Some of the strategic industrial sites would be better classified as brownfield land suitable for use as a residential area, eg Woodbridge Park, Woodbridge Road and Merrow Lane.

This study varies very significantly from the previous Guildford Borough Council ELNA 2013, which after two years has been completely re-written. This leads us to question the reliability of the evidence base here which has been used to justify the assumptions and plans; it is unclear that the current evidence base is any more reliable than that used previously. This calls into question the general reliability of the process of collection and interpretation of data in the overall forward planning process by GBC.

**DEFINITIONS:**

B1 Business

B1 building use is use for all or any of the following purposes:

(a) as an office other than a use within class A2 (financial and professional services),

(b) for research and development of products or processes, or

(c) for any industrial process, being a use which can be carried out in any residential area without detriment to the amenity of that area by reason of noise, vibration, smell, fumes, smoke, soot, ash, dust or grit.

General Industrial

B2 building use is for the carrying on of an industrial process other than one falling within class B1 above or within classes B3 to B7 below. (Note: B3-B7 relates to very heavy industry such as oil refining, smelting etc).

Distribution or Storage

B8 building use is for storage or as a distribution centre.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
We OBJECT because

- the evidence base is unreliable
- there is unclear differentiation between B class uses
- only high added-value business uses are desirable, not low grade, low employment warehousing which is land hungry
- industrial and commercial businesses must be concentrated in the urban area, or existing business parks (eg Slyfield) not in the rural environment which the infrastructure is unable to support
- the rural environment must support micro or high tech businesses, agricultural industries, and tourism, and these sectors must not be damaged by general industrial development which is inappropriate

Full response

We OBJECT to this policy.

We need to distinguish between wanting to increase the added value of the economy and physical expansion, especially given the scarcity of land in Guildford. Guildford is not the place for large space hungry businesses. We believe Guildford should target high added-value small and medium sized enterprises or the headquarters of larger corporations, but not provide low added value warehousing and industrial space.

GBC appear to fail to appreciate the fundamental rationale of the Use Classes Order as a planning tool in terms of useful property market research or forward planning.

No proper analysis has been made of data held by GBC in respect of different B classes in terms of planning applications granted or evidence gathered by the economic development function at GBC without any attempt at real market demand apart from vague references to freely available market research undertaken by commercial estate agents. (See definitions of B classes at end of this policy response).

What we are left with is a fairly clumsy and poorly informed plan which clusters B classes without any appreciation of widely different employment impact and economic sustainability. E.g. B1 (mostly local office use/R&D) generates at least 5 times as much employment as B8 (distribution and warehousing).

This draft Local Plan is partly based on new findings by Aecom in the latest ELNA 2015 [Employment Land Needs Assessment 2015]. This includes the recasting of the ELNA by Aecom in 2015 which updated the ELNA 2013 prepared by GBC. We have had regard to the evidence base provided by Aecom in the 2015 ELNA and find it a more reliable evidence base for overall projected employment in the borough over the plan period in overall numbers than done previously by GBC in 2013. However, we have concern that the survey work by Lambert Smith Hampton is in the form of high level free property research that is used for the purposes of marketing their services over a wide area not specifically commissioned for the borough of Guildford and undertaken for ELNA purposes.

However, we are concerned that the research undertaken by Aecom is generally superficial and lacks sufficient detail and analysis between B1a, B1b, B1c, B2 and B8 use classes and that no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of office, research and development, light industrial, general industrial and warehousing and distribution floor space.

The lack of appreciation by GBC as to the opportunity for widely different uses being generated within B class clusters defeats the whole point of proper planning of employment uses and can significantly endanger previously good planning put forward in the previous 2003 plan. We support the concept of seeking increased investment in our local knowledge-based, high technology economy. This will provide well paid, creative jobs and generate the wealth necessary to fund the infrastructure and environment this sort of industry requires.
We need to promote the idea of new knowledge transfer in incubator units and small premises for new start up enterprises. We need to be on the wave of innovative new technology as opposed to older established businesses. High value-added industry is desirable; low tech, land-hungry older businesses which will increase congestion are not desirable.

We have concern as to the ill-informed clustering of all B classes. This is unclear in terms of market evidence required to inform effective planning. There is a failure to provide a clear understanding of business needs within the relevant area as required under Section 160 of the NPPF.

Little regard has been given in the plan to the economic reality of falling demand for B2 industrial space which is clustered with other B classes almost randomly throughout the plan.

Little regard is had to the opportunity of B1 b space as an opportunity for research and development which needs to be nurtured and preserved without the detrimental and confused clustering with other B classes both in terms of planning and promotion of a research hub.

We do not support the policy of creating Strategic Employment sites outside the urban centres.

Some of the strategic industrial sites would be better classified as brownfield land suitable for use as a residential area, eg Woodbridge Park, Woodbridge Road and Merrow Lane.

This study varies very significantly from the previous Guildford Borough Council ELNA 2013, which after two years has been completely re-written. This leads us to question the reliability of the evidence base here which has been used to justify the assumptions and plans; it is unclear that the current evidence base is any more reliable than that used previously. This calls into question the general reliability of the process of collection and interpretation of data in the overall forward planning process by GBC.

**DEFINITIONS:**

**B1**

**Business**

B1 building use is use for all or any of the following purposes:

(a) as an **office** other than a use within class A2 (financial and professional services),

(b) for **research** and **development** of products or processes, or

(c) for any industrial process, being a use which can be carried out in any residential area without detriment to the amenity of that area by reason of noise, vibration, smell, fumes, smoke, soot, ash, dust or grit.

**General Industrial**

B2 building use is for the carrying on of an industrial process other than one falling within class B1 above or within classes B3 to B7 below. (Note: B3-B7 relates to very heavy industry such as oil refining, smelting etc).

**Distribution or Storage**

B8 building use is for storage or as a distribution centre.

We note that there is a significant reduction of between 71% and 79% in the previous job target and resultant 79% reduction in employment space in response to the many objections lodged in 2014 against an unsubstantiated agenda for economic expansion in the last draft and based on new findings by Aecom in the latest ELNA 2015. We have concern as to the ill-informed clustering of all B classes in terms of the clarity of market evidence required to inform effective planning and a failure to provide a clear understanding of business needs required under Section 160 of the NPPF. We also note the
dramatic reduction in assessed demand by two Employment Land Needs Assessment Reports carried out under the same terms of reference within a period of 2 years which calls into question the general reliability of the process of collection and interpretation of data in the overall forward planning process by GBC. We do not support the policy of creating a Strategic Employment site at Garlick’s Arch (A43) in the Green Belt which is completely unnecessary due to the overall decrease in demand for industrial space which could be easily accommodated at Slyfield. We are concerned however that the research undertaken by Aecom is generally superficial and lacks sufficient detail and analysis between B1a, B1b, B1c, B2 and B8 use classes and that no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of office, research and development, light industrial, general industrial and warehousing and distribution floor space. No proper analysis has been made of data held by GBC in respect of different B classes in terms of planning applications granted or evidence gathered by the economic development function at GBC and no robust assessment of local market demand apart from fairly brief references to freely available market research undertaken by commercial estate agents such as Lambert Smith Hampton covering a much wider area. GBC appear to fail to appreciate the fundamental rationale of the Use Classes Order as a planning tool in terms of useful property market research or forward planning. What we are left with is a fairly clumsy and poorly informed plan which clusters B classes without any appreciation of widely different employment impact and economic sustainability. E.g. B1 generates at least 5 times as much employment as B8. The lack of appreciation by GBC as to the opportunity for widely different uses being generated within B class clusters defeats the whole point of proper planning of employment uses and can significantly endanger previously good planning put forward in the previous 2003 plan. E.g. the creation of a research and development park linked to the University but now has the threat of being downgraded into a general business park (see below). Little regard has been given in the plan to the economic reality of falling demand for B2 industrial space which is clustered with other B classes almost randomly throughout the plan. Little regard is had to the opportunity of B1b space as an opportunity for research and development which needs to be nurtured and preserved without the detrimental and confused clustering with other B classes both in terms of planning and promotion of a research hub. We note that the past trend of expansion of Office/R &D is 0.43% pa over the period from 2004 to 2012 derived from VoA analysis and that the calculated annual floor space demand is 0.7% over the plan period up to 2033. We support the concept of seeking increased investment in our local knowledge-based, high technology economy. This will provide well paid, creative jobs and generate the funding necessary to pay for the infrastructure and environment this sort of industry requires. We need to distinguish between wanting to increase the added value of the economy and physical expansion, especially given the scarcity of land in Guildford. Guildford is not the place for large space hungry businesses. So we should target high added value small and medium sized enterprises rather than the headquarters of larger corporations. We need to promote the idea of new knowledge transfer in incubator units and small premises for new start up enterprises. They need to be on the wave of innovative new technology as opposed to older established businesses. We object to the policy of creating a Strategic Employment at Garlick’s Arch (A43) in the Green Belt. The stated requirement of 7,000 sq m (B1c, B2 and B8) could easily be accommodated at the Slyfield Regeneration site of 40 ha.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy E2: Location for new employment floorspace

Response

Summary

I OBJECT to this policy as it stands. I am of the opinion that all new office and research and development (use Class B1a and B1b) floor space should be within Guildford town centre. I do not support the policy of expanding the Research Park onto Blackwell Farm and I do not believe there are exceptional circumstances to justify incursion into this permanent and high quality area of Green Belt

Detailed response:

- The Surrey Research Park currently extends to 65,000 sq m
- There is already granted consent to expand to a further 9,000 sq m (14%)
- The past trend of expansion of Office/R &D is 0.43% pa over the period from 2004 to 2012 based on ELNA 2015 derived from VoA analysis
- The ELNA 2015 calculated annual floor space demand is 0.7%
- The data point for our analysis is today in 2016 so we have 17 years to go to the end of the plan period.
- The necessary growth in floor space over the plan period is therefore 17 years x 0.7% = 11.9%
- There is currently 14% expansion space already available
- The proposal by GBC to expand the 65,000 sq m by 9,000 sq m (existing allocation) with an additional 35,000 sq m amounts to an increase of 67% of the Research Park which is not required
- The Research Park is currently developed at a density of 25% plot ratio. The majority of existing buildings are 2 storeys giving a developed floor space plot ratio of 12.5%.
- The existing Research Park has the opportunity to markedly increase its density without infringing any Green Belt land nearby. Any density increase would be cost effective for the use of all existing infrastructure and would also have the potential to match the existing densities of existing academic buildings on the university campus which are three to four times higher.
- Together with the existing expansion of 14% through existing consents and the opportunity to increase its density the Research Park has ample capacity to expand to embrace new demand for B1b uses linked to the university.
- A preferred location for increased B1a and B1b space should be on other existing sites close to housing and a convenient transport hub

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E3: Maintaining employment capacity and improving employment floorspace

Response

Summary

I OBJECT. I do not support the policy of resisting change of use from B1a to residential because it flies in the face of positive property market solutions for the regeneration of brownfield land and is contrary to current government policy which has recently been reaffirmed and permits a change of use from B1a (offices) to C3 (residential).

Detailed response:

- I believe that the existing government policy which has recently been made permanent of allowing change of use from B1a to C3 is sound
- Many office buildings reaching an age of more than 30/50 years become redundant in terms of energy compliance making them illegal to occupy for employment purposes and the cost of refurbishment makes them redundant and uneconomic
- The reality of market demand is that the gross development value of refurbished residential space is in excess of the gross development value of refurbished old office space in many locations (this gross development value assessment is supported by the analysis by property consultants GVA in the supporting evidence within the Allies and Morrison Masterplan for Guildford dated 2015)
- Office space is available and the turnover of office space in Guildford is slow, which would seem to indicate that there is excess office capacity relative to demand
- To resist change from B1a to C3 is contrary to the concept of brownfield first for residential development schemes
- To resist change from B1a to C3 in Strategic or Significant Employment Sites is contrary to the concept of integrated mixed use communities whereby the journey to work is minimised
· London has led the way with significant residential schemes being created from redundant office stock. A good example is the South Bank in London adjacent to Waterloo Station where in 2005 the Shell Centre has been converted into flats. Another early example is the 2000 scheme at Metro Central Heights at Elephant and Castle where the old Alexander Fleming House was converted to 435 flats by St George. GBC needs to adopt more modern trends and policies.

· Guildford is in dire need of increasing town centre residential development

· The feared loss of employment will be marginal and impractical to resist. Empty office blocks are not the answer.

· I regard the evidence base (Employment Land Needs Assessment 2015 and the Guildford Borough Economic Strategy 2013-31) as flawed and inconsistent and therefore unreliable evidence

· In relation to the targets and monitoring indicators, I do not consider that the targets are desirable or sound, and therefore do not consider that the monitoring indicators are valid. Why should Guildford target 3200 additional B class jobs when it has almost full employment? Why should no employment floorspace be lost, when some of it is inappropriate and not fit for purpose? Why is it desirable to increase B1/B2/B8 floorspace?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Policy E3 maintaining employment capacity

We support the concept and aim but object on the grounds that the practicalities of sustainable transport have not been properly considered,

It is not sustainable to build dormitory towns and call them sustainable.

Not everyone can cycle all the time.

How can large developments outside the town centre maximise sustainable travel? This is a matter for the planning process- the further from the town centre, the less sustainable the development will be.

Reliance on cycling discriminates against vulnerable members of the community. How can the disabled, those with small children, or the very old, or the infirm, or those who are ill, cycle outside the town in order to commute, or even inside the town? Only some people cycle –and Guildford has some steep hills, especially going out of town. Park and rides are slow – how can those with a 3 hour commute add 1 hour to their journey from using park and rides?
The only sustainable mechanism for new developments is to have them in the town centre close to the railway and the main shopping links where a hoppa bus can provide satisfactory links for those who cannot walk or cycle.

While we welcome the intention to encourage rail travel by adding two new stations there could unintended consequences. Once again we see the word “expect” used which means the policy has no teeth. The word “expect” must be replaced with the word “require” so that this policy is enforceable.

There are a number of problems with this policy.

Congestion is a widely recognised factor in the local area of Guildford, and this is a major factor in the public response to the proposed housing numbers, which represents more than a 25% increase in housing numbers in a borough that is already profoundly congested. [Source: SHMA p61: itself sourced from ONS for 2013.] Residents recognise that to increase the population by this level within the existing transport provision is not feasible, and this informs much of the public response to the proposed level of housing accommodation.

It is not clear that this recognition, which is widespread through the borough, is shared by those who have drafted the Local Plan.

Guildford is a commuter town, which (compared to London) offers better quality of life and lower house prices, so it will continue to be a commuter town for the foreseeable future. As a result, access to the stations for commuting is of significance. It is not realistic to assume that traffic to stations for commuters can be replaced either by bus services (slow, intermittent, expensive, and in many cases absent completely) or by cycle. There is a capacity issue of car parking at the station, which effectively creates an absolute constraint on the feasibility of commuting from Guildford.

Cycling is attractive, and, for the urban young, especially students, it is both practical and cheap, and can be quick. However, as noted, those en route to work cannot be assumed to be able to cycle in working clothes. Elderly members of the community, those transporting small children, and the disabled cannot participate in cycling except to a limited extent. Effectively the "average" person deemed to be capable of cycling to substitute for car trips is an able-bodied adult not travelling to somewhere where smart clothing is required, not needing to arrive clean (or with showering facilities on arrival, not provided by all employers); this is not sufficiently widespread in terms of the local demographic for travellers that it should be allowed to determine policy – and of course, not needing to transport, for example, supermarket shopping after the trip. What about the disabled? the elderly? those looking after more than one child? Are they to be housebound? This is not a reasonable strategy. Before transport and buildings are determined on the basis of such a policy, it is also imperative that safe cycle routes are implemented through the borough. Cycling in winter on rural roads is inherently more dangerous. Upgrading these roads would not be feasible in terms of cost nor desirable in terms of local character.

Cycle lanes which disappear into normal traffic lanes, which travel over potholes and which allow cyclists to be threatened by HGVs are not conducive to wider cycle usage, nor should wider cycle usage be encouraged until it can be demonstrated that it is safe, which currently, locally, it is not. The A25 cycle corridor scheme (Part of LRN1) will exchange the risk between cyclists and vehicles sharing space for the risk between cyclists and pedestrians sharing space. Much of the A25 has no pedestrian area anyway outside the urban space. Many cyclists travel at high speed and they will be put into conflict with pedestrians including mothers with very young children and schoolchildren many of whom need to cross the road and hence cross the cycleway. This is likely to lead to accidents and pedestrians are being disadvantaged.

Road capacity reduces as average speeds come down due to congestion. Where proper cycle lanes or off-road lanes are not provided then it is inevitable that safe driving will lead to reduced average motor vehicle speeds and gap development in the traffic stream. Both these effects act to reduce the capacity of our local road network. This loss of capacity has not been recognised in the Transport Strategy.

The concept of the park and ride with access into the town limited for those who live outside the town, is similarly flawed. Park and Ride is expensive, cumbersome and slow. It should be noted that in Oxford it has had a disastrous impact on small local retailers which is a retail segment that it is important to retain and support.

Use of park and rides increases the use of the strategic road network by local users, which is not what it is designed to do.
This proposal is combined with aggressive exclusion from the town of those who are living in peripheral communities, which will increasingly resemble housing estates. This is a strategy for sink estates through Surrey instead of the Green Belt - this is not a strategy for growth. Head offices will choose to go elsewhere, because highly skilled staff and management in the cutting edge industries that GBC wants to encourage, will not choose to live in a dense housing estate.

The existing extent of traffic congestion has not been fully recognised. As a consequence the impact of the various development scenarios has been understated and the infrastructure costs are an understatement.

The transport studies are incomplete and unpublished and this should have led to deferral of consideration of the Local Plan consultation process until it was possible to revise the plan post publication of the studies. This matter was raised by a number of councillors at the Full Council meeting on 24 May 2016 when the consultation was approved, but a motion to defer was overturned by the majority party.

Cross-subsidy in terms of infrastructure is envisaged. The infrastructure deficit needs to be resolved before there are large numbers of new residents exacerbating the current congestion. The funding of the new developments through CIL and S 106 is expected to contribute to the transport impacts across the borough, and there is negligible concern for the transport problems created within those new developments or in areas adjacent to them. This is not acceptable to existing residents and is likely to cause some problems with the future residents too, who may arguably feel aggrieved that the road funding associated with their developments is being subverted to other areas. While this may be permissible under the revised CIL regulations it is questionable whether it is morally acceptable to grant planning permission to build on the Green Belt in order to cross subsidise the building of roads or other infrastructure in the town centre or elsewhere across the borough or outside it.

Insetting of villages and the proposed relaxation of planning restrictions anywhere outside settlements (Green Belt or not), implied in P2, will lead to substantial infilling that will not require traffic assessment but will contribute a highly significant amount of additional car journeys overall - by a more insidious process than the large developments proposed.

Costs for rail or bus travel could be substantially reduced and would incentivise their use; but these are outside the remit of GBC and so cannot be encouraged by them.

It remains to be seen whether the proposed new stations will be delivered as they are not entirely within the council’s control. While we welcome the intention to encourage rail travel by adding two new stations there could be unintended consequences as the roads local to both sites are heavily congested. If parking facilities are inadequate this could lead to a need for onerous parking restrictions on roads nearby – possibly affecting small businesses adversely.

If parking facilities are adequate this will encourage more traffic onto local roads and commuters tend to be hurrying to catch a train or anxious to return home after a day at work. That does not bode well for the safety of pedestrians needing to cross those roads. House prices near to stations tend to attract higher prices and this will increase the profit motive to developers wanting to build on greenfield sites nearby. It will also mean that so-called affordable housing will be even less affordable at these sites. It may also lead, over time, to an undesirable loss of social-rented housing in the vicinity. A minor issue is that stopping at the additional stations will increase the train journey times to and from Guildford town centre on the lines affected.

Detail in Policy wording – flawed drafting:

The policy begins and ends with the weak and totally ineffective word, in planning terms, “expect”.

Contributing through CIL will not necessarily address needs local to the development concerned, and created by it, but may involve solving existing problems elsewhere in the Borough.

Bullets 4 & 5 – improvements to park and ride facilities imply increased car usage from outside the town and the parking provision acknowledges that most journeys will be by car.
Bullet 6 - Has the Vehicle parking Supplementary Planning Document been published? It is not listed as key evidence but the policy refers. How can a policy have been determined with reference to a non-existent part of the evidence base?

Bullets 7, 8, 9 & 10 are weak & aspirational with let-out words such as “facilitate the use of”, “wherever possible”, “contribute” and “where appropriate” (and poorly bulleted!). How will the use of ultra low emission vehicles be facilitated? This is such a vague aspiration as to be meaningless.

The policy only “expects” new developments to contribute, demonstrate adequate provision, etc – it should enforce them. A transport statement AND assessment ought to be a fixed requirement – not a matter for negotiation – while the policy implies that this might be waived even for sites that generate significant amounts of movement.

The construction traffic, noise and pollution generated by meeting the proposed housing number will be excessive. It will have a highly significant impact on the amenity and health of those residents living close to the development sites and those who live on the routes that will be taken by the construction traffic.

The last paragraph says nothing new in planning terms but does mean that the Local Plan has not fully and properly considered the traffic impacts of the proposed sites. We have experience of how misleading the TAs produced by developers can be – using averaging techniques and understated baseline figures, days when schools are not operating and many other devices to pull the wool over the eyes of planning authorities. This aspect is a denial of responsibility by GBC. The result is that Green Belt and countryside will be released for development when fuller consideration of traffic impacts at the Local Plan stage should have prevented that. If the planning authority is taken in by developers’ TAs then wholly unsuitable developments will be permitted.

Introduction:

The spatial development strategy (paragraph 4.6.20 and Policy S2) does not address the development needs of the borough ensuring distances are practical; this is certainly not the case with all the development sites. For example, the Wisley airfield site will generate a massive increase in vehicle journeys; developments in West Horsley will lead to greater car use, as will the proposed developments at Garlick’s Arch and in Send. The obvious site choice for sustainable development would be on brownfield sites in the town but the Local Plan proposes allocating those sites to the declining retail industry instead.

Paragraph 4.6.21 suggests that sustainable transport is promoted. Far from providing sustainable transport this Plan will generate a massive increase in motor vehicle journeys. The Plan cannot force residents to ride bicycles or walk everywhere.

Justification:

Paragraph 4.6.22 seeks to set out a reasoned justification and alleges that development should offer real travel choice by sustainable transport modes. There is little sign that this is being taken seriously enough now.

Paragraph 4.6.23 proposed to bring forward a Vehicle Parking Supplementary Planning Document. It is not clear what to make of this. Failure to provide off-street vehicle parking will not prevent residents owning cars and finding somewhere else to park but it may make life difficult for key workers to commute to their place of work. How can a consultation take place relying on non-existent background documents which are key parts of the Evidence Base? How can anyone comment on non-existent documents, and even if brought forward part-way through the consultation, any comments will be prejudiced by the absence of this informing the start of the consultation.

Paragraph 4.6.24 refers to the Sustainable Movement Corridor. Bus services are aspirational but economic reality may mean that they fail to persist. There is not enough detail published on how the SMC will be delivered – suggesting that it is aspirational rather than fully thought through.

Paragraph 4.6.26 refers to reviewing existing transport facilities and likely transport generation as part of assessing the amount of incremental travel demand. That consideration should have taken place in a robust and detailed manner on a site-by-site basis before the sites were allocated in the Local Plan. It is not sufficient to leave that until the planning application stage as intended by GBC and SCC, given that all sites will be subject to “permission in principle” under the Housing and Planning Act 2016 and so will not be capable of subsequent rejection on these grounds.
Paragraph 4.6.27 notes that Development must mitigate its transport impacts. The measures described rely entirely on people taking them up and not dumping their travel information packs in the nearest bin. It is clear that GBC, in response to concerns about elderly and disabled people failing to be coerced into riding bicycles are now suggesting tricycles to overcome this obstacle to their aspirations. They should be aware that while tricycles may help with balance issues they are heavier and harder to ride uphill. While the policy (unusually) notes that mitigation must be provided, in fact this is then diluted to suggest that facilities for electric car charging points and encouragement to car-share can be sufficient; all are optional and therefore meaningless.

However well designed a development is it will make matters worse during construction and if on a greenfield site, it is hard to see how it will achieve environmental benefits. On the other hand, replacing inefficient buildings on a brownfield site could lead to benefits in the long term.

Paragraph 4.6.28 notes “Developers should have regard” to the “Infrastructure Schedule at Appendix C”. The only thing that developers have regard for is forcing their application through and maximising their profit – that is the business they are in. Appendix C is lacking in detail. It notes, for example that there will be new town centre bus facilities at a cost of £5-10million – such vagueness make it clear that no real costing or analysis of proposals has been prepared, and that the Infrastructure improvements proposed have not been properly considered. Having regard to fluid and uncertain proposals is effectively meaningless as a constraint or a requirement.

Paragraph 4.6.29 requires that applications need to address the transport implications of the proposed development. Experience with recent planning applications suggests that developers will do everything in their power to understate transport impacts and we have no faith in GBC and SCC taking a sufficiently robust line on this.

Key Evidence is missing or inadequate.

The Strategic Transport Assessment (SCC 2016) is listed as “forthcoming”, but this plan has been produced in the absence of any strategic transport review.

There are further inadequacies in the Evidence Base, highlighted in the following annexes, which include examples of deficiencies, ambiguities and inadequacies in the transport and infrastructure evidence. This is not a comprehensive list of deficiencies, but serves as an illustration of the poor evidence on which decisions have been based.

Annexe 1

Comments on Guildford Borough Transport Study 2016

Page 2 – “address the historic infrastructure deficit” - developers are not required to do this?

Page 2 – It is wrong to claim that the cycle infrastructure along the A25 is good – and many cyclists are not careful, so putting them in contention with pedestrians is not a good idea.

Page 5 – The decision on Heathrow or Gatwick has yet to be taken but airport expansion in the south-east cannot be regarded as sustainable development and, although GBC has no control over such external decisions, its own growth agenda will drive a need for that expansion.

Page 6 An additional weakness is alternative “road closure diversion” routes for the SRN on the LRN

Page 6 Are the “Committed Improvements” actually committed and guaranteed to be delivered?

Page 7 The rail strategy does not provide for Wisley (residents would drive to stations)

Page 7 How long will it take to deliver Crossrail 2? “We hope that Crossrail 2 could be operational by 2030, but we are in the very early stages of planning and no decision to build it has been made.”

Page 7 Guildford platform capacity still many years away if ever.
Page 7 The rail strategy anticipates many improvements that have not been secured and may have unintended consequences if they proceed (see above)

Page 7 The Southern Rail Access to Heathrow ##[see the feasibility study dated December 2015 – although other proposals may be put forward (e.g. by Hounslow)]## is still in its early stages and would have significant impacts on open space beyond our Borough. For example, all options in the feasibility study would use Staines Moor SSSI and Option 4 would use Bedfont Lakes Country Park (a Local Nature Reserve and SNCI).

The various options would use existing commercial, residential and highways land in varying degrees. It seems unlikely that a solution will be delivered within the Plan period and removal of highly valued open space with high biodiversity (wherever it is in South-east England) cannot be regarded as sustainable.

Page 10 and 13 There is a stark contrast between the plans for the town centre which involve encouraging a reduction in traffic by reducing roadspace and the plans for the SRN and parts of the LRN which involve increasing capacity. While increasing capacity may reduce some areas of congestion in the short term, history suggests that traffic will rapidly grow until the improved roads are congested once again. This can hardly be regarded as sustainable. A sustainable option would be to apply a very substantial traffic infrastructure constraint on the housing number.

Page 10 While the A3 Guildford Tunnel aspiration has some environmental advantages over widening (in particular for residents living close to the A3), the environmental burden of the construction phase will be far higher and aspects such as location of ventilation stacks and their local effect (in all weather conditions) do not appear to have been considered.

Page 14 Under Weaknesses the point about A roads in Guildford Town also applies to surrounding areas in the Borough and beyond. The anticipated improvements ignore existing congestion to the south and east of Guildford – presumably because SCC’s transport assessment methodology only identifies the tip of the iceberg. The current Plan will see increased congestion and a resultant reduction in air quality in many areas beyond the town centre.

Page 16 “Largely commercial bus services” is seen as a strength whereas it should be seen as a weakness with a trend to reduced subsidies and the provision of bus services, especially in rural areas, being increasingly dependent on commercial gain. It is difficult to see this changing under the current Government cuts philosophy. The point “Subject to business case including funding” under Aspirations demonstrates this point.

Page 18 We welcome the aspiration to “Expand the public realm through significantly extended pedestrian-priority areas”

Page 19 Guildford is well behind other areas in monitoring air quality let alone attempting to reduce it.

The introduction talks about reductions in some pollutants. This may be the case for pollutants such as Sulphur Dioxide, which contributed to the visible London smogs, but it is not true of diesel vehicle emissions which have increased as a result of Government policy including its aggressive growth agenda and population increase through immigration. 30 accessible electric vehicle charging points are only an aspiration and will be nowhere near enough if there is a real shift to electric vehicles.

It is clear from the “Strategy outcomes” that GBC would prefer not to follow other areas in pro-actively tackling air quality.

Page 22/23/24 The timescales indicate that the main rail improvements (Including the two new stations) are unlikely to be delivered until the end of the Plan period or even later. The sites that are supposedly justified by their inclusion will generate a major increase in road traffic in the interim and it may be more difficult to achieve this aspect of modal shift in the longer term. The same can be said about the other traffic infrastructure proposals. Residential development is being scheduled before the infrastructure that it will need.

Page 24 Monitoring – “Increase” needs to be in proportion to population growth as otherwise failure will taken as success. “An Increase in average vehicle speeds” is inconsistent with the desire to reduce the number of persons killed or seriously injured. For example, some A roads pass through residential areas where pedestrians, including schoolchildren, are trying to cross the road at peak times. It is noted that increase in vehicle speeds is only desired in the morning. Going home from work does not seem to matter!
Annexe 2

GTAMS

NPPF and NPPG The Plan ignores the points concerning Green Belt and protecting the environment. GBC have tried to get round this by spinning their messages and using misleading statistics including a major understatement of the area of Green Belt to be removed.

Planning Update (March 2015) – The point in this update concerning Green Belt has been ignored

Monitoring Indicators:

Ten years is far too long to wait for information on whether the approach is working or not. The target requires only an increase. This would permit an increase less than that in line with any population growth to be regarded as success. The bar has been set well within the failure range.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E4: Surrey Research Park

Response

Summary

I support the maintenance of research, development and design activities, in any science, including social science, that is complementary to the activities of the University of Surrey at the Surrey Research Park. I do not believe that there is a need to expand the Research Park into a larger Business Park. I believe that the planning policy going forward for the Surrey Research Park should be to maintain and enhance the integrity of its research base allowing for the economic value add to the local economy of knowledge and technology transfer from the University. I believe that B1b (should be the primary use class for the Research Park and that applications for B1a should be resisted due to the danger of dilution of the core purpose and reputation of the park. I do not believe the inclusion of B1c uses is appropriate or necessary.

Detailed response:
- Research parks based on the early UK technology transfer exemplars of the Cambridge and Oxford need careful monitoring, nurturing and protection to ensure the integrity and quality of the park is maintained and the park continues to be a destination for innovation and enterprise.

- There is a danger for research parks to be overwhelmed by short sighted development opportunities being taken by park managers provided by standard office activities and administrative functions which in time turn them into standard business parks which can be found anywhere in the country. Their relative low density and attractiveness make them targets for "any other" office user.

- Research parks that lose their way stop being the location of choice for new innovative enterprises.

- The Surrey Research Park in Guildford needs to be focussed on a broad spectrum of scientific research including computer science, bio-chemistry, design, space-science, eco-science, health science, software development, laser technology, media-science, artificial intelligence, robotics and super-manufacturing.

- Monitoring indicators should include new start-ups and new patents created.

- Facilities should be provided whereby new small businesses can secure premises under subsidised licence fee arrangements with no onerous rent or lease commitments.

- I support the idea of a variety of sizes of unit including some small units (between 15 – 80 sq m) bearing in mind one workstation is 10 sq m.

- Consideration should be given to the concept of shared “enterprise hubs” where individuals can take pay as you go workstations in shared spaces similar to touch down business centres similar to the “enterprise village” concept.

- I do not support the policy of a new extension of the research park more than the existing 14% already provided for within the park.

- The Surrey Research Park currently extends to 65,000 sq m.

- There is already granted consent to expand to a further 9,000 sq m (14%) This space has been available for 10 years and is still to find a taker.

- The past trend of expansion of Office/R &D is 0.43% pa over the period from 2004 to 2012 based on ELNA 2015 derived from VoA analysis.

- The ELNA 2015 calculated annual floor space demand is 0.7%.

- The data point for our analysis is today in 2016 so we have 17 years to go to the end of the plan period.

- The necessary growth in floor space over the plan period is therefore 17 years x 0.7 = 12% which is less than the current expansion space of 14%.

Nature Conservation value of the site is protected or improved.

In relation to the Target there is no evidence of a justified need for additional B1a and c use. I consider that the existing land, used efficiently, will accommodate realistic expansion of B1b uses for high tech added value purposes. Existing planning permissions must be built before any additional green belt land is earmarked for development. The target of 35,000 sq metres of additional employment land are not justified by the evidence base.

I regard the evidence base (Employment Land Needs Assessment 2015) as flawed and inconsistent and therefore unreliable evidence.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to policy E4 Surrey research Park.

We support the maintenance of research, development and design activities, in any science, including social science, that is complementary to the activities of the University of Surrey at the Surrey Research Park. However, we do not believe that there is a need to expand the Research Park into a larger Business Park. We believe that the planning policy going forward for the Surrey Research Park should be to maintain and enhance the integrity of its research base allowing for the economic value add to the local economy of knowledge and technology transfer from the University. We believe that B1b (should be the primary use class for the Research Park and that applications for B1a should be resisted due to the danger of dilution of the core purpose and reputation of the park. We do not believe the inclusion of B1c uses is appropriate or necessary.

- Research parks based on the early UK technology transfer exemplars of the Cambridge and Oxford need careful monitoring, nurturing and protection to ensure the integrity and quality of the park is maintained and the park continues to be a destination for innovation and enterprise.
- There is a danger for research parks to be overwhelmed by short sighted development opportunities being taken by park managers provided by standard office activities and administrative functions which in time turn them into standard business parks which can be found anywhere in the country. Their relative low density and attractiveness make them targets for “any other” office user.
- Research parks that lose their way stop being the location of choice for new innovative enterprises.
- The Surrey Research Park in Guildford needs to be focussed on a broad spectrum of scientific research including computer science, bio-chemistry, design, space-science, eco-science, health science, software development, laser technology, media-science, artificial intelligence, robotics and super-manufacturing.
- Monitoring indicators should include new start-ups and new patents created.
- Facilities should be provided whereby new small businesses can secure premises under subsidised licence fee arrangements with no onerous rent or lease commitments.
- We support the idea of a variety of sizes of unit including some small units (between 15 – 80 sq m) bearing in mind one workstation is 10 sq m.
- Consideration should be given to the concept of shared “enterprise hubs” where individuals can take pay as you go workstations in shared spaces similar to touch down business centres similar to the “enterprise village” concept.
- We do not support the policy of a new extension of the research park more than the existing 14% already provided for within the park.
- The Surrey Research Park currently extends to 65,000 sq m.
- There is already granted consent to expand to a further 9,000 sq m (14%) This space has been available for 10 years and is still to find a taker.
The past trend of expansion of Office/R &D is 0.43% pa over the period from 2004 to 2012 based on ELNA 2015 derived from VoA analysis.

The ELNA 2015 calculated annual floor space demand is 0.7%.

The data point for our analysis is today in 2016 so we have 17 years to go to the end of the plan period.

The necessary growth in floor space over the plan period is therefore 17 years x 0.7 = 12% which is less than the current expansion space of 14%.

Nature Conservation value of the site is protected or improved.

In relation to the Target there is no evidence of a justified need for additional B1a and c use. We consider that the existing land, used efficiently, will accommodate realistic expansion of B1b uses for high tech added value purposes. Existing planning permissions must be built before any additional green belt land is earmarked for development. The target of 35 000 sq metres of additional employment land are not justified by the evidence base.

We regard the evidence base (Employment Land Needs Assessment 2015) as flawed and inconsistent and therefore unreliable evidence.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E5: Rural Economy

Response

Summary

This policy should only apply to small-scale development in rural areas which means development of less than 100 sq m (gross) which is in keeping with and the permanence and amenity of the green belt.

Use of rural areas for town centre uses without applying the sequential approach is against the principles of localism which mean that local people should be consulted – and heeded (not ignored!). Villages need protecting both in terms of design and in terms of scale.

Previous commitments to improved high-speed broadband and mobile phone coverage have now been diluted, despite general support. This is disregarding the responses from the previous consultation.
Detailed response:

It should be noted that the NPPF “provides a framework within which local people and their accountable councils can produce their own distinctive local and neighbourhood plans which reflect the needs and priorities of their communities.” (NPPF 1).

Guildford becoming a Growth Hub was NOT in the election manifesto. This policy was mentioned only tangentially in the corporate plan. Given Guildford’s poor transport links, noted congestion and the problems that this is perceived to cause for existing businesses, this does not seem an appropriate decision.

This radical, unsupported policy change is apparently in order to generate "growth" - although the possibility is that too much building over the areas that make Guildford Borough attractive will actually generate damage and stagnation, and cause a net decline in local affluence and growth. This risk has been highlighted by some local business leaders in the press.

In addition to NPPF 1, the Core Planning Principles set out in NPPF 17 include, as the FIRST (and therefore most important) principle, that “planning should:

· Be genuinely plan-led, empowering local people to shape their surroundings, with succinct local and neighbourhood plans setting out a positive vision for the future of the area”.

Furthermore, if this were not enough, in the section on Plan-making, NPPF 155 states:

“Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. [It is not clear that early collaboration with prospective developers is either required or legal]. A wide section of the community should be proactively engaged so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made”.

Local People are supposed to be represented within the NPPF, and any plan which does not meet with the consent of local people is arguably unsound. The failure to amend a plan following consultation, and to take the points made into account, is arguably in breach of NPPF and is therefore at risk of consequential challenge. A policy that is unsupported by the local community should be considered to be unsound.

It is arguable that GBC is arguing aggressively for a pro-development strategy in relation to villages and the Green Belt and mis-stating national policy as a result.

Many of the proposed “main town centre” uses would not be appropriate either to the Green Belt or villages within it - indoor bowling, casinos, warehouses etc. would not be appropriate for most villages in Surrey.

The provision and take up of reliable and high speed broadband, and the increased impact of home working and smart working are welcomed. Access to high speed broadband as a priority is welcomed and this is one of few aspects of the LEP’s policy that is welcomed in relation to the rural environment.

In this context, it seems entirely inappropriate that a monitoring indicator is net additional employment floorspace completed by category. “Smart” and home-working do not involve incremental floorspace and to evaluate incremental economic growth by the size of floorspace allocated is an inappropriate measure in the Green Belt. By definition such work uses do not require space. It is important to recognize – as this Local Plan does not – that the main employment within the countryside is related to that countryside, whether due to agriculture, tourism (so that “unproductive” or open space land has a positive economic impact too), film, or ancillary activities related to the above, and that to reduce the countryside footprint by building sites is to reduce economic land. The only use of land that has no ongoing positive impact for the community is to use it as a building site, whereupon it is lost in terms of ongoing economic benefit to all except the future owners.

NPPF 17 requires that local authorities “always seek to secure high quality design and a good standard of amenity for all existing and future occupants of land and buildings”, and that they “take account of the different roles and character of
different areas, promoting the vitality of our main urban areas, protecting the Green Belts around them, recognizing the intrinsic character and beauty of the countryside and supporting thriving communities within it”. To appraise building within the Green Belt merely in terms of numbers of buildings or net additional floorspace does not meet the requirements of those principles.

The rural areas currently have a vibrant and strong economy, and building should not be regarded as a major objective. Existing agriculture, food production, tourism and film industries rely on our existing countryside, and to substitute these by building warehouses, commercial space or even processing space for ancillary agricultural processing will be to damage the environment for no economic gain. The loss of agricultural land is to be avoided; food security is an increasingly important factor in a congested island with an increasingly population based in the temperate zone so that it can supply food without climate stress; as noted by Cambridge University we will need more food producing land, not less, over the next few decades (see study attached to previous submission, disregarded).

Villages should be protected; new building in villages should be within the existing settlement boundaries, and new settlement boundaries should only reflect the historic changes of the settlement areas; building should not extend into the open countryside of the Green Belt; and new building should focus on brownfield sites within the urban areas.

I support the proposal for high speed broadband but are disappointed that the previous reference to this specifically “Provision and take-up of reliable and high speed broadband has been a major issue reported by rural businesses. Access to key services vital for economic growth is often poor in rural areas. Slow broadband and inadequate and slow mobile phone coverage are constraints to economic development” has now been modified to refer only to “provision of internet services where needed in rural areas and enhance digital inclusion in such areas”. This must be modified to read “provision of high speed internet services and reliable mobile phone coverage to all rural areas etc”. In the prior consultation, a matter that was warmly welcomed by most respondents has now been significantly weakened.

I agree that high speed broadband is a desirable attribute for the wider economy, and that this is particular lacking in the rural areas of Guildford. However, its introduction should lead to an increase in smart home-working, rather than the building of additional employment space. The policy needs to include a commitment to get super fast broadband accessible by all residents in the borough as this will provide much greater support to rural industry than anything else.

In this context, a monitoring indicator of “Number of sq m of B Class floorspace permitted and completed in rural wards” is fundamentally wrong; the indicator used for monitoring should be independent of land use, or this creates a perverse incentive to build on land. It should be related to real economic growth – for example, incremental corporation and personal tax income generated by businesses and individuals based within the borough.

Furthermore, as ever, the urban-guided planning philosophy also entirely fails to recognize the real phenomenon of rural employment. Some of this is genuine “smart” growth of the kind that the council ought to be promoting, and states that they are keen to encourage. Faster broadband, where it exists, is a genuinely useful tool which allows remote working for the highly educated populace. The University of Surrey generates a significant proportion of this highly skilled group. It also boasts about the highly skilled external population and the high calibre of local residents in its publicity material. The Surrey Hills AONB is proud to be classified by government as an “Elite Employment Enclave” where a high proportion of around 40% of households include a company director; such groups can often work flexibly. However, too much industrialization, commercialization and physical building in a rural environment will result in a change in the environment that attracts these flexible and affluent members of the community, and would result in these same groups moving to a more desirable and pleasant location. This would have a negative impact on the local economy. This consideration, while noted in public meetings in relation to the Surrey Hills by the Surrey Hills AONB board, has a general application to the borough as a whole.

In addition to smart-working among an educated group, and its economic upside, there is the fact that the rural area is founded on an agricultural framework that has persisted for two thousand years and is a viable, successful and profitable series of businesses. The land on which GBC proposes to build is viable and profitable agricultural land which supports existing businesses. Some of these are simple farms, producing food which our country needs. This should not be underestimated. The University of Cambridge has noted a significant decline in the UK’s food security or ability to feed itself – a significant factor in an era of increased climate change and global insecurity. This report, produced in
conjunction with a number of other groups including CLA (Country Landowners’ Association), NFU (National Farmers’ Union), Sainsbury’s, Asda and Nestlé noted that the UK would require up to 7 million hectares more agricultural land to meet the country’s needs for food by 2030, roughly the period covered by the plan. To replace valuable and necessary agricultural land with storage depots or warehouses which will make the environment unpleasant for residents, destroy viable agricultural businesses, and that are likely to remain empty and unprofitable unless they undercut existing viable depots elsewhere, seems to benefit only those who build the depots.

While there is ostensible recognition of the importance of agriculture, this is subverted by suggesting that the provision of new and larger buildings is essential to agriculture and forestry. I would dispute this contention.

In addition to the essential business of food production, an increasing number of our farmers are engaged in high added value food processing and delivery, which is also an extremely profitable business and of growing local interest. This does not, however, necessitate large scale building. The Surrey Hills label is helpful in this regard, as is noted in the context of the policy. Silent Pool gin and sparkling wine, The Tillingbourne Trout Farm, the Kingfisher Watercress beds, the raising of beef, lamb, pork, and poultry in the Surrey Hills at Drydown Farm or Manor Farm; the Hog’s Back brewery, fruit grown throughout the borough and many other businesses are of enormous significance to the borough and should be encouraged. It will be harder to cultivate a label advertising premium quality organic food from the North Downs if Guildford becomes known principally as a storage or warehousing area.

Economic growth is indeed needed by the country. Some of that growth is perhaps needed in Surrey, although we already produce a disproportionate share of the national wealth and are the most densely populated rural county. Many would argue that this is not an appropriate destination for economic pump-priming and that areas which have more need of employment, (for example in the Black Country, the North West, the North East or Wales) would be better recipients of public finance to encourage economic growth. We don’t particularly want it; we don’t particularly need it; and we are trying to cope with the organic growth we have, we certainly don’t need to stimulate it further. The unelected and undemocratic M3 LEP has a stated agenda, evidenced by its minutes (subsequently expurgated), of actively influencing government policy in relation to housebuilding; and this is perhaps because house builders sit on the Land and Property Group of the M3 LEP. This constitutes an unacceptable conflict of interest.

The ability to generate wealth is not related to the size or number of warehouses built. This is unintelligent and old thinking – wealth is not related to the size of storage space. The monitoring of sq m of B class floorspace completed in rural wards is entirely inappropriate.

The Key Evidence summary notes that the evidence base includes the Guildford Borough Rural Economic Strategy which is yet to be published and therefore (by definition) cannot have informed this policy or the decisions which have been taken in order to arrive at it. To determine a policy on the basis of a non-existent evidence base, which is only provided (or indeed drafted) post hoc, must be legally indefensible.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We **object** to policy E5 Rural Economy

This policy should only apply to small-scale development in rural areas which means development of less than 100 sq m (gross) which is in keeping with and the permanence and amenity of the green belt.

Use of rural areas for town centre uses without applying the sequential approach is against the principles of localism which mean that local people should be consulted – and heeded (not ignored!). Villages need protecting both in terms of design and in terms of scale.

Previous commitments to improved high-speed broadband and mobile phone coverage have now been diluted, despite general support. This is disregarding the responses from the previous consultation.

It should be noted that the NPPF “provides a framework within which local people and their accountable councils can produce their own distinctive local and neighbourhood plans which reflect the needs and priorities of their communities.” (NPPF 1).

Guildford becoming a Growth Hub was NOT in the election manifesto. This policy was mentioned only tangentially in the corporate plan. Given Guildford’s poor transport links, noted congestion and the problems that this is perceived to cause for existing businesses, this does not seem an appropriate decision.

This radical, unsupported policy change is apparently in order to generate "growth" - although the possibility is that too much building over the areas that make Guildford Borough attractive will actually generate damage and stagnation, and cause a net decline in local affluence and growth. This risk has been highlighted by some local business leaders in the press.

In addition to NPPF 1, the Core Planning Principles set out in NPPF 17 include, as the FIRST (and therefore most important) principle, that “planning should:

- Be genuinely plan-led, **empowering local people to shape their surroundings**, with succinct local and neighbourhood plans setting out a positive vision for the future of the area”.

Furthermore, if this were not enough, in the section on Plan-making, NPPF 155 states:

“Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. [It is not clear that early collaboration with prospective developers is either required or legal]. A **wide section of the community should be proactively engaged so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made**.”

Local People are supposed to be represented within the NPPF, and any plan which does not meet with the consent of local people is arguably unsound. The failure to amend a plan following consultation, and to take the points made into account, is arguably in breach of NPPF and is therefore at risk of consequential challenge. A policy that is unsupported by the local community should be considered to be unsound.

It is arguable that GBC is arguing aggressively for a pro-development strategy in relation to villages and the Green Belt and mis-stating national policy as a result.

Many of the proposed “main town centre” uses would not be appropriate either to the Green Belt or villages within it - indoor bowling, casinos, warehouses etc. would not be appropriate for most villages in Surrey.

The provision and take up of reliable and high speed broadband, and the increased impact of home working and smart working are welcomed. Access to high speed broadband as a priority is welcomed and this is one of few aspects of the LEP’s policy that is welcomed in relation to the rural environment.

By definition such work uses do not require space. It is important to recognize – as this Local Plan does not – that the main employment within the countryside is related to that countryside, whether due to agriculture, tourism (so that “unproductive” or open space land has a positive economic impact too), film, or ancillary activities related to the above, and that to reduce the countryside footprint by building sites is to reduce economic land. The only use of land that has no ongoing positive impact for the community is to use it as a building site, whereupon it is lost in terms of ongoing economic benefit to all except the future owners.

NPPF 17 requires that local authorities “always seek to secure high quality design and a good standard of amenity for all existing and future occupants of land and buildings”, and that they “take account of the different roles and character of different areas, promoting the vitality of our main urban areas, protecting the Green Belts around them, recognizing the intrinsic character and beauty of the countryside and supporting thriving communities within it”. To appraise building within the Green Belt merely in terms of numbers of buildings or net additional floorspace does not meet the requirements of those principles.

The rural areas currently have a vibrant and strong economy, and building should not be regarded as a major objective. Existing agriculture, food production, tourism and film industries rely on our existing countryside, and to substitute these by building warehouses, commercial space or even processing space for ancillary agricultural processing will be to damage the environment for no economic gain. The loss of agricultural land is to be avoided; food security is an increasingly important factor in a congested island with an increasingly population based in the temperate zone so that it can supply food without climate stress; as noted by Cambridge University we will need more food producing land, not less, over the next few decades (see study attached to previous submission, disregarded).

Villages should be protected; new building in villages should be within the existing settlement boundaries, and new settlement boundaries should only reflect the historic changes of the settlement areas; building should not extend into the open countryside of the Green Belt; and new building should focus on brownfield sites within the urban areas.

We support the proposal for high speed broadband but are disappointed that the previous reference to this specifically “Provision and take-up of reliable and high speed broadband has been a major issue reported by rural businesses. Access to key services vital for economic growth is often poor in rural areas. Slow broadband and inadequate and slow mobile phone coverage are constraints to economic development” has now been modified to refer only to “provision of internet services where needed in rural areas and enhance digital inclusion in such areas”. This must be modified to read “provision of high speed internet services and reliable mobile phone coverage to all rural areas etc”. In the prior consultation, a matter that was warmly welcomed by most respondents has now been significantly weakened.

We agree that high speed broadband is a desirable attribute for the wider economy, and that this is particular lacking in the rural areas of Guildford. However, its introduction should lead to an increase in smart home-working, rather than the building of additional employment space. The policy needs to include a commitment to get superfast broadband accessible by all residents in the borough as this will provide much greater support to rural industry than anything else.

In this context, a monitoring indicator of “Number of sq m of B Class floorspace permitted and completed in rural wards” is fundamentally wrong; the indicator used for monitoring should be independent of land use, or this creates a perverse incentive to build on land. It should be related to real economic growth – for example, incremental corporation and personal tax income generated by businesses and individuals based within the borough.

Furthermore, as ever, the urban-guided planning philosophy also entirely fails to recognize the real phenomenon of rural employment. Some of this is genuine “smart” growth of the kind that the council ought to be promoting, and states that they are keen to encourage. Faster broadband, where it exists, is a genuinely useful tool which allows remote working for the highly educated populace. The University of Surrey generates a significant proportion of this highly skilled group. It also boasts about the highly skilled external population and the high calibre of local residents in its publicity material. The
Surrey Hills AONB is proud to be classified by government as an “Elite Employment Enclave” where a high proportion of around 40% of households include a company director; such groups can often work flexibly. However, too much industrialization, commercialization and physical building in a rural environment will result in a change in the environment that attracts these flexible and affluent members of the community, and would result in these same groups moving to a more desirable and pleasant location. This would have a negative impact on the local economy. This consideration, while noted in public meetings in relation to the Surrey Hills by the Surrey Hills AONB board, has a general application to the borough as a whole.

In addition to smart-working among an educated group, and its economic upside, there is the fact that the rural area is founded on an agricultural framework that has persisted for two thousand years and is a viable, successful and profitable series of businesses. The land on which GBC proposes to build is viable and profitable agricultural land which supports existing businesses. Some of these are simple farms, producing food which our country needs. This should not be underestimated.

The University of Cambridge has noted a significant decline in the UK’s food security or ability to feed itself – a significant factor in an era of increased climate change and global insecurity. This report, produced in conjunction with a number of other groups including CLA (Country Landowners’ Association), NFU (National Farmers’ Union), Sainsbury’s, Asda and Nestlé noted that the UK would require up to 7million hectares more agricultural land to meet the country’s needs for food by 2030, roughly the period covered by the plan. To replace valuable and necessary agricultural land with storage depots or warehouses which will make the environment unpleasant for residents, destroy viable agricultural businesses, and that are likely to remain empty and unprofitable unless they undercut existing viable depots elsewhere, seems to benefit only those who build the depots.

While there is ostensible recognition of the importance of agriculture, this is subverted by suggesting that the provision of new and larger buildings is essential to agriculture and forestry. We would dispute this contention.

In addition to the essential business of food production, an increasing number of our farmers are engaged in high added value food processing and delivery, which is also an extremely profitable business and of growing local interest. This does not, however, necessitate large scale building. The Surrey Hills label is helpful in this regard, as is noted in the context of the policy. Silent Pool gin and sparkling wine, The Tillingbourne Trout Farm, the Kingfisher Watercress beds, the raising of beef, lamb, pork, and poultry in the Surrey Hills at Drydown Farm or Manor Farm; the Hog’s Back brewery, fruit grown throughout the borough and many other businesses are of enormous significance to the borough and should be encouraged.

Economic growth is indeed needed by the country. Some of that growth is perhaps needed in Surrey, although we already produce a disproportionate share of the national wealth and are the most densely populated rural county. Many would argue that this is not an appropriate destination for economic pump-priming and that areas which have more need of employment, (for example in the Black Country, the North West, the North East or Wales) would be better recipients of public finance to encourage economic growth. We don’t particularly want it; we don’t particularly need it; and we are trying to cope with the organic growth we have, we certainly don’t need to stimulate it further. The unelected and undemocratic M3LEP has a stated agenda, evidenced by its minutes (subsequently expurgated), of actively influencing government policy in relation to housebuilding; and this is perhaps because housebuilders sit on the Land and Property Group of the M3 LEP. This constitutes an unacceptable conflict of interest.

The ability to generate wealth is not related to the size or number of warehouses built. This is unintelligent and old thinking – wealth is not related to the size of storage space. The monitoring of sq m of B class floorspace completed in rural wards is entirely inappropriate.

The Key Evidence summary notes that the evidence base includes the Guildford Borough Rural Economic Strategy which is yet to be published and therefore (by definition) cannot have informed this policy or the decisions which have been taken in order to arrive at it. To determine a policy on the basis of a non-existent evidence base, which is only provided (or indeed drafted) post hoc, must be legally indefensible.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy E6: The leisure and visitor experience

Summary

I OBJECT. Tourism and visitors do not depend on new visitor attractions and facilities – and these may undermine the area. Overdevelopment is a risk especially in the countryside.

- I believe that the importance of a visitor attraction hub could be much better articulated. Guildford has great potential to become a “must see” destination for tourists and visitors. Surrounded by the natural beauty of the Surrey Hills, it is already distinguished as an historic town. The historic part of the town should be exploited to the full creating a real sense of vibrancy and atmosphere. This should be linked to the attractions of the Museum, the Castle, the Wey and the historic High Street including its views of the Hogs Back. Guildford would be wise to model itself on other historic towns like Bath, Chester and York. The economic impact would create big advantages for both the local niche speciality retail sectors in the town. Given the local and wider catchment of the town Guildford should strive for high quality definition making it a great centre for people to live in and visit. It would be a great mistake if Guildford were to opt for large impersonal department stores and dull high street chain stores at the expense of exploiting its uniqueness and character which would afford greater benefits.

- Guildford the historic “Gateway to the Surrey Hills” has far more potential than Guildford just any other stereotypical centre found anywhere around London. What GBC needs to do is create a theme such as a new “Pilgrims Trail” similar to the Patriots trail in Boston USA with marked yellow footsteps leading from the station to the River and up through the historic heart of the town.

Detailed response:

The importance of tourism and leisure within the borough is acknowledged by GBC, and thus far this policy is welcomed. Thus far, the principles underlying this policy are given measured and qualified support. However, the emphasis however on development in order to facilitate tourism seems fundamentally misguided, and, as in other areas of the plan, seems to regard both the planning function and local government as a whole as the marketing and sourcing department of the building and civil engineering industries. This is inappropriate and therefore this element merits objection on an overall basis.

It should be noted that Tourism is one of the major industries in the country. Visit Britain notes: “Since 2010 tourism has been the fastest growing sector in the UK in employment terms, responsible for one-third of the net increase in UK jobs between 2010 and 2012.

The report forecasts that the tourism economy will be worth around £127 billion this year (2013), equivalent to 9% of the UK’s GDP supports over 3.1 million jobs, that’s 9.6% of all jobs and 173,000 more than in 2010. The sector is predicted to grow at an annual rate through to 2025 - significantly faster than the overall UK economy (with a predicted annual rate of 3% per annum) and much faster than sectors such as manufacturing, construction and retail.”

In the context of the importance of the tourism sector, it is deeply shocking that there is so little care attached to this section of the local plan. The part of the local economy is likely to grow more quickly than any other sector of the economy, and the damage to the UK economy...
could result from unrestricted promotion of housing estates and warehouses should be calculated before growth is seen as a motivating force for development.

This area of England is important, and it is visited by tourists and visitors, not primarily because of tourist centres nor even because of other sites of significance such as Hatchlands Park, important though that National Trust sites may be.

The importance to the borough of the countryside qua countryside, embodying rural tourism, rural agriculture and its related impact on the local economy cannot be overstated. The contribution of the outstanding countryside in the borough (which is highly valued by walkers, cyclists and many others) has been disregarded.

In this part of England agriculture is prosperous and prospering; and the importance of the countryside to the country as a whole is enormous. Set out below are extracts from the submission to the Issues and Options consultation by the Burrows Cross Area Residents’ Association which indicates, just for the villages within the ward of Shere, some of the tourist sites which are of historic, cultural and tourist interest. These are illustrative only, and many other areas within the borough have equivalent points of local and regional interest. This is indicative of the level of information that should be considered for all areas throughout the borough, and that greenfield and Green Belt sites should be avoided wherever possible on these grounds, quite apart from any other environmental factors. It indicates some of the tourist significance of this area. It should be noted that tourism relies heavily on the agricultural and rural qualities of the landscape in the area, not just to visit particular sites but for walking and cycling on a routine basis.

It should also be noted that activities such as Duke of Edinburgh walks rely heavily on the North Downs for schools in most of the South West quadrant of London. These schools would not send parties of teenagers through the countryside every weekend of spring and early summer if the sites were overdeveloped. Walks along the nationally important North Downs Way or Pilgrims’ Way are of enormous popular importance to all sections of the community. These do not need “facilities” except the informal facilities of cafes, pubs and restaurants that exist within the villages.

Furthermore, it should be noted that the cycle trips that are of increasing national importance rely heavily on the Surrey countryside. The Olympic cycle route routed through the Surrey villages, through or past Ripley, Ockham, Clandon, Shere and Gomshall; subsequently followed by Ride Prudential, is regarded as the archetypal illustration of the English countryside at its best for an international audience. Lack of development is in itself a key element of the attraction to tourists, and this should not be disregarded as a key element of the planning process, which should constrain inappropriate development as much as it should promote development which is socially and environmentally desirable (e.g. in the renovation of brownfield sites).

Appendix:

Extracts from BCARA submission to issues and options consultation as an illustration of the level of tourist activity and areas of interest in rural areas:

NPPF 132 notes an obligation to restrict development in the vicinity of heritage assets. It has already been noted that heritage assets are significant in the villages of Shere (Norman church (1190), mediaeval village buildings (The Old Forge, The Old Prison, Weaver’s House, Wheelwright Cottage), many other listed buildings including the restaurant of Kinghams in a mediaeval building or The White Horse pub, filmed in The Holiday (tourism, local business)) and Gomshall (17th Mill, Tudor houses including the King John House, NT property and land at Netley House). The area also has bronze age hill forts, a Roman temple, High House Shere (1630, Grade 2 listed). This brief history of Shere (incorporated in full by reference) gives an indication of its historical importance: http://www.sheredelight.com/history.html

This website also gives an indication of the importance of the undamaged nature of the villages and the surroundings to an important industry, which is filming. See http://www.sheredelight.com/films.html. It should be noted that NPPF enjoins local authorities to consider the impact of development on any existing business, and that if this is adverse, then they should not give permission. The impact on the film industry of any development in this area should not be underrated. This would have a significantly negative impact on the local economy of the borough as a whole.

notes that the Manor of Gumesele was a Saxon feudal landholding; that Gomshall appears in Domesday Book of 1086 as Gomeselle. It was held by William.

In 1154, Henry II of England divided the Manor of Gumesele into three: West Gomshall (granted to an abbey in Netley so known as Netley after 1240), East Gomshall (granted to an Abbey in Tower Hill in 1376 so now known as Tower Hill) and Somersbury (now Gomshall). This demonstrates that the current boundaries of the village are recognizable from the Domesday book, and that this is in itself of cultural importance. To develop on land adjacent to these boundaries would be wholly inappropriate since that would be to alter the village boundaries that have lasted on a very long term basis as permanent and established features of the landscape, as required by NPPF.

Local industries developed based on the plentiful and constant water supply of the River Tillingbourne. Leather tanning is a historic industry, now gone. Gomshall Mill was the corn mill. Some other businesses based on the Tillingbourne survive, and would be damaged by over-development. These include watercress growing (at the Kingfisher Watercress Beds in Abinger) and trout farming (between Abinger and Gomshall, in the area bounded by this study – for both of which clean water is a particular essential ingredient. Damage the water supply and you will kill the business). In addition to these food suppliers, many of the local fields are farmed organically and contribute to the Surrey organic food brands (beef, lamb, pork). The importance of the agricultural industry should not be ignored; it is not reasonable to perceive that building a house is “growth” or “development” while destroying a farm or an agricultural business (which of course economically is negative growth). Those farms have a hugely positive tourist impact too.

The AA has prepared a walking guide of historical sites associated with Romans and Celts in this parish, http://www.theaa.com/walks/the-romans-and-celts-at-farley-421068

The area of Abinger Roughs and Netley Park is listed on the NT website; this link is incorporated into this section by reference: http://www.nationaltrust.org.uk/abinger-roughs-and-netley-park/how-to-get-here/?findPlace=Abinger%20Roughs%20and%20Netley%20Park&type=&view=map. The guide to the locality from the NT (see web link incorporated by reference) is relevant in the context of local wildlife, which are abundant throughout this parish not just in the area identified by the NT. http://www.nationaltrust.org.uk/cs/Satellite?blobcol=urldata&blobheader=application%2Fpdf&blobkey=id&blobtable=MungoBlobs&blobwhere=1349108282364&ssbinary=true

NPPF 126 notes that local authorities have a duty to recognise that heritage assets (and their setting) are an irreplaceable resource and that they have a duty to conserve them.

NPPF 123 notes that planning decisions should protect areas of tranquillity which have remained relatively undisturbed by noise and for their recreational and amenity value for this reason. In this locality the most prevalent noise is that of birdsong. It is not appropriate to consider this as a possible area for development.

NPPF 118 notes that planning permission should be refused for development resulting in the loss or deterioration of irreplaceable habitats.

The NT guide to Netley Park and the Abinger Roughs notes in the context of local wildlife: “Lots of birds can be seen and heard on the Roughs. Near the rhododendrons is a good spot - look out for: goldcrests, woodpeckers, wrens, treecreepers, song thrushes, chaffinch, dunnocks.” Some of these species, and also the other species noted by the NT such as noctule bats, are of conservation importance and should not be disturbed. (Source: http://www.nationaltrust.org.uk/abinger-roughs-and-netley-park/wildlife/).

NPPF 115 notes that “Great weight should be given to conserving landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty”. It is not acceptable to destroy any part of this area, protected over the last two millennia and substantively unchanged, in order to make a short term developmental profit even for a tourism related project. It further comments that the conservation of wildlife and cultural heritage are important considerations in all these areas. NPPF 116 notes that planning permission should be refused in these areas except in exceptional circumstances. This should be incorporated into the local plan.

Overriding force should be given to the Green Belt provisions of NPPF 88 and 89 which generally notes that substantial weight should not be given to any harm to the Green Belt and that the construction of new buildings is generally inappropriate.

GBC should be reminded that the AONB has status equivalent to that of a National Park.
Interestingly in National Parks, the National Park authority has overall responsibility for planning policy. For the South Downs National Park, the guidance is of relevance [http://www.southdowns.gov.uk/__data/assets/pdf_file/0013/123232/Agenda_Item_8_Appendix_1_20101203.pdf](http://www.southdowns.gov.uk/__data/assets/pdf_file/0013/123232/Agenda_Item_8_Appendix_1_20101203.pdf).

This states:

“National Parks have two statutory purposes which must be taken into account when considering planning proposals that could have an impact upon a National Park.

To conserve and enhance their natural beauty, wildlife and cultural heritage

To promote opportunities for the public understanding and enjoyment of these special qualities.

If there is a conflict between these two policies then the first must take precedence.”

Other guidance is worth noting. The National Parks and Access to the Countryside Act 1949 legislated for the designation of AONBs and National Parks. Their purpose was to be similar – to conserve and enhance natural beauty. The Countryside Commission defined the purpose of AONB designation in a statement of 1991.

**Purpose of AONB Designation**

- "...Is primarily to conserve and enhance natural beauty.

- In pursuing the primary purpose of designation, account should be taken of the needs of agriculture, forestry, and other rural industries and of the economic and social needs of local communities. Particular regard should be paid to promoting sustainable forms of social and economic development that in themselves conserve and enhance the environment.

- Recreation is not an objective of designation but the demand for recreation should be met so far as this is consistent with the conservation of natural beauty and the needs of agriculture, forestry and other uses."

**Areas of Outstanding Natural Beauty: A policy statement (Countryside Commission, CCP 356, 1991), p5**

AONBs and National Parks are recognised in England to be on a par legally because of their nationally important landscapes. The National Planning Policy Framework confirms that AONBs are equivalent to National Parks in terms of their landscape quality, scenic beauty and planning status.

The statutory duty enjoined upon GBC is not to seek to develop but to protect this area – “to conserve and enhance natural beauty”. It appears to have objective seeking growth which is in conflict with the requirements to protect. This is already covered by NPPF in relation to Green Belt status, which is in itself glossed by ministerial guidance, as previously noted (Eric Pickles, Brandon Lewis and others).

Development within the AONB of any form is likely to be damaging. In addition to the overriding restriction on such development under NPPF, the following statement referred to by Natural England is of significance:

“The United Nations Environment Programme (UNEP) has recently drawn attention to studies finding that although developed land covers only a small proportion of North America’s land base, it has a large impact on ecosystem services. For example, roads occupy just 1% of US land area, but they alter the ecological structures and functions of about 22% or more of the land. In US regions with rapid exurban growth, species richness and endemism diminish as urban cover increases, threatening biodiversity. The fragmentation of natural habitat threatens more than 500 endangered US wildlife species with extinction. It also provides new entry points for invasive species already introduced through other pathways”. 13. Source: United Nations Environment Programme, Global Environment Outlook GEO-4, Environment for development, 2007, p.259 at Box 6.30, itself quoted by Natural England.

In other words, seeking growth of any kind within the AONB is inherently undesirable and in conflict with the overriding principles of biodiversity, and therefore sustainability.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
We object to Policy A6 as it stands. Tourism and visitors do not depend on new visitor attractions and facilities – and these may undermine the area. Overdevelopment is a risk especially in the countryside.

- We believe that the importance of a visitor attraction hub could be much better articulated. Guildford has great potential to become a “must see” destination for tourists and visitors. Surrounded by the natural beauty of the Surrey Hills, it is distinguished as an historic county town. The historic part of the town should be exploited to the full creating a real sense of vibrancy and atmosphere. This should be linked to the attractions of the Museum, the Castle, the Wey and the historic High Street including its views of the Hogs Back. Guildford would be wise to model itself on other historic towns like Bath and York. The economic impact would create big advantages for both the leisure and the niche speciality retail sectors in the town. Given the local and wider catchment of the town Guildford should strive for high quality definition making it a centre for people to live in and visit. It would be a great mistake if Guildford were to opt for large impersonal department stores and dull high street chain stores at the expense of exploiting its uniqueness and character which would afford greater benefits.

- Guildford the historic “Gateway to the Surrey Hills” has far more potential than Guildford just any other stereotypical centre found anywhere around London. What GBC needs to do is create a theme such as a new “Pilgrims Trail” similar to the Patriots trail in Boston USA with marked yellow footsteps leading from the station to the River and up through the historic heart of the town.

The importance of tourism and leisure within the borough is acknowledged by GBC, and thus far this policy is welcomed. Thus far, the principles underlying this policy are given measured and qualified support. However, the emphasis however on development in order to facilitate tourism seems fundamentally misguided, and, as in other areas of the plan, seems to regard both the planning function and local government as a whole as the marketing and sourcing department of the building and civil engineering industries. This is inappropriate and therefore this element merits objection on an overall basis.

It should be noted that Tourism is one of the major industries in the country. Visit Britain notes: “Since 2010 tourism has been the fastest growing sector in the UK in employment terms, responsible for one-third of the net increase in UK jobs between 2010 and 2012. The report forecasts that the tourism economy will be worth around £127 billion this year (2013), equivalent to 9% of the UK’s GDP, supports over 3.1 million jobs, that’s 9.6% of all jobs and 173,000 more than in 2010. The sector is predicted to grow at an annual rate of 3.8% through to 2025 - significantly faster than the overall UK economy (with a predicted annual rate of 3% per annum) and much faster sectors such as manufacturing, construction and retail.”
In the context of the importance of the tourism sector, it is deeply shocking that there is so little care attached to this section of the local plan. The part of the local economy is likely to grow more quickly than any other sector of the economy, and the damage to the UK economy that could result from unrestricted promotion of housing estates and warehouses should be calculated before growth is seen as a motivating force for development.

This area of England is important, and it is visited by tourists and visitors, not primarily because of tourist centres nor even because of sites of significance such as Hatchlands Park, important though that National Trust sites may be.

The importance to the borough of the countryside qua countryside, embodying rural tourism, rural agriculture and its related impact on the local economy cannot be overstated. Overriding force should be given to the Green Belt provisions of NPPF 88 and 89 which generally notes that substantial weight should be given to any harm to the Green Belt and that the construction of new buildings is generally inappropriate.

GBC should be reminded that the AONB has status equivalent to that of a National Park.
Interestingly in National Parks, the National Park authority has overall responsibility for planning policy. For the South Downs National Park, the guidance is of relevance http://www.southdowns.gov.uk/__data/assets/pdf_file/0013/123232/Agenda_Item_8_Appendix_1_20101203.pdf. This states:

“National Parks have two statutory purposes which must be taken into account when considering planning proposals that could have an impact upon a National Park.

To conserve and enhance their natural beauty, wildlife and cultural heritage

To promote opportunities for the public understanding and enjoyment of these special qualities.

If there is a conflict between these two policies then the first must take precedence.”

Other guidance is worth noting. The National Parks and Access to the Countryside Act 1949 legislated for the designation of AONBs and National Parks. Their purpose was to be similar – to conserve and enhance natural beauty. The Countryside Commission defined the purpose of AONB designation in a statement of 1991.

Purpose of AONB Designation

- “...Is primarily to conserve and enhance natural beauty.
- In pursuing the primary purpose of designation, account should be taken of the needs of agriculture, forestry, and other rural industries and of the economic and social needs of local communities. Particular regard should be paid to promoting sustainable forms of social and economic development that in themselves conserve and enhance the environment.
- Recreation is not an objective of designation but the demand for recreation should be met so far as this is consistent with the conservation of natural beauty and the needs of agriculture, forestry and other uses.”

AONBs and National Parks are recognised in England to be on a par legally because of their nationally important landscapes. The National Planning Policy Framework confirms that AONBs are equivalent to National Parks in terms of their landscape quality, scenic beauty and planning status.

The statutory duty enjoined upon GBC is not to seek to develop but to protect this area – “to conserve and enhance natural beauty”. It appears to have objective seeking growth which is in conflict with the requirements to protect. This is already covered by NPPF in relation to Green Belt status, which is in itself glossed by ministerial guidance, as previously noted (Eric Pickles, Brandon Lewis and others).

Development within the AONB of any form is likely to be damaging. In addition to the overriding restriction on such development under NPPF, the following statement referred to by Natural England is of significance:

“The United Nations Environment Programme (UNEP) has recently drawn attention to studies finding that although developed land covers only a small proportion of North America’s land base, it has a large impact on ecosystem services. For example, roads occupy just 1% of US land area, but they alter the ecological structures and functions of about 22% or more of the land. In US regions with rapid ‘exurban’ (or extensive residential) growth, species richness and endemism diminish as urban cover increases, threatening biodiversity. The fragmentation of natural habitat threatens more than 500 endangered US wildlife species with extinction. It also provides new entry points for invasive species already introduced through other pathways”. 13.Source: United Nations Environment Programme, Global Environment Outlook GE04 – environment for development, 2007, p.259 at Box 6.30, itself quoted by Natural England.

In other words, seeking growth of any kind within the AONB is inherently undesirable and in conflict with the overriding principles of biodiversity, and therefore sustainability.

Policy E7: Guildford Town Centre

Response

Summary

I OBJECT to this policy

There should be much more residential use of the town centre. There is limited need for further retail, which will disadvantage existing retailers as well as using valuable land inefficiently. There is an urgent need for a brownfield register and to focus on brownfield redevelopment before considering development outside the existing urban area. CIL strategy must promote brownfield redevelopment.

Detailed response:

The government committed to legislating for a ‘brownfield register’ of ‘land suitable for housing in the Queen’s Speech 2015 and the 73 councils piloting the brownfield register were announced in March, 2016. Section 151 of the Act permits regulations requiring LPAs to keep a register of particular kinds of land, of which the brownfield register will be one. There is no reference to a brownfield policy within the policy for Guildford Town Centre, which is a major flaw.

Retail

Policy E7 is ill-informed. The evidence base fails to assess the capacity of the existing town centre to accommodate appropriate new development objectively. Paragraph 161 of the NPPF requires the LPA to assess the real quantitative and qualitative needs for economic activity including retail and leisure development, and I consider that this requirement has not been met.

Policy E7 is unlikely to benefit the health of the town centre in the future. There is no reliable evidence provided that the retail core of the Town Centre can support expansion of 45,000 sq m of additional retail space at North Street. There is a lack of demand for retail units in the Town Centre particularly large units.

There is falling demand for retail space in Guildford and town centres throughout the country (as evidenced by independent research and the reality of empty shops in many high streets (including Guildford) and the accelerating competition from internet shopping – see CEBR studies).

The North Street scheme has repeatedly failed in various redevelopment proposals over the last ten years. This is evidence of a lack of demand, such that the original planning permission for a large retail scheme became time expired. A number of major developers have studied the proposals in detail and then withdrawn from negotiations because the proposals are not economically viable.
The reality is that the town centre has enough retail floor space. If more is introduced it will result in the closure of existing shops particularly in locations which are less than 50% of peak Zone A or 100% positions.

What Guildford needs is a new focus on speciality high quality comparison shopping supported by a revival of Guildford’s attractive heritage core and the historic visitor attractions supported by restaurants.

The existing site in North Street should be replaced with a well-designed ground floor high quality speciality retail mall and frontage of no more than 40 shops extending to 7,000 sq m with the rear and upper floors providing an additional 500 to 600 homes. The proportion of the above proposed smaller scheme at North Street will be complementary to and not antagonistic to the Upper High Street, Tuns gate, the Debenhams site and the 100% Zone A positions of the Lower High Street. If the existing policy under E7 is adopted the North Street site will remain empty for another 10 years.

The findings of the Guildford Retail and Leisure Study 25 September 2015 are very pessimistic about retail trends. Carter Jonas’s recent study reports a bad time for retail. GBC’s own evidence base demonstrates that there is limited demand for additional retails space. The bullet points below are direct quotes from the report:

- Para 3.3 Retail Trends “Town centres, once the principle focus for retail and leisure are now increasingly under threat”
- Para 3.4 Retail Expenditure “disposable income and retailers’ margins are being squeezed further”
- Para 3.5 “there has been limited growth in retail (convenience and comparison goods) expenditure per head since 2008”
- Para 3.6 “the retail sector remains fragile and analysts forecast that some operators and centres will continue to struggle over the short to medium term”
- Para 3.8 “completed new shopping centre floor space in the UK is currently at its lowest level since the 1990s”
- Para 3.11 Internet Shopping “New forms of retailing have also emerged in recent years and are becoming established as significant alternatives to more traditional ‘bricks and mortar’ shopping facilities. Over the last 5 years, online sales have increased by 222%”

Appendix 6 of the Retail Study indicates inaccurate demand data

- Para 5.29 “The latest CoStar Report recorded 64 requirements for Guildford from January 2013 to August 2014; representing a total maximum floor space requirement of 62,208m2 gross (see Appendix 6).”
- This looks in the main unpersuasive with brands such as Joules Clothing; Fossil; Comptoir des Cotonniers; Moshulu; Rituals; Princesse tam.tam; Cycle Surgery; Majestic Wine; Game Stores Group Ltd; Iceland. But if we look closely at Appendix 6 it is an amalgam of old unchecked national high street requirements some of which do not even include Guildford as a destination and most is hardly high quality comparison retail. There are also no “big” requirements in terms of space. Where are the big stores?
- GH Pressley & Sons – Watches and Silver - Requirement “They are seeking a flagship diamond store in central London. Target locations include Mayfair, St James, Kensington and Knightsbridge. Brands will include Hans D Krieger and Marco Bicego.” This does not sound like Guildford
- Oxygen Red Ltd – Ladieswear- Requirement “Oxygen Red is looking to acquire temporary stores in Shopping Centre locations within the M25” Guildford is well outside the M25
- Game Stores Group Ltd have apparently a requirement for a store in Guildford dated 2012 but the company entered administration on 26 March 2012, and 277 of Game's 609 UK stores were closed immediately, resulting in 2,104 job losses. Are they really looking?
The data relating to retail demand does not appear reliable. The 62,800 sq m does not translate to real demand for an expansion of 500,000 sq ft. If proper due diligence was applied perhaps 10% of this Carter Jonas requirement would survive.

Brownfield redevelopment

We must make full use of our urban brownfield before we consider building in the Green Belt or countryside. Paragraph 17 of the NPPF states that to “encourage the effective use of land by reusing land that has been previously developed (brownfield land)” is a core planning principle. Paragraph 80 of the NPPF clearly states that Green Belt serves a key purpose, “to assist in urban regeneration, by encouraging the recycling of derelict land and other urban land”. In order to comply with central planning policy we need a brownfield strategy.

In response to the detailed objections received in the Regulation 18 process of the 2014 Local Plan and also in accordance with government policy a Guildford brownfield land register should be urgently compiled showing address, ownership, occupier, current use and detailed planning brief.

- GBC needs to accelerate residential redevelopment at Woodbridge Meadows, Walnut Tree Close and the Station within the next 1 to 5 years
- GBC needs to examine the residential development opportunity of the 25.7 acres of car parks in GBC ownership
- A brownfield-first policy should underline all planning decisions and the default for non-brownfield land should be rejection
- Failure to promote brownfield-first is unsustainable and is contrary both to the policies of the Metropolitan Green Belt (still in force) and NPPF paragraph 80 and 84.

Our recommendation is for a new Brownfield Policy for the town centre:

“We are committed to a brownfield-first initiative. All applications on previously developed land within the urban settlement area will be given fast-track priority. Development of urban brownfield land will be prioritised for residential and employment purposes to satisfy the needs of local people.

In parallel a zero-CIL incentive should be given for all residential development on urban brownfield land in order to meet the NPPF requirement for urban regeneration. Brownfield sites in the urban area should be identified as soon as possible. The register should be public, with full details of ownership. All brownfield sites owned by Guildford Borough Council, Surrey County Council or other government entities should be considered as available development land within the first 5 years of the plan.”

Residential

I do not believe that the target of 1,172 homes in the town centre takes account of the need and demand for urban housing or the opportunities that brownfield sites present for increasing the residential development in the core of the town. This will help to sustain the retail core. The Town Centre policy needs to maximise the potential for residential development on brownfield. It must include as an absolute minimum the 2,551 units proposed in by Allies and Morrison for the town centre included in the masterplan 2015 which has recently been adopted by GBC. I consider that the Town Centre has the capacity for the higher of at least 50% of the total or at least 5,000 homes. At present, the plan is to impose 70% of new residential development on greenfield and Green Belt land.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to policy E8 District centres We object to the proposal that sites “on the edge” of District Centres should be considered for retail developments. This is another Trojan horse policy, allowing retail hubs to be vastly expanded in order to smooth the way for vast new housing estates outside in the countryside (e.g. to meet the “everyday shopping and service needs” of the roughly 1,500 people living in the 600 new homes planned for the Horsleys). This is a case of back-to-front priorities. Expanded local retail hubs are being proposed in order to justify more housebuilding in the villages, and in a forlorn attempt to mitigate the serious traffic and infrastructure problems this will bring. The Council have no business preparing the way for new supermarkets in the Green Belt. Rural retail capacity should be left to local demand. The policy proposes not a single measure to support existing rural shops and services that are the lifeblood of village communities, e.g. using business rates and other levers at the Council’s disposal.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Policy E9 Local centres

We object (for the reasons given under Policy E8 above) to the proposal for retail development adjacent to the 6 rural centres, and sites on the edge of designated centres. This is creeping urbanisation, damaging to the Green Belt and to Guildford town revival as a thriving urban hub. It will contribute to local urban decay and depopulation, just as expansion of the suburbs did to mid-20th century London.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to policy H1 Homes for all.

Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set any rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions. The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated. We support higher density development in the urban area close to transport hubs to facilitate modal shift e.g. 20 minutes’ walk of Guildford railway station. Much of Guildford town could usefully be regenerated with 5-6 storey blocks (there are currently blocks of this size already in the town) at 50 homes per ha with landscaping and underground parking, as often seen on the Continent and, recently, in London. Student accommodation should provide for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and underused surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back. Surrey University has 17 ha of car parks that could provide all the student accommodation
required on stilts with parking beneath. Guildford borough already has a higher proportion of traveller sites than most comparable boroughs. Overprovision is inappropriate given other constraints.

Policy H3: Rural exception homes

Response

Summary

I OBJECT

This policy allows potential development OUTSIDE settlements even in Green Belt and includes wording to propose extension of this policy for Market housing. This is a Trojan horse to allow development where it would not otherwise be permitted. Ensure it is made clear, as part of the policy (blue box), that this is an exceptional scheme only and that the overriding requirements of the NPPF, especially NPPF 87, 88 and 89, will apply in the administration of this policy so
that it will only apply in exceptional circumstances. Far from being exceptional, this policy seeks to introduce a scheme where housing could be built anywhere, with no restriction, other than the general link to some form of connection with the Guildford housing list.

**Detailed response:**

Re rural exception sites, the NPPF deals with this in NPPF 54 which states:?

“In rural areas, local planning authorities should be responsive to local circumstances and plan housing development to reflect local needs, particularly for affordable housing, including through rural exception sites where appropriate”. This clause makes it clear that housing in rural locations should reflect local needs particularly for affordable housing. In this context local should imply with a direct connection to the local community only, not the wider community within the borough.

The following extract from the National Planning Policy Guidance is relevant:

**Paragraph: 034 Reference ID: 3-034-20140306**

Can unmet need for housing outweigh Green Belt Protection?

Unmet housing need (including for traveller sites) is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development on a site within the Green Belt.

Revision date: 06 03 2014

In fact it is clear that Guildford Borough Council sees rural exception housing not as an exception but as a normal mechanism for supply while disregarding the constraints of the Green Belt.

It uses existing and projected affordable housing within the villages not in order to meet local needs but as a response to the general housing list. This, per the NPPF, is inappropriate. It is symptomatic of the manner in which Guildford Borough treats the rural area – although containing 50% of the population of the borough- as merely ancillary to the needs and desires of the town.

This is arguably in contravention of the requirements of NPPF where housing development in rural areas should reflect local (not borough-wide) need. Such lack of earmarking has two potential problems. One is that there is increased pressure to consider too many rural exception sites which properly would not and should not be required. The preferred response to this would therefore be to earmark affordable housing within villages for demonstrable local need.?

The other, which should not be overlooked, is that it has the capacity to create a rural poverty trap. In Gomshall, for example, (the site of a significant number of new affordable homes currently being built by GBC) the cost of a single bus fare to Guildford is currently £3.50 and the cost of a single train fare to Guildford is £3.80. This is likely to prove a significant obstacle in seeking employment or the facilities needed by most members of a community (cheaper food from supermarkets; hospitals; dentists; secondary schools; junior schools (none of these are present in Gomshall)). Such a rural poverty trap is likely to be of less impact for those with family in the immediate area or those who work in the area; but for those on the general housing list it is inappropriate housing. So if the affordable housing within villages is allocated to those with local connections, the need for the rural exception scheme falls away. It should be noted that the NPPF requires the policies under which limited affordable housing for local need to be set out in the Local Plan; this should not set out the circumstances either of where these policies should apply, nor to whom they should apply – both would seem to be required.

One particularly shocking – developer led –initiative is the proposal which suggests that the rural exceptions scheme should be utilised to grant planning permission in the Green Belt OUTSIDE settlement boundaries for market housing. This is completely in contravention of NPPF.

The detail of this provision indicates that this will override all guidelines as to appropriate zones for development within the plan. It is wholly unacceptable.
NPPF 89 notes that “a local planning authority should regard the construction of new buildings as inappropriate in Green Belt. Exceptions to this are... limited affordable housing for local community needs under policies set out in the Local Plan”. New market housing does not meet this criterion and should not be permissible. This is in clear breach of the requirements of NPPF and of planning law (St Albans, Gallagher homes) and should be deleted. There are no circumstances where it could or should be permissible to build market housing under the rural exceptions scheme?

Concerns have been expressed previously that the ordinary rural exceptions scheme could become a “Trojan Horse” policy allowing development that should not otherwise be permissible. This expression of that policy emphatically seems to embrace this concept.

This policy is much wider than the NPPF requirement that rural exception sites should be restricted to the local (i.e. parish level) need. The wording of this policy- “contribute to meeting... local needs” means that GBC plans to use these to meet its normal housing list - the “local” is defined by GBC as meaning “current or former residents of the borough or have a family or employment connection”. So these would not really be local housing at all.

This policy requires radical revision in order to?articulate the requirements under which the rural exception scheme might be permissible, making it clear that

- it will not be permitted except where there is demonstrable unfilled local need which cannot be met elsewhere?
- make it clear what the requirements are to qualify for the scheme?
- ensure it is made clear, as part of the policy (blue box), that this is an exceptional scheme only and that the overriding requirements of the NPPF, especially NPPF 87, 88 and 89, will apply in the administration of this policy so that the provision of rural exception sites will only apply in exceptional circumstances.

Under no circumstances should the rural exceptions scheme be used to accept market housing.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to this policy which allows potential development OUTSIDE settlements even in Green Belt and includes wording to propose extension of this policy for Market housing. This is a Trojan horse to allow development where it would not otherwise be permitted. Ensure it is made clear, as part of the policy (blue box), that this is an exceptional scheme only and that the overriding requirements of the NPPF, especially NPPF 87, 88 and 89, will apply in the administration of this policy so that it will only apply in exceptional circumstances. Far from being exceptional, this policy seeks to introduce a scheme where housing could be built anywhere, with no restriction, other than the general link to some form of connection with the Guildford housing list.
Re rural exception sites, the NPPF deals with this in NPPF 54 which states: "In rural areas, local planning authorities should be responsive to local circumstances and plan housing development to reflect local needs, particularly for affordable housing, including through rural exception sites where appropriate." This clause makes it clear that housing in rural locations should reflect local needs particularly for affordable housing. In this context local should imply with a direct connection to the local community only, not the wider community within the borough.

The following extract from the National Planning Policy Guidance is relevant:

*Paragraph: 034 Reference ID: 3-034-20140306*

**Can unmet need for housing outweigh Green Belt Protection?**

*Unmet housing need (including for traveller sites) is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development on a site within the Green Belt.*

**Revision date: 06 03 2014**

In fact it is clear that Guildford Borough Council sees rural exception housing not as an exception but as a normal mechanism for supply while disregarding the constraints of the Green Belt.

It uses existing and projected affordable housing within the villages not in order to meet local needs but as a response to the general housing list. This, per the NPPF, is inappropriate. It is symptomatic of the manner in which Guildford Borough treats the rural area – although containing 50% of the population of the borough- as merely ancillary to the needs and desires of the town.

This is arguably in contravention of the requirements of NPPF where housing development in rural areas should reflect local (not borough-wide) need. Such lack of earmarking has two potential problems. One is that there is increased pressure to consider too many rural exception sites which properly would not and should not be required. The preferred response to this would therefore be to earmark affordable housing within villages for demonstrable local need.?

The other, which should not be overlooked, is that it has the capacity to create a rural poverty trap. In Gomshall, for example, (the site of a significant number of new affordable homes currently being built by GBC) the cost of a single bus fare to Guildford is currently £3.50 and the cost of a single train fare to Guildford is £3.80. This is likely to prove a significant obstacle in seeking employment or the facilities needed by most members of a community (cheaper food from supermarkets; hospitals; dentists; secondary schools; junior schools (none of these are present in Gomshall)). Such a rural poverty trap is likely to be of less impact for those with family in the immediate area or those who work in the area; but for those on the general housing list it is inappropriate housing. So if the affordable housing within villages is allocated to those with local connections, the need for the rural exception scheme falls away. It should be noted that the NPPF requires the policies under which limited affordable housing for local need to be set out in the Local Plan; this should not set out the circumstances either of where these policies should apply, nor to whom they should apply – both would seem to be required.

One particularly shocking – developer led – initiative is the proposal which suggests that the rural exceptions scheme should be utilised to grant planning permission in the Green Belt OUTSIDE settlement boundaries for market housing. This is completely in contravention of NPPF.

The detail of this provision indicates that this will override all guidelines as to appropriate zones for development within the plan. It is wholly unacceptable.

NPPF 89 notes that “a local planning authority should regard the construction of new buildings as inappropriate in Green Belt. Exceptions to this are... limited affordable housing for local community needs under policies set out in the Local Plan”. New market housing does not meet this criterion and should not be permissible. This is in clear breach of the requirements of NPPF and of planning law (St Albans, Gallagher homes) and should be deleted. There are no circumstances where it could or should be permissible to build market housing under the rural exceptions scheme.
Concerns have been expressed previously that the ordinary rural exceptions scheme could become a “Trojan Horse” policy allowing development that should not otherwise be permissible. This expression of that policy emphatically seems to embrace this concept.

This policy is much wider than the NPPF requirement that rural exception sites should be restricted to the local (i.e. parish level) need. The wording of this policy- “contribute to meeting.. local needs” means that GBC plans to use these to meet its normal housing list - the “local” is defined by GBC as meaning “current or former residents of the borough or have a family or employment connection”. So these would not really be local housing at all.

This policy requires radical revision in order to articulate the requirements under which the rural exception scheme might be permissible, making it clear that

- it will not be permitted except where there is demonstrable unfilled local need which cannot be met elsewhere?
- make it clear what the requirements are to qualify for the scheme?
- ensure it is made clear, as part of the policy (blue box), that this is an exceptional scheme only and that the overriding requirements of the NPPF, especially NPPF 87, 88 and 89, will apply in the administration of this policy so that the provision of rural exception sites will only apply in exceptional circumstances.

Under no circumstances should the rural exceptions scheme be used to accept market housing.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy II: Infrastructure and delivery

Response

Summary

I OBJECT to this policy as it stands. Various aspects of Infrastructure are acknowledged as congested, inadequate for the existing population and not able to accommodate much growth. However, greenfield sites – requiring heavy infrastructure investment – are targeted in order to generate CIL income for the council. This is not sensible. The current draft CIL scale also encourages development on greenfield sites rather than brownfield.

The methodology commissioned by the Council to assess traffic and the corresponding roads infrastructure needs is inadequate for the purpose of the Local Plan and identifies only the tip of the iceberg in terms of existing congestion. Looking at local traffic situations around the Borough it becomes clear that the schemes proposed will not solve congestion and the local road network has not been given sufficient consideration. Under the growth proposed some
locations would require highway schemes that involve demolition of property and road-widening in residential areas to solve the resultant congestion. Even the A3 improvements are not guaranteed to take place but they are being used to justify removing large areas from the Green Belt before detailed traffic assessments have taken place. These detailed investigations are being deferred until the planning application stage and will be left to developers to prepare. If a site then proves to be unsustainable its Green Belt protection will have been lost for no reason and unsuitable development will take place by a more insidious process.

With regard to SANG provision, GBC has demonstrated that it has no genuine interest in conserving and enhancing biodiversity and clearly regards the Thames Basin Heaths SPA as an obstacle to be overcome rather than a valued asset. This is underlined at the end of the Policy wording which indicates that the council is more interested in meeting its legal responsibilities than actually protecting wildlife. GBC is failing to take account of existing biodiversity at sites selected for SANG provision.

**Detailed response:**

Some infrastructure, as identified in Figure 1 of the draft IDP- is within the control and remit of Guildford Borough Council – they have some influence in relation to planning – but much is under the control, and is the fiscal responsibility of, Surrey County Council or Highways England.

It is not realistic to assume that car use can effectively be replaced for all or even many users. Those who are disabled or infirm cannot easily substitute car journeys with bike travel: the elderly; the disabled; those caring for young children (particularly uncertain bike users and those with multiple children to care for); those wishing to use cars for supermarket or other bulky shopping; those who wish to commute to work and have no facilities for showering or changing on arrival; those who have lengthy and tiring commutes at present, for which the car is the final (short) element of a long journey (for those commuting into London from outside Guildford, a daily 3 hour commute is typical; this cannot realistically be extended by extensive cycling). All these factors mean that the replacement of the car with cycle use is likely to be overstated by many studies, particularly given narrow roads which do not allow effective or safe bike lanes.

Funding is not the only - nor the main - obstacle to improving infrastructure within the borough, and this seems not to be recognized. Guildford is a gap town, set in a bowl within the Surrey Hills Area of Outstanding Natural Beauty to the south of the borough, and with large sections of the borough affected by the Thames Basin Heaths Special Protection Area to the north. There is a ribbon through the middle of the borough which contains rail and road links to London, but is already heavily congested, is Green Belt, AONB, SPA or more than one of the above. Very little of the borough is available for extensive development of infrastructure or any building. Do we really want solutions that involve driving new roads through our remaining countryside – including the AONB – at huge cost in financial and environmental terms. Such solutions may be the only ones left when the inadequacies of this proposed Local Plan are realised after the event.

Policy indicates note an intention to pool Community Infrastructure Levy from most new build development and to use CIL receipts to assist in provision of infrastructure needed to support the delivery of the plan. As with other aspects of planning, there is a failure to recognize that out of town settlements in particular have particularly high requirements for additional new basic infrastructure in order to exist at all – roads, sewers, water provision, electricity, gas, telephone and broadband links will all need to be provided and in many cases the links to existing services will need to be upgraded before these can be implemented. The ability to divert funds from CIL to other uses will be inherently limited, not least that otherwise the proposed settlements will not be able to function. The Council strategy of taking CIL from new build in the Green Belt seems to be to pay for roads within the town centre, as indicated in the policy which notes that legislation prevents the use of planning obligations to fund existing infrastructure deficits.

In the reasoned justification, it is indicated that the council will be prepared to negotiate if an applicant claims that the infrastructure requirements for their development make it unviable. This means that some developments will go ahead anyway and worsen the infrastructure deficit. The Policy claims that infrastructure needed “should” be provided and available when first needed but I have no confidence in the council enforcing this.

The absolute constraint on developmental capacity within the borough represented by the infrastructure limitations cannot be swept aside, but the council has ignored this and failed to apply a constraint on the housing number.
I am not convinced that the extent of existing traffic congestion has been fully recognised by the SCC transport assessment because the methodology employed waters down the level of traffic observed. This has knock-on effects when modelling the various development scenarios. The result is that the requirements identified (expensive though they may seem) are the tip of the iceberg. One of the easiest issues to understand is the use of average peak hour flows for the baseline data. SCC acknowledge that this is “typically lower” (see Transport Assessment 4.13.4 but GBC prefer the averaging approach with some eloquent wording in their Headline network metrics (3.9). A much better solution would have been to collect reliable baseline data that allowed for the effects of queuing and modelled each hour (or a shorter time period). Such an approach would have cost more but GBC seem unwilling to go the extra mile for reliable evidence while being content to spend large sums of money on propaganda exercises such as their one-sided video. There are other more technical reasons why the transport assessment methodology fails to fully identify current and planned congestion.

 Planned developments for Guildford and Waverley Boroughs were modelled together but growth for the rest of the UK was allowed for only using the DoT forecasts. As a result it is not clear whether adequate allowance has been made for significant developments planned for Woking and other neighbouring Boroughs. This represents an inconsistency in approach with the West Surrey SHMA.

 Many of the results for the PM peak are missing (TA 4.1.11 states that “these can be set out in an addendum report at a later date”). I believe that those who need to travel on the roads in peak hours will be every bit as interested in their future journeys home as they are for going to work. Publication of the Transport Assessment was delayed until the start of the consultation period so perhaps the non-inclusion of many PM results was simply a result of running out of time.

 The Model Development Validation Report does include some interesting baseline data that may be of interest to residents in terms of local knowledge of traffic.

 I am not convinced that it would be practical or desirable to end up in a position where the only solution to traffic congestion is to build many more new roads as by-passes through the Surrey countryside, or turn existing roads into dual carriageways, or demolish buildings (some of which may be historic) in order to accommodate higher capacity junctions in built-up areas.

 It is noted that the infrastructure Development Plan was developed using hotspots identified in “OGSTAR” (the previous Transport Assessment used for the 2014 consultation) as a starting point. (See Transport Topic Paper (5.56)). However, the site list used for OGSTAR was not even compatible with the former draft Local Plan let alone the current one. Despite this, the Key Evidence mentions the June 2016 TA but not OGSTAR.

 Appendix C (Infrastructure Schedule) is lacking in detail concerning what work will actually be carried out for most of the Local Road Network projects and the cost estimates are clearly at the guesswork stage suggesting that these schemes have not been fully thought through or checked for viability. If more detail is available then why not provide it.

 It is not clear whether CIL will be received in time to put the required infrastructure in place for each development – or what penalties will be applied for late payment.

 The Monitoring Indicators rely entirely on annual CIL receipts and spending. Surely they should look at actual infrastructure delivery and any changes in its adequacy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The Monitoring Indicators rely entirely on annual CIL receipts and spending. Surely they should look at actual infrastructure delivery and any changes in its adequacy.

The local plan does not state an objective for congestion. The two strategic objectives that are included for infrastructure refer to supporting sustainable development and delivering a balanced system. However, in para 2.15 there is an aspiration expressed about opportunities ‘to improve the performance of the road networks through transport infrastructure and service improvements’, which taken with the previous paragraph includes reducing congestion. The evidence so far shows that this will not happen. The mitigation proposed is not sufficient to overcome the problems that will be caused by the level of growth in the local plan. Congestion will worsen. The network will lack resilience and be vulnerable to disruption due to incidents. Minor roads will have to cope with a lot more traffic, for which they are unsuitable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy I2: Supporting the Department for Transport’s “Road Investment Strategy”

Response

Summary

I OBJECT to this policy as it stands. This policy is concerned only with the strategic road network – the A3 and M25 for which the responsibility and decision-making lies with Highways England. It is only reasonable that the council will work closely with Highways England to ensure that the Local Plan does not utilise land in a way that limit the scope for future improvements.

However, the proposals for the A3 are undecided and the council has suggested a very expensive tunnel proposal that, even if HE decided to go ahead with it, is unlikely to be delivered until the end of the plan period. Less expensive alternative A3 improvements would not be delivered before implementation of the current draft Local Plan and would deliver a massive growth in traffic. The road improvements are likely to lead to significant disruption to traffic during the construction phase on top of an already overloaded road network. It would be folly to make matters worse by committing to such a large housing number and the only logical conclusion is that a very significant traffic constraint should be applied to the OAN for this Local Plan.

Detailed response:

Funding for prospective road improvements has not been secured.
The wording of this policy is far too vague. Terms such as “working with” Highways England, to “facilitate” improvements, “to take account” of “emerging proposals” mean that this policy is, in effect, meaningless. Typographical errors – such as the misspelling of “licensed” – must also be corrected.

The Road Investment Strategy phase 2 (RIS2) for the period post 2020 is currently in the research stage. Until the research is completed it is impossible to prejudge what impact this will have on the Strategic Road network. However, the Strategic Transport Assessment does state “4.8.6 It should be noted that despite these improvements, Figure 4.7 shows the A3 is still operating overcapacity with resulting impacts on congestion.” and “4.5.10 Currently it is unclear why some minor roads in or just outside Guildford town centre are showing increases. These include roads such as Nightingale Road, Denmark Road and Tormead Road. However, it could be related to re-routing occurring as a result of the improvements to the A3 through Guildford attracting drivers to both join the A3 and remain on the A3 at Guildford and weaving through local streets.” Also, at 4.8.3 “At the same time, average vehicle speeds increase not just on the A3 but across the network within the borough as a whole. However, despite this it should be noted that although the average speed across the network in Scenario 5 is higher than in Scenario 1 (the Do-Minimum), there are differences within the network with average speeds on A roads and minor roads lower than in Scenario 1.” In other words, traffic congestion on the local road network is predicted to be worse under this draft Local Plan.

It is possible or indeed probable that no further funding will be available, or that any funding will not meet projected full costs. If this funding is unavailable in full, then this policy should clearly state that projects cannot be developed.

RECOMMENDATION:

I propose that unless guaranteed public funds are available to cover costs in full, there should be no development of any individual sites of more than 10 homes outside the urban areas.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy I3: Sustainable transport for new developments

Response

Summary
I support the concept and aim but OBJECT on the grounds that the practicalities of sustainable transport have not been properly considered, it is not sustainable to build dormitory towns and call them sustainable. Not everyone can cycle all the time.

How can large developments outside the town centre maximise sustainable travel? This is a matter for the planning process - the further from the town centre, the less sustainable the development will be.

Reliance on cycling discriminates against vulnerable members of the community. How can the disabled, those with small children, or the very old, or the infirm, or those who are ill, cycle outside the town in order to commute, or even inside the town? Only some people cycle - and Guildford has some steep hills, especially going out of town. Park and rides are slow – how can those with a 3 hour commute add 1 hour to their journey from using park and rides?

The only sustainable mechanism for new developments is to have them in the town centre close to the railway and the main shopping links where a hoppa bus can provide satisfactory links for those who cannot walk or cycle.

While we welcome the intention to encourage rail travel by adding two new stations there could be unintended consequences.

**Detailed response:**

Once again we see the word “expect” used which means the policy has no teeth. The word “expect” must be replaced with the word “require” so that this policy is enforceable.

There are a number of problems with this policy.

Congestion is a widely recognised factor in the local area of Guildford, and this is a major factor in the public response to the proposed housing numbers, which represents more than a 25% increase in housing numbers in a borough that is already profoundly congested. [Source: SHMA p61: itself sourced from ONS for 2013.] Residents recognise that to increase the population by this level within the existing transport provision is not feasible, and this informs much of the public response to the proposed level of housing accommodation.

It is not clear that this recognition, which is widespread through the borough, is shared by those who have drafted the Local Plan.

Guildford is a commuter town, which (compared to London) offers better quality of life and lower house prices, so it will continue to be a commuter town for the foreseeable future. As a result, access to the stations for commuting is of significance. It is not realistic to assume that traffic to stations for commuters can be replaced either by bus services (slow, intermittent, expensive, and in many cases absent completely) or by cycle. There is a capacity issue of car parking at the station, which effectively creates an absolute constraint on the feasibility of commuting from Guildford.

Cycling is attractive, and, for the urban young, especially students, it is both practical and cheap, and can be quick. However, as noted, those en route to work cannot be assumed to be able to cycle in working clothes. Elderly members of the community, those transporting small children, and the disabled cannot participate in cycling except to a limited extent. Effectively the "average" person deemed to be capable of cycling to substitute for car trips is an able-bodied adult not travelling to somewhere where smart clothing is required, not needing to arrive clean (or with showering facilities on arrival, not provided by all employers); this is not sufficiently widespread in terms of the local demographic for travellers that it should be allowed to determine policy – and of course, not needing to transport, for example, supermarket shopping after the trip. What about the disabled? the elderly? those looking after more than one child? Are they to be housebound? This is not a reasonable strategy. Before transport and buildings are determined on the basis of such a policy, it is also imperative that safe cycle routes are implemented through the borough. Cycling in winter on rural roads is inherently more dangerous. Upgrading these roads would not be feasible in terms of cost nor desirable in terms of local character.

Cycle lanes which disappear into normal traffic lanes, which travel over potholes and which allow cyclists to be threatened by HGVs are not conducive to wider cycle usage, nor should wider cycle usage be encouraged until it can be
demonstrated that it is safe, which currently, locally, it is not. The A25 cycle corridor scheme (Part of LRN1) will exchange the risk between cyclists and vehicles sharing space for the risk between cyclists and pedestrians sharing space. Much of the A25 has no pedestrian area anyway outside the urban space. Many cyclists travel at high speed and they will be put into conflict with pedestrians including mothers with very young children and schoolchildren many of whom need to cross the road and hence cross the cycleway. This is likely to lead to accidents and pedestrians are being disadvantaged.

Road capacity reduces as average speeds come down due to congestion. Where proper cycle lanes or off-road lanes are not provided then it is inevitable that safe driving will lead to reduced average motor vehicle speeds and gap development in the traffic stream. Both these effects act to reduce the capacity of our local road network. This loss of capacity has not been recognised in the Transport Strategy.

The concept of the park and ride with access into the town limited for those who live outside the town, is similarly flawed. Park and Ride is expensive, cumbersome and slow. It should be noted that in Oxford it has had a disastrous impact on small local retailers which is a retail segment that it is important to retain and support.

Use of park and rides increases the use of the strategic road network by local users, which is not what it is designed to do. This proposal is combined with aggressive exclusion from the town of those who are living in peripheral communities, which will increasingly resemble housing estates. This is a strategy for sink estates through Surrey instead of the Green Belt - this is not a strategy for growth. Head offices will choose to go elsewhere, because highly skilled staff and management in the cutting edge industries that GBC wants to encourage, will not choose to live in a dense housing estate.

The existing extent of traffic congestion has not been fully recognised. As a consequence the impact of the various development scenarios has been understated and the infrastructure costs are an understatement.

The transport studies are incomplete and unpublished and this should have led to deferral of consideration of the Local Plan consultation process until it was possible to revise the plan post publication of the studies. This matter was raised by a number of councillors at the Full Council meeting on 24 May 2016 when the consultation was approved, but a motion to defer was overturned by the majority party.

Cross-subsidy in terms of infrastructure is envisaged. The infrastructure deficit needs to be resolved before there are large numbers of new residents exacerbating the current congestion. The funding of the new developments through CIL and S 106 is expected to contribute to the transport impacts across the borough, and there is negligible concern for the transport problems created within those new developments or in areas adjacent to them. This is not acceptable to existing residents and is likely to cause some problems with the future residents too, who may arguably feel aggrieved that the road funding associated with their developments is being subverted to other areas. While this may be permissible under the revised CIL regulations it is questionable whether it is morally acceptable to grant planning permission to build on the Green Belt in order to cross subsidise the building of roads or other infrastructure in the town centre or elsewhere across the borough or outside it.

Insetting of villages and the proposed relaxation of planning restrictions anywhere outside settlements (Green Belt or not), implied in P2, will lead to substantial infilling that will not require traffic assessment but will contribute a highly significant amount of additional car journeys overall - by a more insidious process than the large developments proposed.

Costs for rail or bus travel could be substantially reduced and would incentivise their use; but these are outside the remit of GBC and so cannot be encouraged by them.

It remains to be seen whether the proposed new stations will be delivered as they are not entirely within the council’s control. While we welcome the intention to encourage rail travel by adding two new stations there could be unintended consequences as the roads local to both sites are heavily congested. If parking facilities are inadequate this could lead to a need for onerous parking restrictions on roads nearby – possibly affecting small businesses adversely.

If parking facilities are adequate this will encourage more traffic onto local roads and commuters tend to be hurrying to catch a train or anxious to return home after a day at work. That does not bode well for the safety of pedestrians needing to cross those roads. House prices near to stations tend to attract higher prices and this will increase the profit motive to
developers wanting to build on greenfield sites nearby. It will also mean that so-called affordable housing will be even less affordable at these sites. It may also lead, over time, to an undesirable loss of social-rented housing in the vicinity. A minor issue is that stopping at the additional stations will increase the train journey times to and from Guildford town centre on the lines affected.

**Detail in Policy wording – flawed drafting:**

The policy begins and ends with the weak and totally ineffective word, in planning terms, “expect”.

Contributing through CIL will not necessarily address needs local to the development concerned, and created by it, but may involve solving existing problems elsewhere in the Borough.

Bullets 4 & 5 – improvements to park and ride facilities imply increased car usage from outside the town and the parking provision acknowledges that most journeys will be by car.

Bullet 6 - Has the Vehicle parking Supplementary Planning Document been published? It is not listed as key evidence but the policy refers. How can a policy have been determined with reference to a non-existent part of the evidence base?

Bullets 7, 8, 9 & 10 are weak & aspirational with let-out words such as “facilitate the use of”, “wherever possible”, “contribute” and “where appropriate” (and poorly bulleted!). How will the use of ultra low emission vehicles be facilitated? This is such a vague aspiration as to be meaningless.

The policy only “expects” new developments to contribute, demonstrate adequate provision, etc – it should enforce them. A transport statement AND assessment ought to be a fixed requirement – not a matter for negotiation – while the policy implies that this might be waived even for sites that generate significant amounts of movement.

The construction traffic, noise and pollution generated by meeting the proposed housing number will be excessive. It will have a highly significant impact on the amenity and health of those residents living close to the development sites and those who live on the routes that will be taken by the construction traffic.

The last paragraph says nothing new in planning terms but does mean that the Local Plan has not fully and properly considered the traffic impacts of the proposed sites. We have experience of how misleading the TAs produced by developers can be – using averaging techniques and understated baseline figures, days when schools are not operating and many other devices to pull the wool over the eyes of planning authorities. This aspect is a denial of responsibility by GBC. The result is that Green Belt and countryside will be released for development when fuller consideration of traffic impacts at the Local Plan stage should have prevented that. If the planning authority is taken in by developers’ TAs then wholly unsuitable developments will be permitted.

**Introduction:**

The spatial development strategy (paragraph 4.6.20 and Policy S2) does not address the development needs of the borough ensuring distances are practical; this is certainly not the case with all the development sites. For example, the Wisley airfield site will generate a massive increase in vehicle journeys; developments in West Horsley will lead to greater car use, as will the proposed developments at Garlick’s Arch and in Send. The obvious site choice for sustainable development would be on brownfield sites in the town but the Local Plan proposes allocating those sites to the declining retail industry instead.

Paragraph 4.6.21 suggests that sustainable transport is promoted. Far from providing sustainable transport this Plan will generate a massive increase in motor vehicle journeys. The Plan cannot force residents to ride bicycles or walk everywhere.

**Justification:**

Paragraph 4.6.22 seeks to set out a reasoned justification and alleges that development should offer real travel choice by sustainable transport modes. There is little sign that this is being taken seriously enough now.
Paragraph 4.6.23 proposed to bring forward a Vehicle Parking Supplementary Planning Document. It is not clear what to make of this. Failure to provide off-street vehicle parking will not prevent residents owning cars and finding somewhere else to park but it may make life difficult for key workers to commute to their place of work. How can a consultation take place relying on non-existent background documents which are key parts of the Evidence Base? How can anyone comment on non-existent documents, and even if brought forward part-way through the consultation, any comments will be prejudiced by the absence of this informing the start of the consultation.

Paragraph 4.6.24 refers to the Sustainable Movement Corridor. Bus services are aspirational but economic reality may mean that they fail to persist. There is not enough detail published on how the SMC will be delivered – suggesting that it is aspirational rather than fully thought through.

Paragraph 4.6.26 refers to reviewing existing transport facilities and likely transport generation as part of assessing the amount of incremental travel demand. That consideration should have taken place in a robust and detailed manner on a site-by-site basis before the sites were allocated in the Local Plan. It is not sufficient to leave that until the planning application stage as intended by GBC and SCC, given that all sites will be subject to “permission in principle” under the Housing and Planning Act 2016 and so will not be capable of subsequent rejection on these grounds.

Paragraph 4.6.27 notes that Development must mitigate its transport impacts. The measures described rely entirely on people taking them up and not dumping their travel information packs in the nearest bin. It is clear that GBC, in response to concerns about elderly and disabled people failing to be coerced into riding bicycles are now suggesting tricycles to overcome this obstacle to their aspirations. They should be aware that while tricycles may help with balance issues they are heavier and harder to ride uphill. While the policy (unusually) notes that mitigation must be provided, in fact this is then diluted to suggest that facilities for electric car charging points and encouragement to car-share can be sufficient; all are optional and therefore meaningless.

However well designed a development is it will make matters worse during construction and if on a greenfield site, it is hard to see how it will achieve environmental benefits. On the other hand, replacing inefficient buildings on a brownfield site could lead to benefits in the long term.

Paragraph 4.6.28 notes “Developers should have regard” to the “Infrastructure Schedule at Appendix C”. The only thing that developers have regard for is forcing their application through and maximising their profit – that is the business they are in. Appendix C is lacking in detail. It notes, for example that there will be new town centre bus facilities at a cost of £5-10 million – such vagueness make it clear that no real costing or analysis of proposals has been prepared, and that the Infrastructure improvements proposed have not been properly considered. Having regard to fluid and uncertain proposals is effectively meaningless as a constraint or a requirement.

Paragraph 4.6.29 requires that applications need to address the transport implications of the proposed development. Experience with recent planning applications suggests that developers will do everything in their power to understate transport impacts and we have no faith in GBC and SCC taking a sufficiently robust line on this.

Key Evidence is missing or inadequate.

The Strategic Transport Assessment (SCC 2016) is listed as “forthcoming”, but this plan has been produced in the absence of any strategic transport review.

There are further inadequacies in the Evidence Base, highlighted in the following annexes, which include examples of deficiencies, ambiguities and inadequacies in the transport and infrastructure evidence. This is not a comprehensive list of deficiencies, but serves as an illustration of the poor evidence on which decisions have been based.

Annexe 1

Comments on Guildford Borough Transport Study 2016

Page 2 – “address the historic infrastructure deficit” - developers are not required to do this?
Page 2 – It is wrong to claim that the cycle infrastructure along the A25 is good – and many cyclists are not careful, so putting them in contention with pedestrians is not a good idea.

Page 5 – The decision on Heathrow or Gatwick has yet to be taken but airport expansion in the south- east cannot be regarded as sustainable development and, although GBC has no control over such external decisions, its own growth agenda will drive a need for that expansion.

Page 6 An additional weakness is alternative “road closure diversion” routes for the SRN on the LRN

Page 6 Are the “Committed Improvements” actually committed and guaranteed to be delivered?

Page 7 The rail strategy does not provide for Wisley (residents would drive to stations)

Page 7 How long will it take to deliver Crossrail 2? “We hope that Crossrail 2 could be operational by 2030, but we are in the very early stages of planning and no decision to build it has been made.”

Page 7 Guildford platform capacity still many years away if ever.

Page 7 The rail strategy anticipates many improvements that have not been secured and may have unintended consequences if they proceed (see above)

Page 7 The Southern Rail Access to Heathrow [see the feasibility study dated December 2015 – although other proposals may be put forward (e.g. by Hounslow)] is still in its early stages and would have significant impacts on open space beyond our Borough. For example, all options in the feasibility study would use Staines Moor SSSI and Option 4 would use Bedfont Lakes Country Park (a Local Nature Reserve and SNCI).

The various options would use existing commercial, residential and highways land in varying degrees. It seems unlikely that a solution will be delivered within the Plan period and removal of highly valued open space with high biodiversity (wherever it is in South-east England) cannot be regarded as sustainable.

Page 10 and 13 There is a stark contrast between the plans for the town centre which involve encouraging a reduction in traffic by reducing roadspace and the plans for the SRN and parts of the LRN which involve increasing capacity. While increasing capacity may reduce some areas of congestion in the short term, history suggests that traffic will rapidly grow until the improved roads are congested once again. This can hardly be regarded as sustainable. A sustainable option would be to apply a very substantial traffic infrastructure constraint on the housing number.

Page 10 While the A3 Guildford Tunnel aspiration has some environmental advantages over widening (in particular for residents living close to the A3), the environmental burden of the construction phase will be far higher and aspects such as location of ventilation stacks and their local effect (in all weather conditions) do not appear to have been considered.

Page 14 Under Weaknesses the point about A roads in Guildford Town also applies to surrounding areas in the Borough and beyond. The anticipated improvements ignore existing congestion to the south and east of Guildford – presumably because SCC’s transport assessment methodology only identifies the tip of the iceberg. The current Plan will see increased congestion and a resultant reduction in air quality in many areas beyond the town centre.

Page 16 “Largely commercial bus services” is seen as a strength whereas it should be seen as a weakness with a trend to reduced subsidies and the provision of bus services, especially in rural areas, being increasingly dependent on commercial gain. It is difficult to see this changing under the current Government cuts philosophy. The point “Subject to business case including funding” under Aspirations demonstrates this point.

Page 18 We welcome the aspiration to “Expand the public realm through significantly extended pedestrian-priority areas”
The introduction talks about reductions in some pollutants. This may be the case for pollutants such as Sulphur Dioxide, which contributed to the visible London smogs, but it is not true of diesel vehicle emissions which have increased as a result of Government policy including its aggressive growth agenda and population increase through immigration.

30 accessible electric vehicle charging points are only an aspiration and will be nowhere near enough if there is a real shift to electric vehicles.

It is clear from the “Strategy outcomes” that GBC would prefer not to follow other areas in pro-actively tackling air quality.

Page 22/23/24 The timescales indicate that the main rail improvements (including the two new stations) are unlikely to be delivered until the end of the Plan period or even later. The sites that are supposedly justified by their inclusion will generate a major increase in road traffic in the interim and it may be more difficult to achieve this aspect of modal shift in the longer term. The same can be said about the other traffic infrastructure proposals. Residential development is being scheduled before the infrastructure that it will need.

Page 24 Monitoring – “Increase” needs to be in proportion to population growth as otherwise failure will be taken as success. “An Increase in average vehicle speeds” is inconsistent with the desire to reduce the number of persons killed or seriously injured. For example, some A roads pass through residential areas where pedestrians, including schoolchildren, are trying to cross the road at peak times. It is noted that increase in vehicle speeds is only desired in the morning. Going home from work does not seem to matter!

Annexe 2

GTAMS

NPPF and NPPG The Plan ignores the points concerning Green Belt and protecting the environment. GBC have tried to get round this by spinning their messages and using misleading statistics including a major understatement of the area of Green Belt to be removed.

Planning Update (March 2015) – The point in this update concerning Green Belt has been ignored

Monitoring Indicators:

Ten years is far too long to wait for information on whether the approach is working or not. The target requires only an increase. This would permit an increase less than that in line with any population growth to be regarded as success. The bar has been set well within the failure range.

Policy 14: Green and blue infrastructure

Response

Summary

Response type: OBJECT

The Policy shows concern for conserving and enhancing biodiversity, which is welcome. We also note and welcome the intention to extend the principle beyond Biodiversity Opportunity Areas. However the current plan to build on large areas of countryside and to inset villages will have the opposite effect. The Policy appears therefore to be a box-ticking exercise with no real teeth to it.
There is no mention of the value of wildlife gardening to biodiversity or the important role that larger gardens play in a village setting.

There is no mention of the impact of the plan on food production, or monitoring the loss of agricultural land.

“The natural world, its biodiversity and its constituent ecosystems are critically important to our wellbeing and economic prosperity, but are consistently undervalued in conventional economic analyses and decision-making” (Biodiversity 2020 page 11)

“As a public authority in England you have a duty to have regard to conserving biodiversity as part of your policy or decision making.” (Government Planning Guidance)

Part of the problem is that “Biodiversity benefits are unpriced” and so not valued by those who look only at the more obvious and simplistic economic benefits.

We have some concerns that “enhancing” the River Wey in the town centre will avoid using the available brownfield land around Walnut Tree Close and Slyfield for urban regeneration and sustainable housing that could otherwise be used.

Why should the Walnut Tree Close/Woodbridge Meadows industrial area not be regenerated from bus garages, urban car parks and empty factories to offer sustainable, well designed, urban homes which are medium height, and can meet almost all of Guildford’s real housing needs?

**Detailed response:**

The policy on Green and Blue infrastructure is broadly supported with an important and major caveat; and if disregarded this should count as an objection.

However, it is noted that the largest areas of industrial brownfield land within the borough are near to or adjacent to the River Wey, particularly in the Walnut Tree Close area and in the Slyfield industrial area.

These areas could support much more housing than the relatively small numbers indicated in the policy on the town centre, under a town centre regeneration scheme. This would have huge benefits for the community as a whole since relatively run down areas would be subject to regeneration, the river banks would be cleaner and more attractive.

It is vitally important for the town as a whole that the run-down Walnut Tree Close area is used for well-designed housing, as indicated by the Mastervision document first draft compiled by Allies and Morrison. John Rigg of Savills and Guildford Vision Group indicated to the Scrutiny Committee of GBC that initial commercial projections indicated that the Walnut Tree Close area alone could provide 4000 homes. This is significantly in excess of the current GBC proposals. Both Allies & Morrison and GVG initially indicated that they believed that this site could be available for regeneration within the critical 5 year window required for the local plan. It is therefore essential that nothing in this policy should jeopardise anything that could lead to the Walnut Tree Close area being a regeneration zone.

As has been noted elsewhere, for reasons that are not altogether clear but appear to be connected to central government direction and a desire to maximize the Community Infrastructure Levy, there is an aggressive desire to push development on to the Green Belt at all costs, ignoring or eliminating for other reasons sites which could be used in the town for residential purposes. This has informed recent planning decisions (both the Aldi site and the Waitrose site were originally zoned for residential purposes and were eminently suitable for this) and this bias seems to be informing the Local Plan.

As a result, it is important that the desire for Green and Blue infrastructure does not become an excuse for preventing regeneration of Walnut Tree Close. It is noted that the Council has stated that “The Council is keen to protect the watercourses from inappropriate development that would spoil their character”. The bus station adjacent to the River Wey, and the empty car parks associated with empty factory space, are hardly attractive development – well designed mid height (3-4 storey) apartment blocks would be a great improvement to the river corridor, offer major scope for sustainable regeneration, and would prevent the need for any incursion into the Green Belt to meet reasonable housing needs.
That regeneration zone would be highly sustainable, because it would be within 1 mile of the railway station, adjacent to
the A3, and would eliminate an area of huge congestion in the town because if the industrial sites were replaced by
housing then the residents would commute by train or walk to work rather than having to drive in to an industrial estate.

It certainly does not seem appropriate to create substantial new parkland on current hard standing. The protections to
which this policy refers largely describe existing open space, which is of great importance. But to determine not to
utilize brownfield land for residential use at an appropriate density in order to force building on to the Green Belt would
seem to be in contradiction of the principles of use of the Green Belt applied in the Gallaher Homes v Solihull court of
appeal case, where the hierarchy of use is clearly defined, with urban brownfield required to be used as a first option.

So there is some considerable support for the residential element of this policy, with the note that this should be explicitly
amended to permit construction of a regeneration zone on the brownfield areas surrounding the river in the middle of the
town, and that this should not be held up pending yet more transport studies (Guildford’s track record on brownfield
utilisation is poor), but should be implemented with immediate effect.

It is not clear what form the “parkland” along the River Wey will take but the images available in the Town Centre
MasterPlan suggest mown grass similar to the area around Millmead. This misses an opportunity to enhance biodiversity
and enable town centre residents to engage with wildlife. Engagement with wildlife should mean much more than
throwing bread at ducks and chasing pigeons. To achieve a wildlife corridor through Guildford, that can also benefit the
health and well-being of residents living close by, the green space retained beside the river should be managed with the
needs of wildlife in mind.

Responses to policy notes:

4.6.33 Villages are generally permeable to wildlife. The lower density of housing and presence of gardens (especially
larger gardens) provides a corridor for movement across the residential area. Insetting of villages and the relaxation of
planning restrictions in the Green Belt implied by Policy P2 will lead to infilling, “garden grabbing” and consequent loss
of biodiversity. It will replace connections and corridors between habitats with barriers and lead to further fragmentation
of our natural infrastructure.

4.6.34 In the past Guildford Borough Council recognised the role that wildlife gardening and management of parks and
open spaces for wildlife could play in enhancing biodiversity. There seems to have been a shift away from this. These
aspects should be recognised in the Plan as well as the importance of BOAs and although 4.6.35 goes part way towards
this we have yet to see the GISPD.

4.6.36 This is long overdue and should include the way that our lanes are managed. The current approach is
unsympathetic, sometimes damaging tree roots and scarce native plants. It seems to be oriented towards encouraging
faster traffic rather than recognising the traffic-calming effects of natural vegetation (See the original Quiet Lanes
Initiative) – management of open spaces and lanes

We await the Countryside Vision with interest.

4.6.37 It appears that Policy I5 (whatever it was) has been omitted. (We think this means P5 – more evidence of slapdash
work)

4.6.38 I agree with this statement but public access is frequently damaging to biodiversity – the more obvious examples
being dogs out of control in the vicinity of ground-nesting birds and trampling of grassland habitats. Public open space
must be protected for the reasons given but wildlife needs undisturbed (or at least less disturbed) space too if it is to
thrive.

Responses to definitions:

This section starts with a definition that is not a proper definition and is followed by statements that are not definitions at
all, apart from the last – suggesting that this part of the document has not been thought through or checked.

4.6.42 “Biodiversity creation and/or enhancement” is not a definition – it requires definition.
Do you mean that you will create new species or encourage them to evolve? Or do you mean that you will increase the number of species living in the Borough, or the population of each species, or both?

The points made are aspirational that have no enforcement to back them.

We support the use of green roofs and walls.

However, building on the countryside and increasing the population by such a large amount will not help vulnerable species. It will put added pressure on remaining habitats and increase light and air pollution, degrading the ability of the borough to support wildlife.

4.6.43 Arrangements with developers have no guarantee of success or longevity. They involve partial mitigation and overall loss of the original biodiversity interest of a site.

4.6.44 This appears to be saying that you will deliberately put playing fields, sports facilities and other leisure activities in BOAs – but these are land uses that reduce biodiversity!

4.6.45 Our understanding of SANG is that it is intended to reduce pressure on Special Protection Areas by providing an alternative area for people to walk their dogs – and hope that they do not prefer to use the SPA. In other words they are intended to attract the type of user that is damaging to vulnerable species such as ground-nesting birds. In the desperation to find SANG land Guildford Borough Council are making use of existing open space that will not attract people away from the SPA and you are ignoring the impact on existing wildlife. For example – GBC decided to include the towpath in the Parsonage Meadows SANG as a way of also facilitating a cycle route. Encouraging cyclists and dog-walkers to use the same narrow path will not encourage dog-walkers to use it rather than the SPA. At Effingham Common GBC plan to designate an important area for wildlife and ground-nesting Skylarks. GBC is riding roughshod over the opinions of the Commoners and local residents. GBC used to put up signage warning dog-walkers not to disturb the Skylarks during the nesting season – but it appears that these signs are no longer there. Protests to Cllr Richard Billington may result in returning signs but these are not yet in place.

In allocating sites as SANG, GBC has ignored the requirement to consider existing biodiversity and clearly have little or any knowledge or understanding of the issue. The issues relating to Russell Place Farm have been pointed out by a qualified Biologist (see article in The Guildford Dragon – Chris Venables), Many invertebrates are dependent on the dung of grazing animals and this aspect of our countryside is being steadily driven out of our Borough.

4.6.46 We welcome this acknowledgement of the damaging effects of the proposed building developments. This also has relevance to the manner in which the green spaces next to the River Wey are managed.

4.6.47 We welcome the proposals but are concerned that these may be no more than good intentions. How will GBC ensure that they are carried out fully – and paid for by the developer?

Reasoned Justification:

4.6.50 As the emerging strategy for Surrey and the GISPD are not yet available the plan should not be proposing sites that will jeopardise them. The implication is that this aspect of the plan is not being taken seriously and will carry no weight in site selection despite the guidance in the NPPF.

4.6.51 In fact some GBC contract mowing and lane management is not in line with a strategy that is meant to protect biodiversity. (Examples – damage to tree roots and unsympathetic treatment of roadside vegetation (that includes orchid species) in Chalk Lane – southern end of Kingston Meadow in East Horsley is now mown flat rather than left to grow as a meadow through the Spring and Summer as it used to be (so no more day-flying Burnet moths there for example.

KEY EVIDENCE

Guildford Borough Policy Statements are statements – not evidence.

Additional evidence should include:
Existing SNCI surveys, including those that took place in 2004-2007.

Biodiversity evidence emerging from Neighbourhood Plans.

Evidence obtained by requests to local naturalists and natural history societies including those with a specialist interest.

**MONITORING**

Simply maintaining open space will not be enough for a significantly enlarged population.

Providing more open space to meet existing shortfalls or the needs of a much larger population will reduce the area of land currently in food production or providing wildlife habitat.

**SANG delivery is harming existing biodiversity**

It is not clear how you will measure a change in biodiversity just by looking at planning applications. “Net gains in biodiversity provided by development” is a contradiction in terms. There may well be a few examples in England where low density housing has been combined with manufactured habitat at the expense of loss of agricultural land with no surrounding habitat damage - but we see no evidence of that in the Local Plan. Even when a housing development replaces agricultural land it increases pressure on the surrounding countryside. A simple example is where houses border woodland and residents dump their garden rubbish (and often worse) over the garden fence. Increased leisure use on nearby countryside also has an adverse effect on biodiversity.

There is no guarantee that mitigations listed in an application will be carried out and their effectiveness is not guaranteed either. GBC would need to carry out follow-up ecological surveys on all sites. Who would pay for these? Are there enough consultants to carry out the work in sufficient detail? What aspects of biodiversity will be measured?

How frequently are surveys by Natural England intended to take place? How will GBC ensure that NE carry them out? A baseline of existing surveys against which changes will be monitored should be included within the plan and it must be comprehensive for monitoring to be effective.

How frequently will SNCI surveys be carried out? At what expense? The last survey published in 2007 made recommendations for an increase in the size of the Wisley Airfield SNCI and stated that this should be taken into account for planning purposes. This was overridden in the recent planning inspector’s report and the Local Plan includes this particular SNCI as a building site. This is clearly a case of hypocrisy and suggests that the Council has no genuine intention to maintain biodiversity let alone enhance it.

We believe that a survey of SNCIs is currently taking place but that it is limited in scope to the previously known sites. This prevents other sites, where genuine biodiversity enhancement has taken place (often as a result of volunteer community effort), from being recognised in this way. While every stone is being turned over in the quest to find green space to build on, no genuine effort is being made to identify biodiversity hotspots that may have been overlooked in the past. In other words the approach being taken is one that intends to make no net gain, and possibly even reduce, sites of nature conservation interest – in contradiction to the stated aims.

If an existing SNCI (or one proposed on grounds of biodiversity but not formally accepted in a Local Plan) is found to be in poor condition the action taken should be to bring it back into good condition – not to remove its status and build on it.

**Policy P3: Countryside.**

**Response**
Summary

I OBJECT to this policy as it stands. There is huge emphasis on provision both of services and of additional Green Belt in Ash and Tongham. It is not clear why new Green Belt should be designated here, while the Green Belt is being rolled back in all other areas of the borough. The only notable fact is that the Leader of the Council and other Executive members are based in this area and the question of impartiality does need to be raised.

Detailed response

Note that in the recent judicial review in relation to Ashdown Forest, the SANG zone for the Ashdown Forest SPA was 7km, and this gave rise to a lower housing number than that proposed by this local authority.

The urban areas of Ash and Tongham are indeed of importance within the borough, creating a barrier between the countryside of Guildford and the urban towns of Aldershot and Farnborough.

However, as noted, it does not seem entirely appropriate to seek to reduce Green Belt designation everywhere else in the borough, on the grounds of overwhelming housing need (which is itself not an exceptional circumstance) – including land within the Green Belt and the Thames Basin Heath SPA, but then to propose designating additional Green Belt in this particular area.

If the planning policy is sufficiently aggressive as to disregard existing Green Belt, to propose significant development in that area, then it is inappropriate, and in contravention of existing planning law, (Gallagher Homes v Solihull as determined by the Court of Appeal) to consider proposing new areas for Green Belt. It is unclear why the strategic gap that separates the Ash and Tongham urban areas from neighbouring Aldershot is of greater significance to the borough as a whole, than other threatened Green Belt villages and fields.

The desire to protect the strategic gap between Ash and Tongham and Ash Green is welcomed, and provided that this does not arise because of a loss of Green Belt land elsewhere, the proposal to include some of this land within the Green Belt is welcomed too. However, Green Belt boundaries should not be traded off. One village community should not benefit to the detriment of another. The proposed extension of Green Belt designation to Ash and Tongham is unlikely to succeed, because it is not inherently better at serving the purposes of the Green Belt than other areas threatened by development, and a similar attempt in Solihull was wholly unsuccessful. The Court of Appeal decision will represent a precedent in this regard.

As noted in Gallagher Homes v Solihull, the NPPF is based on PPG2 which is quoted in a similar context to this proposal:

“If such an alteration is proposed the Secretary of State will wish to be satisfied that the authority has considered opportunities for development within the urban areas contained by and beyond the Green Belt.”

In other words, before altering Green Belt boundaries (to use for building), land beyond the Green Belt should be considered as building land first; and first of all, brownfield urban land should be used. Provided that the Green Belt is not subject to the wholesale assault then this extension might be acceptable to the wider community within the borough. It will not be acceptable as a trade-off for loss of the Green Belt elsewhere.

Policy P3 States that ‘development will only be permitted provided it:

“requires a countryside location or where a rural location can be justified, and is proportionate to the nature and scale of the site, its setting and countryside location, and does not lead to greater physical or visual coalescence between the Ash and Tongham urban area and Aldershot”.

We would like to know what the rural justification of proposed housing has for Ash and Tongham and how Guildford Borough Council proves that contributes to the rural economy? In the Local Plan, Guildford Borough Council refers to these Eastern Borough proposals as ‘extensions to urban boundaries’. Developments of 1241 and 91 homes cannot
possibly meet the necessary term ‘rural justification’ (The site allocation maps show different figures of 1200, 62, 58 homes)

As far as we can tell with the corresponding maps, the proposed developments in Ash and Tongham will create a greater coalescence between the separate villages to combine them into one urban area with a slither of green space between it and the A331/Aldershot.

Designation of Green Belt does not guarantee a barrier between Ash and Ash Green as Guildford has demonstrated the urge to move the Green Belt boundaries in communities elsewhere. We would suggest removing the allocation of further Green Belt designation as it does not follow NPPG Policy. There are no exceptional circumstances to allow changes in Green Belt Boundaries in Guildford.

It is also not clear what the impact will be of designating SANG in this area, and whether this will be used to permit building on Green Belt or land otherwise protected because of the Thames Basin Heath SPA designation elsewhere.

Ash and Tongham have countryside designated Ancient Woodland, AGLV and SNCI and a sensitive historic site which must be protected. This, together with a focus on using existing brownfield within the urban settlement area and a more realistic housing number, should succeed in protecting the valuable countryside around Ash and Tongham, while the attempt to adjust Green Belt boundaries seems doomed to failure and therefore will allow wholesale overdevelopment in this area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to policy I3 Sustainable transport for new developments. This is another vaguely aspirational policy, based on wishful thinking and not grounded in the practical realities of daily life. It consists of a standard, box-ticking list of local government measures unrelated to the specifics of the plan. Like infrastructure, transport appears to be an afterthought; the policy fails in its essential job of guiding planning decisions, since it assumes development of any kind can be supported by sustainable transport.

We support the concept and aim but OBJECT on the grounds that the practicalities of sustainable transport have not been properly considered, it is not sustainable to build dormitory towns and call them sustainable. Not everyone can cycle all the time.

How can large developments outside the town centre maximise sustainable travel? This is a matter for the planning process - the further from the town centre, the less sustainable the development will be.

Reliance on cycling discriminates against vulnerable members of the community. How can the disabled, those with small children, or the very old, or the infirm, or those who are ill, cycle outside the town in order to commute, or even inside the town? Only some people cycle – and Guildford has some steep hills, especially going out of town. Park and rides are slow – how can those with a 3 hour commute add 1 hour to their journey from using park and rides?
The only sustainable mechanism for new developments is to have them in the town centre close to the railway and the main shopping links where a hoppa bus can provide satisfactory links for those who cannot walk or cycle. While we welcome the intention to encourage rail travel by adding two new stations there could be unintended consequences.

Once again we see the word “expect” used which means the policy has no teeth. The word “expect” must be replaced with the word “require” so that this policy is enforceable.

There are a number of problems with this policy.

Congestion is a widely recognised factor in the local area of Guildford, and this is a major factor in the public response to the proposed housing numbers, which represents more than a 25% increase in housing numbers in a borough that is already profoundly congested. [Source: SHMA p61: itself sourced from ONS for 2013.] Residents recognise that to increase the population by this level within the existing transport provision is not feasible, and this informs much of the public response to the proposed level of housing accommodation.

It is not clear that this recognition, which is widespread through the borough, is shared by those who have drafted the Local Plan.

Guildford is a commuter town, which (compared to London) offers better quality of life and lower house prices, so it will continue to be a commuter town for the foreseeable future. As a result, access to the stations for commuting is of significance. It is not realistic to assume that traffic to stations for commuters can be replaced either by bus services (slow, intermittent, expensive, and in many cases absent completely) or by cycle. There is a capacity issue of car parking at the station, which effectively creates an absolute constraint on the feasibility of commuting from Guildford.

Cycling is attractive, and, for the urban young, especially students, it is both practical and cheap, and can be quick. However, as noted, those en route to work cannot be assumed to be able to cycle in working clothes. Elderly members of the community, those transporting small children, and the disabled cannot participate in cycling except to a limited extent. Effectively the "average" person deemed to be capable of cycling to substitute for car trips is an able-bodied adult not travelling to somewhere where smart clothing is required, not needing to arrive clean (or with showering facilities on arrival, not provided by all employers); this is not sufficiently widespread in terms of the local demographic for travellers that it should be allowed to determine policy – and of course, not needing to transport, for example, supermarket shopping after the trip. What about the disabled? the elderly? those looking after more than one child? Are they to be housebound? This is not a reasonable strategy. Before transport and buildings are determined on the basis of such a policy, it is also imperative that safe cycle routes are implemented through the borough. Cycling in winter on rural roads is inherently more dangerous. Upgrading these roads would not be feasible in terms of cost nor desirable in terms of local character.

Cycle lanes which disappear into normal traffic lanes, which travel over potholes and which allow cyclists to be threatened by HGVs are not conducive to wider cycle usage, nor should wider cycle usage be encouraged until it can be demonstrated that it is safe, which currently, locally, it is not. The A25 cycle corridor scheme (Part of LRN1) will exchange the risk between cyclists and vehicles sharing space for the risk between cyclists and pedestrians sharing space. Much of the A25 has no pedestrian area anyway outside the urban space. Many cyclists travel at high speed and they will be put into conflict with pedestrians including mothers with very young children and schoolchildren many of whom need to cross the road and hence cross the cycleway. This is likely to lead to accidents and pedestrians are being disadvantaged.

Road capacity reduces as average speeds come down due to congestion. Where proper cycle lanes or off-road lanes are not provided then it is inevitable that safe driving will lead to reduced average motor vehicle speeds and gap development in the traffic stream. Both these effects act to reduce the capacity of our local road network. This loss of capacity has not been recognised in the Transport Strategy.

The concept of the park and ride with access into the town limited for those who live outside the town, is similarly flawed. Park and Ride is expensive, cumbersome and slow. It should be noted that in Oxford it has had a disastrous impact on small local retailers which is a retail segment that it is important to retain and support.

Use of park and rides increases the use of the strategic road network by local users, which is not what it is designed to do.

This proposal is combined with aggressive exclusion from the town of those who are living in peripheral communities, which will increasingly resemble housing estates. This is a strategy for sink estates through Surrey instead of the Green
Belt - this is not a strategy for growth. Head offices will choose to go elsewhere, because highly skilled staff and management in the cutting edge industries that GBC wants to encourage, will not choose to live in a dense housing estate.

The existing extent of traffic congestion has not been fully recognised. As a consequence the impact of the various development scenarios has been understated and the infrastructure costs are an understatement.

The transport studies are incomplete and unpublished and this should have led to deferral of consideration of the Local Plan consultation process until it was possible to revise the plan post publication of the studies. This matter was raised by a number of councillors at the Full Council meeting on 24 May 2016 when the consultation was approved, but a motion to defer was overturned by the majority party.

Cross-subsidy in terms of infrastructure is envisaged. The infrastructure deficit needs to be resolved before there are large numbers of new residents exacerbating the current congestion. The funding of the new developments through CIL and S 106 is expected to contribute to the transport impacts across the borough, and there is negligible concern for the transport problems created within those new developments or in areas adjacent to them. This is not acceptable to existing residents and is likely to cause some problems with the future residents too, who may arguably feel aggrieved that the road funding associated with their developments is being subverted to other areas. While this may be permissible under the revised CIL regulations it is questionable whether it is morally acceptable to grant planning permission to build on the Green Belt in order to cross subsidise the building of roads or other infrastructure in the town centre or elsewhere across the borough or outside it.

Insetting of villages and the proposed relaxation of planning restrictions anywhere outside settlements (Green Belt or not), implied in P2, will lead to substantial infilling that will not require traffic assessment but will contribute a highly significant amount of additional car journeys overall - by a more insidious process than the large developments proposed. Costs for rail or bus travel could be substantially reduced and would incentivise their use; but these are outside the remit of GBC and so cannot be encouraged by them.

It remains to be seen whether the proposed new stations will be delivered as they are not entirely within the council’s control. While we welcome the intention to encourage rail travel by adding two new stations there could be unintended consequences as the roads local to both sites are heavily congested. If parking facilities are inadequate this could lead to a need for onerous parking restrictions on roads nearby – possibly affecting small businesses adversely.

If parking facilities are adequate this will encourage more traffic onto local roads and commuters tend to be hurrying to catch a train or anxious to return home after a day at work. That does not bode well for the safety of pedestrians needing to cross those roads. House prices near to stations tend to attract higher prices and this will increase the profit motive to developers wanting to build on greenfield sites nearby. It will also mean that so-called affordable housing will be even less affordable at these sites. It may also lead, over time, to an undesirable loss of social-rented housing in the vicinity. A minor issue is that stopping at the additional stations will increase the train journey times to and from Guildford town centre on the lines affected.

**Detail in Policy wording – flawed drafting:**

The policy begins and ends with the weak and totally ineffective word, in planning terms, "expect".

Contributing through CIL will not necessarily address needs local to the development concerned, and created by it, but may involve solving existing problems elsewhere in the Borough.

Bullets 4 & 5 – improvements to park and ride facilities imply increased car usage from outside the town and the parking provision acknowledges that most journeys will be by car.

Bullet 6 - Has the Vehicle parking Supplementary Planning Document been published? It is not listed as key evidence but the policy refers. How can a policy have been determined with reference to a non-existent part of the evidence base?

Bullets 7,8, 9 & 10 are weak & aspirational with let-out words such as “facilitate the use of”, “wherever possible”, “contribute” and “where appropriate” (and poorly bulleted!). How will the use of ultra low emission vehicles be facilitated? This is such a vague aspiration as to be meaningless.
The policy only “expects” new developments to contribute, demonstrate adequate provision, etc – it should enforce them. A transport statement AND assessment ought to be a fixed requirement – not a matter for negotiation – while the policy implies that this might be waived even for sites that generate significant amounts of movement.

The construction traffic, noise and pollution generated by meeting the proposed housing number will be excessive. It will have a highly significant impact on the amenity and health of those residents living close to the development sites and those who live on the routes that will be taken by the construction traffic.

The last paragraph says nothing new in planning terms but does mean that the Local Plan has not fully and properly considered the traffic impacts of the proposed sites. We have experience of how misleading the TAs produced by developers can be – using averaging techniques and understated baseline figures, days when schools are not operating and many other devices to pull the wool over the eyes of planning authorities. This aspect is a denial of responsibility by GBC. The result is that Green Belt and countryside will be released for development when fuller consideration of traffic impacts at the Local Plan stage should have prevented that. If the planning authority is taken in by developers’ TAs then wholly unsuitable developments will be permitted.

Introduction:

The spatial development strategy (paragraph 4.6.20 and Policy S2) does not address the development needs of the borough ensuring distances are practical; this is certainly not the case with all the development sites. For example, the Wisley airfield site will generate a massive increase in vehicle journeys; developments in West Horsley will lead to greater car use, as will the proposed developments at Garlick’s Arch and in Send. The obvious site choice for sustainable development would be on brownfield sites in the town but the Local Plan proposes allocating those sites to the declining retail industry instead.

Paragraph 4.6.21 suggests that sustainable transport is promoted. Far from providing sustainable transport this Plan will generate a massive increase in motor vehicle journeys. The Plan cannot force residents to ride bicycles or walk everywhere.

Justification:

Paragraph 4.6.22 seeks to set out a reasoned justification and alleges that development should offer real travel choice by sustainable transport modes. There is little sign that this is being taken seriously enough now.

Paragraph 4.6.23 proposed to bring forward a Vehicle Parking Supplementary Planning Document. It is not clear what to make of this. Failure to provide off-street vehicle parking will not prevent residents owning cars and finding somewhere else to park but it may make life difficult for key workers to commute to their place of work. How can a consultation take place relying on non-existent background documents which are key parts of the Evidence Base? How can anyone comment on non-existent documents, and even if brought forward part-way through the consultation, any comments will be prejudiced by the absence of this informing the start of the consultation.

Paragraph 4.6.24 refers to the Sustainable Movement Corridor. Bus services are aspirational but economic reality may mean that they fail to persist. There is not enough detail published on how the SMC will be delivered – suggesting that it is aspirational rather than fully thought through.

Paragraph 4.6.26 refers to reviewing existing transport facilities and likely transport generation as part of assessing the amount of incremental travel demand. That consideration should have taken place in a robust and detailed manner on a site-by-site basis before the sites were allocated in the Local Plan. It is not sufficient to leave that until the planning application stage as intended by GBC and SCC, given that all sites will be subject to “permission in principle” under the Housing and Planning Act 2016 and so will not be capable of subsequent rejection on these grounds.

Paragraph 4.6.27 notes that Development must mitigate its transport impacts. The measures described rely entirely on people taking them up and not dumping their travel information packs in the nearest bin. It is clear that GBC, in response to concerns about elderly and disabled people failing to be coerced into riding bicycles are now suggesting tricycles to overcome this obstacle to their aspirations. They should be aware that while tricycles may help with balance issues they are heavier and harder to ride uphill. While the policy (unusually) notes that mitigation must be provided, in fact this is then diluted to suggest that facilities for electric car charging points and encouragement to car-share can be sufficient; all are optional and therefore meaningless.
However well designed a development is it will make matters worse during construction and if on a greenfield site, it is hard to see how it will achieve environmental benefits. On the other hand, replacing inefficient buildings on a brownfield site could lead to benefits in the long term.

Paragraph 4.6.28 notes “Developers should have regard” to the “Infrastructure Schedule at Appendix C”. The only thing that developers have regard for is forcing their application through and maximising their profit – that is the business they are in. Appendix C is lacking in detail. It notes, for example that there will be new town centre bus facilities at a cost of £5-10 million – such vagueness make it clear that no real costing or analysis of proposals has been prepared, and that the Infrastructure improvements proposed have not been properly considered. Having regard to fluid and uncertain proposals is effectively meaningless as a constraint or a requirement.

Paragraph 4.6.29 requires that applications need to address the transport implications of the proposed development. Experience with recent planning applications suggests that developers will do everything in their power to understate transport impacts and we have no faith in GBC and SCC taking a sufficiently robust line on this.

Key Evidence is missing or inadequate.

The Strategic Transport Assessment (SCC 2016) is listed as “forthcoming”, but this plan has been produced in the absence of any strategic transport review.

There are further inadequacies in the Evidence Base, highlighted in the following annexes, which include examples of deficiencies, ambiguities and inadequacies in the transport and infrastructure evidence. This is not a comprehensive list of deficiencies, but serves as an illustration of the poor evidence on which decisions have been based.

**Annexe 1**

Comments on Guildford Borough Transport Study 2016

Page 2 – “address the historic infrastructure deficit” - developers are not required to do this ?

Page 2 – It is wrong to claim that the cycle infrastructure along the A25 is good – and many cyclists are not careful, so putting them in contention with pedestrians is not a good idea.

Page 5 – The decision on Heathrow or Gatwick has yet to be taken but airport expansion in the south- east cannot be regarded as sustainable development and, although GBC has no control over such external decisions, its own growth agenda will drive a need for that expansion.

Page 6 An additional weakness is alternative “road closure diversion” routes for the SRN on the LRN

Page 6 Are the “Committed Improvements” actually committed and guaranteed to be delivered ?

Page 7 The rail strategy does not provide for Wisley (residents would drive to stations)

Page 7 How long will it take to deliver Crossrail 2 ? “We hope that Crossrail 2 could be operational by 2030, but we are in the very early stages of planning and no decision to build it has been made.”

Page 7 Guildford platform capacity still many years away if ever.

Page 7 The rail strategy anticipates many improvements that have not been secured and may have unintended consequences if they proceed (see above)

Page 7 The Southern Rail Access to Heathrow ##[see the feasibility study dated December 2015 – although other proposals may be put forward (e.g.by Hounslow)]## is still in its early stages and would have significant impacts on open space beyond our Borough. For example, all options in the feasibility study would use Staines Moor SSSI and Option 4 would use Bedfont Lakes Country Park (a Local Nature Reserve and SNCI).
The various options would use existing commercial, residential and highways land in varying degrees. It seems unlikely that a solution will be delivered within the Plan period and removal of highly valued open space with high biodiversity (wherever it is in South-east England) cannot be regarded as sustainable.

Page 10 and 13 There is a stark contrast between the plans for the town centre which involve encouraging a reduction in traffic by reducing roadspace and the plans for the SRN and parts of the LRN which involve increasing capacity. While increasing capacity may reduce some areas of congestion in the short term, history suggests that traffic will rapidly grow until the improved roads are congested once again. This can hardly be regarded as sustainable. A sustainable option would be to apply a very substantial traffic infrastructure constraint on the housing number.

Page 10 While the A3 Guildford Tunnel aspiration has some environmental advantages over widening (in particular for residents living close to the A3), the environmental burden of the construction phase will be far higher and aspects such as location of ventilation stacks and their local effect (in all weather conditions) do not appear to have been considered.

Page 14 Under Weaknesses the point about A roads in Guildford Town also applies to surrounding areas in the Borough and beyond. The anticipated improvements ignore existing congestion to the south and east of Guildford – presumably because SCC’s transport assessment methodology only identifies the tip of the iceberg. The current Plan will see increased congestion and a resultant reduction in air quality in many areas beyond the town centre.

Page 16 “Largely commercial bus services” is seen as a strength whereas it should be seen as a weakness with a trend to reduced subsidies and the provision of bus services, especially in rural areas, being increasingly dependent on commercial gain. It is difficult to see this changing under the current Government cuts philosophy. The point “Subject to business case including funding” under Aspirations demonstrates this point.

Page 18 We welcome the aspiration to “Expand the public realm through significantly extended pedestrian-priority areas”

Page 19 Guildford is well behind other areas in monitoring air quality let alone attempting to reduce it.

The introduction talks about reductions in some pollutants. This may be the case for pollutants such as Sulphur Dioxide, which contributed to the visible London smogs, but it is not true of diesel vehicle emissions which have increased as a result of Government policy including its aggressive growth agenda and population increase through immigration.

30 accessible electric vehicle charging points are only an aspiration and will be nowhere near enough if there is a real shift to electric vehicles.

It is clear from the “Strategy outcomes” that GBC would prefer not to follow other areas in pro-actively tackling air quality.

Page 22/23/24 The timescales indicate that the main rail improvements (including the two new stations) are unlikely to be delivered until the end of the Plan period or even later. The sites that are supposedly justified by their inclusion will generate a major increase in road traffic in the interim and it may be more difficult to achieve this aspect of modal shift in the longer term. The same can be said about the other traffic infrastructure proposals. Residential development is being scheduled before the infrastructure that it will need.

Page 24 Monitoring – “Increase” needs to be in proportion to population growth as otherwise failure will be taken as success. “An increase in average vehicle speeds” is inconsistent with the desire to reduce the number of persons killed or seriously injured. For example, some A roads pass through residential areas where pedestrians, including schoolchildren, are trying to cross the road at peak times. It is noted that increase in vehicle speeds is only desired in the morning. Going home from work does not seem to matter!

Annexe 2

GTAMS

NPPF and NPPG The Plan ignores the points concerning Green Belt and protecting the environment. GBC have tried to get round this by spinning their messages and using misleading statistics including a major understatement of the area of Green Belt to be removed.
Planning Update (March 2015) – The point in this update concerning Green Belt has been ignored

Monitoring Indicators:

· Ten years is far too long to wait for information on whether the approach is working or not. The target requires only an increase. This would permit an increase less than that in line with any population growth to be regarded as success. The bar has been set well within the failure range.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/10098  Respondent: 8640353 / Julian Cranwell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Response type: OBJECT

The Policy shows concern for conserving and enhancing biodiversity, which is welcome. We also note and welcome the intention to extend the principle beyond Biodiversity Opportunity Areas. However the current plan to build on large areas of countryside and to inset villages will have the opposite effect. The Policy appears therefore to be a box-ticking exercise with no real teeth to it.

There is no mention of the value of wildlife gardening to biodiversity or the important role that larger gardens play in a village setting.

There is no mention of the impact of the plan on food production, or monitoring the loss of agricultural land.

“The natural world, its biodiversity and its constituent ecosystems are critically important to our wellbeing and economic prosperity, but are consistently undervalued in conventional economic analyses and decision-making” (Biodiversity 2020 page 11)

“As a public authority in England you have a duty to have regard to conserving biodiversity as part of your policy or decision making.” (Government Planning Guidance)

Part of the problem is that “Biodiversity benefits are unpriced” and so not valued by those who look only at the more obvious and simplistic economic benefits.

We have some concerns that “enhancing” the River Wey in the town centre will avoid using the available brownfield land around Walnut Tree Close and Slyfield for urban regeneration and sustainable housing that could otherwise be used.

The policy on Green and Blue infrastructure is broadly supported with an important and major caveat; and if disregarded this should count as an objection.

However, it is noted that the largest areas of industrial brownfield land within the borough are near to or adjacent to the River Wey, particularly in the Walnut Tree Close area and in the Slyfield industrial area.
These areas could support much more housing than the relatively small numbers indicated in the policy on the town centre, under a town centre regeneration scheme. This would have huge benefits for the community as a whole since relatively run down areas would be subject to regeneration, the river banks would be cleaner and more attractive.

It is vitally important for the town as a whole that the run-down Walnut Tree Close area is used for well-designed housing, as indicated by the Mastervision document first draft compiled by Allies and Morrison. John Rigg of Savills and Guildford Vision Group indicated to the Scrutiny Committee of GBC that initial commercial projections indicated that the Walnut Tree Close area alone could provide 4000 homes. This is significantly in excess of the current GBC proposals. Both Allies & Morrison and GVG initially indicated that they believed that this site could be available for regeneration within the critical 5 year window required for the local plan. It is therefore essential that nothing in this policy should jeopardise anything that could lead to the Walnut Tree Close area being a regeneration zone.

As has been noted elsewhere, for reasons that are not altogether clear but appear to be connected to central government direction and a desire to maximize the Community Infrastructure Levy, there is an aggressive desire to push development on to the Green Belt at all costs, ignoring or eliminating for other reasons sites which could be used in the town for residential purposes. This has informed recent planning decisions (both the Aldi site and the Waitrose site were originally zoned for residential purposes and were eminently suitable for this) and this bias seems to be informing the Local Plan.

As a result, it is important that the desire for Green and Blue infrastructure does not become an excuse for preventing regeneration of Walnut Tree Close. It is noted that the Council has stated that “The Council is keen to protect the watercourses from inappropriate development that would spoil their character”. The bus station adjacent to the River Wey, and the empty car parks associated with empty factory space, are hardly attractive development – well designed mid height (3-4 storey) apartment blocks would be a great improvement to the river corridor, offer major scope for sustainable regeneration, and would prevent the need for any incursion into the Green Belt to meet reasonable housing needs.

That regeneration zone would be highly sustainable, because it would be within 1 mile of the railway station, adjacent to the A3, and would eliminate an area of huge congestion in the town because if the industrial sites were replaced by housing then the residents would commute by train or walk to work rather than having to drive in to an industrial estate.

It certainly does not seem appropriate to create substantial new parkland on current hard standing. The protections to which this policy refers largely describe existing open space, which is of great importance. But to determine not to utilize brownfield land for residential use at an appropriate density in order to force building on to the Green Belt would seem to be in contradiction of the principles of use of the Green Belt applied in the Gallaher Homes v Solihull court of appeal case, where the hierarchy of use is clearly defined, with urban brownfield required to be used as a first option.

So there is some considerable support for the residential element of this policy, with the note that this should be explicitly amended to permit construction of a regeneration zone on the brownfield areas surrounding the river in the middle of the town, and that this should not be held up pending yet more transport studies (Guildford’s track record on brownfield utilisation is poor), but should be implemented with immediate effect.

It is not clear what form the “parkland” along the River Wey will take but the images available in the Town Centre MasterPlan suggest mown grass similar to the area around Millmead. This misses an opportunity to enhance biodiversity and enable town centre residents to engage with wildlife. Engagement with wildlife should mean much more than throwing bread at ducks and chasing pigeons. To achieve a wildlife corridor through Guildford, that can also benefit the health and well-being of residents living close by, the green space retained beside the river should be managed with the needs of wildlife in mind.

Responses to policy notes:

4.6.33 Villages are generally permeable to wildlife. The lower density of housing and presence of gardens (especially larger gardens) provides a corridor for movement across the residential area. Insetting of villages and the relaxation of planning restrictions in the Green Belt implied by Policy P2 will lead to infilling, “garden grabbing” and consequent loss of biodiversity. It will replace connections and corridors between habitats with barriers and lead to further fragmentation of our natural infrastructure.

4.6.34 In the past Guildford Borough Council recognised the role that wildlife gardening and management of parks and open spaces for wildlife could play in enhancing biodiversity. There seems to have been a shift away from this. These
aspects should be recognised in the Plan as well as the importance of BOAs and although 4.6.35 goes part way towards this
we have yet to see the GISPD.

4.6.36 This is long overdue and should include the way that our lanes are managed. The current approach is unsympathetic,
sometimes damaging tree roots and scarce native plants. It seems to be oriented towards encouraging faster traffic rather
than recognising the traffic-calming effects of natural vegetation (See the original Quiet Lanes Initiative) – management of
open spaces and lanes

We await the Countryside Vision with interest.

4.6.37 It appears that Policy I5 has been omitted. (We think this means P5 – more evidence of slapdash work)

4.6.38 We agree with this statement but public access is frequently damaging to biodiversity – the more obvious examples
being dogs out of control in the vicinity of ground-nesting birds and trampling of grassland habitats. Public open space
must be protected for the reasons given but wildlife needs undisturbed (or at least less disturbed) space too if it is to thrive.

Responses to definitions:

This section starts with a definition that is not a proper definition and is followed by statements that are not definitions at
all, apart from the last – suggesting that this part of the document has not been thought through or checked.

4.6.42 “Biodiversity creation and/or enhancement” is not a definition – it requires definition.

Do you mean that you will create new species or encourage them to evolve? Or do you mean that you will increase the
number of species living in the Borough, or the population of each species, or both?

The points made are aspirational that have no enforcement to back them.

We support the use of green roofs and walls.

However, building on the countryside and increasing the population by such a large amount will not help vulnerable
species. It will put added pressure on remaining habitats and increase light and air pollution, degrading the ability of the
borough to support wildlife.

4.6.43 Arrangements with developers have no guarantee of success or longevity. They involve partial mitigation and
overall loss of the original biodiversity interest of a site.

4.6.44 This appears to be saying that you will deliberately put playing fields, sports facilities and other leisure activities in
BOAs – but these are land uses that reduce biodiversity!

4.6.45 Our understanding of SANG is that it is intended to reduce pressure on Special Protection Areas by providing an
alternative area for people to walk their dogs – and hope that they do not prefer to use the SPA. In other words they are
intended to attract the type of user that is damaging to vulnerable species such as ground-nesting birds. In the desperation to
find SANG land Guildford Borough Council are making use of existing open space that will not attract people away from
the SPA and you are ignoring the impact on existing wildlife. For example – GBC decided to include the towpath in the
Parsonage Meadows SANG as a way of also facilitating a cycle route. Encouraging cyclists and dog-walkers to use the
same narrow path will not encourage dog-walkers to use it rather than the SPA. At Effingham Common GBC plan to
designate an important area for wildlife and ground-nesting Skylarks. GBC is riding roughshod over the opinions of the
Commoners and local residents. GBC used to put up signage warning dog-walkers not to disturb the Skylarks during the
nesting season – but these signs were not put up until well into the nesting season this year and only then after complaints
and harassment of Skylarks by out-of-control dogs.

In allocating sites as SANG, GBC has ignored the requirement to consider existing biodiversity and clearly have little or
any knowledge or understanding of the issue. The issues relating to Russell Place Farm have been pointed out by a
qualified Biologist (see article in The Guildford Dragon by Chris Venables, Many invertebrates are dependent on the dung
of grazing animals and this aspect of our countryside is being steadily driven out of our Borough).
4.6.46 We welcome this acknowledgement of the damaging effects of the proposed building developments. This also has relevance to the manner in which the green spaces next to the River Wey are managed.

4.6.47 We welcome the proposals but are concerned that these may be no more than good intentions. How will GBC ensure that they are carried out fully – and paid for by the developer?

Reasoned Justification:

4.6.50 As the emerging strategy for Surrey and the GISPD are not yet available the plan should not be proposing sites that will jeopardise them. The implication is that this aspect of the plan is not being taken seriously and will carry no weight in site selection despite the guidance in the NPPF.

4.6.51 In fact some GBC contract mowing and lane management is not in line with a strategy that is meant to protect biodiversity. Examples – damage to tree roots and unsympathetic treatment of roadside vegetation (that includes orchid species) in Chalk Lane – southern end of Kingston Meadow in East Horsley is now mown flat rather than left to grow as a meadow through the Spring and Summer as it used to be (so no more day-flying Burnet moths).

KEY EVIDENCE

Guildford Borough Policy Statements are statements – not evidence.

Additional evidence should include:

Existing SNCI surveys, including those that took place in 2004-2007.

Biodiversity evidence emerging from Neighbourhood Plans.

Evidence obtained by requests to local naturalists and natural history societies including those with a specialist interest.

MONITORING

Simply maintaining open space will not be enough for a significantly enlarged population.

Providing more open space to meet existing shortfalls or the needs of a much larger population will reduce the area of land currently in food production or providing wildlife habitat.

SANG delivery is harming existing biodiversity

It is not clear how you will measure a change in biodiversity just by looking at planning applications. “Net gains in biodiversity provided by development” is a contradiction in terms. There may well be a few examples in England where low density housing has been combined with manufactured habitat at the expense of loss of agricultural land with no surrounding habitat damage - but we see no evidence of that in the Local Plan. Even when a housing development replaces agricultural land it increases pressure on the surrounding countryside. A simple example is where houses border woodland and residents dump their garden rubbish (and often worse) over the garden fence. Increased leisure use on nearby countryside also has an adverse effect on biodiversity.

There is no guarantee that mitigations listed in an application will be carried out and their effectiveness is not guaranteed either. GBC would need to carry out follow-up ecological surveys on all sites. Who would pay for these? Are there enough consultants to carry out the work in sufficient detail? What aspects of biodiversity will be measured?

How frequently are surveys by Natural England intended to take place? How will GBC ensure that NE carry them out? A baseline of existing surveys against which changes will be monitored should be included within the plan and it must be comprehensive for monitoring to be effective.

How frequently will SNCI surveys be carried out? At what expense? The last survey published in 2007 made recommendations for an increase in the size of the Wisley Airfield SNCI and stated that this should be taken into account for planning purposes. This was overridden in the recent planning inspector’s report and the Local Plan includes this
particular SNCI as a building site. This is clearly a case of hypocrisy and suggests that the Council has no genuine intention to maintain biodiversity let alone enhance it.

We believe that a survey of SNCIs is currently taking place but that it is limited in scope to the previously known sites. This prevents other sites, where genuine biodiversity enhancement has taken place (often as a result of volunteer community effort), from being recognised in this way. While every stone is being turned over in the quest to find green space to build on, no genuine effort is being made to identify biodiversity hotspots that may have been overlooked in the past. In other words the approach being taken is one that intends to make no net gain, and possibly even reduce, sites of nature conservation interest – in contradiction to the stated aims.

If an existing SNCI (or one proposed on grounds of biodiversity but not formally accepted in a Local Plan) is found to be in poor condition the action taken should be to bring it back into good condition – not to remove its status and build on it.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to the omission of a policy for the River Wey which was included in the previous local plan. The existing policy G11 from 2003 Local Plan should be included so that development within the River Wey corridor will only be permitted provided that:

1.1.1 It protects or improves the special character of the River Wey and the Guildford and Godalming Navigations, in particular their visual, setting, amenities, ecological value, architectural and historic interest;

1.1.2 The special character of the landscape and townscape in the corridor is protected or improved;

1.1.3 Views both within and from the corridor which contribute to this special character are protected or improved;

1.1.4 Where appropriate, public access is provided to and along the River and the Navigations.

1.1.5 The Nature Conservation value of the site is protected or improved

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Policy P1 Surrey Hills Area of Outstanding National Beauty

Whilst the Guildford Greenbelt Group welcomes the inclusion of a policy to protect the AONB within its submission draft of the Local Plan, we strongly object to Policy P1 and its supporting text, which we consider has weakened the protection of the AONB and the AGLV from the previous draft Plan.

Much of our concern stems from the loose wording of the Policy, which in some places renders the policy ineffective, for example:

“All proposals will be considered against whether they...”

“All development proposals within and adjacent to the AONB will be expected to conserve or enhance its special qualities”

Terms such as “considered” and “expected” are not strong enough in prohibiting development proposals that do not conserve and enhance the AONB, and it is likely that developers will be able to use this loose wording to their advantage.

Of particular concern is the paragraph 3, which begins:

“Whilst the AONB designation does not preclude specific types of development in the Surrey Hills and proposals will be assessed on their individual merits...”

This whole opening clause is unnecessary and almost invites development proposals. We believe that it should be deleted, and the sentence should therefore begin: “There is a presumption against major development in the AONB in accordance with NPPF.”

In addition to the weakness of the language, we are also concerned that the AONB criteria listed in the policy are not the most important ones in determining whether a planning application should be approved. Aside from the one outlined in the first bullet point (which relates to the AONB setting) none of these criteria is concerned with the key characteristics of AONB, ie landscape character, scenic beauty, important views, tranquility etc. Whether or not a development supports the rural economy or provides public access are of far less national importance than preserving the quality of the landscape itself.

We believe that the AONB Policy in the Draft Plan 2014 provided greater protection to the AONB, and would like to see the following sentences reinserted:

• “The national significance the AONB will be afforded the highest level of protection and only proposals which can be sensitively amalgamated into the area and which complement and enhance the character of the AONB will be considered”
• “Proposals within the AGLV which would have a negative impact upon views into and out of the AONB and which do not respect the setting, will not be acceptable”
• In accordance with the most up to date Minerals and Waste Plan, safeguarding of applicable land within the AONB and/or AGLV may be necessary and deemed appropriate

Finally, we would like to see a clause which gives protection to the candidate areas for AONB status in the forthcoming Surrey Hills AONB Boundary Review. We consider that all land that has been assessed as meeting the latest Natural England criteria for AONBs should be subject to the same level of protection as an AONB, not just land that has been designated AGLV.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
We object to Policy P2 green belt. This policy states, “the general extent of the Green Belt has been retained.” We do not accept this statement. The policy wording is weak in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the present Government’s policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations – an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it. It is an inalienable public good. Once gone it is gone forever. It is not the Council’s to give away. Policy P2 completely fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it has been around for a long time and it needs to be permanently protected. It was actually established in a local act of parliament in Guildford under the London Home Counties (Green Belt) Act 1938 and subsequently in the 1944 Greater London Plan to contain the outward sprawl of London. The boundaries of the Green Belt through Guildford Borough were later defined in the 1987 Local Plan, forming part of a 19-24km concentric belt around London. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land. The principles of the Green Belt designation were outlined within Planning Policy Guidance 2: Green Belts (PPG2) and are found within the National Planning Policy Framework (NPPF). The Metropolitan Green Belt is an exemplar of good planning and the envy of planners throughout the world. Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of: 1. Agricultural production 2. Rural leisure and tourism amenities 3. Water catchment 4. Flood control 5. Biodiversity 6. Natural heritage 7. A carbon sink for air pollution 8. Room for public facilities such as parks and burial grounds 9. Profitable film locations (e.g. Shere) 10. Future economic potential such as mineral extraction (even fracking) 11. Natural beauty, landmarks, open space, rural views and sight lines 12. Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF). As a matter of law and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations. It is quite incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. No-one argues that we should sell 1.6% of the Crown jewels in order to build houses. We object to the “insetting” of 14 villages from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages. We are deeply disturbed that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are “leggy” in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests...
of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hell bent on self-defeat. We believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors. To “inset” two thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. We cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed “insetting” and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need (especially post-Brexit) and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to ALL Green Belt sites allocated for development in the local plan. We object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development, however, it does identify the principle of development and uses.” This ignores the tens of thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. This amounts to a war of attrition by the Council in conjunction with developers, since many busy residents are sick and tired of repeating the same comments to deaf ears. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014.13 There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints. All Green Belt sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
We object to this policy, taken in the light of the other policies proposed within the local plan.

There is huge emphasis on provision both of services and of additional Green Belt in Ash and Tongham. We object to this policy. It is not clear why new Green Belt should be designated here, while the Green Belt is being rolled back in all other areas of the borough. The only notable fact is that the Leader of the Council and other Executive members are based in this area and the question of impartiality does need to be raised.

Note that in the recent judicial review in relation to Ashdown Forest, the SANG zone for the Ashdown Forest SPA was 7km, and this gave rise to a lower housing number than that proposed by this local authority.

The urban areas of Ash and Tongham are indeed of importance within the borough, creating a barrier between the countryside of Guildford and the urban towns of Aldershot and Farnborough.

However, as noted, it does not seem entirely appropriate to seek to reduce Green Belt designation everywhere else in the borough, on the grounds of overwhelming housing need (which is itself not an exceptional circumstance) – including land within the Green Belt and the Thames Basin Heath SPA, but then to propose designating additional Green Belt in this particular area.

If the planning policy is sufficiently aggressive as to disregard existing Green Belt, to propose significant development in that area, then it is inappropriate, and in contravention of existing planning law, (Gallagher Homes v Solihull as determined by the Court of Appeal) to consider proposing new areas for Green Belt. It is unclear why the strategic gap that separates the Ash and Tongham urban areas from neighbouring Aldershot is of greater significance to the borough as a whole, than other threatened Green Belt villages and fields.

The desire to protect the strategic gap between Ash and Tongham and Ash Green is welcomed, and provided that this does not arise because of a loss of Green Belt land elsewhere, the proposal to include some of this land within the Green Belt is welcomed too. However, Green Belt boundaries should not be traded off. One village community should not benefit to the detriment of another. The proposed extension of Green Belt designation to Ash and Tongham is unlikely to succeed, because it is not inherently better at serving the purposes of the Green Belt than other areas threatened by development, and a similar attempt in Solihull was wholly unsuccessful. The Court of Appeal decision will represent a precedent in this regard.

As noted in Gallagher Homes v Solihull, the NPPF is based on PPG2 which is quoted in a similar context to this proposal:

“If such an alteration is proposed the Secretary of State will wish to be satisfied that the authority has considered opportunities for development within the urban areas contained by and beyond the Green Belt.”

In other words, before altering Green Belt boundaries (to use for building), land beyond the Green Belt should be considered as building land first; and first of all, brownfield urban land should be used. Provided that the Green Belt is not subject to the wholesale assault then this extension might be acceptable to the wider community within the borough. It will not be acceptable as a trade-off for loss of the Green Belt elsewhere.

Policy P3 States that ‘development will only be permitted permitted provided it:

• “requires a countryside location or where a rural location can be justified, and
• is proportionate to the nature and scale of the site, its setting and countryside location, and
• does not lead to greater physical or visual coalescence between the Ash and Tongham urban area and Aldershot”.

We would like to know what the rural justification of proposed housing has for Ash and Tongham and how Guildford Borough Council proves that contributes to the rural economy? In the Local Plan, Guildford Borough Council refers to these Eastern Borough proposals as ‘extensions to urban boundaries’. Developments of 1241 and 91 homes cannot possibly meet the necessary term ‘rural justification’ (The site allocation maps show different figures of 1200, 62, 58 homes)

As far as we can tell with the corresponding maps, the proposed developments in Ash and Tongham will create a greater coalescence between the separate villages to combine them into one urban area with a slither of green space between it and the A331/Aldershot.
Designation of Green Belt does not guarantee a barrier between Ash and Ash Green as Guildford has demonstrated the urge to move the Green Belt boundaries in communities elsewhere. We would suggest removing the allocation of further Green Belt designation as it does not follow NPPG Policy. There are no exceptional circumstances to allow changes in Green Belt Boundaries in Guildford.

It is also not clear what the impact will be of designating SANG in this area, and whether this will be used to permit building on Green Belt or land otherwise protected because of the Thames Basin Heath SPA designation elsewhere.

Ash and Tongham have countryside designated Ancient Woodland, AGLV and SNCI and a sensitive historic site which must be protected. This, together with a focus on using existing brownfield within the urban settlement area and a more realistic housing number, should succeed in protecting the valuable countryside around Ash and Tongham, while the attempt to adjust Green Belt boundaries seems doomed to failure and therefore will allow wholesale overdevelopment in this area.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to policy P4 Flood risk and water source protection zones Urban development on existing hardstanding would not create additional flood risk, especially where there is scope for improved flood resistance measures to be included in the design. Sites such as Woodbridge Meadows Industrial Estate and the Arriva bus depot, on the River Wey bank, are potential high-value brownfield sites that would not be available for housing if this policy is implemented. It is not the footprint of existing buildings that should limit future development, but the extent of existing hardstanding. Tarmac and concrete do not act as functional floodplain, and some land with hard standing close to the river, within the town centre and within easy walking distance of the railway station, provides an excellent opportunity for real urban regeneration that could protect the surrounding countryside. We strongly believe that this policy should not be used as a convenient excuse not to build on the extensive area of brownfield sites between the station and Ladymead. Any new development in this area could easily be built on stilts with flood resistant ground floor parking in areas that are identified as high flood risk. This area has been built over successfully over the last 50 years. We do not need to stop now.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
We OBJECT to this policy. This policy is weak. The mitigation (cash compensation) offered for development in the special protection area is so small and negligible as to be meaningless. SANG (Suitable Alternative Natural Greenspace) is not beneficial; the sites identified or targeted are already green space. To create SANG is just using agricultural or wooded land as recreation land in order to justify building on other green spaces. There is no actual increase in environmental protection; it is a policy designed to permit building on otherwise protected areas. SANG – in part used to prevent dogs and cats attacking nesting birds - must ensure that it is not using land which is adjacent to the special protection areas.

Thames Basin Heaths Special Protection Area (TBH SPA; see Map 1, Appendix 1), is a statutory designated site and designated for its rare and vulnerable birds, specifically nightjar, Dartford warbler and woodlark under the EC Birds Directive. This site also forms part of the Thursley, Ash, Pirbright and Chobham Special Area of Conservation (SAC), a statutory designated site and designated for its North Atlantic wet heaths, European dry heaths and peat bogs.

We believe that the Plan is unsound as the Habitats Regulations Assessment prepared for GBC does not take sufficient account of the impact seven proposed developments will have upon the Thames Basin Heaths Special Protection Area (TBH SPA) which is a European Site (as defined under the Habitats Directive and Conservation of Habitats and Species Regulations 2010 (as amended).

The seven proposed developments are less than five kilometres away from the TBH SPA and in some cases not much beyond the 400m exclusion zone, occupying an area between under 1km to just over 2km from the TBH SPA. It has been indicated that the cumulative effect of further residential development up to 5 km from protected heathlands will have a significant adverse effect on the heaths. The TBH SPA is an internationally important habitat for three rare species of bird - the Dartford warbler, woodlark and nightjar. The latter two are ground nesting and therefore particularly susceptible to disturbance from people and animals. In fact Natural England believes that recreational use of the heaths arising from housing developments up to five kilometres away from a SPA will create disturbance to rare bird populations.

A survey in 2008 showed that more than 83% of visitors to the SPA arrived by car and that 70% of those had come from within 5km of its access point. A very large proportion of the TBH SPA visitors are dog walkers, many of whom visit a particular site on a regular basis. A follow-up survey in 2012 found that there was a 10% increase in visitors to the SPA.

A survey of households carried out by a veterinary team at Bristol University in 2010 “Number and ownership profiles of cats and dogs in the UK” published in the Journal of The British Veterinary Association indicates 31% households own dogs and 26% households own cats. Dogs were more likely to be owned by rural households.

Applying this analysis for all new housing at the listed strategic housing sites in the draft Local Plan within the 400m-5km mitigation zone of TBHSPA (in total 7,000 new homes), the cumulative impact of dog ownership (up to an estimated 2,200 new dogs within 5 km of TBHSPA) with dog-walker incursions on the rare bird species habitat of the TBHSPA will be a devastating increase. No amount of SANG nor SAMM programmes will change human behaviour and the draft Local Plan evidence base contains no studies or data to prove otherwise, it contains only unproven assertions. Natural England can provide no survey evidence of the effectiveness of SANG or SAMM programmes in attracting dog-walkers and other visitors away from TBHSPA.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to policy S1 as stated and the presumption in favour of sustainable development While this wording is based on the National Planning Policy Framework (NPPF) – which is binding - this policy fails to recognise that development in rural areas, with inadequate transport and other infrastructure, cannot cope with the proposed scale of development. It is unsustainable. This should represent an absolute constraint on development. The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” Policy S1 ought to set a clear framework. No definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts. The promise “to secure development that secures the economic, social and environmental conditions in the area” omits to recognise that economic growth, social justice and environmental protection often conflict. It does not say how each element is to be weighted or conflicts resolved. Under this policy, any development will qualify as “sustainable”, thereby failing to apply the NPPF’s most important guideline. The most gaping hole in Policy S1 is the Green Belt. As an inter-generational covenant (enshrined in primary legislation) to protect green areas in perpetuity, the Green Belt is a living example of sustainable development in practice. It is the envy of the world. Policy S1 should commit to uphold Green Belt boundaries and protections, setting at least one clear boundary to planning decisions. The plan’s contempt for Green Belt constraints is amply demonstrated in later policies. The commitment to approve planning applications “wherever possible” and “without delay” reveals this draft plan’s pro-development bias. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy suggests that “We will work proactively with applicants jointly to find solutions that mean that proposals can be approved wherever possible, and to secure development that improves the economic, social and environmental conditions in the area”. This does not appear to accord with the requirements of NPPF 10 which notes that “plans and decisions need to take local circumstances into account so that they respond to the different opportunities for achieving sustainable development in different areas”.

Furthermore NPPF 14 notes that specific policies within the framework may require development to be restricted, and in this context, decision taking should not imply that development proposals should be approved in all circumstances.

NPPF 17 notes further that there are 12 planning principles which should be applied to underpin both plan-making and decision-taking and so these should be taken into account in the framing and the administering of the Local Plan. These include

• "empowering local people to shape their surroundings"
• "take account of the different roles and character of different areas, promoting the vitality of our urban areas, protecting the Green Belts around them, recognising the intrinsic character and beauty of the countryside and supporting thriving communities within it" [note in this context that Guildford is in the Metropolitan Green Belt surrounding London and, therefore, that all users of the Green Belt within London are stake holders for the purposes of this assessment]
• "support the transition to a low carbon future" [hardly promoted by increasing commuter dwellings]
• "contribute to conserving and enhancing the natural environment and reducing pollution"
• "encourage the effective use of land by reusing land that has been previously developed (brownfield land) provided it is not of high environmental value"
• "conserve heritage assets in a manner appropriate to their significance"
• "actively manage patterns of growth to make the fullest possible use of public transport walking and cycling and focus significant development on locations which can be made sustainable"

Of the 12 core principles set out in NPPF 17, Policy S1 seems to be disregarding at least 7 of these. These core principles must be taken into account in order to meet the requirement to comply with NPPF 17.
There is grave concern about the statement in the policy that “Planning applications that accord with the policies in this Local Plan (and, where relevant, with policies in adopted neighbourhood plans) will be approved without delay, unless material considerations indicate otherwise.” This is too flexible and too permissive and open to subsequent abuse. Policies should be structured as part of local plan so that they will be enforceable for the duration of the plan. Furthermore, the presumption in favour of all applications, as stated in this policy, fails to recognise the requirement for constraints which should be agreed and implemented as part of the Local Plan process. The proximity of the SPA, for example, should preclude development (which is a major factor for a large proportion of the borough); most development in the AONB should be severely restricted (which is another major factor); and Green Belt should act as a substantial constraint on development. The Birds and Habitats Directive is a further major issue.

Astonishingly, there are no Monitoring Indicators to ensure the achievement of this core requirement set out in paragraph 14 of the NPPF.

In the context of assessing sustainability it is worth quoting from the response of David Roberts who is a retired civil servant who was, from 2005-08, in charge of the British Government's international policy on Sustainable Development (SD).

“The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking[1].” Standing at the head of the draft plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given[2]. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The promise “to secure development that secures the economic, social and environmental conditions in the area” omits to recognise that economic growth, social justice and environmental protection often conflict. It does not say how each element is to be weighted or conflicts resolved. As a practical guide to the tough choices Councillors will face, it is useless. Under this policy, any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

The most gaping hole in Policy S1 is the Green Belt. As an inter-generational covenant (enshrined in primary legislation) to protect green areas in perpetuity, the Green Belt is a living example of sustainable development in practice. It is the envy of the world. Policy S1 should commit to uphold Green Belt boundaries and protections, setting at least one clear boundary to planning decisions. The plan’s contempt for Green Belt constraints is amply demonstrated in later policies.

The commitment to approve planning applications “wherever possible” and “without delay” reveals this draft plan’s pro-development bias. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17[3].

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We object to policy S2 the Borough Wide Strategy and the commitment to build 13,860 homes based on the Strategic Housing Market Assessment (SHMA) 2015 prepared by GL Hearn. The OAN “objectively assessed need” figure in the SHMA of 693 homes a year is far too high. We are very surprised and concerned that GBC have adopted the OAN of 13,860 homes as the housing target without any application of constraints as required under the National Planning Policy Framework and the National Planning Policy Guidance. The scale of the housing number proposed, inevitably increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole. Other local planning authorities appear to take a more balanced view in their approach to planning. The Woking Core Strategy 2012 applies a constraint of 50% from the 594 new homes identified in their own SHMA. “It should be noted that local evidence (Strategic Housing Market Assessment - SHMA) highlights a need for an additional 499 new affordable homes every year in the Borough and a total of 594 new homes every year when taking into account demand. Given the level of environmental constraints present in the Borough, it is considered that the provision of an average of 292 dwellings per annum represents a reasonable level of housing growth for Woking and is deliverable.” Historically GBC have correctly applied constraints on housing numbers to protect the Green Belt. The Surrey Structure Plan 1994 advocated a general slowing down in the rates of development “because of the environmental constraints which exist in the County, including Green Belt”. This slowing down was reflected in the requirement that Guildford Borough should accommodate a net increase of 3,800 dwellings between 1991 and 2006. This was a lower rate of development than in previous years. It is interesting to note that the Structure Plan at that time expected sufficient land to arise within the urban areas to accommodate this requirement. However it would appear that today GBC have effectively ignored the real potential of the urban area to provide for housing. At the same time GBC have adopted a radically different approach to the policy of the Council over the last 20/30 years and are now ignoring government policy in relation to the Green Belt. A detailed and comprehensive professional review of the SHMA dated June 2016 by NMSS an independent expert firm dealing with housing and demographics procured by Guildford Residents Association (GRA) has concluded that the OAN figure should be revised down from 693 homes per annum to 510 homes per annum. The 41 page report by NMSS which can be found on the GRA website entitled “A Review of the West Surrey SHMA as it relates to the Objectively Assessed Housing Needs of Guildford”. It was a real community effort. It was paid for by over separate 20 Guildford Residents Associations and Local Parish Councils none of whom were convinced that the SHMA report procured and presented by GBC was accurate or transparent or accessible in a meaningful way. So they clubbed together and collected contributions from many hundreds of Guildford residents to try to find out the truth of the housing need figure presented in the Local Plan. The NMSS report includes detailed analysis and financial modelling and was prepared by Neil McDonald who we were lucky to find. He is a niche consultant with the right skills and a national reputation. An independent adviser and commentator on housing demographics. He works with local authorities and others on the estimation of housing need and related issues. He was a civil servant and policy adviser to Ministers for over 30 years, the last 10 advising on housing and planning issues within the Department of Communities and Local Government. His 7 years as a Director at DCLG included a posting as Director, Planning Policy and a period as Chief Executive of the National Housing and Planning Advice Unit. NMSS found that the SHMA used in the Local Plan incorrectly adds extra homes to its basic demographic projection to allow for improving affordability of housing, increased student numbers and economic growth. The report found that none of these additions were justified based on the evidence presented within the SHMA. The report concluded amongst other matters that: The affordability of housing in Guildford is no worse than in other Surrey districts and boosting supply beyond the demographic OAN would not result in a noticeable improvement in affordability but simply in more people moving to the area. There are reasons for believing that the SHMA’s estimate of the number of homes needed for students may be too high and that an adequate provision for students is already included in the demographic OAN. The report advises that the Council should commission a separate student housing need figure for Guildford given the distorting effect of students on our overall OAN. It envisages that, once this exercise is undertaken, improved accuracy means the overall OAN would be likely to reduce still further. The SHMA seeks to estimate the number of homes needed to support employment growth using employment rate assumptions that are inconsistent with the employment forecasts. This produces misleading results. An analysis of the Cambridge Econometrics and Oxford Economics forecasts using employment or economic activity rate assumptions consistent with the forecasts suggests that in neither case is there a need to provide more housing than suggested by the demographic analysis. Indeed, in both cases a smaller population growth (and hence fewer homes) could support the jobs growth that is forecast. A further independent report was procured in 2016 by the Campaign for the Protection of Rural England CPRE from Richard Bate of Green Balance, an independent consultancy with expertise in demographic and housing matters to carry out a review of the GL Hearn SHMA. The report by Green Balance runs to 37 pages and its findings are that the OAN for homes in Guildford should be reduced from 693 per annum to 481 because: 1. the vacancy rate figures should be taken from local government annual records rather than from the 2011 Census. This would reduce vacancy rates to 2.9% in Guildford. 2. there should be no increase for affordability above basic demographic change. 3. there should be no increase for Student housing and it was considered
However, this is before constraints are applied to arrive at an acceptable housing target. A further study is attached which is included within this section by reference. It is unacceptable that demographic and economic model assumptions have been withheld by GBC and cannot be checked making the process unaccountable. The figure of 13,860 new homes is unsubstantiated. It has not been scrutinised by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by commercial sub-contractor used in preparing the SHMA. Both the National Planning Policy Framework and National Planning Policy Guidance provide a clear policy direction that the overall housing target should be reduced by a variety of constraints to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors. We have corrected this omission below. Infrastructure policies should be planned at the same time as Local Plans but in this case they have effectively been left out and are not sufficiently developed. The Framework also makes clear that, once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. Unmet housing need (including for traveller sites) is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development on a site within the Green Belt. Appendix: Report prepared by David Reeve in relation to the SHMA (attached as this is a separate document but included within this section by reference). The NEED TO APPLY CONSTRAINTS Ministerial guidance in relation to building on the Green Belt is clear.1. “the single issue of unmet need - is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development in the Green Belt” - Nick Boles to Sir Paul Beresford MP 7th February 2014.2. “we were always very clear that we would maintain key protections for the countryside, and, in particular, for the Green Belt. The Framework makes it clear that a Green Belt boundary may be altered only in exceptional circumstances and reiterates the importance and permanence of the Green Belt” – Nick Boles to Sir Michael Pitt, Planning Inspectorate 3rd March 2014.3. “Planning Guidance, updated in March 2014, also states that unmet housing need is unlikely to outweigh the harm to the Green Belt to constitute the very special circumstances justifying inappropriate development within the Green Belt” – Nick Boles to Sir Paul Beresford MP 18th June 2014.70% of the sites put forward in the Local Plan are in the Green Belt which flies in the face of current government planning policy. The National Planning Policy Framework (NPPF), National Planning Policy Guidance and case law make it clear that Green Belt is an absolute constraint on housing supply. Exceptional circumstances need to be shown to adjust boundaries. Other constraints under the NPPF include assessments of sustainability, strategic flood risk assessment, physical constraints on land use and infrastructure constraints (this can include road congestion, schools, drains, power supply and medical requirements). Constraints should be applied to the Objectively Assessed Housing Need (OAN). However this itself is overstated and should be reduced from 693 per annum to 500. In view of the comments above it would appear logical to apply CONSTRAINTS in line with government policy to a corrected OAN. Of approximately 50% to account for the fact that 89% of the borough is in the permanent Green Belt and development is not supported by adequate major infrastructure. This reduction is in line with the constraints percentage of 50% applied by Woking Borough Council. This would result in a more acceptable and practically achievable HOUSING TARGET of 250 homes per annum which over a 20-year period would be 5,000 homes. All of these homes could be built in the existing urban brownfield areas of the borough and would in part satisfy the 20,000 objections made by residents to the 2014 draft plan and also relieve the additional problems of inadequate infrastructure. It would also mean that there is currently 8.5 years supply of housing (2131/250) which is made up of existing permissions granted (1,518) and completions made (613) during 2013/2015. (Monitoring Report by GBC 2015) Whilst we have many significant objections to the GBC Local Plan we applaud the policy statement by GBC in their Monitoring Report, “We will continue to monitor the use of previously developed land, and continue to identify as many opportunities as possible for redevelopment of previously developed land.” We believe it will be to the benefit of all residents if GBC can apply themselves vigorously to this endeavour in order to protect the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

The evidence base is far from adequate. The council is not in possession of the model used to calculate the OAN. Much of the remainder of the 'evidence base' appears to have been cobbled together to support as development agenda, with insufficient regard to infrastructure needs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: SQLP16/1310  Respondent: 8640353 / Julian Cranwell  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to the paucity of the evidence base. The submission documents are unsound, unreliable and inconsistent.

Key parts of the evidence base are flawed or based on withheld assumptions. The current SHMA inflates the proposed housing figure due to the following factors:

- the failure to correct for errors in the historical data for international migration flows;
- the way it considers students and affordability, and;
- the flaws in the method for estimating the number of homes needed to support job growth;
- the treatment of vacant property.

The Green Belt and Countryside Study does not value the fundamental aim of Metropolitan Green Belt properly or look strategically at options for development in major settlements beyond. The way Green Belt is parcelled up and scored is not valid: serving 2 Green Belt functions is as valid as serving 4 functions. Green Belt is Green Belt, it does not require assessment or qualification. The Green Belt sensitivity analysis is not a valid basis for informing decisions. Exceptional circumstances clearly do not exist to justify amendments to Green Belt boundaries as part of the Local Plan process. It is quite achievable for realistically prepared and identified development needs to be accommodated in Guildford’s urban areas and villages.

The Transport Evidence has been produced very late and is incomplete, inaccurate and untested to the extent that the Plan is not ready for a Regulation 19 consultation. It is emerging that the Strategic Highway Assessment shows there will be congestion, even with all the highway schemes in the Plan. Many questions remain unanswered. E.g. Why would 1000 homes on Slyfield generate no extra traffic? The report only gives average speeds and information needed to understand how much congestion will occur and where it has not been provided in time to inform Plan proposals or responses. The available evidence suggests much of the proposed Sustainable Movement Corridor cannot be delivered due to narrow roads.
and pinch points. Evidence on bus travel is fundamentally compromised because no clear and workable location for a bus interchange is proposed. No information has been provided on the demand for and capacity of rail services. The main line to London is already extremely busy in peak periods. Information about the town centre as regards traffic, buses and parking is lacking. It is not credible to proceed without this given existing levels of congestion, the number of transport routes that rely on the town centre to cross the Downs, the shortage of crossing points over the railway and river and the fact that narrow roads and steep slopes make Guildford unsuitable for a ring road approach. The Strategic Highway Assessment 2016 is flawed. It is invalid to base this on less traffic growth than the proposed housing growth. The report points to overcapacity use of the A3, M25, A31, A320, Millbrook, Ladymead, Woodbridge Road, York Road, London Road but understates the congestion consequences. Various suggested queue reductions are unexplained.

The consequences of major proposed reductions in road space in the town centre (eg closure of Walnut Tree Close, narrowing of Woodbridge Road, reduced capacity of the gyratory) and of developing Burnt Common are not included. More time is needed to assess and refine this crucial 11th hour report which seems incomplete, understates the consequences of traffic overload, shows inconsistencies, and does not supply assumptions or information needed to understand queues at junctions.

The Guildford Retail Study Update lacks credibility and there is no proven case for expanding comparison retail space which is undermined by failure to implement existing retail consents at the North Street development over the last 10 years. The Guildford Retail Study does not take account of changing retail patterns in relation to the threat of the internet and the "clicks and mortar" conflict. The study also assumes a number of logged retail requirements from companies already in liquidation or with national requirements that exclude Guildford. We believe that it was unacceptable to stop monitoring air quality, where NO2 emissions exceed limits, on the unrealistic assumption congestion would reduce. Estimates of premature deaths have doubled and issues with vehicle emission controls have emerged. Traffic noise from the A3 should also be reported.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Key parts of the evidence are missing, flawed or based on withheld assumptions. We consider therefore that it is questionable as to whether the Local Plan meets all legal requirements. The Strategic Housing Market Assessment overstates need, the Green Belt and Countryside Study uses a flawed approach and the Transport evidence is too late and incomplete to be relied upon to inform the Plan. The Plan preparation process has had inadequate regard for national policy which attaches “great importance” to the “openness” and “permanence” of Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level. The Sustainability Appraisal seems to have lost sight of the concept of Sustainable Development as described in the National Planning Policy Framework to the extent that we question whether it complies with the requirement. It is unacceptable to treat Green Belt as a readily available source of development land during Plan preparation. The Mayor of London intends to respect Green Belt. The test of “exceptional circumstances” that might justify allocating Green Belt land for development in a Local Plan has not been rigorously and transparently applied at a strategic level. Releasing Green Belt to fund infrastructure or build on open, previously-developed Green Belt does not pass this test. Opportunities to channel development towards brownfield locations beyond the outer Green Belt boundary, linked to sustainable transport, have not been adequately considered. It is not credible to suggest the Green Belt is being treated as permanent when its boundary was changed as recently as 2003 as part of the last Local Plan review. Indeed, land released in 2003 is neither fully developed nor efficiently used. An approach of eroding the Green Belt at each Local Plan review is not sustainable. If there is a case for Green Belt development, it needs to be proven through the application of policy.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)
Object. The plan is completely unsound, for the reasons already given, in response to questions 1 and 2.

The housing number has been prepared behind closed doors, without the council having the facility to verify the calculations, or assumptions used.

There is no desire or need to remove the 14 villages from the greenbelt.

The proposals would change the character of the villages forever.

The council has made almost no effort to utilise the large brownfield assets it controls to provide housing, as directed by central government.

The principal architect of the plan is a convicted forger, who behaved fraudulently while in office.

The following changes are necessary to ensure the plan is made sound:

1. No building on the greenbelt, until all available brownfield land has been used up.
2. Require developers to use up their land banks, before any new greenbelt is released.
3. Start from scratch on a new plan rather than tinker with the discredited previous plan, virtually unchanged, with no objections dealt with.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We consider that the Local Plan is unsound. Guildford is physically constrained being a gap town set in the Surrey Hills AONB and in Metropolitan Green Belt. Significant parts are affected by the Thames Basin Heath Special Protection Area. There are also notable areas of river, surface water, groundwater and surface water flood risk. Constricted road and rail routes converge to cross the downs seeking to avoid both high ground and floodplain. These compete with housing for land and there is no space for road widening or a conventional ring road approach. The Local Plan process envisages that the housing target should be lower than the “objectively assessed need” if there are valid constraints. **GBC have failed to apply any reduction. We consider this makes the plan undeliverable and unsound.** We believe it would be harmful to the character, quality of life and economy of Guildford to apply the housing figure to a number of 13,860 new homes by 2033. We submit it would be counter to sustainable development as a whole (in particular to living within environmental limits and achieving a sustainable economy) and contrary to policy to develop on the scale currently proposed. We are concerned that insufficient attention has been paid to cumulative impacts with constraints considered separately for each site. In view of the extent of physical and policy constraints, the inflated SHMA figure, and the transport evidence indicating that the Plan would lead to congestion, the OAN figure should be **500 homes per annum.** After application of
constraints the target should be in the range of 250 homes per annum and kept under regular review. The extent to which the Sustainability Appraisal fails to test the sustainability of the spatial options in a meaningful way casts doubt over whether sustainability has been assessed. The report treats various major development sites in Green Belt, contrary to the importance attached to protecting Green Belt, as “a given”, fails to consider options that constrain development or that make greater use of brownfield or previously released greenfield land, focuses on a range of options that involve developing on even more Green Belt around Guildford in order to protect Green Belt around Woking does not consider environmental limits or impact on the next generation in terms of weighing demand for homes for the young alongside the use of all possible last resort greenfield options by one generation. The National Planning Policy Framework requires that objectively assessed needs should be met unless: "any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; or specific policies in this Framework indicate development should be restricted." The specific policies described include several of particular relevance to Guildford including sites protected under the Birds and Habitats Directive, Sites of Special Scientific Interest, Green Belt, Local Green Space, Area of Outstanding Natural Beauty, designated heritage assets and locations at risk of flooding. In this situation, we would question whether it is appropriate for the Appraisal to propose meeting needs in full from a sustainability perspective. Notwithstanding guidance that the Sustainability Appraisal should be proportionate, strategic and look at significant matters, the assessment appears deficient and biased in the spectrum of alternatives it considers to the point that it is questionable whether it meets the requirements. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation. GBC has proposed an OAN of 693 houses per annum in the GL Hearn Strategic Housing Market Assessment (SHMA) which we consider is unsupported. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018. This is too late.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

Object. Whilst GBC has cooperated on a joint SHMA, with Waverley and Woking Councils, the other 2 subcontracted the SHMA development to GBC.

GBC subcontracted the work to G.L. Hearn, who in turn sub-contracted to Justin Gardner, which ised its own proprietary model to calculate the housing need. The model used has not been released to any of the 3 councils, or the public, in order for the workings to be independently verified, as required by the NPPF.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

Rather than respond to the 20,000 objections to the previous draft, GBC has taken the easy route of trotting out the previous plan, almost unchanged, apart from an increase in the OAN, for some explained reason. They have spent a fortune on PR consultants to plug their achievements, whereas they should have gone back to the drawing board, and started from scratch.

The constraints, which are required to be applied, under the NPPF, such as the purpose of the greenbelt have not been applied.

The GBC Tory party promised in its 2015 election manifesto to protect the greenbelt, and yet this plan proposes the wholesale destruction of the greenbelt.

There is little or no proposed solution to improving the infrastructure, which is already under strain.

This plan is not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/10061  Respondent: 8640353 / Julian Cranwell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Vision and ambition
We consider that the vision underlying this Local Plan is inadequate and that the ambitions proposed are inappropriate.

The vision is to build 693 dwellings a year, an inflated housing target, produced by using a “black box” model that takes no account of anomalies in the ONS statistics for the borough that underpin this model. One such anomaly is the increase in the number of university students during the base years used to generate ONS population projections. Consultants used by GBC ignored this, so the housing target is far in excess of the needs of residents. This housing target will result in the borough’s permanent resident population increasing at 4.5 times the rate of population increase during the period 2001 to 2011, as measured by the censuses in these years. Given the existing strain on infrastructure in the borough the “vision” in this plan will create a nightmare for existing residents.

The only ambition in this plan is to build on a scale across the borough never before seen, driven by the ambition to “roll back the green belt”. There is no regeneration programme for urban areas of Guildford, and instead of using the Local Plan as an opportunity for redevelopment within Guildford’s deprived areas, the focus is on large developments outside Guildford, mostly in green belt. The plan has nothing for low paid workers in Guildford, and very little for young people who wish to live in the town. It is a plan to benefit developers, not residents; a plan rooted in the past, but without learning lessons from the past.

There are many contradictions within this Local Plan, and a few of examples of these are given below:

- The plan proposes a major increase in traditional “bricks and mortar” retail in the town centre, as well as an expansion in warehousing and distribution. Workers in these sectors tend to be among the lowest paid, at or just above the minimum wage. The plan places an emphasis on the provision of “affordable” housing, but those on the minimum wage cannot afford “affordable” housing, it is a misnomer. Workers in these sectors need social housing, but there are no plans for a significant expansion in Guildford’s social housing.

- As well as an increase in town centre retail, etc it is proposed to locate new employment sites in or close to the urban area of Guildford. Only 20% of the housing proposed is to be within the town, with the remainder outside Guildford town. This means that if employers take up the buildings in the centre of the town (this is a big if, as in surveys many employers complain about congestion) workers in these employment centres will have to live outside the town. Inevitably this means they will rely on cars and vans to get to their place of work. This is not sustainable, Guildford already has a problem with congestion and air pollution.

- The rate of growth (averaging more than 693 dwellings a year to 2031) means if employment is to be provided locally (for about 1,200 new adult residents a year) Guildford’s economy would have to expand at a rate well above anything seen in the recent past, and be sustained at this rate for 16 years – a period when history indicates there will be at least two national/international economic downturns. This sustained growth would be unprecedented. Without an expansion in local employment, Guildford will become a dormitory town for workers commuting long distances to other areas. This is not sustainable.

- The delivery of housing is entirely in the hands of private companies that currently enjoy record profits due to their control of the delivery of new homes. These companies will simply not build if anything has a major impact on their profitability, be it a global economic downturn or a local oversupply of housing, whatever. Similarly, much of the infrastructure required has to be built by private companies, over which GBC have no powers. In effect, GBC are proposing a Local Plan over which they have minimal control. They have no powers to force the delivery of their targets in that plan. This means the plan is an exercise in fantasy, but a fantasy that blights the lives of thousands of people, especially those who live close to proposed development areas.

These examples serve to illustrate inconsistencies within the plan. Other specific points addressing the declared “Vision and Ambition” are detailed below.

**Spatial Vision**
A plan that will increase car journeys as much as this one will, especially in an area that already suffers from heavy congestion with associated high levels of air pollution, could not be described as a “vision”. It is more of a nightmare than a vision. The Metropolitan Green Belt was established to prevent the urban sprawl that has blighted many countries, such as the USA, but the goal of this plan is to set aside the protection offered by the Green Belt, and to create urban sprawl, with large extensions to the urban area of Guildford and the creation of urban areas in the countryside.

A contributor to the nightmare vision is the ongoing lack of investment in infrastructure, which will be exacerbated by this plan. In terms of infrastructure, the Surrey County Council Infrastructure Plan estimated that the borough would need investment totalling £2.5 billion, based on the provision of about 9,300 dwellings through the period of the plan. GBC plan for at least 13,860 dwellings, most of them outside the urban areas of Guildford and so infrastructure needs will be higher than estimated. Of the £2.5 billion, SCC estimated that £2 billion would be available from various sources, leaving a shortfall of £0.5 billion. In an address to a council meeting, Mike Murray, speaking on behalf of Wisley Property Investments estimated that the developments outlined in the Local Plan would raise £100 million for infrastructure investment. This leaves an obvious shortfall of £400 million – but in fact the shortfall will be much greater than this, due to the housing target in the Local Plan being about 50% higher than in the Surrey County Council estimate, and because of probable changes to the Community Infrastructure Levy. This means that the borough cannot possibly meet its infrastructure needs, which is not recognised in the infrastructure plan that forms part of the evidence base of this Local Plan.

Another contributor to the nightmare vision is the lack of recognition of the air quality problem in some areas of the borough. That there is an air quality issue is illustrated by nitrogen dioxide (NO2) concentrations that are higher than the legal maximum. One of the proposed development sites is close to one of the “official” NO2 measuring stations, at Wisley, and this reveals that nitrogen dioxide concentrations have been higher than the legal maximum of an annual average of 40µg/m³ for several years. Other measurements have been made in villages that have roads that serve the A3 and have high traffic levels, and these have shown concentrations well in excess of the legal maximum concentrations, to the extent that one village has formally requested that their village be designated as an air quality management area. This has not been put into effect, and the whole issue of air quality has been entirely ignored in the Local Plan, specifically in the spatial vision. The spatial “vision” proposed in this plan is the reverse of that recommended by the Institute for Air Quality Management, who said “The pattern of land use determines the need for travel, which is in turn a major influence on transport related emissions. Decisions made on the allocation of land use will dictate future emissions, as many people and businesses will make significant use of road transport for journeys between places that form part of their daily lives.”[1]

This has not been recognised in the spatial planning within this plan, which proposes that a large majority of new dwellings should be in rural areas, some considerable distance from the urban centre and employment centres. It is a plan that could have been written specifically to increase journeys by road.

This report[1] also suggested that

“Ideally, air quality should be a prime consideration for long term planning, so that land is used and allocated in ways that minimise emissions and that reduce the exposure of people to air pollution, so that land is used and allocated in ways that minimise emissions and that reduce the exposure of people to air pollution.”

This has not been part of spatial planning, but it should have been, even though there is no statutory requirement to do so. However, there is a statutory requirement to declare an air quality management area (AQMA) in areas that are known to have high pollution levels, but this has not been done. The spatial planning in this draft plan will expose more people to air pollution. Instead of what is proposed, more housing developments should be within Guildford town, which could be achieved by recognising that an expansion in retail and warehousing and distribution is not sustainable, and the land set aside in the town centre for these used instead to provide housing. GBC should also have used the local plan to set targets for air quality planning, with proposals to reduce noxious emissions, for example, through the use of LPG fuelled public service vehicles, as is happening in other areas, such as Birmingham. This has not been done; there is no proposal to tackle existing air pollution or to alleviate the pollution caused by adding approximately 30,000 cars and vans to those already in use within the borough. This is the approximate number of vehicles that the proposed housing additions would bring.

There are many areas where the text within the “spatial vision” section does not accord with reality, and a few examples are given below:
The opening text of the Spatial Vision reads

"The Local Plan: strategy and sites makes provision to meet the identified growth needs of the borough in terms of housing, employment and retail and leisure. This is achieved by maintaining the extent and function of the Green Belt in such a way as to protect the existing character of the borough through maintaining the clear distinction between urban and rural areas and safeguarding the natural built and historic environment”.

If this were what is planned, there would be little room for complaint. In fact, the clear distinction between urban and rural areas will be very considerably blurred with large holes punched into the Green Belt. More than 6% of the Green Belt will lose that designation.

The plan calls for a very large, high density development at Wisley, close to the boundary of the borough, in what is currently open countryside in the Green Belt. Another large development is planned at Garlick’s Arch, less than 3km south on the A3, and within another 3 km another at Gosden Hill Farm, all of which are in the Green Belt. When considering the view from the A3 the current appearance of open countryside from the junction with the M25 to Guildford along the A3 will be lost, replaced by two large developments in open countryside and a large extension to the urban area of Guildford, extending into the countryside. Thus the extent of the Green Belt will not be protected.

Two of the villages to be removed from the Green Belt are East Horsley and West Horsley, with a total of 363 ha (3.6 km2) to be removed from the Green Belt. The justification for insetting of villages is given in Policy D4, and this is to increase housing density within villages. From some of the plans given in the Local Plan showing proposed sites it is clear that it is expected that the provision of a number of development sites and the insetting of these villages is designed to lead to the coalescence of villages, such as East and West Horsley, and Normandy and Flexford. As the housing layout and style in these villages is an open pattern of development, they both make a contribution to the openness of the Green Belt, and this will be lost because the housing density for the developments proposed (averaging approximately 18 dwellings/ha) is considerably higher than the average density in these settlements.

It is not clear why new Green Belt will be created in and around Ash and Tongham to prevent Ash and Tongham merging with the village of Ash Green, when the result of removing East and West Horsley from the Green Belt together with several new development sites will be their coalescence. If it was important to prevent existing villages from merging then both East and West Horsley would remain in the Green Belt, and proposed developments would be smaller, in proportion to the existing villages.

Similar considerations apply to the settlements of Flexford and Normandy. The area to be inset is approximately 134 ha (1.3 km2) including a very large 67 ha development site, located between the two settlements. This will result in the coalescence of the settlements of Normandy and Flexford. As both make an important contribution to the openness of the Green Belt, they should not be inset, and this development site is inappropriate development in the Green Belt. Again, if it is important to prevent existing settlements of Ash and Tongham merging with Ash Green, then similar considerations should apply to these settlements, especially given that they are in the Green Belt, whereas Ash and Tongham are not.

The Spatial Vision goes on to say

“The plan provides for the delivery of 13,860 homes by 2033. The preferred location for this development is existing brownfield sites. Over 2,800 units are proposed in the urban areas to take advantage of the existing infrastructure and services, reduce the need to travel and offer alternatives modes of transport to the private car.”

Or, to put it another way: 11,060 homes are proposed on sites which cannot take advantage of the existing infrastructure and services, which will increase the need to travel and which cannot offer alternatives modes of transport to the private car.

The low proportion of housing within the urban centre is because there is so much emphasis on providing employment sites within the urban area, for example, by expanding retail premises, etc but not enough on using these sites for housing – to take advantage of the benefits defined in the above quotation. There is no emphasis on using land in the urban area.
efficiently, for example, by replacing existing land hungry surface car parks with multiple level car parks, thus freeing up land for housing development. A few employment centres have multi-level car parks and this should be encouraged in other centres, and all new employment centres should be required to have multi-level car parks, ideally with several levels underground. Steps such as this would increase the availability of brownfield land within the urban area, and permit higher levels of housing provision. Another step would be to encourage the University of Surrey to do the same, to be more efficient in their land use, and to house a much higher proportion of students within the university campus – as they previously agreed to do. There is adequate space for this within the existing campus, especially if surface car parks were replaced by multi-level car parks. This would free up many houses within Guildford which would then be available to residents, either to rent or purchase.

The Spatial Vision refers to the need to the economy and steps planned to support local employers. However, one of the major issues that employers have with Guildford is severe traffic congestion, and this is not addressed adequately in the plan, and the Spatial Policy outlined will make it much worse. As stated above, a very considerable shortfall in funds required for infrastructure has been highlighted by Surrey County Council. Proposals for many of the changes to local roads are light on detail, and the funds suggested as being required (which in fact are unlikely to be available) fall well short of what is actually necessary to effect an improvement in congestion.

The Local Plan includes the provision of additional sites and premises to meet employment needs across the borough, as well as 120 houses per year for new workers for new employers in the borough. However, the rosy picture painted in the employment report by the authors AECOM does not adequately reflect the actual condition of the local economy. The strength of the local economy as painted in the Employment Land Assessment Report[2] was exaggerated through the careful selection of supporting statistics. As an example, in the section with the heading Policy and Socio-Economics (page 1) the increase in employment within the borough was given as 4.1% during the period 2010 - 2013. This was a period when Guildford was still emerging from a recession, and so employment growth was strong, but not typical of a full business cycle. Employment growth over a longer period should have been given, to give a more accurate picture of the local economy. Using NOMIS statistics the number of residents employed in 2005 averaged 68,000 and this had increased to an average of 68,500 in 2015, so that the growth in employment over this 10 year period was less than 1%. Note too that the average employment in 2015 was considerably lower than peak employment reached in 2007, when it was 74,400. According to NOMIS statistics there has been very considerable variations in the number of residents employed and this is not captured by the Employment Land Assessment report. Although the NOMIS statistics refer to employment by residents of the borough rather than jobs within the borough (a similar time series for these is not readily available), jobs available locally should be reflected in the employment of residents. In fact, NOMIS statistics also reveal that the average weekly pay of residents in the borough is significantly higher (6% in 2015) than pay for those employed within the borough, suggesting the local economy is weaker than neighbouring economies. Residents commute outside the borough to get higher pay.

It is simply astonishing that the Local Plan suggests that jobs can be created over a 15 year period at a rate well in excess of anything that Guildford has seen in the past. It is simply a nonsense to add an additional 120 houses so that additional workers will come to the borough. The housing target of a minimum of 693 per year will result in an additional adult population of about 1,200 potential employees per year, and the local economy will not be able to supply employment for these people. Historical employment data provides no evidence that over a 15 year period an additional 18,000 jobs will be created within the borough, given that the number of residents in employment increased by only 0.7% in the 10 years from 2005 to 2015. Consequently, a large majority of new residents will be forced to commute out of the borough to find employment, adding enormously to traffic congestion and air pollution.

There are many other instances of selective use of statistics in the Employment Land Assessment Report, far too many to elaborate on. As the report concludes there is a need for additional land for employment premises, and because a large part of this land set aside for employment is within Guildford town, it is worth commenting on a few more instances of the use of statistics. This is because this land should be used for housing within the town, which is where the need for housing is, not in the countryside beyond the town. In Section 6.6 of this report2, an explanation of employment forecasts were given. Data was used by AECOM from 3 separate forecasting organisations for employment growth between 2015 to 2033, namely

- Cambridge Econometrics
- Experian
- Oxford Economics
These forecasts exhibited a very wide range – in the case of office employment the range was 0.55% to 1.18% per annum, so the highest forecast was 2.1 times the lowest. This may be acceptable in a short range forecast, but is wholly unacceptable for long range use. Similarly, the forecast for employment in the industrial/storage category ranged from 0.58% to 1.14%, so in this case the highest forecast was 2.0 times the lowest. Again, this range should be unacceptable for use in long range forecasts. These individual forecasts were averaged by AECOM to provide a number used to project the requirement for floor space for these respective employment categories. In this case, with forecasts from various sources exhibiting such a wide range, averaging is not appropriate. As an example of the dangers of averaging consider a human with half of their body in a deep freeze, at about -25°C, and the other half in an oven at 100°C. Their average temperature would be 37.5°C – an ideal body temperature, but that would be irrelevant because they would be dead. Averaging must take account of the range, etc and this has not been done. In fact, the variation given in these separate forecasts indicate that the quality of the forecasts is very debateable, given that they are all for the same variable, and over an extended period of time each forecast would result in a very different outcome.

In addition, the emphasis on these two employment categories is unwise as the total employment market is important – it is likely employment in some employment categories will fall, so if there is growth in any employment category it must serve to mop up unemployment as well as create new opportunities. Finally, statistics given for actual changes within Guildford cover the period 2004 to 2012 – but this should be unacceptable for a report published in September 2015, data up to 2014 must have been available at the time of publication.

A final example of the selective use of statistics is from section 6.11.2, in which the OPDM Employment Land Reviews Guidance Note is quoted. This was used to provide a ratio of land to premises on that land, over one storey, so that the area required for industrial land could be calculated. Quoted ratios ranged from 1:0.35 to 1:0.45 (ratio of land : premises) for manufacturing and from 1:0.40 to 1:0.60 for warehouse uses. AECOM used the average of the median of these to provide a ratio used in producing forecasts for land requirements, namely 1:0.45. However, using an average of the medians was inappropriate in Guildford – land costs are high in the borough, and a large part of the borough (89%) is designated green belt and so using this average ratio betrayed a lack of ambition to use land efficiently. An ambitious goal would be to do better than the best, and this would be provided by using an average ratio slightly beyond the range given, for example, 1:0.60. This could be achieved, for example, by ensuring that all car parking was provided by underground parking, beneath buildings, so that open space could be retained, and by building several storeys above ground where this is possible. Surface car parking and single storey buildings are inefficient in their land use. Using an average land to premises ratio, as AECOM did, showed a total lack of ambition to use land efficiently. Using land efficiently would mean there would be no requirement for additional land to be set aside for employment purposes – and this land could be used instead for housing.

Overall, the Employment Land Assessment displayed a selective use of statistics to give an inaccurate overoptimistic picture of the growth potential in local economy as well as displaying a complete lack of ambition to use land efficiently. Consequently, its conclusions regarding land requirements for employment use should be disregarded.

In the paragraphs devoted to transport, there is a statement

“During the plan period Guildford will experience significant improvements to transport infrastructure including new stations at Guildford West (Park Barn) and Guildford East (Merrow).”

This is presented as a factual statement. However, Network Rail has made no commitment to approval of these stations, despite having recently published a study that examines investment needs on this route up to 2043[3]. In this study, the possibility of these new stations is mentioned, but only as a response to the consultation that preceded the publication of the report. Details given of proposed projects that will be included in their next spending plans (to cover the period 2019 to 2024) include no provision of any description for these new stations, and in fact the emphasis is on increasing the number of trains per hour during peak periods. Adding a further two stops would reduce the ability to add additional trains, and so goes against the need to increase capacity on the line by adding trains. Thus it seems highly unlikely that these new stations would be provided within the time frame of this Local Plan, if ever. In addition, it is clear from the Network Rail report that changes to platforms in Guildford Station will not be made in the next budget period (up to 2024) and that the inclusion of this project in the next budget period (after 2024) is dependent on further studies. Similar timing constraints apply to the electrification of the North Downs Railway. So the delivery of many of the infrastructure improvements, particularly the new stations, within the timeframe of the Local Plan is, at best, doubtful. To present their provision as a certainty was simply dishonest.
Finally, according to the Spatial Vision, the delivery of housing as described in the plan is predicated on the delivery of infrastructure, yet there is no monitoring system in place to ensure that infrastructure is delivered, with necessary services provided. As an example, consider the need for GP services. It is possible to build a doctor’s surgery, but there is a national shortage of GPs, so there are considerable problems in recruiting doctors needed to man existing surgeries. Thus building premises are no guarantee that services will follow, even assuming funds are available. No monitoring systems or programmes are described in this spatial vision and so one has to assume there are none in place to monitor this programme to ensure that services, as part of necessary infrastructure, are actually delivered. No red lines for specific developments have been provided, so that it is clear exactly what infrastructure must be provided before a specific development can be started. As no monitoring systems are in place, there is nothing in this vision to suggest that the promise made by Councillors, that infrastructure will be delivered before additional housing is built, will be honoured.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I wish to object most strongly to the proposed change to the Shalford Green Belt and Settlement Boundary contained within the new version of the Guildford local Plan.

These changes run the risk of destroying the Village environment that is so important to both current and future residents.

However, I have no confidence in the numbers in the SHMA because the basis on which they calculated has not been disclosed. The Council cannot expect the electorate to accept a figure that, without this disclosure, might as well be picked out of the air. I cannot understand why Mr Spooner has refused to publish the analysis behind the numbers so that people can at least have some confidence that the figure of new housing being used by GBC to inform their planning decisions is accurate. This failure to be transparent unfortunately can only serve to make people even more suspicious of the motives of the Council.

I also object to GBC’s use of the term “affordable” housing. As I understand it, their definition of “affordable” is that the property should be 20% below market value. However, this is in reality a nonsense. This is because developers will want to maximise their profits by building big houses. If a house has a market value of £800,000 the “affordable” price for that house would be £640,000. Surely it is ridiculous to call this “affordable” for the target market of young professionals and families as this level would be out of reach to most of them.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Rather than insist that a small number of Green Belt villages cope with several hundred new homes, it would be fairer and less damaging if smaller numbers of new houses were built over a much larger number of villages.

This would mitigate the negative impact on local services, such as GP surgeries, schools, and transport, and the electorate would have more confidence that GBC is working in an equitable way and not unfairly sparing those areas where some local councillors live (Ash South and Tongham, for example).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I accept that provision must be made for new housing, in particular for young people and others who need an affordable housing solution. But I don’t think the Draft Local Plan is the answer. The majority of the proposed new housing (65%) is slated for Green Belt land. I find this totally unacceptable and I do not believe that GBC has properly and fully investigated the available brown field and other sites for this development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Finally, I object to the undemocratic process that has produced this plan. We have just had a referendum on this country’s membership of the European Union. Whether one is in favour of leaving or remaining, it was right to give the electorate a direct say in such a momentous decision.

Yet a decision of this magnitude, which has far-reaching implications on local life, should not be in the hands of a few elected officials.

So GBC, do the right thing. Accept that a majority of the electorate are against it. Hold a poll to confirm that this is the case. Accept that the plan is flawed and think again.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
In this latest version of the Plan, Guildford Borough Council has totally ignored the views of tens of thousands of their constituents (including my own) who wrote with objections last year in the hope that they might have some influence over the process.

Specifically, it is with regret and anger that I note that no changes are being proposed since the 2016 consultation in terms of removing (in planning double speak I believe this is called “insetting”) parts of West and East Horsley from the Green Belt. This means that several sites that are currently protected by their Green Belt status will be available for housing developments and these are in addition to those sites already earmarked in the Plan as suitable for development.

I further believe that the proposed housing target is flawed and the process has not been transparent with the Council refusing to publish details of evidence, data and assumptions used in reaching the target figure.

This flawed “evidence” is being used to justify over-expansion, particularly in the Horsleys, where local services and infrastructure are insufficient for the proposed numbers of new homes. The Plan has failed to include measures to improve the sustainability of development these sites.

Deletion of the constraints on housing density in Policy H1 is a retrograde step and will give developers a free hand to use land inefficiently (but at maximum profit for them) and the policy relating to AONBs serves only to weaken the current protection against inappropriate development.

The Council in my view has failed to prioritise the use of brownfield sites in urban settings for housing and is instead intent on compromising the Green Belt against the wishes of a large majority of borough residents.

Instead, these brownfield sites, especially in Guildford, are being allocated for retail and commercial development. I don’t believe we need more shops; we need more affordable housing in suitable locations, with good transport links and local services.

The Council’s website encourages residents to “help shape the borough’s future” by commenting on the Local Plan. However, the latest version of the Plan shows very little if any evidence that the Council is listening to the views of local people.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Guildford New Local Plan

Transport June 2016 Topic Paper

Policy Infrastructure and deliver

- Existing infrastructure problems must be solved before any more development is permitted
- Not clear where the funding for new infrastructure need will come from nor whom will provide it.
- Economic viability clause weakens policy, development should not be allowed if infrastructure cannot be provided.
- Existing road already inadequate or under pressure and would worsen with the planned development reducing quality of life, A247, Send,

Policy

- New rural development is car dependent and inadequate/unsafe cycle routes and footways resulting in more traffic accidents.
- Scale of proposed development is too much for local infrastructure/
- The A247 experiences a significant accident rate including many minor accidents associated with peak time traffic, off peak accidents associated with speeding, vehicles mounting the payment.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

2. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as III as being entitled to do this the Council was required to give proper consideration to
constraints. The scarcity of sites outside the Green Belt as ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

3. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **APPENDIX D**

   I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

   1. The “objectively assessed need” figure of 693 homes a year is too high.
   2. A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
   3. The current SHMA inflates the proposed housing figure due to

      - failure to correct for errors in the historical data for international migration flows,
      - issues with the way it considers students and affordability and
      - flaws in the method for estimating the number of homes needed to support job growth.

   1. It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially
confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

**Comment ID:** PSLPS16/2372  **Respondent:** 8655233 / Kay Mackay  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY A25 - Gosden Hill Farm**

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 – 2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcots Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.
The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that...
the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.
The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY D3

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

1. **POLICY D3**

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

1. **POLICY D4**

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

<td></td>
</tr>
</tbody>
</table>
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E1

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I strongly object to the fact that there are many empty industrial buildings in Surrey and therefore to build more that are not required when these could be utilised instead.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY E2**

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. POLICY E5

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/5252  Respondent: 8655233 / Kay Mackay  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E6

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/5246  Respondent: 8655233 / Kay Mackay  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E7

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY H1**

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H2

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/5250  Respondent: 8655233 / Kay Mackay  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.
The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses through all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/5224   Respondent: 8655233 / Kay Mackay  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I strongly object to the fact that there has been no forward planning regarding the infrastructure with regard to water supply (water companies need 10 years advance warning of large supply requirements) which is under great pressure in the local area.

I strongly object to a plan that has made no extra provision for the pressure this will put on the local hospital with no provision or planning.

I strongly object to a plan that has made no provision for waste disposal of the large developments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.
This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. POLICY I2

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Re: Responses to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objections to specific policies and matters within the Plan.

I strongly object to GBC Plan in that it has made no provision whatsoever in the Plan to protect the residents in West Clandon (A247) from the vast amount of increased traffic on a road that cannot possibly cope with the additional vehicles yet alone all the HGV’s that would be travelling backwards and forwards to these proposed sites in the building of the proposed developments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
PODICY I3

1. I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. POLICY P2

1. I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.
The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of “About Guildford” (published by the Council) on page 5 states that “... the Plan rejects any schemes that would have a detrimental impact on the Green Belt.” This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of W ready Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires...
there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. SITES - POLICIES A1 TO A57

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/5235  Respondent: 8655233 / Kay Mackay  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4
1. POLICY P4

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY S1

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy
does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

1. POLICY S2

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not
transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of
identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Questions posed by Guildford Borough Council as part of its consultation.

Questions from GBC

24.A. Question 1: The evidence base and submission documents

The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence. The evidence base documents contributing to the preparation of the plan are listed and can be found.

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

ANSWER

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

**24.B. Question 2: Legal Compliance**

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole is legally compliant? Please provide the following information being as precise as possible:

- why you consider it is or is not legally compliant and
- what change(s) (if any) you consider necessary to make it legally compliant, explaining why this is the case.

**ANSWER**

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Answer (if comment is on questions 1-7 of the questionnaire): ()

24.C. Question 3: Soundness

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound? Please provide the following information being as precise as possible:

• why you consider it is or is not sound and
• what change(s) (if any) you consider necessary to make it sound, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. "Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt." Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councillors cannot impose conditions which make development non-viable.
5. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
6. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
7. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound.

8. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018.

9. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars.

10. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.

11. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

12. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

13. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

14. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

15. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councillors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

16. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

17. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

18. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

19. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
24.D. Question 4: Duty to cooperate

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate? Please provide the following information being as precise as possible:

- why you consider it has or has not complied with the Duty to cooperate and
- what change(s) (if any) you consider necessary to make it comply with the duty to cooperate, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I trust that the objections made above are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4705  Respondent: 8655233 / Kay Mackay  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.

4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”

5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.

7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()
If residents come first then much of what is proposed would be scrapped. And the biggest issue facing these proposals is safety. We have 2nd class roads that are A roads which are totally unsafe. This can not be legally compliant and is unsound.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp171/10  Respondent: 8655233 / Kay Mackay  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Guildford Borough Council have a duty to the residents to protect the environment, to protect green belt land, to protect residents and their families. This fails in every area. There is no case for taking villages such as Send, Ripley, Burnt Common and part of West Clandon out of the Green Belt. There is no case to extend the University if it impacts on residents in the area. The roads in this area are over flowing with traffic and at times is almost at a standstill. To protect put in policies that mean people can not enjoy the Countryside, can not sit in their gardens because of noise pollution is not compliance.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Scrap the proposed building on Green Belt and use the brownfield sites. Stop expanding the University at the cost of residents.

Attached documents:

Comment ID: pslp17q/633  Respondent: 8655233 / Kay Mackay  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1395  Respondent: 8656417 / Allan Howlett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A42 of the Local Plan because you have ignored my original objection and increased the number of houses from 45 to 60 houses. This will further increase the traffic entering Send Barnes Road. This road and intersection is already too narrow to take the existing traffic. The footpath at the nearby traffic lights is far too narrow, this footpath is used by mothers and children on the way to and from school. The path is so narrow that mothers cannot walk side by side. This is an accident black spot about to happen. This development is a further erosion of the green belt, which the Prime minister has said will not happen.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to policy A43, the development of 400 houses at Garlick's Arch. This is a huge development to be built on the green belt. This is unreasonable and out of all proportion to local needs. The Old Portsmouth Road from Burnt Common to the A3 roundabout is already overloaded. The intersection in Ripley regularly blocks solid during busy periods as does the slip road onto the A3. At the Burnt Common intersection the roundabout is regularly blocked with queues in all directions trying to feed from and on to the A3 slip into and onto Send Barns Lane.

I also wish to object to the setting aside for travellers and show people. There is no justifiable need. Your addendum notes state that you determined the need by 'asking them' very scientific. They children and mothers on these uncontrolled sites are particularly denied access to proper healthcare, and education. We need to break the cycle and provide permanent occupation, close to the services they need. Local services are already overloaded, local children already have to be bussed out of the area for their education.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attended documents:

---

I object to Policy A58 the construction of an industrial complex at Burnt Common. There is no need. If there is a need in Guildford it needs to be closer to Guildford Centre. There are several light industrial sites in Guildford and Woking that are an inefficient use of the space available. All need rebuilding with proper access to local roads, and some would provide space on the River Way frontage for council houses. I object to the term low cost housing, they are not value for money but cheap, poorly designed with insufficient storage, narrow staircases and little parking, irregular bus service and too far from the needs of those resident.

Tannery Lane, this a a very narrow and winding lane, how it will cope with commercial and residential development in such a tight roadway.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

As a Guildford resident I am extremely concerned about the high number of new homes proposed in the latest version of the local plan. This would lead to loss of substantial amounts of Green Belt land and loss of local character.

The method used to calculate the number of proposed new homes has never been explained. I am concerned that population growth has been overestimated due to under recording of students leaving at the end of their studies. I also believe that, as a campus university, Surrey University should provide more student accommodation on site, thus freeing up affordable housing stock in the town.
As a cyclist, walker and bus user I am only too aware that the town does not provide adequate provision for non-car modes of transport. The town needs more and better cycle lanes, far more pedestrian crossings (for example on the Epsom Road) and a more sensible ticketing system on buses (eg the 'kangaroo ticket' used in London) to encourage sustainable transport.

Such changes are discussed but sadly not implemented.

Substantial increases in housing numbers will add to congestion, which is already a huge problem in the town. A single incident regularly creates gridlock throughout Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Any development that impinges on the Thames Basin Heaths Special Protection Area should be vigorously opposed. These are special environments and should not be impacted by a growth in human population. ‘we need to adapt to our numbers by increasing the density of housing.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The proposed development on this site has been turned down by GBC for a range of reasons: the inaccuracies in describing the site by the developers; poor air quality; no access to A3; roads too narrow for additional traffic; no parking at the stations; no public transport; lack of affordable housing or housing to rent; inappropriate housing density and height of buildings; eyesore when viewed from AONB of Surrey Hills. Add to this that the land has no dwellings currently; only 15% comprises of the runway and the rest is all agricultural land. It is entirely in the Green Belt and is a SANG for the Thames Heaths Basin conservation area. I cannot understand why GBC has included this site in its new Local Plan. It makes no sense that the recent proposals were rejected by GBC and yet here it is again.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( Yes ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Ramada Hotel does not provide a local amenity of much value. It is a suitable site for redevelopment, as long as it keeps within the current building footprint and does not extend into any open areas of grassland which surround it. Horsley has a need for smaller dwellings, especially for downsizing. A courtyard development, perhaps with some flats, combed with starter homes and flats would for younger people starting out would provide a lively new community base in East Horsley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The Bell & Coleville site is suitable for housing development, but these plans seem to include a large tract of land behind the brownfield site. Every time an extra field is taken into building part of the rural nature of the Horsleys disappears for ever. The actual site of the garage, showroom and parking should be redeveloped, but no more.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/895  Respondent: 8659489 / Helen Bennett  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A38

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As there needs to be some development this site seems to be more appropriate than some as it is already concealed behind the ribbon development. However the field facing long reach should be taken out of consideration as it provides the open green space that is so special for the villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/902  Respondent: 8659489 / Helen Bennett  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A39

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This area of land is largely hidden from view and consequently is less damaging visually. However, this is a very large piece of open field in the green belt. A more limited, high density form of starter homes etc would be appropriate her which used up lessor the undeveloped lend.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Student accommodation: it would be very beneficial for the housing stock in Guildford if all students either lived at home or on campus.

HMO: rather than assuming that HMOs are a poor quality option, it would be a good plan to encourage new building of this type which could provide good quality accommodation for rent for single people who work in Guildford.

Smaller, manageable homes for downsizing, perhaps in a courtyard development, with some help that would make the process manageable for older people, would benefit them and release larger homes to the market.

Answer (if comment is on questions 1-7 of the questionnaire): ()
The "right" to live in a village because your parents do has never been an affordable option. Social housing in villages that is now privately owned has become "unaffordable". All this policy does is to provide subsidised housing to a few who can then maximise the profit a few years later. It has been more than 50 years since people lived in the same streets as their relatives. The world has moved on with university education and the car. There is no return to some nostalgic idyll of cosy country life.

Everything that can be done to conserve natural green landscapes, be they woodland, hedges, commons, heaths, agricultural land or parks and gardens should be done. We are the custodians of the landscape and the biodiversity that depends on us for its survival. It should be our pleasure and our duty to offer protection to our wildlife and its habitats. The maintenance of clean, lifeful water courses is essential. The blue and green infrastructure should be kept as wild as possible, not turned into playing fields and mown dog walking areas. The open green landscape is not there just to be tamed by us but as a living habitat, which still gives enormous pleasure to those who wish to walk in it.

GBC must be very energetic in its protection of Surrey Hills AONB and AGLV. The Green Belt protections must be preserved. The open landscapes, woodland, commons and agricultural land are vital for wildlife and for people. We are in danger of creating a huge conurbation or ribbon development linking Leatherhead, Woking and Guildford, thereby destroying all that is special about Surrey. The villages beyond the North Downs are very precious in this area where we are burdened by 20th and now 21st century suburbia. New homes need to be kept within the existing built boundaries of the borough and not encroach onto the countryside.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
Objection: Changes to the Green Belt

I am particularly concerned about the changes to the Green Belt. The areas of open country in Surrey define its nature and provide a natural environment for wildlife, agriculture and for people. All of which are essential and, once lost, is gone forever. GBC seems to be intent on reducing the Green Belt and its protections. Surrey Hills AONB needs to be vigorously protected and not dismissed as having little protection in law. Two thirds of the proposed developments are on Green Belt land. This is unacceptable: any incursion will provide opportunity for more damage in the future.

Objection: East Horsley is in the Green Belt and this affords it protection from suburban sprawl. Its Green Belt status has been a key factor in preserving that character. One third of East Horsley is composed of woodlands. The Green Belt has preserved the rural character of the village. There is a proposal to move the East Horsley settlement boundary to the edge of Lollesworth Wood is unacceptable. These are agricultural fields. A change to Green Belt boundaries require ‘exceptional circumstances’. More land for housing is not a sufficient justification for changing a Green Belt boundary.

Objection: The proposal to remove Kingston Meadows out of the Green Belt is non-sensical. Kingston Meadows is the recreational space of East Horsley. It has sports facilities and playing fields. What possible benefit can there be in taking it out of the Green Belt and then leaving it vulnerable to “enterprising” developers in the future to offer some minor inducements for future facilities as a trade off for building plots.

Sites for development

Objection: I question the need for the level of house building set out in the plan. The statistical basis is flawed and overestimates the number of houses required for those living and working here. Certainly, it has not been demonstrated that this increased housing stock is required in East Horsley.

Support: However, the site of Thatcher’s Hotel is a possibility as long as it keeps within the current building boundary and does not extend to the open fields behind.

Objection: the green-field site behind the houses on the western side of Ockham Road North is Green Belt land and should not be developed.

West Horsley

Objection: The 405 houses proposed represents an increase of one third in the current housing stock, most of which are on open fields in the Green Belt. This is an overwhelming number for a small village and will fill-in every bit of its green space, destroying its character.
Objection: Proposal to remove Wisley Airfield from the Green Belt.

Despite the objections by GBC to the recent proposal to build what amounted to a small town on the airfield. The proposal to build 2000 houses still seems to be on the Local Plan. The objections included concerns about air quality; lack of public transport; the housing density; the visual impact from AONB of the North Downs. In addition to the many inaccuracies in the planning application about the nature of the land and the access to major roads and the railway stations. What has changed? The A3 and M25 interchange will not move; the stations will not get nearer. The rural character of the roads and environment will be destroyed by such a proposal. GBC should be protecting the true rural character of Surrey, not seeking to destroy it.

I hope that GBC will act to support its current residents and their wishes, rather than pursue some ideological process for urbanising the this corner of England and facilitating a continuous sprawl of housing with few social facilities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have little confidence in the GBC desire to protect the Green Belt. There should be no loss no Green Belt protection in any local area. Every hedge and field is important. Once lost or encroached upon it is lost forever and provides a precedence for further planning proposals on this precious resource. Why is the proposal for 2000 houses on the disused Wisley runway even being contemplated as it was rejected for a range of misleading information and inappropriate plans? This is almost entirely agricultural land in the Green Belt. It is not attached to a village; it is a new town. The scale of the housing proposed for many of the villages, almost entirely on Green Belt and green field sites, will change the local environment for ever. The GBC should be working for its current inhabitants not on some strange policy venture of its own.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Any SPA must be protected as a matter of priority. SANGs are needed to protect these areas and to provide space for people and their pets, whilst allowing the natural world to exist. Nature is under threat. It is people and their housing needs who can and must adapt. We should be proud of our environmental stewardship, rather than be prepared to build over it.

The housing target is a complete invention, with no evidence demonstrated of the need for it in such numbers. All additional housing should be associated with urban areas i.e. Guildford. Any additions to the villages should be very restrained and small in number and size. The number should be restricted to the local plans put forward by individual villages and parishes. The proposal of a new town on Wisley airfield should be dismissed, as it has been already by GBC planning, as completely unacceptable in all regards - for the many reasons put forward in the objections by GBC landing themselves.

The number of new houses proposed in the Strategic Housing Market Assessment has been generated without any visible evidence or explanation. The numbers are vastly inflated and the forecast population increase in the borough as a whole is 70% higher than the official national estimates for the borough. These inflated numbers become even more inaccurate when looking at individual villages: the proposals for the Horsleys, Effingham and Ripley/Ockham far exceed the number of houses required by the local population. The proposed increases in households in these areas can be as high as 35-50%. It will destroy a semi-rural pocket of Surrey. All on false numbers.

</table>
'What are we going to do with West Horsley in the New Local Plan?’ asked John.

‘Well’ said Jack ‘the village has about 11/1200 houses and we propose to increase the size by 40 to 50% and build a further 500 to 600 houses’

‘Won’t that put a huge strain on all the services because I understand the area is close to gridlock in any case?’ said John ‘ and what do the residents have to say about it?’

‘Almost without exception the residents are extremely upset but we have learnt to ignore the torrent of protests from the last plan and have produced a new plan that incorporates the same sites as our previous plan. As far as strain on services is concerned, I must admit that doctor’s surgeries are full, the local schools are all full, the railway station car park is full and has no potential for expansion, parking in the village is well nigh impossible at peak times, the narrow unlit lanes cannot possibly cope with more traffic and the road surfaces are appalling and always have been, the road junction to the A3 has dangerous levels of pollution let alone the congestion and of course we all know that the M25 at Junction 10 is a complete lottery but normally blocked’ said Jack.

‘I am no rocket scientist’ said John ‘but why on earth therefore are you intending to make matters so much worse?’

‘Well you see we have been forced by the Government to identify large swathes of land on which houses can be built in order to accommodate our burgeoning population and we feel we have no option.’

‘But isn’t Surrey already the most densely populated county in the whole of England with 683 people per sq.km. so who decides what quantity of extra housing is needed?’ enquired John.

‘That’s a moot point’ replied Jack ‘but we have conducted something called the SHMA and have come up with a figure but I must admit it is a touch subjective’

‘Surely however, since Brexit there is now an intention to control our borders and thereby reduce immigration and ergo the demand for housing. I note that the biggest losers on the stockmarket as soon as ‘Leave’ was confirmed were the housebuilders (down 30%) so I would imagine I am not alone in this contention. Will you be revising your SHMA downwards in light of this?’

‘Probably not. It’s gone too far.’

‘And what’s this I hear that you intend to build on protected Greenbelt land and in many cases before you have attempted to develop Brownfield sites?’ John demanded.

‘We have come up with what we think is a master stroke’ said Jack. ‘Brownfield sites are invariably more expensive to develop so Greenbelt sites are cheaper and less time consuming. In the case of West Horsley we have decided, subject to the Govt. Inspector agreeing with us, to remove the village from the Greenbelt so we can build anywhere and render any local protest impotent.

Incidentally we are proposing to try this ruse on approximately 15 equally pretty Greenbelt Surrey villages. It will make our lives so much easier’.
‘That’s verging on scandalous’ said John ‘so what is the point of involving the local residents in your ‘presentations’ if nothing can be altered?’

‘Transparency old boy’ said Jack ‘transparency.’

Further to the above I OBJECT to the proposal to build 135 houses at The Manor Farm site for the following reasons:-

1) My amenity will be severely blighted with the houses in the adjacent field to the north of my house having complete visual access over my garden and swimming pool.

2) The light will be reduced and the gorgeous sunsets will not be seen.

3) The road of Long Reach is a 4.6 metre wide lane with no pavements or lighting. I believe it is suggested that there should be an access to the site from Long Reach. It would be impossible for two construction lorries to pass each other and, as I have mentioned many times in the past, the road is reduced to a single lane because of a half mile queue of cars parked nose to tail with no passing places by those using the football club. I have sent many photos already of the mayhem caused. How fire engines/ambulances etc. could get through is beyond me. It is worth taking into account that the current single track lane to the site is used and was originally constructed solely for access to the Montesori school and was only granted on the basis that the entrance gate is closed by 18.00 hrs every day. Any building work would be a real and significant hazard for the young children who go there.

4) The field in question is used every year as a car park for over 250 cars for the annual Horsley Football Club tournament (please see photo). The organisers have told me that the tournament, which has been running for over 25 years, will have to close if this field becomes unavailable as there is no viable parking alternative. I would have thought that GBC should be promoting sport and not reducing it.

5) If, heaven forbid, a housing estate gains approval it will have to cope with the floodlights already in place and also those that have recently been approved by GBC for the main pitch and of course the noise. Not ideal.

6) Councillor Paul Spooner of GBC has proudly trumpeted that only 1.6% of Greenbelt land in the Borough will be affected by the building proposals. This of course is massively misleading and is probably designed so to be. After all it makes good reading but a great proportion is A.O.N.B. which cannot be built on. At a rough estimate 25% of Horsley’s current Greenbelt land is being put up for building. Nobody was able, or willing, to answer my question on this point at last week’s presentation at East Horsley village hall.

7) I am non-plussed as to why West Horsley is being so disproportionately targeted. Perhaps it’s because it is the second closest village to London in the borough and developers will make more money here than elsewhere. How do you quantify an ‘affordable’ house in this area?

8) The plan is that all four of the sites adjacent or near to my house will now be developed simultaneously in years 0-5 (whereas the Manor Farm Site was originally proposed for years 6-10). Can you imagine what traffic carnage this would cause let alone dust, noise etc.. The developers (Thakeham Homes) have advised that because of the high water table at the Manor Farm site all the 135 houses will need to be piled which will probably drive us all bonkers.

9) A Department for Communities and Local Government spokesman said ‘Ministers have repeatedly been clear that demand for housing alone will not justify changing Green Belt boundaries’. (Daily Telegraph 25/4/16). What has empowered GBC to believe they are entitled to do otherwise. Surely a truly exceptional circumstance is required?? GBC call the removal from the Green Belt ‘inserting’ but the field next to my house which is set in beautiful quiet countryside is outside the curtilage of the village as has been declared in previous appeals by a Govt. Inspector.

10) Lastly, and most importantly, my wife and I feel we will have to abandon the house we have loved and nurtured for over 35 years. We could not stand the awful intrusion but our option to sell is already severely reduced because I doubt if anyone else could as well. A local Estate Agent reckons the house is already devalued by £300,000 because of the proposed development and that is if a buyer can be found which he says will now be difficult.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: DSC04220 2305843009213841397.JPG (6.5 MB)
I wish to register my objection to the proposal that "In total, 1.6% of green belt land will be removed and allocated for development during the plan period". I see no reason why a principle of no net loss of green belt could not be followed.

I note the statement that "4.3.13 The following villages are now inset from the Green Belt: Chilworth, East Horsley, Effingham, Fairlands, Flexford, Jacobs Well, Normandy, Peasmarsh, Ripley, Send, Send Marsh/ Burnt Common, Shalford, West Horsley and Wood Street Village". Does this mean that they were inset prior to the current planning process, that they are proposed to be inset, or that additional areas are proposed to be inset to provide a more uniform village/green belt boundary?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

I have familiarised myself with the Draft Plan (CD disc version) and have attended the Council’s exhibition held at East Horsley Village Hall on Tuesday 21st June 2016. I would like to make the following representations;

1. I wish to object, most strongly, to the Council’s Green Belt policy in relation to the removal of Green Belt land for housing development. In particular I am concerned about the proposed release of the open fields known as Allocation Sites A38, A39, A40 and A41 in West Horsley. My objections are that the Council’s proposal is contrary to Government advice contained within the National Planning Policy Framework 2012;

   • Paragraph 79 states that “the Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence”.

   • Paragraph 82 states that “New Green Belts should only be established in exceptional circumstances”. Therefore if existing Green Belt land is sacrificed for housing, the quantum of Green Belt will reduce and will not be replaced.
• Paragraph 83 provides “Once established, Green Belt boundaries should only be altered in exceptional circumstances. The Council has not demonstrated “exceptional circumstances” but states that the shortage of available housing land is an exceptional circumstance. The problem is that Green Belt land, which is not Previously Developed Land (PDL), should be regarded as sacrosanct and should only be released as a very last resort and after the re-use of Brownfield and PDL has been exhausted. GBC has made no real attempt to survey and review the availability of Brownfield and PDL but, instead, has targeted Green Belt land predominantly in single ownership, as this is easier to deliver. Good town planning is not about easy deliverability and knee-jerk solutions. This is “lazy” planning and should be rejected.

• Paragraph 87 says “As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances. Insufficient “special circumstances” have been advanced by GBC to justify the release of previously undeveloped Green Belt, which still serves its original purpose as Green Belt land.

• The proposal is also contrary to paragraph 88 of the NPPF, which states that exceptional circumstances will not exist unless the harm caused to the Green Belt is outweighed by other considerations. I do not agree that a shortage of housing land is to be considered as an exceptional circumstance but, even if I am wrong, the harm to Green Belt is not outweighed by other considerations.

• Paragraph 89 states that a local planning authority should regard the construction of new buildings as inappropriate in Green Belt.

• In summary the proposal to release Green Belt land is contrary to Government advice and there are, in fact, two distinct tests. Firstly GBC has to prove “exceptional circumstances” to change the boundaries of the Green Belt and secondly it has to prove “exceptional circumstances” to justify inappropriate development.

1. There is case law concerning “special circumstances” and, in particular, whether a housing shortage is a “special circumstance” of sufficient weight to justify the release of Green Belt. I list below the relevant synopsis;

• In Hunston Properties Ltd [2013] EWCA Civ 1610; [2014] JPL 599, it was held that;
On the facts, the Inspector was obliged to find a housing shortfall. However, the weight to be given to such a housing shortfall (and whether it constituted “very special circumstances” for the purposes of NPPF 87) was a matter of planning judgment. The weight to be attached to the shortfall may, as a matter of planning judgment, be reduced where a shortfall is inevitable due to a district being subject to policies, which restrict development (such as AONBs, National Parks or Green Belts).

• Further it was held in R (Lee Valley Regional Park Authority) v Broxbourne Borough Council [2015] EWHC 185 (Admin) that;
“A shortfall in housing land supply can, as a matter of policy, be a very special circumstance, although the occasions when it is likely to suffice by itself to warrant the grant of permission for housing development in the Green Belt are expected to be few and far between”.

Page 1557 of 3335
The case of R (Luton Borough Council) v Central Bedfordshire Council [2015] EWCA Civ 537 it was stated that;

“...paras. 87-88 of the NPPF provide guidance regarding the approach to be adopted if there is a proposal for development of an area within the Green Belt set out in a local plan: “very special circumstances” have to be shown. This is a stricter test than that in para. 83 in respect of changing the boundaries of the Green Belt in the local plan.”

As can be seen none of the case law to date supports the development of new housing in the Green Belt.

1. The proposal to build 385 new houses will swamp the small village of West Horsley, which in 2011 had 1,111 homes in the Parish. This is a 35% increase. There is insufficient infrastructure in terms of roads, parking, public transport, medical provision, education and schooling, drainage and sewerage. This is contrary to paragraph 47 of the NPPF, which requires local planning authorities set out their own approach to housing density to reflect local circumstances.

1. The Council has not done enough to encourage the re-use of Brownfield and Previously Developed Land (PDL). For example, application 16/P/00783 relating to Oldfields Field Yard concerns the proposed re-development of a builder’s yard and buildings for residential housing in the Green Belt. The property benefits from an Established Use Certificate for B1, B2 and B8 and sui generis uses to include scaffolding yard, car servicing, restoration, motor repairs and storage. Consequently, the Green Belt use has already been lost and the aim of providing permanent open land to prevent urban sprawl can no longer be maintained. Notwithstanding GBC’s alleged housing land crisis, this application was refused. One of the reasons for refusal was that the applicant had not demonstrated any “special circumstances” to justify the inappropriate development.

It seems to me to be inconsistent and inappropriate to refuse the re-use and redevelopment of PDL in the Green Belt and to propose the release of Green Belt in the Local Plan, which is open in character and has never previously been developed.

1. There is no precedent for releasing existing Green Belt land where its original aims and functions are still being met. The original Green Belt legislation and particularly circular 42/55 only envisaged and to a limited scale the “infilling” and “rounding off” within the Green Belt and existing towns and villages should not be allowed to expand any further.

1. I would like to challenge the Council’s Evidence Base as paragraph 47 of the NPPF states that local planning authorities should provide sites sufficient for 5 years supply of housing land with an additional 5% buffer to allow for choice and competition in the market for land. Where there has been persistent under delivery this buffer should be increased to 20% This means that GBC is required to identify deliverable housing land for the
next 6 years and not for the whole Local Plan period to 2032. LPAs are then required to identify and update annually a supply of specific deliverable sites.

1. I would like to write in support of GBC’s proposal for “insetting” (i.e. removing from the Green Belt) the existing settlement areas. I do not agree that the village boundary should be enlarged but I do think that it serves no planning purpose for the established built environment to be retained in the Green Belt.

Where the function and purpose of Green Belt has already been lost it makes no sense to determine planning applications by reference to Green Belt policy. A case example is planning reference 14/P/00484 in Mount Pleasant where the surrounding area was a linear pattern of development either side of the road but located in the Green Belt.

The Guildford Borough Local Plan 2003 allows for limited infilling within identified settlements where the land is substantially surrounded by existing development. This is only partly consistent with the NPPF. The main distinction being that the NPPF does not support the restriction of development to land that is “substantially surrounded by development”.

Further paragraph 85 of the NPPF states that when defining boundaries, local planning authorities should not include land, which it is unnecessary to keep permanently open. Here the land in question cannot be kept permanently open because it is already developed.

In paragraph 86 the NPPF sets out that a village should be included in the Green Belt if its open character makes an important contribution towards the openness of the Green Belt. However, if the character of the village needs to be protected for other reasons such as conservation or development management policies, then it should be excluded from the Green Belt.

The removal of the Green Belt designation from the existing settlements (without their extension) would comply with the Central Government advice contained in the NPPF and would allow sensible brownfield redevelopment to help alleviate the housing land shortage.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I refer to the land behind the Christmas Hill properties and Shalford Village Hall.

I see that you are proposing to move the green belt boundary to exclude these fields and extend the village boundary to include these fields, making it easier to develop.

I object to these changes because:

The elevation of this land is 32 ft above Christmas Hill and Kings Road. Any housing development would tower over the village community facilities and surrounding area including the ancient Shalford Common. Any development would be easily seen from Chinthurst Hill, from the Chantry and the Downs link national trail.

The land contributes to the open character of the village and provides an attractive setting for the village community facilities.

Access to this land is via Chinthurst Lane, an already heavily congested lane.

Over 700 residents signed a petition objecting to the proposed settlement boundary changes last year. The Parish Council also objects to the boundary changes. As you can imagine the issue has united the local community.

If Guildford Borough Council support the express views of the local residents to protect these fields from development, they should retain them within the current green belt boundary and keep them outside the village settlement boundary.

The boundary has been there for a very long time and should remain in place.

There is no justification for the proposed change.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

22. APPENDIX C

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/1261  Respondent: 8667713 / Victoria Sinnett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

1. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

2. Having determined housing need the Council was entitled to consider constraints before determining the housing. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

3. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the The Green Belt should trump shortterm considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
23. APPENDIX D

I object to the Strategic Housing Market Assessment (SHMA) figure of 693 houses per annum in the borough being too high (Appendix D).

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to:
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
20. POLICY A25 Gosden Hill Farm

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data: 2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head 17 incidents
- Bulls Heads Head to Bennett Way 8 incidents
- Bennett Way to Highcotts Lane 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close 8 incidents 2015
- 21 Oct 2015 – A247 near shell garage Three vehicles collided causing delays Surrey Fire and Rescue

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the offslip to Burpham.
No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 8789 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel. The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is gridlocked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new onslip at Burpham would only be 1.8km from the onslip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cashflow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
20. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council’s eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement often at speed. It has narrow bends with poor sight lines, an infants school and a humpbacked bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and recross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8).

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from
the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

15. POLICY D3
I OBJECT to Policy D3 Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

Answer (if comment is on questions 1-7 of the questionnaire): ()
16. POLICY D4

I OBJECT to Policy D4 Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):**(

5. POLICY E1

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a nonsustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.
I object to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt. Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

I OBJECT to the location for new employment floorspace (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses,
which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ
dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will
result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/5055  Respondent: 8667713 / Victoria Sinnett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? (), is Sound? (), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E6

I OBJECT to Policy E6 The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the
new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas
surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor
facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For
example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is
likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk
of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly
argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk
of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly
vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are
given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate This is all the more
valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural
residents are its custodians and require no Council interference. Economically, the most valuable forms of
旅游, such as walking and cycling, require no new development. In the overcrowded SouthEast of England,
lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford’s river landscape less off-putting and support town-break packages for highvalue
tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence
normal tourism market mechanisms.

1. To help private providers market local This need not involve extra spending. The Council could, for instance,
help coordinate readymade, local tourism packages under a distinctive brand at an allin price. An “English town
break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to
Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would
be highly attractive to many European visitors who currently bypass Guildford to go to Bath, Oxford or
Cambridge instead.
2. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E7

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull highstreet chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/5049  Respondent: 8667713 / Victoria Sinnett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

12. POLICY H1

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on outofdate, preBrexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, highrise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 45 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and underused surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Overprovision is inappropriate given other constraints.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
13. POLICY H2

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative nonpremium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative nondevelopment uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price? As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/5054  Respondent: 8667713 / Victoria Sinnett  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

17. POLICY H3

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The bluebox policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 8789) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations Ire
available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The bluebox policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 8789) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**9. POLICY II**

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy II)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.
I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

Adequate infrastructure provision is a precondition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development nonviable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services. Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.
There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY I2

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2) I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Page 1577 of 3335
The link road that runs through the village of West Clandon (A247) is currently a 'hazardous' road as highlighted in a traffic survey, and only today there has been yet another accident on this road with the colliding vehicles mounting the pavement.

At present, infant school children walking to the small local school are forced to walk along narrow pavements close to a road which is unsuited to the volume and type of traffic that uses it. Last week I had to jump across the pavement to avoid being hit by a lorry who drove up onto the pavement to avoid another passing the other way, and had my own car struck by another travelling at speed a few months ago. Large vehicles such as lorries and buses are frequently seen mounting the pavements at significant speeds to avoid collisions with one another and will no doubt in time lead to serious injury or death. A development as proposed in the local plan will significantly increase the likelihood of this occurring, as a direct result of the obvious increase in traffic in the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

11. POLICY I3

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Re: Responses to Guildford Borough Proposed Submission Local Plan (June 2016)

I am writing to express my serious concerns relating to the most destructive policy ever to be imposed on the population of Surrey, or as you call it the 'Guildford Borough Plan'. In addition to my comments below which directly relate to the outlined proposals, I am disappointed and perplexed as to how the council feels to is right to make such ludicrous plans at the significant expense of areas of outstanding natural beauty in the Guildford area.

The plan is a total attack on the beautiful green areas which surround the northeast of Guildford, and it is not only unethical to propose building on Greenbelt land but destructive to a small local village community within this region. Greenbelt land is intended to protect small village settlements, such as West Clandon, from the urban sprawl of larger town and cities, and the residents of such communities live away from urban areas out of choice. As such it is totally unacceptable to be proposing to build on such large green spaces as an urban extension, when it will totally transform the number of residents living within a parish.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different...
attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” twothirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Answer (if comment is on questions 1-7 of the questionnaire): ()

19. SITES POLICIES A1 TO A57

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and nonGreen Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

Answer (if comment is on questions 1-7 of the questionnaire): ()

4. POLICY P4

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.
The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Furthermore, the additional information below supports the need to scrap these plans:

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objections to specific policies and matters within the Plan.

1. POLICY S1 Sustainable Development

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both planmaking and decisiontaking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious longterm impacts. The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the
Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development. The commitment to approve planning applications “wherever possible” and “without delay” reveals the prodevelopment bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all. This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by overdevelopment, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/5039  Respondent: 8667713 / Victoria Sinnett  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2  

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY S2 Borough Wide Strategy

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on preBrexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.
The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” triborough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the triborough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial subcontractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their prodevelopment agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase
availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere.

Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

24. Questions posed by Guildford Borough Council as part of its consultation. Questions from GBC

24.A.Question 1: The evidence base and submission documents
The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence. The evidence base documents contributing to the preparation of the plan are listed in Appendix D and can be found on our website (links open in a new window).

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

ANSWER

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

2. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be reassessed and the methodology for arriving at housing need figures should be fully transparent.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

24.A. Question 2: Legal Compliance

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole is legally compliant? Please provide the following information being as precise as possible:

- why you consider it is or is not legally compliant and
- what change(s) (if any) you consider necessary to make it legally compliant, explaining why this is the

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.
That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be reassessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

20.A.Question 3: Soundness

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound? Please provide the following information being as precise as possible:

- why you consider it is or is not sound and
- what change(s) (if any) you consider necessary to make it sound, explaining why this is the

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green” Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

3. The draft Plan does not accord with the NPPF policies on protecting the Green Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can
the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the
2. The housing number is at least twice the achieved rate of building in the Borough over the last few There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

1. The 4045% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development nonviable.
2. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
3. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
4. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
5. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
6. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
7. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham

1. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
2. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation
3. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
4. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
5. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing The Council has prevented councillors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
6. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
7. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale
8. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been
9. The status of the text which accompanies each policy box is not If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.
The draft Plan should be reassessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

20.A. Question 4: Duty to cooperate

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate? Please provide the following information being as precise as possible:

• why you consider it has or has not complied with the Duty to cooperate and
• what change(s) (if any) you consider necessary to make it comply with the duty to cooperate, explaining why this is the

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to cooperate with the wishes and requirements of the vast majority of the residents in its Borough. The Council has failed to cooperate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I trust that the objections made above are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Gosden Hill development of 1700 houses. Reference to a potential link road from the development to the A247. The clear implication is for an access from the development to the A247 with enormous traffic implications for the A247.

South bound off- and on- slip roads to service the development and replace the existing off- slip road to Burpham. The only North bound access to the A3 will be via the existing slip road off Clay Lane. (See later, Burnt Common).

A 4-entry form secondary school, a primary school, a retail centre and a park and ride for up to 700 cars.

When developed, the new employment site at the north side of Gosden Hill Farm (site allocation A25) will be treated as an Office and Research & Development Strategic Employment Site (7000sq.m). This could mean several hundred employees.

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt.

4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity.

5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.

7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).

8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** pslp172/2102  **Respondent:** 8667713 / Victoria Sinnett  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

Garlick’s Arch development of 400+ houses and facilities for travelling showmen (implies storage yards and long vehicles). This will generate traffic on the A247.

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.

3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.

4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”

5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.

7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Although much is made of the need for new infrastructure to support these developments and for this to be in place as needed, the Plan admits … “we forecast that there will also be an absolute increase in overall traffic volumes” and this is assuming all the infrastructure (listed in App. C to the Plan) is in place in a timely fashion. GBC has little or no control over the plans of Surrey County Council as the local highways authority and Highways England for trunk roads. Worryingly, the Plan now has less substantive information about improvements to the A3 South of the M25 from Highways England and it appears that their plans are not yet formed (Policy ID2). In the absence of such information, the infrastructure proposed is specific to each proposed development and does not address cumulative effects. What would be the case with regard to planning approval if SCC and/or HE do not provide timely infrastructure?

The Plan now calls for nearly all infrastructure to be funded by developers (see APP. C). We question how realistic it is to expect developers not only to pay for all the infrastructure but also to have it in place in a timely fashion. The Plan says that planning permission will be refused if timely provision of infrastructure cannot be secured. Such refusals will almost certainly be settled in the courts. Developers’ business models are based on building and selling houses to create the cash to provide infrastructure. People will be living on the sites well before infrastructure is complete. Will GBC prevent development of Gosden Hill until slip roads etc. are provided off and onto the A3? Again, the infrastructure is site specific and does not address cumulative effects.

If development were to be refused the land would still have been removed from the green belt and its future rendered uncertain.

Residents are being asked to accept very large amounts of development with little or no detail being provided on measures which would relieve existing congestion and limit future problems. The cumulative effects of the developments listed below are certain to have a devastating effect on the A247 through our village (and of course on Send) and it is hard to see how any of the infrastructure proposed in the Plan (App. C) will do anything to mitigate the effects of these developments on the A247 and hence our village.

**Summary of the Impacts on the A247 – My Objections**

All of these developments will draw additional traffic to the A247 through the village. It would be naïve to think that the employment sites and schools will serve only the developments themselves. Apart from the normal movements of residents to and from the new sites there will be considerable additional traffic on the A247 generated by:

- children from elsewhere being delivered to schools and collected
- the employees of the offices and industrial sites getting to work and returning home
- the vehicle movements generated by distribution and storage activities
- traffic from Wisley wishing to travel South and returning
- traffic from Gosden Hill wishing to travel South and returning
- traffic from Slyfield wishing to travel South and returning
- private and commercial traffic originating in the South and accessing Gosden Hill, Burnt Common or the A3 and returning (including traffic from Dunsfold)

The A247 although an A road:

- is less than 2 vehicle wide in places
- does not have continuous footpaths
- has several sharp bends
- has a hump-backed bridge with poor site lines
- has a very difficult junction to access the station
- is largely unlit
- has a primary school
- is already very congested at times

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Comment ID:** pslp17q/73  **Respondent:** 8667713 / Victoria Sinnett  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

**Non-plan Items– My Objections**

Surrey County Council’s business plan for Newlands Corner (not referenced in the Local Plan) to attract 100,000 more visitors a year. A significant proportion of these can be expected to use the A247.

Waverly B. C. has approved the development of 1,800 homes at Dunsfold which has the potential to feed traffic trying to avoid Guildford, onto the A247 to access the A3 (not referenced in the Local Plan).

**Cumulative impact of changes – My Objections**

Changes to the Plan have done nothing to alleviate the problems (particularly of traffic and congestion) raised in residents’ previous responses. Indeed it is now clear that the problems will be made much worse. There do not appear to be any changes which would be of benefit to the Clandons and indeed the cumulative effect of what is in the Plan and some external factors not in the Plan will have a much worse impact on the A247 through West Clandon and Send than the 2016 draft. Note that the A247 is the only road over the Guildford to Waterloo railway, North of Guildford that doesn’t involve travelling through the town centre.

**Duty to Cooperate – My Objections**

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
The eradication of 72-hectares of virgin green belt land between West Ward Lane and Glaziers Lane is going to be a complete lottery for those that have houses on this site. It is a very badly thought-out idea. Flooding problems in Normandy are well documented, so water running off houses, roads and driveways of 1,150 homes will only make the matter worse. We have enough problems in Glaziers Lane with sewage backing-up out of residents toilets as it is. What happens when new house owners start getting sewage coming up through their new toilets, I wonder! Will Taylor Woodrow give them their money back?

I am fortunate enough in having 4-head teachers as neighbours living very close by and they all tell me every school in Guildford is under subscribed. This is a fact. So why build a school that is not needed in an area that has poor transport links. Thus bringing even more traffic into an all ready over congested area. The building of a school is little more than a sweetener to catch the eyes of the planners. Once again, this is a badly thought-out idea.

I would ask the GBC planners to scrap the idea of such a lot of houses being built in Normandy. The present infrastructure cannot cope with this type of large housing scheme.

The facts I have given are truly relevant to the future of Normandy and its residents.

I strongly object to the Local Plan and the chaos it will bring to Normandy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Before every blade of grass is destroyed, every tree hacked down and every living creature is slaughtered to accommodate 1,150 houses in Normandy, I would ask you to make sure the roads that service this area are in-place before a house is built. The roads concerned are the A3, A31, A323, Westward Lane (D class) and Glaziers Lane (D class). A 'D' class lane is one that has no structural foundations and is little more than a farm track. With the influx of thousands of lorries and cars these roads and lanes are not fit for purpose in their present state. This would have to be addressed immediately and be the first priority.

The railway line from Aldershot to Guildford must be up-dated and have more stations in order to get some of the cars off the roads. New stations for the Guildford University, Park Barn, Wanborough and Ash must be in-place and free adequate parking to accompany these stations. Without these travelling arrangements it goes without saying that chaos will be achieved to those unfortunate enough to buy a house in these areas. The level crossing at Ash station must be done away with and a bridge put in place because this is a major pinch-point on the A323. The bridge is essential and must be one of your first considerations. The traffic in this area is a total shambles in the rush-hour let alone when hundreds more homes are built.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objection to the settlement boundary change behind Shalford Village Hall

I strongly object to the proposal in the Guildford Borough Council’s Local Plan to take the land behind Shalford Village Hall out of its present Green Belt and Area of Great Landscape Value status. The effect would be to remove this land from its protected position and open the way for future housing development. This is highly undesirable for the following reasons:

1. We need to protect the open character of this land for the enjoyment of future generations. Users of the Halls often comment how delightful it is to have the open green fields at the back and the Common and pond to the front. A couple of years ago I arranged a large family reunion at the Village Hall and relatives came from all parts of England, Wales and Scotland as well as Australia and Canada and many expressed their pleasure at the lovely site.

2. The land behind the Village Hall is on one of the highest elevations in the area. The ground level is at the same elevation as the roof of the main Village Hall. Any 2 or 3 storey buildings would be widely visible from the road and significantly impact upon the open character of the village and green nature of the locality.
1. Any development would undermine the character at the heart of the village where so many people come from far and wide to enjoy the facilities within the Tennis and Bowling clubs and the Village Hall. Houses and gardens overlooking the village hall and its sports facilities would spoil this.

2. **Environmental damage and localised flooding** will increase if development takes place in the areas directly surrounding this elevated open space.

1. Access for any future housing development on this site will be via Chinthurst Lane, which is not equipped to take any **more traffic** and even now is often highly dangerous for pedestrians.

1. Whilst this proposal only involves a relatively small site, the **environmental damage** is quite disproportionate to any perceived benefits.

1. In summary, it is wrong to take these fields out of the Green Belt boundary and put them within the settlement of Shalford. Only a small adjustment to the 2003 boundary is necessary to reflect the 1999 development behind the Village Hall and thus keep its Green Belt status.

All present and future users of the Village Hall will appreciate full and sympathetic consideration being given to this objection.

**Answer (if comment is on questions 1-7 of the questionnaire):** ( )

I wish to comment regarding sites A36-A41 in the draft plan.

There are no real 'exceptional circumstances' for building over 500 homes in a small village with the infrastructure of a small village.

Within GBC, as in many parts of the South East, there is a need for affordable housing for younger people, families and downsizers.
If these people were to be the beneficiaries in Horsley, many would accept a modest increasing in house building. However building homes with a nod to affordability, with the criteria set for affordability a % of the average price of a house in the village (high), is not going to meet this need. The houses will be occupied by those priced out of London and the only beneficiaries the housebuilders.

These families will require school places - there are insufficient; parking - there is insufficient; access to transport-insufficient capacity and parking; facilities - the local PO depot is closing at the end of the year; shops - limited with insufficient parking; medical services - stretched. The streets of E&W Horsley are littered with potholes and flood heavily in rain. There is no provision to improve any of these essential services.

A SHMA has been undertaken - but meeting this inflated need would have a catastrophic impact on the Horsleys, current and future residents.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am of the opinion that new houses are required but that they should be placed in locations where there is adequate supporting infrastructure in place in advance and where impact studies on existing populations are carried out first. I believe that development at Wisley is a viable option but only with road infrastructure improvements at the A3 carried out first, road improvements to Horsley station, as well as the station itself, being described and funding secured first and for healthcare and school provision being described and secured first. Descriptions of infrastructure already in place does not support the case for an increase in population which existing infrastructure does not cater for.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E8

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am in addition concerned with how definitions within the report have been made. For example, Horsley Village’s “Station Parade” is described as a “District Centre” which is used to support the case for a very large number of new houses in the vicinity. At present local provision for food, education, as well as the roads themselves are either appropriate for the current population, or in some cases, inadequate. The proposals in the local plan would turn the Horsley’s into a single town with roads, schools and healthcare designed for Village life.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Infrastructure failings and shortcomings. In materials published and videos produced, repeated mentions of the requirement for infrastructure investment but what is required, where and at what cost, both monetarily, environmentally and culturally is not described or accounted for. There is mention of new rail infrastructure, but no supporting evidence for what specific need this addresses and to what extent it will solve it. There is mention of DfT investment in A3 at Wisley and Guildford being delivered during the plan period but no account of what any lack of delivery or a change in DfT priorities would mean to the local plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not believe that the local plan in its current form sufficiently communicates requirements and possibilities to the current population. There is mention with the local plan of possibilities such as Guildford East and West stations, of which there has been little to no mention of before and no supporting literature from Network Rail or the DfT. The local plan should have briefly and simply stated needs and goals followed by in-depth analysis of each and every potential development so costs and benefits can be measured alongside one another.

Answer (if comment is on questions 1-7 of the questionnaire): ()

“Insetting” or removal of Green Belt status which is meant to take place only in extraordinarily circumstances. I have not seen any evidence to support urbanisation of Villages is necessary over modest house building spread across a wider area, focused in city centre development and development of land immediately adjacent to the city centre. There is no account of why the Green Belt status should remain, even prior to a conclusion that on balance it should not. On your website you describe how you are “protecting the green belt” (video quotation), its removal contradicts this statement.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Finally, I strongly feel the process has been described to residents in a purposefully and unnecessarily complex manner which has disenfranchised much of the population from fair comment. Whilst there is the need to make reference to and speak in a legal context, it is a barrier to many and produces a failing on behalf of the council to its citizens to effectively communicate and act in a democratic manner.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
2 West and East Horsley

I object to the over-development of West Horsley in particular.

We feel we are being punished for exposing the illegal activities of GBC’s former Planning Officer, Monika Juneja. GBC’s Leader and Chief Executive never apologised for their support of this former Councillor, neither did she apologise for the threats she sent in emails and in the local paper, when she knew she had broken the law. Indeed she still continued to protest her innocence even after conviction.

Her legacy has left the Borough with HER megalomaniac intent to ruin our environment.

West Horsley does not want to be a dormitory town.

Sites A36-41 will completely change the feel of the village, ruining what is at present a large natural green break between houses.

The planned number is far too great for a small village.

The planned number is far greater than anywhere else in the Borough

The wastewater(sewerage) system will not be able to cope.

The surgery is full and would be very difficult to enlarge

The carparks are full

Schools are full

Children cannot walk to Ripley or Effingham for alternative schools and there is no bus service to Ripley, neither are the roads safe for cycling.

There are no proposals for improving the roads.

If the Wisley site is also developed there will be a further 2000+ houses using the same facilities.

The proposal to build 120 houses at Waterloo farm will make the present Camping Site unusable as a rural facility.

Flooding is a regular problem down Ripley lane and Ockham Road North, both of which have been closed several times during the past year.

Traffic travels on The Street in West Horsley and Ockham Road North (both 30mph zones) at up to 80mph, and regularly travels at recorded speeds of 52mph. Traffic has doubled on these roads in the last 15 years. There are no speed cameras or traffic calming measures. Pavements are narrow and impossible to widen. Both roads are narrow and cannot reasonably be expected to regularly accommodate a further 1500 cars.

3 Three Farms meadow

I object to development on this site. Various reasons have been stated elsewhere in this letter. What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
GBC has included fields adjacent to the Bell and Colville site, at present in the greenbelt and partly in a Conservation area for 40 houses...a density double that of any nearby housing, and within 400 metres of 4 listed houses. One of the reasons for turning down the latest Wisley application was because of its detrimental effect on several listed houses, in fact these were more than 400 metres from the planned development.

GBC wish to remove the opportunity to appeal against inappropriate development. This is appalling!

Better Places! No, considerably worse!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the fact that GBC has not referred in its documents to any consideration of vernacular styles, or materials in the preservation of the surroundings of historic, or even listed houses, even in existing Conservation areas.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
D2 Sustainable design construction and energy

What is sustainability? Surely it means that the infrastructure of an area is also considered when development is planned. I object to the fact that the GBC has taken none of these considerations into account when drawing up its Draft Local Plan and encouraging a further approximately 30,000 cars onto the local roads.

There are no plans for better roads apart from the A3.

There are no plans for extending the Hospital.

There are no plans for sufficient school places (Wisley proposed a couple of schools, but only after 500 houses were built, where, in the meantime will the children from these houses go?)

There are no plans for more surgeries (The above statement also applies here)

There will be a considerable increase in light pollution

There will be a considerable increase in noise pollution

There will be a considerable increase in exhaust pollution. (The Wisley site is already polluted severely from the A3/M25 junction)

There are no facilities to supply the Combined Cooling, Heating and Power and Communal Heating networks proposed by GBC

D3 Historic environment

How on earth can development enhance our heritage assets? Not NPPF paras 126 and 131-133.

Development adjacent to historic buildings or landscape damages those assets and should be prohibited.

I object to any suggestion that our heritage can be improved by development.
History is what it is, history, and historic buildings only need looking after, preventing decay, and GBC should support those who care for such properties and landscape.

Subtle improvements to access to the Museum and its links with the Castle do not need aggressive developments.

The Electric Theatre should remain a community asset, and rents based on what local, amateur groups, for whom it was created, can reasonably pay. GBC should never have considered selling it off. They should have spent some of the money wasted on useless sculptures around the Borough on improving these facilities, making the car-park more efficient and opening up the riverside to the general public.

GBC should not have spent a small fortune on improving their own offices at the expense of facilities for the public.

GBC should not have overspent on buying an office building at a price well beyond that agreed by the Council.

GBC have wasted our rates on pointless vanity projects.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

E5 Rural Economy

I object to the fact that localism is being ignored.

Villages need to be protected from inappropriate development, not swamped with semi-urban housing estates as GBC proposes.

The Rural character of many villages will be lost; especially West Horsley.
The building of the new Theatre in the Woods (Opera House) and the accompanying Arts Centre in the adjoining barns and outbuildings at West Horsley Place, will rely for its success on bringing tourists and visitors from far and wide, who will not appreciate its position in a village full of ticky-tacky, over-dense housing estates.

E6 Leisure and Visitor experience

I object to the over-development of essentially simple rural sites, such as Newlands Corner.

Heritage sites should be left as natural as possible, while still preserving them for the enjoyment of visitors (new loos will always be appreciated…cafes in plain view for miles around will not!)

Guildford could make more of its existing tourism sites, such as linking the Castle with the Museum and publicising the heritage trail with better public information panels.

The Tourist Office is barely visible under a welter of items for sale at a commercial shop at its rear.

Guildford still has a beautiful High Street, though from a high viewpoint (the café on top of the House of Fraser for instance), most of the attractive roofs are lost in the later developments with flat roofs. For the visitor, Guildford is already losing its appeal.

GBC should remove the use of Hotels from redevelopment plans. Thatchers in E Horsley will be needed when the Opera House is functioning.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
E7 Guildford Town Centre

This policy is worthless and I object to the “vision” as a reference to the “Unique setting “ of Guildford, when that setting will be destroyed by GBC’s intention to over-develop the countryside and remove Greenbelt status from Villages.

There should be better use of the Riverside in Guildford, particularly in the old bus station, now a car park, in one of the most visible of sites in Guildford. Walnut tree Close should also be included in a re-planned riverside development. The Riverside could be connected through Guildford as a pedestrian channel with attractive gardens, benches and cafes at strategic points.

According to the NPPF, there should be design requirements, but these have not been considered. The designs should consider references to existing historic buildings and local materials. This is an opportunity, which seems to be neglected by GBC, to improve the look of Guildford, ruined in part by 60s/70s/80s/ brutalist architecture.

There is too much emphasis on shopping. Rates should be reduced for food shops, who cannot afford (and are therefore not available) the rates paid by chain stores, of which there are far too many already.

GBC made a big mistake developing the new Waitrose site with on-ground, rather than below-ground parking, or even multi-story parking.

The open air car parks should all be re-developed including the large one near the River (Yvonne Arnaud) where shops, a large development of flats and parking could be built.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
E8/E9 District Centres

I object to the idea that sites on the edge of District Centres should be developed further with retail opportunities. There is a proposal to increase the number of shops at East Horsley for the use of the 600+ houses planned for West and East Horsley. It is in West Horsley that we need a few shops, the GBC having given permission for the PO to be turned into flats. The general stores is also shortly closing, leaving West Horsley with NO shop at all. Part of the Bell and Colville site, should have been proposed for a small general store, chemist and PO.

However, the increase in shops in East Horsley will exacerbate the problem, already there, of insufficient parking places, and nowhere to create more. There will also be increased traffic on already narrow and crowded roads, impossible to use during school-run time.

GBC should reduce rates for existing shops to allow them to flourish.

GBC is encouraging urbanisation of rural communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

H1/H2

I OBJECT as homes for all is an impossible dream, as there always will be people who cannot afford the inflated prices of the so-called "affordable homes."

Only if GBC were able to build more Council Houses, rather than selling them off, would it be possible to house everyone.

There is no "right" to own a home; other countries have many more rented properties than England.

GBC should not have allowed the University to renege on the deal it struck several years ago, to build student accommodation, rather than encouraging students to fill houses needed by Guildford's own people.

GBC needs to build low-rise flats and underground parking to accommodate people, who want to live and work in Guildford.

Developers will use the viability clause (4.2.40) to get out of providing ANY affordable homes on each site.

This policy does not state by what rules will be applied to constraints, such as existing density in Villages.

GBC has proposed density more than twice that which exists at present in every site they want to build on in West Horsley. At present there are 1100 homes in WH, but GBC are proposing to increase this by a 35%, turning what is at present a semi-rural community into a small town. The Parish Council and the Neighbourhood Plan Committee have twice surveyed the need in WH for new homes and have reached a number approximately one fifth of that proposed in the Draft Local Plan.
There should be fewer traveller pitches. The proposals are for too many, more than other similar Boroughs.

**H3 Rural Exception Homes**

I object to this, the most frightening policy proposed by GBC, as it will encourage development on AONB land and Agricultural Land as has recently been proposed by a developer on a site, not included in the Draft Local Plan, at the junction of the A246 and Shere Road in West Horsley, with access onto an already overcrowded roundabout.

The original intention of these developments was to allow people in a village to downsize, or for their children to remain in the village, but GBC intend to allow anyone on the Guildford housing list to take advantage of this building.

The NPPF (paras 87-89) must be applied when demonstrating "exceptional circumstances".

Answer (if comment is on questions 1-7 of the questionnaire): ()

11/12/13 Infrastructure and delivery and Dept of Transport Strategy

See my comments under D2/D4

I object to the Draft Local Plan in every respect on these policies.

Plans are too vague and too far in the future to beneficially affect, new residents encouraged by GBC to settle around Guildford, and as for the existing residents, their lives will be made a misery by excessive road widening, footpaths and cycletracks changing the whole image of the Borough.

Buses were not able to travel between the proposed Wisley site and Effingham station. There are not sufficient buses anywhere, and are underused, generally, as people prefer to commute by car.

Station carparks are full already, with no possibility of extension at Horsley or Effingham.

The elderly, children and disabled are not able to walk or cycle long distances. The idea that most people will return to these primitive ways of getting around is unrealistic.

Many roads cannot be widened for footpaths or cycletracks.

The new stations proposed will slow commuter trains to London, but may relieve the other carparks. It is uncertain from documents whether these are a reality or just a dream.

Answer (if comment is on questions 1-7 of the questionnaire): ()
1 Green belt sites

I object to any land that is at present in the greenbelt being designated as suitable for building.

Allowing these areas to be included in the DLP will give the green light to developers to put in applications anywhere they choose, not just on land proposed by GBC.

Indeed, at West Horsley, there is already a proposal by a developer to build on a large, sloping and very visible field at the junction of the A246 and Shere Road, a site which was previously in the 2014 DLP, but had been removed in the latest one.

20,000 objections were sent in to GBC to the 2014 DLP.

GBC has taken no notice of local opinion.

GBC has increased the number of houses overall to be built in the Borough

GBC has identified even more sites to be built on in the Greenbelt

The Government requires that use of Greenbelt land should only be done in exceptional circumstances, but SPECIFICALLY says that demand for house is not a good enough reason, so why is GBC still persisting with their ridiculous proposals.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

P2 Green Belt

I object, as this policy is a downright lie. No Greenbelt land should be lost.

Greenbelts should be protected for the values for which it was created:
Agriculture,
Leisure activities
Tourism
Water catchment
Flood control
Biodiversity
Heritage of nature, landscape views, open spaces
Heritage of historic villages and houses
Parks
Burial grounds
Benefit for public health and wellbeing

Objections have been voiced by thousands of local residents to previous plans and applications for greenbelt development but GBC have ignored, even ridiculed the public and claimed that such a policy is necessary, even desirable, which it is not!

Villages should not be "inset" (what a fatuous, mealy-mouthed, non-sensical word that is) and their greenbelt status lost forever, particularly in West Horsley.

I object to the other 13 villages around Guildford also being inset.

The policy of insetting was arrived at by GBC through a flawed Greenbelt and Countryside policy which was commissioned without the Councillors consent.

I object to the Village envelopes (boundaries,) being enlarged in order to develop large tracts of greenfields and woodland, as proposed by GBC in West Horsley at Manor Farm, land opposite Greta Bank on East Lane and at Waterloo Farm or land adjoining Bell and Colville Garage.

I object to the planned “infilling” of Villages, especially outside settlement boundaries.

I object to the resulting “urban sprawl” which is against NPPF policy.

Development in Villages outside Guildford will result in even more congestion on the approach roads, which are already clogged at commuter and school-run times. People will not cycle or walk from Villages to Urban centres, nor take irregular buses, but will want to drive themselves in cars.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

SITES
1 Green belt sites

I object to any land that is at present in the greenbelt being designated as suitable for building.

Allowing these areas to be included in the DLP will give the green light to developers to put in applications anywhere they choose, not just on land proposed by GBC.

Indeed, at West Horsley, there is already a proposal by a developer to build on a large, sloping and very visible field at the junction of the A246 and Shere Road, a site which was previously in the 2014 DLP, but had been removed in the latest one.

20,000 objections were sent in to GBC to the 2014 DLP.

GBC has taken no notice of local opinion.

GBC has increased the number of houses overall to be built in the Borough

GBC has identified even more sites to be built on in the Greenbelt

The Government requires that use of Greenbelt land should only be done in exceptional circumstances, but SPECIFICALLY says that demand for house is not a good enough reason, so why is GBC still persisting with their ridiculous proposals.

Answer (if comment is on questions 1-7 of the questionnaire): ()

P3 Countryside

This is another appalling policy, directed towards protecting specific areas in which some of the more influential Councillors live.

I object to this misuse of Councillors’ powers as new greenbelt is to be created and the areas of Ash and Tongham, which are not at present in the greenbelt will not be inset, and will have greater protection from development. This policy is immoral.

Policy S1

I object to the policy that sustainable development should be paramount in GBC's planning, particularly as no explanation of what this means is given in the paperwork.

There is therefore no obvious framework to support this intention.

The Plan intends to "secure development that secures the economic, social and environmental conditions in the area" but fails to discuss how conflicts between these various aims will be resolved.

Basically I object in the strongest terms to ANY development in the Greenbelt for housing, on the promise of the protection of which, the GBC Councillors were elected.

Government guidelines state that development for housing is not a valid reason for building on Greenbelt, even if there is not enough other land available, which I dispute as GBC are intending to develop most of the brownfield sites with businesses, shops and industry, rather than housing.

Obviously, GBC's intention to encourage building and approve planning applications "without delay," and "wherever possible" suggests that building will be allowed anywhere, without proper consideration.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
S2  I object to the number of new homes proposed

13860 is well beyond the actual "need" in the Borough. There may be a "demand" for more houses, (many people would love to live in the so-far, "leafy," will-be “concreted-over” Surrey,) but this is an excessive number, reached by GBC sub-contracting to a company who sub-contracted again, thereby being able to claim that the results of their surveys were their own "intellectual property" and therefore not available to either the Councillors or the general public ( even after requests under the FOI Act).

That the Scrutiny Committee of the GBC did not discuss or even have access to these documents is appalling. It is immoral, if not illegal to withhold this information, because, without it, no one can know why the number of houses is so large. What is more, the companies employed are connected to the construction industry and therefore are likely to benefit from development around Guildford.

Policy D1 Place Shaping

I object to 4.5.8 which formerly was a reference to development, responding to local character, history or vernacular architecture. This direction has been removed, indeed GBC appear to be encouraging unsuitable modern buildings in sensitive sites.

GBC have removed all reference to sensitive development, including being aware of and noting the characteristics of an area, constraints such as hedges and trees, and local distinctiveness.

SHMA

I object to the fact that research resulting in the SHMA has not been made public

GBC have broken a lot of rules in preparing the SHMA.

They subcontracted to GL Hearn, who subcontracted the work to Justin Gardner. This was against their own rules. Justin Gardner then claimed that the research which led to the numbers of houses needed was their “intellectual property”, therefore they were not obliged to share this information with anyone, not even the Councillors! Mr Spooner, Leader of the Council, claims not to have seen the research. How can he and his executive team make any reasoned decision without seeing the evidence?

The document Strategic Housing Market Planning states that consultants “should ensure that there will be no data protection or commercial restrictions on the storage and sharing of data used in the assessments”. This was not done

The Strategic Housing Market Assessment Practice Guidance document V2 Aug 2007 (1.1.2.5) states that “assumptions, judgements and findings are fully justified and presented in an open and transparent manner.” This has not been done.

These last two points have been entirely and ruthlessly ignored by GBC as they have refused on many occasions, even when information was requested under the FOI Act to divulge any research.

With regards to the student numbers in Guildford, the fact that most of them leave and live elsewhere, after finishing their degree, has not been taken into consideration, and plans to accommodate students have skewed the numbers of houses required by the GBC, probably by about 25%.

The University should be forced to build the student accommodation for which it was given land and building permission. GBC should not allow any further increase in student numbers, nor any further buildings on the site, until the university has fulfilled their agreements regarding student accommodation. This would release large numbers of inexpensive flats in Guildford for local occupation and reduce the numbers of houses needed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Infrastructure

I object to most of GBC’s plans as they have proposed no realistic infrastructure improvements.

The A3/M25 interchange will cause even more air pollution than already exists, which is well above permitted levels for development.

It will swallow up huge amounts of common land.
It will direct **Wisley Garden traffic** onto an already over-used junction (Ripley/East Horsley), which, it is suggested will also be the exit and entrance point for the proposed development of Three Farms Meadows, (erroneously re-named Wisley airfield).

The congestion will result in tailbacks even further West in a London-bound direction, along the A3, than there are at present. (often 2 miles before the A3/M25 junction)

Ripley is threatened with ALL the traffic from Wisley, heading West on the A3, going through the village, which was bypassed in order to reduce the traffic.

**I object** to the plans to close roads around Wisley or to make some one way only. This will be very disruptive to traffic from other places trying to get through Ripley, or on to the A3 or from Ockham to Cobham.

**A3:** There are no proposals for meaningful improvements to the **A3** around Guildford. At present one may be stuck in heavy traffic for 45 minutes on a daily basis, as one covers no more than 2 miles travelling Westwards. A tunnel might help but is there any realistic prospect of that being completed in the Plan period?

**Roads:** There are no proposals to widen or improve the surface of poor roads in and around Guildford. Many roads cannot be widened, therefore the increased traffic from the planned 12,426 new houses (approximately 24,000 extra cars) will cause grid-locks and serious congestion, within the town and in the small rural roads in and around villages.

**Surgeries:** There are no proposals for new surgeries in most of the areas GBC proposes to develop.

At present, most surgeries are managing at the limit of their capabilities. Many surgeries have no room to expand, even if they could find sufficient doctors, nor to expand their car-parks.

**Schools:** Most schools are at full capacity. Not enough new schools have been proposed.

**Water and sewage:** Many of the sites proposed will have difficulty in bringing in sufficient water supplies. New sewage farms would need to be built at most of the sites. At Wisley, proposals suggest that the Ripley sewage works could accommodate the waste from an extra 2000 houses. **It cannot.**

**Trains:** a new station at Burpham is a good idea. It might take the pressure off Horsley and Effingham.

**Buses:** Suggestions by the Wisley developers that buses might run every 10 minutes to Woking station are ludicrous. It is also unrealistic to run buses to Effingham as the road is too narrow and unsafe.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Flawed evidence is exaggerating the need for expansion as shown clearly by the GRA report on housing;

Transport evidence is not yet fit for use and major transport issues are unresolved eg another river crossing, a central bus facility;

Answer (if comment is on questions 1-7 of the questionnaire): ()

- Expansion should be constrained to protect the character of town and country in our congested gap town;
- It is unacceptable that, unlike other places, Guildford is choosing not to constrain its overall housing growth;
- Allowing Green Belt development to pay for transport schemes will simply generate yet more traffic from more homes, fuelling congestion;
- Brownfield opportunities are being ignored – we need homes in the centre (not 40% more shops), much more accommodation on campus for students, and homes for the elderly to free up family houses;

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing to object to the planned proposal to move the green belt boundary to exclude the fields behind Shalford Village Hall. The idea behind the green belt is to protect our countryside from development. However I understand that as new roads are built and towns expand there is a case in extreme cases to change this, for example the area either side of the A3 between Guildford and the M25. THIS IS NOT THE CASE in Shalford, there are no new roads or motorways, expanding Town etc, and therefore no case to infringe the green belt. Being next to the Village Hall this is an area in constant use and the path leads to the beautiful area of Chinthurst Hill. Also the elevation of this land means that any housing development would be visible from most of the village.

One of the biggest problems for Shalford is the rush hour traffic. The failure of Surrey County Council to build a North/South bypass has meant the A281 is the only North/South road and has to go through the centre of Guildford. Both the A281 & A2128 (from Cranleigh) meet at the Shalford roundabout and very long queues form. Many cars now use Chinthurst Lane as an alternative route and this often backs up past my house making it difficult to turn right from my drive. Coming back is almost impossible because of parked cars on the right makes Chinthurst Lane a one way Lane in rush hour. I think it would be irresponsible to allow any development South of Guildford until a viable alternative route through Guildford is built.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/15202  Respondent: 8672993 / Kes Heffer  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This policy is endorsed, but safeguards to make sure that high quality traditional building in keeping with surroundings is strictly enforced need to be included. There is a lot of motherhood and apple pie in the sentiments of the current statements in Policy D1, which are also occasionally conflicting: e.g. the Blairite, ‘third-way’ fudge: ‘reflecting the identity of its surroundings whilst allowing for innovative and forward thinking design’ (paragraph 4.5.8). That just allows a gigantic loophole for developers to jump through. Also it is not clear how the emphasis of the Draft Local Plan on development in rural villages can possibly aid the stated objective: ‘to facilitate and promote walking, providing a high quality environment for pedestrians, and where possible allowing short walking distances to amenities’; employment and major amenities will generally not exist within short walking distances of rural villages. Those moving to proposed new houses in the rural villages (existing or proposed at Wisley airfield) will mostly have jobs elsewhere, and quite likely children will go to schools elsewhere. Car use can only increase under the assumptions of the Draft Local Plan. No quantitative assessment has been made by GBC of the effect of the proposals on car use in the Borough in the future.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D2
All measures to improve energy efficiency by better insulation etc. are laudable. However, this policy should explicitly preclude the possibility of building wind-farms or solar electricity farms in the Borough, which are extremely inefficient forms of energy production12. Both suffer from the intermittency problem, and, as a consequence for wind turbines, even the contributions to reducing carbon dioxide emissions are highly dubious13,14,15. Those analyses rigorously demonstrate that wind developments of various sizes cause extra fuel consumption (and hence carbon dioxide emissions) instead of fuel saving, when compared to electricity production with modern high-efficiency gas turbines only. However, power from so-called renewable sources receives large Government subsidies which are attractive to landowners, and, under the proposed policy D2 would be allowed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I Object - It needs strengthening.

The weak provisions of this policy for development within villages that have been ‘inset’ from the Green Belt by the proposals elsewhere in this draft Local Plan imply that the density of housing within the villages will inexorably increase over time, through a ratchet effect, destroying their rural character. The wording that supposedly protects such character against inappropriate development is extremely vague and weak, and needs strengthening.

Page 1629 of 3335
The statement on housing mix in policy H1 that ‘New residential development is required to deliver a wide choice of homes and meet a range of housing needs as set out in the latest Strategic Housing Market Assessment’ is misconceived. All detailed surveys of housing need in the Borough conducted by local organisations (i.e. by local people who, by dint of NPPF paragraph 17, should be empowered; not by remote, development-biased consultants) conclude that the most pressing need is for affordable housing. Consequently, the proportion of affordable housing catered for in the Local Plan should be as high as possible, ideally about 80% of total projections. These are the only houses that the borough actually needs for its indigenous population. Students at Guildford University are the only migrants that the borough needs in significant numbers; they should be accommodated in dedicated buildings around the University. There is a shortage of homes for local older people, especially in the rural villages: if they could be accommodated in specialised, attractive smaller homes, they would free up a number of larger houses for younger people. The Borough does NOT need many more 5-bedroomed mansions in order that wealthy families can move to a (currently) attractive area, either as owners or renters of property owned by foreign investors. Allowing such developments will mean that they will comprise an excessive (relative to proper need) proportion of the housing mix provided by developers, simply because most profit can be obtained from them – especially if built in greenfield sites such as the PDAs earmarked around West Horsley and other rural villages. This is a beautiful area and therefore attractive to many. Catering for all of them will destroy that beauty and the continuity of the Green Belt. There is no ‘right’ for people to be able to fulfill a desire to live in one of the most beautiful parts of the country (certainly in the over-crowded South-East of England). It would be perverse to the point of madness to try to assuage such desire by additional development. Providing infrastructure in attempts to meet the new needs of migrants into the Borough would simply encourage even more. As with policy S2 this policy would also inevitably lead to exponentially growing numbers without end.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

My comments under Policy H1 are also pertinent here. This policy is too weak to be effective in increasing the availability of affordable homes. 40% is insufficient as a percentage for the numbers of affordable homes in a development; it should be at least 80%. (This percentage has even declined since the 2014 version of the draft Local Plan, in which it was set at 40-45%). Nor should there be a lower limit of 5 houses or minimum area criterion for the developments that are affected by this policy. No new housing off the campus of Guildford University should be provided for its students; sufficient planning provision was made in earlier years to cater for student housing on the Manor Farm site, which the University has failed to develop for that purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The key statement in the ‘Green Belt and Countryside Study’ policy-based ‘evidence’ document (in paragraph 4.111) concerning removal of rural villages from the Green Belt is: ‘National planning policy states that only those villages whose open character make an important contribution to the openness of the Green Belt should be included in the Green Belt.’ The assessment of whether the villages have an open character to make an important contribution to the openness of the Green Belt was made principally by Pegasus Planning Group (whether under covert direction from GBC or not is unknown) in the ‘Green Belt and Countryside Study’. Pegasus of course are not ‘local people’ wishing to ‘shape their surroundings’ as they see fit; rather they are a remote business, making money from lucrative council contracts. They have rather cornered the market in studies such as this, commissioned by councils trying to react to central Government diktat: this shows in their output.

Nowhere in the GBCS Summary document is the first sentence on the Green Belt policy reproduced: ‘The Government attaches great importance to Green Belts’. No weight has been given in these documents to this fundamental Government sentiment about the Green Belt. It is obvious that any importance that GBC or Pegasus Planning Group attach to the Green Belt is not ‘great’. Instead the documents’ recommendations are predominantly evasions of this sentiment, finding intricate and even artificial ways of justifying its lack of concern. In addition nowhere in GBCS Summary or briefing note that commissioned the GBCS does the word ‘permanence’ appear: this is an essential characteristic of the NPPF policy on the Green Belt. So the claim in the title of Appendix IV of GBCS that it is ‘in accordance with the NPPF’ is fallacious.

Rather than protecting the permanence and openness of the Green Belt, the paramount objective of the GBCS is finding areas to develop. Indeed the key requirement of the study as identified in the briefing note from GBC was: 2.1 The Green Belt and Countryside Study must:
provide a robust, independent assessment of Guildford Borough’s Green Belt and Countryside beyond the Green Belt with a view to potential release for development purposes in the longer-term, should this be necessary within the GDF plan period - 2006-2026 (and up to 2031), identifying realistic sustainable location(s) for green field release.

If the PDAs identified by this study are retained in the finalised Local Plan, they will be early targets for development because of the high house prices that can be imposed. The ‘finger’ of urban development that is currently extending through the Green Belt from London south-westwards via Epsom, Ashtead, Leatherhead, and Bookham towards Merrow and Guildford would be more densely formed. In partnership with the parallel ‘finger’ of development through Kingston, Walton, Weybridge, Byfleet to Woking a double barrier to circumferential continuity of the Green Belt in its SW corner is rapidly and inexorably being created. In addition to the loss of unspoilt landscape that is valued so highly by so many (not only those who live within the Green Belt), it is well-known that continuity of the countryside is of vital importance to the flourishing of wildlife.

For PDAs in and around urban areas, GBCS used the following screening criterion for whether a site was safe from bulldozers: at least 3 out of 4 of the purposes of the Green Belt, listed on page 19, paragraph 80 of the NPPF, need to be met (the encouragement ‘to recycle urban land’ was considered a common purpose at all sites and therefore not used in the assessment; i.e., actually, 4 out of 5 purposes need to be met). Meeting only 1 or 2 of the 4 purposes doesn’t count for anything in this study. But the NPPF states that ‘The Government attaches great importance to Green Belts’ and does not give any indication that the purposes of the Green Belt can be scaled in this fashion. The Government’s attachment of importance is absolute, not gradational depending upon the number of purposes served by parts of it. If a plot of land within the Green Belt serves only 1 of the 5 purposes, then it is making an important contribution to it. Conversely, to dismiss even 1 of the purposes that a plot of land currently meets in the Green Belt is to dismiss the importance that the Government places on the Green Belt, and would be inconsistent with the NPPF. The short-sighted, objective-enabling, unilaterally-decided exercise undertaken by Pegasus is almost certainly not going to maintain the permanence of the Green Belt for the future, particularly with regard to the purpose ‘to assist in safeguarding the countryside from encroachment’. However, even that gradation of purposes proved too lenient for the rural villages; too many sites would escape development. So even sites that served 3 or 4 Green Belt purposes (out of 4) were given more exacting criteria. To determine the potential suitability or appropriateness of each village for insetting within the Green Belt (or perhaps to meet GBC’s requirement that enough villages should be inset), a three stage assessment was devised. Those 3 stages deserve further detailed discussion.

Stage 1: Assessing the degree of openness within each village through analysis of urban form, density and the extent of developed land

Key to the recommendations made as to whether rural villages should be dismissed from the Green Belt or not is paragraph 86 of the NPPF, which states:

‘If it is necessary to prevent development in a village primarily because of the important contribution which the open character of the village makes to the openness of the Green Belt, the village should be included in the Green Belt. ‘Pegasus have assessed ‘openness’ of the villages ‘through analysis of the urban form, density and the extent of developed land’. Pegasus have unilaterally decided to assess the openness of a village’s character in their ‘professional judgement’. But given that there is no official definition, ‘openness’ can be assessed equally well by any person, professional or lay in planning matters. Professionalism in planning is of no advantage to judging ‘openness’; in fact it may be a disadvantage since the priorities of a planning consultancy must be towards development and inconsiderate of protecting openness. It was written by Pegasus Group, yet another contractor chosen by GBC whose every commercial, or ‘professional’, incentive, is to promote development, and who have no commercial interest in protecting the countryside, Green Belt or other. Whilst such bias is doubtless unwitting, it is safe to say that their contracts would soon dry up in the absence of development. Why was not an appropriate body commissioned to work alongside and provide counter-balance to the development-biased Pegasus assessment of ‘openness’, organisations such as the Campaign to Protect Rural England, or The Wildlife Trusts, have members who are in line with the Government in that they do attach great importance to the Green Belt, its permanence and openness? Alternatively or additionally a poll of local residents, whose daily experience with the degree of openness in their villages would enable an assessment just as objective, if not more so, than that of Pegasus. Relevant here is the exhortation in the Ministerial Foreword to the NPPF for planning to be a collective exercise and not to exclude people and communities. As an example, consider how differently the parishioners of West Horsley view the importance of ‘openness’ in their village. Given how greatly they value the open character of their village, there is a strong chance that most parishioners would, perhaps aided by their lack of professional bias, consider that its open character is an important contribution to the openness of the Green Belt, and that this is the prime reason to prevent development within it, contrary to the opinion(s) of a handful of ‘professionals’ in the Pegasus Group. Whilst GBC have studiously ignored the West Horsley Parish Plan in all planning decisions since its publication on the grounds that it is a
will harm the open character of the Green Belt. It is obvious that expansions of settlement areas that encroach on previous remaining Green Belt from many vantages (e.g. West Horsley from Sheep Leas and nearby locations in the North Downs) fine, as far as they go, but are also too weak. Also remember that development of the rural villages, visible from the countryside and rural villages from inappropriate development. It also stops the outward spread of London and contributes to regional policy for the South East seeking to redirect development pressures to the eastern part of the region.

If the Green Belt has provided those significant benefits in the past, weakening it now will reduce those benefits, to policy P2 regarding those parts of the Green Belt that are left after its diminution by insetting villages are particularly in terms of protection of the rural villages from inappropriate development.

What has changed since 2003? Remember that at issue now is whether the openness of the rural villages is important to the openness of the Green Belt. So, if boundaries of settlements were drawn in 2003 to limit development to where it would not impinge upon the openness of the Green Belt, then transgressing those boundaries with development at any time must still impinge upon the openness of, and therefore harm, the Green Belt. Similarly, if only limited development was permitted in 2003 within the settlement area so as not to cause detriment to the character of the countryside or the settlement, then major development within the settlement area at any time must still cause detriment to the character of the countryside or the settlement. This is not a question of policy, changing with the political wind or economic cycle; it is an issue of judgement about the importance of openness in and around the rural villages to the openness of the Green Belt. The judgement, accepted by GBC and all stakeholders in the Local Plan in 2003, cannot be gainsaid by a few Pegasus ‘professionals’ using dodgy definitions and dodgy statistics. Nor can ‘rural villages’ in 2003 come to be called ‘urban areas’ within a democratic poll.

Objective evidence about the openness of the rural villages is also to be found in the previous Guildford Borough Local Plan of 2003. This paragraph is relevant:

10.14 under policy RE3: The settlements identified are free standing villages surrounded by countryside which are of a sufficient size to contain a number of supporting services such as shops and community facilities. They may also be capable of accommodating limited development without detriment to the character of the countryside or the settlement. In defining settlements, the boundaries have been drawn to limit the areas in which development may take place to those parts of the settlement where it will conform to the purposes of the Policy, that is to say it will not affect the scale or appearance of the village or impinge on the openness of the Green Belt. The Policy does not envisage extension of the built up area of the settlement beyond the defined boundaries or other than very limited development taking place within settlements.

What has changed since 2003? Remember that at issue now is whether the openness of the rural villages is important to the openness of the Green Belt. So, if boundaries of settlements were drawn in 2003 to limit development to where it would not impinge upon the openness of the Green Belt, then transgressing those boundaries with development at any time must still impinge upon the openness of, and therefore harm, the Green Belt. Similarly, if only limited development was permitted in 2003 within the settlement area so as not to cause detriment to the character of the countryside or the settlement, then major development within the settlement area at any time must still cause detriment to the character of the countryside or the settlement. This is not a question of policy, changing with the political wind or economic cycle; it is an issue of judgement about the importance of openness in and around the rural villages to the openness of the Green Belt. The judgement, accepted by GBC and all stakeholders in the Local Plan in 2003, cannot be gainsaid by a few Pegasus ‘professionals’ using dodgy definitions and dodgy statistics. Nor can ‘rural villages’ in 2003 come to be called ‘urban areas’ within a decade, even if it suits the purpose of meeting nominal housing targets.

Also relevant from the 2003 Local Plan is:

3.36 The Green Belt has provided significant benefits to Guildford Borough, with long-term protection of the Borough's countryside and rural villages from inappropriate development. It also stops the outward spread of London and contributes to regional policy for the South East seeking to redirect development pressures to the eastern part of the region. If the Green Belt has provided those significant benefits in the past, weakening it now will reduce those benefits, particularly in terms of protection of the rural villages from inappropriate development.

The sentiments of policy P2 regarding those parts of the Green Belt that are left after its diminution by insetting villages are fine, as far as they go, but are also too weak. Also remember that development of the rural villages, visible from the remaining Green Belt from many vantages (e.g. West Horsley from Sheep Leas and nearby locations in the North Downs) will harm the open character of the Green Belt. It is obvious that expansions of settlement areas that encroach on previous
Green Belt have no real natural boundaries in practice; no more so than current boundaries. There is therefore no reason to trust that further encroachment will not be made onto the Green Belt as the iterative circle of development, inward migration, joining of immigrants by extended families, greater need for more housing and jobs, further development etc. spirals out of control, and the ‘finger’ of development from the NE to Guildford and beyond is completed. The provisions of the policy should give stronger protection to the Green Belt. There is too much ‘wriggle room’ for developers to work around in the current proposal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY S2: Borough Wide Strategy – I object

The housing requirements proposed under policy S2 flow from the flawed Strategic Housing Market Assessment produced by the remote consultants GL Hearn, now a subsidiary of Capita Real Estate, whose main business is concerned with property development. Contracting out the estimation of housing requirements to property developers is akin to asking foxes to design chicken coops; it ensures that the results are highly compromised because of conflict of interest. The SHMA is consequently flawed, principally because a) it over-estimates future migration trends; and b) its assessment of housing requirements is subjectively inflated over even such high demographics, without proper disclosure of methodology.

In addition, this policy has totally ignored the following key requirements from paragraph 17 of the NPPF:

• “take account of the different roles and character of different areas, promoting the vitality of our urban areas, protecting the Green Belts around them”
• “recognising the intrinsic character and beauty of the countryside and supporting thriving communities within it”
• “contribute to conserving and enhancing the natural environment and reducing pollution”
• “encourage the effective use of land by reusing land that has been previously developed (brownfield land) provided it is not of high environmental value”
• “conserve heritage assets in a manner appropriate to their significance”
• “actively manage patterns of growth to make the fullest possible use of public transport walking and cycling and focus significant development on locations which can be made sustainable”.

Removing West Horsley and other rural villages from the Green Belt by ‘insetting’ them, and expanding the boundaries of the settlement areas into neighbouring green fields (i.e. reducing the Green Belt) does NOT protect the Green Belt. Nor does it give adequate recognition to the intrinsic character and beauty of the countryside.

Nor, by giving developers the option of building more cheaply on green fields does it encourage the effective use of land by reusing land that has been previously developed (brownfield land). By turning West Horsley into a rural town, it does not conserve the heritage assets of West Horsley. By encouraging 35% more houses in a rural village without intrinsic employment, rather than brownfield urban sites, it does not make fullest possible use of public transport, walking and
empowering local people to shape their surroundings”

It is obvious from the degree of protest that there has been throughout Guildford Borough to the previous (2014) Draft Local Plan and the preceding ‘Issues and Options’ ‘consultation’ that local people wish to shape their surroundings in ways that are entirely different from that which is projected by the Draft Local Plan. As strong evidence of the lack of empowerment, West Horsley Parish has already twice recently provided democratically robust opinion on the way they wish to shape their surroundings and that shaping involves minimal development. The West Horsley Parish Plan 1 of 2008/9, compiled under the auspices of the West Horsley Parish Council and collating the opinions of those households responding to a questionnaire (430, or 38% of all in the parish), begins its section on the ‘Environment’: ‘This section achieved the most clear-cut answer of all. All but one respondent values the rural character of the village.’ Furthermore, under ‘Housing and Planning’, the results of the questionnaire showed that: ‘A large majority (337) of respondents believe that West Horsley should not be one of the village settlements identified for meeting new housing requirements’. With the background that nine sites in West Horsley had been suggested in the GDF process for possible development, ‘over half of respondents (180) consider that no area, either inside or outside the current settlement area, is appropriate for development of the village’. ‘Of the respondents who answered more than zero area as appropriate for development most believed that any development should have an emphasis on affordable and sheltered housing and be distributed over more than one site. There was little support for any development of commercial facilities’. ‘Confirming the majority opinion for zero area of development, almost exactly half of respondents (128) considered that West Horsley can currently accommodate no additional dwellings.’

The 2015 Emerging Neighbourhood Plan of West Horsley2 essentially confirmed these majority sentiments. Again evidenced by a comprehensive survey of residents for the Neighbourhood Plan itself, together with the results of research by West Horsley Parish Council and Surrey County Council, Policy 2 of the emerging Neighbourhood Plan is: “The emerging Neighbourhood Plan provisionally provides for the development of between 40 and 75 new homes within the area covered by West Horsley Parish Council, between 2016 and 2031”. This is consistent with Policy 1 which states: “We will ensure that the village maintains its rural and open style, architectural heritage and special atmosphere and character and we will resist the urbanisation of the village. Specifically we will protect, conserve and, where appropriate, improve: ? The designated Green Belt status ? Open spaces, parkland, green space, trees and hedges ? The open aspect and strategic natural spaces along East Lane, The Street, Ripley Lane, the A246 (Epsom Road), Long Reach and Ockham Road North, which reinforce the village’s rural nature”. In addition: “When asked about where new housing development should take place, only 3.4% suggested that the designated Green Belt should be considered.”

In stark contrast, the GBC Draft Local Plan entails the addition of 385 extra homes within West Horsley, an increase of approximately 35%; and the addition of 533 homes within East and West Horsley parishes together, most of it outside the current Settlement Area, and therefore in the current Green Belt. Over the whole of Guildford Borough the new plan proposes some 13,860 houses, of which almost two-thirds are on current Green Belt. The imbalance makes a mockery of the supposed Policy P2 (“Green Belt”) which states ‘We will continue to protect the Metropolitan Green Belt, as shown on the proposals map, against inappropriate development’. It is illuminating to contrast this revised statement with that in the previous policy #10 of the 2014 draft Local Plan; this stated: ‘We will continue to protect the Metropolitan Green Belt against inappropriate development in accordance with national planning policy to maintain its openness and open character’. A better paraphrase of the current version would be: GBC proposes to make use of the openness of the Green Belt for easier development now; in the future it may protect what is left of the Green Belt. This is despite the massive objections to the degree of Green Belt development proposed in 2014. For West Horsley the proposed development is entirely against the opinions expressed within the Parish Plan. The NPPF requirement to empower local people to shape their surroundings has been paid merely lip service by GBC. Although the old South East Plan3 has purportedly been abolished, a concatted crow of the Conservative Borough councillors in their manifesto when seeking election just a short time ago, it is apparent that the SE Plan’s designation of Guildford as a ‘centre for significant change’ still dominates the approaches of GBC. This blinkered, autocratic, patrician approach completely ignores the wishes of the local population. There appears to be a pride amongst GBC and many Borough Councillors that ignoring democratically-expressed wishes is somehow ‘strong governance’, and that this virility is laudable. Although it has issued manifold purported ‘consultation’ documents and ‘topic papers’ with colourful balloons all over their covers, GBC has patently ignored most of the critical comments that have been returned by residents: the council has taken not a jot of notice of popular petitions. That is not proper empowerment of local people. This is not ‘meaningful engagement and collaboration with neighbourhoods, local
organisations’ (NPPF 155); it has been collaboration with solely growth-minded businesses. How can key requirements of the NPPF be ignored in such a blatant fashion?

Pertinent here are the words from the Ministerial Foreword to the NPPF which encourages local participation in planning: ‘This should be a collective enterprise. Yet, in recent years, planning has tended to exclude, rather than to include, people and communities. In part, this has been a result of targets being imposed, and decisions taken, by bodies remote from them. Dismantling the unaccountable regional apparatus and introducing neighbourhood planning addresses this. In part, people have been put off from getting involved because planning policy itself has become so elaborate and forbidding – the preserve of specialists, rather than people in communities’.

If these words are to have any meaning in this context then local views on the benefits of local immigration should be taken into account in producing the SHMA and housing target. The specialists in Capita Real Estate themselves pronounce that their estimates of future housing ‘need’ are objective: they seem to be unaware that their approach is based on a particular viewpoint of how economic growth occurs, or how the balance between economic growth and other factors should be weighted. The predominance of Capita Real Estate in churning out these assessments, being the apparent market-leaders selected by Local Planning Authorities amongst contractors, is a dangerous concentration of national planning power in what is essentially a biased company with no interest in protecting the countryside, Green Belt or other. It is perhaps no coincidence, but also no consolation, that the scale of attack on the Green Belt envisaged in this draft Local Plan for Guildford Borough is not unique within the nation: the Campaign to Protect Rural England estimates that over 219,000 houses are now proposed to be built on Green Belt land across England. The original, inspired, far-sighted purposes of Green Belt, that has been, and is, valued by so many of past and present generations is rapidly being destroyed: if this trend continues future generations will not be able to value Green Belt because it will have disappeared, and their lives will be the worse for that. As with choice of Pegasus Group to perform the ‘Green Belt and Countryside Study’, another flawed document in the Guildford Borough ‘evidence’ base, every commercial, or ‘professional’, incentive, of Capita Real Estate is to promote development, as is easily ascertained from their website. People in communities can assess the migration trends that they want for their localities: these would be as objective, and no more subjective, than the development-biased view of Capita Real Estate specialists.

The increase in the number of homes (by past correlation almost exactly equivalent to increase in population) proposed for Guildford Borough in the draft Local Plan represents an increase of about 25% over the 17 years of its duration. This is equivalent to a compounding annual increase in homes of 1.32%. For those with short-sighted ambitions that may not sound much; but if such a rate of increase were to be maintained over future generations (a perspective that the NPPF insists upon when considering sustainability) then a simple calculation indicates that the Borough population would increase by nearly 40% in one generation (25 years) and almost double in 2 generations (50 years). It would increase by an order of magnitude (i.e. a factor of 10) in only 7 generations. Recall the definition of sustainable development: achieving growth while “ensuring that better lives for ourselves don’t mean worse lives for future generations”. There is no limit on the number of generations that is to be considered in this premise. Indeed, Councillor Paul Spooner professes in the Foreword to the draft Local Plan: “The borough of Guildford is a very special, beautiful place for all who live and work here. We want to keep it this way for generations to come.”, whilst endorsing development proposals that can only lead towards one outcome in less than a few generations at most: a dense urban sprawl interspersing just a few remnant open spaces. Before this draft plan can be submitted it is incumbent upon Guildford Borough Council to demonstrate, with hard evidence, just how the proposed Local Plan will ensure improvements to the lives of the majority of current residents, or indeed how a majority of future residents will have improved lives over those of current residents ‘for generations to come’. At face value the daily life of an average current resident will deteriorate as a direct result of the extra crowding that will ensue. If widespread improvements to daily life cannot be proven, the development cannot be considered ‘sustainable’ and the plan will therefore be contrary to the NPPF. The provision for all future generations mirrors that envisaged in the NPPF for the Green Belt: an essential characteristic of the Green Belt is its ‘permanence’ (NPPF, 79). Even the draft Local Plan makes this point in policy P2 (4.3.11): ‘The main aim of Green Belt is to prevent urban sprawl by keeping land permanently open’. GBC surely appreciate the meaning of ‘permanently’, which can only imply that they are deliberately ignoring this issue: one cannot keep land permanently open by locating 65% of new development on it.

Paragraph 159 from the National Planning Policy Framework requires the Strategic Housing Market Assessment to identify the housing that the local population is likely to need over the plan period which meets household and population projections, taking account of migration and demographic change. The problem for this task is that projection of migration is extremely uncertain at the moment. This is particularly important because, as noted by the report for GBC by Edge
Analytics in 2013, international migration has been a large proportion of population growth in Guildford Borough over the past decade, increasing over the past few years, especially since 2009. About half of the increase in population predicted for the SHMA regions is attributed to migration (paragraph 4.16; see also figure 9 of the previous draft SHMA). That the housing ‘need’ is indeed a very subjective quantity is clearly evident from the document ‘Guildford borough. How many new homes? Background paper, October 2013’. That document gave 11 estimates of housing ‘need’ for the borough, each based on different premises. Figure 18 of that report gives a summary plot of the estimates of yearly housing ‘requirements’ over the next 20 years, which makes 2 points crystal clear:

- The large spread in the distribution of estimates of annual ‘need’, and therefore how subjective the figure is. There is no ‘right’ housing number for the local plan as the Lead Member for Planning and Governance so naively thought at the time: estimates of ‘need’ will be a function of the respective priorities subjectively placed by individuals upon factors such as business development, staffing requirements, migration, adequacy of infrastructure, permanent sanctity of the Greenbelt, political considerations in Westminster etc.
- How large the GL Hearn / Capita Real Estate estimate of ‘need’ is compared with most of the others.

Given the subjectivity, it takes the biscuit that G.L.Hearn / Capita Real Estate specialists should have criticised the prior output of Edge Analytics specialists (section 4.7 and Table 12 of previous draft SHMA), who, in turn, themselves criticised the first draft produced by GBC specialist(s), adding into the mix the specialism that only the POPGROUP computer programme can provide. Is this not the perfect example of how planning has become the ‘preserve of specialists rather than local populace’?

Even Capita Real Estate's 2015 SHMA report itself considers sensitivities about its preference for the proposal of 517 dwellings per annum for Guildford Borough that range from 239 to 744, a ratio of 3:1. Such uncertainty in figures implies a very weak basis for calling circumstances sufficiently exceptional that the boundaries of the Green Belt must be altered.

Returning to the issue of migration, stated Government policy for the past 6 years has been to reduce national net immigration numbers down from ‘hundreds of thousands’ to ‘tens of thousands’. The new Secretary of State for Exiting the European Union, the Rt. Hon. David Davis, is also committed to modifying the principle of freedom of movement of people within the EU and so honouring a key persuasion of the majority of the national population that voted for ‘Leave’ in the recent referendum on whether the UK remains within the EU. A main reason why the ‘Leave’ result occurred from the referendum is because a majority of the indigenous population is exasperated with politicians pursuing policies that crowd increased numbers of people into their surroundings and result in a deterioration in their quality of life. A reduction in EU migration will surely result if a reduction in the free movement of EU citizens into the UK is negotiated in the near future: such an outcome is highly likely and therefore immigration is more likely to fall more than that projected by Capita Real Estate in future years. Estimates of the numbers of homes required for net immigrants in Guildford Borough should reflect the strong possibility of these migration reductions and be themselves correspondingly reduced: the assumption by Capita Real Estate of only a small decline in international immigration to the Borough must be a worst case scenario. A factor of 1/10 (say 10,000/100,000) in migration is more appropriate. Intuitively a policy of no net migration might be more widely supported by the local population, despite it being labelled ‘inappropriate’ according to the Capita Real Estate ‘specialists’. It is pertinent that net total migration into Guildford Borough is only predicted to be positive because of international migration: without foreign immigration, net migration into the Borough would be significantly negative (net internal migration efflux of 500 to 1000 persons per annum according to figure 15 of the SHMA). Such an efflux would approximately cancel the natural growth of the Borough's current population, leading to zero extra housing requirement.

Migration does not equate to housing ‘need’: by definition it is extra to indigenous need. Migration should be catered for in terms of housing plans only if that migration is generally and democratically seen to be of positive benefit to the local community, in both economic and social terms. The question of economic benefit from migration is a hotly contested subject. Although studies show that, initially, immigrant young working people make a positive contribution to the economy, over the longer term immigration is a net drain on the public purse (to the tune of £95 billion nationally over 1995-2011)4. Given a weak, possibly non-existent net benefit from inward migration, compared with the definite degradation of their environment and daily lives, it is a confident bet that most residents would opt for a lower quantity.

It is also quite uncertain that the large-scale immigration proposed in the draft plan will erase the differences in life expectancy that have identified between affluent and non-affluent areas in the Borough: such differences may indeed be exacerbated by the influx. Population growth, by itself, is no guarantor of increasing wealth per capita5. Capital- and
knowledge-intensive postindustrial societies sustain the highest growth rates: these are not necessarily associated with large population growth rates.

In other words the future ‘need’ for housing is anybody’s estimate; it is a very subjective entity, dependent upon the bias of the estimator: Capita Real Estate has erred on the high side given their predilection towards development. To predict and provide for such a large housing number could well be a self-fulfilling prophesy, but producing little benefit to, and more likely a negative effect on, the borough’s economy, let alone its social cohesion.

With the bullish estimates of net international immigration included in its initial demographic projections, Capita Real Estate predict a population increase of 15% for Guildford (21,179; SHMA table 13). But Capita Real Estate then further amplifies housing requirements (SHMA, 10:38, figure 63), such that housing would increase by 25% over the current number of homes in the Borough over the period of the plan. But, historically and generally, numbers of houses are tightly correlated to populations, so, contrary to the token logic, Guildford Borough population would grow by about the same 25%. Consider that the population of the whole UK is projected to grow by only ca. 11% over the same period (growth from 64m to 73m over the 25 years from 2013 to 2037, proportioned to a common 20 year time period). In other words Capita Real Estate are recommending that Guildford Borough cater for housing a population growth that is over twice as large as the national average! So a borough which provides some of the most beautiful scenery in the UK (certainly in the over-populated South-East), and which comprises 89% Green Belt on which the Government places great importance, is to take more than twice its share of the national population growth! This is perverse.

Key within that perversity are the factors that increase the annual extra housing requirement up from 517 to 693 (SHMA, 10:38, figure 63): Student Growth Impact (25); Improving Affordability (31); Supporting Economic Growth (120). The additive nature of these amendments is naïve, and did not the historical population growth include any student growth or support for economic growth? Will not the extra, extra population growth, from 15% to 25%, require even more houses to account for the factors of affordability and economic growth? Or will the affordability and economic growth be diluted by being spread across that extra, extra population growth? Guildford resident Lewis Carroll would have appreciated such logic, and the draft Local Plan might well be entitled “13,860 Alices Through the Looking Glass”. Building more houses to improve affordability is equally naïve. It is often stated that increased house building will lead to lower prices that will be more affordable by the local population: this is fallacious. The mechanisms of house prices are complex, but to a large extent they are governed by the availability of money for potential buyers; at the moment with very low interest rates, mortgages are cheap and prices have risen as a consequence. Such low interest rates are unlikely to continue for much longer. In addition, there is effectively an infinite market for housing in the borough given its current attractiveness and current national immigration numbers: build more houses, such that their prices drop infinitessimally, and more migration will occur to fill them and sustain the prices. The process is self-defeating and would lead to exponentially increasing housing numbers. Simon Jenkins wrote perceptively on these topics when the NPPF regime was first imposed. It is noteworthy and reprehensible that Capita Real Estate is not open about, nor gives proper justifications for, these hikes in housing numbers, even despite a Freedom of Information request.

Even more perverse, 65% of this inflated local growth is proposed by GBC to be located in the Green Belt, which implies that Green Belt growth in Guildford Borough will be far greater than 25%. West Horsley is proposed to be most severely affected, to suffer a 35% growth. Has anyone at GBC seriously considered the implications of that sort of expansion in a rural village: another 35% school places required; another 35% cars on the roads, constricted in many places by continual roadworks as the network attempts to cope; another 35% patients and medical staff at surgeries; another 35% passengers crowding onto already over-crowded trains; another 35% pressure on sensitive natural areas? Over the 20 years daily life being constantly disrupted by the development.

This is not sustainable. Already, as GBC themselves admit, ‘This growing population places pressure on our existing infrastructure and services like roads and schools. The demand for school places is high and access to amenities such as open spaces struggles to keep pace with Guildford borough’s popularity. Travel demand is concentrated in certain parts of the borough, creating high levels of congestion during peak times.’ These are factors that should have been included in the Sustainability Appraisal by AECOM Infrastructure & Environment UK Limited, rather than the restricted selection of 18 issues given in its paragraph 4.2. This firm is a subsidiary of AECOM, a worldwide group making money from development, whose headquarters are located in Los Angeles, USA, again hardly describable as local champions of empowerment for local people in accordance with the supposed spirit of the NPPF! Incidentally just how competent is AECOM Infrastructure & Environment UK Limited given that its accounts were overdue at Companies House on 18 July 2016 (the last day of public consultation)?
Furthermore, despite the proposed extra housing, there will almost inevitably be continuing shortages during this 20 years as the extra urbanization of the Green Belt will have a magnetic effect. It is naïve to imagine that a massive building programme of ‘mixed housing’ will bring down prices as a consequence. So, unless GBC learns a lesson, there is more likelihood of the pursuit of growth continuing and even acceleration beyond that period. Given how much extra development is proposed in this 2016 draft Local Plan compared with that of 2003, how long might it be before another revision of the plan is called for and further erosion of the Green Belt ensues?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2) I object to the refusal of GBC to take proper account of the Green Belt Despite more than 30,000 objections to the 2016 draft Local Plan, GBC persists with its policies of removing villages from the Green Belt (“insetting”) and with directing the majority (56.7%) of development to the Green Belt. The retained relaxation of planning constraints implied by removing villages from the Green Belt will lead sooner or later to infilling and the villages becoming small dense towns, thereby providing a self-perpetuating and accelerating pressure towards further expansive growth. Despite all the concern expressed about the damage that will be visited upon the Green Belt by the draft Local Plan, no revision has been made to the ‘Green Belt & Countryside Study’ commissioned from the development biased Pegasus Planning Group. Note that the 1.32% p.a. compound growth of housing in Guildford Borough, mainly in the Green Belt, envisaged in the draft Local Plan will lead to a doubling of the house numbers in the Borough within 2 generations, 50 years; and an increase by an order of magnitude (i.e. a factor of 10) in only 7 generations. Recall the original definition of sustainable development accompanying the NPPF: achieving growth while “ensuring that better lives for ourselves don’t mean worse lives for future generations”. There is no limit on the number of generations that is to be considered in this premise. The importance of the Green Belt[5], despite fine words, has been underplayed in this draft Plan: the lives of future generations will certainly be worse than ours if this draft Plan is enacted.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1) Revised figures for future population growth: I object to those produced by GL Hearn[1]

The GL Hearn Addendum report identifies a need for 12,426 homes in Guildford Borough between 2015-34, equivalent to 654 dwellings per annum. This is 17% above the starting point demographic projections.

So in 3 years GL Hearn has managed to change its ‘objectively based’ estimate of how many homes per annum are required for Guildford from 652 in 2014 to 693 in 2016 and back to 654 in 2017. And what has happened during that period to cause the changes in these superficially accurate estimates? Why, the UK has decided to exit the European Union with the intention of reducing freedom of movement and therefore inward migration. Goodness knows how much the Council taxpayers of the Borough have had to pay GL Hearn for the expertise which has gone into increasing over the 3 years the estimate by that extra 2 homes per annum, with a slight wobble in between.

But in truth the exercise is an expensive charade. There is no ‘objectivity’ in estimating future numbers. Estimates of future trends by individuals, or even individual organisations, are always subjective and consequently usually turn out to be wrong. In fact, it has been demonstrated in many different fields that the average values chosen by many different individuals or organisations, even inexpert ones, can outperform single expert opinions.

“Wisdom-of-the-crowds research[2] routinely attributes the superiority of crowd averages over individual judgments to the elimination of individual noise an explanation that assumes independence of the individual judgments from each other. Thus the crowd tends to make its best decisions if it is made up of diverse opinions and ideologies.”

No exercise of gauging crowd estimates of required homes has been officially organised, although over 30,000 objections to GBC’s 2016 draft Local Plan might have provided some evidence that it has estimated very much on the high side. Of course the charge of self-interested NIMBYism might be levied on those objections, so let us instead take as a source for multiple and heterogeneous estimates of housing requirements a document published by GBC itself, even though it was nearly 4 years ago: “How many new homes? A background paper” by GBC October 2013[3]. Although from one, let us charitably say unbiased, publisher it did at least use various different methodologies to estimate housing need. From the Executive Summary:

“The options look at the future need for homes between 2011 and 2031 from three different perspectives, official CLG projections, demographic trend based, job-led and dwelling-led data. We have used projections to generate these options, as they are the best available evidence” (my italics).

These 3 different approaches, each with multiple sub-options, led to estimates of housing requirements per annum of: (a) 704, 415-474; (b) 591-674, 181-226; (c) 358-426, 572-655, 464-540; (d) 312, 322, 1066.

In the above there are 17 estimates (taking the upper and lower limits of each range as separate estimates) of required homes per annum over 2011-2031. They range from 181 to 1066. The mean of the estimates is 507 and the median (as many estimates below as above) is 474. For a pictorial view of the numbers, below is a full distribution of estimates from ‘How many homes?’, also showing the estimates from GL Hearn of 2014, 2016 and 2017.

[Chart]

As an indication of how high is the latest GL Hearn addendum estimate of 654, it falls into the uppermost quartile of the normal distribution fitted to the 17 GBC estimates in ‘How many homes?’ And yet GBC prefer this higher number from the
development biased GL Hearn consultancy; possibly because those numbers are consistent with its own expansive development schemes? Of course the exercise of estimating the required number of homes cannot be treated in terms of just statistics, but neither should it just be relinquished to a single development-dependent organisation, however expert, in 3 closely spaced years; naturally that organisation would be expected to, and did, provide self-consistent numbers in order not to ‘save face’, even despite contra-indications from many other people and organisations. For particular example, the consultant commissioned by West Horsley Parish Council, Neil McDonald, possessing equal, if not greater, expertise than GL Hearn, has examined[4] the latter’s addendum figures and also found that they overstate the future trends in Guildford population. In particular he states:

“It seems probable that the under-recording of out migration has continued after 2011. This has major implications. In particular, the ONS’s 2015 population estimate for Guildford may over-estimate the district’s population and DCLG’s 2014-based population projection may overstate the likely increase in housing by a substantial margin. An alternative calculation making plausible adjustments to the estimated outflows in the period 2001-15 would reduce the demographically-based estimate of the number of homes needed from 558 homes a year 2015-34 to 404.”

International immigration comprises a key component of the population changes in Guildford. In 2014/15 it was almost exactly 2/3. It is noteworthy that GL Hearn are content to consider that the effect of Brexit on reducing immigration to Guildford Borough is already subsumed within the ONS projections of future population growth.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:  Letter of objection.pdf (212 KB)
I am in total support of this policy A21.

Please, please keep the Aldershot Road allotment site for ALLOTMENTS, and ALLOTMENTS ONLY - NOT HOUSES.

We are losing all the green areas in the North West side of Guildford as opposed to other parts of the town. Houses are being shoe horned everywhere we look. Allotments are the very few areas of green land that we have in the GU3 area.

Allotments are increasingly popular, as can be seen by the waiting lists. Allotments not only give fresh air and exercise to those who don't have gardens, but a seasonal supply of fresh produce, organic and with no carbon footprint. The children at St Joseph's school have one and thoroughly enjoy their days out there.

The allotments attract all sorts of wildlife too, we have a bee keeper with 4 hives, and as we all know, bees are on the decline in this country and we need to encourage them.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I, the undersigned am in complete objection to the land at Blackwell Farm being built upon as part of the Guildford Plan. I have a young family, and we regularly go to walk and play in the land and woods adjacent to the Research Park and we enjoy the skylarks singing and the views where all but the cathedral tower is blocked by the mature woodland.

We are dismayed that this proposal is still on the Guildford plan and ask for it to be rejected on the following grounds.

**True boundaries of Area Outstanding Natural Beauty**

To build on Blackwell Farm and the Hogs Back would blight the views of the wonderful Surrey landscape for miles and miles. The building of this University campus would be in complete contradiction to the Area Outstanding Natural Beauty it is a part of.

This also includes the land up to the current Research Park boundary, as if these are built upon, this will be seen from the Hogs Back and ruin the views from the top. And therefore undermine the designation as an AONB.

Surrey University's proposal to build properties to high environmental standards that would be sympathetic to the locality is completely unachievable, as any building on that land would be to the detriment of the AONB.

There is already a recycling centre on the southern side of the Hogs Back which is an eye-sore and can be seen from the ridge, surely Surrey County Council is not going to do the same on the northern face of the ridge.

All of the land earmarked is either an Area of Outstanding Natural Beauty, Area of Great Landscape Value or Greenbelt and should be protected by law.

**Building on Greenbelt**

Originally defined to stop Urban sprawl, I feel that it is illegal and immoral to keep changing the boundaries of the Greenbelt, and this area should remain Greenbelt so that there is a clear rural area between developments.

**Risk of flooding to local area**

The Hogs Back, one of the highest points in the area, naturally drains onto Blackwell Farm, this then drains in to Park Barn. Currently there is insufficient waste water infrastructure for this site.

This is a huge concern to us as if our house were ever flooded it would affect our insurance premiums and make our house price fall considerably.

**Surrey University's poor use of the land that they have already developed**

A brief walk through the Research Park, or University Campus will soon show you that the University does not build things to high environmental standards, and instead build things that are noisy and do not fit in with their locality.
To allow a further 10 – 11ha extension to the Research Park when they have made such poor use of the land they have already built upon would be a poor decision by planners.

Their history so far does not show any evidence that they will make any environmental considerations, it will purely be financial.

**Proposed railway station**

This will be to the detriment of the local residents in Park Barn despite what the Local plan says. Firstly due to the added noise and light pollution, which is already bad enough as we have students for the University and hospital staff parking on the estate, it cannot take much more of this.

It is also proposed that it will serve existing housing developments. This is unnecessary as there are two extremely good bus routes for any prospective residents.

**Traffic**

To build the road that will provide access to the proposed development on an already busy junction of the A3 and A31 is ludicrous. The junction for the new road will also be on the ridge of the Hogs Back, therefore visible for miles around and a blight throughout the area.

To provide access from Gill Avenue will only add to the traffic on the west of Guildford around Park Barn, the Hospital and Research Park, yet the Research Park already has a large number of cars with more traffic to and from work. It will be purely for the Research Park, and if they were prepared to use public transport already, there is sufficient.

**Services**

There are already not enough school places on the proposed development side of Guildford, short-sighted planning by previous councils.

**Pollution**

I have already mentioned the noise and light pollution that comes from the Research Park, added to the additional light and noise pollution from the proposed development, this again would be to the detriment of the current AONB.

**Wildlife Habitat**

The land proposed to be built upon has a huge selection of natural flora and fauna: nesting skylarks, deer, kites, ancient woodland, nightjar, orchids, to name a few.

**Ancient Roman Road and Settlement**

The land to the rear of the Research Park has huge historic value, and is a scheduled ancient monument, this area should not be developed.
Unable to afford rural house prices

We chose our house because although it is in a town, it is right next to an area of natural beauty, and fields that you can walk through.

Green spaces

We do not believe that the University will provide enough green spaces - certainly how could they provide such long vistas as are already enjoyed by houses nearer the railway line, and those which the premium could be charged for will be in the higher locations.

True green spaces, and not manufactured ones are vitally important for the emotional and physical health of people. Anything that was on that site would destroy the open vista.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We have been looking at the latest version of the Local Plan issued on 6 June 2016 in relation to the fields behind Shalford Village Hall and are very concerned as it could adversely affect the Bowling Club, which is somewhat unique in Surrey because of its artificial playing area. The Plan removes the fields from the Green Belt and puts them in the Shalford Settlement Boundary. This appears to remove the current long established Green Belt protection these fields have and would encourage the developer who has an option on the land to submit housing development proposals with access from Chinthurst Lane.

It is noted that the Plan does reserve these fields for "Open Space" but we have been advised that the wording on the Shalford plan is not clear and in any event is not as strong as its current Green Belt status so it could be open to challenge. It is understood that the Borough Council shares the local community’s view that the fields should not be developed and as we see it, this would be best met by retaining this land in the Green Belt with its additional AGLV protection.

The Bowling club was established in 1999 when the area was developed and the bowling green, two additional tennis courts and the smaller hall were added. The bowling green itself is unusual in that it is built and played on artificial turf. This enables bowling to continue throughout the winter which of course is not possible on natural grass greens and is very popular with members coming from all parts of Surrey to enjoy it. These fields rise up 32 feet from Kings Road and are over 25 feet above the Village Hall. Any development would be clearly seen from the Village Common and could dominate the bowling green and tennis courts and would take away the lovely open backdrop to the playing area which the players fully appreciate as do each year the many hundreds of users and visitors to the Village Hall.

The gift by the late E. C. Wigan in 1962 of the land for the main Village Hall building was made for the use of the inhabitants of Shalford and the neighbourhood "for use for meetings ...... and other forms of recreation and leisure-time occupations with the object of improving the conditions of life for the said inhabitants". The Village Hall site and the open space around it has been known and loved by many residents for over 50 years. The facilities offered in the Halls, the tennis courts, the bowling green and open space are a significant amenity value and are important in providing an attractive...
setting for the village. There is a real possibility that the recreational facilities could be expanded in the future: for example adding more tennis courts. We are very anxious to keep these options open and retain the site benefits for future generations.

In summary the proposed Green Belt boundary is in the wrong place by enclosing these fields on the edge of the village within the built up area of Shalford. Only a small adjustment to the 2003 boundary plan is necessary to reflect the 1999 development behind the Village Hall and thus keep its Green Belt status. Your full and sympathetic consideration to this objection will be appreciated by all users of the Village Hall.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to the proposed Local Plan

My strongest objection is the loss of the Green Belt in general and the removal of East and West Horsley villages in particular. I greatly admired the foresight which brought about the Green Belt at a time remember when much within it was green with gardens, parks, school playing fields even farms. Nowadays much of that inner green has been built over. Pollution in London and its adverse effect on children is a fact. The Green Belt provides the lungs of London and must be preserved.

Far too many houses are proposed for the Horsleys.

The Local Plan does not adequately provide associated infrastructure as indeed much needed present improvements let alone new for this area.

Councillors must not be influenced by developers offering for example "a school extension if you grant huge house development near by. Each planning application should stand or fail on its own merit. Do not fail those you represent. Bring genuine foresight and our concerns forward.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to:

a) the extension of the settlement boundaries of the Horselys into GreenBelt;
b) the removal of extended village areas from Green Belt;
c) the original and remaining proposed large developments in Green Belt land, most especially that for the former Wisley Air Field.

The Green Belt was created to provide the lungs of London and to safeguard near by villages forests and farmland. Such green spaces are needed more than ever today. This generation must not thwart that important principle to line the pockets of developers. Heed these of all other objections and safeguard greenery.

P.s You are there to represent our view so please do so.

Attached documents:

---

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write to object most strongly to the inclusion of the Wisley Airfield in the local plan. We must protect our green belt and exclude this site from the draft local plan without delay. I have written previously to object, our country lanes cannot hold the considerable amount of traffic that would need to be accommodated, the A3 junctions would be even more clogged up than usual at rush hour, air pollution would suffer, the site is unsuitable for a housing development and would spoil the green belt and the protected area and its environs. The potential schools are not needed here. We are served by excellent schools already. This is the wrong area to consider. There are many other sites that could and indeed should be considered. Please start afresh. Take a step back and consider how detrimental this would be to our landscape. Why build on this agricultural land which should be retained as such, as was the original historical intention. There are sites off the M25 that could be considered, and outside Guildford, where much of the housing could be contained.

Please consider carefully all the objections you will receive from residents of this picturesque hamlet of Ockham - don't spoil our countryside in this way. Expand elsewhere but not here at Wisley - green open space enjoyed by so many is becoming a rarity. Conserve and preserve our green belt as was intended.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the proposed alteration of the Shalford Green Belt and Settlement Boundaries. They appear to be the simplistic drawing of straight lines for no apparent reason other than the cutting of corners and the saving of the draughtsman's ink. There are three areas of considerable concern to me.

1. The small triangle area of Chinthurst Lane, opposite Granary Cottage, lying within the Site of Nature Conservation Interest. It is Common Land (except the actual Highway); it cannot be built upon, so is not "ripe for development". There is therefore no need to exclude it from the Green Belt or bring it within the Settlement Boundary.

1. The area of land, currently Open Space, to the rear of the Village Hall complex but accessed from Chinthurst Lane. This is the highest ground in Shalford Village. If it is excluded from the Green Belt status which it currently enjoys, it will immediately become the subject of planning applications for development. Any house or houses will completely dominate the skyline when viewed from nearly anywhere within the village. Any house(s) built on this land would completely overlook all the surrounding houses and it would not be possible to screen them. The access from such dwelling(s) would have to be onto Chinthurst Lane, a narrow road without footways for much of its length and a "rat-run" for rush hour traffic trying to avoid Rices Corner or Bramley and the queues to the Shalford Roundabout.

The Council makes much of the need for affordable housing. No potential developer of this site will be prepared to provide such housing. The area is not big enough to build for profit and to provide houses in sufficient number which are small enough to be "affordable" and the density would be out of keeping with the area.

1. The triangle of land behind Christmas Hill. This is totally land locked, accessible only from adjoining property, a footpath or Common Land. It is quite unnecessary to bring that corner within the Settlement Boundary and exclude it from the Green Belt. It creates the suspicion that the Council has a hidden agenda for this area. Much is made of the need for transparency. The Council should make the reasons for this inclusion clear.

All this land falls within the Area of Great Landscape Value for which there is a current proposal for its inclusion within the existing adjoining Area of Outstanding Natural Beauty. The Council has backed this proposal so it is contrary to the Council's own policy to now seek to exclude these areas from that proposal.

I strongly believe that these areas should be protected from development.

It is essential that Shalford remains WITHIN the Green Belt. It is so close to Guildford that removal of Green Belt status would mean the rapid progress toward a joined-up conurbation when a buffer is really what is needed.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the proposal to retain, and increase, the number of houses to be built at Keen’s Lane. (Policy A22 Land to the North of Keens Lane)

Responses on previous submissions have been ignored and in fact the number of dwellings has been increased from 140 to 150.

• This will increase traffic congestion on the surrounding routes, which are already congested.
• It will add to traffic problems around exits on to Keens Lane, which is unsuitable for more than minor use by vehicles.
• It will put the protected area at Whitmoor Common under increased footfall pressure.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

• disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
• directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule
This Local Plan appears to be very similar to the last one with a little tinkering to the detriment of most residents in the area. I think the bullying tactic of “if we don’t put in for sufficient building the Government will demand the Council does more” is not the way for the Council to work with local residents.

I object to the proposed Local Plan:

1. I cannot understand how anyone can expect residents to agree with a plan that is only half written. How can you suggest the building of hundreds of properties without detailed mention of the infrastructure. The infrastructure in East Horsley is already under great stress – full roads, full schools, full medical centre, full car parks and poor water supply and drainage. Main roads are not the total infrastructure of the community.

I OBJECT because of the lack of “total” infrastructure.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Shortly before this Local Plan was published Guildford Borough Council totally rejected the application to redevelopment Wisley Airfield, yet here it is again. The current proposal would destroy the village of Ockham. In effect the proposal is for a New Town with houses and blocks of flats packed close together on a density scale more appropriate to an inner London borough and the site is largely Green Belt.

I OBJECT to the intense use of this largely Green Belt land for housing units.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. How can the Council remove Green Belt protection from villages and then expand the villages’ settlement boundaries whilst at the same time stating “We will continue to protect the Metropolitan Green Belt”. How much more contradictory can these two statements be? And where is the “exceptional circumstances” to build new houses on the Green Belt?

I OBJECT to the destruction of the Green Belt without evidence of need.

Answer (if comment is on questions 1-7 of the questionnaire): ()
The idea of a new township on Wisley Airfield was, and continues to be a very bad idea. GBC has already objected to a planning application for the Wisley site and presented fourteen reasons to justify its position, yet keeps it in the Local Plan as a “policy site”!

The developers have presented what they call “minor” alterations to the original plan – I would query the use of the word “minor”.

I still **OBJECT** to the continued inclusion of the Wisley Airfield site in the revised Local Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I refer to the draft local plan.

I object to the inclusion of policy A35, Three Farms Meadow for the reasons below:-

1. The much heralded bus service from the site to Horsley would be a major hazard to other road users as the lanes are not wide enough. I object to the scheme because it is both unsuitable and dangerous.
2. There would be minimal employment on site so almost all residents would have to travel to work by road. I object to the inevitable increase in traffic and fear for the lives of those who chose to cycle on narrow unlit country lanes.
3. The site would generate increased traffic at the A3/M25 junction which is already heavily congested. I object to the further overloading on this road system and the resulting additional pollution.
4. I object to further "grabbing" of green belt land.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Before any proposals to new housing schemes are considered, the infrastructure, particularly in East & West Horsley, needs a vast amount of development – schools, doctors’ surgeries, supply of water and drainage, roads, railway car parks.

I OBJECT to new/revised proposals in the Horsleys until the infrastructure has been improved hugely.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The proposed increase of 22% in housing stock in the Borough bears no relation to the ONS population growth projections. I would suggest that the Consultants have misused the official data and the result is an unfair burden on those areas that are targeted to absorb such additional housing.

I OBJECT to these housing targets.

Answer (if comment is on questions 1-7 of the questionnaire): ()

If this Policy is adopted provision should be made at the developer's expense for improved public right of way crossing of the A31 so that those walkers denied access to the Blackwell Farm site are able more easily to access the south side of the Hog's Back. At present one has to take ones life in one hands every time one tries to cross it on foot.

Do you consider this section of the document; complies with the Duty to Cooperate? (No), is Sound? (No), is Legally Compliant? (No)

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to OBJECT in the strongest possible terms to the inclusion of Policy/Site A46 in the Local Plan, on the following grounds:

Site A46 would fill in the whole area between the two settlements of Normandy and Flexford and would completely destroy the nature of our community (it would deliver an increase of 175% in the population over the Plan period). The claim that it would achieve greater sustainability is spurious.

There is no legal basis for claiming that housing is needed to build a school and that this constitutes the “exceptional circumstances” required to remove land from the Green Belt in advance of development.

The need for a 7/8FE secondary school on this site has not been established.

Even if the need for an additional 7/8FE secondary school were established, GBC has not demonstrated why development needs to take place on this sensitive Green Belt site as opposed to other alternative sites around the Borough.

There has been no proper assessment of the impact on the local transport and other infrastructure of such a huge development.

The site is less than 1 km away from the Thames Basin Heaths Special Protection Area (TBHSPA), where development should be restricted.

This site was not allocated for development in the previous version of the Local Plan and should not therefore have been included in this one.

I develop these arguments further below:

1. **Site A46 would fill in the whole area between the two settlements of Normandy and Flexford and would completely destroy the nature of our community (it would deliver an increase of 175% in the population over the Plan period). The claim that it would achieve greater sustainability is spurious.** No evidence has been sought/obtained by GBC to justify the assertion that the designation of Normandy/Flexford as a ‘strategic site’ “achieves greater sustainability for the village”. This is an unsubstantiated statement that is not underpinned by any research. The residents have made their views very clear at two public meetings organised by the Normandy Action Group and subsequently by Normandy Parish Council: they do not want the infilling of the open space between their two settlements under the development proposals for Policy/Site A46.

   Part of the rationale for this proposal was an argument in a ‘Green Belt and Countryside Study’ (GBCS) commissioned by GBC that the openness of the land between Normandy and Flexford did not make a sufficiently “important contribution to the openness of the Green Belt” to warrant its needing to remain in the Green Belt as per the National Planning Policy Framework (NPPF), para 86. This is complete nonsense. It assumes that these opportunities only present themselves to people who drive cars along the roads, as opposed to those who walk the public footpaths – in this case the one between Westwood Lane and Glaziers Lane that traverses one of the most rural landscapes in this part of the Borough, with a rich natural flora and fauna that most certainly does contribute to the openness of the Green Belt as per para 86 of the NPPF. It is also ludicrous to claim that the vista from Westwood Lane – or indeed looking down on the area from the Surrey Hills AONB on the Hog’s Back – would not be adversely affected by the construction of an estate of over 1000 new houses. Unsurprisingly, in the public consultation this proposition was heavily contested by local residents, among the other objections they made to the GBC proposals. However it has simply been ignored by GBC in this latest version of the Plan.
2. Closer examination of the GBCS and the Guildford Borough Settlement Hierarchy reveals that Normandy and Flexford are treated as separate settlements for the purposes of Green Belt ‘sensitivity’ but as one settlement for the purposes of ‘sustainability’. This double standard denies the openness of the 85 hectares of land between the two settlements, and the important contribution it makes to the openness of the Green Belt. The proposed merging of Normandy and Flexford is inconsistent with one of the five purposes of the Green Belt (NPPF para 80), namely, to prevent neighbouring towns from merging with each other. Normandy and Flexford may only be villages, rather than towns, but the spirit of the NPPF is clear, and it has been ignored in this case.

3. **There is no legal basis for claiming that housing is needed to build a school and that this constitutes the “exceptional circumstances” required to remove land from the Green Belt in advance of development.** In February 2016 the leader of GBC, Councillor Paul Spooner, and other GBC Councillors told a public meeting organised by Normandy Parish Council (NPC) that further work on the GBCS had established that the Normandy/Flexford site was at the highest level of sensitivity in terms of Green Belt protection, thereby giving the impression that it was safe from development. However Cllr Spooner also warned that if a proposal came forward to build a secondary school on the site that would “trump” its Green Belt sensitivity. It subsequently transpired that since at least the summer of 2014 GBC had been in discussions with a major developer, Taylor Wimpey, who had obtained an option on a large part of the site, and was offering to make part of it available for the construction of a 7/8FE secondary school. Cllr Spooner has justified the over-riding of the sensitivity criterion in the following terms:

“This is because it is considered an enabling development to fund a much needed secondary school in the West of Guildford and also achieves greater sustainability for the village”[1].”

1. However, the argument that it is an “enabling development” is circular as the claim that the school is needed rests on the argument for building additional houses on this and other sites, but the houses on this site can only be built if the school is allowed to be built. So it amounts to putting up houses to justify a school that would not be needed if the houses were not built.

2. **The need for a 7/8FE school on this site has not been established.** Responses to FoI requests from Surrey County Council disclose that there is no evidence that a 7/8FE secondary school is needed in the west of the borough. It is predicated on increased housing to be provided as part of the Plan in Ash and the Blackwell Farm site to the west of Guildford, as well as the Normandy/Flexford development. The latter alone would only justify a single form entry school, i.e. an insufficient number to justify a new school and one that could be met by utilising capacity in existing schools (as established by Surrey County Councillor for Normandy Keith Witham’s enquiries of local head teachers).

1. **Even if the need for an additional 7/8FE secondary school were established, GBC has not demonstrated why development needs to take place on this sensitive Green Belt site as opposed to other alternative sites around the Borough.** Other sites have been excluded on the basis that they lie in “sensitive red Green Belt land” (‘Secondary Schools Discounted Sites, pp 576-580 of the Plan document); exactly the same consideration applies to this site. In other words I wish to challenge SCC/GBC as to the robustness of the decision-making process that has led them to eliminate other potential sites for a secondary school in West Guildford, and in particular I would ask why the one in Normandy suddenly appeared in early 2016 given that SCC’s ‘School Organisation Plan’ of December 2015 contains no reference to the need for additional places in the west of the borough.

2. **There has been no proper assessment of the impact on the local transport and other infrastructure of such a huge development.** The road network in particular, but also the drainage and sewerage system, are already under severe pressure. The site for the proposed development is bounded by a C road and a D road, both of which include dangerous narrow bridges over and under the railway (one single lane traffic and one a blind summit) and both of which exit onto the A323 at one end and the A31, Hog’s Back, at the other. The A323 itself is, at rush hour, already congested and is identified in GBC’s OGiSTAR (Options Growth Scenarios Transport Assessment Report) study as being at full capacity already and the access up Wanborough Hill to the Hog’s Back is also a major bottleneck. It is very hard to see how this fragile transport infrastructure could support the additional 1,650 cars that would accompany the 1100 homes in GBC’s proposal, let alone the massive disruption from construction traffic over a period of years that such an enormous building project would entail.

3. **The site is less than 1 km away from the Thames Basin Heaths Special Protection Area (TBHSPA), where development should be restricted.** GBC has failed to take into account that the specific policies in the National Planning Policy Framework (para 14, especially footnote 9, and para 119 – with reference to the Birds and Habitats Directives) indicate that a development of this scale, in such proximity to the TBHSPA, should be...
restricted. In addition development of this scale on this site will cause untold damage to the rich flora and fauna, as detailed by the submission from the Friends of Normandy Wildlife. This summer my garden has seen young foxes, young deer, young Tawny Owls, hedgehogs, bats, and numerous species of bird. Two years ago it was visited by a raptor that on the basis of video footage provided by me led the RSPB to conclude: “So on balance, I think it could be a goshawk, which would be a fantastic sighting in a garden.” This bio-diversity will be irreparably damaged by a development that builds over the precious fields and woodland on the adjacent site, A46.

4. **This site was not allocated for development in the previous version of the Local Plan and should not therefore have been included in this one.** Site A46 has not been the subject of a Regulation 18 consultation. It is an entirely developer-led proposal that is driven by commercial considerations rather than the needs of the local community.

I believe that all these questions reveal fundamental weaknesses in GBC’s “Submission Local Plan” as far as Normandy is concerned. I fail to understand how removing valuable agricultural land and woodland from the Green Belt can be justified by the subjective and erroneous judgments about openness that the GBCS reveals, and how a developer-led proposal to make land available for a school in return for being allowed to build 1100 houses can be consistent with the principles of the NPPF, let alone be legally compliant.

At its Extraordinary Meeting on 24 May, and as a result of representations made by Normandy and Flexford residents to Councillors prior to the meeting, Guildford Borough Council approved the ‘Submission Local Plan’ for public consultation, subject to the following proviso:

*As strategic site allocation A46, Land to the south of Normandy and north of Flexford, is a land parcel coloured red on the Green Belt sensitivity map and is only included as a strategic site to support the provision of a new secondary school, this strategic site allocation be deleted should it be demonstrated that provision of such a school within this site is not required.*

The Leader of the Council maintained that SCC had before the meeting reaffirmed the need for a school in the west of the Borough, although it transpired that this was purely on the basis of “informal consultations”. FoI requests of SCC[2] (see point 2, above) have disclosed that:

> “Without taking into account any additional housing created by the Guildford Local Plan, there are no proposals for a new secondary school in the area west of Guildford, therefore no such considerations have taken place.”

In other words, a new strategic site, A46, which had not featured as such in the Regulation 18 consultation, was included in the Submission Local Plan as a purely developer-led initiative and on the basis of nothing more than informal consultations about the likely future requirement for secondary school places. This is an extraordinarily casual approach to planning and given the damage to the Green Belt that would follow I find it quite shocking that it forms part of the Plan. I repeat my OBJECTION in the strongest possible terms to the inclusion of this site.

---

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A47
Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to OBJECT to the inclusion of Policy/Site A47 in the Local Plan, on the grounds that it forms part of an SNCI and is not appropriate for housing development; also that it would exacerbate existing flooding problems in the area, and that the local roads infrastructure is insufficient to support this level of housing.

This site lies within a 'Water Vole Alert Area'. It is astonishing that it can be proposed for development, given the damaging effect on biodiversity this would entail.

The site is regularly flooded; if it is built over it can only contribute to increased flooding in the surrounding area, notably at Wanborough Station, which is regularly inaccessible after heavy rain. I find it almost inconceivable that anyone could think it is an appropriate site upon which to build 50 houses.

Access to the site is via a narrow bridge over a stream running from the Hogs Back; this is completely unsuitable for the additional traffic that 50 houses would create, let alone the construction traffic that would accompany the development. Immediately after the bridge is a sharp left hand turn that would be almost impossible to negotiate for a low loader carrying the plant that would be needed for the construction works.

This is a poorly chosen site, not at all within the spirit of the NPPF.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the fact that so much housing development is included in the Local Plan with so little realistic appreciation of the strain this will place on the transport and other infrastructure and so little evidence of advance planning. Reassurances from the Lead Councillor for Infrastructure that all this will be taken care of at the detailed planning stage are not adequate; it is irresponsible to base a Local Plan on infrastructure improvement that may or may not be forthcoming - especially when this entails taking land out of the Green Belt. The Leader of the Council has said he will not support the housing numbers in the latest draft of the Plan without the infrastructure improvements, but how can we have faith in future promises from third parties about the infrastructure that may or may not be delivered?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I OBJECT to the fact that, while this Policy claims "Permission will not be granted for proposals that are likely to materially harm the nature conservation interests of local sites unless clear justification is provided that the need for development clearly outweighs the impact on biodiversity", this is manifestly contradicted by other Policies, in particular the inclusion in the Plan of Policy/Site A46. If this site is developed as per the Plan, i.e. if 1100 new houses are built on it, it will completely destroy a precious wildlife habitat that is home to an extraordinary variety of flora and fauna, as evidenced by the separate submission from the Friends of Normandy Wildlife. And all this on the spurious grounds that building 1100 houses 'enables' the development of a new secondary school, the need for which has not been established. The same comments apply to the proposed Policy/Site A47, which is a SNCI - how can anyone justify building 50 houses on such a site? Thus this Policy clearly is not strong enough to achieve the objectives it sets itself.

Comment ID:  PSLPP16/1542  Respondent: 8687041 / Michael Aaronson  Agent:
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the cavalier approach to Green Belt protection revealed by this Policy. It flies in the face of manifesto commitments made when this Council was elected. The insetting of 14 villages from the Green Belt, the proposal to allow infilling within a further 12 villages within the Green Belt, plus the proposed extensions to the settlement boundaries of 11 more villages - allowing even more infilling there - will amount to a gradual erosion of the Green Belt and a degradation over time of the character of the villages concerned. The Green Belt makes a vital contribution to our well-being and deserves stronger protection. The villages are an essential part of it.

Specifically with regard to Normandy and Flexford, the settlement boundary proposals will need to be revisited when Policy A46 is withdrawn from the Plan (see separate submission) and if there is to be any change to the existing boundaries that will need to be the subject of further public consultation, as it is not possible to see from the existing proposals where they would lie in the absence of Site A46.

<td>I OBJECT not to the need to have robust flood protection measures but to the naive way they are applied in this Local Plan. Reading the descriptions of the flood risk at sites of which I have close acquaintance I wonder whether the planners have ever actually visited them. For example, the descriptions relating to Policies/Sites A46 and A47 bear no relation to the lived experience of wading through water in the car park to catch a train at Wanborough Station, or squelching along the footpath that runs through Site A47, or getting bogged down in the heavy clay that underlies most of Site A46. This Policy reveals wishful thinking on a grand scale.</td>

<td>I OBJECT to the irresponsible application of the SANG concept in this Policy and in the Plan as a whole. Allowing developers to claim that taking over previously productive farmland or ecologically valuable woodland and calling it SANG justifies building on nearby green field sites is a travesty of what the SANG concept is intended to achieve. The net result is a degradation of the existing environment without any meaningful mitigation of the risk to the THBSPA, as increased numbers of dog walkers and others will prefer to use the latter rather than an artificially constructed so-called 'suitable alternative'. This really is a shockingly cynical approach.</td>

<td>Although this follows the wording of the NPPF the Policy has to be set in the local context and be based on an honest understanding of what &quot;sustainable&quot; means. The Plan document takes a very narrow view of 'sustainability', appearing to equate it with housing development being near to a transportation link, without any consideration of the environmental aspects of 'sustainability'; a sustainable community is one with good community cohesion and spirit, based not least on an aesthetically agreeable environment that people want to live in. I OBJECT to the way the Plan treats the issue of 'sustainability' and uses it to justify placing the majority of new housing development in the Green Belt.</td>

The Strategic Housing Market Assessment (SHMA) is deeply flawed, as has been demonstrated by two separate authoritative studies: Councillor David Reeve's analysis published in July 2016 and the independent NMSS report commissioned by the Guildford Residents Association of June 2016. In turn this invalidates the statement of Objectively Assessed Need (OAN) and negates the basis on which so much development is proposed in the Local Plan. I OBJECT to the entire Local Plan's being predicated on a housing number that rests on a flawed methodology. I also OBJECT to the fact that constraints have not been applied to the OAN to arrive at a more rational housing number. I believe the number in the Plan to be grossly inflated as a result and not a sound basis for planning, especially as using this number has such devastating consequences for the Green Belt.

*Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )*

*Answer (if comment is on questions 1-7 of the questionnaire): (No)*

With reference to Site A46 I OBJECT to the fact that in the Section 18 consultation this site was not indicated for development as part of this Local Plan. I therefore do not believe it is legally compliant that it features as such in this Section 19 consultation. Furthermore the Council has not demonstrated that there are "exceptional circumstances" that would justify removing this land from the Green Belt; it has been claimed that it is an "enabling development" to allow the construction of a secondary school but there is no legal basis for this. I therefore OBJECT to the inclusion of this site as part of the Local Plan.

*Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )*

*Answer (if comment is on questions 1-7 of the questionnaire): (No)*

The Plan is unsound because it is not based on objectively assessed development and infrastructure requirements. The housing need is exaggerated (see answer to question 1) and the infrastructure requirements have not been adequately assessed. For example, with regard to Policy/Site A46, it is inconceivable that the local road infrastructure could be improved to an extent sufficient to bear the weight of the additional number of houses proposed; bland assurances that these matters will be addressed at the planning permission stage are simply inadequate. To remove land from the Green Belt is a significant step and should be based on sound, evidence-based requirements.

*What changes (2016)/further amendments (2017) do you suggest should be made to the document?*
Belt against a purely hypothetical, not to say fantastical, infrastructure plan is extremely dangerous and irresponsible. I therefore OBJECT to the Plan on the grounds that it is unsound.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

The Plan fails to take into account the very significant impact of the housing development taking place to the West of the Borough, in Rushmoor (especially in Aldershot). This will have a significant impact on the transport infrastructure in the area, which is already at near full capacity. There is no indication in the Plan that the housing development proposals, especially Policy/Site A46 in Normandy/Flexford - which would themselves add a huge extra burden to the same infrastructure - have taken this into account. I therefore OBJECT to the Plan on the basis that there is evidence of a lack of planning co-operation across this local authority boundary.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to the proposal to 'inset' the three settlement areas of Normandy, Flexford, and Wyke/Walden Cottages as shown on the "Normandy and Flexford" maps. Previously these areas formed part of a much larger project (Policy/Site A46) to remove a huge part of Normandy Ward from the Green Belt. Although the withdrawal of the latter development is welcome I object to the insetting of these settlement areas along with the other proposed areas to be inset, on the following grounds. First, no case has been made for the 'exceptional circumstances' that are required to remove land from the Green Belt. If this happens it will become much easier in future for developers to make the case for further development in areas adjacent to the 'inset' areas and we will lose our Green Belt by attrition. Second, as recent Planning Inspector judgments have confirmed, the settlements of Normandy and Flexford make an important contribution to the 'openness' of the Green Belt which would be put at risk were they to be 'inset'. They should therefore remain 'washed over' by the Green Belt as at present.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I strongly support the removal of Policy/Site A46 from the Plan. This was always a purely developer-led proposal that would have permanently destroyed the character of the Normandy/Flexford community. It was “the only site in the 2016 Proposed Submission Plan set to result in the loss of a significant area of ‘red-rated’ Green Belt.” (Sustainability Assessment 2017, para 10.11.15) and was strongly opposed by local residents, as was seen in the responses to the 2016 consultation. It was justified by the offer from the developer to provide land for a secondary school, the need for which was never conclusively established. The area makes a significant contribution to the openness of the Green Belt, and its development would have resulted in the coalescence of Normandy and Flexford in contradiction of the declared purposes of the Green Belt. Development on this site would also have involved the loss of Grade 3A agricultural land (Sustainability Assessment para 10.10.7). It would have been a travesty for it to have been included in the Plan.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A47

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly support the removal from the Plan of Policy/Site A47. This was in a highly inappropriate location, being both an SNCI and particularly prone to year-round flooding. It was purely developer-led and was justified solely by virtue of its proximity to Wanborough Station, which is now no longer to be considered a transport interchange.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1088  Respondent: 8687041 / Michael Aaronson  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I support the clear statement in para 4.4.17 that for the purposes of the sequential assessment the train station at Wanborough will not be considered to be a transport interchange because of its location within the Green Belt, and that it is not considered appropriate to direct office development over 100 sq m to this location. The weight that this station was made to carry in the 2016 version of the Plan, and its use to help justify the entirely developer-led Site A46, was completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: pslp171/1089  Respondent: 8687041 / Michael Aaronson  Agent:  

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I much welcome the new statement in this Policy (para 3) that "Agricultural land will be protected as set out in national policy and the economic and other benefits of the best and most versatile agricultural land will be taken into account." Previous versions of the Plan have not sufficiently acknowledged the importance of agriculture in an age when the UK needs to become more self-sufficient in food production and reduce the harmful environmental effects of 'food miles'.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Although the number of houses planned for Guildford town centre has increased slightly compared to the 2016 version of the Plan I still object to the priority accorded to retail and other commercial developments over housing - especially affordable housing. Guildford town is where people - especially young people - want to live, rather than in locations that require them to travel. A positive and comprehensive vision for housing in the town centre is lacking from this Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1091  Respondent: 8687041 / Michael Aaronson  Agent:  

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I strongly support the welcome emphasis in the 2017 Plan on improved infrastructure for cycling in, into, and around Guildford. At present there is no safe way of crossing Guildford on a bicycle, especially from east to west. The Plan document rightly refers to "a fragmented and disjointed network of cycle routes, consisting of routes both on and adjacent to local roads, with the latter often comprising shared lanes for pedestrians and cyclists. Many cycle lanes and tracks are narrow and some are unattractive to the average cyclist." This is very true, and I hope that as this Plan is implemented the Council is as good as its word and delivers a first class cycling infrastructure that will lead to a reduction in car journeys and improved quality of life for all.

Answer (if comment is on questions 1-7 of the questionnaire): (No)

While I appreciate that much good work has been done since the publication of the 2016 version of the Local Plan I am still not convinced of the soundness of the housing target figure, especially as the methodology by which it was generated has not been made public. This figure shapes so much else in the Plan and it therefore detracts from the credibility of the Plan as a whole if the public does not have confidence in it.

**Do you consider this section of the document; complies with the Duty to Cooperate?**, **is Sound?**, **is Legally Compliant?**

**Answer (if comment is on questions 1-7 of the questionnaire):**

In addition to the long list of objections I have already sent to you, I'd like to add **one further objection** to the the so-called Objectively Assessed Number of 693 which the council has paid property developers G L Hearn to invent.

The two exhaustive studies attached, one by GGG Councillor David Reeve and the other by an independent expert commissioned by the non-political Guildford Residents Association, now suggest to me that a number around 400-500 dpa would be more realistic.

If the council stubbornly go on ignoring evidence such as this, the draft plan is bound to fail the soundness test when it goes to the planning inspector.

<td></td>
<td></td>
</tr>
</tbody>
</table>

**Do you consider this section of the document; complies with the Duty to Cooperate?**, **is Sound?**, **is Legally Compliant?**

**Answer (if comment is on questions 1-7 of the questionnaire):**

1. Sites in East and West Horsley

I **OBJECT** in particular to including **Sites A36-41** (East and West Horsley). This is a back-door way to create a mega-village – essentially, a soulless new dormitory town. The Horsleys feel victimised by this plan, which has been masterminded by Council leaders representing Ash and Tongham at the other end of the borough, where (in a flagrant case of political double standards) the Green Belt is actually being extended under Policy P3.15

Whatever their merits as development sites, the 6 Horsley sites should not be considered individually but for their cumulative impact on the contiguous villages of East and West Horsley.

Building 533 new houses on these 6 sites, plus at least another 90 on small sites is (a) excessive in absolute terms and (b) disproportionate relative to the rest of the borough. It will destroy the rural character of these communities.16

Under the plan, rural West Horsley will take 35% of new homes, urban Ash and Tongham 16% and Guildford urban area only 11%. The total number of homes in West Horsley will increase by 35%, which is disproportionate when measured against the overall increase in housing across the borough and particularly in Guildford town. If the Council have justifiable
reasons to transform a particular community so radically, the plan should present a case rather than putting forward site proposals as a fait accompli.

These sites will put unsustainable strain on local facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewage, surface drainage and shops. For instance:

- Thames Water have advised the Council that the current wastewater network will not cope and that the foul drainage system all the way to the treatment works North of Ripley will need to be upgraded.
- Guildford Council’s Education Review says “expansion options may need to be considered for primary” education in the Horsley area within the first 5 years of the plan, but Surrey County Council have no plans to do so. The Raleigh School is already full. The private Glenesk and Cranmore schools are also at or near to full capacity. The suggestion that schools in Ripley can be used contradicts the plan’s stated intention to reduce traffic on the A3 and strategic aim that primary schools should be within walking distance.
- The plan’s Infrastructure Schedule (Appendix C) imagines an “East Horsley and West Horsley traffic management and environmental improvement scheme between 2019 and 2023 by Surrey CC” but gives no details. This scheme is just wishful thinking. The proposed housing can only harm the local environment, not “improve”

The harmful impact of these sites is magnified by the proximity of the so-called Wisley Airfield site (Three Farms Meadow), with over 2,000 new homes only 2 miles away (see below).

The density of new housing on the 6 Horsley sites is inappropriate, being greater than anywhere in the locality at present. Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries for which the plan presents no arguments. Contrary to NPPF paragraph 79, this will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.

Collectively, these 6 sites militate against NPPF paragraph 81’s encouragement of access to the Green Belt and its amenity and recreation value. This has been a success story in the Horsleys, with the creation of an amenity wood and community garden, the purchase of adjacent fields (on the eastern side of Ockham Road North) by local residents in order to preserve their open aspect, well-maintained pitches for local football and cricket clubs, public tennis courts, open space for a high-quality campsite (at Waterloo Farm) used by many foreign tourists and the approval of plans for a “Theatre in the Woods” – making West Horsley the only village in Surrey with an opera house. The open nature of West Horsley determined that a long portion of the 2012 Olympic cycle races passed through the village. This route has since been adopted by cyclists as a permanent asset, including the annual

2. Councillor Paul Spooner and his predecessor, Councillor Stephen Mansbridge
3. Even some property developers complain about the Council’s bias in favour of oversized developments, g. Dandara, whose relatively small Green Belt site on the A245 (Epsom Road) in West Horsley is not considered in the plan.

Prudential cycle race. These and future examples of “positive planning” depend on protecting the Green Belt to maintain the openness and attractiveness of the local landscape and avoiding the urbanisation and traffic congestion that Sites A36-41 will bring.

By surrounding Waterloo Farm campsite with 120 new houses, Policy A40 on land to the North of West Horsley will make this rural tourism amenity unviable. This may accord with developers’ plans, since the site would then be vulnerable to infilling with yet more housing.

Site A40 is subject to an unacceptable flood risk from a combination of a high groundwater table and the lack of surface water run-off. This is flat, clay land on the downhill side of the Horsleys where floodwater from new development will
accumulate and back up onto existing properties nearby. I can provide photographs proving how badly these fields already flood at present. These problems will only get worse with the increase in extreme weather events associated with climate change. The “appropriate mitigation” suggested in Policy A40 exists only as an abstract notion. It should not overrule the need for Green Belt “exceptional circumstances”.

Policy A40 underestimates the problems of safe access and egress. Firstly, Ockham Road North was closed for several weeks in 2014 because of flooding, and still floods regularly. Secondly, access problems are not confined to flooding and are not addressed by the proposal to extend the existing 30mph zone past the site entrance. Repeated attempts made by Ockham Road North residents to extend this zone have been turned down by the local authorities, Highways England and Surrey Police, even though data collected in 2015 show that traffic has doubled over the last 15 years and that the average speed in the 40mph section of this road is 52mph, with maximum recorded speeds of over 80mph. No traffic calming measures have so far been achieved. Additional housing will add to several hazards along this stretch of road, including:

- Its use by pedestrians, especially children (using the Raleigh and Glensk schools and catching school buses to Guildford and Howard of Effingham), pensioners living in the string of bungalows at the northern end of the road, and visitors from the Waterloo campsite who are unfamiliar with the area.
- The existence of a narrow footpath on only one side of the road in any one spot. The layout means that walking half a mile between Green Land and East Lane requires crossing the road twice.
- The road’s increasing use by recreational cyclists (see above).
- Its winding nature, poor sight lines (especially when interrupted by summer vegetation) and dangerous, concealed driveways. Most of these were built in the 1930s. Some have been widened but many are too narrow for modern traffic. Since a deep ditch runs along most of the road, vehicles have to swing out dangerously when entering or leaving.
- The prospect of additional traffic, including 19,000 HGV movements (90 a day over a long period) if Surrey County Council approves the Drift Golf Course’s planning application to re-landscape its site using bulk waste transported from London.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3. Three Farms Meadow site

I OBJECT also to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds.17 This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again.

This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company.18
Policy A35 should be ditched from the plan for all the reasons the development was rejected by the Planning Committee, including:

- Green Belt location and absence of “exceptional circumstances”.
- Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
- Proximity to RHS Wisley and Thames Basin Heath Special Protection Area (TBHSPA).
- Proximity to A3/M25 bottleneck and Ripley village and roundabouts.

1. Application reference 15/P/00012.
2. Including the Rt Hon. David Mellor QC (its erstwhile founder and former Minister), Mr Michael Murray (spokesman for the project and Conservative cabinet member for planning policy at the Vale of the White Horse District Council in Oxfordshire) and the Hon. Charles Balfour (director, descendant of the Tory Prime Minister).

- Absence of adequate traffic data.
- Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
- Loss of high-quality agricultural land (55% of the site), in breach of national policy.
- Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.
- Presence of a Surrey County Council safeguarded waste site.
- Cost of infrastructure required to the detriment of alternative more favourable sites.
- Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.
- Impact on listed buildings.
- Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.
- Extreme housing density with tiny garden spaces.
- Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.
- Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14).

- Failure to evaluate the cumulative impact of this and nearby development sites on the area.

*****

1. The River Mole would flood even more badly should a new runway be built at Gatwick.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
**POLICY D1 - Making better places**

I OBJECT to the absence of any reference to vernacular or historic design guidelines, even in Conservation Areas. Most of the borough, especially the rural areas, has vernacular design guidelines that are available to give suggestions as to appropriate design. These should have mandatory planning force.

The monitoring of this policy is inappropriate. Why should this policy result in a reduction of the number of appeals for poor design? Should it not result in better-designed buildings?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

**POLICY D2 - Sustainable design, construction and energy**

I OBJECT. Sustainability should be an overarching ambition, conditioning the whole local plan and running through it, as claimed in the NPPF, “like a golden thread”. It should be set out clearly in Policy S1, not buried away as a minor detail in Policy D2.

This policy amounts to “greenwashing”, expounding aspirational environmental targets while ignoring the plan to build dormitory towns across the Green Belt that are environmentally and socially unsustainable. These settlements will bring vastly increased car use and will lead to unacceptable traffic congestion, overstretched social infrastructure, and more greenhouse gas emissions, noise and light pollution. This policy should not be just about saving energy but about preserving the borough’s stock of natural capital, especially the countryside, from futile attempts to rig the housing market.

This policy’s emphasis on Combined Cooling Heating and Power and communal heating networks is meaningless, since no such networks are available locally.

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY D3 - Historic environment

I OBJECT. This policy clashes with the strongly pro-development agenda of the rest of the plan and fails to address the contradiction. History is unamenable to improvement, so the policy should commit the Council firmly to protecting and preserving our heritage assets from development. Instead, the specific policy pledge to “support development” that might “enhance” heritage assets leaves wide scope for abuse in the form of destructive commercialisation and financial leveraging of relevant sites.

This policy is based on the false premise that Guildford’s heritage is inherently in decay. This is a developer’s charter – a short step away from the idea that the historic environment needs to pay its way to be preserved. The Council’s aggressive reviews of Guildford Museum and the Electric Theatre support this interpretation. Whatever the “reasoned justification”, the actual policy wording in the blue box leaves too many loopholes.

Development close to historical assets is harmful and should be expressly prohibited. This policy fails to meet the requirements of NPPF paragraphs 126 and 131-133.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY D4 - Development in urban areas and inset villages

I OBJECT. This is a piously aspirational policy that does not address any of the obvious practical issues already touched on above:

- The plan envisages that 40% of homes built will be “affordable”, but this does not provide any accommodation for low-paid workers, for example, those on the minimum wage, who cannot afford to buy so-called “affordable” homes or pay an “affordable” rent. There is a need for some expansion in social housing, especially in urban areas, where there is a greater concentration of low-paid workers such as those employed in the retail, warehousing and distribution sectors (all of which this plan aspires to expand).
- The number of homes planned in the urban area is too low. There is a glaring need for regeneration in many urban areas, but this is ignored in favour of building homes on green-field sites instead. This will not address urban housing needs. It is also unsustainable, since building outside the town does disproportionate harm to road traffic, air quality and overstretched infrastructure.
- The plan envisages a large expansion of the traditional “bricks and mortar” retail sector, but this is a sector in rapid and continuous decline.
- All the stated policy aims for “inset” villages will be negated by the excessive weight of new housing development proposed which would radically change their character forever. Against this disruptive background, it is barely relevant to talk about preserving views!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
POLICY E1 - Meeting employment needs

I OBJECT because -

- The evidence base is unreliable;
- There is unclear differentiation between B class uses;
- Only high value-added business uses, contributing to a modern “knowledge economy”, are desirable, not low-grade, low-employment warehousing which is also land hungry;
- Industrial and commercial businesses must be concentrated in the urban area or existing business parks (e.g. Slyfield) not in the rural environment which the infrastructure is unable to support;

1.  See footnote 3

- The rural environment must support micro- or high-tech businesses, agricultural industries, and tourism, and these sectors must not be damaged by general industrial development which is inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY E2 - Location for new employment floorspace

I OBJECT. It would be more sensible to confine all new office and research and development (use Class B1a and B1b) floor space to Guildford town centre. I oppose the policy of expanding the Research Park onto Blackwell Farm (see my reference to “regulatory capture” of local public policy by the University, Policy H1, above). No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E4 - Surrey Research Park

I OBJECT. The Council are required by the NPPF to facilitate commercial science and technology clusters. But, as with Policies H1 and E2 above, this policy seems to be dictated more by the ambitions of Surrey University than the public interest. In an extremely tangled sentence, it says that the Research Park will be “protected for business use… in any science… that is complementary to the activities of the University of Surrey.”
This fails to distinguish adequately between the University’s public role as a state-funded, academic institution and its private, financial interest in profit-making business spin-offs. It ignores enterprises that might be commercial rivals of the University. And it fails to consider the public harm done by turning the Research Park into a larger Business Park, such as the loss of Green Belt social and environmental capital.

B1b should be the primary use class for the Research Park and applications for B1a should be resisted given the danger of diluting the core purpose and reputation of the park. The inclusion of B1c uses is inappropriate and unnecessary.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**POLICY E5 - Rural economy**

I OBJECT. Use of rural areas for town centre uses without applying the sequential approach is against the principles of localism that require local people to be consulted and heeded, not ignored. Villages need protecting in terms of both design and scale.

Most of the economic activities listed in 4.4.44 depend on maintaining the rural character of our villages which would be endangered by the wholesale “insetting”, boundary expansion and house building proposed in other parts of the plan. This applies also to new and projected enterprises in the Green Belt (e.g. Grange Park Opera’s Theatre in the Woods in West Horsley, which requires a protected, rustic setting to be a success, not housing estates and congested roads). Policy E5 is incompatible with the high housing numbers proposed.

Previous commitments to improved high-speed broadband and mobile phone coverage have now been diluted, despite general support. This disregards the responses from the 2014 public consultation.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for over-development/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to RHS Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan, yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E7 Guildford Town Centre

I OBJECT. The policy “vision” refers to protecting the Guildford’s “unique setting” (including, surely, its surrounding Green Belt and countryside views) but this is not carried over into the formal policy wording in the blue box. It is therefore a worthless commitment.

There should be much more residential use of the town centre where most people, especially the young and less well-off, want to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose a visionary regeneration plan for the River Wey/Walnut Tree Close area, where there is arguably enough brownfield land for 4,000 new homes, meeting near all the borough’s housing need over the plan period without harming the countryside.
There is an urgent need for a brownfield register and to focus on brownfield redevelopment before considering development outside the existing urban area. CIL strategy must promote brownfield redevelopment.

Strangely, the policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public debate.

This policy also fails to provide guidance on design requirements, as required by the NPPF.11

Instead, it is far too concerned with shopping. Town-centre shopping is in decline internationally as consumers move irreversibly online. There is no need to expand physical retail capacity or warehousing floorspace, which will only kill off existing shops while using up valuable housing land. The delays to the redevelopment of North Street is a flashing red light warning that consumer patterns are shifting. Guildford is a large town without a single butcher or fishmonger, showing that the Council need to use the fiscal and other mechanisms at its disposal to support niche retailers. To opt for large, impersonal department stores and dull high-street chain stores at the expense of Guildford’s unique character would be an historic blunder. For this type of shopping, most residents can go to Woking or Kingston, whose ugly town centres should serve as a dire warning to Guildford planners.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E8 - District centres

I OBJECT to the proposal that sites “on the edge” of District Centres should be considered for retail developments. This is another Trojan horse policy, allowing retail hubs to be vastly expanded in order to smooth the way for vast new housing estates outside in the countryside (e.g. to meet the “everyday shopping and service needs” of the roughly 1,500 people living in the 600 new homes planned for the Horsleys).

This is a case of back-to-front priorities. Expanded local retail hubs are being proposed in order to justify more housebuilding in the villages, and in a forlorn attempt to mitigate the serious traffic and infrastructure problems this will bring. The Council have no business preparing the way for new supermarkets in the Green Belt. Rural retail capacity should be left to local demand.

The policy proposes not a single measure to support existing rural shops and services that are the lifeblood of village communities, e.g. using business rates and other levers at the Council’s disposal.

1. NPPF 59: “Local planning authorities should consider... the overall scale, density, massing, height, landscape, layout, materials and access of new development in relation to neighbouring buildings and the local area more ”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**POLICY E9 - Local centres**

I OBJECT (for the reasons given under Policy E8 above) to the proposal for retail development adjacent to the 6 rural centres, and sites on the edge of designated centres. This is creeping urbanisation, damaging to the Green Belt and to Guildford town revival as a thriving urban hub. It will contribute to local urban decay and depopulation, just as expansion of the suburbs did to mid-20th century London.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** PSLPP16/1066  **Respondent:** 8687265 / Dagero Ltd (David Roberts)  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**POLICY H1 – Homes for all**

I OBJECT. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set any rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to de-humanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

1. This has been challenged by residents including, by Mr Ben Paton, as far as the Information Ombudsm But the Council have consistently refused to seek disclosure of the model.
2. See [http://www.glhearn.com/developer/Pages/Overview.aspx](http://www.glhearn.com/developer/Pages/Overview.aspx): “We act for many of the leading ” G L Hearn is now part of Capita Real Estate.
3. See letter from Neil Taylor, Director of Development at Guildford Borough Council, in the Surrey Advertiser of 3 June 2016: “I would like to highlight the difference between the Objectively Assessed Housing Need (OAN) figure produced by G L Hearn (693 homes per year) and the Housing Target for the Local Plan. Some opponents of the Local Plan appear to blur the edges of the two figures. The OAN figure is the one produced by the modelling tool. The Housing Target figure is the proportion of the OAN that the Council feels it can successfully
deliver. Based on the infrastructure that Highways England, Surrey County Council and others suggest they can provide over the next 15 years, the Council believes it can deliver the full OAN number as the Housing Target. However if, during this consultation, or later on, the anticipated infrastructure is not going to be provided then the council will be forced to apply further constraints to the OAN number, which may reduce the Housing Target number. Therefore, it is clear that the OAN and the Housing Target are not the same. The OAN is objective and the Housing Target is subject to constraints.”

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under- used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough already has a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H2 – Affordable homes

I OBJECT. “Affordable” homes, under national definitions, means homes that are sold or rented at 80% of market value. Even if 70% of these are rented as proposed, the level of market prices in the South-East means (even post-Brexit) that these homes will remain well beyond most people’s means and that starter homes will not become available for local people.

In addition, the viability clause (4.2.40) means that in practice the policy could be unenforceable. Private financial viability has no place in a public policy and should be removed. It is a get-out-of-jail-free card for developers that will sacrifice countryside for no local benefit.

I question the assumptions that seem to underlie this policy: that people have a right (rather than a legitimate aspiration) to own a home; that they should be encouraged to live locally (contradicting the Government’s policy of encouraging labour mobility and development in poorer regions, where homes are cheaper anyway); that increasing local house-building will reduce overcrowding and congestion (rather than simply suck more people into the borough); and that it will stem the rise in house prices (even though 13,860 new homes will be a drop in the ocean, given that prices are determined by an infinite demand-pull from London, whose population is increasing by 100,000 a year, and by the currently low cost of capital for overseas and other buyers). The weak mechanisms proposed in the plan might influence the market in a more remote part of the UK, but not here.
This policy’s version of “affordability” is just a smokescreen for pushing through more development generally. Building more homes in Guildford cannot increase real affordability given the overhang of the London market.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H3 – Rural Exception Homes

I OBJECT. This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix”, this can include “market” housing – i.e. normal commercial development which in Guildford usually means large executive homes. This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY I1 - Infrastructure and delivery

I OBJECT. Most of the borough’s infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. Yet this plan’s commitment to building housing estates across the Guildford countryside will mean either major infrastructure investment that no-one is prepared to pay for or else a catastrophic and simultaneous collapse in transport, educational, medical, energy, water and communications services.
The plan targets greenfield sites – requiring heavy infrastructure investment – in order to generate CIL income necessary to meet an infrastructure shortfall that is already serious. This is not sensible. The current draft CIL scale also encourages development on greenfield sites rather than brownfield.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing infrastructure needs in this area is inadequate, identifying only the tip of an iceberg of existing congestion. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that involve demolishing property and road-widening in residential areas to solve the resultant congestion. The A3 improvements are not guaranteed to take place but they are being used to justify removing large areas from the Green Belt before detailed traffic assessments have taken place. These detailed investigations are being deferred until the planning application stage and will be left to developers to prepare. If a site then proves to be unsustainable its Green Belt protection will have been lost for no reason and unsuitable development will take place by a more insidious process.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritising greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognising this as a key issue, the plan is based on a wing and a prayer.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY I2 - Supporting the Department of Transport’s “Road Investment Strategy”

I OBJECT. This policy is too vague and optimistic. Decisions by Highways England on improving the strategic road network (the M25 and A3) are still years off. The Council have suggested a very expensive tunnel under Guildford, but this is no more than a dream. Even if Highways England accepted this (which is highly unlikely in the post-Brexit public spending climate) it would not be built until the end of the plan period at the earliest. Other, less expensive A3 improvements, and changes to the Junction 10/Heathrow stretch of the M25, will also take years to agree and complete.

The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is foolhardy. Surrey is the most congested county in England, with 683 people per square kilometre, compared with an English average of 413. This policy will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone). This is a major development constraint that should have been applied to the OAN before this consultation, and not left up in the air.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
POLICY I3 - Sustainable transport for new developments

I OBJECT. This is another vaguely aspirational policy, based on wishful thinking and not grounded in the practical realities of daily life. It consists of a standard, box-ticking list of local government measures unrelated to the specifics of the plan. Like infrastructure, transport appears to be an afterthought; the policy fails in its essential job of guiding planning decisions, since it assumes development of any kind can be supported by sustainable transport.

The sustainability of the dormitory settlements which the Council want built across the countryside depends on a general “modal shift” from private car use to walking, cycling and public transport. This is unrealistic. The proposed sites are often miles away from the nearest railway station. Bus services even in the largest villages are almost non-existent – just one bus to and from Guildford each day in the Horsleys and none at weekends. Since bus services depend on profitability, they cannot be expanded and the Council are not proposing to subsidise new ones. Rural buses are too slow anyway for busy people. Most rural roads in the borough are narrow, winding, hilly, potholed, muddy and unlit. Many flood badly and have no footpaths.

The desired modal shift would require a comprehensive co-ordination of bus and train timetables with services every few minutes, seven days a week, to stops within walking distance of every home in the borough. This kind of integrated public transport system has been achieved in Switzerland, for instance, but only at huge public cost and thanks to a political consensus supporting state ownership of trains, buses and the post office, which delivers rural passengers as well as mail. There is absolutely no chance of this in the UK.

The vast majority of the borough’s residents are not, in practice, able to cycle. This includes children, the elderly, commuters who have to look smart, the infirm, the unfit and people carrying goods or shopping of any kind. Dependence on walking and cycling discriminates against these groups, which include some of the most vulnerable members of the community. It is socially unjust.

One in two working people in Guildford commute for up to 3 hours a day, as I used to do. They will not leave their cars for even part of their journey if it means longer travel times.
Park-and-rides are a welcome part of the transport mix but are too slow for commuters and others on a tight schedule. Well-off pensioners seem to be the main beneficiaries. For an adult couple going shopping it is still cheaper to park in town.

Forget about water buses. The Wey is too narrow and, with a river speed limit of 4mph, boats are too slow for anything but recreation. Except on the tideway, not even the Thames has such services.

The addition of two new stations appears attractive but will slow down train journeys, which are already slower than at any time since the 1930s. Knock-on effects on localities where the new stations are built have not been worked out or presented.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY I4 Green and blue infrastructure

I OBJECT. This policy is a box-ticking exercise with no teeth to it. It sits oddly with the plan’s onslaught on the Green Belt. The plan to build on large areas of countryside and to inset villages will cancel out any benefits from extending the principle of enhancing biodiversity beyond Biodiversity Opportunity Areas.

There is no mention of the value of wildlife gardening to biodiversity or the important role that larger gardens play in a village setting.

There is no mention of the impact of the plan on food production, or monitoring the loss of agricultural land.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1689
POLICY P1 – Surrey Hills Area of Outstanding Natural Beauty

I OBJECT. This policy weakens existing protection when it should strengthen it. It is dependent on the Surrey Hills Management Plan. The latter welcomes housing development. Even major (undefined) development in the AONB would be permitted if exceptional (undefined) circumstances could be demonstrated.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

POLICY P2 – Green Belt

I OBJECT. This policy states, “the general extent of the Green Belt has been retained.” This is a lie.

The policy wording is tepid in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the present Government’s policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations – an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it. It is an inalienable public good. Once gone it is gone forever. It is not the Council’s to give away.

Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of:

- Agricultural production
- Rural leisure and tourism amenities
- Water catchment
- Flood control
- Biodiversity
- Natural heritage
- A carbon sink for air pollution
- Room for public facilities such as parks and burial grounds
- Profitable film locations (e.g. Shere)
- Future economic potential such as mineral extraction (even fracking)
- Natural beauty, landmarks, open space, rural views and sight lines
- Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF)8

As a matter of law, morality and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations.

It is disreputable to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More...
importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. No-one argues that we should sell 1.6% of the Crown jewels in order to build houses.

I am not opposed to appropriate development in the Green Belt and recently supported a major planning application in my own village. But I fail to see why a system of fair burden-sharing of new development cannot be applied to the borough’s existing settlements in proportion to their size. This alternative would minimise the strain on infrastructure and maximise the chances of retaining the character of each settlement through gradual growth. It is reasonable to ask urban Guildford, with x times the population of semi-rural East Horsley for instance, to accommodate x times the number of new homes over the plan period. Parish councils could be asked, and will no doubt be willing, to propose where their quota of houses should go. Most rural residents are reasonable people who, if not alienated by top-down planners, will support realistic numbers of new houses in their neighbourhoods. Unfortunately, this democratic, bottom-up approach has not been attempted.

Instead, while developers flip and land-bank urban sites as a financial speculation, this plan will dump most new development on greenfield sites where building costs are lower, covering the Green Belt with dozens of housing estates that few residents want. 8,086 new houses are planned for the Green Belt but only 1,135 for Guildford urban area. This is disruptive, socially inequitable and unnecessary. It will not only destroy countryside but will also delay and disincentivise much-needed urban regeneration. The remarkable revival and repopulation of central London shows that building dormitory satellite settlements is an out-of-date approach to planning.

I particularly protest at the “insetting” of 14 villages from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages. I am deeply disturbed that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are “leggy” in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost hellbent on self-defeat.

I believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors. To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I

1. See Ministerial foreword: “Our natural environment is essential to our wellbeing, and it can be better looked after than it has Habitats that have been degraded can be restored. Species that have been isolated can be reconnected. Green Belt land that has been depleted of diversity can be refilled by nature – and opened to people to experience it, to the benefit of body and soul.”

2. Councillor Matthew Sarti, Planning Committee meeting, 18 May

cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed “insetting” and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need (especially post-Brexit) and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

SITES

1. Green Belt sites

I OBJECT to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development, however, it does identify the principle of development and uses.” This ignores the tens of thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. This amounts to a war of attrition by the Council in conjunction with developers, since many busy residents are sick and tired of repeating the same comments to deaf ears. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014.13 Some residents have concluded that commenting is a waste of time.

13 Further discredited by criminality on the Council. Former lead Councillor for planning Monika Juneja, architect of the 2014 draft plan, is currently serving a two-year sentence on 3 counts of forgery, pretending to be a barrister and obtaining dishonest pecuniary advantage.

All Green Belt sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established.14

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P3 – Countryside (i.e. beyond the Green Belt)

I OBJECT. This is more protective – as a policy – than the proposals for the AONB and the Green Belt, so is anomalous and wrong. I am not in favour of building on this area, since urban, brownfield areas are sufficient to meet all reasonable housing targets. There is no need to build on any green fields if brownfield, previously developed land is used efficiently (without garden-grabbing).

This policy refers to the countryside near Ash and Tongham (see paragraph 4.3.28). This area does not justify stronger policy protection than any other part of the borough. The fact that the current and previous Council Leaders represent it should not give it preferential status: “we will seek to limit any development in the countryside unless it can be demonstrated that it is necessary in that location”. Green Belt and AONB areas should by definition have higher levels of protection than non-Green Belt areas.
It should also be noted that Ash and Tongham lie beyond Guildford far away from London and therefore make no contribution to controlling Metropolitan urban sprawl, unlike those villages which, ironically, are to be “inset”. That is presumably why Ash and Tongham are not in the Green Belt already. This policy, however, attaches higher priority to preventing the “coalescence between the Ash and Tongham urban area and Aldershot” than it does to the primary purpose of the Metropolitan Green Belt, which is to stop London sprawl.

Apart from being a scandalous misuse of local political patronage, this policy effectively says, “Look, we are not destroying the Guildford Green Belt because we are extending it in Ash and Tongham.” It is a cynical piece of tokenism. The leader of the Council needs to be seen to be above reproach by deleting this policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY P5 - Thames Basin Heath Special Protection Areas

I OBJECT. This policy is weak. The mitigation (cash compensation) offered for development in the special protection area is so small as to be meaningless.

SANG (Suitable Alternative Natural Greenspace) is not beneficial since the sites identified or targeted are already green space. This is just using agricultural or wooded land as recreation land in order to justify building on other green spaces nearby. There is no actual increase in open space or environmental protection; instead, it is a ploy designed to permit building on otherwise protected areas. SANG – in part used to prevent dogs and cats attacking nesting birds – must also ensure that it is not using land which is adjacent to the Special Protection Areas.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

POLICY S1 – Presumption in favour of sustainable development

I OBJECT. The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.”1 Standing at the head of the draft plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. 

The promise “to secure development that secures the economic, social and environmental conditions in the area” omits to recognise that economic growth, social justice and environmental protection often conflict. It does not say how each element is to be weighted or conflicts resolved. As a practical guide to the tough choices Councillors will face, it is useless. Under this policy, any development will qualify as “sustainable”, thereby failing to apply the NPPF’s most important guideline.

The most gaping hole in Policy S1 is the Green Belt. As an inter-generational covenant (enshrined in primary legislation) to protect green areas in perpetuity, the Green Belt is a living example of sustainable development in practice. It is the envy of the world. Policy S1 should commit to uphold Green Belt boundaries and protections, setting at least one clear boundary to planning decisions. The plan’s contempt for Green Belt constraints is amply demonstrated in later policies.

The commitment to approve planning applications “wherever possible” and “without delay” reveals this draft plan’s pro-development bias. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.3 In my view Policy S1 is a non-policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
POLICY S2 – Borough Wide Strategy

I OBJECT. I have 5 objections to the proposal to build 13,860 new homes:

1. The number is based on pre-Brexit projections for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously. "4

2. The number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any commonsense view, “West Surrey” is much too sma Half of Guildford borough’s residents work elsewhere, and half the people who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent districts of Rushmoor and Mole Valley, minutes from Guildford town, are outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere. Unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and is part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council have failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so the housing numbers

1. NPPF paragraph 14
2. The most widely accepted definition is the 1987 United Nations one from the Brundtland Report: “Development that meets the needs of the present without compromising the ability of future generations to meet their own”
3. Including: “empowering local people to shape their surroundings… Take account of the different roles and character of different areas… protecting the Green Belts around them… recognizing the intrinsic character and beauty of the countryside and supporting thriving communities within it… Support the transition to a low carbon future… Contribute to conserving and enhancing the natural environment and reducing pollution… Encourage the effective use of land by reusing land that has previously been developed (brownfield land)... Conserve heritage assets… Actively manage patterns of growth to make the fullest use of public transport and cycling and focus significant development on locations which can be made sustainable.”
4. At the time of writing, about £8 billion (40%) has been wiped off the value of the UK’s top 4 housebuilders alone.
derived from it are unreliable. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county (none in Mole Valley, for instance). This highly lopsided distribution is unexplained.

1. The figure of 13,860 new homes is unsubstantiated. It has not been scrutinised by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by commercial sub-contractor used in preparing the SHMA.5 The Council say we should trust the contractors’ model because it is used by a large number of other local authorities. Wide usage, however, does not confer objectivity. Guildford’s OAN would fail the basic transparency test even if the methodology used were a universally admired ‘gold standard’. But it is not: it belongs to consultants whose website openly proclaim their pro-development agenda,6 provoking reasonable suspicion that the figures are inflated. External experts and members of the public have provided detailed critiques of the mode Its most fatal flaw, however, is that it has not been disclosed – not even to the authors of the plan, who have taken it on trust. This is irrational and unsound.

2. The status of the 13,860 figure is ambiguous. The plan fails to set a Housing Target of new homes to be built, or explain how this relates to the “Objectively Assessed Number” (OAN) for housing need. Elsewhere, the Council have said that the two are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted, but in the same breath say that infrastructure or other constraints may in due course affect deliverability.7 Despite the NPPF, the plan fails to address these constraints. In any case, the number of homes proposed, plus existing planning permission, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how can anything else be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a Housing Target that takes normal constraints and adjustments credibly into account, and which leaves the Council to set one at any level without further consultation. Even if the OAN were not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

I wish to object to the above mentioned proposed boundary change.

This land contributes to the open character of this area of the village any change of usage i.e. development would tower over the village.

Chinthurst Lane is quite unsuitable to take more traffic being already burdened by people using it as a ‘rat run’ at certain times.

These boundaries have been there for many many years and I can see no valid reason for changing them.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Introduction

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**SITES**

I OBJECT TO ALL POLICIES INVOLVING BUILDING IN THE GREEN BELT: • No “exceptional circumstances” shown, numbers excessive and the clearly expressed views of residents in previous consultations ignored.

I OBJECT ESPECIALLY TO 6 POLICIES: A36, A37, A38, A39, A40 & A41: • Amount of new housing far exceeds local need. • Housing density excessive when compared with existing development. • Would transform the Horsleys into a sizable town, something for which no case is made. • No local support. • Collective impact of these 6 sites on a small part of the borough not considered. Should not be treated as isolated, separate sites. • Total amount of new building out of scale with the planned development elsewhere the borough, especially less sensitive urban areas not protected by Green Belt. • Sites unsustainable. Key infrastructure lacking. No adequate provision is made to increase it – e.g. poor wastewater capacity, lack of schools, absence of traffic management plan, flooding. • No account taken of additional impact of Wisley Airfield site on Horsleys. • Extension of settlement boundaries too permissive. Horsleys characterised by streets with development along only one side of the road. Policies allow too many adjacent green fields to be developed by squaring off boundaries and claiming they don’t contribute to Green Belt “openness”.

6

• Green Belt gap with neighbouring settlements hugely narrowed, especially if Wisley Airfield is built on. • Will harm compliance with NPPF 81 – e.g. by making cycling (including Prudential cycle races) too dangerous, ruining the rural setting of Waterloo Farm campsite, destroying the ambience of Grange Park Opera’s new “Theatre in the Woods”. • Policy A40 especially unviable because of high water table and poor drainage, leading to regular winter flooding. • Safe access and egress at Site A40 unachievable, owing to flooding, high speed limits, poor sight lines, narrow access to existing properties, inadequate pavements for elderly and schoolchildren, increasing use by recreational cyclists etc.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
I OBJECT ALSO TO POLICY A35 (WISLEY AIRFIELD): • Should not be in the plan for all the reasons the Planning Committee rejected the identical recent proposal by Wisley Investment Properties. • Irregularity of including this policy in the plan 24 hours before this planning application was rejected (like extending the time allowed for the developers to present their application). • Unacceptable Conservative Party links between the developers and the Council. • No Green Belt “exceptional circumstances” presented. • Not a brownfield site as stated – only 15% of it. • Proposed SCC waste site ignored. • Loss of farming land. • Too near RHS Wisley and Thames Basin Heath SPA. • SANG would harm on SPA. • Will aggravate traffic jams at A3 roundabout and M25 Junction 10. • Unacceptable increase in air pollution. • No existing public transport and stations miles away. • No proper traffic data. • Housing density far too great. • Over 2,000 houses will swamp and destroy Ockham conservation area, with impact on listed buildings. • Access confined to inadequate narrow lanes. • Water table and surface water flooding not considered either for site itself or for downstream areas on River Mole. • Major impact on neighbouring villages, especially Horsleys. • No assessment made of collective impact on area of this and 6 Horsley sites.

I OBJECT TO POLICY D4 (DEVELOPMENT IN URBAN AREAS AND INSET VILLAGES) • No commitment to expand social housing or accommodation for people who can’t afford so-called affordable homes. • Not enough new homes in urban areas, despite demand and need for urban regeneration and protection of Green Belt. • Objectives for inset villages cancelled out by plans for excessive housing growth there. • Too much emphasis on traditional shops, when a lot of this sector is in terminal decline.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2626  Respondent: 8693153 / Vicki Willetts  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I OBJECT TO POLICY E1 (EMPLOYMENT):

• Poor evidence base.

• Too much encouragement to low added-value employment that’s needed elsewhere in the country. • Fails to concentrate general business activity in urban areas or business parks that have the infrastructure.

• Fails to differentiate this from appropriate rural business.

• Too much encouragement of warehousing, for which Guildford is too congested.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2627  Respondent: 8693153 / Vicki Willetts  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT TO POLICY E3 (EMPLOYMENT CAPACITY AND FLOORSPACE): • Puts unnecessary obstacles in the way of using brownfield land into useful residential housing, contrary to government policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2628  Respondent: 8693153 / Vicki Willetts  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY E4 (SURREY RESEARCH PARK): • Subordinates public planning policy to the University of Surrey’s private, commercial enterprises (not its public academic purpose). • No cost/benefit analysis of harm to Green Belt involved in extending research park. • Waters down research purpose of park, turning into a general business park.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2629  Respondent: 8693153 / Vicki Willetts  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY E5 (RURAL ECONOMY): • Incompatible with high housing numbers proposed for rural areas elsewhere in the plan. • Insetting and settlement boundary extension endanger appropriate rural activities listed that depend on maintaining rural areas’ character. • Town-centre uses for rural areas contradict government’s localism policy and need to consult and protect village environments. • Established commitments to high-speed rural broadband and mobile coverage watered down despite 2014 consultation responses.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY H1 (HOMES FOR ALL): • Policy doesn’t set any constraints on building. • Housing mix based on pre-Brexit growth and demographic assumptions and unreliable SHMA that wasn’t put out to formal public consultation and wasn’t scrutinised by Councillors. • Fails to compel University of Surrey to use its thousands of planning permissions and existing space, such as car parks, for student accommodation. • Lets University off the hook of accommodating all its students, so as to free up houses for the most needy in town.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<tr>
<td>I OBJECT TO POLICY H2 (AFFORDABLE HOMES): • Using the official definition of Affordable is a joke. Affordable homes round here are not affordable! Pushing for these homes just means pushing for more development. • The viability clause lets developers off the hook of providing even these (non-) affordable homes. Too open to manipulation. • Contradicts government policy to develop less advantaged regions of the UK. People don’t have to live and work in Guildford but should be encouraged to move to cheaper, less congested areas. • This policy won’t affect market forces or house prices. Guildford is too small and too near London to influence these, however many homes it builds.</td>

</tbody>
</table>
I OBJECT TO POLICY I1 (INFRASTRUCTURE & DELIVERY) • Infrastructure considered here as an afterthought, rather than pre-condition of development. Should be a key issue for the rest of the plan. • Excessive housebuilding in countryside not supported by any funding or provision for infrastructure. • Heavy focus on building on greenfield sites inefficient and unnecessary: cheap for developers but much more expensive for the public who have to fund the infrastructure. • Draft CIL scale discourages use of brownfield land first. • No plan for organic increase in existing traffic congestion, let alone once thousands of houses are built across the countryside. Local roads hardly considered. Green Belt being eroded before road widening/improvement plans certain, encouraging over-development of greenfield sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT TO POLICY I3 (SUSTAINABLE TRANSPORT): • Just a list of generic measures, not related to real life or the particularities of Guildford. • Fails to treat sustainability as a constraint. Assumes excessive levels of development proposed in the plan can be supported by sustainable development. • Unrealistic. Most people can’t or won’t walk or cycle – commuters in a hurry, the elderly, children, people who are unwell or unfit, people carrying heavy shopping or other goods. I.e. most residents! • Town’s eye view of transport. Ignores scarcity of existing rural public transport and commercial unviability of increasing it. Ignores terrible state of Surrey’s roads, potholes, flooding etc. Ignores extra stress to be created by huge new housing estates in countryside.

I OBJECT TO POLICY I4 (GREEN & BLUE INFRASTRUCTURE): • No teeth. Policy cancelled out by huge developments across the countryside. No mention of opportunity costs of loss of Green Belt services and amenities (e.g. farming).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2621  Respondent: 8693153 / Vicki Willetts  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY P2 (GREEN BELT): • No declaration of support for protecting the Guildford Green Belt, contrary to NPPF and government statements. • No evaluation of value of local Green Belt as a public and private asset: it’s just treated as potential building land with a few inconvenient restrictions. • Impact of Green Belt development on local agriculture ignored. • Impact on rural leisure and tourism ignored. • Impact on carbon sink and knock-on effects for air pollution and climate change ignored. • Impact on biodiversity ignored. • Impact on natural heritage ignored. • Impact on water catchment ignored. • Impact on room for public space amenities (parks, cemeteries, waste facilities etc) ignored. • Impact on rural business (e.g. mineral mining, film making) ignored. • Impact on natural landmarks and views ignored. • Harm to public health and wellbeing (physical, psychological) ignored. • Allows excessive levels of development in breach of views expressed in last consultation and Conservative Party manifesto commitments at the last local elections. • Has allowed ruling Councillors to argue that there is an acceptable percentage of
Green Belt that should be sacrificed to development, when no such rule exists in the NPPF. • Ignores alternative approaches, such as fair burden-sharing under which settlements would undertake to accommodate new development in proportion to their size. • Disproportionate amount of development (most of it, in fact) to be in Green Belt. Too few new homes in urban areas where most people (especially the young and less privileged) want to live. This will act against much needed urban regeneration. • “Insetting” of most villages disproportionate and unjustified in terms of their contribution under the NPPF to the purposes of the Green Belt. Based on flawed Green Belt and Countryside Study. Idea that most Guildford villages do not contribute to “openness” is subjective. • Major settlement extensions allow indiscriminate housebuilding, as irregularly shaped villages are squared off to enclose green fields. • Overall harm to Guildford Green Belt unjustified by any objective development need post-Brexit. • Ignores most of NPPF 17 stipulations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY S2 (BOROUGH-WIDE STRATEGY): • Numbers based on growth and demographic data now invalidated by Brexit. • No justification given for 13,860 housing figure. Figure based on a secret formula used by consultants and never seen by anyone on the Council or by the public. Council has failed to seek its disclosure. • 13,860 figure confuses the OAN with a housing target. No definite housing target given, leaving too much scope for the Council to make one up. I can’t understand how we’re being consulted when we don’t know how many houses the Council want to build, taking all the contraints into account. • Figures based on a Housing Market Area that ignores 2 neighbouring districts (Rushmoor and Mole Valley) and is much too small, since most people commute or travel far outside the Area to shop or study. This distorts the figures: no reason why Guildford needs to build nearly twice as many large housing estates as the rest of Surrey put together, or half of all sites over 100 units. • High numbers involved would transform character of the borough from mainly rural/Green Belt to urban, creating a corridor of development out of London as per Woking or Croydon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/4210  Respondent: 8694369 / Nicola Ogilvie Smals  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A38

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

NPPF section 17.5 specifically states that policies must take account of the different roles and character of different areas, protecting the Green Belts around them, recognising the intrinsic character and beauty of the countryside and supporting thriving rural communities within it. As outlined in the points below the insetting of West Horsley does not appear to comply with the overarching ethos of the NPPF.

The open spaces will be eroded by the infilling; In addition NPPF 17.7 states allocations of land for development should prefer land of lesser environmental value - site 38 is considered good agricultural land in the majority; site 38 also contains a grade II listed farmhouse which should be considered as part of NPPF 17.10 and a thriving nursery which is both a major employment provider and also an essential service provider for local families - it is unclear how this nursery would be retained in its current form if encircled within a dense housing development. The insetting of the village of West Horsley and the sites allocated can not be considered as sustainable development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Sites A37, A38, A40 and A41 are not practical for non-car based transport without alterative bus routes and improved pedestrian routes; this is further evidenced below.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8889  Respondent: 8694369 / Nicola Ogilvie Smals  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The NPPF and draft local plan emphasises the need to consider the historic environment. Site 38 contains a grade II listed farmhouse and West Horsley Village contains a number of listed buildings. The incorporation of so many houses within the curtilage of listed buildings does not comply with D3

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8890  Respondent: 8694369 / Nicola Ogilvie Smals  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Development should be commensurate to the size, character and function of existing settlements. Allocating a 100% increase in homes to West Horsley North is in no way commensurate to the size, character and function of this village. The local plan references the rich and varied mix of settlements and interspersed development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy S2 of the local plan specifically relates to the spatial development strategy; an additional clause should be inserted requiring development to respect the character and appearance of existing settlements. 4.1.6 states the preference is to focus growth making use of previously developed land. The proposed development locations in the village of West Horsley suggest a significant increase in the size of village, with limited use of previously developed land. The impact of these developments can be clearly seen on pg 346. These sites do not comply with 4.1.6.

Table 2 suggests that Station Parade, East Horsley is a Rural District Centre. Whilst the station parade contains limited shopping facilities the number of units is significantly smaller than a number of the local centres listed. This classification should be reconsidered. Whilst there are 3 parades of small shops spread between 2 distinct villages, this does not constitute designation as a district shopping centre either. Local residents are most likely to travel by car, to Cobham, Ripley or Guildford town centre to fulfil needs. Increasing the number of residents in this area will increase the substantially the number of car journeys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The local plan sets out the strategy relating to the mix of housing requiring most efficient use of land which is appropriate to the site size, characteristics and location. New residential development is required to make the most efficient use of land whilst responding to local character, context and distinctiveness.

The 2011 census indicates West Horsley is comprised of 1111 households; adding a further 345 homes by 20220 as detailed in sites A38, A40, A41 is a 35% increase to the current number of households in the village. The majority of new homes are proposed at the northern end of the village, the estimated number of households in the area classed as West Horsley north is around 400; the proposed sites therefore represent an increase of almost 100% to this area. This is in no way in accordance with the draft policies or with the NPPF guidelines. The character and community of this area of the village would be eliminated.

The current density within the current settlement boundaries of West Horsley is just under 10 dwellings per Hectare; the proposed density is 14-20 dwellings/ha which is a 40-100% increase to the established village density. The development densities are likely to increase once existing uses are considered (for example the grade II listed building and nursery school on site A38).

Furthermore the economic strategy does not make a case for the location of so many homes within the village of West Horsley and contradicts many statements in the local plan, not least the overarching presumption in favour of sustainable development. It is not sustainable to propose so many homes in one village; an increase of nearly 100% to one end of the village of West Horsley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8885  Respondent: 8694369 / Nicola Ogilvie Smals  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

West Horsley, unlike East Horsley, can still benefit from the policy relating to Rural Exception Homes, this allows small affordable housing development in perpetuity. No sites were noted as allocated to this programme within the local plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1
In order to accommodate the infrastructure upgrades required to accommodate the huge expansion of West Horsley a full study must be undertaken. As a minimum the following infrastructure issues are pertinent:

Primary schools; the Raleigh is already oversubscribed to the extent that many residents of West Horsley south are unable to secure places for their children resulting in twice daily car journeys to neighbouring villages of Effingham and Clandon, expansion of the school is not possible with the current confines of the school grounds therefore expansion of the village will exasperate the problem of capacity and will therefore increase local traffic to other schools;

Secondary schooling is generally obtained at the Howard of Effingham School, which is itself the subject of uncertainty as a result of the Draft Plan;

Drainage is a notable problem within the village currently, but any proposals must take into account the costs of upgrades;

There are poor provisions for pedestrians outside of East Horsley; West Horsley North does not have street lighting or appropriately sized pavements;

Local facilities such as the medical centre and parking for local shops must also be considered alongside capacity of the car park at Horsley Station.

The CIL as a tariff will pool resources however there are a number of specific local infrastructure improvements that must be taken into account. The infrastructure delivery plan makes little note of these local issues which are of significant importance given the proposed 100% increase in size to West Horsley North.

Site A38 contains an oversubscribed nursery school employing around 30 members of staff including support staff and around 100 children are on the role; it is unclear whether the proposals to develop this site include the retention the existing nursery leased from the land owner or whether it will be forced to close resulting in a loss of employment including many jobs for 18-24 year olds including training; furthermore this nursery school provides an essential service to residents. If the nursery school continues to operate there will be a considerable effect on the setting of the nursery and the planning application will require extensive consideration of size, access and safety issues. If the Nursery School remains, the density of the development at site A38 will be increased further which will be even less in keeping with the scale of the surroundings.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy 13: sustainable transport for new developments

Sustainable transport modes are encouraged in various sections of the local plan. In order to embrace sustainable transport modes new developments must facilitate trips by walking and cycling. Whilst East Horsley has a railway station, the development sites A37, A38, A40 and A41 are not within reasonable (defined as less than 1km) walking distance therefore requiring trips to the station by car; the station car park is at capacity. Legible walking routes would require substantial upgrade to street scenes, for example there are no streetlamps in West Horsley North.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As noted in the Plan a large proportion of the borough is designated greenbelt; NPPF requires that greenbelt boundaries are amended in exceptional circumstances. I do not believe that meeting additional housing need when brownfield sites and limited local infilling is available within the borough, can be considered as exceptional. The function of the green belt, as defined by the NPPF is to check the unrestricted sprawl of large built up areas; to prevent neighbouring towns merging into one another; to assist in safeguarding the countryside from encroachment; to preserve the setting and special character of historic towns and to assist in urban regeneration by encouraging the recycling of derelict and other urban land. Removal of West Horsley from the greenbelt will allow the village to sprawl into the countryside, further exacerbate the merging of East Horsley and West Horsley North encroaching on settlement boundaries, the developments will encroach on the surrounding countryside, the character of the villages will be significantly altered and the recycling of available derelict land will not be encouraged. Insetting the village of West Horsley (North and South) cannot be considered to be in accordance with Policy P2. The development sites proposed can not be considered as “limited infilling” given the substantial increase in village size that will result from the proposed development sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Paragraph 83-89 of the NPPF clearly state that alterations to the greenbelt are only permissible in exception circumstances, subsequent parliamentary directives issued to councils have confirmed that meeting housing targets cannot be considered as ‘exceptional’. The plan specifically states that only villages whose character make an important contribution to the greenbelt should be included in the green belt; the number of walkers and cyclists passing through West Horsley is a clear indication of the character of the village as a whole. 

I would like to note that I am not opposed to sensitive localised small scale housing within the existing settlement boundary of West Horsley, I also appreciate the need for villages to grow in order to retain vitality and viability, however the 100% increase in the number of homes proposed to the northern end of the village cannot be considered as localised infill and doubling the density does not respect the character and appearance of the existing village.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Policy S1 – Presumption in Favour of Sustainable Development
In accordance with the local plan policy S1 and the National Planning Policy Framework 2012, there is a presumption in favour of sustainable development. Sustainable development, as defined in the NPPF section 14, should meet objectively assessed needs unless any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies [in the NPPF] taken as a whole or specific policies [in the NPPF] indicate development should be restricted. These additional paragraphs should be specifically referenced within the local plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to Guildford BC proposed local plan (June 2016) and the continued inclusion in the plan of Three Farms Meadows (formerly Wisley Airfield) Allocation A35 phased development of new settlement of up to 2100 dwellings.

1. The site is in the Green Belt and the exceptional circumstances necessary for its removal have not been demonstrated.
2. The proposed development is too large scale and high density completely out of keeping with the surrounding area and swamping the village of Ockham.
3. There will be a very large increase in traffic around the site both during and after construction. Local roads are already congested and will struggle to cope with the new traffic volumes.
4. Air quality will also suffer as a result of the large increase in road traffic.
5. Parking is already inadequate at both of the local railway stations.
6. Schools and medical services in the area are already fully stretched and in view of this development, and those proposed on the Horsleys, will need to be substantially expanded. Will the developers be meeting the cost of this?
7. The sewerage system in the area is already overloaded and would need to be greatly expanded to cope with the very large increase in housing.
8. Likely to be a greater risk of flooding on and around the development site.
9. Loss of rural environment and local footpaths and bridle ways.
10. The planning application has already been unanimously rejected by Guildford BC's Planning Committee.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The total number of houses proposed could lead to there being upwards of 5000 additional cars on the local roads.

Roads are already very busy and car parking provision is minimal. I therefore foresee severe traffic congestion particularly at the junction of Ockham Road North with the A3, unless there are major road improvements.

Both the local school and medical centre are already at virtually full capacity.
And there might eventually be at least 12000 alltime people living in the area, it is clear that these services would be unable to cope without major new provision.

There would also need to be a big expansion of local shops.

Can the developers be relied upon to finance the expansion of the extra services?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have now had an opportunity to look at some of the issues ensuing from the New local plan and would like to mention the following matters.

I note that the council appears to have unilaterally decided to remove large parts of the area around the horsleys from the Green Belt, following which it is proposed to allow the building of some 450 houses within a radius of approximately one mile of my house, together with another 90 houses further afield.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The local services are already failing to cope particularly in times of heavy rain.

The manhole in my front garden overflows on various occasions when there has been high rainfall due to the backup of water in the main sewer.

During the very recent heavy rain one of the manholes in the main sewer in Green Lar has again overflowed leaving raw sewage in the road and surrounding ditches. Certain of the surrounding fields are also more to flooding and as in the long
term it is expected that we will have more extreme weather this is a continuing problem. The proposed developments will of course exentuate the problem and major new sewage and disposal methods will be required.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The proposal to build on Blakewell Farm is not justified as the farm is in the Greenbelt and is an area of natural beauty visible from one of Guildford's major landmarks, The Hogs Back. With developments being proposed for Normandy and Tongham development at Blackwell Farm will lead to the urbanisation of Guildford westwards to eventually join up with Aldershot with very little green space in between.

There would be no need for a development of this size if the University had by now met its obligations in building a student village for 7000 or so students at Manor Farm which was originally planned when that land was taken out of the Greenbelt a number of years ago. I understand that the University has still some way to go to meet the original planned numbers and if these had been met or exceeded then some 1200 to 1500 houses in the borough would have been available by now for the town's residents to buy or rent.

The proposals for a development of this size would mean that the infrastructure west of Guildford which is now at breaking point will seize up completely even with the new link roads that have been proposed as they will eventually lead onto the existing road system somewhere in the borough.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to strongly object to the plans for developments in and around the West Horsley village and the removal of West Horsley from the green belt.

The village is a typical ribbon development consisting largely of one very long road with houses either side. West Horsley feels more Rural than East Horsley being surrounded by fields. The infilling of these fields with housing would irrevocably alter the very nature of the village and turn it into another part of the continuous conurbation that runs from London out to Bookham. If the intention of the council is to make Guildford an outer suburb of London than obviously this is one way of going about it. However, the developments are far larger than the service infrastructure, roads, schools, drainage, doctors etc would be able to sustain.

I am not sure with the proposed development at Wisley whether the train services would be able to cope either.

I do not understand Guildford Councils ardent desire to build over the greenbelt, this must be about the 4th time I have had to write in to object to your plans, is the intention to simply keep going until people give up?
I live adjacent to the Manor Farm proposed building site and do not think 135 houses is a reasonable number to put on what is a small plot.

The housing density would be completely out of character with the area.

Furthermore, I do not understand why the council is slavishly following government dictat regarding housing provision, surely it would be better served asking what the government is doing to redistribute people across the country rather than cramming them all into the south east.

I therefore object to the proposed plan

I feel strongly that in view of the questionable way the housing need figures were compiled and now with the extra uncertainty following the Brexit vote, that a review of these needs must precede any other decision taking place. The housing need seems to be the key factor upon which all the other discussions hang. Appx d

These include the issue of Green Belt protections being removed, when brown field sites lie unused.

<td><strong>My objection is based upon the fact that after the 2016 Consultation it does not go far enough in reducing the still very large number of new dwellings proposed on the Green Belt. It is also totally unacceptable that Guildford Council is choosing not to constrain its overall housing growth as many other Councils have done to protect the Green Belt. Nothing has been put forward since last year's Consultation to improve the sustainability of the West Horsley development sites and therefore meet National policy requirements. Every home on the West Horsley sites will need at least one car to get to the shops, Medical Centre, and Horsley Station which are already over subscribed, with flawed evidence being relied upon to justify over expansion. Finally i wish to object to no changes being proposed since the 2016 consultation to insetting West and East Horsley from the Green Belt.</strong></td>

I am writing to express my objections to the new Guildford Local Plan with regard to East and West Horsley on the following points:

I object to the proposed removal of the Horsleys from the Green Belt, I do not believe that 'exceptional circumstances' have been demonstrated. I also believe that all Green Belt areas should be conserved at all costs. To allow the Green Belt to be eroded is a slippery slope and we should be looking to conserve all of the Green Belt for our future generations; In light of the above, I also object to the proposed extension of the boundaries of the settlement areas of the Horsleys, since it would enable developments on currently undeveloped 'green' sites.

The proposed housing numbers are unrealistic and would place a severe burden on the existing infrastructure to the Horsleys. These are rural narrow roads that are already unable to cope with current traffic. I have to regularly wait 2 weeks for an available doctor's appointment, increasing the population density would inevitably lead to an even longer wait time.

I therefore also object to the proposed development at Wisley airfield, since local infrastructure is ill-equipped to cope with this scale of development, including local schools, medical facilities, road quality, transport links and local drainage.

The removal of these villages from the greenbelt will take away the open spaces that define these areas and lead to villages merging and becoming one urban sprawl. It is vital that the semi rural villages are kept as this defines Surrey and the guildford area.

It is also not sound to plan increases in the populations of these villages without also expanding infrastructure. The local schools, doctors and roads are all crowded and over subscribed. This plan is not viable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

<td>I wish to <strong>object</strong> to the 2016 Draft Local Guildford Plan for the following reasons:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>1. Failure of the Local Plan to properly represent local needs or the needs of the Borough generally</td>
<td></td>
<td></td>
</tr>
<tr>
<td>A questionnaire produced by West Horsley Parish Council identified a local need for only 20 No. affordable homes.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>The effect of these proposed developments will be only to draw in more people from outside the area and impoverish the quality of life for those of us who already live here.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
| The number of houses being put forward has been assessed purely on empiric calculation and the Local Plan is being driven by a biased GBC planning executive committee, which puts its own members' self interest before the interest of those who
elected them. Furthermore, the figures cannot possibly be representative of accurate projected demand, not least because of the likely reduction of immigration following Brexit. The assessment is flawed and must be rejected.

2. Unauthorised removal of West Horsley from the Green Belt

By the guidelines set down by central government, and restated by successive government ministers, there should be no relaxation of Green Belt boundaries unless there are **exceptional circumstances.**

This condition is not being satisfied for any of the proposed development sites (A36, A37, A38, A39, A40, A41). The use of brown field sites is also a stated intention of central government - an option not fully explored by GBC.

For these reasons, the proposed West Horsley development sites must be rejected.

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()

GBC has cynically removed villages from the Green Belt in order to be able to say that they are complying with central government guidelines not to develop on Green Belt areas.

What are the exceptional circumstances that can be applied to the proposed development areas?

Stop trying to confuse people with ridiculous questions about legal compliance and get to the point ie. Housing numbers and the effect on the local community.

It is also absurd to have two pages of this questionnaire the same – pp. 7-9.

I object to the disproportionate distribution of houses across Guildford Borough, by far, the North East has taken an unsustainable number, in an area where country lanes are narrow and volume of traffic now using through routes makes roads gridlocked at rush hour.

I object to the methodology of drawing up the plan. Guildford Borough employs consultants who allegedly have planning expertise but have done so without taking account of Surrey County Council highway planners’ views, or the costs involved in improving the infrastructure, currently out side their financial capability.

The methodology is also flawed as this plan has been formulated without regard to village Neighbourhood plans. Surely, logic would suggest planning is best formed by a bottom up approach, not top down.

Insufficient data on infrastructure analysts in particular traffic movements and journey times in the area immediately surrounding the proposed development sites in East/West Horsley.

Also, given that HS2 and other major capital projects are being put on hold, following recent government cut backs, how can extensive housing development take place whilst A3 upgrading is by no means certain?

Draft Local Development Plan - Send, Send Marsh & Burntcommon

I object to the removal of Send and Ripley from the Greenbelt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/901  Respondent: 8703937 / Alan Sussex  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A43 and to the inclusion of the 30 hectares of Garlick's Arch in this Plan. This site is new and was not included in the Regulation 18 Draft, and has not been consulted on previously and is therefore improperly included.

Even so it forms part of the Green Belt and is permanently protected by the NPPF, which is there to prevent the merging of settlements. It also contains around 5 hectares of ancient woodland, some of which dates back to the 16th century.

Furthermore any further industrial space required could easily be accommodated at Slyfield.

However, the traffic chaos that this proposal will generate is the reason for my next objection;

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Policy A43a, the new on/off slip roads proposed to and from the A3 by the bridge on the A247 over the A3. These new junctions are ill conceived and will considerably increase traffic flows in the Burntcommon, Send and Clandon areas.

SEND CANNOT TAKE INCREASED TRAFFIC FLOWS

The A247 through Send would be gridlocked at rush hours, and at other times. At present there is a constant flow of traffic around the Burntcommon roundabout (by the Shell petrol station and Little Waitrose) all day and evening.

I also fear that those of us living in Boughton Hall Avenue, about 100 metres from this roundabout, will find access to and from the Avenue very difficult indeed. The junction with the B2215 is our only entry and exit point and there are at present 76 properties in this estate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/1522  Respondent: 8704417 / Philip Ashfield  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
My objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield now known as Three Farm Meadows - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings.

I very strongly object to the draft local plan for many reasons - and I wonder if any of the Councillors have really considered this proposal, and many others in the neighbourhood - over 600 houses in Horsleys, 400 in Burnt Common, 2000 houses on Gosden Hill Farm (Burpham) plus a number of smaller sites in nearby villages. These add up to in excess of 5000 new dwellings in this neighbourhood.

As far as I am aware no Councillor or Planning Officer has ever been to or considered the enormous effect that this would have, not only on the residents in these areas but many other people from far and wide. I wonder if the Councillors or Planning Officers even know where these places are and, possibly as they do not live near the area affected, they feel that they are correct in putting these plans forward (NIM BY/SM).

If these building projects were carried out then there would be total traffic gridlock not only in the local area but on the M25 and A3 and, of course on every one of the smaller roads in Surrey and the surrounding Counties.

Amongst my other objections to the draft local plan, where no consideration has been given, are:

- There are not sufficient Transport links (railways, buses or roads)
- There are not sufficient Schools/Academies to educate possibly up to 10,000 children in the area. There are insufficient shopping and parking facilities
- The roads in the area cannot take any increase in traffic as this contribute to grave danger to all users (car drivers, pedestrians and cyclists, etc)
- The air pollution is already at a high level and any increase caused would be well in excess of the legal level.
- I was under the impression that the Councillors had previously stated in their Manifesto that "the Green belt is safe" It now appears that these words were totally meaningless and untrustworthy.
- Councillors and Planning Officials have no right nor lawful reason to turn prime Greenfield land into an enormous urban sprawl/slum stretching from Greater London to Guildford and probably further out.

**Answer (if comment is on questions 1-7 of the questionnaire):**

The proposed development is located in the GREEN BELT outside any identified settlement area and represents inappropriate development which is by definition harmful to the GREEN BELT.

Accordingly to your planning department this proposed site is not in the village of NORMANDY? however the site is within 400-Slan THAMES BASIN Heath Special PROTECTION AREA. Why do we need an extra 1100 houses in Normandy anew 1500pupilsecondaTy school, where are all the pupils coming from. You will completely destroy our rural environment of village life, where will all the dogs go for walkies? If you take away our precious GREEN BELT land it will be completely outrageous. To consider doubling our village in a small area is an unsustainable pressure on all ready very busy roads.. In Westwood Lane we have a Horse and cart Railway bridge and Glaziers Lane a Railway bridge built in the 1800 both net fit for the 21st century propose

I strongly OBJECT to this proposal.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to **OBJECT** to the proposed local development plan.

The plan does not site any required exceptional circumstance or other justification to alter the existing Green Belt boundaries.

The Horsleys have a rich & varied mix of established LOW housing density settlements, with a considerable number of historic buildings.

The proposed development would introduce an element of HIGH density development, which would alter the character & outlook of the villages.

No allowance appears to have been made for the impact of these developments on the existing infrastructure. The infrastructure is already "creaking at the seams" without increased development.

This plan in it's existing form is totally inadequate & includes far too many houses. It really should be reconsidered.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I write to complain about the latest version of the "local plan" for West Horsley

This plan would represent the largest change, over a short period, experienced by Horsley in the last 1000 years!! Our infrastructure would be incapable of coping with this.

The roads are already congested and public transport cannot take any more.

Other items of concern are:-

Schools
Shops
Medical center
Surface water
Main drainage
Policing
Public open spaces

Other items which would soon start to break down are

Electricity
Mains Water
Gas
Telephone systems (inc BroadBand)

All these matters will require urgent attention, and should be an integral part of any 'Plan'

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I refer to the New Local Plan dated 6th June 2016.

Once again, I write on behalf of myself and others who feel VERY strongly about this.

My family have lived in the Horsleys for 4 generations and we have owned many houses over the years. The reason why we have made this area our home is simply because we enjoy living here, it offers green spaces and a friendly safe environment.

We cannot understand why GBC wise to completely change the nature of these villages. To even consider building 533 new homes is just ridiculous. To take us out of the Green Belt is unthinkable. To bring in Travellers Sites criminal.

The Horsleys cannot cope with this number of new homes........we do NOT have the infrastructure. Our roads, schools, Doctors, cannot cope now! Also consider more noise, lights, damage to the natural environment, flooding, drains etc .

This is on top of GBC'S favour of building 2,100 new homes at Wisley Airfield which is only 2 miles away!!!

I ask you to please consider the future of these villages and the mess that will be created if this number of new homes are built.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

Once again I write to OBJECT strongly to this new development.

The reasons are always the same ie this area CANNOT COPE with such a mass expansion of new homes. The effect on the environment, lighting, our terrible poor quality roads, Doctors, countryside, drains and flooding, travel etc.

Even considering Traveller pitches and sheltered/care homes is unthinkable. If allowed then the 2000 new homes will never be sold!

I have lived here nearly 60 years, from a child, and I do not like what you are submitting. This is a lovely area and already over populated.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2745  Respondent: 8706625 / Hilary Barker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base
I OBJECT to the number of houses being proposed for Guildford in this Local Plan: The Housing number of 693 calculated by GL Hearn who represent councils wanting to build large numbers of houses and greedy developers, has been proven to be a gross miscalculation of our housing need and far too high. The SHMA calculations on how this number was reached have not been provided and we have been asking for two years. Nobody in the council can tell us and GBC are refusing to provide the details.

- In 2010 GBC fought for 322 which met the housing need then and it appears that nothing has changed.
- This number of 693 is exaggerated and massively over stated and contains errors.

Despite a great deal of new evidence being made available that would reduce the dwellings per annum, residents are having to use this draft figure which is not right as the “need” to utilise Green Belt for development is based on this figure and for no other reason.

- 693 new homes for Guildford is more than twice that of any other Surrey borough.
- Guildford will be increased by 25%
- Guildford needs no more than 500 new homes during the Plan period all of which can easily be accommodated on urban and brownfield land with good local services.

- If this many new homes are built around Guildford it will only attract more immigration into the borough as it is proven that immigration is largely responsible for the housing shortage.
- These new homes will be mostly “executive” homes selling for a high price and therefore this strategy will not dampen house prices.
- These houses will be snapped up by affluent families wanting to migrate out of London and commute to the City.
- Our train network is already over loaded
- Our roads are congested.
- Now we have Brexit and this may well change our forecast on immigration numbers again and numbers for the university in the years to come.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT strongly to the development of 1100 and 50 houses and secondary school proposed for Normandy and Flexford.

- GBC should not be using Green belt land.
- The INFRASTRUCTURE is inadequate to cope with the extra housing – inadequate sewerage system, doctors surgery.
- The Aldershot Road into Guildford will not be able to cope with the extra traffic generated by 1150 homes = 2300 cars. Unclassified rural roads and two railway bridges are unsuitable for an increase in traffic.
- There is some doubt that there is a demand for a secondary school in this part of Guildford and the traffic generated would add to the congestion on the rural roads by a secondary school.
- This extra traffic will inevitably “rat run” through Wood Street Village which is already being eroded away by EXCESSIVE SPEEDING traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT strongly to the development at KEENS LANE of 140 homes and a Care home.

This land is currently part of the Metropolitan Greenbelt

- Keens Lane is a narrow rural road – mostly single lane not suitable for extra cars generated by 140 new homes.
- This land is within the 400m buffer zone for the SPA, SSSI at Whitmoor Common.
- This land forms part of the wildlife corridor between Broad Street and Whitmoor Common.
- It will generate extra traffic exiting onto the A323 and A322 which are both at a standstill in rush hour traffic trying to get into Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT strongly to the University’s planning application in this Local Plan to build 1800 homes on Blackwell Farm along with businesses, offices, supermarket, school and Traveller accommodation.

- Blackwell Farm site is located partly within the Surrey Hills AONB which the NPPF states “should be afforded the highest level of protection.”
- This is a major swathe of Green Belt land comprising 139 hectares of Green Belt land. Statistics show that 139 hectares is more land than was taken out of the Green Belt across the whole of England in the 12 months to March 2012.
- The Green Belt boundary was established 11 years ago when Manor Farm was taken out of the Green Belt and gifted to the University so that they could build student accommodation.

Blackwell Farm fulfils all 5 functions of the Green Belt: (NPPF para 80)

- To prevent urban sprawl from London.
- To check the unrestricted sprawl of large built up areas.
- To prevent neighbouring towns merging into one another.
- To assist in safeguarding the countryside from encroachment.
- To preserve the setting and special character of historic towns. (Guildford is an historic town)

NPPF para 79 states that:

“The Government attaches great importance to the Green Belt. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of the Green belt are their openness and their permanence.”

NPPF 83 states that:

- “Once established, Green Belt boundaries should only be altered in “exceptional circumstances”
- “Inappropriate development is by definition harmful to the Green Belt and should not be approved except in very special circumstance”

The NPPF (section 9 para 83) states that “boundaries should be defensible and permanent and capable of enduring beyond the Plan period.

- Part of this area to be built on is registered as an AONB.

GBC would have to show “exceptional circumstances” in order to build on an AONB in the Green Belt.

- It would have a devastating impact on the AONB from an aesthetic and environmental perspective.

The panoramic views from the Hogs Back form an important part of Guildford’s landscape heritage – you can see the cathedral from here.

- It has an ancient woodland which the University promised to protect in 2003 when it was given Manor Farm along with the ancient monument and Hazel Farm.
- Blackwell Farm has many public footpaths and bridleways which offer extensive walking, horse riding and bicycling to local residents and visitors to Guildford.
- ENDANGERED SPECIES: The Hogs Back is the only steep, north-facing chalk ridge in the southeast and is home to some rare plant species and many protected animals and birds.
- There are a number of endangered species which inhabit the Hogs Back – skylarks, little owls, yellow hammers and curlews – all in decline.
- FARMING: Blackwell Farm is a working farm. It is good quality agricultural land. With the proposed increase in population in the South East there will be greater pressure on food resources so we need to protect our ability to provide food and crops for this country in the future years. Statistics show that 40% of food consumed in Britain is imported and this figure will be rising.
**FLOODING:** This land is formed of chalk and currently soaks up a significant amount of surface water. If it is developed and concreted over, this surface water run off would exacerbate existing flooding problems in Wood Street Village and Fairlands.

**INFRASTRUCTURE:** The A31 is already a congested road onto the A3 Guildford bound and an extra 4-5000 cars generated will bring it to a standstill.

- It would be controversial to build roads across an AONB and an exit road through to the Research Park / Tesco roundabout would add enormously to the traffic congestion already experienced at this junction – the ambulances would not be able to get through to the RSCH.

Thames water does not have sewerage capacity to cope with a development of this scale.

Once again this shows greed by our University who were given this land for safe keeping. They have already broken many promises made for Manor Farm in 2003. If this development goes ahead they are likely to make hundreds of millions of pounds on housing which will be worth 1bn – a lucrative business deal for them which is not going to benefit the residents of Guildford and the loss of some very beautiful AONB Green Belt land.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

---

**Comment ID:** PSLPS16/5716  **Respondent:** 8706625 / Hilary Barker  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A53

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**I OBJECT** to this site being in the Local Plan:

- This site is in the Metropolitan Green Belt and should be returned to a private garden. Planning policy for traveller sites (PPTS) Policy E states that “Traveller sites are inappropriate development within the Green Belt and should not be approved except in very special circumstances.”
- The Traveller family who moved onto this site and applied for retrospective planning permission were granted a five year stay at appeal only until GBC provided them with a pitch in the area. As they must be top of the list for relocating, they should be allocated one of the 3 new pitches proposed for Cobbetts Close or Four Acres Stables or one of 17 new pitches at Hatchingtan - Burdenshott Road.

**SANGS**

**I OBJECT** strongly to GBC creating SANGS so that they can justify building developments within 5 km

- Russell Place Farm – Frog Grove Lane
- Broad Street Common and Backside Common
- Blackwell Farm
- Stringer’s Common
- Burpham Court Farm

**Definition of a SANG:** Suitable Alternative Natural Green Space.

- The role of a SANG is to divert visitors from visiting the Thames Basin Heaths Special Protection Area – SPA.
Worplesdon incorporates Whitmoor Common

- A SANG must provide a similar quality of experience as the SPA - be more attractive to visitors than the SPA.
- They should provide biodiversity, access, landscape character and wildlife.

GRA suggested in the consultation of the Issues and Options in 2013 that:

“A SANG needs to ensure that it can provide genuinely new opportunities for informal recreation in newly created areas of high potential wildlife value rather than simply a rebranding of areas already enjoyed by residents.

- SANGS are being created in Worplesdon in order to detract people away from Whitmoor Common SPA, SSSI, LNR. There is no proof that SANGS work. GBC will have to provide legal proof.
- They are also being created to allow developers to build extensively within a 5km radius of a SANG – this would allow for building in Normandy, Wood Street, Fairlands.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11499  Respondent: 8706625 / Hilary Barker  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

I OBJECT VERY STRONGLY to the strangle hold and seemingly the power that the University has over GBC. They must be relieved that the majority of Guildford residents are blissfully unaware of all the broken promises made by the University and the effect this is having on housing demand and housing shortage.

- The University has been expanding its numbers year by year – now 13,700 which makes up for 10% of the borough population (SHMA appendix C)
- Student growth now accounts for 50% of the recent growth of Guildford.
- We are now told that the University wants to expand to 17,000 students by 2017 – another 3000 full time students in the next 3 years.
- In 2003, in order to accommodate this growing rise in student numbers, GBC took Manor Farm (given to the University) out of the Green Belt specifically to allow the University to build a campus for their students and staff – 4,790 units.
- They have only built 1,665 units and we are still waiting for the other 3,125. The land is still available but is being squandered by concreting over large areas to create surface level car parks which should, at least, have student units built above.
- If the University was made to fulfil their 2003 commitments and house 60% of their students and staff on Manor Farm campus it would free up to 1,300 houses in Guildford and provide some much needed “social housing”.
- It would provide an income of 1.2 million for GBC as students /landlords are not obliged to pay council tax.
- By not building the student units on Manor Farm, the University is creating its own housing demand and this is reflecting on the Local Plan’s housing “need” numbers in the borough as it is being artificially raised.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the number of extra Traveller Pitches allocated to Worplesdon Parish and the insetting of Green Belt in order to create these Traveller pitches.

It was said in the previous draft plan “We have sought to select sites carefully and in a way which does not over burden any single area of our borough and ensure that the right infrastructure is in place.”

Worplesdon Parish and other adjoining Parishes of Normandy and Ash in NW Guildford have for many years taken the larger share of Traveller and Showman’s sites and is now over-burdened.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I am in favour of “affordable homes” being built BUT only for our own local families and key workers who already live in Guildford on a low income and cannot afford to get on the housing ladder – not those choosing to migrate from London.

By stating in the Plan that affordable homes will be provided “subject to viability” this creates an escape route for developers and it is financially more “viable” for them to build executive homes only. It should be taken out of the Local Plan.

There should be more plans to build affordable homes in the town centre for our key workers – hospital staff, teachers, firemen, police etc. They are the most important people and we should look after them.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to the lack of forward planning by GBC as the Infrastructure delivery schedule is not developed enough to support even the 5 year programme.

This council has a very poor record of delivering infrastructure to support developments. GBC freely admitted in the previous draft plan that “infrastructure provision has not kept pace with housing development.” I feel this remains much the same.

- The current poor state of infrastructure must be remedied in advance of adding further strain by increasing populations.
- Road infrastructure is a very basic need. The road system around Guildford is already gridlocked at peak times and the amount of traffic is beyond the capacity of most feeder roads from the North, West and East of Guildford.
- Primary and Secondary school places will not keep up with demand.
- Doctor’s surgeries with more doctors and facilities need to be built and staffed.
- The Royal Surrey Hospital is already at capacity for the existing population.
- Sewerage system in parts of Guildford – particularly around the NW and Fairlands is not fit for purpose for the current population let alone more housing in the area.

- ROADS: There are no known plans to improve the already serious road congestion on the A322 and A323 – a crucial factor in the refusal of two previous applications. These roads along with the A320, A31 and A3 are all major problems as they all funnel towards the Dennis Roundabout. These roads cannot cope with the extra cars generated by 693 new homes.
- The road system around Guildford is already gridlocked at peak times and the amount of traffic is beyond the capacity of most feeder roads from the North, West and East of Guildford.
- SCHOOLS: primary schools are expanding to meet the current demand on places but won’t be able to offer places to new arrivals in the area. At 11 they will need to move on to Secondary Schools. Can SCC afford to build new schools and pay teacher’s salaries?
- DOCTOR’S SURGERIES are already over-subscribed. The developers may build new surgeries but can SCC afford to pay the doctors and nurses to staff them?
- THE SEWARAGE SYSTEM, in many areas are already at capacity and not fit for purpose for the current population let alone another 693 homes.
- WATER SUPPLY in the NW corner of Guildford is becoming a problem with falling water pressure - the bore holes on the Hogs Back are said to be under strain.
- FLOODING in Worplesdon continues to be a problem.
- ELECTRICITY SUPPLY is not consistent in Worplesdon and other villages in the NW of Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Russell Place Farm - Wood Street Village SANG

This site is not needed as a SANG as it is adjacent to 128 hectares of Common Land – Broad Street and Backside Commons offer the residents and visitors enough varied recreational space in the village – walkers, dog walkers, horse riding, bicycling and running.

Natural England’s report NECR136 para 3.58 dated 13th February 2014 indicates that there is no evidence to suggest provision of a SANG reduces the number of visitors to the SPA. Contrary to the NPPF para 118.

• This land is within the Metropolitan Green Belt so this would be “inappropriate” development.

There is already a public footpath 377 across this land providing for dog walking facilities.

• This is viable working farm land. Agricultural land should be protected for the future needs of a growing population in the SE.
• This expanse of farm land is a very attractive feature in Frog Grove Lane and the plans put forward will turn it into a contrived, sculptured space with unnatural footpaths creating an “urban” character compared to the “natural” character of the established Commons.

Broad Street Common and Backside Common SANG

Common Land is given to the people for their recreation and enjoyment of natural spaces and environments and are already publicly available land where residents have the right to walk over the commons via s193 of the Law of Property Act 1925 and the CROW Act (Countryside and Rights of Way) 2000.

Natural England’s report NECR136 para 3.58 dated 13th February 2014 indicates that there is no evidence to suggest provision of a SANG reduces the number of visitors to the SPA. Contrary to the NPPF para 118.

It is therefore inappropriate to designate the COMMONS as SANGS as it DOES NOT provide any new additional recreational space.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
**I OBJECT** strongly to GBC’s plans to concrete over Green Belt land.

Guildford is made up of 89% Green Belt forming part of the Metropolitan Green Belt which was set up to:

NPPF paragraph 79 quotes “The Government attaches great importance to the Green Belt. The fundamental aim of the Green belt policy is to prevent urban sprawl by keeping land permanently open: the essential characteristics of the Green Belt are their openness and their permanence.

NPPF paragraph 80 The Green Belt serves 5 purposes:

- To check the unrestricted sprawl of large built up areas
- To prevent neighbouring towns merging into one another.
- To assist in safeguarding the countryside from encroachment.
- To preserve the setting and special character of historic towns.
- To assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

NPPF 83 states that:

- “Once established, Green Belt boundaries should only be altered in “exceptional circumstances”
- “Inappropriate development is by definition harmful to the Green Belt and should not be approved except in very special circumstances”

Can GBC demonstrate these “exceptional” or “special” circumstances?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

Firstly **I OBJECT** to the enormous amount of paperwork involved in this second draft Local Plan – total overload and to make it worse we have only been given a mere 6 weeks to read it with no consultation period during the most busy period of the year. No doubt what you were hoping for…………..

It is therefore highly unlikely that you will get the amount of responses that Guildford deserves as we are all fed up having to write and re - write and then there are the so called “hard to reach groups” you have talked about in the past. As from my experience so far, the majority of residents do not even know what the Local Plan is and have certainly not read it so will not be making informed comments on the issues that may well affect them and their families in the future.

These “hard to reach groups” still exist and will likely not be responding:

- the young and busy working people.
- the elderly who live alone and have no support from family or neighbours.
- those with limited IT skills – not owning a computer for access to information.
- ethnic groups - those with limited English language skills.
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. GBC want to double the size of the village but have made ZERO provision for infrastructure. Pure lunacy. We have a primary school that is 50 children over subscribed every year and growing. We have one bus service a day to Guildford. We have no public parking left at the railway station and a doctors surgery that cannot serve current residents. So where on earth does GBC expect the additional 1500 + residents to find said services…..There is NO infrastructure to support your ridiculous plan!!

6. There is no infrastructure to support the 500 proposed houses for Horsley. The roads are riddled with pot holes and we have very limited public transport. How on earth will the new residents get around.

The plan is a mess. Its sponsored by a political party who have completely ignored the wishes and views of the local community. The winners will be the developers and their share holders. The losers the natural habitat the villages.

Its an appalling mess.

Well done GBC!

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. You state that the purpose of the building more houses is to provide affordable housing - how on earth does GBC believe that allowing the Greenbelt to be developed on is going to suddenly lower land values here...have you all been smoking something funny? An average house in Horsley costs around £700K - An affordable house is deemed to be 80% of the total cost of the average house in that area currently making an affordable house in Horsley to be priced at well over half a million pounds - how many key workers can currently afford that cost???

Are GBC and the developers suddenly going to offset the costs to help people to get onto the property land...that would be a big fat NO!

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The plan to develop greenbelt is disgusting. Its a sad and desperate attempt by the Conservative led Council to appease their Whitehall bosses who have failed to tackle immigration. Over population is leading to this requirement for more housing. The loss of natural habit will never be replaced. Offsetting new area of green for those lost is will never workout. How can you replace centuries old greenbelt with new greenbelt zones. The lack of understanding by our Councillors in that regard is deeply disturbing. Below are quotes from local Councillors at the recent plan meeting:

Cllr Goodwin (con) said he didn't know what all this fuss about airpollution was all about

Last night Angella Gunning said I don't see why ancient Woodland should be protected, after all they are old.
Its deeply disturbing that these people have such a lack of awareness of such key issues.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Strategic Housing Market Assessment (SHMA): I OBJECT to this evidence base:** The number of houses proposed by outside consultants, G L Hearn, of 13,860 or 693 per annum over the next 20 years, has not been properly scrutinised by Councillors as the methodology used to arrive at the figures has not been made available. If this document is to be part of the evidence base and the foundation for a raft of the policies in the proposed Local Plan all the background information on which the calculations were made must be put in the public domain.

An independent, highly qualified expert, Neil McDonald has indicated the housing number should be 510 per annum, as has Cllr David Reeves in his calculations. This is a reduction of almost 25% on the unsubstantiated figures presented to the residents by Guildford Borough Council and demands some detailed response which although demanded for sometime has been waved away by those responsible on the Council on the grounds that the information is 'commercially confidential' as 'intellectual property'.

It is interesting to note that G L Hearn on its website states "is increasing its work with the public sector providing a consultancy approach with a strong commercial aspect." One feels “strong commercial aspect” is the overriding aspect of the SHMA produced for Guildford Borough Council.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Sites in East and West Horsley: I OBJECT** to the inclusion of Sites A36-41. These sites should not be looked at individually but at the cumulative impact they will have on the two villages, but in particular West Horsley. Under the Plan the very rural West Horsley would have its housing stock increased by 35%, this is wholly disproportionate when set against the increases proposed for urban Guildford and Ash & Tongham. The infrastructure in the villages cannot support a further 593 houses, the local schools are already oversubscribed and medical centre is overstretched. The drainage already has difficulty coping with the roads regularly flooding and being impassable when there is heavy rainfall. It is noted in the site descriptions except A36 there is “surface water flood risk” and in the case of A39 the flood risk is “fluvial and surface water”. Building on open Green Belt agricultural will only exacerbate the problem. In the "Land Availability" survey it refers to the “Horsley flood hotspot” when discussing the sites referred to. There will no shop in West Horsley from October 2016, the parking at East Horsley, to be designated a "District Centre" is already full to capacity. As is the station car park at Horsley Station, whatever the hope is to encourage cycling and walking on a cold, wet winter morning and evening people will use their cars and 593 extra households would suggest at least that number of extra cars on roads.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Site A35 - Former Wisley Airfield: I OBJECT to the inclusion of the former Wisley Airfield as a site for 2,000 homes. This is totally inappropriate development that requires the land to be taken out of the Green Belt to even suggest that it should be built on. No exceptional circumstances have been given to justify such a move. Guildford Borough Council is being hypocritical in its inclusion in a Proposed Local Plan published the day before a planning meeting that gave very strong reasons, it being in the Green Belt and the traffic management next door to the already excessively busy Junction 10 of the M25 where the A3 joins that road for refusing an application to build 2,068 houses on the site. If there were no exceptional circumstances to justify planning permission the day after the Local Plan was published how can there be the day before! The information about the amount of brownfield land at the site is incorrect.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Green Belt: I OBJECT to the insetting of 14 villages from the Green Belt, the infilling proposed and the adjustment of the settlement boundaries in a number of other villages. This effectively gives a free for all to developers in those villages. The Green Belt was introduced to provide a lung round the London Metropolitan area. Guildford’s plan to put 8,086 new houses in that lung destroys its whole purpose. The claim that only 1.6% of the Green Belt in the borough is a manipulation of the figures as it ignores insetting, infilling and settlement boundary extensions. It merely tries to put a good light on a disreputable policy. The "exceptional circumstances” required to take this action have not been demonstrated in the proposed Plan, which ignores far more suitable brownfield sites in the urban part of the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Countryside (ie beyond the Green Belt): I OBJECT This appears to give stronger protection to an area beyond the Green Belt and outside the AONB than within those areas (the Green Belt and AONB); this is anomalous. It is noted, perhaps cynically, that this happens to include the wards of the Borough that the present leader and immediate past leader of the Council represent. Why should these be given extra protection when other much more rural parts of the Borough have their protection reduced.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Flood Risk and water source protection zones:** I OBJECT

The proposed Local Plan puts by far the majority of new housing on greenfield sites, this can only increase flood risk by concreting/tarmacing over land which at present acts, at least partially, as a catchment for excess rainwater. The better use of brownfield sites in already urban areas for housing with proper flood management would be more appropriate.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Thames Basin Heath Special Protection Areas:** I OBJECT

The policy appears to be ineffective. There should be NO development within 400 metres and only VERY LIMITED development within 5km. Yet the proposed Local Plan ignores this with the inclusion of a large development at the former Wisley Airfield. There are also the proposed sites at Garlick’s Arch and the various sites in West Horsley. The provision of SANGs (Suitable Alternative Green Spaces) will not stop dog walkers, cyclists and general leisure users going to the protected heaths when those heaths are nearby to an increased population should the Plan be adopted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Various Sites along the A3/A31 Corridor: I OBJECT not only to site A35 mentioned above but the various other sites that have been proposed along the A3/A31 corridor. These, apart from the brownfield site at Slyfield, are all on open agricultural land currently in the Green Belt. The destruction of swathes of Green Belt and open countryside when brownfield sites in the current urban envelope are available is wholly contrary to the NPPF guidelines. It will mean there is continuous built up land from Junction 10 of the M25 to the North East of Guildford to the junction of the A3/A31 to the South West at Blackwell Farm. There can be no justification of “exceptional circumstances” to cut into the Green Belt and countryside in this way.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Green Belt

I object to the claim that West Horsley and a further 13 villages are "now inset in the Green Belt" under Green Belt Policy P2 (4.3.13).

Guildford Borough Council merely proposes that this should happen. The villages remain in the Green Belt until a decision on the proposal by the Inspector. The wording in your document is incorrect.

I object to there being no changes are being proposed since the 2016 consultation to the insetting West Horsley and the further 13 villages listed.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough. It is too high because of

- The critiques of the SHMA submitted by Councillor Reeve and the Guildford Residents’ Association. They provide compelling justification for materially reducing the proposed
- The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have ignored these factors

Moreover the Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough. This is over double the previous figure of 322 used in previous plans. The SHMA report methodology is apparently based on commercially confidential modelling assumptions that are not publicly available for checking or review. For such an important public decision, this runs counter to all democratic principles of accountability and is totally unacceptable

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A25 - proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds there is a grave risk that the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure for development.

It would represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan puts forward no compelling evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.
If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The site was inserted in the draft plan at a late stage just before publication of the draft without proper consultation. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an primary school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

Taken together with the development of the Gosden Hill site, the outcome would be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition of north facing ramps to the A3 at Burnt Common would do great environmental damage to local communities. There is no significant requirement for local traffic to access the A3 to the north. The addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.
This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this proposal.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I object to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I object to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy E7 Guildford Town Centre

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy H1 – Homes for all.

Numbers aside, the policy in the blue box states that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not sufficiently specific to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should be provided by the University and the other higher education bodies for 100% of new students and more than 60% of existing students. This would free up ideal family accommodation in the urban area. I understand that other university cities insist on higher percentages than those proposed in the plan. It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.
Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15024  Respondent: 8708545 / Nigel Wicks  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object because of the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads. Many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are already in a poor condition as a result of insufficient public funds for their maintenance and renewal.

I object to the development proposed in the local plan. It will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The Council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road rendering it dangerous, especially when vehicles mount the pavements.

The borough’s infrastructure is already heavily strained. Yet the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording is silent about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours, ignoring the effects of junctions and understating peak demand - hides the problem, which will worsen as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.
Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing green field over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. This plan, however, assumes infrastructure will be provided housebuilding without providing evidence that it is likely to materialize. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of Community Infrastructure Levy (CIL) income. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways:

- Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. Without commitments to improve these services, there should be no development of the Garlick’s Arch site.
- Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.
- Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.
- There is no provision of the increased capacity of Guildford hospital.

Attached documents:

Comment ID: PSLPP16/15027  Respondent: 8708545 / Nigel Wicks  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object because of the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), would take place before any improvements are made to the trunk road network. The A3 &
M25 are already at capacity during peak hours and any development prior to improvement of these roads will make the situations worse.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I object because of concerns about poor air quality (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough, will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I object to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. It is meretricious to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.
Paragraph 4.3.16 states that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt.

No evidence is put forward to suggest that this balancing exercise has been done. The Countryside Study does not meet the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt, nor carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. Each of the identified Green Belt sites proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is implausible, given the borough’s location on the edge of Metropolitan London.

In addition I object to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch and so provides no evidence base to support inclusion of this site. Nor was there adequate public consultation before that site was included in the proposals.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
materially since the Council received 20,000 objections to its first draft plan in 2014. There is scant evidence that the Council has given thorough consideration to the constraints, particularly the lack of infrastructure. Nor is evidence put forward that exceptional circumstances justify development on green field sites.

The housing needs assessment is flawed in various respects and overstates housing need. In addition, since it was produced, the Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should consider constraints before determining the housing number.

Even if having properly applied constraints, specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15013  Respondent: 8708545 / Nigel Wicks  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to this Policy as the development proposed will not be sustainable (Policy S1).

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed.

Policy S1 is seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity.

Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. Over 60 percent of the proposed housing would be in the Green Belt. The commitment to approve planning applications “wherever possible” and “without delay” is prejudicial. Countervailing references to sustainability are so vague that the National Policy Planning Framework (NPPF) presumption in favour of sustainable development becomes a presumption in favour of any development at all.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. These sites are also unsuitable since they will not be supported by sustainable access transport. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. There are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater
consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided at much lower cost.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I write to object to the Guildford Borough Proposed Submission Local Plan (June 2016). I set out below my objections to specific policies and matters within the Plan.

First, let me say that I believe that the scale of development envisaged in the Plan is not in the national interest. There is considerable agreement that economic development in the United Kingdom is unhealthily skewed towards the south east of the country. The proposals in the Plan would intensify such development. It is in the interests of the country at large that development in our region should be restricted so as to provide incentive to take place in other regions less favoured than ours. I therefore object to the scale of development envisaged in the Plan and ask for it to be materially reduced.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the Borough Wide Strategy (Policy S2).

The borough wide strategy is poorly considered. It proposes 13,860 housing units being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from that of all the other Borough Councils in Surrey. No justification is given for this differentiation.

The housing number is based on pre-Brexit data for economic and population growth, including migration. This number needs to be revised downwards.

The critiques of the Strategic Housing Market Assessment (SHMA) submitted by Councillor Reeve and by the Guildford Residents’ Association provide compelling justification for materially reducing the proposed number.

As a result of the juxtaposition of Guilford with Woking, Guildford residents are effectively being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The Plan in general and this policy in particular does not address the fact that Guildford exists as part of London's commuter belt. The Plan also ignores the fact that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

It is unreasonable to embark on a radical transformation of the borough on the basis of this unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). This would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban. The needed housing should be provided by concentrating development on urban brown field sites and by increasing the housing density of existing built up urban areas.

The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighbouring towns merging into one another.

The strategy adopted in the Plan represents disproportionate development in the north east of the borough as a result of the allocation of Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Currently these three Wards represent only about 11% of the existing housing in the borough and are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. This would result in the coalescence and a merging of identities of the surrounding villages. In short, the Plan is unbalanced and does not reflect the current spread of housing across the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix C: Infrastructure Schedule
I object to the reliance of the Plan (Policies SRN 2, 3, 9 and 10) on the change of responsibility for the provision of funds for infrastructure, especially transport infrastructure, to developers and public agencies such as Highways England and Surrey County Council. In the former case developer funding provision will undermine the requirement to provide forty percent affordable housing and in the latter case the budgets of such public agencies, both as to their quantum and allocation, are totally outwith the control of the Local Authority.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the evidence base as it applies to Policy S2; because it fails to reflect the deterioration in national economic prospects as a result of the EU Referendum and thus overestimates the need for the provision of housing numbers; because it assumes that a high proportion of students will remain in the borough after graduation rather than is most likely moving elsewhere; and because it encourages development in the South East when it is declared government policy for development to be balanced throughout the country and especially in the northern English regions.

I object to the proposed changes to the plan and evidence produced or updated since 18 July 2016, for all the relevant reasons set out in the submissions of the East and West Clandon Parish Councils.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Question 2: Legal Compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I object to the proposed changes to the plan on the basis that they are not legally compliant since they are in conflict with the framework stipulation in paragraph 87 of the NPPF which states

“As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances.” (Policy P2, P3, E5).

It is relevant here that, according to the Guildford Green Belt Group, 70% of new housing will be in countryside and 58% of this is on Green Belt (Gosden Hill, Wisley, Blackwell Farm).

The Plan does not provide evidence of the exceptional circumstances, which would justify this use of Green Belt land. Nor does the Plan justify the exclusion of further development in brown belt and urban areas sites. More such sites should be included to make the Plan legally compliant.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( Yes ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- **Statement of objection.**
  - Despite having concerns at the lack of scrutiny by GBC as to how the Objectively Assessed Need figure for the Local Plan has been derived, I acknowledge the need for and support some development throughout the borough.
  - However, **Object** to the large scale ‘strategic’ development proposed at Policy A46 which I consider to be inappropriate. Notwithstanding that I am a resident in Glaziers Lane who would be directly affected by the proposed development; I have tried to remain objective in the points of objection made below.

- **‘Developer led’ policy for site A46.**
  - Cllr Spooner, leader of GBC, stated during his visit to a residents meeting in Normandy on 3 May 16 that the previously proposed ‘safeguarded’ A46 site was to remain ‘red’ in the 2016 Local Plan.
  - This meant that the site was within the Green Belt, was a sensitive area contributing to the openness and permanence of the Green Belt and would therefore not be built upon. This apparently unless a developer proposed building a school on the site. So in other words, this has now become a ‘developer led’ site.
  - I contest that the building of a secondary school is an ‘exceptional circumstance’ enough to bring Normandy out of Green Belt status.
  - The Local Plan should not be 'developer led'.

- **No ‘early and meaningful engagement’ with the local community.**
There has been no ‘early and meaningful engagement’ with the residents in Normandy regarding the proposed development at A46. Its appearance in this Local Plan is the first that I have learnt about it. This runs contrary to NPPF 155 which states that this engagement is essential.

It is clear that GBC and the developer, Taylor Wimpey, have been in discussion about the site as far back as at least 2014. See attached Taylor Wimpey plan dated September 2014 obtained subsequent to the Local Plan’s publication through a Freedom of Information request. There has been no consultation with residents between 2014 and the issuing of the Local Plan.

The proposed development of 1100 homes on site A46 would ‘double’ the size of the village, thereby removing all of Normandy’s current characteristics of community and charm.

I chose to live in Normandy for its openness, rural peacefulness and access to the countryside. I am unconcerned about the lack of food shops or a pub within the village; I accept that facilities such as these thrive or die in a competitive market and with availability through the internet. Although these facilities used to exist in the village market forces have determined otherwise.

Rather than a large proposed development on a single site within an existing community, why does the Local Plan not propose to spread the need for development more equally across the whole borough? This would reduce the significant impact it will have on communities and share development within all parishes.

- **Need for a secondary school in Normandy**
  - There is no evidence within the Local Plan or supporting documents to suggest that a secondary school is required in Normandy.
  - Surrey County Council has not declared that there is a requirement for such a school in Normandy.
  - With no requirement for a school there is no requirement for 1100 homes.
  - If only 1FE of this new 7FE school is anticipated coming from Normandy (Appendix C - SED3) then the school could also be built elsewhere. This could be at Blackwell Farm which was recommended during the 2014 Local Plan process.
  - Local children from Normandy already travel by train from Wanborough to Guildford for secondary school.

- **Inadequate infrastructure to support proposed development**
  - General points:
    - There is no evidence that, given the existing national shortage of funding that exists for current infrastructure projects, any of the proposed infrastructure requirements identified in this Local Plan would be met.
    - The Local Plan should state quite categorically that without guaranteed funding for the entire infrastructure plan required to support a development of this scale, the development should be not go ahead.
  - There is no evidence within the Local Plan that the proposed changes to infrastructure would ameliorate a road system in Normandy that is at times already working to capacity (Appendix C - LRN 17, 18 and 19 refer).
  - Glaziers Lane is a busy rural ‘D’ class minor road (D60) with a recognised speeding issue. As well as local traffic, it takes traffic to and from the Hog’s Back via Wanborough Hill. Given the adjacency of housing to the road, there is little opportunity to change the width or direction of the carriageway. The footpath running up the Lane has to change sides in two places. This lane would therefore not contribute to safe, sustainable travel and access to the site given the likely increase in traffic.
  - The bridge over the railway in Glaziers Lane and tunnel under the railway in Westwood Lane are hazardous places at the best of times. The road over the ‘blind’ bridge in Glaziers Lane has an unnerving hump in the road to the south side and the tunnel is single file traffic with a narrow pedestrian walkway. With the increase in traffic that this proposed development would bring, no consideration seems to have been given to improving these bridges for the safety of road users and pedestrians, let alone ease of access to the site.
  - I consider that the proposed development would have a significant impact on the village resulting from commuter vehicle noise, pollution, and congestion and that this has not been recognised. Site traffic during development would exacerbate this situation.
  - **Other considerations.** I am also concerned that other infrastructure requirements would be looked over at the point of planning application because of a shortage of funding.
    - **Sewerage.** Rainwater run-off already causes significant disruption to residents with sewers backing up into properties and onto roadways. The main sewer pipe in Glaziers Lane is an
old six inch diameter pipe and would not be capable of handling the demands from any further development.

- **Flooding.** The site area, being on a clay based soil, has regularly become either flooded or susceptible to flooding for up to six months of the year. I am concerned that despite with the best intention of including a SuDS (Appendix C - FRR5) on site that this would not be effective enough for the whole site and that locally there would be areas of increased flooding.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: [2516_101_A_Concept_Masterplan.pdf](2516_101_A_Concept_Masterplan.pdf) (5.6 MB)
1. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

2. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as well as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as well as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

3. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. APPENDIX D

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.
The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ( )

1. **POLICY A25 - Gosden Hill Farm**

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents
2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 June 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.
The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

1. **POLICY A43 AND A43a – Garlick’s Arch**

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase...
when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)
The addition of north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of 'through' traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. **POLICY D3**

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY D4**

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. **POLICY E1**

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

---

---
There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E5

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/4511  Respondent: 8709249 / Geoff Spink  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E6

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For
example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/4505  Respondent: 8709249 / Geoff Spink  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H1

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students are accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.
It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/4506  Respondent: 8709249 / Geoff Spink  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H2

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/4510  Respondent: 8709249 / Geoff Spink  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations were available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. POLICY I1

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists pass through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable
(and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY I2

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).
Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. POLICY I3

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. **POLICY P2**

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt sites proposed to be removed from the Green Belt should be carefully assessed against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt sites proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.
This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/4512   Respondent: 8709249 / Geoff Spink   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. SITES - POLICIES A1 TO A57

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. POLICY P4

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
It seems to me that the plan is draconian in approach, whilst failing to absorb the previous genuine concerns of local residents regarding infrastructure and traffic problems. Furthermore, the plan seems to assume the annexation of Green Belt, contrary to Governmental stipulations

1. POLICY S1

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. POLICY S2

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinised by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighbouring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.
The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

1. **Questions posed by Guildford Borough Council as part of its consultation.**

**Questions from GBC**

24.A. **Question 1: The evidence base and submission documents**

The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence. The evidence base documents contributing to the preparation of the plan are listed in Appendix D and can be found on our website (links open in a new window).

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

**ANSWER**

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

24.B. Question 2: Legal Compliance

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole is legally compliant? Please provide the following information being as precise as possible:

- why you consider it is or is not legally compliant and
- what change(s) (if any) you consider necessary to make it legally compliant, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SQLP16/812  Respondent: 8709249 / Geoff Spink  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
24.C. Question 3: Soundness

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound? Please provide the following information being as precise as possible:

• why you consider it is or is not sound and
• what change(s) (if any) you consider necessary to make it sound, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. "Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt." Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound

4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018

5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars

6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham

7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework

8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**
24.D. Question 4: Duty to cooperate

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate? Please provide the following information being as precise as possible:

- why you consider it has or has not complied with the Duty to cooperate and
- what change(s) (if any) you consider necessary to make it comply with the duty to cooperate, explaining why this is the case.

**ANSWER**

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I trust that the objections made above are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** pslp172/4359  **Respondent:** 8709249 / Geoff Spink  **Agent:**

**Document:**  Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4360  Respondent: 8709249 / Geoff Spink  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** pslp172/4361  **Respondent:** 8709249 / Geoff Spink  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to
build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.

4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”

5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.

7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Page 1809 of 3335
The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp17q/520  Respondent: 8709249 / Geoff Spink  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/4316  Respondent: 8709601 / Robert Fletcher  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I live in West Horsley and I am writing with my objections to the Guildford Borough Proposed Submission Local Plan.

**Permanent loss of greenbelt never to be retrieved for our progeny**

The current green belt and surrounding policies have worked well in preserving the nature of this area. The proposed changes will turn the Horsleys into a residential area getting on for half the urban area of Guildford - by comparing the area enclosed by the proposed green belt boundary. Horsley and particularly West Horsley with it's open spaces along East Lane has a very different character from the urban spoke that runs through Ewell, Epsom, Leatherhead and out through Fetcham and the Bookhams towards Horsley. Horsley is the first place along this spur that is properly surrounded by countryside with a village and not suburban feel. This is wholly down to the restriction previous authorities have placed on development. The Horsleys serve the Surrey hills immediately to the south, an area of outstanding natural beauty. This is significant generator of tourist trade for the village. The change in character will have a huge impact. For example, we have a Camping and Caravan Club site in Horsley. Part of the proposal is to build a large area of housing to the north and east of Waterloo farm where the camp site is located. Can you imagine the change in the approach road to the site, from a drive between open fields consummate with the rural feel of the area, to a drive through a housing estate. The council have failed to demonstrate the exceptional circumstances necessary to remove the proposed sites in Horsley from the Green Belt.

Sadly the focus of the plan appears to be on green field sites as cheaper option for developers over the many brown field opportunities in the borough.

**An unsustainable growth in the population of the Horsleys**

The proposed plan, is grossly disproportionate both in the proportion of Guildford's housing allocation landing on the Horsley area, and in the size of increase in housing numbers in West Horsley (35% in West Horsley). To the residents this looks like a piece of exploitative opportunism on the part of developers and councillors - many sites already being under option.

I am very concerned about the infrastructure in the area and it's ability to cope with the population we have now.

**Inadequate Junior Schools Provision**

The schools have no capacity left to accommodate more children and the Raleigh Primary School has not enough real estate to take on more pupils without having to build on the school field which is valuable for physical recreation, an increasingly important part of the curriculum to encourage healthy lives.

**Inadequate Senior Schools Provision**

We already have had the nightmare of parents being told places are not available in local senior schools and the prospect of having to take their children many miles to school - bad for the children, the community and the local transport systems. A jump in population will make this situation unmanageable.

**Inadequate Roads and Parking**

The roads in the area are already busy and often in a poor state of repair. The area around the junctions between Nightingale Avenue, East Lane and Ockham Road are seriously congested in the morning as children are being dropped at both the Raleigh and Glensk Schools. The proportionate increase in cars and traffic in the village would be unsustainable and completely out of character with the current rural nature of the village. Many of the residents would catch the train to work. Horsley station car park is already full on week days and would need expansion to support the new commuters.

Medical facilities too are stretched currently and could not cope with the extra population. The car park is often full and people use the few extra spaces available at the village hall. More people would again dictate the provision of extra facilities.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
### Flood Risk and Inadequate Drainage and Sewerage

There have been drainage problems in the area around Waterloo Farm leading to localised flooding and backed up drains - about 5 years ago we had sewage across our back garden where the water level in the system had risen above that of some of the drain covers - notably one on our property. This had backed up from the main sewer. These sewers could not cope with any further development in the area.

The area around and to the rear of Waterloo Farm is also low lying and always floods in periods of heavy or sustained rainfall. Evidence of the wetness of the area can be seen by the thriving willow trees behind Waterloo Farm. This makes this area most unsuitable for housing.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

### Inadequate Infrastructure Planning

I was astounded to discover that the Borough's Infrastructure Delivery Plan failed to address these issues at all, let alone adequately. No planning gain seems to have been outlined in the proposal.

The proposed local plan for the Horsleys is a travesty when set against the criteria of the National Planning Policy Framework (NPPF) that new residential development must respect the character and density of housing in the area and be limited in quantity by the availability of infrastructure and local facilities.

Sadly, the drive behind the plan appears to be to maximise the financial opportunity for developers in the area over addressing the needs and well-being of council tax paying residents.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Land bounded by Aldershot/Guildford Railway, Glaziers Lane, A323 & Westwood Lane.

I supported and commented in detail to the 2013 Local Plan -Ref my letter 26-11-13.

When the 2014 proposed plan was issued all had changed and suddenly Green Belt Land had become safeguarded. I opposed these significant proposed changes. -Ref my Letter 18-9-14.

Now we are presented with the proposed Draft Local Plan 2016. Having considered in detail the impact this will have on our rural area of Normandy/Plextord I am strongly opposed to this Plan on the following points.

1 - Green Belt Land
The Borough conveniently refers this area as "safeguarded" but fails to demonstrate "exceptional circumstances" to transfer this area from Green Belt Land. For our rural area of Normandy this must stay as Green Belt land.

2 - National Planning Policy Framework (NPPF)
This provides local residents an opportunity to be involved with the proposed redevelopment of their home environment. No involvement was available to residents until this plan was released. For me this appears to be Developer (ie Taylor Wimpey) led with proposals to build Schools, Care Homes, Shops etc in order to get Planning Permission for large scale profitable development!

3 - School
This is "Chicken & Egg" - build the houses you will need a new secondary school! However there seems no justification for a new school as the two nearest secondary schools Ash Manor and Kings College Guildford are under subscribed. Kings College have stated that if there were Increased needs they would be prepared to expand!

4 - Infrastructure
The Village is already heavily congested with through traffic due to the density of transport along the A31 Hogs Back and A 323 Aldershot to Guildford commuter flow. Development of the scale proposed will completely grid-lock the Village especially with school collections! The railway bridges in Westwood Lane and Glaziers Lane would make road redevelopment hugely expensive.

5 - Thames Basin Heath Special Protection Area (TBHSPA)
The A46 site is with in the zone of protection and if developed would Impact seriously on the five key threats to the Area.

6 - Scale of Proposed Development
I accept that more affordable housing is urgently needed and I supported the 2013 Proposed Local Plan to achieve this objective. local Plan 2014 was targeted principally to the West of Guildford with 53% of new housing for the next 10 years in this area which for me was unacceptable. Now with 2016 Local plan it will totally change a pleasant rural Village Into an unacceptable urban congestion!
1000 plus properties in a highly congested area subjected to flooding is not right for this rural area. The Proposal includes retail properties includes retail properties, again I suspect the Developers suggestion. We have had shops in the village when we first moved to Normandy 55 years ago but they could not survive against the Supermarket's range and sadly I expect the same would happen again!

I was very surprised the Borough proposing to mix Traveller Pitches within Residential housing. With two different cultures there is potential for conflict!

7 - Environmental Issues

The urban spread West of Guildford and East of Aldershot is destroying much of our important rural habitat and in turn much of our native wildlife*. We must protect the valuable areas that remain.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Wisley Site - Possible site for future expansion but who would trust the company for the project? Basis is an off shore tax haven that’s enough to convince me they have little or no interest in surrey's well being. Their sole objective will be to get the maximum cash return from the project. Money is their motivation – not concerns with developing a site that is – keeping its location eg. opposite the royal horticultural garden at Wisley.
Finally does the site have the necessary infrastructure to support further development. The simple answer to that is NO, it does not, so why produce a plan that will only jeopardise what we need to hang on to.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/9425  Respondent: 8711489 / Malcolm Wych  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have tabled my comments and objections previously but believe I now need to do so again.

The Horsley Village proposed removal from the Green Belt is cited as being due to exceptional circumstances. I see no justification for this and do not believe the case is proven. These villages should remain in the Green Belt

Extension to bowanes in settlement area. I see no sound reasons supporting the proposed changes. I believe they are being driven by the councils personal need to provide space for additional development. The basis for such moves are unproven and suspect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/1072  Respondent: 8711489 / Malcolm Wych  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

What I find suspect or flawed in all the documentation is the way the provision of additional amenities in relationship to the plan are apparently regarded by the planners as "Givens". For example new cycle paths, primary schools, roads, Doctors surgeries are shown as part of the infrastructure in support of additional housing. However in reality there is little evidence that Surreys budget can support things as they currently are-let alone provide additional support for an enlarged population. As one small example I have lived in East Horsley since 1990 and during that time the paths and service roads at Station Parade, Ockham Road South have never been resurfaced or upgraded. A small example maybe but if the Council cannot attend to a small issue like that how can it expect to fund an enlarged population and infrastructure as outlined in the plan.

As such I worry that the plan represents a "Civil Service" style response to a Government dictate to provide more homes-at whatever the cost to the Green Belt,Local environment or Village communities.
I'm worried.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPA16/1199  **Respondent:** 8711841 / Rosmarie Roberts-Kunz  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT ESPECIALLY TO 6 POLICIES: A36, A37, A38, A39, A40 & A41:

- Amount of new housing far exceeds local need.
- Housing density excessive when compared with existing development.
- It would transform the Horsleys into a sizable town, something for which no case is made.
- Collective impact of these 6 sites on a small part of the borough not considered. Should not be treated as isolated, separate sites.
- Total amount of building involved disproportionate with the amount of planned development elsewhere the borough, especially less sensitive urban areas not protected by Green Belt.
- Sites unsustainable, since key infrastructure is lacking and no adequate provision is made to increase it – e.g. poor wastewater capacity, lack of schools, absence of traffic management plan, flooding.
- No account taken of additional impact of Wisley Airfield site on Horsleys.
- Extension of settlement boundaries too permissive. The Horsleys are characterised by streets with development along only one side of the road. Policies allow too many adjacent green fields to be developed by squaring off boundaries and claiming they don’t contribute to Green Belt “openness”.
- Green Belt gap with neighbouring settlements hugely narrowed, especially if Wisley Airfield is built on.
- Policies will harm compliance with NPPF 81 – e.g. by making cycling (including Prudential cycle races) too dangerous, ruining the rural setting of Waterloo Farm campsite, destroying the ambience of Grange Park Opera’s new “Theatre in the Woods”.
- Policy A40 especially unviable because of high water table and poor drainage, leading to regular winter flooding.
- Safe access and egress at Site A40 unachievable, owing to flooding, high speed limits, poor sight lines, narrow access to existing properties, inadequate pavements for elderly and schoolchildren, increasing use by recreational cyclists etc

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT ALSO TO POLICY A35 (WISLEY AIRFIELD):

- Should not be in the plan for all the reasons the Planning Committee rejected the identical recent proposal by Wisley Investment Properties.
- Irregularity of including this policy in the plan 24 hours before this planning application was rejected (like extending the time allowed for the developers to present their application).
- Unacceptable Conservative Party links between the developers and the Council.
- No Green Belt “exceptional circumstances” presented.
- Not a brownfield site as stated – only 15% of it.
- Proposed SCC waste site ignored.
- Loss of farming land.
- Too near RHS Wisley and Thames Basin Heath SPA.
- SANG would harm on SPA.
- Unacceptable increase in air pollution.
- No existing public transport and stations miles away.
- No proper traffic data.
- Housing density far too great.
- Over 2,000 houses will swamp and destroy Ockham conservation area, with impact on listed buildings.
- Access confined to inadequate narrow lanes.
- Water table and surface water flooding not considered either for site itself or for downstream areas on River Mole.
- Major impact on neighbouring villages, especially Horsleys.
- No assessment made of collective impact on area of this and 6 Horsley sites.

I OBJECT TO POLICY D4 (DEVELOPMENT IN URBAN AREAS AND INSET VILLAGES)

- No commitment to expand social housing or accommodation for people who can’t afford so-called affordable homes.
- Not enough new homes in urban areas, despite demand and need for urban regeneration and protection of Green Belt.
- Objectives for inset villages cancelled out by plans for excessive housing growth there.
- Too much emphasis on traditional shops, when a lot of this sector is in terminal decline.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4726  Respondent: 8711841 / Rosmarie Roberts-Kunz  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

I OBJECT TO POLICY E1 (EMPLOYMENT):

- Poor evidence base.
- Too much encouragement to low added-value employment that’s needed elsewhere in the country.
- Fails to concentrate general business activity in urban areas or business parks that have the infrastructure.
- Fails to differentiate this from appropriate rural business.
- Too much encouragement of warehousing, for which Guildford is too congested.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4727  Respondent: 8711841 / Rosmarie Roberts-Kunz  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E3
I OBJECT TO POLICY E3 (EMPLOYMENT CAPACITY AND FLOORSPACE):

- Puts unnecessary obstacles in the way of using brownfield land into useful residential housing, contrary to government policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4728   Respondent: 8711841 / Rosmarie Roberts-Kunz   Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY E4 (SURREY RESEARCH PARK):

- Subordinates public planning policy to the University of Surrey’s private, commercial enterprises (not its public academic purpose).
- No cost/benefit analysis of harm to Green Belt involved in extending research park.
- Waters down research purpose of park, turning into a general business park.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4729   Respondent: 8711841 / Rosmarie Roberts-Kunz   Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY E5 (RURAL ECONOMY):

- Incompatible with high housing numbers proposed for rural areas elsewhere in the plan.
- Insetting and settlement boundary extension would endanger appropriate rural activities listed that depend on maintaining rural areas’ character.
- Town-centre uses for rural areas contradict government’s localism policy and need to consult and protect village environments.
- Established commitments to high speed rural broadband and mobile coverage watered down despite 2014 consultation responses.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/4730  Respondent: 8711841 / Rosmarie Roberts-Kunz  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY E6 (LEISURE AND VISITOR EXPERIENCE):

- Danger of overdevelopment: success doesn’t depend on building “attractions” which can harm heritage and rural settings. No case made for creating new ones.
- No policy of opposing reduction in rural hotel capacity.
- No definition of what added value interventions by Council can make to normal visitor market mechanisms.
- No policy of supporting Guildford countryside as its prime leisure and visitor asset, whose value rises as London gets bigger and busier.
- No vision of what the ideal visitor experience of the borough actually is and how to support its various elements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/4731  Respondent: 8711841 / Rosmarie Roberts-Kunz  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY E7 (TOWN CENTRE):

- No statement in policy wording of value of Guildford’s rural setting and views.
- No consideration of Town Centre Master Plan, GVG proposals or plans to redevelop the station.
- Far too little new housing in town. Development pushed into countryside, ruining the latter and harming urban regeneration.
- No brownfield register.
- Too much big retail, despite online shopping revolution and decline of traditional high streets internationally. Futile to try to turn Guildford into Woking or Kingston.
- No measures to support small, niche retailers in town, e.g. through business rates.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

<table>
<thead>

</tr>
<tr>
<td>Answer (if comment is on questions 1-7 of the questionnaire): ( )</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

I OBJECT TO POLICY E8 (DISTRICT CENTRES):
- Too much scope to expand rural retail centres in order to justify major housing expansion across the countryside, despite lack of existing demand. This will spoil the character of villages while further harming Guildford's role as a retail hub.
- No measures to support existing rural shops and services, e.g. through business rates.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY H1 (HOMES FOR ALL) as follows:

- Policy doesn’t set any constraints on building.
- Housing mix based on pre-Brexit growth and demographic assumptions and unreliable SHMA that wasn’t put out to formal public consultation and wasn’t scrutinised by Councillors.
- Fails to compel University of Surrey to use its thousands of planning permissions and existing space, such as car parks, for student accommodation.
- Lets University off the hook of accommodating all its students, so as to free up houses for the most needy in town.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

<table>
<thead>
<tr>

<td></td>
<td></td>
</tr>
</tbody>
</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY H2 (AFFORDABLE HOMES):

- Using the official definition of Affordable is a joke. Affordable homes round here are not affordable! Pushing for these homes just means pushing for more development.
- The viability clause lets developers off the hook of providing even these (non-) affordable homes. Too open to manipulation.
- Contradicts government policy to develop less advantaged regions of the UK. People don’t have to live and work in Guildford but should be encouraged to move to cheaper, less congested areas.
- This policy won’t affect market forces or house prices. Guildford is too small and too near London to influence these, however many homes it builds.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

<table>
<thead>

</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY I1 (INFRASTRUCTURE & DELIVERY)

- Infrastructure is considered here as an afterthought, rather than a pre-condition of development. Should be a key issue for the rest of the plan.
- Plan for excessive housebuilding in countryside not supported by any funding or provision for infrastructure.
- Plan’s heavy focus on building on greenfield sites inefficient and unnecessary: cheap for developers but much more expensive for the public who have to fund the infrastructure.
- Draft CIL scale discourages use of brownfield land first.
- No plan for organic increase in existing traffic congestion, let alone once thousands of houses are built across the countryside. Local roads hardly considered. Green Belt being eroded before road widening/improvement plans are certain, encouraging opportunistic over-development of greenfield sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<td></td>
<td></td>
</tr>
</tbody>
</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I OBJECT TO POLICY I2 (SUPPORTING DTP’S ROAD STRATEGY):

- Policy doesn’t allow for catastrophic increase in traffic resulting from spreading new housing estates across the borough.
- Plan is out of sync with DTP’s strategy: houses would be built and Green Belt destroyed before plans for A3 etc are implemented.
- Many of the road plans are too optimistic anyway, especially post-Brexit, and very likely will never happen.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT TO POLICY I3 (SUSTAINABLE TRANSPORT):

- Just a list of generic measures, not related to real life or the particularities of Guildford.
- Fails to treat sustainability as a constraint. Policy assumes excessive levels of development proposed in the plan can be supported by sustainable development.
- Unrealistic belief most people can be persuaded out of their cars to walk or cycle. Many large groups can’t or won’t do this – commuters in a hurry, the elderly, children, people who are unwell or unfit, people carrying heavy shopping or other goods. In other words, most residents!
- Town’s eye view of transport. Ignores scarcity of existing rural public transport and commercial unviability of increasing it. Ignores terrible state of Surrey’s roads, potholes, flooding etc. Ignores extra stress to be created by huge new housing estates in countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY I4 (GREEN & BLUE INFRASTRUCTURE):

- A toothless policy completely cancelled out by plan for huge developments across the countryside. No mention of opportunity costs of loss of Green Belt services and amenities (e.g. farming).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4722  Respondent: 8711841 / Rosmarie Roberts-Kunz  Agent: PSLPP16/4722

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I STRONGLY OBJECT TO POLICY P2 (GREEN BELT) on the following grounds:

- No declaration of support for protecting the Guildford Green Belt, contrary to NPPF and government statements.
- No evaluation of value of local Green Belt as a public and private asset: it’s just treated as potential building land with a few inconvenient restrictions.
- Impact of Green Belt development on local agriculture ignored.
- Impact on rural leisure and tourism ignored.
- Impact on flood control ignored.
- Impact on carbon sink and knock-on effects for air pollution and climate change ignored.
- Impact on biodiversity ignored.
- Impact on natural heritage ignored.
- Impact on water catchment ignored.
- Impact on room for public space amenities (parks, cemeteries, waste facilities etc) ignored.
- Impact on rural business (e.g. mineral mining, film making) ignored.
- Impact on natural landmarks and views ignored.
- Harm to public health and wellbeing (physical, psychological) ignored.
- Allows excessive levels of development in breach of views expressed in last consultation and Conservative Party manifesto commitments at the last local elections.
- Has allowed ruling Councillors to argue that there is an acceptable percentage of Green Belt that should be sacrificed to development, when no such rule exists in the NPPF.
- Ignores alternative approaches, such as fair burden-sharing under which settlements would undertake to accommodate new development in proportion to their size.
- Disproportionate amount of development (most of it, in fact) to be in Green Belt. Too few new homes in urban areas where most people (especially the young and less privileged) want to live. This will act against much needed urban regeneration.
“Insetting” of most villages disproportionate and unjustified in terms of their contribution under the NPPF to the purposes of the Green Belt. Based on flawed Green Belt and Countryside Study. Idea that most Guildford villages do not contribute to “openness” is subjective.

- Major settlement extensions allow indiscriminate housebuilding, as irregularly shaped villages are squared off to enclose green fields.
- Overall harm to Guildford Green Belt unjustified by any objective development need post-Brexit.
- Ignores most of NPPF 17 stipulations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPP16/4742  **Respondent:** 8711841 / Rosmarie Roberts-Kunz  **Agent:**

I OBJECT TO POLICY P5 (THAMES BASIN HEATH S.P.A.):

- Compensation mechanism too feeble to provide protection.
- Cynical encouragement of SANG to justify nearby development in protected areas. Does not extend protection or amount of green space, and can damage them (e.g. dog and cat attacks on wildlife).

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY S1 (GREEN SPACE NEEDS):

- Compromises on location and extent of protection (green spaces).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT TO POLICY S1 (SUSTAINABLE DEVELOPMENT) for the following reasons:

- No definition given, no reference to its importance in the NPPF, no guidelines for applying it to planning.
- No statement of how economic, social and environmental impacts should be balanced.
- No mention of Green Belt, Guildford’s greatest legacy by far to Sustainable Development. No commitment to protecting it.
- No reference to most of the NPPF Core Planning Principles.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

| Comment ID: PSLPP16/4718 | Respondent: 8711841 / Rosmarie Roberts-Kunz | Agent: |
| Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2 |

I OBJECT TO POLICY S2 (BOROUGH-WIDE STRATEGY) as follows:

- Numbers based on growth and demographic data now invalidated by Brexit.
- No justification given for 13,860 housing figure. Figure based on a secret formula used by consultants and never seen by anyone on the Council or by the public. Council has failed to seek its disclosure.
- 13,860 figure confuses the OAN with a housing target. No definite housing target given, leaving too much scope for the Council to make one up. I can’t understand how we’re being consulted when we don’t know how many houses the Council want to build, taking all the contraints into account.
- Figures based on a Housing Market Area that ignores 2 neighbouring districts (Rushmoor and Mole Valley) and is much too small, since most people commute or travel far outside the Area to shop or study. This distorts the figures: no reason why Guildford needs to build nearly twice as many large housing estates as the rest of Surrey put together, or half of all sites over 100 units.
- High numbers involved would transform character of the borough from mainly rural/Green Belt to urban, creating a corridor of development out of London as per Woking or Croydon.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I call on the Inspector to send Guildford Council back to the drawing-board with this plan. It is a shoddy effort that takes almost no account of the 32,000 comments (mostly objections) in the last public consultation, or the 20,000 almost identical comments in the consultation before that (on the Issues and Options paper).

Reasons for declaring the draft unsound are too numerous to list, but I wish to highlight the following 6 items:

1. The council have gone to huge lengths to conceal the consultant’s formula apparently used to calculate the OAN, which cannot therefore be scrutinised. They have failed to differentiate between the OAN (which is supposed to be objective evidential data) and their housing number policy target. They have made no effort to address flaws in the SHMA revealed by independent studies well known to residents, which suggest a target more in the order of 4,000 than over 12,000. They have not taken seriously the implications of applying constraints which, by greatly reducing the housing target, would answer many other objections, for instance by preserving the Green Belt. They are also being ambiguous about how development will be phased and how constraints will be applied, suggesting a plan full of moving targets that cannot be properly monitored or evaluated for performance or against government policy over the plan period.

2. The council have deleted a passage in Policy H1 on housing density, leaving it up to developers. This removes a key planning element and makes it impossible for Guildford to comply with Government policy on efficient land use.

3. Policy P1 and E5 reduced protections against development in the AONB, contrary to the declared policy of central and local government.

4. Despite some 52,000 objections in the previous 2 rounds of public consultations, the council is persisting in trying to direct most new development onto the Green Belt, contrary to declared government policy including the NPPF. Whether one agrees with this attempt or not, it needs to be argued through in any plan worthy of the name – for instance, in Policies P2, P3, E5 or the Sites appendices. The council, however, do not say why 70% of new homes need to be on green fields, or 58% in the Green Belt, when common sense suggests most people would like to live in urban or suburban areas where close to employment and other facilities. The plan doesn’t say either why three of the biggest developments need to be in the Green Belt: Wisley “airfield” (which is actually good farmland), Blackwell Farm and Gosden Hill Farm. The NPPF states that the Green Belt can be developed only in “exceptional circumstances”, but the plan does not mention these. The council do not say why most of the borough’s rural villages need to be “inset” from (i.e. kicked out of) the Green Belt against their expressed will. No justification, weak or strong, is advanced for such drastic action. The numerous proposals in the plan for infilling and extending settlement boundaries seem designed merely to support or facilitate an a priori decision to promote maximum development in the countryside and to minimise development in the urban areas. Instead of balancing public and private interests, this plan fails the public by capitulating to developers’ understandable greed for green-field sites that are cheap to build on. A sound plan would need to balance this by a full appraisal of urban brownfield sites available, many of which the council already own but seem strangely reluctant to release for housing.

5. In Policies E1 and E2, the council has similarly taken the caved in to a perceived business demand for retail and commercial space in the town centre. This is probably not what business (such as the Local Enterprise Partnership) actually want, but may seem a soft-option route to easy growth. With 89% of the borough Green Belt, however, there are obvious objections to devoting scarce urban space to uses of low employment value such as warehousing or drying activities such as town-centre shopping, especially if this means even less new urban residential development. The plan does not say why these areas cannot be developed for low-cost housing that would regenerate the town centre, or for high-value, less space-wasting businesses that are more consistent with Guildford’s well-educated workforce. It also fails to make an assessment of the impact on traffic or existing high-street shops. Instead, it plonks commercial development in cut-off, unsuitable locations, such as Burnt Common, with no balancing arguments about how the consequent damage to the Green Belt can be justified. Policy D1 reveals that the council has failed to address in any serious manner the vast discrepancy between its ambitious development targets and Guildford’s infrastructure deficiencies, which are already a serious constraint
on day-to-day life in the borough. Lack of infrastructure was brought forcefully to their attention in previous public consultations. In their public rhetoric, they have recently acknowledged that this is a major problem. But this is not reflected in the latest version of the plan, which continues to rely on vague hopes that the gap might be narrowed through the CIL mechanism or by willing “infrastructure providers”. The council is either being cynical (thinking they can fob the government off with promises of development they know they cannot deliver) or else incompetent (in thinking that so much infrastructure will simply materialise out of nowhere once development is underway). To meet the soundness test, on the other hand, the plan must recognise the reality of Guildford as a congested, exceptionally constrained borough in London’s shadow, and plan only as much economic and housing growth as can predictably be supported in infrastructure terms.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Key facts

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan seems to be concerned almost exclusively with the well-being of the economy of the borough, the enhancement of the lives of the more deprived sections of its existing community, and the care of new-comers. All of these are concerns which can be supported, but the Plan seems to have neglected the well-being of the majority of its existing residents, which may be described as not deprived.

2.22 This paragraph has been deleted. Its first sentence was "Pressure on existing infrastructure and additional stress caused by planned growth must be addressed if we are to maintain and enhance the borough's prosperity and quality of life."

This deleted sentence summarises one of the main concerns of many existing residents, and its deletion should call into question the validity of the document's arguments.

It should be made clear that the increase in housing, economic activity, infrastructure etc. will result is a reduction in the quality of life of its existing residents: if this is not considered to be true, then the Plan should demonstrate that adequate measures will be taken to ensure that that is not the case.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1
4.6 Infrastructure Policies.

Policy ID1 (p.122) states that "Infrastructure necessary to support new development will be provided and available when first needed".

Garlick Arch (Site 43) is identified as an area for the introduction of some 400 homes, and a new interchange with the A3 trunk road is proposed (Site 43a). Both of these are likely to give rise to significant extra traffic on the A247, which runs through West Clandon village. There is already some congestion at peak times in the village, as well as numerous accidents due to the narrowness and poor driver visibility in parts of the village. There is no scope for road widening or of line-of-sight visibility in these places, so these proposed developments appear to be in violation of the Plan's policies.

I hope these reservations will be properly taken into account,

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Furthermore, it is beyond comprehension that the development of the Wisley Airfield site to include 2000 houses, has been included again after having been overwhelmingly rejected so recently.

What is the point of having public consultation when its findings are completely ignored?

I sincerely trust that the plan as it exists will be rejected.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The villages within the Guildford Borough are already choked with traffic, the roads are in a parlous state, drains are frequently blocked leading to flooding after even a short shower, schools are over-subscribed and medical services are already over-stretched. The arrival of 500 - 600 more families will place an intolerable burden on the local infrastructure and amenities. Even the increased Council Tax income from all these new homes is unlikely to be adequate to cover the additional demand.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/163  Respondent: 8713889 / Joyce Campbell  Agent:

As a resident of East Horsley for nearly 30 years, I am horrified at the latest attempts to build more than 500 houses in the Horsleys and to further erode the existing Green Belt.

The introduction of Green Belt land in the 1950’s was to stop the spread of urban sprawl. It is particularly important in the South East to prevent the Greater London conurbation from spreading further into the surrounding countryside. A look at a map will show that further urbanisation would soon join it to areas such as Guildford and Woking and Redhill and Reigate to the south. There must be plenty of brownfield sites which could be developed. Even though this might be more costly at the outset, in the long term it would have many advantages.

The M25 should be allowed to be a natural barrier between the built-up areas and the countryside. For those people who live in busy towns, the opportunity to get out into the countryside for recreation and relaxation is vital to their health and well-being, although I understand that air quality around Junction 10 of the motorway is comparable with that in Central London.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the alteration of the green belt boundary in Shalford. Shalford is a village with a wonderful open ambience. The land behind the Village Hall contributes to the open character of the village and should be preserved. Also the elevation of the land is 32 feet above King's road which would make any housing development unsightly and out of keeping with neighbouring properties and tower over the village community facilities. Access to this land is via Chinthurst Lane, which is already a heavily congested country lane.

The boundary has been its current place for a long time and there is no valid reason for change. Guildford Borough Council should support the expressed views of the local residents and protect the fields from development.

I strongly object to further plans to destroy our Green Belt. We had 700 residents sign a petition against this only last year. Apart from destroying this English village how can you possibly consider Chinthurst Lane as as access? It is already an extension of Shalford Station Car park and a thorough danger as it is narrowing daily due to overuse by railway users, making passing other vehicles impossible to pass each other.

Answer (if comment is on questions 1-7 of the questionnaire): ()

GUILDFORD PROPOSED LOCAL PLAN 6/6/2016
FIELDS BEHIND SHALFORD VILLAGE HALL

As a resident of Shalford and a member of Shalford LTC I wish to make known my objections to the current version of the local plan which removes the fields behind the Village Hall and Tennis Club from the Green Belt and puts them in the Shalford settlement boundary.

Although these fields have been classified as “open spaces” there is no explanation or confirmation to say that this would give them the same degree of protection as the Green Belt from housing development.

Any Construction on these fields which are 25ft above the village hall would tower over the tennis courts and bowling green and totally destroy the Green lung of the village.

The considerable traffic from a development would have to exit on Chinthurst lane not only adding to the traffic chaos and pollution but increasing the potential for an accident.

We believe that any construction in this field would exacerbate the current flooding that the tennis courts and the village hall suffers in heavy rain.

By implementing a small adjustment back to the 2003 boundary GBC could protect these fields and ensure they remain open spaces.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: PSLPA16/3377  Respondent: 8714433 / Paul and Liz Reynolds  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Shalford (south)
I live adjacent to Shalford Village Hall on the Common and I am writing to strongly object to the above new version of the Guildford Local Plan. I have written to the Council before but feel I need to make my feelings clear again by objecting to this proposed extension of the village settlement boundary to include the fields behind Shalford Village Hall.

If this land in question is incorporated into the new village settlement boundary, it will lose its green belt and area of great landscape value (AGLV) status. This would be a huge mistake as the land would then be open to other further development in the future. Due to the height of the land, which is 32 feet above the Kings Road, any development would be clearly seen and tower over the village community facilities and the surrounding area, detracting from the village feeling of space and open character we have at present. These boundaries have been in place for a long time and there is no valid reason for them to change. We cannot allow the development of 20 houses on these fields with access via Chinthurst Lane. This would create a disastrous traffic situation where we already have considerable congestion and overcrowded village roads. A further 20 houses on this site would potentially mean a further 40 cars (minimum) using the access road on a daily basis, together with visiting cars. This traffic would be in addition to the already heavily congested country lane we have at present. The lower end of Chinthurst Lane, leading off from Kings Road, is an impossible drive with the continuous parked cars on one side. Further housing development behind Shalford Village Hall would reduce this road to a standstill. Widening the lane, which I understand has also been proposed, would only further degrade our village from retaining its rural character.

I also object to the fact that the infrastructure has not been properly assessed and is inadequate to deal with current housing levels. The local roads in the area, the schools and local amenities will not be able to cope. Development of this site will surely lead to further areas of beauty being scarred forever.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Over 700 residents signed a petition objecting to the proposed settlement boundary change last year. This issue has united the local community with widespread support across local clubs and other organisations.

This land is in the Green Belt and in an Area of Great Landscape Value, both of which designations are meant to be permanent. If the boundary is changed, the protection afforded by the Green Belt and AGLV will be lost, the consequence of which is likely to be a planning application for housing.

As a resident of Shalford for 34 years, I strongly object to the repositioning proposal and to any planning application for housing on this piece of land, which would create a precedent for further development on other Green Belt and AGLV land.

I am horrified that the removal of the protection of Green Belt land is even being considered. This designation is intended to be a permanent protection for our beautiful countryside for our enjoyment and that of future generations.

This land contributes to the open character of the village and provides an attractive setting for the village’s community facilities. Any development on this land would be clearly visible from the road and significantly impact upon the open character of the village and green nature of the locality.

At 32 feet above King’s Road, the land behind the Village Hall is one of the highest elevations in the area and any housing development built on it would tower over the village community facilities and the surrounding area.

Any development would also impact on the local infrastructure which is already limited, including poor vehicle access, inadequate provision of schools and doctors’ surgery; the latter is already stretched to its limits.

Of particular concern is vehicle access to the site, which would be via Chinthurst Lane, which is not able to take any more traffic, being already highly congested, especially during rush hours when it is used as a “rat run” by drivers trying to avoid the traffic jams on the A281 from Bramley/Horsham and the A248 from Chilworth/Wonersh/Shamley Green/Cranleigh. Chinthurst Lane is a narrow, winding country lane; it is single carriageway along most of its length with hardly any pavements. It is unsuitable for the amount of traffic it already has, let alone any additional. It also has to be borne in mind that because of the increased congestion in Chinthurst Lane that would result from additional housing, it is inevitable that Summersbury Drive and Poplar Road would also become “rat runs”. This would be dangerous as they are narrow, residential roads.

Because of the Green Belt and AGLV status of the land and inadequate infrastructure for additional homes and traffic, I am appalled that this proposal is even being considered.

Please leave Shalford’s settlement boundary where it is.

Objection to Guildford Borough Council’s proposal to (1) move the green belt boundary to include the fields behind Shalford Village Hall, (2) extend the village settlement boundary to include these fields, making it easier to develop

Once again I am writing to **object** in the strongest possible terms to Guildford Borough Council’s proposal to significantly reposition the Shalford settlement boundary which will result in the inclusion of land at the rear of the Village Hall.

If Guildford Borough Council support the expressed views of the local residents to protect the fields from development, they should retain them within the current green belt boundary and keep them outside the village settlement boundary. The boundaries have been there for a long time so there is no valid reason for change.

Over 700 residents signed a petition objecting to the proposed settlement boundary change last year. This issue has united the local community with widespread support across local clubs and other organisations.

This land is in the Green Belt and in an Area of Great Landscape Value, both of which designations are meant to be permanent. If the boundary is changed, the protection afforded by the Green Belt and AGLV will be lost, the consequence of which is likely to be a planning application for housing.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the methodology of drawing up the plan. Guildford Borough employs consultants who allegedly have planning expertise but have done so without taking account of Surrey County Council highway planners' views, or the costs involved in improving the infrastructure, currently outside their financial capability.

The methodology is also flawed as this plan has been formulated without regard to village Neighborhood plans. Surely, logic would suggest planning is best formed by a bottom up approach, not top down.

The Car Parks of both Horsley and Effingham Junction stations are already full to capacity and will not be able to cope with any additional housing (other than minor infilling) in either East or West Horsley or Ockham villages. This also applies to the Medical Centre in East Horsley which is also presently oversubscribed.

Finally the three roads which enter East Horsley (the B2039; the road from the A3 to Effingham Station; and the road from Cobham to East Horsley are minor roads or lanes and the increased level of traffic, (including large commercial lorries) from any significant additional house building will lead to unacceptable congestion in a rural environment. The deterioration in the air quality alone from the additional traffic should be a good enough reason not to proceed with the level of proposed housing in the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2607  Respondent: 8717697 / Michael Henderson  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

• The Local Plan Policy central theme is that “we will continue to protect the Metropolitan Green Belt (MGC)” and yet there are several instances in the Plan which completely flout this statement. A detailed study of the plans show that nearly 9,000 new homes (65% of the proposed developments) are to be built on land currently within the MGC which destroys the central tenet of the Local Plan. This is a deceitful statement and brings no credit to the authors of the GBC Local Plan.

• I have lived in East Horsley for 44 years and can see no good reason why as a Rural location it’s Green Belt status should not be preserved. I object strongly to the proposal that East Horsley should be “inset from the Green Belt “ as it clearly both in the past and currently makes an important and continuing contribution to the openness of the Green Belt. Driving down the B2039 lane from the A3 (or for that matter from the A3 to Effingham or the road into East Horsley from Cobham) it is clear you are driving through farmland and countryside before entering the rural village of East Horsley.

I also object strongly (which I have done in a separate detailed letter to GBC) regarding the proposal to remove Wisley Airfield from the Green Belt in order to build further houses which is certainly not a good enough reason to warrant the description of “exceptional circumstances “.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2606  Respondent: 8717697 / Michael Henderson  Agent:
I am writing to register my serious OBJECTIONS to various aspects of the proposed GBC Local Plan published recently.

The proposed scale of House building of 13,860 new homes over a twenty year period represents a 25% increase in the housing stock of GBC which is indefensible and is totally unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

--

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
13) I object to the fact that infrastructure planning for sites has not been properly addressed. There is a huge infrastructure deficit, no public funding available and developments will not fund the shortfall. Central government will not bail out Surrey County Council or Guildford Borough Council. Sites which will rely on the private car must be excluded from the local plan. Unrealistic transport plans put forward by developers need to be scrutinised thoroughly and exposed for the misleading documents that they are. Surrey County Council has told me that they do not have sufficient resources to critique these applications/policies properly and this is totally unacceptable.

[...]

18) I object to the fact that there is no tolerance planned at all for accidents, roadworks etc on the SRN which already impact local roads often resulting in gridlock. I am mindful that recent guidance from the Parliamentary Select Committee on Transport published on 30th June 2016 condemning the use of hard shoulders for permanent running [see http://www.parliament.uk/business/committees/committees-a-z/commons-select/transport-committee/news-parliament-2015/all-lane-running-report-published-16-17/]. For the avoidance of doubt, hard shoulder running is a large part of the planned increased capacity on the M25 southwest quadrant – the costs of adding capacity without using the hard shoulder option is not funded and is unlikely to be properly funded in the near term particularly following the result of the recent Referendum.

[...]

32) I object to the proposed Strategic SANG allocation at Long Reach, West Horsley as it “supports” the development of close to 1000 additional homes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/4142  Respondent: 8717921 / Helen Jefferies  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- I object to the housing number of 693 houses per year from the West Surrey SHMA is far too. The calculation are not transparent and no one in the council appears to care [or have the intellect to realise that errors could and probably do exist]. There are AT LEAST three independent reports which are highly critical of the SHMA including those commissioned by the GRA, CPRE and the one done by Councillor Reeve. The West Surrey SHMA is completely unfit for purpose and as a core document in the draft local plan brings the soundness and legality of the plan completely into doubt. I have no confidence in the SHMA. I object to its inclusion in the evidence base.

- I object to the use of inferior, inadequate and subjective documents in the evidence
• In particular I object to the LAA, which is inconsistent in the extreme and incomplete, citing for example land considered for schools which has not been considered for housing despite being brownfield, in excess of 50ha and close to the [eg site at Newmarsh Farm East Horsley – clearly brownfield due to lack of enforcement]. It is also highly subjective and open to challenge.

• I object to the Borough Infrastructure Delivery Plan, which is incomplete, lacking in detail, not properly costed eg £5-£10 million or even worse £100-£250 million and relies on funding that is not allocated by central government and is more of a wish list than anything

• I object to the use of the Green Belt and Countryside Study in all its volumes and Why is it that some sites are excluded because they weren’t identified in the Green Belt and Countryside Study despite numerous volumes and addenda? Why is it that some sites may impact the TBHSPA when they are outside the 5km zone are excluded (nothing to do with the size of site) and some sites are inside and indeed outside the zone but included? (again not to do with the size of site). It just appears to be inconsistent and subjective – quite possibly a desk based study which has not been verified or cross-checked. This is unacceptable.

I object to all sites in West Horsley for over 5 homes. There is insufficient infrastructure planned. It is impossible to deliver sustainable housing sites of this size in the countryside.

I object to the insetting of West Horsley

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7709  Respondent: 8717921 / Helen Jefferies  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ) is Sound? ( ) is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

• I object to the fact that the impact of poor air quality on the Special Protection Area is not properly taken into account. There is no evidence that the impact of nitrogen and acid deposition on the heathland and the consequent degradation of the heathland has been taken into Please see the attached document by Baker Consultants specifically in response to the planning application almost identical to policy A35 which is relevant for ALL SITES WHICH ARE CLOSE TO THE SPA.

• I object to the allocation Three Farms Meadows– allocation A35.I object to the proposed removal of this site from the green belt when no exceptional, very special or special circumstances I object due to
  1. Unsustainable nature of site reliant on private cars and undeliverable public transport [in terms of unrealistic journey times/fabricated modelling which do not stand up to scrutiny]
  2. Unrealistic assumptions that people will even walk from one end of the development to the other to go to the doctor, school, shop etc.
  3. Unsustainable due to poor air quality impact on both housing and the SPA
  4. Impact on views to and from the Surrey Hills AONB
  5. The urban nature of the proposal – five storey buildings are out of keeping in the countryside [and some would argue are not even acceptable in Guildford town centre]
  6. Road, sewerage, fresh water, gas and electric capacity does not exist
  7. Funding for infrastructure from Central government does not exist;
  8. There is already a huge infrastructure deficit in terms of This is not properly taken into account.
  9. Impact on nitrogen deposition on the TBHSPA is not neutral and this allocation is therefore open to legal challenge
  10. No consideration has been taken of the current and future plans of the RHS These should take priority over allocation A35. Roads definitely cannot accommodate an additional 500,000 visitors to the RHS and 5,000 residents of site A35. [this is without taking into consideration the huge number of houses planned in the Horsleys, Send and Ripley].
  11. Robust objections to the planning application almost identical to this allocation were made by numerous statutory bodies including neighbouring Local authorities
  12. Insufficient consideration has been taken of the historic houses in Ockham and Ripley and the Chatley Heath Semaphore Tower

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the allocation at Garlick’s Arch – allocation A43 due to the loss of ancient woodland; the impact on all local infrastructure of another 400 houses; the site is too close to the A3 and will have poor air There appears to be no joined up thinking on the various on/off junctions on the A3 – my understanding is that the SRN is meant to be for THROUGH TRAFFIC not local traffic. Numerous junctions will slow progress for all users and increase accidents due to more lane changes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- I object due to the unsuitability of our local roads for heavy vehicles and more traffic including many years of construction traffic
- I object due to the fact that local healthcare facilities will be overwhelmed by large numbers of additional residents – it is already difficult to get an appointment at the GP and the RSCH is failing to meet waiting times for outpatients’
- I object due to the impact of large numbers of additional residents on local policing facilities which will be further Surrey Police are currently unable to cope with dealing with local residents’ concerns [eg breach of law on PROWs on allocation A35] citing lack of resources.
- I object to the impact of large numbers of new residents on school places which has not been properly For example, Send Primary School (in the process of being rebuilt) is being rebuilt with no spare capacity. The proposed redevelopment of the Raleigh School in Horsley [not even in the local plan] is only for redevelopment not for enlargement. Schools planned for Three Farms Meadows will not be operational for the first 500 houses of development. Where will those children go to school? There is no capacity. When the school is built at TFM children will have to be bussed in from elsewhere as it’s not possible to walk… adding to congestion on local
roads and the Strategic Road Network. Does one hand know what the other one is doing because it certainly does not look like it to me?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- There is no mandate from the electorate to build on the Green Belt – to the contrary the Conservatives who were elected in Guildford without exception stood on a protect the Green Belt I object to the fact that election manifesto promises to protect the Green Belt have not been upheld. Councillors have no mandate from the electorate to justify development of the greenbelt.

- It is clear from the census that building the majority of new housing on the greenbelt will generate almost double the amount of cars than building housing in the urban area. This is unsustainable and I object to greenbelt housing on air quality Residents of GBC will not be prepared to pay the fines for breaches of air quality limits due to the inability and unwillingness of the Council to take the impact of poor air quality on humans and the SPA seriously.

- I object to the draft plan which proposes over 70% of new housing on the This will ruin the countryside for ever impacting both current and future residents.

- I object to the fact that insufficient consideration has been made for the constraints in this borough, be they infrastructure in nature, AONB, THBSPA, Green Belt, water supply
- I object due to the inadequate protection of the environment in terms of wildlife, SNCIs, SPA; in terms of air pollution and noise and light

- I object to the fact that this proposed plan does not meet the needs of local communities
- I object to the fact that insufficient truly affordable housing is being proposed. There is no evidence that any calculations at all have been done; no sensitivity analysis on interest rates; costs of running cars
- I object to the impact of further congestion on local village roads and

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- I object to the disproportionate (in terms of population density) allocation of housing to the north east of the borough in the wards of Clandon and Horsley and Lovelace in
- I object to the overdevelopment of sites, particularly the large sites, the density of housing proposed for site allocation A35 is higher than in most London Boroughs – this proposal is urban in nature and completely out of keeping with its surroundings
- I object to the fact that many of the allocated sites are being planned in unsustainable locations
- I object to the fact that the plan implies modal shift to cycling and walking which in the rural areas is completely unrealistic due to lack of proper cycle lanes on local roads (and the space to provide them)
- I object to the fact that the plan implies modal shift to cycling and walking which in the rural areas is completely unrealistic due to lack of proper pedestrian footpaths on local roads and the requisite street lighting to ensure the safety of Much of the borough is RURAL IN NATURE and residents specifically do not want to live in well-lit areas more akin to urban living.
- I object to the insetting of villages from the This is not necessary. There is plenty of suitable land in the urban area which needs to be regenerated rather than left to degrade further.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

Much of the evidence base is unsound being either incomplete, inaccurate, subjective, inconsistent or in many cases all of the above. The SHMA and LAA are particularly poor pieces of work.

Comment ID: pslp172/3957  Respondent: 8717921 / Helen Jefferies  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I require conformation that all of these comments together with all my previous comments are passed to the Inspector. I reserve my right to appear at the inquiry and present my evidence.

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:
1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)

4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)

5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.

6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.

7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   o The associated traffic increase from the RHS has not been taken into account.
   o The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account

8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.

9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station

10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.

11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”

12. Opportunity (3) should be common to all sites and is not unique to this site

13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.

14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.

15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)

16. I object to the removal of additional 3.1 ha from the green belt without any justification

17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact

18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3

19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.

20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.

21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation consultation when the changes are major.

23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.

24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.

25. I object to the extension of the plan period by 1 year as it has not been identified as a major change.

26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.

27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.

28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.

29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.

30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.

31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.

32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.

33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.

34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

35. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

36. I object to the plan period being inconsistent. This is an example (of which there are many) of extremely sloppy work which gives me no confidence in the content. For example, the foreword mentions an end date of 2034 whereas the introduction 1.2 and 1.3 refer to 2033. Spatial vision uses 2033. What is the plan period? This is very unclear.

37. Para 2.10a underestimates the pressure already suffered by local residents on a daily basis as a result of insufficient infrastructure particularly in the provision of health services, e.g. doctors and hospital appointments. Additional growth in the quantum proposed is unsustainable in that it fails to recognised the needs of current residents and is focussed only on the needs of future residents.

38. Para 2.13 I reject the statement that most local roads in villages have “at least one footway and usually two “.

39. I reject the assumption in para 2.15 that increased road infrastructure capacity – it may improve theoretical capacity but actually worsens performance.
40. I object to the new green belt provision in Ash and Tongham to prevent the merger with Ash Green and I do not understand why this locality should be treated any differently from any other location for example the merger of Ripley and Ockham as a result of policy A35.

41. I object to the fact that the spatial vision makes no mention of protecting the TBHSPA

42. I reject the comment in the spatial strategy that the RIS will provide congestion relief for the A3 in Guildford as my understanding is that these schemes have been dropped.

43. I do not accept para 3.2 where there is a disconnect in the period of the Council’s Corporate Plan and the Submission plan –

44. I object to Para 4.1.11 which should clearly identify the version of the LAA and not just refer to “the latest”.

45. I object strongly to the deletion of para 4.2.8 on housing density. There must be an efficient use of land in keeping with the local area. It is notable than the development planned for the town centre is at a lower density than that at site A35 for example and this is totally unacceptable.

46. I object to the wording of 4.2.18 which is unenforceable. Throughout the plan the word “Expect” needs to be replaced by “require”

47. Likewise, I object to the use of the word “resist” in 4.2.24 – it should be replaced by “refused” in this para and throughout the plan.

48. I object to the wording of policy H2 specifically “we will also seek” and “we will seek”. This should be replaced by the use of the verb “require” in this para and throughout the document.

49. Policy H2 para 4 needs to include that any funds paid in lieu of affordable housing should be ringfenced and the wording further tightened by replacement of “expect” by “will enable”

50. I object to policy H3 para b “the local community”. Rural exception sites should only be allowed where the identified need is truly local defined as within the parish.

51. I object to policy P2 and the inclusion of Ripley in the list of villages to allow insetting.

52. Policy P2 refers to the Metropolitan green belt yet goes on to create additional green belt in the west of the borough furthest from the metropolitan area. There is no justification whatsoever for new green belt land in Ash.

53. There is no evidence that cross-boundary options beyond the green belt have been considered as a viable option instead of moving the green belt boundaries within the borough.

54. I object to the removal in para 4.3.18 of “where it would not have a greater impact on the openness.” and the replacement by “subject to the impact”. This is completely in contravention of the purposes of the green belt.

55. I strongly object to policy P5 TBHSPA as no regard whatsoever is paid to the impact of air pollution on the integrity of the heathland and the resultant loss in habitat from nitrogen deposition. It is inconceivable that the level of development proposed in this plan will result in anything other than thousands more vehicles on the roads due to the unsustainable locations of for example policy A35. Additional traffic equals more pollution and more nitrogen deposition. There is no evidence at all of any in-combination impact from planned developments in adjacent boroughs and no regard to the recent Wealden case for example.

56. I also reject that the SAMM mitigation through the use of wardens will have any impact on cat predation.

57. I object to the statistics in para 4.3.55. Any survey work done on the visitor numbers is unlikely to have covered the time when commercial dog walkers from South London who appear in droves throughout the week.
58. I object to para 4.3.57 – there is no evidence that SANG provided adjacent to the SPA will provide any mitigation at all. Faced with the choice of walking in a manmade environment or on the SPA, the majority of people would choose the natural environment.

59. I object to para 10 of policy E1. Where is the “new industrial employment land on the west side of the former Wisley airfield”? there is no “new” employed land listed under policy A35. This is confusing and needs to be clarified.

60. I do not understand why previously developed sites in the green belt have not been included for development. Specifically, HMP Send where the prisoners have been told that they might be moving and indeed the site is understood to have been valued by Savills amongst others. There is no justification for adjustment of green belt boundaries until all other options have been exhausted. Doubtless there are other examples.

61. I object to para 4.4.36 with regard to the extension of the Surrey Research Park. There is no justification for this when there are a number of surface car parks within the Research Park which should be used in preference. The density of buildings in the Research Park needs to be prioritised over an extension in area.

62. I object to the wording of para 5 in policy E5 – “marketing of the site for its current use for a minimum of 12 prior to submission of a planning application”. This is another example of extremely poor and careless drafting. DO you mean 12 days, months, years….

63. I object to policy D1. Firstly, the deletion of the word “must” in para 2. This means that the policy will be unenforceable (see earlier comments). The word “must” has to be retained.

64. I object to the deletion of the wording in para 2 of policy D1 which must remain in full and I also object to the deletion of para 4.5.8.

65. I agree with the insertion of para 4.5.8a regarding the need for an efficient broadband connection but would add that the needs of current residents should take precedence. The state of broadband provision in parts of the borough (e.g. Ockham) is frankly dire.

66. I support the inclusion of policy D4.

67. In Guildford borough, it is widely accepted that there is an infrastructure deficit particularly in roads and the provision of health services. The needs of current residents are not taken into account in policy ID1. All infrastructure should be in place before development of strategic sites takes place to ensure that the developer pays so as not to jeopardise the needs of current residents.

68. There is insufficient weight given to the problem of air pollution in the borough. I object strongly to the fact that the Council does not take the health of its residents sufficiently seriously to have a policy to ensure the improvement of air quality in the life of the plan.

69. I object to the wording of policy ID3 para 11 which makes no sense at all. What do you mean by “the provision of additional public off-street parking in Guildford town centre will be supported when it facilitates the interception of trips that would otherwise derive through the Guildford gyratory”.

70. I object to the continued assumption that Guildford needs more retail. The ELNA fails to understand the shortcomings in the Carter Jonas retail study update 2017 which refers to retail requirement from companies already in administration and also fails to recognise the increasing use of internet shopping over the bricks and mortar experience. This is lamentable as the land allocated for retail could be put to much better use as residential.

71. I object to the inclusion of policy A58 – there is no justification for an increase in additional industrial floorspace at this location or indeed particularly as there are a number of vacant industrial sites at o Slyfield.

72. The AECOM work to support the ELNA is a poor piece of work riddled with unsupported assumptions.
73. I continue to object to the inclusion of the following policies:
o A36-A41 inclusive in the Horsleys, A43 at Garlick’s Arch, A42 Clockbarn, and A58. There is no evidence that anyone has considered the cumulative impact of these developments together with the development at A35. The infrastructure proposed is totally inadequate and, as these stand at the borough boundary will have a huge impact on residents throughout the borough and further afield, particularly those who use the A3.

74. I object to the fact that there is no evidence that land owned by the council in the town centre is being used for residential development.

75. I object to the fact that the land required at Garlick’s Arch is said to be almost 29ha where only 13ha is required at 30dph.

76. Similarly, I object to the excess requirement for land at A53 where the normal plot ratio of 50% appears to have been ignored resulting in an excess use of green belt land of over 7.5ha.

77. I object to the housing number of 693/annum as no constraints have been applied – the GL Hearn methodology has compounded past errors in international migration forecasts and the whole SHMA needs to be re-visited and corrected as a matter of urgency.

78. I object to the continued use of the Green Belt and Countryside study as part of the evidence base. It is a subjective and inconsistent document that pays no regard to the impact of the current proposals on the setting of the AONB for example.

79. The transport evidence provided shows an increase in congestion as a result of the planned developments. Insufficient modelling has been done to satisfy me that any of the strategic sites can move forward on this basis. The consequences are severe to residents of Guildford and those much further afield.

80. I object to the fact that there is no proposed location for a bus station in the town centre. This means it is impossible to model journey times from, for example A35 with any degree of reliability. Furthermore, the modelling capacity at SCC does not use “real world” situations for example the junctions do not allow for traffic stopped at red traffic lights and assume all time all direction running which is clearly a fallacy. This perhaps makes it easier to understand why the today’s congestion is so dire.

81. There is no evidence that noise and light pollution and the impact on both humans and wildlife has been adequately taken into account.

82. I object to the fact that policy S2 makes no distinction between previously developed land in the Green Belt. It is clear that the use of a site with no above ground building e.g. A35 has a far greater impact than the use of a site such as Send Prison.

83. I object to the fact that greenbelt sites are allocated to improve flexibility in the delivery of the plan. It is clear that the green belt should only be seen as a last resort, after all other opportunities have been fully explored.

84. I object to the use of a film on the GBC website promoting a biased view from those interviewed who would in the real world have been excluded due to conflicts of interest. This is unfortunately completed expected behaviour from a council that continues to promote opaque policy and one which has little respect from many residents.

85. I object to the fact that the prosed housing allocation at Slyfield of 1000 homes results in no increase in vehicles. This is a patently false assumption and leads me to question the soundness of the transport evidence base.

86. I object to the variation in the assessment of sites which is extremely inconsistent. In some cases the TBHSPA appears to be a concern whereas in others it isn’t. The same applies to a number of elements including impact of conservations areas, SNCIs, views in and out etc.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose. It is very worrying that the council does not appear to have either the resources or the intellect to get the basics right.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Sites A36-41 (East and West Horsley). This is a back-door way to create a mega-village – essentially, a soulless new dormitory town. The Horsleys feel victimised by this plan, which has been masterminded by Council leaders representing Ash and Tongham at the other end of the borough, where (in a flagrant case of political double standards) the Green Belt is actually being extended under Policy P3.15

Whatever their merits as development sites, the 6 Horsley sites should not be considered individually but for their cumulative impact on the contiguous villages of East and West Horsley, the green belt is meant to stop villages from conjoining.

Under the plan, rural West Horsley will take 35% of new homes, urban Ash and Tongham 16% and Guildford urban area only 11%. The total number of homes in West Horsley will increase by 35%, which is disproportionate when measured against the overall increase in housing across the borough and particularly in Guildford town.

These sites will put unsustainable strain on local facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewage, surface drainage and shops.

By surrounding Waterloo Farm campsite with 120 new houses, Policy A40 on land to the North of West Horsley will make this rural tourism amenity unviable. This may accord with developers’ plans, since the site would then be vulnerable to infilling with yet more housing

Answer (if comment is on questions 1-7 of the questionnaire): ()
The Plan is already out of date, with Britain leaving the EU many European laws that currently apply to this Draft will come under scrutiny these issues should be considered within the draft, and GBC should decide now which European laws they will uphold until the next plan.

With the possible return of many European citizens to Europe and possible recession projected housing numbers and growth should also be reconsidered.

How can GBC say you are producing a map for the areas you want to 'protect' i.e. the Green Belt and Surrey Hills and then take huge swathes of Guildford out of the Green belt by insetting, other sites, and the potential damage to Surrey Hills. The green belt belongs to the whole Metropolitan area, GBC are supposed to be the care takers of it.

The increased population from new housing is not sustainable when according to Gov figures 45% of Guildford borough commute and the current train (incl. car park) and roads infrastructure is already severely overcrowded.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The re-inclusion in the plan of Site A35 Three Farms Meadow, alias the former Wisley airfield, Ockham following a huge public outcry, and after Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds has deceived many residents into thinking that it has been defeated. This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected.

Policy A35 should be removed from the plan for all the reasons the development was rejected by the Planning Committee.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

### Comment ID: PSLPP16/11640   Respondent: 8721857 / Andrea Lightfoot   Agent:
**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy D1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
No reference to vernacular or historic design guidelines, even in Conservation Areas. Most of the borough, especially the rural areas, has vernacular design guidelines that are available to give suggestions as to appropriate design. These should have strong planning force.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Sustainability should be the main ambition, conditioning the whole local plan and running through it, as claimed in the NPPF, “like a golden thread”. It should be set out clearly in Policy S1.

Your plan wants to build towns in the Green Belt that are environmentally unsustainable. Bringing increased car use and unacceptable traffic congestion, overstretched social infrastructure, and more greenhouse gas emissions, noise and light pollution. It’s counter-intuitive and contradictory.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The policy should commit the Council firmly to protecting and preserving our heritage assets from development. Instead, the specific policy pledge to “support development” that might “enhance” heritage assets leaves wide scope for abuse in the form of destructive commercialisation.

This policy needs to be much stronger, and do much more to protect and preserve our historic assets.

### Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

The plan envisages that 40% of homes built will be “affordable”, but this does not provide any accommodation for low-paid workers, for example, those on the minimum wage, who cannot afford to buy so-called “affordable” homes or pay an “affordable” rent. There is a need for some expansion in social housing, especially in urban areas, where there is a greater concentration of low-paid workers such as those employed in the retail etc.

The number of homes planned in the urban area is too low. There is a need for regeneration in many urban areas, but this is ignored in favour building homes on green-field sites instead. This will not address urban housing needs. It is also unsustainable, since building outside the town does disproportionate harm to road traffic, air quality and overstretched infrastructure.

All the stated policy aims for “inset” villages will be negated by the excessive weight of new housing development proposed which would radically change their character forever.

**Attached documents:**
Tourism and visitors do not always depend on new visitor “attractions”, ie. Newlands Corner. In this policy, the presumption in favour of development may damage Heritage sites and the Green Belt.

Guildford has many “leisure and visitor attractions” already. Need examples.

The priority should be to protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London.

Don’t ruin our National Attractions ie RHS Wisley with a huge neighbouring development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/11637  Respondent: 8721857 / Andrea Lightfoot  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The policy “vision” refers to protecting the Guildford’s “unique setting” (including, surely, its surrounding Green Belt and countryside views) but this is not carried over into the formal policy wording in the blue box.

There should be much more residential use of the town centre where most people, especially the young and less well-off, want to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose a visionary regeneration plan for the River Wey/Walnut Tree Close area, where there is arguably enough brownfield land for 4,000 new homes, meeting near all the borough’s housing need over the plan period without harming the countryside.

There is an urgent need for a brownfield register and to focus on brownfield redevelopment before considering development outside the existing urban area. CIL strategy must promote brownfield redevelopment

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

To the proposal that sites on the edge of District Centres should be considered for retail developments allowing retail hubs to be vastly expanded in order to smooth the way for vast new housing estates outside in the countryside.

The Council should not be preparing the way for new supermarkets in the Green Belt, supermarkets are closing due to deliveries. Rural retail capacity should be left to local demand.

The policy proposes not a single measure to support existing rural shops and services that are the lifeblood of village communities, e.g. using business rates and other levers at the Council’s disposal.

NPPF 59: “Local planning authorities should consider... the overall scale, density, massing, height, landscape, layout, materials and access of new development in relation to neighbouring buildings and the local area more generally.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11626  Respondent: 8721857 / Andrea Lightfoot  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The policy in the blue box says is that the Council will encourage building over the plan period. We need rules, context and we need a proper framework.

The housing mix is based on out-of-date, pre-EU exit projections and on assumptions set out in a flawed SHMA that has not been scrutinised.

Higher density development in the urban area would be an improvement, not high rise ruining the views but sensitive regeneration with 3-4 storey blocks with landscaping and underground parking.

How can Guildford trust GL Hearn “We act for many of the leading developers.” “Focused on maximising returns from real estate assets.” and part of Capita Real Estate, when it is not in there interest to act for GBC.

Student accommodation should provided for all of new students and more than 60% of existing students by the Uni, freeing ideal family accommodation in the urban area. Other university cities insist on higher percentages than those proposed in the plan. Surrey University, has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks).

If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11627  Respondent: 8721857 / Andrea Lightfoot  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The viability clause (4.2.40) means that in practice the policy would not work. Private financial viability has no place in a public policy and should be removed. Loosing countryside for no local benefit.

Building more homes in Guildford cannot increase real affordability given the London market and the average price of houses in the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11628  Respondent: 8721857 / Andrea Lightfoot  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

It implies that homes can be built anywhere near a settlement of any form (including agricultural land, Green Belt and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list and they are not in perpetuity because of right to buy.

The blue-box policy wording needs to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The sustainability of the settlements which the Council want built across the countryside depends on a general shift from private car use to walking, cycling and public transport, this will not happen everyone will still drive, especially at the proposed Wisley Airfield site where they would be isolated. The proposed sites are often miles away from the nearest railway station, the station car parks are all full. Bus services even in the largest villages are almost non-existent. Many roads flood badly and have no footpaths.

The vast majority of the borough’s residents are not able to cycle.

Park-and-rides are part of the transport mix but are too slow for commuters. For an adult couple going shopping it is still cheaper/easier to park in town.

The addition of two new stations appears good but will slow down train journeys, which are already packed and what’s the point when we are told the Waterloo lines have no extra time slots for extra trains, we are not cattle.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This policy states “the general extent of the Green Belt has been retained.” The plan has not done this, at this rate it will be nearly gone in just over 100 years, possibly during the lifetimes of our grand children.

The Metropolitan Green Belt forms 89% of the borough. It is precious beyond the short-term demands of the present Government’s policy or a 15-year local plan. It is a legacy to future generations – an asset and amenity that belongs as much to all Londoners as GBC, have you done your duty to cooperate with all of them, I believe their Mayor has banned building in the Green belt in the London area.

These assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is contrary to previous responses to public consultations.

Loss of 7% when insetting, infilling and settlement boundary extensions are included, unacceptable.

Instead say no to land-banking urban sites as a financial speculation.

I strongly object to “insetting” of 14 villages from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages. I am deeply disturbed that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages.

I strongly Object to Wisley Airfield site being included, it is not a brownfield site and it completely ignores the SPA influence and the councillors own decision to object to it. Very strange.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire):()

To the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development, however, it does identify the principle of development and uses.” This ignores the tens of thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. This amounts to a war of attrition by the Council in conjunction with developers, since many busy residents are sick and tired of repeating the same comments to deaf ears.

The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014, commenting is a waste of time.

All Green Belt sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should always be above short-term considerations such as perceived housing need, as the law has established.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire):()

The Green Belt is not for swopping. Areas in the West are having new green belt while other areas in the East are having their Green Belt removed, the reason why land nearer to London is more ecologically valuable as Green Belt is as a Green ‘lung’, the further away from the Urban area the less efficient it is in its purpose to curb pollution.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11632  Respondent: 8721857 / Andrea Lightfoot  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire):()
Urban development on existing hardstanding would not create additional flood risk, especially where there is scope for improved flood resistance measures to be included in the design. Sites such as the Arriva bus depot, on the River Wey bank, are potential high-value brownfield sites that would not be available for housing if this policy is implemented. It is not the footprint of existing buildings that should limit future development, but the extent of existing hardstanding. Tarmac and concrete do not act as functional floodplain, and some land with hard standing close to the river, within the town centre and within easy walking distance of the railway station, provides an excellent opportunity for real urban regeneration that could protect the surrounding countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11633  Respondent: 8721857 / Andrea Lightfoot  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The policy must ensure that it is not using land which is adjacent to the Special Protection Areas.

The mitigation (cash compensation) offered for development in the special protection area is so small as to be meaningless.

SANG (Suitable Alternative Natural Greenspace) is not beneficial since the sites identified or targeted are already green space. This is just using agricultural or wooded land as recreation land in order to justify building on other green spaces nearby. There is no actual increase in open space or environmental protection; instead, it is a ploy designed to permit building on otherwise protected areas. SANG – in part used to prevent dogs and cats attacking nesting birds. Car parking actually reduces the green space.

Strongly Object to Car Parking on Effingham Common, due to having its own protected species.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/11624  Respondent: 8721857 / Andrea Lightfoot  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
No definition of sustainable development. The policy also needs to set out any principles for applying sustainable development in practice for local planning decisions, which could have serious long-term impacts.

No environmental protection.

It doesn’t reflect issues of transport and infrastructure in the rural areas, where scale and density are unsustainable.

It does not say how each element is to be weighted or conflicts resolved.

Where is the Green Belt in the Policy - to protect the green areas in perpetuity, stopping urban sprawl and villages converging. Commit to Green Belt boundaries and protections. It is what is so great about our borough.

“Wherever possible” and “without delay” is not the sort of language to be used in a serious planning document like this, it is too open to be used by any half decent developers lawyer.

Where are the 12 Core Planning Principles set out in NPPF?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: PSLPP16/11625  Respondent: 8721857 / Andrea Lightfoot  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The number is based on in EU projections for economic and population growth, including migration. These now need to be revised downwards, due to our exit. The area is artificial, and so are the housing numbers artificially high.

It is not clear why Waverley is included in the SHMA and not say Mole Valley. Guildford borough is unique and should be treated as such. These concerns have been raised since 2014 but the Council have failed to seek good data.

No public consultation on the SHMA and no scrutiny. The method has not been disclosed therefore one one knows whether the numbers are completely fabricated. This is not a good basis for our Local Plan.

University Student housing should not be counted in the SHMA.

Most of Guildford borough is meant to be protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). This would be a major and irreversible change, a largely rural borough into a suburban one like Woking, if residents wanted to live in Woking we would, its cheaper and has lower house prices. A substantially lower housing number would remove the need to build on Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY E4 - Surrey Research Park

- Subordinates public planning policy to the University of Surrey’s private, commercial enterprises (not its public academic purpose).
- No cost/benefit analysis of harm to Green Belt involved in extending research park.
- Waters down research purpose of park, turning into a general business park.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/9063  Respondent: 8723809 / Sally Blake  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY E5 - Rural economy

- Incompatible with high housing numbers proposed for rural areas elsewhere in the plan.
- Insetting and settlement boundary extension endanger appropriate rural activities listed that depend on maintaining rural areas’ character.
- Town-centre uses for rural areas contradict government’s localism policy and need to consult and protect village environments.
- Established commitments to high-speed rural broadband and mobile coverage watered down despite 2014 consultation responses.
I object to POLICY E6 - The leisure and visitor experience

- Danger of overdevelopment: success doesn’t depend on building “attractions” which can harm heritage and rural settings. No case made for creating new ones.
- No policy of opposing reduction in rural hotel capacity.
- No definition of what added value interventions by Council can make to normal visitor market mechanisms.
- No policy of supporting Guildford countryside as its prime leisure and visitor asset, whose value rises as London gets bigger and busier.
- No vision of what the ideal visitor experience of the borough actually is and how to support its various elements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to POLICY E7 Guildford Town Centre

- No statement in policy wording of value of Guildford’s rural setting and views.
- No consideration of Town Centre Master Plan, GVG proposals or station redevelopment plans.
- Proportion of new housing in town far too small. Development pushed into countryside, ruining the latter and harming urban regeneration.
- No brownfield register.
- Too much big retail, despite online shopping revolution and decline of traditional high streets internationally. Futile to try to turn Guildford into Woking or Kingston.
- No measures to support small, niche retailers in town, e.g. through business rates.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E8

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY E8 - District centres

- Too much scope to expand rural retail centres to justify major housing expansion across the countryside, despite lack of demand. Will spoil character of villages while harming Guildford’s role as a retail hub.
- No measures to support existing rural shops and services, e.g. through business rates.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/9067  Respondent: 8723809 / Sally Blake  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E9

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY E9 - Local centres

- No need for retail development “adjacent” to rural centres for same reason as Policy E8.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/9051  Respondent: 8723809 / Sally Blake  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1
I object to POLICY H1 – Homes for all

- The policy doesn’t set any constraints on building.
- Housing mix based on growth and demographic assumptions and unreliable SHMA that weren’t put out to formal public consultation and wasn’t scrutinised by Councillors.
- I support higher density development in the urban area.
- Fails to compel University of Surrey to use its thousands of planning permissions and existing space, such as car parks, for student accommodation.
- Lets University off the hook of accommodating all its students, so as to free up houses for the most needy in town.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to POLICY H2 – Affordable homes

- Using the official definition of Affordable is not appropriate. ‘Affordable homes’ in this area are not affordable!
- Pushing for these homes just means pushing for more development.
- The viability clause lets developers off the hook of providing even these (non-) affordable homes. It is too open to manipulation.
- Contradicts government policy to develop less advantaged regions of the UK. People don’t have to live and work in Guildford but should be encouraged to move to cheaper, less congested areas.
- This policy won’t affect market forces or house prices. Guildford is too small and too near London to influence these, however many homes it builds.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to POLICY H3 – Rural Exception Homes

- It loosens the criteria by allowing “market housing” and development that changes the housing mix. Developers would be able to override NPPF “exceptional circumstances” and other restrictions to build large houses in the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/9072  Respondent: 8723809 / Sally Blake  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY I4 Green and blue infrastructure

- Infrastructure considered here as an afterthought, rather than pre-condition of development. Should be a key issue for the rest of the plan.
- Excessive housebuilding in countryside not supported by any funding or provision for infrastructure.
- Heavy focus on building on greenfield sites inefficient and unnecessary: cheap for developers but much more expensive for the public who have to fund the infrastructure.
- Draft CIL scale discourages use of brownfield land first.
- No plan for organic increase in existing traffic congestion, let alone once thousands of houses are built across the countryside. Local roads hardly considered. Green Belt being eroded before road widening/improvement plans certain, encouraging over-development of greenfield sites.
- All Green Belt sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/9054  Respondent: 8723809 / Sally Blake  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**I object to POLICY P1 – Surrey Hills Area of Outstanding Natural Beauty**

- This policy weakens existing protection when it should strengthen it. It is dependent on the Surrey Hills Management Plan. The latter welcomes housing development. Even major (undefined) development in the AONB would be permitted if exceptional (undefined) circumstances could be demonstrated.
- The wording in paragraph 4.3.9, Policy P1, and the bullet points in the first paragraph of Policy box P1, could be interpreted to allow spectacular viewpoints and features in the AONB to be commercialised with visitor centres, shops and man-made additions for play areas. These would contravene the 1949 National Parks and Access to the Countryside Act 1949, which established the AONB "for the primary purpose to conserve the natural beauty of the landscape." (paragraph 4.3.1)

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**I object to POLICY P2 – Green Belt**

- No declaration of support for protecting the Guildford Green Belt, contrary to NPPF and government statements.
- No evaluation of value of local Green Belt as a public and private asset: it’s just treated as potential building land with a few inconvenient restrictions.
- Impact of Green Belt development on local agriculture ignored.
- Impact on rural leisure and tourism ignored.
- Impact on flood control ignored.
- Impact on carbon sink and knock-on effects for air pollution and climate change ignored.
- Impact on biodiversity ignored.
- Impact on natural heritage ignored.
- Impact on water catchment ignored.
- Impact on room for public space amenities (parks, cemeteries, waste facilities etc) ignored.
- Impact on rural business (e.g. mineral mining, film making) ignored.
- Impact on natural landmarks and views ignored.
- Harm to public health and wellbeing (physical, psychological) ignored.
- Allows excessive levels of development in breach of views expressed in last consultation and Conservative Party manifesto commitments at the last local elections.
- Has allowed ruling Councillors to argue that there is an acceptable percentage of Green Belt that should be sacrificed to development, when no such rule exists in the NPPF.
• Ignores alternative approaches, such as fair burden-sharing under which settlements would undertake to accommodate new development in proportion to their size.
• Disproportionate amount of development (most of it, in fact) to be in Green Belt. Too few new homes in urban areas where most people (especially the young and less privileged) want to live. This will act against much needed urban regeneration.
• “Insetting” of most villages disproportionate and unjustified in terms of their contribution under the NPPF to the purposes of the Green Belt. Based on flawed Green Belt and Countryside Study. Idea that most Guildford villages do not contribute to “openness” is subjective.
• Major settlement extensions allow indiscriminate housebuilding, as irregularly shaped villages are squared off to enclose green fields.
• Overall harm to Guildford Green Belt unjustified by any objective development need post-Brexit.
• Ignores most of NPPF 17 stipulations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to POLICY P4 – Flood risk and water source protection zones

• Inappropriately limits development of urban, brownfield, hardstanding sites, pushing development unnecessarily into the countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/9058  Respondent: 8723809 / Sally Blake  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY P5 - Thames Basin Heath Special Protection Areas

• Compensation mechanism too feeble to provide protection.
• Cynical encouragement of SANG to justify nearby development in protected areas. Does not extend protection or amount of green space, and can damage them (e.g. dog and cat attacks on wildlife).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/9049  Respondent: 8723809 / Sally Blake  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY S1 – Presumption in favour of sustainable development

• No definition of sustainable development given, no reference to its importance in the NPPF, no guidelines for applying it to planning.
• No mention of Green Belt, Guildford’s greatest legacy by far to Sustainable Development. No commitment to protecting it.
• No statement of how economic, social and environmental impacts should be balanced.
• No reference to most of the NPPF Core Planning Principles.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to POLICY S2 – Borough Wide Strategy

- No justification given for 13,860 housing need figure. Figure based on a secret formula used by consultants and never seen by anyone on the Council or by the public. Council has failed to seek its disclosure.
- 13,860 figure confuses the OAN with a housing target. No definite housing target given, leaving too much scope for the Council to make one up. I can’t understand how we’re being consulted when we don’t know how many houses the Council want to build, taking all the constraints into account.
- Figures based on a Housing Market Area that ignores 2 neighbouring districts (Rushmoor and Mole Valley) and is much too small, since most people commute or travel far outside the Area to shop or study. This distorts the figures: no reason why Guildford needs to build nearly twice as many large housing estates as the rest of Surrey put together, or half of all sites over 100 units.
- High numbers involved would transform the character of the borough from mainly rural/Green Belt to urban, creating a corridor of development out of London as per Woking or Croydon.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I wish to object to the draft local plan, on the grounds that Guildford council have failed to disclose how they arrived at the number of 13,860 new homes.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. APPENDIX D

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

° The “objectively assessed need” figure of 693 homes a year is too high.

° A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.

° The current SHMA inflates the proposed housing figure due to

° failure to correct for errors in the historical data for international migration flows,
° issues with the way it considers students and affordability and
° flaws in the method for estimating the number of homes needed to support job growth.

° It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Introduction

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

SITES - POLICIES A1 TO A57

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. **POLICY A25 - Gosden Hill Farm**

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  
  Surrey Fire and Rescue deployed.

2016
Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost. There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size. Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.
If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1570  Respondent: 8726529 / Eric Palmer  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.
Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost. There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size. Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning
and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/1475  Respondent: 8726529 / Eric Palmer  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.
The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council’s eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)
It is clear that with this site being added at the 11th hour, no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

1. **POLICY D4**

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3226  Respondent: 8726529 / Eric Palmer  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E2

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

1. POLICY E5

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E6

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey
Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. **POLICY E7**

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
1. **POLICY H1**

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students I support in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.
Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. POLICY H3

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations Ire available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
POLICY H3 – Rural Exception Homes

I OBJECT  This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.
Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY I2**

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

1. **POLICY I3**

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Attached documents:

1. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the
bureau’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of “About Guildford” (published by the Council) on page 5 states that “... the Plan rejects any schemes that would have a detrimental impact on the Green Belt.” This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.
There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
1. **POLICY P4**

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have lived in the borough for 46 years and have become increasingly alarmed at the constant erosion of rural amenities and increasing pressure on local services and traffic. I am aghast at the proposed plan which will only exacerbate further these issues.

I object in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary. I set out below my objection to specific policies and matters within the Plan.

1. **POLICY S1**

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.
The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have lived in the Guildford area for 46 years and am devastated by the latest proposals in the Guildford Borough Councils Local Plan. The Council appears to have no regard for the wishes of the local residents and just ploughs ahead with its own agenda to make Guildford into an economic growth area which is not wanted by the local population. People who choose to live in this area want to be surrounded by green belt countryside and do not and do not wanted it covered in housing estates.

Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan.
1. I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY S2

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It
is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears
to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Borough Wide Strategy (Policy S2)

1. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.
2. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.
3. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any commonsense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in
the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Questions posed by Guildford Borough Council as part of its consultation.

Questions from GBC

24.A. Question 1: The evidence base and submission documents

The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence. The evidence base documents contributing to the preparation of the plan are listed in Appendix D and can be found on our website (links open in a new window).

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

ANSWER
I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SQLP16/676  Respondent: 8726529 / Eric Palmer  Agent:
Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. I do not believe the draft plan accords with the NPPF policies on protecting the Green Belt.
14. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not itself a very special circumstance justifying an indiscriminate removal of sites from the Green Belt. Having properly calculated a housing needs number, constraints should be applied to it to reflect the Green Belt and AONB. Each proposed Green Belt site then needs to be considered on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances, and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt, can the proposal proceed. The draft plan does not demonstrate that this has been done. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
15. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
16. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
### Question 4: Duty to cooperate

Do you consider the Proposed Submission Local Plan: strategy and sites **as a whole** has complied with the Duty to cooperate? Please provide the following information being as precise as possible:

- why you consider it has or has not complied with the Duty to cooperate and
- what change(s) (if any) you consider necessary to make it comply with the duty to cooperate, explaining why this is the case.

#### ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites **as a whole** has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I trust that the objections made above are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

Please acknowledge receipt of my comments.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In summary my objections are very much directed to the inadequacy of the Plan to support new housing with the necessary infrastructure and especially relating to the road network which already creaks with the existing amount of traffic. In places the Greenbelt is being sacrificed for homes that will most probably be proven unaffordable which in turn will change the developers plans and promises made to finance new infrastructure.

I propose that as a minimum the planned development at Garlicks Arch be withdrawn and that a detailed road traffic relief plan be undertaken and committed to before any development at all is agreed.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Contrary to national trends, too much potential development land within the town centre is being allocated for retail or commercial development rather than housing. High added value businesses are welcome in the borough, but much of the employment land is designated for retail or low added value employment floorspace, which only exacerbates current issues such as lack of low cost housing and heavy traffic. Sites such as the Burnt Common Triangle, currently in the Green Belt, are inappropriate for heavy industry,

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The paragraphs relating to density in Policy H1 have been deleted. To ensure developments make optimal use of space there must be a policy to cover minimum and maximum densities. Without a policy to cover density, there is a risk that developers will use land inefficiently, putting additional pressure on the countryside and un-developed land. This deletion is inappropriate.

Answer (if comment is on questions 1-7 of the questionnaire): ()

There is concern about the inability of current infrastructure to meet current and future needs. The policy recognises that the “Infrastructure provider” will maintain infrastructure in most cases, and developers can only offer a contribution via Community Infrastructure Levy. Until the current infrastructure can meet existing needs adequately, further development should be very targeted to meet only absolute essentials.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The policy relating to AONB weakens the protections offered, and (unlike previously) does not have restrictions on non-major development. This is a move in the wrong direction. Previously all proposals were considered against the 5 key tests – now development in the AONB seems to be more acceptable. This is weaker, not stronger, and is contrary to huge responses from the public in previous consultations and the weight of protection given to AONB in the NPPF.

<tr>
<td>Exceptional circumstances must be demonstrated in order to develop Greenbelt yet despite the weight of public opinion against weakening of this policy, 70% of new housing development will be in the countryside, of which, 58% will be in Greenbelt. By definition, this is not an exception and no attempt is made to demonstrate exceptional circumstances, in line with the requirements of the NPPF. Insetting villages is of concern since restrictions within the settlement boundary raises concerns over loss of character. The Rural Economic Strategy covered in 4.51a, promoting affordable homes everywhere in the countryside including the AONB as a main aim, is a mechanism for promoting overdevelopment in our countryside. It has not been subject to full public consultation and is based on data, which is not up-to-date. Three major strategic sites – Blackwell Farm, Wisley Airfield and Gosden Hill Farm – are in the Green Belt. Previous consultations show that, in line with the NPPF, the public would prefer to use brownfield land in the urban area first.</td>

Answer (if comment is on questions 1-7 of the questionnaire): ()

I fail to see how building on Send MARSH (the clue is in the name) can be a sensible idea in terms of future flood risk to properties unless you build all properties on high stilts and give every property a boat!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not know enough about the law to judge whether or not the document is legal. I object to the principle of a presumption in favour of development rather than a presumption in favour of the needs of the environment and local people.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
When assessing the need for development in the local rural areas I want to know how the council proposes to determine whether there is true local need. Under the last local plan the only housing development allowed in the villages was supposed to be for people within the parish. The recent social housing development in new road Gomshall has been mostly filled with people from outside the parish. How does the proposed local plan address this and what assurances have we that self interest on the part of planning officials will not take precedence.

If East & West Horsley are taken out of the Green Belt then I believe it would be much easier for developers to build new homes which would very quickly destroy the quality of living in Horsley. The existing infrastructure in Horsley cannot cope with the existing number of residents so any increase in housing would again be detrimental to the community.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the building on the Green Belt at Send at Garlick’s Arch and Send Hill because it is not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually eroded. I have cycled to work from Ripley to Camberley for over 25 years and in this time the volume of traffic has increased massively. If we are serious about the environment and wish to encourage more people to give up the car then we must resist further development and erosion of the green belt. Our road system simply cannot cope.

2. I object to the exaggerated “housing need” figure of 13,860 which is far too high and results in the completely unnecessary development of the Green Belt. The way students, economic need and affordability are calculated inflates the housing need. No assessment is presented which projects the pull factor this scale of development will have to people already living in London. Living to so close to one of the largest cities in the world Guildford will just act as London overspill - what % of this figure is overspill - 80%?

3. I object to all proposals to build on the Green Belt at Send and elsewhere in the borough because all the actual development that is really needed for locals not London overspill can be accommodated in Guildford’s urban brownfield areas much closer to existing transport hubs.

4. I object to the proposed new interchange onto the A3 at Burnt Common because it would be disastrous for Send and the (A247) would be gridlocked all day. As a Cyclist using this road every day I am seriously concerned about pollution and safety on this road. It will just become a major cut through to/from Woking with traffic from the clockwise M25 using this instead of the M25 J11. Old Woking is grid locked as it is - no account of the development by Woking Borough Council in and around this area is considered which has already increased congestion i.e. the massive development at Willow Reach (nr Woking Football Ground).

5. I object to the development at Garlick’s Arch because the site has a particular conservation sensitivity since it is covered in ancient woodland. Trees which existed in the 16th century would be endangered. The site is also subject to flooding. It also proved a natural barrier from the A3 reducing pollution and traffic noise. So very few sites of ancient woodland remain and this should be preserved at all costs.

6. I object to the proposed massive development at of 2,000 houses at Wisley Airfield, 2,000 houses at Gosden Hill and 1,850 houses at Blackwell Farm because it will destroy large areas of Green Belt and agricultural land and the local infrastructure requirements have not been properly considered and are inadequate to deal with proposed housing levels. Roads, doctors and schools will be unable to cope.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/6236  Respondent: 8727457 / Nuala Crampin  Agent:
Hogs Back development

I strongly disagree with this proposed development as it is violating green belt and an A.O.N.B. and will remove from the environment of the town one of its major attractions in the form of its rural character. Furthermore the local infrastructure, especially of roads and water drainage is insufficient to support the development. If implemented it will increase the water-logging problems on Broad Street Common, Pound Lane and the area of Wood Street Village, and exacerbate the already acute traffic congestion on that side of Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Land South and East of Ash and Tongham

If this development is allowed it will again destroy an area of rural peace and contribute to even more traffic congestion on the already overburdened A323 and through Wood Street Village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Land South of Normandy and North of Flexford

This proposed development will completely destroy the semi-rural character of Normandy; again there is not the road infrastructure to support it and the A323 and Wood Street Village will be adversely affected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The whole plan is based on the premise that growth and expansion of business and population is a desirable objective for Guildford; I strongly disagree with this as if it is achieved it will change the character of the borough from that of a busy market town to that of city. Residents of Guildford have chosen to live in the former, not the latter. I therefore do not accept the excessive figure for the estimated housing need.

The plan proposed puts too much emphasis on expanding retail capacity within the town at the expense of allocating town sites to housing development. The need for retail premises is in decline due to online shopping, and housing development should be built at high density on town sites in order to preserve the green belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
In conclusion I do not see the borough council to be acting in the best interests of their electorate in the draft plan as they will be destroying the environment and character of the area in which we have chosen to live. Indeed much of what is proposed seems to be in the best interests of property developers, and there seems to be little regard for the views of residents expressed in the previous consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the release of Site A46 from the Green Belt and the proposed development in Normandy for the following reasons:

Road/highway infrastructure. There has been no demonstrable evidence of any forward planning to increase and develop the highway accessibility which would be required for a housing development of 1100 new homes/traveller sites/secondary school. At least 1500 additional cars using minor local roads would be a conservative estimate. Unless there is an immediate plan to widen the A31/A3/A323 and build a bridge/tunnel to relieve the Ash railway crossing, any proposals for this housing development are ill-thought out, foolhardy and unplanned.

Secondary school provision under 'exceptional circumstances' for development. In-depth research and studies show that the two secondary schools in the Normandy catchment area: King's College and Ash Manor are approximately 40% under subscribed and likely to continue to be so. I object that one of the main premises for the proposed development is based on flawed statistics for additional secondary school places, when the existing schools are struggling to fill pupil numbers.

Travellers' sites proposed within the development. I object that Normandy is once again required to provide further sites for travellers. Normandy has its quota of these sites and it is time for a fairer distribution within the Borough.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P2 Green Belt. I object to the misuse of Policy P2: Green Belt and the apparent justification of 'exceptional circumstances' for the removal of Normandy from this policy. GBC's Local Plan appears to be re-writing the green belt policy and choosing to ignore vital historical and contemporary concepts of the green belt. Professional planners ignore it at their, and our, peril. The UK is a small, over-crowded land mass with an ever-growing population. The retention of open spaces, wildlife habitats and, most importantly, clear air is not a 'nimby' whim but of survival necessity for rural and urban populations.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

S2 Unfair concentration of housing development and overturning of Green Belt sites to the west of Guildford. Once again, it seems that the villages to the west of Guildford are the target of GBC's development plans and I object to an apparent uneven policy of distribution within the Borough.

Lord Onslow's proposal to develop1000 new homes, a new school and sports facilities on Clandon Golf Course, Merrow is an excellent and practicable idea and it is curious that it is absent from the overall draft Plan. The site is well served by a good road system, with excellent access to the A3/A25/M25 thus avoiding the need to circumnavigate the congested roads of central Guildford. The schools on that side of Guildford (St. Peter's, George Abbot, Howard of Effingham) are popular and would benefit from an additional secondary school in the area. It's a win/win idea for Lord Onslow's proposal.

Comment ID: PSLPA16/904  Respondent: 8728577 / Peter Williams  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed local plan for the following reasons:

1. Green Belt and the Countryside (Policy P2) and Surrey Hills Area of Outstanding Natural Beauty (AONB) (Policy P1)
   1. Policy P2 states that the Metropolitan Green Belt will continue to be protected against inappropriate development. I object to the village’s removal from the Green Belt by insetting and extending the 2003 Local Plan Settlement Area boundaries.
   2. No exceptional circumstances are made for the new boundaries.
   3. The Green Belt study and Countryside Study is flawed. Wet Horsley’s defined settlement boundaries (2003 Plan) do not need to be extended.
   4. The parish has a rich and varied mix of low density housing and a good number of historic buildings. It sits on the north side or the North Downs (partly within the Surrey Hills AONB) and is a magnet for visitors, particularly walkers and cyclists, throughout the year.
   5. The key evidence document (Guildford Borough Economic Strategy 2013-2031) makes no case for the large increase in housing in West and East Horsley, nor for that matter, in the neighbouring villages.
   6. The proposed new economic development sites are proposed for the opposite side of the borough. Any increase in housing should be close to them.

2. Presumption in favour of sustainable development (Policy 1), Borough-Wide Strategy (Policy S2), Homes for all and affordable homes (policy H1, H2)
   1. Policy S2 calls for 13,800 new houses to be built during the plan period of 2013-2033. This number is excessive and unsustainable in the villages surrounding Guildford, particularly in West Horsley.
   2. Substantial expansion of the village is not sustainable. There is a single small shop, no post office, and a very restricted bus service. This is inadequate for the proposed increase in housing.
   3. The density of development proposed is much higher than the current level and will be out of character with the varied mix of type and layout in the village.
   4. There is already a deficiency in the local infrastructure; there is a lack of schools and shops; drainage is overloaded; parking is in short supply and the station car park in East Horsley is often full.
   5. The need for the proposed number of homes to be constructed during the first 5 years is completely unproven. The West Horsley Parish Council and Surrey Community Action Housing Survey: May 2014 identified a need for some 20 additional affordable homes to cater for young people and local elderly people who wished to remain in the village by down-sizing to smaller homes.

3. Sustainable Transport for new development (Policy i3)
   1. The practicalities of delivering secure travel plans have not been properly considered. The elderly, disabled, or those with small children, are best served by developments in towns and close to extensive amenities, including health care. The Policy states that developers ‘will be expected’ to propose and secure travel plans; this is a far cry from ‘be required to deliver’.
   2. Access to essential facilities (this is not mentioned in the written policies, although there are vague references in the infrastructure policies section)
      3. The green grocer may retire this year leaving the village with no shop. Plus parking outside the shop is, in any case, very limited.
      4. Parking is very limited in East Horsley where most residents go to use the library and the shops. The proposed increase in population will make movement through, and parking in, the village much more difficult.
4. Schools (schools are mentioned in the definition under Policy I1)

1. There is already a shortage of state primary school places in the village. The Raleigh School has been oversubscribed for several years.
2. Secondary school places at the Howard of Effingham School amongst others are limited and necessitate a significant bus or car journey to attend.
3. The private schools of Glenesk and Cranmore are busy and generate significant traffic from other parts of the county for parents to deliver and collect their children. There is heavy traffic on the A246 and Ockahm Road North as a result at the start and end of each day.

5. Medical facilities (Infrastructure Delivery Plan refers to a possible extension of Kingston Avenue Medical Centre)

1. The doctors’ surgery is already busy and it is difficult get appointments now. An increase in patients will adversely affect the level of service.
2. A major extension of the Royal Surrey Hospital will be needed to deal with the increase of population (which is in excess of the Government ONS forecasts).

6. Roads and transport infrastructure (mentioned in the definitions of Policy I1)

1. There are frequent trains to London and Guildford, but the station car park is normally full on weekdays. There is no scope of extension of the car park.
2. The large increase in population planned will overload the station and the roads serving it.
3. Because of the village’s location and the distant location of jobs and amenities, most households have at least 2 cars. The proposed housing will increase traffic on the already inadequate roads, prolonging journey times, increasing local air and noise pollution, and increasing risk of traffic accidents.
4. The road surfaces and drainage are already in a very poor state of repair and will deteriorate even more rapidly.

7. Waste water infrastructure (mentioned in Reasoned Justification under Policy I1)

1. Sewage is known to overflow in the Ockham Road and Green Lane areas
2. Guildford Council has been advised by Thames Water that drainage network is unlikely to be able to cope with the increased demand of the proposed population increase. The foul water drainage system connecting West Horsley to the treatment works north of Ripley will require upgrading, for which Thames Water advises 2-3 years lead-in subsequent to any planning permission.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )
I object to the proposed local plan for the following reasons:

1. The reduction in the number of new homes in the Green Belt is not enough. There is still a very large number of new dwellings proposed for construction in the Green Belt.

2. It is proposed that the area to the east of the borough takes an even higher number of dwelling in the Green Belt.

3. Many other councils have chosen not to constrain overall housing growth to protect the Green Belt, yet Guilford has not. Although the objectively assessed housing target has been reduced since the 2016 plan to 12,466 dwellings by 2034, this still represent a 25% growth for Guilford.

4. Nothing has changed since last year’s consultation to address the sustainability aspects of the West Horsley development sites, as is required by national policy requirements. No matter how much people are encouraged to travel on foot or by cycling, each new home will need at least one car to give access to Horsley station, shops, medical centre, library, etc.; this is easily demonstrable.

5. More apartments are needed in Guildford, not more retail space. The rise of on-line shopping and the reduction in physical shopping is clearly documented and many authoritative reports support that view that the trend will continue.

6. No changes have been made to the proposal to inset both East and West Horsley from the Green Belt. Policy P2 states that the Metropolitan Green Belt will continue to be protected against inappropriate development. I object to the village’s removal from the Green Belt by insetting and extending the 2003 Local Plan Settlement Area boundaries.

7. The overload of local social and physical infrastructure is not addressed. Increased demand for access to medical facilities, schools, station parking, roads, and particularly disposal of waste water remain at large.

I trust that you will take my views into consideration and I would be happy to discuss the matter further with you.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Wood Street Village Association

Wood Street Village Association was established in 1990 to represent the Village of Wood Street, and represents the people of Wood Street Village, as defined by the Parish Boundaries, some 1612 people and 550 homes.

WSVA Summary View

WSVA remain deeply disappointed by the process and output on this local plan. Any project which works without targets (in this case housing numbers) for so long can be suspect. In this case since the housing number (693 per year) has only recently been produced, has not been scrutinised, is not open to examination, and is so much higher than the existing 322 per year, we believe this a significant flaw in the plan.

WSVA recognise the need for a Guildford Local Plan, beyond the legal requirements for one. This is seen as good practice and WSVA support that need.

WSVA also see a need for Social Housing, however we do not believe this plan takes proper account of all the evidence to correctly enable this housing to be available in the right place. We see far too many houses built on Greenbelt (nearly 8000), and far too few in the town (2000) where available land appears to be allocated at too low density, and to allow a retail expansion of close to 40%, which is against almost all market trend information.

We see much of our resident feedback from the regulation 18 consultation completely ignored., we therefore conclude, that the regulation 18 consultation feedback has largely been given lip service only. Despite the major rewrite, many policies are still loosely worded, and the greenbelt protection asked for and which was paramount in many responses, has been completely ignored.

Over 1100 people said in the regulation 18 responses, no building on the greenbelt, against just 6 saying yes, “saving the greenbelt” was a major election manifesto promise, yet the number of houses on the Greenbelt proposed is now even higher than original local plan proposal consultation of 2014.

We remain deeply sceptical that the council planning office is representing its residents views in this local plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: 20160716 Local Plan Consultation (Reg 19) response By WSVA Final.pdf (1.1 MB)
Mixed use 1,800 homes, 6 Traveller pitches, employment, Local Centre, school etc.

Object

This area is Greenbelt. Despite suspect evident, Greenbelt Study evidence, it does meet all purposes of the Greenbelt and should be rejected on this basis alone.

As a result of a recent study (June 2016) by Land Management Services Ltd, we now know that most of Blackwell Farm and the land in its vicinity is of a landscape and scenic quality, character and condition that should merit inclusion within a revised AONB boundary.

The landscape is critical to the setting of the Hog’s Back ridge and in the conservation of rural views to the north of equal, if not greater importance, than land to the west of Down Place, which has been included in the boundary proposed by the Surrey Hills AONB Board.

Two fields at the very eastern edge of the Blackwell Farm/Manor Farm site did not meet the AONB criteria. However, these were acknowledged to be important in providing the setting to Guildford and an important transitional landscape.

The boundary put forward by Surrey Hills AONB Board between Misley Copse and Down Place and between Down Place and the current AONB boundary does not follow any defined landscape features (such as a ridge line, woodland edges, or prominent field boundary) or reflect a decline in landscape and scenic quality or changes in landscape character that might justify exclusion.

The proposed AONB boundary should be reviewed at this location and realigned according to the recommendations made by Land Management Services Ltd – As per their report entitled “Hogs Back Natural Beauty Evaluation” dated June 2016, as attached.

Failure to realign the boundary according to Land Management Services Ltd’s recommendations could enable opportunities for development which would result in significant harm to the setting of the existing AONB and the loss of landscape which is of a character and quality which merits inclusion within a revised AONB boundary.

Lack of infrastructure and increased surface water run-off would affect Wood Street Village (particularly Pound Lane/Baird Drive) and Fairlands.

A development in this location would have a significant negative effect on the wonderful biodiversity of the region. We note that dormouse and insect monitors for study were placed around 2014 (date not recorded) and within 2 weeks of being placed in hedgerows and on field boarders, the hedges and grass areas were cut. We are therefore not surprised if there are studies showing poor bio diversity.

The proposed accesses from the A31 and Gill Avenue would be inadequate to support such a development. Indeed access onto the A31 would be in the AONB. In addition there would be an adverse impact on the following: Ancient Woodland, Strawberry Grove, Dean Bottom, Manor Copse and a strip of Ancient woodland at Wildfield Copse. The Infrastructure Study para 3.10 states there is insufficient waste water infrastructure for this site.

The level of development in Ash would significantly increase traffic on the highway network through Wood Street. The Strategic Highway Assessment Report carried out by Surrey County Council, on behalf of GBC concludes that the Aldershot Road (A323) would experience increased traffic congestion and have a level of service indicator which would be at least unstable or where there would be no spare capacity.

A development of this size is inappropriate for Normandy. Westwood Lane and Glaziers Lane, which are unclassified rural roads, as well as the two railway bridges, are unsuitable for an increase in traffic from such a development. The draft Local Plan indicates that local highway environmental improvements (these are not specified) would mitigate the transport impact from this development...

However, the Strategic Highway Assessment Report carried out by Surrey County Council, on behalf of GBC concludes that the Aldershot Road (A323) would experience increased traffic congestion and have a level of service indicator which would be at least unstable or where there would be no spare capacity. This implies that far more traffic mitigation would be required.

The sewerage system is already running at capacity and could not cope with the proposed development. We are not convinced that there is a demand for a secondary school in this part of Guildford

While we support the emphasis on views, natural features, local distinctiveness, and layout of surrounding buildings, there need to be some good design criteria for Guildford and its setting, which should have mandatory planning enforcement.

The monitoring of this policy is inadequate, and should result in more sympathetic and better designed buildings.

I do not see how 8000 houses built on the greenbelt meets the definition of sustainable. There will be 16000 additional cars (2 per house is the norm), increased pollution and a biodiversity reduction.

The council is also currently reluctant to do emissions testing due to cost. Air quality testing is something which should be required in planning to protect our environment from overdevelopment and should have a clear policy statement and develop is required by law to meet emissions standards.

Sustainability should be a key aim and therefore defined in Policy S1.
We do not see how 8000 houses plus required infrastructure on the Greenbelt, together with the 16000 cars (2 per house is the norm) is in anyway sustainable.
The council is currently reluctant to do emissions testing due to costs. We see this as something required in planning to protect our environment from overdevelopment and should have a clear policy statement.

One of the biggest issues with the local plan is the failure of a strong and far sighted plan for the town. Where is the urban housing development?

Only 2000 houses on brownfield in the town of Guildford are not sufficient, especially when other policies promote retail and industry within the town.

Where are the people going to live to support retail? There are sites available, for example, various sites in Woodbridge Meadows (relocating post office would be a major boost for example), Walnut Tree Close (including the area around the station) and North Street.

I really do not understand the focus on retail and the 40% growth in what is widely now regarded as a contracting business sector, while denying land for housing we also observe:--

1. Retail is contracting. The British Retail Consortium forecast that by 2020 up to one third of those now employed in traditional retail could lose their job.
2. Online sales are still growing. Recently it was announced that 13% of total retail sales now made over the internet.
3. This does not meet the stated objective of attracting highly paid jobs to the area – the majority of jobs in retail are low paid, with zero hours contracts and usually a pay rate based on the minimum wage.

We need the plans for retail to be converted into plans for building sustainable houses.

Especially social houses (i.e. council led).

I expect this plan to change to deliver a much higher density of house building and much more brownfield land allocated away from retail. Good design is essential.

I do like the idea of developing and promoting the river area as a key attraction.

CIL strategy must promote brownfield redevelopment.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Wrong and misguided policy which flies in the face of national and global trends.

Where is the urban housing development? Only 2000 odd houses in the town of Guildford is not sufficient, especially when other policies promote retail and industry within the town. Where are the people going to live? There are sites available, for example, various sites in Woodbridge Meadows (relocating post office would be a major boost for example), Walnut Tree Close (including the area around the station) and North Street.

We do not understand the focus on retail and the 40% growth in a dying sector. While denying land for housing we also observe:

1. Retail is contracting. The British Retail Consortium forecast that by 2020 up to one third of those now employed in traditional retail could lose their job.
2. Online sales are still growing. Recently it was announced that 13% of total retail sales now made over the internet.
3. This does not meet the stated objective of attracting highly paid jobs to the area – the majority of jobs in retail are low paid, with zero hours contracts and usually a pay rate based on the minimum wage.

There has been wholesale mismanagement of the University since the 2003 local plan, with a complete failure to enforce the policies agreed at that time. Specifically related to building for student accommodation. Many of these issues detailed in my last submission (and others), but have not been addressed. I have summarised again under policy S2.

Failure to build the accommodation is a very poor thing for Guildford, and should put the University at the top of the bad developer list.

I support high density development in the urban area, but this plan does not deliver it.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs and this should be taken into account when evaluating need for travellers. This policy needs to be in line with the Traveller Guidelines issues and included in the NPPF in August 2015.

The University of Surrey students are steadily taking over Guildford – a town with a population of around 70,000 inhabitants. There are now 14,000 students with only 5,500 campus accommodation places. There are at least 1,500 HMO’s in Guildford occupied by students and that number is growing. Student accommodation should be provided by the University of Surrey for 85% of all its full time students overall, with 100% of new students and more than 60% of existing students accommodated. Active promotion of this policy would allow 1000 houses to be released from HMO occupancy and find their way back to the local communities, for family housing in the urban area.

We support high density development in the urban area.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs and this should be taken into account when evaluating need for travellers. This policy needs to be in line with the Traveller Guidelines issues and included in the NPPF in August 2015.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
In 2002, when the University was pushing to take Manor Farm out of green belt, it argued that students wanted to live in student halls and that not having enough on-campus accommodation meant that it was losing students to Kingston. It also stated the following:

“The provision of on-campus accommodation for over 60% of students is a benefit of very substantial significance. On-campus accommodation is cheaper than renting in the private sector and students are closer to the University’s facilities. Other benefits include a subsequent reduction in housing demand in Guildford, further enhanced by the release of University land at Hazel Farm for general housing provision.” - University of Surrey, Manor Park Non Technical Summary (para 19/20), November 2002. The University now promotes the opposite argument suggesting that students prefer to live in town. Pressure for housing in the town suits the University's case to develop its land holding on the green belt.

A phased plan would only affect future intakes. I.e those currently studying for their GCSEs. Future candidates would be applying to Guildford in the knowledge that this was a "campus university" in the true sense of the word.

It would be possible for the University to encourage students to live on campus by making the accommodation cheaper or by including accommodation costs within the student fees. Exceptions could be made for students who were married with families or who wished to live with their parents or who had other good reason for living in town.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Strongly Object

This policy will be a disaster for Guildford residents. This wording looks like a developer’s charter. A local community nightmare, which appears to allow development outside the settlement boundaries - even in Green Belt. This policy introduces a loop hole to allow housing be built anywhere with no restriction, other than an obscure link to the easy to manipulate housing list.

Wording needs to make clear, as part of the policy that the overriding requirements of the NPPF, especially NPPF 87, 88 and 89, will apply in the administration of this policy so that it will only apply in exceptional circumstances.

Strongly Object

Existing infrastructure is highly constrained, with particular concern to roads, water supply and sewerage.

This again looks like a wish list rather than a plan. The stated infrastructure first cannot be implemented on this policy. Many of the key schemes like the tunnel are aspirational rather than practical. Existing roads are jammed – try going through Guildford at 8.30 am. We need one co-ordinated transport strategy, but this is piecemeal based on developments which may never happen.

If 14,000 houses are built as this document suggests this policy will not support the 28,000 additional cars on the road. This is implies a serious constraint which needs to be applied in Policy S2.

CIL strategy as drafted also encourages development on green field sites rather than brownfield.

SANG strategy is flawed. I see no practical way the Thames Basin will be protected by sites like Russell Place Farm as proposed. We also believe the Russell Place Farm SANG already an application before this consultation has been predetermined. It seems GBC approach to SANGS is as a method of building houses on the Greenbelt rather than adding them as a valued community asset.

The Hockford Sewage works have been omitted in error. Without this being seriously upgraded, the whole of the west of Guildford will not be able to get rid of sewerage.

Policy I2: Supporting the Department for Transport’s “Road Investment Strategy"
Object

What happened to integration? This should be part of policy I1.

The A3 tunnel is not funded.

Infrastructure funding and support is needed before housing and employment growth are factored in.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy I1: Infrastructure and delivery

Strongly Object

Existing infrastructure is highly constrained, with particular concern to roads, water supply and sewerage.

We doubt this policy, led as it is by developer contributions (mainly from Greenfield sites requiring significant infrastructure of all types) is deliverable. Many of the key schemes like the tunnel are aspirational rather than practical.

Existing roads are jammed – try going through Guildford at 8.30 am. **We need one co-ordinated transport strategy**, but this is piecemeal based on developments which may never happen. If 14,000 houses are built as this document suggests this policy will not support the 28,000 additional cars on the road.

**A strong policy here is not possible and this should be used as a major constraint on building on the greenbelt.**

CIL strategy as drafted also encourages development on green field sites rather than brownfield.

SANG strategy is flawed. We see no practical way the Thames Basin will be protected by sites like Russell Place Farm as proposed. We also believe the Russell Place Farm SANG already an application before this consultation has been predetermined. It seems GBC approach to SANGS is as a method of building houses on the Greenbelt rather than adding them as a valued community asset.

We note the wording at the end of the Policy which indicates that the council is more interested in meeting its legal responsibilities than actually protecting wildlife. GBC is failing to take account of existing biodiversity at sites selected for SANG provision.

Paragraph 3.6 of the Infrastructure Study is incorrect. The Hockford Sewage works have been omitted in error.

Policy needs expanding, and to have more solutions.

While I support the concept but fail to see how it can be applied for new out of town Greenbelt sites. We are in the surrey HILLS it isn’t flat and cycling is not practical in many cases.

Bus travel is being scaled down by Surrey CC, and private investment will only be on profitable routes. No bus hub is yet clear to link busses and trains.

The further from the town centre, the less sustainable and more car dependant the development will be.

Policy has no teeth and appears to contradict much of the rest of this plan.

We welcome the intention to extend the principle beyond Biodiversity opportunity areas; however the current plan to build on large areas of countryside and to inset villages will have the opposite effect. That includes the flawed approach of making farmland into SANGS. There is no mention of the impact of the plan on food production, or monitoring the loss of agricultural land.

The inset map for Wood Street Village is incorrect as it does not show the common land on Oak Hill.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Object.

We like the concept of the policy, but the wording leave us to believe this will weaken the AONB protection. Terms such as “considered” and “expected” are not strong enough in prohibiting development proposals that do not conserve and enhance the AONB, and it is likely that developers will be able to use this loose wording to their advantage.

The AONB Policy in the Draft Plan 2014 provided greater protection to the AONB, and I would like to see the following sentences reinserted:

“The national significance the AONB will be afforded the highest level of protection and only proposals which can be sensitively amalgamated into the area and which complement and enhance the character of the AONB will be considered”

“Proposals within the AGLV which would have a negative impact upon views into and out of the AONB and which do not respect the setting, will not be acceptable”

In accordance with the most up to date Minerals and Waste Plan, safeguarding of applicable land within the AONB and/or AGLV may be necessary and deemed appropriate

I would also like to see a clause which gives protection to the candidate areas for AONB status in the forthcoming Surrey Hills AONB Boundary Review. All land that has been assessed as meeting the latest Natural England criteria for AONBs should be subject to the same level of protection as an AONB, not just land that has been designated AGLV.

We like the concept of the policy, but the wording leave us to believe this will weaken the AONB protection. Terms such as “considered” and “expected” are not strong enough in prohibiting development proposals that do not conserve and enhance the AONB, and it is likely that developers will be able to use this loose wording to their advantage.

We are also concerned that the AONB criteria listed in the policy are not the most important ones in determining whether a planning application should be approved. Aside from the one outlined in the first bullet point (which relates to the AONB setting) none of these criteria is concerned with the key characteristics of AONB, i.e landscape character, scenic beauty,
important views, tranquillity etc. Whether or not a development supports the rural economy or provides public access is of far less national importance than preserving the quality of the landscape itself.

The AONB Policy in the Draft Plan 2014 provided greater protection to the AONB, and we would like to see the following sentences reinserted:

“The national significance the AONB will be afforded the highest level of protection and only proposals which can be sensitively amalgamated into the area and which complement and enhance the character of the AONB will be considered”

“Proposals within the AGLV which would have a negative impact upon views into and out of the AONB and which do not respect the setting, will not be acceptable”

We need our greenbelt protected by much stronger wording, as it is under threat from developers. This policy wording is much weaker than previous plans and versions, and it now appears that it is dependent on the Surrey Hills Management Plan which we note welcomes housing development.

Greenbelt needs much more substantial protection. Even major (undefined) development in the AONB would be permitted if exceptional (undefined) circumstances could be demonstrated.

Greenbelt is not just for us but also for future generations. It is not the Council’s to give away. When it gone it is gone forever.

Any policy on the Green Belt should start with a fair assessment of its value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. It is a National Asset and should be protected in perpetuity. However Policy P2 appears to try to justify excessive development in supposedly protected areas. This is contrary to previous wishes expressed in responses to the regulation 18 public consultation.

This policy is also based on a flawed Green Belt and Countryside Study. Errors reported in the last consultation have not been addressed. The Greenbelt sensitivity study which accompanies the Greenbelt reports is also deeply flawed. Nowhere are the errors more apparent than with area H2, as this area has been recently assessed as high grade greenbelt fitting the criteria for the AONB expansion (see the Land Management Services report June 2016), yet the sensitivity study only rated it as Amber – too convenient as the University and GBC both wish to develop it.

Policy P2 states that “the general extent of the Green Belt has been retained.” This is a misrepresentation as over 6% of the borough Greenbelt is being given away.

Not clear why we are removing Greenbelt in most of the borough while adding it back in Ash. Exceptional circumstances have not been demonstrated anywhere to remove or add Greenbelt. We hope it’s purely co-incidental that the current and immediate past leadership of Guildford Council and a significant number of the Executive reside in the area.

There are aspects of this policy which are acceptable; it is sensible to protect groundwater source protection zones. We note the maps used in some cases (example around the Clay Lane Link Road project) were inaccurate, missing as they did a key water course.

However, urban development on previously developed concreted areas does not create increased flood risk, especially where there is the capacity for improved flood resistance measures to be included in the design. E.g. Walnut Tree Close and Woodbridge Meadows.

This looks like an exercise in creating SANGs to justify using agricultural or wooded land as recreation land in order to justify building on other green spaces. There is no actual increase in environmental protection, and actually a reduction in Biodiversity.

This policy is weak and pointless. The Waddenze judgement must be applied. As per paragraph 21 of Planning Circular 06/2005.

SANG (Suitable Alternative Natural Greenspace) is not beneficial as the sites identified or targeted are already greenspace. Site designation shows how little logic applied (for example 900 Houses in Ash cannot be mitigated by a SANG in Wood Street Village).

The building of 14000 houses and allowing excessive employment growth in an already overcrowded part of the Surrey is by definition unsustainable.

This wording is based on the National Planning Policy Framework (NPPF) however the policy fails to recognise that development in rural areas, with inadequate transport and other poor infrastructure, cannot cope with the proposed scale of development.

This should represent an absolute constraint on development and housing and that constraint should be reflected in policy S2.

There is no account of the impact of the University of Surrey past and present.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Local Area Definition

Guildford Area only defined as Waverley and Woking as well as Guildford – Guildford entwined will be hit by other implications from Rushmoor and the further to the west. Much of this passes through Guildford in the rush hours. These concerns have been raised since 2014 but the Council has failed to seek better market data.

The OAN / SHMA Process is flawed

The Local Plan evidence base should be open to scrutiny. How can we scrutinise the OAN on 693, when the assumptions and calculations underlying the result are hidden. The Council propose we should trust them, as the contractors’ model is used by a large number of other local authorities.

Widespread usage in no circumstances mean it is right for Guildford, and Guildford itself has some rather special circumstances, being that it is dominated by the University of Surrey. The Office of National Statistics acknowledge this, yet no mention is made of the implications of the massive and temporary resident student population on the long term population forecasts underlying the model.

Brexit has made the large immigration assumptions used in the SHMA rather suspect too.

For reasons I do not understand Guildford Borough Council failed to scrutinize the SHMA, and recently altered the petitioning rules in March 2016 to avoid a full public petition on the matter going into debate.

The hidden model belongs to consultants G L Hearn, whose website openly proclaim their pro-development agenda, leading me to the reasonable suspicion that the figures are not right.

This lack of debate and closed process, undermines the validity of the whole consultation. It is unreasonable to ask us, the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN were not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

Outside Analysis

Guildford Resident Association commissioned a critique of the housing number “A Review of the West Surrey SHMA as it relates to the Objectively Assessed Housing Needs of Guildford” by Neil McDonald dated June 2016. This suggests the target should be 510 per year (before constraints) rather than the 693 which appears to be set and applied.

The Campaign for Rural England has also done a critique exercise they will be submitting, which we believe leads to a similar conclusion on numbers

Constraints should be applied

Constraints are fully justified and need to be applied in accordance with para 166 of the NPPF.

- The borough has major traffic and access problems,
- The town is gridlocked in rush hours
- The A3 is gridlocked in rush hours
- Minor roads are overloaded
• Most of Guildford borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA).

Guildford residents cannot take such a large increase in housing target on trust but that is what we are being asked to do. As the number is not explained it is difficult to argue with.

**SHMA is Pre Brexit**

Even the 510 would be substantially low if Brexit implies a limit on international migration, as international migration is driving the majority of the population rise.

**The University Impact**

The University has approximately 14000 FTE students, half of whom live off-campus. This means that around 7000 students live in the town centre, occupying homes that could be made available for University staff and other key workers.

The housing need has to be completely rethought in light of the student impact. There is no policy for students and I feel - as outlined below - this is a serious omission, with nearly 1 in 5 of the Guildford Town population being a student.

Let’s begin with the history, and previous promised. The University has been woeful in meeting its promises made in 2003 to build one student accommodation place for each extra full time place. I specifically refer to the University of Surrey’s agreement to build 4790 student residences, and 300 staff residences to support its expansion in the Manor Park Development Brief (MPDB) in 2003. To date only around 1665 residences and 30 staff houses have been built, while the University has expanded by 5850 full time students (SHMA Appendix C).

Over the same period it has expanded by around 6000 students, placing a huge burden on infrastructure, and forcing the population out of the town as the student move in.

In the same 2003 Local Plan – the University committed to 60% of full time students on site. It currently admits to 54%, but with 11523 (under and post graduate) full time students (SHMA appendix C) and only 5100 accommodation units (SHMA Appendix C) this is calculated 44% on site. The current University Estates Plan of 2009 states clearly the University only plans for 42%. This is a direct breech of that 2003 agreement. We note the slight fall after 2011 is more likely to do with the introduction of student grants, than a plan reduction by the University as stated in SHMA Appendix C.

Increase Students on Site. We note that other councils such as Oxford which have a similar scale University challenge have solved this creatively, by seeking agreements for student numbers between 80 and 85% on site. OBC motivate the University colleges by effectively blocking any development until this is agreed and adhered to.

I therefore believe that the proposal of 60% of students is wholly insufficient. Guildford needs a policy to ensure that the University accommodates 85% per cent of its students on its existing campuses. This policy would quickly free up 1000+ houses currently denied to the residents due to the advantages of high returns offered in renting to Students by privet landlords. These properties would be in the town centre, close to the University and railway station, where they are sustainable and needed. An easy win.

If this were to happen a natural result would be fewer traffic movements, and fewer problems with students parking in residential areas. Students living on campus are less likely to bring cars. (In parts of Ashenden there are four cars per student house) NB In 2003, the University promised that Manor Park would be a “world-class car-free campus”.

Under a 2004 Section 106 agreement (Section 15), Hazel Farm will be released by the University to provide housing for Guildford once 2,500 units have been built on Manor Park. Whilst the site cannot be used for family housing (because of its proximity to Whitmore Common SPA), Natural England would allow the site to be used as a care home. This usage would seem appropriate given the ageing population often cited as being a reason for population growth, and it would help towards Guildford’s housing supply numbers.

This is all good. Also

Seven out of the top-10-ranking US universities accommodate more than 86% of students on campus - Harvard has 98%.
Oxford City Council’s Local Plan includes a policy which limits the number of students in the private housing market to 6,000 out of a student population expected to reach 40,000 in the near future.

The University has ample space on its Manor Park and Stag Hill campuses to provide this accommodation.

Student preference is an argument that the University has used in order not to build its student housing, however the majority of students attending Oxford University are not given the option to live in shared accommodation in town, and this does not prevent them wanting to go there.

Many students actively want to live on campus and want the security of knowing that they have a roof over their heads for three years. The student halls are filled every year. A number of students, for example in Onslow Village, would have preferred to remain on campus, but say they were unable to do so.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Object - Mixed use 1,800 homes (1500 in plan period), 6 Traveller pitches, employment, Local Centre, school etc.

All original objections remain - Additional comments.

(Allocation 9) Adding a secondary school will exaggerate the already unacceptable traffic situation. The RGB technical note produced for Compton and Worpleson parish councils dated June 2017. Highlighted this and access to this site is along existing congested roads. The 20% uplift on the A3 in 2011 was never addressed, and this will have a similar impact on the A31, and feed roads. This will exaggerate the already unacceptable traffic situation.

Also noted, is that the two areas proposed are through points

- Southern access is through a protected AONB per policy
- Eastern Access is through/next to Ancient Woodland

(Infrastructure 3 ) Control of through traffic (turning the new estate in to a run like Park Barn and Wood Street already are) will be unenforceable.

Surface water run of will be uncontrollable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Object - All original objections remain. In addition

The amended definition does not provide for enforcement or corrections for the previous under provision of student accommodation by the University of Surrey.

Housing targets should include the students, however due to restricted land supply, future expansion (and previous under build to 2003 commitment) should 85% be accommodated on the University campus. We are recommending at a minimum, 4500 student accommodation places to meet the 2003 plan proposals (not provided), plus 1 student place for each additional FTE student attending the University of Surrey.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Strongly Object

I do not believe the maths support developer funding the infrastructure and the affordable housing requirements via any method, including CIL. Indeed it is doubtful they would add up to a significant part of either infrastructure OR affordable housing costs required. On this point alone the proposed plan fails.

Since the previous plan, Guildford has been identified as the 4th most congested town in England.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Object - All original objections remain

The amended policy wording still appears to weaken the AONB protection. We maintain the requirement of this policy is to fully consider the AONB build policy against the 5 key tests.

Wording amendments are not specific. We need to manage implications of changes and building on flooding. Specifically we mention site A26 (Blackwell Farm), as the runoff water courses have been identified as affecting Wood Street Village, Fairlands, etc... as well as environmentally protected areas (covered by GBC and SCC policy), such as the Thames Heath Basin SPA, Whitmoor Common, and wetlands downstream in the river Wey. These are covered in the Flooding Assessment produced by JBA, and submitted by Worplesdon Parish Council as part of the evidence base. Link attached. http://s3.spanglefish.com/s/428/documents/other/2017s5991-worplesdon-parish-council-sw-fra-v4-july-2017.pdf

Answer (if comment is on questions 1-7 of the questionnaire): ()
Object - All original objections remain

A modified target of 12426 houses still does not reflect local need or conditions. Conversely changing the target based on a SHMA document which remains unexplained adds to the accusation that the number is made up, rather than calculated based on a clear set of assumptions. Guildford is a town of 70000 residents, and we have a University of 14000 students. Under any definition that is a monopoly. The affect this has had on the town, and housing is dramatic. Guildford residents association (GRA) have employed a professional analyst (Neil MacDonald), and I would defer to his report and conclusions, on numbers and lack of transparency. https://www.guildfordresidents.co.uk/app/download/30614509/Review+of+GL+Hearn%27s+Guildford+Addendum+to+the+West+Surrey+SHMA.pdf

We should NOT be taking unfulfilled housing needs form Woking and Waverly. We have no space for our own.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Infrastructure

There are any number of infrastructure pinch points, consideration of which appear to be an after thought with very little in the way of upfront commitment to solving the capacity issues ahead of building extra homes. Road, rail, schools, sewage, waste disposal, GPs, emergency services, to name but a few, all need scaling up or scaling out first, well ahead of considering building significant numbers of new homes. Solving these issues afterwards is not good enough, many are overstretched already.

Answer (if comment is on questions 1-7 of the questionnaire): ()
In response to your Draft local plan, requiring responses by 18/07/2016, I must strongly object to the proposed development on Blackwell Farm.

Greenbelt should be a last resort

There are plenty of brownfield sites that can be developed to provide a proportionate quantity of extra housing capacity, if strategically planned for the long term. Building on greenfield sites should be a last resort only when all brownfield sites are exhausted.

Building on greenfield sites because there are insufficient brownfield sites available as a tactical short term option is not a good enough reason to take greenfield.

Any perceived lack of immediately available brownfield sites is due to a historic lack of strategic planning and a continued lack of long term strategic planning. What is being proposed is an excessive tactical build to make up for these short comings.

The plan needs to fit the land becoming available, not the land fitting the available plan. Reduce the target numbers of new home to only what can be built without taking green field.

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

<table>
<thead>
<tr>
<th>Question</th>
<th>Reason</th>
</tr>
</thead>
<tbody>
<tr>
<td>1)</td>
<td>I object to the draft Local Plan for the following key reasons:</td>
</tr>
<tr>
<td>2)</td>
<td>I object to the planning process and its implications.</td>
</tr>
<tr>
<td>3)</td>
<td>I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).</td>
</tr>
<tr>
<td>4)</td>
<td>I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.</td>
</tr>
<tr>
<td>5)</td>
<td>I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.</td>
</tr>
<tr>
<td>6)</td>
<td>I object to the detrimental impact on transport, local roads and road safety. I specifically object to:</td>
</tr>
<tr>
<td>a.</td>
<td>The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars</td>
</tr>
<tr>
<td>b.</td>
<td>The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads</td>
</tr>
<tr>
<td>c.</td>
<td>The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements</td>
</tr>
<tr>
<td>d.</td>
<td>The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)</td>
</tr>
<tr>
<td>e.</td>
<td>The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest</td>
</tr>
<tr>
<td>f.</td>
<td>The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity</td>
</tr>
<tr>
<td>7)</td>
<td>I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).</td>
</tr>
</tbody>
</table>
8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Following the Issues and Options Consultation, Save Hogs Back, alongside other residents and campaign groups, presented its concerns regarding inconsistencies and obvious flaws in the Study to the Guildford Borough Council (GBC) Scrutiny Committee.

Save Hogs Back produced a paper (dated March 2014, titled: “Commentary on Guildford Borough Green Belt and Countryside Study” to put down in writing concerns that had been tabled at a round table discussion with the Pegasus consultant as part of the scrutiny process.

Following the Scrutiny Committee meeting, Pegasus was asked to revisit parts of the study and as a result adjusted scores for different land parcels. A large number of concerns were not addressed - in particular why a large site such as that at Blackwell Farm was not considered as a single land parcel. Whilst we still have strong reservations about the Study and the methodology applied by Pegasus, revised scores would have meant that site H1 would have dropped out as a potential development area. However, if the study had considered H1 and H2 as a whole, then both of these would drop out.

This paper sets out again some the reservations that Save Hogs Back has with the GBCS methodology and application of this methodology.

It also sets out further information about how Blackwell Farm meets each Green Belt purpose.

The GBCS study

The GBCS prepared by Pegasus Planning Group (Pegasus) on behalf of GBC contains significant flaws in its methodology and in the application of this methodology. These flaws mean that sites H1 and H2 (collectively “the land at Blackwell Farm, Hogs Back”) should not have been identified as potential development areas (PDAs).

Furthermore, the GBCS does not then consider other factors that would influence whether land should be taken out of Green Belt:

- The GBCS suggests that it follows best practice as outlined in the South West Regional Assembly (SWRA) Strategic Green Belt Review. The SWRA review recommends the “consideration of landscape character and environmental capacity to absorb development” when identifying areas where boundaries might be reviewed. We have been told by GBC that the Landscape Character Assessment 2007 hasn’t been considered within the Pegasus Study.
- The Environmental Capacity Analysis, which does form part of the study, is incomplete, contains errors and hasn’t been used in formulating recommendations for PDAs.
- The study has not taken into account the results of the 2003 boundary review, which resulted in the release of land at Manor Park and a decision which the University described would “reaffirm rather than undermine the permanence of Green Belt around Guildford”.

The conclusions of the study for H1 and H2 contain further errors and do not take account of GBC’s current policy towards Areas of Outstanding Natural Beauty (AONB) or the ability to create a revised boundary within the land parcel as defined in the NPPF.

It is hoped that GBC considers the issues raised in this paper, amends the findings of the GBCS study accordingly and removes land parcels H1 and H2 as PDAs from the local planning process.

Commentary of approach adopted in the GBCS

1. Pegasus described in Volume I of its report how its methodology for carrying out the GBCS had “emerged from best practice identified within previous Green Belt studies, with particular reference to the recommendations of the review by SWRA [South West Regional Assembly].”
2. It also recognised that “the methodology used within the Coventry Study most closely follows the recommendations of the SWRA Review in terms of the clarity of the report and the stages undertaken within the assessment.”
3. The methodology adopted by Pegasus has not followed best practice as set out in the SWRA report or adopted the rigour of the Coventry study. In particular:
• The SWRA report describes how the starting point for review is “to determine the relative importance of the five criteria [five Green Belt purposes] and identify a ranking of criteria...”. This stage of the analysis isn’t included in the GBCS report, which instead assumes that each of the four purposes of Green Belt it considers in the analysis are equally important to Guildford

• Pegasus has not created clear criteria for how scoring was assessed against each of the purposes of Green Belt, despite it recognising how “Fundamental to a sound methodology that provides robust, defendable [sic] conclusions about Green Belt release, is the clear and transparent identification of information used, and the scoring methods and thresholds applied to each stage of the assessment. These need to be objective where possible and consistently applied to each area under assessment to allow for direct comparisons of each area at each stage of the review.”

• The GBCS approach isn’t “able to make judgements on strength of purpose for Green Belt” as described in the SWRA report. The GBCS simply gives a 1 or a 0 against each purpose of Green Belt, but does not consider how effective a plot of land might be relative to another within each category.

• There appear to be anomalies in the methodology adopted by Pegasus - eg its interpretation of Purpose 2 (to prevent neighbouring towns merging into one another) and Purpose 3 (to assist in the safeguarding the countryside from encroachment), as well as its very narrow interpretation of Purpose 4 (to preserve the setting and special character of historic towns). These anomalies result in land being incorrectly assessed for its ability to fulfil the purposes of Green Belt. The approach adopted seems difficult to defend.

• There appear to be inconsistencies in the application of this methodology when looking at the analysis of land parcels across the borough.

1. The GBCS approach does not recognise that, whilst an area of land may fulfil just a single purpose of Green Belt, there may still be strong arguments for it to remain as Green Belt (an issue that is picked up in other reviews). For example, an area next to a town may solely have the purpose to prevent urban sprawl (to check the unrestricted sprawl of large built-up areas - NPPF Purpose 1); whereas, the purpose of Green Belt designation for a remote area in the countryside may be solely to retain the open character of that land (ie to assist in safeguarding the countryside from encroachment - NPPF Purpose 3). The SWRA states that “areas of Green Belt might only fulfil a single purpose and yet have no capacity to accommodate development, that is without undermining the very purpose of Green Belt itself.”

2. The GBCS study has ranked a plot of land based on how many purposes of Green Belt it achieves (regardless of how well the land actually meets each purpose and how important that purpose is considered to be).

3. It is interesting to contrast the approach taken by Pegasus with the one taken by Cambridge (cited as a robust example in the SWRA report). The Cambridge review considers that the overriding purpose of Green Belt for the city is to preserve its historic setting, which includes its existing settlement pattern. It then appraises the extent to which each land parcel achieves this purpose in more detail.

4. Further concern about the criteria for scoring each Green Belt purpose is discussed later in this report, when the scoring for the two land parcels H1 and H2 is re-assessed.

5. The SWRA report states that “weighting the purposes for the Green Belts so as to achieve a cumulative ranking does provide a rational basis for identifying areas where boundaries might be reviewed. However, this analysis should be considered in combination with the consideration of landscape character and environmental capacity to absorb development.” This simply has not been done.

**Appraisal of Blackwell Farm**

The initial appraisal of land parcels H1 and H2 scored only 1 against a possible 4 when assessed by Pegasus against the 4 purposes of Green Belt it considered.

An independent appraisal of H1 and H2, based on the methodology used by Leeds City Council, demonstrates that an area comprising of H1 and H2 combined contributes to each of the 4 Green Belt purposes (ref. Rob Burch, 2013)

It should also be noted that the nature of the land at Blackwell Farm means that it scores strongly against each of the Green Belt purposes - although the Pegasus methodology wasn’t able to take this into account.

A subsequent appraisal by Pegasus, scored H1 and H2 with a score of 3 and 2 against the purposes of Green Belt respectively.
It would seem reasonable to consider the entire land area in terms of its ability to meet the purposes of Green Belt. Applying the same rules adopted by Pegasus for this combined site would demonstrate it met all four purposes.

Green Belt Review (culminating 2003)
The appraisal of Green Belt on the west side of Guildford was undertaken over a long period and resulted in the movement of the Green Belt boundary to accommodate expansion of the University of Surrey onto Manor Farm. The “essential characteristics of Green Belts are their openness and their permanence” and the determination of a revised boundary that was then adopted in 2003 took this into account. The appraisal by Pegasus (conducted in 2009) failed to address this issue.

“Compartmentalisation and subdivision of land into separate land parcels”
There is concern as to why the land parcels H1 and H2 are treated separately - despite conclusion in the report that development of H2 would be linked to development of H1. They have also been grouped together within subsequent local planning documentation.

There is also concern that the original subdivision of parcels of land didn’t follow a more defined boundary along the western edge of H2 (“using physical features that are readily recognisable and likely to be permanent” - NPPF, para 85). It would seem more appropriate to choose a line of tarmac road as the boundary, which has a hedge alongside it, rather than a footpath which passes across a field.

This example suggests that initial site visits did not inform the sub-division of land parcels and a choice of a revised western boundary of H2 passing through the farm buildings and then passing along a line bordered by woodland would have been more appropriate. This would have resulted in a land parcel much closer in land area to H1 and consistent with others in the study.

Diagram to the right shows the extent of H2 if the boundary had been informed by site visits.

Note: Whilst we have indicated a revised boundary that would follow the methodology proposed (but not adopted) within the GBCS, the revised area for H2 does not indicate a land parcel that would be deemed acceptable as a PDA. It simply highlights that the pro-cess used by Pegasus to define boundaries and compartmentalise land parcels within the study was inadequate.

It would be interesting to see records and photographs from Pegasus to establish how they arrived at the decisions they did.

Modification to the boundary has no impact on the scores for H2 (which have been corrected to account for errors in the methodology and application of the methodology discussed later).

Green Belt Purpose 1 - to check the unrestricted sprawl of large built-up areas
The definition appears to be clear within the GBCS and the score for both H1 and H2, which is close to the existing Green Belt boundary around Guildford, is justifiable.

Westward development of Guildford along the Hogs Back
Over the last 100 years, extensive development on the west side of Guildford on the northern slopes of the Hogs Back has made a large impact on the character of this area from what was formerly farmland and parks. The planned low-density garden village “Onslow Garden Village” (now known as “Onslow Village”) on the site of the old Guildford Hunting Park was started in the 1920s. The building of the A3 Guildford and Godalming Bypass which opened to traffic in June 1934 effectively formed the western extent of this development for many years. [Mount Farm, on the higher slopes of the Hogs Back above Onslow Village was separately acquired to protect the views of the ridge - which formed the southern bound to development.]

Piecemeal development had taken place on the western side of the A3 following the gift of land to the UniS with the construction of the Royal Surrey Hospital and then the Holiday Inn hotel alongside the A3 on land that was leased by the University to help finance the construction of the low density Research Park development, which began in the 1980s on the lower slopes.
The Manor Park park campus and sports park was given permission in 2003, which was followed by the recently built surface car parks of the Onslow Park and Ride. This low density expansion of Guildford is bounded on the west by the ancient woodlands at Manor Copse, Strawberry Grove and Dean Bottom. The 90m contour also forms the extent of the Manor Park development which helps form a boundary to development and goes some way to protecting the rural views from the AONB and Blackwell Farm.

A further low-density expansion of Guildford leapfrogging the ancient woodland and rising above the 90m contour, as now proposed, would be an example of urban sprawl on a massive scale - rather than what is described as “urban extension” in the draft local plan.

**Green Belt Purpose 2 - to prevent neighbouring towns merging into one another**

The approach taken by the GBCS is to consider the merging of towns as well as settlements and this seems to be consistent with Green Belt reviews elsewhere. However, the analysis of coalescence of settlement patterns has sometimes been seen to be considered within Purpose 4 (in the way they provide the setting and special character of towns) or analysed as a separate purpose of Green Belt (eg Purpose 6).

The definition that Pegasus has adopted within its study and its criteria for scoring against this purpose seems muddled and unclear. Whilst it can be agreed that “Some areas of land contribute more effectively in maintaining separation than others, depending on the local environmental or site conditions, such as topography and tree cover”, it doesn’t follow that an open, expansive landscape “contributes less in terms of anti-coalescence (scoring 0), whereas a land parcel which forms a narrow gap between two settlements would have a significant anti-coalescence role (scoring 2)”. What really counts is whether building on this land would cause a bridge between these settlements causing them to merge.

A piece of land that (once developed) would result in the merging of communities should score a 1 regard-less of the open nature of the land or otherwise.

Land at H1 and H2 fulfils the purpose of preventing towns merging over the long term as the entire slopes of the northern face of the Hogs Back are under developmental pressure. Already a quarter of the 12km stretch between Farnham and Guildford is developed. The University’s plans would increase this to a third.

Land at Blackwell Farm also presents merging of in-dividual settlements. Development of land parcels H1 and H2 would bridge communities of Park Barn, the Research Park, Wood Street with settlements in Pinks Hill, Down Place in Compton, with the small settle-ment of farm cottages on Blackwell Farm, with the houses of Beechcroft Drive and Onslow Village and the new communities of students and key workers at Manor Park. The development also draws in the small settlement in Chalk Pit, which borders the development area and further development (as proposed by the University) would draw in the small community at Flexford.

**Green Belt Purpose 3 - to assist with safeguarding the countryside from encroachment**

Land parcels H1 and H2 fulfil the purpose of preventing encroachment onto open countryside. The land itself is open countryside and neighbouring land stretching along to Ash is open countryside. Whilst the GBCS argues that only land that has development may fulfil this purpose, it is clear from other Green Belt studies that this is not the case and that parcels that themselves are open countryside are ‘stronger’ in the way that they fulfil this purpose (see note 1).

Whilst concerns exist regarding the definition of encroachment used in the study, the presence of a small settlement at Down Place and also a small settlement comprising a few farm buildings and farm cottages at Blackwell Farm does mean that this land should score a 1 according to the GBCS definition. [This was some-thing acknowledged by the Pegasus representative at the meeting of 04 March 2014.]

**Green Belt Purpose 4 - to preserve the setting and special character of historic towns**

The Pegasus analysis as to whether a piece of land fulfils the purpose of preserving the setting and character of historic towns seems overly simplistic by just focusing on conservation areas. A more comprehensive and holistic approach which considers a number of broader issues is needed to provide a robust answer to this question. The SWRA report, for example, notes that the Cambridge Green Belt review has “withstood the rigour of Examination in Public, and comprised comprehensive and transparent assessment”.
The following factors were considered in Cambridge ("Qualities that preserve the unique character of Cambridge, and/or maintain and enhance the quality of its setting"):

- Views towards the city,
- Topographical framework for Cambridge,
- Specific sites that enrich the setting,
- Physical links with Cambridge,
- Elements and features contributing to the character of the setting,
- Contribution to a strongly rural landscape setting, and
- Social or economic links with Cambridge.

Applying equivalent factors to Guildford would indicate that H1 and H2 strongly assist in preserving the setting and character of Guildford.

It is also worth noting that in Coventry it was also acknowledged that the Meriden Gap formed part of the character of the area. It is therefore appropriate that the Hogs Back could be considered in the same light as a purpose of Green belt could be to assist in preserving the setting and character of the Hogs Back.

Clearly Green Belt land on H1 and H2 fulfils this purpose also.

In the St Albans review (section 7.5.2.), the key network of parcels that preserves setting and special character is identified as being: “to the south, west and north of St Albans (GB23, 24B, 30, 37, 38 & 39), especially to preserve views to the Cathedral and Abbey Church of St Albans”. There are uninterrupted views across open farmland from Blackwell Farm to Guildford Cathedral.

Green Belt Purpose 5 - assist in urban regeneration, by encouraging the recycling of derelict or other urban land

The study has chosen not to take into account a consideration of the purpose of Green Belt to “assist in urban regeneration, by encouraging the recycling of derelict or other urban land”. This has been based on assumption that all land meets this objective in equal measures.

However, other Green Belt reviews have taken this into account and have highlighted parcels of land that, due to their location (eg proximity to an urban setting), size and the extent to which they’ve been subjected to developmental pressure, would score higher than other areas.

In this context, land parcels H1 and H2 would score highly as the Green Belt has already been moved back to accommodate growth of the University; the University has already put forward proposals to build on Blackwell Farm; and, in response, the Council is already looking at alternative ways that the University can help meet housing needs by developing and regenerating areas with existing permissions (eg better use of surface car parking, the development of more student accommodation and the redevelopment of Hazel Farm).

The Research Park was created as a low density development:

"The notion of a research park had first occurred to the Vice Chancellor Professor Anthony Kelly back in 1977... “I remember thinking, Guildford is an attractive place too, where people enjoy living, and it has good communications. And we, the University, have land to spare. So why don’t we build a research park? - p48, UniS A History of Shaping the Future, 2011.

Unfortunately, 40 years later, Guildford is less attractive and there is less space to play around with and transport links are choked. The research park provides just 65,000 sqm of office space across 28.33 hectares. The University can easily increase this density six fold. The extract from the Estate Strategy shows that the University is planning to build up to 323,200 sqm across a smaller area of Manor Park 24.6 hectares. The resulting plot ratio would still be at the low end for a typical development in a major town like Guildford.

Guildford should make better use of its surface car parks across the borough.
The WWF’s new Living Planet Centre in Woking was built over existing surface car parks.
The University of Surrey has more than 17 Ha of surface car parks alone across its estate. At the same time, the University
is seeking to develop new homes on Blackwell Farm on the Green Belt. Recommendation: All new buildings on the
University estate should make provision for underground car parking so that land devoted to existing surface car parks can
be used more effectively. This is an efficient strategy for removing surface car parks. The new development for the Vet
School should incorporate these ideas.

Rather than extending the outer edges of Guildford, GBC should make better use of its land near to the railway line. The
idea for building over railway lines isn’t new either
- the Metropolitan Line in London was built by cutting down to build the railway and covering it over for roads parks and
buildings. Other more recent examples include prestigious projects like Broadgate in London and the 320m long tunnel in
Gerrards Cross to create a Tesco supermarket over an existing railway cutting. A similar development in Guildford would
provide city centre ac-commodation (and easy access to the station!). It would also enable pedestrian and vehicular flows
across a railway line which helps to split the town and contributes to traffic woes.

The aerial photograph <see attachments> shows areas of surface car parks (in yellow) and areas of railway line (in green)
in the centre of Guildford which could be redeveloped for mixed use, including offices, retail and housing. The natural
slopes of the surrounding land down towards the railway line means that buildings could be built several storeys high
without reaching the height of the existing neighbouring buildings alongside the railway. This gives an opportunity for the
development to create a mixed use development at high densities, whilst blending in with the surroundings. A linear
development could be extended incrementally along the railway as Guildford needs to grow in the future. In doing so, the
development will help to regenerate the surrounding areas and would form a bridge which links the two sides of Guildford
which has been divided by the railway line and helping access across the town.

“The Hog’s Back Chalk Ridge landscape should be conserved, in particular the open nature of the landscape which forms a
backdrop to the surrounding rural areas and Guildford, the wide and far ranging views from the many viewpoints along the
ridge line and the sparse settlement pattern of traditional style and local materials. The intact large scale geometric field
pattern and hedgerow boundaries and hedgerow trees should be conserved while there is potential to enhance and reinforce
some of the hedgerows.” - Guildford Landscape Character Assessment

Environmental Capacity Analysis

It is not clear how the environmental capacity analysis has been used in the GBCS or how it will be used in deciding where
development is best placed when considering alternative parcels of land. The SWRA re-port makes it clear that ranking of
land parcels against Green Belt purposes should be considered in combination with landscape character and environmental
capacity.

The data presented in the environmental capacity analysis for H1 and H2 is not complete and is therefore not fit to assess
whether development could take place on this site.

The analysis does not allow a comparison to be made between the environmental capacity of different land parcels.

The simplistic approach adopted by the GBCS towards environmental capacity should be compared with the approach
undertaken by Coventry, which considered primary and secondary constraints, existing or proposed development,
landscape assessment and connectivity to the urban area when comparing alter-native land parcels.

The Environmental Capacity Analysis tables for H1 and H2 provides only superficial information about the land parcels,
for example information about the position of paths, bridleways and ancient woodland on the site is incomplete.

The analysis does not consider the impact on the AONB for the road and road junction that is planned for the site.
The analysis does not take into account the visual impact of street lighting which would be necessary at the large junction and which would be visible for miles around. One of the distinctive features of countryside is the dark night skies and development on H1 and H2 would have an impact on views from both sides of the A31 and across the Surrey Hills AONB.

The identification of priority species and ecological network should have been included in the analysis because they directly dictate restraints to development, so the following should have been included:

- Priority species (there are at least 4 at Blackwell Farm)
- Ancient hedgerows
- Ancient trees
- Single Payment, Entry Level Stewardship and Higher Level Stewardship measures
- Ponds and streams
- Biodiversity Action Plan Habitats
- Biodiversity Opportunity Areas
- Green/ecological infrastructure
- More (see box 4.1 p41 in DEFRA’s Guidance for Local Authorities

The analysis doesn’t include all the environmental criteria needed to make an informed decision, for example, quality of life capital should have been considered in the assessment as has been done in the Cambridge Green Belt Review and the Nottingham-Derby Green Belt Review. This would capture the recreational value of Blackwell Farm.

**Landscape Character Assessment**

The SWRA Strategic Green Belt Review describes how landscape character should have been included in the identification of areas for Green Belt review.

The Guildford Landscape Character Assessment says:

“The Hog’s Back Chalk Ridge landscape should be conserved, in particular the open nature of the landscape which forms a backdrop to the surrounding rural areas and Guildford, the wide and far ranging views from the many viewpoints along the ridge line and the sparse settlement pattern of traditional style and local materials. The intact large scale geometric field pattern and hedge-row boundaries and hedgerow trees should be conserved while there is potential to enhance and reinforce some of the hedgerows. The remnant areas of chalk grass-land should be conserved and opportunities taken to extend and link these isolated areas. Screening for the A31 should be carefully maintained to retain a balance between shielding views from below of moving vehicles while keeping important views out for those using the road. The restoration of links across the ridge should be explored.”

Landscape Character Assessment was not considered within the Pegasus study.

**Sustainability scores**

The sustainability score is very simplistic in its approach. It does not take account of a range of broader sustainability issues - such as traffic impact, loss of farmland etc.

**Commentary on conclusions of GBCS**

The conclusions regarding the land parcels at Blackwell Farm (H1 and H2) don’t stand up to scrutiny. The scoring should be 4 out of 4 (not 2/3 out of 4 as assessed).

Furthermore, whilst the GBCS does not seek to differentiate between land parcels (in terms of their ability to meet each purpose of Green Belt), the land parcels at Blackwell Farm serve each purpose of Green Belt strongly.

The study does not take into account existing GBC policy: “10.25 Development should not result in the loss of important views to and from the AONB” as described in the Local Plan.
The photograph above was taken across H1 from the AONB and there is ancient woodland at the bottom of the field. There is no opportunity for development which could meet GBC policy. It is therefore not clear how the Environmental Capacity analysis has fed into this study and the recommendations that have been made.

The conclusion states: “The Green Belt boundary could be realigned to exclude the sloping ground between the A3, Down Place and Manor Farm, with defensible boundaries located along hedgerows, tree belts and woodlands.” The photograph shows that this isn’t possible.

The conclusion for H2 seems to be linked with H1:

“the land is somewhat remote from highway infrastructure when compared with land parcel H1” and “Given this situation, it would be appropriate for land parcel H1 to come forward as a first phase with land parcel H2 providing an opportunity for further development in the longer term, allied to the initial phase of land parcel H1”.

Given that the dependency of H2 on H1 was highlighted in the GBCS findings, there appears to be a lack of thoroughness in its approach. Recognising this dependency, these parcels should have been looked at together as a combined land parcel and a revised score for the combined land parcel evaluated.

Comments regarding views to, and from, a large stretch of the Hogs Back (and therefore to and from the AONB) apply to land on H2. Development on H2 would be visible to vehicles as they drive along the Hogs Back. (NB development on the University’s Research Park is screened by ancient woodland at Strawberry Grove. Any development to the west of this woodland would be seen.) Long views to the AONB enjoyed from Pinks Hill would be lost - thereby breaching GBC’s existing policy 10.25.

**Going forward**

It is not clear how the GBCS is being used.

The approach to assessing each of the purposes of Green Belt in the GBCS appears simplistic and it isn’t always possible to follow the logic adopted.

The GBCS conclusion that it is possible to develop any part of area H1, whilst not building on the slopes of the AONB, but still providing a boundary that uses physical features as defined in the NPPF, is simply not possible. This causes concern that the site was not visited by the consultants or anyone checking its conclusions.

If a land parcel has scored 3 or 4 out of 4 under a revised assessment (such as the land at Blackwell Farm) then it would be reasonable to expect to see the PDA removed from consideration in the local planning exercise.

The existing Green Belt boundary coincides in with the historic boundary of Guildford’s Royal Park.

“The Park’s boundaries are still identifiable today
- However, the western boundary is most interesting, curving and kinking as it follows hedgerow, and passing through woodland with Manor Copse (shown as ‘The Parocke’ on the east, and Strawberry Grove on the west, following a path along the west edge of the Research Park and Park Barn housing estate to Broad Street, with sections of banking still evident. Clearly the Park was created within the existing field and natural boundaries, and it is possible that the west boundary followed ancient field systems, which dictated its curvatures.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Introduction

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not believe that the inclusion of development sites within the green belt, without providing any exceptional circumstances to justify adjustment to the green belt boundary, is either sound or legally compliant. An exceptional circumstance is rare, and it is highly unlikely that there are rare circumstances to create several large-scale developments in Guildford borough's green belt.

I have emailed a separate submission relating to Blackwell Farm (site allocation A26 - which I have looked at in detail). I strongly object to the inclusion of this site in the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/8004  Respondent: 8729217 / Karen Stevens  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This response focuses on the proposed allocation of Blackwell Farm as a major development area in Policy A26, together with associate Save Hogs Back and Campaign to Protect Rural England (Surrey) object to the Proposed Submission Local Plan on the following grounds:

Legal compliance:

1. Failure to have regard to national policies and advice contained in guidance issued by the Secretary of State, in respect of policy on Green Belt and Areas of Outstanding Natural Beauty (Planning and Compulsory Purchase Act 2004, s19(2)(a)); and
2. Failure to have regard to the resources likely to be available for implementing the proposals in the document, in respect of the infrastructure requirements needed to allow the Blackwell Farm development (Policy A26) to proceed (Planning and Compulsory Purchase Act 2004, s19(2)(i)).

Soundness:

1. The proposals to remove land from the Green Belt at Blackwell Farm and to promote development there within and in the setting of the Surrey Hills Area of Outstanding Natural Beauty are not consistent with Government policy;
2. The proposal to develop land at Blackwell Farm is not justified as this is not the most appropriate strategy when considered against its reasonable alternatives;
3. The proposal to develop land at Blackwell Farm would not be effective as it is not deliverable over the Plan period due to the impracticability of access and high infrastructure

This submission sets out the grounds on which Save Hogs Back and Campaign to Protect Rural England (Surrey) support these challenges to the Plan. We ask that:

1. Policy A26 Blackwell Farm, Hogs Back, Guildford be deleted;
2. The Blackwell Farm site remains in the Green Belt;
3. The housing provision in the Plan be reduced by 1,800 dwellings;
4. The infrastructure provision associated with Blackwell Farm be dropped

Access to Blackwell Farm and traffic

2.1 Policy A26 allocating Blackwell Farm for urban development is entirely clear (under 'Requirements: Infrastructure' that "The principal vehicular access to the site will be via the existing or a realigned junction of the A31 and the Down Place access road, which will be signalised". This is impractical. It is also so costly as to be undeliverable. The highways works are also highly undesirable on environmental grounds, which are addressed in section 3 below.

Impracticality of access from the Hogs Back

2.2 Compton Parish Council commissioned RGP - Transport Planning and Infrastructure Design Consultants to advise on the transport and highway implications of the proposed Blackwell Farm development. This report is in draft and available from Karen Stevens. It demonstrates that there is insufficient space on the A31 to construct the minimum necessary road space and associated infrastructure to allow the proposed signalised junction to be built. At least 20m total highway width is required, but the existing highway is just 14m at this point due to the road being contained within the A31 overbridge structure. This could only be remedied by hugely expensive highways improvements on the top of the Hogs Back, including widening the A31 bridge over the A3 and acquiring and demolishing dwellings on the north side of the A31. These have been omitted from the estimate of costs for enabling the Blackwell Farm development to proceed.

2.3 The report also shows that the anticipated traffic volumes on the roads meeting at the top of the Hogs Back are easily sufficient to warrant the construction of a roundabout at this Guildford Borough Council has not proposed a roundabout, presumably because there is wholly insufficient space for this to be built, and there is a likelihood of significant danger to highways users from attempting to insert a roundabout in immediate proximity to the split-level A31/A3 junction. Whether a signalised junction could work remains unproven.

2.4 The road layout at the eastern end of the Hogs Back is The proposed access off the A31 into Blackwell Farm would be at the existing Down Place junction. This is a very small junction which would need major improvement including left and right egress lanes onto the A31 which extend well back to absorb the substantial volume of vehicles expected to queue at the signalled junction. The road layout would need amendment to overcome the sharp dog-leg bend in Down Place close to the A31 junction. It is not certain that the existing bridge over the A31 exit slip-road (onto the A3 northbound) is wide enough given the need for bus, pedestrian and cycle access. There are also existing traffic restrictions in place to limit bridge loading.

2.5 Even if all these upgrades to the highways were achieved, the road layout would frustrate many drivers. First, modelling suggests (Surrey CC SINTRAM model - see RGP Figure 3.1) that two thirds of Blackwell Farm residents exiting Down Place onto the A31 in the morning peak would expect to turn left towards Guildford. The road is already
heavily congested at this point at this time, so exit would be limited to a few vehicles that could find some exit space at each phase of the proposed traffic lights. There would be substantial queues back towards Blackwell Farm. Second, the road layout also seriously impedes access to or from the A3 north-east of the site around Guildford city centre. Drivers southbound on the A3 aiming at Blackwell Farm would take the A31 diverge to join the A31 westbound, but this would find themselves west of the Down Place junction to Blackwell Farm. Drivers would therefore be obliged either to effect a U-turn through a point in the central reservation of the A31 or continue to the Puttenham junction with the B3000 where they could turn around. Either would be frustrating and time-consuming. Both would be dangerous, as accident statistics presented by RGP demonstrate. Correspondingly, any drivers leaving Blackwell Farm from Down Place and aiming for the A3 northbound would similarly need to turn right and begin their journey by travelling in the wrong direction: they too would need to effect a U-turn through a point in the central reservation of the A31 or continue to the Puttenham junction with the B3000. Then they would return eastbound on the A31, joining the morning peak queue, and take the slip-road to the A3 under the new Down Place bridge in order to travel north on the A3. The numbers of vehicles needing to make these awkward manoeuvres would increase the danger to themselves and to other road users. The alternative would be turn left out of Down Place into queue of traffic during peak hours before cutting through residential streets in Onslow Village and joining the A3 at the Tesco roundabout.

2.6 There is no certainty that the third party land required for the highways improvements would be available: the Borough Council has not demonstrated that it will be. There has been no indication that Highways England would agree to the widening of the A31 overbridge.

Alternative access to Blackwell Farm from Guildford

2.7 Proposed Submission Policy A26 states that "Secondary vehicular access is required from the site to Egerton Road, preferably via Gill Avenue."

2.8 Without this access, the Blackwell Farm site would not be an urban extension but a free-standing urban development which happened to be located close to the edge of Guildford. The likely reason Guildford BC views this as a secondary access rather than the primary one is because it will be very difficult to achieve in a way which significantly increases highway capacity. The starting point for considering the Blackwell Farm site is that access into Guildford and to the A3 would all be via the 'Tesco' roundabout on Egerton Road, which is already highly congested. The Inspector's Report into the Guildford Borough Local Plan Review, in September 2001, reported on the (then) proposed development of Manor Park on Manor Farm:

"The principal access to the site from the A3 and the Stag Hill Campus is the roundabout immediately to the west of the A3 (the Tesco roundabout). This roundabout and other elements of the local road network are likely to be operating above their normal capacity before the development of Manor Farm is commenced" (paragraph 16.9.5).
"...the Council and the highway authorities were satisfied that a sustainable solution to the movement implications of the [Manor Farm] Proposal could be found and that to this end the University would, and could, if need be in conjunction with the authorities, confine the increase in traffic generation from the Manor Farm site to no more than 5%..." (paragraph 16.9.7). "...it is implicit in the agreement that if the 5% ceiling can not be achieved, the scale of the development will also need to be limited" (paragraph 16.9.9).

With that development and much of the Manor Park scheme now implemented, the congestion locally is even worse. We are aware of no efforts to enforce a 5% limit on the increase in vehicles associated with University of Surrey development. Efforts to alleviate this congestion may help, but fundamentally the scale of congestion in the peak periods reflects problems across the local network. If capacity were to be created on the Tesco roundabout, the likelihood is that this would immediately be taken up by the generation of additional trips, currently frustrated.

2.9 Gill Avenue, which passes the Royal Surrey County Hospital and leads directly to Egerton Road, will be difficult to join to Blackwell Farm (to its west). This is because a road would need to follow an awkward route either north or south of the Ancient Woodlands of Strawberry Grove and Manor Copse which shield the whole of the western side of the Research We strongly oppose any access through the Ancient Woodland as this would be environmentally entirely unacceptable. Road access north of the Ancient Woodland would funnel Blackwell Farm traffic through the Research Park. Road access south of the Manor Copse Ancient Woodland would funnel traffic through the Manor Park student village and ruin the setting of a Scheduled Ancient Monument (a moat at Manor Farm). It would also isolate newly constructed Veterinary School buildings from their paddocks. The road would therefore introduce pollution into a series of sensitive
2.10 The problem appears to be that Guildford BC decided some years ago to allocate Blackwell Farm for development on the assumption that access problems could be resolved, but now finds that this is not practicable. The Issues and Options consultation in October 2013 proposed the site for urban development, but noted "There are however constraints in terms of access to the site from the A3, particularly given that where access would likely be required is in the AONB or very close to it. The site as a whole is very close to the AONB, which would require sensitive development and careful consideration." Following this, the Council tried to secure access direct from Guildford, via the 'Tesco' roundabout and Egerton Road. The heavy existing congestion on this side of Guildford turned out to make this problematic and little apparent progress has been made. Internal correspondence within Guildford BC on 12 June 2015 obtained only by Freedom of Information request illustrates this:

"Tesco Roundabout (Egerton Road/A3 northbound slips)

GBC has been developing a junction improvement scheme for Tesco roundabout which could offer a substantial capacity improvement and may significantly reduce peak hour queuing. The improvement is subject to funding and to the existing hotel access being closed to vehicular traffic with a new access from the Sports Park access road. The layout is also subject to Safety Audit and technical approval. However, we thought it would be beneficial to share this layout with you on a confidential basis so that you can be informed of the likely scale of improvement required.

The next stage is for GBC to discuss this layout in more detail with SCC in order to get some idea of the technical aspects of the proposal agreed. For your information, the layout has been presented at the Surrey CC/Guildford BC Joint Infrastructure Group meeting which is also attended by Highways England."

Email from [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998], Transport Consultant (Policy) to [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] (Interim Head of Planning)

Little appears to have come of this initiative so far.

2.11 Meanwhile, Surrey County Council as Highways Authority is concerned about introducing additional traffic into this congested area from the A31. The extraordinary outcome of these difficulties is that the Proposed Submission Local Plan proposes the primary access for Blackwell Farm should be from the A31 at Down Place, whereas Surrey County Council has specifically advised that the primary access should be via Egerton Road.

2.12 Surrey County Council has advised a member of Save Hogs Back that a signalised junction at Down Place would not be adequate for the volume of traffic likely to want to use it, and has therefore been keen to discourage use of that access point. The methods proposed were making the route through Blackwell Farm tortuous and restricting access by means of Automatic Number Plate Recognition (ANPR). This is made clear in the exchange of correspondence between Karen Stevens (Save Hogs Back) and [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] (Transport Development Planning Manager West, Surrey CC) (see email exchange 3-7 June 2016 'Re: Access to Blackwell The Surrey CC response was after consultation began on the Proposed Submission Plan, demonstrating the gulf in approach between the two arms of local government at this critical stage. Surrey CC advised that:

"were ANPR to be implemented, it could be on a private section that formed the ultimate short link between the new development and the existing UniS activities in West Guildford. This section of the route would therefore not be adopted. ANPR is used on motorways / other routes (including the A3 between Boundless Road and the A333 where it is in a tunnel) where there are average speed restrictions in place. Clearly these are not used to control access on the public highway, and I recognise that this would be a quantum leap to use this technology on the public highway for these purposes.

2.13 Surrey County Council's position now is that "All of the principles behind the access strategy would need to be justified through the production of a Transport Assessment, which... would not come about until the planning application / pre-planning process " The effect of the impasse is therefore that Guildford BC is seeking to allocate a site which Surrey
CC is far from certain of being capable of delivery, with the County Council requesting that matters be left for sorting out at the planning application stage. Guildford Borough Council has been unhelpful in addressing the concerns raised by Save Hogs Back, with a failure to answer emails properly or at all (see 'RE: Down Place junction {UNC}’ 12-19 May 2016 and 'Fwd: Blackwell access’ 23 June 2016) and no engagement in the access difficulties raised by their own proposals. Our experiences illustrate the reticence of the parties to accept the lack of feasibility of access to the Blackwell Farm site. In our view it would be irresponsible for the forwarding planning process to allocate Blackwell Farm without absolutely clear understandings of how access to it would be achieved, what the network effects would be, how congestion would be avoided, and who would pay for the necessary infrastructure. It is clear that there are currently no answers to these questions.

Through access between the A31 and west Guildford via Blackwell Farm

2.14 The Proposed Submission Plan is clear in Policy A26 that "A through vehicular link is required via the above accesses between the A31 Farnham Road and Egerton Road to provide a new route to the Surrey Research Park, the University of Surrey’s Manor Park campus and the Royal Surrey County Hospital. This will provide relief to the A31/A3 junction, in advance of the delivery of Highways England's A3 Guildford scheme.” In other words, the intention is to attract additional traffic off the A31 and A3 through the Blackwell Farm site in a ‘Sustainable Movement Corridor’. We consider there is nothing sustainable in a glorified rat-run.

2.15 Guildford Borough Council is explicitly trying to promote what Surrey County Council is trying to avoid. Given that both ends of the route have proved impractical just to meet the impacts of the Blackwell Farm development, we consider a further increase in their capacity is wholly unrealistic. This confusion is wholly We consider the Plan is unsound on the ground that it is not deliverable. In addition to the practicability, we notice that Policy A26 in the Plan expects the Blackwell Farm development to pay for this additional infrastructure for other users attracted to the area: “Developer to provide the western route section of the Sustainable Movement Corridor on the site and make a necessary and proportionate contribution to delivering the western route section on the Local Road Network.”

2.16 There are practical problems in putting a through route into position between Gill Avenue and the A31 at Down Place while serving the Blackwell Farm Connecting the ‘Sustainable Movement Corridor’ to Gill Road will be problematic. The routes noted in paragraph 2.9 above would be tortuous if north of the Ancient Woodland, while a link south of the Ancient Woodland would barely serve the Blackwell Farm development at all (which would all be to its north). Both routes would send through traffic to the hospital and elsewhere through residential areas (Blackwell Farm or Manor Park campus).

2.17 Not only are the access routes in the Proposed Submission Plan inadequate for the task, but Surrey County Council and Guildford Borough Council have played down the traffic volumes which will need to use them at peak periods:

the data from SCC’s Strategic Highways Assessment Report are the average for the morning peak three hours (not the average for the morning peak one hour, which would be 16% higher);

no allowance has been made for the impacts of promoting a through vehicular link, but the SHAR is forced to acknowledge that, with this, "then flows through the development may be higher still" (paragraph 4.7.S).

The higher real traffic volumes in the peak may necessitate still larger works at the accesses, with associated practical problems and also additional costs.

2.18 The effect of these numerous deficiencies and confusions is that there is wholly insufficient evidence to demonstrate that the access arrangements in the Proposed Submission Plan to and through the Blackwell Farm site are actually deliverable. This is in breach of Government policy:

it is the intention in DfT Circular 02/2013 The strategic road network and the delivery of sustainable development on capacity enhancements that "Capacity enhancements and infrastructure requirements to deliver strategic growth should be identified at the Local Plan stage, which provides the best opportunity to consider development aspirations alongside the associated strategic infrastructure needs."

Paragraph 158 of the NPPF similarly requires that "Each local planning authority should ensure that the Local Plan is based on adequate, up-to-date and relevant evidence about the economic, social and environmental characteristics and prospects of the area” (emphasis added).
The proposals have therefore failed to have adequate regard to national policies and advice. The Plan is unsound because the proposal to develop land at Blackwell Farm would not be effective, as it is not deliverable over the Plan period due to the impracticability of access.

Cost of access to Blackwell Farm

2.19 The transport costs of the proposed works to give access to Blackwell Farm have been understated in the Proposed Submission Plan. Some of the costs are listed in Appendix C of the Plan. The need to resolve consequential highways infrastructure requirements is identified in Policy A26 but not costed. Further requirements have been identified by RGP but not costed. The table below lists the main transport-related items.

2.20 The need for interventions to address highway network performance issues which could otherwise result from the development is especially acute in the case of Blackwell Farm. Surrey County Council's *Options Growth Scenarios Transport Assessment Report*, January 2014, (to some extent overtaken by the *Strategic Highway Assessment Report* in June 2016) explains the likely highways effects of the various major urban developments proposed by Guildford BC (though the size of the Blackwell Farm scheme has been reduced since then from 2,250 to 1,800 dwellings). Blackwell Farm was 'Scenario 3', the sum of Scenario 2 - development of all permitted sites and three large developments just beyond the Borough's boundaries - and the south-west Guildford urban development at Blackwell Farm itself. The Options study concluded that "When comparing scenarios 3 (south-west urban extension), 4 (north-east urban extension) and 5 (Wisley airfield development) to scenario 2, scenario 3 has the largest impact on general borough wide network statistics and scenario 4 the least" (paragraph 5.1.7). The 2016 SHAR did not conclude on the relative impacts of each major urban development.

2.21 The table above shows that the stated costs purely for access to the Blackwell Farm development (and associated through movement) amount to £60m. This is over £33,000 per dwelling In addition, there would be very serious additional highways costs to resolve the consequences of Blackwell Farm in the wider network beyond the site and to achieve the junction improvements with signalised lights around the Down Place access. Those are just the transport costs attributable to the development; in addition, Policy A26 refers to other supporting infrastructure including a two-form entry primary school, local retail centre, GP surgery, open space, playing fields and allotments. Secondary education is only not mentioned because a secondary school at the nearby proposed urban development at Flexford/ Normandy is expected to serve the Blackwell Farm development. Furthermore, 40% of the dwellings built will need to be affordable (Policy H2), largely cross-subsidised from the private open market housing for sale. All the usual gas, water, electricity and sewerage services would be needed, and typical contributions to local government services. The transport-related costs alone are far more than a development of 1,800 houses and 31,000m² of employment could realistically bear. Together with all the other infrastructure necessary to allow a new community to proceed, the scheme is undeliverable financially.

2.22 We conclude that Policy A26 on Blackwell Farm is not legally compliant because it has failed to have adequate regard to the resources likely to be available for implementing the proposals in the document, in respect of the infrastructure requirements needed for the development to proceed; no regard at all has been had to a range of substantial The policy is
also unsound because the proposal to develop land at Blackwell Farm would not be effective, as it is not deliverable over the Plan period due to very high infrastructure costs.

2.23 We recommend that the Blackwell Farm urban development proposal in Policy A26 is deleted on highways grounds.

**Impact on the Surrey Hills AONB and landscape**

*Direct impact on the AONB*

3.1 The proposed development at Blackwell Farm is the only major scheme in the Proposed Submission Plan which would directly affect the Surrey Hills. The built-up urban development is proposed in the setting of the AONB to the north of the Hogs Back, but the principal access road is proposed to cross the AONB in a highly intrusive manner, and the greatly expanded access at the A31/Down Place junction would also adversely affect the AONB.

3.2 The principal impact of the development within the AONB would be the construction of a major access road up and down the steep northern slope of the Hogs. The ridge of the AONB is at nearly 50m and the northern AONB boundary in the area at Om (on the contour through Down Place Stables, below the bend in the existing Down Place access road). The national landscape designation therefore includes the whole of the steepest part of the slope through a vertical elevation of 40 metres. A road on this slope at this point would be highly damaging to the AONB, and its construction would also have further very serious impacts.

3.3 The construction of 500m of major access road on the slope down from the AONB ridge is in our view major development as such it must pass the tests in paragraph 116 of the NPPF if it is to be acceptable. We consider it fails to do this. The proposal at Blackwell Farm is not of such overriding importance that the access to it through the AONB meets the "exceptional circumstances" required, nor can it be demonstrated to be in the public interest in view of the adverse effects. The need for the main development is predicated on an Objectively Assessed Need for housing which we consider far too high. Whether or not the Secretary of State agrees with us (either that this is major development in the AONB or that the OAN is too high), the AONB is a key consideration in its own right. The NPPF makes clear at paragraph 14 that 'sustainable development' involves reflecting policies from the NPPF where these indicate that development should be restricted, and AONB is one such policy. There is no policy presumption that housing needs should override AONB interests: the reverse applies. In view of the damage which would be done to the AONB by the proposed allocation, and this being the only major allocation to do that, we consider that Blackwell Farm should be the primary candidate of all the major sites for deletion from the Plan.

3.4 The Proposed Submission Plan states as a requirement that "Primary vehicular access to the site allocation will be via the existing or realigned junction of the A31 and the Down Place access road, which will be signalised. The design of the improved Down Place access road or a new adjacent parallel access road will be sympathetic to its setting variously within the AONB and AGLV". The comment on the design of the road is as foolish as it is undeliverable. The existing access road is a beautiful country lane flanked by mature trees which is entirely typical of the AONB landscape. The first option, of 'improving' this 'sympathetically' to the standards needed by an access road for a new settlement (let alone to provide a Sustainable Movement Corridor to serve the Research Park, Hospital and other facilities), is impossible. The road is too narrow to be widened sufficiently and has a sharp bend near the bottom. This option could only be effected by the large scale removal of mature trees on one or both sides of the route, plus further damage on the lower slope to overcome the bend. Taking the substantial adjacent land beyond the paved highway itself, used in highway construction, would cause further major damage to the heavily treed landscape of the AONB in this location. This could not be 'sympathetic' to the AONB.

3.5 The second option, of a 'new adjacent parallel access road', would introduce an appalling scar onto the steep northern slope of the Hogs. It would irreparably damage this nationally known iconic landscape, and it is absurd for the Plan to suggest that this also could be designed 'sympathetically' to the AONB (and AGLV). An inevitable consequence of forcing a wide road down a steep slope at the angle proposed would be to require a near vertical wall of chalk on the ridge-side and other earthworks. This would be part of the unavoidable degradation to the AONB associated with the road, which will be visible and intrusive from miles around. There is also a real possibility that the access road would be accompanied by street lighting under either option, introducing a damaging night-time impact into this dark AONB landscape.
3.6 The Highways Authority has indicated to us that it will require street lighting at and around the new signalised junction on the top of the Hogs Back on the A31 in the vicinity of Down Place and Down. This would be damaging to the current night-time experience: lighting currently stops east of the A3/A31 interchange, with the A31 and the AONB to the west of this largely unlit. The change would give the clear impression that Guildford had spread outwards to the west and upwards to the highest point around the city.

3.7 The proposed road down the AONB scarp would damage views to the AONB from public rights of way to the north and north east as well as from Manor Park and from more distant viewpoints in and around the. The construction of the road would itself greatly increase the damage to the experience of the AONB by introducing thousands of vehicle movements daily: this would force drivers and passengers to see and experience the visual damage done to this nationally important landscape, by the road they would be using.

3.8 In each of these respects, the proposed allocation at Blackwell Farm would run counter to the statement in the Plan's 'Spatial Vision' that "Areas of high environmental value such as Areas of Outstanding Natural Beauty and Sites of Special Scientific Interest will be retained and afforded great New development on the edges of urban areas will be required to treat the transition from urban to rural character in a sympathetic way."

**Impact on the setting of the AONB**

3.9 The proposed urban development would be in the setting of the AONB to the north of the Hogs Back (and also north of but abutting the Area of Great Landscape Value). Only the access road to the A31 would be permitted on land to the south of this development. If, however, the secondary access road was aligned south of Manor Copse, then this too would pass through the AGLV.

3.10 Regard must be had to the setting of AONBs. Section 85(1) of the Countryside and Rights of Way Act 2000 states: "In exercising or performing any functions in relation to, or so as to affect, land in an area of outstanding natural beauty, a relevant authority shall have regard to the purpose of conserving or enhancing the natural beauty of the area of outstanding natural beauty" (emphasis added). The Government's Planning Practice Guidance draws attention to this obligation and specifically mentions proposals "which might have an impact on the setting of AONBs (Natural Environment paragraph reference ID 8-003-20140306). The setting of AONBs is not protected as rigorously as land within AONBs, but various appeal decisions before and since the NPPF - which have rejected intrusive developments in the settings of AONBs - show that it continues to be relevant to decisions. In the absence of policy guidance, the formal position is that the weight to be given to setting is a matter for the decision-taker's discretion. NPPF paragraph 115 requires that in any decision "great weight should be given to conserving landscape and scenic beauty" in AONBs. In the context of paragraph 85 of the Act noted above, this applies not only to developments proposed within an AONB but if proposed in its setting such that the AONB would be affected. This should be taken into account in plan preparation.

3.11 Both Guildford Borough Council's and Surrey County Council's Landscape Character Assessments (LCAs) identify the drama of the chalk ridge and the panoramic views, north and south, as defining characteristics of the Hogs Back. Both these LCAs also identify the significance of views to and from the ridge. The Guildford BC LCA Rural Urban Fringe Assessment of the Hogs Back references the importance of the land in providing "the setting to and views from Guildford" and the desire to maintain the "essentially undeveloped rural character" of the land. The assessment notes that: "The setting of Guildford and the AONB are both highly sensitive to any small scale incremental change".

3.12 In the circumstances at Blackwell Farm, we would expect considerable weight to be given to protection of land from inappropriate change in the setting of the Surrey Hills AONB: this is the setting of the Hogs Back, a nationally known and revered part of an AONB; the steep slope to the north from the Hogs Back ridge opens up a wonderful vista which contributes enormously to the enjoyment of the AONB, and should be protected from inappropriate change; the setting has been relatively little-damaged to date (though development by the University of Surrey is creeping out of Guildford into it), and this achievement should be continued.

3.13 The proposed development would damage the setting of the AONB, causing Guildford to sprawl yet further into the rural vista that can be enjoyed from the AONB on the Hogs. We appreciate that urban built development is no longer proposed on land south of Down Place and Manor Farm (contrast the Issues & Options and Consultation Draft stages of the Plan), though there would continue to be visual intrusion into the AONB's setting. Moreover, the continued presence of the primary access road to the site passing through the immediate setting of the AONB (and the AONB itself) remains a very
seriously damaging aspect of the proposal by bringing noise and pollution into the setting, as well as visual damage from the road and the eye-catching effect of moving vehicles upon it. Furthermore, the thousands of northbound users of the primary access road daily would themselves experience comprehensive views into the setting of the AONB; their appreciation of this setting would be significantly marred by the Blackwell Farm development. We conclude that the allocation would conflict with Policy Pl Surrey Hills Area of Outstanding Natural Beauty not least because it would fail "to conserve and/or enhance the setting and views of the AONB". The impact of the urban development allocation on the setting of the AONB is not considered in Policy A26 and has therefore been neglected in the Proposed Submission Plan.

The future boundary of the AONB

3.14 Natural England has announced its intention to review the boundary of the Surrey Hills AONB. It commissioned a report in 2012, from Alison Farmer Associates, which identified areas of search for possible extensions to the AONB, including the whole of the Blackwell Farm allocation area. A further report was commissioned by Surrey County Council on behalf of the Surrey Planning Officers Association and the Surrey Hills AONB Board in 2013 from Hankinson Duckett Associates to further evaluate the natural beauty of those areas of search (and other Landscape Character Assessment work). This proposed extensions to the existing AONB boundary on the north side of the Hogs Back (and elsewhere), but just omitted the Blackwell Farm allocation area.

3.15 The Hankinson Duckett evaluation was not carried out in detail, so in 2016 Compton and Worplesdon Parish Councils commissioned another firm of landscape architects, Land Management Services (LMS), to undertake a more detailed natural beauty evaluation in the vicinity of Blackwell Farm, Down Place and Homestead Farm to the north of the Hogs Back. The LMS report (the final report is available from Karen Stevens) agreed that the area identified by Hankinson Duckett Associates should be included within a revised AONB boundary north of the Hogs Back, but also proposed a north-eastward extension of the AONB boundary to include Down Place and Blackwell Farm. No further land at Homestead Farm was proposed for inclusion.

3.16 The LMS evaluation identified small scale character areas, one of which covered the eastern-most parts of the study area, adjacent to the built-up area of There were two parcels: one on Manor Farm (south and east of Manor Copse Ancient Woodland) and one north of Strawberry Grove Ancient Woodland. The latter comprises the north-east corner of the Policy A26 development allocation at Blackwell Farm. LMS recommended that both these parcels should not be included within the revised AONB boundary, but recommended that they remain open as the setting of Guildford and the AONB. LMS concluded here: "This area does not merit inclusion within the AONB, but provides an important buffer and transitional landscape on the western edge of Guildford. It is recommended that the boundary to [the AONB here] follows the western edge of this sub character area but includes Strawberry and Manor Copses. The semi-rural transitional character of this landscape should be retained in order to conserve the currently limited impact of Guildford on the AONB and other rural land to the west."

3.17 We consider it vitally important that decisions on the Guildford Local Plan in the near future do not prejudice the outcome of the review of a nationally important landscape designation. The most detailed natural beauty evaluation north of the Hogs Back to date (against Natural England's criteria for designating AONBs) shows that most of the Policy A26 Blackwell Farm allocation area should be included within a revised AONB boundary. The principal remaining area, in the north-east corner of the allocation, should remain open as the setting of the AONB and of Guildford.

3.18 The Blackwell Farm allocation should therefore be withdrawn so that, with a high probability, most of the land can be included within the AONB in future after the boundary review has been completed. The LMS interpretation of natural beauty confirms our own local perception that the land identified does merit AONB designation. Its high landscape quality, in the setting of the current AONB, is a major consideration for the Local Plan in any event. This would be a highly damaging location for a major urban development in landscape terms.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

### Direct impact on the AONB

3.1 The proposed development at Blackwell Farm is the only major scheme in the Proposed Submission Plan which would directly affect the Surrey Hills AONB. The built-up urban development is proposed in the setting of the AONB to the north of the Hogs Back, but the principal access road is proposed to cross the AONB in a highly intrusive manner, and the greatly expanded access at the A31/Down Place junction would also adversely affect the AONB.

3.2 The principal impact of the development within the AONB would be the construction of a major access road up and down the steep northern slope of the Hogs Back. The ridge of the AONB is at nearly 150m and the northern AONB boundary in the area at 110m (on the contour through Down Place Stables, below the bend in the existing Down Place access road). The national landscape designation therefore includes the whole of the steepest part of the slope through a vertical elevation of 40 metres. A road on this slope at this point would be highly damaging to the AONB, and its construction would also have further very serious impacts.

3.3 The construction of 500m of major access road on the slope down from the AONB ridge is in our view major development. As such it must pass the tests in paragraph 116 of the NPPF if it is to be acceptable. We consider it fails to do this. The proposal at Blackwell Farm is not of such overriding importance that the access to it through the AONB meets the “exceptional circumstances” required, nor can it be demonstrated to be in the public interest in view of the adverse effects. The need for the main development is predicated on an Objectively Assessed Need for housing which we consider far too high. Whether or not the Secretary of State agrees with us (either that this is major development in the AONB or that the OAN is too high), the AONB is a key consideration in its own right. The NPPF makes clear at paragraph 14 that ‘sustainable development’ involves reflecting policies from the NPPF where these indicate that development should be restricted, and AONB is one such policy. There is no policy presumption that housing needs should override AONB interests: the reverse applies. In view of the damage which would be done to the AONB by the proposed allocation, and this being the only major allocation to do that, we consider that Blackwell Farm should be the primary candidate of all the major sites for deletion from the Plan.

3.4 The Proposed Submission Plan states as a requirement that “Primary vehicular access to the site allocation will be via the existing or realigned junction of the A31 and the Down Place access road, which will be signalised. The design of the improved Down Place access road or a new adjacent parallel access road will be sympathetic to its setting variously within the AONB and AGLV”. The comment on the design of the road is as foolish as it is undeliverable. The existing access road is a beautiful country lane flanked by mature trees which is entirely typical of the AONB landscape. The first option, of ‘improving’ this ‘sympathetically’ to the standards needed by an access road for a new settlement (let alone to provide a Sustainable Movement Corridor to serve the Research Park, Hospital and other facilities), is impossible. The road is too narrow to be widened sufficiently and has a sharp bend near the bottom. This option could only be effected by the large scale removal of mature trees on one or both sides of the route, plus further damage on the lower slope to overcome the bend. Taking the substantial adjacent land beyond the paved highway itself, used in highway construction, would cause further major damage to the heavily treed landscape of the AONB in this location. This could not be ‘sympathetic’ to the AONB.

3.5 The second option, of a ‘new adjacent parallel access road’, would introduce an appalling scar onto the steep northern slope of the Hogs Back. It would irreparably damage this nationally known iconic landscape, and it is absurd for the Plan to suggest that this also could be designed ‘sympathetically’ to the AONB (and AGLV). An inevitable consequence of forcing a wide road down a steep slope at the angle proposed would be to require a near-vertical wall of chalk on the ridge-
side and other earthworks. This would be part of the unavoidable degradation to the AONB associated with the road, which will be visible and intrusive from miles around. There is also a real possibility that the access road would be accompanied by street lighting under either option, introducing a damaging night-time impact into this dark AONB landscape.

3.6 The Highways Authority has indicated to us that it will require street lighting at and around the new signalised junction on the top of the Hogs Back on the A31 in the vicinity of Down Place and Down Lane. This would be damaging to the current night-time experience: lighting currently stops east of the A3/A31 interchange, with the A31 and the AONB to the west of this largely unlit. The change would give the clear impression that Guildford had spread outwards to the west and upwards to the highest point around the city.

3.7 The proposed road down the AONB scarp would damage views to the AONB from public rights of way to the north and north east as well as from Manor Park and from more distant viewpoints in and around the city. The construction of the road would itself greatly increase the damage to the experience of the AONB by introducing thousands of vehicle movements daily: this would force drivers and passengers to see and experience the visual damage done to this nationally important landscape, by the road they would be using.

3.8 In each of these respects, the proposed allocation at Blackwell Farm would run counter to the statement in the Plan’s ‘Spatial Vision’ that “Areas of high environmental value such as Areas of Outstanding Natural Beauty and Sites of Special Scientific Interest will be retained and afforded great protection. New development on the edges of urban areas will be required to treat the transition from urban to rural character in a sympathetic way.”

**Impact on the setting of the AONB**

3.9 The proposed urban development would be in the setting of the AONB to the north of the Hogs Back (and also north of but abutting the Area of Great Landscape Value). Only the access road to the A31 would be permitted on land to the south of this development. If, however, the secondary access road was aligned south of Manor Copse, then this too would pass through the AGLV.

3.10 Regard must be had to the setting of AONBs. Section 85(1) of the Countryside and Rights of Way Act 2000 states: “In exercising or performing any functions in relation to, or so as to affect, land in an area of outstanding natural beauty, a relevant authority shall have regard to the purpose of conserving or enhancing the natural beauty of the area of outstanding natural beauty” (emphasis added). The Government’s Planning Practice Guidance draws attention to this obligation and specifically mentions proposals “which might have an impact on the setting of” AONBs (Natural Environment paragraph reference ID 8-003-20140306). The setting of AONBs is not protected as rigorously as land within AONBs, but various appeal decisions before and since the NPPF – which have rejected intrusive developments in the settings of AONBs – show that it continues to be relevant to decisions. In the absence of policy guidance, the formal position is that the weight to be given to setting is a matter for the decision-taker’s discretion. NPPF paragraph 115 requires that in any decision “great weight should be given to conserving landscape and scenic beauty” in AONBs. In the context of paragraph 85 of the Act noted above, this applies not only to developments proposed within an AONB but if proposed in its setting such that the AONB would be affected. This should be taken into account in plan preparation.

3.11 Both Guildford Borough Council’s and Surrey County Council’s Landscape Character Assessments (LCAs) identify the drama of the chalk ridge and the panoramic views, north and south, as defining characteristics of the Hog’s Back. Both these LCAs also identify the significance of views to and from the ridge. The Guildford BC LCA Rural Urban Fringe Assessment of the Hogs Back references the importance of the land in providing “the setting to and views from Guildford” and the desire to maintain the “essentially undeveloped rural character” of the land. The assessment notes that: “The setting of Guildford and the AONB are both highly sensitive to any small scale incremental change”.

3.12 In the circumstances at Blackwell Farm, we would expect considerable weight to be given to protection of land from inappropriate change in the setting of the Surrey Hills AONB:

- this is the setting of the Hogs Back, a nationally known and revered part of an AONB;
- the steep slope to the north from the Hogs Back ridge opens up a wonderful vista which contributes enormously to the enjoyment of the AONB, and should be protected from inappropriate change;
• the setting has been relatively little-damaged to date (though development by the University of Surrey is creeping out of Guildford into it), and this achievement should be continued.

3.13 The proposed development would damage the setting of the AONB, causing Guildford to sprawl yet further into the rural vista that can be enjoyed from the AONB on the Hogs Back. We appreciate that urban built development is no longer proposed on land south of Down Place and Manor Farm (contrast the Issues & Options and Consultation Draft stages of the Plan), though there would continue to be visual intrusion into the AONB’s setting. Moreover, the continued presence of the primary access road to the site passing through the immediate setting of the AONB (and the AONB itself) remains a very seriously damaging aspect of the proposal by bringing noise and pollution into the setting, as well as visual damage from the road and the eye-catching effect of moving vehicles upon it. Furthermore, the thousands of northbound users of the primary access road daily would themselves experience comprehensive views into the setting of the AONB; their appreciation of this setting would be significantly marred by the Blackwell Farm development. We conclude that the allocation would conflict with Policy P1 Surrey Hills Area of Outstanding Natural Beauty not least because it would fail “to conserve and/or enhance the setting and views of the AONB”. The impact of the urban development allocation on the setting of the AONB is not considered in Policy A26 and has therefore been neglected in the Proposed Submission Plan.

The future boundary of the AONB

3.14 Natural England has announced its intention to review the boundary of the Surrey Hills AONB. It commissioned a report in 2012, from Alison Farmer Associates, which identified areas of search for possible extensions to the AONB. This included the whole of the Blackwell Farm allocation area. A further report was commissioned by Surrey County Council on behalf of the Surrey Planning Officers Association and the Surrey Hills AONB Board in 2013 from Hankinson Duckett Associates to further evaluate the natural beauty of those areas of search (and other Landscape Character Assessment work). This proposed extensions to the existing AONB boundary on the north side of the Hogs Back (and elsewhere), but just omitted the Blackwell Farm allocation area.

3.15 The Hankinson Duckett evaluation was not carried out in detail, so in 2016 Compton and Worplesdon Parish Councils commissioned another firm of landscape architects, Land Management Services (LMS), to undertake a more detailed natural beauty evaluation in the vicinity of Blackwell Farm, Down Place and Homestead Farm to the north of the Hogs Back. The LMS report (Appendix 4) agreed that the area identified by Hankinson Duckett Associates should be included within a revised AONB boundary north of the Hogs Back, but also proposed a north-eastward extension of the AONB boundary to include Down Place and Blackwell Farm. No further land at Homestead Farm was proposed for inclusion.

3.16 The LMS evaluation identified small scale character areas, one of which covered the eastern-most parts of the study area, adjacent to the built-up area of Guildford. There were two parcels: one on Manor Farm (south and east of Manor Copse Ancient woodland) and one north of Strawberry Grove Ancient woodland. The latter comprises the north-east corner of the Policy A26 development allocation at Blackwell Farm. LMS recommended that both these parcels should not be included within the revised AONB boundary, but recommended that they remain open as the setting of Guildford and the AONB. LMS concluded here: “This area does not merit inclusion within the AONB, but provides an important buffer and transitional landscape on the western edge of Guildford. It is recommended that the boundary to [the AONB here] follows the western edge of this sub character area but includes Strawberry and Manor Copses. The semi-rural transitional character of this landscape should be retained in order to conserve the currently limited impact of Guildford on the AONB and other rural land to the west.”

3.17 We consider it vitally important that decisions on the Guildford Local Plan in the near future do not prejudice the outcome of the review of a nationally important landscape designation. The most detailed natural beauty evaluation north of the Hogs Back to date (against Natural England’s criteria for designating AONBs) shows that most of the Policy A26 Blackwell Farm allocation area should be included within a revised AONB boundary. The principal remaining area, in the north-east corner of the allocation, should remain open as the setting of the AONB and of Guildford.

3.18 The Blackwell Farm allocation should therefore be withdrawn so that, with a high probability, most of the land can be included within the AONB in future after the boundary review has been completed. The LMS interpretation of natural beauty confirms our own local perception that the land identified does merit AONB designation. Its high landscape quality – in the setting of the current AONB – is a major consideration for the Local Plan in any event. This would be a highly damaging location for a major urban development in landscape terms.
Conclusions

3.19 We consider that the Blackwell Farm development allocation should be removed by deleting Policy A26 because of its impact on the AONB:

- there would be a significant direct impact of the primary access road on the AONB;
- the primary access road through the AONB would be major development in its own right, and the proposals do not fulfil the criteria for allowing such development;
- the proposed built development and part of the primary access road would have a significant adverse effect on the setting of the AONB;
- the signalled junction to the primary access road, where Down Place joins the A31 on the top of the Hogs Back, would be lit at night, which would damage the appreciation of the rural qualities of the AONB at night and emphasise the sprawl of Guildford into it;
- the primary access road from the Blackwell Farm development to the Hogs Back ridge would probably be lit at night, which would also damage the appreciation of the rural qualities of the AONB and emphasise the sprawl of Guildford into it;
- most of the proposed development site should be included within a revised boundary of the Surrey Hills AONB, while its north-east corner (north of Strawberry Grove Ancient Woodland) would be in the immediate setting of the AONB and should be kept free of development as a buffer between urban Guildford (the research park) and the AONB.

3.20 We conclude that the Plan is unsound because the proposal to promote development at Blackwell Farm in the Surrey Hills Area of Outstanding Natural Beauty and within its setting is not consistent with Government policy. Insufficient regard has been had to the impact of the primary access road on the AONB (and which we also regard as major development). Insufficient regard has also been had to the primary access road on the setting of the AONB none at all to the impact of the urban development area on the setting of the AONB. In that last respect we consider there has been a legal failure to comply with the Planning and Compulsory Purchase Act 2004, s19(2)(a).

Green Belt at Blackwell Farm

4.1 Paragraph 83 of the NPPF states that “Once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. At that time, authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period.” This is a continuation in principle of previous Green Belt policy (from PPG2, paragraph 2.9).

4.2 In the most recent review of the Guildford Local Plan, following the report of the Inspector in September 2001, there was just one change to the Green Belt boundary. This was to allow the expansion of the University of Surrey (and two minor adjacent plots) into Manor Farm (the Manor Park development). It is a further withdrawal of the Green Belt boundary to allow more development immediately beyond the last land release that is proposed now. The Local Plan Inspector in 2001 was alert to the risk of nibbling away at the Green Belt and responded as follows to objectors who sought a more limited release of land from the Green Belt: “the guidance suggests that in reviewing Green Belt boundaries a longer time scale should be used than for other aspects of the Plan. If the normal period suggested for a local plan is ten years, it is not unreasonable to look at defining the Green Belt boundary with two local plan periods in mind. A cushion of undesignated land for future requirements, where they are reasonably foreseeable, can be accepted where it can avoid a succession of bites at the Green Belt” (paragraph 16.4.3).

4.3 The Borough Council and the University of Surrey are attempting to undermine this intention. The Local Plan was adopted in 2003, yet even when the Issues and Options report for the current Local Plan was issued in 2013, they were trying to release further land from the Green Belt in precisely the way the Inspector had been trying to prevent. Save Hogs Back and CPRE Surrey are appalled at this attempt to abuse and undermine Green Belt policy and principles. The proposal reflects a remarkably casual approach to the Green Belt which should not be tolerated. Further removal of land from the Green Belt at a location where Green Belt land has only recently been released is contrary to the expectations of Government planning policy and the Plan therefore unsound.

4.4 There should be no illusion about the University of Surrey’s desire to develop a huge swathe of land west of Manor Park at the foot of the Hogs Back. In November 2013 the University released its proposals for a ‘Garden Neighbourhood’
stretching as far west as Flexford House and occupying the whole area between the AONB and the railway beside Wood Street Village. An illustrative page from the proposals is attached as Appendix 1. This shows comprehensive development of the area, a new junction on the A31 and a road straight down the steep northern slope of the Hogs Back. The development of Blackwell Farm would only be a stepping stone in this expansionist thinking of the University which shows a serious lack of appreciation of the role of Green Belt, the Hogs Back and the Surrey Hills AONB. Releasing Blackwell Farm is highly undesirable in its own terms and would only fuel the desire of the University to press the Council for yet more land releases in future.

4.5 The Proposed Submission Local Plan has adopted “a controlled realignment of the Green Belt boundary and development of a small number of strategic sites, which will allow us to provide for mixed and inclusive communities supported by new infrastructure” (paragraph 2.28). The Plan is a coy as it possibly can be about the remarkable scale of Green Belt land release for housing which it proposes. Large urban developments are proposed in the Green Belt at Blackwell Farm (1,800 houses), Gosden Hill Farm (2,000 houses), former Wisley Airfield (2,000 houses) and between Normandy and Flexford (1,100 houses). Various Green Belt sites offering over 100 houses each are also proposed.

4.6 The Government policy on Green Belt in the NPPF begins with a statement of great clarity, but one which the Proposed Submission Plan appears to have neglected or sidelined: “The Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence” (paragraph 79). The NPPF does of course also provide considerable encouragement to the provision of the housing which the nation needs. It explains how the conflict is to be dealt with between the pressure of housing and the constraint of Green Belt (and other nationally important designations) at paragraph 14: “Local Plans should meet objectively assessed needs, with sufficient flexibility to adapt to rapid change, unless…. specific policies in this Framework indicate development should be restricted”. One such policy (footnote 9) is Green Belt.

4.7 For the avoidance of doubt, the Government has issued various statements confirming its commitment to Green Belt and reiterating how the pressure to release Green Belt land should be addressed in Local Plans. For example, Brandon Lewis MP, Minister for Housing and Planning told a Westminster Hall debate on 15 March 2016:

“…we have regularly made the point that the green belt is a legitimate constraint. It is an important part of the country’s infrastructure and the Government attach the highest importance to its protection. In fact, over the past few years we have increased it. The NPPF makes it clear that green belt boundaries should be established in local plans and can be altered only in exceptional circumstances, using the local plan’s process of consultation and independent examination. The Government do not specify what constitutes exceptional circumstances, as it is for each local authority to determine that and how much weight to attach to those circumstances” (Hansard column 307WH).

On 11 January 2016 Mr Lewis gave a written answer to a Parliamentary Question by Mr Laurence Robertson MP (Tewkesbury), as follows:

**Green Belt**

**Question 21089**

To ask the Secretary of State for Communities and Local Government, what his policy is on the priority that should be given to maintaining Green Belt land in Local Plans in areas where there is unmet housing need.

**Answer** Green Belt is protected by local authorities in line with national policy set out in the National Planning Policy Framework. The Framework states that permanence is an essential characteristic of Green Belt, and that a Green Belt boundary may be altered only in exceptional circumstances, using the Local Plan. Our supporting Guidance reminds local authorities that, in planning to meet their objectively assessed local housing needs, they must have due regard to national policies (including Green Belt policy) which indicate that development should be restricted and which may restrain the ability of an authority to meet all its needs. This applies even where there is no up-to-date Plan. It is for the Planning Inspector examining a revised Local Plan to determine whether it is based on sound evidence and in line with national policy.

A statement to *Planning* from DCLG reported on 25th April (attached as Appendix 2) said:
“There are no plans or policy to relax the strong protections that prevent inappropriate development on the green belt. Ministers have repeatedly been clear that demand for housing alone will not justify changing green belt boundaries.”

4.8 In our view, the statements from the Government clarify that releasing land from the Green Belt to meet housing needs is an option but is only to be undertaken in exceptional circumstances rather than lightly. Guildford Borough Council, in contrast, has chosen to meet all its Objectively Assessed Need for housing, taking whatever land is necessary from the Green Belt to secure this. Furthermore, the Proposed Submission Plan has made no real effort at all to justify the release of land from the Green Belt in the terms set by the NPPF. Paragraph 4.3.16 of the Plan simply states:

“National planning policy requires that Green Belt boundaries are only amended in exceptional circumstances and that this must be undertaken as part of the Local Plan process. We consider that exceptional circumstances exist to justify the amendment of Green Belt boundaries in order to facilitate the development that is needed and promote sustainable patterns of development.”

Claiming ‘exceptional circumstances’ is easy. However, there is no review of the arguments needed to demonstrate that exceptional circumstances might apply at any location in the Borough. In our view, this means that the Plan is unsound by virtue of not being consistent with Government policy, and also unlawful because it has failed to have regard to national policies and advice on Green Belt contained in guidance issued by the Secretary of State.

4.9 The purposes of Green Belt have played remarkably little part in the selection of areas for urban development in the Proposed Submission Plan. Pegasus Group for the Borough Council divided all non-urban land in the Borough into a series of large plots for analysis. Their most up-to-date analysis is given in their Green Belt and Countryside Study, Volume II Addendum Appendix 1, April 2014. This assumes that the Green Belt purpose of encouraging urban land recycling applies equally to all plots, but the other four purposes are assessed for each plot. If none or one purpose is served by the plot it is ranked as low sensitivity, two purposes is ranked as medium sensitivity and three or four purposes is ranked as high sensitivity. 41 plots in the Green Belt are identified as having low sensitivity, 67 as having medium sensitivity and 91 as having high sensitivity. Of the four major proposed urban developments noted in paragraph 4.1 above, three have medium sensitivity and one (Flexford/Normandy) has high sensitivity. It is striking that none of the plots having low sensitivity was chosen for development. The choice of sites for development was clearly not significantly influenced by suitability of sites in Green Belt terms.

4.10 Pegasus Group explains its approach to recommending ‘Potential Development Areas’ (PDAs) in its Volume II Addendum at paragraph 3.7:

“Volume II of the Study has focussed upon those parcels which directly adjoin the urban edge as they are likely to offer a more appropriate relationship with the main urban area than those parcels which are separate from it. It is recognised that if the Council do identify urban edge parcels as appropriate for development and removal from the Green Belt, this may offer the potential for some adjoining land parcels which do not currently connect with the urban edge to come forward in a more appropriate manner. However, such decisions will be best informed by the Council’s chosen spatial strategy, and choices upon the recommended PDAs around the urban edge set out in Volume II and this Addendum.”

In practice, the Borough Council did not accept this approach: two of the four main areas proposed for major development are essentially free-standing urban areas in the countryside, at Wisley Airfield and Flexford/Normandy. If these sites were considered suitable by the Council, then it should also have revisited the 41 plots previously identified as low sensitivity in Green Belt terms before deciding which to allocate.

4.11 We are not arguing that the choice of major development sites was random, but that Green Belt policy played hardly any part in the selection process. On not a single occasion is a Green Belt plot retained free of development ‘because it significantly fulfils Green Belt purposes’. Nor is a Green Belt plot proposed for release ‘because it has little benefit in fulfilling Green Belt purposes’. We consider that the Borough Council has fallen far short of being able to demonstrate exceptional circumstances to justify any of its choices of major development area in Green Belt terms. That is a major failure of policy implementation and, in our view, makes the selection of sites unsound as (i) contrary to national planning policy and (ii) not the most appropriate strategy when considered against its reasonable alternatives.

4.12 In reality, Pegasus Group has emphasised a range of non-Green Belt planning issues which it considers important, including a highly selective ‘sustainability assessment scoring’ system which is dominated by walking distances. No doubt
informed by this, there are important deficiencies in the Borough Council’s approach when considering the possibility of releasing Blackwell Farm for development. Policy A26 refers to ‘key considerations’ merely as “AONB, AGLV, Access, Surface water flood risk”. There is much else at stake, and no justification for changing the existing Green Belt boundary to the newly proposed one.

(i) The protection of Ancient Woodland has been given little attention by Pegasus Group or the Council. Although there is no formal proposal to fell Ancient Woodland at Blackwell Farm, the presence of Strawberry Grove, Manor Copse and Wildfield Copse immediately adjacent to the proposed development area will compromise these irreplaceable natural assets as the residents of 1,800 houses seek nearby leisure and recreation. It appears that zero weight has been given to the real impact on Ancient Woodlands and ancient hedgerows. The proposed allocation can be expected to cause the degradation of the Ancient Woodlands to the extent that over a period of time they lose much of their biological and historic interest.

(ii) The Pegasus Group study refers to development within landscape designations but omits review of the impact of development on the setting of the Surrey Hills AONB. This is a major omission which we have attempted to rectify in paragraphs 3.9-13 above. Reference is made to landscape character but not to visual impact: the latter is an important consideration in close proximity to the Hogs Back and therefore an important omission in relation to Blackwell Farm.

(iii) The Pegasus Group study assumed that Purpose 5 of the Green Belt “to assist in urban regeneration, by encouraging the recycling of derelict and other urban land” (NPPF paragraph 80) applied equally everywhere. We think not. The Blackwell Farm site is capable of achieving far more by way of concentration of land uses than most other sites. This is because the whole of the Blackwell Farm site is owned by the University of Surrey, as is all the land to the east. One effect of stopping development on Blackwell Farm would be to oblige the University to pay more attention to the efficient use of its land. At present the University takes a relaxed approach to land supply:

- the University has devoted large areas to inefficient surface-level car parks (view this on Google Earth, for example);
- the Research Park is specifically advertised as a ‘low density rural location’ (see the video spool on www.surrey-research-park.com/), and provides just 65,000m2 of office space across 28.33 hectares;
- the Guildford Local Plan Inspector’s Report in 2001 agreed to remove over 60 hectares of land from the Green Belt at Manor Park for University purposes, immediately east of Blackwell Farm, which has given the University an impression that land supply is not an issue; the Inspector commented “It may be that, as many Objectors felt, the Proposal is being overgenerous in the amount of land that is being taken out of the Green Belt and that this could be cut back. I have sympathy with that view” – though he still released the land for the reasons he gave in paragraph 16.10.2.

(iv) There is no Green Belt boundary available on Blackwell Farm which would be reliably permanent. The NPPF states that when Local Plans review Green Belt boundaries local planning authorities should “define boundaries clearly, using physical features which are readily recognisable and likely to be permanent” (paragraph 85). The Council’s proposed western boundary to the site – the new Green Belt boundary – would follow a hedge in a dip in the landscape. The existing Green Belt boundary is superior and there is a clear risk from the proposals that Guildford could in future sprawl further west of Blackwell Farm on the basis that the boundary proposed now is indefensible.

4.13 On all these grounds the existing Green Belt boundary has superior merit to the one now proposed further west.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Introduction

I object to Blackwell Farm (site allocation A26) being removed from the green belt and put forward as a Potential Development Area (PDA). I do not believe that the decision is justifiable or sound for three key reasons:

1. Inclusion of the site does not comply with national government policy on the adjustment of green belt boundaries. Furthermore there has been no proper review of this site and other sites across the borough in terms of their suit-ability for development from a green belt point of view. The Green Belt and Countryside Study by Pegasus is a flawed document, and in any case does not appear to have informed Guildford Borough Council’s selection of PDAs.

2. Inclusion of the site does not follow national government policy on development within Areas of Outstanding Natural Beauty (AONB) or national planning guidelines for the setting to AONBs. No exceptional circumstances have been put forward which demonstrate that the benefits of developing Blackwell Farm outweigh the harm to the AONB/AONB setting as is required by the NPPF for major developments (Section 11; Para 115-116).

3. The proposed vehicular access to the site is not viable, which means that the site is not “de-velopable”, it is not in a “suitable location for housing development” and there is no “reason-able prospect that the site is available and could be viably developed at the point envisaged” as is required by the NPPF (Section 6; para 47).

I fully support the detailed joint submission by Save Hog’s Back and CPRE Surrey which outlines objections on the grounds of legal compliance and soundness. In this, my personal response, I outline further reasons for my objection under the head-ings of Green Belt, AONB and Viability.

Green Belt Background

The proposed Blackwell Farm development is described in the draft Local Plan as an “urban extension”, and its location is described as “Guildford urban area”, both these descriptions are misleading and inaccurate (and are likely to skew public responses to the consultation). Blackwell Farm is in a rural location, completely dislocated from the town both geographically and in terms of its infrastruc-ture.

If you look at a map of the proposed development area, only the very far north-eastern corner of the site comes anywhere close to an urban area (Park Barn) and this is separated from it by a railway line and a belt of trees. The eastern edge is separated from the Surrey Research Park/University campus by ancient woodland and by an area of safeguarded agricultural land. The single row of houses at Beechcroft Drive at the southern end of Strawberry Meadow is part of Onslow Garden Village – not itself an “urban” area. Building a second “garden village” or “garden neighbourhood” within a few miles of an existing separated by an area of green belt and ancient wood-land would appear to make the term “urban extension” nonsense. Separating two “garden villages” by an area of green belt and an area of ancient woodland, would also effectively make this become an island within the urban area and would be gradually eroded by urban influence - just as has happened with the vet school being recently built on an area set aside as a buffer zone on the eastern side of Manor copse. The large areas of farmland within this green belt “island”, will be made redundant, just as the grade 2 farmland on Manor Park was made redundant in 2004 (and is now being levelled at the southern boundary to form new playing fields).

In terms of infrastructure too, Blackwell Farm is com-pletely disconnected from the town and cannot be inte-grated into the existing urban fabric. There are no existing public roads or sewerage systems or gas pipes connect-ing the site to the town,
which brings into question the economic viability and the deliverability of the proposals. This site could be anywhere outside the urban boundary of Guildford and should be treated as such within the Local Plan.

Satellite image shows that the site is dislocated from the rest of Guildford and therefore doesn’t form a true urban extension as claimed. Should the site connect through by road to the Tesco roundabout then there would be transport chaos rendering the proposals impractical and the plan unsound.

**Openness and permanence of the green belt**

Blackwell Farm lies entirely within the green belt and the proposal to develop this site overlooks the two fundamental principles of the green belt: its openness and permanence (NPPF Section 9, Para 79).

**Openness**

The central objective of Green Belt is to protect the openness of land. Blackwell Farm is very open, not concealed discernibly from any direction, except perhaps from behind the railway to the north, and is visible from surrounding areas – notably from the Hog’s Back ridge to the west and to the east (at the Mount – a popular public recreation area). The site therefore performs a significant function in keeping land open.

**Permanence**

Green belt boundaries should be realigned with regard to their permanence. The boundary on this western side of Guildford was moved at the last local plan and to move it again would not be in line with the NPPF (Section 9, para 83).

Following the Public Inquiry into the 2003 Local Plan, the green belt boundary at Manor Farm was rolled back to allow the University of Surrey’s expansion. A sizable area (63.3 hectares) was removed from the green belt and the new boundary (the belt of ancient woodland at Manor Copse and Strawberry Grove) was seen to be “a logical and defensible boundary well related to physical features on the ground and the land form, and it provides for the University’s long term requirements thereby avoiding pressure for further green belt releases in the future.” [Simon Birch, Director of Environmental and Planning Services for Guildford Borough Council, in his evidence to the Public Local Enquiry, para 16.]

The Planning Inspector’s report at the time confirmed this and made clear that this boundary review was for the long term (beyond the plan period):

“...frequent changes affecting the approved Green Belt...

A firm and justified boundary was therefore laid down with a firm statement that it would not be moved again. This substantially reinforces the NPPF ruling that boundaries need to be defensible and permanent [NPPF 9.85].

Furthermore, the University accepted this:

“The CPRE rightly quotes ... that ‘there should be a presumption against frequent changes affecting the approved Green Belt. ’ UniS does not advocate ‘frequent changes’ and fully supports the Borough Council’s proposal in 99U1 to exclude all of the land it requires for its long term expansion. [Tim Hancock, of Terence O’Rourke plc for the University (2.9 of his Supplementary proof in response to CPRE).]

Of all the Green Belt boundaries in Guildford, this one at Manor/Blackwell Farm is unique in having been altered in 2003 after lengthy and detailed examination over two local plan periods. The boundary selected in 2003 was recognised to be defensible – it followed a belt of ancient woodland and a prominent field boundary/ancient hedgerow. It also follows the deer leap, which bounded the 12th century Royal Hunting Ground and has formed the boundary to Guildford since medieval times. This existing boundary, is on raised ground and so provides a natural screen to Guildford town. The new boundary being proposed – a hedgerow further west – lies within a dip. It is therefore not at all defensible and would provide no screening; the development would be clearly visible for miles along the Hog’s Back ridge, blighting...
views from the AONB. Furthermore, the arbitrary nature of this new boundary means there is a clear risk from the proposals of sprawl further west.

The statements made in 2003 about the permanence of the new boundary have been completely ignored by GBC. This is unacceptable and cannot be passed off as new circumstances or previously unforeseeable needs now arising. It is clear that the University has been developing its own plans as if the green belt was not an impediment to its expansion aspirations, contrary to the commitments it gave at the time. Furthermore, its own proposals for future development west of Blackwell Farm at Chalk Pit and Wildfield Farms show quite clearly its casual approach to the impediment of green belt.

Urban sprawl on the western edge of Guildford

Over the last 100 years, extensive development on the west side of Guildford on the northern slopes of the Hog’s Back has made a large impact on the character of this area from what was formerly farmland and parkland. The planned low-density garden village “Onslow Garden Village” (now known as “Onslow Village”) on the site of the medieval Royal Hunting Park was started in the 1920s. The building of the A3 Guildford and Godalming Bypass, which opened to traffic in June 1934, effectively formed the western extent of this development for many years. (Mount Farm, on the higher slopes of the Hog’s Back above Onslow Village was separately acquired to protect the views of the ridge, which formed the southern bound to development.)

Piecemeal development had taken place on the western side of the A3 following the gift of land to the UniS, with the construction of the Royal Surrey Hospital and then the Holiday Inn Hotel alongside the A3 on land that was leased by the University to help finance the construction of the low-density Research Park, which began in the 1980s on the lower slopes.

The Manor Park campus and sports park were given permission in 2003, which was followed by the recently built surface car parks of the Onslow Park and Ride. This low-density expansion of Guildford is bounded on the west by the ancient woodlands at Manor Copse, Strawber-ry Grove and Dean Bottom. The 90m contour also forms the extent of the Manor Park development, which helps form a boundary to development and goes some way to protecting the rural views from the AONB and Blackwell Farm.

A further low-density expansion of Guildford, which “leapfrogs” the ancient woodland and rises above the 90m contour, as now proposed, would be an example of urban sprawl on a massive scale - rather than what is described as “urban extension” in the draft local plan.

Blackwell Farm meets 4 out of 5 purposes of green belt

The Green Belt and Countryside Study carried out by Pegasus is unsound and cannot be relied on as evidence. Although the worst aspects of it were rectified after a Guildford BC Scrutiny Committee meeting with public inputs, it is still a flawed document and does not address the problems highlighted in the report submitted by Tom Stevens, The purpose of Green Belt – Blackwell Farm, in September 2014 in response to the draft Local Plan (see Annex 1). A key problem with the revised Pegasus study is its “green belt sensitivity test”. It amounts to nothing more than a ‘tick-box’ exercise to see how many of the green belt purposes a particular site meets. No consideration is given to how effectively the site meets each function, and no weight is given to any one function above another. In the case of Blackwell Farm, the scoring was incorrect as the site meets all five green belt purposes, and yet is only considered by the Pegasus test to have met three.

Green Belt

- Purpose 1 - to check the unrestricted sprawl of large built-up areas
- Purpose 2 - to prevent neighbouring towns merging into one another
- Purpose 3 - to assist with safeguarding the countryside from encroachment
- Purpose 4 - to preserve the setting and special character of historic towns
- Purpose 5 - assist in urban regeneration, by encouraging the recycling of derelict or other urban land

(Please note that the purposes of Green Belt in this paper have been referred to, and numbered, according to the order they appear in within the NPPF, rather than the numbering adopted by Pegasus.)

Green belt purposes:

Purpose 1. The Blackwell Farm site fulfils the purpose of “checking the unrestricted sprawl of a large urban area” (Clearly the Metropolitan Green Belt refers to the sprawl of London, but the sprawl of Guildford is a significant consideration within that designated area.) Because Blackwell Farm is in the front line of Guildford’s sprawl, it is
achieving this purpose very strongly. There is huge pressure to develop on the western edge of Guildford; the University of Surrey has stated publicly that its key objective is to develop the whole of its landholdings (265 hectares), stretching west to Flexford Farm. This, combined with the indefensible boundary being proposed (a hedgerow rather than the existing belt of ancient woodland), will put more of the green belt and the Surrey Hills Area of Outstanding Natural Beauty (AONB) at risk of future development. The green belt was created to protect this kind of sprawl (ie to prevent Guildford from moving ever westward) and should be allowed to do its job, rather than cave in at the first opportunity to the pressure it was designed to resist.

Purpose 2. to prevent neighbouring towns merging into one another
The Pegasus study considered the merging of communities rather than towns in its study. If we were to assume that Blackwell Farm is an urban extension (as GBC contests), which is joined with Park Barn in the north western corner and with Onslow Village (via Beechcroft Drive) on the south west, then the development would form a bridge between these communities. Furthermore communities at Down Place and Pinks Hill would also be linked up. The extension of the development site westward to bring in Wildfield Farm (just 5 minutes walk from the Wood Street Village Green) also forms coalescence with this community. If the University continues to push for its stated key strategic aim of developing further west to build across its entire landholdings, then communities at Chalkpit Farm and Flexford would also merge within the urban boundary.

Purpose 3. The Blackwell Farm site assists strongly with “safeguarding the Countryside from encroachment” The proposed movement of the green belt boundary on the west of Guildford to allow for development of the University in 2004 resulted in the encroachment on countryside and the loss of working farmland (including some Grade 2) at Manor Farm. The proposed future change in the boundary would result in further encroachment and the loss of farmland, including further Grade 2. The proposed road development with access from the A31 would also effectively cut off farm access to the south of the development area leading to further urban influence on this countryside. The University’s stated key objective is to develop its entire landholding on this western edge of Guildford (including Chalkpit and Wildfield Farms), leading to the risk of further boundary change and further encroachment in future years.

Purpose 4. Blackwell Farm helps to preserve the setting and special character of the historic town of Guildford
It forms the views from the Hog’s Back ridge, which is acknowledged to be an important setting to the town, particularly through sightlines to the Cathedral. The site itself is visible along the ridge, both from the west and the east (the north-easter corner of the site being visible from The Mount – a popular recreation area and viewing platform). Guildford Borough Council’s Landscape Character Assessment makes it clear that the Hog’s Back forms and important setting to the town:

“The steep slopes rising from the River Wey and distinctive elevated ridge landform provides a natural containment for, and backdrop to, the lower lying town centre and allows panoramic views across Guildford, to the Cathedral… To the north the arable slopes north of the A3/A31 provide an important open backdrop to the emerging Manor Park site.” (Landscape Character Assessment, Vol II, Rural Urban Fringe, p37, Jan 2007)

A Landscape Evaluation Study, by landscape architect, Land Management Services, commissioned by three parish councils – Compton, Worplesdon and Wanborough (Annex 2) – confirms that land parcel H2 is “critical to the landscape setting of the chalk ridge” (Hog’s Back Natural Beauty Evaluation, June 2016, p16)

Henry II’s Royal Hunting Park also forms a major feature of Guildford and the historic setting for the town. The deer leap alongside the edge of the hunting park is still visible within the woods that separate Blackwell Farm from the Surrey Research Park as well as the Scheduled Ancient Monument (remains of the Royal Hunting Lodge), which also sit alongside the existing green belt boundary between Manor Park and Blackwell Farm. The field patterns are also influenced by this park and features such as Strawberry Grove on the north east corner of the PDA are clearly marked in historic maps of the town, which date back to when the Royal Park was still in existence.

Purpose 5.
The more effective that parcels of Green Belt are at restricting development, the more likely they are to have an effect in assisting urban regeneration. As Blackwell Farm is close to the urban edge, it has a significant inhibiting effect on development, and because both Blackwell Farm and the land adjacent to it at Manor Park (formerly Manor Farm) are under the control of the University of Surrey, not allowing building at Blackwell Farm would help to discourage the profligate use of land shown recently by the University. The University has 17 hectares of surface car parking that could be...
built over with offices and flats across its estate. This is a more sustainable option than building over open farmland (including grade 2 and 3a) within the green belt. Stopping development on Blackwell Farm would result in the University of Surrey investing in, and regenerating, land in its ownership and delivering its commitments following the 2003 boundary review (including 270 homes for key workers, 3,125 student residences and releasing further accommodation at Hazel Farm).

**How the green belt analysis has been used**

Considering the urban-edge parcels identified by Pegasus in Guildford Borough around Guildford and Tongham, there is just one considered ‘low sensitivity’ (K6) supporting just one of four green belt purposes. There are 11 parcels considered ‘medium sensitivity’ with two purposes supported, and 26 considered ‘high sensitivity’ with three or four purposes supported. Overall, there are 42 parcels around the borough identified as of ‘low sensitivity’, but Pegasus proposed a PDA on only one of them. It proposed PDAs on all or part of six urban edge parcels of ‘medium sensitivity’ and nine of ‘high sensitivity’. The evidence therefore clearly shows that the number of green belt purposes served by parcels has had hardly any effect on the selection of sites around the borough for development. The choice of land for development around Guildford has therefore not been guided by green belt. The whole exercise of looking for plots to release which are least sensitive in green belt terms has been a sham.

Instead, the choice of sites for release has been informed only by traditional planning issues (eg AONB, flood risk, protected wildlife areas, Registered Common Land, MoD land etc) and, to a lesser extent, by environmental capacity.

Although the environmental capacity assessments have considered some relevant issues, they have ignored other important ones, such as development in the setting of the AONB and visual impact. The conclusions of GBC’s Landscape Character Assessment (LCA), which forms part of the evidence base, have been largely ignored, and this is evident in relation to Blackwell Farm, where the LCA is very clear that the views from the Hog’s Back ridge should be conserved:

“The Hog’s Back Chalk Ridge landscape should be conserved, in particular the open nature of the landscape which forms a backdrop to the surrounding rural areas and Guildford, the wide and far ranging views from the many viewpoints along the ridge line and the sparse settlement pattern of traditional style and local materials. The intact large scale geometric field pattern and hedgerow boundaries and hedgerow trees should be conserved while there is potential to enhance and reinforce some of the hedgerows.” [Landscape Character Assessment (Chalk Ridge), 2007 p41]

In putting forward PDAs, GBC considers only landscape value (which is not the same thing as landscape character) and this is addressed only in terms of landscape designations. Furthermore, the protection of ancient woodland has been given little weight in that, even though such woodlands are not proposed to be removed, they would in some cases be severely compromised by development around them. The ancient woodland at Strawberry Grove/Manor Copse, for example, would be completely encircled should the proposed Blackwell Farm development go ahead, and a large road would pass through, or very close, to it. The ancient woodland at Wildfield Copse would also be harmed. The weight that is given to the various environmental capacity elements other than the absolute constraints is unclear, but appears to be only slightly above zero.

An additional round of evaluation has taken place in the form of a ‘sustainability assessment’. This scores urban edge sites that come through the environmental capacity assessment free of absolute constraints. This last assessment is purely on grounds of walking distance to a selection of nine facilities. There are some oddities in this: the most obvious point of ‘walking distance to a bus stop’ has been omitted on the dubious grounds that everywhere will be served by buses, but the nearly-pointless ‘walking distance to an A-road’ remains in the mix. The 16 sites assessed are rated from zero to 3 according to distances to be walked to nine facilities. The distances at which cut-offs between the rating-points occur varies from one facility to another, so there is some ranking of importance in this part of the process. The scores are then added up (ie each of the nine facilities has equal weight in this part of the exercise), with the highest number the most sustainable. The scores are then listed in descending order. Parcel H2 (Blackwell Farm) is ranked 14 overall, in other words it is one of the least sustainable sites, yet it has been put forward for development. Despite the work which went into the sustainability assessment, no use appears to have been made of it in the selection of PDAs. It is therefore unclear what the purpose was of the whole exercise.
Conclusion
The treatment of green belt in the choice of allocation sites is unacceptable. Despite going through the motions of carrying out a green belt review, the Council has selected sites for allocation for development irrespective of green belt constraints. Urban-edge sites have been chosen as if the green belt constraint did not exist at all. On not a single occasion is a green belt site retained free of development ‘because it significantly fulfils green belt purposes’. Nor is a green belt site released ‘because it has little benefit in fulfilling green belt purposes’. The green belt analysis has therefore been entirely misleading. Site selection has instead been on the basis of the Council’s selected planning preferences. The absence of actual attention to green belt constraint has played down the highly significant contribution of sites, such as H2 (Blackwell Farm), to green belt purposes, even though this should have been a fundamental consideration shaping the town’s development.

AONB

The Blackwell Farm development would result in harm to the setting of the Surrey Hills Area of Outstanding Natural Beauty (AONB), harm to an Area of Great Landscape Value (AGLV), and harm to the AONB itself.

Harm to the AONB setting
Blackwell Farm forms part of the views into and out of the Hogs Back ridge, which is an iconic landscape feature well known in the region. The ridge is located on the northern edge of the Surrey Hills AONB and, because of its elevated position, provides dramatic views over a long distance. The proposed large-scale development at Blackwell Farm would be clearly visible from many points along the ridge, thereby blighting the setting of the AONB.

In addition to the ridge itself, there would be an impact at the very least on two footpaths, one bridleway and three further access roads (unclassified), all of which come off the A31 on the north side of the Hogs Back in, or adjacent to, the AONB, from which the setting would be a consideration. There would also be an impact on views from the train on the North Downs Line between Reading and Gatwick.

The setting today for the AONB at Blackwell Farm includes a locally designated Area of Great Landscape Value and is arguably more beautiful than other areas within the AONB because the topography results in panoramic views over a great distance. If the planned development goes ahead, then the AONB will be seen by thousands of people in cars entering and leaving the housing estate – but the setting and views of the AONB that they would experience would be in marked contrast to those enjoyed by people today. It seems perverse to argue that developing a site would cause only slight harm because the AONB is not visible from a wide number of public locations, and then to open it up to much wider viewing by the public (through road and house building), but to destroy the beauty of the landscape in the process.

It is worth noting that the Government has, in its March 2014 National Planning Practice Guidance on Natural Environment – Landscape, emphasised the importance of protecting the setting of AONBs and National Parks. This affects proposals on land outside an AONB that might adversely affect its setting.

It states that under Section 85 of the Countryside and Rights of Way (CROW) Act 2000, “relevant authorities” are required in “exercising or performing any functions in relation to, or so as to affect land “ in an AONB to “have regard” to their purposes. It goes on to state:

“The duty is relevant in considering development proposals that are situated outside National Park or Area of Outstanding Natural Beauty boundaries, but which have an impact on the setting of, and implementation of, the statutory purposes of these protected areas.”

Harm to potential future AONB
Natural England has identified the Surrey Hills as one of only two AONBs in the country where a boundary review will be considered, and has agreed to support the process of evidence gathering to inform this process.

A new piece of evidence related to this review - an independent Landscape Evaluation Study by Land Management Services – was published in June 2016 and puts forward a strong case for including most of Blackwell Farm and its surrounding area within the revised AONB boundary. (See Annex 2.)

The study was commissioned by Worplesdon, Compton and Wanborough Parish Councils when it was realised that Surrey County Council’s evaluation of the land on the northern slopes of the Hog’s Back (by consultant Hankinson and Duckett),
had omitted Blackwell Farm from consideration and assessment. The Hankinson and Duckett evaluation had been funded by the Surrey Hills AONB Board as part of the AONB review process. This omission was despite a study by Alison Farmer Associates just a year earlier (in Jan 2012), which had recommended the area as meriting assessment. The Alison Farmer study, also commissioned by SCC, used up-to-date criteria, based on boundary reviews of the New Forest and South Downs National Parks. This map shows the area identified by Alison Farmer Associates for assessment.

It seems remarkable that Blackwell Farm should have been excluded from the Hankinson and Duckett evaluation, particularly given the strength of the arguments for including the area in the AONB that Land Management Services (LMS) has put forward in its report. LMS concludes:

“Land to the south and east of Wildfield Copse, in the vicinity of Down Place and Blackwell Farm (sub character areas 3 and 4) is of a landscape and scenic quality, character and condition which should merit inclusion within a revised AONB boundary… This landscape is therefore considered integral to the AONB and critical to the conservation of rural views to the north of equal, if not greater importance, to land to the west of Down Place included in Area 12-1.” (Section 6, p23.)

The fact that the H2 included an AGLV and that Surrey County Council’s and Guildford Borough Council’s own landscape character assessments also highlighted the scenic quality of this area, makes the omission even more striking:

“The Hog’s Back has a vital role in providing a dramatic landscape setting to Guildford” [Landscape Character Assessment, Vol II, Rural Urban Fringe, p37, Jan 2007]

It is also strange that the AONB boundary selected by SCC/Surrey Hills AONB Board for Area 12-1 follows a rather arbitrary line. As the LMS Study states:

“The proposed boundary to Area 12-1 between Misley Copse and Down Place and between Down Place and the current AONB boundary does not follow any defined land-scape features (such as a ridge line, wood-land edges, or prominent field boundary) or reflect a decline in landscape and scenic quality or changes in landscape character (for instance increased urban influences) which might justify exclusion.” (Section 6. p23)

The Surrey Hills AONB Planning Advisor Clive Smith, in writing to the Surrey Hills AONB Board on 25th June 2013, appears to have made the same observation. He states, “the proposed boundaries do appear in places tortuous and perhaps pedantic and the consideration of scale of landscape perhaps should be consid-ered.” Mr Smith also highlighted that Natural England had advised “that boundaries should follow clear physical features such as settlement boundaries and roads”. (See Annex 3.)

Perhaps a clue as why Surrey CC/Surrey Hills AONB Board did not opt for a more robust boundary (instead selecting one which in plac-es runs through the middle of a field) and why there was no AONB evaluation of the land at Blackwell Farm lies in this extract from a report by Surrey Hills AONB Board Director Rob Fairbanks:

“The Surrey Hills Board has established that there is a high level of support for a boundary modification among local authorities, including parish councils, although concerns have been raised by Waverley and Guildford regarding the potential implication that the evaluation process and areas identified for evaluation may have on their emerging Core Strategies. As a re-sult, it is important that all the local authorities on the AONB Board will be involved on any project steering group and the AONB partners will be made aware of the sensitive nature of the work.” – item 7 (Annex 4).

This begs the question: why do the local authorities need to be on the steering group for this project? – determining whether landscape is of AONB quality should be a purely technical exercise.

As most of land parcel H2 has been identified as an evaluation area for the forthcoming AONB boundary review, it is reasonable that GBC should treat it as though it is within the AONB during this local planning process. The field in the north eastern corner, adjacent to Chapel House Farm, which was not considered in the LMS Study to meet the criteria for AONB, should be retained, as an “important buffer and transitional landscape on the west-ern edge of Guildford” as recommended by LMS (Hogs Back Natural Beauty Evaluation, June 2016, p19.)

Harm to the AONB

The proposed access road to the new development, link-ing the site to the A31 in the south and to Gill Avenue in the north, would pass through the existing AONB, cre-ating a large scar across the northern slopes of the ridge, and bisecting a tree-
tunnelled, 18th century parkland drive – an attractive feature of the AONB. The road would carry two lanes of traffic and
would involve a complex junction on the ridge, with substantial environmental consequences (and cost). The lighting
associated with such an junction would also have an impact on the AONB for miles around.

The NPPF is clear that AONBs should be afforded the highest level of protection in relation to landscape and scenic
beauty. All development proposals within and ad-jacent to the AONB must conserve or enhance its special qualities. The
NPPF also makes it clear that applications for major development in the AONB will be refused unless exceptional
circumstances are demonstrated and the development is proven to be in the public’s interest (Section 1, Para 116).

Guildford Borough Council has not demonstrated that the proposed housing development or the extension of the Research
Park, or the proposed link road from the A31 to Gill Avenue, is in the wider public interest. Indeed, the increased traffic
through the already congested Egerton Road/Gill Avenue junction, which would result from the development, would
impede emergency vehicles travel-ling to the Hospital and this would be very much against public interest. It would also
impede commuter traffic travelling to the Hospital and Research Park (to major centres of employment) from the east.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Exceptional circumstances

Although the Council does not cite any exceptional circumstances that would offset harm to the AONB within the Local
Plan or its supporting evidence, Council Leader Paul Spooner has put forward a number of benefits that he considers the
development would deliver. These were outlined in his answer to my question to the Council Executive Committee on May
11, 2016 (See http://www2.guildford.gov.uk/councilmeetings/documents/b1616/
Supplementary%20Information%20Sheet%2011th-May-2016%20Executive.pdf?T=9) and include:

1. Provision of the access road through the site, which will provide an alternative route into Surrey Research Park
and the Royal Surrey County Hospital from the west via the A31 and relieve pressure on the A3 and Egerton
Road.
2. Provision of on-site infrastructure, including traveller pitches, a new local centre with associated community and
retail uses, a primary school, part of the Sus-tainable Movement Corridor linking the site to the town centre and
beyond, Suitable Alternative Natural Greenspace (SANG) and other open space.
3. A significant expansion of the Surrey Research Park, which will enable Guildford to build on its knowl-edge-
based industry, which is of regional significance.
4. Provide enhanced justification to Government for a new Guildford West railway station as there will be a better
business case with the additional employment and residential demand.

I have outlined below why I do not believe that any of these “benefits”, either alone or collectively, can be considered
“exceptional” enough to justify:
• taking 78 Ha out of green belt
• harming the AONB and its setting
• threatening further areas of green belt and AONB in future years.

Provision of an alternative route to the Surrey Research Park and Hospital
See Section 3 (Viability)

Provision of on-site infrastructure,
Cllr Spooner cites the provision of a range of infrastructure as a benefit to the site and the existing community. This includes:

- traveller pitches,
- a new local centre with associated community and retail uses,
- a primary school,
- part of the Sustainable Movement Corridor linking the site to the town centre and beyond,
- Suitable Alternative Natural Greenspace (SANG) and other open space.

Traveller pitches
From an infrastructure point of view, this site offers no particular benefit as a location for traveller pitches. As stated earlier, Blackwell Farm is in a rural location, disconnected from the fabric of the town, and has no sewerage or gas infrastructure, no schools etc. Furthermore, the requirement for traveller pitches can be met in other locations, which

- are not performing the functions of green belt so strongly
- do not form the setting to the AONB
- have not been identified as a potential candidate area for inclusion within the revised Surrey Hills AONB boundary
- do not require a new road and 4-way junction to be built in the AONB.

The provision of traveller pitches, therefore, does not form an “exceptional” circumstance

New local centre with associated community and retail uses
Any new local centre at this location would be of benefit only to those people living in the proposed new Blackwell Farm housing development (not the existing community). If 1,800 houses were not located at Blackwell Farm, then there would be no need for this facility. It is therefore, not, in itself, an “exceptional circumstance” for building in the green belt and developing the AONB.

Primary school
A new primary school, like the local centre, would be provided largely to serve the proposed new community at Blackwell Farm. There are already four junior schools serving this west side of Guildford, three of which are within a two-mile radius of Blackwell Farm – Guildford Grove School (1.1 miles away), Queen Eleanor’s C of E (aided) School, (1.3 miles away), St Joseph’s Catholic Primary School (1.7 miles away). If there is a need for additional school places to serve the existing community, these could be provided as part of Guildford Grove School on the existing King’s College School campus. King’s College is currently 57% undersubscribed.

Although King’s College is a high school, it is adjacent to the Grove School and could easily offer additional class-rooms to its neighbouring junior school if these were needed. Even if the under-utilised classrooms at King’s College were not deemed suitable, the campus itself is very large (see image above right) and there is plenty of space for Grove School to expand. There would be no significant loss of playing fields, and in any case the University-owned Surrey Sports Park, with its many playing fields, is only a 13 minute walk from the school, and a 3 minute drive away (without traffic). GBC does not seem to have explored these alternatives at all, and instead has chosen to site a new school at Blackwell Farm in the green belt (within the setting to the AONB).

The provision of a school is not an “exceptional circumstance” for building in this environmentally sensitive area. There are other, more appropriate, locations for a new school – locations that are not served as well by existing schools, and which would result in fewer peak-hour traffic movements (as children would be travelling shorter distances to go to school). This would be a more sensible option than bringing more peak-hour traffic into this already congested area.
Sustainable Movement Corridor
The Sustainable Movement Corridor is described in the draft Local Plan as “providing a priority route for buses, pedestrians and cyclists through the Guildford Urban area and serving new communities at Blackwell Farm, Gos-den Hill Farm and Slyfield Area Regeneration Project”. Beyond this, no further detail is given, other than that the Corridor is estimated to cost between £80-90 million and that this cost would be shared between the developer and the Local Growth Fund (via the Local Enterprise Partner-ship). No economic viability assessment for the scheme is provided, and there is no account of how the road net-work would be used or how proposed bus service would be funded going forwards (especially relevant in a climate where Surrey County Council is cutting back on its public transport budget).

Aside from the question of its economic viability, the provision of the Sustainable Movement Corridor is not dependent on the Blackwell Farm development going ahead in any way other than, perhaps, through the fund-ing that would be provided by the University. Allowing development in exchange for funding for infrastructure does not form an “exceptional circumstance” for building in the green belt and in the AONB setting. If this were to be the case, a developer need only offer to pay for a school or road, and it would be given carte blanche to build anywhere.

SANG and other open space
The final on-site benefit Cllr Spooner cites is the provision of SANG and other open space.

SANG - The University has confirmed at a stakeholder meeting held in March 2015 that it would only provide SANG to mitigate against development on its own land-holdings; it would not offer SANG to unlock housing elsewhere. It seems perverse to argue that SANG is a benefit to the wider community because it enables land in the green belt and AONB to be developed.

The submission draft of the Local Plan does not identify which area of Blackwell Farm will be allocated as SANG on Blackwell Farm. In a previous (Regulation 18) draft of the Local Plan, the ancient woodland at Manor Copse/Strawberry Grove was allocated for this purpose. Natu-ral England has stated that the identification of SANGs should “seek to avoid sites of high nature conservation value”, such as ancient woodland, which are likely to be damaged by increased visitor numbers. [Natural England Guidelines for the creation of Suitable Accessible Natural Green Space (SANGS) Introduction 12-06-08]

Open space - The land at Blackwell Farm is already en-joyed by the residents of the surrounding communities of Park Barn, Wood Street Village, Onslow Village, Down Place and Flexford, who walk along the public/permissive footpaths and bridleway that cross the site. [Footnote 1] It is difficult to see what benefit developing 78 hectares of this farmland would bring to these residents.

Furthermore, the University has already promised to open up Blackwell Farm for “informal recreation”. In the run up to the 2003 Local Plan, in order to allay fears at the time that the boundary review at Manor Farm signalled further loss of green belt at the adjacent Blackwell Farm, the University stated:

“The University has no plans for the development of its adjoining land at Blackwell Farm. In partnership with the Borough Council, the University intends to explore how the woodland and adjoining land at Blackwell Farm could be opened up to the public for informal rec-reation and link to existing areas of open space. Access would be gained via existing public footpaths crossing the site.” [Surrey Matters (University of Surrey news-letter), published in January 1998]

This intention was also included in GBC’s Local Plan 2003:

“The University has indicated that they...would like to explore how best appropriate parts of its Blackwell Farm lands might be further opened up to the com-munity (including the possibility of a country park).” (16.26)

The University has done nothing to honour this commit-ment - erecting signs that discouraged use of Blackwell Farm and allowing the rides through the ancient wood-land to become impassable. These signs remained in place until June 2015, when new signs appeared.

Given that the University has already committed to pro-vide this informal recreation space at Blackwell Farm (and reneged on it), there can be little benefit to the community receiving the same (potentially empty) promise again.
The research park is a low density development and there is great potential to increase capacity on this site - without having to expand onto Blackwell Farm next door.

Expansion of the Research Park
Cllr Spooner writes in response to my formal question to the Council Executive:

“A particular benefit of allocating Blackwell Farm is that it enables an extension to the Surrey Research Park, which is key to meeting our objectively assessed need. It is also a unique opportunity that enables us to build on knowledge-based employment that is of regional significance. This type of specialist employment could not be provided elsewhere in the borough.” [Supplementary Information Sheet, Guildford Borough Council Exec Meeting, May 11, 2016]

This “particular benefit” of allocating Blackwell Farm therefore seems to hinge on two arguments:

- Extension to the Surrey Research Park is key to meeting GBC’s objectively assessed need
- The opportunity to build on Guildford’s knowledge-based employment is unique to the Research Park and cannot be provided elsewhere in the borough

Both these arguments can be challenged, firstly:

- There is no need to extend the Research Park in order to meet GBC’s objectively assessed need because there is enough space on the existing footprint of the Research Park to meet the likely growth in the research and development (R&D) sector.
- There is already granted consent to expand by a further 9,000 square metres (14%). This space has been available for 10 years and is still to find a taker. It would appear from GBC’s own analysis that this would be sufficient to meet the demand for floor space in this sector. Guildford Borough’s Economic Land Needs Assessment (ELNA 2015), gives an annual floor space demand of 0.7% for office/research and development (Table 6-4 PMA Floorspace Growth Forecast CAGR). The necessary growth in floor space over the plan period is therefore 12% (17 years x 0.7%), which is less than the current expansion space of 14%.
- Even if growth in the R&D sector were to exceed that forecast in the ELNA, the existing Research Park has been built at a very low density. It provides just 65,000m² of office space on 27 hectares of land. There is scope to use this land more efficiently by building additional office space above the surface car parks, and by introducing mixed-use development across the site (so the area can be used for 24 hours a day, rather than just during office hours). Building at the same plot-ratio as the approved Master Plan for Manor Park would provide six times the office accommodation on the Research Park than exists at present. With better design on its existing brownfield estate, the University has the room to grow for the next 100 years without taking more greenfield land out of green belt.

Secondly, it is not true that the Surrey Research Park is unique in providing knowledge-based employment and that this type of employment cannot be provided elsewhere in the borough:

Policy E4 states: “The existing 28 hectare Surrey Research Park and the proposed extension will be protected for business use comprising offices, research, development and design activities, in any science, including social science, falling within Use Classes B1 (a), (b) and (c) of the Town and Country Planning (use Classes) Order 1987 (as amended), that is complementary to the activities of the University of Surrey.”

The inclusion of B1c uses (light industrial) will mean that the Surrey Research Park would lose its status as a “research park” and become no different to any business park across the borough; it certainly would not be “unique” as a centre for knowledge-based industry.

Knowledge-based businesses are already located in other areas of the borough, for example EA Games is situated in the town centre (Onslow Street), and advertises itself as “a 5 minute walk from the main train station and only minutes away from the town’s main shops, restaurants and bars”.

There is no evidence to suggest that businesses prefer out-of-town locations, in fact the ELNA suggests that the opposite is the case.
“Where sites are available the Council could seek to encourage office/R&D development in town centres. The town centre is a more sustainable location and there is evidence of demand from potential occupiers which currently do not necessarily have town centre offices that match their needs.” (ELNA, 7.3.2)

The University has argued that an important factor in attracting knowledge-based businesses to the Research Park is the proximity to, and contacts with, the University.

However, a survey conducted by the University in 2002 showed that less than half of the companies on the site (27 out of 46) believed this factor was of “weak or no influence”, and only 6 cited it as the “most important” factor.

The same survey also showed that links with other tenants on the Research Park was of even less importance (39 out of 46 said it was of “weak or no influence” and none felt it was the “most important” location factor). [See Annex 6 “A Vision of the future of Science Parks” para 28, by Dr Malcolm Parry, Managing Director, Surrey Research Park and University Planning Officer, 2002]. Based on this survey, it would appear that the Research Park offers little additional benefit to knowledge-based companies over other locations. In fact, the survey showed that the most influential factor attracting businesses was Guildford’s close proximity to international airports, road and rail links, which is applicable to locations almost anywhere in the borough.

Even if proximity to the University were considered essential to the growth of this business sector, Blackwell Farm would not be the best location to offer this. There are many sites in the urban centre much nearer to the University campus at Stag Hill, than this one. Manor Park is home only to the recently built Vet School.

Provide enhanced justification to Government for a new Guildford West railway station

As Cllr Spooner acknowledges, the business case for the new Guildford West station has not been proven. It also does not appear that the traffic impact of the new station has been looked at in any detail, as a rail halt at this location might bring more commuter traffic to this heavily congested area. Certainly the proposed station has not yet been assessed by Network Rail from an engineering or economic point of view, as a Freedom of Information request reveals:

“We understand that the Council has engaged a consultant to produce a GRIP 2 study to further investigate the feasibility of a station called Guildford West (previously known as Park Barn). We intend to review the study once it has finished and provide feedback from a railway perspective.”

Even if the new rail halt were to be considered viable from an engineering point of view (and GBC planners have acknowledged that there are likely to be problems with gradients at this location), it does not seem right that GBC should be ‘manufacturing’ an economic case for the station by proposing more housing and employment land in the vicinity. This certainly does not seem to be an ‘exceptional circumstance’ for building in the green belt within the AONB setting.

Conclusion

Blackwell Farm is the only major development being put forward in the Local Plan that will impact on the AONB and the setting of the AONB. In law, AONBs should be given the “highest level of protection”. We do not believe that GBC has given due consideration to the AONB; but rather has ignored this constraint entirely, and so the Plan is unsound in this regard.

The Council has not even cited the exceptional circumstances for development on Blackwell Farm, so it is impossible for the public to weigh up these against the harm to the AONB, when being consulted on the Plan. Rather than protecting this area of high quality landscape, Surrey CC and Guildford Borough Council almost seem to be covering up the fact of its beauty by excluding it from proper landscape assessment and by misleading the public into believing that it is a site within the “Guildford Urban Area” respectively.

Viability

The provision of an alternative route to the Surrey Research Park and Hospital, which Cllr Spooner has de-scribed as the “main benefit” to the community of developing Blackwell Farm, is not outlined in any detail. Whilst this alternative route might be a benefit to the owner of the Research Park (through its ability to charge higher rates for the office space) and to some businesses on the Park (by attracting more staff from the west), the greatest community benefits would be to those staff members who might be living on the west of the borough who would use the new route to access their place of work without having to join the increased queues at Gill Avenue and the Tesco roundabout. However the net benefit does not
appear to have been assessed (which needs to consider increased journey time for any workers who would be accessing the site from other parts of Guildford (via Gill Avenue/Tesco roundabout) from the east and the net community benefit could easily be negative as a result of this new development.

Furthermore, from information provided in the Plan and in the supporting Transport Assessment, and from communications with Surrey County Council’s Transport Development Planning Manager West, Mike Green (see Annex 7), it seems that the new road depends on the following 4 schemes:

1. A new signalised all-ways junction on the A31
2. A tortuous road through the new development (to deter rat running) and possibly a secondary route with restricted access, possibly controlled by automatic number plate recognition (ANPR)
3. Changes to the Tesco roundabout on Gill Avenue
4. Widening of the A3

The viability of implementing these 4 schemes is covered in the Technical Note prepared by traffic consultant RGP and commissioned jointly by Compton PC and Compton Village Association (Annex 8). However, at least three of these schemes are fraught with difficulties that make it questionable, from a highways point of view, whether they could be delivered at all.

1. It is not certain that a signalised all-ways junction would be adequate to cope with the volume of traffic that would use the new route. This is the conclusion reached in RGP’s Technical Note. Surrey County Council acknowledges that a roundabout on the A31 further west would be a better option in highways terms, and indeed a roundabout further west was the option of choice put forward by the University when it first outlined its plans for Blackwell Farm to the Guildford Society on February 18, 2014. Guildford Borough Council has since stated that a roundabout would be unacceptable in terms of impact on the AONB and traffic. The Council has failed to provide any details of route options studies taken for this access, despite repeated requests (see Annex 9) and despite Surrey County Council stating that such studies were undertaken by Guildford Borough Council and are in the public domain. Even if a signalised junction were to prove adequate, RGP points out that this would require four lanes of traffic, and that in order to accommodate this, the bridge over the A3 would need to be widened, adding significantly to the overall cost of the scheme and casting doubt on its economic viability.

2. Taking traffic on a tortuous route through a residential estate simply to deter rat running is neither sustainable nor safe, and such a route would not be suitable for use by emergency vehicles from the hospital, which often need to travel at speed. The roads through the Manor Park Campus and the Research Park were not designed for a large volume of traffic. Indeed, Manor Park was promised by the University as a “world class car-free campus” so putting a major highway through it would mean another broken commitment.

The Manor Farm Master Plan (2003) also makes it clear that this was to be “a sustainable and predominantly car-free campus, with the objective of restricting net increase in car travel to less than 5% of the University’s current and committed traffic generation (including the Surrey Research Park) measured at peak times.” (Section 5.1)

The road would also have to pass through, or very close to, a belt of ancient woodland. Given that commuters to Guildford from the west would be feeding into the existing bottleneck at Egerton Road/Gill Avenue, traffic is likely to be at a standstill during peak hours and this will create further problems for residents, students and the ancient woodland in terms of pollution.

ANPR would be fraught with difficulties – legal and administrative. What about visitors choosing to leave by the opposite route or delivery vehicles continuing through the site and out the other side? How would GBC keep up with changes in residents’/employees’ vehicles and who profits from fines or bears any losses? This whole idea smacks of “clutching at straws” and does not appear to have been thought through.

1. The Strategic Highway Assessment (June 2016) mentions “improvements to the Tesco and Cathedral junction” (3.2.1), but no further illustration or explanation of these improvements is given. Again, GBC has ignored repeated requests to have these modifications explained. What is made clear, however, is that these “improvements”, whilst they might alleviate traffic on the A3, would not mitigate against the volume of traffic generated by the new development at Blackwell Farm, and that this would impact on the Egerton Road/Gill Avenue junction.
“although there is a proposal to improve it [Tesco Junction], the additional access to and from the Blackwell Farm development via Gill Avenue results in a significant increase in trips on this part of the network. This is, in turn, impacting on junctions for which there are no schemes proposed at the moment, highlighting where additional improvements may be necessary. An example of this is the Egerton Road/Gill Avenue junction adjacent to the Royal Surrey County Hospital.”

(14.9.5)

It is not clear what improvement could be made to increase capacity at this junction: Gill Avenue has already been widened and widening Egerton Road would involve widening the road bridge over the railway line, for which no funding has been allocated.

Additional traffic at this junction could potentially impede access/egress from the A&E unit, which was identified as a problem by the Inspector at the 2003 Local Plan Inquiry. He recommended a cap of 5% on traffic generated by the Manor Farm site.

The Inspector’s Report states, “As a safeguard, it is implicit in the agreement that if the 5% ceiling cannot be achieved, the scale of development would also need to be limited.” The University’s latest survey shows that overall traffic with permissions already granted would exceed the 5% cap. The University consultant (PBA) has fudged the figures by removing buses and construction vehicles. Even had the cap not been breached, it would certainly be once the cars from 1,800 homes, an extended business park, a school, a supermarket and a new station are added to the mix. Further-more, the change from B1a (offices) to B1c (light industrial) may mean that more HGVs use this route, which could add to problems at this junction as well as on the business park and student campus – neither of which were designed for this type of traffic.

The Blackwell Farm development is dependent on Highways England committing to widening of the A3 between the A31 and A320. To date, HE has not told Guildford Borough Council what it plans to do, and adding a lane along this stretch is not straightforward because, as Neil Taylor (Director of Development at Guildford Borough Council) has pointed out, it is a “tight squeeze”. Putting forward a site without any tangible commitment from HE to provide the infrastructure necessary for sustainable delivery goes against Government policy (NPPF Section 6; para 47).

In addition to the difficulties in providing access to this proposed site from a highways point of view, it would appear that the new access road is unlikely to be economically viable either. The Technical Note produced by RGP indicates that the costs involved (£50-60m) have been grossly underestimated, and that they would not justify a 1,800 home development. In addition to the cost of road infrastructure, there are other infrastructure costs, eg:

- Suds (or reservoirs) to prevent surface water run-off flooding residential areas further north, eg at Wood Street Village. During heavy rainfall there would be 3.89 million gallons of water running off the Hog’s Back (based on one inch per hour, and one inch on one acre = 22,000 gallons). This would require at least two suds to release flows at a controlled rate, one of which would ideally need to be located in the area allocated for the Research Park extension (due to topography)
- A primary school
- Sewerage - 1,800 homes would produce 300,000 gallons of sewage per day. It is not explained in the Plan where this sewage would be treated. If it were directed to the Hockford sewage treatment works at Pirbright, this would mean building new trunk sewers across Broadstreet Common, as the existing sewers are already overloaded. Similarly, directing the sewage to the relocated treatment works in Slyfield would involve building new trunk sewers. Both options would likely require a new pumping station on the site
- Construction costs. These are likely to be unusually high - Blackwell Farm is situated where clay is next to chalk and this can lead to instability and subsidence. The whole area already suffers subsidence problems – it was the reason the former Vice Chancellor Professor Snowden cited for vacating his official residence at Blackwell Farm. It may also have been the reason why UniS demolished the halls of residence (Stag Hill is also on clay).

To mitigate against this, deeper foundations would be required, adding to building costs. The whole area is also subject to high levels of radon and houses located here may require remedial ventilation, again pushing up the costs.

Given all the above factors, it seems highly unlikely that the developer would be able to provide a significant proportion of affordable houses on the Blackwell Farm site.
Conclusion
Aside from environmental and landscape considerations – ie the loss of important and effective green belt and harm to the AONB and its setting – there are clearly significant infrastructure problems to be overcome before this site could be allocated in the Local Plan. The site infrastructure is not deliverable within the budget outlined in the Plan, which is already well above what would be expected for a development of this size. More worrying, perhaps, is that development here would exacerbate existing problems on the road network, and at the north east end of the site it would impede access to the hospital’s A&E department and a major incident unit. There is a sense that this site has been thrown into the mix simply to keep the University happy, with the intention of resolving the infrastructure/access problems down the line (at the planning application stage). This approach to plan making is far from sound, and proposals mentioned by Surrey County Highways and the University to introduce tortuous routes and Automatic Number Plate Recognition are unsustainable and unrealistic. If GBC has to resort to such measures to try to make the access work, then clearly a large-scale development at Blackwell Farm is in the wrong location.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Rather than conducting this consultation in the spirit of openness and fairness, GBC appears to be bending the facts to meet its own agenda, which includes plans to develop Blackwell Farm. Most notable examples of this are:

- The description of Blackwell Farm as within the “Guildford Urban Area” when it clearly is not
- The description of Blackwell Farm as an “urban extension” and the doctoring of maps to remove belts of woodland to make the site look as though it is adjacent to the Research Park.
- Telling the public that the Plan has no development within the AGLV and AONB, when the Blackwell Farm development and associated infrastructure falls within both these land designations.
- The video, which appears prominently on the Local Plan web page, originally purporting to reflect “the views of local people” (later changed to “some local people”). This video is unbalanced and unrepresentative. More than 7,000 people responded to the last consultation on the draft Local Plan and it was widely accepted that the vast majority of these objected to it. Yet we did not hear a single voice of dissent in this video.
- Questions from some Councillors to public speakers in the chamber have shown a clear bias towards development of Blackwell Farm.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
- Expansion of the Research Park onto green belt and the setting to the AONB requires exceptional circumstances, which have not been outlined in the plan. This policy does not therefore comply with planning law.

- There is ample opportunity for the Research Park to grow without increasing its existing footprint - there is already capacity for the growth predicted in the ELNA and, if further growth were needed, it could build more densely by utilising space above its extensive surface car parks.

- Expansion of the Research Park at Blackwell Farm is not sound as there is no viable access to Blackwell Farm, and it would not be possible to provide such an access that was viable from an economic or highways point of view.

- GBC has shown no Duty to cooperate in planning for an extension of the Research Park.

- GBC has not explored in detail any joined-up approaches to providing employment land across the region, dismissing off-hand such ideas on the basis that “we don’t want Guildford to be a dormitory town”. [Stephen Mansbridge, April 1, 2014].

In particular GBC is ignoring Bordon Eco-town, a brownfield site outside the Green Belt, which is less than 30 minutes from Guildford by road, and is looking for high quality businesses to locate there. This is exactly the right area for expansion of some of Guildford's businesses (particularly those on the Research Park).

There is also opportunity to develop rail links using existing lines and disused MOD lines.

In the Whitehill and Bordon Inward Investment Strategy 2012 Consultation Draft the masterplan recognises that “the town does not operate in isolation of its neighbouring business centres, such as Alton, Petersfield and Farnham and larger economic centres such as Portsmouth, Farnborough, Basingstoke and Guildford.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

No I do not agree that the evidence used for the Submission draft of the Local Plan Strategy and Sites is adequate or relevant. The Strategic Housing Market Assessment (SHMA), the Strategic Highways Assessment Report (SHAR), the Sustainability Appraisal and the Green Belt and Countryside Study (GB&CS) are all either flawed, provide incomplete information or information that is not properly used to inform the Plan.

SHMA - I support the commentary on the SHMA provided by Neil Taylor (on behalf of the Guildford Residents Association) and Richard Bate (on behalf of CPRE). Furthermore, I do not believe that residents are being consulted properly on Plan when they have no means of understanding how the objectively assessed housing need has been derived. Without the ability to check this figure (and without any assurance that councillors have scrutinised this), it is impossible to know how many sites are required to meet the borough’s need.

SHAR - The SHAR is very thin on detail. There is no clear indication of how junctions will operate (eg the proposed 4-way junction at the top of the Farnham Road (on the A31)), or which routes new roads will take (eg the proposed link road from the A31 to Gill Avenue). No details are provided about how schemes have been costed (eg the A31-Gill Ave link road and the Sustainable Movement Corridor) or about what other alternatives have been considered and why they were ruled out. I fully support the commentary in the Technical Note by traffic consultant RGP on the proposed access to site A26 (Blackwell Farm), which was commissioned by Compton Parish Council.

Sustainability Appraisal - This appraisal appears to be based purely on grounds of walking distance to a selection of nine facilities. Even within this limited appraisal, there are some oddities: the most obvious point of ‘walking distance to a bus stop’ has been omitted on the dubious grounds that everywhere will be served by buses, but the nearly-pointless ‘walking distance to an A-road’ remains in the mix. It isn't clear how the Sustainability Appraisal is being used to inform site selection decisions. Parcel H2 (Blackwell Farm) is ranked 14 overall, in other words it is one of the least sustainable sites, yet it has been put forward for development.

Green Belt and Countryside Study - This study is inconsistent and flawed in its analysis. The sensitivity test it uses for determining how effectively a particular site meets green-belt purposes is simply to count how many of the purposes are met. This is too simplistic and gives little consideration to how well a particular function is met. The study also fails to take into account landscape character or environmental factors such as ancient woodland or the setting to the AONB.

The comments made by a member of Save Hogs Back at the Regulation 18 consultation were ignored.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)
I do not consider that the Plan is legally compliant because huge areas have been taken out of green belt for development

- without any exceptional circumstances being put forward to justify this
- without any exceptional circumstances being put forward for a major road through the AONB or a major settlement in the setting to the AONB
- without proper constraints being applied (in terms of landscape designations or lack of infrastructure)
- without proper consideration of the viability of development schemes, especially from a highways point of view
- without proper use of the evidence base in the selection of sites

All of the above are necessary to make Guildford’s Local Plan legally compliant.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not consider that the Plan is sound because huge areas have been taken out of green belt for development

- without an accompanying town master plan, which would demonstrate that proposals for the urban areas and villages and countryside are joined up
- without taking into account the views of the residents, particularly with regard to the levels of growth proposed for the borough and the feasibility of delivering this.
- without putting forward information relating to individual sites in a fair and balanced manner.

All of the above are necessary to make Guildford’s Local Plan sound.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)
I do not believe that GBC has complied fully with the Duty to Cooperate. The Strategic Housing Market Area, whilst it includes the neighbouring boroughs of Waverley and Woking, omits Rushmore entirely. Rushmore also has an impact on Guildford’s housing, employment and transport links.

GBC has not explored in detail any joined-up approaches to providing employment land across the region, dismissing off-hand such ideas on the basis that “we don’t want Guildford to be a dormitory town”. [Stephen Mansbridge, April 1, 2014].

In particular GBC is ignoring Bordon Eco-town, a brownfield site outside the Green Belt, which is less than 30 minutes from Guildford by road, and is looking for high quality businesses to locate there. This is exactly the right area for expansion of some of Guildford’s businesses (particularly those on the Research Park).

There is also opportunity to develop rail links using existing lines and disused MOD lines.

In the Whitehill and Bordon Inward Investment Strategy 2012 Consultation Draft the masterplan recognises that "the town does not operate in isolation of its neighbouring business centres, such as Alton, Petersfield and Farnham and larger economic centres such as Portsmouth, Farnborough, Basingstoke and Guildford."

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 5: The examination

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

I would like to participate in the Examination. I have engaged positively in the Local Plan from the outset. I have coordinated the Save Hogs Back campaign from its inception and am very familiar with the arguments for and against developing the Blackwell Farm site (Policy A26). For the past two years, I have immersed myself in the Local Plan, regularly attending meetings of the Guildford Residents Association (GRA), the Guildford Society (GSoc), the Campaign to Protect Rural England (CPRE), Guildford Borough Council and various parish councils and residents groups. I am a member of the GRA, GSoc and CPRE (Guildford branch), and up until May 2016, I was Chairman of Compton Parish Council.

I have prepared detailed responses to the Issues and Options Consultation and the Regulation 18 Local Plan consultations, which I hope will show the depth of knowledge that will allow me a place at the Examination.

The Save Hogs Back campaign is supported by three Local Parish Councils and numerous special interest groups and residents groups on the west of Guildford. It has helped to raise funds to draw on the knowledge of a planning expert to inform our contributions.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/3999  Respondent: 8729217 / Karen Stevens  Agent:
My overall objections to development on Blackwell Farm were spelt out last year in Local Plan Consultation – Objection to site selection Blackwell Farm (A26) – July 2016. Issues raised in this document apply to the amended proposals in the latest Local Plan document. I have therefore commented on the following specific changes in policy A26 (Blackwell Farm) made in the latest iteration of the Local Plan:

- The phased delivery of housing, with a minimum of 1,500 delivered during the Plan period (Allocation (1))
- The addition of a new secondary school on the site (up to six form entry, of which two forms are needed for the housing on the site, and the remainder for the wider area) (Allocation (9))
- Changes to vehicular access (Infrastructure requirement (1))
- The proposal to “control” a through-vehicular link (Infrastructure requirement (3))
- The requirement for the developer to “have regard to” the Sustainable Movement Corridor Supplementary Planning Document
- The addition of a significant bus network to serve the site and key destinations including the existing western suburbs of Guildford and the town centre (Infrastructure Requirement (5))

I have outlined the reason for my objections to these changes below.

**The phased delivery of housing, with a minimum of 1,500 delivered during the Plan period (Allocation (1))**

I object to the delivery of a minimum of 1,500 homes on Blackwell Farm in this iteration of the Local Plan. There is an oversupply of housing built into this Plan, even with the inflated OAN of 12,426 homes (3.2), and therefore it is not acceptable to put forward an area of high environmental sensitivity that is not needed in this Local Plan period. Any buffer required by the plan could be provided by building more densely. The objectively assessed housing need has reduced from 13,860 to 12,426 (3.2). Blackwell Farm should not have been selected as a proposed development area due to:

- Its impact of the development on the Surrey Hills Area of Outstanding Natural Beauty (AONB)
- Its role in effectively fulfilling the purposes of the green belt
- Its access problems, which render the site undeliverable

The impact on the AONB was spelt out in detail in my response to the consultation of July 2016 and in the Hog’s Back Natural Beauty Evaluation by Landscape Architects Land Management Services (Annex 2).

The role of Blackwell Farm in fulfilling the purposes of Green Belt was covered in my July 2016 response and also in the report titled: The Purpose of Green Belt – Blackwell Farm, (Annex 6).

Proposed access arrangements have changed in this latest draft of the Local Plan, and my comments/ objections are set out on pages 32 to 39.

**The addition of a new secondary school on the site**

The addition of a secondary school at Blackwell Farm would exacerbate traffic problems on the adjacent road network (local and strategic), particularly as this latest version of the Plan states that the school is to be sited “to the north of the site” (Infrastructure schedule SED3). The inclusion of a six-form entry school, which would attract significant peak-time traffic through a highly congested area, has not been considered in the traffic model.

**Changes to vehicular access**
I object to the changes to vehicular access to the A26 (Blackwell Farm) PDA. Instead of citing the A31 as the primary access to the development, the latest version of the Plan does not determine where the primary access will be. Similarly, the access/egress to Egerton Road is only ‘preferably’ via Gill Avenue. Other options for the access to Egerton Road are not given. This suggests that the routes into and out of the site have not yet been established or properly thought through.

[Figure 13] – Tailbacks from the Tesco roundabout onto the A3 and back to the A31 mean that ambulances are delayed in responding to emergencies and it causes particular inefficiency to the ambulance service in non-emergency situations as ambulances queue up alongside other road users.

Any change that gives greater priority to the Egerton Road/Gill Avenue access/egress will result in:

• increased traffic flows across the Cathedral and Egerton Road (Tesco) roundabouts. The SHAR shows that, despite the upgrade to the Egerton Road roundabout, the junction would be over capacity (and this excludes traffic generated by the new secondary school and new “Guildford West” station);
• increased rat-running through residential roads in Onslow Village, Park Barn, and Westborough – queues already form back to Queen Eleanor’s Primary School on Queen Eleanor’s Road at morning peak times and this problem will be exacerbated as drivers rat-run through Onslow Village to avoid delays on the A31 approach into Guildford;
• increased traffic backing up onto the A3. Even if the A3 widening goes ahead (which is uncertain) the A3 will remain over capacity between the Cathedral roundabout and the A31 (see SHAR Figure 4.7 and Table 4.5); and
• delays to ambulances heading to the A&E department from the town, which lies adjacent to the roundabout. Ambulances already struggle to cross this roundabout at peak hours (Figure 13).

The proposal to control a through-vehicular link (Infrastructure requirement (3))

I object to the proposal to “control” a section of the through-vehicular link from the A31 to Gill Avenue (policy A26 Infrastructure requirement (3)). The Plan does not state how this control is to be implemented, although officers at Guildford Borough Council and Surrey County Council have suggested that automatic number plate recognition (ANPR) cameras might be used. If the access road becomes an adopted highway, the highway authority would need to agree to ANPR being used, and this is not certain (Annexes 7 and 8), which means that the controlled section of the A31- Egerton Road link may well have to remain a private road.

A private road is not a practical option as its upkeep/policing would be the responsibility of a private organisation, which would be less reliable than if it rested with the local authority. Furthermore, if the Blackwell Farm site were sold off in parcels to developers, as the University stated at its Bite Size Briefing on 12 December 2013, then responsibility for the road would be divided and it would be even more difficult to guarantee its ongoing maintenance/policing.

There is a strong risk that trying to control a section of this new road would not work in practice, and that this proposed link from the A31 to Egerton Road would become a rat run through the AONB for all the traffic heading into Guildford from the west. As discussed above and in my earlier response document, neither the local road network nor the strategic network (A3) would be able to cope with this influx of vehicles crossing the Egerton Road roundabout, even if the junction is upgraded.

In addition, the impracticality of controlling a section of this new access road would have an adverse impact at the southern (A31) end of the link. Without controls in place, the new road would attract traffic from the wider network to the south, for example from Godalming, Farncombe, and Shalford. This traffic would head north-west along the B3000 (through The Street in Compton) and north up Down Lane. Down Lane has recently been designated a “Quiet Lane” by Surrey County Council and the B3000 already experiences high volumes of traffic. High levels of nitrogen oxides, which are well above the EU legal limit, have been consistently recorded over three years at one residential location on the B3000 in Compton.

The Air Quality Review of Guildford Borough Proposed Submission Local Plan: Strategy and Sites, June 2017 states: “In 2016 a detailed air quality assessment of emissions from traffic passing through the area along the B3000 (The Street) was carried out. The results of this assessment show that there are residential receptors at which the NO2 concentration is above the associated objective. However, it is predicted that if little development takes place within the area and vehicles emissions are reduced by technological advances these objective exceedance should reduce to below the objective into the future, without additional measures being required locally.” (2.3)
Clearly any new road traffic scheme which would increase flows through Compton (such as an uncontrolled link road through Blackwell Farm) would adversely impact air quality and mean that measures need to be implemented.

**Requirement for the developer to “have regard to” the Sustainable Movement Corridor Supplementary Planning Document**

There is no published Sustainable Movement Corridor Supplementary Planning document accompanying this version of the Local Plan and therefore I object to the inclusion of a requirement that is not fully explained within this policy (A26).

The most recent proposals for the SMC involve reducing road capacity along some of the busiest sections of Guildford’s road network in order to create bus and cycle lanes. However, this is not feasible in a town that is regularly gridlocked, and which is ranked sixth among Britain’s most congested towns/cities. Furthermore, it unlikely that the SMC would encourage any kind of “modal shift” as many of the routes proposed for cyclists would be unattractive, unsafe and probably polluted.

**The addition of a significant bus network to serve the site and key destinations including the existing western suburbs of Guildford and the town centre (Infrastructure Requirement (5))**

Whilst I support sustainable transport, I have been advised by Gordon Adam, a Fellow of the Chartered Institute of Highways and Transportation[13] that Guildford town’s population is too small to sustain a viable passenger transport system and therefore I object to this proposal, and any reliance within the Plan on modal shift.

Furthermore, the infrastructure schedule does not confirm how this new bus service (BT6) is to be funded, although the suggestion is that the developer would be expected to contribute upfront towards its costs. This would add to the already unacceptable infrastructure burden placed on the developer of Blackwell Farm and raises questions of economic viability (contrary to NPPF Para 173).

**Access problems, which render the site undeliverable**

This latest draft of the Local Plan has still not satisfactorily addressed the access problems to the site and it is therefore unsound. The site is dependent on two infrastructure requirements: 1) widening of the A3 between the A31 and Stoke Roundabout; and 2) a “controlled” link from the A31 to Gill Avenue/Egerton Road Roundabout. The former is uncertain, and the latter is impractical.

[Figure 14] – Traffic on A3 northbound carriageway during the morning peak on April 24, 2017

**Widening of the A3**

The only way that the strategic road network could cope with the cumulative impact of growth on the scale proposed in the Local Plan, would be if the A3 widening RIS2 scheme went ahead[14], but any reliance on this road scheme would be misplaced as there is no certainty that it would be delivered either within the Plan period or beyond. Patrick Blake, HE Area 3 Spatial Planning Manager, writes of the scheme:

“This is not a committed scheme and we are currently at the early stages of developing a business case which will include how proposals will achieve value for money. We anticipate any decisions of schemes to be funded for the next Roads Investment Strategy to be taken in 2019. This would be a Ministerial decision (facilitated by the Department for Transport) not Highways England and timing of decisions could change.

[13] Gordon Adam is Principal Development Engineer at Wokingham Borough Council with 25 years’ experience in strategic modelling, transport planning and policy, travel planning and development control. He is a member of the Chartered Institute of Logistics, a fellow of the Chartered Institute of Highways and Transportation and a member of the Transport Planners Society

On this basis, it is accepted that there is a level of uncertainty on the delivery of critical infrastructure necessary to facilitate growth on allocated strategic sites identified in Guildford’s Local Plan. We have been working with Guildford and Surrey County Council to ensure that the Local Plan provides a planning policy framework to ensure development does not come forward ahead of critical infrastructure to mitigate any potential adverse impacts to the A3 and M25.” (Email from Patrick Blake to Karen Stevens, April 13, 2017 [Emphasis mine.] – Annex 3)

It is unsound for GBC to be basing its plan-making on the uncertain delivery of the A3 widening scheme.)

Furthermore, Table 4.5 of the Strategic Highway Assessment Report (SHAR), shows that if the A3 were to be widened, this would result in a 16% increase in traffic volumes northbound on the A31 through Compton – an area where levels of NO2 exceeding EU legal limits have consistently been recorded. The Air Quality Review accompanying the Local Plan states that this location “was not declared as an AQMA as the assessment noted that emissions from traffic were expected to decrease into the future which should lead to a decrease in NO2 concentrations measured in the area.” (4.1) It is difficult to see how GBC is going to achieve this decrease with more than 1,000 vehicles per hour passing through the area in just one direction for three hours every weekday morning.

Despite HE making it clear in its original response to the Reg 19 draft of the Local Plan that “There is still a level of uncertainty on precisely what improvements on the A3 can be delivered and the quantum of growth any potential improvements will facilitate during the Local Plan period”, and despite the known problems of air pollution in Compton that would be exacerbated if the A3 widening went ahead, GBC is pushing ahead with its development proposals, and trying to pressurise HE into changing its position and deferring strategic highways issues until the planning application stage (Annex 9 and 10). GBC also appears to be trying to brush Compton’s air pollution problem under the carpet by challenging the NO2 readings on spurious grounds (Annex 9).

“Controlled” link - A31 to Gill Avenue/Egerton Road Roundabout

Rights of way

The Council’s Deputy Leader has stated that delivery of the Blackwell Farm development is dependent on a new “western link” road from the A31 to Egerton Road, and under this new plan, it is confirmed that this new road requires a section to be controlled. (Policy A21 - Infrastructure requirements (3)).

New signalised junction on A31 - impact on SRN (A3)

Although controlling the access would reduce usage of this new link, introducing a new signalised junction on the A31 would add to queues on the strategic road network (A3). This problem was identified in Highways England’s response to the 2016 Local Plan, which was subsequently withdrawn following a meeting with GBC on September 1.

This HE response stated:
“Whilst the new access is proposed just off the A3 on the adjoining A31, the traffic impacts of these proposals could potentially lead to significant detrimental impacts on the A3. Whilst Highways England has a number of significant concerns with the Strategic Highway Assessment modelling evidence base underpinning the Local Plan, it does suggest that Scenario 3, which includes the new Blackwell Farm access onto the A31, leads to a worsening of traffic impacts on the SAN.” [Emphasis mine.]

HE also adds:
“To date neither the Local Plan nor its transport evidence base has confirmed that the new access is essential for the delivery of the Blackwell Farm site in line with Circular 02/2013 or that the new junction can be delivered safely without compromising traffic flow along the A3. The proposed ‘relief to the A31/A3 junction’ has not been evidenced. The proposed new access and link road associated with the Blackwell Farm development is therefore not considered Justified, Effective, or “sound” in line with the NPPF.”

“Queues likely” signs on A31 warn of rush-hour queues on A31. On the right-hand lane, these queues lead all the way to Guildford down the Farnham Road. On the left-hand lane, these queues lead to the A3 slip road and subsequent turn off for the Tesco roundabout at Egerton Road.

The original plan for access to the Blackwell Farm site, described by the UniS was to construct “a massive piece of kit[17]” comprising of a lit, grade-separated junction on the top of the A31 ridge. This proposal followed an analysis by the University[18] for access to and from the site. The proposal to provide access along the Down Place driveway was originally dismissed as being impractical by representatives of the University. It is clear from studies undertaken by RGP and from observations of tailbacks out of Guildford (along the A31) and past the Down Place entrance that this solution is not viable.

Despite requests to look at the analysis of options for access to the site by the University and a follow up FOI request to GBC, it has not been possible to obtain a copy of the document, which originally dismissed the Down Place junction as impractical. The reason given by GBC was that this information is commercially confidential, presumably as it shows that access issues demonstrate the Blackwell Farm site development is not viable.

**New signalised junction on A31 - impact on LRN (A3)**

Although this version of the Plan no longer identifies the proposed new A31 junction as the main access to the Blackwell Farm site (Policy A26, Infrastructure Requirement (1)), this change is insufficient to address the traffic problems that would occur on the local road network to the south of Guildford should a new junction be installed on the A31.

Almost every weekday morning, peak-hour traffic heading east towards Guildford is backed up beyond the proposed site of the junction and also beyond the A3 slip road (Figure 16). GBC’s traffic model does not appear to accurately reflect this problem, and this gap in the traffic modelling data is pointed out by HE in its response:

"The journey time validation meets DMRB criteria within the borough of Guildford. However, it is noted that the A31 journey time routes five and six do not extend west of the junction with the A3. Therefore it is not known if the model is accurately reflecting peak delays on the A31 at its junction with the A3 during the average AM peak hour.” [Emphasis mine.]

If the new signalised junction goes ahead, there will be even more queuing on the A31 (Hog’s Back), especially if the A3 is also widened, as this will lead to a 9% increase in traffic on the eastbound carriageway (SHAR Table 4.5). Any hold-ups on the A31 result in increased traffic through the villages of Puttenham, Compton, Farncombe and Artington as Guildford-bound drivers seek out the fastest route. The Puttenham interchange, in particular, is an accident “hot spot”, and as discussed above, high levels of nitrogen oxides, which are well above the EU legal limit, have been consistently recorded at the A3 end of the B3000 in Compton.

[17] Presentation by Terence O'Rourke, representing University proposal at Guildford Society, February 13, 2014
[18] This position was confirmed in a discussion between UniS and a resident of Down Place.

**Figure 16** - Eastbound traffic on the A31 backing up to beyond the proposed access to the Blackwell Farm development (Morning peak, May 23, 2017)

Figure 17 (taken from Google maps) indicate levels of traffic along the A31 on the approach to Guildford on a typical weekday morning in the rush hour (during the University term). They demonstrate that when congestion occurs along the A31, vehicles will take alternative routes into Guildford, through Compton, and through the section which is experiencing air quality problems. This is contrary to the NPPF (para 171) and is therefore unsound.

Figure 17, shows that the shortest route (A) from Puttenham to Guildford Station Car Park on 08 March 2017, takes the longest journey time (31 mins). Route (B) shows that time can be saved by rat-running down Wodeland Avenue and cutting over the Mount (29 mins).

When the A31 (Hog’s Back) is congested, the longest route (in journey miles) through Compton, Binscombe, Farncombe and Artington is the quickest (23 mins). This is the route that Sat Nav systems will direct drivers to take (route (D)). Route (C) shows it is also quicker to divert onto A3 rather than take the shortest route along the A31 (25 mins). The other option
(Route (E)) also shows it might be quicker to divert off the A31, travel to Compton and cut up Down Lane to rejoin the A31 just to the east of the proposed access to the Blackwell Farm development.

**Egerton Road/Gill Avenue access - impact on SRN**

Any change that gives greater priority to the Egerton Road/Gill Avenue access/egress will add to traffic in this congested corner of Guildford and result in traffic backing up onto the A3. Even if more capacity is added to the A3 through the proposed widening scheme (which is uncertain), the A3 would remain over capacity between the Cathedral roundabout and the A31 (see SHAR Figure 4.7 and Table 4.5). In fact, the impact could be even more severe as traffic flows across the two roundabouts reported in the SHAR do not include additional traffic generated by the secondary school and the new railway station at Park Barn (Annex 12).

The problem of additional traffic from Manor Park impacting on the A3 (and on emergency vehicles to the nearby hospital A&E unit) was a concern for the Planning Inspector at the 2003 Local Plan examination when the University sought permission to move back the green belt boundary in 2005. His report stated that the University must “confine the increase in traffic generation from the Manor Farm site to no more than 5%.” However, the traffic figures put forward by the University in 2003, which were accepted by the Inspector (and which showed the University development would put almost no new traffic demands on the local community) did not include projections for the park and ride.

*Figure 17* - Journey times from Puttenham to Guildford Station - March 8, 2017 during morning peak

The University has not demonstrated that this 5% cap on traffic hasn’t been breached. The conclusions of the traffic assessment carried out by PBA in June 2013 (accompanying a planning application for a car park at Manor Park) are not valid as:

1. The traffic assessment was carried out outside term time
2. The decision was made to disregard certain journeys from the final figures.

**Egerton Road/Gill Avenue access - impact on LRN**

Any change that gives greater priority to the Egerton Road/Gill Avenue access/egress will have an impact on the surrounding road network on the west of Guildford, adding to existing peak hour congestion on Egerton Road, Gill Avenue, the A323 and on residential roads throughout Onslow Village, Park Barn, and Westborough.

Recent proposals to upgrade the Egerton Road roundabout and to introduce a rail halt at Park Barn (Policy A59) would offer some relief, but this is unlikely to be sufficient to mitigate against the impact on the road network from up to 1,800 homes, two schools, a local centre, an extended business park, a new railway station, and potentially all the additional traffic accessing the University and hospital from the west. Furthermore, under the Plan’s proposals, the capacity of the road network itself will be reduced by the need for a new bus lane/cycle lane (which would have to share road space through pinch points such as the A3 underpass).

It is evident that the Egerton Road junction would not be able to cope with traffic volumes from the Blackwell Farm development unless:

1. a link to the A31 was provided,
2. rat-running along this link was discouraged through the introduction of some kind of “control” (A26 Infrastructure Requirement (3)), and
3. the A3 was widened.

Details of how GBC plans to control this link are not provided, but it questionable whether SCC would introduce any control on a public road. It is probable, therefore, that the proposed “controlled section” would remain in private hands, and its ongoing maintenance and policing would rest with the developer(s). This is a far from reliable solution and there is a strong risk that measures to control the route would be subsequently abandoned due to its impracticality or due to funding not being forthcoming. This would have serious consequences for users of the road network on the west of Guildford and particularly for the emergency vehicles trying to reach the adjacent Royal Surrey County Hospital. Ambulances already struggle to cross this roundabout at peak hours (Figure 18).

*Figures 18 (a), (b) and (c)* - Blue light ambulance impeded by traffic at Egerton Road roundabout during morning rush hour on April 26, 2017. Traffic crossing this roundabout will increase as a result of the Blackwell Farm development.
[Figure 19] - Queues of traffic at Tesco roundabout cause tailbacks along The Chase and past Queen Eleanor’s Junior School during morning rush hour, as well as queues along the A3 and A31

Conclusion

The deliverability of the Blackwell Farm PDA depends on the provision of significant road infrastructure: the widening of a section of the A3 from the A31 to Stoke Roundabout; and a new access road from the west.

No business case has yet been proven for the widening of the A3 and HE has made it clear that the scheme is uncertain. It would therefore seem that the site is both “undeliverable” and “undevelopable” and runs counter to the NPPF (para 47, footnotes 11, 12)

“To be considered deliverable, sites should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years and in particular that development of the site is viable.” (Footnote 11)

“To be considered developable, sites should be in a suitable location for housing development and there should be a reasonable prospect that the site is available and could be viably developed at the point envisaged.” (Footnote 12).

The new western link road, upon which the site also depends, will slice through the Surrey Hills AONB and an Area of Great Landscape Value (which comprises historic parkland). It will also pass through, or very close to, a belt of ancient woodland (now acknowledged as a key consideration (Policy A26 key consideration (3))) and a scheduled ancient monument. In order to justify this level of environmental and landscape harm, GBC would need to demonstrate that the need for this new road outweighs this damage and that the road itself was practical (in terms of its impact on the surrounding road networks) and economically viable (NPPF para 173). GBC has demonstrated neither in this version of the Local Plan.

Resorting to untried and potentially unworkable measures, such as controlling part of what would become a major route into Guildford (A26 – Infrastructure requirement (3)) in order to take land out of green belt and force through development would be questionable in any circumstance, but to adopt these measures in order to force through development in the setting to an AONB, in an area that is also an AONB candidate area, is bad planning and suggests that decisions are being made based on who owns the land rather than its suitability for development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I support the proposal for a new rail station at Park Barn. However, its delivery remains uncertain for the following reasons:

- There is no evidence accompanying this version of the plan that Network Rail has approved the scheme.
- The economic viability of operating such a station has not been demonstrated and it is unclear whether there is passenger demand for the train service offered on this line.
- The policy does not allocate land for taxis, buses, disabled parking and ‘kiss and ride’ (Requirement 3), and it is not confirmed that the Royal Surrey County Hospital estate would be prepared to provide this land.
- The station is located within a severely congested corner of Guildford, and the traffic generated by trips to and from this new station has not been included within the peak-hour modelling.
- The cost of the new station (£10m) will be met by the developer. This, again, would add to the already unacceptable infrastructure burden placed on the developer of Blackwell Farm and there is a risk that it would not fulfil all its infrastructure commitments (contrary to NPPF Para 173).
- There are likely to be much greater benefits for travellers in Guildford as a whole if £10m was spent on other transport schemes, such as providing safe access/egress for Beechcroft Drive, or a bus service targeted at all school-aged children.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the deletion in Policy D1 of the following wording:

“All developments will:
• respond meaningfully and sensitively to the site, its characteristics and constraints, and the layout, grain, massing and height of surrounding buildings
• be laid out to make the best use of the natural features such as trees and hedges and levels, and enhance views into and out of the site
• promote and reinforce local distinctiveness to create a sense of place, with innovative architecture encouraged and supported in the appropriate context
• be expected to have regard to and perform positively against Building for Life 12 criteria, and be expected to use art and materials of a nature appropriate to their setting.”

The requirements listed above would have improved the design of developments and reduced their adverse impact on the environment. There is no justification for their deletion.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I support the addition in paragraph 4.5.42, which recognises that “Historic landscapes are also undesignated heritage assets”. However, merely “considering” their local distinctive “through the Guildford and Surrey Landscape Character Assessments” is not enough. GBC’s Landscape Character Assessment (LCA) considers that the landscape of the Hog’s Back a key asset, which should be conserved.

Its landscape strategy states: “The Hog’s Back Chalk Ridge landscape should be conserved, in particular the open nature of the landscape which forms a backdrop to the surrounding rural areas and Guildford, the wide and far ranging views from the many viewpoints along the ridge line and the sparse settlement pattern of traditional style and local materials.” (Page 41 - emphasis mine.)

This strategy has been disregarded in the Blackwell Farm site allocation (policy A26), which proposes to build over this open landscape and damage views from the ridge line. This policy should be strengthened to ensure that recommendations in the LCA are adopted.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the changed statement in para 4.4.4 of the introduction to policy E1 that: “Innovative industries have emerged and clustered, some based at the Surrey Research Park and the University of Surrey and others in the town centre, such as electronic gaming, stem cell research and satellite technology. The borough has benefited from strong cluster growth in high tech innovative businesses including healthcare and bioscience and satellite technology.”

The rhetoric around the Surrey Research Park being a “hub” or “cluster” for these specialist industries is a myth created by the owner, the University of Surrey. The “hub” for these sectors is not in Guildford, but the whole of the South-East, including places such as Whitehill & Bordon, Basingstoke, Bracknell and Reading, and the East Midlands (in terms of satellite technology). The developer of Send Business Park is using this same rhetoric, claiming its Tandridge Studios site is a “hub” for the digital-creative sector: “Tandridge Studios is complementary to the science park and has the scale to become the creative hub for the area, and this development will provide opportunities with the M3 graduates... Guildford is the centre of a unique supply chain, with educators,
including ACM and Surrey University, as well as being the centre of the video games, virtual effects and animation sectors that currently lacks a hub - a gap we seek to meet.” George Hamburger (Borough, Economy and Infrastructure Executive Advisory Board, 20 April 2017).

It should also be noted that a number of organisations have moved away from the Surrey Research Park, notably Microsoft (with Lionhead studios) last year. Individual members of staff also have mixed feelings about working in Guildford, with an example of what should be a 30 minute commute, taking 70:

“I commute in from Hampshire and sadly work on the research park. The traffic situation is intolerable and I am at the point where I might just change jobs simply because the current morning rush hour puts me in such a foul mood for the rest of the day.” (Email from Chris Twin to Karen Stevens, dated July 18, 2017).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to changes in policy E4 Surrey Research Park, which is earmarked for a 10-11 Ha expansion that is not supported by the findings of the ELNA 2017.

Neither is this expansion justified by the Research Park’s own growth, which has stagnated over the past 20 years, growing by just 14,000 sqm since 1996.

According the University of Surrey[8]:

"The original timescale for the development of the Surrey Research Park was 10 years. However, it has taken nearly 30 years to achieve 90% developed. Only sites for larger building still remain undeveloped after this period. The areas originally designated to micro and small companies was completed within the original planned 10 years. The slower rate of developments for larger companies reflects the fact that today many larger companies are not locating their R&D effort in a single large building but are looking to deploy their research activities as small specialist groups close to specific host organisations that have defined technology competencies."

After 30 years, the Surrey Research Park still has capacity 6,769 sqm of R&D office space on its original 71,250 sqm site, and uptake on the Park has declined. This, together with Dr Parry’s statement that the demand is now for “small specialist groups close to host organisations” suggests that there is no need to extend the Research Park further. Small specialist groups can be located in the town centre, which is more sustainable in terms of traffic movements.

[Figure 6] – Cumulative gross built space on the Surrey Research Park since its inception (sq m) by year. Source The Surrey Research Park; A Case Study of Strategic Planning for Economic Development, Parry M, September 2012 Were it necessary for GBC to find 30,000 sqm of B1b office space, there are other options that do not require any intrusion into the green belt or onto land that forms the setting to an AONB. For example:

A. It would be possible to provide this on the existing low-density Surrey Research Park. The existing Research Park, (which provides 65,000 sq m2 of office space on 27 hectares of land) is developed at a plot ratio of 25%. This could be increased to 50% within the footprint of the existing park without any adverse impact. The University Estates Strategy shows that the University is planning to build up to 323,200 sqm across a smaller area of Manor Park (24.6 hectares) – this is six times the plot ratio of the Research Park, and still at the low end for a typical development in a major town such as Guildford. GBC’s approach shows a clear desire to maintain low-density development and to extend this low-density development onto neighbouring countryside.

[Figure 7] – Planned density of development on Manor Park

B. It would be possible (and more sustainable in terms of reduced traffic movements) to provide this 30,000 sqm of office space within the town centre, on sites that have currently been allocated for retail space. Much of this space is closer to the University of Surrey than Blackwell Farm.

There is no evidence that the retail space within the town centre needs to be expanded by 41,000 sqm at North Street. There is falling demand for retail space in Guildford and other town centres, due to the rise in online shopping (which jumped 16 per cent between January 2015 and January 2016).

The Centre for Retail Research Report[9] forecasts that by 2018:
- Total store numbers will fall by 22%
- The share of online retail sales will rise from 12.7% (2012) to 21.5% by 2018 or the end of the decade
- 41% of town centres will lose 27,638 stores in the next five years

There is no evidence to support GBC’s assumption that Guildford will buck these trends. Its ability to do so won’t be
helped by increased congestion, resulting from proposals on Blackwell Farm.

C. A further option would be to expand the Surrey Research Park at Whitehill & Bordon, a former army barracks and brownfield site located 30 minutes south of Guildford by car. This new eco-town is seeking to attract exactly the sort of businesses that currently operate on the Surrey Research Park. The masterplan[10] for this ecotown recognises that:

“... the town does not operate in isolation of its neighbouring business centres, such as Alton, Petersfield and Farnham, and larger economic centres, such as Portsmouth, Farnborough, Basingstoke and Guildford. Links to these locations present opportunities to capture investment from important business sectors, such as defence, aerospace and communications, and higher education and research and from the Universities of Surrey, Portsmouth and Creative Arts at Farnham”

Duty to cooperate with Whitehill & Bordon clearly does suit the landowner and a local authority which wants to generate tax revenues within its own borough. There is a conflict of interest here, which means that GBC isn’t keen to promote this option. What is perceived by the Council to be good for them is bad in terms of planning, and bad for the environment.

Any arguments for expanding the Surrey Research Park by 30,000 sqm at its current location (sandwiched between the A31, A3 and A323) are untenable from a traffic point of view. The Surrey Research Park is in the wrong place and has contributed significantly to the traffic problems on the west of Guildford since its inception.

Problems with developing a business park at this location were identified in the 1980s at the time permission for the Research Park was first sought, and again when the University expanded onto what was then Manor Farm. The University and Hospital both objected to the nearby Tesco development in 1988 on the grounds of the traffic impact the superstore would have on their operations. Since then, the widening of Gill Avenue has provided some relief to traffic in this area, but congestion continues to be a chronic problem on the surrounding road network at morning and evening peak hours, with traffic backing up along local, residential roads and onto the A3. This problem would be further compounded by the addition of 35,000 sqm of offices, not to mention 1,800 residences and two schools proposed at the adjacent Blackwell Farm, and a new station at Park Barn.

I also object to the continued proposal to extend the Research Park to classes B1a and B1c (light industrial). This is both inappropriate and contrary to the original outline planning permission for the Research Park (as acknowledged in para 4.4.37 of the draft Plan). The land on which the Research Park sits was funded in part by Surrey County Council on behalf of the people of Surrey for educational purposes. It was not intended to become an industrial estate.

Low-density and surface car parks on the Surrey Research Park demonstrate wasteful use of space

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I support the addition of policy E5 (3), which states that “Agricultural land will be protected as set out in national policy and the economic and other benefits of the best and most versatile agricultural land will be taken into account.” However, this policy has not been applied in the Plan, and the true extent of agricultural land classifications 2 and 3a has not been accurately disclosed.

Blackwell Farm (policy A26) has both land classifications 2 and 3a (Figure 8) and yet there is no mention of its existence or extent in the Plan or accompanying evidence base. Furthermore, the site assessment criteria devised for agricultural land assessment do not mirror NPPF definitions of best and most versatile land and in their current form and application to sites do not reflect the true proportion of each grade within sites. It is unsound to present inaccurate and misleading information in documentation released for public consultation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I support the statement in para 4.4.59 that “The plan seeks to ensure that the borough’s unique natural landscapes and heritage, which contribute so significantly to its appeal as a leisure and tourism destination, are preserved”. However, GBC has failed to put this policy into practice in forming its Plan, as it has included a proposal to build 1,800 homes in the setting to the AONB – an area that contributes significantly to Guildford’s landscape heritage by providing far-reaching views from the Hog’s Back ridge as well as a rural gateway to the town from the west.

It also is in close proximity to the Scheduled Ancient Monument at Manor Farm. Plans by the University to promote this site to local schools and create a small visitors’ centre and nature trails have unfortunately not materialised following the 2003 Local Plan. GBC should strengthen this policy to ensure that any commitments/promises made by developers (such as the University) come to fruition.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:  
KJS 2017 consultation response (rev 01F).pdf (7.6 MB)

Comment ID: pslp171/2065  
Respondent: 8729217 / Karen Stevens  
Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
**Retail space**
I object to the changes in policy E7, which now propose 41,000 sqm expansion of retail space at North Street. This allocation is excessive and does not take into account growth in the online retail sector. Furthermore, it is not supported by adequate assessment of demand. This space should alternatively provide housing or office space.

**Town centre residential development**
I also object to the continued failure of this policy to provide adequate residential development in the town centre. The town centre is the most sustainable location for housing, and yet this version of the Plan allocates just 1,300 homes – around 10 per cent of the total planned for the borough. This allocation could be at least doubled. A master plan created by Allies and Morrison, and originally adopted by GBC, identified land in the town centre for 2,551 units.

In addition to the land identified by Allies and Morrison, Guildford has more than 25 acres of surface car parking in its ownership that could be built over, including the under-utilised Onslow Park and Ride, which until March 2017 was used as a free car park for the University and Hospital staff.

Guildford’s failure to fully exploit brownfield sites in the town centre is contrary to the NPPF and to the latest Government White Paper on housing, which states:

"the Government proposes to amend the National Planning Policy Framework to make it clear that plans and individual development proposals should ... address the particular scope for higher-density housing in urban locations” (A68)

I object to the deletion in paragraph 4.4.72 of the statement “we will continue and extend an active dialogue with our residents and other stakeholders”. This is contrary to the spirit of localism. This statement should also extend to “listening and considering views of stakeholders”, not just dialogue.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents: [KJS 2017 consultation response (rev 01F).pdf](#) (7.6 MB)

---

**Density**
I object to the deletion of the paragraph on density:

"New residential development is required to make the most efficient use of land whilst responding to local character, context and distinctiveness. Residential densities will vary dependent upon the local area context and character and the sustainability of the location. Higher density development will be supported in Guildford town centre."

This suggests that GBC does not intend to build at a higher density on its new developments or within the existing urban area (which is the most sustainable location for development). The latest government white paper, Fixing our broken housing market[4], promotes “increasing the density of development”. It states:

“To help ensure that effective use is made of land, and building on its previous consultations, the Government proposes to amend the National Planning Policy Framework to make it clear that plans and individual development proposals should:

• make efficient use of land and avoid building homes at low densities where there is a shortage of land for meeting identified housing needs;

• address the particular scope for higher-density housing in urban locations that are well served by public transport (such as around many railway stations)”
Whilst I do not support any of the proposed development sites within the Metropolitan Green Belt (until legitimate constraints have been applied to the OAN and exceptional circumstances have demonstrated that these are necessary), were these to go ahead, the provision of housing should be at much higher densities in order to reduce adverse impact on the green belt and to avoid building on high quality landscapes such as at Blackwell Farm, which lies in the setting to the AONB. Across the whole of the borough, there is a high proportion of low-density housing – large units with large gardens. Even social housing in areas such as Fairlands and Park Barn has been built at a low density. Many of these family homes are now being used inappropriately as HMOs for student accommodation.

According to a report by Frank Knight[5], there are 3,500 students living in shared private rented sector dwellings. If alternative, purpose-built, smaller units existed for students, it would eliminate the need for these HMOs and they could be returned to homes for family groups.

The case study accompanying the 2017 Housing White Paper cites densities of 45-70 dwellings per hectare (dph) in the “urban, riverside and gateway quarters” of the award-winning Trumpington Meadows development outside Cambridge. It further states: “The lower density village quarter (30-45 dwellings per hectare) will provide larger, 3-4 bedroom homes”. [Emphasis mine.]

GBC’s Local Plan, in contrast, has:
• 23 dph at Blackwell Farm
• 22 dph at Gosden Hill
• 21 dph at Wisley Airfield
• 18 dph at Ash and Tongham
• 37.5 dph at Slyfield.

Apart from at Slyfield, which matches the “lower density village quarter” in terms of density, these proposed densities are very low. If GBC were to build at what the housing white paper terms “low-density” (ie around 40 dph) on the Countryside Beyond the Green Belt at Ash and Tongham, there would be no need to build on Blackwell Farm or on one of the other strategic sites within the green belt. Alternatively (and preferably), if GBC were to increase the density at the Slyfield Regeneration Site (a brownfield site within the urban area) to 75 dph, which is comparable to parts of Trumpington Meadows, this would also eliminate the need to develop one of the strategic green belt sites.

GBC has ignored the proposed amendment to national planning policy in the latest Government white paper on housing, as it has not demonstrated that it has “examined fully other reasonable options for meeting their required development requirements”, including “optimising the proposed density of development” (1.39).

Furthermore, Edge Analytics, which GBC commissioned to review the GL Hearn SHMA in 2014, stated:
“Whilst it is evident that Guildford Borough has a particularly acute affordability issue, it is less clear how an upwards adjustment to housing provision would manifest itself as an improvement to the affordability position”.[6]

[Figure 3] – The University of Surrey has more than 17 Ha of surface car parks across its estate. The University suggested (in the Council chamber at Millmead) that development on its main Stag Hill car park was not possible as it formed part of the landscape design for its campus. At the same time, the University was seeking to develop new homes on Blackwell Farm on the Green Belt and was actively promoting building on the AONB.

Given that boosting housing provision is unlikely to make housing in the borough more affordable, it is incumbent on the Council to consider alternative ways of deliver housing more cheaply and one such way is achieved by building more densely.

**Student housing**
I object to the changes in relation to student accommodation:

“About 60 per cent of full time Guildford based University of Surrey eligible students (full time equivalent) are expected to be provided with accommodation on campus.”

The addition of the word “about” weakens this policy and would enable the University to reduce the level of student provision below that which it committed to in the 2003 Local Plan.
As stated in my 2016 response, the University should provide accommodation for 100 per cent of its future Guildford-based student population, and 80 per cent of its existing student population on its two campuses at Manor Park and Stag Hill (which it could implement over the next three years without affecting any existing students). This would help the housing situation as it would quickly free up more than 1,000 houses close to the town centre, Hospital, Research Park and University.

By building student accommodation, the University would effectively be freeing up family homes close to the town centre, which are at a higher density than the proposed executive homes on Blackwell Farm. This would be a much more efficient plan for Guildford’s existing housing. It would also allow new development in the town to focus on the smaller units required due to changing demographics, which in turn would be more affordable. Furthermore, it would release Hazel Farm (promised at the last Local Plan) to be freed up for residential space/care/sheltered accommodation for the elderly – the type of accommodation required due to the changing age profile of the borough.

Increasing the proportion of students on campus would be of benefit to both Guildford and to students, who currently pay considerably higher rent in the private-sector market. The report by Frank Knight[7] reveals that:

“University rents for self-catered accommodation range from £69 - £99.50 per week (for shared non en suite accommodation) to £205.00 per week (for studio self-catered accommodation). The standard letting term is 38 weeks for undergraduates and 50 weeks for post-graduates, rents are paid inclusive of bills.”

[Table 2] – In 2003, the University of Surrey committed to housing 60% of its students on its two campuses. This table showing “the existing and potential total supply of bed spaces” indicates that only 36.8% of its students are currently in purpose-built student accommodation (PBSA), and that there is future provision for a total of 44% of students to live in PBSA. As 141 PBSA bed spaces are provided by a privately-operated company (Scape), the University has clearly fallen well below its 2003 commitment.

By comparison, advertised rents from private landlords during the 2016/2017 academic year “range from £195 to £205 per week for en-suite rooms and up to £310 per week for studios, inclusive of all bills” and “All rooms are provided as 51/52 week tenancies.”

Further data contained with the Frank Knight report shows that Guildford has “both a low existing and pipeline bed space count compared to its student population” and that, compared with other university cities, “Guildford is second lowest in terms of existing supply of bed spaces and second lowest in terms of student numbers. In comparison to Liverpool and Newcastle, the second and third largest university populations, it has considerably less existing and pipeline bed space supply.” [Emphasis mine.]

The report concludes that, “the market in Guildford for student accommodation is currently structurally undersupplied. The consented pipeline of proposed developments will do little to re-address the lack of student accommodation.”

The Council’s reluctance to increase the proportion of students living on campus, along with its failure over the past 13 years to encourage the University to build out its existing planning permissions for student accommodation in a timely manner, or to build more efficiently across its estate, (for example by building over its extensive surface car parks), are all indications of the Council’s pandering to the University and its drive to increase house building, rather than seeking alternative solutions, which would have less impact on the environment.

There is also clearly a huge conflict of interest with the University, which had previously argued the case for increasing the amount of purpose-built student accommodation when it wished to expand onto its Manor Park campus in 2003. Building this accommodation would clearly weaken the case for taking Blackwell Farm out of green belt – a move that would present it with huge profits. It is therefore no surprise that it has been slow to deliver on the commitments it made in 2003 (including the promise to provide greater access to Blackwell Farm for public recreation/ benefit).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Affordable homes

Iobject to the changes in policy H2. This policy has been weakened by changing the wording of the policy from “At least 40 per cent of the homes on these sites must be as affordable homes” to “We will seek at least 40 per cent of the homes on these sites as affordable homes.” Simply “seeking” to achieve 40 per cent affordable homes, is not the same as making this provision a “must”.

The aspiration for London is that 50% of all new homes should be affordable within the next 10 years and lower land values should make this target achievable in Guildford now. I therefore believe that the target should be increased from 40% to 50%.

Viability

I also object to the “viability clause” and specifically the deletion in paragraph 4.2.40 of the statement that “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [which would make a scheme inviable to deliver].” This undermines any requirement placed on a developer to provide 40% affordable housing or to fund vital infrastructure on which developments may depend. This could leave the Council exposed to unforeseen infrastructure costs, with the risk that housing developments are progressed without the required infrastructure to support them.

[Figure 4] – “To Let” signs along Southway, Guildford (Image: Grahame Larter). Around 7000 students occupy private homes in the borough

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the changes in Policy 1D1, particularly the proposals that “delivery of infrastructure will be secured by planning condition and/or planning obligation.” (2) and “If the timely provision of infrastructure necessary to support new development cannot be secured, planning permission will be refused.” (3). This acknowledges that the provision of necessary infrastructure to unlock development may not be “secured” within five years and the Plan therefore runs counter to the NPPF[11], which states that:

“To be considered deliverable, sites should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years and in particular that development of the site is viable.”

The whole approach underpinning Guildford’s Local Plan is to allocate land for housing that does not currently have the infrastructure needed to support it in the hope that this will be provided downstream by the government (in terms of the A3 widening) or by developers. However, there is a risk that these schemes will not come to fruition: the widening of the A3 is uncertain, being subject to budget constraints and the whims of different government ministers (Annex 3); whilst required local road infrastructure could fail to be delivered if the developer abandons the project without fulfilling all the conditions and obligations, or claims that the cost of delivery is not viable (para 4.6.8 suggests that GBC would be prepared to negotiate reduced infrastructure requirements). This is a particular risk in the case of the Blackwell Farm allocation (A26), where the landowner (University of Surrey) has already demonstrated a poor track record in meeting the commitments it made at the last Local Plan.

I object to the fact that the changes within policy 1D1 (and indeed the whole policy) are based on flawed traffic modelling. Despite recommendations from Highways England (HE) (Annex 4) and other commentators on the Local Plan that the modelling should be revised using the latest OmniTRANS software tool (version 6.0.22), GBC has failed to instruct Surrey County Highways to update its modelling accordingly, and instead appears to have tried to browbeat HE into accepting less reliable modelling assumptions, as is apparent from the minutes to its meeting with HE on September 1 (Annex 5).

A Technical Note prepared by Mouchel on behalf of HE in response to the 2016 Local Plan (Annex 4) concludes that: “the future updated model, using the latest version of the OmniTRANS software, should help to address some of the concerns by including blocking back and true peak hours, but the inability to model merge delays on the A3 will remain a significant limitation. The results from the new version of the model could be significantly different from those presented in the GBC’s current Local Plan evidence Base.” [Page 6 – emphasis mine.]

It is unsound to base housing allocations on traffic scenarios that have been skewed by using outdated traffic modelling software and do not reflect the true situation.

I object to the deletion of infrastructure project SRN6 (Beechcroft Drive new access road/road safety scheme) from this version of the plan. The current access (a 90 degree junction on a blind bend of the A3) is dangerous not just to the residents of Beechcroft Drive, but to all drivers travelling on the A3.

The Manor Farm Master Plan (2004) states: “Benefits secured by legal agreement include... commitment to exploring ways of alleviating Beechcroft Drive access problems.” (Section 8.8). Thirteen years later this access has not been provided. If the University/GBC cannot fund a few metres of road linking Beechcroft Drive to Manor Farm in order to provide safe access for 21 existing residences (some with young families), it is questionable whether they would bother to pay to enforce a controlled section of the new link road from the A31 to Gill Avenue.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy 1D3 (3), which states: “New development providing, contributing and/or close to the routes of the proposed Sustainable Movement Corridor in the Guildford urban area will have regard to the Sustainable Movement Corridor Supplementary Planning Document.”

The Sustainable Movement Corridor Supplementary Planning Document does not appear to have been published so GBC cannot consult meaningfully on this policy.

The whole concept of the Sustainable Movement Corridor (SMC) appears vague and uncertain – what began as a car-free route through Guildford for pedestrians, cyclists and buses/trams has been downgraded to a bus/cycle lane through some of the busiest sections of Guildford’s road network. Without widening sections of the route (which is not proposed), the SMC would reduce capacity on an already overstretched road network. This will be a particular problem at pinch-points along the route, such as the A3 underpass at Egerton Road, where cars are at a standstill most weekday mornings during the University term time (Figure 9(a) and Figure 9(b)).

Proposals to introduce a significant bus service to proposed key development sites to the town centre and other key destinations (Policy A26 Infrastructure requirement (5)), whilst a good idea in theory, are not practical. Guildford borough is too rural (with villages too far apart) and the town’s population too small and low density to sustain a viable passenger transport system. Furthermore, there appears to be no real expectation that the SMC would achieve a modal shift and reduce car movements significantly so it is questionable why GBC would propose expenditure of up to £250m on the scheme.

[Figure 9(a)] above and [Figure 9(b)] – The strategic movement corridor will reduce capacity of Egerton Road passing beneath the A3 during peak times

[Figure 10] – Concentric circles drawn from University of Surrey’s Senate House demonstrate how remote Blackwell Farm is from the central hub of Guildford, with its existing transport provision

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (

Green infrastructure

I support the addition of the statement in para 4.6.42a that: “Where proposals fall within or adjacent to a BOA [Biodiversity Opportunity Area], biodiversity measures should support the BOA’s objectives, including those set out in the BOA Policy Statements produced by SyNP [Surrey Nature Partnership].” However, it has not been explained how the Local Plan meets this requirement. The Blackwell Farm (A26) allocation has habitats and Species of Principal Importance for the Conservation of Biodiversity. It is located adjacent to a BOA, and arguably should have been included within it. Bizarrely, all the farmland along the northern slopes of the Hogs Back has been included with the BOA, except for that in the ownership of the University of Surrey. This begs the question: why has Surrey Nature Partnership omitted this land from this BOA, when it forms the same habitat and has the same biodiversity value as adjacent land included within it? This omission would appear to be deliberate, in the same way that SCC has not been able to demonstrate (despite FOI requests) that it carried out landscape character assessments for land on Blackwell Farm (as part of the AONB boundary review).

It is a policy of the NPPF to “Allocate land with the least environmental or amenity value, where consistent with other policies in this Framework”, and it is a strategic priority of Biodiversity 2020: A Strategy for England’s Wildlife and Ecosystem Services to “take a strategic approach to planning for nature within and across local areas” as “This approach will guide development to the best locations” in the context of reducing environmental pressures. It has not been explained how the Local Plan has used Surrey Nature Partnership’s identification of Biodiversity Opportunity Areas to guide developments to the best location.

Blue infrastructure

I object to the changes in policy ID4, which fail to take into account the environmental impacts on the River Wey of developing the Blackwell Farm site and other strategic sites.

GBC has been tasked with the specific action in the River Basin Management Plan that, when developing new DPDs and when making planning decisions, the planning authority should use evidence relating to “priority water bodies” (those that have been assigned “bad”/”poor” status, such as the River Wey), alongside other relevant evidence, to influence the location and scale of future development[12]. There is no indication in the Plan of how GBC has fulfilled this requirement. The River Wey is already failing the Water Framework Directive for phosphates and Natural England states that the majority of phosphates in rivers comes from treated/untreated sewerage. The current Plan will only make this matter worse.

[Figure 11] – Blackwell Farm remains home to a number of birds of Principal Importance for the Conservation of Biodiversity, despite the recent use of bird scarers on the University-owned farmland

[Figure 12] – More than a half of Blackwell Farm sits above the 90m contour (orange) and includes C18 parkland (light blue), ancient woodland and Grade 2 farmland (dark blue/ green). The farmland in yellow is criss crossed with ancient hedgerows and provides a habitat for ground nesting birds

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: KJS 2017 consultation response (rev 01F).pdf (7.6 MB)

Comment ID: pslp171/2047  Respondent: 8729217 / Karen Stevens  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P1
**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I support the changes to Policy P1, and particularly the addition of the following:

1. In accordance with national planning policy, there will be a presumption against major development in the AONB except in exceptional circumstances and where it can be demonstrated to be in the public interest. (P1 (2))
2. High priority will be given to the conservation and enhancement of the natural beauty of the AONB and development proposals must have regard to protecting its setting. (P1 (3))

However, the strategic allocation of land for housing in Policy A26 at Blackwell Farm and the proposed extension to the Research Park (policy E4) are in direct conflict with these amendments. The Blackwell Farm site allocation is the only significant proposed land release which will impact significantly on the AONB. No exceptional circumstances have been put forward for developing this site, and therefore it should be removed from the Local Plan. These impacts of developing Blackwell Farm are:

- A new access road through the AONB and AGLV. The Deputy Leader has stated that the Blackwell Farm development is dependent on a new “western link” road from the A31 (Hog’s Back) to Gill Avenue. Because the road would have to be built along a corniche, the earthworks required would create a huge scar on the northern face of the Hog’s Back ridge, which would be visible for miles to the west, as well as from the public footpaths/bridleways that cross the Farm.
- A 1,800-home development, as outlined in policy A26, would damage the setting to the AONB and this is contrary to national planning policy and to the amended policy P1 (3).
- Part of the 1,800-home development site has also been put forward as an AONB candidate area. An independent land evaluation by professional landscape architect Land Management Services (Annex 2) concluded that the majority of the Blackwell Farm site merited AONB status, and that the rest of the site should not be developed as it forms an important “buffer”/“setting”. This evaluation has been submitted to Natural England (NE) by Anne Milton on behalf of three parish councils so that the site can be included as a candidate area for NE’s forthcoming boundary review.
- The extension to the Surrey Research Park (Policy E4) would damage the setting to the AONB and is contrary to national planning policy and to the amended Policy P1 (3) in this version of the Plan. The area earmarked for the Research Park extension would be visible from the Mount – a popular recreation area in the AONB.

Under key evidence, I object to the omission of the Hog’s Back Natural Beauty Evaluation carried out by Land Management Services (LMS) on behalf of Compton, Worplesdon and Wanborough parish councils, which was submitted in response to the 2016 consultation by Compton Parish Council and by CPRE/Save Hogs Back. GBC has failed to recognise Blackwell Farm as a candidate area and has omitted this new study (of which it was aware) from its key evidence supporting Policy P1 (4.3.10), although it has included a similar landscape evaluation by Hankinson and Duckett, commissioned by Surrey County Council in 2013.

I consider it unsound to exclude a study from the consultation evidence base, which follows the same assessment criteria as the Surrey CC evaluation, and which has been carried out by a registered landscape practice (a consultancy that the Surrey Hills AONB Board has itself used). Please note that the Surrey CC evaluation study did not report its findings on the entire Blackwell Farm site on the basis that Surrey CC only had to put forward a case for areas that it proposed should be included in the AONB following NE’s boundary review. It was also not able to provide any detailed evaluation of different parts of the Blackwell Farm site following an FOI request.

### Comment ID: pslp171/2049  Respondent: 8729217 / Karen Stevens  Agent:

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy P3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I object to the changes to policy P3, particularly the statement in para 4.3.28 “it is nevertheless important that we seek to manage growth in this area”, which shows a bias towards protecting the countryside beyond the green belt (near Ash and Tongham) above other areas with more important landscape designations.

Whilst I do not see the need to build on the countryside beyond the green belt (if constraints are applied to the OAN and housing is built more densely on brownfield sites), GBC appears to be more protective of this area than it is of AONB or the green belt, and this is contrary to the NPPF, which states that national parks and AONBs should have the highest level of protection.

The policy seems to attach greater importance to preventing the “coalescence between Ash and Tongham urban area and Aldershot” than it does to the primary purpose of Metropolitan Green belt, which is to stop London sprawl. Ash and Tongham lie beyond Guildford at a distance from London and therefore do not fulfil this purpose. That is presumably why Ash and Tongham are not in the green belt already. It also seems that GBC is more concerned about the coalescence between Ash & Tongham and Aldershot than it is between Guildford and Woking, or between Flexford and Guildford, or between Wood Street Village and Guildford.

In the 2014 version of the Plan, the reason given for extending the green belt to Ash and Tongham was that this would protect important views from the Hog’s Back ridge, but this justification was changed to “preventing coalescence” after it was pointed out that Blackwell Farm equally protected the views from the ridge. It appears that policies (and elements of the evidence base) are being adapted to ensure that certain sites are included in the Local Plan (and others excluded), rather
than using sound evidence and policies as a starting point to determine which are the most suitable locations for
development. The whole approach to the Local Plan is therefore unsound.

“The Hog’s Back Chalk Ridge landscape should be conserved, in particular the open nature of the landscape which forms
a backdrop to the surrounding rural areas and Guildford, the wide and far ranging views from the many viewpoints along
the ridge line and the sparse settlement pattern of traditional style and local materials. The intact large scale geometric
field pattern and hedgerow boundaries and hedgerow trees should be conserved while there is potential to enhance and
reinforce some of the hedgerows.” - Guildford Landscape Character Assessment

Answer (if comment is on questions 1-7 of the questionnaire): ()

Climate change
I support the addition in para 4.3.37, which states that “New development should be carefully planned to ensure that
vulnerability to the range of impacts associated with climate change is not increased.”

Land drainage
I also support requirement (5) in this policy that “all development proposals are required to demonstrate that land drainage
will be adequate”. However, GBC has failed to put this policy into practice in forming its Plan and does not demonstrate
exactly how it will prevent the increased impermeable surface water run off from the Blackwell Farm development
exacerbating flooding at Wood Street Village, Fairlands and Whitmoor Common Special Protection Area (SPA).
In particular, it has not addressed the likely requirement (and cost) for two reservoirs to control flow – one of which (due to
topography) would ideally be located in the north-east corner of the site, which is currently allocated for the Research Park
extension.
The Whitmoor Common SPA does require flooding at times in order to maintain its wetland habitat, and so damming
streams that flow from Blackwell Farm would not be a straightforward solution. The Plan does not explain how the
developers of Blackwell Farm site would achieve the balance between damming up streams to prevent surface water run off
flooding residential areas and preserving the wetland habitat of the SPA.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I support the addition of paragraph 4.3.50a, which recognises contribution of Special Protection Areas (SPAs) and Areas of Special Conservation Interest in meeting the UK’s international agreements and treaties. However, I object to the insertion of a new paragraph 4.3.50c, which states “... if residential developments provide or contribute to appropriate SANG and SAMM measures, they will not be required to undergo Appropriate Assessment.”

It is not sufficient mitigation against harm to the SPA to merely allocate land as SANG or to contribute to SAMM measures. There is no evidence that SANGS actually alleviate pressure on the SPAs and, without this, it is irresponsible to plan large-scale developments within 5km of them. For example, Blackwell Farm is likely to have a negative impact on Whitmoor Common (Guildford’s primary SPA) and Pirbright Common SPA, even with bespoke SANG provision, for the following reasons:

- The centre of the site is within 5km of the centre of Whitmoor Common and 3.8km to the nearest boundary point. It is highly likely that additional recreational pressure will be put on Whitmoor and Pirbright Commons as a result of the quantity of dwellings proposed (1,800). Even if only 5% of households use the SPAs, that is an increased recreational pressure of 90 households and this is without considering the combined recreational pressures caused by all planned sites.

- The Habitats Regulations Assessment also notes that the Blackwell Farm site “could contribute to reduced air quality through traffic movements past Thames Basin Heaths SPA in combination.” (Page 37)

The Surrey Wildlife Trust describes the Thames Heath lowland heaths as a rarer habitat than rainforest. They are home to large numbers of rare insects, rare amphibians, rare plants, and rare bats – in addition to the EU protected Dartford warbler and nightjar. It is irresponsible to plan for development which does not safeguard this habitat.

It should further be noted that many local residents on the west of Guildford, including Flexford, Park Barn, Onslow Village and Wood Street village currently use Blackwell Farm as an area to walk dogs (one of the biggest threats to ground-nesting birds). It is possible that these people might encroach on the SPA instead, if Blackwell Farm was to become urbanised.

Comment ID: pslp171/2031  Respondent: 8729217 / Karen Stevens  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I support the addition of the conditional statement “unless any adverse impacts of doing so would significantly outweigh the benefits or specific policies in the NPPF suggest that development should be restricted” (4.1.1). And I also support the new statement in Reasoned Justification that:

“When implementing Policy S1, local circumstances will be taken into account to respond to different opportunities for achieving sustainable development. In accordance with the NPPF, the presumption will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.” (4.1.4)

However, Guildford Borough Council (GBC) appears to have taken little or no account of local circumstances (namely Guildford’s inadequate transport infrastructure and chronic traffic congestion), and little or no account of the specific policies in the NPPF, when putting forward its proposed development sites.

[Figure 1] - Does a development of 1800 homes on this farmland on the Hog’s Back at Blackwell Farm and an access road cutting through the AONB, as shown above, constitute sustainable development?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the commitment to build 12,426 homes (Policy S2 (1)), based on the Strategic Housing Market Assessment (SHMA) 2017 prepared by GL Hearn. The objectively assessed need (OAN) figure of 12,426 has been inflated and does not apply any of the constraints required under the NPPF and the National Planning Policy Guidance.

Inflated OAN
The Strategic Housing Market Assessment (SHMA) modelling has been found to be unreliable. A detailed, professional review of the Guildford and West Surrey SHMA, undertaken in June 2017 by NMSS on behalf of the Guildford Residents Association and Parish Councils has shown that the demographic and economic need figures put forward are fundamentally flawed. The NMSS analysis highlights a large gap between projections and census figures in Guildford and identifies under recording of students moving away as the most plausible explanation. It concludes that if this recording error is corrected by making plausible adjustments for the outflow of students in the period 2001-15, this would reduce the demographically-based estimate of the number of homes needed from 558 homes a year during 2015-34 to 404 per annum[1].

Failure to apply constraints
According to the INRIX 2016 Traffic Scorecard[2], Guildford is the town with the worst traffic congestion in the UK, and its congestion is worse than many major cities, such as Glasgow, Cardiff, Liverpool, Bristol, and Southampton, making it the sixth worst congestion hotspot in the UK (Table 1). Furthermore, there is no resilience in the road network, and when incidents occur almost the whole of the borough is gridlocked. Figure 2 shows what happens to the network on the west of Guildford when there is an accident on the A3. This screen grab of traffic was taken on 14 April 2017.

In planning its spatial development strategy, GBC does not appear to have taken the borough’s traffic problems into account. Nor has it taken into account the fact that 89 per cent of the borough lies within the green belt and that 64 per cent
lies within the AONB. The neighbouring borough of Woking has reduced its OAN by 50 per cent as a result of constraints, and yet it has a lower percentage of green belt (60 per cent) and no AONB. Woking is also less congested. It seems a nonsense that Guildford should apply zero constraint (on the grounds of traffic and landscape) to its OAN and then seek to provide for the shortfall of a neighbouring borough, which is less constrained. It would appear that GBC’s refusal to apply constraints is driven by the Lead Councillor’s wish to maintain higher housing figures, as evidenced in his statement to the GBC Council Meeting on May 15, 2017:

“I’ll take the objectively assessed need as it is at 12,426, but I can tell you I’m not going to celebrate the fact that the number has come down.” (Cllr Paul Spooner, GBC Council Meeting, May 15 2017)

This suggests that, given a choice, Cllr Spooner would wish to build over the green belt, as this is a direct consequence of a higher housing number. It seems that the real driver is to boost the size of Guildford and its economy rather than to meet housing need at all, and this has resulted in the opportunity being taken at every turn to adopt the higher housing figure within the SHMA modelling. Unfortunately, Cllr Spooner has overlooked the fact that traffic congestion is detrimental to Guildford’s economic growth. A business survey carried out by GBC in 2008 found that the main reasons, given for businesses moving out of the borough – aside from the cost of property – were transport and congestion. Traffic problems are also cited as a deterrent to businesses setting up in Guildford[3].

Given that boosting housing provision is unlikely to make housing in the borough more affordable, it is incumbent on the Council to deliver a Local Plan that will encourage (per capita) growth and therefore will not exacerbate existing traffic problems.

Table 1: INRIX 2016 Traffic Scorecard – UK’s 10 most congested cities/large urban areas

Figure 2: Typical build-up of traffic on Guildford’s local roads and on A31 Hog’s Back following an accident on the A3 - 14 April 2017

</table>
Keens Lane will have to be widened to accommodate the traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

OBJECT. Greenbelt site which should be protected.

OBJECT to the destruction of farmland

OBJecct also to the impact of traffic on an already gridlocked A3, London Rd Burpham and surrounding area.

Burpham and Merrow already have shops and services.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Overall the proposals are unsound as the road will plough through AONB to the South and road 2 will cut up existing Ancient Woodland.

Greenbelt and Countryside study flawed and made to fit as per developer wishes. Ditto SHMA figures.

No cooperation with Rushmoor or Hart District Council ref traffic impacts from the West.
OBJECT- AONB setting. Also, a new assessment commissioned by Worplesdon, Compton and Wanborough Parish Councils says the whole of this area should be reclassified AONB. Surrey Hills AONB and Natural England for some strange reason did not include Blackwell Farm in their own AONB review, they chose to exclude it.

OBJECT- All land currently classified Greenbelt and AGLV.

OBJECT. More cars along Egerton Rd /Gill Avenue which is already gridlocked. A&E dept access problems for ambulances.

OBJECT- Road and housing destroying Ancient Woodland.

OBJECT, Surface water will increase flooding at Wood Street Village and Fairlands (who already have an issue with rising sewerage when it rains heavy)

OBJECT, protected species both animal and plant will be destroyed. Skylarks, Newts, Kites, Orchids etc etc

OBJECT, Working Arable Farmland should be protected so we can feed ourselves.

OBJECT, Historical importance of Henry 8 Deer Park, features still visible.

OBJECT, Surrey Research Park isn't full now, has empty units and acres and acres of unused space. Other office facilities in the area are also vacant.

OBJECT to the increase in Air pollution in the area. Destroying the plants that currently help to clean our air and then building 1800 houses with all the emissions AND car pollution is a double whammy for the West of Guildford. We already have high air pollution in this area.

OBJECT to urban sprawl

OBJECT to merge of Guildford Urban area with Wood Street Village

OBJECT to sacrifice of Arable land for SANG.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

OBJECT, This was already refused by the planning committee.

OBJECT Its Greenbelt

OBJECT Traffic nightmare for the whole of the area. Ripley, Send, Ockham, Horsleys, Effingham are already running at road capacity.

OBJECT- Air pollution is already bad at the M25/A3 Junction.

OBJECT- unsustainable as stuck in the middle of nowhere, no facilities, no utilities.

OBJECT, impact on SPA Cannot be mitigated by SANG on its doorstep.

OBJECT current rights of way being affected or ignored.

| Document:    | Proposed Submission Local Plan: strategy and sites 2016 / Policy A44 |
| Question 1:  | Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( No ) |
| Answer:      | () |

This site has been added since the reg 18 consultation

OBJECT, Site is Greenbelt and should be protected.

Object, site gives access to 'Garden Grabbing'

Object, Site is on a very narrow rural road.

Object, travellers should be compliant with usual planning control for Greenbelt policies and should therefore be dismissed.

This site is previously Land Fill.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

| Question 1:  | Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( No ) |
| Answer:      | () |

This site was previously safeguarded for future development. The villagers were promised that this site would not come forward for another 15 years, essentially they were lied to!

No consultation with Rushmoor Council ref traffic.

OBJECT, Site is Greenbelt and should be protected.
OBJECT, There are no proven special circumstances to bring this site forward.

OBJECT, sensitive wildlife site.

OBJECT, Road network cannot cope with current traffic. Both Glaziers Lane and Westwood Lane have severe restrictions.

OBJECT, Impact of Traffic on Aldershot Road.

OBJECT, not enough trains to take people to Guildford or London.

OBJECT, this site floods and Normandy already has issues with sewerage flooding when it rains heavy.

OBJECT, Impact on local doctors and primary school capacity.

OBJECT, Urban sprawl, joining of 4 small hamlets into a very large village.

OBJECT, air and traffic pollution.

OBJECT, Impact on Ancient Woodland.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

| Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2 |  |

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()
OBJECT. not enough affordable homes planned for.

Clarification of affordable required.

in a rich town, how can affordable actually be affordable?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SQLP16/536  Respondent: 8729313 / Lisa Wright  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

SHMA- OBJECT. No calculations available. No scrutiny in Council. No constraints applied.

OBJECT- No mention of recent AONB review.

OBJECT- LAA sites added from last consultation.

OBJECT- NO data available for Local Housing Needs Assessment. Nothing about this mentioned at Worplesdon Parish Council so not sure what GBC intend to do?

OBJECT- Retail and Leisure. Guildford do not need more retail space. Retail is declining as people shop online.

OBJECT- No update for Rural Economy, LAA and SNCI data.

On the whole a very shabby collection of rushed work without the dat to support it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SQLP16/539  Respondent: 8729313 / Lisa Wright  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

No.

It has been developer lead.

GBC are too friendly with the University of Surrey. Uni heads are always in council, Uni staff are featured in GBC promotional video.

Local radio station, Eagle, has not published any news item related to the Local Plan in days. Question relationship between GBC leader and Eagle Director.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SQLP16/537  Respondent: 8729313 / Lisa Wright  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

No

SHMA is deeply flawed. No calculation available, No Scrutiny of figures in Council. Unconstrained numbers.

Look at the independent GRA SHMA which gives a figure of 510 unconstrained. We did tell GBC it was wrong but they repeatedly ignore us and refuse to show the maths behind the numbers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)
Maps change frequently. First you see ancient woodland then with the next draft you don't. Maps are using old data and do not reflect the true nature of places. The whole thing's been a mess since they started.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** (Yes)

**OBJECT** To building anything on Greenbelt, AGLV or AONB sites. It should be protected as per election promises from Local and Central Government.

**OBJECT** to amount, or lack of, homes planned for the town.

**OBJECT** to SHMA figure of 693, Guildford is promoted as a growth town and this plan does not reflect Local Need. Further independent scrutiny of the base line data shows that this document is seriously flawed. GBC insists it is right but they haven't seen the calculations.

**OBJECT** to the proposals for more employment space as guildford already has a very high employment rate. We also have a range of buildings which are empty.

**OBJECT** to huge retail expansion in Guildford. These places should be reserved for homes. Guildford already has ample retail space, some of which are still empty. Our local businesses will be unable to compete with big retailers and will be forced to close.

**OBJECT** to the current lack of infrastructure. Guildford is gridlocked, no one seems to do anything about it. We can't get to the station, it takes longer to drive 2.4 miles from the station as it does to get a train from Waterloo to Guildford. More people will make this journey ridiculous.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In addition to my online comments.

I would like to object at the way Guildford Borough Council consulted Worplesdon Borough Council and neighbouring councils on the Local Plan. They had one meeting with us in three years at which they promised that in Worplesdon 'we would be pleased'. They showed us a map of all the sites, without labels.

They then showed neighbouring parish councils different maps and gave different views of the same plan.

It seemed different maps and explanations were given to every Parish Council across Guildford. The whole thing was just a tick box exercise.

Furthermore, as a Parish Councillor, we were warned that if the current Local Plan sites didn't go forward for approval, other sites, e.g Fairlands safeguarded land would come back in the plan. This I took as a direct threat, knowing that the residents of Fairlands had previously objected to their safeguarded land for a multitude of reasons and had it removed from this consultation.

Therefore, I must object to the lack of openness, honesty and transparency Guildford Borough Council has given to its residents and Councillors during this consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Overall, I object to this local plan as it;

Does not make efficient use of Guildford's Brownfield sites for homes.

Relies on housing need projection which has not been publically scrutinised.

It is too reliant on Greenbelt to provide housing where no special circumstances have been listed to warrant changing Greenbelt boundaries, especially ignoring residents and elected councillors wishes to protect these areas.

It does not protect our Greenbelt, AGLV and AONB from development.

It makes no attempt to protect our wildlife.

It has no social/council housing provision.

It predominantly adds to traffic congestion, flooding, air pollution and the subsequent physical and mental health issues of our communities.

It takes no account of Brexit and the likely impact of migration or population change.

It does not account for our very large native and foreign student population which should be housed by the University of Surrey to free up our family housing stock.

It adds to the travel congestion from trains, buses and traffic that we have in Guildford with no solution available.

It does not specify what affordable housing is and makes no attempt to provide enough affordable housing for our young people, elderly or key workers.

Most of my comments on previous consultations have been largely ignored and unresolved.

Some of the sites which are still included in this plan have already been refused planning permission.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( No ), is Sound? ( No ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to any building on this Greenbelt, AGLV and AONB.

Residents and the wider community have not been listened to and most of the objections to this site have not be addressed, primarily the protection of our designated greenbelt, AGLV and AONB.

An independent assessment of the whole site, commissioned by Worplesdon and Compton Parish Councils shows that the site warrants inclusion into the AONB. This has been completely ignored. (strangely, the council excluded these particular fields from the AONB review list to be assessed by their own chosen consultant last year).

3, I object to further expansion of the Surrey Research Park when the current business park is not being fully utilised. There are still 'plots' which haven't been built on yet, while other units are still vacant. The existing park is covered in surface car parks which could be built over. The lack of efficiency with the current Research Park with large unused space is criminal. There is huge traffic congestion throughout the local area impacting the Hospital, A3, Park Barn- tailing back to
Worplesdon, Tesco roundabout and of course, the business park itself. Doubling the traffic from a whole new business park would double the congestion and severly impact our Hospital. The only access road would have to be cut through a section of Ancient Woodland (they've already started the road access). A joint traffic study commissioned by Worplesdon and Compton Parish Councils has shown an increase in traffic queues and congestion along the A31 and A3 which currently are gridlocked in rush hour.

9. Surrey County Council have already stated that there is no need for a further secondary school in this area. The nearby 'Kings College' is historically under subscribed and has ample room for expansion should it be required.

ref Infrastructure.

note 1,

I object to another major road, serving 1800 homes and a new business park being added to The Egerton Road/ Gill Avenue area. It is currently one of the worst congested road networks in Guilford, always at a stand still every morning and evening with people trying to access the Research Park, University, Hospital, Tesco and the A3, the road has no further capacity, In particular, I am concerned about Hospital ambulance access, rising pollution levels and road accidents. I am also concerned that the this new road will serve as a cut through from everything North and West trying to bypass Guildford itself (which is a nightmare any day of the week or weekend).

I also strongly object to the impact on the current Ancient Woodland and adjoining SNCI Commons, this road will cut a gaping hole through a very important wildlife corridor.

Furthermore, I object to the proposed route coming off the A31 into Blackwell Farm as it will significantly impact the beauty of the Nationally protected AONB and have a detrimental affect on the arable land, large native trees and wildlife in the area.

note 3.

I object to the University and GBC statement here. The proposal of 'controlled access' to the Blackwell farm site is completely unworkable. Aside from the fact that no working model of a large scale housing estate with ANPR or similar can be found (because it doesn't work), how can we possibly police this type of situation? Will the taxpayer have to pay to monitor this site?

note 4,

The sustainable Movement corridor does not work on this site as it is very hilly, the average person will be unlikely to want to either cycle or walk up this steep hill. I object to Green Belt land being used for this purpose.

note 5.

Who is providing this bus network? Has Surrey County Council agreed to provide these services? We have recently seen our local bus network in Worplesdon being shrunk as it is not profitable for the bus companies to run the services. Buses do not work, people like to drive!

Note 10. Primary provision is available in Park Barn and I therefore object to the building of a new school on this site.

Note 11, SCC has no need for extra school capacity in West Guildford. I object to this clause being added at this point to try and 'sweeten' the development, it is irrelevant for this Local Plan document.
Note 22. I object to this. As already stated, the current Business Park has empty units, unbuilt plots and acres of unused land (which was taken from the greenbelt in 2003). There is no supporting evidence to warrant a further Research Park.

In Addition, these issues are missing from the proposal, have not been addressed and should be noted;

There is no statement of special or exceptional circumstances to warrant taking this land out of its protection and this should be divulged ASAP so we can make informed decisions.

Air pollution is very high in this area as shown by recent Guildford reports, I am very concerned about the current levels and I object to this development as it will dangerously increase that pollution and subsequent health of our communities. I already have a friend that was forced to move from the area to Scotland to avoid air pollution!

This farmland includes some of the best arable land at grade 2 and 3 and should be preserved for farming.

There is no mention of protected species, skylarks, bats, badgers etc and I object to their destruction.

Flooding is a serious problem in Worplesdon, this development will increase those problems.

This document is not Legally Compliant as disregards various policies of the NPPF, which include but are not limited to, the protection of the views to and from an AONB, the protection of our best and most versatile Agricultural land, Greenbelt protection etc etc.

This plan is not Sound as this site A26 has so many environmental, traffic, flooding and financial issues it is unlikely to be built within the plan period or at all. It is unlikely with all the mitigation required that the site will offer any form of affordable housing after a viability calculation.

This plan fails the Duty to Cooperate as has not considered our neighbours in Rushmoor who have a huge development proposal for thousands of houses, most of which will rely on the A31 and A3 as their major transport links. Furthermore, Waverley sites such as Dunsfold which also have a huge impact on the A31/A3 junction have not been assessed for their additional impact.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the change of name of this proposed site.

This site is not just an old airfield! The majority of this site is agricultural and the title should reflect that.

I object to the increase in the size of this land parcel, all of which is in the greenbelt.

I object to the intended mitigation regarding traffic at Clandon/Send junction as this will do nothing to protect the local area. Traffic from this site will predominantly be travelling towards London in the morning, as is reflected around the home counties, thus the impact will be felt at Jct 10 /M25. Air pollution and congestion at this junction is severe and further traffic movements will increase the problem.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the increase in housing on this site. Tannery Lane is a very narrow lane and will not be able to cope with the traffic congestion. Furthermore, the whole village of Send has terrible congestion as it is used as a Rat Run for cars coming from Woking, joining the A3, any further developments in Send will add to this congestion.

I object as this is a brand new addition to the Local Plan and has not be subject to the same scrutiny as other sites in the Plan.
I object on the following basis;
It's Greenbelt and no special circumstances have been given to change this land classification.
Traffic along this stretch of Send is dangerously fast, there will be a multitude of accidents if you increase the traffic in this area.
You only need 2-3 acres of land to build 7000sq m of property, Why have you allocated 10 times that amount for this site? Would it not have been more 'open' to say that you intend to build 500,000 sq m of industrial units on this site rather than lie?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the amount of retail and office space this site has been allocated. Retail is in demise and guildford still has empty shops in the Friary, High Street and North Street.

I object to the huge increase in Food outlet space which is very unnecessary as we have a very nice offering of restaurants and fast food outlets already. If built, could force some of our top, independent restaurants out of business.

I object to the low amount of housing this site offers. Surely, with such a high housing target, Guildford should be utilising these brownfield sites for homes. I estimate that at least 1000 sustainable homes could be provided in this town centre site.

Object.

The University has plenty of space on the existing Surrey Research Park for expanding its buildings. the current site is full of surface car parking, huge empty plots, extensive greenery and landscaping.
The University markets this site as Low Density and should do very much more to EFFICIENTLY use its land before taking more of our countryside for development. They should invest in building out the huge empty plots, filling the empty offices and building over their car parks.

This proposed extension will also damage a very important Wildlife corridor, which is Ancient Woodland. It will also increase flooding in Wood Street, Fairlands, Park Barn and Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: IMG_1735.PNG (3.4 MB)
community”. The cost, however, would be to completely degrade or destroy an existing community in Normandy and Flexford.

While you talk about “appropriate mitigation for flood risk and flood risk management”, these are merely hollow words that totally underestimate the long-established problems faced by Normandy and Flexford in relation to flooding. If developers manage to make the 67-acre site “flood-free” (which I would greatly doubt), they would merely pass the problem on to surrounding lands and properties. This is irresponsible and unforgiveable and would have huge financial, insurance and quality-of-life implications for people already resident in Normandy and Flexford.

The proposed development at site A46 would also have huge impacts on local roads and would create even more traffic and access problems for local people. I would invite councillors and planning officers to visit Normandy and Flexford at peak times – and then to imagine the further chaos that will be caused by 1,100 additional homes, not to mention 1,400 pupils (or more) on a typical “school run”!

I am only too conscious that any objections to your proposals must be based on hard facts, not simple emotions or “NIMBYism”. I would therefore highlight the following specific points for your consideration:

• Guildford Borough Council has failed beyond any question to demonstrate “exceptional circumstances” why site A46 should lose its Green Belt status and therefore be developed.
• The allocation of site A46 for development does not take account of local communities’ needs and priorities – and therefore falls down on National Planning Policy Framework.
• Potential development of brownfield sites across the borough has not been adequately assessed before green belt has been lined up for potential sacrifice.
• A doubling of the size of Normandy and Flexford’s population is disproportionate and would destroy the rural environment.
• The council has failed to take serious consideration of the potential impact on local roads and commuters and the potential for creating gridlock in an already-pressured road system.
• The impact of additional vehicles (particularly queuing as they attempt to get on to or along the A323) would cause unacceptable levels of air pollution and would put public health at risk.
• There is no evidence whatsoever that a secondary school (or an additional primary school) will be required for Normandy. (If there is a need in the borough, there are arguably much better sites that would not require such huge numbers of people to travel by road to reach the new facilities.)
• The environmental impact (on valuable green space, ancient woodlands and potentially diverse wildlife) would be huge – and has not been considered adequately by the council.
• A number of important or protected species (such as hedgehogs, newts, snakes, badgers, bats and dormice) are known to live in and around Normandy, so are threatened by the development of site A46.
• Flood risk and flood management has not been considered adequately.
• The development site falls just 800 metres from the Thames Basin Heath Special Protection Area, so ignores requirements for “protection zones” to be respected around such locations.

Finally, I express my grave concerns that development of site A46 would be so clearly unjustifiable that Guildford Borough Council would face inevitable (and potentially protracted) legal battles if it presses ahead with its plans.

As a local council-tax payer, I can see that valuable financial resources would be lost and – at a time of ongoing national and international economic uncertainty – that the borough council would therefore have to make further and wholly unnecessary cuts to local services. We do not live in an economic climate where much-needed resources can be squandered on doomed legal battles by our elected representatives and their officials.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Proposal to build 385 new homes in a village of 1100 houses - an increase of 35% would change the rural character and openness of the village forever.

The infrastructure cannot support this large number of homes and is unsustainable.

Transport:
- The lanes are too narrow and in poor condition with tree roots growing underneath them making them very bumpy. Few have public footpaths
- Limited bus service
- Limited public footpaths
- Lanes too narrow for Cycle lanes
- Nearest Railway station is East Horsley with limited parking
- Drainage system is inadequate,

Schooling
- 1 x subscribed junior school The Raleigh shared with East Horsley
- Nearest secondary school is The Howard of Effingham also over subscribed
- 1x shared medical centre with East Horsley
- 1 x shop in West Horsley. No Post office. 1 x shared library in East Horsley
- Limited parking

385 new homes in West Horsley

OBJECT
This is a substantial number of homes for a small village to absorb and will change the character of the village significantly.

West Horsley’s Neighbourhood Plan survey estimated that we might require as many as 20 new homes.

A37 Bell & Colville site being on the main road with public transport links could meet the village requirement by limiting to 20 homes not 40.

Regarding the other plots of land under consideration, I believe that either plot A38 at Manor Farm or Plot A40 Waterloo Farm would have the least impact. However the number of houses proposed is excessive.

Consideration could perhaps be given to relocating the village hall to Manor Farm area where the public tennis courts and football club are situated.

Long Reach Sang Area Object
Why do we need a public park in this area of rolling acres of beautiful countryside? An extension of public footpaths and bridleways would be far more beneficial.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E6 The Leisure and visitor experience

Guildford town centre is a most attractive market town overlooking hills and countryside.

Its greatest draw being that it is not a stereotypical town engulfed by ugly outlet stores and industrial buildings and has much to offer.

Visitors from overseas, London and the rest of the UK enjoy the benefits of a sophisticated town offering excellent shopping, culture, sports and attractions whilst retaining its character and size. It is pleasurable to visit in comparison to Croydon, Reading, Portsmouth, Southampton and Kingston.

Policy H1 Homes for All Object

I support high density housing in urban areas, and would encourage the University to provide the majority of student accommodation on site with the land they have available. Thereby releasing a large number of rental houses back onto the market. Allocation of additional travellers sites to be reviewed as currently generous allocation in comparison with other boroughs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H2 Affordable Homes Object

Affordable homes in the South East is a contradiction in terms. Location is key.

Cheaper land sites should be prioritised in the borough to make it financially possible to build more affordable homes.

Land North of Guildford, West Horsley for example is more expensive and property developers will not build ‘affordable homes’ but expensive executive homes to sell at premium prices. We would be losing valuable countryside for no local benefit.

It is with relief that the number of new homes proposed in the Green Belt in West Horsley has been reduced. However, I strongly object to the following proposals in the current plan:-

1. Insetting West Horsley from the Green Belt The historic village of West Horsley with 41 listed buildings and set in glorious open countryside is in danger from the proposed development plan and insetting of becoming linked with East Horsley and creating Town Horsley. The character of West Horsley would be destroyed and should be preserved for future generations to enjoy. The West side of West Horsley is extraordinarily beautiful with rolling acres, copses, natural springs and streams meandering through the quintessential English open countryside and should be preserved at all costs. We are grateful to you and your team for removing the land between the back of Stilkmore lane and Ripley Lane. This area should be considered for inclusion in the Surrey Hills area of outstanding natural beauty and be within the village's conservation area. The open countryside is not only valued and enjoyed by locals but by visitors from nearby towns and cities and overseas.
2. Village Boundary West Horsley
