated to become an Air Quality Management Area. GBC has resisted requests by members of the PC to have the northern end of The Street made an AQMA, but readings of nitrous oxide in this area are well above EU legal limits.

There is little information about the tunnel but the map indicates that one access / egress point will be in Compton near the A3, although no land has been safeguarded for this purpose. This is likely to have the same impact as the improvements to the A3, i.e. increased traffic (and pollution) through Compton.

The Spatial Hierarchy

The spatial hierarchy, which outlines Guildford's preferred strategy, does not match up with the proposed plan. The hierarchy places Brownfield sites (including those on Green Belt) as a priority, but the Plan has 66% of development on Greenbelt and only 34% on Brownfield. The hierarchy lists Guildford town and urban areas as a priority followed by inset villages and identified Green Belt villages. A relatively small percentage of housing is allocated for Guildford town (the most sustainable location) and Green Belt areas, such as Blackwell Farm, with high sensitivity have been classified as within the 'Guildford urban area' when they are in fact in the open countryside. We are told that only 1.6% of the 89% Green Belt has been earmarked for removal and that the 6% removed via insetting doesn't count as these villages are already developed. If this is the case, why list them in 4.1.16 of policy s2 - Spatial Strategy?

4.18 The preferred options cannot accommodate all that Guildford 'needs'. This is untrue. Two specialist consultants have independently critiqued the OAN and both question the level of uplift and the use of ONS data without full correction for changes and anomalies. They refer to 'double accounting' as the uplift is introduced at several stages and the assumptions that result in the final OAN are not explained. See comments on Strategic Housing Market Assessment (SHMA).

Strategic Housing Market Assessment (SHMA)

I Object

The “objectively assessed need” figure of 693 homes a year is too high.

A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the SHMA method should be changed to consider student housing need separately due to the distorting effects of students on the figures.

The current SHMA inflates the proposed housing figure due to:

- failure to correct for errors in the historical data for international migration flows,
• issues with the way it considers students and affordability, and
• flaws in the method for estimating the number of homes needed to support job growth.

It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

Two additional reviews of the SHMA reach similar conclusions, one having been produced by CPRE and the other by Cllr. David Reeve.

The Land Assessment

I object

The exclusion of sites of 5 dwellings or fewer from the list might make administration easier, but the addition of these sites plus windfalls and outstanding (but current) permissions gives rise to a higher number of dwellings than is actually needed. There is therefore no justification for release of all the Green Belt put forward.

The criteria used to include or exclude sites because of this study lack consistency, with many sites excluded as 'unsuitable' with no further explanation offered (many of which were in the urban area of Ash). The assessment lacks objectivity and detail.

Green Belt & Countryside Study

I object

GBC’s Green Belt & Countryside Study does not value appropriately the “fundamental aim” of Metropolitan Green Belt or look strategically at options for developing in major settlement areas beyond the Green Belt. It is pointless for London to apply constraints to protect its Green Belt if areas within it, such as Guildford, choose to ignore this option. It is the same Green Belt and serves the same purposes, all of which are acutely valuable.

The way Green Belt is parcelled up and scored is invalid: serving 2 Green Belt functions well is as legitimate as serving 3 to 5 functions less effectively. The Green Belt sensitivity analysis is not a valid basis for informing decisions. This method also omits purpose one, on the basis that all Green Belt sites encourage regeneration of urban sites. This should not be excluded for it is valid and could even be argued to be particularly valid in areas close to the town. Boundaries used for Blackwell Farm were neither permanent nor defensible.

Proposed removal from the Green Belt of a number of relatively small sites where development of an exceptional nature has taken place, plus adjoining land, has lost sight of the scale at which Green Belt is effective.

Assessment of which villages to take out of the Green Belt does not adequately consider that villages contribute to the openness of the Green Belt, as seen from surrounding AONB.

A key principle of Green Belt is its permanence. The University Consultants stated this 13 years ago when seeking permission to take Manor Farm out of the Green Belt to create Manor Park. They reassured residents that the boundary would not be frequently moved and that Blackwell Farm would be opened up to the public for “informal recreation”. The same Consultant has now repeated this promise in putting forward the University plans to develop on Blackwell Farm, saying that the new boundary would be permanent for at least 25 years!

Comment ID: SQLP16/1644  Respondent: 11036289 / Osman Abdullah  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents
Answer: ()
Key parts of the evidence are still missing, flawed or based on withheld assumptions. The Strategic Housing Market Assessment overstates need, the Green Belt and Countryside Study uses a flawed approach, and the Transport Assessment is too late and incomplete to be relied upon to inform the Plan.

The Plan excludes the Town Centre Master Plan, which plays a pivotal role and fails to address the results of infrastructure difficulties, or use these and Greenbelt to constrain the level of development.

Specifically:

I OBJECT to the fact that GBC has made major changes to the Plan which require another full consultation under Regulation 18 - not trying to get out of that full consultation by use of Regulation 19. This not only invalidates the whole process - but makes a mockery of it.

I OBJECT to the lack of Evidence supporting GBC Strategic Housing Market Assessment 2015 which is highly questionable and for which GBC has consistently refused to provide details of its calculations despite several requests to do so. I believe that the requirement for 13,860 new homes in the Borough is exaggerated - and even if the population were to grow by 20,000, based on an average family size of 2.5 persons in each home, the need would only be 8000. It would appear that the number of foreign students has been wrongly used to inflate the population need. The Green Belt does not need to be built over to meet that need when 50% of the 13,860 new homes stated as needed could be built on existing Brownfield Sites. GBC's Transport Assessment was not even available to Councillors when the vote on the New Local Plan was put to them on 25th May which again questions the objectivity and competence of GBC and its Planners.

I am writing to formally object to the Guildford Local Plan.

Firstly, the basis on which the target number of new houses is unclear. I have seen no evidence that the assumptions in the Strategic Housing Market Assessment (SHMA) have been challenged or validated in any transparent way. Moreover, in our new context of much reduced expectations for growth following the decision to leave the EU the assumptions in the SHMA need to be revisited.

Comment ID: SQLP16/1107  Respondent: 11041121 / Catherine Dean  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

Question 1: Evidence Base. I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

• The evidence base documents take no account of the radically changed environment and outlook following the BREXIT referendum. This is hardly the fault of the Council but is nevertheless a serious flaw and requires a re-evaluation of the strategic context.
• The Transport Assessment was published at the same time as the Plan leaving little time for study and analysis. The projections contained appear to be quite inadequate in that 1) they average congestion over 3-hour time bands, which materially reducing the impact of congestion and 2) they do not model junctions.
• The “Assessment” shows that congestion will worsen significantly over the period of the Plan even if all the proposed and aspirational infrastructure is built.
• The Strategic Housing Market Need (SHMA) attempts to justify an Objective Assessed Need (OAN) based on a very aggressive desire for economic growth in the borough. No case is made that such growth is sustainable. The assumptions and estimates are opaque and have not been adequately scrutinized by Councillors. Consequently people have to take on trust the work of a consultant. In any case, political events have overtaken the SHMA.

The number and complexity of the documents in the evidence base make reading, understanding, analysis and assimilation extremely difficult.

Questions from GBC

24.A. Question 1: The evidence base and submission documents
The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence. The evidence base documents contributing to the preparation of the plan are listed in Appendix D and can be found on our website (links open in a new window).

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

**ANSWER**

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

**Answer:** (No)

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

2. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Answer: ()

The information in the draft plan and it’s size may seem too complicated for many individuals to take in but that does not stop ‘us’ understanding the overall policies that you are putting forward. One wonders about the qualifications and experience of the people who have put this plan together. What expertise and experience do they have? What local knowledge have they digested? The fact the Wisley site is still included in the draft Local Plan makes one question the whole ethos of the GBC Executive. The councilors unanimously decided on 14 counts that the site was unsuitable and yet it is still in this local plan.

**Answer:** (No)

- The arithmetic behind the housing numbers in the SHMA remains a complete mystery and can’t be tested by either the public or the government because the council refuses to reveal it. The mistakes in the SHMA have been amply explained in at least 2 independent studies which the inspector will have seen, but the SHMA methodology is still taken by the council to produce an “objective” housing number assessment. This has been lifted wholesale into the plan as a policy proposal, when it is merely part of the evidence base and should be assessed and debated critically and transparently. I suspect this would produce a target about 60% lower than the 12,000+ proposed and would immediately solve a lot of objections about building on the green belt etc. I also don’t think the inspector should trust the figures as a fixed target, given the council’s contradictory noises about how development will be phased and infrastructure and other constraints applied. This leaves the final housing number so up in the air as to render this part of the plan useless as a practical policy tool for officers responsible for day-to-day planning. No-one knows for sure what number the council is heading towards or how this aligns with public opinion or government policy. This cannot be deemed “sound”.

1. Questions posed by Guildford Borough Council as part of its consultation.

Questions from GBC

24.A. Question 1: The evidence base and submission documents

The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence. The evidence base documents contributing to the preparation of the plan are listed in Appendix D and can be found on our website (links open in a new window).

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

**ANSWER**

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.
1. The Proposed Submission Local Plan includes the statement “We will continue to protect the Metropolitan Green Belt” however GBC appears to be in breach of this same policy as some 65% of developments will be made on land that is currently Green Belt.

2. I do not agree with the scale of the house building programme which is being proposed by GBC. The target outlined represents a 25% increase in the housing stock of the borough. The Office of National Statistics projects a population increase of some 15% for Guildford Borough over this same period.

3. I am also concerned that the infrastructure proposals are inadequate even to meet the needs of what is there at the moment, let alone the proposed developments in the Local Plan.

I therefore OBJECT to the Proposed Submission Local Plan.

Attached documents:  letter gbc 290616.doc (26 KB)

Key parts of the evidence are still missing, flawed or based on withheld assumptions. The Strategic Housing Market Assessment overstates need, the Green Belt and Countryside Study uses a flawed approach, and the Transport Assessment is too late and incomplete to be relied upon to inform the Plan.

The Plan excludes the Town Centre Master Plan, which plays a pivotal role and fails to address the results of infrastructure difficulties, or use these and Greenbelt to constrain the level of development.

The Employment Land Needs Assessment

I object
This document omits many important points that are to be addressed at a future stage. The information is, however, very relevant and necessary and without it the document is weak on evidence. The overview given does not assess the capacity of existing supply to accommodate future growth. The paper acknowledges that almost 9% of commercial premises are empty and this somewhat flies in the face of arguments to vastly increase the volume until the reasons are understood. Around 30% of businesses are considering leaving Guildford (congestion being cited as a reason). There are also issues with planning permissions being granted to convert office space to residential, whilst at the same time it is argued that more offices are needed? The contradictions appear to indicate that policies related to this need firming up and that the evidence is incomplete.

I disagree with 40% of land in the town centre being given over to retail as there is no evidence that Guildford will 'buck the national trend' in terms of declining high-street sales, as has been suggested by Cllr Furniss. Guildford urban area ranks no 1 in terms of being the most sustainable location in the borough and, as housing is a priority, there should be more than 1,172 residences in the town centre.

I object to Policy E4 (expansion of the Surrey Research Park into the Blackwell Farm) The existing Research Park has been built at a very low density (25% plot ratio), which is very low for an urban extension. The majority of existing buildings are 2 storeys giving a developed floor space plot ratio of only 12.5%.

The existing Research Park has acres of surface car parking, which provides it with the opportunity to markedly increase its density without infringing any Green Belt land nearby. Any density increase would be cost effective for the use of all existing infrastructure and would also have the potential to match the existing density of the neighbouring academic buildings on the university campus at Manor Park, which is five times higher.

Together with the existing expansion of 14% through existing consents and the opportunity to increase its density, the Research Park has ample capacity to expand to embrace new demand for B1b uses linked to the university, without utilising additional land.

**Infrastructure**

**I object**

The infrastructure schedule makes reference to 'improvements' without saying what they are. It includes a junction at the Guildford end of the A31, and another junction at Tongham. No evidence or traffic modelling data is available to demonstrate whether these 'improvements' will indeed improve anything at all given the additional traffic that will be generated by the new developments included in the plan. The Highways Assessment indicates that, even with these 'improvements', the level of congestion on the A3, A31, the B3000 and A25 will leave these roads over capacity and congested.

Constraints should be applied to the housing need/number as a full application of the overinflated number will have a severe detrimental impact on our road network. Smaller housing estates may be more difficult financially, but they would have less impact on infrastructure and could be considered where infrastructure already exists. The borough has many acres of surface car parking which, if replaced by multi-storey versions, and combined with current Brownfield sites, would free up enough land to build housing where it is wanted and needed and not on valuable Green Belt. There would be no need to build high-rise style development in Guildford town, which we don't support, but we do believe that buildings of 6-10 storeys (with underground parking) would be in keeping in some urban areas (where they don’t impinge on important vistas). [Some existing buildings already reach 5-7 levels in height].

The traffic maps omit the area south of Guildford borough completely and the lack of detail about impact on the B3000, a strategic route, is highly questionable, particularly as there are no solutions in place to deal with the impact. I am particularly concerned that, after the main highways routes of M25, A25, and the A320, the B3000 will incur the greatest increase in flow as this road is already close to capacity, with tailbacks at peak times. The road is no longer fit for purpose and modelling shows that developments planned, and the introduction of a new westerly route through Blackwell Farm, will severely worsen the situation, whether major work takes place on the A3, or not.

**The Highway Assessment**
I OBJECT

The strategic highway assessment requires a great deal more work and hence I OBJECT to the inclusion of this as evidence.

The B3000 runs through Compton, a small village with many listed buildings, most of which are very close to the road. The road already carries in excess of 5 million vehicles a year with average flow rates exceeding most A roads. It is the only settlement area in the borough where pollution levels exceed EU regulations and it is close to capacity now, with tailbacks at peak times, which add to the pollution problem. [see legal section]

The study is highly misleading. It refers to a figure of zero additional traffic from scenario 3, which includes the traffic from the strategic sites, one of which is partly in Compton. The assessment does not make it clear that the modelling is extremely limited and only includes impact on developments within the immediate area. Blackwell Farm is excluded from Area 107 (part of Compton) as false boundaries have been set. I believe that the impact from the strategic sites will be far-reaching and will most certainly impact Compton and beyond. Each village needs to be able to see the impact that development will have.

The Highways Assessment concentrates on peak time traffic only and gives no indication of overall volume increases or traffic type using specific routes outside peak hours. Understanding of the overall increase is important, as there is a bridge on the B3000 between Artington and Compton, which has a width restriction and may also require a weight restriction as it needs replacing within the next 2 years and no funding has been set aside for this. Instead Network Rail, SCC, GBC and Waverley BC continue to battle over responsibility for, and scope of, the project.

It appears that traffic data has been collected at different times of the year and over varying time scales in order to provide averages. This method of data collection can underestimate measurements by at least 30%.

Furthermore, I have been told that the person responsible for ratifying traffic data at Surrey County Council (SCC) has been off sick for over a year and that, whilst the daily data boxes continue to collect data, that data has not been collected or analysed for 2015. The data put forward for Compton's B3000 was based on a 3-week period in January and, as this was not representative, we understand it was removed. That said, the year-on-year data is for different periods and different times, varying from a few weeks in winter to longer periods over many months. I would like a more robust approach to traffic data collation.

The cumulative effect of the additional traffic generated by the developments in the proposed submission Local Plan will be to increase congestion, even with the proposed highway improvement schemes in place. More detailed analysis of the junctions and queuing is required. We question the conclusion that the developments would have an acceptable impact on the capacity of the highway networks in terms of the policy test set in paragraph 32 of NPPF'. We do not believe that the impact on the B3000 will be acceptable, as it is already operating beyond capacity, and this situation will be made much worse following the mitigation proposed for the A3.

The Highways Assessment is limited to 30 results. Roads have been omitted from the report and it is unclear whether findings for the B3000 (also referred to as The Street B3000) are in fact from the Street or the roundabout from which there is a feeder road to Godalming via Priorsfield Road.

The table comparing scenarios and the impact on traffic is difficult to decipher. Scenario 1 includes current planning permissions plus Waverley's strategic sites. This shows an increase of just 9 vehicles per hour at peak times on the B3000. The next scenario 2 is the same, but includes GBC's strategic sites. Given that there is a strategic site in Compton of 1,800 homes and another of 1,000 at Normandy, the expectation would be for the volume to be not only higher, but considerably higher. The result is however, ZERO. We understand that this is because the impact measured is only from the immediate area and, as Blackwell Farm has been removed from the village for modelling terms, this does not give a realistic result. The omission of the Town Centre Master Plan and its impact on the roads further diminishes the integrity of this Highways Assessment.

Even without the full impact being understood, it is clear from the scale of development on the west of Guildford (1,800 homes at Blackwell Farm, 1,000 homes at Normandy, 1,300 homes at Ash, 3,800 homes in the Aldershot urban area, 1,200 homes at Borden) that the increase in traffic on the B3000 and other main routes would be severe.
The Highways Assessment shows that as a result of the proposals put forward in this draft of the Local Plan the B3000 will suffer the highest increase in flow rates at peak times (after the M25, A320 and A25. It also reveals that traffic flows would increase if the A3 was widened, as the A3 would then attract more traffic via the B3000. Despite this, there are no solutions planned to mitigate the situation and we are therefore strongly objecting to the level of development and in particular strategic development at Blackwell Farm as outlined in the Local Plan.

The proposal to introduce a new route to Guildford town centre from the west via Blackwell Farm has been ill thought out. The volume of traffic that will use this new ‘rat run’ through the new development and the university campus/business park, has been underestimated. There will be problems for traffic wishing to exit the new development in both directions during peak hours - traffic is frequently queueing for miles along the A31, and the Tesco roundabout is one of the worst bottlenecks in Guildford. The knock-on effect on the Egerton Road/Gill Avenue junction would impede emergency vehicles getting to and from the hospital.

The Highways Assessment has many limitations, not least being the absence of the Town Centre Master Plan, which includes potential road closure and re-routing. Compton is likely to be very much affected by any reduction in road capacity in the town centre and it is important that we are presented with the whole the picture.

The Assessment acknowledges that not all impacts of proposed Blackwell Farm development have been modelled and that, due to the emphasis on the A31 and the A3, not all roads were included.

The report concludes that the improvements to the A3 are necessary to maintain adequate flow rates on the strategic network. Further work is needed to determine what impact any widening or junction improvements will have on local roads, and what will be done to mitigate against the increased flows through Compton, particularly given that a section of the B3000 though the Village is anticipated to become an Air Quality Management Area. GBC has resisted requests by members of the PC to have the northern end of The Street made an AQMA, but readings of nitrous oxide in this area are well above EU legal limits.

There is little information about the tunnel but the map indicates that one access / egress point will be in Compton near the A3, although no land has been safeguarded for this purpose. This is likely to have the same impact as the improvements to the A3, i.e. increased traffic (and pollution) through Compton.

**The Spatial Hierarchy**

The spatial hierarchy, which outlines Guildford's preferred strategy, does not match up with the proposed plan. The hierarchy places Brownfield sites (including those on Green Belt) as a priority, but the Plan has 66% of development on Greenbelt and only 34% on Brownfield. The hierarchy lists Guildford town and urban areas as a priority followed by inset villages and identified Green Belt villages. A relatively small percentage of housing is allocated for Guildford town (the most sustainable location) and Green Belt areas, such as Blackwell Farm, with high sensitivity have been classified as within the 'Guildford urban area' when they are in fact in the open countryside. We are told that only 1.6% of the 89% Green Belt has been earmarked for removal and that the 6% removed via insetting doesn't count as these villages are already developed. If this is the case, why list them in 4.1.16 of policy s2 - Spatial Strategy?

4.18 The preferred options cannot accommodate all that Guildford 'needs'. This is untrue. Two specialist consultants have independently critiqued the OAN and both question the level of uplift and the use of ONS data without full correction for changes and anomalies. They refer to 'double accounting' as the uplift is introduced at several stages and the assumptions that result in the final OAN are not explained. See comments on Strategic Housing Market Assessment (SHMA).

**Strategic Housing Market Assessment (SHMA)**

I Object
The “objectively assessed need” figure of 693 homes a year is too high.

A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the SHMA method should be changed to consider student housing need separately due to the distorting effects of students on the figures.

The current SHMA inflates the proposed housing figure due to:

- failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability, and
- flaws in the method for estimating the number of homes needed to support job growth.

It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

Two additional reviews of the SHMA reach similar conclusions, one having been produced by CPRE and the other by Cllr. David Reeve.

**The Land Assessment**

I object

The exclusion of sites of 5 dwellings or fewer from the list might make administration easier, but the addition of these sites plus windfalls and outstanding (but current) permissions gives rise to a higher number of dwellings than is actually needed. There is therefore no justification for release of all the Green Belt put forward.

The criteria used to include or exclude sites because of this study lack consistency, with many sites excluded as 'unsuitable' with no further explanation offered (many of which were in the urban area of Ash). The assessment lacks objectivity and detail.

**Green Belt & Countryside Study**

I object

GBC’s Green Belt & Countryside Study does **not value appropriately the “fundamental aim”** of Metropolitan Green Belt or look strategically at options for developing in major settlement areas beyond the Green Belt. It is pointless for London to apply constraints to protect its Green Belt if areas within it, such as Guildford, choose to ignore this option. It is the same Green Belt and serves the same purposes, all of which are acutely valuable.

The way Green Belt is parcelled up and scored is invalid: serving 2 Green Belt functions well is as legitimate as serving 3 to 5 functions less effectively. The Green Belt sensitivity analysis is not a valid basis for informing decisions. This method also omits purpose one, on the basis that all Green Belt sites encourage regeneration of urban sites. This should not be excluded for it is valid and could even be argued to be particularly valid in areas close to the town. Boundaries used for Blackwell Farm were neither permanent nor defensible.

Proposed removal from the Green Belt of a number of relatively small sites where development of an exceptional nature has taken place, plus adjoining land, has lost sight of the scale at which Green Belt is effective.

Assessment of which villages to take out of the Green Belt does not adequately consider that villages contribute to the openness of the Green Belt, as seen from surrounding AONB.

A key principle of Green Belt is its permanence. The University Consultants stated this 13 years ago when seeking permission to take Manor Farm out of the Green Belt to create Manor Park. They reassured residents that the boundary would not be frequently moved and that Blackwell Farm would be opened up to the public for “informal recreation”. The same Consultant has now repeated this promise in putting forward the University plans to develop on Blackwell Farm, saying that the new boundary would be permanent for at least 25 years!
I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Refer to the accompanying separate representation submission letter dated 15th July 2016 for details.

ASSIGNMENT OF COPYRIGHT
18.1. The Service Provider hereby assigns to the Council all vested contingent and future rights of copyright and all rights in the nature of copyright and all accrued rights of action and all other rights of whatever nature in and to the reports (which shall include all plans drawings documents (writte and electronic) and presentation material and all other material
capable of being subject to copyright produced by the Service Provider in the course of undertaking the Service for the Council) prepared under the terms of the Contract whether now known or in the future created to which the Service Provider is now or may at any time after the date of the Contract be entitled by virtue of or pursuant to any of the laws in force in each and every part of the world.”

As a consequence of this and since the report and various findings represents a very large proportion of the local plan, the entire proposed GBC Local Plan 2017 as amended, is in my view fatally flawed and should be thrown out. Additionally, if were to consider the so called ‘evidence base’ contained in the proposals in this plan, they are contrary to a large portion of the National Planning Policy Framework (NPPF) particulary applying to the Green Belt and proposals for development and change including the disgraceful proposals (original and amended) concerning unapproved boundary changes and ‘insetting’ designed to allow as much development on the Green Belt as possible.

As an example of how the Green Belt including openness should be protected from inappropriate development, there is a recent High Court judgment in the case of R (Boot) v Elmbridge Borough Council [2017] EWHC 12 (Admin) which provides useful clarification on the approach that local planning authorities should take when applying paragraph 89 of the National Planning policy Framework (NPPF) to applications for development within the Green Belt.

This case concerned a proposal to build a new sports centre which local residents where concerned was inappropriate and would harm the openness of the Green Belt. The details are reproduced here:

The claimant argued that if a new sports facility caused harm to the openness of the Green Belt - even limited harm - it was not appropriate development. Mr Justice Supperstone ruled that the first ground had been made out. The judge said the conclusion of the council that the proposal had a “limited adverse impact on openness” of the Green Belt was not a finding that there had been compliance with the policy that required openness to be preserved. “Accordingly even if the adverse impact referred to at para 95 of the OR [officer’s report] is acceptable for the purposes of DM17 [the council’s development plan policy – Green Belt (Development and New Buildings)], it is not acceptable for the purposes of para 89 of the NPPF,” he said.

The judge also accepted counsel for the claimant’s submissions that West Lancashire Borough Council v SSCLG [2009] EWHC 3631 established that if “a proposal has an adverse impact on openness, the ‘inevitable conclusion’ (see para 22 of the judgment) is that it does not comply with a policy that requires openness to be maintained. A decision maker does not have "any latitude" to find otherwise, based on the extent of the impact.”

In the present case, Mr Justice Supperstone said, the defendant council “concluded that there was an adverse impact on openness, but nevertheless granted permission without giving consideration to whether under paras 87 and 88 of the NPPF there were very special circumstances that would justify it.” The High Court judge rejected the second ground of challenge, saying the two proposals were materially dissimilar. The development of a sports centre is not materially dissimilar to building houses and other buildings in the Green Belt and in no way could it be said that such housing development would not harm the Green Belt.

The GBC Local Plan 2017 in its original form and as amended, is contrary to the following NPPF guidelines:
NPPF planning guideline Paragraph 79; NPPF planning guideline Paragraph 80; NPPF planning guideline Paragraph 81; NPPF planning guideline Paragraph 82; NPPF planning guideline Paragraph 83;
NPPF planning guideline Paragraph 84; NPPF planning guideline Paragraph 85; NPPF planning guideline Paragraph 86; NPPF planning guideline Paragraph 87; NPPF planning guideline Paragraph 88; NPPF planning guideline Paragraph 89; NPPF planning guideline Paragraph 90; NPPF planning guideline Paragraph 91; NPPF planning guideline Paragraph 92; and NPPF planning guideline Paragraph 109.

In addition, I object to policies: A25; A26; A27; A28; A29; A32; A35; A37; A38; A39; A40; A42; A43; A44; A58; A49; A55; A56; A57 on the grounds that all these sites earmarked for development and change detailed on the plans and diagrams, are either Green Belt, green farmland, ANOBs, or wrongly designated as urban land when they clearly are not.

The corresponding proposed housing requirements and all related infrastructure including roads; water; gas; sewerage; refuse collection and treatment and telecommunications assessments etc, are hopelessly flawed, inaccurate and in some
cases missing. Additionally, the ‘evidence base’ consisting of thousands of pages of closely written text and graphs/diagrams is so completely incomprehensible to many ordinary people, that most will not even attempt to read or understand it.

It seems to me that real evidence is mistaken for wildly inaccurate assumptions and projections. One might perhaps conclude that this could appear to be a deliberate policy to avoid proper scrutiny, but I am sure this is very unlikely.

In conclusion it is my opinion that the scale and size of development and change as proposed in the Guildford Local Plan is breathtakingly inappropriate and would irrevocably change the whole character and environment of Guildford. Such a plan if approved would allow several ‘medium sized towns’ to be built in the villages and Green Belt areas of the borough. The desire to increase house building and development is not an exceptional or valid reason to build on and destroy the Green Belt land. This has been stated many times in the NPPF and confirmed by several recent legal judgements.

I urge GBC to listen to and heed the views of local people as required by the localism act and reject this ill-conceived and highly damaging proposed local plan.

Comment ID: SQLP16/1859  Respondent: 12316001 / Vail Williams LLP (Jane Terry)  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents  
Answer: ()

The following representations are made to the Proposed Submission Plan accordingly:

Question 1: The Evidence Base and Submission Documents

Do you agree that the evidence used for the draft Local Plan: Strategy and Sites is adequate, up-to-date and relevant?

No.

We do not consider that the Green Belt and Countryside Study has adequately assessed the Potential Development Areas (PDA’s) it identified in relation to how those PDA’s fulfilled their greenbelt purposes. The Council has carried out Greenbelt purpose assessments on the larger land parcels and has placed an over reliance on these assessments to inform their spatial strategy. As a result the Council has removed many of the more Sustainable village infill sites between the Reg 18 and Reg 19 draft based on what land parcel they happen to fall within.

The Land Availability Assessment (LAA) has a list of sites that it has discounted for various reasons. There seem to be only two sites on that list that have been considered and discounted as potential dedicated Custom and Self Build sites. We do not feel this is an adequate amount of sites considered.

Attached documents:

Comment ID: SQLP16/1901  Respondent: 12316001 / Vail Williams LLP (Jane Terry)  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents  
Answer: ()

No.
We do not consider that the Infrastructure Deliver Plan is adequate in relation to the provision of suitable or sufficient SANG.

No.

The accompanying report points to shortcomings in the Green Belt & Countryside Study as a basis for reviewing Green Belt boundaries and identifying appropriate allocations to meet the objectively assessed need for housing throughout the plan period.

The Land Availability Assessment is not based on a consistent rate of housing delivery that reflects housing requirements and shows a shortfall in housing land supply in the early years of the plan, including the absence of a five-year supply of housing land.

Please refer to the Turley letter dated 18 July 2016 submitted on behalf of Hermes for detailed comments.

The letter is uploaded under Question 7 of the Consultation Questionnaire.

The letter addresses concerns relating to the following evidence base documents:

- Guildford Borough ‘Land Availability Assessment (LAA)’ dated February 201
- Guildford Borough Strategic Flood Risk Assessment January 2016
- Sustainability Appraisal of the Guildford Borough Local Plan carried out by Aecom
- Guildford Borough Council Flood Risk Sequential and Exception Test document, May 2016

**Attached documents:**

- HERL2015_LT_180716_Representation_Letter_to_Draft_Local_Plan_on_behalf_of_Hermes.pdf (95 KB)
- HERL2015_Representation_of_behalf_of_Hermes_WaterCo_Flood_Risk_Assessment_w10122160718FRA.pdf (4.2 MB)
The Guildford Vision Group, a group of concerned residents with very relevant commercial and professional experience, was established four years ago to press for reinvigoration of the town centre. Specifically we have called for six objectives:

1. Wider pedestrianisation of the town centre
2. Exciting new public space along a reinvigorated riverside
3. Redirection of vehicle traffic away from the centre
4. An integrated transport hub and interchange around the rail station
5. New town centre housing
6. A new and better East-West link

We are thus disappointed by the lack of real ambition and aspiration in the Local Plan in respect of the town centre. There are no substantial coordinated policies or strategies in the Local Plan that will achieve the six objectives above. These objectives have received wide public support, as recognised by:

- Our 2013 document ‘Guildford on the Way’, a Vision for Guildford in 2030 (attached) as articulated by members of the public, Guildford residents and our members
- Comments and feedback from our public meetings over the past four years that have regularly attracted audiences of 200 and above
- Feedback from our frequent Newsletters to our supporters, interested parties and councillors

I wholeheartedly object. The fact that there is a site in the first place for these plans to be proposed is bad enough. There is not enough space where it is being proposed and the fact that adding another junction for traffic will severely degrade traffic around Woking & Guildford which is bad enough during rush hour already. Adding many more houses and as well as that many more cars into a congested system will make things far worse. This is a terrible idea when the traffic is already crippled enough as it is. The A3 gets incredibly congested now due to all the people commuting to London and Guildford and this will exacerbate things massively.

The evidence base identifies a wide uncertainty range in future housing demand, which may not require the volume of development outlined in the LP. This range has not been acknowledged in the proposed submission LP, which may result in excessive development and non-essential loss of rural sites.

I object to this plan.

GBC have not followed the correct process in that the plans have been changed and a new junction to the A3 added which will cause major flow problems in Send and which is already gridlocked every rush hour and cannot handle any increase.
Have the council considered the knock on effect on local services like GP, schools and hospital?

The industrial site at Send is not needed and should be on BROWN FIELD site at Slyfield.

GBC's Transport Assessment was not available to councillors when the vote was taken on 24th June.

I object because the evidence that has been used to arrive at the proposed changes is based on GBC ELNA carried out in 2013. These have been shown to have been reduced over the last 3 years by up to 80%. In addition, the housing numbers have been exaggerated by including students in the population increase to amplify the number of new houses required. Currently in the Send/Ripley area the current infrastructure finds it difficult to support the current population. If this program goes ahead as currently set out it will result in grid-lock on our roads, the possible collapse of the local health services, schools being even more over crowded than present and the disappearance of both villages as separate entities.

Attached documents:

---

I OBJECT on the basis that the GBC has not provided sound evidence of the ELNA 2015 which suggests that industrial space in Burnt Common is no longer required. I further OBJECT as the GBC has not followed the correct planning process in regard to the large scale road junction at Burnt Common. This proposal requires full public consultation under Regulation 18.

Attached documents:

---

I object to the exaggerated “housing need” figure of 13,860 which is far too high and results in the completely unnecessary development of the Green Belt. The way students, economic need and affordability are calculated inflates the housing need.

Attached documents:

---

I object

Attached documents:

---

I object

Attached documents:
I object. I do not agree that there is sufficient evidence for the need to build so many additional houses and industrial space in Send and in particular at Burnt Common. The Employment Land Needs Assessment (ELNA) 2015 shows an 80% reduction in employment space required form the ELNA 2013, and therefore the additional industrial space proposed at Burnt Common is not required and there is insufficient evidence to support the need for it. I do not understand why the Council would propose such a new site anyway when Slyfield would be the appropriate site for any further development.

There is insufficient evidence to support the need for the additional housing proposed in Send and the number of foreign students has been wrongly used to inflate the need for additional houses. The proposal also would remove Send from the Green Belt and I OBJECT VERY STRONGLY TO THIS. There is insufficient evidence to clarify how the local infrastructure would cope with such a development.

Attached documents:

---

I object to the revised plan for S1,S2,H1,H2,H3,P1,P2,P3,P4,P5,E5 E6, E7,E9,D4I1,P12,P13,P14 - on the basis that A46 was not proposed or considered as a strategic site in the first consultation - it was safeguarded and was not removed from the GreenBelt. No exceptional circumstances have been demonstrated or approved. It also fails the National Planning Policy Framework - it is a Builder Led building proposal not local Parish Council/residents. We don't need a secondary school, many in the area are currently under-subscribed! - just one example of why it fails NPPF. There has been NO meaningful engagement with local residents.

There is inconsistency on how you are measuring Sustainability versus Sensitivity - Normandy and Flexford are two separate villages, on one hand you treat them on one = Sustainability. On the other, Sensitivity, you treat them as two separate. I object to this approach, it is illogical and unfair.

I object to the claim that A46 will lead to improving services for local residents. this is not fact, all shops and pubs in the village have closed over the years due to lack of trade - NO ONE IN THE VILLAGE USED THEM!

I object to the treat to the Thames Basin Heath Special Protection Area -A46 is only 800 metres away from the TBHSPA so it is within the 400m zone of Protection

There is a risk of flood, no consideration is being to your own Surface Water Management Plan which excluded land north of A46 because of Flood Risk.

I object to the disproportionate scale of the proposed building works in Normandy, it is completely unjustified and will destroy our rural environment. The road network cannot cope today, long delays on the A31 and A3 trying to get into Guildford or onto the major road networks to get to work. Also the detrimental health issues caused by massive development, plus the noise pollution and the continual noise and traffic chaos with Lorries and Construction materials and vehicles

I object to the basis of the plan which is distorted by large student numbers from Guildford University, which disproportionately increases the 'required' number of houses. the University must provide campus housing for the...
students, not destroy greenbelt land by trying to accommodate students off campus. The SHMA is not justified and should be reviewed.

GBCs local plan is unsustainable and is against the wishes of most local residents. There are many BrownField Sites in the Guildford area that would benefit from development of some type - there is no reason to destroy greenbelt land and affect areas of beauty and nature

I object. The proposed development on A44 Send Hill will have a major negative impact on the surrounding areas, the roads are not suitable to handle the additional traffic and the numbers of vehicles that will be generated by both the additional housing but particularly the travellers sites which will attract a higher proportion of caravan, trades vehicles and [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]

Attached documents:

Comment ID: SQLP16/188  Respondent: 15140289 / Francis Pearse  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

I object, the developments that are proposed for A44 will have a significant negative impact on the surrounding areas and in particular the road network in the area. The additional housing and in particular the travellers sites will generate significant additional traffic and parking based on the fact that most private homes now have between 1 and 3 cars / vans and the travellers sites also have a high concentration of caravans, trades vehicles and other trade related paraphernalia that is both unsightly and a danger to the environment.

I would like to object to planned building of 700 homes per year, the area of Send does not have sufficient infrastructure to support this type of expansion. There are insufficient schools, road and transport system. Will destroy the village and its uniqueness, turn the whole area into a massive Conurbation.

The process which this has been proposed contravenes not only planning commitment and guidance as laid down by the government for green belt, but also has ignored due process.

I object to further development for the following reasons. With advent of the UK exit from the EU, the prediction for the requirement for housing and development of commercial units will need to be revised downwards. As the 3 million EU citizens currently in the UK, will be affected by this current event, and their ability to stay in this country will also be affected. So your estimates for further development of housing are wildly exaggerated and need to be revised downwards.

In addition to the potential down grade in the economy due to Brexit, your estimation for commercial and housing development is wildly exaggerated and unnecessary. Given you have allowed development of Send Marina; I really don’t understand how you can commit to further commercial developments. So therefore this development is folly this area does not need.

In particular, I want to object to all the following points:

I object to Garlicks Arch development of green belt land which contravenes government guidelines and that due process was not followed in the introduction of this development into this plan, and did not follow this process. Its inclusion in this plan was included at the last stage and did not follow process. So for that reason should be excluded.

I object to the council changing the enclosure of green belt land round the Ripley and Send villages, changing of village boundaries to allow for future development.

I object to the wholesale destruction of green belt land in this area (including development of 2000 homes at Gosden hill farm, Merrow, and also Send and Ripley), which contravenes directly the government stated commitment to preservation of green belt land.

I object to the creation of new north and South Bounds slips ways from the A3 to the A247clandon Road (policy A243) at Burnt common, as in light of the wholly unnecessary due to planned expansion which unlikely be needed within the 10 years.

Attached documents:

Comment ID: SQLP16/267  Respondent: 15156673 / Emma France  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents
Answer: (No)

Guildford Borough Council have failed to provide sound evidence in terms of the Employment Land Needs Assessment 2015 (ELNA) which shows an 80% reduction in employment space from the previous ELNA carried out by Guildford Borough Council in 2013. This means that industrial space at Burnt Common is no longer needed. Housing numbers from the Strategic Housing Market Assessment 2015 (SHMA) are highly questionable. The number of foreign students has been wrongly used to inflate the need. The required 13,860 houses in the local plan is exaggerated. If the population is to grow by some 20,000 in the plan we actually need 8,000 homes (based on an average of 2.5 persons per home). The Green Belt does not need to be built over. 50% of new homes needed could be built on brownfield sites. GBC's Transport Assessment was not even available to councillors for the vote taken on 24 May, being published on 6 June. Infrastructure overload has received scant attention.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents
Answer: ()

I have read through the Guildford plans and although you state that in all cases you have taken infrastructure into account I cannot see how justification can be made for:

1) the amount of proposed housing in Walnut Tree Close adding to the already congested and narrow road. I do not believe that all of the proposed new residents will rely solely on public transport (although this would be an ideal scenario), as in general most adults own a car. Walnut Tree Close is already an extremely difficult road to traverse and is highly used due to access for the railway station, the Post Office and Businesses based there. The question is: How do you propose to improve the infrastructure and access to the amenities in Walnut Tree Close with the additional housing?

2) I could not see any mention of additional schools for the proposed new residents. Surely this is an oversight?

My concerns relate to the scale of housing proposed and the percentage of which will be in Green Belt. Although Guildford Borough Council have stated they will protect Green Belt they then go on to contradict this whereby stating in the appendix (policy p2) that 65% of the proposed housing will be in the Green Belt. This will lead to ribbon development and our beautiful and historic villages and rural areas will be destroyed. In addition to this I do not see how the infrastructure of our villages can support such development and Guildford Borough Council have provided little comfort on how they will improve rail and road infrastructure in addition to providing other services to support such mass development.

No. I object as GBC have not followed due process as increasing the number of homes to 485, from 185 in Apr 16 requires full consultation under Rule 18, not the shortcut GBC have taken under Regulation 19.

Guildford BC planning context & housing numbers

Guildford BC is currently in the process of producing a new Local Plan which is to cover the period 2013 – 2033 and guide development within the borough and is to be compliant with the National Planning Policy Framework (NPPF). This representation is in response to the Regulation 19 consultation phase for the pre-submission version of the draft Local Plan. Persimmon Homes are pleased to have been given the opportunity to make representations on this concerning the Site and general planning matters within the Borough. Persimmon are also pleased that Guildford BC has acknowledged the significant challenges that the borough faces in delivering sufficient housing to meet its needs. The previous interim housing figure of 322 dwellings per annum agreed on May 2012 did not take account of up to date assessments of housing need and therefore was not NPPF compliant. The reliance on this figure has meant that Guildford BC has significant under-delivered on their housing requirements over the past five years as shown in the below table:

<table>
<thead>
<tr>
<th>Year</th>
<th>Net Completions</th>
</tr>
</thead>
<tbody>
<tr>
<td>10/11</td>
<td>190</td>
</tr>
<tr>
<td>11/12</td>
<td>262</td>
</tr>
<tr>
<td>12/13</td>
<td>234</td>
</tr>
<tr>
<td>13/14</td>
<td>137</td>
</tr>
<tr>
<td>14/15</td>
<td>242</td>
</tr>
</tbody>
</table>

As the housing completions above show, Guildford has not only been under-delivering against the now up-to-date Objectively Assessed Need (OAN) but there has also been consistent under-delivery against the interim housing target, which also needs to be factored into an emerging housing target moving forward.

The most recently produced Annual Monitoring Report (AMR), published in October 2015 for the period 2014/2015 showed that net completions of dwellings in the borough for this period was 242 and that the majority of homes completed in this period are on sites of under 20 homes. As the AMR notes “the number of new homes completed this year (2014/15) is still lower than required to meet our objectively assessed need…contributes to a growing deficit of new homes”. The recommendation within the AMR following this states that “housing provision is currently restricted by the lack of available and deliverable development land in the borough….delivery rate is only likely to increase when larger areas of land are suitable and available for development”. This shows the necessity for suitable and available sites to be considered and this should apply to all sites within the borough that meet this criteria. Persimmon Homes have control of the Site through an option agreement with the landowners and the Site is available for development. The council also consider the site to be suitable for development, having identified it within the proposed submission Local Plan.

i. Objectively Assessed Need
Guildford Borough has an identified (OAN) of 693 dwellings per annum following the conclusions of the West Surrey Strategic Housing Market Assessment (SHMA) produced in September 2015 by GL Hearn. This assessment was carried out as part of the Housing Market Area (HMA) known as West Surrey which included Waverley and Woking in addition to Guildford. Persimmon have concerns that the SHMA may have under-estimated the OAN for Guildford due to migration from London into the borough expected to increase and by downplaying the need for jobs. The most recent population projections produced by Office of National Statistics (ONS) shows that by 2037, the population of Surrey is expected to increase by over 200,000 and this increase is anticipated to be faster than previously considered based on 2012 population figures, which have informed the SHMA which in turn has informed the housing requirement for the new Local Plan. It can be expected that a large proportion of this increase will be in the West Surrey HMA due to its proximity to London, strong rail connections and reputation as being part of the commuter belt and a desirable place to live. It is on this basis that Persimmon believe that the OAN to be inaccurate and should be revised upwards taking into account the increases based on the 2014 projections as opposed to the 2012 figures. This should, in turn, mean that the housing requirements in the new Local Plan should also be revised upwards, taking into account the updated projections; the constant under delivery in recent years and the need to better allow for flexibility within the plan for economic growth reasons etc.

This point is further supported by the established planning principle of seeking to plan for balanced growth in jobs and homes where possible with a view to reducing the need to travel and commuting distances. The SHMA identifies that to support the forecast growth in employment a high level of growth is needed.

ii. Five-year supply of deliverable housing land

Paragraph 47 of the NPPF states that there is a requirement for Local Planning Authorities (LPA) to “identify and update annually a supply of specific deliverable sites sufficient to provide five years worth of housing against their housing requirements with an additional buffer of 5%...where there has been a record of persistent under-delivery of housing, LPAs should increase the buffer to 20%”. It has been established that GBC cannot demonstrate a robust five year supply of deliverable housing land and at best the Council can show 2.5 years supply whilst at worst this drops to 1.4 years. It is also clear that Guildford has persistently and consistently under delivered and therefore those sites, which are capable of coming forward sooner should do, without being fettered by ill conceived policy requirements.

ii. Housing requirements within new Local Plan (2013-2033)

The pre-submission version of the draft Local Plan makes provision for the delivery of 13,860 new homes over the plan period (2013-2033). This equates to 693 dwellings per annum which matches the identified housing need through the SHMA. The draft Local Plan states that “the delivery of new homes is expected to increase over the plan period, reflective of timescales associated with delivery of strategic sites”. The draft Local Plan sets out the housing delivery in different tranches as below:

Annual Housing Targets (as set out in the draft Local Plan – Policy S2)

The above shows that there is proposed to be an increasing level of delivery over time as the plan progresses through the plan period. On this basis, to ensure the minimum housing requirements are achieved, over the first five years of the plan an average of 693 dwellings per annum are to be delivered. This raises an immediate concern given that GBC cannot demonstrate a five year land supply of any better than 2.5 years. As the net completions table also shows, the first two years of the plan period 2013/14 and 2014/15 have delivered significantly fewer than 693 dwellings per annum. We are concerned that insufficient sites have been identified to deliver this housing provision and concerns particularly over the deliverability of Wisley Airfield. Should the airfield be unable to deliver the allocated 2068 dwellings as proposed, then this number will have to be subsumed in other areas and given the local opposition to this scheme and impact on the highway network the deliverability of Wisley Airfield must be strongly questioned.

It is therefore clear that the evidence used for the Proposed Submission Local Plan Strategy from a housing perspective is not adequate or up to date.

Does the SHMA use the latest housing projections?
In addition, for those reasons above, whilst we recognise that the council has made some difficult decisions concerning some of the large strategic allocations, these are by their very definition slow to deliver units and it is clear that the council are not planning to deliver any meaningful increase in supply in the short term and for these reasons, those sites which are capable of delivering units quickly within the first five years of the plan should be considered favorably; this includes land to the east of Foreman Road, Ash.

With regards to more specific comments, Persimmon Homes are pleased that both policies A29 and A30 identify the site for development, however, we do not believe for those reasons below, that the identification of a road through part of the site is appropriate; feasible or indeed the correct approach. For the reasons set out below it is therefore clear that the evidence used for the Proposed Submission Local Plan Strategy and Sites is not adequate, up-to-date or indeed relevant.

The following comments should be read alongside the Odyssey Markides Technical Note dated July 2016, which accompanies these representations. We have drawn some of the comments within the Technical Note out, but expansions of these points are made within the note.

Two land allocation policies of note in the draft LP are Policy A29 and Policy A30. Policy A29 is a land allocation for up to 1,200 dwellings on land adjacent to that in control of PHTV, between Foreman Road and Harper’s Road, as well as other small areas to the west. Policy A30 allocates land which is, in part, under the control of PHTV for provision of a new railway over bridge for vehicles and pedestrians. This new bridge will facilitate the closure of the existing level crossing on the A323 Guildford Road allowing unrestricted movement along the A323 and safer crossing for pedestrians; refer to Drawing A/GB/ASHSTATION.1/04 (Mayer Brown, November 2015).

Having reviewed the proposed railway over bridge it is apparent that it has been designed with some relaxation in Design Manual for Roads and Bridges (DMRB) standards applied, in order to allow the bridge to closely align to the existing route of the A323. A 30mph design speed has been used, with 90m forward visibility provided.

Based on this data it is considered that although implementing a new bridge over the railway line would be effective in reducing delay to the local highway network, it is not necessary in highway capacity terms as the operation of the level crossing would still be within capacity even after the LP developments are implemented.

The new bridge is set out in the Guildford Borough Transport Strategy 2016 as Local Road Network (LRN) Scheme LRN21 ‘New road bridge and footbridge scheme to enable level crossing closure on A323 Guildford Road adjacent to Ash railway station’. Its status is ‘Anticipated’ and its estimated cost is ‘£15m’, with delivery between 2017 and 2026.

Those schemes categorised as anticipated are ‘subject to a positive business case, funding can be secured, and planning and statutory approvals are likely to be achieved’.

The GBC Infrastructure Schedule, contained in Appendix C of the draft LP, states that the likely cost is £15m and the likely funding sources will be developer contributions, Local Growth Fund and from Network Rail. This document sets the delivery timescale as between 2018 and 2022.

It is reasonable for some material funding to come from developers of ‘Land to the South and East of Ash and Tongham’ for 1,200 residential dwellings, as set out in Policy A29.

It is however understood from the Enterprise M3 Local Enterprise Partnership (LEP) that there has been no submission made to the LEP for funding. The latest Expression of Interest (EoI) for the Enterprise M3 Local Growth Fund closed on 31 March 2016. This EoI allows for funding requests for schemes up to the year 2020/21. As the new railway bridge is stated as being delivered before 2026 it is therefore concluded that either (1) the bridge would be funded by developer contributions and Network Rail only or (2) that LEP funding will be requested in future and the delivery of the bridge would occur towards the end of the suggested delivery timescales (i.e. 2026).

It is not clear how much funding Network Rail would be providing for this new bridge. Network Rail would likely have to also fund a new pedestrian/cycle footbridge with lifts in order to maintain, or improve, the current level of accessibility for local residents. Relying on pedestrians and cyclists using the new bridge would be contrary to this given
the material greater distance to cross the railway line and the steepness of the proposed crossing. The cost of the footbridge with lifts could be c.£1.5M.

It is therefore unclear why GBC would classify this new bridge as ‘anticipated’ rather than ‘aspirational’. Aspirational schemes are classified as ‘a strong business case will need to be demonstrated in order to secure funding as the estimated cost presently exceeds typical funding envelopes and / or there are significant planning and statutory approvals to be achieved’.

No details are publically available with respect to the vertical alignment of the new bridge; however, it appears that the northbound forward visibility over the bridge would be materially compromised.

This is due to the gradient of the road between Foreman Road and the crest of the bridge, which would likely materially reduce the forward visibility in the vertical plane.

The forward visibility would also be impinged by the actual bridge structure. The bridge would need material safety structures and barriers along the edge of the parapets and embankments for both pedestrian and driver safety. As these would be a solid structure of over 600mm in height it would therefore compromise forward visibility, especially in the northbound direction.

Although it is understood that the location of the bridge was chosen to align as closely to the existing alignment of the A323 as possible, this alignment is not considered feasible.

It is also clear that no discussions have taken place between the parties over the delivery of the wider scheme and there is no common agreement over delivery, timings and funding etc and therefore piecemeal development will continue to come forward in the short term, further impacting upon the aspirational road scheme to come forward.

For those reasons listed above we therefore are of the view that the plan is unsound, because it is not justified, effective or indeed consistent with national policy.

the assessment of housing need expressed in the SHMA produced by GL Hearn, is flawed, making no allowance for the transient population of higher education students, and by a number of other issues. It is essential that these issues are addressed and rectified with numbers reducing from circa 700 per year to circa 500 per year.

Attached documents:

Comment ID: pslp17q/153  Respondent: 15266273 / Danescroft Land Ltd Danescroft Send LLP  Agent: Pegasus Group (Mike Spurgeon)
Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents
Answer: ()

The updates to the Proposed Submission Local Plan: Strategy and Sites reflects a more up-to-date evidence base which in some areas differs from the position set out in the previous iteration of the plan published in June 2016.

The use of a more up-to-date evidence base in itself represents a positive development. Revisiting aspects of the Land Availability Assessment and publication of a 2017 Addendum adds weight and legitimacy to the revised capacity assessments of a number of potential development sites. This additional clarity is welcomed.

The Sustainability Appraisal does not appear to have been updated to reflect some site-specific matters which were highlighted in previous representations.

Comment ID: pslp17q/156  Respondent: 15266273 / Danescroft Land Ltd Danescroft Send LLP  Agent: Pegasus Group (Mike Spurgeon)
Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents
Answer: ()

Sustainability Appraisal

The Sustainability Appraisal assesses Site A42 and other proposed allocations against a range of criteria which provide an indication of how well it performs as a sustainable location for new housing. An extract of the scoring system and the
The assessment of Site A42 are enclosed in Appendix A and Appendix B. The site generally scores highly against the relevant criteria in this assessment. However, it is clear that some of the values which have been assigned to this are more negative than would otherwise have been the case.

The following assessment criteria have been used to assess site A42, however, when reviewing these, this particular site has been incorrectly assessed against these criteria and as such it has been assigned an unduly negative value. It is requested that these are reviewed and amended on the following basis:

- **Primary School Walking Distance:** – The SA records a ‘red’ value (where there would be a walking distance of 2km or more between the site and the nearest primary school), when in fact the 800m walking distance (as measured by Google Maps – see extract at Appendix C), would move this into a ‘light green’ category.
- **Previously Developed Land:** - The site is currently afforded a ‘red’ value in category 18, as it has not been categorised as previously developed land. However, based on the definition of previously developed land provided in the NPPF, and following pre-application discussions with the local planning authority in 2016, it is clear that this does represent previously developed land. This matter was previously highlighted in representations submitted in July 2016.

The correction of these inaccuracies in the Sustainability Assessment would result in a stronger performance against the criteria and would better reflect how the site performs against these assessment criteria. This would further reinforce the position that this is a highly sustainable location for new housing on the basis of the selected indicators.

Please see attached for context of representations in their full context and the attachments referred to above.

**Agent:** Boyer (Michelle Thomson)

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

**Answer:** (No)

Please see report prepared by Boyer on behalf of Trenfold Property Limited and Countryside Properties UK Limited for further details.

**Green Belt Assessment**

First, the GBCS considers that a land parcel either contributes or not to a specific Green Belt purpose (i.e. with the parcel scoring either 1 or 0) without providing any quantification or the degree of that contribution (for example the extent to which a land parcel may make towards a particular Green Belt purpose).

1.13 Second, as a result of this first limitation, the methodology of the GBCS does not allow for any detailed form of ranking to assess the relative contribution each land parcel makes towards the purposes of including land within the Green Belt. The GBCS did not therefore carry out any form of comparative assessment between the identified PDAs/MDPAs.

1.14 Notwithstanding this, the GBCS does identify a number of small PDAs that are considered not to significantly compromise the land parcel score as a whole. These have included sites that have subsequently been proposed as site allocations or safeguarded sites within the previous draft Local Plan (2014) (site references 74-76). Our client’s site was previously identified as safeguarded land (site reference 120).

1.15 Boyer has adopted a scoring methodology to address these issues and quantify the contribution made by each PDA/MPDA towards the purposes of including land within the Green Belt. The aim is to build upon the methodology of the GBCS by enabling a comparison between potential sites already identified through the Local Plan process.
1.16 This approach, together with the sustainability methodology adopted within the GBCS, has been applied to the 11 PDAs/MPDAs surrounding Send, Send Marsh & Burntcommon and Ripley.

1.17 This assessment concludes that the site, at best, makes only a very limited contribution to the purposes of including land within the Green Belt. When compared with the PDAs/MPDAs assessed, it is ranked joint top (i.e. contributes least to the Green Belt) along with land south of Burntcommon. It is considered therefore that its release from the Green Belt would not have any adverse impact on the purpose and function of the Green Belt in this part of the Borough and as such there are no overriding constraints to prevent early delivery of the site.

Previously Developed Land
1.18 The broad approach to removing major previously developed sites from the Green Belt accords with national planning policy and is supported. However, the evidence base to support Guildford’s assumptions about the sites considered to be previously developed appears to be somewhat lacking. There are no details as to the methodology or reasoned justification that has been applied to demonstrate that a site should be considered as previously developed land.

Settlement boundary of villages
1.22 The approach of the Council to respond to the changes in national policy in respect of the Green Belt designation and to protect these areas using development management policies in accordance with the NPPF are supported.

1.23 The addition of ‘Policy D4: Development in urban areas and inset villages’ in the latest draft of the Local Plan which seeks to “promote the efficient use of land” whilst ensuring that “this does not negatively impact upon the quality of the local environment” is also supported.

1.24 Land at Polesden Lane and Send Marsh Road, Send Marsh is bordered on three sides by established housing and defensible boundaries including a footpath to the west (footpath number 46) and a second footpath to the north of the site (footpath number 45). It therefore lies within the effective framework of Send Marsh Village although it does not fall within the proposed settlement boundary as defined by the draft Local Plan.

1.25 Given the evidence presented in previous sections relating specifically to our client’s site at Polesden Lane, Send Marsh with regards to its contribution to the Green Belt and its previously developed land status, the location of the settlement boundary should be redrawn around the entire site.

I believe the West Surrey Housing SHMA used by Guildford Borough Council as a fundamental rationale for the removal of Green Belt status from Normandy, Flexford and various other local areas now proposed for development was significantly overestimated and has not been subjected to sufficient rigorous checks about its accuracy.

In addition events have now moved on and the current consensus of independent economic forecasters is that the short to medium term UK's (and hence South East's) growth forecast has significantly reduced from previous forecasts due to the likely impacts of Brexit uncertainties on the economy. These reductions of likely growth trends as well as probable changes to population movements have not been factored into the local planning process yet and both these factors are likely to reduce some of the demand for additional new housing.

Attached documents:
I object to the SHMA that is presented by Guildford Borough Council. It is in my opinion, unsound and the detail to be able to fully scrutinise this document is not available, to myself. I have no visibility over the model or formula used to calculate the numbers in the SHMA and as such have no confidence in it. The fact that GBC has got the contractual leverage and ability to force GL Hearn and its sub contractor Justin Gardner Consulting to release these, but does not, and that GBC has failed on several accounts to scrutinise the SHMA within the council, makes me believe this document has been written with 'Policy On' inputs whilst this document should have been prepared in a 'Policy off' mode as required by the NPPF. As the SHMA, in my opinion, forms the back bone of the Local Plan by providing an OAN to then hang all other policies from, without having confidence in the SHMA I have no confidence in the OAN and hence the rest of the Local Plan and consider it all to be unsound.

The specific reasons why I find the SHMA unsound can be found in the attached document written by Cllr David Reeve, which I fully endorse.

<td>As a Surrey resident keen to protect the rural character of a dwindling portion of our county, I am dismayed that the council is proposing to support development in so many Green Belt areas and on sites that are wholly inappropriate for large housing developments. The Green Belt and countryside study seems to take as a fait accompli that much of the green belt should be built on without proper consideration of alternatives. In my view, and I attach much of the blame for this not to the council but to unscrupulous developers using dubious tactics in the pursuit of financial gain (such as the use of Caymans Island companies - Wisley airfield) the council has failed properly to consider how brownfield sites could be developed. It has failed to look ahead and realise that many out of town shopping centres will close in coming years as people continue to do more shopping online. It has failed to realise that the rural character of areas like Ripley, Send and Ockham are an asset to the county that will be destroyed by the developments it appears to be prepared to sanction. The council has failed also to take account of its responsibilities to protect wildlife. Surrey has a large proportion of the UK's remaining lowland heathland, 80% of which has already been lost. The council should be working to preserve this, not destroy it. Yet I see little consideration of this in the documents I have seen. This plan does not present a vision of a sustainable future that will preserve the quality of life of Surrey residents.</td>

Key parts of the evidence are still missing, flawed or based on withheld assumptions. The Strategic Housing Market Assessment overstates need, the Green Belt and Countryside Study uses a flawed approach, and the Transport Assessment is too late and incomplete to be relied upon to inform the Plan.

The Plan excludes the Town Centre Master Plan, which plays a pivotal role and fails to address the results of infrastructure difficulties, or use these and Greenbelt to constrain the level of development.

The Employment Land Needs Assessment

We object

This document omits many important points that are to be addressed at a future stage. The information is, however, very relevant and necessary and without it the document is weak on evidence. The overview given does not assess the capacity of existing supply to accommodate future growth. The paper acknowledges that almost 9% of commercial premises are empty and this somewhat flies in the face of arguments to vastly increase the volume until the reasons are understood. Around 30% of businesses are considering leaving Guildford (congestion being cited as a reason). There are also issues with planning permissions being granted to convert office space to residential, whilst at the same time it is argued that more offices are needed? The contradictions appear to indicate that policies related to this need firming up and that the evidence is incomplete.

We disagree with 40% of land in the town centre being given over to retail as there is no evidence that Guildford will 'buck the national trend' in terms of declining high-street sales, as has been suggested by Cllr Furniss. Guildford urban area ranks no 1 in terms of being the most sustainable location in the borough and, as housing is a priority, there should be more than 1,172 residences in the town centre.

We object to Policy E4 (expansion of the Surrey Research Park into the Blackwell Farm) The existing Research Park has been built at a very low density (25% plot ratio), which is very low for an urban extension. The majority of existing buildings are 2 storeys giving a developed floor space plot ratio of only 12.5%.

The existing Research Park has acres of surface car parking, which provides it with the opportunity to markedly increase its density without infringing any Green Belt land nearby. Any density increase would be cost effective for the use of all existing infrastructure and would also have the potential to match the existing density of the neighbouring academic buildings on the university campus at Manor Park, which is five times higher.

Together with the existing expansion of 14% through existing consents and the opportunity to increase its density, the Research Park has ample capacity to expand to embrace new demand for B1b uses linked to the university, without utilising additional land.

Infrastructure

We object

The infrastructure schedule makes reference to 'improvements' without saying what they are. It includes a junction at the Guildford end of the A31, and another junction at Tongham. No evidence or traffic modelling data is available to demonstrate whether these 'improvements' will indeed improve anything at all given the additional traffic that will be generated by the new developments included in the plan. The Highways Assessment indicates that, even with these 'improvements', the level of congestion on the A3, A31, the B3000 and A25 will leave these roads over capacity and congested.

Constraints should be applied to the housing need/number as a full application of the overinflated number will have a severe detrimental impact on our road network. Smaller housing estates may be more difficult financially, but they would have less impact on infrastructure and could be considered where infrastructure already exists. The borough has many acres of surface car parking which, if replaced by multi-storey versions, and combined with current Brownfield sites,
would free up enough land to build housing where it is wanted and needed and not on valuable Green Belt. There would be no need to build high-rise style development in Guildford town, which we don't support, but we do believe that buildings of 6-10 storeys (with underground parking) would be in keeping in some urban areas (where they don’t impinge on important vistas). [Some existing buildings already reach 5-7 levels in height].

The traffic maps omit the area south of Guildford borough completely and the lack of detail about impact on the B3000, a strategic route, is highly questionable, particularly as there are no solutions in place to deal with the impact. We are particularly concerned that, after the main highways routes of M25, A25, and the A320, the B3000 will incur the greatest increase in flow as this road is already close to capacity, with tailbacks at peak times. The road is no longer fit for purpose and modelling shows that developments planned, and the introduction of a new westerly route through Blackwell Farm, will severely worsen the situation, whether major work takes place on the A3, or not.

The Highway Assessment

We OBJECT

The strategic highway assessment requires a great deal more work and hence we OBJECT to the inclusion of this as evidence.

The B3000 runs through Compton, a small village with many listed buildings, most of which are very close to the road. The road already carries in excess of 5 million vehicles a year with average flow rates exceeding most A roads. It is the only settlement area in the borough where pollution levels exceed EU regulations and it is close to capacity now, with tailbacks at peak times, which add to the pollution problem. [see legal section]

The study is highly misleading. It refers to a figure of zero additional traffic from scenario 3, which includes the traffic from the strategic sites, one of which is partly in Compton. The assessment does not make it clear that the modelling is extremely limited and only includes impact on developments within the immediate area. Blackwell Farm is excluded from Area 107 (part of Compton) as false boundaries have been set. We believe that the impact from the strategic sites will be far-reaching and will most certainly impact Compton and beyond. Each village needs to be able to see the impact that development will have.

The Highways Assessment concentrates on peak time traffic only and gives no indication of overall volume increases or traffic type using specific routes outside peak hours. Understanding of the overall increase is important, as there is a bridge on the B3000 between Artington and Compton, which has a width restriction and may also require a weight restriction as it needs replacing within the next 2 years and no funding has been set aside for this. Instead Network Rail, SCC, GBC and Waverley BC continue to battle over responsibility for, and scope of, the project.

It appears that traffic data has been collected at different times of the year and over varying time scales in order to provide averages. This method of data collection can underestimate measurements by at least 30%.

Furthermore, we have been told that the person responsible for ratifying traffic data at Surrey County Council (SCC) has been off sick for over a year and that, whilst the daily data boxes continue to collect data, that data has not been collected or analysed for 2015. The data put forward for Compton's B3000 was based on a 3-week period in January and, as this was not representative, we understand it was removed. That said, the year-on-year data is for different periods and different times, varying from a few weeks in winter to longer periods over many months. We would like a more robust approach to traffic data collation.

The cumulative effect of the additional traffic generated by the developments in the proposed submission Local Plan will be to increase congestion, even with the proposed highway improvement schemes in place. More detailed analysis of the junctions and queuing is required. We question the conclusion that the developments would have *An acceptable impact on the capacity of the highway networks in terms of the policy test set in paragraph 32 of NPPF*. We do not believe that the impact on the B3000 will be acceptable, as it is already operating beyond capacity, and this situation will be made much worse following the mitigation proposed for the A3.
The Highways Assessment is limited to 30 results. Roads have been omitted from the report and it is unclear whether findings for the B3000 (also referred to as The Street B3000) are in fact from the Street or the roundabout from which there is a feeder road to Godalming via Priorsfield Road.

The table comparing scenarios and the impact on traffic is difficult to decipher. Scenario 1 includes current planning permissions plus Waverley's strategic sites. This shows an increase of just 9 vehicles per hour at peak times on the B3000. The next scenario 2 is the same, but includes GBC's strategic sites. Given that there is a strategic site in Compton of 1,800 homes and another of 1,000 at Normandy, the expectation would be for the volume to be not only higher, but considerably higher. The result is however, ZERO. We understand that this is because the impact measured is only from the immediate area and, as Blackwell Farm has been removed from the village for modelling terms, this does not give a realistic result. The omission of the Town Centre Master Plan and its impact on the roads further diminishes the integrity of this Highways Assessment.

Even without the full impact being understood, it is clear from the scale of development on the west of Guildford (1,800 homes at Blackwell Farm, 1,000 homes at Normandy, 1,300 homes at Ash, 3,800 homes in the Aldershot urban area, 1,200 homes at Borden) that the increase in traffic on the B3000 and other main routes would be severe.

The Highways Assessment shows that as a result of the proposals put forward in this draft of the Local Plan the B3000 will suffer the highest increase in flow rates at peak times (after the M25, A320 and A25. It also reveals that traffic flows would increase if the A3 was widened, as the A3 would then attract more traffic via the B3000. Despite this, there are no solutions planned to mitigate the situation and we are therefore strongly objecting to the level of development and in particular strategic development at Blackwell Farm as outlined in the Local Plan.

The proposal to introduce a new route to Guildford town centre from the west via Blackwell Farm has been ill thought out. The volume of traffic that will use this new ‘rat run’ through the new development and the university campus/business park, has been underestimated. There will be problems for traffic wishing to exit the new development in both directions during peak hours - traffic is frequently queueing for miles along the A31, and the Tesco roundabout is one of the worst bottlenecks in Guildford. The knock-on effect on the Egerton Road/Gill Avenue junction would impede emergency vehicles getting to and from the hospital.

The 4-way junction on the A31 has no detail at all and the concern is that permission in principle will be given to the site in the hope that these problems are surmountable. If they are insurmountable, which we believe they are, then enormous amounts of Green Belt land within the setting of the Surrey Hills AONB will have been sacrificed for nothing. The 4-way junction, if it goes ahead, is likely to be huge and, due to its elevated position, will cause significant harm to the AONB in terms of landscape and light pollution.

The Highways Assessment has many limitations, not least being the absence of the Town Centre Master Plan, which includes potential road closure and re-routing. Compton is likely to be very much affected by any reduction in road capacity in the town centre and it is important that we are presented with the whole the picture.

The Assessment acknowledges that not all impacts of proposed Blackwell Farm development have been modelled and that, due to the emphasis on the A31 and the A3, not all roads were included.

The report concludes that the improvements to the A3 are necessary to maintain adequate flow rates on the strategic network. Further work is needed to determine what impact any widening or junction improvements will have on local roads, and what will be done to mitigate against the increased flows through Compton, particularly given that a section of the B3000 though the Village is anticipated to become an Air Quality Management Area. GBC has resisted requests by members of the PC to have the northern end of The Street made an AQMA, but readings of nitrous oxide in this area are well above EU legal limits.

Note Annex 3 - Independent traffic report by RGP - attached.

There is little information about the tunnel but the map indicates that one access / egress point will be in Compton near the A3, although no land has been safeguarded for this purpose. This is likely to have the same impact as the improvements to the A3, i.e. increased traffic (and pollution) through Compton.
The Spatial Hierarchy

The spatial hierarchy, which outlines Guildford's preferred strategy, does not match up with the proposed plan. The hierarchy places Brownfield sites (including those on Green Belt) as a priority, but the Plan has 66% of development on Greenbelt and only 34% on Brownfield. The hierarchy lists Guildford town and urban areas as a priority followed by inset villages and identified Green Belt villages. A relatively small percentage of housing is allocated for Guildford town (the most sustainable location) and Green Belt areas, such as Blackwell Farm, with high sensitivity have been classified as within the 'Guildford urban area' when they are in fact in the open countryside. We are told that only 1.6% of the 89% Green Belt has been earmarked for removal and that the 6% removed via insetting doesn't count as these villages are already developed. If this is the case, why list them in 4.1.16 of policy s2 - Spatial Strategy?

4.18 The preferred options cannot accommodate all that Guildford 'needs'. This is untrue. Two specialist consultants have independently critiqued the OAN and both question the level of uplift and the use of ONS data without full correction for changes and anomalies. They refer to 'double accounting' as the uplift is introduced at several stages and the assumptions that result in the final OAN are not explained. See comments on Strategic Housing Market Assessment (SHMA).

Strategic Housing Market Assessment (SHMA)

We Object

The “objectively assessed need” figure of 693 homes a year is too high.

A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the SHMA method should be changed to consider student housing need separately due to the distorting effects of students on the figures.

The current SHMA inflates the proposed housing figure due to:

- failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability, and
- flaws in the method for estimating the number of homes needed to support job growth.

It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

Two additional reviews of the SHMA reach similar conclusions, one having been produced by CPRE and the other by Cllr. David Reeve.

The Land Assessment

We object

The exclusion of sites of 5 dwellings or fewer from the list might make administration easier, but the addition of these sites plus windfalls and outstanding (but current) permissions gives rise to a higher number of dwellings than is actually needed. There is therefore no justification for release of all the Green Belt put forward.

The criteria used to include or exclude sites because of this study lack consistency, with many sites excluded as 'unsuitable' with no further explanation offered (many of which were in the urban area of Ash). The assessment lacks objectivity and detail.

Green Belt & Countryside Study

We object
GBC’s Green Belt & Countryside Study does not value appropriately the “fundamental aim” of Metropolitan Green Belt or look strategically at options for developing in major settlement areas beyond the Green Belt. It is pointless for London to apply constraints to protect its Green Belt if areas within it, such as Guildford, choose to ignore this option. It is the same Green Belt and serves the same purposes, all of which are acutely valuable.

The way Green Belt is parcelled up and scored is invalid: serving 2 Green Belt functions well is as legitimate as serving 3 to 5 functions less effectively. The Green Belt sensitivity analysis is not a valid basis for informing decisions. This method also omits purpose one, on the basis that all Green Belt sites encourage regeneration of urban sites. This should not be excluded for it is valid and could even be argued to be particularly valid in areas close to the town. Boundaries used for Blackwell Farm were neither permanent nor defensible.

Proposed removal from the Green Belt of a number of relatively small sites where development of an exceptional nature has taken place, plus adjoining land, has lost sight of the scale at which Green Belt is effective.

Assessment of which villages to take out of the Green Belt does not adequately consider that villages contribute to the openness of the Green Belt, as seen from surrounding AONB.

A key principle of Green Belt is its permanence. The University Consultants stated this 13 years ago when seeking permission to take Manor Farm out of the Green Belt to create Manor Park. They reassured residents that the boundary would not be frequently moved and that Blackwell Farm would be opened up to the public for “informal recreation”. The same Consultant has now repeated this promise in putting forward the University plans to develop on Blackwell Farm, saying that the new boundary would be permanent for at least 25 years!

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: (No)

I object to the local plan!

You have made significant changes to planning that has already been chopped and changed and argued and objected to before. The prosess that I have been informed of regarding all these significant changes require you to arrange another FULL consultation (not sneeking it in at the end of a meeting) under regulation 18 it appears that you are trying to short cut the prosesses, most likely to not allow residents the time to object.

Attached documents:

Comment ID: SQLP16/501  Respondent: 15275073 / Sean Lightfoote  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: (No)

I object on the basis that I don't believe the ELNA 2015 shows a need for an industrial area any more. I also believe that international student figures have been used to influence the amount of housing needed even though once their courses are complete they will spread out or return to their respective countries.
The evidence is based on assumptions about population growth in the area which are wildly inflated beyond anything seen before and clearly not in line with the new reality which will be live outside the EU.

Assessment based on future needs and ’Brexit’ not taken into account

9. RPC has concluded that, without modification, the Plan cannot be considered “sound” within the meaning of Section 20 of the 2004 Act and paragraph 182 of the NPPF.

12. RPC are not satisfied that the documents have been made available in accordance with Regulation 19. In particular the Transport Document not being available until 6 June 2016. What RPC describe as “constant alterations to the website throughout the consultation period and, in particular the late substitution of Garlick’s Arch for the previous A43 allocation, which was not disclosed until the publication of the PSLP on 6 June 2016.

14. RPC object to the approach taken to the assessment and calculation of the housing requirement in the plan.

15. The PSLP seeks to meet OAN by delivering 693 pa during the plan period, an overall figure of 13,860 in the plan period with delivery of housing numbers increasing from 500 per annum in 2018-19 to 790 p.a. in 2032/33.

16. The justification for this is explained in the Sustainability Appraisal June 2016 at para 6.2.10: (Text not copied)
17. While Guildford Town Centre and urban area takes 2,742 units. This is less than 14% of the total projected housing requirement and much of the remaining 11,000 homes are to be accommodated in urban and village extensions (mainly open countryside around existing settlements) and in rural areas including what are called “inset villages” - effectively a redrawing of Green Belt boundaries to exclude former Green Belt villages and open land surrounding them from the protection of Green Belt designation. Of the 11,000 non-Town Centre requirement over 50% are being planned for the 3 North East Wards of Lovelace, Send and Clandons/Horsleys. This is disproportionate and unacceptable for such a small and sparsely populated area.

18. It is noted that there is a significant shift in the balance of urban to rural housing site allocation at the expense of the Green Belt, when comparing the housing allocations in 2016 in comparison to the 2014 draft Plan. In the 2014 Plan Guildford town centre and urban area was allocated 3439 homes. Total housing potential listed was 14057 but there was a provision of only 13,040 in 2014 policy 2, which means that nearly 25% was allocated originally for town/urban in 2014. However the parameters of site allocations seem to have altered which now masks the true extent of the shift from urban to rural. For example, A24 Slyfield (1000 homes), A25 Gosden Hill Farm (2000 homes) and A26 Blackwell Farm (1800 homes) are now designated as “Guildford urban area” whereas in 2014 these 3 sites were allocated as “land around Guildford urban area”. The 2016 PSLP town centre and urban area (excluding Slyfield, Gosden Hill and Blackwell Farm sites) on a like for like basis give a housing provision of 2108 homes with a total housing figure of 13860 which means only 15% of new homes are allocated in the original definition of the town centre or urban area, against the 25% allocation in 2014.

19. RPC takes issue with the approach taken to meeting housing need within the Borough as a whole and objects to adopting the whole of the OAN as the housing requirement in a Borough which is almost 90% Green Belt and which contains significant areas of AONB.

20. RPC note that Core Strategies in other constrained areas have been found to be “sound” despite a housing requirement significantly below AON. (see for example Brighton and Hove City Plan 2016).

21. The approach taken by the Council does not appear to have understood or followed the decision of the Court of Appeal and judgement of Lord Justice Keene in City of St Albans v Hunston Properties plc [2013]EWCA Civ 1610 at “There is no doubt, that in proceeding their local plans, local planning authorities are required to ensure that the “full objectively assessed needs” for housing are to be met, “as far as is consistent with the policies set out in this Framework”. Those policies include the protection of Green Belt land. Indeed, a whole section of the Framework, Section 9, is devoted to that topic, a section which begins by saying “The Government attaches great importance to Green Belts”; Paragraph 79. The Framework seems to envisage some review in detail of Green Belt boundaries through the new Local Plan process, but states that “the general extent of Green Belts across the country is already established.” It seems clear, and is not in dispute in this appeal, that such a Local Plan could properly fall short of meeting the “full objectively assessed needs” for housing in its area because of the conflict which would otherwise arise with policies on the Green Belt or indeed on other designations hostile to development, such as those on Areas of Outstanding Natural Beauty or National Parks.”

22. Despite this clear guidance from the Court of Appeal, the Council appears to have adopted the full OAN as the basis for the Plan. This in turn, and taken together with the emphasis on providing new housing in the Green Belt has led to removal of protection of the Green Belt from places previously within the Green Belt, by insetting of land in and around settlements to exclude them from the Green Belt and by the allocation of land within the Green Belt in order to allocate it for housing.

23. While RPC has not carried out its own OAN assessment it is noted that Table 1 of the PSLP indicates delivery well excess of the requirement identified in Policy S2 for the period 2018-2033. Paragraph 4.1.12 of the Plan confirms that the
number of new homes shown in Table 1 is greater than the figure in the policy and purports to justify this as building flexibility into the plan and to demonstrate that the strategy is capable of delivering the target. The extent of oversupply in the Plan (130% of OAN) is not a figure derived from national policy and appears to be arbitrarily chosen. National policy in the NPPF states the requirement “to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area, as far as is consistent with the policies set out in this Framework”. NPPF 82 states: “Once established, Green Belt boundaries should only be altered in exceptional circumstances…” There is no “exceptional” need for flexibility in Guildford Borough and certainly no case is made out to support such a significant over-supply.

24. In all the circumstances, RPC do not accept that either the housing requirement of 693 dwellings per annum or the proposed Table 1 delivery is reasonably justified. The plan has not been drawn up in conformity with the NPPF. The balance between housing need and the exceptional circumstances required to justify Green Belt boundary alterations is not made out.

25. The policies of the Plan are therefore not “sound” in this important respect and both the requirement in Policy S2 and the Planned Delivery between 2018 and 2033 should be modified by significant reductions in the number of dwellings proposed in each case.

Insetting of Green Belt

39. The approach adopted by the GBC in the Local plan is to exclude land in and surrounding rural settlements from the protection of Green Belt designation by “insetting” of land some of which continues to serve the Green Belt purposes and contributes to the openness of the Green Belt.

40. The approach appears to have taken place as a significant general shift in policy, rather than on the basis of an assessment, in each case, of the extent to which the land in question still serves GB functions.

41. The “exceptional circumstances” required to justify amendment of GB boundaries are not identified.

42. The exclusion of these areas is not in accordance with the guidance in the NPPF. Unless this policy is modified the Plan cannot be “sound” and the criteria in Section 20 of the 2004 Act are not met.

43. RPC objects to the proposed insetting of rural villages so as to exclude them from the Green Belt protection.

44. There are no exceptional circumstances which justify such an approach and it does not follow or accord with the guidance in the NPPF set out above.

45. This Report is particularly concerned at the following insetting: (1) the insetting of Ripley Village; (2) the Send Marsh/ Burnt Common insetting.

46. There is no change of circumstances or exceptional circumstances which justify the insetting.

47. While RPC objects to the general approach to insetting in principle, it also objects to alignment of the boundary of the insetting, which has been drawn too widely and without proper or any regard to the character of the land to be excluded from the Green Belt or the extent to which it continues to fulfil Green Belt purposes.
48. RPC objects in particular to the insetting of land to the rear of the Talbot and the allocation A45. (above) The land to the rear of the built development behind the Talbot beyond the light industrial buildings is open land and forms a valued part of the rural setting of the village.

49. RPC takes the view that the insetting of Ripley Village has been far too widely drawn. The NPPF para 86 states: “If it is necessary to prevent development in a village primarily because of the important contribution which the open character of the village makes to the openness of the Green Belt, the village should be included in the Green Belt. If, however, the character of the village needs to be protected for other reasons, other means should be used, such as conservation area or normal development management policies, and the village should be excluded from the Green Belt.”

50. Whilst acknowledging that much of the Village of Ripley is in a widely drawn conservation area RPC consider that the open character of the village does make an important contribution to the openness of the Green Belt which justifies retention of its existing Green Belt status.

51. Accordingly RPC objects to the insetting of Ripley from the Green Belt, both in principle and in detail. The Plan is not “sound” in this respect and RPC recommends that the Plan should be modified to retain the village entirely in the Green Belt. If this objection is rejected, and the village is to be inset, the boundary should be drawn more tightly into the existing village built envelope and the paddock are to the rear of The Talbot excluded.

Comment ID: SQLP16/560  Respondent: 15280321 / Sport England (Owen Neal)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: (Yes)

Sport England has an established role within the planning system which includes providing advice and guidance on all relevant areas of national, regional and local policy as well as supporting local authorities in developing the evidence base for sport.

Sport England aims to ensure positive planning for sport, enabling the right facilities to be provided in the right places, based on robust and up-to-date assessments of need for all levels of sport and all sectors of the community. To achieve this our planning objectives are to seek to PROTECT sports facilities from loss as a result of redevelopment; to ENHANCE existing facilities through improving their quality, accessibility and management; and to PROVIDE new facilities that are fit for purpose to meet demands for participation now and in the future.

We work with the planning system to achieve these aims and objectives, seeking to ensure that they are reflected in local planning policies, and applied in development management. Please see our website for more advice: http://www.sportengland.org/facilities-planning/planning-for-sport/

Evidence Base

The National Planning Policy Framework (NPPF) requires each local planning authority to produce a Local Plan for its area. Local Plans should address the spatial implications of economic, social and environmental change. Local Plans should be based on an adequate, up-to-date and relevant evidence base. In addition, para 73 of the NPPF requires that:
“Planning policies should be based on robust and up-to-date assessments of the needs for open space, sports and recreation facilities and opportunities for new provision. The assessment should identify specific needs and quantitative deficits or surpluses of open space, sports and recreational facilities in the local area.”

Sport England is aware that the Council does not have an up-to-date Playing Pitch Strategy or indoor or outdoor sports facilities strategy. It is noted that the Council relies on an open space, sport and recreation assessment based on the out-of-date “PPG17 – planning for open space, sport and recreation” and does not include a Playing Pitch Strategy. It is noted that there is little detail on sports provision within the assessment and indoor sports facilities are not included. It is crucial that the Council has an up-to-date and robust evidence base in order to plan for the provision of sport both playing fields and built facilities. Sport England would highly recommend that the Council undertake a playing pitch strategy (PPS) as well as assessing the needs and opportunities for sporting provision. Sport England provides comprehensive guidance on how to undertake both pieces of work.

Playing Pitch Strategy

This guidance document provides a recommended step by step approach to developing and delivering a playing pitch strategy (PPS). It covers both natural and artificial grass pitches. Sport England believes that to ensure there is a good supply of high quality playing pitches and playing fields to meet the sporting needs of local communities, all local authorities should have an up to date PPS. By providing valuable evidence and direction a PPS can be of significant benefit to a wide variety of parties and agendas.

Assessing needs and opportunity for sports provision (Indoor and Outdoor)

This guide complements the PPS guidance providing the recommended approach for assessing the need for pitch provision. Sport England believes that providing the right facilities in the right place is central to enabling people to play sport and maintain and grow participation. An assessment of need will provide a clear understanding of what is required in an area, providing a sound basis on which to develop policy, and make informed decisions for sports development and investment in facilities.

Without this additional evidence base, Sport England is concerned that the Council has not adequately planned for indoor and outdoor sports facilities in accordance with paragraph 73 of the NPPF. On this basis, Sport England does not agree that the evidence used is adequate, up-to-date and relevant.

Comment ID: SQLP16/561  Respondent: 15280385 / Alexander Chenery  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: (Yes)

I believe the local plan fails to take any material consideration of (1) the impact on the proposed Guildford Town Centre plan on local residents who live within that zone, (2) the existing infrastructure (specifically, parking) difficulties and problems faced by local residents based on current developments in the Town Centre and surrounding areas, and (3) the significant impact that future developments in and outside of the Town Centre will have on residents in the Guildford Town Centre area, specifically in relation to parking.
In particular, whilst at various points the local plan notes that the increased housing developments will result in a greater demand for the amenities in Guildford Town Centre and that a number of these developments will not be within walking distance of the Town Centre for many, a number of the development sites would directly result in the removal of car parks and parking spaces. This is totally illogical. There is no thought or consideration given to what happens to cars using these existing parking facilities, or the impact that this would have on residents, who already suffer great misery on the weekends having to use congested dual-use parking bays. Although reference is made Guildford's Transport Plan 2016 and that further consideration will be given to any necessary changes, it is naïve and ill-conceived to believe that significant infrastructure plans can, or should, be formulated without also reviewing the local transport plan. This is both in the interests of local residents and local businesses, who quite understandably want visitors to having adequate parking provision to ensure that Guildford remains a principal retail centre.

I also believe that the local plan fails to take any adequate consideration of the wider catchment area that Guildford has - the report and the evidence base is very insular facing and fails to consider the wider catchment area that Guildford has across Surrey and surrounding counties for shopping and other amenities. It fails to consider that this wider catchment means that cars and parking issues will continue to exacerbated by increased infrastructure development and it is totally misplaced to assume that alternative transport links (such as park and ride (which the local plan seems to place great hope on, but this is totally misplaced and it is quite clear this is not a substitute for car parks) or buses (which, again, the local plan seems to put great hope on, but it is quite clearly not a substitute for car parks given the long distance catchment that Guildford has)) will be adequate to support the increased population who will consider Guildford to be their nearest shopping centre.

The absence of any consideration of the impact on Town Centre parking, and in particular the parking arrangements for residents who already have to put up with congested roads, a lacking of dedicated parking spaces for residents and poor parking behaviour by visitors, means that I do not believe that the plan fails to take account of the interests of all of its stakeholders and I think that the local plan is deficient in this respect.

Comment ID: SQLP16/629  Respondent: 15280737 / Miller Developments (David Milloy)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: (No)

We have reviewed the evidence base, and whilst we recognise that a considerable amount of material has been produced, we are concerned at the reliability of some of the evidence and its application. We are particularly concerned that the evidence has been used inconsistently in order to reach different conclusions between the various Plan stages.

Of greatest concern is the departure from the original (2014) Green Belt and Countryside Study (GBCS), which concluded that development adjacent to Fairlands (and our site, H8-C, in particular) was very sustainable and that development could be accommodated without compromising the purposes of the Green Belt. This conclusion ultimately led to the lands to the west of Fairlands being 'safeguarded' for future development.

Most recently, however, a totally different conclusion has been reached following a review of the GBCS (February 2016). This most recent assessment has concluded that:

'No major village expansions were considered appropriate within the surroundings of Chilworth, East Horsley, Fairlands, Pirbright, Ripley, Shalford and Wood Street Village due to a combination of environmental constraints, limited sustainability credentials, and the potential impact on the purposes and openness of the Green Belt within Guildford Borough'.

As a consequence, the safeguarding of the land adjacent to Fairlands has been removed.

Nothing has changed in the period between these two conclusions being reached which leads us to question the both the
appropriateness of the evidence base and the subjective way it has been applied.

Equally, we are surprised by the lack of evidence supporting how the purposes of the Green Belt have been assessed in relation to individual sites through the sensitivity assessment. The Green Belt Purposes Assessment (http://www.guildford.gov.uk/media/16830/Appendix-1-Green-Belt-Purposes-Schedule/pdf/App_1_Green_Belt_Purposes_Schedule.pdf) provides no rationale or detail to support each single sentence that assesses whether a particular location satisfies each of the four Green Belt 'purpose' tests. Overall, it is considered that too much importance is given to such a subjective assessment; resulting in potentially highly sustainable development opportunities being ruled out in some cases and unsustainable locations being allocated for development in relation to others.

Finally, the lack of evidence provided to support certain allocations and policies is particularly concerning. Given the emphasis placed on strategic sites, the lack of evidence (i.e. the lack of any agreed strategy) for the infrastructure improvements required to enable these is concerning. In this regard we are concerned that as Guildford BC relies so heavily on these larger allocations to deliver its Objectively Assessed Need (OAN) any delay will have very serious implications, particularly in the short to medium term, in meeting the five year housing supply.

As we set out in our earlier representation, we are concerned at the reliability of some of the evidence and its application. Our concerns in this respect are reinforced by GBC's approach to housing numbers, and whether the proposed reduction can be justified from an evidence perspective. In particular, we are far from convinced the country's in-principle decision to leave the European Union (i.e. Brexit) is having a quantifiable impact on employment numbers, with a resulting reduced demand for housing. We believe this assessment to be highly dubious and would question its validity. We are not aware of any other local authorities - including those neighbouring to GBC - who have taken an approach along these lines.

In setting out this concern, we have reviewed the submission recently made by the Home Builders Federation (HBF) to this same consultation, in which they make a number of persuasive points. They note that there is an inherent uncertainty in employment forecasts and "as such the NPPG does not require a mechanistic matching of labour supply and planned housing provision". They go on to express concern that no consideration has been given to the level of job growth elsewhere in the Housing Market Area (HMA), even though Planning Practice Guidance sets out that employment trends and growth in working age population should be considered across such an area. As such, the approach taken by GBC in this regard is not consistent with national policy.

In particular, we are concerned that Guildford's unilateral approach in this regard is likely to be found wanting. At the recent examination hearings for the Waverley Draft Local Plan, the Inspector set out his view that it would be appropriate for Waverley and Guildford to accommodate the unmet need from Woking. In GBC's rush to reduce their housing numbers - and their Guildford-only economic assessment - they appear to have had no regard for the wider HMA, despite originally commissioning the SHMA (with these neighbouring local authorities) that produced the baseline OAN for all three areas. It does appear that Guildford was willing to work across the HMA when required to do so (in order to produce a shared evidence base) but it has now arbitrarily detached itself from this to reshape its own figures in isolation - through the SHMA addendum which has been solely commissioned by GBC. This approach does not stand up to even the most basic scrutiny from a consistency and reliability perspective. Indeed, rather than looking at how they could meet Woking's unmet housing needs, Guildford are looking to do the opposite by reducing their own housing requirement, despite the Inspector on the Waverley Draft Local Plan suggesting that Guildford would need to take account of this.

**Comment ID:** SQLP16/564  **Respondent:** 15281409 / Andrew Hogarth  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

**Answer:** (Yes)

I have read the draft plan and the supporting documents. I confess that I find myself disappointed to see that the objections to the previous edition of this document have been largely ignored and this report is simply more of the same.

There is no doubt that we need more houses as our children have nowhere to live. There is room for debate as to whether we really need to increase our housing stock by rather more than 1% a year for the foreseeable future but I accept that there is a need for considerably more housing in the Guildford.

The difficulty is how to achieve this objective without destroying the reason why we all like living in the Guildford Area. Adopting a scheme which involves putting large blobs of new housing, apparently scattered at random on a map of the area will not retain the feel and beauty of our Borough. If a proposal to increase housing in each area by 1% a year was agreed with each local area or parish we could achieve our objective of increasing our housing stock without destroying our countryside. For this reason I object very strongly to the draft local plan.

My other objection is the that I see there is a proposal to turn East Clandon into a designated settlement. This has not been discussed. NO reasons are given for this proposal. Until it is discussed and detailed reasons why this proposal is necessary are given the proposal should be rejected.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

**Answer:** (Yes)

The provisions of the Localism Act 2011 have not been complied with in that East Hampshire District Council is not on the list of consultees. East Hampshire is part of the Wey Valley and the transport infrastructure is shared. EHDC provides an important housing location particularly for lower priced housing serving Guildford workers.

The Bordon area is outside the Green Belt South Downs National Park or the AONB. It is scheduled for development and further development can be sustained without damage to high grade environmental protection areas.

if housing from Guildford and Waverley in damaging locations were moved It could provide the logical basis for Guildford and Waverley to secure their protected areas. It would allow better infrastructure at Bordon such as the re-instatement of the Bordon Bentley Farnham Guildford rail link which is still a protected aspiration for Bordon's development. This is a key to its eco-town status. It meets all planning objectives in terms of environment, housing, affordable housing and industry and be able to fund infrastructure particularly transport via rail not even envisaged by either Guildford or Waverley's proposals.

The evidence base should be reviewed in the light of Brexit. In particular, most commentators predict slower growth or recession for the next few years at least, and Brexit will presumably result in lower immigration, both of which are key drivers for new housing developments. Also, public finances (national and local) are also likely to come under yet more pressure, constraining supporting infrastructure developments.

There has been a massive and material shift in the evidence base for this consultation as a result of the recent UK decision to leave the European Union, which is expected to result in significant falls in net migration and thus population, reduction in the need for and use of London office space by predictions of up to 25%, with knock-on effects for both commercial and residential property in London and the South-East, plus reduced demand for property and potentially, falling prices. Though predictions vary widely, the general thrust clearly is that the demand for property over the periods outlined in the plan will be materially lower than projected and therefore the exercise needs to be reviewed and amended to reflect these significantly changed circumstances.

In my opinion much is out of date or flawed. Perhaps the council would like to share the evidence for the figures of the SHMA for instance?

**Attached documents:**
The house building target of 13,860 dwellings over period 2013 to 2030 must clearly be reviewed following the Referendum result.

Attached documents:

---

Continuing to add residents to a borough or an area such as Guildford because of demand will, incrementally, change the nature of Guildford borough and make it less desirable to its residents. The roads and Guildford itself are already crowded, the intended road plans will not alleviate all of the congestion. Congestion will become incrementally worse than increment in traffic and people as adding to queues compounds the problem. Reducing desirability of Guildford cannot be an objective, although it will result from following the draft local plan.

Comment ID: SQLP16/1646  Respondent: 15299201 / Samira Abdullah  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

Key parts of the evidence are still missing, flawed or based on withheld assumptions. The Strategic Housing Market Assessment overstates need, the Green Belt and Countryside Study uses a flawed approach, and the Transport Assessment is too late and incomplete to be relied upon to inform the Plan.

The Plan excludes the Town Centre Master Plan, which plays a pivotal role and fails to address the results of infrastructure difficulties, or use these and Greenbelt to constrain the level of development.

The Employment Land Needs Assessment

I object

This document omits many important points that are to be addressed at a future stage. The information is, however, very relevant and necessary and without it the document is weak on evidence. The overview given does not assess the capacity of existing supply to accommodate future growth. The paper acknowledges that almost 9% of commercial premises are empty and this somewhat flies in the face of arguments to vastly increase the volume until the reasons are understood. Around 30% of businesses are considering leaving Guildford (congestion being cited as a reason). There are also issues with planning permissions being granted to convert office space to residential, whilst at the same time it is argued that more offices are needed? The contradictions appear to indicate that policies related to this need firming up and that the evidence is incomplete.

I disagree with 40% of land in the town centre being given over to retail as there is no evidence that Guildford will 'buck the national trend' in terms of declining high-street sales, as has been suggested by Cllr Furniss. Guildford urban area ranks no 1 in terms of being the most sustainable location in the borough and, as housing is a priority, there should be more than 1,172 residences in the town centre.
I object to Policy E4 (expansion of the Surrey Research Park into the Blackwell Farm) The existing Research Park has been built at a very low density (25% plot ratio), which is very low for an urban extension. The majority of existing buildings are 2 storeys giving a developed floor space plot ratio of only 12.5%.

The existing Research Park has acres of surface car parking, which provides it with the opportunity to markedly increase its density without infringing any Green Belt land nearby. Any density increase would be cost effective for the use of all existing infrastructure and would also have the potential to match the existing density of the neighbouring academic buildings on the university campus at Manor Park, which is five times higher.

Together with the existing expansion of 14% through existing consents and the opportunity to increase its density, the Research Park has ample capacity to expand to embrace new demand for B1b uses linked to the university, without utilising additional land.

**Infrastructure**

I object

The infrastructure schedule makes reference to 'improvements' without saying what they are. It includes a junction at the Guildford end of the A31, and another junction at Tongham. No evidence or traffic modelling data is available to demonstrate whether these 'improvements' will indeed improve anything at all given the additional traffic that will be generated by the new developments included in the plan. The Highways Assessment indicates that, even with these 'improvements', the level of congestion on the A3, A31, the B3000 and A25 will leave these roads over capacity and congested.

Constraints should be applied to the housing need/number as a full application of the overinflated number will have a severe detrimental impact on our road network. Smaller housing estates may be more difficult financially, but they would have less impact on infrastructure and could be considered where infrastructure already exists. The borough has many acres of surface car parking which, if replaced by multi-storey versions, and combined with current Brownfield sites, would free up enough land to build housing where it is wanted and needed and not on valuable Green Belt. There would be no need to build high-rise style development in Guildford town, which we don't support, but we do believe that buildings of 6-10 storeys (with underground parking) would be in keeping in some urban areas (where they don’t impinge on important vistas). [Some existing buildings already reach 5-7 levels in height].

The traffic maps omit the area south of Guildford borough completely and the lack of detail about impact on the B3000, a strategic route, is highly questionable, particularly as there are no solutions in place to deal with the impact. I am particularly concerned that, after the main highways routes of M25, A25, and the A320, the B3000 will incur the greatest increase in flow as this road is already close to capacity, with tailbacks at peak times. The road is no longer fit for purpose and modelling shows that developments planned, and the introduction of a new westerly route through Blackwell Farm, will severely worsen the situation, whether major work takes place on the A3, or not.

**The Highway Assessment**

I OBJECT

The strategic highway assessment requires a great deal more work and hence I OBJECT to the inclusion of this as evidence.

The B3000 runs through Compton, a small village with many listed buildings, most of which are very close to the road. The road already carries in excess of 5 million vehicles a year with average flow rates exceeding most A roads. It is the only settlement area in the borough where pollution levels exceed EU regulations and it is close to capacity now, with tailbacks at peak times, which adds to the pollution problem. [see legal section]

The study is highly misleading. It refers to a figure of zero additional traffic from scenario 3, which includes the traffic from the strategic sites, one of which is partly in Compton. The assessment does not make it clear that the modelling is extremely limited and only includes impact on developments within the immediate area. Blackwell Farm is excluded from Area 107 (part of Compton) as false boundaries have been set. I believe that the impact from the strategic sites will
be far-reaching and will most certainly impact Compton and beyond. Each village needs to be able to see the impact that
development will have.

The Highways Assessment concentrates on peak time traffic only and gives no indication of overall volume increases or
traffic type using specific routes outside peak hours. Understanding of the overall increase is important, as there is a
bridge on the B3000 between Artington and Compton, which has a width restriction and may also require a weight
restriction as it needs replacing within the next 2 years and no funding has been set aside for this. Instead Network Rail,
SCC, GBC and Waverley BC continue to battle over responsibility for, and scope of, the project.

It appears that traffic data has been collected at different times of the year and over varying time scales in order to provide
averages. This method of data collection can underestimate measurements by at least 30%.

Furthermore, I have been told that the person responsible for ratifying traffic data at Surrey County Council (SCC) has
been off sick for over a year and that, whilst the daily data boxes continue to collect data, that data has not been collected
or analysed for 2015. The data put forward for Compton's B3000 was based on a 3-week period in January and, as this
was not representative, we understand it was removed. That said, the year-on-year data is for different periods and
different times, varying from a few weeks in winter to longer periods over many months. I would like a more robust
approach to traffic data collation.

The cumulative effect of the additional traffic generated by the developments in the proposed submission Local
Plan will be to increase congestion, even with the proposed highway improvement schemes in place. More detailed
analysis of the junctions and queuing is required. We question the conclusion that the developments would have
An acceptable impact on the capacity of the highway networks in terms of the policy test set in paragraph 32 of
NPPF’. We do not believe that the impact on the B3000 will be acceptable, as it is already operating beyond
capacity, and this situation will be made much worse following the mitigation proposed for the A3.

The Highways Assessment is limited to 30 results. Roads have been omitted from the report and it is unclear whether
findings for the B3000 (also referred to as The Street B3000) are in fact from the Street or the roundabout from which
there is a feeder road to Godalming via Priorsfield Road.

The table comparing scenarios and the impact on traffic is difficult to decipher. Scenario 1 includes current planning
permissions plus Waverley’s strategic sites. This shows an increase of just 9 vehicles per hour at peak times on the
B3000. The next scenario 2 is the same, but includes GBC’s strategic sites. Given that there is a strategic site in Compton
of 1,800 homes and another of 1,000 at Normandy, the expectation would be for the volume to be not only higher, but
considerably higher. The result is however, ZERO. We understand that this is because the impact measured is only from
the immediate area and, as Blackwell Farm has been removed from the village for modelling terms, this does not give a
realistic result. The omission of the Town Centre Master Plan and its impact on the roads further diminishes the integrity
of this Highways Assessment.

Even without the full impact being understood, it is clear from the scale of development on the west of Guildford (1,800
homes at Blackwell Farm, 1,000 homes at Normandy, 1,300 homes at Ash, 3,800 homes in the Aldershot urban area,
1,200 homes at Borden) that the increase in traffic on the B3000 and other main routes would be severe.

The Highways Assessment shows that as a result of the proposals put forward in this draft of the Local Plan the B3000
will suffer the highest increase in flow rates at peak times (after the M25, A320 and A25. It also reveals that traffic flows
would increase if the A3 was widened, as the A3 would then attract more traffic via the B3000. Despite this, there are no
solutions planned to mitigate the situation and we are therefore strongly objecting to the level of development and in
particular strategic development at Blackwell Farm as outlined in the Local Plan.

The proposal to introduce a new route to Guildford town centre from the west via Blackwell Farm has been ill thought
out. The volume of traffic that will use this new ‘rat run’ through the new development and the university campus/
business park, has been underestimated. There will be problems for traffic wishing to exit the new development in both
directions during peak hours - traffic is frequently queueing for miles along the A31, and the Tesco roundabout is one of
the worst bottlenecks in Guildford. The knock-on effect on the Egerton Road/Gill Avenue junction would impede
emergency vehicles getting to and from the hospital.
The 4-way junction on the A31 has no detail at all and the concern is that permission in principle will be given to the site in the hope that these problems are surmountable. If they are insurmountable, which I believe they are, then enormous amounts of Green Belt land within the setting of the Surrey Hills AONB will have been sacrificed for nothing. The 4-way junction, if it goes ahead, is likely to be huge and, due to its elevated position, will cause significant harm to the AONB in terms of landscape and light pollution.

The Highways Assessment has many limitations, not least being the absence of the Town Centre Master Plan, which includes potential road closure and re-routing. Compton is likely to be very much affected by any reduction in road capacity in the town centre and it is important that we are presented with the whole picture.

The Assessment acknowledges that not all impacts of proposed Blackwell Farm development have been modelled and that, due to the emphasis on the A31 and the A3, not all roads were included.

The report concludes that the improvements to the A3 are necessary to maintain adequate flow rates on the strategic network. Further work is needed to determine what impact any widening or junction improvements will have on local roads, and what will be done to mitigate against the increased flows through Compton, particularly given that a section of the B3000 though the Village is anticipated to become an Air Quality Management Area. GBC has resisted requests by members of the PC to have the northern end of The Street made an AQMA, but readings of nitrous oxide in this area are well above EU legal limits.

There is little information about the tunnel but the map indicates that one access / egress point will be in Compton near the A3, although no land has been safeguarded for this purpose. This is likely to have the same impact as the improvements to the A3, i.e. increased traffic (and pollution) through Compton.

The Spatial Hierarchy

The spatial hierarchy, which outlines Guildford's preferred strategy, does not match up with the proposed plan. The hierarchy places Brownfield sites (including those on Green Belt) as a priority, but the Plan has 66% of development on Greenbelt and only 34% on Brownfield. The hierarchy lists Guildford town and urban areas as a priority followed by inset villages and identified Green Belt villages. A relatively small percentage of housing is allocated for Guildford town (the most sustainable location) and Green Belt areas, such as Blackwell Farm, with high sensitivity have been classified as within the 'Guildford urban area' when they are in fact in the open countryside. We are told that only 1.6% of the 89% Green Belt has been earmarked for removal and that the 6% removed via insetting doesn't count as these villages are already developed. If this is the case, why list them in 4.1.16 of policy s2 - Spatial Strategy?

4.18 The preferred options cannot accommodate all that Guildford 'needs'. This is untrue. Two specialist consultants have independently critiqued the OAN and both question the level of uplift and the use of ONS data without full correction for changes and anomalies. They refer to 'double accounting' as the uplift is introduced at several stages and the assumptions that result in the final OAN are not explained. See comments on Strategic Housing Market Assessment (SHMA).

Strategic Housing Market Assessment (SHMA)

I Object

The “objectively assessed need” figure of 693 homes a year is too high.

A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the SHMA method should be changed to consider student housing need separately due to the distorting effects of students on the figures.

The current SHMA inflates the proposed housing figure due to:

- failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability, and
- flaws in the method for estimating the number of homes needed to support job growth.
It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

Two additional reviews of the SHMA reach similar conclusions, one having been produced by CPRE and the other by Cllr. David Reeve.

**The Land Assessment**

**I object**

The exclusion of sites of 5 dwellings or fewer from the list might make administration easier, but the addition of these sites plus windfalls and outstanding (but current) permissions gives rise to a higher number of dwellings than is actually needed. There is therefore no justification for release of all the Green Belt put forward.

The criteria used to include or exclude sites because of this study lack consistency, with many sites excluded as 'unsuitable' with no further explanation offered (many of which were in the urban area of Ash). The assessment lacks objectivity and detail.

**Green Belt & Countryside Study**

**I object**

GBC’s Green Belt & Countryside Study does not value appropriately the “fundamental aim” of Metropolitan Green Belt or look strategically at options for developing in major settlement areas beyond the Green Belt. It is pointless for London to apply constraints to protect its Green Belt if areas within it, such as Guildford, choose to ignore this option. It is the same Green Belt and serves the same purposes, all of which are acutely valuable.

The way Green Belt is parcelled up and scored is invalid: serving 2 Green Belt functions well is as legitimate as serving 3 to 5 functions less effectively. The Green Belt sensitivity analysis is not a valid basis for informing decisions. This method also omits purpose one, on the basis that all Green Belt sites encourage regeneration of urban sites. This should not be excluded for it is valid and could even be argued to be particularly valid in areas close to the town. Boundaries used for Blackwell Farm were neither permanent nor defensible.

Proposed removal from the Green Belt of a number of relatively small sites where development of an exceptional nature has taken place, plus adjoining land, has lost sight of the scale at which Green Belt is effective.

Assessment of which villages to take out of the Green Belt does not adequately consider that villages contribute to the openness of the Green Belt, as seen from surrounding AONB.

A key principle of Green Belt is its permanence. The University Consultants stated this 13 years ago when seeking permission to take Manor Farm out of the Green Belt to create Manor Park. They reassured residents that the boundary would not be frequently moved and that Blackwell Farm would be opened up to the public for “informal recreation”. The same Consultant has now repeated this promise in putting forward the University plans to develop on Blackwell Farm, saying that the new boundary would be permanent for at least 25 years!

**Attached documents:**
I welcome the opportunity to comment on the consultation draft Guildford Local Plan. We have a number of objections to the draft plan.

In particular we consider the consultation process to be flawed. We note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that ". . . the Plan rejects any schemes that would have a detrimental impact on the green belt." This is demonstrably untrue and we consider this to be a deliberate untruth which compromises the consultation process. We would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (We assume the document was delivered to most houses in the Borough.) We reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

General comments:
We have serious, general objections to the plan which are summarized below as well as being expanded upon in our comments on numbered policies in the draft plan.

• In common with many others we do not believe the housing figure has been properly calculated and we believe it overstates housing need. The Council has prevented Councillors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

• The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

• We do not believe the draft plan accords with the NPPF policies on protecting the Green Belt.

• Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not itself a very special circumstance justifying an indiscriminate removal of sites from the Green Belt. Having properly calculated a housing needs number, constraints should be applied to it to reflect the Green Belt and AONB. Each proposed Green Belt site then needs to be considered on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft plan does not demonstrate that this has been done. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

• Stronger assurances should be included in the plan that development can only commence when required infrastructure improvements have been secured.

• The A247 through Clandon is overburdened by traffic already and is unsuitable as an A road in any event. In parts it is too narrow for two lorries to pass and lorries routinely mount the pavement at speed in a dangerous fashion. We believe the plan should include proposals to provide other routes for traffic to take traffic away from the A247.

• We object to the Gosden Hill proposal. We do not believe very exceptional circumstances have been shown to justify taking this site out of the Green Belt. Even if the Gosden Hill development were to remain in the plan we believe the boundary should be explicitly drawn so as to prevent it being visible from West Clandon. In addition development should be conditional on the A3 improvements and new railway station.

• We object to the Garlick's Arch proposal. This site was removed from consideration before the previous draft of the plan was issued. We do not understand how this site has been brought back into the plan. We do not believe exceptional circumstances have been shown to justify taking this site out of the Green Belt. The site was not discussed in the Green Belt and Countryside study and there seems to have been no consideration of the justification for removing it from the Green Belt.

1. I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

° The “objectively assessed need” figure of 693 homes a year is too high.
° A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
° The current SHMA inflates the proposed housing figure due to
° failure to correct for errors in the historical data for international migration flows,
° issues with the way it considers students and affordability and
° flaws in the method for estimating the number of homes needed to support job growth.
° It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable. Why is this so?

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest 'value creation' areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Local Plan Document & Consultation
The Local Plan marks a defining point for Guildford and its future. The University's involvement with this plan is three fold:

- As civic partner, the University benefits from and contributes to the health and prosperity of the town
- As a major employer the University and its staff are materially affected by the existing housing and infrastructure deficits
- As a land owner the University is planning to develop Blackwell Farm to support housing, infrastructure and employment

The University has submitted a formal and comprehensive response to the consultation through its planning advisors Terence O'Rourke. This letter seeks to reinforce the most material points of that submission. These are:

1. The University is supportive of the Local Plan process and is generally supportive of the draft. A summary of the main comments is attached as an appendix to this letter

We strongly object to the 2016 draft Local Plan for many reasons including the loss of green belt in the area. The distinct lack of evidence for the alleged housing need numbers which at 693 a year is more than double the previous figure quoted in 2012 of 322.

I object to the lack of any evidence for the alleged housing needs

We have voted to leave the E.U. and so we will be able to control the number of people entering the UK. We need to realistically re-assess our housing needs. I do not believe that we need to build on every piece of land just to appease the current governments wishes.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents
Answer: ()

The need for housing projected over the next few years is far lower than GBC are supposedly making provision for. What you are proposing in effect is a 35% increase in housing in two small villages which barely have the facilities and infrastructure to cope with the population as it stands. This is unprecedented and far beyond anything proposed elsewhere in the borough. It is completely unreasonable especially since predicted growth in the area is much nearer 15%. GBC has voluntarily chosen to pursue a policy of aggressive civic and economic expansion which underpins all of the housing policies in the Local Plan. GBC’s target of a 25% increase in housing stock is entirely down to a political choice made by...
GBC and well in excess of the official statisticians’ forecasts. Why are GBC pursuing this aggressive house building project when there is no proof of demand?

OBJECTION TO THE GUILDFORD LOCAL PLAN (sent by email)

A little over one year ago my wife and I moved to West Horsley from West London with our young son. We moved here away from the hustle and bustle of everyday London life, its density of housing and lack of green open spaces both for us to enjoy and our son to explore. West Horsley is the epitome of what we sought in leaving London: A peaceful, community-spirited, spread out village with local shops with acres of open, pleasant green spaces in and around to enjoy whilst being really well connected to the main roads, railways and airports.

I have tried my best to understand the Guildford Borough Proposed Submission Local Plan: June 2016, but have found it very complex and frankly unwieldy to digest. For your information, the links to Appendices B-E are missing from your website at http://www.guildford.gov.uk/newlocalplan/proposedsubmission

Despite your claims to have ‘listened’ to citizens following the last version of the plan it seems as though very little has changed and, in fact, more development is now being tabled than before. I am writing to OBJECT to the Guildford Borough Proposed Submission Local Plan: June 2016.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

Just how accurate are your SHMA figures and was the person/people responsible for the figures adequately briefed or qualified to declare these? Only 4 years ago, the number of houses needed was put at 322 per year, even then this figure was disputed, however, comments and objections were never addressed and fortunately this was not carried through. So here we are, 4 years on and the figure has soared to around 693 per year in Burpham alone. What justification can you make for this dramatic and frankly terrifying number which will double the size of the village.

Housing Numbers

I do not agree with how Guildford Borough Council (GBC) have handled the Strategic Housing Market Assessment (SHMA). The SHMA method of calculating housing numbers is not clear and as such the Local Plan should be considered unsound, the number of houses proposed in the plan far exceeds what is required. GBC have simply taken the maximum projected number of houses by the SHMA without using common sense or rational judgement, I understand that other boroughs (e.g. Woking) are applying constraints to their overall housing growth and believe that Guildford should have a similar approach. The SHMA has been demonstrated to overestimate housing numbers in several areas, in particular the amount of new homes required to support job growth and students. Any population growth figures need to be revisited, especially following the vote for Great Britain to leave the European Union which is likely to significantly reduce external migration to the region. The building of houses far in excess of requirement has potential of leading to a property price collapse in the local area which will have long lasting negative economic consequences for all those who currently own homes there.

1. I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report, which says that 693 homes a year are required by the borough, which is more than double the figure of 322 used in previous plans.
But because the Council will not publish the SHMA report, this figure cannot be verified. This lack of transparency is not right for consultation on the Plan.

Comment ID: SQLP16/783  Respondent: 15359905 / John Burns  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

[I attach my objections to this covering email, I have tried to relate them directly to the terms of reference used by Guildford Borough Council; however, I should like to make some fundamental points which I hope the Inspectorate take on board as they point to a flaw, in my opinion, in the Local Plan.

The Plan rests on a market based solution to a housing crisis, one which has suddenly been visited on us, one that we are expected to compliantly accept as being 100% accurate; I do not accept the latter or the former. There is a housing crisis to be sure, it's been building up for decades, successive National Governments, for political reasons, have succeeded in exacerbating it, year on. It is a crisis which is still obfuscated by politicians, mainly due to National Governments ideological bent to markets, thus it remains improperly diagnosed. Are we talking about people not being forced out of their homes, couples unable to afford rents, housing lists growing; or are we observing wealthy speculators manipulating the situation in order to make large profits at the general expense of most others. There is a housing crisis to be sure, it's been building up for decades, successive National Governments, for political reasons, have succeeded in exacerbating it, year on. It is a crisis which is still obfuscated by politicians, mainly due to National Governments ideological bent to markets, thus it remains improperly diagnosed. Are we talking about people not being forced out of their homes, couples unable to afford rents, housing lists growing; or are we observing wealthy speculators manipulating the situation in order to make large profits at the general expense of most others.

Having scanned the official Government documentation; i.e. The Economic Basis for Housing need, I cannot find any conclusive evidence that provision of such housing schemes, will solve urgent housing requirements per se. The policy rests on an aspiration that a certain amount of social housing has to result from private developments; but in practice does it? Such housing, in the main attracts purchasers who already are adequately housed, it doesn't necessarily follow that social housing requirement would also be met by any take up along the chain of housing vacated concomitantly alongside sales. At the procurement stage of new build homes, there are many ways any social housing element, built-in to any development, can be reduced; e.g. S106 agreements, appeals and 'subject to economies'. Even if they are agreed under a S106 agreement, houses seen as starter homes are generally out of reach for people on the local Borough's waiting list, who might want to buy; similarly rents.

The data for the need to build houses - the strategic Housing Market Assessment (SHMA), originates mainly from interested parties, and it's usually stamped as commercially confidential; IMO, it's skewed, inaccessible and uncontestable. Worst still, the policy for gross invasion into the Green Belt is actually being driven by similar, if not the same interested parties, many of whom donate large amounts to fund the Party in Government. So access to analyse, let alone accurately judge whether these figures represent reality, is somewhat limited. One thing is for sure; if anyone wants to move house within our parishes, you only have to go to the nearest estate agent, you won't find it a problem to locate something to your liking. No one is saying a moratorium on private house building, far from it, but you don't necessarily need mass estates built to increase choice, especially when that in itself is likely to lead to the destruction of an environment that you desired in the first place. There are however, accessible and easily understandable statistics available from Local Authorities, showing accurate housing requirements in the Borough; i.e. numbers and categories of folk registered on the housing list. If that housing NEED was met PROPERLY and as a priority, then the pressure for private building development would diminish, and similarly the pressure on the GB.

It should be clear to those trying to administer the Governments plan, that the crisis started over thirty years ago with another market based policy: Local Authority Housing stocks were systematically reduced by the tax payer subsidised
policy of the 'Right to Buy'. In one foul swoop thousands of dwellings were taken from local authority stocks, and not replaced by new build. The result was, despite some heroic efforts made by LA's and the formation of Housing Associations, that social housing struggled to keep pace with demand. Private rented accommodation was supposed to provide where the L.A. could not, or rather, was prevented doing so; that too was a failure. Nearly 40 years on, Central Government now is imposing an even worse policy, via it's Housing Bill. Sanctioned in May 2016, once again the private sector is seen as the panacea to the lack of rentable accommodation and a gateway to house ownership for all; bizarre! Municipal stock that remains, as well as prime Housing Association stock, will be forcibly sold off via the 'right to buy' mk 2 - at a major cost to the tax payer, again.

As the private sector has historically failed to provide affordable rented accommodation, it is hard to see how such a policy will succeed this time round, especially now that matters emanating from the issue affect most all households, not just those renting Council or H.A. houses. The Governments vision of a home owning utopia is not only unrealistic, but in life, undesirable. You don't need to own something to call it your home: rented accommodation that is well managed and reasonable to pay for, is a way forward for many who want a home proper whilst keeping their mobility, be able to save, and able to plan their future without the burden and responsibility of a mortgage and all that might entail in keeping up with payments. It is the rented sector that has been scandalously neglected IMO by successive Governments; it is this sector in which the L.A. could and should, play a rightfully important role once again. So IMO, the Plan is an ideological sledge hammer, it masks alternative strategies that would not incur the gross diseconomies which will undoubtedly spring from implementation of the Governments Plan.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

**Answer:** ()

Major doubt concerning housing numbers.

The derivation of a mathematical model of a Strategic Housing Market Assessment (SHMA) without disclosure of the hypotheses and postulations used or of, for example, standard deviation in the results clearly does not permit any assessment of its validity and reflects poor scientific practice.

The doubt concerning this SHMA target housing figure is further compounded by the Guildford Borough Council inflating the SHMA figure to give a figure for population increase which is almost 70% higher than the official national estimates for population growth in the Borough.

This results the figure of 593 new houses proposed in the Horsleys within 5 years following adoption of the plan.

The scale of this enormous increase is demonstrated in that it would result in an increase of up to 35% in existing West Horsley households - a truly alarming figure and greater than any other single area in the Borough.

I trust that my concerns will be fully considered by the appointed independent inspector.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

**Answer:** ()
1. **Questions posed by Guildford Borough Council as part of its consultation.**

Questions from GBC

24.A. Question 1: The evidence base and submission documents

The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence. The evidence base documents contributing to the preparation of the plan are listed in Appendix D and can be found on our website (links open in a new window).

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

**ANSWER**

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

---

3. QUESTION 1 – The Evidence Base and Submission Documents.

We do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites, as it relates to site A46 and the need for a new secondary school at that site, is adequate, up-to-date and relevant.

Our reasoning, using the Evidence Base, is given as follows.

3.1 Provision of Education in Surrey

The responsibility for provision of Education in Surrey lies with Surrey County Council, not GBC. SCC annually produces a report, the latest being the *Schools Organisation Plan December 2015* (“SOP”). The SOP has a 10 year outlook, and does not call for a new secondary school requirement within this timeframe; therefore SCC in the SOP, as informed by the 2014 draft Local Plan and its inherent new housing plan, is not calling for building of a new secondary school in Guildford Borough in the period to 2025.

In terms of school sustainability and operating efficiency, SCC states that schools have to operate full or nearly (95%) full, and that any schools with more than 25% surplus places will be viewed by SCC as educationally and financially unsustainable; where possible SCC seeks to take action early to ensure that schools do not reach this point of unsustainability. Furthermore, SCC prefers to see existing schools expand rather than develop new schools, since this is a more efficient and sustainable use of infrastructural, economic and human capital.

Also, SCC state that, to be sustainable, a new secondary school has to have a minimum of 6FE. The two other new secondary schools at strategic sites Wisley and Gosden Hill are proposed in the LP:ER to be 4FE, which would be below the SCC threshold of sustainability, since both of these schools are in areas of higher population density and are sustainable strategic sites it is evident that these schools should be increased in size to 6FE each, should it not be proven that existing schools cannot be expanded to meet any future needs.

3.2 Proposed development does not require an 8FE secondary school

The proposed development of 1,100 dwellings on site A46 would result in a secondary school requirement of one Form of Entry (30 places) (Source LP:ER). Therefore the proposed A46 development does not, in itself, require provision of an 8FE secondary school at the site.

3.3 Proposed new secondary school at Site A46 is in wrong location
Site A46 in the Normandy ward is located in a sparsely populated area of the borough (Refer to the housing density map contained in the LP:ER, below), therefore is situated remotely from potential pupils, causing unsustainable travel requirements to fill the school places sufficiently to achieve and maintain school sustainability required by SCC. The justification for the school made in SED3 is that it serves the surrounding area, however the on the Evidence Base contained in the draft Local Plan, Normandy and the surrounding area does not need a secondary school.

[IMAGE 1]

3.4 Local Plan itself shows a secondary school is not needed at A46

According to the LP:ER, Site A46 is located in a ward that does not need additional education provision at all during the life of the Draft Plan, and is immediately adjacent to wards that either also do not need additional education provision over the life of the plan, or are only affected in the first 5 years of the plan i.e. before a secondary school could be built. Area 46 is distant from the wards that are affected over the whole life of plan (refer to map below reproduced from the LP:ER). Therefore location of a secondary school at A46 is unsustainable according to both SCC and GBC principles.

Pupils in Ash South and Tongham and Ash Vale also avail themselves of Secondary Schools in Hampshire (Farnham and Aldershot) further reducing need for a new secondary school in Normandy.

[IMAGE 2]

3.5 Declining birth rate in Guildford

The birth rate in Guildford is declining, reducing the future need for school places.

[IMAGE 3]

3.6 Existing secondary school capacity exists

Representations have been made by the head teachers of various Secondary Schools to the 2014 Draft Plan and to GBC and SCC, stating that they have existing capacity to take new pupils, and that they also have space and infrastructure to permanently expand. This is in accordance with SCC’s school sustainability policy of using under-utilised existing capacity and of expanding existing schools in preference to developing new schools.

3.7 Migration to UK to decline

Following the Brexit vote, government and commentators agree that migration into the UK will decline significantly once the UK exits the EU. This will naturally reduce the demand for housing and education within Guildford Borough, further negating the justification for a new Secondary School at site A46 at Normandy/Flexford.

3.8 A new secondary school at site A46 is unsustainable.

A new secondary school at Normandy is not sustainable on many levels, some being:

- It is not demonstrated that there will be sufficient pupils from the surrounding area to maintain 95% capacity.
- The site is in a sparsely populated area of the B
- The Local Plan shows that Normandy is a ward that does not need additional secondary school provision over the life of the Plan.
- If any extra secondary provision is needed, it is to the east or north, not west of the borough.
- Road transport infrastructure to the site has limited capacity without major changes to infrastructure.
- The site destroys greenbelt, ancient woodland, vulnerable habitats, impinges on listed buildings and is located on an area of important drainage for flood mitigation.
- Heavy clay soils will give rise to unusable playing and sports fields.

We note that the Sustainability Appraisal of the Guildford Borough Local Plan, June 2016 (“SA”) does not deal with education sustainability nor considers the sustainability of transport and infrastructure requirements arising from
education needs arising from the draft Local Plan. In respect of education, the SA merely makes some high level, self-serving and unsubstantiated comments with regard to spatial strategy.

The evidence base documents contributing to the preparation of the plan are listed in Appendix D and can be found on our website (links open in a new window).

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

ANSWER

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures Independent assessments of the SHMA (e.g. from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.
I wish to register my objection to the above plan for the following reasons:

1. Lack of protection for the Green Belt
2. Disproportionate housing development in our area, resulting in over-loaded schools, health services and public transport
3. Major traffic congestion on already vastly overcrowded and congested roads
4. Air pollution from thousands of extra cars affecting children and the elderly
5. Pedestrian and cyclist safety on crowded local roads with no footways
6. No guarantee of enough affordable housing for young families.

These are just the immediate concerns, but as a local resident who drives to Kingston every day to work, and also has to use the local roads at peak travel times, the congestion on the local roads is already appalling.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

**Answer:** ()

I attach my response to the Guildford Borough Proposed Submission Local Plan.

Having considered the terms of the planning policy I OBJECT. This Plan is unsustainable, unworkable and, in many provisions, unnecessary. I was born and grew up, until the age of 24, in the Guildford area. Having moved to London to work in recent years I have always considered Guildford and particularly Clandon to be an area I would like to return to raise a family. These plans would fundamentally change my view of Guildford and the surrounding areas. In addition, my parents still live in West Clandon and I therefore have a strong vested interest in the proposed plans.

I trust that the objections included in the attached are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

**Answer:** ()

**Road network**

I object to the plan on the grounds of the impact to the local road network, which I do not believe has been adequately addressed. In respect of the proposals for development at Wisley Airfield and for an upgrade the current A3 junction at Burntcommon to a full 4-way junction, SCC traffic modelling anticipates increased use of Guileshall Lane, Hungry Hill Lane and Tithebarns Lane for traffic accessing the A3 at Burntcommon in order to travel to Guildford and beyond. The SCC report states that “consequently, it indicates that further thought may have to be given to managing traffic in this area as part of a transport assessment should the development be progressed”. It appears that the Plan is proposing a strategic site at Wisley Airfield without even knowing what improvements to the local road infrastructure will be required. If that is the case for Wisley Airfield, then it is almost inevitably true for the proposed developments in East and West Horsley as well.
I am a householder in West Clandon village and I wish to make the following comments on the above document:

Question 1: Evidence Base. I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

- The evidence base documents do not yet reflect the post-referendum circumstances. The documents and the Plan must be modified to these into account.
- The Transport Assessment document is detailed and was published too late to study its detailed conclusions. The document appears to show that congestion will worsen significantly over the period of the Plan even if all the proposed infrastructure is built. The assessment is inadequate because it does not include the effects of junctions and averages flows over 3hr periods thus masking the impact of peaks.
- The SHMA attempts to justify an OAN based on a very aggressive desire for growth in the borough. No case is made that such growth is sustainable. The assumptions and estimates are not transparent and have not been adequately scrutinized by Councillors so that people have to take on trust the work of a consultant. In any case events have overtaken the SHMA.
- The number and complexity of the documents in the evidence base have made reading, understanding, analysis and assimilation extremely difficult. The relevance and status of some of the documents is unclear.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

GRA Comment: Key parts of the evidence are missing, flawed or based on withheld assumptions. The Strategic Housing Market Assessment overstates housing need, the Green Belt and Countryside Study uses a flawed approach and the Transport evidence is too late and incomplete to be relied upon to inform the Plan.

Strategic Housing Market Assessment

The “objectively assessed need” figure of 693 homes a year is too high.

A professional review by NMSS (see Appendix 1) has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year. It also advises the SHMA method should be changed to consider student housing need separately due to the distorting effect of students on the overall Objectively Assessed Need (OAN) forecast.
The current SHMA inflates the proposed housing figure due to

- failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability, and
- flaws in the method for estimating the number of homes needed to support job growth.

The SHMA needs to be revised, and the proposals based upon it reconsidered, before the Plan can be viewed as ready for submission to an Inspector. In addition, an immediate start should be made on calculating student requirements separately using a consultant with appropriate expertise. It is probable this exercise will reduce the OAN.

Revision of the SHMA to take account of the consequences of the vote to leave the European Union has been proposed by a number of consultees and the Council leader. The NMSS SHMA Review makes an important contribution to the way ahead in several respects by showing that:

- even with a relatively strong pre ‘Brexit uncertainty’ economy, and using a stronger trend period than the one used by GLHearn for migration flows within the UK, the GLHearn OAN figure was too high.
- simply making a few post ‘Brexit uncertainty’ adjustments to economic and demographic need, as currently calculated by GLHearn, would not be an adequate response because their approach to the economic data is flawed and they have not corrected for large errors in the historical data on international migration,
- student flows should be better understood and separated out to avoid distortion of the forecasts and, especially given the significance of flows of international students in Guildford, separate modelling of the student population will become more significant in future.

NMSS has advised that the new projections issued on 12 July 2016 should make little difference in Guildford as the household formation rates on which they are based are not significantly different from the 2012-based set.

It is most disappointing that demographic and economic model assumptions have been withheld by GLHearn so that the whole process cannot be cross checked. This means the OAN taken from their SHMA cannot be substantiated.

Green Belt and Countryside Study

This does not value appropriately the “fundamental aim” of Metropolitan Green Belt or look strategically at options for developing instead in major settlements beyond the Green Belt.

- The way Green Belt is parcelled up and scored is invalid: serving 2 Green Belt functions well is as legitimate as serving 3 to 5 functions. The Green Belt sensitivity analysis is not a valid basis for informing decisions. Eg It could be argued the sweep of open countryside rising up Gosden Hill, as you approach Guildford along the A3, is highly prized.
- Proposed removal of the Green Belt of a number of relatively small sites where development of an exceptional nature has taken place, plus adjoining land, has lost sight of the scale at which Green Belt is effective.
- Assessment of which villages to take out of the Green Belt does not adequately consider that villages contribute to the openness of the Green Belt as seen from surrounding AONB.

Transport Evidence

This has been produced very late and is incomplete and untested to the extent that the Plan is not ready for a Regulation 19 consultation.

- It is emerging that the Strategic Highway Assessment shows there will be congestion, even with all the highway schemes in the Plan. Many questions remain unanswered. We assume various inconsistencies are errors (eg 1000 homes on Slyfield generating no extra traffic). More information is needed to understand how much congestion will occur, and where. This has not been provided in time to inform Plan proposals or
responses. The analysis points out problems across the network and does not support the claim that the highways network can accommodate the additional demand arising from the Plan.

- The available evidence shows that the Sustainable Movement Corridor is in a preliminary stage of development. The information provided indicates that it cannot achieve its intended objectives along much of its route due to narrow roads and pinch points. The original concept has had to be diluted and impact on other routes, demand and an economic business case are required. The very concept of a single linear route as appropriate for Guildford is unproven.

- Evidence on bus travel is fundamentally compromised because no clear and workable location for a bus interchange is proposed.

- No information has been provided on the demand for and capacity of rail services. The main line to London is already extremely busy in peak periods.

- Information about the town centre as regards traffic, buses and parking is lacking in the Plan. The Plan does not address the traffic issues in the town centre. The Council has announced its intention of implementing the Town Centre Master Plan which includes making better use of the asset of the river. We submit that the Plan should include the protection of a route for a new bridge connecting the east and west parts of the town across the railway to maintain accessibility and to provide greater resilience in this key part of the road network.

For more detail refer to Appendix 2.

Please Note: Additional transport information has been requested which it was not possible for Guildford BC and Surrey CC to provide in time for this submission. A list of the relevant questions has been submitted. GRA wishes to reserve the right to follow up aspects of this submission where lack of transport information (data or model assumptions) or absence of clarification leads to gaps or errors in analysis and observations.

### Guildford Retail and Leisure Study

This is an improvement but the credibility of the case for massively expanding retail space is undermined by trends in retailing and by the repeated failure to implement the North Street development. The economic value of the green and historic character of Guildford is not adequately considered.

### Air Quality and Noise

NO2 emissions need careful monitoring in view of some sites being close to limits, revised estimates of premature deaths, issues with vehicle emission controls and misplaced optimism regarding congestion. Traffic noise from the A3 should also be reported.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

**Answer:** ()

Q 1 The evidence base and submission documents

**Doc Ref T12a Addendum to 2016 Strategic Highway Assessment Report: high level review of potential key changes in the Guildford borough PSLP: strategy and sites June 2017**

1. This presents a qualitative assessment of the effect of the changes made to the 2016 plan on traffic forecasts. Essentially, because the amount of development in the plan has been reduced, GBC’s argument is that things will be better than estimated in 2016. We can readily agree that where development sites have been removed, notably as in the case of the Normandy/Flexford strategic site, the forecast traffic level will be lower in the
vicinity of the development. However, there are some sites where the planned development is now greater than in 2016. There are also potential changes to plans outside the borough to be taken into account, such as Dunsfold Park, which may have significant consequences for Guildford, as was pointed out by SCC and GBC in their submissions to Waverley in response to that planning application. The trip rates used in the forecast assume a level of public transport use and an appropriate level of bus services.

2. On the evidence provided by the SHAR based on the 2031 traffic forecasts using the SCC traffic model, congestion will be widespread in peak periods across much of the highway network, including on strategic routes. The A3 and M25 are forecast to be at or over capacity. The cumulative effect of the additional traffic generated by the developments in the plan will be to increase congestion, even with the proposed highways schemes in place. Interpreting the model results is not straightforward, as was pointed out in response to the 2016 consultation. Table 4.12 is significant – showing the roads with the ten largest ratios of flow to capacity for Scenario 3, which includes all the planned development but not the major strategic route improvements on the A3 and M25. There is no equivalent for Scenario 5 (i.e. with the strategic improvements), but we can infer that all the roads in Table 4.12 will be at or over capacity in Scenario 5.

3. With regard to the comments on Policy A6: North Street redevelopment (page 9), the model used for the Strategic Highway Assessment is not sufficiently detailed to provide a satisfactory assessment of conditions on the town centre road network. This has been recognised by GBC and has led to the commissioning of more detailed analysis using a simulation model. Added to which, there is uncertainty over the highway capacity implications of the Sustainable Movement Corridor in the town centre and possible changes to the town centre gyratory, as discussed in the draft Town Centre Regeneration Strategy, which indicates that the intention is to reduce the capacity of the town centre network. The experimental closure of Walnut Tree Close is already being planned. Taking into account the demand forecast on the A281, the A322 and A31 in Table 4.12, the consequences of such a reduction will be far-reaching.

4. Policy A26: Blackwell Farm has been amended and now the proposed development includes a secondary school with up to six form entry. This will add to morning peak hour traffic which was not included in the 2016 modelling. The SHAR findings indicate that there will be congestion in peak periods on the network that will serve this development. The A3 will be at or over capacity which means that the network will lack resilience, as it does today. The roads connecting to the town centre will continue to be under pressure. The SMC concept is more advanced on this section than elsewhere, but the effect on capacity has yet to be established. There will be queuing on the A31 on the approach to the new signalised junction that will give access to the Blackwell Farm site. The A31 is regarded as a key route by the LEP and LA partners.

5. The improvement to the A3 is obviously critically important to the Gosden Hill Farm development. We do not have the benefit of analysis of the proposed new slip roads giving access off and on to the A3 S-bound carriageway, nor an understanding of the implications of the SMC for the allocation of highway capacity on the local roads. What is self-evident is that the pressure on local roads in Burpham is already intense in peak periods, and these roads are not suited to carrying large volumes of traffic. Under the plan, congestion is very likely to be worse than today. The proposed Policy A24 Slyfield development will also add demand to the A320 and roads in Jacob’s Well.

6. The change to Policy A29: Land to the south and east of Ash and Tongham involving more houses means that there will be more traffic locally. While this will not be ‘major’ in terms of the borough as a whole, it will be significant locally. Ash and its surroundings will be impacted by the large Wellesley expansion in Aldershot. It is not clear to what extent the modelling reported in the SHAR allowed for this development. The pressure on the A331 and the roads connecting Aldershot to Guildford and Woking will increase.

7. The M25 is forecast to be at capacity after the planned improvements have been introduced, as shown both in the SHAR and in the recently published DfT/HE report on the South West Quadrant. This is relevant to Policy A35 Wisley airfield. It should be noted that RHS Wisley is expanding its facilities with the aim of significantly increasing visitor numbers. The DfT/HE Stage 3 report concludes that the focus should not be on widening the existing road further beyond currently planned schemes but on how to reduce pressures and provide parallel capacity to relieve this part of the network. If the M25 and A3 are at capacity, then the Wisley development will add pressure on local roads that are not well-suited to carrying higher volumes of traffic. This is also relevant to the proposed developments at Burnt Common. The consequences for Ripley are likely to be serious. It is noted that Policy A35 now includes a requirement for mitigation of impacts in Ripley and on surrounding roads, which is some recognition that there will be a problem.

8. A comprehensive up-to-date analysis is required to inform decision-making. This should include analysis of the mid-term stage of the plan, before the A3 improvement is complete, as well as 2034.
1. Section 1 Overview. The description of existing conditions and challenges is broadly correct and welcome.
2. Section 2 Surface access to airports. The problem is that the improved A3 will be at or over capacity in peak periods under the Plan, and the M25 SW Quadrant study has concluded that the M25 will be overloaded. So surface access to Heathrow from Guildford will continue to be affected by the weaknesses listed in this section.
3. Section 3 Rail. This section is welcome. However, it is noted that Crossrail 2 has not yet been secured.
4. Section 4 Strategic roads. Surely the strategy should be aligned with the position of Highs England set out in the Topic Paper: Transport, where it is evident that the improvement of the A3 will not be completed until 2026/27, or even 2027/28? The removal of schemes SRN1 and SRN6 from the list of key infrastructure for the plan, and redesignating them as ‘aspirational’ is inconsistent with the safety objectives of the borough and surely of Highways England and Surrey County Council (the highway authority). Under the strategy and the Plan, the issues for Beechcroft Drive and the weaving and merging issues on the existing A3 will not be addressed until half way through the plan period.
5. Section 5 Local roads. While welcoming the aspiration to transform the town centre, the traffic implications have not been dealt with in the strategy or the Plan. Section 1 correctly included the issue of “severance of the town and its constituent neighbourhoods resulting from a combination of the A3 trunk road, railway lines and the River Wey”. The case for a new crossing of the river and railway relieving pressure on the Farnham Road railway bridge should be taken very seriously and examined in depth. There is a real risk that a significant reduction in capacity in the town centre, both the gyratory and Walnut Tree Close, and on routes carrying the SMC, will lead to road users transferring to minor roads around the town that are unsuited to carrying more traffic.
6. The M25 SW Quadrant study report recommends that alternative routes are developed to carry orbital traffic, and this could mean more use of the A31/A331 in Guildford. There are local roads where capacity is already an issue and planned growth will add to problems that are not mentioned in this strategy. The scope of this element of the strategy is not wide enough.
7. The bus transit strategy is welcome. However, there is insufficient information on the Sustainable Movement Corridor to gauge either what it might deliver and its potential impact on road capacity. A high quality bus station in the town centre is critical for the future of the town. There is a lack of park and ride on the east of the town and not even an aspiration for future provision.
8. The active modes strategy is welcome. However, many roads in the borough are two-lane carriageways of restricted width, with little scope for allocating space for cyclists, and this has to be either accepted or addressed over the long term.
9. Section 6 Air quality. If traffic is going to increase in aggregate, as the forecasts show, even with the measures being proposed, then air quality will continue to be a concern.
10. Section 7 Road safety. The proposals are welcome, but as stated above, the schemes SRN1 and SRN6 should be reinstated in the Plan for safety reasons.
11. Section 8 Programme and funding. See comments on Topic Paper: Transport and the Infrastructure Schedule (App C).

**Topic Paper: Transport**

1. This is a helpful paper providing context and background to the transport aspects of the Plan.
2. The fact the new supplementary technical work is planned to be carried out prior to the submission of the plan to the Secretary of State (para 3.18) is welcome, but it would have been better if the results had been available for this consultation.
3. It is recommended that the wider evidence base should be expanded to include the following:
24. Questions posed by Guildford Borough Council as part of its consultation. Questions from GBC

24.A. Question 1: The evidence base and submission documents

The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence.

The evidence base documents contributing to the preparation of the plan are listed in Appendix D and can be found on our website (links open in a new window).

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

ANSWER

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

2. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Guildford borough Proposed Submission Local Plan: strategy and sites (June 2016)

Thank you for consulting Elmbridge Borough Council on Guildford Borough's Proposed Submission Local Plan.

As you know, we are keen to work with you and other authorities within our respective Housing Market Areas to seek to meet needs across the wider area, ensuring the best and most suitable sites are brought forward for development and, that other cross-boundary and strategic planning matters are continuously addressed.

In responding to this latest consultation, we note that a number of the points we previously raised have been addressed. This consultation response therefore focuses on outstanding matters and those which have arisen from examining newly published and updated evidence base documents. Please note we have not been able to review the entire Proposed Submission Local Plan and all supporting evidence base documents in detail. As such, we continue to raise a number of queries I comments on the key topics that are of particular importance to Elmbridge Borough Council.

Transport:

The evidence on future traffic conditions which has been provided in the Strategic Highway Assessment Report was produced late and is incomplete. Critical information on congestion has not been given in time to be taken into account in the plan proposals.

Attached documents:

| Comment ID: SQLP16/1404 Respondent: 15571617 / Bruce Garbutt Agent: |
| Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents |
| Answer: () |

**Question 1: Evidence Base. I do not agree** that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

- The evidence base documents take no account of the radically changed environment and outlook following the BREXIT referendum. This is hardly the fault of the Council but is nevertheless a serious flaw and requires a re-evaluation of the strategic context.
- The Transport Assessment was published at the same time as the Plan leaving little time for study and analysis. The projections contained appear to be quite inadequate in that 1) they average congestion over 3-hour time bands, which materially reducing the impact of congestion and 2) they do not model junctions.
- The “Assessment” shows that congestion will worsen significantly over the period of the Plan even if all the proposed and aspirational infrastructure is built.
- The Strategic Housing Market Need (SHMA) attempts to justify an Objective Assessed Need (OAN) based on a very aggressive desire for economic growth in the borough. No case is made that such growth is sustainable. The assumptions and estimates are opaque and have not been adequately scrutinized by Councillors. Consequently people have to take on trust the work of a consultant. In any case, political events have overtaken the SHMA.
- The number and complexity of the documents in the evidence base make reading, understanding, analysis and assimilation extremely difficult.

In addition, there has been very little information provided to the residents from the Local Council and we had to be alerted to the information on the website by community members. There has therefore, not really been a reasonable chance for locals to know about this consultation period which seems not very open and within the spirit for such a large decision. It seems more reasonable that the Council could have distributed some leaflets to ensure that those affected would be given a fair chance to read and digest the plans for such an important proposal.

Answer: ()

There is an acknowledgement of the important role of Crossrail 2 in the supporting transport topic paper and transport evidence base although this has not been explicitly recognised in the Local Plan strategy. Inclusion of Crossrail 2 in the transport topic paper and transport evidence base is welcomed. However, the explanatory text in section 5.25 on rail schemes needs to be updated as follows:

Options are set out, including the Crossrail 2 scheme, which in combination would remove the capacity constraint on the South West Main Line between Surbiton and Waterloo and allow for an additional 13 trains per hour peak services forecast to be required by 2043. The Government and TfL have subsequently announced funding for the development of Crossrail 2 which is expected to be operational in 2033. Schemes to provide grade separation at Woking Junction and an additional through platform at Woking station will also be required.

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

I object
Key parts of the evidence are still missing, flawed or based on withheld assumptions. The Strategic Housing Market Assessment overstates need, the Green Belt and Countryside Study uses a flawed approach, and the Transport Assessment is too late and incomplete to be relied upon to inform the Plan.

The Plan excludes the Town Centre Master Plan, which plays a pivotal role and fails to address the results of infrastructure difficulties, or use these and Greenbelt to constrain the level of development.

The Employment Land Needs Assessment I object

This document omits many important points that are to be addressed at a future stage. The information is, however, very relevant and necessary and without it the document is weak on evidence. The overview given does not assess the capacity of existing supply to accommodate future growth. The paper acknowledges that almost 9% of commercial premises are empty and this somewhat flies in the face of arguments to vastly increase the volume until the reasons are understood. Around 30% of businesses are considering leaving Guildford (congestion being cited as a reason). There are also issues with planning permissions being granted to convert office space to residential, whilst at the same time it is argued that more offices are needed? The contradictions appear to indicate that policies related to this need firming up and that the evidence is incomplete.

I disagree with 40% of land in the town centre being given over to retail as there is no evidence that Guildford will 'buck the national trend' in terms of declining high-street sales, as has been suggested by Cllr Furniss. Guildford urban area ranks no 1 in terms of being the most sustainable location in the borough and, as housing is a priority, there should be more than 1,172 residences in the town centre.

I object to Policy E4 (expansion of the Surrey Research Park into the Blackwell Farm) The existing Research Park has been built at a very low density (25% plot ratio), which is very low for an urban extension. The majority of existing buildings are 2 storeys giving a developed floor space plot ratio of only 12.5%.

The existing Research Park has acres of surface car parking, which provides it with the opportunity to markedly increase its density without infringing any Green Belt land nearby. Any density increase would be cost effective for the use of all existing infrastructure and would also have the potential to match the existing density of the neighbouring academic buildings on the university campus at Manor Park, which is five times higher.

Together with the existing expansion of 14% through existing consents and the opportunity to increase its density, the Research Park has ample capacity to expand to embrace new demand for B1b uses linked to the university, without utilising additional land.

Infrastructure I object

The infrastructure schedule makes reference to ‘improvements’ without saying what they are. It includes a junction at the Guildford end of the A31, and another junction at Tongham. No evidence or traffic modelling data is available to demonstrate whether these ‘improvements’ will indeed improve anything at all given the additional traffic that will be generated by the new developments included in the plan. The Highways Assessment indicates that, even with these 'improvements', the level of congestion on the A3, A31, the B3000 and A25 will leave these roads over capacity and congested.

Constraints should be applied to the housing need/number as a full application of the overinflated number will have a severe detrimental impact on our road network. Smaller housing estates may be more difficult financially, but they would have less impact on infrastructure and could be considered where infrastructure already exists. The borough has many acres of surface car parking which, if replaced by multi-storey versions, and combined with current Brownfield sites, would free up enough land to build housing where it is wanted and needed and not on valuable Green Belt. There would be no need to build high-rise style development in Guildford town, which we don't support, but we do believe that buildings of 6-10 storeys (with underground parking) would be in keeping in some urban areas (where they don’t impinge on important vistas). (Some existing buildings already reach 5-7 levels in height).

The traffic maps omit the area south of Guildford borough completely and the lack of detail about impact on the B3000, a strategic route, is highly questionable, particularly as there are no solutions in place to deal with the impact. I am
particularly concerned that, after the main highways routes of M25, A25, and the A320, the B3000 will incur the greatest increase in flow as this road is already close to capacity, with tailbacks at peak times. The road is no longer fit for purpose and modelling shows that developments planned, and the introduction of a new westerly route through Blackwell Farm, will severely worsen the situation, whether major work takes place on the A3, or not.

The Highway Assessment: OBJECT

The strategic highway assessment requires a great deal more work and hence I OBJECT to the inclusion of this as evidence.

The B3000 runs through Compton, a small village with many listed buildings, most of which are very close to the road. The road already carries in excess of 5 million vehicles a year with average flow rates exceeding most A roads. It is the only settlement area in the borough where pollution levels exceed EU regulations and it is close to capacity now, with tailbacks at peak times, which add to the pollution problem. [see legal section]

The study is highly misleading. It refers to a figure of zero additional traffic from scenario 3, which includes the traffic from the strategic sites, one of which is partly in Compton. The assessment does not make it clear that the modelling is extremely limited and only includes impact on developments within the immediate area. Blackwell Farm is excluded from Area 107 (part of Compton) as false boundaries have been set. I believe that the impact from the strategic sites will be far-reaching and will most certainly impact Compton and beyond. Each village needs to be able to see the impact that development will have. The Highways Assessment concentrates on peak time traffic only and gives no indication of overall volume increases or traffic type using specific routes outside peak hours. Understanding of the overall increase is important, as there is a bridge on the B3000 between Artington and Compton, which has a width restriction and may also require a weight restriction as it needs replacing within the next 2 years and no funding has been set aside for this. Instead Network Rail, SCC, GBC and Waverley BC continue to battle over responsibility for, and scope of, the project.

It appears that traffic data has been collected at different times of the year and over varying time scales in order to provide averages. This method of data collection can underestimate measurements by at least 30%.

Furthermore, I have been told that the person responsible for ratifying traffic data at Surrey County Council (SCC) has been off sick for over a year and that, whilst the daily data boxes continue to collect data, that data has not been collected or analysed for 2015. The data put forward for Compton's B3000 was based on a 3-week period in January and, as this was not representative, we understand it was removed. That said, the year-on-year data is for different periods and different times, varying from a few weeks in winter to longer periods over many months. I would like a more robust approach to traffic data collation. Indeed it does not correspond to the statistics generated by the Vehicle Activated Signals which have been monitoring traffic speeds through Compton for a number of years.

The cumulative effect of the additional traffic generated by the developments in the proposed submission Local Plan will be to increase congestion, even with the proposed highway improvement schemes in place. More detailed analysis of the junctions and queuing is required. We question the conclusion that the developments would have an acceptable impact on the capacity of the highway networks in terms of the policy test set in paragraph 32 of NPPF. We do not believe that the impact on the B3000 will be acceptable, as it is already operating beyond capacity, and this situation will be made much worse following the mitigation proposed for the A3.

The Highways Assessment is limited to 30 results. Roads have been omitted from the report and it is unclear whether findings for the B3000 (also referred to as The Street B3000) are in fact from the Street or the roundabout from which there is a feeder road to Godalming via Priorsfield Road.

The table comparing scenarios and the impact on traffic is difficult to decipher. Scenario 1 includes current planning permissions plus Waverley's strategic sites. This shows an increase of just 9 vehicles per hour at peak times on the B3000. The next scenario 2 is the same, but includes GBC’s strategic sites. Given that there is a strategic site in Compton of 1,800 homes and another of 1,000 at Normandy, the expectation would be for the volume to be not only higher, but considerably higher. The result is however, ZERO. We understand that this is because the impact measured is only from the immediate area and, as Blackwell Farm has been removed from the village for modelling terms, this does not give a realistic result. The omission of the Town Centre Master Plan and its impact on the roads further diminishes the integrity of this Highways Assessment.
Even without the full impact being understood, it is clear from the scale of development on the west of Guildford (1,800 homes at Blackwell Farm, 1,000 homes at Normandy, 1,300 homes at Ash, 3,800 homes in the Aldershot urban area, 1,200 homes at Borden) that the increase in traffic on the B3000 and other main routes would be severe.

The Highways Assessment shows that as a result of the proposals put forward in this draft of the Local Plan the B3000 will suffer the highest increase in flow rates at peak times (after the M25, A320 and A25. It also reveals that traffic flows would increase if the A3 was widened, as the A3 would then attract more traffic via the B3000. Despite this, there are no solutions planned to mitigate the situation and we are therefore strongly objecting to the level of development and in particular strategic development at Blackwell Farm as outlined in the Local Plan.

The proposal to introduce a new route to Guildford town centre from the west via Blackwell Farm has been ill-thought out. The volume of traffic that will use this new ‘rat run’ through the new development and the university campus/business park, has been underestimated. There will be problems for traffic wishing to exit the new development in both directions during peak hours - traffic is frequently queueing for miles along the A31, and the Tesco roundabout is one of the worst bottlenecks in Guildford. The knock-on effect on the Egerton Road/Gill Avenue junction would impede emergency vehicles getting to and from the hospital.

The 4-way junction on the A31 has no detail at all and the concern is that permission in principle will be given to the site in the hope that these problems are surmountable. If they are insurmountable, which I believe they are, then enormous amounts of Green Belt land within the setting of the Surrey Hills AONB will have been sacrificed for nothing. The 4-way junction, if it goes ahead, is likely to be huge and, due to its elevated position, will cause significant harm to the AONB in terms of landscape and light pollution.

The Highways Assessment has many limitations, not least being the absence of the Town Centre Master Plan, which includes potential road closure and re-routing. Compton is likely to be very much affected by any reduction in road capacity in the town centre and it is important that we are presented with the whole the picture.

The Assessment acknowledges that not all impacts of proposed Blackwell Farm development have been modelled and that, due to the emphasis on the A31 and the A3, not all roads were included.

The report concludes that the improvements to the A3 are necessary to maintain adequate flow rates on the strategic network. Further work is needed to determine what impact any widening or junction improvements will have on local roads, and what will be done to mitigate against the increased flows through Compton, particularly given that a section of the B3000 though the Village is anticipated to become an Air Quality Management Area. GBC has resisted requests by members of the PC to have the northern end of The Street made an AQMA, but readings of nitrous oxide in this area are well above EU legal limits.

There is little information about the tunnel but the map indicates that one access / egress point will be in Compton near the A3, although no land has been safeguarded for this purpose. This is likely to have the same impact as the improvements to the A3, i.e. increased traffic (and pollution) through Compton.

The Spatial Hierarchy

The spatial hierarchy, which outlines Guildford's preferred strategy, does not match up with the proposed plan. The hierarchy places Brownfield sites (including those on Green Belt) as a priority, but the Plan has 66% of development on Greenbelt and only 34% on Brownfield. The hierarchy lists Guildford town and urban areas as a priority followed by inset villages and identified Green Belt villages. A relatively small percentage of housing is allocated for Guildford town (the most sustainable location) and Green Belt areas, such as Blackwell Farm, with high sensitivity have been classified as within the ‘Guildford urban area’ when they are in fact in the open countryside. We are told that only 1.6% of the 89% Green Belt has been earmarked for removal and that the 6% removed via insetting doesn't count as these villages are already developed. If this is the case, why list them in 4.1.16 of policy s2 - Spatial Strategy?

4.18 The preferred options cannot accommodate all that Guildford ‘needs’. This is untrue. Two specialist consultants have independently critiqued the OAN and both question the level of uplift and the use of ONS data without full correction for changes and anomalies. They refer to ‘double accounting’ as the uplift is introduced at several stages and
the assumptions that result in the final OAN are not explained. See comments on Strategic Housing Market Assessment (SHMA).

Strategic Housing Market Assessment (SHMA) I Object

The ‘objectively assessed need’ figure of 693 homes a year is too high.

A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the SHMA method should be changed to consider student housing need separately due to the distorting effects of students on the figures.

The current SHMA inflates the proposed housing figure due to:

- failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability, and
- flaws in the method for estimating the number of homes needed to support job growth.

It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

Two additional reviews of the SHMA reach similar conclusions, one having been produced by CPRE and the other by Cllr. David Reeve.

The Land Assessment I object

The exclusion of sites of 5 dwellings or fewer from the list might make administration easier, but the addition of these sites plus windfalls and outstanding (but current) permissions gives rise to a higher number of dwellings than is actually needed. There is therefore no justification for release of all the Green Belt put forward.

The criteria used to include or exclude sites because of this study lack consistency, with many sites excluded as ‘unsuitable’ with no further explanation offered (many of which were in the urban area of Ash). The assessment lacks objectivity and detail.

Green Belt & Countryside Study I object

GBC’s Green Belt & Countryside Study does not value appropriately the ‘fundamental aim’ of Metropolitan Green Belt or look strategically at options for developing in major settlement areas beyond the Green Belt. It is pointless for London to apply constraints to protect its Green Belt if areas within it, such as Guildford, choose to ignore this option. It is the same Green Belt and serves the same purposes, all of which are acutely valuable.

The way Green Belt is parcelled up and scored is invalid: serving 2 Green Belt functions well is as legitimate as serving 3 to 5 functions less effectively. The Green Belt sensitivity analysis is not a valid basis for informing decisions. This method also omits purpose one, on the basis that all Green Belt sites encourage regeneration of urban sites. This should not be excluded for it is valid and could even be argued to be particularly valid in areas close to the town. Boundaries used for Blackwell Farm were neither permanent nor defensible.

Proposed removal from the Green Belt of a number of relatively small sites where development of an exceptional nature has taken place, plus adjoining land, has lost sight of the scale at which Green Belt is effective.

Assessment of which villages to take out of the Green Belt does not adequately consider that villages contribute to the openness of the Green Belt, as seen from surrounding AONB.

A key principle of Green Belt is its permanence. The University Consultants stated this 13 years ago when seeking permission to take Manor Farm out of the Green Belt to create Manor Park. They reassured residents that the boundary would not be frequently moved and that Blackwell Farm would be opened up to the public for ‘informal recreation’. The same Consultant has now repeated this promise in putting forward the University plans to develop on Blackwell Farm, saying that the new boundary would be permanent for at least 25 years!
I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.
The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

**Comment ID:** SQLP16/1654  **Respondent:** 15602177 / Julia Hunt  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

**Answer:** ()

**Key parts of the evidence are still missing, flawed or based on withheld assumptions. The Strategic Housing Market Assessment overstates need, the Green Belt and Countryside Study uses a flawed approach, and the Transport Assessment is too late and incomplete to be relied upon to inform the Plan.**

The Plan excludes the Town Centre Master Plan, which plays a pivotal role and fails to address the results of infrastructure difficulties, or use these and Greenbelt to constrain the level of development.

**The Employment Land Needs Assessment**

**I object**

This document omits many important points that are to be addressed at a future stage. The information is, however, very relevant and necessary and without it the document is weak on evidence. The overview given does not assess the capacity of existing supply to accommodate future growth. The paper acknowledges that almost 9% of commercial premises are empty and this somewhat flies in the face of arguments to vastly increase the volume until the reasons are understood.
Around 30% of businesses are considering leaving Guildford (congestion being cited as a reason). There are also issues with planning permissions being granted to convert office space to residential, whilst at the same time it is argued that more offices are needed? The contradictions appear to indicate that policies related to this need firming up and that the evidence is incomplete.

I disagree with 40% of land in the town centre being given over to retail as there is no evidence that Guildford will 'buck the national trend' in terms of declining high-street sales, as has been suggested by Cllr Furniss. Guildford urban area ranks no 1 in terms of being the most sustainable location in the borough and, as housing is a priority, there should be more than 1,172 residences in the town centre.

I object to Policy E4 (expansion of the Surrey Research Park into the Blackwell Farm) The existing Research Park has been built at a very low density (25% plot ratio), which is very low for an urban extension. The majority of existing buildings are 2 storeys giving a developed floor space plot ratio of only 12.5%.

The existing Research Park has acres of surface car parking, which provides it with the opportunity to markedly increase its density without infringing any Green Belt land nearby. Any density increase would be cost effective for the use of all existing infrastructure and would also have the potential to match the existing density of the neighbouring academic buildings on the university campus at Manor Park, which is five times higher.

Together with the existing expansion of 14% through existing consents and the opportunity to increase its density, the Research Park has ample capacity to expand to embrace new demand for B1b uses linked to the university, without utilising additional land.

**Infrastructure**

**I object**

The infrastructure schedule makes reference to 'improvements' without saying what they are. It includes a junction at the Guildford end of the A31, and another junction at Tongham. No evidence or traffic modelling data is available to demonstrate whether these 'improvements' will indeed improve anything at all given the additional traffic that will be generated by the new developments included in the plan. The Highways Assessment indicates that, even with these 'improvements', the level of congestion on the A3, A31, the B3000 and A25 will leave these roads over capacity and congested.

Constraints should be applied to the housing need/number as a full application of the overinflated number will have a severe detrimental impact on our road network. Smaller housing estates may be more difficult financially, but they would have less impact on infrastructure and could be considered where infrastructure already exists. The borough has many acres of surface car parking which, if replaced by multi-storey versions, and combined with current Brownfield sites, would free up enough land to build housing where it is wanted and needed and not on valuable Green Belt. There would be no need to build high-rise style development in Guildford town, which we don't support, but we do believe that buildings of 6-10 storeys (with underground parking) would be in keeping in some urban areas (where they don’t impinge on important vistas). [Some existing buildings already reach 5-7 levels in height].

The traffic maps omit the area south of Guildford borough completely and the lack of detail about impact on the B3000, a strategic route, is highly questionable, particularly as there are no solutions in place to deal with the impact. I am particularly concerned that, after the main highways routes of M25, A25, and the A320, the B3000 will incur the greatest increase in flow as this road is already close to capacity, with tailbacks at peak times. The road is no longer fit for purpose and modelling shows that developments planned, and the introduction of a new westerly route through Blackwell Farm, will severely worsen the situation, whether major work takes place on the A3, or not.

**The Highway Assessment**

**I OBJECT**

The strategic highway assessment requires a great deal more work and hence I OBJECT to the inclusion of this as evidence.
The B3000 runs through Compton, a small village with many listed buildings, most of which are very close to the road. The road already carries in excess of 5 million vehicles a year with average flow rates exceeding most A roads. It is the only settlement area in the borough where pollution levels exceed EU regulations and it is close to capacity now, with tailbacks at peak times, which add to the pollution problem. [see legal section]

The study is highly misleading. It refers to a figure of zero additional traffic from scenario 3, which includes the traffic from the strategic sites, one of which is partly in Compton. The assessment does not make it clear that the modelling is extremely limited and only includes impact on developments within the immediate area. Blackwell Farm is excluded from Area 107 (part of Compton) as false boundaries have been set. I believe that the impact from the strategic sites will be far-reaching and will most certainly impact Compton and beyond. Each village needs to be able to see the impact that development will have.

The Highways Assessment concentrates on peak time traffic only and gives no indication of overall volume increases or traffic type using specific routes outside peak hours. Understanding of the overall increase is important, as there is a bridge on the B3000 between Artington and Compton, which has a width restriction and may also require a weight restriction as it needs replacing within the next 2 years and no funding has been set aside for this. Instead Network Rail, SCC, GBC and Waverley BC continue to battle over responsibility for, and scope of, the project.

It appears that traffic data has been collected at different times of the year and over varying time scales in order to provide averages. This method of data collection can underestimate measurements by at least 30%.

Furthermore, I have been told that the person responsible for ratifying traffic data at Surrey County Council (SCC) has been off sick for over a year and that, whilst the daily data boxes continue to collect data, that data has not been collected or analysed for 2015. The data put forward for Compton's B3000 was based on a 3-week period in January and, as this was not representative, we understand it was removed. That said, the year-on-year data is for different periods and different times, varying from a few weeks in winter to longer periods over many months. I would like a more robust approach to traffic data collation.

The cumulative effect of the additional traffic generated by the developments in the proposed submission Local Plan will be to increase congestion, even with the proposed highway improvement schemes in place. More detailed analysis of the junctions and queuing is required. We question the conclusion that the developments would have an acceptable impact on the capacity of the highway networks in terms of the policy test set in paragraph 32 of NPPF. We do not believe that the impact on the B3000 will be acceptable, as it is already operating beyond capacity, and this situation will be made much worse following the mitigation proposed for the A3.

The Highways Assessment is limited to 30 results. Roads have been omitted from the report and it is unclear whether findings for the B3000 (also referred to as The Street B3000) are in fact from the Street or the roundabout from which there is a feeder road to Godalming via Priorsfield Road.

The table comparing scenarios and the impact on traffic is difficult to decipher. Scenario 1 includes current planning permissions plus Waverley's strategic sites. This shows an increase of just 9 vehicles per hour at peak times on the B3000. The next scenario 2 is the same, but includes GBC's strategic sites. Given that there is a strategic site in Compton of 1,800 homes and another of 1,000 at Normandy, the expectation would be for the volume to be not only higher, but considerably higher. The result is however, ZERO. We understand that this is because the impact measured is only from the immediate area and, as Blackwell Farm has been removed from the village for modelling terms, this does not give a realistic result. The omission of the Town Centre Master Plan and its impact on the roads further diminishes the integrity of this Highways Assessment.

Even without the full impact being understood, it is clear from the scale of development on the west of Guildford (1,800 homes at Blackwell Farm, 1,000 homes at Normandy, 1,300 homes at Ash, 3,800 homes in the Aldershot urban area, 1,200 homes at Borden) that the increase in traffic on the B3000 and other main routes would be severe.

The Highways Assessment shows that as a result of the proposals put forward in this draft of the Local Plan the B3000 will suffer the highest increase in flow rates at peak times (after the M25, A320 and A25. It also reveals that traffic flows would increase if the A3 was widened, as the A3 would then attract more traffic via the B3000. Despite this, there are no
solutions planned to mitigate the situation and we are therefore strongly objecting to the level of development and in particular strategic development at Blackwell Farm as outlined in the Local Plan.

The proposal to introduce a new route to Guildford town centre from the west via Blackwell Farm has been ill thought out. The volume of traffic that will use this new ‘rat run’ through the new development and the university campus/business park, has been underestimated. There will be problems for traffic wishing to exit the new development in both directions during peak hours - traffic is frequently queueing for miles along the A31, and the Tesco roundabout is one of the worst bottlenecks in Guildford. The knock-on effect on the Egerton Road/Gill Avenue junction would impede emergency vehicles getting to and from the hospital.

The 4-way junction on the A31 has no detail at all and the concern is that permission in principle will be given to the site in the hope that these problems are surmountable. If they are insurmountable, which I believe they are, then enormous amounts of Green Belt land within the setting of the Surrey Hills AONB will have been sacrificed for nothing. The 4-way junction, if it goes ahead, is likely to be huge and, due to its elevated position, will cause significant harm to the AONB in terms of landscape and light pollution.

The Highways Assessment has many limitations, not least being the absence of the Town Centre Master Plan, which includes potential road closure and re-routing. Compton is likely to be very much affected by any reduction in road capacity in the town centre and it is important that we are presented with the whole the picture.

The Assessment acknowledges that not all impacts of proposed Blackwell Farm development have been modelled and that, due to the emphasis on the A31 and the A3, not all roads were included.

The report concludes that the improvements to the A3 are necessary to maintain adequate flow rates on the strategic network. Further work is needed to determine what impact any widening or junction improvements will have on local roads, and what will be done to mitigate against the increased flows through Compton, particularly given that a section of the B3000 though the Village is anticipated to become an Air Quality Management Area. GBC has resisted requests by members of the PC to have the northern end of The Street made an AQMA, but readings of nitrous oxide in this area are well above EU legal limits.

There is little information about the tunnel but the map indicates that one access / egress point will be in Compton near the A3, although no land has been safeguarded for this purpose. This is likely to have the same impact as the improvements to the A3, i.e. increased traffic (and pollution) through Compton.

The Spatial Hierarchy

The spatial hierarchy, which outlines Guildford's preferred strategy, does not match up with the proposed plan. The hierarchy places Brownfield sites (including those on Green Belt) as a priority, but the Plan has 66% of development on Greenbelt and only 34% on Brownfield. The hierarchy lists Guildford town and urban areas as a priority followed by inset villages and identified Green Belt villages. A relatively small percentage of housing is allocated for Guildford town (the most sustainable location) and Green Belt areas, such as Blackwell Farm, with high sensitivity have been classified as within the 'Guildford urban area' when they are in fact in the open countryside. We are told that only 1.6% of the 89% Green Belt has been earmarked for removal and that the 6% removed via insetting doesn't count as these villages are already developed. If this is the case, why list them in 4.1.16 of policy s2 - Spatial Strategy?

4.18 The preferred options cannot accommodate all that Guildford 'needs'. This is untrue. Two specialist consultants have independently critiqued the OAN and both question the level of uplift and the use of ONS data without full correction for changes and anomalies. They refer to 'double accounting' as the uplift is introduced at several stages and the assumptions that result in the final OAN are not explained. See comments on Strategic Housing Market Assessment (SHMA).

Strategic Housing Market Assessment (SHMA)

I Object

The “objectively assessed need” figure of 693 homes a year is too high.
A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the SHMA method should be changed to consider student housing need separately due to the distorting effects of students on the figures.

The current SHMA inflates the proposed housing figure due to:

- failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability, and
- flaws in the method for estimating the number of homes needed to support job growth.

It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

Two additional reviews of the SHMA reach similar conclusions, one having been produced by CPRE and the other by Cllr. David Reeve.

**The Land Assessment**

I object

The exclusion of sites of 5 dwellings or fewer from the list might make administration easier, but the addition of these sites plus windfalls and outstanding (but current) permissions gives rise to a higher number of dwellings than is actually needed. There is therefore no justification for release of all the Green Belt put forward.

The criteria used to include or exclude sites because of this study lack consistency, with many sites excluded as 'unsuitable' with no further explanation offered (many of which were in the urban area of Ash). The assessment lacks objectivity and detail.

**Green Belt & Countryside Study**

I object

GBC’s Green Belt & Countryside Study does not value appropriately the “fundamental aim” of Metropolitan Green Belt or look strategically at options for developing in major settlement areas beyond the Green Belt. It is pointless for London to apply constraints to protect its Green Belt if areas within it, such as Guildford, choose to ignore this option. It is the same Green Belt and serves the same purposes, all of which are acutely valuable.

The way Green Belt is parcelled up and scored is invalid: serving 2 Green Belt functions well is as legitimate as serving 3 to 5 functions less effectively. The Green Belt sensitivity analysis is not a valid basis for informing decisions. This method also omits purpose one, on the basis that all Green Belt sites encourage regeneration of urban sites. This should not be excluded for it is valid and could even be argued to be particularly valid in areas close to the town. Boundaries used for Blackwell Farm were neither permanent nor defensible.

Proposed removal from the Green Belt of a number of relatively small sites where development of an exceptional nature has taken place, plus adjoining land, has lost sight of the scale at which Green Belt is effective.

Assessment of which villages to take out of the Green Belt does not adequately consider that villages contribute to the openness of the Green Belt, as seen from surrounding AONB.

A key principle of Green Belt is its permanence. The University Consultants stated this 13 years ago when seeking permission to take Manor Farm out of the Green Belt to create Manor Park. They reassured residents that the boundary would not be frequently moved and that Blackwell Farm would be opened up to the public for “informal recreation”. The same Consultant has now repeated this promise in putting forward the University plans to develop on Blackwell Farm, saying that the new boundary would be permanent for at least 25 years!

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

2. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Key parts of the evidence are still missing, flawed or based on withheld assumptions. The Strategic Housing Market Assessment overstates need, the Green Belt and Countryside Study uses a flawed approach, and the Transport Assessment is too late and incomplete to be relied upon to inform the Plan.

The Plan excludes the Town Centre Master Plan, which plays a pivotal role and fails to address the results of infrastructure difficulties, or use these and Greenbelt to constrain the level of development.

The Employment Land Needs Assessment

I object

This document omits many important points that are to be addressed at a future stage. The information is, however, very relevant and necessary and without it the document is weak on evidence. The overview given does not assess the capacity of existing supply to accommodate future growth. The paper acknowledges that almost 9% of commercial premises are empty and this somewhat flies in the face of arguments to vastly increase the volume until the reasons are understood. Around 30% of businesses are considering leaving Guildford (congestion being cited as a reason). There are also issues with planning permissions being granted to convert office space to residential, whilst at the same time it is argued that more offices are needed? The contradictions appear to indicate that policies related to this need firming up and that the evidence is incomplete.

I disagree with 40% of land in the town centre being given over to retail as there is no evidence that Guildford will 'buck the national trend' in terms of declining high-street sales, as has been suggested by Cllr Furniss. Guildford urban area ranks no 1 in terms of being the most sustainable location in the borough and, as housing is a priority, there should be more than 1,172 residences in the town centre.

I object to Policy E4 (expansion of the Surrey Research Park into the Blackwell Farm) The existing Research Park has been built at a very low density (25% plot ratio), which is very low for an urban extension. The majority of existing buildings are 2 storeys giving a developed floor space plot ratio of only 12.5%.

The existing Research Park has acres of surface car parking, which provides it with the opportunity to markedly increase its density without infringing any Green Belt land nearby. Any density increase would be cost effective for the use of all existing infrastructure and would also have the potential to match the existing density of the neighbouring academic buildings on the university campus at Manor Park, which is five times higher.

Together with the existing expansion of 14% through existing consents and the opportunity to increase its density, the Research Park has ample capacity to expand to embrace new demand for B1b uses linked to the university, without utilising additional land.

Infrastructure

I object

The infrastructure schedule makes reference to 'improvements' without saying what they are. It includes a junction at the Guildford end of the A31, and another junction at Tongham. No evidence or traffic modelling data is available to demonstrate whether these 'improvements' will indeed improve anything at all given the additional traffic that will be generated by the new developments included in the plan. The Highways Assessment indicates that, even with these 'improvements', the level of congestion on the A3, A31, the B3000 and A25 will leave these roads over capacity and congested.

Constraints should be applied to the housing need/number as a full application of the overinflated number will have a severe detrimental impact on our road network. Smaller housing estates may be more difficult financially, but they would have less impact on infrastructure and could be considered where infrastructure already exists. The borough has many acres of surface car parking which, if replaced by multi-storey versions, and combined with current Brownfield sites, would free up enough land to build housing where it is wanted and needed and not on valuable Green Belt. There would be no need to build high-rise style development in Guildford town, which we don't support, but we do believe that
buildings of 6-10 storeys (with underground parking) would be in keeping in some urban areas (where they don’t impinge on important vistas). [Some existing buildings already reach 5-7 levels in height].

The traffic maps omit the area south of Guildford borough completely and the lack of detail about impact on the B3000, a strategic route, is highly questionable, particularly as there are no solutions in place to deal with the impact. I am particularly concerned that, after the main highways routes of M25, A25, and the A320, the B3000 will incur the greatest increase in flow as this road is already close to capacity, with tailbacks at peak times. The road is no longer fit for purpose and modelling shows that developments planned, and the introduction of a new westerly route through Blackwell Farm, will severely worsen the situation, whether major work takes place on the A3, or not.

The Highway Assessment

I OBJECT

The strategic highway assessment requires a great deal more work and hence I OBJECT to the inclusion of this as evidence.

The B3000 runs through Compton, a small village with many listed buildings, most of which are very close to the road. The road already carries in excess of 5 million vehicles a year with average flow rates exceeding most A roads. It is the only settlement area in the borough where pollution levels exceed EU regulations and it is close to capacity now, with tailbacks at peak times, which add to the pollution problem. [see legal section]

The study is highly misleading. It refers to a figure of zero additional traffic from scenario 3, which includes the traffic from the strategic sites, one of which is partly in Compton. The assessment does not make it clear that the modelling is extremely limited and only includes impact on developments within the immediate area. Blackwell Farm is excluded from Area 107 (part of Compton) as false boundaries have been set. I believe that the impact from the strategic sites will be far-reaching and will most certainly impact Compton and beyond. Each village needs to be able to see the impact that development will have.

The Highways Assessment concentrates on peak time traffic only and gives no indication of overall volume increases or traffic type using specific routes outside peak hours. Understanding of the overall increase is important, as there is a bridge on the B3000 between Artington and Compton, which has a width restriction and may also require a weight restriction as it needs replacing within the next 2 years and no funding has been set aside for this. Instead Network Rail, SCC, GBC and Waverley BC continue to battle over responsibility for, and scope of, the project.

It appears that traffic data has been collected at different times of the year and over varying time scales in order to provide averages. This method of data collection can underestimate measurements by at least 30%.

Furthermore, I have been told that the person responsible for ratifying traffic data at Surrey County Council (SCC) has been off sick for over a year and that, whilst the daily data boxes continue to collect data, that data has not been collected or analysed for 2015. The data put forward for Compton's B3000 was based on a 3-week period in January and, as this was not representative, we understand it was removed. That said, the year-on-year data is for different periods and different times, varying from a few weeks in winter to longer periods over many months. I would like a more robust approach to traffic data collation.

The cumulative effect of the additional traffic generated by the developments in the proposed submission Local Plan will be to increase congestion, even with the proposed highway improvement schemes in place. More detailed analysis of the junctions and queuing is required. We question the conclusion that the developments would have An acceptable impact on the capacity of the highway networks in terms of the policy test set in paragraph 32 of NPPF’. We do not believe that the impact on the B3000 will be acceptable, as it is already operating beyond capacity, and this situation will be made much worse following the mitigation proposed for the A3.

The Highways Assessment is limited to 30 results. Roads have been omitted from the report and it is unclear whether findings for the B3000 (also referred to as The Street B3000) are in fact from the Street or the roundabout from which there is a feeder road to Godalming via Priorsfield Road.
The table comparing scenarios and the impact on traffic is difficult to decipher. Scenario 1 includes current planning permissions plus Waverley's strategic sites. This shows an increase of just 9 vehicles per hour at peak times on the B3000. The next scenario 2 is the same, but includes GBC's strategic sites. Given that there is a strategic site in Compton of 1,800 homes and another of 1,000 at Normandy, the expectation would be for the volume to be not only higher, but considerably higher. The result is however, ZERO. We understand that this is because the impact measured is only from the immediate area and, as Blackwell Farm has been removed from the village for modelling terms, this does not give a realistic result. The omission of the Town Centre Master Plan and its impact on the roads further diminishes the integrity of this Highways Assessment.

Even without the full impact being understood, it is clear from the scale of development on the west of Guildford (1,800 homes at Blackwell Farm, 1,000 homes at Normandy, 1,300 homes at Ash, 3,800 homes in the Aldershot urban area, 1,200 homes at Borden) that the increase in traffic on the B3000 and other main routes would be severe.

The Highways Assessment shows that as a result of the proposals put forward in this draft of the Local Plan the B3000 will suffer the highest increase in flow rates at peak times (after the M25, A320 and A25. It also reveals that traffic flows would increase if the A3 was widened, as the A3 would then attract more traffic via the B3000. Despite this, there are no solutions planned to mitigate the situation and we are therefore strongly objecting to the level of development and in particular strategic development at Blackwell Farm as outlined in the Local Plan.

The proposal to introduce a new route to Guildford town centre from the west via Blackwell Farm has been ill thought out. The volume of traffic that will use this new ‘rat run’ through the new development and the university campus/business park, has been underestimated. There will be problems for traffic wishing to exit the new development in both directions during peak hours - traffic is frequently queueing for miles along the A31, and the Tesco roundabout is one of the worst bottlenecks in Guildford. The knock-on effect on the Egerton Road/Gill Avenue junction would impede emergency vehicles getting to and from the hospital.

The 4-way junction on the A31 has no detail at all and the concern is that permission in principle will be given to the site in the hope that these problems are surmountable. If they are insurmountable, which I believe they are, then enormous amounts of Green Belt land within the setting of the Surrey Hills AONB will have been sacrificed for nothing. The 4-way junction, if it goes ahead, is likely to be huge and, due to its elevated position, will cause significant harm to the AONB in terms of landscape and light pollution.

The Highways Assessment has many limitations, not least being the absence of the Town Centre Master Plan, which includes potential road closure and re-routing. Compton is likely to be very much affected by any reduction in road capacity in the town centre and it is important that we are presented with the whole the picture.

The Assessment acknowledges that not all impacts of proposed Blackwell Farm development have been modelled and that, due to the emphasis on the A31 and the A3, not all roads were included.

The report concludes that the improvements to the A3 are necessary to maintain adequate flow rates on the strategic network. Further work is needed to determine what impact any widening or junction improvements will have on local roads, and what will be done to mitigate against the increased flows through Compton, particularly given that a section of the B3000 though the Village is anticipated to become an Air Quality Management Area. GBC has resisted requests by members of the PC to have the northern end of The Street made an AQMA, but readings of nitrous oxide in this area are well above EU legal limits.

There is little information about the tunnel but the map indicates that one access / egress point will be in Compton near the A3, although no land has been safeguarded for this purpose. This is likely to have the same impact as the improvements to the A3, i.e. increased traffic (and pollution) through Compton.

The Spatial Hierarchy

The spatial hierarchy, which outlines Guildford's preferred strategy, does not match up with the proposed plan. The hierarchy places Brownfield sites (including those on Green Belt) as a priority, but the Plan has 66% of development on Greenbelt and only 34% on Brownfield. The hierarchy lists Guildford town and urban areas as a priority followed by inset villages and identified Green Belt villages. A relatively small percentage of housing is allocated for Guildford town
(the most sustainable location) and Green Belt areas, such as Blackwell Farm, with high sensitivity have been classified as within the 'Guildford urban area' when they are in fact in the open countryside. We are told that only 1.6% of the 89% Green Belt has been earmarked for removal and that the 6% removed via insetting doesn't count as these villages are already developed. If this is the case, why list them in 4.1.16 of policy s2 - Spatial Strategy?

4.18 The preferred options cannot accommodate all that Guildford 'needs'. This is untrue. Two specialist consultants have independently critiqued the OAN and both question the level of uplift and the use of ONS data without full correction for changes and anomalies. They refer to 'double accounting' as the uplift is introduced at several stages and the assumptions that result in the final OAN are not explained. See comments on Strategic Housing Market Assessment (SHMA).

**Strategic Housing Market Assessment (SHMA)**

**I Object**

The “objectively assessed need” figure of 693 homes a year is too high.

A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the SHMA method should be changed to consider student housing need separately due to the distorting effects of students on the figures.

The current SHMA inflates the proposed housing figure due to:

- failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability, and
- flaws in the method for estimating the number of homes needed to support job growth.

It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

Two additional reviews of the SHMA reach similar conclusions, one having been produced by CPRE and the other by Cllr. David Reeve.

**The Land Assessment**

**I object**

The exclusion of sites of 5 dwellings or fewer from the list might make administration easier, but the addition of these sites plus windfalls and outstanding (but current) permissions gives rise to a higher number of dwellings than is actually needed. There is therefore no justification for release of all the Green Belt put forward.

The criteria used to include or exclude sites because of this study lack consistency, with many sites excluded as 'unsuitable' with no further explanation offered (many of which were in the urban area of Ash). The assessment lacks objectivity and detail.

**Green Belt & Countryside Study**

**I object**

GBC’s Green Belt & Countryside Study does not value appropriately the “fundamental aim” of Metropolitan Green Belt or look strategically at options for developing in major settlement areas beyond the Green Belt. It is pointless for London to apply constraints to protect its Green Belt if areas within it, such as Guildford, choose to ignore this option. It is the same Green Belt and serves the same purposes, all of which are acutely valuable.

The way Green Belt is parcelled up and scored is invalid: serving 2 Green Belt functions well is as legitimate as serving 3 to 5 functions less effectively. The Green Belt sensitivity analysis is not a valid basis for informing decisions. This method also omits purpose one, on the basis that all Green Belt sites encourage regeneration of urban sites. This should
not be excluded for it is valid and could even be argued to be particularly valid in areas close to the town. Boundaries used for Blackwell Farm were neither permanent nor defensible.

Proposed removal from the Green Belt of a number of relatively small sites where development of an exceptional nature has taken place, plus adjoining land, has lost sight of the scale at which Green Belt is effective.

Assessment of which villages to take out of the Green Belt does not adequately consider that villages contribute to the openness of the Green Belt, as seen from surrounding AONB.

A key principle of Green Belt is its permanence. The University Consultants stated this 13 years ago when seeking permission to take Manor Farm out of the Green Belt to create Manor Park. They reassured residents that the boundary would not be frequently moved and that Blackwell Farm would be opened up to the public for “informal recreation”. The same Consultant has now repeated this promise in putting forward the University plans to develop on Blackwell Farm, saying that the new boundary would be permanent for at least 25 years!

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

- The evidence base documents take no account of the radically changed environment and outlook following the BREXIT referendum. This is not the fault of the Council but nevertheless means the plan is not based on actuality and requires a re-evaluation of the strategic context.
- The Transport Assessment was published at the same time as the Plan leaving little time for study and analysis. The projections contained appear to be quite inadequate in that 1) they average congestion over 3-hour time bands, which materially reducing the impact of congestion and 2) they do not model junctions.
- The “Assessment” shows that congestion will worsen significantly over the period of the Plan even if all the proposed and aspirational infrastructure is built, surely this cannot be seen to be acceptable.
- The Strategic Housing Market Need (SHMA) attempts to justify an Objective Assessed Need (OAN) based on a very aggressive desire for economic growth in the borough. No case is made that such growth is sustainable. The assumptions and estimates are opaque and have not been adequately scrutinized by Councillors. Consequently people have to take on trust the work of a consultant. In any case, political events have overtaken the SHMA.
The number and complexity of the documents in the evidence base make reading, understanding, analysis and assimilation extremely difficult.

After long and careful consideration to the proposed Guildford Borough Council ‘New Local Plan’ I would like to OBJECT strongly to a number of the council’s recommendations. If you continue with the new plan in full you will destroy and erode an area that by the council’s own admission is considered an area of natural beauty? Why?

GUILDFORD BOROUGH LOCAL PLAN

PROPOSED SUBMISSION: STRATEGY AND SITES 2013 - 2033  WRITTEN REPRESENTATIONS ON BEHALF OF PEGASUS LIFE

These representations have been prepared on behalf of our Client, Pegasuslife, and set out comments in response to Guildford Borough Council's (GBC) Proposed Submission Local Plan Strategy and Sites consultation (PSLP, June 2016).

These representations have been prepared in objective terms and assessed against the prevailing planning policy framework, namely paragraph 182 of the National Planning Policy Framework (March 2012) that requires a Local Planning Authority to produce a Plan that is:

- Positively prepared - the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development;
- Justified - the plan should be the most appropriate strategy, when considered against the reasonable alternative, based on proportionate evidence;
- Effective - the plan should be deliverable over its period and based on effective joint working on cross-boundary strategy priorities; and
- Consistent with national policy - the plan should enable the delivery of sustainable development in accordance with the policies in the

I am an employee of The University of Surrey who lives locally and am writing in support of the Local Plan and in support of the University of Surrey's part in that plan.

The University plans are robust, professional and show genuine smart growth; they support sustainable transport, relieve critical infrastructural issues and deliver high levels of employment and affordable housing. Those plans need to be prioritised within the Local Plan.

Introduction

Gladman Developments Ltd (Gladman) specialise in the promotion of strategic land for residential development and associated community infrastructure. From this experience, Gladman understand the need for the planning system to deliver the housing and economic needs of an area, whilst responding positively to the wider opportunities for growth.
This submission provides Gladman Developments’ written representations to the submission version of the Guildford Local Plan (strategy and sites). The plan will be followed by a part 2 plan considering issues relating to development management policies.

The plan is at submission stage and therefore has already been subject to public consultation. This submission draft of the plan is one that the Council should consider ‘sound’, which means it should be:

- Positively prepared
- Justified
- Effective
- Consistent with national policy

Gladman have considered the documentation and accompanying sustainability appraisal prepared by the Council, which support the submission version of the Guildford Local Plan. This representation outlines some brief comments from Gladman with regard the Councils approach to its constraints and its establishment of its FOAHN, and the implications this may have for neighbouring authorities, the housing market area and discussions being undertaken through the Duty to Cooperate.

1 EXECUTIVE SUMMARY

i. This submission provides Gladman Developments’ written representations on the Guildford Borough Council Proposed Submission Local Plan Draft for Consultation (regulation 18).

ii. Gladman specialise in the promotion of strategic land for residential development, with associated community infrastructure. These representations concern the following matters:

- Duty to Cooperate
- Sustainability Appraisal
- Vision
- Housing Numbers
- Site Allocations
- Evidence Base

iii. At this stage of the plan preparation process, Gladman consider that there are number of areas the Council will need to address in order to be able to deliver a sound plan, most importantly the housing requirement being planned for.

2 INTRODUCTION

2.1 Context

2.1.1 Gladman Developments specialise in the promotion of strategic land for residential development with associated community infrastructure. This submission provides Gladman Developments’ representations on the Guildford Proposed Submission Local Plan Draft for Consultation (regulation 18).

2.1.2 Through this submission Gladman have highlighted several issues with the Guildford Proposed Submission Local Plan in its current form. We submit that the plan will need to reconsider some of its policies and ensure that its evidence
base is up to date and robust in light of changing circumstances and the potential changes brought about by the Housing White Paper.

2.1.3 To ensure a sufficient supply of deliverable and developable sites and to meet Guildford’s and the HMA housing needs in full, we submit that the plan should be seeking to identify additional sites, and that the process for identifying the sites currently within the plan is in need of further explanation and consideration.

2.1.4 The National Planning Policy Framework (NPPF) sets out four tests that must be met for Local Plans to be considered sound. In this regard, we submit that in order to prepare a sound plan it is fundamental that it is:

- Positively Prepared – the Plan should be prepared on a strategy which seeks to meet objectively assessed development and infrastructure requirements including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development.
- Justified – the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on a proportionate evidence base.
- Effective – the plan should be deliverable over its period and based on effective joint working on cross-boundary strategic priorities; and
- Consistent with National Policy – the plan should enable the delivery of sustainable development in accordance with the policies in the Framework.

2.1.5 The current consultation is on proposed changes, as such this representation should be considered in the context of previous submissions made by Gladman.

3 NATIONAL PLANNING POLICY

3.1 National Planning Policy Framework and Planning Practice Guidance

3.1.1 The NPPF has been with us now for over five years and the development industry has experience with its application and the fundamental changes it has brought about in relation to the way the planning system functions. The Framework sets out the Government’s goal to ‘significantly boost the supply of housing’ and how this should be reflected through the preparation of Local Plans. In this regard, it sets out specific guidance that local planning authorities must take into account when identifying and meeting their objectively assessed housing needs:

“To boost significantly the supply of housing, local planning authorities should:

- Use their evidence base to ensure that their Local Plan meets the full, objectively assessed needs for market and affordable housing in the housing market area
- Identify and update annually a supply of specific deliverable sites sufficient to provide five years’ worth of housing against their housing requirements…”
- Identify a supply of specific, developable sites or broad locations for growth, for years 6-10, and where possible for years 11-15” (Paragraph 47)

3.1.2 The starting point of identifying objectively assessed housing needs is set out in paragraph 159 of the NPPF, which requires local planning authorities to prepare a Strategic Housing Market Assessment (SHMA), working with neighbouring authorities where housing market areas cross administrative boundaries. It is clear from the Framework that the objective assessment of housing needs should take full account of up-to-date and relevant evidence about the economic and social characteristics and prospects of the area, with local planning authorities ensuring that their assessment of and strategies for housing and employment are integrated and take full account of relevant market and economic signals (paragraph 158).

3.1.3 Once a local authority has identified its objectively assessed needs for housing these needs should be met in full, unless any adverse impacts would significantly and demonstrably outweigh the benefits of doing so (paragraph 14). Local planning authorities should seek to achieve each of the economic, social and environmental dimensions of sustainable development, and net gains across all three. Adverse impacts on any of these dimensions should be avoided. Where adverse impacts are unavoidable, mitigation or compensatory measures may be appropriate (paragraph 152).
3.1.4 As the Council will be aware the Government published its final suite of Planning Practice Guidance (PPG) on the 6th March 2014, clarifying how specific elements of the Framework should be interpreted when preparing their Local Plans. The PPG on the Housing and Economic Development Needs in particular provides a clear indication of how the Government expects the Framework to be taken into account when Councils are identifying their objectively assessed housing needs. Key points from this document include:

- Household projections published by the Department for Communities and Local Government should provide the starting point estimate of overall housing need
- Plan makers should not apply constraints to the overall assessment of need, such as limitations imposed by the supply of land for new development, historic underperformance, infrastructure or environmental constraints.
- Household projection based estimates of housing need may need adjusting to reflect factors affecting local demography and household formation rates which are not captured by past trends, for example historic suppression by under supply and worsening affordability of housing. The assessment will need to reflect the consequences of past under delivery and the extent to which household formation rates have been constrained by supply.
- Plan makers need to consider increasing their housing numbers where the supply of working age population is less than projected job growth, to prevent unsustainable commuting patterns and reduced local business resilience.
- Housing needs indicated by household projections should be adjusted to reflect appropriate market signals, as well as other market indicators of the balance between the demand for and supply of dwellings.
- The more significant the affordability constraints (as reflected in rising prices and rents, and worsening affordability ratio) and the stronger other indicators of high demand (e.g. the differential between land prices), the larger the improvement in affordability needed, and the larger the additional supply response should be.
- The total affordable housing need should be considered in the context of its likely delivery as a proportion of mixed market and affordable housing developments, given the probable percentage of affordable housing to be delivered by market housing led developments. An increase in the total housing figures included in the local plan should be considered where it could help to deliver the required number of affordable homes.

3.2 Housing White Paper – Fixing our broken housing market

3.2.1 A government Housing White Paper was published in February 2017, and included a consultation on changes to planning policy and legislation in relation to housing, sustainable development and the environment, which expired on the 2nd May 2017. Government White Papers are often Command Papers that either contain future legislation or proposals for future legislation, therefore they provide a very clear indication of the direction of travel for government policy, which in this instance relates to Housing. In order to safeguard its local plan position, the Council will need to consider the emerging plan against the points raised within the White Paper, and monitor the progress of the consultation as the proposals within it materialise as potential reforms to the planning system. Given that the intention of the document is to have some of the proposed reforms to come into force by November 2017, it is highly likely that a number of its measures will be relevant considerations prior to the adoption of the plan.

3.2.2 The title of the White Paper makes apparent that the government considers the housing market to be broken, it is also clear from the document forward by the Prime Minister that the cost of housing is a key part of why the housing market is considered broken. In the foreword the Prime Minster states:-

“Today the average house costs almost eight times average earnings – an all-time record.”
“In total more than 2.2 million working households with below-average incomes spend a third or more of their disposable income on housing.”
“We need to build many more houses, of the type people want to live in, in the places they want to live. To do so requires a comprehensive approach that tackles failure at every point in the system.” (Foreword from the Prime Minister)

3.2.3 The second foreword from the Secretary of State adds further to the governments thinking, particularly on the need to build new homes now, it states:-

“This country doesn’t have enough homes. That’s not a personal opinion or a political calculation. It’s a simple statement of fact”
“Soaring prices and rising rents caused by a shortage of the right homes in the right places has slammed the door of the housing market in the face of a whole generation.”
“That has to change. We need radical, lasting reform that will get more homes built right now and for many years to come.”
3.2.4 The White Paper outlines further potential reforms to the plan making process, OAN methodology, and Green Belt consideration and housing delivery tests, amongst others. Gladman will point out key aspects from the White Paper in relevant sections of this representation.

3.2.5 Whilst the document is a White Paper, the Council must give consideration to what it is saying, and how it outlines the need for reform and the need for change in the planning system. It is clear that not delivering the identified housing needs of an area or a HMA is not an option moving forward.

5 SUSTAINABILITY APPRAISAL

5.1.1 In accordance with Section 19 of the 2004 Planning and Compulsory Purchase Act, policies set out in Local Plans must be subject to Sustainability Appraisal (SA). Incorporating the requirements of the Environmental Assessment of Plans and Programmes Regulations 2004, SA is a systematic process that should be undertaken at each stage of the Plan’s preparation, assessing the effects of the Local Plan’s proposals on sustainable development when judged against reasonable alternatives.

5.1.2 The Guildford Local Plan should ensure that the results of the SA process clearly justify its policy choices. In meeting the development needs of the area, it should be clear from the results of the assessment why some policy options have been progressed, and others have been rejected. Undertaking a comparative and equal assessment of each reasonable alternative, the Guildford Local Plans decision making and scoring should be robust, justified and transparent.

5.1.3 Gladman are concerned that in a previous iteration of the plan the sustainability appraisal supported a significantly more positive approach with the Council considering itself able to deliver 14% above its then significantly higher housing requirement. The current consultation is seeking to deliver a much lower number and Gladman suggest that this approach cannot be justified.

5.1.4 Given the issues expressed above with regard to the Duty to Cooperate, and the need for the Council to consider unmet housing needs the Councils SA is not fit for purpose in justifying it’s substantially lower housing requirement.

6 OBJECTIVELY ASSESSED HOUSING NEED

6.1 Background

6.1.1 The process of undertaking an OAN is clearly set out in the Framework principally in §14, §47, §152 and §159 and should be undertaken in a systematic and transparent way to ensure that the plan is based on a robust evidence base.

- 6.1.2 The starting point for this assessment requires local planning authorities to have a clear understanding of housing needs in their area. This involves the preparation of a SHMA working with neighbouring authorities where housing market areas cross administrative areas as detailed in §159 of the Framework. The Framework goes on to set out the factors that should be included in a SHMA including identifying “the scale and mix of housing and the range of tenures that the local population is likely to need over the plan period which:
  - Meets household and population projections taking account of migration and demographic change;
  - Addresses the need for all types of housing including affordable housing and the needs of different groups in the community (such as, but not limited to, families with children, older people, people with disabilities, service families and people wishing to build their own homes); and
  - Caters for housing demand and the scale of housing supply necessary to meet this demand.”

6.1.3 Key points that are worth noting from the above is that the objective assessment should identify the full need for housing before the Council consider undertaking any process of assessing the ability to deliver this figure. In addition, §159 specifically relates to catering for both housing need and housing demand within the authority area. It is worth pointing out that any assessment of housing need and demand within a SHMA must also consider the following factors: Falling household formation rates; net inward migration; the need to address the under provision of housing from the previous local plan period; the results of the Census 2011; housing vacancy rates including the need to factor in a housing
vacancy rate for churn in the housing market; economic factors to ensure that the economic forecasts for an area are supported by sufficient housing to deliver economic growth; off-setting a falling working age population by providing enough housing to ensure retiring workers can be replaced by incoming residents; addressing affordability and delivering the full need for affordable housing in an area.

6.1.4 Of particular importance is the need to consider market signals. The consideration of market signals is one of the core planning principles considered in §17 of the Framework, which states:

‘...Plans should take account of market signals, such as land prices and housing affordability, and set out a clear strategy for allocating sufficient land which is suitable for development in their area, taking account of the needs of the residential and business communities.’

6.1.5 Of critical importance is what the Framework goes onto say in §158 in the section discussing Plan Making. It states here:

‘Local planning authorities should ensure that their assessment of and strategies for housing, employment and other uses are integrated, and that they take full account of relevant market and economic signals.’

6.1.6 Market signals are therefore at the very core of what the Framework is trying to achieve in promoting sustainable development and boosting the supply of housing land.

6.1.7 The formal publication of the Planning Practice Guidance (PPG) in March 2014 gives further explanation to what the Framework means with regard to market signals, and sets out, in a range of paragraphs, the way in which local planning authorities should go about factoring in relevant market signals in arriving at their OAN. §19 and §20 of the PPG gives guidance on what market signals should be taken into account and how plan makers should respond to these market signals. The below extracts identify some particularly pertinent points.

‘The housing need number suggested by household projections (the starting point) should be adjusted to reflect appropriate market signals, as well as other market indicators of the balance between the demand for and supply of dwellings. Prices of rents rising faster than the national/local average may well indicate particular market undersupply relative to demand.’

6.1.8 The paragraph goes on to indicate that these factors would include, but should not be limited to, land prices, house prices, rents, affordability, rates of development and overcrowding. However, given what the Framework says at §17, quoted above, it seems clear that particular consideration should be given to affordability.

6.1.9 In order to consider how market signals should be taken forward §20 identifies some key concepts:

‘Appropriate comparisons of indicators should be made. This includes comparison with longer term trends (both in absolute levels and rates of change) in the: housing market area; similar demographic and economic areas; and nationally. A worsening trend in any of these indicators will require upward adjustment to planned housing numbers compared to ones based solely on household projections.’ (emphasis added)

6.1.10 It is therefore clear that where market signals are apparent (in any of the indicators assessed), there is an absolute and clear direction that an upward adjustment to housing numbers is required. It is also clear that both the absolute level of change and the rates of change are considerations, and that local planning authorities need to carefully bench mark themselves against other areas. This should not simply be a case of considering neighbouring authorities but should look at, as well as these, local authorities on a national basis, if the demographic and economic indicators are relevant. Gladman are firmly of the view that considering comparisons purely against neighbouring authorities is not sufficiently robust and does not address the underlying issues which both the Framework and PPG are trying to tackle with regard to housing.

6.1.11 What is of further importance when considering these issues is the period of time analysed when considering both relative and absolute change. It has become apparent, in our consideration of a number of plans that many local authorities choose to look at periods of time that are not fully representative of the depth of the housing crisis which we are currently within.
6.1.12 The problems are noted in Fixing the Foundations: Creating a more prosperous nation published by HM Treasury in July 2015. In paragraph 9.7 the report states:
‘There remains more to do. As the London School of Economics (LSE) Growth Commission found, ‘under supply of housing, especially in high-growth areas of the country has pushed up house prices. The UK has been incapable of building enough homes to keep up with growing demand.’

6.1.13 Gladman are therefore of the view that local planning authorities must take a long term view when considering affordability and consider the relative and absolute change over a long term 15-20 year period, which coincides with the normal time span of a Local Plan. Authorities should assess, as a constituent part of their OAN, how they can improve affordability over the life time of a plan to a point where affordability is more in line with average earnings and affordable mortgage lending rates. They should assess a level of housing over the 15-20 year plan period that would enable this step change and consider its deliverability in the plan. Only through planning for significant housing growth can local authorities realistically tackle market signals in the way advocated by the PPG and tackle the affordability and housing crisis.

6.1.14 The need to identify the full OAN before considering any issues with the ability of a Local Planning Authority to accommodate that level of development has been confirmed in the High Court. Most notably in Solihull Metropolitan Borough Council v (1) Gallagher Homes Limited (2) Lioncourt Homes Limited where it was considered that arriving at a housing requirement was a two stage process and that first the unconstrained OAN must be arrived at. In the judgment it was stated:

“The NPPF indeed effected a radical change. It consisted in the two-step approach which paragraph 47 enjoined. The previous policy’s methodology was essentially the striking of a balance. By contrast paragraph 47 required the OAN [objectively assessed need] to be made first, and to be given effect in the Local Plan save only to the extent that that would be inconsistent with other NPPF policies. […] The two-step approach is by no means barren or technical. It means that housing need is clearly and cleanly ascertained. And as the judge said at paragraph 94, “[h]ere, numbers matter; because the larger the need, the more pressure will or might be applied to [impinge] on other inconsistent policies”.

6.1.15 Therefore, following the exercise to identify the full, OAN for housing in an area, “Local planning authorities should seek opportunities to achieve each of the economic, social and environmental dimensions of sustainable development, and net gains across all three. Significant adverse impacts on any of these dimensions should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where adverse impacts are unavoidable, measures to mitigate the impact should be considered. Where adequate mitigation measures are not possible, compensatory measures may be appropriate.” (NPPF §152)

6.1.16 This statement clearly sets out that local planning authorities should seek to deliver the full OAN and that this should be tested through the evidence base. Only where the evidence shows that this is not achievable should they then test other options to see if any significant adverse impacts could be reduced or eliminated by pursuing these options. If this is not possible then they should test if the significant adverse impacts could be mitigated and where this is not possible, where compensatory measures may be appropriate.

6.1.17 The final stage of the process is outlined in §14 and involves a planning judgement as to whether, following all of the stages of the process outlined above, “Local Plans should meet OAN, with sufficient flexibility to adapt to rapid change, unless:

- specific policies in this Framework indicate development should be restricted.”
- any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this framework taken as a whole; or

6.1.18 It is also worth noting that the final part of this sentence refers to footnote 9 of the Framework which sets out the types of policies that the Government consider to be restrictive. These include:

“sites protected under the Birds and Habitat Directive (see paragraph 119) and/or designated as Sites of Special Scientific Interest; land designated as Green Belt, Local Green Space, an Area of Outstanding Natural Beauty, Heritage Coast or within a National Park (or the Broads Authority); designated heritage assets; and locations at risk of flooding or coastal erosion”.

Section page number
Page 305 of 321

Document page number
306
6.1.19 Although this list is not exhaustive it is clear that local landscape designations, intrinsic value of the countryside, the character of areas, green gaps etc. are not specifically mentioned as constraints by the Framework.

6.1.20 The PPG contains guidance to support local authorities in objectively assessing and evidencing development needs for housing (both market and affordable) and economic development. This document supports and provides further guidance on the process of undertaking such assessments, in addition to what is set out in the Framework.

6.2 Objective Assessment of Housing Needs for Guildford

6.2.1 Gladman are concerned with the OAN figure for Guildford and the robustness of the evidence to support it. The SHMA undertaken by GL Hearn for the authorities of Guildford, Waverley and Woking was published in 2016 which set out the full OAN for Guildford to be 693 dwellings per annum. This considered it was necessary to include an uplift to the 2012 household projections to support economic growth, improve affordability and student growth impact. Whilst a fairly positive assessment it was considered that to truly improve affordability this uplift would need to be taken significantly further than the 5% as proposed.

6.2.2 Following consultation on the draft Local Plan, an addendum to the SHMA has published solely for Guildford which is not a full assessment of the HMA. Whilst increasing the affordability uplift, still significantly less than the level it should be, this addendum has significantly reduced the uplift to support economic growth resulting in an OAN less than previously consulted on. It is considered that this is not a robust figure that is positive, justified or effective.

6.2.3 It is expected that the uplift for market signals should be at least 25%, equal to that of neighbouring Waverley, following examination of the Waverley Local Plan where the Inspector considered this to be a more appropriate figure. It is also not considered appropriate to reduce the economic growth uplift and it is considered that the Council are planning for significantly less than what should be the full OAN for Guildford.

6.2.4 We do consider that the SHMA is a robust piece of evidence, nor do we consider the proposed reduction in the housing requirement justified.

----------

8 CONCLUSIONS

8.1.1 Having considered the Guildford Submission Local Plan, Gladman are concerned about a range of matters including the housing requirement, evidence base, and delivery of some site allocations.

8.1.2 The plan must be positively prepared, effective, justified and consistent with national policy to be found sound at examination. In the first instance, the Council should look again at its housing requirement and subsequent site allocations, and crucially the assessments that underpin the decisions made.

8.1.3 It is apparent that there are substantial problems with the OAN for Guildford and the subsequent housing requirement derived from it. The Council is failing to meet its requirements in meeting it’s OAN and in contributing to meeting the already known unmet housing needs of the HMA. A number of issues with the GL Hearn OAN methodology were exposed during the examination of the Waverley Local Plan Part 1, these have led to a significant increase in the housing requirement for Waverley. We consider that such an upward adjustment is also required in Guildford. The plan as written is unsound as it is not adequately planning to meet its housing requirements.

8.1.4 Furthermore even should the Council wish to put forward the argument that the constraints of the district mean that it cannot meet its housing requirement, when this requirement has been properly assessed, there is currently insufficient evidence to justify this position. Indeed the Councils previous iteration of the plan was accompanied by evidence that suggested the previously planned for housing figure was both sound and acceptable.

8.1.5 The Guildford Local Plan is therefore considered not to be sound.

Final comments
Once again, thank you for contacting us. Our comments are based on our available records and the information submitted to us. Please quote our reference number, letter subject and letter date in any future correspondence.

We would like to work with you further on your Local Plan to ensure that all of the potential issues are satisfactorily addressed and to enable Guildford Borough to have a robust, effective local plan that is reflective of national planning policy and your local evidence base.

Attached documents:

---

I support both responses submitted from the Downsedge Residents Association and Guildford Residents Association and similarly do not feel that this plan is ready for an inspector

Attached documents:

---

I have been following the debate on the Local Plan through the Surrey Advertiser, attendance at a Parish meeting and leaflets that have come through our letter box. No information has been received from GBC despite their promotion of the Local Plan. The Council Leader (Mr. Spooner) and his Deputy (Mr. Furniss) did attend the Send Parish meeting which was good of them. Unfortunately it did nothing to arrest local fears and concerns. The inability to name the developers that have been liaising closely with the Council and the lack of willingness to show the calculations that support the housing number added to the general stench arising from the last minute insertion of Garlick’s Arch into the Local Plan. I like to believe that corruption is something that happens elsewhere but this the Parish meeting left me uncertain. The Deputy’s belief that a motorway style junction is a good idea because it would help build a tunnel under Guildford is demented.

I understand that there is a format that has to be followed to register an objection to the Local Plan otherwise you are simply ignored. But to be clear, I utterly object to developments that contribute to urban sprawl. I’ve spent a lot of time in Houston and have observed at close hand what uninhibited building does. The idea of building on the greenbelt might bring some short term gain to a few developers but we all lose in the long term as Guildford sprawls up the A3 towards the M25. Who are we to wreak destruction on the countryside and leave concrete for those who come after us? In the short term we all lose as the overloaded rail and roads deteriorate further.

Attached documents:
Guildford Borough Transport Strategy 2016

This makes a disappointing read as an initial search for Cycling policies finds them hidden away with Walking in an Active Modes Strategy. These are so important for the future of a healthy, pollution reduced, congestion free Guildford that they should each be given their own separate strategies.

However we comment on the various strategies as listed and request that all bullet points below are incorporated in these strategies:

3 Our Rail Strategy

- The safe cycle storage at Guildford Station should be greatly increased to 2000 bikes and include CCTV cameras for security.
- All other stations should increase safe cycle storage and security.
- A ‘Boris’ bike scheme with both normal and electric bikes should be introduced at Guildford Main and London Road stations to compliment the small Brompton Scheme at the Main station not replace it.
- Cycle access needs to be improved to all railway stations to provide segregated access for cyclists.
- More cycle storage needs to be provided on trains.
- A cycle hub is listed as an improvement with no explanation what this involves? Please explain.

4 Our Strategic Road Network Strategy

- The A3 improvements should include provision for a segregated Cycle super highway from Guildford to London and in the future to Portsmouth.
- The strategic Wooden Bridge footway over the A3 and A25 needs replacing with a wider joint cycling and walking bridge.

5 Our Local Road Network Strategies

Our local roads and parking strategy

- All main A roads through Guildford Borough should have segregated safe two way cycleways to replace the existing footpaths and be shared with pedestrians, eg A25 to Dorking, A246 to Leatherhead, A31 to Farnham, Woking Road and Worplesdon Road.
- Park and rides should have ‘Boris’ bikes (normal and electric) installed with segregated Cycle routes to the Town Centre
- All schools should have Cycle to School plans and all roads within one mile of schools should be 20mph zones

Our bus transit strategy

- The sustainable movement corridor SMC must not be just for buses but must include segregated cycle lanes as well
- There should be cycle storage and Boris bikes at the Main bus station

Our active modes strategy should be split into our cycling strategy and our walking strategy

- Guildford needs to create an integrated safe cycle network throughout the Borough.
- This network needs to start with safe routes through the town centre which need to be designed in accordance with the Master Plan Options for the Town Centre gyratory system. However in the interim period safe routes
must be provided for cyclists to avoid the gyratory and these require in some cases sanctioning shared use of pavements with pedestrians.

- A Town wayfinding cycle map must be provided showing the full network. This should be positioned at strategic notice boards around the town ie the station and also be available as leaflets.
- We support the sustainable movement corridor SMC concept but need to be sure that this will include segregated two way cycle lanes
- On certain routes the sharing of pavements with pedestrians should be encouraged but cyclists need to practice safe cycling etiquette to achieve this and persuade pedestrians to share their surface
- The various cycle routes in the villages should all be integrated into the proposed network such that all villages are linked in.
- New development must incorporate internal safe cycling routes and also contribute financially to the cycling network

7 Our road safety strategy

- Improved facilities are promised for pedestrians and cyclists. Unfortunately as cycling casualties are increasing so is the urgency for the gyratory and the full cycling network to be implemented. Funds must be provided to enable this work to be completed within ten years, not fifteen years as proposed.

Summary

We applaud Guildford for the introduction of the Guildford Borough Transport Strategy 2016 but feel that Cycling is too far down the list of priorities. If Guildford wants to reduce congestion, reduce pollution, and improve the health of its inhabitants, the quickest and most cost effective way is to improve its cycling infrastructure to create a fully integrated network of safe cycle lanes and cycleways. As in London, this can supply the town with a tenfold return on investment, and therefore needs to be implemented immediately as a top priority.

Build it and we will ride it!

Comment ID: SQLP16/2065  Respondent: 15705857 / GRH Hampshire  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

It is counter to Government policy on consultation. Consultations should be simple and easy to understand by ordinary people. Your document is too dense, full of detail and impossible to comprehend.

Attached documents:

Comment ID: SQLP16/2102  Respondent: 15724353 / Arvnid Parmar  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.
The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

**QUESTION 1: THE EVIDENCE BASE AND SUBMISSION DOCUMENTS**

The majority of the Evidence Base is considered robust, although the Council have not published an update on CIL. This will be a key document in assessing and evaluating the deliverability of sites and other plan commitments, in particular the level of affordable housing sought from new development.

Our client is particularly concerned that the 40% target for affordable housing provision has been determined on the basis of assumptions from the Preliminary Draft of the CIL Charging Schedule. Furthermore, the affordable housing threshold does not take account of National Guidance (see additional comments on Policy H2 below).

Our client would also question the robustness of the Viability and Affordable Housing Study, Peter Brett Associates, December 2014 which was prepared in the context of a Draft affordable housing policy which had already been set and has now been amended and utilises the preliminary CIL figures.

The Council also acknowledge at Appendix D of the Draft Plan that the Local Housing Needs Surveys for settlements are still being updated. This work will be key in understanding the specific balance of housing needs; including specialist housing and care accommodation (see Policy H1). In the absence of this work the Council must ensure that there is flexibility in the allocated uses in Site Allocations to ensure that specialist needs are met. Our client would draw attention to the fact that no provision has been made for specialist retirement or care development accommodation in the Ash and Tongham area, despite the fact that 1,320 units are proposed in this location.

It is imperative that the Council ensure that:

- That the Evidence Base guidance is reflected in the policy approach adopted unless clear justification for departing from the Evidence base is provided;
- That the Evidence Base relied upon is up to date;
- That the Evidence Base is published at an early enough stage in the process and that stakeholders are afforded an opportunity to comment on it before key policy decisions are fixed.
UNSOUND:

The absence of an up to date CIL charging schedule, taking account of responses to the 2015 consultation means that the Council cannot proceed with confidence that the 40% affordable housing target will be achievable.

The absence of the Local Housing Needs Surveys means that specific assessments on housing need or specialist accommodation cannot be made. Accordingly to ensure that the Plan is EFFECTIVE Site Allocations must be flexible in order to allow for a balance of uses to be provided.

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Answer: ()

The majority of the Evidence Base is considered robust, although the Council have not published an update on CIL. This will be a key document in assessing and evaluating the deliverability of sites and other plan commitments, in particular the level of affordable housing sought from new development.

Our Client is particularly concerned that the 40% target for affordable housing provision has been determined on the basis of assumptions from the Preliminary Draft of the CIL Charging Schedule, 2015. Furthermore, the affordable housing threshold does not take account of National Guidance (see additional comments on Policy H2 below).

Our Client would also question the robustness of the Viability and Affordable Housing Study, Peter Brett Associates, December 2014 which was prepared in the context of a Draft affordable housing policy (now amended in the Proposed Submission Draft Local Plan) and which utilises the preliminary CIL figures.

The Council also acknowledge at Appendix D of the Draft Plan that the Local Housing Needs Surveys for settlements are still being updated. This work will be key in understanding the specific balance of housing needs and the specific local housing requirements.

It is imperative that the Council ensure that:

- The Evidence Base guidance is reflected in the policy approach adopted unless clear justification for departing from the Evidence base is provided;
- The Evidence Base relied upon is up to date;
- The Evidence Base is published at an early enough stage in the process and that stakeholders are afforded an opportunity to comment on it before key policy decisions are fixed locally. This is particular relevant in evaluating the viability of the affordable housing threshold in isolation from a draft CIL charging schedule.

UNSOUND:

The absence of an up to date CIL charging schedule, taking account of responses to the 2015 consultation, means that the Council cannot proceed with confidence that the 40% affordable housing target will be achievable.

The absence of the Local Housing Needs Surveys means that specific assessments on housing need, local housing requirements or specialist accommodation cannot be made. Accordingly, to ensure that the Plan is EFFECTIVE Site Allocations must be flexible in order to ensure that local need is satisfied and the appropriate balance of uses are provided

Attached documents:
QUESTION 1: THE EVIDENCE BASE AND SUBMISSION DOCUMENTS

1.9 The Council have still not published an update on CIL.

1.10 This will be a key document in assessing and evaluating the deliverability of sites and other plan commitments, in particular the level of affordable housing sought from new development and the delivery of new infrastructure. The importance of infrastructure provision is highlighted by paragraph 2.10a which recognises that ‘Pressure on existing infrastructure and additional stress caused by planned growth must be addressed…’ However, in the absence of a joint consultation on CIL it is not possible to critically assess how and when infrastructure will be facilitated and the impact this could have on the delivery of new housing sites.

1.11 Our Client is particularly concerned that the currently proposed 40% target for affordable housing provision has been determined on the basis of assumptions from the Preliminary Draft of the CIL Charging Schedule, 2015.

1.12 Our Client would also continue to question the robustness of the Viability and Affordable Housing Study, Peter Brett Associates, December 2014 which was prepared in the context of a Draft affordable housing policy (now amended in the Proposed Submission Draft Local Plan) and which utilises the preliminary CIL figures.

1.13 It is imperative that the Council ensure that:

- The Evidence Base guidance is reflected in the policy approach adopted unless clear justification for departing from the Evidence base is provided;
- The Evidence Base relied upon is up to date;
- The Evidence Base is published at an early enough stage in the process and that stakeholders are afforded an opportunity to comment on it before key policy decisions are fixed locally. This is particular relevant in evaluating the viability of the affordable housing threshold in isolation from a draft CIL charging schedule.

UNSound: The absence of an up to date CIL charging schedule, taking account of responses to the 2015 and 2016 consultations, means that the Council cannot proceed with confidence that the 40% affordable housing target will be achievable.

Attached documents:

ADDENDUM TO GUILDFORD BOROUGH PROPOSED SUBMISSION LOCAL PLAN “JUNE 2016” STRATEGIC HIGHWAY ASSESSMENT REPORT (SHAR)

It is recognised that the transport evidence base (SHAR 2016) has not been updated, with no further transport modelling taking place.

The Addendum document notes that “key changes made to proposed site policies and to the programme of transport schemes in the Draft Local Plan, as identified in the Draft Local Plan 2017, are not considered likely to change the conclusions of the SHAR 2016”. The SHAR 2016 concludes that: “the results of this assessment indicate that should the
RIS schemes not be forthcoming then the residual cumulative impact of the Proposed Submission Local Plan on the highway network could be considered severe”.

As noted above, it would be helpful to understand in more detail which developments are expected to come forward ahead of a potential A3 improvement scheme and which developments may be dependent upon a scheme. The management and phasing of the Local Plan developments will be critical to maintain the safe operation and performance of the SRN.

TRANSPORT TOPIC PAPER JUNE 2017

1. Evidence Base

With regard to the Addendum Strategic Highway Assessment Report it is noted that “GBC, with Surrey County Council, we will be undertaking new supplementary technical work prior to the submission of the plan to the Secretary of State. This will respond to the remaining issues raised by Highways England on the strategic highway assessment”.

Highways England looks forward to working with GBC and Surrey County Council to take forward the supplementary technical work. This would likely include outputs from the forthcoming update to Surrey SINTRAM model and be used to inform updates to the Infrastructure Delivery Plan supporting the Local Plan. Further the supplementary technical work could help inform a Statement of Common Ground or similar between Highways England, Surrey County Council and GBC.

1. Appraisal and Local Plan

GBC has included Policy ID2 ‘Supporting the Department for Transport’s Road Investment Strategy’ within the Local Plan and text within the Transport Topic Paper between paragraphs 5.33 and 5.57. With regard to the current status of the RIS schemes see our comments on Policy ID2 above.

Paragraph 5.89 notes that “in the early years of the new Local Plan, the delivery of planned development and the impact of new development traffic on the SRN is likely to be an important ongoing consideration as the existing SRN suffers from significant congestion during peak periods. Highways England’s main concern is road safety and any proposal that adds significant levels of traffic to existing congested areas will need to be carefully assessed through the development management process for planning applications to ensure that it does not have a severe impact on road safety”.

Paragraph 5.90 notes that “the delivery of planned development has been proposed to ensure that the sites, and phasing of sites, that will be delivered in the first years of the new Local Plan, and therefore in the absence of the Department for Transport’s RIS Road Period 1 and/or Road Period 2 schemes are located where traffic associated with them will have the least impact on the SRN’s links and junctions where current congestion issues are the most acute”.

As noted above, it would be helpful to understand in detail which developments are expected to come forward ahead of a potential A3 scheme and which sites are dependent upon a scheme. This is required to allow critical management and phasing of the Local Plan developments to take place.

SUSTAINABILITY APPRAISAL

Highways England has no comments on the Sustainability Appraisal, as the broad transport conclusions remain unchanged.

Attached documents:
I strongly object to the Guildford Borough Council Local Plan.

The document includes a number of objectives:

- Preservation of the AONB and Green Belt
- Sustainable Development
- Development predicated on Infrastructure Improvement
- Provision of Affordable Housing

**Comment ID:** pslp17q/656  **Respondent:** 16209409 / Natural England (Amy Steel)  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

**Answer:** ()

Habitats Regulations Assessment

Having read through the updated document to take into account chapter 12, Natural England supports the overall conclusions of the assessment and can advise that the evidence used, particularly relating to Air Pollution is entirely appropriate.

We have however had a conversation with Guildford Borough Council during this consultation period to discuss the readability of certain sections within the document. Natural England expects Guildford Borough Council to amend these sections before submission to the inspector which we would be happy to provide further comments on. Despite this, it is important to note that this will not alter the overall conclusions of the assessment which as stated above we are supportive of.

Please see attached Annex A for our advice.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

**Answer:** (Yes)

Given three forecasts as cited in Guildford Borough Land Availability Assessment(LAA) Feb.2016 of the new local plan, has sufficient focus been given to their overall impact on its efficacy? eg Patterns of Retail, Leisure Spend a) p101, 9.7 *That capacity forecasts beyond 5 years should be treated with caution*(and growth in the internet is one factor given)b) p102, 9.11 *Notwithstanding Guildford's positive performance as noted increased competition from other major centres*(eg Kingston) as well as, again, online shopping competition is cause for concern and c) p105, 9.27 *The impact of large retail development, eg North Street circa 47,500m squared on footfall and trade patterns across the town centre is another troubling factor.* (And I cite here Tunsgate development in the High Street)
In Appendix B, Realistic Candidates for development of the LAA (February 2016), 178, Guildford Park Car Park (160 houses) is up for development but according to the June 2017 Addendum, this has now been deleted.

In p6, Policy E7 Guildford Town Centre of the summary of key changes to the proposed submission Local Plan: Strategy & Sites (2017) it is stated 'Deletion of the Vision which came from the Town Centre Masterplan.' Does this mean the River Wey as a whole is no longer to be developed? If not, it is not clear what are the plans (if any) for this large area.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Answer: ()

The evidence base for this consultation is vastly complicated. One has to assume that it is all relevant and legal although this is far from clear. However, I cannot see how air quality and road traffic movement can improve with these huge changes to the green belt in this area.

For example, paragraph 1.1.5 excludes car access to facilities or the impact on public transport. Although this is included in the overall transport strategy, little assessment seems to have been made of the massive traffic delays on the A3 in recent years due entirely to weight of traffic. Access to the A3 and motorway network by the owners of another 400+ houses, assorted travellers and industrial traffic can hardly improve this. The Topic paper on transport speaks fine words about effective and safe travel, but seems more of an attempt to justify a huge increase in traffic and noise and air pollution which simply would not happen without these incursions into the green belt.

Comment ID: pslp17q/123  Respondent: 17256513 / Guildford Environmental Forum (Adrian Thompson)  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Answer: (Yes)

1. The Sustainability Appraisal (June 2017). This document seems to us to be adequate, up-to-date and relevant.

2. The Environmental Sustainability and Climate Change Study (updated 19.06.2017), although in many ways a very useful summary, it is somewhat out of date. We note that this Study contains very little new data since 2014 and that much of the evidence (see pages 43 to 46) dates back to 2007 to 2010. It refers on page 12 in clause 3.17 to new technical standards that will be introduced (ie in the future) in 2015. We do, however, agree with the substance of the Executive Summary of the report (even though based on evidence that may well be much more serious if it were based on more recent data):

   • Guildford Borough has higher carbon emissions than any other Surrey Borough (para 4.15 on p.18), mainly as a result of high road transport emissions.
   • Guildford Borough's carbon emissions in respect of household energy consumption exceed even those of Scotland, where the climate is much cooler (para 4.33) on p 22.
   • Small scale renewable energy production is lower in Guildford Borough than other parts of the UK (clause 4.42 on page 24).
   • Our water consumption is very high compared to England and Wales, while availability is low (clause 4.46 on page 25).
The potential for extreme climate change, and the possibility that change may come quickly, as the 2020s projections show, means Guildford will need to make plans for adaptation to begin in this plan period (Clause 5.13 on p. 29).

3. Surrey State of Nature Report. This valuable 32 page document has been produced by Surrey Wildlife Trust on behalf of the Surrey Nature Partnership in 2017. We have found no reference to it in the Local Plan 2017, but we believe that the update on biodiversity that it contains, should be taken account of in the 2017 Local Plan. In its conclusion it states that “We are entering a new phase and scale of development to deliver housing and related infrastructure across the county. Our resources will be stretched ever tighter to ensure these proceed as sustainably as possible, by incurring no further losses to Surrey’s biodiversity but instead offering opportunities that result in a genuine net gain”. GEF would recommend that pages 24 and 25 of this Report, which discuss the importance of “Natural Capital”, should be incorporated by GBC in the Guildford Local Plan. We note that the Surrey Nature Partnership plan to produce a “Natural Capital Investment Plan” in 2017 and would recommend that GBC consider this seriously in implementing the Guildford Local Plan.

---

Comment ID: pslp17q/47  Respondent: 17276289 / Tom Newton  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Answer: (No)

1. I am concerned that despite an increase in traffic on the A3100 Burpham slip road of 15% since 2013 (per DoT Traffic count information) no consideration has been made of identifying a baseline air quality in the corner of land bounded by the A3 and the A3100 slip road. There is one primary school in this area and intense residential housing in the area but no evidence that any air monitoring, or detailed modelling has or will be done there. There are currently stationary traffic jams every weekday morning and afternoon and now at the weekends, particularly when Aldi is busy, yet your own Air quality assessment states that there are no sensitive receptors along the London road which is used to justify that ‘- Section 5.2.1 of the report:

"On London Road, where the largest changes in flows are anticipated, there are no air quality sensitive receptors located along the road, therefore significant adverse effects on air quality are not anticipated."

How can there be no sensitive receptors along the A3100 coming away into Guildford form the A3 - there are homes next to the road?

In terms of evidence this is significant flaw in accuracy and therefore conclusions with regard to air quality impacts in this area.

2. Further to this the in the Strategic Highway Assessment Report paras 4.7.7, 4.7.8 and 4.11.4 the traffic impact assessment of differing scenarios - Do nothing through to Scenario 5 show that there will be significant problems at the A3100/B2234 roundabout under all scenarios which is then not addressed anywhere - implies the main route for new residents at the Gosden Hill strategic site travelling into Guildford, existing residents, anyone coming onto Guildford southbound along the A3 and those coming into Burpham to use the proposed new southbound A3 on-slip will be stuck at that roundabout, exacerbating existing issues already prevalent there on a daily basis.

So evidence is available to show that problems with traffic will occur in the Burpham area but there is no attempt to mitigate this and no discussion of potential air quality impacts.

Document: Proposal Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Answer: (No)
Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Answer: ()

We object your plan for the following reasons:

- In view of flawed new evidence, Guildford's proposal for more than 12426 homes (plus a buffer of 1155 homes) is excessive and will result in needless loss of green belt and green character, and increased congestion, that cannot be justified in our heavily constrained borough.
- There is evidence Guildford's population growth is overestimated by about 40% because of under-recording of students leaving at the end of their studies.
- Allocating more land for development in 2017 plan will also result in Guildford being required to provide homes for Woking on our green belt.

Attached documents:

Comment ID: pslp17q/75  Respondent: 17298785 / Ian Annis  Agent:

Answer: ()

NO. There is still a gross over-estimate on the number of housing units required in the region and double the historical rate of about 350 units per year built in the area. The only minor revisions section 3.1 and S2 still shows 654 units per year or 12,426 homes and double the amount actually required in the community.

The number of units of 12,426 also contradicts badly the estimated growth of people expected in section 2.3 showing an additional 20,000 residents in the time frame, which then means an average occupancy of 1.6 - that is not what is reflected in the plans for the type of development and property sizes which are more likely to have 2 to 4 occupants per housing unit.

The exaggerated housing requirement and low occupancy rate given in your own evidence clearly shows this is a massive over-estimate on the actual number and size of developments required in this area let alone any regard to the transport infrastructure already at crisis point along the A3 and through Guildford on a regular basis.

The number of housing units must still be massively revised downwards or justification regarding the actual number of people and occupancy rate and size of units expected as these currently do not justify the size and scale of new development in the plan.

Attached documents:

Comment ID: pslp17q/158  Respondent: 17320801 / Terence O'Rourke Ltd for M&G Real Estate (Andrew Elliott)  Agent: Terence O'Rourke for M&G Real Estate (Andrew Elliott)

Answer: (Yes)

The recent additions to the evidence base are welcomed and help to demonstrate that the Local Plan evidence base is up to date.
Of particular interest to M&G is the **Guildford Retail and Leisure Study Addendum, February 2017**. This confirms that Guildford town centre accounts for most of the Borough’s forecast need for comparison goods floorspace. This reflects the centre’s strong market share of comparison goods expenditure and strength of the comparison retail offer.

Nevertheless the forecast capacity results set out in the study addendum are lower than those identified for the town centre in the 2014 retail and leisure study update covering a similar period. The identified reasons for this include lower forecasted expenditure growth Borough-wide.

The report confirms that capacity forecasts carried out over a long period of time are inherently less certain and should be treated with caution. This is principally due to the impact of economic, demographic and market trends on the key assumptions and forecasts. As a result the report authors, Carter Jonas, advise that greater weight should be placed on the short-term forecasts carried out over a three-five year period in accordance with National Planning Practice Guidance (NPPG). **M&G supports these comparison goods forecasts and findings and the appropriately emphasised caution on their use over a long time period.**

The study update also considers forecast need for new commercial leisure provision, focusing on cinema, food and beverage, and fitness and leisure provision. Opportunities for additional cinema screens (new/ expanded cinema facility in Guildford town centre) is identified together with potential to support new food and beverage floorspace with demand likely to be focused on Guildford town centre. The leisure assessment also identifies the potential need for two branded gym facilities based on projected population and current participation rates in this leisure activity, again with demand likely to be focused on Guildford town centre. **M&G supports these commercial leisure provision findings.**

The content of the Borough Council’s **Retail and Town Centres Topic Paper, 2017** is also of particular interest to M&G. The topic paper correctly identifies at paragraph 4.30 that the methodology for forecasting floorspace needs used in the retail and leisure study and addendum is based on a standard constant market share approach, which does not take into account any potential uplift in market shares and capacity (quantitative need) that could occur due to the ‘claw back’ of expenditure from competing centres to new retail floorspace in town centre locations, for example the new anchor store as part of the proposed North Street scheme.

At 4.39 the topic paper correctly summarises that the evidence underpinning the retail study points towards strong indicated signs of interest in Guildford town centre from food and beverage operators, which has been reflected in an adjustment to the capacity of the allocation for the North Street site A6 in the Local Plan, from 3,000 to 6,000 sq m (approx.) food and drink (A3) uses and drinking establishment (A4) uses between the 2016 and 2017 versions of the Submission Local Plan.

At 5.6 and 5.7 the topic paper identifies from the retail and leisure study addendum that forecasted comparison retail growth requirements have reduced and taking into account the revised need figures and a “reconsideration of the capacity and suitability of the North Street redevelopment site for comparison retail and other uses” the proposed retail floorspace capacity is reduced for A6 North Street from 45,000 sq m gross to 41,000 sq m gross. M&G comments further on this in its representation response to Policy A6.

At paragraph 6.1 the topic paper refers to providing an increased residential element to the allocated North Street regeneration site of up to 400 homes (C3 use) in response to comments raised on the 2016 Submission Local Plan, but also implies that additional capacity for residential is partly in exchange for reduced comparison retail floorspace (given updated forecasts of comparison retail need in the retail and leisure study). M&G comments further on this in its representation response to Policy A6.

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.
2. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

**Comment ID:** pslp17q/196  **Respondent:** 17341057 / Sustainable Land Products Limited (Owen Davies)  **Agent:** Roger Daniels

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

**Answer:** ()

The accompanying report (*Tangley Place Concept Statement*) points to shortcomings in the Green Belt & Countryside Study as the basis for reviewing Green Belt boundaries and identifying appropriate allocations to meet the objectively-assessed need for housing throughout the plan period.

In particular, the Green Belt review does not comply with the requirements of paragraphs 84 and 85 of the National Planning Policy Framework, as it does not give sufficient weight to the need to promote sustainable patterns of development or reflect long-term development requirements.

In addition, the Land Availability Assessment is not based on a consistent rate of housing delivery that reflects housing requirements. It shows a shortfall in housing land supply throughout much of the plan period, including the absence of a five-year supply of housing land on adoption of the plan.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

**Answer:** (Yes)

Refer to attached documents for comments on the following evidence base documents:

- Strategic Housing Market Assessment
- Employment Land Needs Assessment
• Flood Risk Sequential Test

Comment ID: pslp17q/318  
Respondent:  17415009 / Lightwood Strategic (Lightwood Strategic)  
Agent:  Roger Daniels

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Answer:  (No)

The accompanying report by Lightwood Strategic points to shortcomings in the approach to housing land supply which is not consistent with the objective assessment of housing requirements in the Strategic Housing Market Assessment. It also points to shortcomings in the Green Belt & Countryside Study as the basis for reviewing Green Belt boundaries and identifying appropriate allocations to meet the objectively-assessed need for housing throughout the plan period.

In particular, the Land Availability Assessment (June 2017 Addendum) is not based on a consistent rate of housing delivery that reflects housing requirements. It shows a shortfall in housing land supply throughout much of the plan period, including the absence of a five-year supply of housing land on adoption of the plan.

In addition, the Green Belt review does not comply with the requirements of paragraphs 84 and 85 of the National Planning Policy Framework, as it does not give sufficient weight to the need to promote sustainable patterns of development or reflect long-term development requirements.

Answer:  ()

I am dismayed that the revised Local Plan 2017 has not heeded the objections and concerns of residents that were sent to the 2016 Local Plan!

I believe that the new evidence submitted is flawed and that Guildford's proposal for more than 12,426 homes (plus a buffer of 1,155 homes) is excessive and will result in needless loss of the Green Belt and green character and increased congestion, that cannot be justified in our heavily constrained borough.

I suggest that you take a drive around the Guildford bypass and the A3/M25 junction on a Monday morning then ask yourself just how many more homes (and therefore cars!) the area can take

Answer: ()

GRA Comment: The Plan preparation process has had inadequate regard for national policy which attaches “great importance” to the “openness” and “permanence” of Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level.

The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement.

Green Belt

It is unacceptable to treat Green Belt as a readily available source of development land during Plan preparation, notwithstanding that this is the time when any boundary review deemed necessary takes place. Any such review should be mindful of the “great importance”, “openness” and “permanence” of Green Belt and take a long term perspective towards this planning mechanism.

The Mayor of London intends to respect London’s Green Belt boundary.

The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level. Releasing Green Belt to fund infrastructure (eg “support delivery of A3 junction upgrades” or “facilitate delivery of new strategic infrastructure including a rail station, park and ride and a secondary school”) or to fully meet exaggerated need does not pass this test. Nor does building on open, previously-developed Green Belt.

Opportunities to channel development towards locations beyond the outer Green Belt boundary, linked to sustainable transport and the duty to cooperate, have not been adequately considered at a strategic level. This assessment should involve more than just looking at a small area of countryside within the borough immediately beyond the Green Belt boundary, or indeed the rather meaningless Housing Market Area.

In view of the extent of the Area of Outstanding Natural Beauty, Special Protection Area and Green Belt in Guildford Borough, which restrict the availability of land suitable for development, it is important that the potential for sustainable travel is considered. This needs to be balanced against the option of minimising distances between work and home which is usually treated as a more sustainable approach.

It is not credible to suggest the Green Belt is being treated as permanent when its boundary was changed as recently as 2003 as part of the last Local Plan review. Indeed, land released in 2003 is neither fully developed nor efficiently used. An approach of eroding the Green Belt at each Local Plan review without considering the bigger picture is not sustainable. Proposed erosion of Green Belt to development and “insetting” in this Plan should be put in the context of cumulative loss. Since the Metropolitan Green Belt was established, just over 6% has been lost (6.24%), noting that a modest proportion of Green Belt lost to “insetting” will be protected as open space in villages.
If there is a case for Green Belt development, this would need to have been proven through the application of policy. In addition, careful thought would need to be given to the pace at which Green Belt is developed using a long term reserve site approach. It would be unsustainable to release all potential last resort greenfield options within one plan period, denying future generations any such options.

The Green Belt and Countryside Topic Paper refers to the issue of Green Belt safeguarded for development. It suggests in paragraphs 4.64 to 4.71 that the Plan will not safeguard sites for future development because so little land can be identified and more strategic solutions will be required. It concludes that any further Green Belt development would result in ribbon development, a stretched urban area and merging of villages with the urban area*. In view of the fact that such ribbon development would be wholly unacceptable, the more strategic approach referred to in paragraph 4.70 is required now. The current Local Plan review should both constrain the overall scale of development in this Plan and also very carefully pace any releases deemed necessary over several generations.

*4.68 “Given the limited central ribbon within which development could potentially occur, safeguarded land in Guildford would result in an unsustainable pattern of development. It would create an oblong-shaped urban area…”

4.69 “there will inevitably be a limit to the extent that Guildford urban area can expand before it would begin to merge with surrounding villages. This would have a detrimental impact on the character of the countryside and our rural communities.”

4.70 “…a more strategic approach to growth or protection will need to be considered, in cooperation with our neighbours.”

Sustainability Appraisal

The extent to which the current Sustainability Appraisal fails to test the sustainability of the spatial options in a meaningful way casts doubt over whether sustainability has been assessed. The report

- accepts the Council’s corporate objectives, which have not gone through proper consultation, as consistent with sustainable development when this has not been tested,
- treats various major development sites in Green Belt, contrary to the importance attached to protecting Green Belt, as “a given”,
- fails to consider options that constrain development or that make greater use of brownfield or previously-released greenfield land,
- focuses on a range of options that involve developing on even more Green Belt around Guildford in order to protect countryside around Woking
- does not consider environmental limits or impact on the next generation in terms of weighing demand for homes alongside the use of all possible last resort greenfield options by one generation.

The National Planning Policy Framework requires that objectively assessed needs should be met unless:

- “any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole;
- or specific policies in this Framework indicate development should be restricted.”

The specific policies described include several of particular relevance to Guildford including sites protected under the Birds and Habitats Directives, Sites of Special Scientific Interest, Green Belt, Local Green Space, Area of Outstanding Natural Beauty, designated heritage assets and locations at risk of flooding. In this situation, we do not consider it appropriate for the Appraisal to rule out not meeting needs in full from a sustainability perspective.
Notwithstanding that the Sustainability Appraisal should be proportionate, realistic, strategic, and look at significant matters, the assessment appears deficient and biased in the spectrum of alternatives it considers to the point that it is questionable whether it meets the requirements.

We note that the Government’s Local Plans Expert Group has advised (March 2016) that “Whilst we recommend significant reductions in other elements of the local plan evidence base…, we propose that a proportionate Assessment of Environmental Capacity should be an important part of plan making.” The group confirms that “Objectively assessed needs for all types of development are the starting point but it is then necessary for the authority to consider the extent to which the plan can meet those needs consistently with the policies of the Framework.” They continue, “Despite the clear test set by paragraph 14 of the NPPF, few authorities compile an assessment of the environmental capacity of their area, making it difficult for Planning Inspectors to apply the NPPF policy”. They go on to say “We recognise that the NPPF does not require authorities to meet the full identified need for development in all circumstances, even within the Housing Market Area, if there is insufficient environmental capacity but we encountered significant uncertainty about how the appropriate balance should be struck. We make recommendations to remove that uncertainty and to confirm the legitimacy of applying the tests set out in the NPPF to ensure that needs are met up to the point where the adverse effects of doing so can be shown to outweigh the benefit of meeting the need.”

An adequate Sustainability Appraisal, which considers environmental capacity alongside social and economic aspects of sustainable development, should enable reasonable alternative scenarios to be tested against environmental capacity. We suggest the alternative scenarios selected in the current Appraisal, ranging from fully meeting exaggerated need to also meeting all of Woking’s need that would be unmet due to the application of constraints, did not test a meaningful spectrum of options. Indeed, it seems bizarre to place such emphasis on developing Green Belt in Guildford to protect countryside in Woking.

The Expert Panel was concerned at the number of authorities that cannot demonstrate soundness because they have constrained development without adequately testing the point at which adverse effects of meeting need can be shown to outweigh the benefit of doing so. The concern is that Guildford has gone the other way: it has been so eager to get the Plan through that it has failed to give sufficient weight to harm to the environment from fully meeting need, such that it proposes an inadequately tested option that would constitute unsustainable development.

The Guildford Society recognises that Guildford Borough Council has taken legal advice in preparing the Local Plan, whereas we and other charitable bodies do not have access to such advice.

The Society expects there to be a legal challenge from some groups in the Borough who object to the removal of land from the Green Belt.

Whilst we regret the need to remove some areas from the Green Belt, we have taken the view in our previous submissions and in our submission in response to this Regulation 19 Consultation, that we will support the notion (noting our concerns about the reliability of the SHMA) that we will need to use some Green Belt land in this plan period to meet our housing need and to allow the time to properly regenerate our urban brownfield sites.

We do not propose to comment on legal compliance for itself, but rather to make the judgement that IF the plan is legally compliant, we wish to ensure it is the best it can be.

We have not engaged any legal advisors and, as such, are not in a position to determine that legality of the plan. We are concerned about the nature of gamble being undertaken to make all or most development ‘contingent’ upon infrastructure, much of which is beyond the power and control of the Council to bring forward. We have commented on this at many of the individual policies, the evidence base and and also in a section entitled ‘Issues and Topic Papers’

The Plan preparation process has had inadequate regard for national policy, which attaches “great importance” to the “openness” and “permanence” of Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level.

The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement.

The report states that there are no pollution issues in Guildford. This is not true. The A3 end of the B3000 exceeds Eu regulations and this should be flagged in the 2015/16 air quality report which the Council has yet to publish.

I object

The 2015/2016 air quality management report has not yet been published and this will/should include an area at the A3 end of Compton, which exceeds the recommended max NO2 reading. One year results for NOx are **48.728 with high's of 68 using National bias adjustment**.

Cllr Furniss indicated that the location of the test tubes may have made them invalid, but measurements show that they were positioned correctly and monitored for over a year by GBC environment officers, who have now added additional monitoring devices (See Annex 2 – Correspondence between Cllr Curtis and Cllr Furniss). This area qualifies as an air quality management area (AQMA) and it is disingenuous to omit this from the report or to use an old report on the basis that the 2015 report is not yet published, as the problem is known and recognised by the environment department within GBC.

The traffic survey shows increases in overall flow at the B3000 monitoring point, of values between 5.6% and 16.5%. This would severely impact flow, which is not in line with National Policy as further congestion would exacerbate the current air quality issues as the A3 end of the Street.

I do not believe that a regulation 19 consultation is appropriate. Whilst few changes have been made, additional sites have been included without opportunity for regulation 18-consultation input.

The video used and paid for by GBC and taxpayers is biased towards development, and hence raises questions over the validity and legality of such marketing campaigns. All the individuals featured in the video, with the exception of one nurse have previously spoken in the Council Chamber in favour of house building/building on Blackwell Farm; and there is not a single voice representing protection of the Countryside or outstanding landscapes.

**Answer:** (No)
I am not a member of the legal profession but I consider that much of the proposed plan should fail under legal challenge.

The consultation for the 2016 draft local plan was poorly executed. When the comments were published many of mine were missing (later found under a different name whose own comments had been excluded). I answered “Yes” to the question concerning interest in participation at the examination. This was recorded as “No”.

When I raised these points the errors were gradually corrected but, the last time I checked, there were still issues with the way in which some of my comments had been recorded with words left out or incomplete.

It is not clear how many errors exist for other respondents but the majority may not have checked that their views have been recorded correctly.

There has been a lack of transparency, lack of scrutiny, and failure to act on errors pointed out by residents and consultees. The GBC Executive has undermined confidence in local democracy and the planning system.

The housing number is overstated, constraints have not been applied, and various parts of the evidence are unsound. I do not consider the plan to be justified.

The plan will create major problems in the future without solving local social housing needs or achieving affordability for those who currently live and work in the Borough. The continued use of appeals as a monitoring indicator will encourage the Planning Committee to allow applications rather than run the risk of losing an appeal. This is a particular concern given the recent changes to the structure of the Planning Committee.

In my opinion the plan goes against national policy in failing to apply (or even to recognise) constraints with regard to Green Belt and infrastructure.

I reserve my right to participate at the examination.

Comment ID: SQLP16/1437  Respondent: 8582017 / The Clandon Society (J Wright)  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance 
Answer: (No) 

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

**Comment ID:** SQLP16/1339  **Respondent:** 8593537 / Normandy Parish Council (Leslie GA Clarke)  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

**Answer:** (No)

Normandy Parish Council strongly objects to the Guildford Borough Proposed Submission Local Plan: Strategy and Sites ("Local Plan") and in particular to the allocation of land south of Normandy and north of Flexford for substantial development.

**In principle objection to development of this site**

The Parish Council opposes the principle of the development of this site:

1. The site lies within the Green Belt, and has been assessed by Guildford Borough Council (GBC) as having high sensitivity in Green Belt terms, serving to check the southward sprawl of Normandy and northward sprawl of Flexford, preventing the merger of those settlements, and safeguarding the countryside from encroachment (see Green Belt Purposes Assessment, April 2014). Accordingly, given the very significant contribution made by the site to the Green Belt in this area, it should not be developed.

2. The development of the site would not amount to sustainable development within the meaning of the National Planning Policy Framework. GBC’s claim that the approach would be sustainable fails to attach any or any meaningful weight to the environmental aspects of sustainability.

3. The proposed allocation has not been the subject of any proper assessment of highways impacts. The local road network is incapable of coping with the proposed scale of development and there is no evidence that the necessary highways improvements are feasible or deliverable within the plan period.

4. The site lies within 1 km of the Thames Basin Heaths Special Protection Area and accordingly requires substantial provision of alternative green space as an avoidance strategy. Preferable sites for development elsewhere could be delivered without such provision.

The development of this site would significantly affect Normandy and the surrounding area and has not been justified in the Local Plan or in the supporting documents. In addition to the principled objections to the development set out above, the Parish Council considers that there have been substantial flaws in the plan-making process to date which go to both the merits and legality of the Local Plan.

**Specific criticisms of the plan making process**

A sound plan must be based on proper evidence and consistent with national policy. To be lawful, the plan must be promoted on the basis of a proper analysis of the environmental impacts of policies together with an assessment of reasonable alternatives (see Environmental Assessment of Plans and Programmes Regulations 2004/1633 and e.g. Calverlon PC v Nottingham City Council [2015J EWHC 1078 (Admin), per Jay J at (67)].
The history of the Local Plan is known to GBC. The Parish Council wishes to emphasise that in the 2014 plan, it was not proposed that this site be allocated for development. Since then, there has been no further Green Belt review, but there has been a Green Belt Purposes Assessment which identified this site as particularly sensitive in Green Belt terms.

There is no explanation in the published documents of the "exceptional circumstances" (NPPF, 80) that are said to justify release of the site from the Green Belt. The Green Belt Capacity Study does not explain why such exceptional circumstances exist, and nor does the Sustainability Appraisal ("SA"). Extraordinarily, the SA states that the development of the site is regarded as a "given" (6.3.16). The SA acknowledges (in footnote 68, p 131) the greater impacts on the Green Belt in developing sites such as this, but does not explain why such development is nonetheless justified on both environmental grounds and by reference to the exceptional circumstances test.

The SA is open to further criticism through its failure to accord any weight to the Green Belt in analysing various options. This is a significant deficiency which renders the SA unsound and indeed unlawful, since the alternatives are not subjected to proper analysis on environmental grounds.

Further, GBC has consulted on the Local Plan with the proviso that this site should be deleted from the plan should it be demonstrated the provision of a secondary school on the site is not required. However, there has been no proper assessment of whether alternative sites could accommodate the school, as is clearly required given the "exceptional circumstances" test. GBC's assessment of alternative secondary school sites notes that Surrey County Council's concerns as to remoteness of the site from development are as was only overcome by the new housing provision in the Local Plan i.e. that housing which is proposed on this site. The alternatives assessment fails to identify the land area required for the school, and fails to assess alternative sites on the basis of their contribution (or otherwise) to the Green Belt. This is a fundamentally flawed sequential assessment.

Even if this site is the only possible school site (which is not accepted) then there is no explanation as to why 1,100 houses are required to be delivered in addition to the school, with a materially greater impact on the Green Belt and the environment generally. Part of the justification offered for the selection of this site for a school is that it is close to the proposed housing (together with other development sites). This argument is circular, since if the school is not required in this location then nor is the housing. In any event, this justification does not compare alternative sites on a fair basis, since other sites are rejected for schools on the basis of their Green Belt location. This site also lies within the Green Belt.

The Leader of GBC has suggested that the proposed houses should be regarded as "enabling development". The Parish Council submits that school funding should be achieved through the normal channels and not through the release of Green Belt land to housing development. This suggested cross-subsidy is an unjustified claim (there has been no viability analysis) and in any event is not a proper planning reason for allocating the site for development. The Local Plan is therefore unsound.

Next Steps

GBC's consultation on the Local Plan was based on the proviso that policy A46 was to be deleted in the absence of justification for the location of a secondary school at the site.

The Parish Council has seen no proper justification for the location of a secondary school in this Green Belt site. The selection of the site appears to have been justified on the basis that it will be close to the housing identified in the allocation. This makes for an entirely circular argument; the housing is only put forward on the basis of the school, and the school on the basis of the housing.

This cannot amount to an exceptional circumstance for the release of land from the Green Belt. There has been no adequate sequential site assessment for a new secondary school.

In those circumstances, GBC is invited to confirm that policy A46 will be deleted from the Local Plan because the school location has not been justified. The Spatial Strategy should be amended accordingly.
We await GBC's urgent confirmation that the Local Plan will not be proceeding with Policy A46 and that the land in question will remain within the Green Belt.

Downsedge RA notes that the methodology and models used by G L Hearn to calculate the Objectively Assessed Housing Need (OAHN) for Guildford has not been made available to the public, so that others can check it. This OAHN figure is a key input into the calculation of the number of new homes required in the Borough going forward. In order to be legally compliant, we understand that the “Sustainability Appraisal, a tool for appraising the plan to ensure it reflects social, environmental and economic factors, should be made public”. Although a Sustainability Appraisal has been produced and made public, critically it does not contain, the method by which the OAHN has been calculated from the population forecasts.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Answer: ()

I object to the fact that GBC have not met the requirements of the NPPF Paragraph 155 which imposes an explicit obligation to have early and meaningful consultation. This has not been met in a number of areas by GBC. We have not
had a meaningful consultation on imposing a settlement boundary on East Clandon, on the absence of meaningful economic and population growth figures for Guildford showing various scenarios with high, medium and low growth scenarios being offered.

I note that there were over 20,000 responses objecting to the 2014 draft Plan and therefore I object that the Consultation Process has not been properly followed for this Plan which is not materially different from that plan.

**Comment ID:** SQLP16/167  **Respondent:** 8640353 / Julian Cranwell  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

**Answer:** (No)

I do not believe it is legally compliant. The council promised to listen to the objectors, who submitted 20,000 objections to the previous draft, and virtually nothing has changed.

In addition the NPPF clearly sets out the requirement for the OAN calculation to be 'replicable by others'. This is clearly not the case, as the council does not possess the model, and has not been able to verify the workings.

Further, the OAN modelling was outsourced to a sub-contractor, which is precluded in the contract to the main consultant.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

**Answer:** ()

Key parts of the evidence are missing, flawed or based on withheld assumptions. We consider therefore that it is questionable as to whether the Local Plan meets all legal requirements. The Strategic Housing Market Assessment overstates need, the Green Belt and Countryside Study uses a flawed approach and the Transport evidence is too late and incomplete to be relied upon to inform the Plan. The Plan preparation process has had inadequate regard for national policy which attaches "great importance" to the "openness" and "permanence" of Green Belt. The test of "exceptional circumstances" that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level. The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement. It is unacceptable to treat Green Belt as a readily available source of development land during Plan preparation. The Mayor of London intends to respect Green Belt. The test of "exceptional circumstances" that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level. Releasing Green Belt to fund infrastructure or build on open, previously-developed Green Belt does not pass this test. Opportunities to channel development towards brownfield locations beyond the outer Green Belt boundary, linked to sustainable transport, have not been adequately considered. It is not credible to suggest the Green Belt is being treated as permanent when its boundary was changed as recently as 2003 as part of the last Local Plan review. Indeed, land released in 2003 is neither fully developed nor efficiently used. An approach of eroding the Green Belt at each Local Plan review is not sustainable. If there is a case for Green Belt development, it needs to be proven through the application of policy.

24.B. Question 2: Legal Compliance

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole is legally compliant? Please provide the following information being as precise as possible:

- why you consider it is or is not legally compliant and
- what change(s) (if any) you consider necessary to make it legally compliant, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

Attached documents:
As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be reassessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

Comment ID: SQLP16/325  Respondent: 8687041 / Michael Aaronson  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance
Answer: (No)

With reference to Site A46 I OBJECT to the fact that in the Section 18 consultation this site was not indicated for development as part of this Local Plan. I therefore do not believe it is legally compliant that it features as such in this Section 19 consultation. Furthermore the Council has not demonstrated that there are "exceptional circumstances" that would justify removing this land from the Green Belt; it has been claimed that it is an "enabling development" to allow the construction of a secondary school but there is no legal basis for this. I therefore OBJECT to the inclusion of this site as part of the Local Plan.

Comment ID: SQLP16/26  Respondent: 8707553 / Stuart Farquharson  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance
Answer: ()

2. The local plan is a total fraud. GBC outsourced to a 3rd party company (which is not within the legality of plan) to estimate housing numbers required in each village. As a result not one resident can gain access to how these numbers were created due to them being commercially sensitive. Utter stupidity again. How can you expect residents to make an informed choice on what is right or wrong for the Borough and their villages when you hide behind this.

Attached documents:

Comment ID: pslp17q/461  Respondent: 8708545 / Nigel Wicks  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 2: Legal Compliance
Answer: (No)
I object to the proposed changes to the plan on the basis that they are not legally compliant since they are in conflict with the framework stipulation in paragraph 87 of the NPPF which states

“As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances.” (Policy P2, P3, E5).

It is relevant here that, according to the Guildford Green Belt Group, 70% of new housing will be in countryside and 58% of this is on Green Belt (Gosden Hill, Wisley, Blackwell Farm).

The Plan does not provide evidence of the exceptional circumstances, which would justify this use of Green Belt land. Nor does the Plan justify the exclusion of further development in brown belt and urban areas sites. More such sites should be included to make the Plan legally compliant.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

**Answer:** (No)

I do not consider that the Plan is legally compliant because huge areas have been taken out of green belt for development

- without any exceptional circumstances being put forward to justify this
- without any exceptional circumstances being put forward for a major road through the AONB or a major settlement in the setting to the AONB
- without proper constraints being applied (in terms of landscape designations or lack of infrastructure)
- without proper consideration of the viability of development schemes, especially from a highways point of view
- without proper use of the evidence base in the selection of sites

All of the above are necessary to make Guildford’s Local Plan legally compliant.
Comment ID: SQLP16/539  Respondent: 8729313 / Lisa Wright  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Answer: (Yes)

No.

It has been developer lead.

GBC are too friendly with the University of Surrey. Uni heads are always in council, Uni staff are featured in GBC promotional video.

Local radio station, Eagle, has not published any news item related to the Local Plan in days. Question relationship between GBC leader and Eagle Director.

In our opinion the Submission Plan development process has taken insufficient account national policy which we believe stresses the importance of the “openness” and “permanence” of the Green Belt. While we fully understand and empathise with the need to provide development for more dwellings, nevertheless we believe that the criteria adopted for “exceptional circumstances” has not been given the required level of consideration at a strategic level.

We would question the suggestion that the Green Belt is being treated as permanent when as recently as 2003 boundary changes were included as part of the Local Plan Review.

It is our understanding that the National Policy Framework requires that objectively assessed needs should be met unless “…any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole “ etc. Our interpretation of this suggests that there are a number of items which are of particular relevance to Guildford particularly with regards to the eco system relating to birds and wildlife, areas of outstanding local beauty, heritage sites and those areas particularly venerable to flood risk. We would have thought that the Appraisal must include these factors.

1. The Council's choice of certain strategic sites was determined several years ago. In the interval it has sought only to justify the choices it made then. This amounts to predetermination. The developer purchase pre-application advice. Over the course of the advisory period (several years) GBC succumbed to 'regulatory capture': [https://en.wikipedia.org/wiki/Regulatory_capture](https://en.wikipedia.org/wiki/Regulatory_capture).

2. Changing Green Belt boundaries prejudices the property rights of property owners whose property is 're-allocated'. Instead of addressing this serious issue in a professional and disinterested manner, GBC has acted to promote the interests of developers and shown complete disregard for anyone whose property rights have been prejudiced. This is evidenced by a complete failure to i) write to the property owners affected, explain the significance of the proposed changes and seek comment/opinion ii) set out the exceptional circumstances which justify the Green Belt changes iii) justify the new Green Belt boundaries. The local plan does not explicitly address these issues. Instead it merely refers readers to a large scale and rather inaccurate map.
3. Rather than put together the evidence in advance of public consultation and reach a properly documented conclusion GBC has gone ahead without gathering all the necessary information -such as a Transport Plan. It has left itself the opportunity of changing the local plan as new evidence comes in. That makes a mockery of the consultation.

4. [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature] This proposal appears to run contrary to established legal precedent eg the COPAS and Carpets of Worth cases.

"the green belt should ONLY be altered in exceptional circumstances through the local plan process and with the SUPPORT of the local people" "Demand for housing alone will not change the green belt".

It is clear from all local feedback in previous polls that there is NO support for this (apart from with borough councillors).

I believe that sites have been selected randomly according to the population count likely to object (high green belt = low number of people).

I believe that the rejection of previous applications e.g. at Wisley and elsewhere in the country show that this enormous change to the Green Belt policy is one which would require the courts to decide.

Part 6 of the Local Planning Regulations 2012 requires consultation and public participation. In R (Association of Municipal Authorities) v Secretary of State for Social Services [1986] 1 All E R 164 Mr Justice Webster said this at page 167,

"in any context the essence of consultation is the communication of a genuine invitation to give advice and a genuine consideration of that advice. In my view it must go without saying that to achieve consultation sufficient information must be supplied by the consulting party to the consulted party."

Although that was not a planning case, this was clearly statement of general principle which must apply here: Webster J cited the decision of the Court of Appeal Rollo v Minister of Town and Country Planning [1948] 1 All E R 13. In the present case in Local Plan is not legally compliant.

The questionnaire invites representations on the 'proposed changes' in the 2017 proposed plan, asking questions about the proposed changes 'as a whole'. It states 'comments must relate to proposed changes only'. The forward to the 2017 plan states that the consultation period 'offers another opportunity to have your views heard'. Cllr Spooner does not confine this to the latest changes. Many of the changes impact on policies and site allocations which are unchanged. The limitation in this consultation conflicts with NPPF para 155. Further, it is difficult to see how it could comply with the as yet unpublished statement of community involvement. It does not help that no consultation statement has yet been published on the responses to the 2016 draft plan. The restriction to changes is not legally compliant.

No, I do not think the plan is legally compliant.

There is no adequate basis given for changing green belt boundaries, which although a complex issue is clear - there is a need for special special circumstances for each and every change and housing need alone is not an adequate basis for a green belt boundary change. In addition, there is a need for local support for boundary changes and this has not been tested. Many of the boundaries selected are weak and do not comply with the requirements of the NPPF. In at least one area, Effingham, residents have made clear their objection to boundary changes in surveys conducted by the Residents Association.

The draft Plan does not comply with Air Quality standards, there is no plan to introduce air quality management areas, despite some areas being outside legal limits. Under these circumstances there is a legal requirement to introduce an AQMA. This has not been done. There is also a lack of understanding regarding the need for an AQMA at Wisley. GBC maintain this is not needed as there are no residential properties close to the sensor. However, there is a need for an AQMA when the public have open access to the area, and this is the case. In fact, there are several people who are exposed to this pollution on a daily basis as they work in the cafe in the car park, almost directly opposite the sensor.
24.B. Question 2: Legal Compliance

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant? Please provide the following information being as precise as possible:

• why you consider it is or is not legally compliant and
• what change(s) (if any) you consider necessary to make it legally compliant, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

Comment ID: SQLP16/1750  Respondent: 8836129 / Roger Shapley  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance
Answer: (No)
Response: NO

The plan focuses on growth and economic strategy, to the detriment of social equity and environmental protection as required by the NPPF.

Despite the DCLG encouraging ‘brownfield’ registers and ‘brownfield’ land release for housing, there is no ‘brownfield first’ policy. GBC is a major holder of ‘brownfield’ land in the town (Walnut Tree Close and Woddbridge Meadows) and yet has included none of these sites for housing development; Policy P4 is not a sound basis for such an exclusion.

The plan is inconsistent with the NPPF guidance, as 70% of house building is proposed in the Green Belt.

GBC has included no details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation.

GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.

GBC has failed expressly to include in Policy P1, H1 and P5 any direct consideration of NPPF para 119.

Attached documents:

Comment ID: SQLP16/1794   Respondent: 8839041 / Jon Maslin   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Answer: ()

I object

The Plan preparation process has had inadequate regard for national policy, which attaches ‘great importance’ to the ‘openness’ and ‘permanence’ of Green Belt. The test of ‘exceptional circumstances’ that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level.

The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement.

The report states that there are no pollution issues in Guildford. This is not true. The A3 end of the B3000 exceeds Eu regulations and this should be flagged in the 2015/16 air quality report which the Council has yet to publish.

The 2015/2016 air quality management report has not yet been published and this will/should include an area at the A3 end of Compton, which exceeds the recommended max NO2 reading. One year results for NOx are 48.728 with high's of 68 using National bias adjustment.

Cllr Furniss indicated that the location of the test tubes may have made them invalid, but measurements show that they were positioned correctly and monitored for over a year by GBC environment officers, who have now added additional monitoring devices (See Annex 2 – Correspondence between Cllr Curtis and Cllr Furniss). This area qualifies as an air quality management area (AQMA) and it is disingenuous to omit this from the report or to use an old report on the basis that the 2015 report is not yet published, as the problem is known and recognised by the environment department within GBC.

The traffic survey shows increases in overall flow at the B3000 monitoring point, of values between 5.6% and 16.5%. This would severely impact flow, which is not in line with National Policy as further congestion would exacerbate the current air quality issues as the A3 end of the Street.

I do not believe that a regulation 19 consultation is appropriate. Whilst few changes have been made, additional sites have been included without opportunity for regulation 18-consultation input.
The video used and paid for by GBC and taxpayers is biased towards development, and hence raises questions over the validity and legality of such marketing campaigns. All the individuals featured in the video, with the exception of one nurse have previously spoken in the Council Chamber in favour of house building/building on Blackwell Farm; and there is not a single voice representing protection of the Countryside or outstanding landscapes.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

**Answer:** (No)

No the plan is not legally compliant

The plan is not balanced in line with the NPPF - focuses on economic development and growth at the expense of the other aspects such environmental protection. This reflects the fact that "green belt" or Greenbelt is only used twice in the GBC Corporate strategy doc. One was purely as a description of the borough "Almost all – 89% – of our borough is within the Metropolitan Green Belt, much of which is in productive agricultural use." Clearly the GBC have no intention to read the NPPF as a whole and read this policy as a whole, it is not in their published strategy to do so.

The plan is not balanced as a whole as per NPPF with 70% of housing being proposed in the Green Belt and not constraint applied with the housing target representing the full AON.

GBC has policy on failed to include in Policy P1, H1 and P5 any direct consideration of NPPF para 119.

I feel that the regulation 19 consultation is flawed as major changes have taken place since the last consultation - last consultation there was no joint SHMA, infrastructure and transport assessment.
I object as key parts of the evidence are missing, flawed or based on withheld assumptions. No the plan is not legally compliant. The plan is not balanced in line with the NPPF - focuses on economic development and growth at the expense of the other aspects such environmental protection. This reflects the boroughs un-mandated policy on green belt. “Green belt” or “Greenbelt” is only used twice in the GBC Corporate strategy document. One was purely as a description of the borough “Almost all – 89% – of our borough is within the Metropolitan Green Belt, much of which is in productive agricultural use.” Clearly the GBC have no intention to read the NPPF as a whole which is their legal obligation. It is not in their published strategy to do so. [http://www.guildford.gov.uk/media/15695/Corporate-Plan-2015-2020/pdf/5267_GBC_CorporatePlan_004_2015_-_2020.pdf](http://www.guildford.gov.uk/media/15695/Corporate-Plan-2015-2020/pdf/5267_GBC_CorporatePlan_004_2015_-_2020.pdf)

The plan is not balanced as a whole as per NPPF with 70% of housing being proposed in the Green Belt and no constraints applied with the housing target representing the full AON. GBC has policy on failed to include in Policy P1, H1 and P5 any direct consideration of NPPF para 119. I feel that the regulation 19 consultation is flawed as major changes have taken place since the last consultation - last consultation there was no joint SHMA, infrastructure and transport assessment. The Strategic Housing Market Assessment overstates need. Green Belt and Countryside Study uses a flawed approach and the Transport evidence is too late and incomplete to be relied upon to inform the Plan. The Plan preparation process has had inadequate regard for national policy which attaches “great importance” to the “openness” and “permanence” of Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level. The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that I question whether it complies with the requirement. It is unacceptable to treat Green Belt as a readily available source of development land during Plan preparation. The Mayor of London intends to respect Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level. Releasing Green Belt to fund infrastructure or build on open, previously-developed Green Belt does not pass this test. Opportunities to channel development towards brownfield locations beyond the outer Green Belt boundary, linked to sustainable transport, have not been adequately considered. It is not credible to suggest the Green Belt is being treated as permanent when its boundary was changed as recently as 2003 as part of the last Local Plan review. Indeed, land released in 2003 is neither fully developed nor efficiently used. An approach of eroding the Green Belt at each Local Plan review is not sustainable. If there is a case for Green Belt development, it needs to be proven through the application of policy. On the 18/7/2016, in the House of Commons the Member of Parliament for Bromsgrove & Secretary of State for Communities & Local Government said:

Unless there are exceptional circumstances, we shouldn’t be carrying out any development in the Green Belt. The Green Belt is absolutely sacrosanct and that will not change.

Cllr Furniss, at the time in Dec 2014, leader for Infrastructure at GBC made it clear: “The news that this Guildford Borough Council Conservatives will not be supporting green belt development is to be welcomed by all. The Conservatives have always pledged to protect the green belt and we will continue to do so” That is as clear a statement as there can be as to the promise the Conservatives were giving at the time of the elections. He went on to say: “This change in direction by the DCLG allows us to reassess the Strategic Housing Land Availability Assessment (SHLAA) and Draft Local Plan against more constraints.” Yet the GBC have strategically decided to not apply any constraints and are proposing to opt for the full objectively assessed need as the target for the borough. When and who made that decision? It was not debated or discussed in council or really made public.
Much of the development, including areas updated in this revision, relies on SANG and SAMM, a mechanism dreamt up by Natural England and described in the Thames Basin Heaths Avoidance Strategy.

However, this mechanism has no evidence base behind it whatsoever, legal or otherwise.

I have now checked with Natural England twice (most recently 3rd July 2017), and there is still no evidence available. It therefore contravenes the Conservation of Habitats and Species Regulations 2010/EC Habitats Directive, the retained SE Plan Policy NRM6 viii (monitoring), NPPF paragraph 2

"Planning policies and decisions must reflect and where appropriate promote relevant EU obligations and statutory requirements", and NPPF paragraph 7 (which lays out the requirement for environmentally sustainable development).

The EC Habitats Directive, written into UK law, and further clarified by the Waddenzee judgement, places the onus on the “competent authority” to prove a plan will not adversely affect the integrity of the Thames Basin Heaths SPA, “i.e. where no reasonable scientific doubt remains as to the absence of such effects”. Since neither Guildford Borough Council nor Natural England have provided any scientific evidence, or indeed any evidence at all, it can only be concluded that this mechanism is not valid, and any plans relying on it unlawful.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Answer: ()

I object as key parts of the evidence are missing, flawed or based on withheld assumptions. I consider therefore that it is questionable as to whether the Local Plan meets all legal requirements.

The Strategic Housing Market Assessment overstates need, the Green Belt and Countryside Study uses a flawed approach and the Transport evidence is too late and incomplete to be relied upon to inform the Plan.

The Plan preparation process has had inadequate regard for national policy which attaches “great importance” to the “openness” and “permanence” of Green Belt.

The site at Blackwell Farm, Hogs Back for instance involves moving the greenbelt only 10-13 years after it was previously rolled back to allow Manor Farm to be developed by the University to create Manor Park. The test of
“exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level.

The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement.

It is unacceptable to treat Green Belt as a readily available source of development land during Plan preparation. The Mayor of London intends to respect Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level. Releasing Green Belt to fund infrastructure or build on open, previously-developed Green Belt does not pass this test. Opportunities to channel development towards brownfield locations beyond the outer Green Belt boundary, linked to sustainable transport, have not been adequately considered. It is not credible to suggest the Green Belt is being treated as permanent when its boundary was changed as recently as 2003 (ie Manor Farm up to Blackwell Farm) as part of the last Local Plan review. Indeed, land released in 2003 is neither fully developed nor efficiently used. An approach of eroding the Green Belt at each Local Plan review is not sustainable. If there is a case for Green Belt development, it needs to be proven through the application of policy.

Following my letter of 11 July 2016, pasted below, I see very few amendments, which reflect my comments. There should be far more, looking at:

It would appear the Local Plan ignores the NPPF Paragraph 155.

There have NOT been meaningful engagements with local expert community groups. The Guildford Society, Guildford Vision Group, the Guildford Residents Associations and many more have attempted to have a meaningful, and helpful dialogues with GBC, but have been constantly thwarted. The worst of these was a councillor saying " these organisations
do not represent Guildford...”. Disgraceful.

Many members of these groups are far better qualified, with many years of national and international experience with urban development, such as Economist, Architects, Chartered Surveyors, Town Planners or Highway Engineers, than members of GBC. So why has their expertise been ignored? They ALL together with GBC want to plan & build a better Guildford.

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant? Please provide the following information being as precise as possible:

- why you consider it is or is not legally compliant and
- what change(s) (if any) you consider necessary to make it legally compliant, explaining why this is the case.

ANSWER
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

Question 2: No the proposed submission Local Plan strategy and sites as a whole is not legally compliant. Where is the brownfield policy and does GBC hold a register, a mandate of The Housing and Planning Act 2016? 70% of house building is in Greenbelt, so clearly does not follow the NPPF. Not all the evidence was ready before The Plan was passed at full council so there was no time for councillors to scrutinise the missing documents, worryingly the Infrastructure Report which impacts on all the ‘strategic sites’. The majority vote pushed The Plan to the next stage of the process. It was clear councillors were not happy with this decision raising genuine concerns in an attempt to protect the residents who elected them.

NPPF 119 has not been taken into consideration by Planning Policy.

Answer: (No)

Question 2: Legal Compliance

Answer: No

Comment: I have no confidence in the legality of the Plan or the consultation process.

- Within my family, many of the comments made in the last consultation were omitted from the published comments, or recorded under someone else’s name, and it took a long time for corrections to be made. It is likely that many people did not check their comments on the published comments so who knows how many other errors were made.
- I spent time making comments on the on-line response form, only to find that these had disappeared when I logged in again – hence this response by letter. Other people may have given up.
- Insufficient consideration has been given to the results of the previous consultation.
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

Please refer to the separate responses in question 6 / appendix 1.

We consider that the Draft Plan does not fully accord with the National Planning Policy Framework (NPPF) and is therefore not legally compliant at the present time. Whilst these issues are set out below in the detailed responses to draft policies, we summarise here why the draft plan is not fully in accordance with the NPPF.

The NPPF (paragraph 14) sets out the Government’s view of what sustainable development means in practice for both plan-making and decision taking at the local level. For plan-making the Framework states that local planning authorities should positively seek opportunities to meet the development needs of their area. Local Plans should meet objectively assessed needs, with sufficient flexibility to adapt to rapid change, unless any adverse impacts of doing so would significantly and demonstrably outweigh the benefits; either when assessed against the policies in the NPPF taken as a whole, or where specific policies indicate development should be restricted.

The NPPF (paragraph 17) also sets out 12 core planning principles that underpin both plan-making and decision-taking. Amongst other objectives these principles confirm that planning should be:
• plan-led;
• proactively drive and support sustainable economic development to deliver thriving local places;
• promote mixed use developments;
• focus significant development in locations which are or can be made sustainable; and
• deliver sufficient community and cultural facilities and services to meet local needs.

The NPPF is clear that pursuing sustainable development requires “…careful attention to viability and costs in plan-making and decision-taking” (paragraph 173). Plans should be deliverable and, in this context, sites and the scale of development identified in the plan should “…not be subject to such a scale of obligations and policy burdens that their ability to be delivered viably is threatened” (paragraph 173).

In relation to the vitality of town centres, the NPPF at paragraph 23 states that planning policies should be positive and promote competitive town centre environments. When preparing Local Plans, some of the key principles that LPAs are advised to follow include:

• recognise town centres as the heart of their communities and pursue policies to support their viability and vitality;
• promote competitive town centres that provide customer choice and a diverse retail offer and which reflect the individuality of town centres;
• allocate a range of suitable sites to meet the scale and type of retail, leisure, commercial, office, tourism, cultural, community and residential development needed in town centres;
• ensure that the needs for retail, leisure, office and other main town centre uses are “met in full” and “not compromised by limited site availability”;
• recognise that residential development can play an important role in ensuring the vitality of centres and set out policies to encourage residential development on appropriate sites.

The draft allocation for the North Street site (Policy A6) and associated policies as presently worded fail to fully optimise the redevelopment potential of this major previously developed site within the town centre. This is Guildford’s largest brownfield site within the town centre and the only opportunity to meet its retail needs in the most sustainable location. As presently worded, the Draft Plan does not adequately provide for a sufficient quantum of key uses such as food and drink, leisure and residential which are vital ingredients to a successful flagship retail-led mixed use scheme in terms of vitality and viability.

2.10 Clarification is also necessary in relation to the Council’s proposals for new bus facilities as re-provision of the existing bus station on site would render the scheme unviable. Previous consented schemes have proved to be unviable primarily because of the Council’s historic insistence on providing a replacement bus station on site. As set out in our detailed response to policies S1, S2, H1, E2, E3, E6, E7, D1, I1, I2, I3 and A6, the Council has not fully recognised the potential to provide for enhanced retail and high density residential development of an appropriate scale and massing on this key town centre site.

2.11 As such the draft policies as written do not sufficiently or proactively drive sustainable economic development at this town centre site, contrary to the core planning principles (para.17) of the NPPF. This is also contrary to paragraph 23 of the NPPF which requires that town centre sites provide customer choice and a diverse retail offer, and are recognised as the heart of the community.

2.12 The allocation of the North Street site for only 200 homes and 3,000 sq m of food and drink does not recognise the development potential of the site to provide a high density mixed use scheme. This is not in accordance with the core planning principles of the NPPF (para.17) which sets out that planning should promote mixed use developments and encourage multiple benefits from the use of land.

2.13 More detailed comments regarding each of the above points are set out in our responses to specific policies within the Draft Plan.
I judge that the Submission Plan preparation process has not adequately taken account of national policy which attaches “great importance” to the “openness” and “permanence” of Green Belt. To my mind the test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level.

It is not credible to suggest the Green Belt is being treated as permanent when its boundary was changed as recently as 2003 as part of the last Local Plan review. If there is a case for Green Belt development, it needs to be proven through the application of policy and careful thought would need to be given to the pace at which Green Belt is developed bearing in mind future uncertainties in economic and social development. It would surely not be sustainable to release all potential greenfield options within one plan period, and thereby deny future generations, faced with revised circumstances, any such options.

The National Planning Policy Framework requires that objectively assessed needs should be met unless:

° “any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole;

° or specific policies in this Framework indicate development should be restricted.”

The specific policies described include several of particular relevance to Guildford including sites protected under the Birds and Habitats Directives, Sites of Special Scientific Interest, Green Belt, Local Green Space, Area of Outstanding Natural Beauty, designated heritage assets and locations at risk of flooding. In this situation, I cannot see that it is appropriate for the Appraisal to rule out not meeting needs in full from a sustainability perspective.
First of all I would like to object to the council’s use of 'Section 19'. The scale of the opposition to the last plan, from the people whose views they were elected to represent, makes it pretty clear that the plan needed a radical rethink, and not just the modest adjustments permitted under section 19. The use of section 19 also has the effect of stifling debate, and indeed many people are not at all clear what they are allowed to say at this point. Inevitably there will be considerably less comments than last time, and I hope the council will not try and misrepresent this as a sign that voters are any more happy with the plan.

I would like to object strongly to the changes to the draft local plan. It was good to hear that the inspector will see our responses to the last plan, as this one remains substantially the same, despite the public outcry. This leads many people to think that the so-called ‘consultation’ was pretty much a sham, and that the council has largely gone ahead and done what it wanted to do in the first place.

Since the last consultation, there have been a couple of important developments, which were not in the public domain then, and hence we were unable to comment on them.

The first is that the housing minister has recently, on BBC radio 4's 'Today' program, defined the 'exceptional circumstances' that would justify building on the Green Belt, none of which apply to Guildford. They are:

1. That all existing planning permissions have been built out. This does not apply to Guildford, as the university was given planning permission, in 2003, to build 4,790 student and staff units on Manor Park, and, according to the UoS website in April this year, it had only completed 1,637 units.
2. That there is no possibility of more intense development within existing town boundaries. This does not apply to Guildford, as there are some 17 hectares of ground level parking, land which could be used far more efficiently.
3. That there are no brown field sites available. This does not apply to Guildford either, as there are brown field sites at Slyfield, Walnut tree Close, Woodbridge Meadows, Shalford, and elsewhere.

These exceptional circumstances apply to any Green Belt land. Presumably the circumstances that would justify building on AGLV, and AONB, as at Blackwell farm, would have to be considerately more exceptional.

So I object to changes to the local plan on the grounds that it is in contravention of clearly expressed government policy on the Green Belt.

Comment ID: SQLP16/436  Respondent: 9293121 / Charlotte Wilson  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance
Answer: (No)
As I understand it, the main aims of green belt land are:

- to check the unrestricted sprawl of large built-up areas;
- to prevent neighbouring towns merging into one another;
- to assist in safeguarding the countryside from encroachment;
- to preserve the setting and special character of historic towns; and
- to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

I feel that the plan completely disregards all five purposes set out by the government’s National Planning Policy Framework. Whilst I understand there are exceptional circumstances that would make developing green belt land viable, having read both the policy framework and GBC’s Green Belt & Countryside Study, I cannot feel there is enough evidence to make this such an exceptional circumstance to justify potentially destroying an area of outstanding natural beauty. Where does it stop? Green belt is meant to be green belt permanently, which is why on the other side of the coin, 'New Green Belts should only be established in exceptional circumstances'.

---

I object to Policy S1. Sustainability should include the Green Belt as an absolute constraint I object to Policy S2.

I object to the proposed housing figure for the Local Plan to build 13,652 homes at 693 DPA for next 20 years (2013-2033). The housing figure for this plan is unsustainable and the plan does not apply constraints. Local infrastructure will not cope. Paragraph 4.1.12 of the proposed submission Local Plan acknowledges that the number of houses is greater than required.

Representations made on behalf of Send Parish Council by Tibbalds Planning and Urban Design consultants illustrate how allocations are made to provide 910 Dwellings Per Annum (DPA) or 131% of the requirement of the SHMA.

According to NPPF guidance Paragraph 47 stipulates that planning authorities should provide for an additional buffer of between 5-20% and based on this advise the figure would be in region of 727-832 DPA. The provision in the GBC Local Plan to build 910 DPA is therefore excessive.

Without applying constraints the housing figure could rise even higher than 13,652 houses when windfall sites are taken into consideration.

I object to building 485 homes in Send Parish. The scale of development for Send lacks all sense of proportionality. For example Thame in South Oxfordshire has population of approximately 11,000 and a site for 800 was proposed by the Council. Send has a population of approximately 4000 and GBC has allocated 485 houses be built. The population increase will lead to congestion on roads, pressure on local schools, the Villages medical centre and hospital facilities.

I strongly object to Policy H1 Homes for all.

During the 2014 consultation I referenced a report by John Peny (2012) "UK migrants and the private rented sector" for the Joseph Rowntree Foundation. The report noted that taking account of ONS 2011 census data, 75% of migrants who came to the UK in the past five years reside in the private rented sector.
Demographics of the private rented sector (including Houses of Multiple Occupation -HMOs) are an important factor when producing a strategic plan to provide appropriate housing rather than continued reliance on the private rented sector. The plan contains no mechanism to address this or reducing reliance on the private rented sector. Instead GBC has recommends “monitoring” the number of houses of multiple occupation through the number of planning applications. However monitoring will be ineffective when planning permission is not required to change from a C3 (small dwelling house) to C4 (small house of multiple occupation of up to five unrelated individuals). GBC cannot therefore be able to determine the true extend of HMOs and the private rented sector.

However the numbers of those living in the private rented sector inflate the overall housing figure upwards while this plan fails to address the necessity tenure mix of new built dwellings required for this section of population “need” as opposed to building housing on volume. Infact the plan recommends continued use of the private rented sector as a tenure mix and affordability solution. If this recommendation is in addition to the total number of new houses proposed by the plan, then the net effect is to significantly increase population in Guildford, not to address affordability or pressure on existing housing stock that the private rented sector contributes too. Failure to tackle the private rented sector will in turn further inflate housing market prices and leads to more issues of affordability in the longer term. Research published by the Bow Group titled “Solving the Uk Housing Crisis” (November 2015) by Daniel Rossall Valentine, underlines these issues further. It is demand rather than need that is fuelling OAN figures upwards and this plan fails significantly to address this.

I strongly object to Policy H1 Affordable Homes or that this Local Plan addresses building affordable housing for local need. Current guidance on producing SHMA’s Jacks a meaningful needs-based definition of affordability - such as for example the proportion of income allocated to housing costs. OAN figures alone therefore cannot tackle affordability or need (defined as a basic human need to have a roof over our head). I believe that a more meaningful approach to addressing local need is through Neighbourhood Plans and local land trusts. They provide a mechanism to meet local need while preserving and enhancing villages characters. We need local planning that works with local communities. The bottom up approach of Neighbourhood Plans rather than the top down approach of SHMA with an OAN figure incompatible with genuine affordability is a more realistic approach to addressing local need.

Moreover, a recent Rural Housing Needs Survey commissioned by Send Parish Council in 2013 found that “local need” was relatively low within Send Parish.

I object to Policy P2 Green Bell

I object to removing/ insetting villages from the Green Belt for the following reasons:

1) NPPF guidance makes clear that Green Belt boundaries should only be altered in exceptional circumstances through the Local Plan process. Unmet housing need is unlikely to outweigh harm to the Green Belt and consililuate “exceptional circumstances”.

1. Send Village should remain in the Green Bell The village of Send with its proximity on the border of Woking is a village which fulfils paragraph &O of the NPPF which stipulates that Green Bell is Lo check unrestricted sprawl of large built-up areas and to prevent neighbouring towns from merging. Paragraphs 79-&6 of the NPPF should therefore be applied to Send as a constraint and Send should not be removed from the Green Belt.

   • Moreover the basis for Policy P2 is the Guildford Borough Green Belt and Countryside Study.

3a) Guildford Borough Green Belt and Countryside Study has Jacked consistency to Green Belt boundaries. Land in Send Parish which was initially identified as Green Belt within the evidence base document, Guildford Borough Green Belt and Countryside Study - Volume IV (2014) has now been allocated for housing development as sites A43 and A44.
3b) Elsewhere Guildford Borough Green Belt and Countryside Study is used to rule out other sites which meet the GBC Flood Risk Sequential and Exception Test (May 2016), See Appendix I Stag 1, 2 and 3 page 25. Again there is a lack of consistency in approach.

- The Settlement Hierarchy is another key evidenced based document for Policy P2 which is IL makes a subjective decision that Send Marsh and Burnt Common are categorised as a large village due to their proximity to Send services. In practise this is a small convenience store attached to a garage/fuel station. Had this not been so Send Marsh and Burnt Common would have been classified a medium village. Medium villages are unsuitable for substantial growth (such as site A43 Garlick’s Arch). Please refer further to ‘Representations on behalf of Send Parish Council by Tibbalds Planning and Urban Design consultants).

I also object to Policy D4 Development in Urban Areas and Inset Villages for all the reasons above.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

**Answer:** (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement. It is unacceptable to treat Green Belt as a readily available source of development land during Plan preparation. The Mayor of London intends to respect Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level. Releasing Green Belt to fund infrastructure or build on open, previously-developed Green Belt does not pass this test. Opportunities to channel development towards brownfield locations beyond the outer Green Belt boundary, linked to sustainable transport, have not been adequately considered. It is not credible to suggest the Green Belt is being treated as permanent when its boundary was changed as recently as 2003 as part of the last Local Plan review. Indeed, land released in 2003 is neither fully developed nor efficiently used. An approach of eroding the Green Belt at each Local Plan review is not sustainable. If there is a case for Green Belt development, it needs to be proven through the application of policy.

The plan focuses on growth and economic strategy, to the detriment of social equity and environmental protection as required by the NPPF.

Despite the DCLG encouraging ‘brownfield’ registers and ‘brownfield’ land release for housing, there is no ‘brownfield first’ policy. GBC is a major holder of ‘brownfield’ land in the town (Walnut Tree Close and Woodbridge Meadows) and yet has included none of these sites for housing development; Policy P4 is not a sound basis for such an exclusion.

The plan is inconsistent with the NPPF guidance, as 70% of house building is proposed in the Green Belt.

GBC has included no details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation.

GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.

GBC has failed expressly to include in Policy P1, H1 and P5 any direct consideration of NPPF para 119.

• I OBJECT to GBC adding Garlick’s Arch to the plan at only 13 days before the 24th May discussion of the Local Plan by GBC. The fact that this was ‘last minute’ was admitted by Mr Spooner at the Send Parish Council Meeting on June 14th. This site presents a significant change to the regulation 18 consultation in 2014, and therefore should have been fully debated, rather than accepted through a shortcut of Regulation 19. The fact that GBC have been ‘gifted’ the land to build the slip road to the A3 (policy A43a) in return for the inclusion Garlick’s Arch leads to cynicism and doubt that due process is being followed.

• I OBJECT to the disregard that GBC have shown to the concerns of local residents through previous ‘consultation’ processes which suggests that this one will be no different. Since 2014 GBC have changed every major site in Send proposed for development and now want to add a massive new road junction. The 2014 proposal for 430 houses went down in April 2016 to 185 and has now gone up to 485. This is in spite of a huge amount of effort by local residents to give the requested feedback to the previous plan. Naturally people are tired of repeating the same objections on seemingly deaf ears, but GBC should not conclude that the proposals have public support.

Requirements to properly consult have been overridden; no consultation whatsoever has been possible, for example, in the last minute inclusion of the Burnt Common "Garlick’s Arch” estate. The duty to consider use of Green Belt land only in exceptional circumstances has not been met. No assessment has been made of the impact on water, sewerage, power, transport by road and rail, schooling, medical facilities, footpaths and road safety, all of which would be severely affected adversely.

The Plan shows inadequate regard to national policy which attaches great importance to the openness and permanence of the Green Belt. The test of exceptional circumstances has not been rigorously demonstrated. The Sustainability Appraisal has not applied the concept of sustainable development.

The Plan has had such substantial changes since the last Regulation 18 consultation that it should be subjected to a further Regulation 18 consultation.

The Local Plan has been prepared against a predetermination by the GBC Executive to ‘roll back the Green Belt’ which has destroyed objectivity.

Key parts of the evidence are missing, flawed or based on withheld assumptions.

The Strategic Housing Market Assessment overstates need, the Green Belt and Countryside Study uses a flawed approach and the Transport evidence is too late and incomplete to be relied upon to inform the Plan.

The Plan preparation process has had inadequate regard for national policy which attaches “great importance” to the “openness” and “permanence” of Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level.

The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement.

It is unacceptable to treat Green Belt as a readily available source of development land during Plan preparation. The Mayor of London intends to respect Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level. Releasing Green Belt to fund infrastructure or build on open, previously-developed Green Belt does not pass this test. Opportunities to channel development towards brownfield locations beyond the outer Green Belt boundary, linked to sustainable transport, have not been adequately considered. It is not credible to suggest the Green Belt is being treated as permanent when its boundary was changed as recently as 2003 as part of the last Local Plan review. Indeed, land released in 2003 is neither fully developed nor efficiently used. An approach of eroding the Green Belt at each Local Plan review is not sustainable. If there is a case for Green Belt development, it needs to be proven through the application of policy.

Question 2: Legal compliance
The Plan preparation process has had inadequate regard for national policy, which attaches “great importance” to the “openness” and “permanence” of Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level.

The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement.

The report states that there are no pollution issues in Guildford. This is not true. The A3 end of the B3000 exceeds Eu regulations and this should be flagged in the 2015/16 air quality report which the Council has yet to publish.

I object

The 2015/2016 air quality management report has not yet been published and this will/should include an area at the A3 end of Compton, which exceeds the recommended max NO2 reading. One year results for NOx are **48.728 with high's of 68 using National bias adjustment**.

Cllr Furniss indicated that the location of the test tubes may have made them invalid, but measurements show that they were positioned correctly and monitored for over a year by GBC environment officers, who have now added additional monitoring devices (See Annex 2 – Correspondence between Cllr Curtis and Cllr Furniss). This area qualifies as an air quality management area (AQMA) and it is disingenuous to omit this from the report or to use an old report on the basis that the 2015 report is not yet published, as the problem is known and recognised by the environment department within GBC.

The traffic survey shows increases in overall flow at the B3000 monitoring point, of values between 5.6% and 16.5%. This would severely impact flow, which is not in line with National Policy as further congestion would exacerbate the current air quality issues as the A3 end of the Street.

I do not believe that a regulation 19 consultation is appropriate. Whilst few changes have been made, additional sites have been included without opportunity for regulation 18-consultation input.

The video used and paid for by GBC and taxpayers is biased towards development, and hence raises questions over the validity and legality of such marketing campaigns. All the individuals featured in the video, with the exception of one nurse have previously spoken in the Council Chamber in favour of house building/building on Blackwell Farm; and there is not a single voice representing protection of the Countryside or outstanding landscapes.

I do not consider the Proposed Submission Local Plan: strategy and sites **as a whole** to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually **increases** the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

I object in that Guildford BC has not followed the correct process having changed every major site in Send proposed for development since 2014, now adding in a major new road junction. The proposal for new houses has changed having done down in April 2016 to 185 and now being increased to 485. Significant changes require another full consultation under Regulation 18.

**Attached documents:**
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

Attached documents:

---

Overall, I object to the approach that the Council is taking to the consultation. During the re-drafting of the 2014 draft Local Plan, instead of finding a sensible alternative the Council has changed all the major sites in Send and added a large road junction. It is beyond belief that the Council suggest that they have listened to we, the residents, yet have actually increased the planned housing levels in the village. These changes are significant so require another full consultation under Regulation 18, not the short-cut of Regulation 19 which the Council is using.

Attached documents:

---

I Object because the proposed Send developments were never mentioned in the original local plan. This addition requires another full consultation under regulation 18.

Attached documents:

---

The plan fails to follow NPPF guidance regarding Brown Field sites.
The Plan preparation process has had inadequate regard for national policy, which attaches “great importance” to the “openness” and “permanence” of Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level.

The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement.

The report states that there are no pollution issues in Guildford. This is not true. The A3 end of the B3000 exceeds Eu regulations and this should be flagged in the 2015/16 air quality report which the Council has yet to publish.

This is surely a matter for legally qualified people. I am unable to judge whether the Proposed Submission Local Plan as a whole is legally compliant. Doubtless the Inspector and the legal representatives of parties to the hearing will decide this.

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole is legally compliant? Please provide the following information being as precise as possible:

Attached documents:

Comment ID: SQLP16/1655  Respondent: 11080097 / David & Julia Hunt  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Answer: ()

The Plan preparation process has had inadequate regard for national policy, which attaches “great importance” to the “openness” and “permanence” of Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level.

The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement.

The report states that there are no pollution issues in Guildford. This is not true. The A3 end of the B3000 exceeds Eu regulations and this should be flagged in

I object

The 2015/2016 air quality management report has not yet been published and this will/should include an area at the A3 end of Compton, which exceeds the recommended max NO2 reading. One year results for NOx are 48.728 with high’s of 68 using National bias adjustment.

Cllr Furniss indicated that the location of the test tubes may have made them invalid, but measurements show that they were positioned correctly and monitored for over a year by GBC environment officers, who have now added additional monitoring devices (See Annex 2 – Correspondence between Cllr Curtis and Cllr Furniss). This area qualifies as an air quality management area (AQMA) and it is disingenuous to omit this from the report or to use an old report on the basis that the 2015 report is not yet published, as the problem is known and recognised by the environment department within GBC.

The traffic survey shows increases in overall flow at the B3000 monitoring point, of values between 5.6% and 16.5%. This would severely impact flow, which is not in line with National Policy as further congestion would exacerbate the current air quality issues as the A3 end of the Street.
I do not believe that a regulation 19 consultation is appropriate. Whilst few changes have been made, additional sites have been included without opportunity for regulation 18-consultation input.

The video used and paid for by GBC and taxpayers is biased towards development, and hence raises questions over the validity and legality of such marketing campaigns. All the individuals featured in the video, with the exception of one nurse have previously spoken in the Council Chamber in favour of house building/building on Blackwell Farm; and there is not a single voice representing protection of the Countryside or outstanding landscapes.

**Answer:** ()

the overly short consultation plan and the documents which is unreadable by those with poor eyesight (blue background with white text!!)

Attached documents:
### Question 2: Legal Compliance

**Do you consider the Proposed Submission Local Plan: strategy and sites as a whole is legally compliant?**

No.

We question whether the councils proposed Policy H1 “Homes for All” has full regard to National Policy and Guidance in relation to Custom and Self-build homes. The policy H1 makes no specific reference to Custom or Self-builds and there is limited detail in the reasoned justification under para 4.2.12 which focuses on keeping a Self-build Register and the allocation of some self-build plots within the strategic housing development sites. This is the duty imposed on local planning authorities set out in the Self-Build and Custom Housebuilding Act 2015. There is now also a duty placed on local planning authorities to grant planning permission for enough serviced plots of land to meet demand for self-build and custom house building arising in each base period. Regulations are yet to specify the detail and it is early days in terms of people becoming aware of, being interested in and taking up the opportunities of the provisions. Whilst some provision is made within the Plan within the strategic housing sites, there is no monitoring indicator for this type of housing, nor any reference to targets. In order to ensure that the duty to meet demand and to grant permission is adequately addressed, it is considered that further work needs to be made within the Plan through adding an indicator and target but also ensuring that adequate sites of suitable character are allocated.

### Comment ID: SQLP16/578  Respondent: 14181313 / Vision for Guildford Ltd - GVG (William Stokoe)  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

---
We understand that the council propose an Area Action Plan (AAP) for the town centre once the Local Plan is adopted. We are concerned that the AAP will be subject to challenge if its aims are not foreshadowed in the Local Plan. We believe omission of any mention of the AAP could render the Local Plan unsound in this respect.

Comment ID: SQLP16/31  
**Respondent:** 15066369 / Adam Fairbairn  
**Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

**Answer:** (No)

While this plan may be 'legally sound', what about the rights of all of the animals that have no legal side or entity which fights against the destruction of their homes? Putting all these buildings, homes and construction there will murder and eradicate many helpless animals that are only trying to fend for themselves in an already overpopulated area. I strongly object to these proposals for the good of not just the community, but for the wildlife community too. Of course, these plans will be conducted 'by the book' and will be legally sound but this is not the point then constructing houses and destroying habitat for the sake of unnecessary homes.

Comment ID: SQLP16/839  Respondent: 15084897 / Save Send Action Group (Andrew Procter)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Answer: ()

3. LEGAL COMPLIANCE

3.1 Key parts of the evidence are missing, flawed or based on withheld assumptions.

3.2 The Strategic Housing Market Assessment overstates need, the Green Belt and Countryside Study uses a flawed approach and the Transport evidence is too late and incomplete to be relied upon to inform the Plan.

3.3 The Plan preparation process has had inadequate regard for national policy which attaches “great importance” to the “openness” and “permanence” of Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level.

3.4 The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement.

3.5 It is unacceptable to treat Green Belt as a readily available source of development land during Plan preparation. The Mayor of London intends to respect Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level. Releasing Green Belt to fund infrastructure or build on open, previously-developed Green Belt does not pass this test. Opportunities to channel development towards brownfield locations beyond the outer Green Belt boundary, linked to sustainable transport, have not been adequately considered. It is not credible to suggest the Green Belt is being treated as permanent when its boundary was changed as recently as 2003 as part of the last Local Plan review. Indeed, land released in 2003 is neither fully developed nor efficiently used. An approach of eroding the Green Belt at each Local Plan review is not sustainable. If there is a case for Green Belt development, it needs to be proven through the application of policy.

**Respondent:** 15156609 / stewart Gibbons  
**Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

**Answer:** ()

I would like to object to planned building of 700 homes per year, the area of Send does not have sufficient infrastructure to support this type of expansion. There are insufficient schools, road and transport system. Will destroy the village and its uniqueness, turn the whole are into a massive Conurbation.

The process which this has been proposed contravenes not only planning commitment and guidance as laid down by the government for green belt, but also has ignored due process.

I object to further development for the following reasons. With advent of the UK exit from the EU, the prediction for the requirement for housing and development of commercial units will need to be revised downwards. As the 3 million EU citizens currently in the UK, will be affected by this current event, and their ability to stay in this country will also be affected. So your estimates for further development of housing are wildly exaggerated and need to be revised downwards.

In addition to the potential down grade in the economy due to Brexit, your estimation for commercial and housing development is wildly exaggerated and unnecessary. Given you have allowed development of send marina; I really don’t understand how you can commit to further commercial developments. So therefore this development is folly this area does not need.
In particular, I want to object to all the following points:

I object to Garlicks Arch development of green belt land which contravenes government guide lines and that due process was not followed in the introduction of this development into this plan, and did not follow this process. Its inclusion in this plan was included at the last stage and did not follow process. So for that reason should be excluded.

I object to the council changing the enclosure of green belt land round the Ripley and Send villages, changing of village boundaries to allow for future development.

I object to the wholesale destruction of green belt land in this area (including development of 2000 homes at Gosden hill farm, Merrow, and also Send and Ripley), which contravenes directly the government stated commitment to preservation to green belt land.

I object to the creation of new north and South Bounds slips ways from the A3 to the A247 clandon Road (policy A243) at Burnt common, as in light of the wholly unnecessary due to planned expansion which unlikely be needed within the 10 years.

The consultation does not include the impact of the A3 widening. A3 widening is required for the viability of the Blackwell Farm development and should be considered in conjunction.

Attached documents:

---

Comment ID: SQLP16/496  Respondent: 15275009 / Compton Parish Council (Fiona Curtis)  Agent: 

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Answer: (No)

The Plan preparation process has had inadequate regard for national policy, which attaches “great importance” to the “openness” and “permanence” of Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level.

The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement.

The report states that there are no pollution issues in Guildford. This is not true. The A3 end of the B3000 exceeds Eu regulations and this should be flagged in the 2015/16 air quality report which the Council has yet to publish.

We object

The 2015/2016 air quality management report has not yet been published and this will/should include an area at the A3 end of Compton, which exceeds the recommended max NO2 reading. One year results for NOx are 48.728 with high’s of 68 using National bias adjustment.

Cllr Furniss indicated that the location of the test tubes may have made them invalid, but measurements show that they were positioned correctly and monitored for over a year by GBC environment officers, who have now added additional monitoring devices (See Annex 1 – Correspondence between Cllr Curtis and Cllr Furniss). This area qualifies as an air quality management area (AQMA) and it is disingenuous to omit this from the report or to use an old report on the basis that the 2015 report is not yet published, as the problem is known and recognised by the environment department within GBC.

The traffic survey shows increases in overall flow at the B3000 monitoring point, of values between 5.6% and 16.5%. This would severely impact flow, which is not in line with National Policy as further congestion would exacerbate the current air quality issues as the A3 end of the Street.

We do not believe that a regulation 19 consultation is appropriate. Whilst few changes have been made, additional sites have been included without opportunity for regulation 18-consultation input.

The video used and paid for by GBC and taxpayers is biased towards development, and hence raises questions over the validity and legality of such marketing campaigns. All the individuals featured in the video, with the exception of one nurse have previously spoken in the Council Chamber in favour of house building/building on Blackwell Farm; and there is not a single voice representing protection of the Countryside or outstanding landscapes.

Site A26 - Blackwell Farm - See Annex 4 attached.

Attached documents:  
Air Quality correspondence.pdf (408 KB)  
Independent Traffic report annex 3.pdf (2.5 MB)  
Site 26 BWF Annex 4.pdf (456 KB)
I object on the basis that the amount of properties Guildford Borough Council proposed was 185 and now gone to 485. Such a major difference requires a new consultation period under Regulation 18.

Attached documents:

Save in respect of Allocation A43 Garlick's Arch and A43a Land for new northfacing slip roads to/from A3 at Send Marsh/Burnt Common which has not been the subject of consultation prior to its allocation in the Plan.

Attached documents:

We are not convinced that the Proposed Submission as a whole is legally compliant, particularly with regard to the Town and Country Planning (Local Planning) (England) (Amendment) Regulations 2012. One of the requirements for the preparation stage of the Plan is to develop alternatives and options and appraising them through sustainability appraisal and against evidence. For the reasons we have set out in this Submission, we do not believe that the Council has (a) taken a meaningful approach to developing alternatives and options nor (b) assessed them against evidence, or applied a sustainability appraisal in a logical manner. This is contrary to paragraph 182 of the NPPF which makes clear that explicit consideration of alternatives is a key part of the plan making process.

This shortcoming is particularly concerning in light of the strong possibility of a number of the strategic allocations not being delivered (or delayed in coming forward), which would result in other sites being needed as an alternative. In particular, the removal of a number of safeguarded sites from this latest version of the Plan leads to concerns about the lack of any identified alternatives during the Plan period, many of which have been collectively dismissed on the Council’s internal assessment of high sensitivity. This would appear to be contrary to Regulation 12 (2) of The Environmental Assessment of Plans and Programmes Regulations 2004 No. 1633.

We are also concerned that the Council has not demonstrated due regard for other strategies and relevant matters, including the local transport plan and transport facilities and services. It is evident from the shortcomings on infrastructure requirements, particularly in relation to the strategic sites, that the Council has not taken a joined up approach on these matters, which runs contrary to Section 19 (2), Regulation 10 of the Planning and Compulsory Purchase Act 2004 (as amended).

Attached documents:
We are not convinced that the Proposed Submission as a whole is legally compliant, particularly with regard to the Town and Country Planning (Local Planning) (England) (Amendment) Regulations 2012. One of the requirements for the preparation stage of the Plan is to develop alternatives and options and appraising them through sustainability appraisal and against evidence. For the reasons we have set out in this Submission, we do not believe that the Council has (a) taken a meaningful approach to developing alternatives and options nor (b) assessed them against evidence, or applied a sustainability appraisal in a logical manner. This is contrary to paragraph 182 of the NPPF which makes clear that explicit consideration of alternatives is a key part of the plan making process.

This shortcoming is particularly concerning in light of the strong possibility of a number of the strategic allocations not being delivered (or delayed in coming forward), which would result in other sites being needed as an alternative. In particular, the removal of a number of safeguarded sites from this latest version of the Plan leads to concerns about the lack of any identified alternatives during the Plan period, many of which have been collectively dismissed on the Council’s internal assessment of high sensitivity. This would appear to be contrary to Regulation 12 (2) of The Environmental Assessment of Plans and Programmes Regulations 2004 No. 1633.

We are also concerned that the Council has not demonstrated due regard for other strategies and relevant matters, including the local transport plan and transport facilities and services. It is evident from the shortcomings on infrastructure requirements, particularly in relation to the strategic sites, that the Council has not taken a joined up approach on these matters, which runs contrary to Section 19 (2), Regulation 10 of the Planning and Compulsory Purchase Act 2004 (as amended).

Does the SHMA fulfil requirements for legal compliance?

Attached documents:

Comment ID: SQLP16/1647  Respondent: 15299201 / Samira Abdullah  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance
Answer: ()
The Plan preparation process has had inadequate regard for national policy, which attaches “great importance” to the “openness” and “permanence” of Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level.

The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement.

The report states that there are no pollution issues in Guildford. This is not true. The A3 end of the B3000 exceeds Eu regulations and this should be flagged

I object

The 2015/2016 air quality management report has not yet been published and this will/should include an area at the A3 end of Compton, which exceeds the recommended max NO2 reading. One year results for NOx are 48.728 with high’s of 68 using National bias adjustment.

Cllr Furniss indicated that the location of the test tubes may have made them invalid, but measurements show that they were positioned correctly and monitored for over a year by GBC environment officers, who have now added additional monitoring devices (See Annex 2 – Correspondence between Cllr Curtis and Cllr Furniss). This area qualifies as an air quality management area (AQMA) and it is disingenuous to omit this from the report or to use an old report on the basis that the 2015 report is not yet published, as the problem is known and recognised by the environment department within GBC.

The traffic survey shows increases in overall flow at the B3000 monitoring point, of values between 5.6% and 16.5%. This would severely impact flow, which is not in line with National Policy as further congestion would exacerbate the current air quality issues as the A3 end of the Street.

I do not believe that a regulation 19 consultation is appropriate. Whilst few changes have been made, additional sites have been included without opportunity for regulation 18-consultation input.

The video used and paid for by GBC and taxpayers is biased towards development, and hence raises questions over the validity and legality of such marketing campaigns. All the individuals featured in the video, with the exception of one nurse have previously spoken in the Council Chamber in favour of house building/building on Blackwell Farm; and there is not a single voice representing protection of the Countryside or outstanding landscapes.

Answer: ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.
Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant. The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

Attached documents:
• what change(s) (if any) you consider necessary to make it legally compliant, explaining why this is the case.

I also object to the fact that proposed sites in Send, including the Garlick’s Arch proposal, have been added as a last minute addition. They were not included in the 2014 consultation, Send has not been properly consulted and other proposed sites have been substantially changed. The development at Garlick’s Arch for 400 houses was sprung on the village at the last moment with only 2 weeks’ notice and without any prior consultation and is not required in terms of housing need either for the village or the borough.

GRA Comment: The Plan preparation process has had inadequate regard for national policy which attaches “great importance” to the “openness” and “permanence” of Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level.

The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement.

Green Belt

It is unacceptable to treat Green Belt as a readily available source of development land during Plan preparation, notwithstanding that this is the time when any boundary review deemed necessary takes place. Any such review should be mindful of the “great importance”, “openness” and “permanence” of Green Belt and take a long term perspective towards this planning mechanism.

The Mayor of London intends to respect London’s Green Belt boundary.

Releasing Green Belt to fund infrastructure (e.g. “support delivery of A3 junction upgrades” or “facilitate delivery of new strategic infrastructure including a rail station, park and ride and a secondary school”) or to fully meet exaggerated need does not pass this test. Nor does building on open, previously-developed Green Belt.

Opportunities to channel development towards locations beyond the outer Green Belt boundary, linked to sustainable transport and the duty to cooperate, have not been adequately considered at a strategic level. This assessment should involve more than just looking at a small area of countryside within the borough immediately beyond the Green Belt boundary, or indeed the rather meaningless Housing Market Area.

In view of the extent of the Area of Outstanding Natural Beauty, Special Protection Area and Green Belt in Guildford Borough, which restrict the availability of land suitable for development, it is important that the potential for sustainable travel is considered. This needs to be balanced against the option of minimising distances between work and home which is usually treated as a more sustainable approach.

It is not credible to suggest the Green Belt is being treated as permanent when its boundary was changed as recently as 2003 as part of the last Local Plan review. Indeed, land released in 2003 is neither fully developed nor efficiently used. An approach of eroding the Green Belt at each Local Plan review without considering the bigger picture is not sustainable. Proposed erosion of Green Belt to development and “inserting” in this Plan should be put in the context of cumulative loss. Since the Metropolitan Green Belt was established, just over 6% has been lost (6.24%), noting that a modest proportion of Green Belt lost to “inserting” will be protected as open space in villages.

If there is a case for Green Belt development, this would need to have been proven through the application of policy. In addition, careful thought would need to be given to the pace at which Green Belt is developed using a long term reserve site approach. It would be unsustainable to release all potential last resort greenfield options within one plan period, denying future generations any such options.

The Green Belt and Countryside Topic Paper is cause for concern on the issue of Green Belt safeguarded for development. It suggests in paragraphs 4.64 to 4.71 that the Plan will not safeguard sites for future development because so little land can be identified and more strategic solutions will be required. It concludes that any further Green Belt development would result in ribbon development, a stretched urban area and merging of villages with the urban area*. In view of the fact that such ribbon development would be wholly unacceptable, the more strategic approach referred to in paragraph 4.70 is required now. The current Local Plan review should both constrain the overall scale of development in this Plan and also very carefully pace any releases deemed necessary over several generations.
4.68 “Given the limited central ribbon within which development could potentially occur, safeguarded land in Guildford would result in an unsustainable pattern of development. It would create an oblong-shaped urban area...”

4.69 “there will inevitably be a limit to the extent that Guildford urban area can expand before it would begin to merge with surrounding villages. This would have a detrimental impact on the character of the countryside and our rural communities.”

4.70 “…a more strategic approach to growth or protection will need to be considered, in cooperation with our neighbours.”

**Sustainability Appraisal**

The extent to which the current Sustainability Appraisal fails to test the sustainability of the spatial options in a meaningful way casts doubt over whether sustainability has been assessed. The report

- accepts the Council’s corporate objectives, which have not gone through proper consultation, as consistent with sustainable development when they are not,
- treats various major development sites in Green Belt, contrary to the importance attached to protecting Green Belt, as “a given”,
- fails to consider options that constrain development or that make greater use of brownfield or previously-released greenfield land,
- focuses on a range of options that involve developing on even more Green Belt around Guildford in order to protect countryside around Woking
- does not consider environmental limits or impact on the next generation in terms of weighing demand for homes alongside the use of all possible last resort greenfield options by one generation.

The National Planning Policy Framework requires that objectively assessed needs should be met unless:

- “any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole;
- or specific policies in this Framework indicate development should be restricted.”

The specific policies described include several of particular relevance to Guildford including sites protected under the Birds and Habitats Directives, Sites of Special Scientific Interest, Green Belt, Local Green Space, Area of Outstanding Natural Beauty, designated heritage assets and locations at risk of flooding. In this situation, we do not consider it appropriate for the Appraisal to rule out not meeting needs in full from a sustainability perspective.

Notwithstanding that the Sustainability Appraisal should be proportionate, realistic, strategic, and look at significant matters, the assessment appears deficient and biased in the spectrum of alternatives it considers to the point that it is questionable whether it meets the requirements.

We note that the Government’s Local Plans Expert Group has advised (March 2016) that “Whilst we recommend significant reductions in other elements of the local plan evidence base…, we propose that a proportionate Assessment of Environmental Capacity should be an important part of plan making.” The group confirms that “Objectively assessed needs for all types of development are the starting point but it is then necessary for the authority to consider the extent to which the plan can meet those needs consistently with the policies of the Framework.” They continue, “Despite the clear test set by paragraph 14 of the NPPF, few authorities compile an assessment of the environmental capacity of their area, making it difficult for Planning Inspectors to apply the NPPF policy”. They go on to say “We recognise that the NPPF does not require authorities to meet the full identified need for development in all circumstances, even within the Housing Market Area, if there is insufficient environmental capacity but we encountered significant uncertainty about how the appropriate balance should be struck. We make recommendations to remove that uncertainty and to confirm the
legitimacy of applying the tests set out in the NPPF to ensure that needs are met up to the point where the adverse effects of doing so can be shown to outweigh the benefit of meeting the need.”

An adequate Sustainability Appraisal, which considers environmental capacity alongside social and economic aspects of sustainable development, should enable reasonable alternative scenarios to be tested against environmental capacity. We suggest the alternative scenarios selected, ranging from fully meeting exaggerated need to also meeting all of Woking’s need that would be unmet due to the application of constraints, did not test a meaningful spectrum of options. Indeed, it seems bizarre to place such emphasis on developing Green Belt in Guildford to protect countryside in Woking.

The Expert Panel was concerned at the number of authorities that cannot demonstrate soundness because they have constrained development without adequately testing the point at which adverse effects of meeting need can be shown to outweigh the benefit of doing so. The concern is that Guildford has gone the other way: it has been so eager to get the Plan through that it has failed to give sufficient weight to harm to the environment from fully meeting need, such that it proposes an inadequately tested option that would constitute unsustainable development.

Comment ID: SQLP16/1194  Respondent: 15464673 / Trudy Grey  Agent:  

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance  

Answer: ()

24.B. Question 2: Legal Compliance

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole is legally compliant? Please provide the following information being as precise as possible:

- why you consider it is or is not legally compliant and
- what change(s) (if any) you consider necessary to make it legally compliant,

explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

I object that the Plan is not legally compliant in that the modelling assumptions and structure have not been made available and therefore the SHMA does not comply with the Town and County Planning (Local Planning) (England) Regulations.

**Comment ID:** SQLP16/1522  **Respondent:** 15586017 / C Maslin  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance
I object

The Plan preparation process has had inadequate regard for national policy, which attaches ‘great importance’ to the ‘openness’ and ‘permanence’ of Green Belt. The test of ‘exceptional circumstances’ that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level.

The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement.

The report states that there are no pollution issues in Guildford. This is not true. The A3 end of the B3000 exceeds Eu regulations and this should be flagged in the 2015/16 air quality report which the Council has yet to publish.

The 2015/2016 air quality management report has not yet been published and this will/should include an area at the A3 end of Compton, which exceeds the recommended max NO2 reading. One year results for NOx are 48.728 with high's of 68 using National bias adjustment.

Cllr Furniss indicated that the location of the test tubes may have made them invalid, but measurements show that they were positioned correctly and monitored for over a year by GBC environment officers, who have now added additional monitoring devices (See Annex 2 – Correspondence between Cllr Curtis and Cllr Furniss). This area qualifies as an air quality management area (AQMA) and it is disingenuous to omit this from the report or to use an old report on the basis that the 2015 report is not yet published, as the problem is known and recognised by the environment department within GBC.

The traffic survey shows increases in overall flow at the B3000 monitoring point, of values between 5.6% and 16.5%. This would severely impact flow, which is not in line with National Policy as further congestion would exacerbate the current air quality issues as the A3 end of the Street.

I do not believe that a regulation 19 consultation is appropriate. Whilst few changes have been made, additional sites have been included without opportunity for regulation 18-consultation input.

The video used and paid for by GBC and taxpayers is biased towards development, and hence raises questions over the validity and legality of such marketing campaigns. All the individuals featured in the video, with the exception of one nurse have previously spoken in the Council Chamber in favour of house building/building on Blackwell Farm; and there is not a single voice representing protection of the Countryside or outstanding landscapes.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.
The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

Attached documents:

Comment ID: SQLP16/1656  Respondent: 15602177 / Julia Hunt  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance
Answer: ()
The Plan preparation process has had inadequate regard for national policy, which attaches “great importance” to the “openness” and “permanence” of Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level.

The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement.

The report states that there are no pollution issues in Guildford. This is not true. The A3 end of the B3000 exceeds Eu regulations and this should be flagged in

I object

The 2015/2016 air quality management report has not yet been published and this will/should include an area at the A3 end of Compton, which exceeds the recommended max NO2 reading. One year results for NOx are 48.728 with high's of 68 using National bias adjustment.

Cllr Furniss indicated that the location of the test tubes may have made them invalid, but measurements show that they were positioned correctly and monitored for over a year by GBC environment officers, who have now added additional monitoring devices (See Annex 2 – Correspondence between Cllr Curtis and Cllr Furniss). This area qualifies as an air quality management area (AQMA) and it is disingenuous to omit this from the report or to use an old report on the basis that the 2015 report is not yet published, as the problem is known and recognised by the environment department within GBC.

The traffic survey shows increases in overall flow at the B3000 monitoring point, of values between 5.6% and 16.5%. This would severely impact flow, which is not in line with National Policy as further congestion would exacerbate the current air quality issues as the A3 end of the Street.

I do not believe that a regulation 19 consultation is appropriate. Whilst few changes have been made, additional sites have been included without opportunity for regulation 18-consultation input.

The video used and paid for by GBC and taxpayers is biased towards development, and hence raises questions over the validity and legality of such marketing campaigns. All the individuals featured in the video, with the exception of one nurse have previously spoken in the Council Chamber in favour of house building/building on Blackwell Farm; and there is not a single voice representing protection of the Countryside or outstanding landscapes.

1. **Legal compliance and soundness**

I object to the proposed Local Plan on the grounds that numerous factors make it non-compliant legally and unsound.

The Local plan proposals for A46 and A47 are inadequate on all the following grounds:

- The NPPF demands that residents are actively engaged in deciding their needs and priorities. This has not been met. These previously safeguarded proposals have been brought forward in detail only in this iteration of the plan, meaning residents have had only a minimal time to respond and only in relation to Regulation 19, not at Regulation 18. Even at a public meeting on 24th February with Cllr Spooner the position presented was that the safeguarding on A46 had been lifted and that the site was a ‘red rated’ green belt area. No mention was made of either proposal – only a few weeks before the new draft was published. I understand the proposals have been with GBC for up to two years.

I object that residents have not been fully consulted on these proposals.

- The proposals are contrary to the NPPF’s requirements on biodiversity and the natural environment. In section 11 headed “Conserving and enhancing the natural environment”, it is stated that planning policy should protect and enhance valued landscapes and minimise impacts on biodiversity, providing net gains in biodiversity wherever possible to halt the overall decline in biodiversity, by promoting “the preservation, restoration and recreation of priority habitats, ecological networks and the protection and recovery of priority species populations……”. GBC is failing to do this in several ways in relation to A46 and A47 with no clear justification or evidence given as to why this is the case. It seems that no consideration has been given to the value of the existing SNCIs, the wider network of hedges and trees and the fact that all this is within one of Surrey’s Biodiversity Opportunity Areas – despite Policy I4 seeking to promote exactly these qualities. I object that Guildford has not given biodiversity the full consideration legally required, in breach not only of these policies but their statutory duty under the NERC Act 2006.

- A46 and A47 both fall within the Green Belt, but their inclusion here is not justified. The fundamental aim of green belt policy is to prevent urban sprawl by keeping land permanently open. The NPPF states ‘the essential characteristics of Green Belts are their openness and their permanence’ (NPPF). Past verdicts of planning inspectors have declared that Normandy/Flexford green fields (A46) contribute to the ‘openness’ of the Green Belt and a panoramic view of green fields to the Surrey Hills AONB.

Paragraph 4.3.1.2 of the Plan (under Policy P2) states that "only those villages whose open character makes an important contribution to the Green Belt should be included in the Green Belt". I contend that the land in both Policy A46 and A47 makes an unparalleled contribution to the Green Belt which stretches from Guildford in the east to Ash/Tongham in the west. If this area is inset and built upon in the manner proposed it will be the beginning of urban sprawl across this stretch of countryside which Green Belt policy was designed to prevent. The Government have indicated that Green Belt is supposed to be protected, but GBC are trying to justify development in this area when they themselves designated it as having a ‘Red’ status under their system for quantifying sensitivity (red being the most sensitive and least likely to be developed). GBC have totally ignored all policies on biodiversity when proposing to inset these areas.
New developments are supposed to maintain existing Green infrastructure and improve upon it; in order to secure sustainable development, there should be a net gain for biodiversity. It is impossible to agree that any Green infrastructure which would accompany this development could mitigate for the habitat loss and resultant decline of species.

According to the Council for Protection of Rural England (CPRE), 13% of the most important habitat areas identified in UK BAP occur in the Green Belt, and certain species such as the mistle thrush, song thrush and starling (known to use Site 46) are doing better in the Green Belt than in any other parts of England. Green Belt areas also show more positive trends of bird and butterfly species than in the urban fringes compared to them.

I object to the insetting of Normandy and Flexford (A46 and A47) from the Green Belt on the grounds that these areas contribute to the ‘openess of the Green Belt’

### 2.4.1 Impact on the wider environment of the Thames Basin Heaths Special Protection Area

I believe that the Plan is unsound in relation to Policy A46 as the Habitats Regulations Assessment prepared for GBC does not take sufficient account of the impact that this huge proposed development specifically will have upon the Thames Basin Heaths Special Protection Area (TBH SPA) which is a European Site as defined under the Habitats Directive and Conservation of Habitats and Species Regulations 2010 (as amended).

The proposed development is considerably less than five kilometres away from the TBH SPA and not much beyond the 400m exclusion zone, occupying an area between under 1km, to just over 2km, from the TBH SPA. It has been indicated that the cumulative effect of further residential development up to 5 km from protected heathlands will have a significant adverse effect on the heaths. Furthermore, Natural England believes that recreational use of the heaths arising from housing developments up to five kilometres away from a SPA will create disturbance to rare bird populations. The TBH SPA is an internationally important habitat for three rare species of bird - the Dartford warbler, woodlark and nightjar. The latter two are ground nesting and therefore particularly susceptible to disturbance from people and animals (including dogs being exercised).

I therefore question whether enough - or indeed any - consideration been given to the potentially detrimental effect that the proposed strategic development between Normandy and Flexford will have on this internationally important site.

A survey in 2008 showed that more than 83% of visitors to the SPA arrived by car and that 70% of those had come from within 5km of its access point. A very large proportion of the TBH SPA visitors are dog walkers, many of whom visit a particular site on a regular basis. Two hundred and sixty four dogs are likely to come with the proposed development, the current ratio of dogs per household being 24/100, so this could potentially attract between 26 and 132 extra dog-walkers a day.

To deter dog-walkers from visiting the TBH SPA, any Suitable Alternative Green Space (SANG) in the proposed development would have to be of exceptional quality, as the Nightingale Road and Dolley's Hill entrances to the TBH SPA are only either 5 minutes away by car, or 20 minutes on foot. Whatever the size, the SANG would be a very small area in which to exercise 264 dogs. A small number of irresponsible dog owners, who do not scoop the poop, will make such a small area unattractive for walk and play. This is already a problem on Normandy Common.

Another factor is that some areas where a SANG might be located are muddy in wet weather and throughout the winter, whereas many of the tracks on the TBH SPA are dry in wet weather, (including the winter). For those dissatisfied with the proposed SANG for whatever reason, or those wanting a longer walk, the natural alternative is the TBH SPA. If only 10% of dog owners use the TBH SPA, there would be 26 extra dogs a day using the TBH SPA; if 50% do, it would be an extra 132 dogs a day.

I strongly believe, that given the proximity of the proposed development to two entrances to the TBH SPA it will be impossible to design a SANG that will deter many residents from using the TBH SPA to walk their dogs. This
will have a very serious impact on the wildlife and overall environment (unique flora and fauna) of this internationally important area.

Natural England states: “Special Areas of Conservation (SACs) are European designated sites, they are afforded protection under the Conservation of Habitats and Species Regulations 2010. Generally speaking, when considering the impacts upon European sites, the Local Planning Authority, under the provisions of the Habitat Regulations, should have regard for any potential impacts that a plan or project may have”.

‘Natural England disagrees with the conclusions reached by the Habitat Regulation Assessment (HRA) and Sustainability Appraisal (SA) and advise that the plan is unsound on this basis’. Natural England states further: “We also have concerns that the Council does not appear to have adopted Government planning policy set out at paragraph 14 of the National Planning Policy Framework (NPPF) stating that local plans should meet objectively assessed development needs unless specific policies in the NPPF (such as protecting designated wildlife sites and landscapes) indicate development should be restricted.”

The Habitats Regulation Assessment document is incorrect. In Section 18 Policies 9, 10, and 13 are assessed but not the policies proposed in this version of The Plan.

 **Comment ID:** SQLP16/2104  **Respondent:** 15724353 / Arvnid Parmar  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

**Answer:** ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

**Answer:** ()

**QUESTION 2 AND 3: LEGAL COMPLIANCE AND SOUNDNESS**

As a whole our client considers that the Local Plan may be deemed to be legally compliant and sound subject to comments in relation to specific policies which for ease of reference we consider in turn below.
As a general point we are concerned that the Council have failed to “…assess the likely cumulative impacts on development in their area of all existing and proposed local standards…” (Paragraph 174 of the NPPF).

In particular our client has concerns regarding the cumulative impact of; Affordable Homes (Policy H2); Policy D1 (Making Better Places); Policy D2 (Sustainable Design, Construction and Energy) and the Council’s future proposals for CIL (only a preliminary charging schedule currently published)

The wider conformity with National guidance is considered individually below in our responses to individual policies.

Comment ID: pslp17q/381 Respondent: 17243169 / RSPB (Chloe Rose) Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 2: Legal Compliance

Answer: (No)

Legal Compliance
The RSPB does not consider that the document is legally compliant. The plan can only be adopted if the Council is able, on the basis of all the evidence available, to conclude that the Plan will avoid an adverse effect on the integrity of the Thames Basin Heaths Special Protection Area (or any other Special Protection Area (SPA) or Special Area of Conservation(SAC)), as required by The Conservation of Habitats and Species Regulations 2010 (as amended).

The RSPB has already highlighted, in its objection to the recent planning application for the redevelopment of the Wisley Airfield, that it is profoundly concerned about the potential impacts of residential development at this location upon the Thames Basin Heaths Special Protection Area (TBHSPA). We highlighted that we did not consider that it would be possible for the proposed mitigation measures to overcome the impacts upon the TBHSPA. The key point is that the plan cannot be considered legally compliant if it includes a potentially harmful allocation.

In order to make the plan legally compliant we consider that the inclusion of the Wisley Airfield site must be dropped – it is only if this is done that it will be possible for an assessment under the Conservation of Habitats and Species Regulations 2010 (as amended) to conclude that the delivery of the plan will avoid harm to the Thames Basin Heaths Special Protection Area.

Comment ID: pslp17q/48 Respondent: 17276289 / Tom Newton Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 2: Legal Compliance

Answer: (No)

Given:

1. rapidly increasing traffic flows (15% increase since 2013 per DoT Traffic count data) on the A3100/A3 southbound off slip and

2. increasing congestion now prevalent causing regular traffic jams in the area and

3. lack of clarity that the combined impact of the Jacobs Well link road and the local plan together are being considered and

4. no current air quality monitoring in the area and

5. no intention to perform any modelling of air quality around the A3/A3100 , an area including a Primary school and intensive housing now and

6. no plan for detailed air quality modelling of the impact of yet more traffic in the area, as identified in the Strategic Highway Assessment report, as the Local plan developments are delivered

the Council will not be able to demonstrate it has met its duty to adequately asses Air quality impacts of the Plan in this area. As such I believe the Plan will be subject to legal challenge incurring extended time delays and cost in its delivery.

Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: ()

GRA Comment: It is unsound and unsustainable to develop on the scale proposed. The overall housing target (13,860 new homes) and 40% increase in retail space should be reduced to take account of the constraints of our gap town and growth in online retailing. Opportunities to provide greater accommodation on campus for university students, to provide more homes as part of the North Street development, to plan the river corridor achieving flood risk betterment, to promote sustainable commuting and to open up access across the railway for our physically divided town have not been considered positively.

We do not consider that the proposed housing target of 693 homes a year is soundly based, notwithstanding the intention that this should be skewed to later in the Plan period or the aspiration that this should be linked to timely delivery of infrastructure. We are also concerned that a target of “about 695” homes a year and a focus on strategic sites in the Green Belt were suggested very early in the Plan-making process and we would be concerned if the Plan had been prepared around these working assumptions.

Green Belt and Sustainability

The Council’s case set out in the Green Belt and Countryside Topic Paper paragraph 4,62, is as follows: “We consider that in general terms there are exceptional circumstances that justify the amending of Green Belt boundaries in accordance with the NPPF, paragraph 83. Our evidence base identifies a high level of need for market and affordable housing (including traveller accommodation) and employment. Given the extent of Green Belt across the borough (89 per cent) and the lack of sufficient suitable and deliverable sites located outside the Green Belt, to not amend boundaries would lead to a significant undersupply of homes compared to the identified needs – approximately half. The consequences of this within Guildford would be to exacerbate the existing affordability issues and have an adverse impact on economic growth in the area, which would lead to unsustainable commuting patterns. Each addition or removal to the Green Belt is also separately considered above and in the Housing Delivery topic paper.”

We do not accept this assessment.

- The NMSS SHMA review indicates that the evidence base exaggerates the level of housing need and that the employment housing need assessment is flawed. Increasing housing supply beyond the level suggested by the demographic OAN would not have a discernible effect on affordability but simply mean more people who can afford high prices moving to the area.
- We submit that the economic need should be tested on a sector by sector basis and that the priority given to retail expansion should be questioned.
- Suitable deliverable alternatives, such as significantly increasing campus accommodation, thereby freeing up homes in the town, and provision of more homes on North Street in lieu of a 40% increase in retail, have not been pursued.
- Options for meeting revised need in larger settlements beyond the outer Green Belt boundary linked to sustainable transport have not been fully explored.
- The option of not fully meeting needs in recognition of constraints, including Green Belt, has not been balanced against the positive and negative consequences of fully meeting need (as revised) as should happen in a meaningful Sustainability Appraisal that takes account of environmental capacity.
• Commuting by sustainable means, especially in the context of the current high levels of inward- and outward-commuting, should not be dismissed as an unsustainable option in all the circumstances.
• It would be irresponsible and unsustainable to use up all potential least-worst, last resort Green Belt sites within one plan period.
• High-added-value, knowledge-based businesses and homes should be given priority over expansion in retail land.

Constraints

Guildford is physically constrained being a gap town set in the Surrey Hills AONB and in Metropolitan Green Belt. Significant parts are affected by the Thames Basin Heath Special Protection Area. There are also notable areas of river, surface water, groundwater and sewer flood risk. Constricted road and rail routes converge to cross the downs seeking to avoid both high ground and floodplain. These compete with housing for land and there is no space for road widening or a conventional ring road approach. High rise buildings would be inappropriate due to the important contribution views and the rise and fall of the land make to both urban and rural character, including the nationally significant Surrey Hills AONB. The river and railway divide the town and there are too few crossing points; a further constraint. Air quality and traffic noise are not insignificant considerations in some locations.

The Local Plan process envisages that the housing target should be lower than the “objectively assessed need” if there are valid constraints. GRA considers it would be harmful to rural, suburban and urban character, quality of life and the economy of Guildford not to reduce the new housing units delivered by 2033 to a number significantly below 13,860. We submit it would be counter to sustainable development as a whole (in particular to living within environmental limits and achieving a sustainable economy) and contrary to policy to develop on the scale currently proposed. We are concerned that insufficient attention has been paid to cumulative impacts with constraints considered separately for each site.

Transport infrastructure is also a constraint. Current congestion is severe by any meaningful definition and there is a backlog of infrastructure investment. Assessment of the very late and incomplete transport evidence by expert, Richard Jarvis, using the information made available to date, indicates that the overall effect of completing the proposed schemes and development in the Plan would be congestion to a level that makes it hard to conclude that the test in paragraph 32 of the NPPF is passed. See extract below and Appendix 2. Any notion that building 13,860 homes is going to deliver infrastructure that will overcome Guildford’s traffic problems seems misguided.

“The cumulative effect of the additional traffic generated by the developments in the proposed submission local plan will be to increase congestion, even with the proposed highway schemes in place. More detailed analysis of the junctions and queuing is required. So we question the conclusion that the developments would have “an acceptable impact on the capacity of the highway networks in terms of the policy test set in paragraph 32 of NPPF’.”

“The mitigation proposed is not sufficient to overcome the problems that will be caused by the level of growth in the proposed submission local plan. Congestion will worsen. The network will lack resilience and be vulnerable to disruption due to incidents. Minor roads will have to cope with a lot more traffic (47% more than in 2009), for which they are unsuitable. “

In view of the extent of physical constraints, protective designations and congestion, it is likely that even a more accurate, lower OAN housing target would need to be constrained.

We submit that Guildford BC should:
• revise the SHMA to make corrections and to better account for student need
• undertake a proper assessment of constraints, informed by a strategic Green Belt review and a Sustainability Appraisal that tests environmental capacity and considers meaningful alternatives to establish an appropriate balance between adverse effects and fully meeting (revised) need
• test the transport evidence that should inform the plan and which points to congestion.

Any housing figure adopted in the context of considerable uncertainty would need to be kept under regular review.
If any land releases were deemed necessary following a rigorous, strategic and accountable approach to Green Belt review, these should be measured and paced, arising from a robust assessment of the balance between benefits and adverse effects, taking full account of environmental capacity.

Guildford has not currently provided the evidence to derive a housing figure arising from such a process. It is notable that Woking has proposed constraining its OAN by 50%.

In Guildford, if one uses a revised OAN of 10,200 over 20 years (510pa) and assumes no Green Belt development and that 50% of need can be met through positive initiatives in the town, this results in a target of 255 homes pa which would be below the previous target of 322pa. This reinforces the extent to which Guildford is constrained. This would be broadly consistent with the urban capacity assessment undertaken for the last Surrey Structure Plan and with the concern about the risk of town cramming in Guildford identified in the SE Plan.

If one uses a revised OAN of 10,200 over 20 years (510pa) and assumes 20% of all last-resort Green Belt land is released to development in each of the next three Plan periods, this results in a target of 340pa for the current 20 year Plan period.

More strategic solutions, such as development beyond the Green Belt linked to sustainable commuting or a tunnel for the A3, are required now. They cannot be left until the next Plan period as proposed.

**Neglected Opportunities**

A more sound and sustainable approach to planning positively in Guildford should include greater emphasis on the following:

- **Campus accommodation:**

  Higher priority should be given to providing attractive campus accommodation so a very high proportion of university students will want to live on campus thereby freeing up affordable homes in the town. Significantly, this could deliver homes within the challenging first five year period of the Plan.

  There has been some late progress towards meeting the modest 60% student accommodation target agreed in the previous 2003 Plan as a result of residents expressing concern at the lack of progress in meeting the undertakings. However, the opportunity to increase significantly the proportion of university students attracted to live on campus has not been pursued. Neither nostalgia by decision makers for student days spent living in shared houses in the town, nor eagerness by the University to support a case for development on Blackwell Farm, should deflect attention from the opportunity to free up homes in the town for use by others. Nor is it adequate to reject the possibility of increasing campus accommodation by saying the percentage is at the higher end compared with other tertiary institutions or to be sceptical about uptake and funding. We need to plan positively to find sustainable ways to sustain a thriving university in a constrained, commuter belt gap town.

  Appendix 3 provides more information on the opportunity.

- **Flood risk:**

  **Higher priority should be given to work on integrating flood risk management and development in the town centre.** The 2014 Draft Local Plan failed to include a Flood Risk policy and was not informed by a flood risk sequential test or Level 2 Strategic Flood risk Assessment. Subsequent application of the necessary tests has resulted in some residential allocations being removed and some zone 3 non-residential allocation proposed under the exception test.

  Overall, progress has been painfully slow in planning positively along the river corridor in a way that achieves flood risk betterment and also enhances the natural and built environment. Time was lost with a first iteration Town Centre Master Plan that paid insufficient attention to the significant flood risk. The margin required for climate change reinforces the importance of factoring in flood risk and moving away from the old approach of seeking to justify development in even the functional zone 3 floodplain.

- **Sustainable commuting:**
Far more attention should be given to the potential for enabling sustainable commuting recognising that Guildford has a high-value-added economy in a constrained gap town location. Rather than destroying the qualities that underpin the town’s economic success by overdeveloping, the scope for making it easy and affordable to commute by sustainable means from less constrained settlements should be pursued as a priority, both for the short and long term.

The context is that levels of both inward and outward commuting are extremely high. Almost half the working population commutes out to work and almost half of the workforce commutes in. In many households, occupants work in different locations and people do not necessarily move when they change jobs. In 2001, more people commuted out to Rushmoor than vice versa and more commuted in from Waverley than vice versa.

In a Guildford context, the aspiration that more people should live where they work needs to be balanced with other sustainability considerations.

- **All-direction, central bus interchange:**

Failure to identify a central location, and to allocate appropriate land, for an attractive all-direction bus interchange in the town is a grave failing that undermines the soundness of the Plan and should be addressed as a matter of urgency. A central interchange is needed in view of levels of congestion, the gradients involved in town centre journeys, the limited options for crossing the railway and river, and the need to provide sustainable transport options to support complex commuting and travel patterns.

- **Town centre plan:**

Better progress, and a more joined up approach, in town centre planning is required. The slow pace has meant opportunities for coordinated brownfield development are not available as part of this Plan. The need to have brought forward town centre options in a timely way should have been foreseen. Guildford had already used up its green field sites within its Green Belt boundary by the time of the 2003 Local Plan.

It is a problem that Guildford BC has chosen to tackle the town centre after the Plan via an Area Action Plan in which it intends to incorporate Scenario 2 from the Allis & Morrison /Arup proposals that will reduce highway capacity in the centre. This prevents joined up planning. For example, the Plan should face up to the implications of constraints being applied to roads such as the A281, A31 and A322.

- **New cross-town road bridge:**

An additional bridge over the river and railway is required to improve connections across the railways and river for our physically divided town. We want to see the townscape improved, with better use of the river. Achieving this, while maintaining accessibility, will be much easier with a new crossing.

**Sustainable Choices**

Given the scarcity of land arising from being a constrained gap town, the Plan should consider a wider range of sustainable strategies than simply expanding across the board.

- **Balance between retail expansion and town centre homes**

The Plan should weigh the case for a 40% increase in retail space, especially given trends in internet shopping, with the opportunity to provide accessible and sustainable town centre homes. Increased town centre housing provision for the elderly could also have the beneficial knock-on effect of freeing up existing family homes. All types of town centre housing would help support the evening economy.

The wisdom of such massive retail expansion, on top of already generous retail provision, needs to be challenged in view of the fate of the high street in many places. The mix of homes and retail, with its relatively low added-value, in the North Street development should be reconsidered. Residents were dismayed that the Bellerby theatre site was used for yet another supermarket rather than primarily homes.

- **Balance between high-value-added, knowledge-based economy and retail expansion**
Similarly, the mix between land allocated to the high-value-added, knowledge-based economy in the town and to retail expansion should be carefully reviewed. Knowledge-based enterprises yield returns between 3 and 4 times greater than retail.

Planning ahead

In order to deliver sustainable development, it is important to plan ahead. Sites for entrances and, in the shorter term construction areas, for an A3 tunnel through Guildford should be safeguarded. Land should also be allocated for more immediate projects such as an additional crossing over the railway for local journeys.

Attached documents:

Comment ID: pslp17q/473  Respondent: 8556385 / Guildford Residents Association, EGRA (Amanda Mullarkey)
Agent:

Answer: (No)

It is unsound and unsustainable to develop on the scale proposed.

There is evidence Guildford’s population growth is overestimated by about 40% because of under-recording of students leaving at the end of their studies.

Even taking account of all the proposals in the 2017 Plan, including skewing of development to later in the plan period and linking development to infrastructure, congestion which is already severe is set to get worse over the plan period.

In view of flawed new housing evidence and the implications of emerging transport evidence, Guildford’s proposal for more than 12,426 homes (plus a buffer of 1,155 homes) is excessive and will result in needless loss of Green Belt and green character, sprawl along the A3 and increased congestion, that cannot be justified in our heavily constrained borough.

If the Council fails to apply Green Belt protection or constrain expansion to reflect widespread, legitimate environmental and transport constraints, the 2017 Plan will cause harm to the qualities that underpin the economic success of Guildford and aggravate congestion.

The overall housing target and increase in retail space should be reduced to take account of the constraints of our gap town, growth in online retailing and potential for sustainable commuting.

Opportunities to provide greater accommodation on campus for university students and to open up access across the railway for our physically divided town have not been pursued sufficiently positively.

The revised proposal that only 60% of full time Guildford based University students will be provided with accommodation on campus puts unnecessary pressure on housing stock in the town. An 80% target could help by freeing up affordable homes relatively quickly.

Allocating too much land for development in the 2017 Plan will also result in Guildford being required to assess whether it can provide homes for Woking on our Green Belt. This is folly given the constraints in Guildford, a gap town with constricted roads set in the Surrey Hills AONB.

Green Belt and Sustainability

We do not accept the assessment the Council’s case for exceptional circumstances.
• The NMSS SHMA review indicates that the evidence base exaggerates the level of housing need and that the employment housing need assessment is flawed. Increasing housing supply beyond the level suggested by the demographic OAN would not have a discernible effect on affordability but simply mean more people who can afford high prices moving to the area.
• We submit that the economic need should be tested on a sector by sector basis and that the priority given to retail expansion should be questioned.
• Suitable deliverable alternatives, such as significantly increasing campus accommodation, thereby freeing up homes in the town, and provision of more homes on North Street in lieu of a large increase in retail, should be pursued.
• Options for meeting revised need in larger settlements beyond the outer Green Belt boundary linked to sustainable transport have not been fully explored.
• The option of not fully meeting needs in recognition of constraints, including Green Belt, has not been balanced against the positive and negative consequences of fully meeting need (as revised) as should happen in a meaningful Sustainability Appraisal that takes account of environmental capacity.
• Commuting by sustainable means, especially in the context of the current high levels of inward- and outward-commuting, should not be dismissed as an unsustainable option in all the circumstances.
• It would be irresponsible and unsustainable to use up all potential least-worst, last resort Green Belt sites within one plan period.
• High-added-value, knowledge-based businesses and homes should be given priority over expansion in retail land.

Constraints

Guildford is physically constrained being a gap town set in the Surrey Hills AONB and in Metropolitan Green Belt. Significant parts are affected by the Thames Basin Heath Special Protection Area. There are also notable areas of river, surface water, groundwater and sewer flood risk. Constricted road and rail routes converge to cross the downs seeking to avoid both high ground and floodplain. These compete with housing for land and there is no space for road widening or a conventional ring road approach. High rise buildings would be inappropriate due to the important contribution views and the rise and fall of the land make to both urban and rural character, including the nationally significant Surrey Hills AONB. The river and railway divide the town and there are too few crossing points; a further constraint. Air quality and traffic noise are not insignificant considerations in some locations.

The Local Plan process envisages that the housing target should be lower than the “objectively assessed need” if there are valid constraints. GRA considers it would be harmful to rural, suburban and urban character, quality of life and the economy of Guildford not to reduce the new housing units delivered by 2034 to a number significantly below 12,426. We submit it would be counter to sustainable development as a whole (in particular to living within environmental limits and achieving a sustainable economy) and contrary to policy to develop on the scale currently proposed. We are concerned that insufficient attention has been paid to cumulative impacts with constraints considered separately for each site.

Transport infrastructure remains a constraint. Current congestion is severe by any meaningful definition and there is a back log of infrastructure investment. Assessment of the transport evidence by expert, Richard Jarvis, using the information made available to date, indicates that the overall effect of completing the proposed schemes and development in the Plan would be congestion to a level that makes it hard to conclude that the test in paragraph 32 of the NPPF is passed. Any notion that building over 12,426 homes is going to deliver infrastructure that will overcome Guildford’s traffic problems seems misguided. He writes:

“In terms of its transport aspects, the Plan cannot be regarded as sound. GBC has provided vivid descriptions of the conditions on the network today and the evidence is that these will be as poor, and in some cases worse, at the end of the plan period, even with the mitigation measures. Growth and infrastructure have to be better aligned. While the level of growth in homes in this latest draft plan is somewhat lower than that in the 2016 version, it is still substantial and growth is also planned outside the borough. The evidence provided indicates that congestion will be widespread on much of the highway network in peak periods, even with the proposed highway schemes and with the measures to encourage the use of public transport in place.”
In view of the extent of physical constraints, protective designations and congestion, it is possible that even a more accurate, lower OAN housing figure, once it has been identified, would need to be constrained.

We submit that Guildford BC should:

• revise the SHMA to make corrections and to better account for student need
• undertake a proper assessment of constraints, informed by a strategic Green Belt review and a Sustainability Appraisal that tests environmental capacity and considers meaningful alternatives to establish an appropriate balance between adverse effects and fully meeting (revised) need
• continue to improve the transport evidence which points to congestion and work up transport proposals such that both can better inform the plan.

Any housing figure adopted in the context of considerable uncertainty would need to be kept under regular review.

If any land releases were deemed necessary following a rigorous, strategic and accountable approach to Green Belt review, these should be measured and paced, arising from a robust assessment of the balance between benefits and adverse effects, taking full account of environmental capacity.

Guildford has not currently provided the evidence to derive a housing figure arising from such a process. It is notable that Woking applies constraints to its OAN.

More strategic solutions, such as development beyond the Green Belt linked to sustainable commuting or a tunnel for the A3, are required now. Such alternative strategies cannot be left until the next Plan period. Indeed, it is troubling that the proposal for an A3 tunnel has been dropped as an aspiration. This should be being planned now and any necessary land at Gosden Hill and Compton safeguarded.

Neglected Opportunities

A more sound and sustainable approach to planning positively in Guildford should include greater emphasis on the following:

• **Campus accommodation:**

  Higher priority should be given to providing attractive campus accommodation so a very high proportion of university students will want to live on campus thereby freeing up affordable homes in the town. Significantly, this could deliver homes within the challenging first five year period of the Plan. We need to plan positively to find sustainable ways to sustain a thriving university in a constrained, commuter belt gap town. Just as if you provide attractive cycle facilities they are used, if you provide attractive student accommodation, it is used.

• **Sustainable commuting:**

  The revised plan evidence describes commuting as “unsustainable”. This need not be the case. Far more attention should be given to the potential for enabling sustainable commuting recognising that Guildford has a high-value-added economy in a constrained gap town location. Rather than destroying the qualities that underpin the town’s economic success by overdeveloping, the scope for making it easy and affordable to commute by sustainable means from less constrained settlements should be pursued as a priority, both for the short and long term.

  The context is that levels of both inward and outward commuting are extremely high. Almost half the working population commutes out to work and almost half of the workforce commutes in. In many households, occupants work in different locations and people do not necessarily move when they change jobs. In 2001, more people commuted out to Rushmoor than vice versa and more commuted in from Waverley than vice versa.

  In a Guildford context, the aspiration that more people should live where they work needs to be balanced with other sustainability considerations.

• **All-direction, central bus interchange:**
The current site has been declared available for development in an agreement with a developer without an appropriate alternative location being identified in the revised Plan. Failure to identify a central location, and to allocate appropriate land, for an attractive all-direction bus interchange in the town is a grave failing that undermines the soundness of the Plan and should be addressed as a matter of urgency. A central interchange is needed in view of levels of congestion, the gradients involved in town centre journeys, the limited options for crossing the railway and river, and the need to provide sustainable transport options to support complex commuting and travel patterns.

- **Town centre plan:**

Better progress, and a more joined up approach, in town centre planning is required. The slow pace has meant opportunities for coordinated brownfield development are not available as part of this Plan. The need to have brought forward town centre options in a timely way should have been foreseen. Guildford had already used up its green field sites within its Green Belt boundary by the time of the 2003 Local Plan.

GBC’s decision to tackle the town centre after the Plan is preventing joined up planning. The implications of an approach of constraining cross Guildford movement has major implications that need to be understood.

- **New cross-town road bridge:**

An additional bridge over the river and railway is required to improve connections across the railways and river for our physically divided town. We want to see the townscape improved, with better use of the river. Achieving this, while maintaining accessibility, will be much easier with a new crossing.

**Sustainable Choices**

Given the scarcity of land arising from being a constrained gap town, the Plan should consider a wider range of sustainable strategies than simply expanding across the board.

- **Balance between retail expansion and town centre homes**

The Plan should weigh the case for a major increase in retail space, especially given trends in internet shopping, with the opportunity to provide accessible and sustainable town centre homes. Increased town centre housing provision for the elderly could also have the beneficial knock-on effect of freeing up existing family homes. All types of town centre housing would help support the evening economy.

The wisdom of such massive retail expansion, on top of already generous retail provision, needs to be challenged in view of the fate of the high street in many places. The mix of homes and retail, with its relatively low added-value, in the North Street development should be reconsidered.

- **Balance between high-value-added, knowledge-based economy and retail expansion**

Similarly, the mix between land allocated to the high-value-added, knowledge-based economy in the town and to retail expansion should be carefully reviewed. Knowledge-based enterprises yield returns between 3 and 4 times greater than retail.

**Planning ahead**

In order to deliver sustainable development, it is important to plan ahead. Sites for entrances and, in the shorter term construction areas, for an A3 tunnel through Guildford should be safeguarded. Land should also be allocated for more immediate projects such as an additional crossing over the railway for local journeys.

**Attached documents:**
70. The Guildford Borough Proposed Submission Local Plan: Strategy and Sites June 2017 is unsound for the following reasons, which are additional to those we reported in July 2016:

(1) The Plan is not consistent with national policy, in the following respect:

- Policies ID2 and A26 particularly would cause substantial deterioration in air quality in Compton, where air quality monitoring shows that NO2 pollution is already (and has persistently been) in breach of legal limits, by attracting additional vehicular traffic through the village to access both the A3 and Blackwell Farm/Surrey Research Park via a new road link from the A31: this is in breach of NPPF paragraph 109 policy for “preventing both new and existing development from contributing to…. unacceptable levels of…. air…. pollution”.

(2) The Plan will not be effective, in the following respects:

- Policy ID2 is unlikely to be deliverable within the Plan period in respect of widening the A3 through Guildford, which is a precondition for implementing Policy A26. Even if it was, it would not meet its own objective of providing appropriate access to the strategic road network to accommodate future planned growth in the form of the Blackwell Farm development – by virtue of generating congestion rather than alleviating it.
- Policy A26 will not be effective because the volume of traffic the proposed Blackwell Farm development would generate on Egerton Road (even if a link road to the A31 is also in place) would cause levels of congestion so high that the network flow would break down in this area, and the Plan proposes no remedy for this.
- Policy A26 will not be effective because the Plan has failed to identify a means of access from Blackwell Farm onto Egerton Road (Infrastructure Requirement (1)), even though this access has been upgraded in the Plan and is no longer ‘secondary’ to the link to the A31; the 1:10,000 plan accompanying the Policy shows no link at all into Guildford.
- Policy A26 will not be effective because Infrastructure Requirement (3) for a controlled road link through the Blackwell Farm development to limit the users of the road will not be implementable in practice.
- Policy A26 will not be effective because the additional road capacity needed to serve the newly proposed secondary school (Allocation item (9)) within the development has not been provided in the Plan and the road network in the area is already modelled to be well over-capacity when Blackwell Farm is developed.
- Policy ID3(3) on developments having regard to the Sustainable Movement Corridor will not be effective in its western section, because either the modal shift will not be pursued vigorously enough to make a significant difference (which appears to be the Local Plan’s preferred strategy), or, if applied with determination (such as by reducing private vehicle lanes in the A3 underpass from four lanes to two) could not be expected by itself to change driver behaviour significantly; in either case the result would be greater congestion on the local road network than it could take after the development of Blackwell Farm.

(3) The Plan is not justified, in the following respects:

- Policy S2 relies on the completion of the widening of the A3 in sufficient time for the proposed numbers of dwellings to be constructed before the end of the Plan period, but this cannot be a justified proposal because there is no certainty at all that the A3 widening will be completed by 2027, if ever; given the difficulty of finding alternative locations likely not to be dependent on capacity increases on the A3, the most appropriate strategy would be to abandon Policy A26.
- Policy A26 would cause the generation of so much traffic (both by itself and by the construction of the A3 without which Policy A26 cannot be implemented) that the local road network could not possibly cope with it, and documents supporting the Plan acknowledge that local roads would be put seriously over-capacity: such an arrangement cannot reasonably be the most appropriate strategy and the Plan is therefore not justified.

Attached documents:
The Guildford Society questions the soundness of the Draft Plan on several grounds, not the least of which are: the shortcomings of the SHMA, the Green Belt report, and the highways assumptions.

The Society condemns the failure to provide for a new link between the west of Guildford which will be expanded substantially under the planned site allocations (in the region of 10,000 homes plus the growing university, the hospital, the expanding research park and other centres of employment by the end of the Local Plan period).

Of greater importance is the notion that the plan does not adequately provide for development beyond the plan period. The Society’s full submission highlights the restrictive nature of the Borough and illustrates the likely future pressures to sprawl along a narrow corridor of the Borough as we have to plan for future pressures to grow.

Answer: ()

We have genuine and serious concerns about the soundness of a plan that fails to deal proactively and comprehensively with the town centre – a critical part of the regional infrastructure for Guildford and surrounding boroughs. We have commented on this in our response to Policy E7 among others and also in our section entitled ‘Issues and Topic papers’.

The housing target numbers are, we believe, mathematically flawed (even after the SHMA which we do not agree with). The tabulated calculation of housing from 2019 to 2034 leaves a 2015-2018 target inclusive of 653 homes per year. Our five-year housing supply falls well short of these numbers. We have commented on this in our response to the Policy S2, the Housing Policies and also in relation to the Housing Delivery Topic Paper (June 2017)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: ()

24C. Question 3: Soundness. We do not agree that the Plan is sound for the following reasons:

- “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
• The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
• The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
• The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.
• Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
• The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
• Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
• The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

Attached documents:

**Comment ID:** pslp17q/305  **Respondent:** 8562273 / The Clandon Society (Christopher Dean)  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Question 3: Soundness

**Answer:** (No)

The Local Plan is not sound.

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no evidence of a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land, this latest version has as much, if not more, building on the Green Belt and will bring increasing traffic congestion, pressure on other infrastructure, noise and pollution and a reduction in the quality of life of residents.

There cannot be a collective vision about critical matters on which there is no detail available—e.g. any future plans for alleviating congestion on the A3 between the M25 and the town. There is little or no recognition of the cumulative impacts of the concentration of development in the north east of the town centre.
The Plan does not consider the implications of Surrey County Council’s business plan for Newlands Corner to attract 100,000 more visitors a year. A significant proportion of these can be expected to use the A247.

The Plan does not consider the implications for the A247 of the large number of developments which have the potential to generate traffic on it:
- slip roads to the A3 off the A247
- Wisley
- Garlick’s Arch
- Gosden Hill
- Slyfield
- Burnt Common
- 4-way junction near Send/Burnt Common
- diverting traffic from the south to go around and not through Guildford

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: (No)

Too many rural and Green Belt sites are proposed within settlements and, in many cases, outside settlements with inadequate infrastructure, including public transport. Such sites constitute unsustainable development contrary to government advice as set out in the National Planning policy Framework. The redevelopment of Town Centre car parks for residential use will irreparably damage Guildford's function as the principal shopping centre in Surrey.

Comment ID: SQLP16/524  Respondent: 8567105 / David Calow  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: (No)

It is not clear if the housing actions achieve the housing objectives. There should be a table showing housing mix and total unmet housing need today and at, say, 5 year intervals for the life of the plan so that the outcomes can be compared with the objectives.

There are no apparent quantified objectives for why the plan creates 69,800m2 of employment space and 3,200 jobs rather than any other number. Is the plan to create opportunities for local people or to encourage more people to move to or commute to Guildford? Will development concentrate on high salary employment and if so in what proportion?

The assessment of the soundness of the infrastructure plans appears to rely on a model. It is not clear how the model has been validated. Looking at plans for Flexford, for example, it is hard to see how extra road traffic could be accommodated even with improvements. A better rail service would help but access to the area is already difficult and dangerous at peak periods.

The plan hopes development can be kept in line with infrastructure improvements but it takes longer to improve infrastructure than to permit development. It is not clear how this objective can be achieved.

Attached documents:
I object

The plan is not so much positively prepared as avariciously prepared. I do not consider that it is reasonable to take on unmet need from neighbouring authorities, which have given greater protection to their Green Belt if it means our own is compromised on the scale being put forward.

I believe that constraints should be applied to the housing target, which we understand equates to the objectively assessed need (OAN) as no reasonable constraints have been applied. The constraints that could and should be applied are Greenbelt and considerable infrastructure issues. The solutions suggested to accommodate the inordinate levels of growth are both inadequate and costly and the net result will be serious debt for many years if not generations.

It was recommended by landscape consultant Alison Farmer Associates that the area known as Blackwell Farm should be considered in the AONB boundary review, yet it was omitted in Surrey CC’s landscape evaluation. This meant the Parish Councils of Worplesdon, Compton and Wanborough had to fund an independent review to ascertain whether the area was a contender for AONB classification. The survey was carried out by in May 2016 by Land Management Services Ltd, which concluded that most of the 265 hectare farm was of a landscape and scenic quality that merited inclusion within Natural England’s revised Surrey Hills AONB boundary.

It raises serious question about the soundness of the evidence base when Surrey CC says that it only has to account for evidence submitted and not for that omitted? The area within the proposed development site at Blackwell Farm should now be considered by Surrey Hills as part of the AONB boundary review and land to the west should remain undeveloped, as it is important to the setting of the AONB.

The plan is not justified. Residents groups have suggested other strategies but these have not been tested or considered against the current trajectory, which has remained largely unchanged since day one.

Many aspects of the Plan were strongly objected to in 2014 and not only have these points been ignored, they have in fact been embellished or made worse. I refer to the points that GBC referred to in their own summary, which stated that most people objected to the scale of development and the harm to the Green Belt. At that time there were 4 strategic sites and now there are 5. At that time approx. 50% of development was in Green Belt and now it is 66% with only 34% on previously developed sites. 58% of development is on just 5 sites.

A more realistic appraisal of the town centre with more multi-storey car park development and less retail would make way for a greater percentage of housing in the town centre, which is after all the most sustainable and sought after area. Additionally, greater pressure must be placed on the University to house more students at Manor Park in order to free up affordable rented accommodation in the town for key workers.

There is a conflict of interest when the developer (University) drags its feet over the provision of promised student accommodation (thereby putting pressure on the housing market) whilst at the same time seeking permission to build 1,800 new homes to help Guildford’s need? The University is at least five years behind with programme of building student residences and staff housing. It is widely agreed among residents groups that the University must fulfil all of its current building plans and substantially increase the proportion of students on campus. If the University built the outstanding units, the housing need would reduce substantially yet much of this is omitted from the outstanding permissions list?

GBC has approached development without applying constraints that are applicable such as Green Belt and infrastructure. It is wholly inappropriate to build a Plan without constraints when there is widespread opposition to this approach. Furthermore, there are serious doubts over the validity of the objectively assessed housing need. Housing need underpins the entire plan, and we are being asked to accept the figure of 693 on trust. Without an understanding of the methodology behind the OAN, the public cannot 'buy into' this figure, especially as it has been illustrated by two
reputable professionals that there have been errors such as 'double accounting', which has resulted in uplift. Both consultants have concluded that a more accurate figure would be around 500 new homes per annum and the most recent one, which was done in pre-Brexit -June 2016 acknowledges that due to the high number of International students here in Guildford a student SHMA would better inform this plan. Both consultants feel that the current SHMA is flawed and that the OAN of 693 is too high. These reviews will be submitted by CPRE and the GRA and we support the findings of both.

Putting 58% of development on 5 sites, which are within the Green Belt, or largely within the Green Belt, is not consistent with national policy. The definition of 'exceptional' is forming an exception or rare instance; unusual; extraordinary. What possible exceptional circumstances can justify 3 sites of approx 2,000 each and two of 1000 each, on Greenbelt. This makes a mockery of the term ‘exceptional’?

The plan has a maximum number and a hefty buffer. It has underestimated windfalls and overestimated need. It is likely therefore that if one of the major sites fails to come through, the Plan could still succeed in terms of numbers, but would fail in terms of impact on infrastructure and reliance on aspirational, but distant 'yet to be discussed' schemes such as railway stations, making the plan undeliverable. If more people are not given the opportunity to live in Guildford town, the night time economy cannot grow and if the gamble to use 40% of the land for retail fails, shops will close and we will have created a leafy green ghost town, whilst the villages outside the town will have changed beyond all recognition as the impact of urban sprawl takes its toll.

The plan puts many eggs into 5 baskets with 58% of all development on just 5 sites. If these are not deliverable, the plan will fail. This strategy has been roundly criticised by Inspectors in other parts of the country.

Taking on such a high OAN without scrutinising it and then taking land out of Green Belt to fulfil it, and using developer funding to secure infrastructure (which reduces significantly the proportion of affordable housing delivered) is destructive and risky.

It is inconceivable that 5 sites between 1,100 and 2,000+ each can be built on Green Belt land without affecting the purposes of the Green Belt.

AONB should be given the highest protection. Despite being put forward for AONB review Blackwell Farm was omitted and an independent consultant had to be commissioned by local parish councils. The findings showed that the area met Natural England’s latest criteria for AONB and should not therefore be developed but should instead be properly recognised.

The proposal at Blackwell Farm has been reduced from 2100 to 1800 to take account the impact on future AONB or for views in and out of the existing and future AONB from public areas as determined by planning policy. It is feared that if this site were approved and if access could be made possible without causing serious problems to the surrounding road network, that the AONB in this location would undoubtedly be destroyed.

GBC argues that it is necessary to remove more than 1.6% of its 89% Green Belt and to remove more than 6% of its Green Belt from villages (by way of insetting) in order to meet its need, yet at the same time the Council advocates making an additional area Green Belt? The area of land being put forward for inclusion within the Green belt is on the same ridge as two areas of Green Belt it wishes to remove (Normandy & Blackwell Farm). This approach lacks consistency.

Cllrs Paul Spooner and Matt Furniss have stated clearly that there will be no development without supporting infrastructure and that the infrastructure must come before, or alongside, development. It is difficult to see how this will materialise as developers’ CIL contributions (which will fund infrastructure) are paid from profits made from the development. This statement appears to be unenforceable and could offer false reassurance to residents who may support the Plan on this basis.

Developers are being asked to fund large amounts of infrastructure. They will offset this against any agreement for affordable housing and it is highly possible that affordable housing will not be built or that only a small proportion will be built. This was one of the key drivers and is factored into the housing need, yet may not be delivered. Where is the general analysis to see what level of affordable housing might actually be delivered given the level of infrastructure needed to implement this level of development on new sites?
The omission of the Town Centre Master Plan (on the basis that this has different timescales) invalidates two key components of the Plan - the Infrastructure and Highways assessments. The suggested road closures in the town centre and the resulting re-routing of traffic should be factored into the highways assessment, but they are currently omitted. The consequences of this could render the whole Plan undeliverable and I don't believe the Plan can be approved without factoring in the Town Centre Master Plan.

GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA), which CPRE and GRA consider unsound. The methodology for the uplift and assumptions made have not been made available and thus the openness and transparency required for public understanding as outlined in the NPPF has not been adhered to.

I understand that Highways England will not start to consider its intentions as regards the A3 in the vicinity of Guildford until 2018. It is difficult to see how plans can be approved without the inclusion of this information.

Network Rail has not made available for the public consultation any plans for a new railway station at Merrow, nor have we been told where the station car park would be situated nor how the railway bridge between Merrow and Burpham would be re-constructed to take the additional traffic. Likewise, there are no detailed plans for the railway station at Park Barn and Network Rail has not confirmed the status of either. These schemes must have a sounder footing to be included in the Plan if they are to be used to justify large developments nearby.

The access to, and from, Blackwell Farm (via the A31) has not been thought through. There proposed new route will likely be used as a rat run to the A3/Guildford, but this will put pressure on a congestion hot spot, and result in increased traffic at the Compton turn-off and Down Lane (home to Watts Gallery). It is also recognised that congestion at the Tesco roundabout will be made worse and this area is already subject to considerable problems. Additional traffic via the business park from Blackwell Farm will add to congestion at the Egerton roundabout and impede access for emergency services to the hospital.

The proposal at Blackwell Farm has been reduced from 2100 to 1800 to take account of the AONB, but this does not account for views in and out of the AONB from public areas.

The greenbelt sensitivity study is not objective. The reference to Blackwell Farm as 'South West Guildford Urban' is totally misleading as it is unadulterated countryside that fulfills all the purposes of Green Belt. I consider this Study, which was the subject of much criticism in the last plan, to be flawed, yet it remains in this Plan. Why?

The damage caused to the Green Belt by the addition of Blackwell Farm would outweigh benefits gained from development, as there is ample space and lapsed planning permission on the existing Manor Park land for development for student accommodation, which would free up affordable rented accommodation in the town.

The proposal for Garlic Arch was added to the draft Local Plan without any consultation under Regulation 18.

No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Guildford citizens.

No land has been safeguarded for a tunnel, which would show a real intent.

This consultation included 'significant changes' according to GBC, although most residents would strongly dispute this. Some key reports were added and 6 weeks was not long enough to properly digest the information and impart this to residents. Many additional questions had to be asked and many points required clarification, which essentially meant adequate information, was not made available until two-thirds of the way through the consultation.

The level of objection at the 2014 consultation was considerable - these objections have NOT been dealt with, but have been carried through to a regulation 19 consultation, undeterred. This is not in the spirit of Localism or the NPPF.

See annexes included with Q1 - ie Independent SHMA reports and land assessment report
1. The plan does not appear to be led by the evidence base, instead the evidence base is used to influence and justify decisions which have been part of a trajectory from day one. This includes the decision to build on Greenbelt, which was decided before any assessment into land availability or housing need had been conducted. Detailed plans for Blackwell Farm were seen long before the Greenbelt & Countryside study produced its controversial study, that marked down the openness of areas with trees yet set random boundaries in mid-field. The scoring of the area was entirely subjective and bore no resemblance to independent work by Land Management Services (attached Annex 1). The work was omitted from the evidence base and should be included or at least acknowledged with some rationale given for its exclusion. Residents felt that some of the evidence was weak and subjective (Greenbelt & Countryside) and comments around lack of justification for the classification of the RAG system have not been addressed. It is totally unacceptable to simply state that 'the page was lost' in answer to the question to see the assessment that led to the 'medium sensitivity' classification given to Blackwell Farm for instance.

2. Housing targets have remained much the same despite changes in ONS, removal of some retail sites, professional challenges to the SHMA and Brexit. This raises concerns over pre-determination. At the last consultation, independent reviews of the SHMA were carried out. All suggested the OAN put forward by G L Hearn was too high. Whilst further work has been carried out by G L Hearn to bring their 2016 up to date, they have once again failed to fully account for errors and market changes. I support the review, commissioned by GRA and carried out by Neil MacDonald (attached as annex 2) which should be considered as new evidence. It should be noted that the work conducted by the same consultant for Waverley Borough Council was recently upheld by the Planning Inspector. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2020. This is too late for this plan and hence the infrastructure constraints must push large sites out of this plan. If the OAN of 8,000 is adopted, this would mean that all the strategic sites could be removed from the current plan and the additional 500 or so could be dissipated over brownfield sites by increasing the density (especially within the University grounds where land is wasted on acres of surface car parking).

3. It is concerning to see that targets are now minimum requirements rather than firm targets. The presumption being a need for upwards adjustment within the plan period rather than general flexibility which would be more acceptable as Brexit for example could result in Internationals leaving the UK. Numbers are also greater than indicated as proposals such as Blackwell Farm already include large numbers planned for after the plan period of 2034. Development that is not planned within the plan period should not be taken out of Greenbelt. It is also very risky to take land out of Greenbelt now for development that cannot take place for at least another 10 years due to limitations with infrastructure. Doing so, risks piece meal development and hence should not be supported.

4. The traffic survey underestimates congestion levels and impact and no attempt has been made to correct this, instead comment is made in the plan that traffic modeling looks at worst case scenario, but in fact it does not. Account must be taken of the comments made by Mouchel (annex 3) which still stand and which remain a concern for Highways. It is misleading to present traffic impact in the way that it has been presented as part of the evidence base. It should also be noted that Highways withdrew their objection following a meeting at which it could be said that some pressure was applied and they did so in order to cooperate. It must be noted from their letter of October 2016 that improvements appear to be conceptual as funding for some and feasibility for all, have yet to be confirmed. This is particularly true of Garlick's Arch which was introduced very late in the last consultation (annex 4). The sound bite that 'there will be no development without infrastructure' to some degree supports the issues raised by Highways in this annex. The Local Plan should however have some detail around this statement. Ie what infrastructure and which developments and what proof exists to endorse the impact and has it been subject to scrutiny?

5. The impact of development is far reaching yet modeling concentrates very much on the impact of specific zones in relation to one another. New evidence by RGP (attached annex 5 and annex 6), appears to be in line with comments...
made by Mouchel (see comment 4) and shows that the impact has been underestimated. It is known that Blackwell Farm and other major developments cannot go ahead without major improvements to the A3, to assist traffic flow. These same improvements will draw traffic and this will include the B3000. It is not thought that a number plate recognition scheme will work through the Blackwell Farm development and if it fails, as is predicted, this will become a legitimate route to bypass Guildford and once will draw more traffic through smaller routes in order to access it. These include the B3000 which already exceeds NO2 legal limits and should be made an AQMA. Account should also be taken of existing AQMA's in Godalming in Waverley, when considering developments that will increase traffic volume and lorries in particular, on the A3. The same must apply in Farnham (which also has an AQMA) when considering development that will increase traffic on the A31.

6. It has been known for some time that the B3000 warrants an AQMA. Recent results confirm that, yet reports continue to boast that Guildford has no AQMA's (true) but also that Guildford does not require any AQMA's (false). The Aecom report stating this, is misleading. It would be quite untenable to knowingly increase traffic levels on the B3000 given the safety issues that exist. I wrote to [Officer] and Planning Policy and received a joint response from both to a report that was sent by me on behalf of the Compton Traffic Committee (a sub-committee of Compton Parish Council). It was suggested that I include the report in my submission to the consultation (attached annex 7). No answers to any of our questions were given on the basis that this would not be a good use of council resources (attached annex 8). It would seem that the council does not have enough resources to ensure that people wishing to respond to the consultation, do so, fully informed. This is born out by comments made in the survey I conducted recently (annexes 9 and 10).

7. The removal of plans to improve access and safety at Beechcroft Drive. This project has been prioritised and dropped for many years and for safety reasons, it was time it was addressed.

8. The vast majority of people in Guildford do not support the plan. A survey was carried out (by me), details of which are attached (annex 9 and 10) which showed that 81% of respondents objected to the plan in its current form versus 19% who supported it. The survey is on-going but interim results were sent to groups with substantial email databases. Comments were collected as to what changes would facilitate support for the plan. These comments are included in the attachment. Whilst I endorse many of them, I do not agree with them all, but in the interests of impartiality have included them all, save a couple that were modified for legal or data protection reasons. In the last consultation many residents and Parish Councils stated that their comments had not been accounted for and that they had significant issues with the process. The process has however rolled onto regulation 19, without, it would seem, formerly closing the regulation 18 plan and hence the issues mentioned in the survey over the process, appear to be not only valid but submittable. There are also several comments about concerns over the deliverability of the 5 year supply, that I share and hence am submitting this to support my own views on this and also to confirm concerns over procedural weaknesses.

9. Changes to the plans for Blackwell Farm were presented as an example of having listened to the public outcry at the scale and location of the site. This was disingenuous as the number is the same except 300 houses have been deferred beyond the plan period. Concerns over access and impact (particularly to the A31, Egerton roundabouts and the B3000) have not been addressed and evidence by RGP that suggested the site was unviable has been ignored. Issues relating to the inclusion of this site are compounded by the addition of a school, that was not deemed necessary for the site from which it was removed at Normandy but has been added to Blackwell Farm, without evidence supporting the need for it?

10. Lack of consistency -- key areas off the Hog's Back have been dealt with differently. Countryside near Tongham has been put forward for additional Greenbelt status to prevent coalescence with Ash, whilst 78 hectares or 192 acres of land at Blackwell Farm will be removed from Greenbelt despite the fact that only 13 years ago, 64 hectares (158 acres) were removed on the basis that this would not be repeated. This will permit coalescence with Guildford and Onslow, Park Barn, Flexford, Wanborough and Wood Street. These figures exclude land that will be needed to facilitate access, much of which is within AONB. The area known as the Hog's Back that stretches alongside the A31 is iconic, it stretches for many miles and provides a fabulous open rural view across land that is good agricultural land as well as Greenbelt. It serves the purposes of Greenbelt by preventing urban sprawl from Guildford into nearby villages. The plan takes the view that sprawl is 'inevitable' which presumes a need to build on Greenbelt without fully exploring all Brownfield possibilities.

11. The strategic site at Normandy (1000) which was safeguarded from 2003 plan, was excluded from the Issues and Options & initial consultation, it was added at regulation 19 stage, which would appear to be against due process and then removed as part of these amendments, for reasons that could equally apply to Blackwell Farm. Neither Blackwell Farm
nor Wisley 'Strategic Sites' have ever been safe guarded. The selection of areas to be included or dropped appears ad-hoc and late additions and speedy removal reminds me of retail 'SALE' tactics, which should not be deployed in plans which will have an irreversible impact on people’s lives.

12. 20 years ago the University argued against the Tesco development on the basis that it would exacerbate an existing traffic. It is incomprehensible therefore that Blackwell Farm can be considered as viable on the location mentioned, some 20 years on, when congestion is already a daily occurrence before development traffic is added. (annex 12)

13. The Rural Economic Strategy and policies have not been subject to proper or open consultations. I do not believe that due process was followed. Parish Councils were not aware of the consultation, which was a tick box affair, over a very short space of time. On finding that the majority of Parish Councils knew nothing about it, I informed the officer in charge and a short extension to the deadline was given. No feedback was given on submissions and comments were not referenced in the strategy, which was produced and published at a paid conference (£60 a ticket or thereabouts) within such a short time frame that one would be forgiven for thinking it had already been written. Parishes have had little to no involvement in this policy and they should have been key stakeholders.

14. In terms of its transport aspects the Plan cannot be regarded as sound. GBC has provided vivid descriptions of the conditions on the network today and the evidence is that these will be as poor, and in some cases worse, at the end of the plan period, even with the mitigation. Growth and infrastructure have to be better aligned. While the level of growth in homes in this latest draft plan is somewhat lower than that in the 2016 version, it is still substantial and growth is planned outside the borough. The evidence provided indicates that congestion will be widespread on much of the highway network in peak periods, even with the proposed highway schemes and with the measures to encourage the use of public transport in place.

15. Regulation 19 – The Council report for 16th May 2017 says that ‘comments made to parts of the plan that are unchanged should be considered not duly made’ (para 6). The local development scheme and the Council report (para 4.4 to 4.6) refers to this as a ‘targeted Regulation 19 consultation’. That is incorrect. A regulation 19 consultation is on ‘the local plan’ (see regulations 17, 19 and 20) not parts of it, which have changed from an earlier regulation 19 consultation. A number of consequences follow:

(i) The local plan which is intended to be submitted to the Secretary of State is the 2016 submission local plan;

(ii) The changes proposed in the 2017 document can only be made if:

(a) The Inspector finds that the 2016 local plan is unsound;

(b) The Council asks the Inspector to recommend modifications to cure the unsoundness; and

(c) The Inspector exercises his or her discretion to recommend the changes which the Council have proposed rather than any other changes to make the plan sound;

(iii) The 2017 changes proposed by the Council have the same status as any other changes proposed to remedy unsoundness in the 2016 plan;

(iv) Representations can be made seeking changes, which are consequences of or alternatives to the 2017 proposed changes.

Whilst the buffer over the plan period has been reduced to 10% from 14%, it is unnecessary as GBC confirms that it can provide a 5 year supply. The only requirement for a buffer is for the five year housing land supply and that draws forward housing from within the plan period. There is no justification for any buffer over the plan period.

16. It is noted that there is no explanation in the 2017 local plan document or the Council report as to why the 2016 plan is unsound, the ways in which it is unsound, why the proposed changes would render the plan sound and why they are the best changes to make. I consider the plan ‘unsound’ as do action groups against Wisley and Blackwell Farm developments.
17. There is no justification for moving the end date of the plan back by a year. The 2016 plan was not unsound because of its duration. This raises concerns that the change was to increase the housing requirement (by adding a year) and to delay the delivery of new housing (by proposing 850 houses, so above the annual requirement) in that final year. This goes towards a solution for Guildford’s housing needs of strategic sites which may take a long time to come forward rather than promoting smaller, sustainable sites within urban areas with infrastructure or on existing Brownfield sites (which can be in countryside) to enable earlier provision of homes.

18. **Additions and removal of sites. No exceptional circumstances** have been given for the inclusion of sites on Greenbelt and there is no explanation as to why some sites remain in the plan whilst others have been removed.

19. Information -- Throughout the plan it has been a given that Greenbelt sites MUST be included with threats that it would be worse for everyone if the larger sites were not supported as planners would have less control and they would likely be approved after a costly appeal. An FOI shows that this is not the case. To date only one Greenbelt site of the size of the strategic sites put forward in Guildford has been approved at appeal. This was in Tewkesbury. It was also confirmed that planning regulations apply irrespective of how permission is given. It cannot be considered sound to mislead the public in this way?

20. The plan has failed to account for the many thousands of comments made in the previous consultations. The survey (annex 9 and 10) helps to demonstrate how powerless residents feel and the genuine sense of despair that is felt by many who try to engage with the process but feel the plan and the OAN is predetermined and not really evidence based at all.

**Overall issues**

In my view, the overall plan is in contravention of the basic principles of good development and the NPPF. Expansion on the scale purported should see development where infrastructure exists to facilitate urban regeneration and promote sustainable living.

Information appears to be held all over the place and it is difficult to know what exactly we are being asked to do in this consultation. There are different ways of accessing the consultation documents and then there are additional papers and appendices. Some are marked up with the changes but some are not. There is not enough time to read all the documents within the 6 week period.

The survey (attached annex 9&10) confirms the issues many are having with understanding the process and getting adequate information and answers to questions in order to make an informed submission. This in itself must impact the soundness of the consultation.

This plan makes a mockery of Greenbelt policy and the NPPF which states that Greenbelt retain its openness and permanence and development can only be considered (and removed from Greenbelt) if it is appropriate and in exceptional circumstances. No exceptional circumstances have been demonstrated and it is widely thought that the scale of development proposed is to enable highways and infrastructure improvements without due consideration of permissible constraints or impact from the growth proposed.

Comments concerning missing evidence and subjectivity of the Greenbelt study that led to the flawed sensitivity results (red, amber, green) resulted in Blackwell Farm being given medium sensitivity rather than high sensitivity. This in turn has resulted in it being moved forward as 'given' without seeking to address the professional independent evidence submitted in the last consultation, that contradicts this.

It was initially stated that the figure for Blackwell Farm had been reduced from 1800 to 1500 in an effort to reflect public opinion. It was later acknowledged that this 'reduction' was untrue, the extra had been phased for outside the plan period. The same was said of Gosden Hill, which also has housing planned after the plan period.

Language used reflects the direction GBC wish to take the plan whether policies are consistent or not. Page 30 of the AECOM report Box 6.9 Greenbelt around the Guildford urban area, notes that Clandon Golf area is red rated Greenbelt and that it borders AONB and is within AGLV. Blackwell Farm also abuts AONB and is partly within AGLV and access would be via both. This however goes unmentioned.
The employment needs assessment, previously stated that 30% of employers consider leaving the area due to problems with congestion and lack of affordable housing for employees. It also stated that 9% of commercial outlets were empty. The reduction applied to employment land is still therefore insufficient.

**Traffic study**

Compton and Worplesdon Parish Council’s have jointly agreed to fund an addendum to the professional Technical Note, which identified problems with the proposed link road from the A31 to Egerton Road (which will form the sole access to the Blackwell Farm site). The addendum will look at the impact of this new road (and of the entire development) on the surrounding road network in the light of changes to the Local Plan. The planned new road will cross the Surrey Hills Area of Outstanding Natural Beauty, an Area of Great Landscape Value, and historic parkland. It will also pass through, or very close to, a belt of ancient woodland.

**Question over housing need number**

A review of the Strategic Housing Market Assessment commissioned by Guildford Residents Association has identified a flaw in the way that the housing need figure has been calculated. This is outlined in the two paragraphs below:

“A review of the latest ONS population estimates and projections has found compelling evidence that there are substantial errors in past estimates of student migration flows. It is probable that migration flows out of Guildford, both to other parts of the UK and abroad, have been under-estimated by sizeable amounts.

"Owing to the way in which migration estimates are used to construct population and household projections, the errors in past migration estimates are likely to mean that the latest demographically- based housing need estimates by GL Hearn overstate the number of homes needed by over 25%.”

Note that it is important to distinguish between a “demographic need” (births, deaths, migration), an adjusted need figure (which takes into account economic growth and affordability), and the “housing figure” used in the Local Plan (taking account of constraints and ambition). The GRA review is saying that it is a fundamental demographic building block that is wrong.

There has been a lack of transparency, lack of scrutiny, and failure to act on errors pointed out by residents and consultees. The GBC Executive has undermined confidence in local democracy and the planning system.

The housing number is overstated, constraints have not been applied, and various parts of the evidence are unsound. I do not consider the plan to be justified.

The plan will create major problems in the future without solving local social housing needs or achieving affordability for those who currently live and work in the Borough. The continued use of appeals as a monitoring indicator will encourage the Planning Committee to allow applications rather than run the risk of losing an appeal. This is a particular concern given the recent changes to the structure of the Planning Committee.

In my opinion the plan goes against national policy in failing to apply (or even to recognise) constraints with regard to Green Belt and infrastructure.

I reserve my right to participate at the examination.

Comment ID: SQLP16/963  Respondent: 8575585 / Ian Macpherson  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness 

Answer: ()

Question 3: Soundness

The response following repeats the response to Question 1. If the evidence is not wholly satisfactory then it follows that the submission as a whole is not sound.

Unfortunately the evidence used is not wholly adequate, up to date or relevant. This is as much the result of recent external events as matters within GBC's control.

The key areas are * cooperation, * housing and *transport.

* COOPERATION

Set originally for reasons stretching far back into medieval history, the local authority boundaries do not any longer reflect real market boundaries. The Guildford work, shopping and housing areas stretch over the County boundary into Rushmore and far beyond. For one example, the pool of cheap housing for Guildford is in Aldershot. The draft shows signs of discussions with Waverley and Woking but little evidence of in-depth cooperation with Rushmore and beyond - instead, Rushmore and beyond authorities are cooperating with authorities to their west, but not to the east.

THE ORIGINAL 1944 SPECIFICATION FOR GREEN BELT POSTULATED THAT EXPANSION WOULD LEAP THE GREEN BELT. That is Rushmore, not Gosden Hill Farm.

* HOUSING

That the Hearne calculations for housing demand are substantially flawed appears to be a common view, now visibly based on an alternative expert calculation. However, since these original calculations were attached to the Plan documents...
there has been the major event of 'Brexit'. It is expected that Brexit will lead to a considerable decline in immigration from the EU, and, since criteria are likely to be tightened, of some immigration from outside the EU. Not so much of a decline as a simple look at the crude national figures, or the relevant pages in Hearne, but nevertheless a considerable decline is said to be likely. At the same time it is expected that there will be a period of economic stagnation or low growth, which will lead to a decline in the setting up of new households.

So it looks as if the Hearne figures will have to be re-visited, regardless of views as to their original validity. It is understood [verbal] that GBC has this in hand. However it would seem to be demonstrably premature to proceed to acceptance in advance of re-visited and agreed figures.

It is customary in estimating work to publish conclusions that give a mean estimate with a sub estimate of upper and lower tolerances. The Hearne tables appear largely not to do this - instead to put forward a single integer estimate refined to the last digit [as eg 611]. This is surprising, and a word of explanation as to the level of accuracy would be helpful.

TRANSPORT

The sections on transport are the most difficult. They are really quite vague, promising events that are not within the ability of GBC or SCC to deliver.

The lead promise is, of course, the improvement of the A3, where all is vague as to exactly what is to be done. It is not clear how much of the road and transport system an be sorted

But there are many other examples, improvements and changes in the bus services being one. Bus services are provided at the will of the bus operators, and a service exists only where the operator anticipates a profit. There are a few exceptional services that are subsidised, but the relevant Authorities only have very limited funds for this purpose - funds that are being cut and will probably be cut further. Moreover, it seems possible that the Senior Bus Cards will be withdrawn or severely limited, which will reduce the profitability of the existing services further and lead to consequent reductions.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

**Answer:** ()

Personal representations in Respect of the Guildford Local plan submission at Reg. 19 Stage

Dear Sirs

1. I object to the Suite of documents identified in General as ‘A Guildford Local Plan’ in that there has never (as required Reg 17 of the Town and Country Planning act ) been a survey of the peoples of Guildford, asking them what they wanted in ‘their’ local plan – thus the whole suite of documents are legislatively ‘unsound’ from its inception

1. The LPA has failed to observe or act on any representations made by the community in response to the Reg. 18 submission for comment, merely continued their trajectory no matter what logical legal and common sense points have been put forward by highly qualified members of the Borough community.

1. They have acted in Secrecy while constructing the suite of documents – only disclosing ‘after the fact’ agreements with developers for the developers owned land to become part of the housing allotted land. They
have failed to act in a manner which demonstrates Open Government and Localism – failing to consult in a meaningful way, merely going through the motions ignoring rational and sensible comments.

1. They have attempted to plan for the goal of rapid development max Houses, no matter the detrimental effects on the existing community, rather than planning for the future, no infrastructure has been included as a ‘must or Shall’ merely a ‘should or maybe’- this is totally unacceptable. To me and from comments across the Borough unacceptable to literally everyone who has actually thought through the Process.

1. Ignored ‘history’ in respect of known requirements in respect to transport infrastructure, while trying to bring in previously undisclosed schemes which are to the detriment of the community being poorly thought out and failing to consult with the communities affected. They have Ignored the need for always junctions at Potters lane and the A320 and link road to the A25, yet attempted to include a road across a flood plain without numeric or logical justification while failing to identify a sensible and rational route to Exit the site (Slyfield)

1. They have produced documents without proper consultation with the community, thus reaching proposals and conclusions which would not have been reached had the community been consulted and their views taken into account. Thus Failing Reg. 18 Process

1. The Document suite is not indexed despite it consisting of over 220 plus documents many duplicate documents with differing names. Some unfinished some clearly not changed since reg 18 despite notification of errors within them.

1. Thus the ability to comment on the plan is like fishing for Iron with a magnet in 50,000 Fathoms… you never quite know if the document you have found is the ‘latest document’ or a previous one, or simply a renamed identical document. – This makes the whole consultation process unsound.

1. Knowing many residents and Community organisations have commented at length – I formerly support their concerns objections and comments, and reserve all their submission at Reg 18 within the Reg.19 process such that the whole process can be challenged and assessed for its weakness of approach to this extremely serious requirement of having a Local plan for the Next 20 years.

I make no observations on the actually documents, as the actual process used to generate them fails the test of following legislative procedure (in respect of involvement of the community) and Soundness. The process has been development based not community based and at Reg.19 they have introduced documents and policies which would have been soundly rejected at Reg. 18 stage due to content and proposals, using half finished ideas and lacking in Numerical or Studious detail expected of such a plan.

I thus consider the plan unsound and failing to follow legislative procedures and formerly request it is sent back to Reg 17 stage for correct method of process namely Asking the community what they want, drawing up a plan to meet those requirements, submitting that plan to the public for comment, taking notice of those comments prior to pacing the plan before and inspector.

I object that Send is to be removed from the Green Belt under policy P2.Send provides a buffer between Woking and Guildford and no exceptional circumstances have been identified that would justify removal from the Green Belt

Attached documents:
I object to policy A43. There is no need for 400 new houses in Garlick's arch addition to the 13,860 already proposed in the Borough. This is a new site which was not included in the Regulation 18 draft and has not been consulted on previously. It is on Green Belt which should prevent the merging of settlements.

There is no need for the 7000sq m industrial development at Garlick's Arch as the latest ELNA assessment shows a reduction of 80% in employment floor space from the previous draft plan. Industrial development could be based at Slyfield.

Attached documents:

I object to policy A44. This proposal for 40 homes and 2 travellers pitches at Winds Ridge and Send Hill is new and was not included in the regulation 18 draft. It is on Green Belt land and has not been consulted on previously.

Attached documents:

While the report recognises the problems already faced by residents in negotiating their way through excessive traffic, it does not make proposals for improving this situation for those of us who live outside Guildford. More traffic will arise from excessive building proposals, making life ever more difficult for those of us trying to access Guildford town, or simply trying to get out of our own villages in rush hour periods.

Attached documents:

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation.

2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.

3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound.

4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018.

5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars.

6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.

7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: ()

As currently drafted, the Plan is not sound in relation to the provision of primary health care facilities, in particular in the Farncombe area. This is because no account has been taken to assess the current or future clinical needs of the community and no additional capacity has been built in to the plan for the
increase in population or NHS England’s changing health strategy.
In so far as the Farncombe area is concerned, the additional site allocation for a Centre of Health should be made.

**Predetermination of the Draft Local Plan 2016**

Before the first Draft Local Plan was produced the Leader of the Council and the Executive Member in charge of the Local Plan talked about their aim “to roll back the Green Belt”.

Residents objected, but this continued to be strongly promoted and consequently NPPF policies were misinterpreted to allow this to be achieved, and evidence such as the Strategic Housing Market Assessment (SHMA), on which the whole Plan was based and in which a high housing need figure (OAN) was needed to “roll back the Green Belt” was not scrutinised or transparent.

Meanwhile, the Green Belt and Countryside Study (GB&CS) was based on a traffic light system and updated with a sensitivity map, which has no connection with NPPF policies, and was produced to value the Green Belt, and justify and enable it to be built upon. It ignores the five purposes of the Green Belt given in the National Planning Policy Framework (NPPF) para. 80 and the Green Belt as a constraint in the NPPF para. 14, footnote 9.

The spirit and meaning of the term ‘Exceptional Circumstances’ has subsequently been misinterpreted and weakened to allow wholesale Green Belt boundary changes. It has been applied in a way which was not intended and ignores the principle of permanence of the Green Belt. NPPF para.79 states that “the fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence.”

Normally during the Local Plan process the Green Belt can only be changed in ‘Exceptional Circumstances’. (Under the last Plan process one piece of land was released under Exceptional Circumstances with conditions attached.) The Minister of State, Brandon Lewis, has stated: “The Framework makes it clear that inappropriate development may be allowed only where there are very special circumstances and that Green Belt boundaries should be adjusted only in exceptional circumstances through the Local Plan process and with the support of local people. We have repeatedly made clear that demand for housing alone will not change Green Belt boundaries.”

Other ways of providing housing, such as brown field sites were not pursued with any vigour, while those who were consulted and sent in 20,000 responses to the Regulation 18 (2014) consultation were ignored. Furthermore, constraints applied to lower the flawed OAN number, as is allowed, were promised, but have not been applied.

Elections 2015 intervened in the Local Plan process and councillors across Guildford Borough promised in their election leaflets to protect the Green Belt. It seemed that the Green Belt was going to be protected after all and voters voted accordingly. But after the election, the very early political decision to “roll back the Green Belt” was renewed and pursued with the same determination.

**The Draft Local Plan was predetermined and is unsound.**

**The Strategic Housing Market Assessment (SHMA)**

The Strategic Housing Market Assessment (SHMA) has been shown in several authoritative reports to be flawed and unsound. It has not been objectively assessed using consistent data, or scrutinised for flaws and double counting. It has
not been produced in a transparent form with openness about the data used by the Guildford Borough SHMA consultant, G L Hearn, and sub-consultants used. It needs separate reports or sections for issues in the SHMA which are relevant for Guildford only and which could distort the SHMA findings.

**Transport Evidence**

Residents’ concerns about the huge increase in traffic have been ignored and Transport Evidence was produced during the consultation period, too late for scrutiny or review, or for decisions based on evidence to be included in the Draft Local Plan. This is *unsound* practice.

**Consultation: Draft Local Plan 2016**

Significant changes have taken place after the Regulation 18 consultation with new developments in the Green Belt being proposed in the Draft Local Plan 2016 without public consultation. This is *unsound*.

**Special Protection Area (SPA)**

The Special Protection Area (SPA) policy has been misinterpreted by turning existing open spaces into SANGs, instead of providing new open spaces. (This risks land chosen as SANGs in long-established Areas of Outstanding Natural Beauty (AONBs) often at impractical distances from the SPA it is protecting, being harmed by an excess of added infrastructure, contrary to one of the prime purposes of conserving the natural beauty of AONBs.)

**Sustainability Appraisal June 2016**

There is no proper balance in the Sustainability Appraisal June 2016 between economic, environmental and social issues. Throughout the Appraisal it is written that the Council is confident that it can mitigate damage to landscape, but no details are given as to how it can mitigate damage to landscape, countryside and views with proposed developments totalling 13,860 dwellings, nor how it can mitigate the extra traffic congestion and noise of traffic.

The Appraisal’s statement on air quality para.10.71 “*There are no designated air quality management areas within Guildford Borough and whilst there are recognised air quality issues at Guildford Town Centre and at Wisley, it is not possible to conclude that negative impacts will result from growth*” is an inadequate statement to cover this plan period without further investigation.

Noise pollution which is a serious environmental problem for Guildford is not dealt with in this Sustainability Appraisal. The A3 with fast moving traffic goes through Guildford, cutting the town into two halves, causing whole swathes of residential areas across Guildford to suffer from traffic noise. Evidence is needed as to how this can be mitigated and what the impact of even greater amounts of traffic from the proposed developments, which may entail the widening of the A3, would be. The noise impact of increased traffic on rural areas also needs investigation.

In paragraph 10.11.10 of the Sustainability Appraisal (SA of the Guildford Borough Local Plan), it is written: “*Given the extent to which landscape has been applied as a constraint and recognising that the baseline situation would be one whereby development will come forward in an unplanned way, it is appropriate to conclude significant positive effects.*” In a baseline situation the Green Belt would be a significant constraint in itself. This is an illogical, erroneous and *unsound* conclusion.

In para. 10.19.2, it specifically states that it is “Not possible to conclude whether or not the Draft Plan is sustainable.” The specific recommendations which follow this statement have no real significance.

The Sustainability Appraisal needs to be more closely examined as to what is feasible and what is not. It is *unsound* in its assumptions without more detail as to how its assumptions have been reached. Noise pollution needs to be included in the Appraisal.

**Retail Assessment**
The Retail Assessment is weak, and based on flawed and dated concepts. It is apparent that shops are closing and online shopping is growing in popularity, while town centre shopping is decreasing.

The Assessment needs reviewing for soundness and whether the land in the proposed North St development area would now be better used to regenerate the town centre with mainly housing which would bring vibrancy to the town and contribute towards rather than compete with the High St. (For 30 years North St has been run down and from time to time sold or offered to a developer, but no developer has yet snapped up the opportunity to develop this area with retail, which makes one question whether retail is actually needed or would be viable, particularly in these changing times).

- **Safeguarding future options**

  Land needs to be reserved for an A3 tunnel entrance and for a bridge over the railway and river in order to secure these options for the future. It is unsound practice to close down options with such huge potential benefits for Guildford.

- **Bus station/exchange**

  A bus station needed for a transport shift to sustainable travel has not been included in the Plan rendering its sustainable transport policy unsound.

- **Green Belt Policy P2**

  The Green Belt policy P2 of insetting villages needs to be transparent and justified. The evidence in the Green Belt and Countryside Study (GB&CS) appears weak. This should be reviewed to ensure the Plan is sound.

- **BREXIT**

  BREXIT is now an important consideration, but any adjustment made for it, must not be allowed to disguise the underlying flaws in the SHMA. Account needs to be taken of BREXIT for soundness.

I OBJECT to the revised/latest version of the Guildford Local Plan. I request that the following comments together with all my previous objection letters are passed to the Inspector. I reserve my right to appear at the Inquiry and to present my evidence in person.

In addition to my own objections I fully support those made by Mr Andrew Proctor, [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] of June 2017. Mr Proctor’s objections are thorough, detailed and well considered. I would like the Inspector also to view/be provided by Guildford Borough Council (GBC) with a video of the C4 Dispatches Programme of 10 July 2017 entitled ‘Secrets of Britain’s New Homes’. This programme explains well the fallacy of so called ‘affordable homes’ as included in any Local Plan and has particular emphasis on Guildford’s Local Plan and housing numbers within the Metropolitan Green Belt within Guildford Borough

2/4

My own objections are as follows:
1. The GBC Regulation 19 Draft Local Plan is unsound and does not take into account my previous objections and the 30,000+ other valid objections made by others to the previous 2016 Local Plan version. I request written confirmation from GBC that my previous objections will be placed before the Inspector at the EIP.

2. I request that the current Draft Plan is amended taking into account all the objections and that this is reissued before its submission to the Inspector. I object to this version of the Plan being considered under Regulation 19.

3. 89% of the GBC area is Metropolitan Green belt. I object that GBC has adopted a lower but still inflated OAN of 12,426 homes without taking into account Planning Constraints as detailed in the NPPF and NPPG.

4. 70% of GBCs proposed new housing is destined for the Metropolitan Green Belt. The Conservative Government has promised to protect Green Belts and both Mrs May and Mr Javid assured the country that this was Government Policy. If the Inspector reads the local Conservative Election Manifesto for the last GBC Council Elections he/she will see similar assurances from Conservative candidates. The proposed Regulation 19 Plan abandons both central and local government assurances regarding the Green Belt. I object on the basis of assurance given.

5. There is a presumption v development in the Green Belt but no such presumption within Guildford Town. In the Plan there should be a much greater emphasis on urban regeneration and brown field development within Guildford Town for residential development. Only 10% of the new housing numbers are proposed for Guildford Town. Town development can be of a higher density but somehow GBC makes no mention of ‘density for development’ in its latest Plan version. Most potential sites are owned by GBC and the Council has the opportunity to develop more houses there if it chooses. I object.

The housing numbers proposed by GBC are based on a flawed SHMA. And GBC has steadfastly refused to reveal the basis for their housing formula. Why ? Indeed the whole proposed plan is already out of date. Town centres are in decline as shopping patterns change. Footfall is in decline as the customer chooses increasingly to shop on line. GBC should reflect changes in lifestyle and shopping habits in their Plan. They have not. I object.

1. The role of any LPA is to be a protector of the environment. However with its property purchases GBC is appearing to become a developer landowner rather than a guardian of planning rules.

2. I object to the inclusion of the three major strategic sites as proposed. They are all sites of outstanding landscape characteristics reflecting the original objectives of the Metropolitan Green Belt – namely openness, the separation of towns/villages one from the other and stopping urban sprawl – particularly from London. The Green Belt in Guildford provides Londoners currently with beautiful countryside on their doorstep. That will be largely eroded if the Plan is approved. The three sites to which I object are Blackwell Farm, Three Farms Meadows(TFM) (the former Wisley Airfield) and Gosden Hill Farm.

3. I object also to the removal of villages around Guildford from the protection of the Green Belt/ revised village boundaries. Such villages as Send, Ripley, Ockham and East and West Horsley are and should remain self contained communities. They should not be subject to significant expansion/ a developer free for all.

4. I wish to comment and OBJECT in some detail to the proposed development of Three Farms Meadows (TFM) in the very small historic village of Ockham. Once the home of medieval philosopher, William of Occam and more recently in the 19Cy of Ada Lovelace, the computer pioneer. This site has already been rejected overwhelmingly in 2016 by GBC Planners and its elected Planning Committee when the Cayman Islands owners submitted an application for 2000+ homes there within the Metropolitan Green Belt. GBC has declined to reveal who is behind this application given its offshore status.

1. Why include a site again which was rejected on at least fourteen different grounds ?

2. It is the least sustainable of the three strategic sites given its location and constraints. That does not make the other strategic sites sustainable !

3. It has no convenient public transport links despite claims by the applicant. It is adjacent to the A3, one of the most congested trunk roads in the county and by Jct 10 of the M25, the busiest junction on the M25.

4. The site is near the famous RHS Gardens at Wisley where congestion already occurs at peak periods, never mind general traffic congestion for much of the day on the A3/M25.

5. The proposed TFM development would overwhelm the facilities of East Horsley and the station car park there is already full most days.
6. The site would have a negative impact on the Surrey Hills AONB.
7. The local narrow lanes in the Ockham area are unsuitable for extra traffic. Cycling in the locality on these roads would be increasingly dangerous.
8. The site epitomises every reason and justification for the establishment of the Green Belt and should not be removed from it or damaged in any way.
9. I object to the fact that GBC has failed to apply Green Belt (GB) constraints to this site – such as GB itself, air quality, lack of infrastructure and protection of the AONB and the Thames Basin Heath SPA.

My OBJECTIONS to GBC’s revised Local Plan remain. The Council has ignored the well considered 1000’s of Objections. And it has spent vast amounts of taxpayer money in so doing. Its revised Local Plan remains unsound.

Attached documents:

Comment ID: SQLP16/25   Respondent: 8593185 / Niels Laub   Agent:

Document:   Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: (No)

I consider the Proposed Submission Plan to be unsound because it ignores guidance in the PPG regarding the use of constraints, bearing in mind that 89% of the borough lies within the Metropolitan Green Belt.

Specifically

Paragraph: 044 Reference ID: 3-044-20141006

Do housing and economic needs override constraints on the use of land, such as Green Belt?

The Framework is clear that local planning authorities should, through their Local Plans, meet objectively assessed needs unless any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the Framework taken as a whole, or specific policies in the Framework indicate development should be restricted. Such policies include those relating to sites protected under the Birds and Habitats Directives, and/or designated as Sites of Special Scientific Interest; land designated as Green Belt, Local Green Space, an Area of Outstanding Natural Beauty, Heritage Coast or within a National Park or the Broads; designated heritage assets; and locations at risk of flooding or coastal erosion.

The Framework makes clear that, once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan.

Paragraph: 034 Reference ID: 3-034-20141006

Can unmet need for housing outweigh Green Belt Protection?

Unmet housing need (including for traveller sites) is unlikely to outweigh the harm to the Green Belt and other harm to constitute the "very special circumstances" justifying inappropriate development on a site within the Green Belt.

Revision date: 06 10 2014

Attached documents:

Comment ID: SQLP16/1340   Respondent: 8593537 / Normandy Parish Council (Leslie GA Clarke)   Agent:

Document:   Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness
Normandy Parish Council strongly objects to the Guildford Borough Proposed Submission Local Plan: Strategy and Sites ("Local Plan") and in particular to the allocation of land south of Normandy and north of Flexford for substantial development.

In principle objection to development of this site

The Parish Council opposes the principle of the development of this site:

1. The site lies within the Green Belt, and has been assessed by Guildford Borough Council (GBC) as having high sensitivity in Green Belt terms, serving to check the southward sprawl of Normandy and northward sprawl of Flexford, preventing the merger of those settlements, and safeguarding the countryside from encroachment (see Green Belt Purposes Assessment, April 2014). Accordingly, given the very significant contribution made by the site to the Green Belt in this area, it should not be developed.

2. The development of the site would not amount to sustainable development within the meaning of the National Planning Policy Framework. GBC’s claim that the approach would be sustainable fails to attach any or any meaningful weight to the environmental aspects of sustainability.

3. The proposed allocation has not been the subject of any proper assessment of highways impacts. The local road network is incapable of coping with the proposed scale of development and there is no evidence that the necessary highways improvements are feasible or deliverable within the plan period.

4. The site lies within 1 km of the Thames Basin Heaths Special Protection Area and accordingly requires substantial provision of alternative green space as an avoidance strategy. Preferable sites for development elsewhere could be delivered without such provision.

The development of this site would significantly affect Normandy and the surrounding area and has not been justified in the Local Plan or in the supporting documents. In addition to the principled objections to the development set out above, the Parish Council considers that there have been substantial flaws in the plan-making process to date which go to both the merits and legality of the Local Plan.

Specific criticisms of the plan making process

A sound plan must be based on proper evidence and consistent with national policy. To be lawful, the plan must be promoted on the basis of a proper analysis of the environmental impacts of policies together with an assessment of reasonable alternatives (see Environmental Assessment of Plans and Programmes Regulations 2004/1633 and e.g. Calverlon PC v Nottingham City Council [2015] EWHC 1078 (Admin), per Jay J at (67)).

The history of the Local Plan is known to GBC. The Parish Council wishes to emphasise that in the 2014 plan, it was not proposed that this site be allocated for development. Since then, there has been no further Green Belt review, but there has been a Green Belt Purposes Assessment which identified this site as particularly sensitive in Green Belt terms.

There is no explanation in the published documents of the "exceptional circumstances" (NPPF, 80) that are said to justify release of the site from the Green Belt. The Green Belt Capacity Study does not explain why such exceptional circumstances exist, and nor does the Sustainability Appraisal ("SA"). Extraordinarily, the SA states that the development of the site is regarded as a "given" (6.3.16). The SA acknowledges (in footnote 68, p 131) the greater impacts on the Green Belt in developing sites such as this, but does not explain why such development is nonetheless justified on both environmental grounds and by reference to the exceptional circumstances test.

The SA is open to further criticism through its failure to accord any weight to the Green Belt in analysing various options. This is a significant deficiency which renders the SA unsound and indeed unlawful, since the alternatives are not subjected to proper analysis on environmental grounds.
Further, GBC has consulted on the Local Plan with the proviso that this site should be deleted from the plan if it is demonstrated the provision of a secondary school on the site is not required.

However, there has been no proper assessment of whether alternative sites could accommodate the school, as is clearly required given the "exceptional circumstances" test. GBC's assessment of alternative secondary school sites notes that Surrey County Council's concerns as to remoteness of the site from development are as was only overcome by the new housing provision in the Local Plan i.e. that housing which is proposed on this site. The alternatives assessment fails to identify the land area required for the school, and fails to assess alternative sites on the basis of their contribution (or otherwise) to the Green Belt. This is a fundamentally flawed sequential assessment.

Even if this site is the only possible school site (which is not accepted) then there is no explanation as to why 1,100 houses are required to be delivered in addition to the school, with a materially greater impact on the Green Belt and the environment generally. Part of the justification offered for the selection of this site for a school is that it is close to the proposed housing (together with other development sites). This argument is circular, since if the school is not required in this location then nor is the housing. In any event, this justification does not compare alternative sites on a fair basis, since other sites are rejected for schools on the basis of their Green Belt location. This site also lies within the Green Belt.

The Leader of GBC has suggested that the proposed houses should be regarded as "enabling development". The Parish Council submits that school funding should be achieved through the normal channels and not through the release of Green Belt land to housing development. This suggested cross-subsidy is an unjustified claim (there has been no viability analysis) and in any event is not a proper planning reason for allocating the site for development. The Local Plan is therefore unsound.

**Next Steps**

GBC's consultation on the Local Plan was based on the proviso that policy A46 was to be deleted in the absence of justification for the location of a secondary school at the site.

The Parish Council has seen no proper justification for the location of a secondary school in this Green Belt site. The selection of the site appears to have been justified on the basis that it will be close to the housing identified in the allocation. This makes for an entirely circular argument; the housing is only put forward on the basis of the school, and the school on the basis of the housing.

This cannot amount to an exceptional circumstance for the release of land from the Green Belt. There has been no adequate sequential site assessment for a new secondary school.

In those circumstances, GBC is invited to confirm that policy A46 will be deleted from the Local Plan because the school location has not been justified. The Spatial Strategy should be amended accordingly.

We await GBC's urgent confirmation that the Local Plan will not be proceeding with Policy A46 and that the land in question will remain within the Green Belt.

Comment ID: SQLP16/427 Respondent: 8597601 / St Catherines Village Association (Philip Mansley) Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness
Answer: (Yes)

The strategic sites selected to meet the assessed housing requirement. But the SHMA figure has been challenged. As some of the sites encroach on Green Belt land planning permission for those sites should not be granted unless the SHMA estimates are borne out bu actual statistics.

Attached documents:

Comment ID: SQLP16/574 Respondent: 8598049 / Environment Agency (Jonathan Fleming) Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness
Answer: ()

Summary of Soundness

We welcome and support a number of the changes that have been incorporated into the Plan since we reviewed the Draft Guildford Borough Local Plan: strategy and sites dated July 2014. However, we consider the Plan to be UNSOUND in its current form due to issues relating to:

- Infrastructure Delivery Plan – Water quality
- Flood Risk Sequential and Exception Tests - site allocations and the justification for promoting certain sites
- Policy P4 – Flooding, flood risk and groundwater production zones
- Site Allocation Policies – safe access and egress of allocated sites A5 and A13

In its current form the Plan does not meet the tests of soundness in terms of being justified, effective or consistent with national policy. These points are summarised below.

- With regards to water quality the Plan does not reflect the evidence submitted in the Infrastructure Delivery Plan for wastewater capacity issues, which may result in an adverse impact on water quality. The Plan is not consistent with the National Planning Policy Framework (NPPF), paragraph 109, and is not justified by a robust evidence base.
- With regards to the Flood Risk Sequential and Exception Tests, we do not consider that sufficient evidence has been presented in this supporting document to justify the conclusions drawn in the Plan with respect to the allocation of certain sites. Without this evidence the Plan is not justified.
- With regards to Policy P4 we do not consider that sufficient reference has been made to the impacts of climate change on the flood risks associated with development. We consider that without specific mention of the flood risks associated with climate change that the Plan is not consistent with paragraph 99 of the NPPF.
- With regards to flood risk three of your allocated sites; A5: Jewsons, Walnut Close, Guildford; A13: Kernal Court, Walnut Close, Guildford; and A14: Wey Corner, Walnut Tree Close, Guildford, do not have the evidence on access and egress to support their allocation in the Plan. Without this evidence the deliverability of these sites is questionable and their inclusion is not consistent with NPPF paragraphs 100-102 of the NPPF.

Further details regarding these points are within our letter submitted 18 July 2016.

Attached documents:

Comment ID: pslp17q/116 Respondent: 8599201 / Richard D Jarvis Agent:
Answer: (No)
See attached comment.

This comment is about one aspect of soundness - making sure that the infrastructure provision in the plan will be sufficient to meet the needs of the increased population and that of the surrounding area. In the case of transport, this is unlikely to be the case. Achieving soundness in this respect would require a lower rate of expansion of housing and more investment in infrastructure.

The assessment of need for housing in the borough over the plan period adopted by the Council is based on flawed analysis, and this undermines the soundness of the plan.

[Text of attachment reproduced below]

1. In terms of its transport aspects the Plan cannot be regarded as sound. GBC has provided vivid descriptions of the conditions on the network today and the evidence is that these will be as poor, and in some cases worse, at the end of the plan period, even with the mitigation measures. Growth and infrastructure have to be better aligned. While the level of growth in homes in this latest draft plan is somewhat lower than that in the 2016 version, it is still substantial and growth is also planned outside the borough. The evidence provided indicates that congestion will be widespread on much of the highway network in peak periods, even with the proposed highway schemes and with the measures to encourage the use of public transport in place.

Attached documents: [Q3 Soundness, 20.7.17.pdf (5 KB)]
The Local Plan is not sound.
The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

1) The Plan does not consider the implications of Surrey County Council’s business plan for Newlands Corner to attract 100,000 more visitors a year. A significant proportion of these can be expected to use the A247.

2) The Plan does not consider the Waverly B. C. approval for the development of 1,800 homes at Dunsfold which has the potential to feed traffic trying to avoid Guildford, onto the A247 to access the A3.

3) The changes in this latest version of the Guildford Local Plan show little or no willingness on the part of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and will bring increasing traffic congestion, pressure on other infrastructure, noise and pollution and a reduction in the quality of life of our residents.

---

Comment ID: SQLP16/168  Respondent: 8640353 / Julian Cranwell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness
Answer: (No)

Object. The plan is completely unsound, for the reasons already given, in response to questions 1 and 2.

The housing number has been prepared behind closed doors, without the council having the facility to verify the calculations, or assumptions used.

There is no desire or need to remove the 14 villages from the greenbelt.

The proposals would change the character of the villages forever.

The council has made almost no effort to utilise the large brownfield assets it controls to provide housing, as directed by central government.

The principal architect of the plan is a convicted forger, who behaved fraudulently while in office.

The following changes are necessary to ensure the plan is made sound:

1. No building on the greenbelt, until all available brownfield land has been used up.
2. Require developers to use up their land banks, before any new greenbelt is released.
3. Start from scratch on a new plan rather than trot out the discredited previous plan, virtually unchanged, with no objections dealt with.

Attached documents:

---

Comment ID: SQLP16/1312  Respondent: 8640353 / Julian Cranwell  Agent:
We consider that the Local Plan is unsound. Guildford is physically constrained being a gap town set in the Surrey Hills AONB and in Metropolitan Green Belt. Significant parts are affected by the Thames Basin Heath Special Protection Area. There are also notable areas of river, surface water, groundwater and surface water flood risk. Constricted road and rail routes converge to cross the downs seeking to avoid both high ground and floodplain. These compete with housing for land and there is no space for road widening or a conventional ring road approach. The Local Plan process envisages that the housing target should be lower than the “objectively assessed need” if there are valid constraints. GBC has failed to apply any reduction. We consider this makes the plan undeliverable and unsound. We believe it would be harmful to the character, quality of life and economy of Guildford to apply the housing figure to a number of 13,860 new homes by 2033. We submit it would be counter to sustainable development as a whole (in particular to living within environmental limits and achieving a sustainable economy) and contrary to policy to develop on the scale currently proposed. We are concerned that insufficient attention has been paid to cumulative impacts with constraints considered separately for each site. In view of the extent of physical and policy constraints, the inflated SHMA figure, and the transport evidence indicating that the Plan would lead to congestion, the OAN figure should be 500 homes per annum. After application of constraints the target should be in the range of 250 homes per annum and kept under regular review. The extent to which the Sustainability Appraisal fails to test the sustainability of the spatial options in a meaningful way casts doubt over whether sustainability has been assessed. The report treats various major development sites in Green Belt, contrary to the importance attached to protecting Green Belt, as “a given”, fails to consider options that constrain development or that make greater use of brownfield or previously released greenfield land, focuses on a range of options that involve developing on even more Green Belt around Guildford in order to protect Green Belt around Woking does not consider environmental limits or impact on the next generation in terms of weighing demand for homes for the young alongside the use of all possible last resort greenfield options by one generation. The National Planning Policy Framework requires that objectively assessed needs should be met unless: “any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; or specific policies in this Framework indicate development should be restricted.” The specific policies described include several of particular relevance to Guildford including sites protected under the Birds and Habitats Directive, Sites of Special Scientific Interest, Green Belt, Local Green Space, Area of Outstanding Natural Beauty, designated heritage assets and locations at risk of flooding. In this situation, we would question whether it is appropriate for the Appraisal to propose meeting needs in full from a sustainability perspective. Notwithstanding guidance that the Sustainability Appraisal should be proportionate, strategic and look at significant matters, the assessment appears deficient and biased in the spectrum of alternatives it considers to the point that it is questionable whether it meets the requirements. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation. GBC has proposed an OAN of 693 houses per annum in the GL Hearn Strategic Housing Market Assessment (SHMA) which we consider is unsupported. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018. This is too late.

Attached documents:
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford’s circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

5. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation

6. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation

7. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound

8. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018

9. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars

10. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham

11. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework

12. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: (No)

Much of the proposed housing is on Green Belt land. The GBC should be very energetic in preserving the special qualities of the borough i.e. its open spaces and agricultural land and not be actively trying to encroach on it. Once this land is lost, it is gone forever. One encroachment will lead to many more.

Comment ID: SQLP16/326  Respondent: 8687041 / Michael Aaronson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: (No)

The Plan is unsound because it is not based on objectively assessed development and infrastructure requirements. The housing need is exaggerated (see answer to question 1) and the infrastructure requirements have not been adequately assessed. For example, with regard to Policy/Site A46, it is inconceivable that the local road infrastructure could be improved to an extent sufficient to bear the weight of the additional number of houses proposed; bland assurances that these matters will be addressed at the planning permission stage are simply inadequate. To remove land from the Green Belt against a purely hypothetical, not to say fantastical, infrastructure plan is extremely dangerous and irresponsible. I therefore OBJECT to the Plan on the grounds that it is unsound.

Attached documents:

Comment ID: pslp17q/174  Respondent: 8687041 / Michael Aaronson  Agent:

While I appreciate that much good work has been done since the publication of the 2016 version of the Local Plan I am still not convinced of the soundness of the housing target figure, especially as the methodology by which it was generated has not been made public. This figure shapes so much else in the Plan and it therefore detracts from the credibility of the Plan as a whole if the public does not have confidence in it.

Comment ID: SQLP16/987  Respondent: 8703585 / N J Axten  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness
Answer: (No)

It does not take account of the concerns from the overwhelming majority of residents about the extent of actual housing demand, which is considerably less than the numbers put forward in the local plan.

Also, it cannot reflect the demographic change now attributing to lower immigration numbers, following the UK leaving the EU

Attached documents:

Comment ID: pslp17q/405  Respondent: 8711841 / Rosmarie Roberts-Kunz  Agent:

Answer: (No)

I call on the Inspector to send Guildford Council back to the drawing-board with this plan. It is a shoddy effort that takes almost no account of the 32,000 comments (mostly objections) in the last public consultation, or the 20,000 almost identical comments in the consultation before that (on the Issues and Options paper).

Reasons for declaring the draft unsound are too numerous to list, but I wish to highlight the following 6 items:

1. The council have gone to huge lengths to conceal the consultant’s formula apparently used to calculate the OAN, which cannot therefore be scrutinised. They have failed to differentiate between the OAN (which is supposed to be objective evidential data) and their housing number policy target. They have made no effort to address flaws in the SHMA revealed by independent studies well known to residents, which suggest a target more in the order of 4,000 than over 12,000. They have not taken seriously the implications of applying constraints which, by greatly reducing the housing target, would answer many other objections, for instance by preserving the Green Belt. They are also being ambiguous about how development will be phased and how constraints will be applied, suggesting a plan full of moving targets that cannot be properly monitored or evaluated for performance or against government policy over the plan period.

2. The council have deleted a passage in Policy H1 on housing density, leaving it up to developers. This removes a key planning element and makes it impossible for Guildford to comply with Government policy on efficient land use.

3. Policy P1 and E5 reduced protections against development in the AONB, contrary to the declared policy of central and local government.

4. Despite some 52,000 objections in the previous 2 rounds of public consultations, the council is persisting in trying to direct most new development onto the Green Belt, contrary to declared government policy including the NPPF. Whether one agrees with this attempt or not, it needs to be argued through in any plan worthy of the name – for instance, in Policies P2, P3, E5 or the Sites appendices. The council, however, do not say why 70% of new homes need to be on green fields, or 58% in the Green Belt, when common sense suggests most people would like to live in urban or suburban areas where close to employment and other facilities. The plan doesn’t say either why three of the biggest developments need to be in the Green Belt: Wisley “airfield” (which is actually good farmland), Blackwell Farm and Gosden Hill Farm. The NPPF states that the Green Belt can be developed only in “exceptional circumstances”, but the plan does not mention these. The council do not say why most of the borough’s rural villages need to be “inset” from (i.e. kicked out of) the Green Belt against their expressed will. No justification, weak or strong, is advanced for such drastic action. The numerous proposals in the plan for infilling and extending settlement boundaries seem designed merely to support or facilitate an a priori decision to promote maximum development in the countryside and to minimise development in the urban areas. Instead of balancing public and private interests, this plan fails the public by capitulating to developers’ understandable greed for green-field sites that are cheap to build on. A sound plan would need to balance this by a full appraisal of urban brownfield sites available, many of which the council already own but seem strangely reluctant to release for housing.

5. In Policies E1 and E2, the council has similarly taken the caved in to a perceived business demand for retail and commercial space in the town centre. This is probably not what business (such as the Local Enterprise Partnership) actually want, but may seem a soft-option route to easy growth. With 89% of the borough Green
Belt, however, there are obvious objections to devoting scarce urban space to uses of low employment value such as warehousing or dying activities such as town-centre shopping, especially if this means even less new urban residential development. The plan does not say why these areas cannot be developed for low-cost housing that would regenerate the town centre, or for high-value, less space-wasting businesses that are more consistent with Guildford’s well-educated workforce. It also fails to make an assessment of the impact on traffic or existing high-street shops. Instead, it plonks commercial development in cut-off, unsuitable locations, such as Burnt Common, with no balancing arguments about how the consequent damage to the Green Belt can be justified. Policy D1 reveals that the council has failed to address in any serious manner the vast discrepancy between its ambitious development targets and Guildford’s infrastructure deficiencies, which are already a serious constraint on day-to-day life in the borough. Lack of infrastructure was brought forcefully to their attention in previous public consultations. In their public rhetoric, they have recently acknowledged that this is a major problem. But this is not reflected in the latest version of the plan, which continues to rely on vague hopes that the gap might be narrowed through the CIL mechanism or by willing “infrastructure providers”. The council is either being cynical (thinking they can fob the government off with promises of development they know they cannot deliver) or else incompetent (in thinking that so much infrastructure will simply materialise out of nowhere once development is underway). To meet the soundness test, on the other hand, the plan must recognise the reality of Guildford as a congested, exceptionally constrained borough in London’s shadow, and plan only as much economic and housing growth as can predictably be supported in infrastructure terms.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: ()

24.C. Question 3: Soundness

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound? Please provide the following information being as precise as possible:

- why you consider it is or is not sound and
- what change(s) (if any) you consider necessary to make it sound, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.

3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound.

4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018.

5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars.

6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.

7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. I do not believe the draft plan accords with the NPPF policies on protecting the Green Belt.

14. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not itself a very special circumstance justifying an indiscriminate removal of sites from the Green Belt. Having properly calculated a housing needs number, constraints should be applied to it to reflect the Green Belt and AONB. Each proposed Green Belt site then needs to be considered on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances, and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt, can the proposal proceed. The draft plan does not demonstrate that this has been done. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

15. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

16. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: (No)

I do not consider that the Plan is sound because huge areas have been taken out of green belt for development.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.
• without an accompanying town master plan, which would demonstrate that proposals for the urban areas and villages and countryside are joined up
• without taking into account the views of the residents, particularly with regard to the levels of growth proposed for the borough and the feasibility of delivering this.
• without putting forward information relating to individual sites in a fair and balanced manner.

All of the above are necessary to make Guildford’s Local Plan sound.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: (Yes)

No

SHMA is deeply flawed. No calculation available, No Scrutiny of figures in Council. Unconstrained numbers.

Look at the independent GRA SHMA which gives a figure of 510 unconstrained. We did tell GBC it was wrong but they repeatedly ignore us and refuse to show the maths behind the numbers.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: ()

24.C. Question 3: Soundness

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound? Please provide the following information being as precise as possible:

• why you consider it is or is not sound and
• what change(s) (if any) you consider necessary to make it sound, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “ About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councilors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

I do not believe that this plan in any way sound. I would challenge the proposed evidence base (much to large population count for this area), I would challenge the assumptions for infrastructure, even though the borough councillors stated that the infrastructure must come first at the recent council meeting, I do not believe that this would ever be the case and even with investment would not support the huge growth predicted for Horsley's, Clandon, Normandy, Send and Ripley.

The roads are currently under huge pressure (traffic and state of surfaces, speeds and parking), the schools are under huge pressure, Horsley have had a constant battle to remain part of the catchment for the Howard - their only local school, places are very tight already. The local health facilities are bursting at the seams, it takes days to get crucial appointments and I have just waited 10 hours at A&E for treatment.

I believe that the way in which this plan has made assumptions about "insetting" of villages and changing village boundaries then to propose building on green belt land is absolutely astonishing (stronger words would normally be required).

The new sites added in this recent plan to West Horsley have taken local people by surprise, many of my neighbours do not even know of the intention to do so. The nature of these changes proposed to East and West Horsley as well as Clandon would change our villages forever. We have a very strong village and enjoy green countryside, and chose to live here rather than Cobham or other villages which are built up and rapidly becoming additions to London.

The new site proposed for Garlick's arch appears to have been added without any consultation having listened to your recent borough council meeting. I was astonished to hear "its just ancient woodland so it will die out soon anyway". This is an areas of outstanding beauty and with this new site and access to the A3 we will decimate any of the beauty it currently has.
The site proposed for Wisley has already been rejected in recent proposals - mainly due to infrastructure. I consider this to be an irresponsible proposal considering its position, the current traffic, the proximity of small neighbouring villages whose character will be forever changed (and having only a small voice due to their small populations). Rail links although new ones are proposed will not fix the current overload on Effingham and Horsley stations and lack of carriages.

I am a local business owner, I do not believe that the proposals made in this plan are supportive of local businesses other than potentially retailers. Transport, infrastructure, delivery, halls and spaces to work, storage premises are all high on the list of my local business, these have all be provided to the development of the local Horsley plan, this has not yet been considered in this local plan. I wonder how the local people actually have a say in this process if this is the case?

My final point is about this plan process. I have spent hours listening to your borough meetings, with complete dismay. The local people voted for a council that would protect our Green Belt. I wonder where those people have gone? I was also dismayed at the behaviours of other councillors towards those who did try to respect this in your meeting by talking down and dismissing suggestions. I fear that this process is not in good hands, and not truly representing what the local residents require or support.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford’s circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site-by-site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councillors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness
24.C. Question 3: Soundness

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound? Please provide the following information being as precise as possible:

- why you consider it is or is not sound and
- what change(s) (if any) you consider necessary to make it sound, explaining why this is the case.

**ANSWER**

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars.

6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.

7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

**Comment ID:** SQLP16/931  **Respondent:** 8771265 / H C MacKinnon  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

**Answer:** ()

**24.C. Question 3: Soundness**

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound? Please provide the following information being as precise as possible:

- why you consider it is or is not sound and
- what change(s) (if any) you consider necessary to make it sound, explaining why this is the case.

**ANSWER**

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:
1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites— which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation

2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation

3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound

4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018

5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars

6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham

7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework

8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Comment ID: SQLP16/59  Respondent: 8795361 / Steven Whitaker  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: (No)

This new plan does not adequately take into account the feedback on the previous draft. Feedback from hundreds of residents has been unashamedly ignored. In particular there was widespread objection to the construction of a new town at Ockham (referred to as Wisley airfield in the plan) and significant new development at East and West Horsley.

If the huge new town at Ockham is ever built this would represent unprecedented destruction of green belt land and alter forever the character of our borough. The council has understated the strain a new town would place on infrastructure and services in the Borough - many of these problems were identified by the borough's own Planning Department in its refusal to grant permission for a new town at Ockham earlier this year.

The planned development of East and West Horsley would swamp these two villages with new housing and ruin their rural character.

In summary the new local plan is a bitter disappointment.

12. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.

13. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

14. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation.

15. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

16. No adequate explanation is given as to how the asp rational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

17. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

18. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

19. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

20. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

21. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Attached documents:
The Local Plan is not sound. It does not meet objectively assessed development and infrastructure requirements, specifically in respect of housing need and transport infrastructure. It is not based on proportionate evidence. It is very doubtful that it is effective. It is not consistent with NPPF policies in particular with section 9 thereof.

Attached documents:

The report cannot be sound as it is not legally compliant.

In addition, the evidence base documents are poor, so any plan prepared using these documents cannot be considered to be sound - in particular when the declared aim of GBC was "to roll back the green belt". How can any plan produced be sound when this was the declared policy? - and this policy is evident in the details of the plan, which will remove more than 6% of the green belt, and create at least 3 large urban areas in areas that are currently in the green belt, as well as destroying one of the most beautiful areas in the borough, by building across Blackwell Farm.

In particular, the plan is not sustainable. It will result in a very large increase in traffic, as homes are outside the town and so residents would have to travel to their place of work. This was recognised in the Vision and Ambition section of the plan, which said that 2,800 homes were in urban areas, to take advantage of existing infrastructure and services, reduce the need to travel, and offer alternative needs of transport to the private car. All very well - but it means that the other 11,060 homes are planned so they cannot take advantage of existing infrastructure and services, and cannot offer alternative means of travel other than a private car. How could the plan be sound if it is not sustainable?

Attached documents:

1. I object to the draft Local Plan because overall the draft Plan is not sound, and the changes made have not improved it. There are many reasons for believing the plan is not sound, and I have given some of these below. I have given others in objections previously made, and these should be considered with those given below as there is a great deal of detail relevant to this draft Local Plan in my previous submissions.

1.1. This draft Local Plan does not comply with the planning guidelines given in the NPPF, for example, it does not provide exceptional circumstances that are required to be shown before building in the Green Belt can be approved. It contravenes NPPF policies in many other ways, for example, one of the purposes of the Green Belt is to ensure that recycling of previously developed land will occur, and this draft Plan does not do that, about 70% of the dwellings proposed are to be built on green fields, most of which are part of the Green Belt.
1.3. There has been no application of constraints to the housing target. There are many appropriate constraints, such as the existing heavy burden on local infrastructure, which will be further overloaded if the proposed housing target is adopted. One symptom of the infrastructure overload is heavily congested roads across the borough, which gives rise to serious air pollution - but this is not recognised within the draft Plan. There is a need to adopt policies that will improve air quality and ignoring air quality issues is a serious defect in the draft Plan, and so it should be rejected.

1.4. This draft Plan lacks credibility in that it proposes to expand retail space within the town, despite the fact that there are already many unoccupied retail shops within the town. Current retail trends include an ongoing move to internet shopping and home delivery, reducing the importance of bricks and mortar retail outlets. This move is likely to be accelerated by rapidly increasing costs associated with fixed retail premises, such as government mandated increases in labour costs (increases in the minimum wage, auto-enrolment pensions, apprentice levy, etc) and higher business rates. Given increasing costs, it is possible that current trends in retail will impact on leisure outlets, with a growing emphasis on the home delivery of, for example, meals, leading to the closure of some food outlets. The draft Plan does not take account of current trends, nor does it examine the future impact of these trends and means the current draft Plan is not fit for purpose.

1.5. Risk analysis within the plan is inadequate, for example, the risk associated with building too many dwellings has not been considered. That there is a risk associated with a high housing target was shown by the examples of the national housing markets in, for example, Spain and Ireland, in the period 2007 to 2009. It was also noteworthy that the house building programmes in these two countries provided dwellings well in excess of actual need. Despite this being obvious, the price of housing actually increased – until the financial markets crashed in 2007. This was followed by house price crashes that caused great hardship to many households in both countries. It is simply folly to adopt a housing target that is greatly in excess of previously delivered housing without the concomitant consideration of the risks associated with this policy.

1.6. The social housing policy within the draft plan is inadequate and relies on the private sector to deliver “affordable” housing. One of the lessons from the Grenfell Tower disaster is that the current management of social housing is inadequate – witness the installation across the country of external panels that are now deemed to fail flammability tests. This shows the need to re-examine social housing provision and management at both a national and local level. In the specific case of Grenfell, the management company apparently ignored residents’ concerns regarding fire safety equipment and policies. This failure undoubtedly contributed to the disaster. Up to now, Guildford Borough Council have ignored valid concerns regarding their Local Plan, and this bodes ill for the future. The draft Local Plan should be rejected and the council told to think again regarding the provision and management of social housing.

1.7. The draft Plan assumes that house prices are simply a consequence of the balance between supply and demand, and that supplying more houses will result in lower prices. Examples previously cited – Spain and Ireland show that this is not the case. Even though there was a glut of houses, prices in these countries did not fall until after the financial crash. High house prices in the borough (and nationally) are a result of many factors, it is too simplistic to assume prices are determined only by supply. Note that nationally and locally house prices fell or were stagnant during 2008 and 2009 – but this was not because of a huge expansion in the supply of housing. The monetary policies of successive national governments have resulted in an unprecedented period of low interest rates and have fuelled an asset price boom, especially in housing. To compound the effects of asset price inflation, real wages have fallen during the last 10 years – the Office of National Statistics estimated that real wages have fallen by 3.1% since May 2008. This means that the affordability ratio between house prices and wages is very high – but this is not just a supply/demand issue. The draft Plan should be rejected because it is unrealistic to assume house prices are a consequence of only the balance between supply and demand. It should recognise the importance of other factors, with due consideration given to these.

1.8. Guildford Borough needs a large expansion in dwellings for first time buyers and in social housing. Ideally, these would be located close to transport hubs, to reduce the reliance on motor vehicles – and transport hubs are within Guildford Town. Yet much of the housing proposed will be outside the town, with only approximately 10% of the housing proposed inside the town centre. Residents in sites located at some distance from transport hubs will be reliant on motor vehicles – resulting in increased congestion and air pollution. This draft Plan should be rejected because of poor spatial planning.
1.9. Yet another weakness in the draft plan is the lack of the consideration of alternatives, such as using more brownfield sites within the town for housing. The absence of any reasoning for arriving at a plan that proposes building about 70% of housing outside the town on countryside and Green Belt sites suggests that alternatives have not been adequately considered, and so the draft Plan should be rejected.

1.10. Many of the studies and reports that make up the evidence base are weak, with some being indefensible, such as the Green Belt and Countryside Study. Many councillors have commented negatively on this study, yet the conclusions from it have been used to shape the draft plan. There are other examples of poor studies, such as those that underpin the housing target and the Employment Needs Assessment. A plan based on a weak evidence base is bound to be fatally flawed and so the draft Plan should be rejected.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: ()

24.C. Question 3: Soundness

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound? Please provide the following information being as precise as possible:

- why you consider it is or is not sound and
- what change(s) (if any) you consider necessary to make it sound, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

5. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation

6. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation

7. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound

8. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018

9. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars

10. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham

11. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework

12. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

13. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

14. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens

15. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

16. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

17. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

18. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

19. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Attached documents:
1. Plan to House over 2000 Homes in Wisley

This development implies over 5000 new residents in the area. This development is larger than East Hosley and must be planned like a new town from the outset. The infrastructure requirements that flow from this must be fully anticipated within the boundary of the Wisley development itself. Otherwise the development will not be environmentally sustainable and will cause undesirable and illegal rise in traffic volumes, congestion and consequent CO2 emissions.

In particular the infrastructure within the new development must a much larger parade of shops, space for social infrastructure and a local library as well as a primary and secondary school. It is not sustainable to expect such a large population to drive the 3 miles up the Ockham Road to Horsley for to access social and retail infrastructure. The retail area described at a combined 1100 sq m is much smaller than Horsley and is inadequate considering the number of residents anticipated.

Horsley infrastructure is already overstretched and does not have the spare parking space.

The A3 north of Send is severely constrained by M25 Junction 10/A3 Wisley interchange during rush hours. This is clearly cited in the Key Evidence. The Wisley development (A35) should not therefore be started until the planned Scheme (SRN3) for the new interchange at A3 M25 Wisley Junction has been fully implemented and shown to remove the congestion on the A3 which is unsafe during rush hours. The Plan instead inadvisably encourages early development of Wisley irrespective of the progress of the mitigation schemes such as SRN3.

2. Plan to inset East Horsley and West Horsley from the Green Belt

I object strongly to the plan to take the Horsley villages out of the Green Belt. The plan is illegal and unsound. The Green Belt is there to protect the openness of the country side by restricting the building of new houses and limiting the extending of existing homes to a proportionate extent. The green character and openness of the Horsley villages has been preserved as a highly desirable and intended consequence of the Green Belt legislation. The geography of the Green Belt was defined by Parliament in 1952.

Removing the Horsley’s from the Green Belt is unsound and will gradually destroy the open character of the Horsleys and cause the villages to become over developed loosing the openness of the rural village. The benefit of building circa 500 new houses that are planned in Horsley (after its removal from the Green Belt) is outweighed by the disbenefit arising from the potential loss of green open space that the Green Belt is intended to provide to the 7000 or so residents of the Horsley villages and the 10 million residents of London.

3. Extending the Settlement Boundaries south of the A246.

I object to extending the settlement boundaries at the southern end of East Horsley to the south side of the A246 covering Chalk Lane and the Warren. The proposal is unsound.

The evidence on the character of Settlement areas failed to note that East and West Hosrely ( and Chalk Lane in particular) are adjacent to the SSSI of the Sheepleas. Chalk Lane is also very close to two areas of outstanding natural beauty and is the beginning of the Surrey Hills. Chalk Lane was a rural holiday area. It is situated in a uniquely attractive chalk and limestone cutting has abundant wild flora and fauna. Chalk Lane is still a beautiful tree lined lane which is gradually recovering its former impressive canopy after the devastation of the 1987 storm.

Chalk Lane is a popular green route used by walkers and cyclists to access the Sheepleas and Surrey Hills from Horsley and the A246. It is rural and not urban in character. Swallowing this area up into the settlement of the village will lead to undesirable encroachment of the village of East Horsley on the rural south side of the A246. It will give a green light to unsuitable and forms of urban development and become a prelude to future removal of this area from the Green Belt and further loss of openness and Green Belt.
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation

2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation

3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound

4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018

5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

**Answer:** ()

24.C. Question 3: Soundness

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound? Please provide the following information being as precise as possible:

- why you consider it is or is not sound and
- what change(s) (if any) you consider necessary to make it sound, explaining why this is the case.

**ANSWER**

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation.

2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.

3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound.

4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018.

5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars.

6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.

7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation

2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation

3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound

4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018

5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars

6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

8. The proposal for Garlick's Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. I do not believe the draft plan accords with the NPPF policies on protecting the Green Belt.

14. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not itself a very special circumstance justifying an indiscriminate removal of sites from the Green Belt. Having properly calculated a housing needs number, constraints should be applied to it to reflect the Green Belt and AONB. Each proposed Green Belt site then needs to be considered on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances, and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt, can the proposal proceed. The draft plan does not demonstrate that this has been done. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

15. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

16. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

I THEREFORE REPEAT MY OBJECTION TO THE GUILDFORD BOROUGH PROPOSED SUBMISSION LOCAL PLAN: STRATEGY AND SITES 2016, as many aspects of the same, as outlined above, are either ill conceived, unnecessary or unsound.
I trust that these comments will assist in your consideration of the many issues raised with regard to the Guildford borough Proposed Submission Local Plan: Strategy and Sites 2016.

Attached documents:

Comment ID: SQLP16/1751  Respondent: 8836129 / Roger Shapley  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness
Answer: (No)

Response: NO

Guildford is physically constrained being a gap town set in the Surrey Hills AONB and in Metropolitan Green Belt. Significant parts are affected by the Thames Basin Heath Special Protection Area. There are also notable areas of river, surface water, groundwater and surface water flood risk. Constricted road and rail routes converge to cross the ‘downs’ seeking to avoid both high ground and floodplain. These compete with housing for land and there is no space for road widening or a conventional ring road approach.

The Local Plan process envisages that the housing target should be lower than the “objectively assessed need” if there are valid constraints. GBC have failed to apply any reduction which makes the plan undeliverable and unsound.

We propose it would be harmful to the character, quality of life and economy of Guildford not to reduce the housing figure to a number significantly below 13,860 new homes by 2033.

We propose it would be counter to sustainable development as a whole (in particular to living within environmental limits and achieving a sustainable economy) and contrary to policy to develop on the scale currently proposed.

We are concerned that insufficient attention has been paid to cumulative impacts with constraints considered separately for each site.

In view of the extent of physical and policy constraints, the inflated SHMA figure, and the transport evidence indicating that the Plan would lead to congestion, the OAN figure should be 500 homes per annum and the housing target after the application of constraints should be in the range of 250 homes per annum and kept under regular review.

GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation.

GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.

GBC has proposed an OAN of 693 houses per annum in the GL Hearn Strategic Housing Market Assessment (SHMA) which we consider unsound.

Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018. This is coincident with the start date of some developments and consequently too late.

Attached documents:

Comment ID: SQLP16/1795  Respondent: 8839041 / Jon Maslin  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness
Answer: ()
I object

The plan is not so much positively prepared as avariciously prepared. I do not consider that it is reasonable to take on unmet need from neighbouring authorities, which have given greater protection to their Green Belt if it means our own is compromised on the scale being put forward.

I believe that constraints should be applied to the housing target, which we understand equates to the objectively assessed need (OAN) as no reasonable constraints have been applied. The constraints that could and should be applied are Greenbelt and considerable infrastructure issues. The solutions suggested to accommodate the inordinate levels of growth are both inadequate and costly and the net result will be serious debt for many years if not generations.

It was recommended by landscape consultant Alison Farmer Associates that the area known, as Blackwell Farm should be considered in the AONB boundary review, yet it was omitted in Surrey CC’s landscape evaluation. This meant the Parish Councils of Worplesdon, Compton and Wanborough had to fund an independent review to ascertain whether the area was a contender for AONB classification. The survey was carried out by in May 2016 by Land Management Services Ltd, which concluded that most of the 265 hectare farm was of a landscape and scenic quality that merited inclusion within Natural England’s revised Surrey Hills AONB boundary.

It raises serious question about the soundness of the evidence base when Surrey CC says that it only has to account for evidence submitted and not for that omitted? The area within the proposed development site at Blackwell Farm should now be considered by Surrey Hills as part of the AONB boundary review and land to the west should remain undeveloped, as it is important to the setting of the AONB.

The plan is not justified. Residents groups have suggested other strategies but these have not been tested or considered against the current trajectory, which has remained largely unchanged since day one.

Many aspects of the Plan were strongly objected to in 2014 and not only have these points been ignored, they have in fact been embellished or made worse. I refer to the points that GBC referred to in their own summary, which stated that most people objected to the scale of development and the harm to the Green Belt. At that time there were 4 strategic sites and now there are 5. At that time approx 50% of development was in Green Belt and now it is 66% with only 34% on previously developed sites. 58% of development is on just 5 sites.

A more realistic appraisal of the town centre with more multi-storey car park development and less retail would make way for a greater percentage of housing in the town centre, which is after all the most sustainable and sought after area. Additionally, greater pressure must be placed on the University to house more students at Manor Park in order to free up affordable rented accommodation in the town for key workers.

There is a conflict of interest when the developer (University) drags its feet over the provision of promised student accommodation (thereby putting pressure on the housing market) whilst at the same time seeking permission to build 1,800 new homes to help Guildford’s need? The University is at least five years behind with programme of building student residences and staff housing. It is widely agreed among residents groups that the University must fulfil all of its current building plans and substantially increase the proportion of students on campus. If the University built the outstanding units, the housing need would reduce substantially yet much of this is omitted from the outstanding permissions list?

GBC has approached development without applying constraints that are applicable such as Green Belt and infrastructure. It is wholly inappropriate to build a Plan without constraints when there is widespread opposition to this approach. Furthermore, there are serious doubts over the validity of the objectively assessed housing need. Housing need underpins the entire plan, and we are being asked to accept the figure of 693 on trust. Without an understanding of the methodology behind the OAN, the public cannot ‘buy into’ this figure, especially as it has been illustrated by two reputable professionals that there have been errors such as 'double accounting', which has resulted in uplift. Both consultants have concluded that a more accurate figure would be around 500 new homes pa and the most recent one, which was done in pre Brexit -June 2016 acknowledges that due to the high number of International students here in Guildford a student SHMA would better inform this plan. Both consultants feel that the current SHMA is flawed and that the OAN of 693 is too high. These reviews will be submitted by CPRE and the GRA and we support the findings of both.
Putting 58% of development on 5 sites, which are within the Green Belt, or largely within the Green Belt, is not consistent with national policy. The definition of ‘exceptional’ is forming an exception or rare instance; unusual; extraordinary. What possible exceptional circumstances can justify 3 sites of approx 2,000 each and two of 1000 each, on Greenbelt. This makes a mockery of the term ‘exceptional’?

The plan has a maximum number and a hefty buffer. It has underestimated windfalls and overestimated need. It is likely therefore that if one of the major sites fails to come through, the Plan could still succeed in terms of numbers, but would fail in terms of impact on infrastructure and reliance on aspirational, but distant ‘yet to be discussed’ schemes such as railway stations, making the plan undeliverable. If more people are not given the opportunity to live in Guildford town, the night time economy cannot grow and if the gamble to use 40% of the land for retail fails, shops will close and we will have created a leafy green ghost town, whilst the villages outside the town will have changed beyond all recognition as the impact of urban sprawl takes its toll.

The plan puts many eggs into 5 baskets with 58% of all development on just 5 sites. If these are not deliverable, the plan will fail. This strategy has been roundly criticised by Inspectors in other parts of the country.

Taking on such a high OAN without scrutinising it and then taking land out of Green Belt to fulfil it, and using developer funding to secure infrastructure (which reduces significantly the proportion of affordable housing delivered) is destructive and risky.

**It is inconceivable that 5 sites between 1,100 and 2,000+ each can be built on Green Belt land without affecting the purposes of the Green Belt.**

AONB should be given the highest protection. Despite being put forward for AONB review Blackwell Farm was omitted and an independent consultant had to be commissioned by local parish councils. The findings showed that the area met Natural England’s latest criteria for AONB and should not therefore be developed but should instead be properly recognised.

The proposal at Blackwell Farm has been reduced from 2100 to 1800 to take account the impact on future AONB or for views in and out of the existing and future AONB from public areas as determined by planning policy. It is feared that if this site were approved and if access could be made possible without causing serious problems to the surrounding road network, that the AONB in this location would undoubtedly be destroyed.

GBC argues that it is necessary to remove more than 1.6% of its 89% Green Belt and to remove more than 6% of its Green Belt from villages (by way of insetting) in order to meet its need, yet at the same time the Council advocates making an additional area Green Belt? The area of land being put forward for inclusion within the Green belt is on the same ridge as two areas of Green Belt it wishes to remove (Normandy & Blackwell Farm). This approach lacks consistency.

Cllrs Paul Spooner and Matt Furniss have stated clearly that there will be no development without supporting infrastructure and that the infrastructure must come before, or alongside, development. It is difficult to see how this will materialise as developers’ CIL contributions (which will fund infrastructure) are paid from profits made from the development. This statement appears to be unenforceable and could offer false reassurance to residents who may support the Plan on this basis.

Developers are being asked to fund large amounts of infrastructure. They will offset this against any agreement for affordable housing and it is highly possible that affordable housing will not be built or that only a small proportion will be built. This was one of the key drivers and is factored into the housing need, yet may not be delivered. Where is the general analysis to see what level of affordable housing might actually be delivered given the level of infrastructure needed to implement this level of development on new sites?

The omission of the Town Centre Master Plan (on the basis that this has different timescales) invalidates two key components of the Plan - the Infrastructure and Highways assessments. The suggested road closures in the town centre and the resulting re-routing of traffic should be factored into the highways assessment, but they are currently omitted. The consequences of this could render the whole Plan undeliverable and I don’t believe the Plan can be approved without factoring in the Town Centre Master Plan.
GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA), which CPRE and GRA consider unsound. The methodology for the uplift and assumptions made have not been made available and thus the openness and transparency required for public understanding as outlined in the NPPF has not been adhered to.

I understand that Highways England will not start to consider its intentions as regards the A3 in the vicinity of Guildford until 2018. It is difficult to see how plans can be approved without the inclusion of this information.

Network Rail has not made available for the public consultation any plans for a new railway station at Merrow, nor have we been told where the station car park would be situated nor how the railway bridge between Merrow and Burpham would be re-constructed to take the additional traffic. Likewise, there are no detailed plans for the railway station at Park Barn and Network Rail has not confirmed the status of either. These schemes must have a sounder footing to be included in the Plan if they are to be used to justify large developments nearby.

The access to, and from, Blackwell Farm (via the A31) has not been thought through. There proposed new route will likely be used as a rat run to the A3/Guildford, but this will put pressure on a congestion hot spot, and result in increased traffic at the Compton turn-off and Down Lane (home to Watts Gallery). It is also recognised that congestion at the Tesco roundabout will be made worse and this area is already subject to considerable problems. Additional traffic via the business park from Blackwell Farm will add to congestion at the Egerton roundabout and impede access for emergency services to the hospital.

The proposal at Blackwell Farm has been reduced from 2100 to 1800 to take account of the AONB, but this does not account for views in and out of the AONB from public areas.

The greenbelt sensitivity study is not objective. The reference to Blackwell Farm as ‘South West Guildford Urban’ is totally misleading as it is unadulterated countryside that fulfills all the purposes of Green Belt. I consider this Study, which was the subject of much criticism in the last plan, to be flawed, yet it remains in this Plan. Why?

The damage caused to the Green Belt by the addition of Blackwell Farm would outweigh benefits gained from development, as there is ample space and lapsed planning permission on the existing Manor Park land for development for student accommodation, which would free up affordable rented accommodation in the town.

The proposal for Garlic Arch was added to the draft Local Plan without any consultation under Regulation 18.

No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Guildford citizens.

No land has been safeguarded for a tunnel, which would show a real intent.

This consultation included ‘significant changes’ according to GBC, although most residents would strongly dispute this. Some key reports were added and 6 weeks was not long enough to properly digest the information and impart this to residents. Many additional questions had to be asked and many points required clarification, which essentially meant adequate information, was not made available until two thirds of the way through the consultation.

The level of objection at the 2014 consultation was considerable - these objections have NOT been dealt with, but have been carried through to a regulation 19 consultation, undeterred. This is not in the spirit of Localism or the NPPF.

<tr>
<td>Answer:</td>
<td>(No)</td>
<td></td>
</tr>
</tbody>
</table>
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites–which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and
foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Comment ID: SQLP16/443  Respondent: 8843361 / Adrian Atkinson  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: (No)

No the plan is Unsound

 Lets take a step back and look at the bigger picture. The plan is to plan for the sustainable development needs of the borough. Now given that the borough is a physically constrained being a gap town set in the Surrey Hills AONB with 89% of land in the Metropolitan Green Belt. Large parts are affected by the Thames Basin Heath Special Protection Area. There are also notable areas of river, surface water, groundwater and surface water flood risk. Constricted road and rail routes converge to cross the ‘downs’ seeking to avoid both high ground and floodplain. These compete with housing for land and there is no space for road widening or a conventional ring road approach.

Any right minded person, when reading the NPPF as a whole would have to conclude that given this helicopter view the housing target has to be lower than a “objectively assessed need” if there are valid constraints. It is perverse and “policy on” that GBC have failed to apply any reduction in the OAN. Any reasonable person has to concluded that the plan will be undeliverable and unsound.

Each element has been treated in isolation with no regard to the culmulative impact; it is a bunch of players but not a team capable of winning the cup.

Despite warnings and advice from bodies and public, GBC have taken the SHMA as correct but I an others consider it flawed. They have refused to truly understand the drivers of that SHMA and satisfy themselves the numbers are correct.

A key infrastructure constraint on the borough andits wider environs is the A3. The GBC have made it clear that without infrastructurte improvements, the delivery proposed cannot go ahead. With Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018. This is coincident with the start date of some developments and consequently too late. For that simple reason the plan is unsound.
the current plan has not taken into consideration comments taken in Reg 18 consultation - for example of the 21 supportive Green Belt policy responses out of the 20,000 only 6 individuals agreed with the policy with the rest being developers, GBC, landowners in the plan or consultants.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness
Answer: ()

Guildford is physically constrained being a gap town set in the Surrey Hills AONB and in Metropolitan Green Belt. Significant parts are affected by the Thames Basin Heath Special Protection Area. There are also notable areas of river, surface water, groundwater and surface water flood risk. Constricted road and rail routes converge to cross the downs seeking to avoid both high ground and floodplain. These compete with housing for land and there is no space for road widening or a conventional ring road approach. The Local Plan process envisages that the housing target should be lower than the “objectively assessed need” if there are valid constraints. GBC have failed to apply any reduction which makes the plan undeliverable and unsound. I believe it would be harmful to the character, quality of life and economy of Guildford not to reduce the housing figure to a number significantly below 13,860 new homes by 2033. I submit it would be counter to sustainable development as a whole (in particular to living within environmental limits and achieving a sustainable economy) and contrary to policy to develop on the scale currently proposed. I am concerned that insufficient attention has been paid to cumulative impacts with constraints considered separately for each site. In view of the extent of physical and policy constraints, the inflated SHMA figure, and the transport evidence indicating that the Plan would lead to congestion, the OAN figure should be 500 homes per annum and the housing target after the application of constraints should be in the range of 250 homes per annum and kept under regular review. The National Planning Policy Framework requires that objectively assessed needs should be met unless: “any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; or specific policies in this Framework indicate development should be restricted.” The specific policies described include several of particular relevance to Guildford including sites protected under the Birds and Habitats Directives, Sites of Special Scientific Interest, Green Belt, Local Green Space, Area of Outstanding Natural Beauty, designated heritage assets and locations at risk of flooding. Anybody with knowledge of Guildford would have to conclude that the housing target should be lower than the OAN with this constraints. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation. GBC has proposed an OAN of 693 houses per annum in the GL Hearn Strategic Housing Market Assessment (SHMA) which is unsound. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018. This is too late!

Answer: (Yes)

Let's start building new houses and ignore the nimbys.

Attached documents:

Comment ID: pslp17q/145  Respondent: 8852097 / Tim Greenland  Agent:
I do not believe that the proposed submission is sound and OBJECT TO NO CHANGES BEING PROPOSED SINCE THE 2016 CONSULTATION TO INSETTING WEST AND EAST HORSLEY FROM THE GREEN BELT for the following reasons:

The housing targets are significantly over estimated and not supported by objective evidence.

The West Horsley development sites proposed do not meet national policy requirements in terms of sustainability. The roads are already far busier than their capacity allows and they are in appalling condition. I live less than a mile from my local school (The Raleigh) and can't get my children places and so they have to be driven 250 miles per week to separate schools in different directions. The medical centre is under significant pressure due to weight of numbers. The impact on already overstretched roads and services appears to have been completely ignored.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: ()

I object to the Local Plan and consider that the Local Plan is unsound.

Guildford is physically constrained being a gap town set in the Surrey Hills AONB and in Metropolitan Green Belt. Significant parts are affected by the Thames Basin Heath Special Protection Area. There are also notable areas of river, surface water, groundwater and surface water flood risk. Constricted road and rail routes converge to cross the downs seeking to avoid both high ground and floodplain. These compete with housing for land and there is no space for road widening or a conventional ring road approach.

The Local Plan process envisages that the housing target should be lower than the “objectively assessed need” if there are valid constraints. GBC have failed to apply any reduction. I consider this makes the plan undeliverable and unsound. I believe it would be harmful to the character, quality of life and economy of Guildford to apply the housing figure to a number of 13,860 new homes by 2033. I submit it would be counter to sustainable development as a whole (in particular to living within environmental limits and achieving a sustainable economy) and contrary to policy to develop on the scale currently proposed. We are concerned that insufficient attention has been paid to cumulative impacts with constraints considered separately for each site.
In view of the extent of physical and policy constraints, the inflated SHMA figure, and the transport evidence indicating that the Plan would lead to congestion, the OAN figure should be **500 homes per annum**. After application of constraints the target should be in the range of **250 homes** per annum and kept under regular review.

The extent to which the Sustainability Appraisal fails to test the sustainability of the spatial options in a meaningful way casts doubt over whether sustainability has been assessed. The report treats various major development sites in Green Belt, contrary to the importance attached to protecting Green Belt, as “a given”, fails to consider options that constrain development or that make greater use of brownfield or previously released greenfield land, focuses on a range of options that involve developing on even more Green Belt around Guildford in order to protect Green Belt around Woking, does not consider environmental limits or impact on the next generation in terms of weighing demand for homes for the young alongside the use of all possible last resort greenfield options by one generation.

The National Planning Policy Framework requires that objectively assessed needs should be met unless: “any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; or specific policies in this Framework indicate development should be restricted.”

The specific policies described include several of particular relevance to Guildford including sites protected under the Birds and Habitats Directive, Sites of Special Scientific Interest, Green Belt, Local Green Space, Area of Outstanding Natural Beauty, designated heritage assets and locations at risk of flooding. In this situation, we would question whether it is appropriate for the Appraisal to propose meeting needs in full from a sustainability perspective.

Notwithstanding guidance that the Sustainability Appraisal should be proportionate, strategic and look at significant matters, the assessment appears deficient and biased in the spectrum of alternatives it considers to the point that it is questionable whether it meets the requirements.

GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation.

GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.

GBC has proposed an OAN of 693 houses per annum in the GL Hearn Strategic Housing Market Assessment (SHMA) which we consider is unsupported.

Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018. This is too late.

1 SUMMARY

1.1 I object to the Guildford Borough Council (GBC) Regulation 19 draft plan 2017 because it is not sound and the changes do not take account of my previous objections or indeed the 32,000 other valid objections that are shown on the GBC website and made to the previous 2016 version.

1.2 I have focused, as requested, on changes to which I find reason to object but this also includes some deletions which lack acceptable justification.

1.3 I request a confirmation by email from GBC that all of the objections to changes made below are put to the Inspector appointed by the Secretary of State to review the GBC Regulation 19 local plan 2017 and that all my previous objections to the 2016 draft plan will be placed before the inspector.
1.4 I request again that once my objections are fully taken into consideration the draft plan is amended accordingly and re-issued before it is submitted to the Inspector.

1.5 I am of the opinion that if it is submitted in its current form it will be in risk of being summarily dismissed and put back to the Council for resubmission.

1.6 Guildford is a constrained borough by the reality of having 89% of its area zoned as permanent Green Belt and an out of date road network that is already at capacity. I am concerned that GBC have, in this latest Local Plan, adopted a lower but still grossly inflated OAN of 12,426 homes as a housing target without any application of constraints as required under the National Planning Policy Framework and the National Planning Policy Guidance.

1.7 70% of the new development proposed in this plan is in the permanent Green Belt which was coincidentally invented in Guildford under a private Act of Parliament in 1938. It is perhaps ironic that the process of Town and Country planning has become a type of Town v. Country debate. This is too much of an imbalance and more housing should be allocated to Town and Brownfield sites such as the substantial amount of surface land devoted to car parks in the Borough which could be built over.

1.8 The population in the borough is split equally between town and country but Guildford town has developed very little over the last 20 years and has not undergone the type of normal urban expansion, redevelopment of previously developed sites and increase in residential densities as nearby towns such as Woking have experienced. It is informative that Woking is currently outperforming Guildford in terms of economic performance.

1.9 It is interesting to note that urban densities in Guildford town are no higher than the villages that surround it. Even though the latter are in the main in the Green Belt which is protected from development and the former is in an area where there is no presumption against development. I am of the opinion we need a rebalancing between town and country and much more development in Guildford town, particularly residential development and the provision of truly affordable housing.

1.10 In the latest plan only 1,300 homes are going to be built in Guildford town which is some 10% of the total development proposed. It is very disappointing that GBC fail to set higher densities for the urban area and have in this latest draft deleted all reference to “density for development” which is normally an integral part of forward planning and development control.

1.11 GBC still fail to acknowledge that the application of constraints to housing need in respect of the Green Belt is a sensible and practical approach to development within the borough and is not only what they have done in the past in previous plans but is also what its neighbouring local planning authorities have done.

1.12 The current scale of the housing number proposed in this plan, which is based on a flawed SHMA, inevitably increases the onus for the plan to be seen to be sound. A substantially lower number of 4,000 homes, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

1.13 I am concerned that GBC have still failed to grasp the opportunity of following clear government policy to develop in the urban area on previously developed sites. Many of these sites are in their ownership and it would seem a practical and readily achievable alternative which is much more acceptable to local residents.

1.14 In my opinion much of the updated local plan still appears to be based on out of date thinking. It is like a voice from the past. Current trends in terms of property development such as the marked decline in town centre shopping centres and the need to create modal shift by developing residential uses close to transport hubs appear to have been overlooked.

1.15 Unsupported assertions that there is real demand for the expansion of retail, industrial or office space lack credibility especially in the absence of significant planned expansion of residential development in the town centre which is universally acknowledged as a key stimulant for urban economic health.

1.16 There would appear to be two worrying examples where GBC are taking the role of “developer/landowner” rather than “independent not for profit public sector planner” in so far that they have a pre-determined agenda for building on
the Green Belt rather than acting as careful, professional and responsible planner guardians. Example 1: Policy A43 Garlicks Arch Burnt Common. The stated, albeit unproven, need by GBC is 400 homes. Normal residential density is 30 homes per ha. Land required would therefore be 13 ha. Land actually proposed to be allocated is 28.9 ha. This is more than double the land required in beautiful irreplaceable Green Belt. Example 2: Burnt Common Policy A 53. The stated, albeit unproven need, is 7,000 sq m B1c, B2 and B8 development. Normal density 50% plot ratio. Land required 1.4 ha. Land allocated 9.26 ha. This is more than six and half times more land than necessary in valuable Green Belt which the planners should be looking after.

1.17 I regret that my conclusion is that this plan is a clear example of bad planning.

Comment ID: pslp17q/491  Respondent: 8858113 / Ramsey Nagaty  Agent:

Answer: (No)

3 WHY THIS PLAN IS STILL UNSOUND
3.1 Guildford is physically constrained being a gap town set in the Surrey Hills AONB and in Metropolitan Green Belt. Significant parts are affected by the Thames Basin Heath Special Protection Area. There are also notable areas of river, surface water, groundwater and surface water flood risk. Constricted road and rail routes converge to cross the downs seeking to avoid both high ground and floodplain. These compete with housing for land and there is no space for road widening or a conventional ring road approach.

3.2 The Local Plan process envisages that the housing target should be lower than the “objectively assessed need” if there are valid constraints. GBC have failed to apply any reduction which makes the plan undeliverable and unsound. I believe it would be harmful to the character, quality of life and economy of Guildford not to reduce the housing figure to a number significantly below 12,426 new homes by 2034. I submit it would be counter to sustainable development as a whole (in particular to living within environmental limits and achieving a sustainable economy) and contrary to policy to develop on the scale currently proposed. I am concerned that insufficient attention has been paid to cumulative impacts with constraints considered separately for each site.

3.3 In view of the extent of physical and policy constraints, the inflated SHMA figure, and the transport evidence indicating that the Plan would lead to congestion, the OAN figure should be 400 homes per annum and the housing target after the application of constraints should be in the range of 200 homes per annum and kept under regular review.

3.4 The extent to which the Sustainability Appraisal fails to test the sustainability of the spatial options in a meaningful way casts doubt over whether sustainability has been assessed. The report treats various major development sites on the Green Belt, contrary to the importance attached to protecting Green Belt, as “a given”, fails to consider options that constrain development or that make greater use of brownfield or previously released greenfield land, focuses on a range of options that involve developing on even more Green Belt around Guildford in order to protect Green Belt around Woking and Ash, does not consider environmental limits or impact on the next generation in terms of weighing demand for homes for the young alongside the use of all possible last resort greenfield options by one generation.

3.5 Policy in relation to sustainable development has been changed in a way that runs counter to GBC’s previous predetermined agenda for building on the Green Belt.

3.6 Under newly amended para 4.1.4 It is stated that "Local Planning Authorities are encouraged to include a policy within their Local Plan that embraces the presumption in favour of sustainable development. Policy S1 meets this requirement and adopts the model wording suggested. When implementing Policy S1, local circumstances will be taken into account to respond to different opportunities for achieving sustainable development. In accordance with the NPPF, the PRESUMPTION WILL NOT AUTOMATICALLY APPLY to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding. The National Planning Policy Framework requires that objectively assessed needs should be met
unless: “any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; or specific policies in this Framework indicate development should be restricted.”

3.7 Under this amended policy it is clear that the OAN should be constrained.

3.8 The specific amended policy described above is of particular relevance to Guildford including sites protected under the Birds and Habitats Directives, Sites of Special Scientific Interest, Green Belt, Local Green Space, Area of Outstanding Natural Beauty, designated heritage assets and locations at risk of flooding. In this situation, is it appropriate for the Appraisal to rule out not meeting needs in full from a sustainability perspective?

3.9 Notwithstanding that the Sustainability Appraisal should be proportionate, strategic and look at significant matters, the assessment appears deficient and biased in the spectrum of alternatives it considers to the point that it is questionable whether it meets the requirements.

3.10 The plan fails to produce a coherent development strategy for Guildford Town. GBC has deleted its independently commissioned Town Centre Master Plan by the well renowned firm of architects and master planners Allies and Morrison as a source document from the plan even though this master plan was previously well publicised and enthusiastically adopted by the Council.

3.11 Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2020. This is too late!

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

**Answer:**

I do not consider the Proposed Submission Local Plan: strategy and sites “as a whole” to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green” Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.
5. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the
6. The housing number is at least twice the achieved rate of building in the Borough over the last few There is no evidence in the Plan to show that this rate is achievable and sustainable.
7. Much of the infrastructure required to support the level of development proposed is outside the Council’s The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

8. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

9. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation

10. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation

11. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound

12. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018

13. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars and there is no indication that Network Rail has any intention whatsoever of building a station at this

14. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham

15. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy

16. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation

17. The proposal to change village settlement boundaries was added to the draft Local Plan without any prior

18. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

1. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale

2. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

3. I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councillors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn

4. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley

5. Cast iron commitments should be included in the plan that development can only commence when required infrastructure improvements, including commitment from Network Rail to build a new station at Merrow, have been

6. The status of the text which accompanies each policy box is not If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Attached documents:
I do not consider the Proposed Submission Local Plan: strategy and sites (2017) as a whole is sound.

Guildford is physically constrained being a gap town set in the Surrey Hills AONB and in Metropolitan Green Belt. Significant parts are affected by the Thames Basin Heath Special Protection Area. There are also notable areas of river, surface water, groundwater and surface water flood risk. Constricted road and rail routes converge to cross the downs seeking to avoid both high ground and floodplain. These compete with housing for land and there is no space for road widening or a conventional ring road approach.

The Local Plan process envisages that the housing target should be lower than the “objectively assessed need” if there are valid constraints. GBC have failed to apply any reduction which makes the plan undeliverable and unsound. I believe it would be harmful to the character, quality of life and economy of Guildford not to reduce the housing figure to a number significantly below 12,426 new homes by 2034. I submit it would be counter to sustainable development as a whole (in particular to living within environmental limits and achieving a sustainable economy) and contrary to policy to develop on the scale currently proposed. I am concerned that insufficient attention has been paid to cumulative impacts with constraints considered separately for each site.

In view of the extent of physical and policy constraints, the inflated SHMA figure, and the transport evidence indicating that the Plan would lead to congestion, the OAN figure should be 400 homes per annum and the housing target after the application of constraints should be in the range of 200 homes per annum and kept under regular review.

The extent to which the Sustainability Appraisal fails to test the sustainability of the spatial options in a meaningful way casts doubt over whether sustainability has been assessed. The report treats various major development sites in Green Belt, contrary to the importance attached to protecting Green Belt, as “a given”, fails to consider options that constrain development or that make greater use of brownfield or previously released greenfield land. focuses on a range of options that involve developing on even more Green Belt around Guildford in order to protect Green Belt around Woking does not consider environmental limits or impact on the next generation in terms of weighing demand for homes for the young alongside the use of all possible last resort greenfield options by one generation.

Policy in relation to sustainable development has been changed in a way that runs counter to GBC’s previous predetermined agenda for building on the Green Belt.

Under newly amended para 4.1.4 It is stated that "Local Planning Authorities are encouraged to include a policy within their Local Plan that embraces the presumption in favour of sustainable development. Policy S1 meets this requirement and adopts the model wording suggested. When implementing Policy S1, local circumstances will be taken into account to respond to different opportunities for achieving sustainable development. In accordance with the NPPF, the PRESUMPTION WILL NOT AUTOMATICALLY APPLY to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding. The National Planning Policy Framework requires that objectively assessed needs should be met unless: “any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; or specific policies in this Framework indicate development should be restricted.”

Under this amended policy it is clear that the OAN should be constrained.

The specific amended policy described above is of particular relevance to Guildford including sites protected under the Birds and Habitats Directives, Sites of Special Scientific Interest, Green Belt, Local Green Space, Area of Outstanding Natural Beauty, designated heritage assets and locations at risk of flooding. In this situation, is it appropriate for the Appraisal to rule out not meeting needs in full from a sustainability perspective?
Notwithstanding that the Sustainability Appraisal should be proportionate, strategic and look at significant matters, the assessment appears deficient and biased in the spectrum of alternatives it considers to the point that it is questionable whether it meets the requirements.

The plan fails to produce a coherent development strategy for Guildford Town. GBC has deleted its independently commissioned Town Centre Master Plan by the well renowned firm of architects and master planners Allies and Morrison as a source document from the plan even though this master plan was previously well publicised and enthusiastically adopted by the Council.

Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2020. This is too late!

Comment ID: pslp17q/516  Respondent: 8865377 / Angus McIntosh  Agent:
Answer: (No)

It would appear the Local Plan ignores the NPPF Paragraph 182.

It is very doubtful whether the Local Plan is legally sound, as key evidence is clearly missing from the document, including a full open assessment of alternative town centre and traffic proposals put forward, such as the DETAILED analysis by the Guildford Vision Groups. Whilst GVG have had a series of open forum public meeting over FIVE years, GBC have held none! Why not? Having an occasional GBC "shop", staffed by poorly informed operatives, is not useful.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness
Answer: ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green” Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial
Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.
5. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
6. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
7. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
8. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
9. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
10. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
11. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open

Green Belt countryside in clear conflict with the National Planning Policy Framework

1. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
2. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
3. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
4. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
5. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
6. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness
Answer: ()

In summary, the National Planning Policy Framework (NPPF) requires that new residential developments MUST respect the character and density of housing in the area and be limited in quantity by the availability of infrastructure and local facilities. Taking into consideration the points I have raised in my objection, it is clear that NONE of this is being taken into account, particularly with regard to West Horsley, and the proposed high density developments are unbalanced and unsustainable and will dramatically change the character of our village forever. All of this is combined with the dubious legality of removing the villages from being washed over by the Green Belt.

I therefore STRONGLY OBJECT to the Proposed Submission Local Plan: Strategy and Sites June 2016 as many aspects are, in my opinion, unsound and damaging to the villages of East and West Horsley and our community.

Please consider my comments and revise the Proposed Submission Local Plan accordingly.

<td></td>
</tr>
<tr>
<td>A fundamental flaw was the presumption of GBC that it would need to build on the Green Belt to meet its housing target. This presumption has led to building on the Green Belt becoming the main focus for development. The Town Centre Plan is incomplete.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
GBC hopes to remain an historic county town and be a centre for technological industry at the same time. In my view, to achieve this it would need to have a top quality medium rise (4-5 story) technological centre, with workplaces, retail, leisure and flats, in an area offset from the town centre, Slyfield or somewhere similar. This would enable people to live and work sustainably, with the Green Belt countryside available for farming, wildlife, tourism and leisure, and the historic town centre for retail, tourism, housing, particularly more one and two bedroom flats, and leisure. It would also be cost-effective and sustainable, as there would be less need for expensive upgrades to transport infrastructure, as fewer people would be travelling in from the villages.

Taller buildings in Guildford will have to come, if not in this Plan, then in the next, or the one after. How much more far-sighted it would be if thought was given now on where taller buildings could be sited, and to use the Green Belt for the purpose for which it was intended.

A second fundamental flaw is the amount of infrastructure improvement required to deliver the Plan, much of which is unfunded. Some improvements are dependent on external providers, the Highways Agency, Surrey County Council and Network Rail, who may have different priorities. However, I applaud GBC for tackling the problems that Guildford has with its transport infrastructure.

A third fundamental flaw is the amount of extra infrastructure developers are expected to fund. The bulk of these costs incurred by developers will be passed on to property buyers, driving house prices higher.

The plan is not sound in places. I would draw your attention to:

**Duty to co-operate**

I can see no evidence that GBC have co-operated fully with Rushmoor Borough Council (RBC) and Surrey Heath Borough Council. Both the Aldershot Urban Extension (AUE) in Rushmoor and the Princess Royal Barracks (PRB) in Surrey Heath will impact on GBC’s transport strategy and housing numbers. Although both Authorities are mentioned in the West Surrey SHMA, it is not clear where data concerning these sites has been fed into Housing policies. Nor is it clear that GBC have a cross-border Transport Strategy to deal with traffic flow from the AUE and PRB.

**Evidence**

See below, Transport Strategy and Settlement Hierarchy & Settlement Profiles

**Late inclusion of Policies A43 and A46**

These sites were not included in the last version of the Plan. They were not announced until April 2016. This is the first time residents have been able to comment on them, and have had very little time to consider their responses. GBC have been aware of A46 since 2014. Cllr Paul Spooner had the opportunity to engage with Normandy residents on A46 when he addressed Normandy residents in February 2016, but chose not to take it. The NPPF is quite clear that there should be early and meaningful engagements with residents.

**Failure to meet the principles of the NPPF**

There are places where the GBC Submission Local Plan does not meet the principles set out in the NPPF. I have described some of them in comments on individual policies below.

However, in particular, I consider that GBC have not met either its own policies on Biodiversity, found in Policy 14, nor those of the NPPF section 11. There will be a significant net loss of Biodiversity if this Plan goes ahead in full. The GBC Spatial Vision states “Over 250ha, equivalent to more than 350 football pitches, will be provided in perpetuity for the use of residents and visitors. This space will also support and improve the borough’s biodiversity”. This is disingenuous. GBC plans to use 467ha of land that is either farmland or other green space for building. Against this it is creating 249.8ha of mixed use Suitable Alternative Greenspace (SANG) a net loss 218.2 ha of fields and other green space.

**Attached documents:**
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

“Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.

GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound.

Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars.

The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.
The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation

2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation

3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound

4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018

5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars

6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented counselors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: ()

24.C. Question 3: Soundness

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound? Please provide the following information being as precise as possible:

• why you consider it is or is not sound and
• what change(s) (if any) you consider necessary to make it sound, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
1. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

1. The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites- which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

1. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

1. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

1. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation

1. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation

1. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound

2. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018

1. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars

2. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham

3. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework

4. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation

5. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involve These include Electricity Grid supply problems and foul
sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

6. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

7. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

8. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation.
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound.
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018.
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars.
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. I do not believe the draft plan accords with the NPPF policies on protecting the Green Belt.

14. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not itself a very special circumstance justifying an indiscriminate removal of sites from the Green Belt. Having properly calculated a housing needs number, constraints should be applied to it to reflect the Green Belt and AONB. Each proposed Green Belt site then needs to be considered on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances, and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt, can the proposal proceed. The draft plan does not demonstrate that this has been done. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

15. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

16. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Attached documents:
the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

2. ---

**Comment ID:** SQLP16/1698  **Respondent:** 8905537 / Christopher Ross  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

**Answer:** ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.
1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

5. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation

6. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation

7. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound

8. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018

9. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars

10. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham

11. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework

12. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

13. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

14. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens

15. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councillors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
16. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

17. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

18. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

19. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

**Answer:** ()

Question 3: No The Plan is not sound at all. No constraints have been applied to The Plan by Planning Policy. They have not considered the impact on the AONB, the TBHSPA, the Green Belt, the value of agricultural land, the road network, lack of infrastructure, flooding. None of these factors have considered. The decisions taken by GBC have been made by Planning Policy, not the people of the Borough.
The Plan should have included Rushmoor in its cross-boundary discussions. The 4,000 dwellings and 2 new Primary Schools (former Military Town) will have a massive impact on the west of the Borough and although building has begun in Aldershot apparently the infrastructure proposal are not yet published.

Answer: (No)

Due to the number of errors in the plan, and lack of transparency in the evidence base, the accessibility of the evidence base, including the fact that huge files have again been used and these are not accessible to those with poor internet connections and lack of clarity, I believe that the submission plan is not sound.

In conclusion I consider for many reasons not least those listed above that The Local Plan is unsound and not fit for purpose.

Comment ID: pslp17q/118  Respondent: 8916001 / Ockham Parish Council (Peter Bevan)  Agent:

Answer: ()

Dear Sirs,

UPDATED LOCAL PLAN

Ockham Parish Council (OPC) has reviewed the Updated Local Plan released on 17 May 2017 (the Updated Plan) and wishes to make the following points.

OPC is deeply concerned that with each iteration of the draft Local Plan up to and including the Updated Plan the increasing volume of detailed changes has resulted in some fundamental principles and objectives being lost or obscured.

In preparing this response OPC has therefore focused on examples of basic principle and practical import rather than all the many detailed legal or technical issues - most of which have been raised and responded to previously and which will no doubt be revisited going forward.

The basis of the Updated Plan as a whole

1. The Updated Plan is still based, and indeed in some areas relies even more heavily, on flawed assumptions and approaches. Equally if not more importantly, its overall impact would seem to increase rather than ameliorate some of the adverse consequences stemming from previous versions of the proposed Local Plan. This, to say the least, is disappointing when so much time, effort and cost has been expended not only by GBC but by many other councils, organisations, associations and individuals over the past two or more years.

2. Perhaps one of the most important underlying issues is the failure to take fully into account the reality of the existing physical, geographical, environmental, social and infrastructure constraints in the relatively small and already congested Borough of Guildford, particularly in the north east segment. This does not mean that the Borough has to cease growing or improving but rather the constraints need to be fully recognised and a very delicate balance achieved if the existing benefits and attractions of living, working and visiting the historic Guildford town and some of the loveliest countryside in the South East are to be maintained and enhanced.
rather than damaged or destroyed. It is the quantum and to some extent the location of development rather than the principle of growth which are questionable and unsustainable.

3. Reading and rereading the Updated Plan, OPC is also left with the uncomfortable conclusion that the Plan fails to provide, as a plan should, a practical and sustainable basis on which to progress towards the stated vision. Rather, the Plan seems to be developing a life of its own which is now effectively dictating and changing the The result appears to be a growing disconnect between the “Spatial Vision”, the evidence produced, and the Updated Plan and Policies.

4. Some examples of these flawed assumptions, evidence and approaches are:

- the Green Belt and Countryside Study which does not properly value the objectives or benefits of the Metropolitan Green Belt, or recognise the direct and indirect harm that would result from its diminution. The continued proposed incursions into the Green Belt are unnecessary and misguided. If adopted they would result in unjustified, irreversible and irremediable developments to the detriment of existing and future generations;
- the SHMA’s method of assessment, the omission of a number of relevant inputs, and the conclusion as to the “objectively assessed need” – the last of which at 693 homes is still far too high and is challenged by experts including NMSS;
- the Transport Evidence which was late, is incomplete and not objectively tested, resulting in weak and contestable conclusions and proposals that do not acknowledge let alone address the real underlying problems and constraints, or identify adequate practical solutions or ameliorations (which realistically may in the context of the Plan be physically very limited);
- the unspoken but apparent assumption that the way to resolve problems is to increase them e.g. that the way to relieve congestion is to increase the amount of traffic.

5. Notwithstanding the number of both major and minor changes in the Updated Plan, these and other fundamental flaws and issues from previous iterations remain unrectified and in several respects have actually increased. In OPC’s opinion such flaws and issues, both collectively and in some cases individually, materially undermine the soundness and acceptability of the Plan.

Strategic and Other Sites for Development

1. One prime example of a flawed principle and approach is the over heavy focus on developments in the north east of the Borough, and most particularly the continued inclusion of the former Wisley airfield (FWA), known locally as Three Farms Meadows, as a strategic site for development when it is patently unsuited to such designation.

2. The proposed or potential development of some allocated sites (most particularly the FWA), as envisaged by the Updated Plan, directly conflicts with many claimed aims of that Plan which offers no or inadequate explanation, practical or sustainable solution, or amelioration:

   (1) the claimed aim of conserving and enhancing the Thames Basin Heaths SPA;
   (2) the statement that delivery of allocated sites “is contingent upon the provision of new infrastructure”;
   (3) the acknowledgement that pressures on existing infrastructure and natural environment and additional stress caused by planned growth” must be addressed”.
   (4) the statement that “agricultural land will be protected as set out in national policy and the economic benefits of the best and most versatile agricultural land will be taken into account.”
   (5) the statement that “the NPPF requires that developments that generate significant movement will be located where the need to travel will be minimised and the use of sustainable transport modes can be maximised.”

C. Additionally, the whole concept of “new settlements” such as that proposed for the FWA is unjustified, inappropriate or unsustainable in a relatively small and congested area such as Guildford Borough which has a well established and historic main town, an extensive network of villages and hamlets, and is surrounded by major existing and growing centres such as Woking and Cobham. Even more fundamentally, the FWA is at the centre of that part of the north east of
the Borough which serves as a critically important buffer or lung to a growing greater London – for which the Metropolitan Green Belt was rightly formed and which should be unreservedly protected.

D. The examples quoted in paragraph 4 above and particularly 4(b) in relation to housing need, the change to the end date of the Plan, the lack of justification for even the now reduced buffer over the Plan period, the exclusion of one strategic site (Normandy) and the removal of sites which are more sustainable and more easily developed than FWA, further nullify any rationale for including FWA (A35) in the Plan, given the harm it would cause, and strengthen arguments previously made against development on the FWA, namely:

the FWA:

(a) is at the epicentre of the Metropolitan Green Belt to the south west of London and should remain Green Belt.

(b) contains and is bordered by the Thames Basin Heaths SPA, an SNCI and an SSSI;

(c) is completely surrounded and constrained on the north by the A3 (one of the most congested A roads in the UK), and to the west, east and south by narrow, unlit, non-pavemented, twisting rural lanes (Ockham Road North, Old Lane and Ockham Lane) which can barely cope currently with local access needs;

(d) is immediately adjacent to the A3/M25 junction (one of the most congested and polluted junctions in the UK);

(e) has no existing infrastructure;

(f) is of limited area and only developable anywhere near to the degree envisaged by the Updated Plan through extreme and inappropriate high density, with high rise buildings, etc.

(g) produces run off which floods the surrounding area;

(h) would be serviced by a rail line two miles distant and with small existing rail stations which are already at capacity in terms of car parking and near capacity in terms of existing passenger numbers, before taking into account organic growth generally in the area and specifically proposed developments to the east, west, north and south of the line;

(i) has no existing bus services which are in any event inhibited by the narrow and twisting roads.

(j) is distant from existing centres of employment, services, schools, and shops;

(k) is at the centre of Ockham Parish whose assets are small hamlets surrounded by open attractive country side, recreation opportunities, agriculture and rural pursuits, conservation areas, a cherished history and historic buildings;

(l) would constitute a single, densely packed and unsustainable development which would effectively destroy Ockham. OPC, as evidenced by housing additions over recent years, supports increases in its housing stock proportionate to the size of the village and its tenuous infrastructure. OPC does not however support a development such as that proposed for the FWA which would increase its size and population by over 14 times;

(m) could only be “sustainable” through major and unsustainable if not impractical development in the surrounding area – major additional roads, houses, schools, transport, public and private services, etc., - and the consequential absorption of further Green Belt and greenfield sites as well as potentially the demolition of existing houses and other buildings to accommodate such facilities and access thereto. This fact seems to be gaining growing recognition in the Updated Plan which now envisages concepts such as “District” and “Local Centres”, “Locally Significant Employment Sites” “Transport Hubs/Interchanges”, etc – concepts which in this context appear to be simply euphemisms for development “creep”.

It is also noted that the Updated Plan now unacceptably and without explanation includes within the claimed strategic site for development a significant area of land to the south of the FWA directly bordering and looking directly down on the Ockham Conservation Area. That land is in any event not owned by the developer applicant and is not included in its latest Amended Planning Application. Other changes to the Green Belt boundary are also wholly unjustified.
The above and many other objections and concerns have been raised on numerous occasions by OPC in relation to the Local Plan (e.g. in its letters of 25 November 2013, 24 June 2014, 22 September 2014, 19 April 2016 and 12 July 2016) and in relation to the planning applications for development of the FWA (e.g. OPC’s letters of 6 February 2014, 29 September 2014, 29 March 2015, 29 September 2015, 29 January 2016 and 4 July 2016).

Similar and other objections and concerns were also raised by e.g. Thames Water, Surrey CPRE, Surrey Wildlife, RSPB, RHS Wisley, Wisley Action Group, Elmbridge and Mole Valley Councils, the Parish Councils of East Horsley, West Horsley, East Clandon, Ripley, Send, and Effingham, and many hundreds of other organisations and individuals.

E. As evidenced by these widespread responses to the various iterations of the Local Plan and FWA planning applications, the objections and concerns are by no means limited to the potential adverse impacts on the small hamlets of Ockham but extend to the much wider impacts on the towns, villages, roads, public transport systems, infrastructure and services in the Borough generally and beyond. OPC considers these impacts to have been insufficiently acknowledged or addressed in the Updated Plan. With other existing, underway and proposed developments in the Borough generally and in the north east segment particularly (e.g. Ockham, RHS Wisley, Ripley, Send, Effingham, East Horsley and West Horsley) and neighbouring Council areas, as well as organic growth near and further away, the totality becomes a totally uncoordinated, unsustainable and unacceptable combination – a prime example of trying to cram a quart into a pint pot.

F. It would be enlightening and beneficial to all concerned if GBC and its advisers and consultants truly listened to the people who live and work in the local area, and who through long experience know well its strengths and weaknesses, what it can sustain and what it cannot.

Regrettably, however, most of these objections and concerns have, it seems, been ignored or dismissed without explanation in the Local Plan and in some respects actually increased in the Updated Plan. It is however noteworthy that GBC, citing many similar objections and concerns, refused planning application 15/P/00012 as amended for development of the FWA. Such refusal is currently under appeal and yet a further amendment to the application has recently been submitted.

It is also interesting that in its Sustainability Appraisal (SA) of the Guildford Borough Local Plan: SA Report Update June 2017, AECOM appears reluctant to make any strong recommendations about the FWA (and a number of other issues) but simply comments in somewhat muted terms on GBC’s previously expressed preferences.

G. If by design or default, GBC wishes all or much of the north east of the Borough to lose effective protection of the Green Belt and effectively to become over time another Woking or Kingston, it should admit this now and give its electors and residents the opportunity to take such personal, political, legal and other decisions and actions as they deem appropriate.

The direct and indirect, existing and future, financial costs, uncertainties and frustrations for local residents, agriculture, business, services and other interests relating to these issues should not be underestimated.

OPC therefore:

- has serious and fundamental concerns regarding the soundness of the Local Plan/Updated Plan as it currently stands; and
- specifically requests that the FWA be deleted as a strategic or other site for development and that all references to development at the FWA be removed from the Local Plan/Updated Plan.

Attached documents:

| Comment ID: | SQLP16/1562 | Respondent: | 8919009 / Andrew Kukielska | Agent: | Document: | Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness | Answer: | (No) |
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The OAN OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford’s circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and
foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Attached documents:

Comment ID: pslp17q/424  Respondent: 8920865 / Glen Travers  Agent:

Answer: (No)

Reg 19 Consultation objection and right to comment on broader issues

My first objection is to due process. GBC has claimed a reg 19 consultation. As a result it has requested comments only on changes and referenced to the particular clause. This is a breach of due process because substantial/material changes have been made to the Draft Local Plan including a major change to the OAHN as stated by Councillor Spooner, removal of one of four only strategic sites which impacts all strategic sites, changes (increased withdrawal in many cases) to the greenbelt boundaries and in particular A35 with and without consent from owners, incomplete data sets and a requirement from Highways England as a compromise for their withdrawal of major concerns at the impact of the Plan on Highways on the A3 that infrastructure has to be in place before major developments ‘come forward in advance of critical infrastructure’:

“We note that the delivery of housing in the later stages of the plan period is dependent upon a major improvement to the A3 through Guildford. It is essential that the Local Plan provides the planning policy framework to ensure development does not come forward in advance of critical infrastructure. As a result of clarification received at our recent meeting, it is now understood how the Local Plan intends to do this. Therefore we wish to formally withdraw our representation to this policy. In addition, the early targeted small improvement schemes Identified to deliver road safety and some congestion relief on the A3 through Guildford. are not committed proposals. Therefore they are not schemes that can be relied upon to be delivered within the plan period.”

All of these changes cannot be considered minor and therefore the request to comment only on the change clause itself is not in accordance with the law. The effect of these attempted changes are that the DLP of 2016 must therefore be considered ‘unsound’ to have caused the major changes and therefore it is not a valid reg 19 consultation.

In that case comments should be allowed to any material aspect of the Plan and not just to particular clauses. Generally, it is disappointing to note that the Council has given very little weight to either the councils own refusal of the planning
application on site A35 or indeed to any of the thousands of representations made by ourselves and other members of the public and statutory bodies.

I am of the view that the current consultation cannot legally constitute a regulation 19 consultation for the reasons outlined by Richard Harwood QC in Appendix 1.

1. I object to the fact that there has been no clear explanation from the Council as to why they think it is appropriate to have a regulation 19 consultation when the changes made are major, for example the removal of a strategic site and a reduction in the housing number.

2. I object to the fact that there is no clear explanation why the Plan period has changed particularly as this has not been either justified or clearly identified.

3. I object to the Council wasting tax payers’ and residents’ time and money not following due process and indeed ignoring previous representations.

I continue to have very serious concerns on the soundness of the evidence base and object in the strongest of terms on the proposed submission plan.

</tbody>
</table>

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on...
positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Attached documents:
I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.

I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.

**Comment ID:** SQLP16/804  **Respondent:** 8930209 / Ray Corstin  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

**Answer:** ()

24.C. Question 3: Soundness

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound? Please provide the following information being as precise as possible:

- why you consider it is or is not sound and
- what change(s) (if any) you consider necessary to make it sound, explaining why this is the case.

**ANSWER**

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on...
positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Question 3: Soundness
Answer: No
Comment:

- The Proposed Submission Local Plan is based on flawed evidence (SHMA and SHAR among others).
- There has been insufficient scrutiny of the underlying data and assumptions.
- Insufficient consideration has been given to Green Belt and AONB protection.
- The changes made to the 2016 Plan insufficiently reflect the very many objections / suggestions made as part of the consultation on that Plan.

Attached documents:

Comment ID: SQLP16/1332  Respondent: 8961889 / F Turner  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness
Answer: ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly
calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Comment ID: SQLP16/750  Respondent: 8970785 / Guildford Residents Association (Graham Hibbert)  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness
Answer: ()

1. Question 3: Soundness

Much as I want to have an updated plan in place soonest and regret that we do not have one now, I do not find this draft to be sound because:

- The SHMA has not be adequately prepared; in particular I am not convinced that issue of student movements has been adequately addressed
- The use of constraints to reflect the special nature of our borough has been rejected
- The proposed transport evidence and plans do not appear to be complete or adequate to deal with current problems and the level of growth proposed.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness  

**Answer:** ()

The National Planning Policy Framework (NPPF) and the Tests of Soundness

The NPPF sets out the principal components to be included in local plans. Paragraph 182 requires that in order to be "sound" a DPD should be positively prepared, justified, effective and consistent with national policy.

In order to be justified the DPD must be founded upon a robust and credible evidence base and represent the most appropriate strategy when considered against the reasonable alternatives.

Effective means the document must be deliverable, flexible and be able to be monitored.

The positive preparation test also requires plans to be objectively assess development and infrastructure requirements from neighbouring authorities.

### Comment ID: SQLP16/1932  **Respondent:** 8973537 / D. Connor  **Agent:** Andy Stallan (WYG)

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness  

**Answer:** (No)

Refer to the accompanying separate representation submission document dated 15th July 2016 for details.

### Comment ID: SQLP16/2005  **Respondent:** 8977025 / Sustainable Land PLC  **Agent:** Roger Daniels

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness  

**Answer:** ()

No.

The Local Plan is not sound because of its failure to meet the full objectively-assessed need for housing over the whole of the plan period and its failure to achieve a five-year supply of housing land on adoption of the Local Plan. The Review of Green Belt and Spatial Development Strategy have not been based on giving sufficient weight to meeting the full objectively-assessed need for housing throughout the life of the plan.

### Comment ID: SQLP16/1900  **Respondent:** 8993793 / Berkeley Homes (Southern) Ltd.  **Agent:** The Howard Partnership Trust (Vicky Lochead)

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness  

**Answer:** ()
Answer: ()

Taken as a whole, it is our view that the Proposed Submission Local Plan is fundamentally unsound. At present, the Spatial Strategy and proposed phasing of housing will not deliver Guildford’s Objectively Assessed Need within a reasonable timeframe, if at all. Furthermore, the reliance of the Local Plan on large strategic sites delivered in the latter part of the plan period, for both housing and infrastructure delivery has not been justified against reasonable alternatives. Nor has it been demonstrated to be deliverable and is therefore not effective.

The previous Draft Local Plan (2014), substantially based on the same evidence, allocated Howard of Effingham School, Effingham Lodge Farm and Brown’s Field (Site Allocation 69) to provide homes and an expanded school. This allocation has been removed but in our view remains an appropriate, deliverable and sustainable means of meeting the Borough’s need for new infrastructure and homes.

Our client continues to seek to work constructively with the Borough Council to bring the Effingham site forward and would be happy to discuss any of the above points in more detail.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness
Answer: ()

I object, A44 proposal will have a major negative impact on the area and in particular Send Hill Road and Potters lane and the adjacent homes. The travellers site in particular will have a major negative impact on the area by introducing a significant number of vehicle move, nets, but of a high gross weight on roads that are not designed to take this type of traffic. The number of Lorraine’s, vans, tippers and trades related ancillary equipment will be both an eyesore and a danger to pedestrians and the locals in general.

Attached documents:

Comment ID: pslp17q/352  Respondent: 9062913 / Susan Parker  Agent:
Answer: (No)

(From Summary) I consider it is not sound. The changes do not take account of previous objections including the 32,000 other valid objections that are shown on the GBC website as made to the previous 2016 version. In terms of appraisal of the Local Plan it is vital that those objections are fully regarded, since many have not been taken on board……

(From section “Why This Plan Is Still Unsound”)

Guildford is physically constrained being a gap town set in the Surrey Hills AONB and in Metropolitan Green Belt. Significant parts are affected by the Thames Basin Heath Special Protection Area. There are also notable areas of river, surface water, groundwater and surface water flood risk. Constricted road and rail routes converge to cross the downs seeking to avoid both high ground and floodplain. These compete with housing for land and there is no space for road widening or a conventional ring road approach.
The Local Plan process envisages that the housing target should be lower than the “objectively assessed need” if there are valid constraints. GBC have failed to apply any reduction which makes the plan undeliverable and unsound. We believe it would be harmful to the character, quality of life and economy of Guildford not to reduce the housing figure to a number significantly below 12,426 new homes by 2034. I submit it would be counter to sustainable development as a whole (in particular to living within environmental limits and achieving a sustainable economy) and contrary to policy to develop on the scale currently proposed. I am concerned that insufficient attention has been paid to cumulative impacts with constraints considered separately for each site.

In view of the extent of physical and policy constraints, the inflated SHMA figure, and the transport evidence indicating that the Plan would lead to congestion, the OAN figure should be 400 homes per annum and the housing target after the application of constraints should be in the range of 200 homes per annum and kept under regular review.

The extent to which the Sustainability Appraisal fails to test the sustainability of the spatial options in a meaningful way casts doubt over whether sustainability has been assessed. The report treats various major development sites in Green Belt, contrary to the importance attached to protecting Green Belt, as “a given”, fails to consider options that constrain development or that make greater use of brownfield or previously released greenfield land, focuses on a range of options that involve developing on even more Green Belt around Guildford in order to protect Green Belt around Woking does not consider environmental limits or impact on the next generation in terms of weighing demand for homes for the young alongside the use of all possible last resort greenfield options by one generation.

Policy in relation to sustainable development has been changed in a way that runs counter to GBC’s previous predetermined agenda for building on the Green Belt.

Under newly amended para 4.1.4 It is stated that "Local Planning Authorities are encouraged to include a policy within their Local Plan that embraces the presumption in favour of sustainable development. Policy S1 meets this requirement and adopts the model wording suggested. When implementing Policy S1, local circumstances will be taken into account to respond to different opportunities for achieving sustainable development. In accordance with the NPPF, the PREASSUMPTION WILL NOT AUTOMATICALLY APPLY to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding. The National Planning Policy Framework requires that objectively assessed needs should be met unless: “any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; or specific policies in this Framework indicate development should be restricted.”

Under this amended policy it is clear that the OAN should be constrained.

The specific amended policy described above is of particular relevance to Guildford including sites protected under the Birds and Habitats Directives, Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations at risk of flooding. In this situation, is it appropriate for the Appraisal to rule out not meeting needs in full from a sustainability perspective?

Notwithstanding that the Sustainability Appraisal should be proportionate, strategic and look at significant matters, the assessment appears deficient and biased in the spectrum of alternatives it considers to the point that it is questionable whether it meets the requirements. The plan fails to produce a coherent development strategy for Guildford Town. GBC has deleted its independently commissioned Town Centre Master Plan by the well renowned firm of architects and master planners Allies and Morrison as a source document from the plan even though this master plan was previously well publicised and enthusiastically adopted by the Council.

Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2020.

Attached documents:
I object to a plan which is fundamentally unsound and ill thought through which includes a site which its own planning committee rejected as unsuitable only then to have it put back again in its Local Plan. How can that be rational?

I object to sites being included almost as an afterthought viz Garlick Arch Ripley. This also proposes to access A3 Northbound at Burnt Common disrupting an already congested A3 which is frequently gridlocked and at a standstill particularly in the rush hour. There is no provision in the plan to relieve current congestion of traffic in Ripley. It is a significant fact that there is more traffic flowing through the village now than there was when the case was made for the A3 to bypass the village.

I object to a plan that does not recognise the number of new houses already been and being created by the normal planning process, by discreet infilling and sensible use of space in cooperation and consent of Ripley Parish and residents. This Guildford Plan does not have this. I object to the number of houses proposed for the Ward of Lovelace as a whole which is not proportionate when the plan is viewed over the whole of the Borough. I object specifically to the totally unrealistic number of houses proposed in the ancient village of Ockham which is already prone to flooding and has an inadequate sewage system. I object to the plan which will increase through traffic including HGV’s on country lanes which connect villages in the Horsleys from current level of severe congestion, to one of a level which could only be called dangerous.

I object to the plan which will move public service bus network already considered inadequate for current needs, to one that will be unable to run at all on account of the congestion the plan as proposed will accrue. I object to the totally unrealistic number of houses proposed in areas which harm the AONB and SSSI, particularly the proximity of proposed housing to such sites and seemingly being unaware the havoc domestic animals, particularly cats, will have on ground nesting birds and other wildlife. The Plan allows for areas of beauty on the one hand and seeks to destroy it on the other.

For all these reasons and many others I argue the Plan is unsound.

Attached documents:

---

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper
balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.
The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

**Answer:** ()

**24.C. Question 3: Soundness**

Do you consider the Proposed Submission Local Plan: strategy and sites **as a whole** to be sound? Please provide the following information being as precise as possible:

- why you consider it is or is not sound and
- what change(s) (if any) you consider necessary to make it sound, explaining why this is the case.

**ANSWER**

I do not consider the Proposed Submission Local Plan: strategy and sites **as a whole** to be sound, because, but not limited to, the following reasons:

1. "Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt." Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Attached documents:
(1) The Plan is not consistent with national policy, in the following respect:

- Policies ID2 and A26 particularly would cause substantial deterioration in air quality in Compton, where air quality monitoring shows that NO2 pollution is already (and has persistently been) in breach of legal limits, by attracting additional vehicular traffic through the village to access both the A3 and Blackwell Farm/Surrey Research Park via a new road link from the A31: this is in breach of NPPF paragraph 109 policy for “preventing both new and existing development from contributing to…. unacceptable levels of…. air…. pollution”.

(2) The Plan will not be effective, in the following respects:

- Policy ID2 is unlikely to be deliverable within the Plan period in respect of widening the A3 through Guildford, which is a precondition for implementing Policy A26. Even if it was, it would not meet its own objective of providing appropriate access to the strategic road network to accommodate future planned growth in the form of the Blackwell Farm development – by virtue of generating congestion rather than alleviating it.
- Policy A26 will not be effective because the volume of traffic the proposed Blackwell Farm development would generate on Egerton Road (even if a link road to the A31 is also in place) would cause levels of congestion so high that the network flow would break down in this area, and the Plan proposes no remedy for this.
- Policy A26 will not be effective because the Plan has failed to identify a means of access from Blackwell Farm onto Egerton Road (Infrastructure Requirement (1)), even though this access has been upgraded in the Plan and is no longer ‘secondary’ to the link to the A31; the 1:10,000 plan accompanying the Policy shows no link at all into Guildford.
- Policy A26 will not be effective because Infrastructure Requirement (3) for a controlled road link through the Blackwell Farm development to limit the users of the road will not be implementable in practice.
- Policy A26 will not be effective because the additional road capacity needed to serve the newly proposed secondary school (Allocation item (9)) within the development has not been provided in the Plan and the road network in the area is already modelled to be well over-capacity when Blackwell Farm is developed.
- Policy ID3(3) on developments having regard to the Sustainable Movement Corridor will not be effective in its western section, because either the modal shift will not be pursued vigorously enough to make a significant difference (which appears to be the Local Plan’s preferred strategy), or, if applied with determination (such as by reducing private vehicle lanes in the A3 underpass from four lanes to two) could not be expected by itself to change driver behaviour significantly; in either case the result would be greater congestion on the local road network than it could take after the development of Blackwell Farm.

(3) The Plan is not justified, in the following respects:

- Policy S2 relies on the completion of the widening of the A3 in sufficient time for the proposed numbers of dwellings to be constructed before the end of the Plan period, but this cannot be a justified proposal because there is no certainty at all that the A3 widening will be completed by 2027, if ever; given the difficulty of finding alternative locations likely not to be dependent on capacity increases on the A3, the most appropriate strategy would be to abandon Policy A26.
- Policy A26 would cause the generation of so much traffic (both by itself and by the construction of the A3 without which Policy A26 cannot be implemented) that the local road network could not possibly cope with it, and documents supporting the Plan acknowledge that local roads would be put seriously over-capacity: such an arrangement cannot reasonably be the most appropriate strategy and the Plan is therefore not justified.

Comment ID: SQLP16/470  Respondent: 10570785 / Philip Coleman  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness
Answer: (Yes)

The plan is sound and well balanced. It considers the needs of the borough as a whole and not just the (vocal) interests of property developers and home owners masquerading as concern for the green belt. I strongly support it and in my view it cannot be implemented quickly enough.

Attached documents:

Comment ID: SQLP16/1506  Respondent: 10619169 / Wendy Critchlow  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness
Answer: (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford’s circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and
leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

5. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation

6. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation

7. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound

8. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018

9. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars

10. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham

11. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework

12. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

13. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

14. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens

15. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

16. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

17. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

18. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

19. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

**Comment ID:** SQLP16/256  **Respondent:** 10717985 / Alison Drennan  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

**Answer:** (No)

I object to the suggestion that the proposed submission local plan: strategy and sites as a whole is sound.

I completely disagree that this is the case, for the following reasons:
I object because the evidence base used was faulty and unsound. The rationale behind the notion of need to build on Greenfield sites within Guildford Borough is faulty – it is based on poor data and - since the the EU referendum result - unsound assumptions. For example there will not be a need to accommodate the inward movement of international migrants that was previously assumed.

I object because it proposes excessive and unjustifiable numbers of housing need. In 2014 even within the council itself it was recognised that the number suggested for housing at that time was excessively high. So this miscalculated and misconstrued total was been reviewed by the Scrutiny Committee of the council, who decided the housing number needed to be reduced. Given that now even higher housing development is proposed, the current proposals are completely unsound.

I object to GBC's fundamental confusion of housing need with housing demand. This major confusion invalidates many of their arguments for increased housing in the area and renders the local plan unsound.

I object because GBC propose building on Greenbelt land, removing villages from the Greenbelt and failing to heed Government guidance on the issue. Compelling and convincing arguments for building on Green Belt are not provided, in that no ‘special circumstances’ (NPPF) are outlined. These are required by Government guidance. This is another very significant factor undermining the sounds and fitness for purpose of the local plan. It is of note that Local MP Paul Beresford has stated that the Local Plan is not fit for purpose.

Attached documents:

Comment ID: pslp17q/78  Respondent: 10717985 / Alison Drennan  Agent:

Answer: (No)

The 2017 Local Plan is not sound, it uses unsound data, ignoring the views and objections of local residents, and fails to provide exceptional circumstances for building on the Green Belt, and suggests wholly disproportionate an unfair development around Send and Ripley.

Attached documents:

Comment ID: pslp17q/79  Respondent: 10717985 / Alison Drennan  Agent:

Answer: (No)

GBC has completely disregards the tens of thousands of complaints made by local residents with regard to disproportionate development in Send and Ripley, and to building on the Green Belt. It has also disregarded comments that point out the unsoundness of the ‘evidence’ GBC provides with regard to housing need.

Attached documents:

Comment ID: SQLP16/1096  Respondent: 10750945 / Lorna Crispin  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness
We do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford’s circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham, which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councillors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.

</table>

We consider that the Local Plan is unsound. Guildford is physically constrained being a gap town set in the Surrey Hills AONB and in Metropolitan Green Belt. Significant parts are affected by the Thames Basin Heath Special Protection Area. There are also notable areas of river, surface water, groundwater and surface water flood risk. Constricted road and rail routes converge to cross the downs seeking to avoid both high ground and floodplain. These compete with housing for land and there is no space for road widening or a conventional ring road approach.

The Local Plan process envisages that the housing target should be lower than the “objectively assessed need” if there are valid constraints. **GBC have failed to apply any reduction. We consider this makes the plan undeliverable and unsound.** We believe it would be harmful to the character, quality of life and economy of Guildford to apply the housing figure to a number of 13,860 new homes by 2033. We submit it would be counter to sustainable development as a whole (in particular to living within environmental limits and achieving a sustainable economy) and contrary to policy to develop on the scale currently proposed. We are concerned that insufficient attention has been paid to cumulative impacts with constraints considered separately for each site.

In view of the extent of physical and policy constraints, the inflated SHMA figure, and the transport evidence indicating that the Plan would lead to congestion, the OAN figure should be **500 homes per annum.** After **application of constraints the target should be in the range of 250 homes** per annum and kept under regular review.

The extent to which the Sustainability Appraisal fails to test the sustainability of the spatial options in a meaningful way casts doubt over whether sustainability has been assessed. **The report treats various major development sites in Green Belt, contrary to the importance attached to protecting Green Belt, as “a given”, fails to consider options that constrain development or that make greater use of brownfield or previously released greenfield land, focuses on a range of options that involve developing on even more Green Belt around Guildford in order to protect Green Belt around Woking does not consider environmental limits or impact on the next generation in terms of weighing demand for homes for the young alongside the use of all possible last resort greenfield options by one generation.**

The National Planning Policy Framework requires that objectively assessed needs should be met unless: “any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; or specific policies in this Framework indicate development should be restricted.”

The specific policies described include several of particular relevance to Guildford including sites protected under the Birds and Habitats Directive, Sites of Special Scientific Interest, Green Belt, Local Green Space, Area of Outstanding Natural Beauty, designated heritage assets and locations at risk of flooding. In this situation, we would question whether it is appropriate for the Appraisal to propose meeting needs in full from a sustainability perspective.

Notwithstanding guidance that the Sustainability Appraisal should be proportionate, strategic and look at significant matters, the assessment appears deficient and biased in the spectrum of alternatives it considers to the point that it is questionable whether it meets the requirements. **GBC has not included details of its Town Centre Master Plan and urban**
development proposals in time for and as a part of the Guildford Local Plan consultation. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation. GBC has proposed an OAN of 693 houses per annum in the GL Hearn Strategic Housing Market Assessment (SHMA) which we consider is unsupported. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018. This is too late.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness
Answer: (No)

Guildford is physically constrained being a gap town set in the Surrey Hills AONB and in Metropolitan Green Belt. Significant parts are affected by the Thames Basin Heath Special Protection Area. There are also notable areas of river, surface water, groundwater and surface water flood risk. Constricted road and rail routes converge to cross the ‘downs' seeking to avoid both high ground and floodplain. These compete with housing for land and there is no space for road widening or a conventional ring road approach.

The Local Plan process envisages that the housing target should be lower than the “objectively assessed need” if there are valid constraints. GBC have failed to apply any reduction which makes the plan undeliverable and unsound.

We propose it would be harmful to the character, quality of life and economy of Guildford not to reduce the housing figure to a number significantly below 13,860 new homes by 2033.

We propose it would be counter to sustainable development as a whole (in particular to living within environmental limits and achieving a sustainable economy) and contrary to policy to develop on the scale currently proposed.

We are concerned that insufficient attention has been paid to cumulative impacts with constraints considered separately for each site.

In view of the extent of physical and policy constraints, the inflated SHMA figure, and the transport evidence indicating that the Plan would lead to congestion, the OAN figure should be 500 homes per annum and the housing target after the application of constraints should be in the range of 250 homes per annum and kept under regular review.

GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation.

GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.

GBC has proposed an OAN of 693 houses per annum in the GL Hearn Strategic Housing Market Assessment (SHMA) which we consider unsound.

Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018. This is coincident with the start date of some developments and consequently too late.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

**Answer:** (No)

A sound plan would start by correctly identifying the geographic and social context of Guildford and its villages. The methodology of this Plan could be used to concrete over the entire Green Belt, and, the South East of England could become a megalopolis.

A sound plan would take account of the massive response to the previous flawed Plan in 2014.

A sound plan would look at the constraints imposed by the nature of a gap town, as well as of the infrastructure which is itself constrained by those physical hills and rivers.

A sound Plan would set out practical and legal reinforcement of barriers to unwanted development on Green Belt land, SSSI and AONB.

A sound Plan would press the University of Surrey to accommodate its students within existing planning permissions.

**Comment ID: pslp17q/113  Respondent: 10807745 / Belinda Middleton  Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Question 3: Soundness

**Answer:** (No)

The Local Plan is not sound.

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

1) The changes in this latest version of the Guildford Local Plan show little or no willingness on the part of Guildford Borough Council (GBC) to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and will bring increasing traffic congestion, pressure on other infrastructure, noise and pollution and a reduction in the quality of life of residents.

2) The Plan does not consider the implications of Surrey County Council’s (SCC) business plan for Newlands Corner to attract 100,000 more visitors a year. A significant proportion of these can be expected to use the A247 through West Clandon.

3) The Plan does not consider the Waverley Borough Council’s approval for the development of 1,800 homes at Dunsfold. This has the potential to feed traffic, which is trying to avoid congestion around Guildford, onto the A247 to access the A3.

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

- "Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green bel" Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
- The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
- The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
- The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.
- Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
- The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
- Much of the infrastructure required to support the level of development proposed is outside the Council's control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer's business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
- The 40-45% requirement for affordable homes together with infrastructure such as railway stations, parks and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.
- GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation.
GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.

GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound.

Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018.

Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars.

The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.

The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

The proposal for Garlick's Arch was added to the draft ocal Plan without any prior consultation under Regulation 1.

The and Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and

No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

In common with many others I do not believe the housing figure has been properly calculated and believe it overstates housing. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been made.

The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

I consider the assessments made in the local plan are deeply flawed in respect of infrastructure.

Drains and sewage

Residents of the Horsleys are aware of the situation with flooding and drainage in the local area. The current sewage system and drains is always overwhelmed by heavy showers of rain and the drains frequently block. Before there can be any extra demand placed on these systems there would have to be a redesign of the entire system. It would require substantial reconstruction prior to any extra housing.

Roads

The Villages have mostly B roads which are unable to sustain all of the extra traffic. The roads are narrow and full of pot holes. There are crossings not suitable for large traffic volume throughout the villages. Large numbers of cyclists use the roads for training, especially at weekends. It is not possible to overtake safely on large stretches if the roads. Any increase in traffic of the volume suggested would result in gridlock and a big increase in traffic accidents.

Shops/doctors/dentists

they are insufficient to deal with all the extra people.

Before any new homes can be built the infrastructure has to be massively upgraded.

| Comment ID: pslp17q/176 | Respondent: 10846625 / Frank Drennan | Agent: |
The proposed changes to the plan are wholly unsound. As noted in my response to Question 1 the evidence base is at best flawed and at worst highly misleading, significantly overstating the OAN. The plan then compounds these foundational errors by failing to apply appropriate constraints taking due consideration of the need to protect the Green Belt. Further the plan fails to demonstrate any exceptional circumstances justifying the erosion of the Green Belt which would result from the plan's implementation. 70% of the sites put forward in the Local Plan are still in the Green Belt which flies in the face of current government planning policy. The National Planning Policy Framework (NPPF), National Planning Policy Guidance and case law make it clear that Green Belt is an absolute constraint on housing supply. Exceptional circumstances need to be shown to adjust boundaries. Other constraints under the NPPF include assessments of sustainability, strategic flood risk assessment, physical constraints on land use and infrastructure constraints (this can include road congestion, schools, drains, power supply and medical requirements). Constraints should be applied to the Objectively Assessed Housing Need (OAN). However this itself is overstated and should be reduced from 580 per annum to 400.

Attached documents:

1.1 Guildford is physically constrained being a gap town set in the Surrey Hills AONB and in Metropolitan Green Belt. Significant parts are affected by the Thames Basin Heath Special Protection Area. There are also notable areas of river, surface water, groundwater and surface water flood risk. Constricted road and rail routes converge to cross the downs seeking to avoid both high ground and floodplain. These compete with housing for land and there is no space for road widening or a conventional ring road approach.

1.2 The Local Plan process envisages that the housing target should be lower than the “objectively assessed need” if there are valid constraints. GBC have failed to apply any reduction which makes the plan undeliverable and unsound. I believe it would be harmful to the character, quality of life and economy of Guildford not to reduce the housing figure to a number significantly below \textbf{12,426} new homes by \textbf{2034}. I submit it would be counter to sustainable development as a whole (in particular to living within environmental limits and achieving a sustainable economy) and contrary to policy to develop on the scale currently proposed. I am concerned that insufficient attention has been paid to cumulative impacts with constraints considered separately for each site.

1.3 In view of the extent of physical and policy constraints, the inflated SHMA figure, and the transport evidence indicating that the Plan would lead to congestion, the OAN figure should be \textbf{400 homes per annum} and the housing target after the application of constraints should be in the range of \textbf{200 homes per annum} and kept under regular review.

1.4 The extent to which the Sustainability Appraisal fails to test the sustainability of the spatial options in a meaningful way casts doubt over whether sustainability has been assessed. The report treats various major development sites in Green Belt, contrary to the importance attached to protecting Green Belt, as “a given”, fails to consider options that constrain development or that make greater use of brownfield or previously released greenfield land, focuses on a range of options that involve developing on even more Green Belt around Guildford in order to protect Green Belt around Woking does not consider environmental limits or impact on the next generation in terms of weighing demand for homes for the young alongside the use of all possible last resort greenfield options by one generation.

1.5 Policy in relation to sustainable development has been changed in a way that runs counter to GBC’s previous predetermined agenda for building on the Green Belt.
1.6 Under newly amended para 4.1.4 It is stated that "Local Planning Authorities are encouraged to include a policy within their Local Plan that embraces the presumption in favour of sustainable development. Policy S1 meets this requirement and adopts the model wording suggested. When implementing Policy S1, local circumstances will be taken into account to respond to different opportunities for achieving sustainable development. In accordance with the NPPF, the PRESCRIPTION WILL NOT AUTOMATICALLY APPLY to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding. The National Planning Policy Framework requires that objectively assessed needs should be met unless: "any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; or specific policies in this Framework indicate development should be restricted.”

1.7 Under this amended policy it is clear that the OAN should be constrained.

1.8 The specific amended policy described above is of particular relevance to Guildford including sites protected under the Birds and Habitats Directives, Sites of Special Scientific Interest, Green Belt, Local Green Space, Area of Outstanding Natural Beauty, designated heritage assets and locations at risk of flooding. In this situation, is it appropriate for the Appraisal to rule out not meeting needs in full from a sustainability perspective?

1.9 Notwithstanding that the Sustainability Appraisal should be proportionate, strategic and look at significant matters, the assessment appears deficient and biased in the spectrum of alternatives it considers to the point that it is questionable whether it meets the requirements. 1.10 The plan fails to produce a coherent development strategy for Guildford Town. GBC has deleted its independently commissioned Town Centre Master Plan by the well renowned firm of architects and master planners Allies and Morrison as a source document from the plan even though this master plan was previously well publicised and enthusiastically adopted by the Council.

1.11 Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2020. This is too late!

Attached documents:

Comment ID: SQLP16/1229  Respondent: 10857889 / William Kyte OBE  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: ()

It is unsound and unsustainable to develop on the scale proposed. The housing target and substantial increase in retail space should be reduced to take account of the constraints and the growth in online retailing.

Sustainable transport cannot be realised without a central bus station and a proper bus/rail interchange.

The implications of Brexit need to be considered and taken into account.

Attached documents:

Comment ID: pslp17q/317  Respondent: 10857889 / William Kyte OBE  Agent:

Answer: (No)

The Local Plan remains unsound because it is based on flawed evidence and constraints have not been properly applied which lead to an overestimated housing figure. Some of the changes made in this draft exacerbate this.
The 2017 Draft Local Plan is still deeply flawed and should be rejected to enable these flaws to be corrected.

Attached documents:

Comment ID: SQLP16/2118  Respondent:  10858977 / Angela Otterson  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: ()

Guildford is physically constrained being a gap town set in the Surrey Hills AONB and in Metropolitan Green Belt. Significant parts are affected by the Thames Basin Heath Special Protection Area. There are also notable areas of river, surface water, groundwater and surface water flood risk. Constricted road and rail routes converge to cross the downs seeking to avoid both high ground and floodplain. These compete with housing for land and there is no space for road widening or a conventional ring road approach.

The Local Plan process envisages that the housing target should be lower than the “objectively assessed need” if there are valid constraints. GBC have failed to apply any reduction which makes the plan undeliverable and unsound. I believe it would be harmful to the character, quality of life and economy of Guildford not to reduce the housing figure to a number significantly below 13,860 new homes by 2033. I submit it would be counter to sustainable development as a whole (in particular to living within environmental limits and achieving a sustainable economy) and contrary to policy to develop on the scale currently proposed. I am concerned that insufficient attention has been paid to cumulative impacts with constraints considered separately for each site.

In view of the extent of physical and policy constraints, the inflated SHMA figure, and the transport evidence indicating that the Plan would lead to congestion, the OAN figure should be 500 homes per annum and the housing target after the application of constraints should be in the range of 250 homes per annum and kept under regular review.

The extent to which the Sustainability Appraisal fails to test the sustainability of the spatial options in a meaningful way casts doubt over whether sustainability has been assessed. The report treats various major development sites in Green Belt, contrary to the importance attached to protecting Green Belt, as “a given”, fails to consider options that constrain development or that make greater use of brownfield or previously released greenfield land, focuses on a range of options that involve developing on even more Green Belt around Guildford in order to protect Green Belt around Woking does not consider environmental limits or impact on the next generation in terms of weighing demand for homes for the young alongside the use of all possible last resort greenfield options by one generation.

The National Planning Policy Framework requires that objectively assessed needs should be met unless: “any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; or specific policies in this Framework indicate development should be restricted.”

The specific policies described include several of particular relevance to Guildford including sites protected under the Birds and Habitats Directives, Sites of Special Scientific Interest, Green Belt, Local Green Space, Area of Outstanding Natural Beauty, designated heritage assets and locations at risk of flooding. In this situation, is it appropriate for the Appraisal to rule out not meeting needs in full from a sustainability perspective?

Notwithstanding that the Sustainability Appraisal should be proportionate, strategic and look at significant matters, the assessment appears deficient and biased in the spectrum of alternatives it considers to the point that it is questionable whether it meets the requirements.

GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation.1.6 GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.

GBC has proposed an OAN of 693 houses per annum in the GL Hearn Strategic Housing Market Assessment (SHMA) which is unsound.
Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018. This is too late!

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness
Answer: ()

Question 3: Soundness

I object

The plan is not so much positively prepared as avariciously prepared. I do not consider that it is reasonable to take on unmet need from neighbouring authorities, which have given greater protection to their Green Belt if it means our own is compromised on the scale being put forward.

I believe that constraints should be applied to the housing target, which we understand equates to the objectively assessed need (OAN) as no reasonable constraints have been applied. The constraints that could and should be applied are Greenbelt and considerable infrastructure issues. The solutions suggested to accommodate the inordinate levels of growth are both inadequate and costly and the net result will be serious debt for many years if not generations.

It was recommended by landscape consultant Alison Farmer Associates that the area known, as Blackwell Farm should be considered in the AONB boundary review, yet it was omitted in Surrey CC’s landscape evaluation. This meant the Parish Councils of Worplesdon, Compton and Wanborough had to fund an independent review to ascertain whether the area was a contender for AONB classification. The survey was carried out by in May 2016 by Land Management Services Ltd, which concluded that most of the 265 hectare farm was of a landscape and scenic quality that merited inclusion within Natural England’s revised Surrey Hills AONB boundary.

It raises serious question about the soundness of the evidence base when Surrey CC says that it only has to account for evidence submitted and not for that omitted? The area within the proposed development site at Blackwell Farm should now be considered by Surrey Hills as part of the AONB boundary review and land to the west should remain undeveloped, as it is important to the setting of the AONB.

The plan is not justified. Residents groups have suggested other strategies but these have not been tested or considered against the current trajectory, which has remained largely unchanged since day one.

Many aspects of the Plan were strongly objected to in 2014 and not only have these points been ignored, they have in fact been embellished or made worse. I refer to the points that GBC referred to in their own summary, which stated that most people objected to the scale of development and the harm to the Green Belt. At that time there were 4 strategic sites and now there are 5. At that time approx 50% of development was in Green Belt and now it is 66% with only 34% on previously developed sites. 58% of development is on just 5 sites.

A more realistic appraisal of the town centre with more multi-storey car park development and less retail would make way for a greater percentage of housing in the town centre, which is after all the most sustainable and sought after area. Additionally, greater pressure must be placed on the University to house more students at Manor Park in order to free up affordable rented accommodation in the town for key workers.

There is a conflict of interest when the developer (University) drags its feet over the provision of promised student accommodation (thereby putting pressure on the housing market) whilst at the same time seeking permission to build 1,800 new homes to help Guildford’s need? The University is at least five years behind with programme of building student residences and staff housing. It is widely agreed among residents groups that the University must fulfil all of
its current building plans and substantially increase the proportion of students on campus. If the University built the
outstanding units, the housing need would reduce substantially yet much of this is omitted from the outstanding
permissions list?

GBC has approached development without applying constraints that are applicable such as Green Belt and
infrastructure. It is wholly inappropriate to build a Plan without constraints when there is widespread opposition to this
approach. Furthermore, there are serious doubts over the validity of the objectively assessed housing need. Housing need
underpins the entire plan, and we are being asked to accept the figure of 693 on trust. Without an understanding of the
methodology behind the OAN, the public cannot 'buy into' this figure, especially as it has been illustrated by two
reputable professionals that there have been errors such as 'double accounting', which has resulted in uplift. Both
consultants have concluded that a more accurate figure would be around 500 new homes pa and the most recent one,
which was done in pre Brexit -June 2016 acknowledges that due to the high number of International students here in
Guildford a student SHMA would better inform this plan. Both consultants feel that the current SHMA is flawed and that
the OAN of 693 is too high. These reviews will be submitted by CPRE and the GRA and we support the findings of both.

Putting 58% of development on 5 sites, which are within the Green Belt, or largely within the Green Belt, is not
consistent with national policy. The definition of 'exceptional' is
forming an exception or rare instance; unusual; extraordinary. What possible exceptional circumstances can justify 3 sites
of approx 2,000 each and two of 1000 each, on Greenbelt. This makes a mockery of the term ‘exceptional’?

The plan has a maximum number and a hefty buffer. It has underestimated windfalls and overestimated need. It is likely
therefore that if one of the major sites fails to come through, the Plan could still succeed in terms of numbers, but would
fail in terms of impact on infrastructure and reliance on aspirational, but distant 'yet to be discussed' schemes such as
railway stations, making the plan undeliverable. If more people are not given the opportunity to live in Guildford town,
the night time economy cannot grow and if the gamble to use 40% of the land for retail fails, shops will close and we will
have created a leafy green ghost town, whilst the villages outside the town will have changed beyond all recognition as
the impact of urban sprawl takes its toll.

The plan puts many eggs into 5 baskets with 58% of all development on just 5 sites. If these are not deliverable, the plan
will fail. This strategy has been roundly criticised by Inspectors in other parts of the country.

Taking on such a high OAN without scrutinising it and then taking land out of Green Belt to fulfil it, and using developer
funding to secure infrastructure (which reduces significantly the proportion of affordable housing delivered) is destructive
and risky.

It is inconceivable that 5 sites between 1,100 and 2,000+ each can be built on Green Belt land without affecting the
purposes of the Green Belt.

AONB should be given the highest protection. Despite being put forward for AONB review Blackwell Farm was omitted
and an independent consultant had to be commissioned by local parish councils. The findings showed that the area met
Natural England’s latest criteria for AONB and should not therefore be developed but should instead be properly
recognised.

The proposal at Blackwell Farm has been reduced from 2100 to 1800 to take account the impact on future AONB or for
views in and out of the existing and future AONB from public areas as determined by planning policy. It is feared that if
this site were approved and if access could be made possible without causing serious problems to the surrounding road
network, that the AONB in this location would undoubtedly be destroyed.

GBC argues that it is necessary to remove more than 1.6% of its 89% Green Belt and to remove more than 6% of its
Green Belt from villages (by way of insetting) in order to meet its need, yet at the same time the Council advocates
making an additional area Green Belt? The area of land being put forward for inclusion within the Green belt is on the
same ridge as two areas of Green Belt it wishes to remove (Normandy & Blackwell Farm). This approach lacks
consistency.

Cllrs Paul Spooner and Matt Furniss have stated clearly that there will be no development without supporting
infrastructure and that the infrastructure must come before, or alongside, development. It is difficult to see how this will
materialise as developers’ CIL contributions (which will fund infrastructure) are paid from profits made from the development. This statement appears to be unenforceable and could offer false reassurance to residents who may support the Plan on this basis.

Developers are being asked to fund large amounts of infrastructure. They will offset this against any agreement for affordable housing and it is highly possible that affordable housing will not be built or that only a small proportion will be built. This was one of the key drivers and is factored into the housing need, yet may not be delivered. Where is the general analysis to see what level of affordable housing might actually be delivered given the level of infrastructure needed to implement this level of development on new sites?

The omission of the Town Centre Master Plan (on the basis that this has different timescales) invalidates two key components of the Plan - the Infrastructure and Highways assessments. The suggested road closures in the town centre and the resulting re-routing of traffic should be factored into the highways assessment, but they are currently omitted. The consequences of this could render the whole Plan undeliverable and I don’t believe the Plan can be approved without factoring in the Town Centre Master Plan.

GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA), which CPRE and GRA consider unsound. The methodology for the uplift and assumptions made have not been made available and thus the openness and transparency required for public understanding as outlined in the NPPF has not been adhered to.

I understand that Highways England will not start to consider its intentions as regards the A3 in the vicinity of Guildford until 2018. It is difficult to see how plans can be approved without the inclusion of this information.

Network Rail has not made available for the public consultation any plans for a new railway station at Merrow, nor have we been told where the station car park would be situated nor how the railway bridge between Merrow and Burpham would be re-constructed to take the additional traffic. Likewise, there are no detailed plans for the railway station at Park Barn and Network Rail has not confirmed the status of either. These schemes must have a sounder footing to be included in the Plan if they are to be used to justify large developments nearby.

The access to, and from, Blackwell Farm (via the A31) has not been thought through. There proposed new route will likely be used as a rat run to the A3/Guildford, but this will put pressure on a congestion hot spot, and result in increased traffic at the Compton turn-off and Down Lane (home to Watts Gallery). It is also recognised that congestion at the Tesco roundabout will be made worse and this area is already subject to considerable problems. Additional traffic via the business park from Blackwell Farm will add to congestion at the Egerton roundabout and impede access for emergency services to the hospital.

The proposal at Blackwell Farm has been reduced from 2100 to 1800 to take account of the AONB, but this does not account for views in and out of the AONB from public areas.

The greenbelt sensitivity study is not objective. The reference to Blackwell Farm as ‘South West Guildford Urban’ is totally misleading as it is unadulterated countryside that fulfills all the purposes of Green Belt. I consider this Study, which was the subject of much criticism in the last plan, to be flawed, yet it remains in this Plan. Why?

The damage caused to the Green Belt by the addition of Blackwell Farm would outweigh benefits gained from development, as there is ample space and lapsed planning permission on the existing Manor Park land for development for student accommodation, which would free up affordable rented accommodation in the town.

The proposal for Garlic Arch was added to the draft Local Plan without any consultation under Regulation 18.

No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Guildford citizens.

No land has been safeguarded for a tunnel, which would show a real intent.

This consultation included ‘significant changes’ according to GBC, although most residents would strongly dispute this. Some key reports were added and 6 weeks was not long enough to properly digest the information and impart this to
residents. Many additional questions had to be asked and many points required clarification, which essentially meant adequate information, was not made available until two thirds of the way through the consultation.

The level of objection at the 2014 consultation was considerable - these objections have NOT been dealt with, but have been carried through to a regulation 19 consultation, undeterred. This is not in the spirit of Localism or the NPPF.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

**Answer:** (Yes)

I object to the proposed plan for Send and Ripley, I feel that the scale of it is more that the area can cope with. The infrastructure is not in place to be able to cope with such a large development. There is already a lot of traffic through the village and at peak times is constant and very slow moving. The scale of the new plan does not take this into account and the roads would grind to a total stop. There is no proof of the need for the industrial space and the number of new homes has been based on exaggerated figures.

The subsoil of at least one of the proposed sites has documented unsafe landfill waste, which is currently vented. Other sites have permanent Green Belt status and include ancient woodlands and beautiful countryside, some of which stop Guildford and Woking from forming into one!

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

**Answer:** (Yes)

I object to the lack of infrastructure and forward thinking within the hugely over the top and totally unnecessary loss of Green Belt land in the new proposed plan for Send and Ripley. I already have to wait over month for a regular appointment with my GP and it is hard to get emergency/urgent appointments with a designated doctor. The road to the local school is always a nightmare to navigate and the schools are always fully subscribed. The roads in general are at virtual standstill at peak times and the traffic through the village never ends. How does the new plan take this into account and apart from a massive new road junction what plans are there to make this all work smoothly?

**Comment ID:** pslp17q/298  **Respondent:** 10882465 / Colin Bowes  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Question 3: Soundness

**Answer:** (No)

Assumptions and claims made in the plan regarding Allocation A35 are unsound. Regarding traffic increases, the site is adjacent to the most consistently congested stretches of strategic road network in the county and close to one the most congested junction in the country (J10). I had to use this junction for years on my commute to work, and it is frequently at a standstill during rush hours, accidents, diversions or roadworks. To suggest using bus services is disingenuous. The
buses either travel the already congested main roads, or travel on unsuitable minor roads – thus reducing the likelihood of pedestrians or cyclists wanting to use these same minor roads. Furthermore, it is next door to Wisley RHS Gardens where following recent upgrades and extensions visitor numbers will increase by 500,000/annum and this associated traffic increase from the RHS has not been taken into account. I object to the transport evidence base which is unreliable.

It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights and timings. The inclusion of A35 will not contribute to the 5-year housing projection due to this and other constraints notably sewerage capacity.

This is Green Belt Land, and Green Belt is there for a reason. Many councillors and national politicians have made election promises to protect our Green Belt. The removal of an additional 3.1 ha from the green belt without any justification is just not morally right. The increased area of the TFM site now abuts additional heritage assets, including Upton Farm and Bridge End House negatively impacting the setting of these buildings and the wider Ockham Conservation Area. The increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB. I object to paragraph 22 as this does not reflect the impact of the buildings on the surrounding area.

I object to the proposed extended developments within the Green Belt – there are no “exceptional circumstances” which could possibly justify the potential development of such a large area of protected land to the NE of the borough.

I object to housing numbers, which also appear to be unsound. Again, you have ignored Green Belt constraints.

I object to the lack of consideration given to infrastructure, especially in the case of the former Wisley Airfield, which is close to already congested highways. Your Highways Report is unsound. Services are already creaking and many oversubscribed.

I fully support the objections submitted by WAAG, and Ockham and Ripley Parish Councils which are too numerous for me to include, nevertheless I wish my objections and those of the above organisations to be fully taken into consideration and that you amend the Plan accordingly.

Comment ID: pslp17q/410  Respondent: 10883905 / Anita Marshall  Agent:

Answer: (No)

I wish to object to the Local Plan which I consider to be unsound and not fit for purpose.

1. I object to the proposed extended developments within the Green Belt – there are no “exceptional circumstances” which could possibly justify the potential development of such a large area of protected land to the NE of the borough.

2. I object to the lack of consideration given to infrastructure, especially in the case of the former Wisley Airfield, which is close to already congested highways. Your Highways Report is unsound. Services are already creaking and many oversubscribed.

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. The housing DAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councilors before being adopted.

2. The DAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, ADNB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

3. The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an DAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

4. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

8. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation

9. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound

10. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018

11. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars

12. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham

13. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework

14. The proposal for Garlick's Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

15. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

16. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

17. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, Page 16 of 17

18. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

19. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

20. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little. The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Attached documents:
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford’s circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Answer: (No)

I am objecting to the local plan for Send, Send Marsh and Burnt Common. I object to the number of houses that the plan intends to deliver (693 per annum) and in particular Garlick's Arch (Policy A43) and the development of 2000 homes at Gosden Hill Farm Merrow.— Policy A25. I also object to the 2 new A3 sliproads at the A247 clandon road (Policy A43A).

I object as this is in clear contravention of the central government's stated commitment for Green belt protection. I also object because the local infrastructure (medical, schools, roads, transport) etc is already stretched to breaking point and will not support the further development in the local plan.

Regards

Ivan Szabo-Toth
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. "Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt." Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

1. The housing OAN figure has been calculated by a process which is not It has not been properly examined by Councillors before being adopted.
   1. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do the

1. The draft Plan does not accord with the NPPF policies on protecting the Green Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be just ified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites which amount to 65% of the proposed housing number.
