Considering concerns across the communities of Guildford, little has in reality changed since 2014: For instance, the proposals for Garlick Arch and the two slip roads to nowhere have not been assessed as viable by way of infrastructure or effects on traffic movement through the north of Guildford. The LPA’s declared position in 1984, which identified traffic requirements essential to make C1 C2 (B25 – now policy A 25) viable, are now simply dismissed and cheaper, less rational mitigation measures are put forward. In reality will destroy the existing communities of Ripley, West Clandon, Send, Merrow and Burpham, by virtue of increased of pollution and traffic levels. An opportunity to access the B2234 is a case in point. There is no legal access from Gosden Hill to the B2234 and no land has been set aside for such a link. Thus while implying this site will not be a giant cul-de-sac, in reality it can be nothing less without the land being set aside.
Railway

In respect of the proposed Merrow railway station, the current Wessex Route Study Final report of 21st August 2015 [para 2.7.5 page 22], while mentioning that there ‘were proposals’ [Park Barn and Merrow] takes the matter no further than that, and certainly not before 2045. Therefore there is no evidence before the inspector to suggest Merrow railway station will occur in the life of this Local Plan, with corresponding consequences for the Gosden Hill allocation, namely a further lack of required sustainable infrastructure to make the development viable.

Further, the Wessex route study proposes an extra platform to the town side of the station and elsewhere on the line, flyovers for the railway tracks. No land has been set aside for these proposals by the Guildford Local plan, thus suggesting any land within 100 metres or more of rail tracks that is built on, could hamper the efficiency of a major infrastructure improvement.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Addendum documents

Addendum to SHAR 2016 (June 2017)

This document is fundamentally flawed in its conclusion as was the original document in that the conclusion first bullet point claims there will not be a severe impact on the local and strategic highway network. This statement is flawed for the following reason:

“For simplicity numbers are rounded up in this example. If the lane capacity before severe impact occurs is 2,000 cph per lane, then if the lane is currently running at 1000cph an additional 20% will mean 1200 cph and no serious or severe impact will occur. If on the other hand the road is running at 1900cph and 20% is added then 2280cph will cause over capacity problems – the SHAR which fails to display current traffic levels in any rational sense, makes it impossible to assess effect of traffic flow increases. It simply displays increase (and alleged decrease in flows) while failing to accept that during the rush hour the A3 is running at approx 5800cph on a three lane road”

ANY increase in traffic as it is so near to capacity will have a severe and detrimental effect on the traffic flow! The Aldi site is a clear and recent example it was ‘only’ a 2% increase in traffic – but the roads were already at 100% thus severe delays occur at this location. SCC and Qualified Roads data specialist regularly and monotonously fail to take this fact into account during this planning process.

[Image]

Strategic Highway assessment report

[Image]

This road is ‘at capacity’ and ignored by the Aldi planning application and appeal. The additional pressure will cause grid lock and raise pollution levels in the process

[Image - Figure 4.7]
The map/graphic following clearly shows that the only option to solve the congestion problems is as laid out in the History of the A3 north of the A320 in that a Tunnel (providing a total of four lanes south and four north is in reality the only option to cure the traffic congestion and pollution accepted as existing in and around North Guildford

Conclusion statement 5.1.6 is irrational and totally unfounded each home brings with it 1.8 cars on average 10,000 homes is 21,000 vehicles with roads currently exceeding capacity there can be nothing but a ‘severe impact’ both congestion and air pollution.

Note: in the 101 pages of this document there is no calculation of the increase of North bound traffic going south into Burpham to access the North bound Lane of the A3 or its affect on Traffic heading East on Clay lane delayed by the large increase in traffic from The gosden Hill Park and ride departing in the evening.

[Image]

From the Borough Economy and infrastructure document:

Note changes go beyond being minor in nature – but still fail to take any notice of Burpham resident’s comments. Noting on page 17 the display of the corridor to Gosden Hill right through the middle of Burpham (without consultation with Burpham) when the logical corridor for the park and ride buses would be onto the A3 and down to the A320 and into the town centre – for ‘Park and ride’ do not stop on the way thus do not need to be in Burpham at all, should a rational always junction sit on the A3 allowing rational access to Gosden Hill.

Charging for documents: During the Burpham Neighbourhood Plan the examiner ‘complained’ in his report that we could not charge £5.00 yet Guildford Borough want to charge over £300.00 for their local plan – is this disenfranchising the community?

Housing Numbers

The SHMA position within Surrey is clearly indicated by the diagram below – the Council was not elected on a ‘manifesto’ to build more than double that of any other borough in the county. The current ‘rational calculated level’ should be 404 per year which moves the rational number over 19 years of the plan to 7,676 which is still the highest level within Surrey! Noting this number is the raw number prior to reduction for ‘considerations’ in the process e.g. Green Belt and flood plain etc allowed for within the NPPF and NPPG. None of which have been included within the final number.

The SHMA document is the basis for all arguments on both housing and Industrial land allocation – this number must be rational and reasonable. The current document is well out of the statistical probability (standard deviation) summation of the whole of Surrey and on this point alone simply cannot stand unchallenged.

From the opengovernment.org.uk web site:-

“Priority 1: Extending the principles of openness and transparency

The public must be provided with easy access to accurate, credible, high value information in a format that can be easily read and understood, so as to ensure that key actors across the public, private and voluntary sectors can be held to account. Open government has three parts:
1. Transparency – opening up of government data and information on areas such as public spending, government contracts, lobbying activity, the development and impact of policy, and public service performance.
2. Participation – support for a strong and independent civil society, the involvement of citizens and other stakeholders in decision making processes, and protection for whistleblowers and others who highlight waste, negligence or corruption in government.
3. Accountability – rules, laws and mechanisms that ensure government listens, learns, responds and changes when it needs to.”
The current SHMA fails on these aspects of openness and accountability

**Topic Papers**

There is no indication that ‘topic papers’ form part of the Local Plan or simple additional pieces of speculative paperwork. Nor indication this information has been supplied to the public ‘as a component part’ of the local plan.

The Green Belt and countryside topic paper attempts to justify Exceptional circumstances as laid out in the NPPF stating ‘in general terms’ there are exceptional circumstances’

*General definition: “considering or including only the main features or elements of something; not exact or detailed.”*

*Exceptional definition: unusual; not typical. This alone displays a misinterpretation of the word ‘exceptional’*

How can justification for change of Green Belt lines for ‘unusual atypical’ reasons be claimed by stating ‘there is no exact reason or detail’.

[Image - ‘Exceptional circumstances’ 4.73]

From the 2014 Pegasus report vol II Addendum 17 04 2014 clearly states such exceptional circumstances WILL NOT EXIST. Thus fundamentally undermining claims to move the current Green Belt Line

[Image]

[Image]

[Image]

Clearly the process is not being followed as it clearly states these are not the finalised documents to be submitted. Thus this plan fails in the requirement to provide a set of completed documents to the community for comment and they leave themselves open to make changes beyond the sight of the community again failing the open government test.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** pslp173/697  **Respondent:** 8581505 / Burpham Neighbourhood Forum (Jim Allen)  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

*Answer (if comment is on questions 1-7 of the questionnaire): ()*

We also have concerns regarding the manner in which evidence based documents have been updated throughout the local plan process. For instance, the Green Belt and countryside study was subject to a number of updates, leading to a disjointed document, which in any case is no longer up to date given the changes to the local plan prior to the current restricted consultation at REG19, E.g. Appendix 8: Potential Development Areas, being a case in point fails to include the extended site at Gosden Hill. This chaotic content in excess of 200MB plus (greater than 1000 pages) of documentation with addendums to previous documents, means trying to access and assess the up to date text being used in the final plan is impossible, for both the local plan team and members of the public. A total re-cataloguing of the suite of evidence based documents used to create and support the final plan is required to make this Plan sound and justifiable. At this very basic
level an Index of Documents is required complete with web site address where they can be found. A requirement for proportional evidence has not been met.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/2155  Respondent: 8581505 / Burpham Neighbourhood Forum (Jim Allen)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Introduction

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Front cover
- typo small ‘b’ in Borough
- No plan period given on front cover

Page 5, Foreword
(1) It is necessary to have justified statements of fact within the opening comments. The Council Leader’s statement is not justified, for instance in Para 3 the comment is not evidence-based; rather it is a subjective statement, not yet justified.
(2) We welcome the firm commitment that infrastructure should be in place before development, but would add a half sentence break into the last sentence. A reword is required to include “infrastructure prior to occupation of the development”.

1.13 Neighbourhood Planning
This paragraph and its heading are misleading as it appears to refer to the development plan in its normal meaning, rather than neighbourhood planning. This should be re-worded if it is intended to refer specifically to neighbourhood plans. For instance the following could be considered “This means that the neighbourhood plan is the first consideration in determining planning applications....”

1.15 Key diagram
- It is not clear from this paragraph where to find this diagram; by name or web location

1.16 Evidence Base
We are concerned that not all new evidence has been taken into account as some documents in the evidence base are greater than 10 years old: eg. Sites of Nature Conservation Importance Evidence 2004-7, referring back to 1997, 20 years ago.

Another example is that of the Green Belt Purposes Schedule with the Green Belt and countryside study, which was identified as flawed in 2014 and has not been amended or corrected since that time. Despite the additional volumes added to that document, we have been unable to find any text in Appendices 3 through 8, in the Green Belt and Countryside Study, Vol ii Addendum of April 2014, nor does it indicate that any sub documents should be consulted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: BNF comments Local Plan 19 07 17 23 25 table.pdf (5.3 MB)

Comment ID: pslp171/2156  Respondent: 8581505 / Burpham Neighbourhood Forum (Jim Allen)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Key facts
2.3
These population predictions pre-date the EU referendum and were based on potential immigration figures continually increasing due to free movement. These predictions are no longer valid and must reflect the likely situation post 2016. Taking the averages from the National Statistical Office, population predictions over 20 years will only actually rise by 1.006% giving a projected total of 146,388 over the twenty year period; An increase of just over 1,000 in Guildford population. Taking the population census last growth figure [2001 -2011] of 5.8% [over 10 years] the number is 153,577 or an increase of 16,377, yet the GBC prediction is 21,653. Again GBC figures are way outside statistical probability. With no supporting evidence provided for the GBC calculations, one cannot tell how they arrived at such a high figure. Noting all figures quoted within the Local Plan are higher than the statistical probability of them occurring at this high level. We are happy to debate this matter further at the examination in public.

Employment
2.8
The wording of this paragraph suggests that there are 95,000 job vacancies not 95,000 employed persons. The wording ‘opportunities’ is incorrect.

2.10
The reference to skills shortage is a pejorative statement.

2.10a
Clearly this is a statement of admission of currently inadequate infrastructure [on many levels] thus this statement should make it very clear that the Local Plan must prioritise the provision of infrastructure, and planning permission must clearly state and prove it needs prioritising.

2.11
We suggest the following change: A3 replace ‘trunk’ with ‘primary route’ which is a more definitive description of this road.

2.14a
This statement needs clarifying: Guildford and urban areas: Burpham is not congested just at peak times, but generally due to the two lane funnel south towards the A320/A3 intersection. This statement should recognise this as a separate problem which will increase with current development proposals. This statement infers problems only exist on the A3 heading north when in reality the problem is as complex heading south on the A3 and through London Road and Clay Lane in Burpham, which are used as traffic congestion relief roads for the A3.

As a result there are corresponding problems with air pollution in Burpham, which has more traffic than Ripley village [which has the results of a 3 month study, demonstrating pollution levels in excess of internationally acceptable levels]. Therefore this should be monitored prior to any further ‘strategic’ development in the Burpham area.

2.14b
Previous representations have set out the importance of local buses stopping at Guildford main railway station. Despite this item being raised on numerous occasions, nowhere in the Plan is there a reference to a specific intention to ensure buses
from all areas of the Borough visit the railway station as part of their standard routing; thus, fundamentally, failing to provide a sustainable integrated transport system.

**Housing**

2.18

As already discussed, existing evidence of housing need does not support the housing aims of the plan. The document calculations and background evidence sources have been hidden from view. Statistical assessment in comparison with other SHMAs around the country suggests that this document is fundamentally flawed. [See Local Plan summary at end of this document.]

2.21

Financial values become meaningless at the end of a 20 year plan period; we recommend that values are expressed as a percentage of national house prices rather than actual value so that this statement is always current.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: 📄 BNF comments Local Plan 19 07 17 23 25 table.pdf (5.3 MB)

---

**Comment ID:** pslp172/4089  **Respondent:** 8581505 / Burpham Neighbourhood Forum (Jim Allen)  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Sub section 2**

Gypsies are traditionally roamers. Will these sites be very short term lease or errantly taken by one family as a permanent home? If they are permanently taken what will happen to the travellers who want a temporary space? Additional wording as to longevity of tenure should be included in Policy A25.

**Infrastructure**

An all movement junction is essential as roads in Burpham are already over capacity. Anything less is an abdication of responsibility in respect of reducing pollution and easing traffic congestion within the Ward.

**Subsection (1)** should be wholly removed as this is unsustainable and fails to even ‘try’ to mitigate or solve the traffic problems already in existence and the problems this development at Gosden Hill will cause the community of Burpham. A single sided A3 access fails to provide a sustainable park and ride system, fails to provide access to the site from the south, fails to provide a departure route to the M25 and fails to acknowledge that a four way was regarded as essential in 1984 whereas traffic in the past 20 years has increased by over 40%. Since the traffic estimate in 1979 [see estimate below in relation the construction of the A3 in 1979], when the growth was predicted at 65% up until 1995, and since that time has increased a further 40% (May 20th 2016), it is irrational in the extreme to make a claim that a single sided access is now acceptable here at this site.

[Image]
Sub section (3) sets out requirements for a park and ride facility. This requires an all ways junction to make the proposal sustainable, as any ‘park and ride user’ will want to return in the same direction as arrival, i.e. towards the M25. No provision has been made for the un-quantified number of cars [possibly now in excess of 1,000 vehicles as max number not specified nor land area required]. Furthermore the rational route for any park and ride bus would be out onto the A3 down to the A320 and the same route in reverse. Introducing buses into Burpham as part of this park and ride project, which do not pick up along the route, will simply increase pollution within the London Road corridor. There is no opportunity to widen the road to accommodate a ‘third and fourth lane’ to allow free movement of public transport.

Subsection (8) The use of the word ‘mitigation’ in (8) is weaker than the word ‘cure’ and implies a predilection to a reduction in viability and sustainability of the existing community of Burpham, forcing it to suffer from the vagaries of legal and political argument, rather than a practical and sound planning resolution to the problems created on the infrastructure by the selection of this site as an extension of Burpham.

Sub section (9) The use of the word ‘mitigation’ in (9) is weaker than the word ‘cure’ and implies a preference to a reduction in viability and sustainability of the existing community of Burpham, forcing it to suffer from the vagaries of legal and political argument rather than a practical resolution of the problems created within the infrastructure by the selection of this site as an extension of Burpham. The wording is seriously weak and provides no protection for the community of Burpham from cost saving exercises to allow this development to go ahead, in the full knowledge that the community of Burpham is left naked to this intrusion of vehicles, low water pressure and overflowing sewers. This policy fails to comply with section 152 of the NPPF, which states;

152. Local planning authorities should seek opportunities to achieve each of the economic, social and environmental dimensions of sustainable development, and net gains across all three. Significant adverse impacts on any of these dimensions should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. Where adverse impacts are unavoidable, measures to mitigate the impact should be considered. Where adequate mitigation measures are not possible, compensatory measures may be appropriate.

The item(3) in the opportunities section of the policy is suggesting that land is required to be set aside to allow for such a route to occur, yet no land has been set aside for access at this point.

https://issuu.com/broadwaymalyan7/docs/gosden_hill_village_guildford - vi

This very late addition to this policy was not included in the Reg 18 documentation and fails to identify where this link road should be introduced. [Noting no traffic study has been completed on this proposal and unlike Blackwell Farm no new junction layout has been displayed]. No legal access currently exists between the site and Merrow Lane, save at the current farm entrance. This would mean that the local Green Space recently designated in the Burpham Neighbourhood Plan would be substantially affected by such a proposal, contrary to the wishes of the community of Burpham.

In general terms the policy as currently worded is deficient for the following reasons:
(1) the Gosden Hill site is separated from the community of Burpham by common land, Ancient woodland and Local Green Space, as designated in the Neighbourhood Plan, along its full length from London Road to New Inn Lane. At no point will this site merge with the community of Burpham, thus it will be a cul-de-sac village on the outskirts of Guildford, not really part of the urban area. Eg it will be similar to Jacobs Well – adjacent to but separate from the urban area. There are question marks over its sustainability if developed along the terms set out in this policy.

(2) We are concerned by the lack of reference to the need to provide adequate drainage at an early stage of planning, preferably by setting out minimum drainage requirements within the wording of the policy. This is strongly advised due to access to sewers being restricted by the current system, which is subject to hydraulic lock on the gravity section of the Burpham sewer precluding connection to the Burpham sewer system (which carries Merrow sewage as well. Thus the site assessment is substantially flawed see page 72 at web site https://issuu.com/broadwaymalyan7/docs/gosden_hill_village_guildford - vi
(3) 1/3 of the site is subject to the Burpham Neighbourhood Plan, which is not mentioned in the above policy and it should be in the Key Evidence.

(4) The site is currently designated Green Belt and has a strong defensible boundary with Burpham. Changing this boundary to an indefensible fence line endangers the very principle of the Green Belt.

NPPF Para 80. Green Belt serves five purposes:
- to check the unrestricted sprawl of large built-up areas
- to prevent neighbouring towns merging into one another

- to assist in safeguarding the countryside from encroachment
- to assist in urban regeneration, by encouraging the recycling of derelict and other urban land

Moving the Green Belt line from the current solid line to its new proposed location fails to meet requirements of bullet point 3.

[Image]

Existing defensible boundary [above]

[Image]

Indefensible boundary

There has been no demonstration of exceptional circumstances as required by section 82 of the NPPF to move the Green Belt line at this location.

83. Local planning authorities with Green Belts in their area should establish Green Belt boundaries in their Local Plans which set the framework for Green Belt and settlement policy. Once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. At that time, authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period. Does the map below suggest that the new line is safe?

The proposed boundary line fails to ensure ‘their intended permanence’. The current Green Belt line established during the original Green Belt exercise has worked well for over 60 years. Moving that line will destroy its principles. As displayed in page 100 of the developer’s promotion document where the new line is to be fundamentally destroyed by harvesting the trees on this site.

https://issuu.com/broadwaymalyan7/docs/gosden_hill_village_guildford_-_vi

[Image]

[Image]

Potential air quality issues – this is incorrect as the word ‘potential’ suggests that mitigation and obfuscation might make the problem go away. The reality is that the site alongside the A3 (the old C2) is subject to air pollution and also fails to record the noise constraints alongside the A3 noting this was ‘tested’ alongside existing homes. Introduction of new homes would mean the area would be extended north east.

This site is within a noise and air pollution action area designated by DEFRA.

The claim to be any ‘grade’ of farm land is spurious as there is no detailed land study of this farm available from MAFF using the 1988 criteria. – noting sections are Grade 2 farmland taken from the adjoining Dodswell farmland assessment. Yet the document Gosden Hill Village Vision and Development framework document claims it is Grade 2 farmland – the question arises “should we be using Grade 2 and 3a farm land (our food source land) for housing developments such as
Claiming it is sustainable to build on prime farm land is an anathema.

Changes not made, that should have been made by now - without instigation of the residents' comments but ignored by the Guildford Borough Council.

(1) The refusal to make public the raw data and formulae used to calculate the SHMA addendum suggests that it is fundamentally flawed.

(2) No exceptional circumstances have been publicised to justify movement of the Green Belt boundary from the current urban development line in Burpham.

(3) Correction of statements in the transport documents, which fail to accept that a road is running at capacity, according to the documents “Road Capacities by John Van Rijn of Indevelopment” or of the Ministry of Transport document design manual for Roads and Bridges Volume 5 Section 1 part 3 Traffic Capacity Urban roads. If the road capacity is being exceeded or greater than 75% then there is a clear requirement to solve the current problem prior to agreeing to add more traffic to that road. For example Clay Lane is running one car every 3 seconds westward during the rush hour, exceeding capacity of 1020 vph with a 60/40 split on road type UAP2. The total both ways is exceeded by a single line of traffic in excess of 1020vph going west. Clearly any proposal to increase this traffic level is unacceptable and, as the current problems are ‘severe’, they can only deteriorate to ‘very severe’. This alone provides the exceptional circumstances for not building in the Green Belt.

(4) Withdrawal of this Burpham road scheme “south on / off mitigation” for traffic problems caused by Policy A25: as it was pre-designated inadequate in 1984 to solve the traffic problems of this site when it was half the proposed size of A25.

(5) Removal of claimed ‘junctions improvements’ through Burpham. They are a fundamentally flawed proposal, because journeys through this area will increase, from the current 13 right turns for 11 routes to this proposal, which increases to 20 right turns for an improvement to 13 routes. While an all-way junction with link to the A25 would reduce the number of right turns to 11 and provide 18 new routes through the area, this would decreasing traffic congestion throughout the north of the borough; through Ripley, Send, Burnt Common, West Clandon, Merrow and Burpham.

(6) The correction of the Green Belt study, to ensure a rational balance to the traffic-light study, is achieved.

(7) The ‘walk to’ distances of the old C1 C2 site, now Policy A25, should be re-assessed because of the assumptions, as all access is now displayed as entering and exiting the A3 side of the site and it has been extended north east towards Send and West Clandon. Thus any assumption of ‘walk to’ distances via Merrow Lane, are fundamentally flawed and scores achieved are incorrect.

(8) No account has been taken of the grade of farmland as identified in Policy A25 which, although untested by the Min Ag&Fish, is highly likely to come out Grade 2 as it was part designated with this status some years ago, when an adjacent farm was designated with Grade 2 [Plot C3 and part of C2]. It is irrational to use up quality farmland when lower Grade 4 is available to the west of the Borough.

Notwithstanding our specific comments on wording and detail within this confined and incomplete REG 19 non-statutory consultation we find we need to make more general comments following research on the overall Guildford Borough Local Plan. The following section must be considered in the light of this compromised Reg 19 public consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Comment ID: pslp171/2233  Respondent: 8581505 / Burpham Neighbourhood Forum (Jim Allen)  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy D1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Place shaping: This is not a good title as it implies coercion.

Policy D1
Sub section (2) should contain “must” as opposed to “should”.
A statement should be inserted stating that the terms of adopted Neighbourhood Plans must be complied with. Furthermore there is a need for an air impact assessment policy.

4.5.8
Should be retained.

Key Evidence: some documents are out of date. E.g. the Residential Design Guide SPG evidence reference document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/2234  Respondent: 8581505 / Burpham Neighbourhood Forum (Jim Allen)  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy D2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Sustainable design, Construction and Energy – Inappropriate heading
Subsection (1) too vague – delete.

4.5.19
Why has this statement been removed? Reinstate. This statement displays serious concern for water supplies; removing it attempts to hide reality.
4.5.30a
Should be removed in full.

**Key Evidence**
The community has not been consulted on the evidence at Reg 18.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

[Page 70, paragraph 4.4.2]
Reinstate full description of EM3 MEP.
Note: Too many unfamiliar TLA’s confuse the reader throughout the document; it should be a policy of the documents layout to use no abbreviations unless they are in common use.

[Page 70, paragraph 4.4.3a]

4.4.5
Industrial expansion figures are miscalculated with knock on effect to employment and housing, etc. The SHMA, as previously stated, is incorrect so industrial requirements are also mismatched.

4.4.6
Retain definition of ‘ELNA’ at least once.

Policy E1
As the SHMA housing figure is excessive by 30%, consideration needs to be made to the resultant change in the required level of industrial floor space and subsequent jobs ‘needed’ to create ‘full’ employment. A rough calculation would indicate a reduction in employment requirements to 3,200 jobs.

Item ‘D’ does not make sense.

[Page 71, paragraph Policy E1 (5)]

Within this policy, SCC depot was planned to be moving to the Slyfield Industrial Estate extension. No mention is made of this in this policy. In previous iterations of the Plan this proposal was included. Is this proposal still current? Is it no longer proposed that SCC would move sites? Furthermore, what is the knock on effect to the expansion of Slyfield Industrial Estate, which was primarily based on both GBC and SCC effectively amalgamating onto the extension site?

4.4.7
‘ELNA’ should be left expanded for ease of reading in all cases specifically within the definitions section.

4.4.8
There is no safe-guarded land for infrastructure: with both Burnt Common and Gosden Hill identified for some industrial use a strong infrastructure link to the A3 is a basic requirement. However no rational provision has been made for northbound (A3) access to Gosden Hill or southbound Burnt Common, nor access to Gosden Hill from Burnt Common.

Thus, should a company decide for whatever reason to take up opportunities on both sites they are unable to access one from the other without considerable mileage in both directions for what is less than a quarter of a mile as the crow flies. Does the statement below tally with the current SCC waste management plan considering that SCC is apparently not moving from Merrow Business Park? Currently the waste management plan is under review, thus item 10 is ambiguous.

[Page 73, paragraph (10)]

4.4.7 The figure for meeting employment needs is one third higher than required as homes needed is approximatly 7,000 not 10,000.

4.4.8 Reviewed every 3 years.

4.4.11a
Habitat Regulation Assessment: has this been defined? Yet another tla to remember...

BDES 2013 – 2031 (old dates) (3) enterprise M3 2014;

The document has not been publically scrutinised by the community and is not available under that description on the GBC Local Plan website. The document promote’s Guildford as a ‘growth town’, yet there is no mention of this growth town in the Local Plan; nor have the residents of the Borough been consulted about this status. Does this document fundamentally affect the Local Plan? If so why is it not more widely published within the evidence base? There is no mention of what these ‘improvements’ mean in respect of the Local Plan provisions.
This document is promoting rail infrastructure with no cooperation with Network Rail. This misleads the LPA in that no station is planned at Gosden Hill within the life of the Local Plan.

No other mention of these proposals is included within the rail report, yet specific mention is made of other projects including CrossRail and Heathrow southern link, suggesting Network Rail give the proposal little merit.

Enterprise M3 statements referring to Guildford; Not one aspect of the strategic package has been consulted on with the community of Guildford and the document is not available on GBC web site. This organisation appears to have undue influence on the Local Plan while being totally unaccountable to the community which will be affected.

The alleged Interchange improvements are not going to happen until post 2030 according to Highways England and their commitments schedule. No details exist in the public forum to allow them to be studied in detail.

Again, this document is supporting a non-existent, non-achievable goal [see above]. Clearly the writer of this M3 document has little knowledge off the situation in Guildford, as they refer to corridor improvements ‘near’ Guildford when in reality the improvement is needed to be ‘along the length of the A3 through Guildford.

So the unaccountable Enterprise M3 can ask for road improvements to be accelerated yet, when the community ask for the same improvements, they are ignored.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**  BNF comments Local Plan 19 07 17 23 25 table.pdf (5.3 MB)
4.4.14
Burnt Common/ Gosden Hill road access non-existent.

Addition: delete as it contradicts policy E1 and implies that the town centre offers most business opportunities. It adds nothing to the Plan.

Recommendation: add “subject to other policies in this plan” because this is too loosely worded at present and could lead to other uses in residential areas.

[Page 75, Policy E2, (6)]

4.4.16
Two new stations Merrow and Park Barn are not in Wessex Network Rail Plan to 2043. While one paragraph mentions that there was a ‘suggestion’ of new stations, it is ignored throughout both this and all other relevant documents concerning the railway, and can therefore only be considered Aspirational at best.

4.4.22
Estimated ground space subject to change in SHMA -

4.4.23a
Surrey waste management plan is in process of being re-written in 2018. This will be a fundamental change of waste handling as it is being contracted out by adjoining boroughs that use GBC sites during the Plan period. Thus site capacity needed throughout the Borough is subject to change in the next three years.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

4.4.56a
The leisure and visitor experience, insert “Appendix 2 forms part of this policy”

4.4.59
Please add “and enhanced” after “preserved”.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/2203  Respondent: 8581505 / Burpham Neighbourhood Forum (Jim Allen)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4.4.71
The first sentence irrelevant as it includes all time periods of the day. We welcome mention / acknowledgement of parking and traffic problems and request definition of ‘spatial vision’ and source of this document.

4.4.78
ONS 2014 projections are incorrect; overseas student numbers have been double counted.
4.483
Study 2014 is out of date.

4.4.68
The first two sentences of this statement should be left in. The statement is actually referring to flood zone 3b, where there should not be building in any respect. This should be accepted as a severe constraint within the Local Plan. We noting no constraint of any kind have been applied in this Plan, merely ‘Mitigation’ where it is known to cause potential damage will be done by the policy. The NPPG refers to essential infrastructure only. This does not cover business or domestic buildings. No attempt to build in Zone 3b should be supported by this Plan. The implication that the Council is attempting to prevent flooding in a natural flood plain is worrying as speeding water through a natural river course will seriously erode the banks.

4.4.87
Guildford Town Centre regeneration strategy: the relationship between the TCRP and the LP statement should be defined here. The GTCRP Document has not had scrutiny at Reg 18. It is unknown what ‘SPD’ means, and the relationship between it and the Local Plan and the GTCRP’s Aspirational Plan is unclear, as the regeneration strategy is unavailable to comment on.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<tr>
<td>Student accommodation; university students cannot be forced to live on site’ noting the university is not the only education centre in Guildford, [e.g. There is The University of Law, and the Academy of Contemporary Music.] The university should not be singled out in this policy (sub section 5) Student accommodation should be re-worded “<strong>Educational centres with students from outside the Borough and requiring student accommodation should provide at least 60% on site or in purpose built units</strong>”</td>
</tr>
</tbody>
</table>

4.2.1a

Page 35 Key Evidence Housing Policies 4.2

Should include the text “Appendix 2 forms part of Policy H1 Homes for all.”

4.2.3

The addendum to the SHMA did not comply with central government guidance concerning openness of calculations and raw data. The exact raw data and formulae used have been claimed to be commercially confidential, contrary to open government principles. Statistical analysis by bodies other than GBC suggest that the raw data used and the resulting calculations are not comparable with other similar SHMA exercises across the country, suggesting that the housing number is considerably higher than is statistically rational or mathematically correct.

4.2.4

The requirement of 15% to meet M4 Standards is commendable but this needs re-wording so that the 15% is across the borough. If less than 7 homes on any one site were proposed, it is unclear how the 15% would be captured. It would be better worded as “15% of all planned/completed new homes in the Borough in any one year must be M4 compliant.”

4.2.16

Student accommodation: Guildford College has more students on the books (distance learning) and more students will be living at Guildford College following a recent planning application for student accommodation on site. Perhaps re-wording would better explain the student overnight accommodation needs.

4.2.18

The total of student accommodation should logically be removed from the SHMA and treated as a separate calculation and separate need [Similar to how a hotel chain would calculate need in a location]. Only the final number should be translated into policy as ‘beds needed’ across the Borough. The separation should be clearly shown in any calculation. This is because the type and style of accommodation, and nature of occupation, are different than for family homes. The requirement for student beds is ‘yearly’ or even ‘seasonal’. They are not permanent Borough residents across the life of the Plan (20 years). As many as 60 students could be sleeping in the same ‘bed space’ over 20 years if they are attending one term per year, thus numbers for students cannot be aligned with their lecturers who could occupy the same bed space for the full 20 years. A statistical error of 60% plus could be introduced if the calculations are incorrect and remain unchecked by an independent auditor.

Page 41 Key Evidence.

- SHMA Guildford addendum report 2017-06-17

- Land availability assessment GBC 2016

Both of these documents have been developed outside the envelope of public scrutiny due to claims of commercial confidentiality, thus raw data and formulae used in their preparation have not been open to scrutiny. This totally contradicts the Council’s own executive statement of openness and the principles of open government. The Council acknowledges its duty to cooperate; however while preparing the Local Plan at no stage has the LPA communicated with the Burpham Neighbourhood Forum in respect of their intentions within the ward of Burpham, seriously undermining the purposes and
spirit of neighbourhood planning. This is a flagship government initiative. In paragraph 2.13 of their topic paper on their Duty to Cooperate, neighbourhood planning groups do not fall within the Council’s interpretation of groups with whom it should cooperate, while the DCLG take a different approach and state “Where a neighbourhood plan is brought forward before an up-to-date Local Plan is in place the local planning authority should take a proactive and positive approach, working collaboratively with a qualifying body. This could include sharing evidence and seeking to resolve any issues to ensure the draft Neighbourhood plan has the greatest chance of success at independent examination” [https://www.gov.uk/guidance/neighbourhood-planning-2 Paragraph: 009 Reference ID: 41-009-20160211] GBC has failed to share the SHMA evidence (raw data and formulae) with the Neighbourhood Forum and thus failed in both their duty to cooperate and show the openness requirement of the process.

We are concerned that plans to divert the Wey Navigation to permit non-essential development within the flood plain are being hidden behind these changes. Noting the EA has not prevented excessive erosion along the Wey between Stoke Lock and Bowers Lock since 2014. Over 150 trees are endangered by this policy.

A section in this policy referring to Local Green Spaces is required, as it is notably missing throughout this Plan.

[Image of writing]

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4.3.17 Page 5.54 Policy Green Belt

[Maps]

The statement 4.3.17 seems irregular and counter intuitive in that while Green Belt has been introduced ‘to prevent coalescence’ between Ash Green village, Ash and Tongham [the Executive Council leaders own patch!], this protection has been removed along the A3. The A25 Gosden Hill site [formerly C1/C2 plus extension into C3 north] has been extended outwards from the urban boundary, while Burnt Common has been removed from the Green Belt adjacent to Send, meaning Send is coalescing with the urban boundary of Guildford [A section of the Council political opposition’s ‘patch’] forming a ribbon development along the A3, something which the Green Belt designation is meant to prevent.

Noting in the Green Belt study of 2014, site B8 is considered highly sensitivity yet C1, C2 and C3 (owned by a developer) are not, when in fact C1, C2, B6 and B7 should have been given the same weighting in this study as D1. It would be rational to conclude that this assessment was based on the commercial confidentiality of the land owner’s intentions, as opposed to the public interest assessment of the genuine purpose of the Green Belt as supported by the Council’s previous actions in:

- 1949: Tree Preservation Order on boundary of development line and the old and original Green Belt line.
- 1984: Refusal for inclusion in Local Plan of that time.
- 2003: Local Plan the site was not included for residential or commercial development.
- 2011: South East Plan High Court decision to exclude this site from the Local Plan.

The only differences between sites D1 and C1,C2,C3 are that they are separated by a railway line and D is owned by the National Trust and ‘Cs’ are owned by a property developer.

Nowhere in any legislation is the “defensible Green Belt line” permitted to be designated or defined by the land ownership.

[Planning Practice Guidance issued by Government in March 2014 aims to make clear that unmet housing needs (including for traveller sites) is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development on a site within the Green Belt]

4.3.20

This document under Regulation 19 is meant to be ‘the completed Local Plan’ yet in this paragraph it clearly states the ‘forthcoming’ Green Belt Supplementary Planning Document. This is yet another document referred to in this Plan which actually doesn’t exist in this time frame [up until 24th July 2017] and thus cannot be assessed by the public.

4.3.24

As villages have now been proposed to be inset in the Green Belt does this statement refer to ‘inset’ or ‘washed over’ habitation?

Key Evidence page 58

Refers to the Green Belt and Countryside Study; this is flawed evidence as identified in previous public consultations since 2014.

Maps displays inset villages within the green belt while the ‘principle’ of inset is sound the boundary lines are not for example Ash Green boundary instead of following the tree line a ‘defensible line’ as required by the NPPF/NPPG, it chops through an area of wood land with no strong defensible line thus it fails this requirement “define boundaries clearly,
using physical features that are readily recognisable and likely to be permanent”
Page 24 fails to identify Local Green spaces, Ancient woodland and Suitable alternative local green spaces,
Page 61 paints an imaginary line through the middle of the Ripley Green far more rational to follow garden line, it appears
the amendment 2 actually includes the north side of the high street for no benefit to the Green Belt or to Insetting – this line
should be agreed with each parish ...
Page 82 has an identified settlement boundary with ‘numerous’ residential properties outside the boundary suggesting
irrational thought patterns
Page 84 also has a strange delineation between countryside Green belt and inset village suggesting these areas are strategic
employment sites with no strategic highway access and introducing business premises into a residential area without logical
or rational reasoning of boundary delineation.

4.1.2
The plan makes multiple references to sustainable development. However most development put forward appears to need mitigating. ‘Actual adverse impacts’ are singularly missing from any commentary or policy. When considering noise, air pollution or lack of infrastructure, on 53 occasions ‘mitigation’ is used to claim an improvement in sustainability of the Plan’s proposals.

There are multiple references to ‘should’ but never ‘shall’ when referring to the provision of infrastructure. In short these policies are not future proof and strongly suggest sustainability problems, 57 in all, with only 4 providing sustainable solutions. For, ‘to mitigate’ strongly suggests something has failed during the planning process: if it had not failed no mitigation would be required.

Page 27 4.1.1a
The definition below is not recognised. The Minister’s statement is more definitive.

[Quote from the Minister reads “Development means growth. We must accommodate the new ways by which we will earn our living in a competitive world. We must house a rising population, which is living longer and wants to make new choises. We must respond to the change.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

It is our assessment that the plan, in the round, presents a level of development for the borough that is unsustainable in its present format. Specifically, the plan fails to provide sufficient infrastructure to deal, in a sustainable manner, with Traffic, Water, Sewage, Air and Noise Pollution requirements. In broad terms when infrastructure is addressed in the plan the relevant references make such provision ‘generally optional’, encouraging mitigation measures as opposed to requiring the provision of specifically identified infrastructure, which is required to provide a realistic solution to the problems caused by the level of development set out in the Plan.

For instance, in relation to highways requirements associated with specific land allocations, road proposals in the plan have not been properly tested by or to Highways England requirements as set out in the Design Manual for Roads and Bridges. A specific example of this can be found in respect of the Gosden Hill land allocation: An allocation for development was been turned down in the 1980s on this site, due to chronic lack of infrastructure, noting as an example [left] an extract from the GBC objection to the Gosden Site proposal, in which the council specifically noted the offer of a four way intersection but still found the allocation of a smaller section of the current proposed allocation unacceptable. This decision was supported by the local plan inspector at that time, and again in 2003. It would be reasonable to conclude that traffic levels have increased somewhat since 1984 and yet the current proposals for the Gosden Hill allocation makes only a passing reference to junction improvements south bound and make no provision or requirement for the all ways junction proposed in 1984, leaving all north bound traffic to travel south through the community of Burpham. NPPG paragraph 152 states “Local planning authorities should seek opportunities to achieve each of the economic, social and environmental dimensions of sustainable development, and net gains across all three. Significant adverse impacts on any of these
dimensions should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued.” The failure to provide an all ways junction fails this basic principle. It is also worth noting the Council successfully challenged the Gosden Hill allocation in the former the South East Plan on sustainability grounds in the High Court. There is nothing within the current proposals to suggest adequate levels of infrastructure will now be provided [see our separate detailed comments on Policy A25]. Therefore the proposal remains unsustainable and should be removed.

Notwithstanding the lack of sustainability, the plan’s ‘trajectory’ has failed to follow statutory process in that the introduction of new policies and background documents has occurred after closure of Regulation 18 and the Regulation 19 stages. No completed draft plan has ever been displayed to the public for consultation at Reg 19.

[Figure 1] Martin Grant proposal August 1984 (appeal against local plan)

[Page 30 4.1.9a]

The housing number within the table above, 450x2 + 500x3 + 550+600+700x3+800+810+850x3 does not calculate to 12,426 but 9,810 another indication that the Housing Numbers are fundamentally flawed. Raw SHMA data has not been displayed to the public, contrary to the principles of open government [see closing comments at the base of this document]. The numerical data are not statistically sustainable. We therefore question the final figures in this policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: BNF comments Local Plan 19 07 17 23 25 table.pdf (5.3 MB)
Air pollution is currently exceeding national and international annual daily average guideline levels of 40μ/m3 along the A3, Ripley Parish Council has the full set of data for Ripley as a base indication of Levels in the Borough.

**Roads**

Highways England has stated by letter to the Council dated 5th October 2016 that none of the roads proposals mentioned in the local plan have been tested to meet the Design Manual for Bridges and Roads, for the simple reason that there are no firm proposals for any of this road infrastructure at the current time. It is disingenuous for a local plan to be presented to the Secretary of State that makes reference to infrastructure that won’t be provided in the plan period, if at all. The Highways England response supports other statements made indicating their desire to prioritise the Smart M25 then M25 J10 A3 and then the A320 – A31 improvements. Thus, the required infrastructure for Garlick Arch, Gosden Hill and Wisley airfield will not and cannot be constructed within the time frame of the Local Plan, without a complete ‘about turn’ by Highways England. In addition, some early targeted small improvement schemes referenced by the local plan are not committed proposals and cannot be relied upon to be delivered within the plan period [see Highways England letter 5th October 2016]

**Our response to other representations made.**

*NPPG 155. Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.*

The Plan is not future proof in respect of Infrastructure, has been produced in a flawed statutory process using a closed “this is what you are getting approach” with little notice being taken of restrictions to potential proposals, suggesting inadequate infrastructure which simply cannot be supplied within the life of the plan. (Under current funding)
- Highways England from their public statements clearly have no intention of solving traffic problems or providing completed solutions through Guildford within the life of the plan
- Network Rail have no intention of introducing new railway stations –
- Thames Water will struggle to supply water or treat sewage without major and as yet unfound finances.
- The statutory procedure has not been followed. No ‘complete’ plan with catalogue or index document of associated documents exists for members of the public to scrutinise.
- Consultation with the general public has been substantially flawed in that no document has been corrected, no change of planned policies have occurred which reflect responses from the community especially and specifically from the submissions from Burpham residents. Highlighting Traffic lack of infrastructure and pollution effects from Gosden Hill site – GBC Claiming under FOI this detailed information is commercially confidential’ as opposed to the Blackwell Farm and Wisley proposals which have been clearly aired in the public domain.

Thus this plan is fundamentally flawed in its statutory and central government policy approach, its assumptions to sustainability are flawed and will fundamentally reduce the quality of life of those already living in the Borough. This can only be cured by a projected £2 billion (Tunnel, Sewer, Drinking water, General road widening) injection of cash into the infrastructure to provide a sound basis for the next two plan periods up to 2050. Such is the mismatched infrastructure failings to policy proposals.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The proposal is to construct approaching 14,000 new homes in the Plan period. This seems to us a very large number proposed by the Strategic Housing Market Assessment which should be subject to rigorous scrutiny. However the methodology used in arriving at this figure has not been generally revealed or even revealed to Guildford Borough Council. This seems extraordinary and indeed undemocratic to us as it is the basis of much of the Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The proposal to build over 2000 new homes together with other facilities, particularly employment facilities, will have a huge impact on the area including East and West Horsley. It is not reasonable to expect local roads to be able to cope with the increased volume of traffic eg those driving from the development to Horsley Station and shops. Apart from the roads East Horsley Medical Centre is full, the Howard of Effingham Secondary school (the main school for the area) is oversubscribed while parking space is already under pressure in the East Horsley Station Parade area. Infrastructure is earmarked for the Wisley site but it is highly likely that new homes would be constructed before new infrastructure. In any event there would still be considerable pressure on the East Horsley area from this development.

Station Parade, East Horsley is to be designated a Rural Development Centre which opens the possibility of substantial and out-of-character development. The Parade is made up entirely of small businesses apart from Budgens supermarket which in any event is small enough to count as premises not restricted in terms of Sunday opening hours ie East Horsley is a village and not an embryo small town.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We are also very concerned at the proposed encroachment on the Green Belt. The Green Belt is there to guarantee areas of countryside adjacent to London and to take villages in the Bough out of the Green Belt would seem drastic action to take to allow the development of new homes. Surely additional consideration should be given to making further use of brownfield sites in Guildford and elsewhere which together with infilling and limited local development could provide a satisfactory way forward without a significant impact on the Green Belt.

To remove areas from the Green Belt ‘exceptional circumstances’ need to be demonstrated but such circumstances have not been set out in the Plan particularly with regard to East and West Horsley.

I object as GBC have not provided sound evidence on the Employment Land Needs Assessment. The number of foreign students has been wrongly used to inflate the need. The housing need of 13860 houses is exaggerated since if the population grows by 20,000 we would need around 8,000 homes.

Land at Garlick’s Arch, Send Marsh, Policy A43.

Now 400 homes and 6 Travelling Show people plots

I object to the Policy A43 change at Garlick’s Arch because:

It is permanent green belt and no exceptional circumstances exist

It ignores all the thousands of previous objections made by local people

It will cause over-development of our village and the number of homes is excessive

It will join up Ripley and Send and defeat the key purpose of Green Belt

It is subject to frequent flooding and is currently a flood zone 2 allocation

Answer (if comment is on questions 1-7 of the questionnaire): ()

Land at Burnt Common, London Road, Policy A58.

Now a new allocation for a minimum of 7,000 sq m of industrial or warehousing

I object to Policy A 58 at Burnt Common because:

1. It was deleted from the 2014 draft because of all the objections made previously
2. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land
3. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units
4. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt
5. The impact on small surrounding roads will create traffic gridlock
6. It will join up existing villages and defeat the purpose of the Green Belt

Answer (if comment is on questions 1-7 of the questionnaire): (No)

While the report recognises the problems already faced by residents in negotiating their way through excessive traffic, it does not make proposals for improving this situation for those of us who live outside Guildford. More traffic will arise from excessive building proposals, making life ever more difficult for those of us trying to access Guildford town, or simply trying to get out of our own villages in rush hour periods.

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)
The traffic problems raised by those of us who responded to the previous consultation have been insufficiently addressed. You have made proposals for major road changes, and some new park and ride facilities. However, the volume of traffic is already problematic, and for those of us who live in the villages surrounding Guildford, I see no proposals for improvement. In Chilworth, the main road running through the village is used as a 'Guildford by-pass' by large volumes of vehicles daily, and I do not see how this will be improved. It is extremely difficult to get out of Chilworth village in the mornings and other busy periods, due to traffic heading into Guildford from the Wonersh directions, and in the evenings due to traffic in the other direction.

More widely outside my own village, the traffic in the roads around Guildford is very heavy, and quality of life does not appear to have been considered in proposing large amounts of new homes in the area. This has all been said before, and apparently ignored.

I do not believe that proposals cater only for housing requirements in the area, but for people wanting to move into the area. The more houses that are built, the more people will move into the area, from London in particular.

I, and many others, commented in the last consultation against proposals to inset (i.e. remove) some villages from the Green Belt. These comments have been ignored, and the new document still shows a list of villages (including Chilworth) which be removed. In Chilworth, the eastern half of the village has an open character which surely 'contributes to the openness of the Green Belt'. It has views up to St Martha's Hill and to the Heathland on the southern side of the main road running through the village. I strongly object to proposals to remove this village from the Green Belt. The proposal would no doubt then offer opportunities for future building on the northern side of the main road, adding to ever increasing traffic, and consequent noise, and further spoiling the quality of life here.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

I, and many others, protested in the last consultation against your proposal to remove some of the villages from the Green Belt. This included Chilworth, where I live. Our views have been ignored, and still you plan to go ahead with this proposal. Our village sits within the Green belt, and the eastern half of it has an open character, with buildings on only one side of the road. It also sits within the Surrey Hills AONB. It has open views up to St Martha's Hill, and opens out onto heathland on the southern side of the main road. wish to protest again that removal of the village from the Green Belt, as this will clearly open up the possibility of further construction within its boundaries. This would lessen its open aspect, and would give rise to further traffic, congestion and noise. You do not appear to have had any regard to the quality of life experienced by residents within Chilworth and similar villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  
  Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.
A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

**I OBJECT to Policy A43 and A43a on Garlick’s Arch.**

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces
pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the
south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/12188  Respondent: 8582017 / The Clandon Society (J Wright)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in...
London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/12178  Respondent: 8582017 / The Clandon Society (J Wright)  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/12176  Respondent: 8582017 / The Clandon Society (J Wright)  Agent:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university’s ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.
The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire):**

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.
There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.
I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/12165  Respondent: 8582017 / The Clandon Society (J Wright)  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.
Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible
change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: SQLP16/1438  Respondent: 8582017 / The Clandon Society (J Wright)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.
Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to confirm my support for the GBC plan for the redevelopment from this site, the current modern offices are extremely obtrusive on the local landscape, especially from the River and the former Wharf area. Ideally any domestic housing will try and reflect the history of this area. It will lead to the greater use local public houses/shops & restaurants.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E
- and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**APPENDIX C**

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()
APPENDIX D

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Comment ID: PSLPA16/3306  Respondent: 8582977 / Guildford Environment Forum (John Bannister)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix F: Policies overview map

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

SITES - POLICIES A1 TO A57

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.
2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A25 - Gosden Hill Farm

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.
The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/6452  Respondent: 8582977 / Guildford Environment Forum (John Bannister)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.
The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).
The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY D3

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

**POLICY D3**

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

**POLICY D4**

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**POLICY E1**

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY E2

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E5

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13526  Respondent: 8582977 / Guildford Environment Forum (John Bannister)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E6

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment”/Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
POLICY E7

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H1

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.
The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H2

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.
And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

**POLICY H3**

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related”. Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)
The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

**POLICY II**

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy II)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.
The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy 11. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy 11 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

### POLICY I2

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

### POLICY I3

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I
assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY P4

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY S1

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of
sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. The same is true of Guildford itself with all approach roads grid-locked at certain times of day. The cost to business of congestion is huge with the adverse consequences impacting residents through health damaging air quality and road accidents. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result. No one is asking for a 40% increase in retail in Guildford, except maybe Retailers, yet that will exacerbate the adverse effect of more traffic coming to Guildford. Car parking charges must be increased in line with cities like Cambridge if GBC is serious about reducing congestion. A tunnel under the A3 will be hugely expensive and the money would be better spent improving rail travel between Portsmouth and London and the rail and bus links to adjacent locations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY S2

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”.

Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.
It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents
I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

2. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. "Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt." Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.
1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councillors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I have received many thoughtful and well-argued representations from local residents objecting to GBC’s draft plan in relation to Normandy, and specifically with regard to the site allocation 46 and 47.

I would ask GBC to weigh very carefully all responses to the consultation from Normandy residents and also from important local organisations such as the Parish Council (and its elected Councillors) and the Normandy Action Group (and its Chairman and leading Officers). I have a very high regard for the two local Councillors in Normandy, David Bilbe (GBC) and Keith Withan (SCC), and I would like to express my full support for both their representations and, in particular, the key points that Cllr Witham has discussed in detail with me (below).

Response to GBC Draft Local Plan Consultation

GBC Draft Borough Plan re Normandy - Site Allocation 46 and 47

SECONDARY SCHOOL AT NORMANDY (SITE 46-47 GBC DRAFT PLAN):
The proposed site of Normandy/Flexford for a new Secondary School should be rejected as the need for such a school in that location has not been proven.

In its last submission to GBC (July 2014) Surrey County Council, in its official response, said: "A site within the proposed urban extension at Blackwell Farm, with all necessary access infrastructure built in and a catchment surrounding the site, would be a more sustainable location in transport terms for a new secondary school to serve the western side of Guildford."

If GBC wishes to proceed with this proposal, SCC Education Officers need to demonstrate a clear, and undisputed need for such a school at this location, given the current under-subscription of all the neighbouring local secondary schools surrounding Normandy.

The birthrate in Guildford has fallen over the past two years. And whilst it is too early to know if that trend will continue, it is another factor to urge caution, and not to proceed at this time.

The case for a new secondary school in Normandy is therefore not proven. If there is such a need elsewhere in Guildford Borough, I don't believe it is needed in the location proposed at Normandy.

TRANSPORT AND ROADS:

In terms of transport, site 46 is located well beyond the existing confines of any urban area restricting the potential for sustainable travel. The existence of Wanborough Railway Station is only of a marginal benefit. The area is bounded by the D60 (Glaziers Lane); the C16 (Wanborough Hill and Westwood Lane) and the A323 (Guildford/Aldershot Road). I cannot envisage any so called "highways improvements" that could be undertaken, particularly on the C16 or D60 that would enable those roads to cope with the increased traffic from 1,100 homes and a Secondary School.

The A323 is already a busy major route, and scope for "improvements" to this road are also limited.

Although I suggest that in any case Highways should consider installing a passing lane, Guildford bound at the junction with Frog Grove Lane, Wood Street Village, to ease the congestion caused by commuter traffic turning right and causing considerable tailbacks. But that is a current, existing problem.

There would be access issues relating to visibility and safety for pedestrians and cyclists, which could be difficult to resolve given that the roads are fundamentally rural roads, and the existing structures of the Westwood Lane railway bridge and the Glaziers Lane railway road bridge.

The restricted headroom of the Westwood Lane bridge would also prohibit double decker buses from accessing the proposed school.

Rushmore Borough Council - Aldershot development

Local Authorities have a duty to co-operate in making their local plans and I do not believe this has happened. In 2013 the development of 3,850 dwellings (population of approx. 9,000) in Aldershot was approved by Rushmoor Borough Council and is situated about 4 miles from Normandy. The development, over a 15 year period, includes two primary schools, and the provision of a SANG and many other provisions.

The first of these new houses, part of the first phase of 228 dwellings, are now on sale. The land belonged to the Ministry of Defence's former Aldershot Garrison known as Wellesley, Aldershot Urban Extension. Guildford BC responded to the plan in 2013 (ref: 13/P/00108) and in that said that GBC objected to the application on the grounds that insufficient information had been provided to allow a full assessment on the impact of that development on the highways network and said "the impact on Surrey's network and mitigation required has not been established" It its response to that planning application, Hampshire County Council, dealing with Highways and Transport issues, hardly referred to the A323. Copies of those responses are attached for reference.

ENVIRONMENTAL CONSIDERATIONS:
A development of this scale, in such proximity to the Thames Basin Heaths Special Protection Area, should not be supported.

This is an environmentally sensitive location next to one of the component SSSIs of the Thames Basin Heaths Special Protection Area for birds. The Thames Basin Heaths mitigation plan seeks to zone development away from these sites. This results in a 400m buffer zone where no residential development is permitted. A developer-led proposal driven by commercial considerations does not take account of the damage it would cause to the local environment and the strain it will place on the local infrastructure.

The Green Belt and Countryside Study referring to the importance of the openness of the land between Normandy and Flexford, has been ignored. The current version of the Plan treats Normandy and Flexford as separate settlements for the purposes of Green Belt ‘sensitivity’ but as one settlement for the purposes of ‘sustainability’. This is a double standard.

There are many vitally important ecological networks (green infrastructure corridors) that surround the proposed development area (namely Ancient and Semi-natural Woodland, Veteran Trees, Hedgerows, Semi-improved Grassland, Farmland and a Stream) and connect to other important and protected sites within Normandy Parish and the wider countryside (namely Wanborough and Normandy Woods Site of Nature Conservation Importance (SNCI), Normandy Pond SNCI, Normandy Common SNCI (put forward by the Surrey Local Nature Partnership in 2015), Wyke Churchyard SNCI, Little Flexford SNCI, and even more importantly Thames Basin Heaths Special Protection Area (TBH SPA)).

This proposed development would destroy a number of these habitats including Semi-natural Woodland, Veteran and Mature Trees, Hedgerows, Farmland and Semi-improved Grassland, plus would have indirect effects on Ancient Woodland habitat and the Stream through pollution (light, noise, litter and diffuse land and road runoff), predation and disturbance by increased number of cats and dogs (187 cats (cat ownership being 17/100 households) and 264 dogs (dog ownership being 24/100 households) and by people (potential fires and vandalism of trees). The proposed SANG is only 10ha and will be on land that will be muddy in wet weather and during the winter. Whereas the TBH SPA of Ash Ranges is dry during wet weather and during the winter, plus is either 5 minutes away by car or 20 minutes by foot.

All the habitats within or adjoining the proposed development site are Priority Habitats of Principal Importance under the NERC Act, plus a number of protected species (European Protected Species, Species of Principal Importance and those protected under The Wildlife and Countryside Act (1981) as amended) have been recorded within either the proposed development site or 500m to 1km of the proposed development site. These include Hedgehogs, Dormice, Great Crested Newts, Barn Owls, Stag Beetles, Skylarks, Common Toads, Common Lizards, Grass Snakes, Adders, Slow Worms, Badgers and Bats (including potential roosts within a number of veteran and mature oaks and other trees across the proposed development site and within the woodland blocks).

Light pollution from this proposed development on this scale would be starkly visible from Surrey Hills Area of Outstanding Natural Beauty (AONB). Effect on surrounding woodland and stream habitats that adjoin these roads including the SNCIs of Normandy Common, Normandy Pond and Wyke Churchyard. Potential adverse impacts on the SPA could result from noise and disturbance during construction and through usage of the playing fields when, in addition, external lighting could cause disturbance to the feeding and roosting patterns of the SPA bird species.

There could also be impacts on hydrology affecting the open water and wet heathland of the SPA/SSSI and from increased traffic on Westwood Lane, Glaziers Lane and Guildford Road. Traffic pollution is a major source of nitrogen pollution that changes heathland into grassland and many journeys to a new Secondary School could be expected to be by car.

Prior to any allocation of the site it will be necessary for the borough council to be able to conclude, beyond reasonable doubt, that there would be no adverse impact on the integrity of the SPA as a consequence of the proposed development of
the site. Further work is needed by the borough council to provide the evidence needed to be able to reach that conclusion in respect of the use of the site as a secondary school. The site will require archaeological assessment in advance of any application for development being submitted. I am grateful to Danial Winchester a professional ecologist who lives in Flexford for much of the above information.

**IMPORTANCE OF THE GREEN BELT:**

It is Surrey County Council policy (March 2013) by a Motion agreed at a Full Council meeting of Surrey County Council about the Green Belt:

**Surrey County Council, March 2013 RESOLVED (unanimously):**

Council notes:

1. Surrey County Council has a proud history as the creator of the Green Belt. The County’s Countryside Estate founded by the Surrey County Council Act of 1931 was the basis of the London County Council's Green Belt Act of 1938.

2. The Coalition Agreement states:

    ‘We will maintain the Green Belt, Sites of Special Scientific Interest (SSSIs) and other environmental protections, and create a new designation – similar to SSSIs –to protect green areas of particular importance to local communities.’

Council believes: Surrey’s Green Belt, Countryside Estate, SSSIs and other green spaces are vital, not only for the county’s environment but also for maintaining a “green lung” around London.

Council resolves:

1. To use its power to protect Surrey’s Green Belt.

2. To support the National Planning Policy Framework (section 9 – paragraphs 79 to 92) and the Government’s policy of protecting the Green Belt.

3. To make Surrey’s MPs and the County’s Districts and Boroughs aware of this resolution.

4. That any Green Belt development in the County is in line with the needs and wishes of Surrey residents

**JONATHAN LORD MP SUMMARY:**

In summary, I cannot see any substantive justification for taking the very attractive Green Belt land of site 46/47 out of the Green Belt and I can see many solid arguments against such a retrograde step. I would therefore urge GBC to maintain and protect the Green Belt status of this site so that its natural beauty and its important contribution to the local habitat and landscape can continue to be enjoyed by future generations.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
The Guildford Infrastructure Baseline 2013 sets out the position with regard to Primary Health care Facilities. It refers to the Surrey NHS Transformation Plan 2010 to 2015 which includes the key objective of reducing health inequalities through the provision of GP-led Health Centres and acknowledges that primary healthcare services are generally the first point of contact service, offering frontline services. All GP practices are now required to belong to a CCG. There are six CCGs covering Surrey, all within the Surrey and Sussex Local Area team (LAT). Three CCGs cover different parts of the Guildford Borough including Guildford and Waverley CCP. Guildford and Waverley CCG is a group of 21 local GPS surgeries in Guildford and Waverley. It controls a £223 million annual healthcare budget responsibility for the approximately 220,000 people living in the two boroughs. There are currently a total of 99 GPs currently practising in 11 partnerships across the Guildford borough with a total of 154,998 patients on their registers. The existing provision equates to one GP for every 1,565 residents. However, provision is not spread equally across the Borough and when examining local list sizes per GP some existing under provision is apparent on surgery- by-surgery basis. Figure J shows the data on a settlement basis. However this list does not include the Binscombe Medical Centre. This presumably, is because it’s not actually located within the borough. Nevertheless, it serves patients from Guildford and should therefore be considered within the Guildford context. This is a key cross boundary issue that does not appear to have been adequately considered.

The Guildford draft Infrastructure Delivery Plan 2016 confirms but does not update the Infrastructure Baseline. It states at paragraph 6.2 that GBC officers have met with representatives of Guildford and Waverley CCG, GPs from across the borough, NHS England, and the Royal Surrey County Hospital chief officers to discuss future health needs of the borough’s population. It goes on to confirm that such work is ongoing and, as clarity is given to proposals, further input is anticipated from Guildford and Waverley CCG and from the GPs practices that will be impacted by the planned housing development. Paragraph 6.7 of the draft IDP states that: “We will continue to work with NHS England and the relevant CCGs, particularly Guildford and Waverley CCG, the GP Practices, and the Royal Surrey County Hospital, to ensure that health facilities in the borough will meet the health needs of future population, and will continue to work on ensuring that funding and delivery is secured when needed.”

This statement is gratifying and is supported. However, as stated above, it is considered that the cross boundary issues between Guildford and Waverley have not been adequately addressed. A new Centre for Health is required to serve the cross boundary area around Farncombe as set out at Question 6 of this form and an additional allocation should therefore be made to facilitate this. The plan on page 63 of the IDP shows the GP surgeries within Guildford Borough. This should be renamed as ‘GP surgeries serving patients within Guildford Borough’. That said, one GP surgery is indicated on the borough boundary with Waverley – GP Surgery 10 which is referenced New Inn Surgery. This is incorrect and we believe that what should be shown is the Binscombe Medical Practice

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
As currently drafted, the Plan is not sound in relation to the provision of primary health care facilities, in particular in the Farncombe area. This is because no account has been taken to assess the current or future clinical needs of the community and no additional capacity has been built in to the plan for the increase in population or NHS England’s changing health strategy. In so far as the Farncombe area is concerned, the additional site allocation for a Centre of Health should be made.

Insufficient consultation has taken place with health providers as to how the health needs of the local community will be addressed throughout the Plan period. This includes the strategic cross boundary provision of GP services taking on board the NHS England nationwide goal of providing more hospital consultant outpatient appointments in a community setting. Following more extensive consultation with clinical providers, make a to the Plan to include an additional site allocation at New Pond Road, Farncombe for a Centre for Health.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
In this modern and increasingly overcrowded world it would seem logical to retain as much open space as possible for the benefit of the population.

There are many reasons for this, most based on health such as sports and recreational areas for the more active, countryside walks for those with naturalist interests and areas such as allotments where people can not only grow their own produce, but can also engage on a social level with other like minded people and keep physically active at the same time.

It is for these reasons (among others) that I strongly support POLICY A21 (Westborough allotments) as this is a site with strong social bonds, an educational program for the local school and with woodlands to the south a variety of interesting wildlife. The site is also supported by the local population who like having a small green area in the midst or their community if only for the sense of freedom that it conveys.

I would also like to point out that although this site is earmarked for continual use as allotments there are plans to utilise the former car showroom to the north for housing/specialist housing and as this is where the most important vehicular entrance lies, any long term disruption to or loss of this entrance or indeed any existing part of the site could cause closure of the site altogether.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy A22: Land to the North of Keens Lane

The proposal to increase the number of dwellings from 140 to 150 (Site Allocation A22) will add to the traffic congestions in this area. It will also increase the footfall on Whitmoor Common putting this SSI under even more strain. It is not uncommon for the existing parking areas on the edge of the common to be full, local people using the area for recreation such as dog walking frequently seem to prefer driving to the common rather than walking. I assume that in part this is because the roads abutting the common, namely the A322 and Salt Box Road have no provision for pedestrians to cross them and the flow of traffic on these roads is such that crossing on foot requires a fleetness of foot and mind that we do not all have.

Comment ID: pslp172/652  Respondent: 8584929 / Keith Stainer  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Policy A26: Blackwell Farm, Hogs Back

I have previously objected to the inclusion of this site in the local plan and now object to the addition of a secondary school (Allocation 9) on the grounds that there is already overprovision by in excess of 700 places at the secondary schools serving the western parishes and I fail to see why land should be taken out of green belt to add to this over provision.

I also object to the additional proposed access to the site via Egerton Road (Requirements 1). The existing infrastructure in the A3, Egerton Road and Gill Avenue area cannot cope with existing peak time traffic flows with delays and long queues frequently forming in all three roads, the queues off the east bound A3 carriageway are particularly worrying given the potential for accidents, similarly the access slip road to the A3 is wholly inadequate with those joining the east bound carriageway often having to risk life and limb to join the main carriageway from a very short slip road which severely limits the time available to check for a suitable gap in traffic. I also note that the access is stated to be "preferably via Gill Avenue". This statement lacks the precision required for an objective comment. If not Gill Avenue how else?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy D3: Historic environment

Para. 4.5.38: The sentence in this paragraph: “We will seek to ensure that there is an imaginative approach to ensuring that heritage assets are kept in use and do not fall into disrepair.” is so important that it should be included in Policy D3 policy box. It would be considerably strengthened if the words “seek to” were deleted.

Para. 4/5/42, bullet point 4: I fully support the sentence: “identify heritage assets that make an important contribution to the local character of the area and update our local list on a regular basis.” In any supporting document, Guildford’s Victorian heritage should be protected. Bright Hill close to the town centre is proposed to be developed with housing. Over-looking the site is a magnificent example of a Victorian school. It is a landmark building and locally listed. Also within the site is a locally listed public house. These two buildings should be preserved and the development sensitively designed with regard to these buildings. The views from the site over an AONB, as well as to Guildford Cathedral, should be protected for those walkers and drivers descending Bright Hill.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E6: The leisure and visitor experience

E6 Policy Box, para. 1, bullet point 4: It is important that the river is kept as a green finger of countryside coming into Guildford town, and that river banks and scenery are kept as natural as possible. Much of Guildford’s character stems from its countryside views and closeness of countryside. For example, the river area by the town lock consists of trees and grass, and is extremely popular with visitors and residents. Hard paved banks, unnaturally high built up banks and hard paved paths spoil the natural character of riversides. The River Wey is a narrow river and needs careful planning so that it does not lose its character or degenerates into outlets for take away cafes. Environmental factors need to be considered as well as social and economic factors.

E6 Policy Box, para 3, bullet point 2: It is important to keep a mix of cultural venues in the town to cater for different leisure needs, particularly as Guildford Borough grows in population. This needs to be taken into account when assessing the economic viability of cultural establishments, such as theatres and museums. Social factors besides economic factors need to be taken into account.

Para. 4.4.66: I support the policy in the paragraph. However, a much used launderette on local authority land in Sydenham Rd in a central position opposite a large car park and serving nearby residential areas on the east of the town, which contains families, students and the elderly, has recently closed, causing those who formerly used it to drive across town. It also served as a community centre. It would be of benefit to many if it could be rebuilt with dwellings above.

Para 4.4.74: Vision Box. Comment on retail as in Policy E7 Box

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/15528  Respondent: 8585601 / Jennie Kyte  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E7: Guildford Town Centre

Guildford town centre lacks a butcher, grocer, greengrocer and baker, and a way needs to be found to establish these. Independent shops add interest and character to a town and these should also be encouraged.
Policy E7 Box: Guildford Town Centre

**Bullet point 1:** It is written: “A new retail-led, mixed-use development of 45,000 sq m (gross) of additional comparison goods floorspace on the North Street regeneration site within its primary shopping area”

This is based on a Retail Assessment which is weak, and based on flawed and dated concepts. It is apparent that shops are closing and online shopping is growing in popularity, while town centre shopping is decreasing.

The Assessment needs reviewing for soundness and whether the land in the proposed North St development area would now be better used to regenerate the town centre with mainly housing which would bring vibrancy to the town and contribute towards rather than compete with the High St.

**Bullet point 4:** The riverside needs to be carefully planned, so that it is not over-taken by over noisy night life which is magnified beside water. River banks and scenery should be kept as natural as possible. Environmental factors need to be considered as well as social and economic factors. (See comment on Policy E4 box, bullet point 4)

**Bullet point 7:** Care needs to be taken that modern built public squares are not windswept and isolated areas with no defined character. Long established squares usually have a focal point, such as a beautiful building, a church or town hall, and smaller squares are often surrounded by smaller old buildings of character. Large trees bring much character to a town and a large tree could be appropriate in a square.

Para. 4.4.89: The two scenarios in the Town Centre Masterplan (TCM) were not clearly outlined in the Masterplan, so their impacts were not apparent. Scenario 2 has been chosen and its impact on the High St, its setting, views and listed building need more analysis. Both scenarios depend on a very large reduction in traffic and were rated higher for bad traffic impacts than the present gyratory system in a separate traffic study.

The Town Centre Masterplan will depend on a round town bus service. As the town is pedestrianised and car parks accordingly are situated further from the centre and not necessarily near a venue to be visited. For those living in villages, distances to be walked on arriving in Guildford will be further, and to visit different locations and venues in the town, a ‘hop on, hop off’ bus will be essential. At present buses from the bus station at the bottom of North St (adjacent to the High St) carry people up the steep gradient of the High St and North St. An assessment is also needed on the impact of ‘pedestrianisation’ of the town centre on residential roads.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy H1: Homes for all

The condition of 60% of students at the University of Surrey living on campus in the 2003 Local Plan has not been met. If used efficiently, land could be used to house a larger number of students on campus, which would ‘free up’ houses for families.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Policy H3: Rural Exception Homes

Rural Exception Homes should be restricted to those with a connection to the village, rather than those on the Guildford Housing List, who consequently can find themselves isolated in a village with no employment and limited public transport.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Policy I2: Supporting the Department for Transports “Road Investment Strategy”

4.6.18: It is written in this paragraph: “…the scheme could either be the widening of the existing A3 carriageways or a tunnel option”. For the tunnel to be possible land needs reserving for a tunnel entrance.

Land should also be reserved for a bridge over the river and railway to unite the two sides of Guildford and take the pressure of the gyratory system.
Policy 13: Sustainable transport for new developments

Policy 13 box, 3rd para: The new developments proposed and the proposed building of 13,860 houses will have a simply huge impact on the road system in Guildford Borough, both on major roads, and country roads and lanes.

Major roads, particularly the A3, which cuts through the middle of Guildford, and if widened, will bring more traffic, noise pollution (which is a serious environmental problem in Guildford) and air pollution over the Plan period.

Country lanes are narrow and winding, and cannot be widened without demolishing houses and ruining ancient landscape. Park and Ride parks will not alleviate traffic on country lanes, and will not address the problems mentioned above. It needs to be written into the Local Plan how the impacts of the enormous amount of traffic can be alleviated in such a heavily populated borough as Guildford. Without such assurances based on evidence and careful analysis, traffic must be a constraint on the housing figure for Guildford.

At the same time as when sustainable travel is being promoted, Guildford is to lose its bus station. The bus station is in the heart of the town centre, close to the High St, and serves not only Guildford but the surrounding villages. Buses radiate out from the town in all directions and the bus station is heavily used. Buses also run every 10 minutes to the back entrance of the railway station en route to the hospital or university. **No new bus station/exchange is written into the Draft Local Plan.**

There appears to be no overall plan to enlarge Guildford railway station and to increase access to it.

A Sustainable Corridor is proposed (para.2, bullet point 8) with land to be reserved, but without further details it is not known how it will work on the narrow parts of the road on the route proposed.

</table>

**Policy P1: Surrey Hills Area of Outstanding Natural Beauty (AONB)**

The first sentence in **Policy P1 box** should be concerned with conserving the **natural beauty** of the AONB, which is the prime purpose of the AONB, and the wording should follow the wording in the Act as given in paragraph 4.3.1 as follows:

“Areas of Outstanding Natural Beauty (AONB) were originally identified via the National Parks and Access to the Countryside Act 1949, with the primary purpose to conserve the **natural beauty** of the landscape” (para.4.3.1).

**Policy Box P1:**

**Paragraph 1, bullet point 3:** It is written in this bullet point: “promote its enjoyment by the community and visitors to the area”. The enjoyment should come from ‘natural beauty’ and landscape.

**Paragraph 4:** The AGLV should be strongly protected in line with protection given to AONBs as the forthcoming AONB/AGLV review by Natural England is awaited.

**In Para. 4.3.6,** it is written: “Applications for major development in the AONB will be refused unless **exceptional circumstances** are demonstrated and the development is proven to be in the public interest.” Exceptional circumstances in the Draft Local Plan 2016 have been weakened to allow proposed large-scale developments in the Green Belt. Should the same ‘Exceptional circumstances’ apply to the AONB, its protection will also be considerably weakened.

**Para. 4.3.9:** It is written that: “The current Surrey Hills AONB Management Plan (2014-2019) acknowledges these wider values and interprets the AONB as a ‘living landscape’, which constantly changes across seasons and in response to the many social and economic forces placed upon it.” Environmental considerations should also be considered, such as the protection of the **natural** beauty of the AONB, and
similar wording should be added to this paragraph.

Comment ID: PSLPP16/15523  Respondent: 8585601 / Jennie Kyte  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P2: Green Belt

Policy P2 Box: The policy box ignores the Green Belt as a constraint as set
out in NPPF policy, paragraph 14 and footnote 9.

It does not mention how the Green Belt is protected from boundary changes under
Exceptional Circumstances during the Local Plan process and that it normally should
only be changed for a rare or specific purpose, with care being taken not to
infringe the principle of permanence of the Green Belt as set out in NPFF policy,
paragraph 79. It does not give the five purposes of the Green Belt set out in NPFF
policy, para 80, any one of which serves as a reason for the Green Belt.

Releasing Green Belt to fund infrastructure does not constitute ‘Exceptional
Circumstances’.

The protection given to the Green Belt in these policies has been ignored as there
seems to an interpretation that because Exceptional Circumstances can apply to a
local situation that a Local Authority can take as much Green Belt as it wants through
boundary changes, thereby destroying the permanence principle of the Green Belt and
the true meaning of Exceptional Circumstances.

4.3.11 to 4.3.23: There is no mention of the Green Belt as a constraint in these
accompanying paragraphs
4.3.11: This paragraph does not mention the five purposes of the Green Belt as set out in NPPF policy, paragraph 80.

4.3.16: In this paragraph it is stated: “We consider that exceptional circumstances exist to justify the amendment of Green Belt boundaries in order to facilitate the development that is needed and promote sustainable patterns of development.” No justification is given for this statement and the Sustainability Appraisal does not reach any conclusion as to whether this is sustainable. It states in para. 10.19.2: “It is not possible to conclude on whether or not the draft plan is sustainable”

4.3.17: The words in this paragraph “Whilst the general extent of the Green Belt has been retained” is misleading as with the removal of villages from the Green Belt, 6% of the Green Belt has been removed, rather than the 1.9% repeatedly given by the Council in public statements.

4.3.12, 4.3.17 and 4.3.19: Such an enormous change as changing the boundaries of the Green Belt and insetting 14 villages from the Green Belt should not just be casually referred to in accompanying paragraphs to the policy box, but highlighted with a suitable heading or headings. This part of the policy of the Green Belt of insetting needs to be transparent and justified.

This change will have a huge impact on village and landscape scenery, and ignores the NPPF’s purposes of the Green Belt in para.80. Villages instead of being washed over by the Green Belt and protected will be susceptible to developments of large blocks of housing; to sprawl and to joining up with other developments. To give a few examples, Shamley village is extremely close to Guildford and Bramley in neighbouring Waverly District. Effingham is in danger of merging with Little Bookham and East Horsley. Flexford/Normandy and the Horsleys will be transformed from rural environments and susceptible to sprawl, etc. (Just a few large executive houses, favoured by developers, on the entry to a village or on a space within the village, could ruin its entire character and the visual landscape of the countryside surrounding it).

Opposition to this change has been huge and yet the NPPF’s intention of
“empowering local people to shape their surroundings” has been ignored.

Guildford has an ancient Parish heritage presiding over a network of villages linked by footpaths and country lanes, which follow the ancient field lay-out. This has been preserved in spite of Surrey (and Guildford District in particular) being the most populated county in England and in the top three of the most populated areas in Europe. The Green Belt in Guildford Borough is heavily populated with villages, the villages being set so close together that it is easy to walk through countryside from village to village. (A third of the borough’s residents live in rural areas.) The strongest protection possible is needed to protect the outstanding landscape of this ancient heritage and to prevent the whole area with its scenic and narrow lanes from being destroyed by traffic.

The Green Belt and its villages provide views into and out of the AONB and development will encroach on these views and bring light pollution to night skies.

The landscape value of the Green Belt as a whole should be recognised. The Local Plan should strongly protect this heritage with Green Belt policies for future generations and for those living in London.

Para. 4.3.15: This paragraph lists major previously developed sites which in addition to the villages to be inset, further encroaches into the Green Belt. Two nationally important areas of AONB are included.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P3: Countryside

The same protection being given to Ash and Tongham (formerly ‘Countryside beyond the Green Belt’) should be given to other villages losing their Green Belt protection, and which have higher status within the wider Green Belt. They also need protection from sprawl and their intrinsic character needs protection too.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P5: Thames Basin Heath Special Protection Area

In Policy P5, 2nd bullet point, it is written: “Measures will be based on a combination of Strategic Access Management and Monitoring (SAMM) and the provision, improvement and/or maintenance of Suitable Alternative Natural Greenspace (SANG)” The word “improvement” should not be interpreted as recreational facilities which urbanise and harm AONBs which are often chosen as SANGs.

4.3.64: In this paragraph it is written: “Bespoke SANGs may be required to include a combination of benefits, including biodiversity enhancement, green infrastructure and potentially, new recreational facilities in line with the Council’s adopted green infrastructure policies. AONBs are often chosen as SANGs and its needs to be remembered that the prime reason for their existence is their natural beauty as given in the following Act:

“Areas of Outstanding Natural Beauty (AONB) were originally identified via the National Parks and Access to the Countryside Act 1949, with the primary purpose to conserve the natural beauty of the landscape.”

Recreational facilities such as buildings and equipment harm natural beauty and are strongly opposed by residents and visitors. The large amount of money channelled from developers into SANGs should not be used for this purpose, and has no connection with the SPA policy of attracting dog walkers to SANGs.

Wording is needed in Policy Box P5 and paragraph 4.3.64 which ensures that AONBs are protected from harmful recreational facilities, and are enjoyed for their natural beauty and landscape.

SANGs are not appropriate on agricultural land.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy SI: Presumption in favour of sustainable development

Policy Box SI and paragraphs 4.1.1 to 4.1.4: The term ‘Presumption in Favour of Sustainable Development’ is ill-defined and difficult for planning officers to interpret. Consequently, some extremely unsuitable developments are reaching planning application stage. Even if voted against unanimously by councillors on the Planning Committee, the developer using the policy ‘Presumption in Favour of Sustainable Development’ is in a stronger position to appeal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/15519  Respondent: 8585601 / Jennie Kyte  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S2: Planning for the borough – our spatial development strategy

Policy Box S2: Borough Wide Strategy: Housing is needed, but the housing figure of 13,860 produced in the Strategic Housing Market Assessment (SHMA) is too high. The SHMA has been shown in several authoritative reports to be flawed and unsound. It has not been objectively assessed using consistent data, or scrutinised for flaws and double counting. It has not been produced in a transparent form with openness about the data used by the Guildford Borough SHMA consultant, G L Hearn, and sub-consultants used. It needs separate reports for issues in the SHMA which are relevant for Guildford only, such as the large number of international students attending the University of Surrey. The housing figure needs to be based on sound evidence. Constraints need to be applied which are appropriate for Guildford.
Para. 4.1.5: It is written in this paragraph: “Our development strategy for the plan period is based on national planning policy, with recognition of environmental constraints and the availability and viability of land for development.”

However, environmental constraints have not been applied as given in NPPF para.14 and footnote 9 as follows: “…sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest; land designated as Green Belt, Local Green Space, an Area of assets; and locations at risk of flooding or coastal erosion”.

The housing figure has not been adjusted to allow for constraints. Indeed avoidance of development on areas prone to flooding, for example, has meant instead more housing in the Green Belt, which is in itself a constraint.

The Minister of State, Brandon Lewis has stated: “We have repeatedly made clear that demand for housing alone will not change Green Belt boundaries.”

Guildford is a congested gap town with steep hills rising up on either side and surrounded on three sides by AONB and Green Belt. Its many villages are served by narrow country lanes. Traffic is a serious environmental constraint for Guildford because of its topography, setting and heritage. Expensive infrastructure to widen the A3 will bring further environmental impacts such as noise and over the plan period yet more traffic to cope with the extra 13,860 houses. Narrow lanes cannot be widened without demolishing homes, destroying landscape and the character of village settings.

Constraints should be properly applied to lower the housing figure.

Para. 4.1.6: An over-abundance of retail on land which could be developed with housing is being proposed, in spite of the decline in retail and its uncertain future. Some housing is needed in villages, but policies which in effect allow unlimited growth are destructive to the Green Belt and to the character of villages.

Para. 4.1.7: Wording is needed in this paragraph and in the Local Plan to ensure that Rural Exception housing is for those with a connection to the village who need affordable housing.

Para. 4.1.8 Constraints should be taken into account in this paragraph.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** SQLP16/1726  **Respondent:** 8585601 / Jennie Kyte  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Predetermination of the Draft Local Plan 2016**

Before the first Draft Local Plan was produced the Leader of the Council and the Executive Member in charge of the Local Plan talked about their aim “to roll back the Green Belt.”
Residents objected, but this continued to be strongly promoted and consequently NPPF policies were misinterpreted to allow this to be achieved, and evidence such as the **Strategic Housing Market Assessment (SHMA)**, on which the whole Plan was based and in which a high housing need figure (OAN) was needed to “roll back the Green Belt” was not scrutinised or transparent.

Meanwhile, the **Green Belt and Countryside Study (GB&CS)** was based on a traffic light system and updated with a sensitivity map, which has no connection with NPPF policies, and was produced to value the Green Belt, and justify and enable it to be built upon. It ignores the five purposes of the Green Belt given in the National Planning Policy Framework (NPPF) para. 80 and the Green Belt as a constraint in the NPPF para. 14, footnote 9.

The spirit and meaning of the term ‘Exceptional Circumstances’ has subsequently been misinterpreted and weakened to allow wholesale Green Belt boundary changes. It has been applied in a way which was not intended and ignores the principle of permanence of the Green Belt. NPPF para.79 states that “the fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence.”

Normally during the Local Plan process the Green Belt can only be changed in ‘Exceptional Circumstances’. (Under the last Plan process one piece of land was released under Exceptional Circumstances with conditions attached.) The Minister of State, Brandon Lewis, has stated: “The Framework makes it clear that inappropriate development may be allowed only where there are very special circumstances and that Green Belt boundaries should be adjusted only in exceptional circumstances through the Local Plan process and with the support of local people. We have repeatedly made clear that demand for housing alone will not change Green Belt boundaries.”

Other ways of providing housing, such as brown field sites were not pursued with any vigour, while those who were consulted and sent in 20,000 responses to the Regulation 18 (2014) consultation were ignored. Furthermore, constraints applied to lower the flawed OAN number, as is allowed, were promised, but have not been applied.

Elections 2015 intervened in the Local Plan process and councillors across Guildford Borough promised in their election leaflets to protect the Green Belt. It seemed that the Green Belt was going to be protected after all and voters voted accordingly. But after the election, the very early political decision to “roll back the Green Belt” was renewed and pursued with the same determination.

**The Draft Local Plan was predetermined and is unsound.**

**The Strategic Housing Market Assessment (SHMA)**

The Strategic Housing Market Assessment (SHMA) has been shown in several authoritative reports to be flawed and **unsound**. It has not been objectively assessed using consistent data, or scrutinised for flaws and double counting. It has not been produced in a transparent form with openness about the data used by the Guildford Borough SHMA consultant, G L Hearn, and sub-consultants used. It needs separate reports or sections for issues in the SHMA which are relevant for Guildford only and which could distort the SHMA findings.

- **Transport Evidence**

Residents’ concerns about the huge increase in traffic have been ignored and Transport Evidence was produced during the consultation period, too late for scrutiny or review, or for decisions based on evidence to be included in the Draft Local Plan. This is **unsound** practice.

- **Consultation: Draft Local Plan 2016**

Significant changes have taken place after the Regulation 18 consultation with new developments in the Green Belt being proposed in the Draft Local Plan 2016 without public consultation. This is **unsound**.

- **Special Protection Area (SPA)**

The Special Protection Area (SPA) policy has been misinterpreted by turning existing open spaces into SANGs, instead of providing new open spaces. (This risks land chosen as SANGs in long-established Areas of Outstanding Natural Beauty
AONBs) often at impractical distances from the SPA it is protecting, being harmed by an excess of added infrastructure, contrary to one of the prime purposes of conserving the natural beauty of AONBs.)

- **Sustainability Appraisal June 2016**

There is no proper balance in the Sustainability Appraisal June 2016 between economic, environmental and social issues. Throughout the Appraisal it is written that the Council is confident that it can mitigate damage to landscape, but no details are given as to how it can mitigate damage to landscape, countryside and views with proposed developments totalling 13,860 dwellings, nor how it can mitigate the extra traffic congestion and noise of traffic.

The Appraisal’s statement on air quality para.10.71 “There are no designated air quality management areas within Guildford Borough and whilst there are recognised air quality issues at Guildford Town Centre and at Wisley, it is not possible to conclude that negative impacts will result from growth” is an inadequate statement to cover this plan period without further investigation.

Noise pollution which is a serious environmental problem for Guildford is not dealt with in this Sustainability Appraisal. The A3 with fast moving traffic goes through Guildford, cutting the town into two halves, causing whole swathes of residential areas across Guildford to suffer from traffic noise. Evidence is needed as to how this can be mitigated and what the impact of even greater amounts of traffic from the proposed developments, which may entail the widening of the A3, would be. The noise impact of increased traffic on rural areas also needs investigation.

In paragraph 10.11.10 of the Sustainability Appraisal (SA of the Guildford Borough Local Plan), it is written: “Given the extent to which landscape has been applied as a constraint and recognising that the baseline situation would be one whereby development will come forward in an unplanned way, it is appropriate to conclude significant positive effects.” In a baseline situation the Green Belt would be a significant constraint in itself. This is an illogical, erroneous and **unsound** conclusion.

In para. 10.19.2, it specifically states that it is “Not possible to conclude whether or not the Draft Plan is sustainable.” The specific recommendations which follow this statement have no real significance.

- **Retail Assessment**

The Retail Assessment is weak, and based on flawed and dated concepts. It is apparent that shops are closing and online shopping is growing in popularity, while town centre shopping is decreasing.

The Assessment needs reviewing for **soundness** and whether the land in the proposed North St development area would now be better used to regenerate the town centre with mainly housing which would bring vibrancy to the town and contribute towards rather than compete with the High St. (For 30 years North St has been run down and from time to time sold or offered to a developer, but no developer has yet snapped up the opportunity to develop this area with retail, which makes one question whether retail is actually needed or would be viable, particularly in these changing times).

- **Safeguarding future options**

Land needs to be reserved for an A3 tunnel entrance and for a bridge over the railway and river in order to secure these options for the future. It is **unsound** practice to close down options with such huge potential benefits for Guildford.

- **Bus station/exchange**

A bus station needed for a transport shift to sustainable travel has not been included in the Plan rendering its sustainable transport policy **unsound**.

- **Green Belt Policy P2**
The Green Belt policy P2 of insetting villages needs to be transparent and justified. The evidence in the Green Belt and Countryside Study (GB&CS) appears weak. This should be reviewed to ensure the Plan is sound.

**BREXIT**

BREXIT is now an important consideration, but any adjustment made for it, must not be allowed to disguise the underlying flaws in the SHMA. Account needs to be taken of BREXIT for soundness.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Under the Duty to Cooperate policy the area under consideration has narrowed and the wider area has been overlooked. The Green Belt is also the Metropolitan Green Belt and is of great importance as an amenity which serves London.

London in effect reaches to Leatherhead and without the principle of permanence of the Green Belt being adhered to, the city will spread and urbanise the protected ring of countryside surrounding it, engulfing Guildford and its villages in the process.

The Mayor of London, Sadiq Khan, stated on 22 June 2016:

“I am determined to oppose building on the Green Belt, which is now even more important than when it was created.”

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A12

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY A12: Bright Hill Car Park, Sydenham Rd, Guildford

While the retention of the view of the cathedral is to be retained, I object to the loss of the important view from Bright Hill of the historic Area of Outstanding Natural Beauty (AONB) over the Hogs Back. The number of houses to be built on this site has been reduced from 60 to 40. This reduction should allow the two important views from Bright Hill of (1) Guildford Cathedral and (2) the historic Area of Outstanding Natural Beauty (AONB) over the Hogs Back to be preserved. Bright Hill is used by many residents as a walking route to the Town Centre and these views are an established part of the walk. The uplifting experience of the walk encourages residents to master the steep hill and walk rather than drive into town.

There is a lack of open space within the town and the magnificent country view in this town walk is a way of bringing the countryside into the town.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A25: Gosden Hill Farm, Merrow Lane, Guildford

The number of houses has been reduced from 2000 to 1,700 for this plan period, but the same amount of land has been allocated and further development is indicated. This is a very large development which will impact on local roads in Burpham where traffic is heavy during peak hours. The roads were not built to carry heavy volumes of traffic.

I object to this development for the reason above and for the reason set out in my submission to the 2016 Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4190  Respondent: 8585601 / Jennie Kyte  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY A26: Blackwell Farm

I object to this development. The number of houses has been reduced by 300 for this plan period, but the same amount of land has been allocated and further development is indicated. A sixth form secondary school is now proposed and this will increase peak hour traffic on already over-full roads. The addition of a school is a circular argument. Without the development the school would not be needed on Blackwell Farm and school places for the wider area could be provided within existing schools or on urban sites within Guildford.

An independent study shows that a part of Blackwell Farm site is equivalent in status to an Area of Outstanding Natural Beauty and may well be upgraded after Natural England’s boundary review has taken place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

POLICY A35: Former Wisley Airfield, Ockham

The description of the Wisley site, which is in the Green Belt, has been changed from “Land at former Wisley airfield, Ockham” to ‘Former Wisley airfield, Ockham’. This is misleading. The airfield only takes up a small fraction of the site. Much of the site is agricultural.

Beginning with land at the former Wisley airfield there will be continuous development from the M25 along the A3 to Guildford. Prime reasons for the Green Belt are its openness and to prevent urban sprawl, and yet these reasons are being ignored in the Local Plan, even though the Green Belt is land which is given protection from development in the NPPF.

I object to the change in name of “Land at former Wisley airfield, Ockham” to “Former Wisley Airfield, Ockham”, for the above reasons.

I object to: Requirements: Infrastructure (3)(d) Mitigating Highways Performance Issues. This opens the way to damaging rural roads and lanes, and the character and landscape which they provide. The straightening and widening of such roads and lanes would leave this area bereft of countryside and village character.

As stated in my original submission to the 2016 Local Plan consultation, I object to this development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY D2: Sustainable design, construction and energy

4.5.30 I object to the addition of the words: “New buildings, except retail developments in Guildford Town Centre must achieve a reasonable reduction in carbon emissions through the provision of appropriate low and zero carbon technologies in the locality of the development.”

It will not be possible to meet carbon reduction targets, if such exceptions are made. The proposed retail development in North St with housing above should install low carbon technology, such as Combined Heat and Power (CHP).

4.5.37a The retail development in North St is not just a retail development but also a housing development. The carbon emission reduction requirement should be applied to this site. If this is not viable, the development should not go ahead.

I object to the weakening of the carbon emission reduction requirement in para. 4.5.37a

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<tbody>
<tr>
<td>(2) Density</td>
<td></td>
</tr>
</tbody>
</table>

The deleted paragraph regarding density should be re-instated. Density should be flexible and defined by Local Authorities who know the density which is suitable in a particular area taking into account local character and distinctiveness.

I object to the paragraph regarding density being deleted in Policy H1

**Student Accommodation**

(5) 2nd sentence: The word ‘about’ weakens this sentence and makes it less likely that 60% of eligible students will be provided with accommodation on campus. A larger requirement for 80% student accommodation on the University of Surrey campus would free up more homes for families which are at present occupied by students. The campus is also taken up with large areas of surface car parks, land which could be used more efficiently.

I object to the word ‘about’ and the lack of a stronger policy regarding student accommodation provided on campus in Policy H1 (5)

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY 2DI: Infrastructure and delivery

4.6.18 I object to the A3 tunnel option being deleted. The A3 cuts Guildford into two halves despoiling its attractiveness as a scenic heritage town, and causing noise pollution from very heavy traffic which impacts upon swathes of residential areas, lowering the quality of life for many residents. The Government says it wants to spend on infrastructure; Guildford should begin to lobby for a tunnel with a widened A3 for future generations. Tunnels are a way of life for other European countries, even though they are less crowded and have more space. Even junctions are built underground.

Land should be safeguarded to allow for tunnel entrances.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY ID4: Green and blue infrastructure

Blue infrastructure 4.6.40, 2nd sentence

I object to the deletion of the words: “having natural river banks as habitat”

Natural river banks not only enhance the habitat, but the landscape of the river. Hard concreted river banks destroy the natural appearance of rivers. Banks, in particular, raised above the level of the river are unnatural alongside a narrow river, such as the River Wey. Natural river banks are a way of bringing natural open space into towns and the countryside appearance of the River Way as it passes through the town has always been a feature of Guildford, contrasted by the Town Wharf and Bedford Wharf areas with the cinema and Electric Theatre.

4.6.45, 3rd sentence

The addition of this sentence is welcome. It is important that Areas of Outstanding Natural Beauty used as SANGS should keep their natural beauty (the reason why they were designated as AONBs) and not be urbanised by man-made structures and additions.

Paragraph (4.6.45) would benefit from being worded more strongly to protect AONB land used as SANGS from urbanization and unnecessary car parks, which spoil their natural beauty.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp171/2455  Respondent: 8585601 / Jennie Kyte  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy P1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P1 Box: Surrey Hills of Outstanding Natural Beauty and Area of Great Landscape Value

The addition of the words: “and Area of Great Landscape Value” is welcomed.

(3) It is written “High priority will be given to the conservation and enhancement of the natural beauty of the AONB and development proposals must have regard to its setting.”

The words ‘and views into and out of the AONB should be protected’ should be added to this sentence.

It has been a long established policy to protect views into and out of the AONB. In Policy RE5 Area of Outstanding Natural Beauty of the 2003 Local Plan, it was written that: “Important views to and from the Area of Outstanding Natural Beauty should be retained.”

This was further emphasized in para.10.25 with the words: “Development should not result in the loss of important views to and from the AONB.”
G5 Design Code in the 2003 Local Plan strongly protected established views.

Guildford is made up of hills and views, and views into and out of the AONB is one of the foremost reasons why Guildford is so attractive. Such views are important for the quality of life of residents and for tourists visiting Guildford.

I support the sentence in P1 (3) above, but object to the omission of the words ‘views into and out of the AONB’.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp171/2452  Respondent: 8585601 / Jennie Kyte  Agent: 8585601

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY S1: Presumption in favour of sustainable development

Introduction

4.1.1 The following words have been added:

“…..unless any adverse impacts of doing so would significantly outweigh the benefits or specific policies in the NPPF suggest that development should be restricted.”

The word ‘suggest’ is an interpretation of the NPPF. The word ‘indicate’ is used in the NPPF (14) and in this context it is stronger than the word ‘suggest’.

I support the addition of this sentence, but object to the word ‘suggest’.

Reasoned Justification

4.1.4 While it is welcome that protected sites listed in the NPPF are acknowledged, the word ‘automatically’ in the added sentence: "In accordance with the NPPF the presumption will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs,) land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of floods” weakens the sentence and the protection given to these protected sites. It implies that the presumption policy applies, but not automatically. It should be that the presumption does not apply to restricted areas except in exceptional circumstances.

Sites listed in the NPPF where development should be restricted should be listed in Policy S1 box.

The Area of Great Landscape Value should also be listed as restricted in Policy S1 box.
I support the sentence in 4.1.4 above, but object to the word ‘automatically’.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/2451  Respondent: 8585601 / Jennie Kyte  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3.1 SPATIAL VISION

3rd para

The reduction in housing units for this plan period still necessitates three large developments to be built on the Green Belt, plus an increase to 2,000 houses within and around villages, some now inset from the Green Belt, based on a housing figure using flawed data.

The huge increase in traffic that will be caused by these developments on main roads which have reached full capacity and on local roads and lanes not built for heavy traffic, has been acknowledged, but the infrastructure solutions proposed in the Local Plan 2016 will not be sufficient to prevent congestion at peak periods. (SCC Traffic model – SHAR 2031 traffic forecast).

I object to the housing figure in the Local Plan for the above reasons

8th para, 2nd sentence

The large amount of retail has been reduced by a comparatively small amount of 9% to 41,000 sq.m. with some extra housing units added. Evidence as to the need for this amount of retail needs analysing carefully and the data used checked, particularly as retail is being adversely affected by the fast moving and increasing trend for online shopping. Consequently reports by consultants can be out of date.

Instead the Town Centre could be regenerated with housing, which would bring vibrancy to the town, stimulating Guildford’s economy by supporting leisure and eating places, and also the shops in the High St, the primary shopping street, along with its connecting passages.

I object to the over-large amount of retail proposed for the reasons above.

9th para

It is written that: “The transport strategy and Local Plan policies will be aligned to encourage residents, employees and visitors to use alternative modes of transport especially through the town.”

It has been found that residents living in the town, 23% (GTAMS March 2015), were the largest group crossing the town, (ie from residential areas to hospitals, clinics, schools, after school activities, evening classes, leisure centre, sports grounds, University of Surrey, Surrey Research Park, cathedral, churches, colleges, out of town shopping, supermarkets, offices, railway stations, parks and so on.) It needs to be outlined whether public transport can be provided for residents and
how they can be persuaded to use it. Some residential areas do not have a bus service and others have an infrequent service. (Buses are also an extra expense for those who own cars.)

I object to the loss of a central bus station, which gives the option of crossing town by changing buses.

A round town ‘Hop on, Hop off’ bus travelling to all sides of the town centre, stopping at the railway and bus station, would make all parts of the town centre more accessible. Such a bus would benefit residents, visitors and shops.

For the reasons above and to be taken in conjunction with my response to the 2016 Local Plan consultation, I object to the Spatial Vision.

POLICY S2 Box: Planning for the borough – our spatial development strategy

(1) The data used by G L Hearn Consultants to produce the 2017 Objectively Assessed Need (OAN) figure in the West Surrey Strategic Housing Market Assessment (SHMA) has not taken into account the report by Neil McDonald, an independent expert, which shows that the majority of students of the University of Surrey do not stay and live in Guildford, and do not raise families in Guildford, but move elsewhere to live.

The latest OAN figure written in the 2017 Local Plan is based on unsound data.

The revised figure does not apply constraints to the lower the housing number. Applying constraints to individual sites, means that if one site is restricted for flood reasons, etc, to fulfil the housing number, housing to replace it may be built in another restricted area such as the Green Belt, which is no longer being protected under Exceptional Circumstances from development.

See comment under Spatial Vision 8th para, 2nd sentence regarding retail expansion in the town centre.

I object to Policy S2 for the reasons above

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

Blackwell Farm, Hogs Back – Mixed use 1,800 homes, 6 Traveller pitches, employment, Local Centre, school etc. OBJECT the majority of this land should be designated AONB

- Most of Blackwell Farm and the land in its vicinity is of a landscape and scenic quality, character and condition that should merit inclusion within a revised AONB boundary.
- The landscape is critical to the setting of the Hog’s Back ridge and in the conservation of rural views to the north of equal, if not greater importance, than land to the west of Down Place, which has been included in the boundary proposed by the Surrey Hills AONB Board.
- the existing AONB and the loss of landscape which is of a character and quality which merits inclusion within a revised AONB boundary.

Lack of infrastructure and increased surface water run-off would affect Wood Street Village (particularly Pound Lane/Baird Drive) and Fairlands. The proposed accesses from the A31 and Gill Avenue would be inadequate to support such a development. Indeed access onto the A31 would be in the AONB. In addition there would be an adverse impact on the following Ancient Woodland, Strawberry Grove, Dean Bottom, Manor Copse and a strip of Ancient woodland at Wildfield Copse. The Infrastructure Study para 3.10 states there is insufficient waste water infrastructure for this site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Hampshire County Council welcomes the opportunity to comment on the draft Guildford Borough Council Local Plan and supporting documentation. As an adjoining Highway Authority the County Council wishes to comment on the transport implications arising out of the Local Plan Strategy as set out in the Transport Evidence Base; comprising of both the Guildford Borough Transport Strategy 2016 (Guildford Borough Council, June 2016) and the Strategic Highway Assessment Report (Surrey County Council, June 2016).

The Strategic Highway Assessment report acknowledges that it is likely that a reasonable proportion of traffic will travel into the neighbouring borough of Rushmoor. The potential developments set out in the Local Plan have been modelled using Surrey County Council’s Strategic Transport Model SINTRAM. The modelling results show that the potential developments could lead to an increase in traffic on roads leading into Hampshire’s road network via links such as the A31, A323 and A3011.

It is noted that Policy 13 of the Local Plan (Guildford, 2016) places a requirement on any new developments ‘to demonstrate adequate provision to mitigate the likely impacts, including cumulative impacts, of the proposal on both the safe operation and the performance of the Local Road Network and Strategic Road Network’. Hampshire County Council, as a neighbouring Highway Authority would like the to see the wider area incorporated, to include the cross-borough boundary areas such as Hampshire’s road network, within this requirement.

The County Council would expect to be consulted on any future planning applications as and when it is lodged in relation to the developments in Ash and Tongham, in order to identify the potential impact on Hampshire’s Road Network. In addition, it is requested that Hampshire County Council be involved in any discussions aimed at addressing the impacts of any such development.

I object to this development because of the additional traffic from that development coupled with the traffic from the new marina with 80 berths which you have agreed further down Tannery Lane which is mainly a single lane with passing places. This additional traffic will be unable safely to join the much overused main road through Send. This road is the main through road from Woking to the A3 and M2S which is already used to capacity by general traffic including articulated trucks both local and European plus all manner of other heavy vehicles for which the road was never designed. There is also an increasing number of cyclists who are more at risk without a cycle lane for which there is no room and who slow the traffic down because they are difficult to pass. Additional traffic joining from Tannery Lane would have great difficulty and any attempt to ease the problem with a roundabout or traffic lights would simply exacerbate the situation.

I object to this proposal because the number of homes proposed would add to local traffic congestion which is already excessive at peak travel periods. This site is also located underneath one or more pylons carrying power cables which constitute a health hazard for anyone and especially children living in such close proximity to them.

I also object to the location of any form of industrial activity which would increase traffic movements in that area leading to even greater traffic congestion. If additional industrial space is needed the ideal location is Slyfield which has the space to cater for it and where there is a symbiotic relationship between the various activities on such a site.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of two travellers pitches on this site which would be in contravention of your own stated policy of having a ratio of two such pitches for every 500 houses. It is possible that the widening of the Send Hill road would encroach on the area of the site thus reducing its capacity for 40 houses assuming it could even accommodate as many as that which is doubtful. In any event two pitches among so few houses would certainly have a negative effect on the value of any houses built there and would certainly not secure the best return on the tax payers investment in the land.

Send Hill is certainly not a suitable location for travellers anyway access being difficult from the traffic lights especially with cars parked on one side opposite the school and on the brow of the hill making the approach quite hazardous. What evidence is there that travellers are keen to be located among houses to enable them to integrate with the community.
On the other hand a small development without traveller pitches and in keeping with the surrounding properties could be a possibility.

Traveller issues have arisen in Send several times over the years and Send residents and our Parish Council have expressed their views many times to you the Guildford Borough Council and I find it very disappointing that you do not seem to heed our views and now again insist on trying to locate two pitches in a most unsuitable location. [Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it]

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Green Belt realignment which will take Send outside the settlement boundary when there are still brownfield sites available for development in urban areas which will have much less impact on local environment and infrastructure. It has never been made clear, to me at least, who this additional housing is for in an area which is primarily residential and not industrialised.

The number of homes proposed for Send (693p.a.) is completely disproportionate in the context of a village like Send. The extensive development proposed for Send and elsewhere in this locality such as Garlick’s Arch, Gosden Hill and Wisley Airfield means that, in effect, it will become a ribbon development from Guildford almost as far as Cobham and transform a pleasant rural area into suburbia.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
General observations

When I have attended Council meetings at Millmead on particular issues of concern to me, I have always been impressed by the quality of debate and general conduct of the meeting. The publications distributed about developments and activities in Guildford are also very positive and well received but despite this I regret to say that I do not have the complete confidence and faith in you, the Council, that I think I should. Nor do I have the feeling that you are on the same wave length in these matters as most of the people you represent. This probably stems from the way these planning issues are perceived. I well understand the complexities involved which in the main are dealt with very well but there is still some element that is missing. For example

1. There is no explanation of why so much housing capacity is required in this area and who it is for.
2. There are no artist's impressions of how a development might look or any idea given of what an "affordable house" looks like.
3. What is a traveller's pitch?
4. Are there any conditions attached to the allocation of travellers pitches?
5. How are they to be managed?
6. Residents should feel confident that the Council representing them properly reflect the feelings of the public.
7. The villages in Surrey are a huge asset which development on the scale proposed in this local plan will change them into small townships many of which will be linked with ribbon development thus changing the character of the area for ever.

I am sorry if this sounds very negative but perhaps there is some value for you to know how someone feels about things.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A42 Pages 241-2

I object to the proposed increase of a further 16 houses on the Clockbarn Nursery site. Traffic movements from that site coupled with traffic accessing the Marina development and then trying to join Send Road would cause considerable problems for residents and through traffic alike. Send Road is already used to capacity by traffic heading to and from Junction 10 on the M25 and was never intended to be used by today's very large articulated trucks. The essential traffic islands to enable pedestrians to cross represent an additional hazard plus the increasing number of cyclists exposed to rising levels of exhaust pollution.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A43 Pages243-5
I object to the proposed changes to this site which in combination would generate - considerable activity in a most unsuitable location. Show people pitches implies large vehicle traffic movements and a further extension to the commercial premises that have already been added on that side of the road all of which is located in close proximity to the surrounding residential area. In any case the proposed Show people sites contravenes your own guidelines of two pitches on developments of 500 to 1999 houses.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A58
I object to this proposal which is not defined and therefore open to interpretation. Any development of that type and on that scale will again impact the road infrastructure on the edge of two villages, Send and Ripley. In any case the need for them is unclear especially when there seems to be spare capacity at Slyfield industrial estate which is much more appropriate.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
GENERAL OBSERVATIONS

Whilst so much of what the Council does on behalf of the community is taken for granted, probably with very little expression of gratitude, I personally am much more critical of the Local Plan proposals. We in Send have expressed our views over the years but clearly no attention is paid to them as evidenced by the fact that despite everything that has been said even more houses are proposed to be built in Send than before plus an additional eight Show people pitches.

The opening paragraph to the local plan states "Our Proposed Submission Local Plan balances the needs of residents, businesses and visitors with protecting the borough's most important countryside, landscapes and heritage. It addresses housing, employment, retail and leisure requirements, supported by suitable infrastructure including education, healthcare and transport. The new Local Plan will be in place until 2034."

Furthermore there are signs at various points proclaiming "The Surrey Hills an area of Outstanding Natural Beauty." Yet despite this the Local Plan will considerably increase traffic volumes, transform existing villages into small towns, reduce the benefit of the Green Belt, result in undesirable ribbon development and increase demand for education and health services which are already trying to cope. The scale of the plan is such that it will inevitably diminish these claims. I regret to say that I remain disappointed in the Council's objectives and total disregard of public opinion which have consistently been expressed at meetings and in letters of objection by residents deeply concerned with their environment and way of life. I would like to feel that GBC are more in tune with those they represent but I am sorry to say I do not.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.
The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7084  Respondent: 8586369 / Mr Luigi Fort  Agent: 

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition of north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/15875  Respondent: 8586369 / Mr Luigi Fort  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.
I conclude by adding I realize I am lucky to live here and can see why many would want to do the same. But unrealistic and overly ambitious development destroys the very elements that make Clandon and neighbouring settlements special. Surrey has few real villages left so why not preserve rather than blight them?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/15881  Respondent: 8586369 / Mr Luigi Fort  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
POLICY H3 – Rural Exception Homes

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/15878  Respondent: 8586369 / Mr Luigi Fort  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.
The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan.

I have itemised my objections below but also wish to support some of my points by recalling personal experience and other observations (A-C)
1. **Increased danger to pedestrians should the A247 become busier.** I have medical conditions that require my using a walking stick when out and about. Walking along the stretch of A247 between the Burn Common Roundabout to where it meets the A246 is a fraught experience and requires considerable concentration. In many places the pavements are narrow, uneven and winding; should I stumble I could easily end up in the round. To make matters worse these walkways are not continuous so one often has to cross the busy road and back to reach one’s destination.

2. **Clandon Station is a notoriously dangerous place to exit.** Either on foot or by car, turning right from the main car park onto the A247.

3. **Increased congestion on A247 during peaks periods.** While driving during rush hour it can already take 2-3 minutes simply to exit right from Lime Grove onto the A247. Roadworks and accidents cause long –lasting tailbacks as there is no easy way to divert.

I respectfully remind Guildford Borough Council that it has a duty of care to residents and this must be taken into consideration when evaluating the impact of traffic in the area.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

I STRONGLY OBJECT to the Guildford Borough Proposed Submission Local Plan (June 2016). Having lived in West Clandon all my life, I have seen how the local area is already becoming overcrowded. Moreover the A247 is forever becoming a more popular thoroughfare for commuters using the A3 and Woking railway station, coming from Merrow, Gomshall and Horsley, which already has a severe negative impact on those living in the village. The population growth in the surrounding area is evidently already taking its toll on the day-to-day lives of the village people, and I thoroughly believe that to increase it by building almost 14,000 houses will only make matters worse. As a result I consider this Plan unsustainable, unworkable and, in many provisions, unnecessary. Besides congestion I have many other concerns about it, and herewith set out my objections to specific policies and matters. Please email me an acknowledgement that you have received this correspondence and are dealing with it accordingly.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. I believe this site often floods during the winter months and the flooding is made worse by the...
soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/15871  Respondent: 8586369 / Mr Luigi Fort  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the Borough Wide Strategy (Policy S2)

1. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

2. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

3. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common-sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guilford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt.
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity.
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be recommissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular pastime, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4717  Respondent: 8586369 / Mr Luigi Fort  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to
build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.

4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”

5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.

7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**
The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

I object to the 2016 Draft Local Plan and specifically to the development at Gosden Hill Farm -

I do not agree that the council need to build 14,000 new homes I feel there is a lack of evidence for the alleged housing need numbers - independent reviewers do not agree with the Council's number of 693 per year and the plan does not include any constraint on this figure.

The proposed sites including Gosden Hill Farm are all in a straight line in one area of the borough, there is therefore a disproportionate level of development in this area.

The development of Gosden Hill would move Guildford 3 miles north up the A3 and include the loss of a large area of Green Belt, the loss of Green Belt is unacceptable.

The development at Gosden Hill Farm will bring a vast amount of traffic into an already congested area and there is no provision in the plan for specific infrastructure. Without the correct infrastructure the increased traffic will make it almost impossible to drive into Guildford Centre from the Burpham/Merrow area which will discourage people from visiting the town centre, working in Guildford and will also be a disincentive for businesses who will move to towns with a better and planned traffic infrastructure or to out of town sites.

The proposed sites are all along the A3 and a decision needs to be made on the future of this road prior to any developments - if a tunnel is the answer to the traffic congestion problems the site of this must be decided first, if not a tunnel, what other improvements are to be made and where, all of this must be decided prior to any development.

If a small town/village like Hindhead can get a tunnel on the A3 surely a large town like Guildford should be lobbying for a tunnel and perhaps the Council could put some energy into this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

GBC advocates building 13,860 homes during the period of the Plan – 693 dpa according to the SHMA. This begs a few questions.

• Why can we not know the calculations used to reach this figure, over twice the number promulgated four years ago?
• Why have GBC said that we can trust the model the consultants have used because many other local authorities have done so? This shows either a distressing gullibility or appalling arrogance.
• On the one hand we are told that the OAN is deliverable, on the other we are informed of constraints that may affect deliverability; how can we be asked to approve something which does not offer a realistic target number that takes all constraints into account?
• Why has GBC not imposed constraints to overall housing growth when other boroughs have? Guildford is a congested gap town yet little effort seems to have been made to preserve its urban or rural character, or maintain the unique identities of its villages.
- Why is the level of expansion in the north of the Borough so disproportionate? Over 40% of the proposed total will be located within a few miles of Burpham, turning a pleasant village at the urban edge of Guildford into an anonymous built up area suffocated by traffic.
- An independent report commissioned by the Guildford Residents Association (GRA) offers a much lower OAN of 510 dpa. The report found errors in the way student needs were calculated, a failure to correct historical data and flaws in the estimation of homes needed to support job growth.

It is clear that the housing figures quite literally do not add up, therefore they render the whole Plan unsound.

I am totally opposed to this development. I have lived in Burpham for many years and have watched a small community grow ever larger as developments were built - Great Oaks Park, Weylea Farm, Weybrook, Raynham Close and a fair amount of garden grabbing. I have also watched the concomitant increase in traffic and pollution. Two thousand homes, schools, offices and commercial premises, a new station, a Park and Ride will generate a huge amount of traffic and have an utterly devastating effect on Burpham and our neighbouring communities.

The A3/A3100 is one of the major routes into Guildford and as has been pointed out is already overcrowded. The proposed access will only exacerbate the problem so if the development does go ahead, the only possible solution is a four way intersection in the vicinity of Potters Lane as was suggested thirty years ago.

There has been talk of a tunnel to carry through traffic under Guildford and alleviate the overcrowded roads. The idea has merit but a decision has to be made before Gosden Hill disappears under homes and all the associated infrastructure. How galling to decide to go ahead, then realise that the best site for a tunnel entrance is now a housing estate.

We object to this policy as we feel that more residential use should be made of the town centre. Independent research suggests a fall in demand for retail space – there is enough visible evidence of empty shops in High Streets – and no account seems to have been taken of the increase in online shopping.

The Guildford Retail and Leisure Study 25 September 2015 states “Town centres, once the principle focus for retail and leisure are now increasingly under threat.”

Proposing a 40% increase in retail space seems perverse; better surely to concentrate on high quality enterprise that reflects Guildford’s heritage and prioritise brownfield development for imaginative housing. This would take pressure off the Green Belt. The NPPF clearly states that Green Belt serves a key purpose, “to assist in urban regeneration, by encouraging the recycling of derelict land and other urban land.”

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Transport

There is no real clarity on transport and road infrastructure. The Plan hints at road improvements but in an ill-defined way. The traffic issues that have dogged Guildford for years are not resolved – there is no commitment to new town bridges, no indication of a central bus exchange, no commitment to consider the viability of a tunnel. Some things that are proposed are unsustainable – the Sustainable Movement Corridors for example. This has all the hall marks of a brainstorming session with Google maps. One site visit would have been enough to realise that the A3100 is not wide enough and has too many pinch points to accommodate four traffic lanes.

The Gosden Hill development is another example of lack of intellectual vigour. Access to it is via a new on-then-off A3 slip road, with the current slip road becoming two way. With all that is proposed for this development, including a 1000 vehicle Park and Ride, and other developments north of Burpham such as Garlick’s Arch and Wisley, thousands more vehicles will be on the roads and many of them will need to access the north bound carriageway of the A3. How do they do this? Drive through Burpham to the Clay Lane north bound slip road. It may look fine and dandy on Google but the reality is somewhat different. Our roads are already congested to the point of grid lock. I live by the present south bound slip and see the traffic come to a halt most days. The SHAR does note that there will be an increase in traffic through Burpham, putting pressure on the A3100/B2234 roundabout. May I respectfully draw your attention to the fact that there is already a great deal of pressure on that roundabout which alternates between a highways version of bumper cars and complete gridlock.
We object to this policy. The Metropolitan Green Belt constitutes 89% of the Borough and should be at the heart of all planning concerns. It is not merely a space separating urban areas but a vibrant community in its own right – home to agriculture, tourism and leisure activities. It provides biodiversity, beauty, wide rural views – all essential for physical and psychological wellbeing. It plays a vital rôle in water management and flood control. And it is not the personal fiefdom of Guildford Borough Council but belongs to the wider community, including London, and should be regarded as a national asset and a legacy for the future. Once the Green Belt is lost it is lost in perpetuity.

It is reasonable to expect some development but it should be proportional; a village that has 1% of the total number of homes in the Borough should not be expected to accommodate more than 1% of new homes. The demands on infrastructure would also be proportional, and settlements would be more likely to retain their character.

Policy P2 seeks to impose strategic development in the Green Belt, despite government commitments to protect it.

The NPPF states

“…..the essential characteristics of Green Belts are their openness and their permanence…….new Green Belts should only be established in exceptional circumstances.”

Brandon Lewis, the then Minister of State, said

“[the NPPF]… makes it clear that inappropriate development may be allowed only where very special circumstances exist and that Green Belt boundaries should be adjusted only in exceptional circumstances through the Local plan process and with the support of local people. We have repeatedly made clear that demand for housing alone will not change Green Belt boundaries.”

This Local Plan proposes covering large areas of the Green belt with housing estates – 8,086 homes are planned as opposed to 1,135 for the urban area of Guildford, a huge imbalance.

Urban regeneration, the use of brownfield sites, homes in the town centre rather than the proposed 40% increase in retail space that flies in the face of retailing trends, more student accommodation on campus – these should be utilised before summarily dumping blocks of housing onto a precious resource.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Green Belt

The Green Belt is not entirely sacrosanct. There is no reason to object to some development, so long as it is proportional and appropriate. What GBC is proposing however is scandalous. More than half the planned total build is scheduled for the Green Belt – have GBC forgotten the purpose of the Metropolitan Green Belt? It was put in place to prevent urban sprawl, not provide a playground for developers. It is farmland, open space, manages water and flood control, is an area of biodiversity, and a provider of tourism and leisure activities. In the words of the NPPF, "... the essential characteristics of Green belts are their openness and their permanence."

The Green Belt is a national asset and should be held in trust for future generations. Once lost, it cannot be regained.

Why does urban regeneration not play a greater role in this Plan? Prioritising development of brownfield sites, locating more student accommodation on campus, reducing the proposed 40% increase in retail space would take the pressure of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/12263  Respondent: 8586785 / Elizabeth Critchfield  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to this policy which presumes sustainable development in line with the NPPF. It is our contention that the proposal to build 13,860 homes across the Borough is not sustainable. The policy fails to recognise that rural areas with inadequate road and other infrastructure cannot cope with development on this scale and is therefore unsound.

NPPF 10 notes that "plans and decisions need to take local circumstances into account so that they respond to the different opportunities for achieving sustainable development in different areas."

Policy S1 says: "We will work proactively with applicants jointly to find solutions that mean that proposals can be approved wherever possible and to secure development that improves the economic, social and environmental conditions in the area."
There is a subtle shift of emphasis from the NPPF’s “need to take local circumstances into account” to GBC’s “proposals can be approved wherever possible.”

There are twelve planning principals outlined in the NPPF which the Local Plan should take into account. Some seem to be disregarded, for example:

“...take account of the different roles and character of different areas, promoting the vitality of our urban areas, protecting the Green Belts around them, recognising the intrinsic character and beauty of the countryside and supporting thriving communities within it.”

“...support the transition to a low carbon future.”

“...contribute to conserving and enhancing the natural environment and reducing pollution”

“...encourage the effective use of land by reusing land that has been previously developed (brownfield land) provided it is not of high environmental value.”

These values do not sit easily with the proposed strategic developments.

Another statement from Policy S1 gives serious cause for concern.

“Planning applications that accord with the policies in this Local Plan (and, where relevant, with policies in adopted neighbourhood plans) will be approved without delay, unless material considerations indicate otherwise.”

This offers a degree of flexibility that is tantamount to offering carte blanche to developers, and the presumption in favour of applications fails to recognise any constraints such as the Green Belt.

Policy S1 looks to securing “the economic, social and environmental conditions in the area” but fails to acknowledge the conflict that can often occur between economic growth, environmental protection and social justice. There are difficult decisions to be made but no guidance is given as to how dissension might be resolved.

This policy reveals a distinct bias towards development – one might almost add at any price. References to sustainability are nebulous, and inconvenient constraints are swept aside. Perhaps the most shocking omission is the lack of commitment to uphold Green Belt boundaries.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
We object to the proposal to build 13,860 homes in the Borough over the period of the Plan for the following reasons:

- The figures are from the SHMA but we are not privy to the calculations used to derive the required housing need of 693 dwellings per annum (dpa). The consultants who prepared the SHMA claim intellectual ownership and, despite FoI requests, the details remain hidden. We are told to trust the model because many other local authorities use it, a specious argument. GBC have presumably taken the report on trust which suggests a degree of naivety. There is significant concern, too, that the consultants’ website indicates an agenda that is clearly pro development.
- The OAN is 693 dpa but there is no Housing Target within the Plan. GBC seem to suggest the two are the same, that the OAN is deliverable and cannot be gainsaid. However, we understand that deliverability may be affected by various constraints. How can we be asked to approve a plan that does not actually propose a realistic target number that takes all constraints into account?
- An independent report by NMSS, commissioned by Guildford Residents’ Association (GRA), has arrived at a much lower OAN of 510 dpa. This report finds that the SHMA inflates the OAN due to
  1. a) failure to correct historical data
  2. b) issues with the way student needs are considered
  3. c) flaws in the estimation of homes needed to support job growth.
- Other boroughs such as Woking and Waverley have applied constraints to overall housing growth, Guildford has not. There seems to have been little effort to protect the character of either urban or rural aspects of Guildford, already a very congested gap town. The unique identities of villages like Send, Ripley and Clandon are threatened with being lost as a result.
- There is a disproportionate level of expansion in the northern part of the Borough. This will impinge particularly on Burpham which would cease to be a definable village and diminish to just the name of an area within the urban sprawl of Guildford. The planned development of Gosden Hill Farm offers the second largest number of homes, a new railway station, a Park and Ride, shops and primary/secondary schools, all situated in the Green Belt that includes an area of ancient woodland.

It is our contention that these deficiencies render the Local Plan unsound.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Poor documentation and lack of consultation time

Six weeks is insufficient for most people to fight their way through thousands of pages to ascertain the aims and objectives of GBC and prepare a reasoned and informed response.

- The documentation is appalling. The language used is infelicitous to say the least and the presentation is poor; the use of white font on coloured background will have caused problems for visually impaired people.
- The website is cumbersome to navigate.
- The sheer volume of documentation is overwhelming – a literary equivalent of traversing the Himalayas. I would guess many people did not make it beyond the foothills. At the very least, some kind of summary as to the intentions of GBC should have been provided.
- Transport and infrastructure documents were released at the last minute and are incomplete.

I can understand the need for economic development but it should not be at any price. This Plan seems to focus on expansion regardless of the harm done to the existing community. There are serious issues with regard to current infrastructure deficiencies which have not been addressed. They will not be solved by burying acres of Green Belt under houses and requiring the developers to pay for infrastructure in the faint hope that the rest of us might benefit.

A sound and sustainable Local Plan should surely have one major outcome – that most residents on reading the proposals can say “This Plan will so something to improve my quality of life.” On that ground alone, this Plan fails.

I have read the responses submitted by the Burpham Neighbourhood Forum, the Guildford Residents’ Association and the Campaign to Protect Rural England and am in agreement with them.

Policy A25 Gosden Hill

My reasons for objecting to the changes in this policy are as follows:

1. The housing number would appear to have been reduced to 1,700 until you look closely and realise that that figure is a minimum build, leaving 300 homes to be delivered after the plan period.

2. The "improved" two way junction is nothing of the sort. The proposed development - houses, commercial and office premises, a Park and Ride, a station - will generate thousands of vehicles. Any vehicle leaving the development, unless accessing the southbound A3, will travel through Burpham; local traffic wanting to access the southbound A3 will travel through Burpham. The impact on the community will be horrendous. I live along the A3 slip road and am daily witness to the traffic congestion; a slow moving trail of cars, commercial vehicles and an increasing number of HGVs that sometimes judders to a halt. This can be caused by incidents on the southbound A3 that cause traffic to back up and endeavour to escape down the Burpham slip road. It can also result from the planning disasters that Burpham has had to endure over the last few decades with no thought given to infrastructure. We are talking of what is happening NOW - what on earth will it be like if this proposal goes ahead without proper infrastructure? The visible current overloading of our road system is one thing; the invisible result - air pollution - is another. Pollution makes people ill, sometimes kills them. National government is concerned, so should you be.

3. Access/egress to and from the development is from one roundabout; block that and no one can get in or out, including emergency vehicles. That is incredibly bad planning, unless of course you are emulating Blackadder with a cunning plan that could possibly involve another entrance in Merrow Lane.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I note the housing need has been reduced from 693 to 653 per annum, a reduction of around 5%. As last year, there is a significant reluctance to elaborate on the calculations and assumptions that underpin this figure. An independent and open analysis of the housing need figure undertaken by a respected national expert has arrived at a much reduced figure of 404 homes per annum. That is a difference of nearly 40% - statistically extremely significant.

There is no doubt that more homes are needed - so long as they are of the right kind, providing for public sector workers, first time buyers and older people wanting to downsize, not the developer preferred money-grubbing high end of the market housing. However, the housing need figure must be realistic and its raison d'etre transparent. This is not the case and I therefore object to this policy.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have resided in Send since 1980 moving to the area from a busy area where houses were being built on every piece of available land, I picked Send / Ripley as I was certain that it would remain within the Greenbelt.

I OBJECT

To Send losing its Green Belt status, I have received no notification from any planning authorities that these changes were coming, I only heard from neighbours. Local councillors promised that this area would remain "GREEN" but have now reneged on their promises. Send would lose its identity completely and end up like Woking and other similar sprawling towns. Greedy developers would soon move in and do what they want and make vast profits at our expense, I have already met one who has bought land in Send two years ago off main by river, on spec based on "inside knowledge" that the Green belt will be destroyed.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The land off Keens Lane, Worplesdon (Site A22) in the GBC Draft Local Plan for the proposed development of 140 homes and a care home I believe is inappropriate for three main reasons:

1. The area is Green Belt, which should be retained and not built on. I am appending at the end of this email* the agreed Policy of Surrey County Council for your reference and urge that the green belt be protected by Guildford Borough Council.
2. Keens Lane is a narrow road (the word "lane" is a clue) and building more homes there would entail the widening of the road, but this does not account for the fact that at the far end, near to Gravetts Lane/Tangle Lane, it is constricted and the area is already congested. Since the new housing has been built the traffic in the lane is uncontrolled and many cars speed along it. I have been in contact with Surrey County Council about this and asked that traffic calming measures be put in place but nothing has happened. I copy the email response I got below. There are often near collisions on the brow of the hill on the lane as traffic speeds faster and faster.

3. The proposed development site is close to Whitmoor Common and a Site of Special Scientific Interest, and would have a damaging effect on ecology and wildlife. It is also bounded by Broadstreet Common. The open nature of Worplesdon should be retained.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

Building new homes is treating the symptoms of over population. All it will bring about is more population and more housing needs. The causes need to be treated, the Government and local authorities should be addressing the causes of over population, not eternally accommodating it. The infrastructure of Guildford cannot take any more population. The Aldershot road is always heavily congested in the morning and evening, the A322 around the Brookwood area is regularly congested and more housing in Guildford would add to this problem, the same for Burpham, Jacobs Well etc. Concreting over the land creates more flooding, with all the rain this summer the flooding is more than evident.
You have posted on YouTube a clip of people supporting the developments – one being Alf Turner at the Royal Surrey County Hospital. The A&E dept is over run with people attending when they don’t need to – if the Government addressed immigration.....maybe now we’re out of the EU things will change for the better.

Answer (if comment is on questions 1-7 of the questionnaire): ()

There is a lot of wildlife in the area, my home is directly opposite site A22 where there is an abundance of wildlife, even stag beetles which I believe are endangered. Frogs, birds, foxes, all sorts of things will be lost if the 140 planned homes and a care home are built on it.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write to object most strongly to the proposals to build on Guildford’s greenbelt land. Past Governments made the policy of greenbelt to protect it for the country, the people and the wildlife and for new Governments to erase these policies makes the making of any policy a farce if, in time, it can be overwritten.

Answer (if comment is on questions 1-7 of the questionnaire): ()

* It is Surrey County Council policy (March 2013) by a Motion agreed at a Full Council meeting of Surrey County Council about the Green Belt:

Surrey County Council, March 2013
RESOLVED (unanimously):

Council notes:

1. Surrey County Council has a proud history as the creator of the Green Belt. The County’s Countryside Estate founded by the Surrey County Council Act of 1931 was the basis of the London County Council’s Green Belt Act of 1938.

2. The Coalition Agreement states:

‘We will maintain the Green Belt, Sites of Special Scientific Interest (SSSIs) and other environmental protections, and create a new designation – similar to SSSIs –to protect green areas of particular importance to local communities.’

Council believes:

Surrey’s Green Belt, Countryside Estate, SSSIs and other green spaces are vital, not only for the county’s environment but also for maintaining a “green lung” around London.

Council resolves:

1. To use its power to protect Surrey’s Green Belt.
2. To support the National Planning Policy Framework (section 9 – paragraphs 79 to 92) and the Government’s policy of protecting the Green Belt.
3. To make Surrey’s MPs and the County’s Districts and Boroughs aware of this resolution.
4. That any Green Belt development in the County is in line with the needs and wishes of Surrey residents

Answer (if comment is on questions 1-7 of the questionnaire): ()
I have seen the changes to Policy A22, Land North of Keens Lane, Guildford (Pitch Place Farm) and thank you for the invite to submit comments.

I have written to you several times opposing the use of the Greenbelt land for development. The Greenbelt policy was created to safeguard the land from development and the undoing of the policy makes the making of any policy a farce. Despite my objections and those of my children, you now want to increase the number of houses so I feel disappointed that my objections aren’t making any difference, I bought my home here because it’s my home town and all I could afford to not have to live surrounded by other houses, developments and traffic. I have to pay a premium to live in my own home town.

The infrastructure of Guildford and the surrounding area is already under extreme pressure from too much traffic and over population. Schools are under strain, doctors appointments are harder to get now than they’ve ever been, the local hospital is under strain, all the hospitals are. Keens Lane is a very narrow lane, there have already been two housing sites in recent years at the end of the lane joining with Tangle and Gravets Lane – the additional traffic from them is very noticeable, much of it speeding and despite requests to SCC for speed restrictions they keep saying that because no accidents have happened in the last 5 years there’s no need for speed restrictions. There will be an accident one day, it’s only a matter of time with the speed some of the users choose to drive at.

I strongly oppose the building on Pitch Place Farm, my garden is directly opposite the field. The additional traffic will bring noise and vehicle pollution to us. My garden is often flooded in the winter as it’s a very wet area already, taking trees and concreting over the land is only going to make this worse, the trees are a valuable part of the area taking up the flood waters. It is greenbelt land – you shouldn’t be taking this and going against a policy that was put in place for the protection of the area. No greenbelt land should be taken.

I have recently had a letter from Levanter Developments saying that they have bought the land Roseberry in Keens Lane, they want to cut all the leylandi trees down that belong to my Close and border our garage block and their land. I’ve objected but am now anxious that they’ll push and push to get them down, they want to build 2/3 storey terraced cottages, taking yet more greenbelt land. It’s an outrage to the policy and I’m surprised GBC Planners are overlooking it. The leylandi trees I believe form a sound and pollution barrier to the A322 which is congested on a daily basis, SCC see fit to keep having road works on the stretch of road from the Seafare Fish and Chip shop down to the roundabout at Cumberland Avenue and Keens Lane making it even worse.

Keens Lane cannot take the addition of these 150 houses and a Care home – the additional traffic will create many problems for the already problematic traffic problem Guildford faces on a daily basis. You have referred to “Encourage cycling and pedestrian movements from the site” - this won’t happen in reality and with the 150 houses alone it will be bringing in the region of a further 300 cars to the lane, more with the visitors to the care home. I strongly oppose both the houses and the care home. The care home will bring potentially a further 60 cars from visitors and regular HGV vehicles for deliveries, ambulances, mini buses (ie Dial a Ride) coming back and forth for mobility (hospital visits for the residents). The lane isn’t suitable for this amount of additional traffic.

Comment ID: PSLPS16/760  Respondent: 8587073 / Rushmoor Borough Council (Louise Piper)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A29

Do you consider this section of the document; complies with the Duty to Cooperate? ( Yes ), is Sound? ( Yes ), is Legally Compliant? ( Yes )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Guildford Borough contains some “Countryside Beyond the Green Belt”, although this notation covers only 2% of the Borough, and is located in the west of the Borough near Ash and Tongham. Mindful of the hierarchy set out in paragraph 4.3 above, and the need to identify enough land to deliver an average of 693 new dwelling a year, the draft Plan contains several housing allocations that fall on land that is subject to this designation.

Policy A29 is the most significant of these allocations, identifying land for approximately 1200 homes around Ash and Tongham. A map showing the distribution of the sites that comprise this allocation is shown at Appendix 1 of this report. In addition to this, there are two other smaller allocations (A27: Warren Farm, Ash Green and A28: Land to the east of White Lane, Ash Green) of 120 units in total, 629 homes with planning permission (net outstanding) and 124 completions since the base date of 2013. In the wider Ash and Tongham area, taking into account completions, permissions and Local Plan allocations, this equals 2,057 homes to be delivered by 2033.

In terms of any potential cross boundary impacts of this development identified in Policy A29, whilst it is located close to the boundary with Rushmoor Borough, mindful of the constraints noted above, Guildford Borough Council has very limited opportunities to accommodate its objectively assessed housing need. The draft Plan contains a number of other strategic housing allocations, including land at former Wisley Airfield (2,100 homes), Slyfield Regeneration Project (1,000 homes), Gosden Hill Farm (2,000 homes), and Blackwell Farm (1,800 homes). In addition, there are a number of other allocations of around 100 units. Importantly, the evidence supporting the Plan has had to review the function of land within the Green Belt, and facilitate some land releases from it, in order to achieve the scale of residential development required to meet Guildford’s OAN.

Rushmoor Borough Council is supportive of Guildford’s approach of “leaving no stone unturned” in seeking to meet its housing need. This is positive in as much as it is not asking Rushmoor to help meet its housing needs, and in this respect, at this point in time, both authorities can be said to satisfy the “duty to cooperate” on the cross boundary strategic issue of meeting housing needs.

The Strategic Highway Assessment report (2016) sets out that in respect of the development proposed in the Local Plan, without any mitigation, the greatest potential impacts are seen on the network in the vicinity of Ash / Ash Vale and travelling north into the borough of Surrey Heath. Some of the trips in Ash / Ash Vale will join the A331 Blackwater Valley Road to travel further afield, but it is likely that a reasonable proportion will travel into the neighbouring boroughs of Rushmoor and Surrey Heath. Some of these roads already experience congestion, despite the model suggesting that existing traffic flows are relatively low.

Specifically of interest to the strategic allocation around Ash and Tongham, further information on key infrastructure projects is provided at Appendix C of the draft Plan, in the Infrastructure Schedule. Infrastructure projects LRN9 through to LRN14 relate to improvements to traffic management and environmental improvements in and around Ash, Ash Vale and Tongham, to be funded through a combination of developer contributions and Enterprise M3 Local Economic Partnership Local Growth Fund awards. For example, the schedule identifies LRN14, which is a junction improvement scheme at the connection of the A331 Blackwater Valley Route with the A31 Hog’s Back (Tongham). It is important to note that this mitigation is required to enable the development proposed in the Local Plan to proceed.

In this context, Rushmoor Borough Council is supportive of the planning policy framework and detailed infrastructure projects as they relate to the road network, subject to certainty regarding the delivery of these improvements as part of the overall package of implementation of development in and around Ash, Ash Vale and Tongham.

However, in the absence of the implementation of the full suite of transport policies and proposals to support the quantum of development set out in the Local Plan, this would potentially result in negative cross boundary transport impacts, the residual cumulative impacts of which would be severe. In this context, the Council looks forward to continuing to work with Guildford Borough Council on potential cross boundary strategic transport issues, to ensure that those arising from development proposed in the Guildford Local Plan are appropriately mitigated.

In addition, PED6 sets out a potential expansion of Ash Grange Primary School if required to provide spaces for the primary age children who will live in the new homes to the south and east of Ash and Tongham. These infrastructure proposals are supported by Rushmoor Council, mindful of the strategic allocation for residential development in and around the settlements of Ash and Tongham.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( Yes ), is Sound? ( Yes ), is Legally Compliant? ( Yes )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The draft Local Plan sets out policies that provide a strategy for supporting Guildford Borough’s strong and vibrant local economy. It allocates 37,200 – 47,200 sq m of office and research and development floorspace (including a 10 hectare extension to Surrey Research Park), and 4.7 – 5.3 hectares of industrial land. It also seeks to protect existing strategic and locally important employment sites.

Rushmoor Council is supportive of Guildford Borough’s approach to protecting and enhancing the employment land offer within its administrative area, particularly as the objectively assessed housing need takes account of the need to facilitate the delivery of new homes to help provide a local pool of economically active workforce. Moreover, this is reflective of the Enterprise M3 LEP’s Strategic Economic Plan, and the role that Guildford plays in the economic well-being of the northern part of the LEP area, within which Rushmoor also falls.

Comment ID: PSLPP16/1554  Respondent: 8587073 / Rushmoor Borough Council (Louise Piper)  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( Yes ), is Sound? ( Yes ), is Legally Compliant? ( Yes )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The focus for retail and service provision is centred on Guildford itself. Policy E7 (Guildford Town Centre) includes the delivery by 2033 of a new retail-led mixed use development of 45,000 sq m (gross) of additional comparison goods floorspace on the North Street regeneration site. Moreover, the policy supports the delivery of a mix of other town centre uses such as food and drink establishments, cinemas and gyms, active use of the riverside, and around 1,172 new homes.

The policy contained in the draft Plan is in keeping with the role of Guildford as the Borough’s main town centre, and the scale of development is commensurate with this role. Rushmoor Borough Council recognises that it is an appropriate scale of future growth for Guildford.

Attached documents:

Comment ID: PSLPP16/1555  Respondent: 8587073 / Rushmoor Borough Council (Louise Piper)  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( Yes ), is Sound? ( Yes ), is Legally Compliant? ( Yes )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In terms of the detail of the proposed housing allocations around Ash and Tongham, other policies in the draft Plan enable the consideration of relevant planning issues; for example, Policy H1 (Homes for all) requires a mix of housing to be provided to meet a range of accommodation needs.

The suite of policies use to support the determination of proposals for residential development and associated infrastructure, including Policy H1, is supported.

Policy S2 (Borough Wide Strategy) contains reference to the identification of 43 permanent pitches for Gypsies and Travellers and 6 permanent plots for Travelling Showpeople within Guildford Borough by 2017. A requirement for additional pitches and plots beyond 2017 is also recognised.

In terms of meeting this need, Guildford Borough Council is committed to meeting its identified needs for travellers within its administrative boundary in the first instance, which is important to Rushmoor Borough mindful of the fact that even though our Boroughs adjoin, we are cited in a different County. It is noted that in order to meet these needs, as well as some individual site allocations, such as at Sendmarsh and Effingham, the draft Plan requires in Policy H1 (Homes for all) that traveller accommodation should be provided on development sites of 500 homes or more. However, on land around Ash and Tongham, the individual housing sites that together comprise the allocation are individually less than 500 units, hence the policy requirement to provide traveller sites will not apply in this location. Rushmoor is supportive of the policy approach to planning for travellers as set out in the draft Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( Yes ), is Sound? ( Yes ), is Legally Compliant? ( Yes )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The Strategic Highway Assessment report (2016) sets out that in respect of the development proposed in the Local Plan, without any mitigation, the greatest potential impacts are seen on the network in the vicinity of Ash / Ash Vale and travelling north into the borough of Surrey Heath. Some of the trips in Ash / Ash Vale will join the A331 Blackwater Valley Road to travel further afield, but it is likely that a reasonable proportion will travel into the neighbouring boroughs of Rushmoor and Surrey Heath. Some of these roads already experience congestion, despite the model suggesting that existing traffic flows are relatively low.

Policy I1 (Infrastructure and delivery) of the draft Plan requires the infrastructure needed to support development to be provided and available when first needed to serve the occupants and users of the development. Infrastructure includes parks, green spaces and play areas, roads and other transport, schools, flood defences, sporting and recreational facilities, and medical facilities. Policy I3 deals with sustainable transport for new developments, and seeks to ensure that new developments will contribute to the delivery of an integrated, accessible and safe transport system.

Specifically of interest to the strategic allocation around Ash and Tongham, further information on key infrastructure projects is provided at Appendix C of the draft Plan, in the Infrastructure Schedule. Infrastructure projects LRN9 through to LRN14 relate to improvements to traffic management and environmental improvements in and around Ash, Ash Vale and Tongham, to be funded through a combination of developer contributions and Enterprise M3 Local Economic Partnership Local Growth Fund awards. The Strategic Highway Assessment report (2016) sets out that in respect of the development proposed in the Local Plan, without any mitigation, the greatest potential impacts are seen on the network in the vicinity of Ash / Ash Vale and travelling north into the borough of Surrey Heath. Some of the trips in Ash / Ash Vale will join the A331 Blackwater Valley Road to travel further afield, but it is likely that a reasonable proportion will travel into the neighbouring boroughs of Rushmoor and Surrey Heath. Some of these roads already experience congestion, despite the model suggesting that existing traffic flows are relatively low.

Policy I1 (Infrastructure and delivery) of the draft Plan requires the infrastructure needed to support development to be provided and available when first needed to serve the occupants and users of the development. Infrastructure includes...
parks, green spaces and play areas, roads and other transport, schools, flood defences, sporting and recreational facilities, and medical facilities. Policy I3 deals with sustainable transport for new developments, and seeks to ensure that new developments will contribute to the delivery of an integrated, accessible and safe transport system.

Specifically of interest to the strategic allocation around Ash and Tongham, further information on key infrastructure projects is provided at Appendix C of the draft Plan, in the Infrastructure Schedule. Infrastructure projects LRN9 through to LRN14 relate to improvements to traffic management and environmental improvements in and around Ash, Ash Vale and Tongham, to be funded through a combination of developer contributions and Enterprise M3 Local Economic Partnership Local Growth Fund awards. For example, the schedule identifies LRN14, which is a junction improvement scheme at the connection of the A331 Blackwater Valley Route with the A31 Hog’s Back (Tongham). It is important to note that this mitigation is required to enable the development proposed in the Local Plan to proceed.

In this context, Rushmoor Borough Council is supportive of the planning policy framework and detailed infrastructure projects as they relate to the road network, subject to certainty regarding the delivery of these improvements as part of the overall package of implementation of development in and around Ash, Ash Vale and Tongham.

As well as Policy I3, Sustainable transport for new developments, the draft Local Plan is also committed to supporting the Department for Transport’s Road Investment Strategy (Policy I2), focusing on improvements to the strategic road network (A3 and M25). The draft Local Plan is supported by the Guildford Borough Transport Strategy 2016, which sets out the strategic and local transport infrastructure required to support the development proposed in the Plan.

Rushmoor Borough Council is supportive of the suite of transport policies and proposals identified through the policy framework in the draft Plan and the Guildford Borough Transport Strategy 2016. It is likely that the benefits of the implementation of these proposals will be felt not only within Guildford Borough, but also more widely, given the sensitivity of the transport network to individual incidents. For example, Policy A26, the mixed use allocation for Blackwell Farm, off the A31, includes a new link road from the A31, through to Surrey Research Park and the Royal Surrey County Hospital. This will be immensely beneficial in terms of relieving congestion on the A31 into Guildford, as this will assist with removing the need for traffic travelling from the west of Guildford to drive in and back out using either the A3 trunk road or via the town when seeking to access the Research Park and the Hospital.

However, in the absence of the implementation of the full suite of transport policies and proposals to support the quantum of development set out in the Local Plan, this would potentially result in negative cross boundary transport impacts, the residual cumulative impacts of which would be severe. In this context, the Council looks forward to continuing to work with Guildford Borough Council on potential cross boundary strategic transport issues, to ensure that those arising from development proposed in the Guildford Local Plan are appropriately mitigated.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy P2 of the draft Local Plan relates to Green Belt. This notes that whilst some land has been removed from the Green Belt to facilitate residential development to meet identified housing needs, the Green Belt boundary has in fact been extended between Ash Green village and the Ash and Tongham urban area in order to prevent coalescence. Whilst not directly adjoining Rushmoor Borough, it is relevant to note and support this proposed addition to the Green Belt, given the supplementary protection it offers to the green infrastructure surrounding Ash and Tongham in the longer term, once the permissions and allocations for this part of Guildford Borough are built out over the period to 2033.

Do you consider this section of the document; complies with the Duty to Cooperate? (Yes), is Sound? (Yes), is Legally Compliant? (Yes)

Answer (if comment is on questions 1-7 of the questionnaire): ()

Of relevance to Rushmoor, mindful of the allocations around Ash and Tongham, Policy P3 (Countryside) is predicated on the need to ensure that there is no further encroachment into the countryside designation to the west and south of the urban area of those settlements. It notes specifically that any further proposals for development beyond those permitted and allocated would only be allowed provided they would not lead to a greater physical or visual coalescence between the Ash and Tongham urban area and Aldershot. The reasoned justification supporting Policy P3 states that,

“Any development proposals which compromise the integrity of the gap that separates the Ash and Tongham urban area with neighbouring Aldershot will be resisted.”

In the context of the strategic allocation for residential development on land to the south and east of Ash and Tongham, Rushmoor Borough Council welcomes the inclusion of Policy P3 in the draft Plan, and the recognition of the importance of the gap between the Ash and Tongham urban area and Aldershot.

Do you consider this section of the document; complies with the Duty to Cooperate? (Yes), is Sound? (Yes), is Legally Compliant? (Yes)

Answer (if comment is on questions 1-7 of the questionnaire): ()

The draft Plan sets out at Policy SS2 a spatial development strategy; effectively, what type of development, how much of it, and where will it go. In respect of housing, Policy SS2 plans for 13,860 new homes over the Plan period (2013-2033). This equates to an average of 693 net new dwellings a year, and would meet Guildford Borough’s objectively assessed housing need (OAN) within its administrative area.

Guildford Borough Council considers that, in fact, the Plan will meet the OAN with flexibility. The total potential provision of new homes across the plan period (including completions since 2013 and outstanding capacity) is 15,844. This provides 1,984 homes as a buffer. This is not planned over provision, but rather, flexibility that helps to guard against the policies in the plan becoming out of date by failing to deliver a five-year supply of available housing sites. Guildford Borough Council does however make clear in the supporting documentation that it is unable to help with addressing unmet housing needs from within its own Housing Market Area. Rushmoor Borough Council is supportive of Guildford Borough’s commitment to meet its OAN within its administrative boundary.

In terms of the availability of housing sites, an interesting statistic to note is that 89% of Guildford Borough falls within the Metropolitan Green Belt. The Plan sets out in Policy SS2 a spatial hierarchy, which identifies a brownfield first policy including, where appropriate, previously developed land in the Green Belt. The following spatial options are then considered to be the most sustainable locations:

- Guildford town centre
- Guildford, and Ash and Tongham urban area
- Inset villages
- Identified Green Belt villages
- Rural exception housing
- Countryside beyond the Green Belt
- Guildford urban extensions
- New settlement at the former Wisley airfield
- Development around village

Guildford Borough contains some “Countryside Beyond the Green Belt”, although this notation covers only 2% of the Borough, and is located in the west of the Borough near Ash and Tongham. Mindful of the hierarchy set out in paragraph
4.3 above, and the need to identify enough land to deliver an average of 693 new dwelling a year, the draft Plan contains several housing allocations that fall on land that is subject to this designation.

Policy A29 is the most significant of these allocations, identifying land for approximately 1200 homes around Ash and Tongham. A map showing the distribution of the sites that comprise this allocation is shown at Appendix 1 of this report. In addition to this, there are two other smaller allocations (A27: Warren Farm, Ash Green and A28: Land to the east of White Lane, Ash Green) of 120 units in total, 629 homes with planning permission (net outstanding) and 124 completions since the base date of 2013. In the wider Ash and Tongham area, taking into account completions, permissions and Local Plan allocations, this equals 2,057 homes to be delivered by 2033.

In terms of any potential cross boundary impacts of this development, whilst it is located close to the boundary with Rushmoor Borough, mindful of the constraints noted above, Guildford Borough Council has very limited opportunities to accommodate its objectively assessed housing need. The draft Plan contains a number of other strategic housing allocations, including land at former Wisley Airfield (2,100 homes), Slyfield Regeneration Project (1,000 homes), Gosden Hill Farm (2,000 homes), and Blackwell Farm (1,800 homes). In addition, there are a number of other allocations of around 100 units. Importantly, the evidence supporting the Plan has had to review the function of land within the Green Belt, and facilitate some land releases from it, in order to achieve the scale of residential development required to meet Guildford’s OAN.

Rushmoor Borough Council is supportive of Guildford’s approach of “leaving no stone unturned” in seeking to meet its housing need. This is positive in as much as it is not asking Rushmoor to help meet its housing needs, and in this respect, at this point in time, both authorities can be said to satisfy the “duty to cooperate” on the cross boundary strategic issue of meeting housing needs.

Policy S2 (Borough Wide Strategy) contains reference to the identification of 43 permanent pitches for Gypsies and Travellers and 6 permanent plots for Travelling Showpeople within Guildford Borough by 2017. A requirement for additional pitches and plots beyond 2017 is also recognised.

Guildford Borough Council is committed to meeting its identified needs for travellers within its administrative boundary in the first instance, which is important to Rushmoor Borough mindful of the fact that even though our Boroughs adjoin, we are cited in a different County. It is noted that in order to meet these needs, as well as some individual site allocations, such as at Sendmarsh and Effingham, the draft Plan requires in Policy H1 (Homes for all) that traveller accommodation should be provided on development sites of 500 homes or more. However, on land around Ash and Tongham, the individual housing sites that together comprise the allocation are individually less than 500 units, hence the policy requirement to provide traveller sites will not apply in this location. In this context, Rushmoor is supportive of the policy approach to planning for travellers as set out in the draft Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the planned slip roads for the A3 from the Garlick’s Arch site. Access roads are needed to directly serve the new communities at Wisley and Gosden Hill if those sites are developed. The A247 through Send is already under pressure and cannot take further traffic. Nor can it be widened without demolishing existing housing!

I object to the proposed light industrial component of the Garlick’s Arch site. The original site at Burnt Common was far more suitable as it is already partly developed and has direct access to the A3. The land at Slyfield should be developed in preference to the Garlick’s Arch site. The only merit of this site is its immediate availability, but that would be at the expense of threatening ancient woodland and causing havoc to the traffic in and around Send.

I object to the proposed development in and around Send that would lead our village to become a suburb of both Woking and Guildford.

I object to the proposed 45 houses and two traveller pitches on Send Hill, on the grounds that the lane is too narrow to carry further traffic, especially at its junction with Potters Lane; and that the only other route for traffic is along Send Road/ Send Barnes Lane which already suffer from congestion at peak times.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposals for affordable housing rather than social housing. Young people locally cannot “afford” affordable housing. Current housing stock is often granted permission to extend, so the number of small housing units grows ever smaller.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to all proposed development of housing on the Green Belt. In particular, I object to the proposed housing on Tannery Lane Send, Send Hill and at Garlick’s Arch. Plus the insetting of the villages which would leave vast swathes of local countryside unprotected. Government policy deems that housing need alone does not constitute the extraordinary circumstances that are required to develop on Green Belt land; and our local MP, Sir Paul Beresford, has reiterated this point of view recently

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the SHMA figure of 693 houses per annum. That figure remains unsubstantiated. The south east is a magnet for people and any amount of development would remain insufficient. So – if you don’t build the houses, then people can’t move into this already overcrowded part of the country!

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

GBC introduces the Local Plan like this: "Our Proposed Submission Local Plan balances the needs of residents, businesses and visitors with protecting the borough's most important countryside, landscapes and heritage. It addresses housing, employment, retail and leisure requirements, protecting the borough's most important countryside, landscapes including education, healthcare and transport". My comments aim to dispute most of these statements as they apply to Send.

Send has been targeted throughout this process for a disproportionate amount of development. Our residents' needs have been expressed in the approx. one third of comments overall received in response to the summer 2016 consultation. But they have been almost totally ignored! Development proposed in Green Belt land plus insetting which will lead to many other areas becoming future development sites pays no heed to protecting the borough's most important countryside (&). landscapes.

Send parish consists of three separate settlements: Send itself, Send Marsh and Burnt Common. These areas are semi-rural and currently have many green spaces used for leisure activities which are now threatened. None of the settlements contains a significant commercial centre and there are no proposals for retail development here. Parking in most areas is limited. Traffic along the main A247 is heavy at peak times and comes to a standstill if there are local incidents on the A31 Hog’s Back, A3 or M25 which result in more traffic being diverted here (transport). The local primary school, which recently combined onto one site with no further potential for development, is almost at capacity (education). There are no proposals for additional bus services (transport) which only run once an hour and not at all on Sundays. The local medical centre (healthcare) already has difficulty arranging patient appointments at short notice. I e our infrastructure is already at capacity.

I therefore object to the further increase in the proposed number of houses in the Send/ Burnt Common area. The housing number has dropped by 39 houses per annum. Yet the proposed number of houses in Send has increased to 500, despite our high volume of objections in summer 2016.

I particularly object to the increase in proposed additional houses in Tannery Lane (Policy A42) from 45 to 60. The arguments against development in this narrow lane were clearly covered in the 2016 objections; yet this number has been increased rather than reduced or removed.

I object to the allocation of 8 travelling showpeople pitches at the Garlick’s Arch site. Local Plan H1 Policy states that such accommodation should be provided to development sites of 500 homes and above. The Garlick’s Arch site is for a proposed 400 houses (and the whole development is highly contentious) Two traveller pitches were already allocated to Policy A44, a development of 40 houses only and there is no justification for further traveller accommodation in this area. The 8 pitches for travelling showpeople should be allocated to a development of 500 or more houses in the Guildford Borough to meet Policy H1.

I support the decision to move employment floorspace from Garlick’s Arch to Burnt Common (A58) as the latter site is already industrial. I consider it would also be a more appropriate location for travellers, with easy access to the A3.

However, I object to the change from “up to 7000 sq m” to “a minimum of 7000 sq m” now allocated to A58. That leaves this site open to unlimited future development. The local road network is not suitable for unlimited increase and will probably struggle even with 7000 sq m max additional employment floorspace. Document T47 refers to “Significant, recurrent traffic congestion … experienced during peak hours on the A3 trunk road as it runs through the town of Guildford and between the Ripley junction and the A3/M25 (Junction 10) Wisley interchange junction” (transport) ie the next junction from Burnt Common travelling north on the A3.

I consider that the Local Plan has given insufficient consideration to the overall traffic flows in the Send and Ripley/ Wisley A3/ M25 interchange areas as they would be affected by high increases in traffic volume caused by additional
housing, employment and traveller allocations in both Send and at the nearby Wisley and Gosden Hill sites plus the A43a construction of new slip roads at Burnt Common. **(transport)**

Thirdly, floating the vague idea of an A3 tunnel as a sop to local residents that infrastructure issues will be addressed is frankly insulting. The infrastructure needs to come FIRST not vague promises of looking at options which could easily fall away and require enormous sums in financing which the council can only dream of raising. Fourth, have GBC councillors tried returning by car on the A3 from London in the evening rush hour? If they had, they would know that most nights there is a tailback from before the Burpham interchange even without any "incidents". To assume that thousands more cars can be accommodated in what is already gridlock defies logic and fact. How is bringing even more congestion to Guildford and surrounding areas to the benefit of residents? Oh I forgot, they will all use bicycles to get to work in London under the new Guildford transport corridor plan (sic.)

Fifth, GBC needs to stand up for its residents - they are after all supposed to be protecting their interests - against central government diktat. The NPPF is the most nakedly political planning law to ever be passed - its sole purpose to drive the economy via construction. Cameron and Osborne are out of the way now. Let us see some leadership from GBC and the
councillors honouring their pledge that "the green belt is safe with us".

Finally, I attach a copy of an article I read in the local press which sums up my views perfectly. Rather than copy it out in my comments verbatim I attach it instead to save time.

Answer (if comment is on questions 1-7 of the questionnaire): ()

First could I make the very obvious point that with the result of the EU referendum the assumptions by GL Hearn of future immigration numbers are now unsound. Although we do not yet know what form of limits on immigration and freedom of movement will be agreed, it cannot possibly be right to approve a plan which includes such a high number of houses required for future immigration.

Secondly, I do not understand why there is such an allowance for student numbers. My understanding is that the university has planning permission for a significant number of student dwellings at Manor Park but has never built them. If the university would do so then it would free up almost 2000 dwellings in Guildford for the use of families plus have the advantage of council tax being paid on those 2000 dwellings. Why is the council proposing in the draft plan to allow the university to profit by the sale of Blackwell Farm without addressing the real underlying issue of student accommodation?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing in support of the Local Plan and in support of the University of Surrey’s part in that plan.

The University plans are robust, professional and show genuine smart growth; they support sustainable transport, relieve critical infrastructural issues and deliver high levels of employment and affordable housing. Those plans need to be prioritised within the Local Plan.

My comments on the most material of the policies are as follows.

Strategic Policies: The strategic policies within the plan are sensible. Development must be sustainable and respect natural assets; it must also include some careful use of greenbelt land for the simple reason that there is not enough developable capacity in brownfield sites. I therefore support both Policy S1 “Sustainability” and Policy S2 “Housing number”.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Answer (if comment is on questions 1-7 of the questionnaire): ()

When I heard you were producing a further Local Plan I had hoped you might at least reduce the number of houses to be built. But no, the number of houses planned in my area has increased horribly. This seems a far cry from democracy and more like a war of attrition. These are my objections and deep concerns:

1. Potential influx of people on such a grand scale. I live five minutes’ walk from Effingham Junction Station and crossing the roads in the morning rush hour with my dogs is hazardous enough as it is. These people will need cars to get around and to park.
2. Our side road is used as a traffic overflow for commuters who already have crowded trains and insufficient spaces in the stations car park. Car parking itself will be a problem beside Horsleys shops, medical centre etc.
3. We also have many potholed and old roads are liable to flooding from overflowed drains. Increased traffic will do no favours to the state of these roads which were never constructed to deal with such an increased volume of traffic. One-way systems generated by the Wisley Airfields loathsome development or any widening of the roads will spoil the environment of those who live here.
4. How can our Horsley Medical Centre cope with added patients and Guildford Hospital too?
5. Health itself will be affected. Air pollution from traffic is already above the legal limit on Junction 10 of the M25
6. You take no account of where incoming children are going to be educated in the Horsleys.
7. You propose to use our precious Green Belt to accommodate 65% of new houses here. Our population value our green areas for recreational purpose and it is part of the charm of this locality

I understand that Sadiy Khan, the new mayor of London, has instructed his planners not to approve development and green belt land within the M25. I do wish you had a more sensitive approach to Guildford’s planning. We already have housing stretching from here to Central London. Surely you do not need to extend this plague of concentrated development to beautiful Guildford? I would have thought it worthwhile to preserve green space in our area for Londons enjoyment too.

I wholeheartedly OBJECT to your local plan more STRONGLY than ever. You are violating the area totally failing to protect your current population from being overcrowded and suffering the consequent effects of pollution and distress. Cramming Wisley Airfield with a concentration of housing worthy of tower Hamlets is VILE. Perhaps when Brexit comes into full force we wont need so many new homes on this crowded island. Frankly you need to think again before your votes seek to have more Green Belt protection on the council.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object most strongly to the development on the Former Wisley Airfield. The number of houses involved remains quite horrific. I have written to you several times now and nothing of any consequence seems to have been taken into consideration of in excess of 30,000 objections to last year’s plan. To think a [illegible word] will make any difference is laughable. Our area/station will be saturated. Worse still, you will be housing these new folks just off Junction 10 of the M25 which is already over the limit of contaminated air.

I appreciate the developers need to cram in as many houses as possible on the Airfield in order to make a turn on their investment, ie they probably paid too much for the site. But they do not live here! Surely such a plan that affects generations to come, as well as the current taxpayers, should not be held ransome to these developers. Green spaces surrounding our capital are precious. We all need areas for play and enjoyment, as indeed does the wildlife.

I do hope the Government’s Planning Inspector has some sensitivity towards democracy as opposed to a developer’s greed.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A21

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy 21: These allotments are a vital part of the green infrastructure that enhances the landscape of the city. Particularly as they are on the north side of Guildford which is in particular need of these green pockets. They provide important recreational and health benefits both physical and mental for the residents of Guildford. They need to be protected at all costs. Additional allotments are particularly welcomed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/981  Respondent: 8588961 / Mrs Margaret Knight  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4
Policy 14: I support this policy in its aim of enhancing biodiversity supporting which the allotments do.

It is for these reasons that I strongly support these two policies.

I also think that "allotments" needs to be specifically included in the list of green spaces in the definition of "green and blue infrastructure" in para 4.6.31 of the draft plan (page 116)"

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Wisley Action Group (WAG) has reviewed the Proposed Submission Local Plan (Local Plan) and considers that:

1. Despite GBC’s protestations to the contrary, the Local Plan has failed in a number of key areas to take into account or to answer many valid comments and criticisms submitted by thousands of residents and organisations in respect of e.g. the 2013 Draft Local Plan.
2. The Local Plan prioritises growth to the detriment of the ongoing viability, character and “liveability” of Guildford town centre and neighbouring villages and the protection and maintenance of the countryside, the Green Belt, and protected wildlife areas such as the Thames Basin Heath SPA
3. The Local Plan allocates too much land for development, based on a flawed Strategic Housing Market Assessment, and an artificially inflated Housing Target not justified by actual or reasonably projected demand.
4. There are a number of inclusions in the Local Plan which, in WAG’s view, undermine the soundness of the Plan as a whole on grounds of lack of sustainability, deliverability and need.
5. The purpose of the Local Plan should be to enhance the quality of life of the Borough’s resident population, not to increase those aspects which cause the most dissatisfaction: traffic congestion and pollution are not eased by increasing the amount of traffic; inadequate infrastructure, whether schools, services, or sewerage, is made worse not better by increasing demand; and building houses, schools or other facilities in places furthest from existing areas where people live or work merely increases problems of inconvenience, travel, and development sprawl.

Against this background, WAG OBJECTS to the Local Plan overall on the following grounds:
1. The Local Plan proposes major, unjustified and unacceptable erosion of, and removal of villages or major parts thereof from, the Green Belt.

2. Over 70% of new housing is proposed to be built within the existing Green Belt notwithstanding that there is more than enough genuinely brownfield land and non-Green Belt land available.

3. The housing number of 693 houses per year from the Strategic Market Housing Assessment is based on flawed analysis and is too high. Guildford Residents Association (GRA) has commissioned an independent review of the SHMA, which concludes that the methodology used to arrive at the figure of 693 homes is flawed and that the FOAN for Guildford District is in fact 510 homes a year over the plan period.

4. New houses, schools and services should be developed in or adjacent to areas of actual demand and not in relatively remote areas which inevitably and unnecessarily result in major increases in travel requirements from home to work, work to home, home to school, etc.

5. The proposed allocation of housing in the north east of the Borough particularly Ockham, Ripley, Send and the Horsleys is a prime example of locating supply impractically far from the areas of demand, and is totally disproportionate to allocations elsewhere in the Borough.

6. The continued inclusion in the Local Plan of the former Wisley airfield (which is located in Ockham and which is known locally as Three Farms Meadows) is perverse and illogical, and is unsound for reasons of sustainability, deliverability and need.

Specifically in relation to the former Wisley airfield/Three Farms Meadows (FWA/TFM), WAG considers that the inclusion of the site in the Local Plan renders it unsound and the plan should be modified to exclude it. These objections have been made consistently by WAG and others in relation to, inter alia, the GBC’s 2013 draft Local Plan and Planning Applications for development or use of FWA/TFM:

1. FWA/TFM was included in the draft 2013 GBC Local Plan and was widely objected to. That draft Plan was eventually withdrawn after many months of consultation and deliberation.

2. The Wisley Property Investments Ltd (WPIL) planning application of January 2015 (Reference: 15/P/00012), as subsequently amended, for a phased development of a new settlement of over 2000 dwellings at FWA/TFM was decisively and unanimously rejected by GBC on 8 April 2016, after 15 months’ consideration by the Council, including extensive consultation and several major amendments, following the recommendation of the GBC Planning Officers.

The reasons for the refusal of the application were many, including that the proposed development:

- was an inappropriate development within the Green Belt;
- would have a clear and substantial detrimental impact on the openness of the Green Belt and conflict with the purposes of including land within the Green Belt;
- failed to demonstrate that the benefits amounted to very special circumstances such as to clearly outweigh the harm to the Green Belt and the other harm identified;
- failed to comply with the objectives of policy RE2 of the Guildford Borough Local Plan 2003 (as saved by CLG Direction dated 24/09/2007) and chapter 9 of the National Planning Policy Framework;
- was within the 0 -400m and the 400m to 5km zones of the Thames Basin Heaths Special Protection Area, etc.
- would have a severe adverse impact on the safe and efficient operation of the strategic road network, and a severe impact on the efficient operation of the local road network;
- failed to deliver the required transport sustainability measures;
- failed to secure an appropriate provision of affordable housing;
- was detrimental to the viability and vitality of the existing district and local centres in the vicinity of the site;
- would result in loss of the safeguarded waste site;
- presented a dense and urban form of development owing to its quantum and scale;
- had an adverse impact on the setting and significance of a designated heritage asset;
- had an unacceptable air quality impact;
- impacted on education infrastructure;
- impacted on policing infrastructure;
- impacted on health infrastructure;
- impacted on library provision.
1. Both these and other serious objections and concerns had been raised by WAG, neighbouring borough and parish councils, Surrey County Council, statutory bodies, CPRE, Surrey Wildlife Trust, University of Surrey, Thames Water, NATS, the Environment Agency, Police Authorities, Highways Authorities, residents’ associations and several thousands of other organisations and individuals - both in the context of the planning application and in relation to the current and earlier GBC draft Local Plans.

The numerous concerns raised by WAG and others have been well documented in previous correspondence from WAG to GBC (copies of these representations attached). These concerns are supported by a series of legal opinions from Leading Counsel (appended for convenience), most recently the opinion of Richard Harwood QC, dated 17th May 2016, which advises that the FWA/TFM allocation is highly likely to be found unsound by the Inspector at the Local Plan examination. They are founded on the following:

1. The value of the Green Belt and most importantly the value of FWA/TFM as a critical core at the heart of the Green Belt.
2. The very serious harm to the openness of the Green Belt which would be caused by a development of this scale in this location, as acknowledged by the Council in refusing permission for the recent application. As was also acknowledged by the Council, unless the exceptional circumstances test is made out there is not even scope for redeveloping the previously developed parts of the site – the runway, the taxiways and aircraft hardstanding – because of the serious harm which would be caused to openness and to the Green Belt purposes.
3. The absence of any exceptional circumstances justifying removal of the site from the Green Belt. The only justification for releasing the site is said to be the shortfall in available sites to meet the housing needs of the Borough. However the Council’s own evidence base demonstrates that the release of this site is not, in fact, required in order to meet the housing need. Thus:

   1. Draft policy S2 states that 13,860 new dwellings will be provided over the Plan period in order to meet the identified housing need, based on a FOAN of 693 dpa (693 x 20 years = 13,860).
   2. However the LAA advises that, not including sites with planning permission, sufficient land is already available to construct 13,708 new dwellings over the next 15 years i.e. up to 2031 (with any development from 2031-2033 to be added to this total).
   3. There are 1,342 homes with planning permission which are expected to deliver new homes within the next five years, as well as 66 homes in the 11-15 year period.
   4. Accordingly, there is already provision for a total of 15,116 new homes, even without taking into account completions for 2013-2014 (132), 2014-2015 (242) and 2015-Feb 2016.

Even on the Council’s own analysis, there is therefore a significant surplus of available land compared to the identified housing need, and this surplus has previously been acknowledged by the Leader of the Council. Consequently, the housing need cannot amount to exceptional circumstances justifying the release of this site. Moreover, as noted above, the expert advice received by WAG is that the FOAN of 693 dpa is far too high and that the correct figure is in fact 510 dpa, or 10,200 dwellings over the plan period. On this analysis the available land far exceeds the identified housing need.

1. The Sustainability Appraisal includes the FWA/TFM allocation only if the Plan proposes OAN plus 14% (page 32). Consequently FWA/TFM is not required to meet the Council’s own needs figure. The presumption in favour of sustainable development in para 14 of the NPPF does not support the FWA/TFM allocation – as policy is simply to meet OAN with sufficient flexibility to adapt to rapid change unless specific policies, including Green Belt, indicate development should be restricted. Paragraph 47 of the NPPF requires Local Plans to meet OAN (unless there are constraints). The policy does not include a buffer in the Local Plan figure (the 5 year Housing Land Supply is distinct from the Local Plan total numbers). In the absence of national policy support for a buffer in the total, there is no case whatsoever for the allocation of FWA/TFM. There are no potential exceptional circumstances which could therefore support the allocation.
2. The value of FWA/TFM from an environmental and ecological standpoint, not least in relation to the Thames Basin Heath Special Protection Area, a SNCI and a SSI.
3. The value of FWA/TFM as a community asset and as a vital “lung”, not least because of the health risks associated with increasing pollution and decreasing air quality, as well as acid deposition on the SPA impacting human health and animal, plant and soil viability in the site and immediately surrounding area.
4. The wealth of evidence demonstrating that the adverse consequences of development of the site, including damage to the ecology of e.g. the SPA, cannot be satisfactorily mitigated. This is also self-evident from WPIL’s failure to overcome these adverse impacts, despite considerable efforts over a period of 15 months.

5. The significant harm to the character of the surrounding area which would inevitably be caused by a development of up to 2100 dwellings in this location, necessitating building heights of up to five storeys and creating a wholly incongruous urban form of development in the middle of the countryside.

6. The critical location and current nature of FWA/TFM in relation to the historic and current viability of the Ockham hamlets and surrounding villages.

7. The unacceptable impact of a development of this scale on Ockham, an historic rural village with around 160 existing dwellings, and with narrow lanes, no street lights, few pavements, a Conservation Area and many listed properties – which would be completely subsumed by a 2000+ dwelling development, with urban style buildings up to 5 storeys high and a population density higher than most London boroughs. Ockham’s existing population of just over 400 would be increased by more than 15 times.

8. A Local Plan and potential development which do not meet, and indeed which are completely contrary to, the needs and desires of Ockham’s population, as evidenced in the existing Ockham Parish Plan.

9. The detrimental and unsustainable impact of development at FWA/TFM on transport, the A3 and M25, local roads and road safety, with increased vehicle movements (an estimated 4000 additional cars plus increased bus and HGV movements during construction and afterwards), on rail stations and car parking which are already at capacity, and on local services and infrastructure. It is by no means clear how - or whether - the mitigation schemes referred to in policy A35 can be delivered in order to overcome the severe impact of a development of this scale at FWA/TFM on the strategic or local road network (and, certainly, WPIL was unable to overcome these issues, despite considerable efforts on its part and on the part of the relevant authorities).

10. The value of FWA/TFM for agriculture, comprising as it does over 75% of agricultural land including 63ha of Grade 2; 3a and 3b agricultural land (of which at least 45.4ha is classified as best and most versatile land – Grade 2 and Grade 3a). As advised by the planning officer, a development of this scale would result in the loss of approximately 20ha of best and most versatile agricultural land.

11. The loss of a rare consented waste site in the County, which will increase pressure for waste sites elsewhere in the Borough.

12. The impossibility in practical terms of creating a sustainable development on FWA/TFM, which is further demonstrated by the limited historical use of, or development of, the site, and most recently by the inability of the current landowner/developer and its many experts and advisers to come up with a sustainable development plan despite numerous attempts over an extended period.

13. The cumulative adverse consequences of other actual or potential developments in the area particularly in Ripley, Send and the Horsleys.

Consequently the allocation is unsound under paragraph 182 of the NPPF in that:

- It is not positively prepared, since the allocation is not part of meeting objectively assessed requirements nor is it consistent with achieving sustainable development;
- It is not justified, failing to be ‘a most appropriate strategy’ (applying the LPEG change from ‘the most appropriate strategy’) since it contravenes numerous policies and alternative strategies can meet the needs in a less harmful manner;
- The allocation is not effective. The FWA/TFM site is not deliverable, as the objections from the highway authorities show. If the site was deliverable then certain reasons for refusal would have been overcome – the developer’s failure to do so despite a long application process indicates that these are insoluble. It is not based on effective joint working, the planning application being subject to objections from the county planning authority, two neighbouring district authorities and the local and strategic highways authorities;
- The proposal is not consistent with national policy and does not enable the delivery of sustainable development. Instead it is an isolated Green Belt site in an unsustainable location which causes harm to the countryside, landscape, agricultural land, natural conservation, highways, air quality and the historic environment.

CONCLUSION
These objections demonstrate conclusively why removal of FWA/TFM from the Green Belt cannot be justified, and why its isolated location, size, distance from places of employment, and lack of infrastructure, including overstretched and inadequate public transport, roads, services and facilities, make the site totally unsuitable for any kind of significant development – as WAG and others have consistently argued.

The fact that the Local Plan still includes FWA/TFM (as well as neighbouring land not owned by WPIL) as a potential site for development flies in the face of logic and GBC’s own arguments and previous findings, and ignores widespread expert and local opinion.

The repeated attempts, in numerous guises, over the last 3 years to take FWA/TFM out of the Green Belt and to press for both major and ancillary development of the site have stretched the patience and goodwill of local communities, not least Ockham Parish; have imposed heavy and unwarranted costs and other burdens on those local communities (who bear the costs twice: once directly and then again through their Council Tax contributions to GBC), have caused a blight on the area, distress to local residents and farming businesses, and have adversely prejudiced peoples’ lives and livelihoods.

WAG therefore strongly OBJECTS to this further and unwarranted attempt to exclude FWA/TFM from the Green Belt and thereby to promote a highly unsustainable, unnecessary and ultimately undeliverable development. It invites the Council to withdraw the deposit draft and re-deposit a version without the FWA/TFM allocation or to ask the Local Plan Inspector to modify the Plan by removing the allocation. If not, the Inspector is asked to find the plan unsound and if the Council request modifications, to recommend the removal of the allocation.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I write to comment on your local plan for the Horsleys. I know that you have spent time, money and energy preparing the plan. Once built on, the soil plants and wildlife large and small will be destroyed, perhaps for ever.

We need green spaces for plants to photosynthesise and keep the air that we breathe free from pollution.

May I suggest a solution? Many people like to downsize as they get older to apartments with lifts, views and with shops and transport within easy reach. Some nice three storey apartments would be good. Then the houses would be freed up for people with families to move into. Please do not cover the Horsleys in concrete. You must know yourselves the damage that will be done to the environment. Let us guard what we have in our rural, lovely part of England. How about four stories in Guildford as well, so that we can keep our countryside.

**GUILDFORD BOROUGH COUNCIL**

**DRAFT LOCAL PLAN (PROPOSED SUBMISSION) CONSULTATION**

**REPRESENTATIONS ON BEHALF OF ASHILL LAND LTD**

**LAND AT TITHEBARN FARM, SEND**

We write on behalf of our client, Ashill Land Ltd, to submit representations to the draft Local Plan (submission version) to support development at the site at Tithebarn Farm, Send. A site location plan identifying the land is enclosed at Appendix A.

**Background to the Site**

The site currently comprises a series of one and a half storey sheds with shallow pitched roof which are in storage use (B8...
Use Class). In total there are 5 sheds and one hut on site which were historically used as chicken sheds. However, they have been in B8 storage use for 20 years and this has been confirmed by a certificate of lawful existing use or development (application ref. 16/P/00333) granted on 6th June 2016. As the sheds are purely within storage use they make no employment provision.

The buildings are surrounded by hard standing and there is a single vehicular access off Tithebarn Lane. This also serves the substantial barns fronting the road. The land to the north towards the A3 is open and to the east is a farmyard and farmland. To the south east is residential development with natural screening on the boundary fronting onto Tithebarns Lane. The site is located within the Green Belt and also within the 5 km buffer of the Thames Basin Heath SPA.

Summary of Representations and Recommendations We submit these representations on behalf of Ashill Land Ltd, with particular interest to their site at Tithebarn Farm, Send. The representation is thus submitted in support development at this site for the following reasons:

1. The lawful use of the building is confirmed as storage (B8 Use Class) and therefore brownfield land within the Green Belt and can be developed under paragraph 89 of the NPPF.
2. Paragraph 89 of the NPPF supports the complete redevelopment of previously developed sites (brownfield land) and the draft Local Plan Policy P2 should adequately reflect the Framework.
3. We recommend that the threshold trigger for affordable housing within draft Local Plan Policy H5 is increased to 1,000 sq m or 10 or in line with the NPPG.
4. We suggest a flexible approach to the affordable housing policy to have further consideration to starter homes, viability and deliverability. In addition, to payment in lieu towards affordable housing where appropriate.
5. We recommend that the approach to the change of use of non-designated employment sites is reviewed to take into consideration the conditions of existing buildings for employment uses.
6. The development of the site would contribute towards the housing need within Guildford and offer a number of high quality dwellings.
7. The site is deliverable and viable to offer development in the immediate term. The representations, on behalf of our client, to the draft Local Plan (submission version) with regards to the above are set out in the following paragraphs. Green Belt Allocation and Policy The site is located within the Green Belt within the adopted Local Plan. Paragraph 89 of the NPPF states that local authorities should regard the construction of new buildings as inappropriate in Green Belt. However, exceptions to this are:
   - Buildings for agriculture and forestry;
   - Provision of appropriate facilities for outdoor sport, outdoor recreation and for cemeteries, as long as it preserves the openness of the Green Belt and does not conflict with the purposes of including land within it;
   - The extension or alteration of a building provided that it does not result in disproportionate additions over and above the size of the original building;
   - The replacement of a building, provided the new building is in the same use and not materially large than the one it replaces;
   - Limited infilling in villages, and limited affordable housing for local community needs under policies set out in the local plan; and
   - Limited infilling or the partial or complete development of previously developed sites (brownfield land), whether redundant or in continuing use (excluding temporary buildings), which would not have a greater impact on the openness of the Green Belt and the purpose of including land within it than the existing development.

Draft Local Plan Policy P2 ‘Green Belt’ states that the council will continue to protect metropolitan Green Belt, as shown on the proposals map, against inappropriate development. The policy dictates that the construction of new development will be considered inappropriate and will not be permitted unless very special circumstances can be demonstrated. The policy further details that certain forms of development are not considered to be inappropriate. Proposals will be permitted where they are consistent with the local level criteria as set out in the draft policy. Specifically included within the draft policy is the criteria for ‘replacement of buildings’ within the Green Belt. The policy dictates the replacement of a building would be appropriate, provided the new building:
   - Would be in the same use;
   - Is not materially larger than the one it replaces; and
   - Is sited on or close to the position of the existing buildings.
The supporting text of the policy states that when assessing whether the replacement buildings are materially larger, account will be taken of the forthcoming Green Belt SPD. The text justifying the policy further states that the replacement buildings are expected to be sited on or close to the position of the original building, unless it can be clearly demonstrated that an alternative position would reduce the overall impact on the openness of the Green Belt.

The draft policy distinguishes between three criteria including ‘extensions or alterations, replacement buildings and limited infilling’ within the main text. This classification of the acceptable types of development within the green belt is too narrow and does not go far enough to fully reflect the guidance for local authorities included within paragraph 89 of the NPPF.

The guidance within the NPPF is clear and confirms that ‘brownfield land’ within the Green Belt is appropriate development as long as it would not have a greater impact on the openness of the Green Belt than the existing development. The draft local plan policy should clearly state that the ‘limited infilling or partial or complete redevelopment of previously developed sites (brownfield land)’ is appropriate and furthermore the policy should not be restrictive to the same use as this does not fully reflect the policy in paragraph 89 of the Framework. The draft policy broadly follows paragraph 89 of the NPPF but does not go far enough to detail the acceptability for the replacement of buildings on brownfield land within the Green Belt. The NPPF is clear that exceptions to construction of new buildings within the Green Belt are appropriate where the land is classified as ‘brownfield’. This draft policy should be reviewed to include ‘development of brownfield land within the Green Belt is appropriate’ subject to the impact on the openness of the Green Belt.

We also note that the monitoring indicator of this policy is the number of appeals allowed involving development of the Green Belt and that the target is the reduction in the number of appeals allowed. We do not believe this is a clear monitoring indicator and the stance of it appears to be restrictive to development overall and not account for the clear policy tests within the NPPF. This monitoring mechanism should be reviewed to state that development in the Green Belt ‘not’ on brownfield land, to fully reflect the guidance within the NPPF.

Proposed amendments to Draft Local Plan Policy P2 ‘Green Belt’
- With the above in mind, we recommend amending the wording of the policy to read Replacement of a building, provided the new building:
  ? Is on previously developed/ brownfield land;
  ? Is not materially larger than the one it replaces, and
  ? Is sited on or close to the position of the existing building.

Furthermore, we would recommend that the policy is broadened to include the tests included within paragraph 89 of the NPPF and not restricted to the three categories as currently drafted.Affordable Housing Policy Draft Local Plan Policy H2 ‘Affordable Homes’ details that the council will work with registered providers, developers and landowners to increase the number of affordable home in the borough to meet the identified need. The draft policy states that affordable homes will be provided:
- On sites providing five or more home, or sites of 0.17 ha or more regardless of the number of homes. At least 40 percent of the homes on these site must be affordable homes; and
- On developments providing solely affordable housing either on public sector owned land or developments by registered providers.

The policy dictates that the mix of affordable units and tenure split need to reflect the SHMA and 70% rented with the remainder being other forms of affordable housing. The policy confirms that affordable rent must be no more than the maximum level set out in recent housing guidance.

The supporting text of the policy does not go far enough to justify the trigger point of providing affordable housing on site at being 5 or more homes or sites of 0.17 ha in size. This policy has been derived from the SHMA and the update to Guildford Local Plan Viability and Affordable Housing Study. Referring to the SHMA it identifies that approximately half of all Guildford households over the plan period will not be able to afford to buy or rent a home that meets their needs on the open market without subsidy. However, the SHMA does not conclude or provide evidence that supports the draft policy that developments with the capacity of 5 or more units or 0.17ha should contribute towards affordable housing.

Although there is an identified need for affordable housing, the threshold as drafted within this policy at five or more units or sites of 0.17 is onerous. We object to this trigger point of 5 or more dwellings due to the lack of evidence base which supports this low threshold and trigger of affordable housing. Furthermore, the viability study of the draft policies states
that the council should have a flexible approach to applying draft policy H2. This threshold brings into question the viability and deliverability of housing schemes and will ultimately jeopardise housing supply in Guildford. As per other boroughs the threshold for onsite affordable housing should be bought to 1,000 sq m as per the guidance included within the NPPG and recent appeal decision upholding the 10 unit threshold.

A recent appeal decision confirms that following the Court of appeal judgement dated 11th May 2016 that the obligations for affordable housing have been reinstated and refers to the NPPG. This states that such contributions should not be sought from development of 10 units or less and which have a maximum combined gross floorspace of no more than 1000m². The appeal was at 21 Clarence Avenue, London SW4 8LA (Appeal Ref. APP/N5660/W/16/3142911).

Viability and Affordable Housing

It should be noted that viability is determined by a range of elements including but not limited to, the density of the scheme, the location, the build costs incurred, the level of the sales values achievable and of key importance the benchmark land value. Therefore, this restrictive approach to seeking affordable housing from developments of five or more dwellings or 0.17ha does not account for these factors and could bring the viability of smaller housing schemes in question and therefore ultimately affecting the councils ability to achieve their housing target. Starter Homes

The supporting text of draft policy does not refer to the opportunity or inclusion of starter homes. As per national guidance these fall within the affordable housing definition and could be a solution to the affordable housing need in Guildford. The justification for this is that starter homes should be offered at a discount of at least 20% below market value and that they should cost no more than £250,000 outside of London.

The supporting policy text does not provide sufficient evidence as to why starter homes are not included within the affordable housing policy. We object to this exclusion in the policy and believe it is not in-line with the Government’s current consultation on national planning policy guidance. Furthermore, it does not follow the prescribed approach for the draft policy to be flexible.

Proposed amendments to Draft Local Plan Policy H2 ‘Affordable Homes’ With this in mind, we recommend amending the wording of the policy to read:As well as providing and managing affordable homes ourselves, the Council will work with registered providers, developers and landowners to increase the number of affordable homes in the borough toward meeting identified needs. These affordable homes will be provided:

- On sites providing 10 or more home, or sites 1000 sq m. At least 40 percent of the homes on these sites must be affordable homes, subject to viability.

The above amendment is in line with guidance in the NPPG, furthermore, the policy should be reviewed to include viability and the provision of starter homes as a type of affordable housing.

Loss of Employment Floorspace

Paragraph 51 of the NPPF supports the change of use of commercial buildings currently in Use Class B to residential where there is an identified need for additional housing in that area provided there are not strong economic reasons why such development would be inappropriate.

Draft Policy E3 ‘Maintaining employment capacity and improving employment floorspace’ states that in order to sustain and enhance employment capacity:

? Employment floorspace will be protected and the loss strongly resisted on the Strategic Employment Sites, which are defined in policy E1. Change of use will only be acceptable if evidence is provided of active and comprehensive marketing of the site for its current use (offices, research and development or industrial) for a continuous period of at least two years.

? Employment floorspace will be protected and the loss resisted on the Locally Significant Employment Sites, which are defined in policy E1. Change of use will only be acceptable if evidence is provided of active and comprehensive marketing of the site for its current use (offices, research and development or industrial) for a continuous period of at least 18 months.

? Employment floorspace will be protected in line with latest needs assessment and the loss be resisted outside designated employment sites. Change of use will only be acceptable if evidence is provided of active and comprehensive marketing of the site for its current use (offices, research and development or industrial) for a continuous period of at least 12 months.

We are making representations to the following part of the draft policy:
“Employment floorspace will be protected in line with the latest needs assessment and the loss resisted outside designated employment sites. Change of use will only be acceptable if evidence is provided of active and comprehensive marketing of the site for its current use (offices, research and development or industrial) for a continuous period of at least 12 months”.

The draft policy further states that “once the period of comprehensive and active marketing is achieved, any other suitable employment use should be considered before change of use to residential or other use will be permitted”.

Proposed amendments to Draft Local Plan Policy E3 ‘Maintaining employment capacity and improving employment floorspace’

The policy as drafted is restrictive and covers all sites which are in employment use and not designated, furthermore there is a requirement to market these sites for 12 months continuously to provide evidence for a change of use. The draft policy does not take account for site specific characteristics which could impact and hinder the current employment use, this includes:

- The type of employment use;
- The employment generation of sites;
- The suitability and condition of the employment buildings;
- Economic viability for refurbishment;
- The availability and demand for the employment floorspace; and
- Flexibility in employment floorspace.

In addition, the NPPF does not require marketing evidence for employment sites. Therefore these factors of non-designated employment sites should be considered in the draft policy and a pro-active approach should be taken by the council assess the suitability of sites to remain in employment use. With this in mind, we recommend amending the wording of the policy to read:

“Employment floorspace will be protected in line with the latest needs assessment and the loss resisted outside designated employment sites.

Change of use will be acceptable if evidence is provided of active and comprehensive marketing of the site for its current use (offices, research and development or industrial) for a continuous period of at least 12 months or where it can be demonstrated that the building or site is unsuitable for continued employment use”.

The supporting text should further be amended to take account of the proposed amendment above “once the period of comprehensive and active marketing is achieved or provided the existing employment floorspace is redundant and does not offer suitable employment generating uses, a change of use to residential or other use will be permitted”

Please acknowledge receipt of our representations to the Draft Guildford Local Plan (Proposed Submission). We look forward to discussing matters with you further in the future.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
We write on behalf of our client, Ashill Land Ltd, to submit representations to the draft Local Plan (submission version) to support residential development at the site at Keens Lane/Tangley Lane, Worplesdon. A site location plan identifying the land is enclosed at

Appendix A.

Ashill has previously made representations to draft Local Plan consultations including the Issues and Options document (Autumn 2013) and draft Local Plan (Summer 2014). These representations support the release of the land from the Green Belt and the allocation for residential development to contribute towards the Council’s strategic housing land allocation. Our representations to the draft Local Plan (submission version) are detailed within the following sections of this submission.

In addition to the above, Ashill have engaged with Guildford Borough Council (GBC) through pre-applications over the last year and the development of land at Keens Lane and Tangle Lane Worplesdon. In addition, Surrey County Council (SCC) has been consulted with regards to highways. Both GBC and SCC have been supportive for development of the site for housing.

Background to the Site

The site is 5.25 ha in size and is currently used as arable farming land. Built development on site comprises horse stables and agricultural buildings which are ancillary use. The boundaries of the site to the north and east are characterised by existing hedgerows and a bridleway. Adjacent to Keens Lane and Tangley Lane are residential areas which form part of Guildford Urban area. Residential dwellings are located on Keens Lane and Tangley Lane in the south west corner of the site. The site is located at the edge of the Guildford Urban Area to the north west of the town centre. It lies to the north of Keens Lane and is in close proximity to Gravetts Lane and the A322 which is approximately 200m away. To the north of the site is open farmland and the settlement of Worplesdon and to the north-east is Whitmoor Common which forms part of the Thames Basin Heath SPA. To the east and south of the site are existing residential areas. To the west is residential dwellings and agricultural land. The site is adjoined by development on the east, south and west and partially to the north. It is within short walking distance of a range of local amenities and services on Worplesdon Road approximately 450m away. Bus stops are located on Worplesdon Road and Cumberland Avenue (route 26, 27, 28 and 91) and are located within approximately 400m in walking distance of the site. This connects the site to Guildford town centre and the wider employment, leisure and retail services.

Summary of Representations and Recommendations

We submit these representations on behalf of Ashill Land Ltd, with particular interest to their site at Keens Lane, Tangle Lane at Worplesdon. The representation is submitted in support of residential development at this site for the following reasons:

1. The Strategic Housing Market Assessment (SHMA) identifies a low Objectively Assessed Need (OAN) per annum for the Guildford area;
2. The Land Availability Assessment (LAA) confirms the housing target over the plan period and per annum for Guildford which uses the base OAN but is low given the deficit against housing need;
3. The 5 year housing land supply relies on a number of extant planning permissions to be delivered within the period to meet the housing need;
4. The overall housing targets included within draft policy S2 ‘Borough Wide Strategy’ need to reflect the housing need provided within the evidence base;
5. The site has been classified as ‘medium sensitivity’ in the Green Belt Review and thus appropriate for release for development.
6. The site is adjacent to the settlement boundary and is suitable and sustainable site for housing development.
7. The site is the only medium sensitive site in the Green Belt Review in the Guildford Urban Area.
8. The site is suitable and deliverable to offer a significant amount of new housing to contribute towards the council’s housing need within the first 5 year period.
9. We support the requirements of the allocation (A22) but the residential development can be maximised to a minimum of 150 dwellings.
10. We support the requirements of the allocation (A22) to incorporate a residential care home to be provided within the 400m Thames Basin Heaths SPA buffer.
11. We request that the opportunity for self-build plots is removed from the allocation (A22) as there is little evidence to support this requirement.

The representations, on behalf of our client, to the draft Local Plan (submission version) with regards to the above are set out in the following paragraphs.

**Housing Numbers and Evidence Base**

**SHMA June 2016**

The West Surrey SHMA (June 2016) provides an evidence base for the housing policies and targets included within the draft Local Plan and identifies the OAN. The SHMA covers the boroughs of Guildford, Waverley and Woking. The NPPF highlights the Strategic Housing Market Assessment SHMA as a key piece of evidence in determining housing needs. Paragraph 159 in the Framework outlines that this should identify the scale and mix of housing and the range of tenures which the local population is likely to need over the plan period that:

- Meets household and population projections, taking account of migration and demographic change;
- Addresses the need for all types of housing, including affordable housing and the needs of different groups in the community; and
- Caters for housing demand and the scale of housing supply necessary to meet this demand.

The SHMA identifies across the housing market area based on the ONS 2012-based SNPP that there is a need to deliver 1,352 dwellings per annum. Specifically within Guildford there is an OAN for 517 dwellings per annum for the plan period between 2013 – 2033. Taking into account further adjustments such as economic growth, affordability and student growth, the OAN for Guildford has been increased to 693 dwellings per annum. It should be noted that this projection provides a starting point for housing need and is a minimum requirement.

The identified OAN is low for the Guildford area given the factors assessed within the SHMA, specifically with regards to the forecasted population increase which has been identified to increase by 15% by 2033 in the borough and the significant need for Guildford to increase housing to support the growing economy. Therefore the housing target prescribed in Policy H1 ‘Homes for All’ should be reviewed in light of the above and increased substantially to reflect the current need and should be set as a minimum requirement.

The OAN highlights the baseline which is considered in the Strategic LAA and the Five Year Housing Land Supply, the analysis with regards to Land at Keens Lane, Tangley Lane is detailed within the following paragraphs.

**Strategic Housing Land Availability Assessment May 2014**

Guildford Borough Council published their Strategic Housing Land Availability Assessment (SHLAA) in May 2014 noting an overall target of 13,240 dwellings over the proposed plan period. The total figures of 13,420 equates to 652 dwellings per annum. The draft Local Plan cited a 5 year deliverable figure of 1,394 dwellings over the plan period which equated to 279 dwellings per annum. This was however; considerably lower than the 652 dwellings per annum projected by the SHLAA published in May 2014. As part of the evidence base for the current draft Local Plan, the SHLAA has been updated to a LAA to incorporate a number of factors which are detailed within the following paragraphs.

**Land Availability Assessment May 2016**

As part of the evidence base for the Local Plan (proposed submission), a Land Availability Assessment (LAA) has been published (May 2016). This provides evidence to support the ‘draft Local Plan Policy S2’ which identifies the provision of 13,860 dwellings over the plan period. This equates to 15,116 (net) taking into consideration those sites which currently have achieved planning permission. The overall provision from the 2014 figures has increased by 412 dwellings following an update to the LAA. This increase is low given the identified factors and deficit of required housing within the borough.
This LAA supersedes the SHLAA (2014) and has identified sites by the following:

- Sites and broad locations with potential for development for housing and economic development over the plan period;
- Assessment of the development potential; and
- Assessment of their suitability for development and the likelihood of development coming forward.

The LAA notes that planning permissions were granted for no significant strategic sites and of only 20 or more dwellings. This highlights the low level of both consent and delivery and the inability to meet the current housing need within the borough. Therefore, the current low level of delivery contributes towards the overall deficit within the borough and the housing target prescribed in draft policy S2 ‘Borough Wide Strategy’ should be increased to allow more homes to be delivered over the plan period and meet the OAN.

It should be noted that in the borough over 1,471 dwellings have planning permission but have not yet been built (as of February 2016), this highlights a low level of deliverability of permissions within the borough. These generally include smaller sites and the site at Ash and Tongham (398 dwellings 12/P/01973), of which conditions are being discharged for implementation. Of these the Council anticipate that only 1,408 dwellings will be delivered in the next 5 years. The council have discounted the rest and anticipate these to be delivered in the period of 11 – 15 years. It should be noted that there is a reliance on historic permissions to be delivered in the plan period, particularly within the first 5 years. We promote greater flexibility in the draft policy S2 ‘Borough Wide Strategy’ to ensure that a higher number of dwellings can be delivered over the plan period.

Five Year Housing Land Supply

The LAA confirms that the first five years of the plan that 3,583 dwellings will be delivered. This equates to 717 dwellings (net) per annum. The council have set targets for each of the years within the 5 year period from 2018 – 2023 for between 500 - 700 new dwellings per annum. It is noted that the housing numbers takes account and relies on the deliverability of a number of extant permissions. This totals 1031 dwellings over the 5 year period.

It should be noted that given the undersupply of housing during the current plan period during the first five years of the plan there will still be an overall cumulative deficit of – 912 dwellings. Furthermore, of the total 5 year housing land supply, 1,342 have already been granted planning permission but have not yet started on site. Therefore there is a reliance on the extant permissions to be implemented and delivered. The deliverability and viability of these sites and their inclusion within the 5 year housing land supply can be questioned and ultimately highlights that the 5 year land supply targets per year are low and should be increased. This follows a similar trend to the old SHLAA (May 2014) and is highlighted by the minor increase in the target from 652 to 717 dwellings to be delivered within the first 5 years per annum. This equates to a 9.9% increase in provision which is low when considered against the current poor delivery of housing and deficit In Guildford.

In summary, the council could not demonstrate an adequate 5 year housing land supply with the SHLAA (May 2014). Although there has been an update to this by way of the LAA (May 2016) and SHMA, there is still a significant shortfall and net additional dwellings required which has been confirmed through the analysis of the figures above. Therefore, there is a need to increase the provision per annum within the first 5 years by at least 20%, this is in accordance with the National Planning Policy Framework which states that local planning authorities should “identify and update annually a supply of specific deliverable sites sufficient to provide five years’ worth of housing against their housing requirements” plus a buffer of 5 per cent, or 20 per cent where there has been a record of persistent under delivery. This should further be reflected in draft Policy H1 ‘Homes for All’ and the housing provision increased.

Land at Keens Lane/Tangle Lane, Worplesdon

The site is assessed within the LAA as a proposed extension to an urban area which is currently within Green Belt. The assessment confirms that the provision of new homes at this site would contribute towards meeting the housing numbers in the Local Plan and contribute towards achieving sustainable, inclusive and mixed communities. We fully support these conclusions of the LAA. In addition, it is identified that the provision of a nursing or residential care home (C2) would help meet the need for such accommodation within the borough. The LAA concludes that this site is available for development and development for residential dwellings and a care home can be realistically delivered within 5 years. Therefore, the
subject site of these representations is deemed to be suitable, available and achievable to contribute towards the housing need within the borough. This is fully supported by GBC and our client.

Recommendation of amendments to Draft Policy S2 ‘Borough Wide Strategy’

Policy S2 ‘Borough Wide Strategy’ states that “during the plan period (2013 – 2033), we will make provision for 13,860 new homes, 37,200 – 47,200 sq m of office and research and development (B1a and b) floorspace and 4.7 – 5.3 hectares of industrial (B1c, B2 and B8) employment land to help meet the needs for new homes, support the economy and supply 3,200 additional B class jobs”.

The annual housing targets drafted within this policy are detailed below:

(see attachment)

Following a detailed review of the evidence base to support draft Policy S2 ‘Borough Wide Strategy’ we propose the following amendments to the draft text and the annual housing targets:

“During the plan period (2013 – 2033), we will make provision for a minimum of 13,860 new homes, 37,200 – 47,200 sq m of office and research and development (B1a and b) floorspace and 4.7 – 5.3 hectares of industrial (B1c, B2 and B8) employment land to help meet the needs for new homes, support the economy and supply 3,200 additional B class jobs”.

Release of the Green Belt for Development

Background to the Green Belt Review 2014

The National Planning Policy Framework (NPPF) states that the fundamental role of Green Belts is to prevent urban sprawl by keeping land permanently open, identifying the essential characteristics of Green Belts as their openness and their permanence.

The NPPF states that Green Belt boundaries should only be altered in exceptional circumstances such as through the preparation or review of a Local Plan. Paragraph 83 details that when reviewing green belt boundaries, local authorities should take account of the need to promote sustainable patterns of development. Furthermore, the NPPF advises that local authorities should channel development towards urban areas inside the Green Belt boundary, towards towns and villages inset within the Green Belt or towards locations beyond the outer Green Belt boundary.

A Green Belt review was undertaken by Pegasus Planning Group on behalf of Guildford Borough Council in February 2013 and updated in 2014 to positively plan for the release of land to meet the identified housing need. This forms part of
the evidence base of the draft Local Plan and supports the proposed site allocations. The Borough was categorised into various land parcels. Paragraph 84 of the NPPF advises that when defining boundaries of the Green Belt, local authorities should:

- Ensure consistency with the Local Plan strategy for meeting identified requirements for sustainable development;
- Not include land which it is unnecessary to keep permanently open;
- Where necessary, identify in their plans areas of ‘safeguarded land’ between the urban area and the Green Belt, in order to meet longer-term development needs stretching well beyond the plan period;
- Make clear that the safeguarded land is not allocated for development at the present time. Planning permission for the permanent development of safeguarded land should only be granted following a Local Plan review which proposes the development;
- Satisfy themselves that Green Belt boundaries will not need to be altered at the end of the development plan period; and
- Define boundaries clearly, using physical features that are readily recognisable and likely to be permanent.

The Green Belt review assessed a number of sites across the Borough for potential development sites to yield up to 9,000 dwellings over the plan period. This review tested environmental constraints, sustainability and accessibility of various sites. Therefore it is considered necessary to release appropriate Green Belt land for housing and we support the release of the site which is subject to these representations.

Release of Land at Keens Lane/Tangley Lane, Worplesdon from the Green Belt

The site at Keens Lane and Tangley Lane formed part of the potential development area defined as J3. J3 includes the site specifically and a wider area to the north of the site. The Green Belt review confirms opportunities to accommodate appropriate development at the site without significantly comprising the purposes of the Green Belt. This wider site is highlighted on the accompanying ‘Potential Development Areas surrounding Urban Areas and Villages Plan’ as a ‘potential development area surrounding an urban area’. Furthermore Appendix 2 of the Green Belt review details the sensitivity assessment in terms of Green Belt purposes of the identified sites across the Borough.

Land at Keens Lane/Tangley Lane is identified as a ‘medium sensitivity site’ on the urban edge of Guildford. It should be noted that the parcel that this site falls into is the only medium sensitivity parcel immediately surrounding the Guildford Urban Area. The council have been advised by the Green Belt review to guide development to those sites which are ‘low sensitivity’ and ‘medium sensitivity’. It is therefore considered to be the most sustainable Green Belt release within the Borough.

We therefore support the release of Land at Keens Lane/Tangley Lane from the Green Belt to deliver housing considering its location on the edge of the urban settlement and medium classification; all other sites in Worplesdon have been assessed as high sensitivity and inappropriate to release, therefore our site is the only site identified.

Site Allocation

Worplesdon

The land north of Keens Lane is identified in the draft Local Plan (submission version) to deliver circa 150 high quality new homes and a 60 bed care home. A number of factors support this proposal which accord with paragraph 14 and paragraph 85 and 89 of the NPPF regarding sustainability and the boundaries of Green Belt land. This includes:

1. The sustainable location of the site on the northern edge of the Guildford Urban Area including its close proximity to local amenities including local shops, employment opportunities and education facilities;
2. There are no environmental constraints on the site regarding flooding and development is restricted within the 400m buffer of the SPA to the 60 bed care home is proposed. This is deemed an acceptable use within the buffer of the SPA;
3. Ecological appraisals have been undertaken for the site and have confirmed future development would not cause any significant ecological impact on the conservation status of wildlife and habitats;

4. The development of the site will not impinge on the five tests of the Green Belt as set out in paragraph 89 of the NPPF;

5. The site offers the opportunity to provide high quality residential dwellings and contribute to the housing supply;

6. There is an existing natural and defensible boundary located on the northern part of the site which would protect the Green Belt to the north;

7. The future residents that will occupy the dwellings will enhance the localised economy;

8. The proposed vehicle and pedestrian access routes are sustainable and will not have a detrimental impact on the existing highways network; and

9. The site provides a natural extension to the Guildford Urban Area.

It can therefore be concluded that the site provides a sustainable opportunity to contribute towards housing need within Guildford. The site is a natural extension to Guildford Urban Area and has the capacity to bring forward a significant number of high quality dwellings and care home and ultimately contribute to the housing supply.

This is further supported by Guildford Borough Council who have promoted the site for housing within the ‘Strategy and Sites’ allocation draft policy document in September 2014 and the site was deemed appropriate for development within the Green Belt Review. Therefore the proposal is in accordance with paragraph 14 and paragraph 89 of the NPPF to meet longer-term sustainable development needs within the Borough.

Details of the Allocation (A22 ‘Land north of Keens Lane’)

The detailed allocation and Policy ‘A22 ‘Land North of Keens Lane, Guildford’ confirms that the site is allocated for approximately 140 homes (C3) and a care home (C2) with approximately 60 beds. In addition, a number of the requirements regarding environmental constraints are detailed including, the distance of the Thames Basin Heaths SPA. Whilst we generally support the allocation at the site we believe there is capacity to accommodate a minimum of 150 homes and a 60 bed care home given the surrounding residential context and the location on the edge of the urban area. Furthermore, as detailed above this site is the most sustainable for delivering housing within the first 5 years of the plan period and therefore, the draft policy should maximise on this.

In addition, given the low OAN identified in the SHMA and subsequent housing target per annum which forms part of the 5 year housing land supply, it has been confirmed that this site is viable, suitable and deliverable for housing development and therefore its capacity should be maximised within the draft local plan. The allocation notes an opportunity to provide self-build plots; however, no further justification is given within the draft local plan to support this. We note that the SHMA identifies a very low level of interest in self-build plots in the Borough and there is currently not a register publically available. Furthermore, the LAA (2016) confirms and identifies four strategic development sites to require the inclusion of self-build plots, these include the following:

- Gosden Hill Farm, Merrow Lane, Guildford (LAA site 46)
- Blackwell Farm, Hogs Back, Guildford (LAA site 311)
- Land at former Wisley airfield, Ockham (LAA site 53 and 54)
- Land to the south of Normandy and north of Flexford (LAA site 368)

Land at Keens Lane and Tangley Lane should therefore not include the requirement to provide these plots within future housing development without adequate justification. Whilst the principle of self-build plots is supported by our client, there are implications that this requirement could incur on this specific site including; maximising the number of dwellings delivered, lack of a coherent design approach and the deliverability and viability of completing the future development within the defined plan period of 5 years. We would therefore recommend that this requirement is removed from the allocation.

We note that the subject site of these representations is identified to incorporate development of a residential care/nursing home (C2) for 60 beds and this is considered to be delivered within the first 5 years of the adoption of the Local Plan. We support this allocation and the requirement for this to be located within the 400m Thames Basin SPA buffer zone.

Proposed amendments to draft site allocation (A22 ‘Land north of Keens Lane’)

Page 907 of 3335
Following a detailed review of the evidence base to support draft site allocation (A22 ‘Land north of Keens Lane’ we propose the following amendments to the draft text:

“The site is allocated for a minimum of 150 homes (C3) and a care home (C2) with approximately 60 beds”.

In addition the ‘self-build plots’ should be removed from the allocation ‘opportunities’.

We are generally in support of the plan and its attempt to achieve greater housing delivery, however the suggested alterations would support GBC to ensure that that the housing targets are delivered. Furthermore, through engagement with GBC and SCC, it is clear that there is support for this site to come forward in the immediate term for housing.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: attachment 1234.doc (39 KB)

Comment ID: PSLPA16/4515  Respondent: 8589953 / Michael R. Murphy  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In addition I attach the reasoned objections to the whole dreadful Guildford Plan which is opposed by virtually all the Villages Around Guildford and most of the Guildfordians and our local MP Sir Paul Beresford. Compiled by Andrew Procter.

Finally the most important objection:

I OBJECT to Send village being removed from the Green Belt.

This fantastic legacy from our Victorian Philanthropists was always intended to be permanent, as required by the National Planning Policy Framework. There are no special circumstances to justify abandoning this fantastic legacy.

The Green Belt in Send provides an ESSENTIAL Buffer, stopping Woking and Guildford becoming one conurbation. The GBC Councillors and Government gave clear election promises to protect the GREEN BELT. This plan blatantly reneges on those promises, and goes against Government Guidelines as pointed out by Sir Paul Beresford our local MP.

This would be a Developers Charter to provide unlimited development all over our Village and some other villages.

Please do not allow this dreadful error which will be irreversible.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Wisley Airfield, which is classified as a brownfield site on a spurious technicality when everybody can see that it is not what is understood by brownfield, being included in the Local Plan as a development site for 2000 houses when Guildford Planning Committee have just refused the planning application relating to it. Either the left hand does not know what the right hand is doing or this is a devious diversion. I object for all the reasons identified by GBC Planning Committee when it rejected the application.
I OBJECT to building 2000 houses at what GBC calls Wisley but is actually at Ockham, because it would massively and
detrimentally overwhelm Ockham village, East and West Horsley and the entire neighbouring area. The proposal is ill
conceived, showing scant regard for the Green Belt, infrastructure requirements, transport, or pollution and lacking nearly
all the evidence that is needed to show that such a development would be sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT to building 45 houses at Clockbarn Nursery.

There is inadequate access and high local traffic volume.

Planning permission has been given for 64 apartments at the Tannery and for building the Marina. This will generate
additional heavy traffic. By adding another 45 houses, this will greatly add to the traffic already there it will be even more
chaotic. The junction with Send Road is already very dangerous for vehicles joining the Main Road, this proposal will make
it even worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT to building 400 Houses and 7000 sq meters of industrial Space at Garlicks Arch opposite Send Marsh Road.

This is Green Belt Land with Ancient Woodland, and is prone to considerable flooding. The industrial space is definitely
not needed as there is adequate space at Slyfield Green, and the owners at Slyfield are keen to have extra use there if there
is in fact a need at all for extra industrial Space.
If GBC used the brownfield sites this Green Belt land would not be needed.

The gridlock that this development would cause on the local Roads would be

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to a new interchange with the A3 at Burnt Common because Send would have to take traffic from the proposed 2000 houses at Wisley Airfield, 2000 at Gosden Hill and 1850 at Blackwell Farm as well as 485 from Send itself. This is in addition to what it takes at the moment. Much of this traffic to and fro the A3, M25, Woking and Guildford would go through Send. Send Road, which is already overloaded, would face gridlock. This would exacerbate noise and pollution levels which are already excessive and is wholly unacceptable.

I OBJECT to the new interchange with the A3 at Burnt Common because it is being presented as a way of facilitating the movement of a massive increase in vehicles whereas in reality it would cause havoc on the A247 and the many feeder roads in Ripley and Clandon in addition to Send.

I OBJECT to the fact that Guildford Councillors approved the Local Plan before the Transport Assessment had even been published which indicates what scant regard they had for the traffic implications which are at the forefront of residents’ worries. They have to contend with the problem every day in terms of delays, pollution and noise which are already destroying our villages as decent places in which to live.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/8225  Respondent: 8589953 / Michael R. Murphy  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to this proposed new interchange with the A3 at Burnt Common because much of the traffic to and from the A3, the M25, Woking and Guildford would be going through to Send Road which is already at full capacity. It would be total gridlock as this road funnels into a small roundabout and very small congested roads in Old Woking.

The proposed junction would have to take traffic from the proposed 2000 houses at Wisley Airfield, 2000 houses at Gosden Hill, Burpham and 1850 at Blackwell Farm, this would be a total disaster for the Village of Send.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to GBC withholding from residents their consultant’s and sub-consultant’s calculations of housing need, which is what is driving this whole issue. It would appear that even some individual councillors are not privy to the calculations or how the total has been reached but are blindly accepting a figure produced without workings or explanation. There are strong grounds for believing that GBC, aided and abetted by their consultants, have overstated by a wide margin what the figure should be. There are also grounds for believing that the numbers have been exaggerated as a result of pressure from developers. As the grabbing of Green Belt land is predicated on the need for a particular number of houses, a good starting point would have been to get the number right and to show transparently how it was reached.
Other submissions will provide supporting statistics and there are authoritative figures online to show the escalation of housing need in Guildford Borough has been about 0.5% per year for the last ten years. The draft plan provides no proper data which proves that it is increasing significantly more at the moment or that in future years it will rise by so much more. Guildford’s projected number in the last draft local plan was challenged by the Office of National Statistics which is a more reliable source since it is not driven by developers. Since the current set of figures was published other underlying data has changed; for example it was too late to take into account the effects on housing demand of changes to the population which could arise from Brexit. Nor has GBC applied the normal constraints to their maximum projections. For a proper professional assessment of housing numbers I refer the reader to the submission from Andrew Procter on behalf of the Save Send Action group.

I OBJECT to the combined total of 2000 (Wisley) + 485 (Send) + 2000 (Gosden Hill) + 1850 (Blackwell Farm) houses all alongside a short stretch of the A3 between the M25 and the university. To concentrate 6335 of the borough’s assessed need for housing of 13860, that is close to half of it, in such a small area of the borough is by any standards unreasonable. If GBC wants to build this number of houses, which has more to do with developer pressure than properly calculated need, it should spread them more evenly throughout the borough, which it is manifestly failing to do. This would help to alleviate excessive traffic congestion and pollution which is a certain consequence of GBC’s current proposals.

Applied specifically to Send, although it is the largest village in the borough it should not have to take a significantly higher proportion of new houses than the borough overall. It should also not have to take a significantly higher proportion of new houses on account of its current size which arises as a result of a disproportionate volume of housing previously being located in Send, Send Marsh and Burnt Common. When the Wimpy Estate of several hundred houses (Linden Road, Maple Road and all adjacent “tree” roads) was built in Send some 40 or more years ago it represented a massive increase in the size of Send Marsh which increase at the time was disproportionate to the size of the village and its amenities. A further massive increase now, which relates numbers proposed to numbers existing, compounds the offence. It would be more equitable to say that as Send accepted a very large number previously, it should not be expected to do so again.

The housing number calculations also have to take into account the constraints, in particular those resulting from the Green Belt. I therefore repeat the points made in paragraph 11 above which cannot be over emphasised. The NPPF states that in their local plans local authorities are required to meet objectively assessed housing needs “as far as is consistent with the policies set out in this Framework”. The policies referred to include Section 9 - Protection of the Green Belt. The Court of Appeal has clarified the interpretation of this by stating categorically that there may be nothing very special about a housing shortfall in an area which has very little undeveloped land outside the Green Belt.

The key question is not “is there a shortfall in housing land supply?” You have to ask “have special circumstances been demonstrated to outweigh the Green Belt objection?” And such circumstances are not demonstrated simply because there is a less than five year supply of housing land. Special circumstances will not exist unless the potential harm to the Green Belt is clearly outweighed by other considerations. Given the large amount of Green Belt in Guildford Borough, the council can legitimately argue that it does not have to match the housing targets of boroughs with less Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Local Plan because it seeks to build on Green Belt land unnecessarily. The work of Professor Anne Power at the London School of Economics, amongst much other expert research, clearly demonstrates that there is more than sufficient land to build all the houses that are needed without taking any of the Green Belt. In our area several studies show that unused brownfield sites in Guildford Town itself are capable of yielding most of the required land. GBC has not properly explored the capacity which is available there or on brownfield sites elsewhere in the borough, which would have provided a sensible starting point since GBC own many of them.

I OBJECT to the Local Plan in that GBC’s approach to the Green Belt introduces a concept of grading its quality. This is an alien concept, not recognised in law. Of course some Green Belt is seen to be better than other Green Belt but the law does not make any distinction, nor should it. It depends who is looking at it and from what standpoint they are looking. Green Belt is Green Belt and it is not for GBC to stand in judgement on what bits it thinks are worth keeping and what are not.

I OBJECT to proponents of the plan representing those against it as “nimbys”. Those against are not against building houses. They recognise the need for them. They are against building them in unsuitable, unthought out locations which damage existing amenities. This relates particularly to building them on Green Belt land, thereby destroying an existing amenity, when it is not necessary to do so.

I OBJECT to the Local Plan because it seeks to promote sites for houses with woefully inadequate attention being paid to the infrastructure to support those sites. Without proper infrastructure none of the identified sites will deliver what is claimed for them. No detailed thought has been given to the form of the infrastructure required, still less to how much it would cost and, it would appear, none at all to where the money for it would come from.

I OBJECT to removing Send and other villages from the Green Belt. The Green Belt was intended to be permanent, and its permanence was enshrined in law through the National Planning Policy Framework, reinforced by the NPPG and a succession of Ministerial guidance statements. For all of this to be overridden requires “special circumstances” which do not exist in the case of Send.

I OBJECT to all four proposed sites in Send because they are all in the Green Belt and not one of them displays the very special circumstances which would be needed in order to outweigh the substantial harm caused by reason of inappropriateness. There is abundant legal authority but I would cite the Court of Appeal cases of City of St Albans v Hunstan Properties and Gallagher Homes v Solihull Metropolitan Council. These precedents, which have been ignored by Guildford Council before, show that it is necessary to demonstrate that harm to the community at large, by taking the Green Belt, would be less than if it was not taken. The crucial words are “to the community at large”. Paragraph 47(1) of the NPPF advises local authorities “to ensure that their local plans meet the full, objectively obsessed, needs for markets and affordable housing in the housing market area as far as is consistent with the policies set out in this framework”. As the Court of Appeal has made clear one cannot rely on objectively assessed needs without having regard to the policy constraints. The qualification in this clause “as far as is consistent with” is not qualifying housing need; it is qualifying the extent to which the local plan should go to meet those needs. It is quite clear from the precedents that exceptional circumstances will not exist unless the potential harm to the Green Belt has been shown to be clearly outweighed by other considerations. In other words harm to the Green Belt is included in the factors which the NPPF requires to be taken into account.

The NPPF further states that in their local plans local authorities are required to meet objectively assessed housing needs “as far as is consistent with the policies set out in this Framework”. The policies referred to include Section 9 – Protection of the Green Belt. The Court of Appeal has clarified the interpretation of this by stating categorically that there may be nothing very special about a housing shortfall in an area which has very little undeveloped land outside the Green Belt.
The key question is not “is there a shortfall in housing land supply?” You have to ask “have special circumstances been demonstrated to outweigh the Green Belt objection?” And such circumstances are not demonstrated simply because there is a less than five year supply of housing land. Special circumstances will not exist unless the potential harm to the Green Belt is clearly outweighed by other considerations. The draft plan has not begun to demonstrate that there are exceptional circumstances and indeed offers very little to suggest that the authors have even read what the Court of Appeal has said about the provisions in the NPPF.

It is noted that the Court of Appeal precedents have been ignored before by GBC, which appears to regard itself as over and above the law. GBC seems willing to expend residents’ funds on counsel’s advice, in support of what its client developers want to do, but cannot bring itself to get a QC’s opinion in order to guide it on understanding the case law that actually exists, which manifestly it does not understand.

Given the large amount of Green Belt in Guildford Borough, the council can legitimately argue that it does not have to match the housing targets of boroughs with less Green Belt. But if Guildford wants to match the housing target which would apply if it was not constrained by the Green Belt, it can still do so using brownfield land which is in plentiful supply. It is difficult to avoid the conclusion that it has not taken either of these legitimate routes because it finds the allure of developers’ propositions on green field sites more attractive. GBC should also note that the Green Belt was created not just for the benefit of local residents. It came to be known as the Metropolitan Green Belt because it was intended to be of benefit to a much wider range of people, especially Londoners visiting open spaces outside but near to London. It is beyond the remit of GBC to arrogate to itself the power to override Parliament’s intention.

I OBJECT to any sort of diminution of Send’s Green Belt because it provides an essential buffer stopping Woking and Guildford becoming one conurbation. It has served this purpose effectively since its inception and should continue doing so for the benefit of subsequent generations living here. No group of councillors, especially without a mandate, has the authority to impose a different future on residents.

I OBJECT to any reduction in Send’s Green Belt because so much land in Send provides the setting for the beautiful Wey Navigation corridor, which is a conservation area that enhances biodiversity, is visually important, provides a valuable leisure facility and combined with the surrounding lakes an exceptional habitat for a wide range of bird species and other wildlife.

I object to CLOCKBARN NURSERY TANNERY LANE POLICY A42 because:

Increasing the homes from 60 instead of 45 is an increase of 33% is far too many.

Why have all the previous objections been ignored and then you have added to the number of houses?

The Junction of Tannery Lane and the A247 are at gridlock, lots of times each day at present, and coming out from this junction is VERY DANGEROUS.
Adding any houses to Tannery Lane would add to the danger but 60 houses with say another 120 vehicles as well as delivery vans will give constant gridlock, and accidents.

It will add to the existing surface water flooding.

As a boat user on the River Wey Navigation it will detract from the loveliness views from this Canal.

It will further erode our precious Green Belt, which the Government is Committed to keep.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT TO POLICY A 43 because:

It ignores thousands of previous objections made by us local people.

It will cause even more traffic congestion, which is dreadful already, gridlocking the Roads in and out of Send and Ripley.

It will fill in the gap between Send Marsh and Ripley, so defeating the purpose of the Green Belt.

It will cause over development of our village and this number of homes is excessive.

There are NO "exceptional circumstances" existing to use our precious, beautiful Green Belt Land.

The beautiful Ancient Woodland in this site has been there since Elizabeth the First and must be protected for future generations.

Being a flood zone 2 allocation it is prone to frequent flooding, so the surface water will be moved onto the lower ground where I live.

There is a clay pigeon shooting site here which has polluted the ground with lead shot for over 50 years.

There is NO PROVEN demand for Traveling Show people plots here.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am aghast at the Plan released for public consultation on 6th June 2016, particularly in regard to our villages of Send, Send Marsh and Burntcommon.

Firstly, I OBJECT to the proposed removal of these villages from the Green Belt. This is a scandalous raping of these rural settlements, and by re-drawing the Green Belt boundaries around them (insetting) you have attempted to transfer those beautiful fields and 16th century woodlands known as Garlick's Arch (Area A43) from Green Belt, protected from development, into building land for about 400 houses and 7000sq.metres of industrial buildings and warehousing. This site was not included in the Regulation 18 Draft, and has not been consulted on previously, and is therefore illegal in my view. Any requirement for additional industrial development should be at Slyfield, an area which has been developed in this way for many years and if far more appropriate.

Therefore I strenuously OBJECT to Garlick's Arch being removed from the protection of the Green Belt.

I also believe that the proposal in this Draft Plan for 485 new houses for our Send villages is totally out of proportion to the current size of them, and will turn this from a rural area into a suburban one. So I must again OBJECT to this inflated number and ask that it be reduced back to the 185 which it was at in April this year, prior to the last minute inclusion of Garlick's Arch.

Should both Garlick's Arch and the new London bound entry and exit slip roads to the A3 by the A247 bridge go ahead, then traffic will be totally gridlocked around the A247/B2215 roundabout at Burntcommon, by the Shell petrol station/ Little Waitrose. As the only access to and from Boughton Hall Avenue is just 50 metres or so from this roundabout, on to the B2215, I have serious doubts as to whether our residents will actually be able to get in or out of this Avenue, at rush...
hours particularly. Portsmouth Road will be jammed from Kilne/Send Marsh Road to the roundabout; Clandon Road (A247) will be queueing probably from about West Clandon station to the A3 slip road, whilst Send Road will be solid with traffic for its whole length from the Old Woking roundabout. Traffic trying to exit the A3 from Guildford will be clogging up the whole of the Y. mile slip road to Burnt Common roundabout, and probably back on to the A3 itself. Very, very dangerous!

It seems to me that there has been very little, if any, real thought or planning given to the infrastructure problems that will occur due to all this development. What about Jack of school spaces? And the local Villages Medical Centre? There is only just about enough capacity in these facilities NOW. I attended the special Send Parish Council meeting at the Lancaster Hall on Tuesday 14th June 2016. Also present were Cllrs Paul Spooner and Matt Furniss, plus our local borough councillors Cllrs Mike Hurdle and Susan Parker (who spoke against the Plan). The Hall was packed full of very angry local residents!!! Councillors Spooner and Furniss very clearly stated that no developments included in this Plan would go ahead UNLESS THE REQUIRED INFRASTRUCTURE WAS ALREADY IN PLACE!! They emphasised this. I cannot help but wonder whether this was merely political assurances, given in order to appease the locals, or whether it will actually be written into the Local Development Plan as a positive legal requirement before planning approvals are handed out wholesale to hungry developers!!

(Since I drafted this letter on the 16th June, we've had the result of the referendum, which as we all know, is for Brexit!! So, as we are promised, immigration will be controlled, and there will now be nowhere near as much need for all the homes that you are proposing. Therefore, this is definitely the case for bringing the totals for Send, Send Marsh and Burnt Common back to the 185 that I mentioned above. Garlick's Arch MUST be deleted from this Plan!)

I ask that a copy of this letter be passed to the Government's Planning Inspector.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  pslp172/2926  Respondent:  8590209 / Mr Michael J Harris  Agent: 

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposed changes to POLICY A58 at Burnt Common, where the plan now is to allocate 10 hectares for industrial/warehousing on what is currently Green Belt land. This is totally unnecessary as the 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the WHOLE of Guildford Borough, and there is still spare capacity at Slyfield.

This would also cause a huge impact on all our local roads, particularly at the Burnt Common roundabout, A247/B2215. One of my main worries is that, together with all the extra traffic generated by the 400 houses at Garlick's Arch and the 60 at Clockharn Nursery site, it will become almost impossible to exit our Avenue (a 2/3rds of a mile long cul-de-sac containing 76 properties) at peak times, as our entrance is only about 100 yards from the roundabout. This will cause great and unacceptable difficulties for emergency vehicles as well.

The above situation will be made much worse, in fact, if the proposed new slip roads to the A3 (to and from Clandon Road, to give access to and from London bound traffic) are built, as traffic using these new slip roads will also mainly be using our roundabout. I can foresee gridlock for most of the day, every day!! Regarding this whole new Local Development Plan, far too little thought has gone into the road infrastructure planning.
Enormous improvements to the A3 around Guildford, as well as the local major roads, simply MUST TAKE PLACE BEFORE the huge house and industrial building projects are constructed, NOT AFTERWARDS!!

Our present road system is overloaded right now --- please listen to those of us who have to live with the current situation every day, and do not put the cart before the horse ... take the blinkers off, I implore you! Before retiring. I helped run a large housebuilding business. When we constructed a new estate, the first thing we did was to build the roads ... and then the houses --- not the other way round!

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of strategic site Policy A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/2947  Respondent: 8590753 / Mr Michael Anning  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to Policy A43a, the proposed on/off ramps to the A3 at Burnt Common as this will inevitably cause traffic chaos on the local road network throughout Ripley, Burnt Common, Send and West Clandon, with absolutely no possibility of mitigation due to the nature of our rural roads and lanes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Glossary(Appendix A)

Special Area of Conservation (SAC) appears twice.

**Protected species:** A species legally protected by wildlife legislation, including the Wildlife & Countryside Act (as amended) 1981, and the Conservation of Habitats & Species Regulations 2010.

**Biodiversity:** Biodiversity is the variability among living organisms from all sources including, among other things, terrestrial, marine and other aquatic ecosystems, and the ecological complexes of which they are part; this includes the diversity within species, between species and of ecosystems (source: EU-UN Convention on Biological Diversity).

Practically, the term is synonymous with both ‘habitats and species’, and ‘wildlife’.

Certain of these suggested insertions and corrections would also need to be carried through to the Green & Blue Infrastructure Topic Paper.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
SRN3, LRN7: Highways projects at M25 Junction 10/A3 Wisley Interchange
- Adjacency of Thames Basin Heaths SPA/Ockham & Wisley Commons SSSI. Within BOA TBH06 Wisley, Ockham & Walton Heaths; due sensitivity is necessary and projects should assist achievement of BOA objectives (inc. protection, restoration & creation of Priority habitats, esp. Heathland, Acid grassland).

SANG 4: Tyting Farm
- Within BOA ND02 North Downs Scarp & Dip: Guildford-Mole Gap; SANG proposal should assist achievement of BOA objectives (inc. protection, restoration & creation of Priority habitats, esp. Chalk grassland, Beech & yew woodland).

SANG 5: Burpham Court Farm
- Within BOA R04 River Wey & tributaries; proposal must not impact existing ecological interest, and should assist achievement of BOA objectives (inc. protection, restoration & creation of Priority habitats, esp. Floodplain grazing marsh, Wet woodland and other wetland habitats).

SANG 6: Russell Place Farm
- Within BOA TBL01 Wanborough to Normandy Woods & Meadows; proposal should assist achievement of BOA objectives (inc. protection, restoration & creation of Priority habitats, esp. Mixed deciduous woodland, Meadows, Hedgerows, Ponds).

SANG 7: Ash, West of Ash Green
- Partly within BOA TBL01 Wanborough to Normandy Woods & Meadows/Ash Green Meadows SNCI; proposal must not impact existing ecological interest, and should assist achievement of BOA objectives (inc. protection, restoration & creation of Priority habitats, esp. Mixed deciduous woodland, Meadows, Hedgerows, Ponds).

SANG 9: Benswood
- Within BOA TBL02 Clandon to Bookham Parkland; proposals should assist achievement of relevant BOA objectives (inc. protection, restoration & creation of Priority habitats, esp. Mixed deciduous woodland, Hedgerows, Ponds).
Within BOA TBL01 Wanborough to Normandy Woods & Meadows; proposal should assist achievement of BOA objectives (inc. protection, restoration & creation of Priority habitats, esp. Mixed deciduous woodland, Meadows, Hedgerows, Ponds).

Within BOA TBL02 Clandon to Bookham Parkland/Merrow Lane Woodland SNCI; proposal must not impact existing ecological interest, and should assist achievement of BOA objectives (inc. protection, restoration & creation of Priority habitats, Mixed deciduous woodland, Hedgerows, Ponds).

Within Wisley, Ockham & Walton Heaths BOA/ Wisley Airfield SNCI, adjacent Thames Basin Heaths SPA & Elm Corner Woodlands SSSI; proposal must not impact existing ecological interest, and should assist achievement of BOA objectives (inc. protection, restoration & creation of Priority habitats, esp. Heathland, Acid grassland, Arable field margins). The Trust reserves objection to use of the entire site as SANG, pending further impact analysis.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
This site includes the Little Flexford SNCI, and is within BOA TBL01 Wanborough to Normandy Woods & Meadows. Development here is therefore likely to be incompatible with BOA objectives (inc. protection of Priority habitats). The Trust reserves objection if this tension cannot be satisfactorily reconciled.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Policy D1: Making better places.

Developments should include sufficient open recreational spaces proportionate to their overall size and scale. These open spaces should be designed and managed to support biodiversity alongside their sometimes other primary uses. Useful guidance on ensuring relative sufficiency is Natural England’s Access to Natural Greenspace Standard (ANGSt) and your monitoring of Policy D1 could therefore usefully incorporate the achievement of ANGSt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Policy D2: Sustainable development, construction and energy.

We welcome this policy, and the apparent importance the Borough places on such matters through its inclusion and prominence in the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy E6: The leisure and visitor experience.

We welcome the reference here (para. 4.4.55) to the importance of Guildford’s natural environment to leisure activities and as an attraction for visitors from beyond the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2112  Respondent: 8591041 / Surrey Wildlife Trust (Mike Waite)  Agent:

Policy E7: Guildford Town Centre.

We welcome specific reference here to the importance of the River Wey corridor as a natural feature, and aspirations for the improvement of the natural environment within the town.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2115  Respondent: 8591041 / Surrey Wildlife Trust (Mike Waite)  Agent:
Policy II: Infrastructure and delivery.

We would caution the premise here that the sole driver for ensuring the adequate supply of publically accessible green infrastructure is as Suitable Alternative Natural Greenspace (SANG), required via the EU Birds Directive. This is not true and therefore misleading.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy IV: Green and blue infrastructure.

We greatly welcome this vastly-improved policy over that in the previous document. We have several suggestions for improvements to the supporting text around the policy, as below (indicated in red);

4.6.31 Introduction. ...The diversity of potential uses means that by planning for adequate retention and provision of green and blue infrastructure we can make a significant contribution to wellbeing and sustainability across the social, environmental and economic dimensions.

4.6.33 A positive approach to the adequate supply and maintenance of Green Infrastructure is crucial to the maintenance, protection and enhancement of biodiversity and wildlife in the borough, not least through the potential for
creation provision of new habitats and by serving to provide connections between existing habitats. It can further assist in adaptation to climate change by providing pathways for species dispersal and migration; climate amelioration through providing the cooling effects of tree cover; and in natural management of fluvial flooding, for example, through floodplain re-connection and restoration, provision, connectivity, which can also result in and the creation of new wetland habitats.

4.6.34 The Surrey Nature Partnership (SyNP) is the designated Local Nature Partnership for Surrey mandated by Government. SyNP is working with Surrey local authorities to set out an approach to conserving and enhancing the biodiversity of the county at a landscape scale. This approach identifies Biodiversity Opportunity Areas (BOAs) as areas where there are concentrations of recognised sites of biodiversity importance, both statutory and non-statutory, a particular type of habitat. BOAs represent areas where improved habitat management and efforts to restore and re-create priority habitats will be most effective in improving connectivity and reducing habitat fragmentation. BOAs extend across local authority boundaries and therefore provide a strategic approach that addresses biodiversity at a landscape scale. In fact, the majority of the Guildford’s countryside within the borough of falls within BOAs (see figure 1), which is broadly indicative of just how rich in wildlife the borough is.

Blue infrastructure

4.6.39 The River Wey Navigation is a highly valued asset of borough wide significance, both as an important element of our borough’s biodiversity and as a very significant public space. The National Trust has compiled a set of guidelines for what it considers are important characteristics of the river, and how this should be managed. These include the importance of the river as a ‘visually important open corridor’ and ‘an important leisure asset’ as well as a Conservation Area.

4.6.40 The EU Water Framework Directive 2000 aims for achievement of ‘good status’ for all ground and surface waters in the EU, initially by 2015 but by 2027 at the latest. This is assessed against a set of standards including water quality (both its chemistry and biology) and river morphology (for example, preserving or restoration to a naturally meandering course; having natural river banks as habitat) and re-connecting rivers to their floodplains; and providing backwater ponds). Much of the River Wey in the borough currently achieves ‘moderate status’, with some tributaries achieving only ‘poor’ or ‘bad’. The River Wey directly upstream from the borough is largely ‘poor’. The River Blackwater also largely achieves ‘moderate status’, but is a tributary of and thus within the neighbouring River Loddon catchment. This is considered a strategic issue due to the cross boundary nature of the impacts, and the importance of our waterways for the ecological health of the borough. Significant pressures on the River Wey include pollution from waste water and deriving from agricultural inputs, as well as from various sources in towns and from transport infrastructure; and the constraints to its natural function imposed by historic physical modifications to the river.

4.6.41 Both the River Wey and the River Blackwater, in combination with their floodplains and tributaries, are identified as BOAs.

Within Policy 14 itself; Blue infrastructure. Waterways will be protected and enhanced. Development proposals that are likely to have an impact on waterways (including across their catchments), must demonstrate how they will support the achievement of the Water Framework Directive and have followed guidance from the Environment Agency and Natural England on implementation of the Wey Catchment Management Plan and flood risk management.

Definitions

4.6.42 Net gains in biodiversity means biodiversity creation and/or enhancement. This should be integrated into the design of the site through the provision of new wildlife habitats, but also…

[...]

Certain of these suggested insertions and corrections would also need to be carried through to the Green & Blue Infrastructure Topic Paper.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P1: Surrey Hills Area of Outstanding Natural Beauty (AONB)

We welcome the inclusion and content of this policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2109  Respondent: 8591041 / Surrey Wildlife Trust (Mike Waite)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P4: Flood risk and water source protection zones

We welcome the inclusion and content of this policy, especially with regard to (d) “the scheme incorporates flood protection, flood resilience and resistance measures appropriate to the character and biodiversity of the area and the specific requirements of the site.” Note para. 4.3.49 correct reference – European Union Water Framework Directive.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2110  Respondent: 8591041 / Surrey Wildlife Trust (Mike Waite)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P5
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P5: Thames Basin Heath Special Protection Area

We welcome the inclusion and content of this policy. It may be useful to mention the role of SPA and SAC in the Natura 2000 schedule, within the context of international commitments to biodiversity conservation, in view of future uncertainties around the proposed UK withdrawal from the European Union.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy S2: Borough Wide Strategy

We maintain our challenge of the need for this scale of development across the Borough. We therefore continue to object to the overall quantum of development as proposed here, in that it can only result in cumulative negative impacts on the Borough’s natural environment. Clearly the proposed UK withdrawal from the European Union is likely to influence the ONS’ future projections for population growth, which may also have a bearing here.

Para. 4.1.8. Where sites allocations propose the development of greenfield sites, we could only support these where the overall proposed built densities are convincingly constrained by their adjacency/proximity to land of existing value for biodiversity conservation, and their potential value for enhancing landscape connectivity within Biodiversity Opportunity Areas may be fully realised.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Guildford borough Proposed Submission Local Plan: Strategy and Sites Regulation 19 consultation (June 2016)

Thank you for your consultation on the above document. Please find below the comments of the Surrey Wildlife Trust, which are confined to issues concerning the protection of the natural environment, including the conservation of Surrey’s biodiversity. Our most recent communication with you on this matter was our letter of 22/09/2014, where we detailed a range of concerns with the emerging Strategy & Sites document of that time. Some of these have been reflected in the present version now on consultation, but others have not. Overall, we remain concerned that the dependencies of present and future human society on maintaining a healthy and thriving natural environment are reflected adequately in the emerging Guildford Local Plan Strategy & Sites.

National planning policy in the NPPF aims to plan only for sustainable future development and economic growth. That sustainability is defined in part, as the ability to clearly demonstrate a contribution to protecting and enhancing the natural environment; including to “improve biodiversity, use natural resources prudently, minimise waste and pollution, and mitigate and adapt to climate change.” The opportunity to clearly articulate the potential for synergies here (as opposed to tensions) is overlooked at various points within the plan (see comment on para. 4.6.31 below), but especially under the definition of ‘sustainability’ in the Glossary at Appendix A.

Our comments are structured to correspond with the questions as set-out in your consultation questionnaire.

Question 1: The evidence base and submission documents. Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

Regarding the accurate characterisation and valuation of the natural environment, the Borough’s Local Wildlife Sites (Sites of Nature Conservation Importance) are still being reviewed. Whilst this latest iteration of the Local Plan Sites & Strategy makes due reference to the importance of the natural environment to Guildford’s economy and the well-being of its occupants, we feel that this is not translated consistently into policy for the various sites allocations.
To reiterate the point made originally in our previous response, Guildford Borough has arguably the clearest responsibility for the conservation of English and UK biodiversity of all Surrey’s boroughs and districts, with a wealth of declining and nationally-restricted wildlife species under its charge; this is still not adequately reflected in the plan (eg. at paragraphs 2.23-5) nor the underlying evidence base.

Answer (if comment is on questions 1-7 of the questionnaire): ()

FRR Flood risk reduction: surface water mitigation measures (including FRR1 Minimising surface water flood risk at the strategic site at Gosden Hill; FRR2 Minimising surface water flood risk at the strategic site at Blackwell Farm). The Trust welcomes these infrastructure projects.

SANG 4: Tyting Farm  
SANG proposal should assist achievement of relevant BOA objectives (inc. protection, restoration & creation of Priority habitats, esp. Chalk grassland, Beech & yew woodland).

SANG 5: Burpham Court Farm  
SANG proposal must not impact existing ecological interest, and should assist achievement of relevant BOA objectives (inc. protection, restoration & creation of Priority habitats, esp. Floodplain grazing marsh, Wet woodland and other wetland habitats).

SANG 6: Russell Place Farm  
SANG proposal should assist achievement of relevant BOA objectives (inc. protection, restoration & creation of Priority habitats, esp. Mixed deciduous woodland, Meadows, Hedgerows, Ponds).

SANG 7: Ash, West of Ash Green  
SANG proposal must not impact existing ecological interest, and should assist achievement of relevant BOA objectives (inc. protection, restoration & creation of Priority habitats, esp. Mixed deciduous woodland, Meadows, Hedgerows, Ponds).

SANG 8: Land adjacent to Long Reach Farm, West Horsley  
SANG proposal should assist achievement of relevant BOA objectives (inc. protection, restoration & creation of Priority habitats, esp. Meadows, Hedgerows, Ponds).

SANG 9: Benswood  
SANG proposal should assist achievement of relevant BOA objectives (inc. protection, restoration & creation of Priority habitats, esp. Mixed deciduous woodland, Hedgerows, Ponds).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy ID4: Green and Blue infrastructure. 4.6.34 “This approach identifies Biodiversity Opportunity Areas (BOAs) as areas where there are concentrations of recognised...” (suggest insertion to aid clarity here)

Policy ID4: “Proposals for development must demonstrate how they will deliver appropriate net gains in biodiversity where possible.” Our only concern here is over where the arbitration of ‘possibility’ would ultimately lie. This is perhaps better clarified later on as resting wholly with yourselves (and essentially not with a developer or their advisers/consultants). We trust the Borough will be equipped with the specialist knowledge to implement this and look forward to working with you as and when required on such matters.

4.6.50 “The NPPF requires... through a Green & Blue Infrastructure Supplementary Planning Document once enough detail has emerged.” (suggest insertion here for consistency if appropriate). The Trust welcomes this intended SPD and we look forward to working with you on its development.

Monitoring Indicators: Net gains in biodiversity provided by development on sites of 25 homes or greater. This appears a reasonable enough approach; perhaps the derivation of this threshold requires some further clarification however.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy S1: Sustainable development. With reference to para 4.1.4, is the list here (“Birds and Habitats Directives…flooding.”) drafted to be inclusive? If this is the case, we are interested to know whether Local Wildlife Sites (Sites of Nature Conservation Importance in Surrey), as well as Regionally Important Geological Sites, are also referable. If they are not, there is clearly an incentive here for designating SNCI as Local Green Spaces (which has indeed begun to proceed through several Neighbourhood Plans).

On behalf of the owners of this site, I am writing to support the removal of this site from the Green Belt and its allocation for a Burial Ground, together with a new site access and appropriate supporting facilities, in the proposed submission Local Plan, to confirm that I have made representations via the Council’s on-line consultation, and to request that the following information be taken into account by the Council when approving the Local Plan for submission to the Secretary of State.

Our case in support of this allocation is set out below under the following headings:

1. The site and its ownership
2. Removal of the land from the Green Belt
3. Allocation for development
4. Ecological impact
5. Summary

1. The site and its ownership

The site is wholly owned by my clients, Hazel Rosemary Farris and Maureen Elizabeth Trotter, whom I represent and on whose behalf this letter and my on-line representations are made.

The site, with an area of 7.88 ha (19.5 acres), is a level area of improved grassland, situated on the north side of Salt Box Road, immediately to the north of the built-up area of Guildford. The site was previously used for the rearing of pigs, but since the 1970’s has been used for the grazing of domestic horses and the original farm buildings at the eastern end of the site are now in a derelict condition. Existing access is from Salt Box Road by way of a service road at the extreme eastern end of the site. This road also serves a mixed residential and commercial area, lying between the site and the railway line. To the north and west the site adjoins the Thames Basin Heaths Special Protection Area, the mature trees of which form a readily recognisable boundary.

Salt Box Road links with the A322 (Worplesdon Road) to the west and with the A320 (Woking Road) to the east and both these roads enjoy good connections with the principal traffic route of the A3 to the south. There is convenient access for vehicles, pedestrians and cyclists to the Guildford urban area to the south and footpaths and cycleways provide a convenient route to Worplesdon railway station, some 2k to the north. Bus services, operating along the A322 (to the west), the A320 (to the east) and Grange Road (to the south), are convenient to the site.

The site is level, is not at risk of flooding (being within Flood Zone 1), is easily and conveniently accessible by all modes of transport and is readily and immediately available for development.

2. Removal of the land from the Green Belt

The Local Plan’s proposal to remove the land from the Green Belt in order to meet future needs is supported.

The site is not within the Thames Basin Heaths Special Protection Area or within any Sites of Special Scientific Interest, so the presumption against development applies only to its current Green Belt status.

The work that the Council has undertaken in the preparation of the proposed submission Local Plan has demonstrated that there will be insufficient land within the current built-up area to meet future needs over the next 20 years and that land for development will need to be taken out of the Green Belt to meet these needs.

The National Planning Policy Framework (NPPF) of March 2012 sets out the following policy approach to drawing up or reviewing Green Belt boundaries. At paragraph 84 it says that local authorities should take account of the need to promote sustainable patterns of development, and at paragraph 85 it asks local authorities to (among others):
• Ensure consistency with the Local Plan strategy for meeting identified requirements for sustainable development;
• Not include land which it is unnecessary to keep permanently open;
• Satisfy themselves that Green Belt boundaries will not need to be altered at the end of the development plan period; and
• Define boundaries clearly, using physical features that are readily recognisable and likely to be permanent.

Having regard to this national policy, I make the following propositions in respect of the land at Salt Box Road:

• The site is in a sustainable location, being immediately adjacent to the built-up area of Guildford, close to residential and employment development, conveniently served by the A320 and the A322 (both of which have good southward connections to the A3) and bus services and within reasonable distance from Guildford and Worplesdon railway stations, the latter by attractive pedestrian routes and cycleways;
• The development of the site as a burial ground would constitute a logical northward extension to the built-up area of Guildford;
• The site is not within the Thames Basin Heaths Special Protection Area or within any Sites of Special Scientific Interest, so there would be no objection to the development of the site as a matter of principle;
• The site would help to satisfy the Borough’s need for burial ground land over the plan period (and beyond) in a sustainable way;
• There is no need or reason why the land should be kept permanently open; and
• The boundary of the Thames Basin Heaths Special Protection Area (marked, in particular, by a line of mature oak trees around the site) would be a more logical and recognisable boundary to the Green Belt, particularly since the constraints to development of this protected area would ensure that the boundary would be permanent and accord with national policy on defining Green Belt boundaries.

3. Allocation for development

The Council needs land for burial ground purposes to meet future requirements. The land at Salt Box Road will help the Borough to meet these needs in a sustainable way. The allocation of the site under Policy A23 for a burial ground with a new site access and appropriate supporting facilities is therefore supported.

The development of the site for burial ground purposes would be appropriate here, given the proximity of residential development and the accessibility of the site. Moreover, it would not, in principle, be harmful to the Thames Basin Heaths Special Protection Area and would not be ruled out by the Avoidance Strategy.

Having regard to the Council’s allocation of the site for burial ground purposes under Policy A23, I make the following propositions:

• The site is an ideal one for burial ground purposes, being in a sustainable location, immediately adjacent to the built-up area of Guildford, close to residential development, conveniently served by the A320 and the A322 (both of which have good southward connections to the A3) and bus services and within reasonable distance from Guildford and Worplesdon railway stations, the latter by attractive pedestrian routes and cycleways;
• The site has an existing access from Salt Box Road via a service road at its eastern end. Whilst this could provide a secondary or emergency access, a more suitable access can be provided using the existing traffic light-controlled junction of Salt Box Road with Grange Road at the southern edge of the site. A photograph showing this potential access is appended to this letter;
• The allocation of the site as proposed under Policy A23 would assist in meeting anticipated needs for burial ground purposes over the plan period (and beyond); and
• The site is wholly owned by my clients and available for development

4. Ecological impact
Policy A23 states a requirement for a Habitat Regulations Assessment in connection with a future planning application.

A Phase 1 Habitat Survey has been undertaken to assess the likely impact of development on the ecology. The report of the survey and its findings were submitted with my earlier representations letter of 18 September 2014. The report concludes that the development of the site will be able to mitigate and compensate for all protected species and habitats found on site as long as the correct procedures are followed.

There can therefore be no justifiable objection to the proposed allocation of the site for burial ground purposes on grounds of ecological harm.

5. Summary

We support the removal of the site from the Green Belt and the allocation of the site for burial ground purposes under Policy A23 and we ask that what is said above is taken into account when approving the Local Plan for submission to the Secretary of State.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: grange.jpg (257 KB)
I wish to **OBJECT** to the Draft Local Plan currently under consultation as follows:

1. I object to the housing number – 693 homes per annum. This number is far too large and is based on a formula which the Council has declined/failed to reveal to the public for analysis and indeed even to its own Councillors. Any figures are of course already redundant given the Brexit result with its impact on population numbers resulting from lower levels of migration.

2. I object to the 693 housing number because constraints have not been applied to the number. GBC is 89% Green Belt and that alone should result in a significant reduction in housing numbers. Failure to consider infrastructure constraints (road congestion/lack of schools etc) is a failing in the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

a1 I object to the proposed housing sites in East Horsley as follows:

1. Ockham Road North – A39
2. Thatchers Hotel – A36 – already rejected following a planning application by GBC earlier in 2016

b1 I object to the insetting of West and East Horsley

c1 I object to the insetting of Ripley, West Clandon and Send

d1 I object to the creation of new Metropolitan Green Belt at Ash and Tongham – the farthest point within the Borough from London

e1 I object to the failure of the Council to consider ‘brownfield first’ as a policy. There are large swathes of brownfield/ previously developed land within Guildford Town

which should be considered for housing rather than office/warehouse development. Such land is very sustainable for housing in terms of local transport. Given modern

house building technology any flood risk can be managed successfully. I object too, to the lack of affordable housing included in the Plan.

f1 I object to the Borough’s Infrastructure Delivery Plan which lacks detail, is reliant on central government funding which is not confirmed and is merely an expensive wish

list

g1 I object to the Green Belt and Countryside Study. It is lengthy and inconsistent. for example regarding site allocation and the 5km zone for the Thames Basin Heath SPA

I support objections to the Local Plan made by West Horsley, East Horsley, Send and Ripley Parish Councils and by the Wisley Action Group. I support objections made by

West Horsley resident, Mr David Roberts

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Specifically within West Horsley I object as follows to:

1. Manor Farm – A38
2. Bell and Colvill – A37 – already rejected by GBC’s Planning Committee earlier in 2016
3. Land at Ockham Road North – A40
4. Land at East Lane – A41
POLICY A25

1. I object to the inclusion of Gosden Hill (A25) in the local plan. Gosden hill meets all the five requirements of the Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

POLICY A26

1. I object to the inclusion of Blackwell Farm (A26) in the local plan. The site is within the Green Belt and all constraints have been ignored. The site is owned by Surrey University which has permission to build 2000+ units of accommodation on campus but has failed to do so. Building on Blackwell Farm would be detrimental to the Surrey Hills AONB and adjoining AGLV. Given existing congestion in the locality on the A31/A3 the additional 200+ homes would make congestion/commuting intolerable and impact on Air Quality. (I have objected elsewhere to the Wisley (A35) Development. Blackwell Farm and Wisley are similar in need of protection from any development).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/580  Respondent: 8591169 / Michael Bruton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

w. Site Objection (A35) Three Farms Meadows (TFM) – former Wisley Airfield. I object to this site being removed from the Green Belt. The site was comprehensively rejected for housing by GBC’s Planning Committee earlier in 2016 and for a raft of very good reasons. Nothing has changed to justify the inclusion of TFM for housing development. Specifically TFM should be excluded because:

1. It is unsustainable and reliant on private cars
2. Unsustainable because of poor air quality on both housing and the SPA
3. Impact on the Surrey Hills AONB
4. Urban nature – a townscape/cityscape rather than a rural design
5. No infrastructure for the site
6. No promised funding from central government/SCC for required infrastructure
7. Impact of NOx and other carcogens on the potential residents and on the SPA
8. No consideration of the cumulative impact of the many other developments locally and on the expansion Plans of RHS at Wisley
9. Failure to consider protection of /impact on the historic properties within Ockham and the Chatley Heath Semaphore Tower

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

• I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

Comment ID: PSLPS16/7077  Respondent: 8591169 / Michael Bruton  Agent:
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I wish to make a supplementary submission regarding the proposed GBC Local Plan as follows:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
  4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
  5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
  6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity
• I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

• I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels (and in breach of the Air Quality Directive). Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

• I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air, and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

• I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) – where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I request that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

[re Policy A35]

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars

b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads

c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)

e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest

f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A42

1. I object to the development of Clockbarn Nursery (A42). The site has very restricted access along Tannery Lane. Tannery Lane is narrow and is already overused as a route to the local Business Park.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/581  Respondent: 8591169 / Michael Bruton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
x. Site at Garlick’s Arch (A43) – I object to this site for housing which would result in a loss of ancient woodland and impact adversely on the local infrastructure. It is too near to the congested A3 and will suffer from air pollution.

y. I object to the proposed SANG at Long Reach West Horsley as it would be used to support over 1000 additional homes in this small village.

z. I object to all proposed sites in West Horsley in excess of 5 homes. If approved there will be urban sprawl contrary to Green Belt protection – and a merging with all surrounding villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

| k. | I object that many of the sites proposed are in unsustainable locations as defined in the NPPF. |
| l. | I object to the assumptions in the Plan which projects a major shift to cycling and walking. This is highly unlikely given the absence in the Plan of adequate safe cycling lanes/walking routes – especially in rural areas. |
| m. | I object to the threat to relatively small villages of major housing developments. Such villages will be overwhelmed and will cease to be villages. |
| n. | I object to any villages being ‘taken out of the Metropolitan Green Belt’. The MGB is meant to be a permanent and open feature in itself and protected forever and for future generations. |
| o. | I object to the impact of excessive housing numbers in terms of increased traffic congestion on the M25/A3 and other A roads as well as on rural roads which are congested already and which will become even more used as ‘rat runs’ to the A roads. Small accidents already cause major hold ups on the A3/M25 in particular. There is no tolerance in the Plan for increased road accidents/road closures resulting from more traffic. |
| p. | I object to a failure in the local plan to consider the impact of increased traffic on parking congestion both in Guildford and the villages |
| q. | I object to the failure to consider adequate protection in the Plan for heritage assets in both Guildford town, the villages and countryside. |
| r. | I object to the failure in the Plan to consider environmental protection as a fundamental objective. |
| s. | I object to the failure to consider in the Plan the impact of 693 homes per annum on Policing requirements/crime prevention |
| t. | I object to the failure to consider the impact in the Plan on local GP surgeries and increased difficulty in securing doctor appointments. |
| u. | I object to the failure in the Plan to consider and plan for additional school places and how children will journey to these schools – especially at Three Farms Meadows in Ockham. |
| v. | I object to the proposal to build 70% of new housing on the Green Belt which is supposed to be permanent countryside for existing and current generations |

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Answer (if comment is on questions 1-7 of the questionnaire): (No)

Local Plan

I OBJECT to the revised/latest version of the Guildford Local Plan. I request that the following comments together with all my previous objection letters are passed to the Inspector. I reserve my right to appear at the Inquiry and to present my evidence in person.

In addition to my own objections I fully support those made by Mr Andrew Proctor, [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] of June 2017. Mr Proctor’s objections are thorough, detailed and well considered. I would like the Inspector also to view/be provided by Guildford Borough Council (GBC) with a video of the C4 Dispatches Programme of 10 July 2017 entitled ‘Secrets of Britain’s New Homes’. This programme explains well the fallacy of so called ‘affordable homes’ as included in any Local Plan and has particular emphasis on Guildford’s Local Plan and housing numbers within the Metropolitan Green Belt within Guildford Borough.

2/4

My own objections are as follows:

1. The GBC Regulation 19 Draft Local Plan is unsound and does not take into account my previous objections and the 30,000+ other valid objections made by others to the previous 2016 Local Plan version. I request written confirmation from GBC that my previous objections will be placed before the Inspector at the EIP.
2. I request that the current Draft Plan is amended taking into account all the objections and that this is reissued before its submission to the Inspector. I object to this version of the Plan being considered under Regulation 19.
3. 89% of the GBC area is Metropolitan Green belt. I object that GBC has adopted a lower but still inflated OAN of 12,426 homes without taking into account Planning Constraints as detailed in the NPPF and NPPG.
4. 70% of GBCs proposed new housing is destined for the Metropolitan Green Belt. The Conservative Government has promised to protect Green Belts and both Mrs May and Mr Javid assured the country that this was Government Policy. If the Inspector reads the local Conservative Election Manifesto for the last GBC Council Elections he/she will see similar assurances from Conservative candidates. The proposed Regulation 19 Plan abandons both central and local government assurances regarding the Green Belt. I object on the basis of assurance given.
5. There is a presumption v development in the Green Belt but no such presumption within Guildford Town. In the Plan there should be a much greater emphasis on urban regeneration and brown field development within Guildford Town for residential development. Only 10% of the new housing numbers are proposed for Guildford Town. Town development can be of a higher density but somehow GBC makes no mention of ‘density for development’ in its latest Plan version. Most potential sites are owned by GBC and the Council has the opportunity to develop more houses there if it chooses. I object.

The housing numbers proposed by GBC are based on a flawed SHMA. And GBC has steadfastly refused to reveal the basis for their housing formula. Why? Indeed the whole proposed plan is already out of date. Town centres are in decline as shopping patterns change. Footfall is in decline as the customer chooses increasingly to shop on line. GBC should reflect changes in lifestyle and shopping habits in their Plan. They have not. I object.

1. The role of any LPA is to be a protector of the environment. However with its property purchases GBC is appearing to become a developer landowner rather than a guardian of planning rules.
2. I object to the inclusion of the three major strategic sites as proposed. They are all sites of outstanding landscape characteristics reflecting the original objectives of the Metropolitan Green Belt – namely openness, the separation of towns/villages one from the other and stopping urban sprawl – particularly from London. The Green Belt in Guildford provides Londoners currently with beautiful countryside on their doorstep, That will be largely eroded if the Plan is approved. The three sites to which I object are Blackwell Farm, Three Farms Meadows(TFM) (the former Wisley Airfield) and Gosden Hill Farm.
3. I object also to the removal of villages around Guildford from the protection of the Green Belt/ revised village boundaries. Such villages as Send, Ripley, Ockham and East and West Horsley are and should remain self contained communities. They should not be subject to significant expansion/ a developer free for all.
4. I wish to comment and OBJECT in some detail to the proposed development of Three Farms Meadows (TFM) in the very small historic village of Ockham. Once the home of medieval philosopher, William of Occam and more recently in the 19Cy of Ada Lovelace, the computer pioneer. This site has already been rejected overwhelmingly in 2016 by GBC Planners and its elected Planning Committee when the Cayman Islands owners submitted an application for 2000+ homes there within the Metropolitan Green Belt. GBC has declined to reveal who is behind this application given its offshore status.

1. Why include a site again which was rejected on at least fourteen different grounds?
2. It is the least sustainable of the three strategic sites given its location and constraints. That does not make the other strategic sites sustainable!
3. It has no convenient public transport links despite claims by the applicant. It is adjacent to the A3, one of the most congested trunk roads in the county and by Jct 10 of the M25, the busiest junction on the M25.
4. The site is near the famous RHS Gardens at Wisley where congestion already occurs at peak periods, never mind general traffic congestion for much of the day on the A3/M25.
5. The proposed TFM development would overwhelm the facilities of East Horsley and the station car park there is already full most days.
6. The site would have a negative impact on the Surrey Hills AONB.
7. The local narrow lanes in the Ockham area are unsuitable for extra traffic. Cycling in the locality on these roads would be increasingly dangerous.
8. The site epitomises every reason and justification for the establishment of the Green Belt and should not be removed from it or damaged in any way.

9. I object to the fact that GBC has failed to apply Green Belt (GB) constraints to this site – such as GB itself, air quality, lack of infrastructure and protection of the AONB and the Thames Basin Heath SPA.

My OBJECTIONS to GBC’s revised Local Plan remain. The Council has ignored the well considered 1000’s of Objections. And it has spent vast amounts of taxpayer money in so doing. Its revised Local Plan remains unsound.

Answer (if comment is on questions 1-7 of the questionnaire): ()

How many homes does Guildford need, and why? It is clear that GBC have not convinced everyone that we need an annual target of 693 homes. However, I understand that GBC’s own analysis suggests that this could be factored down to approximately 360 homes achievable per year if Green Belt is an absolute constraint and no investment is put into A3 and other road improvements.

Will the decision to leave the European Union and the possible reduction in free movement of people have an impact on the OAN?

Answer (if comment is on questions 1-7 of the questionnaire): ()

The opening statement from the Leader of the Council reflects what most people in my constituency feel - that Guildford is a very special, beautiful place. Many of my constituents would also support: the desire to enhance and protect our natural and built environment; homes they can afford either to rent or buy; a good and vibrant jobs market; improvement in transport across the borough through increased travel options; preservation of our open spaces; enhancement of the river frontage in our town centre; and viable local shops. I would also highlight the importance of the Areas of Outstanding
Natural Beauty, the Green Belt, the Thames Basin Heaths Special Protection Areas and also some of our undesignated countryside which enhance people's lives. This is consistently recognised in the correspondence I receive although this is outweighed by the number of people who write to me because they find it impossible to find a home to rent or to buy.

Answer (if comment is on questions 1-7 of the questionnaire): ()

A town proud of its heritage and economic contribution should be building to the very highest design standards. I continue to be dismayed that whilst we have long and necessary arguments about the principle of building we fail to concentrate on the design of those buildings.

A town with so many constraints should not shy away from dense housing development. The often falsely accepted wisdom is that high density means poor development when the opposite can be true. Where we do have brownfield sites they should be used to the maximum: with good design, evidence shows the end result can be far more attractive, in keeping with the local environment and reduce the need for building in more sensitive areas and without taking the easy option of building upwards.

--------------------------

To ensure that the Local Plan isn’t a static document, design of our built environment should include the ability to gather information about how people's lives could be improved: noise, footfall, humidity, air quality, traffic congestion and where people go for their leisure time.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I hope GBC will anticipate societal trends and advancing technology. A great deal of work is being done with so called 'smart cities' to enhance people's quality of life and increase efficiency of services to lower cost. We should be looking at new materials that allow buildings to be built faster and cheaper than traditional forms of building. We should be setting standards to reduce the need for lighting and heating. These ideas need to be embraced in the final Local Plan.

There is a wealth of new technology being explored and in new forms, eg roads that can now be laid with solar panels to generate energy. I understand Greenwich is networking solar panels, energy from water (the Thames) and other sources as it becomes a test bed for smart city energy technology. This information can be used continually to inform and improve people's quality of life in every new building.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The redevelopment of the town centre is long overdue and there is an opportunity for GBC to be ambitious and visionary and inspire the people who live here, come here to work and those that visit. The town centre is currently designed around the traffic that goes through it and little is made of the river, the High Street or the views around. I would like to see GBC include some of these ideas and put more emphasis on enhancing the town for the future not simply doing more of the same.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would urge GBC to review areas of already developed land. The land around the Law Courts and Surrey Police headquarters is an obvious example where the buildings are unattractive and land is poorly used. Land at the Research Park and University is similarly not well used. Surface parking for instance could be decked, and interspersed with a mix of residential homes to rent or buy. The Plan does not explore these options in any detail. These sites should be looked at to maximise housing opportunities, enhance the built environment and improve land use – but without simply building higher.

The Local Plan does stress the need for protection of the Green Belt and I would restate the very high value local people place on this. So with these competing demands I welcome the 'brownfield first' approach to building, such as the regeneration project at Slyfield. Green Belt land, particularly where it abuts AONB, is particularly sensitive. I would highlight in particular the planned development at Blackwell Farm and the impact on the AONB and the Green Belt. I would draw particular attention to the statement in the NPPF where it says, “Green Belt boundaries should only be altered in exceptional circumstances”. I do not feel that this case has yet been made. However, there may have to be some Green Belt encroachment where there is local support in order to meet local housing need.

I congratulate Guildford Borough Council on producing a much improved Local Plan with a positive approach to the future of Guildford. We need more homes. We must drive developers and those that own land to maximise brownfield development and thus to protect the countryside as far as possible. As I have done before, I will continue to lobby Government for vital investment in infrastructure as, without this money, the number of homes we can build will be constrained.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy A26 – Blackwell Farm - Serious consideration needs to be given to the engineering solutions necessary to maintain the fragile balance of water in the area. If this is not addressed, it will have a damaging impact as far away as Whitmoor Common.

I draw the Council’s attention in particular to the very useful work by Worplesdon Parish Council which they will have submitted separately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Policy A59 – new station at Park Barn – it is excellent now to see specific policy relating to this, but there is some local resident concern about how kiss and ride’ provision only will be managed; not providing car parking does not prevent train users arriving by car and seeking somewhere to park.

I congratulate Guildford Borough Council on amending the Local Plan to reflect local concerns and the continuing positive approach to the future of Guildford. We need more homes. We must drive developers and those that own land to maximise brownfield development and thus to protect the countryside as far as possible.

I will continue to lobby Government strongly for vital investment in infrastructure as, without this money, the number of homes we can build will be constrained.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4.5.8a – The addition of this paragraph on broadband echoes the efforts I have made over a long period to help constituents in no-spots, some of them in surprisingly urban areas. It is crucial that any land required for base stations or other communications equipment is safeguarded

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/3361  Respondent: 8591329 / The House of Commons (Anne Milton MP)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy D4 – I am delighted to see the considerable detail added to this section of the Plan. This reflects what I said in my response to the previous consultation, that in debating what should be built where, we often lose sight of the importance of excellent design.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/3360  Respondent: 8591329 / The House of Commons (Anne Milton MP)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E5 – I am pleased to see reinforcement of the need to keep our rural shops and services.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Accessibility – Policy H1 states 10% but at 4.2.4 and 4.2.10 the figure is 15% - higher is better for people with disabilities, but figure needs to be consistent to be effective.

Local residents, particularly in areas close to the University, continue to raise concerns about the need for more on-campus accommodation and pressures on the HMO and other rented property market in the town.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

H2 - Affordable homes – is it strong enough to use ‘seek at least 40% of the homes on these sites as affordable homes’ to replace ‘must be affordable homes’ (as in previous wording)? Does the new wording reduce enforceability? I also prefer to see the term ‘homes which are affordable to rent and to buy’.

Flooding – I was pleased to see at 4.3.39 the clarification of approach to Flood zone 3 designation. Flooding remains a significant issue in and around Guildford, and led to the establishment of 5 flood forum groups which I chair in my constituency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy ID1 – Again, the strengthening of the need for infrastructure to precede or accompany development is excellent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/3363  Respondent: 8591329 / The House of Commons (Anne Milton MP)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy ID3 – An imaginative approach to planning for car ownership and use is essential, particularly in town centre locations, and the changes to this policy and supporting text appear to go some way to achieving this.

I would like to see reference to cycling provision (particularly safe storage facilities) strengthened even further. Building car-free development will continue to have an element of aspiration until public and alternative transport is of excellent quality.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/3357  Respondent: 8591329 / The House of Commons (Anne Milton MP)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Vision and objectives

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I recognise that consultation is limited to changes made to previous strategy and sites document. My constituency includes the majority of Guildford Borough, but does not include Ash, Ash Vale, Tongham or most of Normandy, and my comments will not cover changes to policies or sites in those areas.

The opening statement from the Leader of the Council reflects what most people in my constituency feel - that Guildford is a very special, beautiful place. Many of my constituents would also support: the desire to enhance and protect our natural and built environment; homes they can afford either to rent or buy; a good and vibrant jobs market; improvement in transport across the borough through increased travel options; preservation of our open spaces; enhancement of the river frontage in our town centre; and viable local shops. I would also highlight the importance of the Areas of Outstanding Natural Beauty, the Green Belt, the Thames Basin Heaths Special Protection Areas and also some of our undesignated countryside which enhance people's lives. This is consistently recognised in the correspondence I receive although this is outweighed by the number of people who write to me because they find it impossible to find a home to rent or to buy.
Transport: In Policies BT5 and BT6 it is good to see bus schemes added for significant bus networks serving Gosden Hill Farm and Blackwell Farm proposed sites respectively to match additional requirements for their site allocation policies.

2.13 – I was pleased to read additional emphasis on the needs of cyclists and at 2.14a/b on transport infrastructure needs

Extension to Surrey Research Park – although slightly reduced, if this comes to fruition, the land allocated must be used for maximum result, and therefore better planned with better land use than the original Research Park development.

Redevelopment of the land used for surface parking must be considered. The University campus and the Research Park are attractively designed but with such a high demand for housing in an area close to the AONB and Green Belt it would be negligent not to re-consider the land use at both these locations

I am pleased to see town centre increase in number of flats, and I would reiterate what I have said before about increased town centre housing.

At 4.1.9a I support the strengthened need for a dependent link between delivery of necessary infrastructure and delivery of housing.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to A42. Tannery Lane has already been designated for the development of a marina which will put more traffic on a narrow road. There is inadequate access to the proposed site for 45 houses and the increase in traffic will cause more burden on Send Road which is frequently solid with cars.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7196  Respondent: 8591521 / Mark Daniell  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A43. This will place a strain on local services including schools, doctors, roads and hospitals. We have not the infrastructure to support such an increase in road traffic. Send is regularly over stretched by busy traffic with queues of traffic a very common problem.

Additionally I object to the use of country side to be used for the proposed development. This will threaten natural habitats.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7197  Respondent: 8591521 / Mark Daniell  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A44

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A44. Send Hill is an extremely narrow road and access onto Potter's Lane is difficult. Putting more cars on this road would cause extra problems and the risk of accident. I also understand that the land is previous landfill and is unsuitable for residential use. Again I am concerned that our schools and other services will be put under strain by this development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

| Answer (if comment is on questions 1-7 of the questionnaire): () |

I object to A25 and A35 with the creation of up to 4000 homes. This increase in population will create a huge burden on local services and I question why this area should be used to meet more than its fair share of the new housing quota GBC need to build. Every evening the A3 is solid with traffic queuing to reach Guildford. This would worsen if the houses proposed are built. Such an increase in population would also lead to excessive traffic on subsidiary roads, including Send Road which regularly grinds to a standstill following RTAs on the M25 or A3. We cannot support the loss of working hours etc this would cause and the subsequent affect on the local economy not to mention quality of life.

After the housing numbers have been revised downwards, the entire approach to planning in Guildford Borough ought also to shift. I have in the past publically called for a planning strategy which focuses more on higher rise development in the centre of Guildford itself if in doing so the historic very central portion of Guildford must be respected. Such developments have a number of advantages, they constitute a far more effective use of land than new builds in rural Green Belt, they are far more likely to be well linked to existing infrastructure, they will be more energy efficient and perhaps most importantly I believe that such development would also be more in line with what future Guildford residents would be looking for in a place to live as opposed to smaller clusters of houses out in the Green Belt, further away from Guildford's amenities and rail links.

The position or central government with regard to local planning and development on the Green Belt is clear. Residents have heard in the past comments to the effect of 'it is the government in Westminster which is forcing us to do this …' This was not true then and it is not true now. I have met with Ministerial colleagues on multiple occasions and corresponded with the Department for Communities and Local Government at length on the questions of Local Planning and Green Belt policy. The Conservative Government is absolutely committed to Green Belt protection, I would urge the leadership and planners at Guildford Borough Council to closely study both the National Planning Policy Framework (NPPF) and the various Ministerial statements published on this topic. The only message one could draw from these needs re-emphasising. There is nothing in national policy which supports, encourages or condones any development on the Green Belt save for the most exceptional - and housing need is acknowledged as not falling into this category.

In addition to the Green Belt issue, I do not believe it is appropriate to propose developments in the green belt, dependant upon large and expensive road infrastructural developments. With the present economic outlook, especially with Brexit looming ahead these are most unlikely to be fulfilled. Whether we take the ill-conceived plans for thousands of
houses at Gosden Farm in West Clandon, at Wisley or Garlick Arch there is a clear lack or foresight where the reliance on such suggested infrastructure will produce planning blight on surrounding areas. This statement is true in the context or not only roads but sewerage or local services such as hospitals and school places.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As the Mole Valley M P with a num ber of G uildford Wards in my Constituency I m ust acknowledge the great effort made by many thousands or Gui ldford Borough residen ts i n contacting the Council and object ing to the latest draft of the Loca l Plan. This di l igence on the pa rt of people determi ned ro protect the u nique environment i n which they live and work is heartening and encour aging to me as someone who has long campaigned on and fought for Green Belt protection. The pro portion of ptotected land i n these wa rd s is of considerable signilicancc.

I will not be addressing in great detail those many individual sites and proposals contained within the draft Local Plan which arc highly contentious. I ha ve read ma ny subm issions from constituent s wh ich do this perfect ly effectively and I endorse and agree with these objections. The accum ulation of t hese object ions prod uces a pic tu re in w hich residents or the Mole Val ley Wa rds of Guildford Borough are united in opposition to what i s proposed in the draft Local Plan - if any resident has written in support of the current draft I am not aware or this! I submit that a Plan which has drawn such an utterly negative response, even compared to the much revised 2014 draft, cannot be legitimate and must be withdrawn and reworked.

A reworked Plan would not simply be a matter of slightly altering some bound aries or numbers - at this stage it must constitute a wholesale realignment of thinking and direction of travel on the part of Guildford Borough Council. Central to this would be the Council acknowledging that the present figures for predicted future housing need, around which much or this Local Plan hinges, are currently too high and in light of the particular situation in Guildford Borough (the prevalence of Green Belt land) they must fight as hard as is needed to have these numbers brought down. In this they would have my full support and that of the huge majority of concerned residents.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The approach to the plan should be to proceed on the acceptance that it has proved possible to persuade the Government Inspectors and hence the Government that because of the protections on such a huge proportion of Guildford Borough a lower target of housing numbers is acceptable. I personally believe and hope that the new leadership or GBC is more open, more receptive to new ideas and more creative than that which came before and that it is with the capacity or the council to craft a genuinely successful plan - but only if lessons are learnt and a genuine acceptance of the need for a change or direction guides council thinking from this point onwards.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to make a formal objection to the Guildford Local Plan 2016 under the public consultation.

The whole consultation appears to be based on figures which have been kept secret from the public, so how can there be any transparency in the whole process? The first line of Policy P2 states “we will continue to protect the Metropolitan Green Belt against inappropriate development” and then the policy looks at totally changing the green belt boundaries and a massive and inappropriate development therein, so there is an initial and gross contradiction in the plan.

Much use is made of the word sustainable in the local plan. My Oxford English Dictionary gives the meaning as “which conserves an ecological balance by avoiding depletion of natural resources or that can be sustained” Please advise how once green belt land is built upon, how it can be sustained? Answer is it can’t – once the green belt is gone it’s gone for ever. If there is going to be a massive growth in population how is the increased population going to be fed if agricultural land is built upon? Besides the recent referendum vote for Brexit from the EU must cast doubt on many of the assumptions made for population and employment forecasts.

I object to the removal of West Horsley from the green belt by the extension of the 2003 Local Plan Settlement boundaries – there is no justification for this extension.

The alteration of the green belt is only allowed under “exceptional circumstances” and these have not been demonstrated in the plan – the inclusion of more housing to meet an unproven need is not an exceptional circumstance – I therefore object to this alteration.

There is no expansion of many local facilities and infrastructure commensurate with the proposed addition to the total housing numbers. The roads in West (& East) Horsley are already very busy, very badly maintained, mostly unlit and with very poor drainage, again with little or no maintenance. There is a drain in School Lane which is full of silt and has been for the 8 years I have lived in West Horsley. The building of more homes with drives and paved areas will only exacerbate...
the problem and result in greater water run off every time there is rain. Ripley Lane is impassable except by boat after any heavy rain, so how is more traffic in the area going to be able to use it?

The expanded village will not have the infrastructure to support it. There is now no Newsagent or Post Office, and the only other village shop is due to close in the autumn. There is a very limited bus service through the village on weekdays only. The medical centre is in East Horsley and is already at capacity. Existing residents must perforce use their cars to travel to East Horsley for the shops or railway station. This is without the massive increase in housing numbers planned. The village schools are again full and there is no mention in the local plan about new schools to cater for the likely increased demand.

The proposed housing developments are at a much greater density than the existing housing. Current small scale developments have to be in keeping with the area & street scene, so why are new ones on such a higher density?

What West Horsley does need, and has been proven is about 20 affordable homes. This was proven by The West Horsley Parish Council Housing survey and local plan in 2014. All that does get built in the area are 4 and 5 bedroom executive homes, usually following the demolition of a perfectly useable smaller home, which brings in a 2 (or more) car family placing extras strain on the village infrastructure. The WHPC survey indicated that there is little scope for older people to downsize, or for starter homes for children born and brought up in the village.

The whole process is very undemocratic and GBC are simply ignoring the wishes of the local population. The plan has been re-issued in virtually the same format as the previous one, and all previous objections have been ignored in the current consultation. It appears to be a copy of the strategy of the remain camp from the Brexit or Scottish Independence referenda – if you don’t achieve your desired result, try again until you do.

**I therefore strongly object to the 2016 Local Plan**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to formally object to the Guildford Draft Local Plan 2017 as far as it affects West Horsley.

While the reduction in the number of new homes is an improvement it does not go far enough in reducing the very large number of proposed houses proposed on Green Belt land. No development should be permitted in Green Belt land.

The plans make it a disproportionate number of homes which are intended to be placed in the eastern side of the borough and in Green Belt land.

Guildford BC is not choosing to constrain its overall housing growth, which is out of line with what other councils are proposing, and the proposed growth is nearly 25%, which is far in excess of what the Office for National Statistics are predicting for the growth of Guildford.
There has been nothing new put forward since last year's consultation to improve the sustainability of the West Horsley development sites and to thus meet national policy requirements. The intended development will place an inordinate strain on the local road network which is already very badly maintained for the current traffic, let alone any proposed increase.

GBC are still using flawed evidence to justify the overexpansion of West Horsley, and all the neighbouring areas.

There is a requirement in Guildford for more apartment style properties, not retail shopping space.

I object to the fact that no changes are being proposed since the 2016 consultation to the insetting of West and East Horsley from the Green Belt.

I also support the arguments put forward by the Wisley Action Group against the development of the proposed new town on the old Wisley airfield sites, for all the reason that they have put forward.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT

There are effectively two separate parts to this policy, both are flawed, and in the case on insetting, fatally flawed. In the case of urban development there are numerous flaws, including:

- The plan envisages that 40% of homes built will be affordable, but this does not provide any accommodation for low paid workers, for example, those on the minimum wage, who cannot afford to buy “affordable” homes, nor can they pay the so-called “affordable” rent. There is a need for some expansion in social housing, especially in urban areas, where there is a greater concentration of low paid workers such as those employed in the retail, warehousing and distribution sectors.
- The number of homes planned in the urban area is too low – there is a need for regeneration in some areas, but this is ignored and instead the plan concentrates on building homes on green field sites, which does not meet the needs for housing within the town, especially with the centre. This is not a sustainable policy as building outside the town has a disproportionate effect on road traffic.
- The plan envisages a large expansion of the traditional “bricks and mortar” retail sector, but this is a sector in long term decline.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT.

There should be much more residential use of the town centre. Online shopping patterns would suggest that there is limited need for further retail space, which will use valuable land inefficiently and further increase traffic congestion in the town centre. There is an urgent need for a brownfield register and to focus on brownfield redevelopment before considering development outside the existing urban area. CIL strategy must promote brownfield redevelopment.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Students:

The University first undertook to achieve a 60% target in 2003 (Manor Farm Master Plan (2003), Section 5.2) when it lobbied to have Manor Farm released from the Green Belt and has so far failed to achieve it, and so monitoring of their performance is crucial.

It is particularly of concern that the University has consent for campus accommodation that has not been built and that it developed the veterinary school on the site of a proposed accommodation block which could have been sited elsewhere. Over 7,500 university students are estimated to live in private rented homes within the town and this is likely to increase with the opening of a medical, veterinary and business school. This represents a large number of more affordable homes that could potentially be made available to the wider community if the university had more accommodation on their own campus.

I OBJECT

Various aspects of Infrastructure are acknowledged as congested, inadequate for the existing population and not able to accommodate much growth. However, greenfield sites – requiring heavy infrastructure investment – are targeted in order to generate CIL income for the council. This is not sensible. The current draft CIL scale also encourages development on greenfield sites rather than brownfield.

The Council’s methodology assessing traffic and roads infrastructure needs is inadequate. It identifies only the tip of the iceberg in terms of existing congestion. Looking at local traffic situations around the Borough it becomes clear that the schemes proposed will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed locations would require highway schemes that involve demolition of property and road-widening in residential areas to solve the resultant congestion. The A3 improvements are not guaranteed to take place but they are being used to justify removing large areas from the Green Belt before detailed traffic assessments have taken place. These detailed investigations are being deferred until the planning application stage and will be left to developers to prepare. If a site then proves to be unsustainable its Green Belt protection will have been lost for no reason and unsuitable development will take place by a more insidious process.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT

This policy is concerned only with the strategic road network – the A3 and M25 for which the responsibility and decision-making lies with Highways England. It is only reasonable that the council will work closely with Highways England to ensure that the Local Plan does not utilise land in a way that limit the scope for future improvements.

However, the proposals for the A3 are undecided and the council has suggested a very expensive tunnel proposal that, even if HE decided to go ahead with it, is unlikely to be delivered until the end of the plan period. Less expensive alternative A3 improvements are not planned to be implemented until 2026 and would not be delivered before implementation of the current draft Local Plan. These road improvements are likely to lead to massive disruption to traffic during the construction phase on top of an already overloaded road network. It would be folly to allow any development on strategic sites dependant on access to the A3 until completion of the A3 improvements. The only logical conclusion is that a very significant traffic constraint should be applied to the OAN for this Local Plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to this policy. It does not mention the need for permanence of Green Belt boundaries (NPPF para 79) nor does it define the exceptional circumstances required to change Green Belt boundaries (NPPF para 83).

The GBC topic paper on housing claims that the decision by Bath & North East Somerset Council to build on the Green Belt justifies a change of Green Belt boundary in Guildford to allow domestic and other building. The scale of building proposed in the Green Belt at Guildford is vastly greater than at Bath and the strategic sites in Guildford can hardly be described as “highly sustainable”.

The analysis of Green Belt in pages 52 and 53 is wholly inadequate as a basis for review of Metropolitan Green Belt around Guildford. A far more strategic assessment is required, especially given the recent letter from the Planning Minister that “unmet housing need alone” is unlikely to justify housing development in Green Belt.

The Green Belt and Countryside Study remains deeply flawed for the following reasons and should be withdrawn:

• Not based on an overall strategy view of how the borough should develop. It is piecemeal in approach.
• Unacceptable definition of sustainability – it is used simply to mean proximity to facilities
• Does not recognise the “very special circumstances” required for Green Belt development or the even stronger protection for the AONB.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

For the avoidance of confusion, this policy should set out the specific policies that restrict development as set out in the NPPF e.g. the Birds and Habitats Directive, SSI, Green Belt and AONB.

The section on “Monitoring Indicators” should state that the Monitoring Report will cover all three aspects of sustainable development as set out in the NPPF i.e. economic, social and environmental. Currently it focuses on the provision of additional housing and employment land. It should also cover:

- A regular assessment of the ability of the local infrastructure to cope with the increased development (housing and commercial development).
- An environmental impact assessment of new development to check that this was as planned
- Reductions in targeted housing and employment land if new demographic and other studies indicate lower growth than forecast.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to this policy.

The proposed housing target is a more than doubling of the target since the Local Plan adopted in 2003 and is not supported by the evidence.

According to the 2012 Based SNPP, taking into account natural causes (births and deaths) and movement within the UK, the population of Guildford is projected to decline over the next twenty years. The entire increase in population is due to
net international migration of which, according to the ONS, 57% are overseas students who would normally be expected to return home or move away from Guildford on completion of their studies.

Moreover, the Household Projections are distorted by the very high proportion of young people in the population of Guildford due to the fact that (1) Guildford is a university town and (2) the permanent address of students is taken as being their term time address. Students are therefore taken as permanent residents of Guildford whereas in reality they move away from Guildford on completion of their studies. According to the Alumni Team at the University of Surrey, only 9% of former students live within the GU postcode.

Answer (if comment is on questions 1-7 of the questionnaire): (No)

**The West Surrey SHMA** which determines the "objectively assessed need" for Guildford is flawed for the following reasons:

**517 houses per annum to accommodate Demographic Indicators**

- The starting point in establishing housing need due to “demographic indicators” is the SNPP. G L Hearn claim that the 2012 Based SNPP is a robust starting point because it shows a level of population growth that falls roughly in line with a 12 year trend to 2013. The 2012 Based SNPP predicts the population of Guildford to grow to 161,300 by 2031. In actual fact, the linear trend based on 2001-2011 predicts a population of about 156,000, a difference of 5,300.

- The ONS 2012 Based SNPP is significantly distorted by an unusual increase in the number of overseas students attending the University of Surrey between 2006 and 2011. This is clearly demonstrated in a number of figures and tables in the report (see Figure 15 on page 50; Table 17 on page 51; Figure 18 on page 53). To establish its projections, the SNPP only looks back over the previous five years. The 2012 Based SNPP is therefore based on population trends between 2006 and 2011, a time which saw the number of overseas students at the university increase by 35% and full time students increase at a rate of 700 per annum.

- If you consider natural growth (births and deaths) and net internal migration (movement within the UK), the 2012 Based SNPP forecasts the population of Guildford to **decline** by 1800 by the year 2031. Therefore the overall projected increase in Guildford’s population to 161,300 in 2031 is entirely due to the projected growth in net international migration of 23,100, of which, according to the ONS, 57% are foreign students who would normally be expected to return home, or move away from Guildford, at the end of their studies.

On page 190 in the SHMA, there is an assertion that overseas students only make up 6% of overall migration. According to the ONS, an analysis of indicative immigration estimates by broad stream (mid-2006 to mid-2010) estimates that the student stream is 57% for those years. Currently 37% of all students at the university are overseas students.
On the 1st December 2015 George Osborne announced that foreign students will no longer be counted as immigrants. The chancellor said that the public is concerned only about “permanent” migrants. “The public’s concern is about permanent migration, people permanently or for many years coming to live in the country. Students come and go.” Daily Telegraph 1 Dec.

- International Immigration is based on International Passenger Surveys (IPS) which are carried out only at the border (seaports, airports, channel tunnel). The intentions of immigrants are highly approximate being based on voluntary face to face interviews on only a sample of passengers. IPS data is therefore not reliable enough to be used at Local Authority level. Estimates of net international migration at Local Authority level are therefore based on (1) the number of migrant workers or students applying for a National Insurance Number (2) data from the Higher Education Statistics Agency (HESA) and (3) data from the NHS Patient Registration Data Service. Unfortunately this data does not accurately record when students return home or move away from Guildford as students often neglect to inform their GP, which explains why emigration is often under reported.

- Un-attributable Population Change (UPC) is essentially the difference between the forecast population and the actual population as recorded in a census. In Guildford the UPC ran at -717 per annum between 2001 and 2011. The population in Guildford was significantly lower as measured in the 2011 census than had been forecast. It is assumed that this is due to the under reporting of foreign students returning home. Nevertheless, in their “sensitivity tests”, G L Hearn has declined to make any adjustment for UPC. According to Table 22 on page 68 the housing need for Guildford would be reduced to 239 houses per annum if UPC were applied.

- The figure on page 183 Appendix B demonstrates that Guildford has an abnormally high proportion of people in the 19-25 age bracket (students) which is to be expected because Guildford is a university town. While this has an impact on internal out-migration, it has a major and disproportionate effect on projected household formations because the 2011 Census measured the term time address of students as being their main place of residence with the assumption that the majority settle in the area and become heads of households, when in reality, being students, they are more likely to return home or move away from Guildford at the end of their studies. According to the Alumni Team at the University of Surrey, only 9% of former students live within the GU postcode, of which a high percentage are likely to have been brought up in the area anyway.

- The figure of 517 houses per annum to accommodate demographic indicators appears to be based on the Figure of 496 taken from the 2012 Based Household Projections (see Table 20 page 66) multiplied by a factor of 104.2% to allow for occupancy levels for Guildford based on the 2011 Census (unoccupied houses recorded as being 4.2% of total housing stock). The NPPG clearly states that vacant properties should be deducted from housing targets.

25 houses per annum to accommodate Students

- In the report, the justification for adding an extra 25 houses per annum to the OAN to cater for students is because “the University of Surrey expects stronger growth in student numbers going forward than occurred during the period on which the SNPP is based”. In paragraph 4.79 page 72 the report states that “the 2012 Based SNPP is based on population trends between 2006/7 and 2012”. However we have already seen that the period between 2006/7 and 2011 was a time which saw an unusual increase in the number of students attending the university. Table C3 on page 187 shows that the number of students attending the university increased from 10,000 in 2006/7 to 13,500 in 2011/12, an increase of 3,500, which represents an increase of 700 per annum, which is very much higher than the 315 per annum increase the university forecasts from 2013 to 2033. This is also at variance with the University’s published Estate Strategy which states that they plan to grow at 2% per annum. There is therefore no justification for building 25 extra houses per annum to house students. In any event, surely the University has a responsibility to provide adequate student accommodation on campus to reduce the demand for affordable housing in the town. Out of a full time student population of 14,000, there is only provision for 5100 student bed spaces on campus.

How are students counted?

The way students are counted has always been an issue. In the 1991 Census, students were treated as living at their home address. In the 2011 Census, students were counted as being usually resident at their term time address. Overseas students, who had no usual address in the UK, were counted as usually resident in their halls of residence regardless of how long
they intended to stay here. This has a distorting effect on the proportion of young people in Guildford and exaggerates projections for household formations.

How is the movement of students monitored?

Internal migration is monitored by (1) the number of migrant workers or students applying for a National Insurance Number (2) data from the Higher Education Statistics Agency (HESA) and (3) data from the NHS Patient Registration Data Service. Unfortunately this data is unreliable in recording when students leave an area because either they fail to unregister from their GP or, when moving abroad, fail to notify the Department of Work and Pensions. The ability to monitor people intending to move away from Guildford to live abroad (overseas students returning home) is even more fraught with difficulties.

120 houses per annum to support Economic Growth

- In the West Surrey SHMA, economic growth for Guildford is taken as 0.9% per annum being the average of three studies (Cambridge Econometrics Employment Projections; Experian UK Local Market Forecasts; Local Authority District Forecasting Model by Oxford Economics). Assuming only one person in employment per household, surely any increase in the supply of housing in excess of 0.9% would more than accommodate the needs of economic growth. One could argue that this is therefore double counting and there is no justification for an additional 120 homes.

- In any event, the impact of economic growth (or decline) for a particular area must be reflected in both the Census and in population projections based on past trends. Therefore the ONS SNPP must already reflect the effects of economic growth. It is therefore misleading and incorrect to make additional allowances in housing need to accommodate economic growth. Economic growth cannot be forecast with any degree of certainty as it depends on so many variables.

31 houses per annum to promote Affordability

- The supply of housing is actually regulated by economic factors, not simply the release of more land. Developers will only build in a rising market when they can afford to borrow money to build and buyers can afford to borrow money to buy - and crucially - when profits are guaranteed. Consider Ebbsfleet in the Thames estuary, where the government announced plans to build a new “garden city” to provide 15,000 new homes. So far, despite the availability of land, only 100 homes have been built.

- Nor will releasing vast areas of the green belt guarantee to increase the supply of affordable housing. Indeed one could argue that greenbelt land is more likely to generate low density high value housing rather than affordable housing. According to a recent report, the biggest house builders in the UK currently have enough land to build more than 615,000 new homes, equivalent to three years housing supply in the whole of the UK.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)
I consider the Proposed Submission Plan to be **unsound** because it ignores guidance in the PPG regarding the use of constraints, bearing in mind that 89% of the borough lies within the Metropolitan Green Belt.

Specifically

**Paragraph: 044 Reference ID: 3-044-20141006**

Do housing and economic needs override constraints on the use of land, such as Green Belt?

The Framework is clear that local planning authorities should, through their Local Plans, meet objectively assessed needs unless any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the Framework taken as a whole, or specific policies in the Framework indicate development should be restricted. Such policies include those relating to sites protected under the Birds and Habitats Directives, and/or designated as Sites of Special Scientific Interest; land designated as Green Belt, Local Green Space, an Area of Outstanding Natural Beauty, Heritage Coast or within a National Park or the Broads; designated heritage assets; and locations at risk of flooding or coastal erosion.

The Framework makes clear that, once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan.

**Paragraph: 034 Reference ID: 3-034-20141006**

Can unmet need for housing outweigh Green Belt Protection?

Unmet housing need (including for traveller sites) is unlikely to outweigh the harm to the Green Belt and other harm to constitute the "very special circumstances" justifying inappropriate development on a site within the Green Belt.

Revision date: 06 10 2014

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

The West Surrey SHMA is unsound in two significant ways because (1) overseas students, who are only here on a temporary basis to study, are included in statistics for net international migration which has an inflationary effect on population projections for Guildford and (2) because the term time address of students is taken as their permanent place of residence, the population of Guildford appears to have a very high proportion of people in the 18-24 year age bracket who are assumed to have a high probability of forming new households and settling in Guildford.

The 2011 Census recorded a population for Guildford significantly less than had been forecast. The ONS suggested that this discrepancy (referred to as Un-attributable Population Change or UPC) was probably due to the under-reporting of overseas students returning home. This discrepancy is so significant that, if an allowance for UPC had been applied, the housing need for Guildford to accommodate demographic indicators would be reduced to 239 homes per annum as opposed to 577 homes per annum in the current Local Plan. This problem would be resolved if overseas students were removed from statistics for international migration on the basis that they are only here on a temporary basis to study.

In the 2011 Census, the term time address of students was taken as their permanent place of residence. This means that Guildford appears to have a very high proportion of people in the 18-24 year age bracket who are assumed to have a high probability of forming new households and settling in Guildford when in reality students move away from Guildford at the end of their studies. This problem would be resolved if, for the purposes of projecting household formations, the home address of students should be taken as their permanent place of residence.

Finally, students generally should not be included in statistics for calculating housing need. Students need student accommodation, not housing. One of the problems we have in Guildford is that, because the university has not built enough Halls of Residence, students occupy an estimated 2500 affordable houses in Guildford which are therefore no longer available for key workers such as council employees, hospital employees, teachers, shop assistants etc. At the moment the university only provides accommodation for about 35% of their full time students despite a requirement in the 2003 Local Plan that they should provide accommodation for at least 60%. The University should be required to provide more student accommodation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 6: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)
There should be a firm requirement for all future residential development to be concentrated in existing urban areas or settlements before any development is allowed within the green belt. For example, there should be a much greater allowance for housing in the North Street Development and an appropriate amount of housing assigned to the Telephone Exchange site which currently has none. Moreover, no development should be allowed on any of the Strategic Sites in the green belt until improvements to the A3 and all supporting infrastructure are in place.

Because, once the Local Plan has been adopted, the council will be tied to a commitment to deliver a certain amount of housing within a stated period of time, the council should consider introducing penalties for developers who leave urban areas derelict, or buildings unoccupied, for long periods of time.

Normandy Parish Council strongly objects to the Guildford Borough Proposed Submission Local Plan: Strategy and Sites ("Local Plan") and in particular to the allocation of land south of Normandy and north of Flexford for substantial development.

**In principle objection to development of this site**

The Parish Council opposes the principle of the development of this site:

1. The site lies within the Green Belt, and has been assessed by Guildford Borough Council (GBC) as having high sensitivity in Green Belt terms, serving to check the southward sprawl of Normandy and northward sprawl of Flexford, preventing the merger of those settlements, and safeguarding the countryside from encroachment (see Green Belt Purposes Assessment, April 2014). Accordingly, given the very significant contribution made by the site to the Green Belt in this area, it should not be developed.

2. The development of the site would not amount to sustainable development within the meaning of the National Planning Policy Framework. GBC's claim that the approach would be sustainable fails to attach any or any meaningful weight to the environmental aspects of sustainability.

3. The proposed allocation has not been the subject of any proper assessment of highways impacts. The local road network is incapable of coping with the proposed scale of development and there is no evidence that the necessary highways improvements are feasible or deliverable within the plan period.

4. The site lies within 1 km of the Thames Basin Heaths Special Protection Area and accordingly requires substantial provision of alternative green space as an avoidance strategy. Preferable sites for development elsewhere could be delivered without such provision.

The development of this site would significantly affect Normandy and the surrounding area and has not been justified in the Local Plan or in the supporting documents. In addition to the principled objections to the development set out above, the
Parish Council considers that there have been substantial flaws in the plan-making process to date which go to both the merits and legality of the Local Plan.

Specific criticisms of the plan making process

A sound plan must be based on proper evidence and consistent with national policy. To be lawful, the plan must be promoted on the basis of a proper analysis of the environmental impacts of policies together with an assessment of reasonable alternatives (see Environmental Assessment of Plans and Programmes Regulations 2004/1633 and e.g. Calverlon PC v Nottingham City Council [2015] EWHC 1078 (Admin), per Jay J at (67)).

The history of the Local Plan is known to GBC. The Parish Council wishes to emphasise that in the 2014 plan, it was not proposed that this site be allocated for development. Since then, there has been no further Green Belt review, but there has been a Green Belt Purposes Assessment which identified this site as particularly sensitive in Green Belt terms.

There is no explanation in the published documents of the "exceptional circumstances" (NPPF, 80) that are said to justify release of the site from the Green Belt. The Green Belt Capacity Study does not explain why such exceptional circumstances exist, and nor does the Sustainability Appraisal ("SA"). Extraordinarily, the SA states that the development of the site is regarded as a "given" (6.3.16). The SA acknowledges (in footnote 68, p 131) the greater impacts on the Green Belt in developing sites such as this, but does not explain why such development is nonetheless justified on both environmental grounds and by reference to the exceptional circumstances test.

The SA is open to further criticism through its failure to accord any weight to the Green Belt in analysing various options. This is a significant deficiency which renders the SA unsound and indeed unlawful, since the alternatives are not subjected to proper analysis on environmental grounds.

Further, GBC has consulted on the Local Plan with the proviso that this site should be deleted from the plan should it be demonstrated the provision of a secondary school on the site is not required.

However, there has been no proper assessment of whether alternative sites could accommodate the school, as is clearly required given the "exceptional circumstances" test. GBC's assessment of alternative secondary school sites notes that Surrey County Council's concerns as to remoteness of the site from development are as was only overcome by the new housing provision in the Local Plan i.e. that housing which is proposed on this site. The alternatives assessment fails to identify the land area required for the school, and fails to assess alternative sites on the basis of their contribution (or otherwise) to the Green Belt. This is a fundamentally flawed sequential assessment.

Even if this site is the only possible school site (which is not accepted) then there is no explanation as to why 1,100 houses are required to be delivered in addition to the school, with a materially greater impact on the Green Belt and the environment generally. Part of the justification offered for the selection of this site for a school is that it is close to the proposed housing (together with other development sites). This argument is circular, since if the school is not required in this location then nor is the housing. In any event, this justification does not compare alternative sites on a fair basis, since other sites are rejected for schools on the basis of their Green Belt location. This site also lies within the Green Belt.

The Leader of GBC has suggested that the proposed houses should be regarded as "enabling development". The Parish Council submits that school funding should be achieved through the normal channels and not through the release of Green Belt land to housing development. This suggested cross-subsidy is an unjustified claim (there has been no viability analysis) and in any event is not a proper planning reason for allocating the site for development. The Local Plan is therefore unsound.

Next Steps

GBC's consultation on the Local Plan was based on the proviso that policy A46 was to be deleted in the absence of justification for the location of a secondary school at the site.

The Parish Council has seen no proper justification for the location of a secondary school in this Green Belt site. The selection of the site appears to have been justified on the basis that it will be close to the housing identified in the
allocation. This makes for an entirely circular argument; the housing is only put forward on the basis of the school, and the school on the basis of the housing.

This cannot amount to an exceptional circumstance for the release of land from the Green Bell. There has been no adequate sequential site assessment for a new secondary school.

In those circumstances, GBC is invited to confirm that policy A46 will be deleted from the Local Plan because the school location has not been justified. The Spatial Strategy should be amended accordingly.

We await GBC's urgent confirmation that the Local Plan will not be proceeding with Policy A46 and that the land in question will remain within the Green Belt.

Answer (if comment is on questions 1-7 of the questionnaire): (No)

Normandy Parish Council strongly objects to the Guildford Borough Proposed Submission Local Plan: Strategy and Sites ("Local Plan") and in particular to the allocation of land south of Normandy and north of Flexford for substantial development.

In principle objection to development of this site

The Parish Council opposes the principle of the development of this site:

1. The site lies within the Green Belt, and has been assessed by Guildford Borough Council (GBC) as having high sensitivity in Green Belt terms, serving to check the southward sprawl of Normandy and northward sprawl of Flexford, preventing the merger of those settlements, and safeguarding the countryside from encroachment (see Green Belt Purposes Assessment, April 2014). Accordingly, given the very significant contribution made by the site to the Green Belt in this area, it should not be developed.

2. The development of the site would not amount to sustainable development within the meaning of the National Planning Policy Framework. GBC's claim that the approach would be sustainable fails to attach any or any meaningful weight to the environmental aspects of sustainability.

3. The proposed allocation has not been the subject of any proper assessment of highways impacts. The local road network is incapable of coping with the proposed scale of development and there is no evidence that the necessary highways improvements are feasible or deliverable within the plan period.

4. The site lies within 1 km of the Thames Basin Heaths Special Protection Area and accordingly requires substantial provision of alternative green space as an avoidance strategy. Preferable sites for development elsewhere could be delivered without such provision.

The development of this site would significantly affect Normandy and the surrounding area and has not been justified in the Local Plan or in the supporting documents. In addition to the principled objections to the development set out above, the Parish Council considers that there have been substantial flaws in the plan-making process to date which go to both the merits and legality of the Local Plan.

Specific criticisms of the plan making process

A sound plan must be based on proper evidence and consistent with national policy. To be lawful, the plan must be promoted on the basis of a proper analysis of the environmental impacts of policies together with an assessment of reasonable alternatives (see Environmental Assessment of Plans and Programmes Regulations 2004/1633 and e.g. Calverlon PC v Nottingham City Council [2015J EWHC 1078 (Admin), per Jay J at (67)).

The history of the Local Plan is known to GBC. The Parish Council wishes to emphasise that in the 2014 plan, it was not proposed that this site be allocated for development. Since then, there has been no further Green Belt review, but there has been a Green Belt Purposes Assessment which identified this site as particularly sensitive in Green Belt terms.

There is no explanation in the published documents of the "exceptional circumstances" (NPPF, 80) that are said to justify release of the site from the Green Belt. The Green Belt Capacity Study does not explain why such exceptional circumstances exist, and nor does the Sustainability Appraisal ("SA"). Extraordinarily, the SA states that the development of the site is regarded as a "given" (6.3.16). The SA acknowledges (in footnote 68, p 131) the greater impacts on the Green Belt in developing sites such as this, but does not explain why such development is nonetheless justified on both environmental grounds and by reference to the exceptional circumstances test.
The SA is open to further criticism through its failure to accord any weight to the Green Belt in analysing various options. This is a significant deficiency which renders the SA unsound and indeed unlawful, since the alternatives are not subjected to proper analysis on environmental grounds.

Further, GBC has consulted on the Local Plan with the proviso that this site should be deleted from the plan should it be demonstrated the provision of a secondary school on the site is not required.

However, there has been no proper assessment of whether alternative sites could accommodate the school, as is clearly required given the "exceptional circumstances" test. GBC's assessment of alternative secondary school sites notes that Surrey County Council's concerns as to remoteness of the site from development are as was only overcome by the new housing provision in the Local Plan i.e. that housing which is proposed on this site. The alternatives assessment fails to identify the land area required for the school, and fails to assess alternative sites on the basis of their contribution (or otherwise) to the Green Belt. This is a fundamentally flawed sequential assessment.

Even if this site is the only possible school site (which is not accepted) then there is no explanation as to why 1,100 houses are required to be delivered in addition to the school, with a materially greater impact on the Green Belt and the environment generally. Part of the justification offered for the selection of this site for a school is that it is close to the proposed housing (together with other development sites). This argument is circular, since if the school is not required in this location then nor is the housing. In any event, this justification does not compare alternative sites on a fair basis, since other sites are rejected for schools on the basis of their contribution to the Green Belt location. This site also lies within the Green Belt.

The Leader of GBC has suggested that the proposed houses should be regarded as "enabling development". The Parish Council submits that school funding should be achieved through the normal channels and not through the release of Green Belt land to housing development. This suggested cross-subsidy is an unjustified claim (there has been no viability analysis) and in any event is not a proper planning reason for allocating the site for development. The Local Plan is therefore unsound.

Next Steps

GBC's consultation on the Local Plan was based on the proviso that policy A46 was to be deleted in the absence of justification for the location of a secondary school at the site.

The Parish Council has seen no proper justification for the location of a secondary school in this Green Belt site. The selection of the site appears to have been justified on the basis that it will be close to the housing identified in the allocation. This makes for an entirely circular argument; the housing is only put forward on the basis of the school, and the school on the basis of the housing.

This cannot amount to an exceptional circumstance for the release of land from the Green Belt. There has been no adequate sequential site assessment for a new secondary school.

In those circumstances, GBC is invited to confirm that policy A46 will be deleted from the Local Plan because the school location has not been justified. The Spatial Strategy should be amended accordingly.

We await GBC's urgent confirmation that the Local Plan will not be proceeding with Policy A46 and that the land in question will remain within the Green Belt.

4. Removal of Infrastructure Schemes AM4, BT4, EG6, FRR4, FRR5, LRNI8, LRN19, PED1, SANG 13, SED3, WCT5, WS4 and OS4

We accept that the removal of Sites/Policies A46 and A47 has greatly reduced the need for these infrastructure projects, so in that respect we offer no objection to their removal as well. However, Normandy and Flexford have for many years suffered problems with traffic management and flood risk and these will continue to worsen, particularly if other developments proceed (10,000 homes are planned within a ten mile radius of Normandy). Please note that we will continue to press for improvements, but for the sole purpose of this consultation and the removal of A46 and A47, we support their removal from the Draft Local Plan.
Normandy Parish Council has consulted with its residents on GBC’s amended Local Plan 2017 and would like to make the following comments, which are a combination of Councillors’ and residents’ opinions.

As per the consultation’s requirement, our comments are confined solely to those changes in the revised 2017 Plan.

In addition, we have restricted ourselves to those changes that affect Normandy and Flexford directly, although we know that many of our residents feel strongly about some of the other aspects of the revised Plan, in particular that insufficient attention has been paid to protecting and preserving the Green Belt across the Borough. We commented at greater length on the version submitted for consultation in 2016, and we assume those comments will form part of GBC’s submission to the Planning Inspector.

. Removal of sites A46 and A47.

We support the removal of these sites from the 2016 Plan. They were strongly opposed by Councillors and residents on the basis that they would have irretrievably destroyed the character of Normandy and Flexford, and would have imposed an impossible burden on the local transport and other infrastructure. We are glad that GBC has taken note of the many objections to these proposed sites, and also of the findings of the revised Sustainability Appraisal 2017, and removed them from the Plan.

Removal of Infrastructure Schemes AM4, BT4, EG6, FRR4, FRR5, LRN18, LRN19, PED1, SANG13, SED3, WCT5, WS4 and OS4

We accept that the removal of Sites/Policies A46 and A47 has greatly reduced the need for these infrastructure projects, so in that respect we offer no objection to their removal as well. However, Normandy and Flexford have for many years suffered problems with traffic management and flood risk and these will continue to worsen, particularly if other developments proceed (10,000 homes are planned within a ten mile radius of Normandy). Please note that we will continue to press for improvements, but for the sole purpose of this consultation and the removal of A46 and A47, we support their removal from the Draft Local Plan.

Traveller site at Palm House Nurseries (Policy/Site A49) and Travelling Show-people site at Whittles Drive (Policy/Site A50)

The Parish Council especially objects to the Traveller site at Palm House Nurseries (Site A49) and the travelling Show-people site at Whittles Drive (Site A50) being made permanent and inset from the Green Belt.

7. At a previous planning appeal the Inspector stated that the land at Palm House Nurseries contributes to the openness of the Green Belt and because of this the Parish Council feels strongly that it should remain ‘washed over’. We understand that Travellers already own the adjacent land; if their existing site is ‘inset’ we fear there will be an attempt to enlarge the site onto this land even though it remains in the Green Belt (see comments above in para 3). The same arguments apply to the Travelling Show-people site at Whittles Drive. Both sites are rated “High Sensitivity” in the Sustainability Appraisal 2017 (Table 10.1) and in the Parish Council’s view this flies in the face of allowing them to be ‘inset’ from the Green Belt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4. Green Belt boundary changes
We are pleased to see the reversion of the Green Belt boundaries to more or less their existing levels (with the exception of 'insetting': see below) as a consequence of the withdrawal of the previously proposed strategic sites (A46 and A47), and welcome the protection this offers for our precious countryside. In particular we welcome and support the acknowledgement that the land lying between Normandy and Flexford (the previous site A46) is particularly sensitive in Green Belt terms as it contributes significantly to the openness of the Green Belt in this area, as well as being of high grade agriculturally and therefore of importance in terms of the rural economy.

However, the Parish Council objects to the 'insetting' in the Green Belt of the three most settled areas of Normandy and Flexford on two counts. First, no case has been made on the grounds of 'exceptional circumstances' for removing this land from the Green Belt, and by so doing GBC will make it easier for further attrition of the Green Belt to take place in future as a result of extensions to the settlement area on adjacent Green Belt land (see para 6 below). Second, all three settlements contribute to the openness of the Green Belt and should therefore remain 'washed over' by it. This view has been supported by Planning Inspectors, who have indicated while rejecting recent appeal decisions that the land at Flexford and Normandy contributes to the openness of the Green Belt. 'Insetting' will make it much harder to sustain this crucial openness in future.

7. At a previous planning appeal the Inspector stated that the land at Palm House Nurseries contributes to the openness of the Green Belt and because of this the Parish Council feels strongly that it should remain 'washed over'. We understand that Travellers already own the adjacent land; if their existing site is 'inset' we fear there will be an attempt to enlarge the site onto this land even though it remains in the Green Belt (see comments above in para 3). The same arguments apply to the Travelling Showpeople site at Whittles Drive. Both sites are rated "High Sensitivity" in the Sustainability Appraisal 2017 (Table 10.1) and in the Parish Council's view this flies in the face of allowing them to be 'inset' from the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
It is contended, that more emphasis should be placed on facilitating self-build and custom housing provision of smaller sites coming forward for self-build housing.

_Policy H3_
Rural Exception Homes makes no provision for self-build housing as a way of securing starter homes on small sustainable sites in close proximity to existing settlement boundaries.

_Site Description and character._

The site is located within the Green Belt, outside any Area of Outstanding Natural Beauty or Area of Great Landscape Value. The site is also outside the East Clandon Conservation Area. Whilst the Council have produced a Green Belt & Countryside Study as part of its evidence base for the Draft Local Plan, the application site is not identified in the study as being of any strategic value.

The site is within close proximity to the existing settlement boundary, and directly adjacent to a line of cottages known as Snelgate Cottages which front on to the Old Epsom Road, and which run parallel to the new Epsom Road.

[Image]
[Image]

The site is also behind a tree screen. The Snelgate Cottages, which number a row of 12 cottages, are located 90m from the settlement boundary and the Conservation Area of East Clandon.

The cottages, whilst pleasant in character, are of no historic merit and hence were not included in the Clandon Conservation Area.

[Map]

The site itself is covered by shrubs and trees of very limited quality. The few mature trees that are present, are mainly around the edges of the site and could easily be retained as part of any redevelopment of the site.

_Access_
The site does not have a formal access point, although there is a pavement that runs for almost the entire length of the sites frontage onto Old Epsom Road. The site has a frontage onto the Old Epsom Road of 80m, although the overall width of the site is 116m.

_Sustainability_
It is considered that the site is a well located, sustainable site for a small residential development and one that is well located to the existing local transport services that serve East Clandon. There are bus stops in close proximity to the site along Epsom Road, which connect to Guildford, Epsom and Leatherhead. The site is in close proximity to the village, with its local church, parish hall and local pub. Schools can be found in the neighbouring villages of West Clandon and West Horsley. West Clandon train station is a mainline station with connections to Waterloo and Guildford.

_Deliverability_
The site is in one ownership, no third-party land is required to achieve appropriate access for the development and there are no known constraints to the development of the site. The site could come forward and be developed within the next five years.

_Economic Benefits_
The site measures 0.5 hectares and is surplus to Clandon Regis Golf Club’s requirements.

The Golf Club opened in 1994 in 170 acres of land and hosts professional golfing events. However, the decline in the popularity of golf in recent years, has had a knock on effect on the number of annual memberships.

At the same time, increased costs of running the business, maintaining the extensive land holding, coupled with the general poor weather conditions experienced in recent times, has put a strain on the club’s resources. The redevelopment of this 0.5
hectare site, would enable the Club to generate a capital sum that could be invested back into the Golf Course business ensuring that it has the necessary funds to continue.

**The Proposal**

The indicative plan attached to this submission shows how the site could be sensitively developed with a low-density housing scheme. Sketch Plan SK01 shows a slightly more intense scheme that utilises the site’s potential with housing to the rear of the site, thus making best use of the land.

[Sketch 1]

The scheme shows how a proposal of 14 dwellings, made up of 2 and 3 bedroom semi-detached and detached houses, could be achieved on the site.

The proposal would have a density of 7dph, and would include a buffer zone between the application site and the Golf Course.

The proposal would provide affordable housing at 35%, in line with current affordable housing policy, and would equate to 5 affordable dwellings provided on site.

Alternatively, and in line with the recently published Housing White Paper and the Government’s commitment to the Right to Build legislation, the site could be re-developed for self-build and custom build homes.

**Consultation with East Clandon Parish Council**

An initial approach to East Clandon Parish Council (meeting held 2nd February 2017) regarding the promotion of the site for housing, has proved relatively positive.

The Parish Council felt the site could accommodate a small housing scheme of smaller units and affordable housing. However, the Parish Council felt they needed more detailed information on the design, density and layout of the scheme, as well as more information on the affordable housing element of the scheme, to then consult with the wider parish members before the Parish Council could formally comment on the proposal.

**Conclusion**

In light of the site’s sustainability and the benefits the proposal could bring to the local area, it is hoped that the site will be included in the Site Allocations document that will accompany the Draft Local Plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents: [Guildford Local Plan Regulation 19 Consultation Reps July 2017.pdf](Guildford_Local_Plan_Regulation_19_Consultation__Reps_July_2017_.pdf) (376 KB)
Landlying to the north of Anchor Close, Normandy, Surrey GU3 2BT

Site Location

The site is located to the north of Anchor Close which is a small cul-de-sac of five dwellings in Normandy off the main A323 Guildford Road running from Guildford to Ash. The proposed site lies to the rear of numbers 2 to 5 Anchor Close. To the east, the site is bounded by a public footpath and Anchor Copse. To the north is a paddock and to the west are detached dwellings set in large plots.

Fig. 1 Land Registry plan with site outlined in red

- The site is located within the Green Belt and abuts the boundary of the Normandy settlement to the south and partially to the

Fig. 2 Extract from Local Plan 2003 Proposals Map with site outlined in red

- The site is a greenfield site used presently as residential It is under private ownership and immediately deliverable.

- It is within the 400m to 5km zone of the Thames Basin Heaths Special Protection Area and is poor agricultural land (classification 4). It is located within Flood Zone 1 (low risk).

3.5 Assessment of Site Opportunities and Constraints

Shown below are photographs of the sites:

Fig. 3 View of site from south east corner looking north west

Fig. 4 View of site from the south looking north east

Fig. 5 View of site looking east along boundary with 5 Anchor Close

Fig. 6 View of site looking west along boundary with 2-4 Anchor Close

Fig. 7 View from site to rear of 2-4 Anchor Close

Fig. 8 View from site to rear of 5 Anchor Close and existing access

Fig. 9 View from proposed access looking west along Guildford Road

Fig. 10 View looking west towards the site from Guildford Road

- The site is located within the Green Belt but adjoins the Normandy settlement zone along the full length of its southern The minor alterations to the settlement boundary within the proposed Local Plan 2016 submission now include the large detached dwellings to the west. Should the redefined settlement zone be agreed, the site will be bordered completely on two sides. An extract from the proposed Local Plan illustrating this is included below:

Fig. 11 Extract from the proposed Local Plan 2016 Proposals Map with the site outlined in red

- The site is not within an Area of Outstanding Natural Beauty, Area of Great Landscaping Value, SSSI or SPA which cover the majority of the No trees or shrubs on or bounding the site are protected by a Tree Preservation Order. A tree, approximately 10m to the south of the site, within the gardens of 1 and 2 Anchor Close has a TPO but this tree will be unaffected by any proposals for a residential development.

- The developable site area is 4ha and therefore at a density of 30dph, 12 houses could be constructed. The surrounding settlement has a density of approximately 16dph. Therefore, should the density of the residential development be reduced to match its surroundings, 6-7 houses could be constructed on the site.
• A new vehicular access could be formed in the south east corner of the site from Guildford. As illustrated within the photographs above, appropriate sightlines exist which would provide safe ingress and egress to and from the site.

• Outside Guildford town centre, established urban areas, inset villages and identified Green Belt villages, the site is in a very sustainable location. A regular bus service also runs down Guildford Road (with a bus stop next to the site) linking the area to Guildford, Aldershot and Woking. It is just 20-25 minutes walk or a 7 minute cycle from Wanborough Railway Station which has two services an hour to Guildford taking just 7 minutes and two services an hour to Aldershot taking 11 minutes. The site is also only 3 miles from the Puttenham junction of the A31 Hogs Back giving excellent vehicular access to the rest of the borough and south to Farnham. It is well located for easy access to cycling routes.

• Guildford Road has a pavement along it providing a safe and easy walking route from the site to the rest of Normandy, giving access to a number of facilities and services including:

1. Places of Workship (Wyke Church, St Marks, Emmanuel Church, RCCG Winners Place)
2. School (Wyke Primary School)
   ◦ Garages (Hyundai Motors, Normandy Motorcycle Co)
3. Public House (The Duke of Normandy)
4. A number of local shops (Session Music)
5. Tennis and sports clubs (Guildford Archery Club, Normandy Tennis Club, Normandy Cricket Club)

Other facilities including Royal British Legion, Dog Obedience School, Nurseries

3.12 Site Planning History

The site was identified as potential development area J16-A in the Green Belt and Countryside Study. It scored three against the purposes of the Green Belt and is ranked 18th in terms of sustainability criteria. The site was classified as suitable, available and viable for residential development in the Strategic Housing Land Availability Assessment (SHLAA) reference part of site 48. It was also included as site 46 within the draft Local Plan Strategy and Sites (regulation 18) document which went out to public consultation in 2014. This document concluded that if sufficient housing land cannot be found in the urban areas and village settlements, this site is potentially suitable for residential development. A copy of the site analysis from this document is included within Appendix A.

3.13 Suitability for Inclusion within the Local Plan 2016

As discussed in section 2, the Local Plan submission proposes a number of large urban extensions and new settlements to deliver the levels of assessed housing required over the 15 year plan period. Many of these sites are dependent on infrastructure improvements which are yet to be agreed with the Department of Transport. Therefore, the majority of the housing proposed is back-loaded to the later years of the plan and may not be deliverable within this time period at all.

• There is a shortfall within the Local Plan submission of housing which could be delivered in the first five years of the plan. This site could help reduce the shortfall as it is within a very sustainable location, available for development and deliverable within 1 to 5 years. It has been assessed previously and found by the Council to be suitable for residential development should sufficient housing land not be found in urban areas and village settlements. The Local Plan submission does not meet this requirement and therefore the site at Anchor Close should be promoted by the Council.

3.15 Comparison with alternative sites allocated within Normandy and Flexford

The Local Plan submission allocates two sites in Normandy and Flexford for residential development. Policy A46 is a large village expansion between the two settlements and will be of mixed use including 1,100 new homes. Policy A47 is a site on Land to the East of the Paddocks, Flexford and is allocated for 50 dwellings. Direct comparison between these sites and the land at Anchor Close is clearly difficult given the differing scales of development but this site will have considerably less impact on the landscape and ecology.
• An assessment of the landscape impact of development on these sites has been undertaken by Jon Etchells Consulting; a practice registered with the Landscape Institute, with extensive experience of landscape design and construction.

With regard to A47 he notes;

“The landscape to the west of Glaziers Lane is very different; it is more rural, relates far less to the settlement edge and is of much higher quality. It is in productive agricultural use, is expansive with long range views across it, and contains a number of large areas of Ancient Woodland. Development here would have significant adverse effects on the landscape, over a wide area.”

And concludes that;

“This large scale development would be likely to have adverse effects on the setting of the nationally designated landscape of the Surrey Hills AONB, as it would cover a large area and would include some large scale buildings for the proposed secondary school, which is intended to be at the southern end of the draft allocation site, closest to the AONB. This potential effect would be increased significantly if the AONB boundary were to be extended to the north into the AGLV, as is currently under consideration.”

• In comparison, the landscape of the application site is small scale, enclosed and strongly related to the settlement. It contains no valuable landscape features, and would have no effects on the setting of the nearby AONB by virtue of its limited extent, buildings of residential scale only and screening along its boundaries.

• The site at A47 is similar in landscaping terms to the site at Anchor Close as it abuts the settlement, is well screened and comprises residential garden and However, the majority of it is designated as a SNCL and lies within an area identified as a ‘water vole alert area’. A stream cuts through the centre of the site and potential mitigation measures may restrict the actual developable area. It appears unlikely, therefore, that this site can deliver the number of houses proposed and it seems somewhat perverse for the Local Plan to designate an area for nature conservation value, but also propose its development, if there are alternative sites such as Anchor Close available.

4.0 Conclusion

• It is considered that the site detailed previously is more suitable for delivering much needed additional housing within the borough than some allocated sites within the draft Local Plan as it is within a very sustainable location, available for development and deliverable within 1-5 years.

• The site has been assessed previously by the Council and it was concluded that if sufficient housing land cannot be found in the urban areas and village settlements, this site is potentially suitable for residential development.

• The position of the site, adjacent to the Normandy settlement boundary, ensures much needed additional housing could be provided in a sustainable location with only a modest indentation into the existing Green Belt.

• The site is more appropriate for residential development in landscaping and ecological terms than other sites allocated within the draft Local Plan for Normandy and

• The site is in a sustainable location on a major bus route and a 20-25 minute walk or 7 minutes cycle from Wanborough. The site has easy highways access on to the A31 Hogs Back.

• The land is of poor agricultural quality and currently used as residential.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCl).
- I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/12105  Respondent: 8594177 / Michael Conoley Associates (Michael Conoley)  Agent:  
Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy D2 

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy D2: Sustainable design, construction and energy

The government has withdrawn the Code for Sustainable Homes to encourage development, sustainable design is appropriately and successfully regulated by the Building Regulations. The requirement for applicants to provide energy statements at the planning submission stage which detail a 15% reduction in carbon emissions is at odds with government guidance and will create unnecessary red tape and costs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H1: Homes for all

It is agreed that new residential development should make the most efficient use of land whilst responding to local character, context and distinctiveness. This said; some existing housing areas in the borough were developed at a time when there were not the constraints on available land that exist today and as a result are low in density. To limit the impact on the countryside and reduce future incursion into the Green Belt, developers should be encouraged to increase density where this will not impact on the character of the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/12102  Respondent: 8594177 / Michael Conoley Associates (Michael Conoley)  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H2: Affordable homes

The provision of affordable housing is dependent on it being financially viable for developers to build market housing. Whilst the policy notes that affordable housing contributions may be provided off-site, or with payment in lieu where the Council agrees that on site provision is impractical, the 0.17ha site area criterion set by the policy triggering affordable housing provision is so restrictive that many sites appropriate for development will not be financially viable. Therefore, financial viability studies will be required even for the smallest developments.
Policy P2: Green Belt

It is agreed that the forthcoming Green Belt Supplementary Planning Document (SPD) should set out guidelines on the scale of development that this likely to be considered appropriate and how this is calculated. This will help provide greater clarity to applicants wishing to extend their homes although the figures should still be considered in relation to other design criteria.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Policy S2: Borough Wide Strategy

The West Surrey SHMA found that the housing shortfall in the borough was much greater than expected. It concluded that:

"Taking account of these adjusted household formation rates for younger households and adjustment for student growth, the SHMA draws the following conclusions on the overall need for housing across the HMA to be at 1,729 dwellings per annum with need in Guildford at 693 dpa."

To make up for this shortfall, the plan makes provision for 13,860 new homes which would average 924 dwellings per annum. This is a higher level of development than experienced in Guildford borough during the previous Local Plan period and higher than the assessed need to build flexibility into the plan. The Annual Housing Targets set within this policy...
average out over the 15 year period at the required 693dpa but delivery is back-loaded to the latter years of the plan. Over the first five years a target of just 2,950 has been set which equates to a delivery of 590dpa. This is considerably less than the assessed need and therefore contrary to the requirements set out in paragraphs 47 to 49 of the NPPF.

• We consider that to comply with the requirements for a deliverable five year supply of housing land, the Council should promote additional sustainable smaller sites on the edges of existing settlements that would be deliverable in years one to five of the Local Plan

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLPP16/12096  **Respondent:** 8594177 / Michael Conoley Associates (Michael Conoley)  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Vision and ambition

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2.1 Spatial Vision

The plan provides for the delivery of 13,860 additional homes by 2033. Considerable effort has been undertaken by the Council to understand the borough’s housing needs through the Land Availability Assessment (LAA) and Strategic Housing Market Assessment (SHMA) and, for the purposes of this representation, we do not seek to challenge the Council’s conclusions in this regard.

• We agree that the preferred location for this development should be existing brownfield sites however; only 2,800 units are proposed by the plan for the urban areas which take advantage of the existing infrastructure and the plan notes the benefit of these sites is that they reduce the need to travel and offer alternative modes of transport to the private car. Significant expansion is also planned to the Guildford Urban Area and around Ash and Tongham which takes advantage of the existing infrastructure and services.

• Much of the remaining provision is in a new settlement at Wisley (2,000 homes) and a significant expansion at Normandy and Flexford which will provide over 1,000 As noted within the plan, the delivery of some of these major sites is dependent upon major improvements to the M25/A3 interchange and the A3 around Guildford and therefore the houses will not be able to be delivered until the later years of the plan. Some of the larger sites may not be deliverable within the plan period at all should agreement not be received from the Department of Transport for the infrastructure improvements. Therefore, it appears the delivery of the required 13,860 additional homes may not be achieved by this plan.

• The plan also proposes almost 1,200 dwellings on non-strategic sites within and around existing villages and over 750 dwellings as extensions to existing villages. We agree that this is important because it will help offer a variety of housing in villages and help contribute to maintaining and improving local services and village When Michael Conoley Associates have organised Public Consultations for small residential developments in villages in the borough, the overwhelming feedback from residents is their support for schemes which will improve the facilities and services in their village and provide lower cost housing that their children may be able to afford and allow them to continue to live locally.

• A number of smaller more sustainable sites on the edges of villages have been identified in the past by the LAA and the Green Belt and Countryside Study but omitted from the Proposed Submission Local Plan, the Council
apparently having concluded that the provision of the larger sites will limit the impact of new development to a few pockets within the borough. Given the majority of the proposed housing will only be deliverable towards the later years of the plan period (if ever) we consider that additional smaller allocated sites should be included within the document to meet the supply requirements for the shorter term (first five years in particular). As discussed in 2 it would make sense that the small sites which are promoted are those that are located in villages which benefit from existing facilities and offer alternative modes of transport to the private car to lessen the impact on the overstretched road network in Guildford. As an example, both Normandy/Flexford and Ash/ Tongham benefit from railway stations with regular and direct access to Guildford on the North Downs Line. This will improve following the addition of the proposed station at the Surrey Research Park.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object the A42: Clockbarn Nurseries, Tannery Lane.

1 This lane is also very narrow and, because of recent Marina approval it will make access into Send Road even more dangerous.

To summarise:
All these proposals are being built on what was green belt and it seems extremely underhand by moving the green belt boundary Jines. This goes against the Secretary of State guide lines and Government planning Minister. A letter received from Sir Paul Beresford in July, 2014 stated that only in exceptional circumstances could properties be built on green belt land. These proposals could be built on brown fields and do not show special reasons for green belt building. With reference to Send Hill development this a complete residential area and could not cope with a large increase in traffic including commercial lorries being used by travellers. However the Clock Barn site is more suitable for commercial vehicles. I am also surprised that Ewbanks brown belt site was suddenly abandoned as it would seem more appropriate for industrial usage and homes. I would be most interested to know how and why this occurred and the other sites suggested were put in at the last moment before the meeting on 24th May. This gives very short notice for discussion.

A copy of this letter is being sent to the Secretary of State, Ministry of Planning, our local Member of Parliament and Prime Minister, David Cameron.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/407  Respondent: 8594721 / Mr Peter Eperon  Agent:
I object to the proposed development of the above sites for the following reasons:

1. Development of this area is totally inappropriate because Send and Ripley could not absorb 400 house and 7000 square feet of industrial usage. As your plan does not include any infrastructure improvements it is obvious that at most time the traffic will be become completely gridlocked. This does not take into consideration the proposed 4000 properties at Wisley and Gosden Hill Farm. The suggested four way entrances on to the A3 would also make a further impact on the area and would encourage traffic to and from Woking and Old Woking to use Send Road to reach this junction. Unless there is vast improvement to the infrastructure, e.g. shops, doctors, hospitals, dentists, schools - all of which are already over subscribed - where are all the people's facilities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I was totally surprised at the latest addition to the local plan for Send's future development. The development at Send Hill would obviously be built on Green Belt Land and is totally unsuitable for this area.

I object for the following reasons:

1. Send Hill is a very narrow lane and, in particular, where this proposed site will be there is absolutely no room for two vehicles to pass each other. If this proposal was accepted, the road would have to be widened, at considerable cost, to enable lorries and caravans to go back and forth on this site. The sewage in Winds Ridge and Send Hill has always been a problem and as Winds Ridge is at a lower level, with excess effluence, there is considerable back up on our property which has to be cleaned on a regular basis. This will only be exacerbated by additional properties.

2. The privately owner part of this development, over recent years, has become a haven for wild life with deer, badgers, bee orchids and various species of birds.

3. When this piece of land was sold to the present owner there was a Covenant that a corner of this plot should not be disturbed as it was used as a dog and pet cemetery If this is built on, surely this is breaking the lease.
4. The GBC area of this development has been used for many years - to my knowledge well over twenty years - for recreation, children and dog walkers.

5. Previously the land was used as a waste infill. This infill was extremely toxic and has been vented over a period of time. If building was to take place, surely this would disturb any existing toxicity in the ground which could result in serious problems. This could be one risk too far!

6. The cemetery enlargement in Send Hill, which has now been offered to all denominations will, in itself, increase both traffic and parking problems and there would be added chaos to your proposed development. If you take into consideration the traffic from schools and their latest rebuilds, this will also increase the traffic problems. By the riding stables in Send Hill the road gets even narrower and is very dangerous leading into Potters Lane.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Local Plan Representations

Proposed Submission Local Plan: Strategy and Sites - Regulation 19 Consultation Consultation Response from Loseley Park on the Guildford Local Plan

I am writing to make responses to the current Regulation 19 consultation on the Guildford Local Plan on behalf of the Loseley Park estate.

The Loseley Park estate extends to over 1,400 acres of farmland, woods and parkland, from the southern slopes of the Hogs Back to the western and south western outskirts of Guildford and from there to the borders of the villages of Compton and Binscombe. Built in the reign of Elizabeth I, the estate has seen significant changes in recent decades, including changes to farming and the growth of new activities. In the last 15 years the leisure and events business has been developed and a wide variety of businesses have moved onto the estate into refurbished buildings.

Loseley Park is an important open space in Guildford that makes an important contribution to leisure provision in the Borough in addition to supporting local business interests.

We enclose the following information as part of these representations:

- This supporting letter;
- Maps Identifying land on the Loseley Park estate, which have been identified by the Council as being accessible open space (Appendix 1);
- Map identifying three sites - land adjacent to Mount Brown, Artington; The Paddock, adjacent to Sheiling, and land opposite Artington Park and Ride (Appendix 2);
- Completed Response Forms for the following policies:
  1. Policy S1 - Presumption in favour of Sustainable Development
  2. Policy S2 - Borough Wide Strategy
  3. Policy P1 - Surrey Hills Area of Outstanding Natural Beauty
  4. Policy P2 - Green Belt
  5. Policy E1 - Sustainable Employment
  6. Policy E2 - Location for new employment Floorspace
  7. Policy E3 - Maintaining Employment Capacity and Improving Employment Floorspace
  8. Policy E6 - The Leisure and Visitor Experience.
  9. Policy 11 - Infrastructure and Delivery
  10. Policy H3 - Rural exception housing

Representations in relation to Open Space, Sports and Recreation Assessment -

Background Study

I have already drawn to the Council's attention the concerns of Loseley Park regarding the Open Space, Sports and Recreation Assessment, which forms part of the evidence base in support of the Local Plan, in a letter to the Planning Policy department dated 11th July 2016. Our comments are also included below as part of this consultation.

Our primary concern regarding the Open Space Assessment is that it refers to areas of land on the Loseley estate that are labelled within this study as 'accessible'. This would imply it is publicly assessable and unrestricted. However, this land is private and whilst some of the land can be accessed by way of Public Rights of Way, most of the land identified is not
publicly accessible. Please refer to the accompanying maps at Appendix 1 to these submissions when reviewing the comments below.

1. **Ashen Copse** - Whilst referred to as accessible, there are no Public Rights of Way within this area of private woodland.

1. **Puddock Copse** - Whilst referred to as accessible, there are no Public Rights of Way within this area of private woodland.

1. **Pipkin Copse** - Whilst referred to as accessible, there are no Public Rights of Way within this area of private woodland.

1. **Bummoor Copse** - there is a Public Footpath running through the centre of this woodland, however, apart from the footpath width, the rest of the woodland is private and not accessible.

1. **Hurtmore Wood** - We understand this small area of woodland has been included incorrectly in the land owned by Puttenham Golf Club. The area of woodland owned by the Estate is private with a Public Footpath running through it.

1. **Loseley House and Home Farm** - The area coloured green on the proposals map is marked as private space. Loseley House and the immediate gardens are open to the General Public throughout the summer. However, the entry also includes private fields, private residential properties and private commercial let units.

1. **7. Land at Arlington** - It is difficult to see from the proposals maps but we believe a small area of land has been included at This is private land and has no Public Rights of Way.

1. **Land to the South of New Pond Road** - An area of farmland to the south of New Pond Road has been included as "Outdoor Sports (Private)". This land is private agricultural farmland with no public access.

Loseley Park requests that the Council remove these areas of land from this evidence base document. Notwithstanding our position on this matter, should the Council seek to maintain this land within the evidence base document on the basis it serves a purpose as open space adjacent to a recreation function, we request the land be clearly labelled as private and inaccessible so as to avoid any confusion and ensure there is greater clarity within the document. Please contact us if you wish to discuss this matter further.

**Sites with Development Potential in the ownership of the Loseley Park**

We wish to bring to the Council’s attention the following parcels of land within the ownership of Loseley Park, which in our view are suitable, available and achievable within the medium to long term.

**Land adjacent to Mount Brown, Arlington**

This land could be included as a logical infill plot. The site could potentially hold 30 dwellings at a density of 16 dwellings per hectare. Whilst located within the Green Belt and AONB/AGLV the draft local plan is seeking to release similar such sites for development over the life of the plan period and is located adjacent to the Mount Brown site. The emerging policy context supports appropriate levels of infilling.

<table>
<thead>
<tr>
<th>Location:</th>
<th>See map at Appendix 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Site Size:</td>
<td>1.86 ha</td>
</tr>
</tbody>
</table>
The Paddock, adjacent to Sheiling

This land is located adjacent to existing residential accommodation and forms a logical infill plot on a gap site. Whilst located within the Green Belt and AONB/AGLV the draft local plan is seeking to release similar such sites for development over the life of the plan period. The site could potentially hold approximately 6 dwellings along its road frontage with The Ridges. Loseley Park is willing to consider the site for 100% affordable housing and would be happy to discuss this possibility with you.

<table>
<thead>
<tr>
<th>Location:</th>
<th>See map at Appendix 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Site Size:</td>
<td>0.4 ha</td>
</tr>
<tr>
<td>Current Use:</td>

</tr>
<tr>
<td>Potential Future Use:</td>
<td>Residential Use</td>
</tr>
</tbody>
</table>

Land Opposite Arlington Park and Ride

Loseley Park has land adjacent to the existing park and ride car park at Artington. To cater for growth in the region, this land could be included as a logical extension to the site and serve a further increase in parking demand. Although within the Green Belt, the principle of park and ride use has already been established in this location.

<table>
<thead>
<tr>
<th>Location:</th>
<th>See map at Appendix 2</th>

<td>2.76 ha</td>
</tr>
<tr>
<td>Current Use:</td>
<td>Vacant Land</td>
</tr>
<tr>
<td>Potential Future Use:</td>
<td>Park and Ride</td>
</tr>
</tbody>
</table>

The above three sites have the potential to make an important contribution to employment, housing and infrastructure provision in the Borough. We would be grateful for the opportunity to meet with you to discuss the planning merits of the above site in more detail.
Conclusions

In summary, we believe the draft Plan could benefit from the minor changes set out in the enclosed representations. Loseley Park makes an important contribution locally to leisure and business uses in the Borough as acknowledged by the Council. Loseley Park remains committed to making sure the estate continues to make this important contribution into the future and therefore trusts you will give due consideration to the development potential of the above sites.

I trust the above comments will be passed to the Local Plan inspector when the Local Plan is submitted for Examination in Public (EiP). We reserve the right to make further representations and attend the Examination in Public if necessary.

Do you consider this section of the document; complies with the Duty to Cooperate? ( Yes ), is Sound? ( Yes ), is Legally Compliant? ( Yes )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We support the aim of an additional 3,200 additional B Class jobs to 2033, although this should not be interpreted as a ceiling. Although not a strategic employment site the Loseley Estate has a number of businesses on the estate which make an important contribution to local employment opportunities.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E3

Do you consider this section of the document; complies with the Duty to Cooperate? (Yes), is Sound? (Yes), is Legally Compliant? (Yes)

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Loseley Estate has a number of employment sites in its ownership that make an important contribution to employment in the area. Over the life of the plan it anticipated that a number of existing business units may need to be redeveloped. We therefore support the last paragraph of this policy, which supports the redevelopment of outmoded employment floorspace to cater for modern business needs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? (Yes), is Sound? (Yes), is Legally Compliant? (Yes)

Answer (if comment is on questions 1-7 of the questionnaire): ()

We welcome the acknowledgement within the plan that Loseley Park makes an important contribution to leisure in the Borough, as per paragraph 4.4.57 of the Local Plan. The Estate is constantly reviewing operations to ensure it continues to make a high quality contribution to the Borough.

We support the broad thrust of Policy E6, particularly the section encouraging the re-use of small scale rural buildings. The Loseley Estate regularly reviews its buildings to ensure they are being adequately deployed.

We particularly welcome the provisions of the policy that calls for the provision of new and improved accommodation for tourist visitors on the site. The re-use of existing buildings should be encouraged as part of this strategy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P1

Do you consider this section of the document; complies with the Duty to Cooperate? ( Yes ), is Sound? ( Yes ), is Legally Compliant? ( Yes )

Answer (if comment is on questions 1-7 of the questionnaire): ()
We support the wording and broad thrust of this policy. Its current wording acknowledges that whilst the main priority is the conservation and enhancement of the AONB, there is a need to allow some development, providing it meets certain key criteria as listed in the policy. Natural England is committed to undertaking a review of AONB boundaries, which also should be given due consideration by the Council.

The Loseley Estate controls a number of buildings within the AONB, which are in use and/or being considered for more viable uses to further support the rural economy of the Surrey Hills.

It is important that flexibility is retained to ensure that businesses located within rural areas are able to adapt to changing business circumstances in the future.

Do you consider this section of the document; complies with the Duty to Cooperate? ( Yes ), is Sound? ( Yes ), is Legally Compliant? ( Yes )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We support the broad thrust of this policy, which seeks to reflect the wording of national Green Belt policy contained within the NPPF, whilst it is acknowledged land will need to be taken out of the Green Belt to accommodate growth. Buildings on the Loseley Estate are in active use for a variety of purposes, including residential and business uses. Extension or alteration and replacement of buildings in the Green Belt is a normal part of the lifecycle of buildings and re-use of existing buildings is in line with the principles of sustainability, and should be welcomed. We also support the limited infilling of previously developed sites allowed by policy.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
We support the aims of this policy, which further reinforces the sustainable development principles set out within the NPPF. Loseley Park seeks to follow the principles of sustainable development by re-using existing buildings wherever possible. To ensure the principles of sustainable development are pursued, the Loseley Estate is constantly reviewing the land and buildings within its control to ensure they are being kept in active use.

Do you consider this section of the document; complies with the Duty to Cooperate? ( Yes ), is Sound? ( No ), is Legally Compliant? ( Yes )

Answer (if comment is on questions 1-7 of the questionnaire): ()

To meet the anticipated housing targets in the plan the Council should keep open the option of further sites coming forward within the plan period. We welcome the fact that the level of provision set out in the policy for each year is not set as a ceiling. There is no guarantee that every site identified for residential development will be developed over the life of the plan period and housing delivery should be subject to annual review. Further sites should not be ruled out for residential development should they come forward and be found acceptable in planning terms.

We support the provision of more employment accommodation. The Loseley Estate currently has a range of buildings under its control that are in active employment use.

We bring to the Council’s attention land that has the potential to make an active contribution towards housing provision and infrastructure provision in the Borough.

These sites are known as:

- Land Adjacent to Mount Brown, Artington (Possible Residential Use);
- The paddock adj. Sheiling (Possible Residential Use - possibly 100% affordable);
- Land adjacent to Artington Park and Ride (Extension to Park and Ride);

Please see accompanying supporting letter and accompanying location plans for further information on these sites.

The scale of growth is excessive, the SHMA has not been scrutinised by the Councillors and the details of the calculation is not in the public domain. With the recent referendum result and uncertainty of forecasts of leading economists this growth is not justified.

The wording of policies is vague. This, coupled with a presumption in favour of development offers no protection. Use of words such as “should” rather than “must” encourages ambiguity.

Comment ID: pslp172/2558  Respondent: 8595777 / Ash Green Residents Association (Paul Povey)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A29: Land to the south and east of Ash and Tongham
We object to the increase from 1200 to 1750 homes as this would increase the pressure of coalescence between the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the “historic location of Ash Green”, is inadequate and would need rewording to prevent this increased potential for coalescence.

• Requirement 6 Amend: "Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road have historically been considered to form part of Ash Green village. Whilst this land is now proposed to be included within the Ash and Tongham urban area, Proposals for the land west of this road and to the south east of Foreman Road / White Lane should must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This should must include the provision of a green buffer that seeks to maintains a sense of separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond"

• Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:

“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”

• Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.

• Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.
- The Street in Tongham
- A331/A323 intersection and A331/A31 Intersection
- A31/White Lane junction

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

"Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and the intrinsic rural character of its countryside location. The properties along Ash Green Road form part of Ash Green village. Proposals for the land west of this road and to the south east of Foreman Road / White Lane must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy P3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road

• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road
• 4.3.29 Amend: "Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough's second largest urban area. Given its relative sustainability, the Countryside to the south and east of the urban area within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development.”
• 4.3.30 Amend: "We however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green.”
• Policy P3 Amend: (1) (c) should be amended to read "does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot."
Regrettably, the Local Plan continues to incorrectly identify the boundary of Ash Green. Ash Green Residents Association made a detailed response to the 2014 Local Plan Consultation and in particular raised their concerns that GBC’s settlement boundary of Ash Green was incorrect and excluded the northern part of the village. AGRA also raised concerns regarding the boundary of the Ash & Tongham Urban Area (previously known as the Ash & Tongham Strategic Location for Growth) and its potential for coalescence with Ash Green. These concerns are detailed in our comments to Policy 11 of the 2014 Local Plan and we attach a copy at Appendix A for your information.

The Ash Green settlement boundary inaccuracy together with the Ash & Tongham Urban Area boundary inaccuracy are still present in the 2017 Draft Local Plan. We therefore ask that our 2014 comments are taken into account when considering the correct settlement boundary of Ash Green, the boundary of the Ash & Tongham Urban Area and a suitable area of separation between them.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

4.3.29 Amend: "Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough's second largest urban area. Countryside within the urban area to the south and east is allocated as a strategic location for development. However to make this growth sustainable, suitable infrastructure must be implemented before further development."

4.3.30 Amend: "We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identity of Ash, Tongham and Ash Green."

Policy P3 Amend: (1) (c) should be amended to read "does not lead to greater physical or visual coalescence between the Ash and Tongham urban area, Ash Green and Aldershot.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the plans for building in Send Hill - an entirely unsuitable site for environmental reasons but also as access is so limited via such a dangerous and narrow road.

Local residents know their own village well, yet it seems that our concerns are ignored, indeed ridden over roughshod, with plans being approved in short order and without the required consultations. We objected to this sort of behaviour before and will do so again. One simply cannot increase the size of villages by such a huge and sudden proportion without tearing out their hearts and changing them forever. Even small developments in unsuitable sites are madness. There is a known landfill site at Send Hill with recent tests having confirmed the presence of potentially dangerous or harmful waste, yet plans are put forward to build there too. This is highly inappropriate.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object in the strongest possible way to the plans of the Council to build in the Green Belt. This specially protected land is meant to preserve our beautiful countryside and give a quality of life to those who live here. I cannot see any reason why the council would feel it necessary to change this glorious area in which we live irreversibly, and cannot understand what right they have to contravene the central government's commitment to the protection of Green Belt land and remove the rights of our descendants. The whole reason this country is so attractive is the division between discrete villages and towns; take away the right to preserve this and Southampton will eventually join seamlessly to Manchester. You do not have the moral *right* to remove the countryside from future generations, and you were elected on the promise that the Green Belt would be protected. What was the price of your promise?

I object to the plan to remove villages from the Green Belt. There can be no justification for this other than to increase the places it is possible to build. Whether the argument is for housing or disguised as for industrial use, all plans to build what are effectively unwanted industrial sites simply allow later change of use, so should be viewed as extremely circumspect. Where is the evidence that so much industrial space is required in a small village, and surrounding roads will be unable to cope with the resulting traffic.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I am actually becoming heartily sick of writing with my objections, and I guess the council as a whole hope that this will mean I and many others like me will give up and go away. I objected with many others to size of the previous plans and your answer? To make an even bigger proposal for development. If this is what you plan, you must by law go through a full and proper process, not short cut the system and try to sneak things through in a way which is totally invalid and I object to the way in which this has been done.

I object to the number of houses you are proposing in our area and in others in the Borough. As far as I can gather, the number of homes the Council are planning to build in our area over the next few years far exceeds the need and would stretch the infrastructure and facilities to breaking point. It appears to be based on a report that none of us are allowed to see. Didn't we as council tax payers actually pay for this? Just because other authorities used this company to determine the need does not make it right or accurate. Let us see the basis of their figures as the secrecy surrounding it suggests they may well be unfounded.

I object to plans to build large new conurbations at Wisley Airfield, Gosden Hill and Blackwell Farm as I believe that the need for such large numbers of housing is based on an inaccurate, flawed or no longer relevant projections, and does not protect our local environment.

When are our elected representatives going to listen to what we are saying?

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

In specific terms, I objected to the original proposal to build 45 homes in Tannery Lane, which is narrow and twisting, with a junction in the village that is often difficult to negotiate, and Tannery Lane itself already serves as a terrifying drive or walk for locals with goods vehicles, vans and the like coming from and going to the industrial units by the Wey. Guilford's response to this is to INCREASE the number of homes being considered. I therefore also object to Policy A42; a one-third sized increase in the number of houses now being proposed and I fail to see how this increase will improve the traffic at the junction in the village I have already objected to. We are already in danger of losing countryside views from the banks of the Wey, and this development will be fully visible from the towpath. Any housing in this low-lying area will obviously affect the situation with drainage, and may cause flooding in the locality on a more frequent basis, or in residential areas that do not currently flood.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A43 citing the building of 400 homes on the Garlick's Arch site as there is no proof these homes are actually required - indeed I understand there has been a reduction in housing numbers in the Borough - and it is a beautiful area of Green Belt with no exceptional circumstances to make this proposal tenable. Local residents were extremely vocal in their previous objections to this site and with other local developments also planned there can be no proven need for the number of homes suggested in this location. It is a crime to deprive our descendants of the right to enjoy the Green Belt as we have done in our lives so far, and there are absolutely NO exceptional circumstances that would EVER make that right here. Nothing has changed, other than the Borough's seeming determination to destroy as much Green Belt as they can by handing it over to developers who will fail, as per most other large developments across the country, to meet any promised requirements for affordable housing, or the provision of services, claiming 'poverty' when it comes to any actual build. Experience shows they will only build what they can make most out of, and the rest of the population pays for their profits in terms of a lost quality of life and place a huge burden on what are effectively still semi-rural services (water, drainage electricity supplies etc). Surely you are required by Law to make sure the infrastructure is in place PRIOR to such large-scale building proposals.

We have complained previously that our village would be completely overwhelmed by such an enormous and sudden increase of people and cars; the newly built school and stretched doctors' surgery could not cope with the extra demand. Local buses and trains are not the best service, and thus most would intend to travel by car, increasing traffic at all times, but at peak times to a level that would become unbearable. Should the village become busier than currently, and living on Potters Lane, where we have recently been operating a Speedwatch campaign we have seen 1000 drivers breaking the speed limit, this sort of practice is bound to increase along all smaller back roads that are not built for such traffic. Pedestrians are in danger now, let alone when there are thousands more vehicles trying to pass through and around the village, and accidents will occur more often.

I object to the change of wording for the industrial site at Burnt Common (Policy A58) as it would permit far more industrial space to be built even than was originally allocated. This removes all upper limits for the size of the proposed and any future development on this site. I am sure that all of us can point to any number of empty industrial buildings in the area at both Slyfield and in Guildford itself, so on what premise are Guildford basing the need for such enormous amounts of industrial space, and more specifically in the Green Belt, to be turned over to industrial use? I understand that the need for such space has actually reduced according to a recent Land Assessment so this is entirely unfounded, and indeed was removed from previous planning drafts due to weight of opinion, so what has changed? The three distinct settlements of Send, Send Marsh and Ripley will simply merge and lose their identities and for what? For industrial buildings on our beautiful Green Belt, traffic gridlock and more polluted air for us all.

I object to the plan to take Send Business Park out of the Green Belt (Policy 2 paragraph 4.3.15) because this is such a narrow lane. In the winter, when the pedestrian path becomes unpleasant to use, and walkers must use the roadway it is a dangerous experience to walk along it presently. I am sure that there is no valid reason to make this road any busier by permitting further expansion at this site.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to strongly object to your so called revised Local Plan.

After all the time and effort land thousands of people in the Guildford Area have been presented with a plan, which is almost a duplicate of the original plan. I wonder why GBC had to rent facilities in Guildford to present the plan only to restate your original thoughts, despite the objections.

The Gosden Hill Farm site, Wisley, Garlick's Arch, Send Marsh, Burnt Common and Ripley will produce thousands of extra homes and vehicles without the road infrastructure to support it. The A3 in particular is full to capacity already.

I have to say the consultants you employed do not appreciate the current traffic difficulties that currently exist. With the extra housing it would gridlock our villages and no one would get any benefits. The infrastructure of services including Hospitals would also be overwhelmed.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections - Local Plan (June 2016)

I write in connection with the Proposed Submission Local Plan (June 2016) and in particular the effect it will have on me as a resident of Send with a young family.

There are no good grounds for taking land out of the green belt designation in this area and it will significantly damage the existing communities and their ability to use their amenities and infrastructure.

Green Belt (Policy P2)

No exceptional circumstances have been put forward to justify removing Ripley, Send and Clandon from the Green Belt contrary to the National Planning Policy. The villages will soon have no separate identities and will merge.

Transport links
The proposals to create additional access points to and from the A3 will only serve to increase rush hour congestion through Ripley and Send, which is already significantly congested. As the extra housing into the mix and we are going to be faced with gridlock whilst trying to take our children to school and on our way to work.

Swamping of local services

In addition to my concerns about the local infrastructure, no plans are being put forward for extra school places or extra primary care services in our area.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A43

I object to the proposal to build 400 houses and 7,000 m sq of industrial use and warehousing at Garlicks Arch. There is no need for any more houses on top of those already proposed for the borough. This site is NEW and not included in the Regulation 18 draft and has not been consulted on previously. It is Green Belt permanently protected by the NPFF which prevents merging of the settlements. There are no exceptional circumstances. The site has particular conservation sensitivity as it is covered in ancient woodland. The proposed industrial development of 7,000 sq m is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous plan. If there is a further need for industrial space, then it should be at Slyfield. A new 4-way interchange onto the A3 at Burnt Common would put substantial pressure on the already overloaded Send Road (A247) as it would be the through route for Woking for traffic leaving the M25 and A3 and the proposed new houses at Wisley and Burpham.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy A44

I object to the proposal to build 40 homes and two new travellers pitches to the west of Winds Ridge and Send Hil. This site is new and was not included in the regulation 18 draft and has not been consulted on previously. Development for housing is inappropriate due to its permanent green belt status and the beauty of the site. The subsoil of the existing site contains documented unsafe land fill waste which is currently being vented. The proposal to include 2 Travellers pitches is inappropriate due to the narrow width single track road providing insufficient access to the site.

Policy P2

I object to the proposal that Send be removed from the Green Belt. Send provides a buffer between Woking and Guildford. If the vulnerable areas proposed are to be included within the village boundaries and removed from the green belt,(the land behind St Bedes and along the Wey navigation) one assumes that there will be a presumption for building on those sites in the future.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Evidence

I object to the evidence presented to support the plan as follows: There is no sound evidence in terms of the ELNA 201 which shows an 80% reduction in employment space from the previous ELNA carried out by GBC in 2013. This means that the industrial space at Burnt Common is no longer needed. Housing numbers from the Strategic Housing Market Assessment 2015 (SHMA) are highly questionable; the # of foreign students has been wrongly used to inflate the need.
The required 13,860 houses in the local plan is exaggerated. If the population is to grow by some 20,000 in the plan period, we actually need 8000 homes (based on an average of 2.5 persons per home). The Green Belt does not need to be built over. 50% of the new homes could be built on brownfield sites. GBC’s transport assessment was not even available to councillors for the vote taken on 24 May. Infrastructure overload has received scant attention.

Policy P2

I object to the proposal that Send be removed from the Green Belt. Send provides a buffer between Woking and Guildford. If the vulnerable areas proposed are to be included within the village boundaries and removed from the green belt, (the land behind St Bedes and along the Wey navigation) one assumes that there will be a presumption for building on those sites in the future.

Policy A43

I object to the proposal to build 400 houses and 7,000 sq m of industrial use and warehousing at Garlicks Arch. There is no need for any more houses on top of those already proposed for the borough. This site is NEW and not included in the Regulation 18 draft and has not been consulted on previously. It is Green Belt permanently protected by the NPFF which prevents merging of the settlements. There are no exceptional circumstances. The site has particular conservation sensitivity as it is covered in ancient woodland. The proposed industrial development of 7,000 sq m is simply not required since the latest Employment Land Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous plan. If there is a further need for industrial space, then it should be at Slyfield. A new 4-way interchange onto the A3 at Burnt Common would put substantial pressure on the already overloaded Send Road (A247) as it would be the through route for Woking for traffic leaving the M25 and A3 and the proposed new houses at Wisley and Burpham.

Policy A44

I object to the proposal to build 40 homes and two new travellers pitches to the west of Winds Ridge and Send Hil. This site is new and was not included in the regulation 18 draft and has not been consulted on previously. Development for housing is inappropriate due to its permanent green belt status and the beauty of the site. The subsoil of the existing site contains documented unsafe land fill waste which is currently being vented. Answer (if comment is on questions 1-7 of the questionnaire): ()
ANNEX A

GBC Transport

LRN9 - LRN 13 and LRN 18 - LRN 19 improvements to the A323 and to Westwood Lane are insufficient and delivery is too late. Westwood Lane are C and D roads respectively where traffic is already very busy as the roads are used in the alternative to the A331 to gain access to the A3 and M3 and Guildford. There is no means of improving the hump backed bridge over the railway in Glaziers Lane or the single laned squint rail bridge over Westwood Lane which is height restricted.

LRN21, a bridge replacement for the level crossing at Ash is welcome but all this will do is pass on trafficholdups to the next pinch point.

In addition to the AUE and PRB, a Super Garrison in Aldershot is being planned. What will the effect of this be on Local Roads in the west of Guildford?

Hot spots on the A323 may be improved, but the congestion will just move on to the next hold-up, be it a car turning right or stopping bus. Large queues will form at peak time at junctions, in particular the roundabout at the junction of the A323 and the B3411 and the traffic lights at the junction of the A323 and the A324. The A323 is a direct road from the AUE into Guildford.

ANNEX B

The flawed nature of the Settlement Hierarchy and Settlement Profiles in respect of Wider Normandy

Wider Normandy is not a village with a centre, but is a collection of the following hamlets; Normandy, Flexford, Christmas Pie, Willey Green, Wyke and the eastern side of Pinewoods, a ribbon development along the A323, the western side being in Ash. Strictly speaking Flexford and Christmas Pie are one settlement, though residents of Christmas Pie think of themselves as separate.

After reading the Settlement Hierarchy and Settlement Profiles documents it is clear to me that Guilford Borough Council (GBC) suffers from confusion between Wider Normandy and Normandy. Wyke is mentioned once and Willey Green and Pinewoods not at all, even to be rejected as being too loose-knit or too small. The populations and amenities of Willey Green, Wyke and Pinewoods are therefore not included in either document. In 2011 Wider Normandy had a population of 2,981. The populations mentioned in these documents are Normandy 585 and Flexford 1,199, a total of 1,784, leaving 1,197 people unaccounted for, over a third of the population of Wider Normandy.

The Settlement Hierarchy

The Settlement Hierarchy document starts with the bold statement “The settlement hierarchy study is a key part of our evidence base for the new Local Plan. ... This document will enable us to have a better understanding of the roles of each of our settlements”. I don't think that the document shows any understanding of Wider Normandy or its settlements.

It is claimed that evidence gathering has identified that Flexford and Normandy would benefit from future development and access to key services for local residents. Where is this evidence?

I am not aware of demand for more services in Normandy, though there are some residents of Normandy who would like a shop for when they run out of milk or bread and to have a chat with the shopkeeper, particularly the chat. (When the Post Office closed, older residents would come to the Surgery and chat to the receptionist. The Church then started Tuesday teas for this group.) This, however, is not a viable business model. The Parish Council undertook a survey to assess demand for a shop, and found that demand was so weak that it would not be worthwhile. We had food shops and pubs in Wider Normandy, but they closed for lack of business. We still have bars in the British Legion and the Cricket Club. We have a farm shop which sells mainly meat, but also milk, fruit and vegetables, and a small range of organic groceries. It opens Weds - Sat and is well used. The Therapy Garden sell their produce and plants on Tuesday Wednesday and Thursday and again this is well used.
The population of Wider Normandy is sufficient to support a pub, there used to be six 15 years ago when the population was less than it is today, and a convenience store, but pubs and local shops are in decline all over the country as living patterns change. The ones we had in Normandy have closed.

Since Fast Broadband arrived two years ago residents increasingly shop online. Sainsbury and Tesco delivery vans buzz round the hamlets, and I have seen the Post van stacked high with Amazon parcels at Christmas. I shop online; my friends in Normandy all shop online. Online shopping and banking is the most sustainable for villages. Local shops will be less sustainable.

The Normandy Community Bus makes three trips a week to the supermarkets for residents who need transport. There is a convenience store in western Pinewoods, and a pub. The milkman delivers a range of groceries.

I am at a loss as to how the current residents of Normandy and Flexford will benefit from this plan, or in what way Normandy and Flexford will be more sustainable. The only thing on offer seem to be shops, which we do not need. The plan only brings disbenefits; loss of green open space, increased traffic, years of noise and disruption during building, pressure on existing services and a loss of identity, as the proposed development will double the size of Wider Normandy. The Settlement Profiles states "In terms of how well the villages work as a community, the settlement scores 35 out of 40, the highest scoring out of all the villages". Will this community spirit still exist if this plan is implemented? As for the evidence gathering, please see below.

The Settlement Profiles

These are the errors and omissions.

- P47 Wider Normandy is confused with Normandy Settlement. The document says

  "Normandy Parish Council considers Flexford and Normandy to be one village. We have therefore assessed and scored it on this basis." Normandy Parish Council considers Flexford and Normandy to be two settlements in the parish. Scoring Normandy and Flexford together is therefore incorrect. The nature of Normandy was explained in the last consultation, but the error has persisted. Why?

- Only Normandy and Flexford are considered. Wyke, Pinewoods and Willey Green are ignored. Wyke has a church, Wyke Infant and Primary Schools and a good bus service. Willey Green has a good bus service and 6 rural businesses, eastern Pinewoods has an Indian restaurant, a Chinese takeaway and a good bus service.
- On page 47 it states that Normandy has two schools. The schools are in Wyke.
- On page 47 it states in respect of Flexford " There is no central meeting place such as a village green within the village" which is true if Flexford is considered to be separate from Normandy, but untrue of they are considered as one, as in this document. Manor Fruit Farm, Normandy, where the Village Hall is situated, is a de facto village green. This is where the May and August Fetes, the 5th November Bonfire and Dog Shows are held. Manor Fruit Farm has a play area for children and an outdoor gym. The Doctors Surgery is also located here, and Normandy Therapy Garden.
- On page 48 it claims that Wanborough station has direct access to London. There is a change at Guildford.
- On page 49 it states that there is a Site of Nature Conservation Interest (SNCI) to the North of Normandy. There are 8 SNCIs in Normandy; Normandy Pond SNCI, Normandy Common SNCI, Wanborough and Normandy Woods SNCI, Little Flexford SNCI, Wyke School SNCI, Wyke Churchyard SNCI, Withybed Copse and Henley Park Fields SNCI and part of Broadstreet Common and Backside Common SNCI.
- On page 50, it is stated that Normandy has two Grade II listed buildings. Normandy has nine, Longer End Farm, Longerend Cottage, Hunts Hill House, Manor House, Normandy Hill Cottage, Normandy Hill Farmhouse, Glaziers, and Halsey Cottage, not two (Or does GBC think that Normandy stops at the A323?). In all, Wider Normandy has 22 Grade II listed buildings.
- Flexford has a Scheduled Ancient Monument, a Romano-Celtic temple complex 385m west of Long Common. List no: 1019641 which lies between Flexford and Wanborough. This not mentioned.
- On page 50 Normandy and Flexford are again considered separately, instead of together, as stated.

ANNEX C
This development is not driven by objectively assessed need as required by the NPPF, but by commercial considerations and GBC's willingness to build on the Green Belt, rather than more difficult options within Guildford itself. The NPPF places priority on Evidence Based planning. This plan has been put forward by Taylor Wimpey, who have options to buy this land and therefore wish to develop it for commercial reasons, as developers quite rightly do. However, to get over the inconvenience of it being Green Belt land, they have offered a free school in return for permission to build 1,100 houses.

Once the offer of a free school in Normandy/Flexford was made, and only then, GBC started to talk about a lack of school places in the West of the Borough, based on need from Blackwell Farm, Ash and the Normandy/Flexford development. Normandy currently has about 20 children.

An amendment was passed at the GBC full Council meeting on 24th May which stated that if the need for a school was not proven, then there should be no development in Normandy/Flexford. It therefore follows that significant need for secondary school places from outside of Normandy should be shown, as children from the new development in Normandy/Flexford cannot be used to justify the school. At the GBC meeting on the 24th May I heard one councillor say "but if the school fails where will we build all those houses?" The houses are the driver and the school is the enabler for building on the Green Belt.

The Infrastructure required is not there

Transport

Roads

The A323, the road that passes through Normandy, is nearing capacity. Travelling eastwards, to turn into Bailes Lane requires a right turn on a sharp left hand bend. Sometimes it can be a long wait, and traffic builds up. Other junctions in Normandy are similar. The traffic lights at the junction of the A324 and A323 have been identified as a bottleneck in the Surrey County Council Strategic Highways Assessment Report (SHAR) 4.9.1, as has the roundabout at the junction of the A323/B341.

Queues also build up on the A323 in Normandy on Mondays, when the rubbish truck collects. There are few bus bays, so traffic queues behind buses. There are no cycle lanes, which means that traffic has to slow and wait to pass cyclists on this narrow road, which has many bends as it passes through Worplesdon.

Westwood Lane and Glaziers Lane form the borders of the Normandy/Flexford Site. Westwood Lane, C16, is a narrow country lane on which two entrances into the Normandy/Flexford site are planned. Queues will form while cars and fairground equipment wait to turn right into the development. Glaziers Lane, D60, where a single entrance is planned is also narrow. These rural lanes have developed over time to allow people to travel between the hamlets of Wider Normandy. They were never meant for, nor are they suitable for, any weight of traffic.

Queues will build at the junction of Westwood Lane, the A323 and School Lane, where Wyke Primary School is located close to the junction. The SHAR table 4.3 anticipates that traffic on Westwood Lane will increase by 1284%. Anticipated improvements to Westwood Lane are not due until 2021-2026. The main area of concern has to be that of traffic. The difficulties arising from the use of the A3, B3000, A323, A322 etc. have all been referred to however the proposal is that the A46 land should hold an additional 1100 homes would generate over 2000 car journeys at peak times.

The exit onto the main roads are via Westwood Lane/A323, Glaziers Lane/A323 and neither of those junctions could be widened or improved. At Westwood Lane the added difficulty is the access for parents to Wyke School, who park along Westwood Lane and cross the busy A323. SCC are presently trying to employ a Lollypop lady but have so far been unsuccessful. The safety for the children at that junction is paramount.

At Glaziers Lane/A323 junction the problem is width of the road combined with flood damage and concerns re subsidence. The road is not capable of widening due to the properties on either side of the road.

So far as the exit onto the Hogs Back is concerned again the junction is sited on an ANLV (soon to be AONB) and it is highly unlikely the junction can be improved. It is also subject to frost and ice making the road impassable at times. People who live in Normandy need SUVs if they are not to be cut off.
Improvements to the junction at Puttenham Hill, if confirmed, will take place between 2021 and 2026. It can be seen that traffic from developments is already preceding improvements to roads. Moreover, the improvements to the A323 and the A31 are anticipated, not confirmed. Given the nature of the A323, it is difficult to see how it can be turned into a major link between Aldershot, Ash and Guildford.

**Rail**

The Normandy/Flexford site is considered sustainable because it is next to Wanborough station. Children from Ash attending the school and commuters to Guildford are expected to use the train. Wanborough is a small rural station, unmanned, with a platform suitable for trains with 4 carriages or less. There are trains to Guildford and Aldershot half hourly, and an hourly service to Reading, which stops at Farnborough. Commuters wishing to travel to London have to change at Guildford onto a service which is already crowded at peak times.

To find out availability on peak hour services I went to Wanborough Station on Monday 6th June between 7:30am and 8:30am. Trains to Reading and Aldershot were quite empty. The 07:48 to Guildford was quite full, but some seats were available. With 40 people standing per carriage, that train could probably have taken 200 passengers. The 08:18 was slightly less crowded. With full standing, this train could probably have taken another 300 passengers. That is 500 spaces on peak hour services for a development with a population of over 2,500 people. Even these few spaces are likely to be unavailable, owing the AUE. The train, a 17 minute journey from Aldershot to Guildford, is likely to be a popular option for AUE residents working in Guildford as it is a 20 minute walk or 10 minute cycle to the station, an overall journey time of 37 minutes.

GBC is in talks with the Train Operating Companies and Network Rail, but any improvements to the service are aspirational.

**Cycling**

Policy A46 mentions an off-site cycle network to Wanborough station. It is not clear where this proposed cycle network would be. There is no space in Glaziers or Westwood Lane, closest to the site, or on the A323. Policy A46 also mentions an off-site cycle network to the Christmas Pie Trail (a rural track), which would lead to key destinations, unspecified.

**Heritage Assets**

It is a core principle of the NPPF to conserve heritage assets so that they can be enjoyed for their contribution to the quality of life of this and future generations.

There are seven Grade II listed buildings and one Grade II listed tomb adjoining or close to, this site. The houses are: Westwood Place, Buckhurst, Great Westwood, Halsey's Cottage and Glaziers. The other buildings are: Great Westwood Barn and St Mary's Church. The tomb is the Pirbright Tomb.

**Glaziers**

Glaziers, a lovely timber framed 16th century cottage, the Glaziers of Glaziers Lane, borders the site. GBC's own plan, according to the Sustainability Scoping Study, is that a site is red for development if an historic house is within 25m. Glaziers is within 25m of the site.

I attach a map showing where these properties are in relation to A46.

**The Thames Basin Heaths Special Protection Area (SPA)**

Policy P5 of the GBC Plan states that 8 ha should be set aside for every 1,000 residents. GBC also estimates an average of 2.4 people per dwelling. As this site proposes to build 1,100 homes, 2,640 people, the SANG should be at least 21 ha.

**Degradation of Ancient Woodland and Ancient Trees and loss of Biodiversity**
Part of this site was originally parkland, laid out with oaks, many of which remain, belonging to Westwood Place. Some oaks are on the Ancient Trees Inventory and are more than 5m in circumference. They are at risk of damage from children, pets, pollution and building work.

There is ancient woodland both on the site and adjoining it. Both will be degraded by cat predation. The woodland on site will be further damaged by children and pollution.

Flooding

Wider Normandy is prone to flooding in all but the driest months, as it is situated in a valley with Ash Ranges to the North and the Hog's Back to the South. As the soil is mostly clay, the drainage is poor. A number of small streams swell and burst their banks in wet weather. There are springs on both the slopes of Ash Ranges and the Hog's Back. The water from these springs, together with surface water, collect in Wider Normandy to form the infant Hoe Stream. The Hoe then passes through Woking to join the River Wey.

The Hoe is notorious for flooding. Woking Borough Council (WBC) and the Environment Agency have worked together to alleviate flooding from the Hoe. As part of the mitigation project, SCC have designed the Hoe Valley Path which follows the Hoe Stream. It is managed by WBC and is designated as an SNCI because of its varied habitats.

Any flood mitigation should therefore be of the greatest sensitivity, in order to protect the Hoe and to avoid flooding other areas of Wider Normandy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A22 Land North of Keen's Lane

Parts of this site are within the 400m zone of the Thames Basin Heaths SPA (SPA). I have no objection to the care home, but have concerns over damage to the SPA from the rest of the development, 140 houses.

Whilst there is a covenant banning pets for the care homes, there is not one for the housing. If cats are not banned there is a risk to the SPA. GBC state that only the most immobile will use these homes, such that they are unlikely to access the SPA for recreation. How can this be controlled? Will mobile C2 potential occupants be turned away? And what would the criteria for rejection be? If the occupants have dogs, there is a severe risk to the SPA.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s draft Local Plan proposals to build 1,800 houses, an industrial park ad a highway on the slopes of the Hog’s Back at Blackwell Farm, which will:
• Destroy views from the Hog’s Back ridge – a nationally designated Area of Outstanding Natural Beauty
• Remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
• Increase tailbacks on the A31 and traffic congestion
• Result in rat-running through local roads
• Add to Guildford’s pollution

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A26; Blackwell Farm.

Unmet housing need is not a reason for building on the Green Belt. Exceptionality has not been shown. (NPPF 87-89)

This site is currently farmed and an AGLV. NPPF states that good agricultural land should be retained for food production. In the light of the Brexit decision GBC should be even more slow to use this valuable farming land for development ( NPPF 112)

Blackwell Farm is home to a wide variety of animal and plant species. Building here will harm Biodiversity. ( NPPF 123 point 4 refers)

The Surrey Hills AONB will be damaged by a proposed new road. ( NPPF 115 )

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/7899  Respondent: 8596673 / Peta Malthouse  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object strongly to the strategic development in Normandy/Flexford, Policy A46 in the plan.

Boundaries of A46

I am confused about the boundaries and size of A46. The developers have produced a Site Concept Master Plan, but the boundaries are different to, and the site would seem to be a little bigger than, the site set out in GBC's Submission Plan on Page 231. The developer's plan stretches further to the east, and GBC's stretches further to the north. I have worked with GBC's boundaries, although I believe they are incorrect in relation to the extension to the north.

In the Settlement Hierarchy Normandy scored highly for sustainability, largely for its community spirit, rather than facilities. Flexford had only open green space and a station. GBC would seem to be set on damaging the most sustainable aspect of Normandy, its community spirit, by doubling the size of the village. The infrastructure at present is adequate for the population, the proposed 'infill will do nothing to improve sustainability rather it will place further pressure on infrastructure by way of lack of sufficient transport. Flexford is even worse off. It will lose its green space and the train will be much more crowded; standing or no place at all at peak times. There is insufficient room to allow access from both sides of the platforms or parking. In addition situation of the station next to the blind hump backed bridge set on a squint over the line will prevent safe access and egress to it in the proposed far greater numbers.

In exchange Normandy and Flexford get shops, which they don't need and will not be used. I have to express complete frustration with GBC who have been told of the survey prepared by the Village in advance of a neighbourhood Plan. Residents think a shop is a nice idea but will not use it which is why in the last 15 years 3 shops and a post office have closed, 2 pubs and a garage. The provision of shops will not add to the sustainability of the village and will, as have others, go broke.

Objections

1. This strategic site is not based on evidence, as required by the NPPF, but by a developer-led plan which offers a free school. In essence, GBC is agreeing to a proposal to build a large secondary school in the Green Belt, where the roads are inadequate, public transport overstretched, where there are only 20 children resident in the area. There is no opportunity to cycle or walk or to school. A school of such a size would involve travel to and from the area of 1200 pupils and 300 staff.

There is no need for another secondary school in West Guildford. In 2013 the draft Sustainability Appraisal specifically stated that there was adequate secondary school provision throughout the Borough, except Central Guildford. The GBC 2013 Plan contained the sites at Blackwell Farm and Ash. So what has changed between 2013 and 2016?

The number of houses in Blackwell Farm has been reduced from 2,250 to 1,800.

The number of developments in Ash has been reduced, but a strategic site of 67ha has been added, so it is difficult to compare, but the number of hectares available for development has been reduced. So why, if there was not a shortage of secondary school places in 2013, is there one now? The children from the Normandy/Flexford site should not be included in the numbers, as it would be in contradiction to logic (a circular argument, the school exists because of the children who exist because of the school). If a school is needed for children in Ash then it should be built in Ash on a small amount of the additionally set aside land.

1. It uses Green Belt Land without proving exceptionality. The land used by this site has been assessed as the most sensitive Green Belt by GBC. (NPPF 89)

2. The Infrastructure required is not there.
The A323, the road that passes through Normandy, is nearing capacity. Significant new developments further west (Wellesley Place in Aldershot and at Ash) will place additional strain on this road. Improvements to the A323 through Normandy are not due until 2021 - 2026. The budget allocated is small. Their nature is unspecified and they are not guaranteed. Westwood Lane and Glaziers Lane form the borders of the Normandy/Flexford Site. Westwood Lane, C16, is a narrow country lane on which two entrances into the Normandy/Flexford site are planned. It is single lane at the rail bridge which is offset and height limited. Glaziers Lane, D60, is even narrower and there are no planned improvements. Glaziers Lane features narrow entry and egress onto the A323 and a hump back bridge over the railway also set at an angle with blind summit obscuring the access and egress from Wanborough Station.

The Normandy/Flexford site is considered sustainable because it is next to Wanborough station. Children from Ash attending the school and commuters to Guildford are expected to use the train. The train will not provide the level of service suggested, as it is already busy at peak times, and as the AUE develops, will be full when it leaves Aldershot, before calling at Ash, Wanborough and Guildford. The Platforms cannot accommodate long trains. It is not accessible for disabled users and is unmanned. It is sited next to Ancient Woodland and could not accommodate even medium scale redevelopment. It has 8 parking spaces and provides access to a builders yard.

Policy A46 emphasises travel by bus, train and bike, but the reality is that owing to shortcomings in these modes of transport, at least 1,000 residents' cars will stream in and out of this site at peak times. Additionally a significant proportion of pupils and staff of the secondary school (1,200 pupils and 300 staff) will also have to use a car to get to school. Even with the anticipated improvements to the A323 and Westwood Lane, the effect on the roads will be severe.

The junctions of both roads with the A323 and the A31 Hogs back cannot be improved. The A31 junction would involve changing road through what is at present AGLV but which is expected to be changed to AONB as it is presently recommended for approval as such. The A323 junctions would involve demolition of buildings one of which is a SNCI containing a Grade11 listed tomb.

The proposed site for Travelling Showmans Guild is another ‘sweetener’ offered by the developer, which is illogical. Normandy has a successfully integrated site on the Guildford Road at A50 Whittles Drive. It was only a few years back that the owner of the adjacent land offered the land for Travellers pitches but this was refused. If expansion is needed then enquiries should be made there. Although the owners of A 50 find it difficult to manoeuvre their equipment (fairground rides) into Whittles Drive they would find it impossible to do so to gain access to A46. I have no objection to expansion of the site at A50.

The NPPF 30 and 35 refer

1. Heritage Assets

It is a core principle of the NPPF to conserve heritage assets so that they can be enjoyed for their contribution to the quality of life of this and future generations. There are seven Grade II listed buildings and one Grade II listed tomb adjoining or close to, this site. The houses are: Westwood Place, Buckhurst, Great Westwood, Halsey's Cottage and Glaziers. The other buildings are: Great Westwood Barn and St Mary's Church. The tomb is the Pirbright Tomb. Glaziers and Westwood Place face particular threats, none of which are recognised in the Plan. Glaziers is within 25m of the site, red for development in GBC's Sustainability Scoping paper. Westwood Place faces the proposed site upon which a line of ancient oaks marks the approach to the house.

I attach a map showing the sites which also includes sites of National Archaeological Importance and potential archaeological importance. No consideration has been given in this plan as to how these historic buildings will be protected once the greenbelt protection is removed. Indeed I believe they will be damaged.

It is important to note that the owners of the land have allowed hedges to grow without restraint in the last few years since GBC started to make enquiries about available land. This has masked the openness of the site and interfered with the setting of the houses. This can however be remedied.

(NPPF 126)

1. The Thames Basin Heaths Special Protection Area
The threat to the SPA from the proposed site has not been given enough weight. Two entrances to the SPA are within easy reach of the site, Dolley's Hill (600m) and Nightingale Road (1k).

Dog walking is of particular concern to SPA managers for the damage they do to the SPA. It can be expected that a large number of residents will have dogs, the pet of choice in the countryside, and will require somewhere to walk them. However good the SANG provided, it is inevitable that a good number of dog-walkers will prefer to walk their dogs on the SPA, especially in winter, as the SPA is dry and land in Normandy is wet. A46 will harm the SPA

(NPPF 113 and 117 point 3 and 118 point 1)

1. Degradation of Ancient Woodland and Ancient Trees and loss of Biodiversity

Ancient Trees, registered on the Ancient Trees Inventory, are at risk of damage from children, cats and dogs, pollution and the building work required to develop the site.

There is ancient woodland both on the site and adjoining it. Both will be degraded by cat predation. The woodland on site will be further damaged by children and pollution.

St Mark's Churchyard SNCI is within 400m of the site. This SNCI contains the rare Green Winged Orchid, which is sensitive to disturbance. I do not hold out any hope of these rare plants surviving the building work. Normandy Common SNCI and Normandy Pond SNCI will be affected by pollution. Surrounding this site are many UK BAP sites, which will be disturbed by the initial build in particular, birds being especially vulnerable. There is a Traditional Orchard BOA bordering the site.

The SANG will not compensate for this loss of biodiversity, nor will the gardens of the development, which will not provide the openness required by many bird species that currently use the site. If this development goes ahead Normandy will have a net loss of Biodiversity of approx 46ha. (NPPF 118 point 1 and 109 point 3)

1. Loss of Agricultural Land

This land is currently farmed. It is mostly hay meadow, with some pigs and horses. It is Grade 3 agricultural land. The Government places a high priority on using lower grade agricultural for building, and retaining other grades for food production. This Grade 3 land should remain in agriculture. Historically this land was farmed as Market Garden and alongside fruit and nut orchards, remnants of which appear in the hedgerows, supplied Guildford and Aldershot. Following Brexit GBC should be slow to discount this valuable asset (NPPF 112)

1. Flooding

The site is Flood Risk 2 and Flood Risk 3 in places. The site is one of the sources of the Hoe Stream (NPPF 100). The sewerage system appears to be already running at capacity and could not cope with the proposed development. Footnote 9 for NPPF policy 14 indicates that development in locations at risk of flooding such as at Normandy/Flexford should be restricted.

1. Degradation of the view from the Hog's Back AONB

GBC’s POLICY P1 states that. All proposals will be considered against whether they conserve and/or enhance the setting and views of the AONB

The best views from the Hog's Back along the A31 are to the North, towards Normandy. A46 will bring a large expanse of taller buildings with street lights. In summer the site will be partially hidden by trees, but at night it will be clearly visible, and also in winter when the trees are bare. Light pollution and dense housing will spoil the view from the Hog's Back. This development will neither conserve nor enhance the AONB, but will harm it. It is sad but the view to the South of the Hogs Back is totally obscured along the whole of its length (NPPF 115)

Summary
The need for school on this site has not been arrived at by means of evidence. A46 is not sustainable. In my view there are seven contradictions to principles in the NPPF. Some of these cite exceptional need as a reason for ignoring the principle, however, is it reasonable to ignore loss of Biodiversity and likely damage to the SPA and spoiling the view from the Hogs Back and Flood Risk 2 & 3 and spoiling Grade II listed houses and losing agricultural land?

I consider that the Transport arrangements mitigate wholly against the use of this site for any of the purposes claimed.

I am at a loss as to how the current residents of Normandy and Flexford will benefit from this plan, or in what way Normandy and Flexford will be more sustainable.

More information in Annex C (NPPF 87 - 89, 30, 35, 129, 118, 112 and 115)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the removal of the land allocated in Policy A46 from the Green Belt by “inset” being that land presently defined in the 2003 Plan as the ‘settlement area’ and it’s extension (NPPF para 83 and 84).

No “exceptional circumstances/very special circumstances” have been given in support of this which redraws the Green Belt boundary for the land in Policy A46 for the present properties along the Guildford Road/Westwood Lane and Glaziers Lane by extension and removal from Green Belt.

I believe the position set out in 2003 Plan should be retained and that the whole of Administrative Normandy (Christmaspie, Flexford, Pinewoods, Willey Green and Normandy) should remain washed over by the greenbelt.

Once a Green Belt has been established and approved, it requires more than general planning concepts to justify an alteration.”

No “exceptional circumstances “ for such re-drawing of boundaries have been offered by GBC in the context of the Local Plan process, so how can residents judge the veracity of this proposal?

The effect would be to urbanise the 2 settlements and destroy the openness and character of this important Green Belt site(s)

SUMMARY

- GBC state that the Town Centre is the most sustainable location to build. The majority of development in is the Green Belt.
- GBC state that they will focus on brownfield development; the majority of building is on greenfield sites in the Green Belt.
- GBC make a priority of Biodiversity. Policy A47 plans to build on an SNCI. The amount of green space is the Borough is reduced by 218ha.
- GBC's policy is infrastructure first, development later. Policy A46 - the developer hopes to deliver in 1-5 years. The infrastructure improvements, minor as they are, will not start until 2021.
• GBC states that they will work with neighbouring Boroughs as the Duty to Co-operate requires. The first commuters from the AUE (Rushmoor) will use the A323 from 2016. Improvements to the A323 start later. The improvements to the A323 will be insufficient to mitigate this increased traffic in any event. There appears to be no consultation with Rushmoor.

To be credible, GBC need to set out policies and then meet them.

Their policies regarding use of greenbelt for housing and Travellers is flawed as no ‘exceptional circumstances’ have been given to support this. They have used the construct of insetting in order to try and push the ability to deliver on housing and Traveller pitch numbers without justification and failed to understand that the greenbelt should be applied as a constraint to those figures with encouragement to make better use of the land already allocated to Urban development in Ash, Tongham and Guildford Town. Brownfield sites in these areas are already sufficient to meet any agreed target.

**Objection to Policy A47 Land to the East of the Paddocks, Flexford**

GBC’s consideration for this site says.

The majority of the site is designated as an SNCI. The site lies within an area identified as a ‘Water Vole Alert Area’. These areas were identified by the National Water Vole Database and Mapping Project in 2012.

The Government is committed to halting overall decline in biodiversity. Building on this site does not support this commitment. I am very disappointed that GBC could consider building on an SNCI. Are our natural assets safe in their hands?

Even though it is small, this site will generate additional traffic, when the roads are already at or nearing capacity.

NPPF 109 point 3 refers.

Again no exceptional circumstances are put forward to justify this.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to A49 Land set aside and insetted at Palm Nurseries Site Normandy

This area is to be taken out of green belt and the policy and site are inaccurately described. (See above comments on ‘Consultation’) No ‘exceptional circumstances ‘are claimed or can be justified

I object to the use and to the idea of insetting land which is in effect done only to justify use of greenbelt for Traveller pitches. (Advice was obtained to that effect from GL Hearn and has been used to support other policies throughout the Borough.) The land is not accurately described. It is presently occupied by 6 pitches who are licensed on the basis of both personal and temporary permission, given only to allow GBC time to find alternate land to allocate pitches. The Planning Inspector has already commented that this is inappropriate use of the greenbelt. It is not sustainable. The site is not occupied by Travellers but instead sublet mainly to Eastern Europeans. There has been a police raid with firearm use and the Borough Council are or should be aware of who occupies the site and how it is used because it is commonly known in the village and widely known by for instance social services and other service providers The SOS has already called in an additional plan which sought to add two further pitches which the SOS refused again citing the unsuitability of the site for Travellers. These facts are known to GBC and it is difficult to understand where this additional information can be found within their documentation. There are no exceptional circumstances sufficient to remove this land from the greenbelt.

It is important to note that unlike other Traveller sites there is no suggestion in the policy that this should be preserved for Travellers.

It has no common boundary with any of the previously settled land and sits as an island within green belt as a totally new site. Such development is highly inappropriate. Insetting land for Traveller sites in the greenbelt is a fabrication and construct which cannot be sustained by arguing exceptional circumstances/very special circumstances

Recent case law would show that this part of the plan is unsound and not legal

They are:

- Gallagher Homes Ltd v Solihull Borough Council [2014] EWHC 1283 (Admin)
- IM Properties Development Ltd v Lichfield DC [2014] EWHC 2440 (Admin)

In the Solihull BC decision in particular

“Exceptional circumstances are required for any revision of the boundary, whether the proposal is to extend or diminish the Green Belt.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objection to Policy D4 Development in urban areas and inset villages

Development in urban areas should be vastly different to development in villages. In this the two are lumped together. Most of Guildford's villages contribute to the openness of the countryside. Their buildings are generally low rise and widely spaced, giving views of the surrounding countryside. The nature of the Guildford countryside will be spoiled if the open character of its villages is damaged. Allowing urban density development within inset villages will damage villages. Development is possible in washed-over villages, either by using brownfield sites such as redundant garages and pubs, or permitted development, such as rural exception housing. It is these types of developments that will preserve the character of the countryside. D4 seeks to suburbanise the countryside. Indeed we have already seen the effect of this at 'Cunningham Close' and Beech Lane' where the developers have been allowed to build in effect 3 story buildings using town density rates (NPPF para 86 ) Beech Lane was an ‘exception site’ yet problems with flooding which have been exacerbated by this build have been ignored

I object to Policy E3

GBC’s desire to promote and retain Office space within the town is commendable but naïve.

I am a joint owner of office space in Guildford and along with others find it hard to let it when it becomes vacant. Up to date working methods make very good use of the internet. Modern working practices involve hot desking, cloud storage of documents, telephone conferencing and other up to date methods of communication which reduce the need for office space down to that of a hub rather than a work place. My own business has halved the need for office space in Guildford yet increased our range for provision of services to 4 counties instead of 2. Factors include time and cost of travel, difficulties with public transport and car use, none of which will be addressed sufficiently by the plan. My own property was put on sale for over 6 months and has had to be provided instead on a short term let to the new occupants. (this month 7/16) The office is modern and well connected and sited with car parking! The idea that office owners would have to advertise consistently for up to 2 years would detract from the desire to build and provide space. Pop up offices in fully serviced provision is the way forward and there is already no shortage of that. There is a slow turnover of office space in the urban area and town centre and I object to Policies B1-8.

I also object to the amount of warehousing space set aside at B8.

We are in an age where supply and delivery is dealt with in a sophisticated manner using IT/barcoding/robotics all of which are more and more centralised. We do not need to dedicate acres of development land to this when the urgent need for Guildford Town is housing.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/17375  Respondent: 8596673 / Peta Malthouse  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objection to Policy E7; North Street development.

GBC has failed to plan proactively for the 21st century when proposing 45,000 sq m of new retail space and has not recognised the role that residential development can play in ensuring the vitality of a town centre.

I object that 45,000 sq m is being set aside for increased retail space in Guildford Centre. This represents a 40% increase in retail space.

Internet shopping now accounts for 13% of all purchases nationally, up from 3% in 2007. Tesco, Sainsburys and Morrisons are all making losses. Austin Reed is closing its shops this month. The British Retail Consortium anticipates
that thousands of stores and 1m jobs will be lost by 2025. The popularity of Amazon and clothes shopping online has come about mainly due to time being wasted in traffic jams and the huge cost in parking (£1.60 per hr in Guildford)

Guildford has been successful in maintaining retail capacity in the past. However, it will be shaped in future shaped by the forces that are changing high streets everywhere; the internet, an overall decline in clothes shopping and more money being spent on experiences and sport. It is not planning for the 21st century. Its assumption that it will continue to maintain and increase shops is flawed. Has there been much interest in this site from retailers?

This space could more profitably be used to fulfil the Government’s and GBC's commitment to building sustainably on brownfield sites and using residential property to boost the vitality of town centres. GBC is only planning to build just 1,300 homes in the town centre. The town centre is where many people would like to live. (NPPF 20 and in particular 23 points 1 & 9 refer)

POLICY H3 Rural Exception homes

There is no reference to Paragraphs 87 to 89 on pages 20 and 21 of the NPPF which should be included in this policy. It should also be made clear that rural exception homes are not a loophole for those on the Guildford Borough housing list through which to move into the countryside but are made available only to meet local need for people with a village connection that should be monitored and agreed by the Parish Councils concerned.

The Future

How can homes be built in Normandy to meet the needs of it’s population?

By retaining ‘washed over by the Greenbelt’ status, GBC has the opportunity to develop a plan which as the NPPF intends will promote diversity and protect our heritage assets. There is also the not so small issue of retaining farmland and rural community. I would hope that a policy can be drawn up by GBC to cover these points but also to provide details of appropriate density and building styles which will have the effect of promoting openness and this preserving the greenbelt.

In the last plan period the Administrative area of Normandy was able to increase household numbers by 10% and there is no reason to think that this ‘windfall housing’ cannot be replicated in the upcoming plan period.

The Govt has changed the definition of ‘affordable housing’ and there are sites where a small amount of housing by way of flats for sale and rent could be provided both for the young people of Normandy but also the elderly who may wish to free up their family homes in their declining years for ground floor but smaller accommodation which they can manage. There is also a need for supported housing for our elderly. This could be provided under the rural exception scheme as we have before. It remains very important however that there is a limit on roof height and ample spacing (i.e. appropriate density) between homes. GBC have failed to implement a policy in this regard in recent years and the effect has been simply to spoil and change the nature of the area in some places.
I have not been able to read the whole plan because of my complaints above. I hope that I have provided useful information and comment. I will have to leave others to comment elsewhere.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy P2 insetting of Normandy & Flexford

There are no exceptional circumstances demonstrated sufficient to warrant removal of both Normandy and Flexford from their washed over by the greenbelt status

P2 mentions Normandy and Flexford separately in the list of villages to be inset in the Green Belt. However, the new Green Belt Boundary shows that they have been considered as one village. By insetting GBC seek to make ‘Greater Normandy’ referred to in their documentation

Of course both Normandy and Flexford both contribute to the openness of the Green Belt. GBC acknowledge that it is the most sensitive Green Belt. Therefore it should not be inset as it is not sustainable. GBC may have inset Normandy and Flexford in order for A46 to go ahead, against their own policy and the policies of the NPPF on Green Belt. They have mistakenly set about removing the greenbelt status on the basis that they believe more development and shops would make the development sustainable. It will not. It will simply provide development that will put more strain on transport and services (NPPF 86)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/17373  Respondent: 8596673 / Peta Malthouse  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to Policy P3 4.3.17, the creation of Green Belt between Ash Green and Ash/Tongham

"The Green Belt boundary has also been extended between Ash Green village and the Ash and Tongham urban area in order to prevent coalescence."

New Green Belts should only be established in exceptional circumstances, for example when planning for larger scale development such as new settlements or major urban extensions.

This is not the case here. (NPPF 82)

In fact by pursuing the creation of greenbelt here the GBC seeks to transfer the benefit of the greenbelt in Flexford and Normandy. This has since its inception prevented coalescence between the land marked in the 2003 Plan as the Urban development land of Ash and Tongham and the Urban Development of Guildford. (Part of the reason given for building a school on the A46 site is to provide for children in Ash)

For many many years Ash has been seen as part of the conurbation of Aldershot and the Blackwater Valley. This huge area of development needs to be contained within solid defensible boundaries. By attacking greenbelt at Normandy and Flexford and creating a ‘new inclusive ‘Village of ‘Greater Normandy ‘the openness of the remaining greenbelt will be hard to defend

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In Policy P3 (para 4.3.28) GBC refer to an area of countryside near Ash and Tongham who are represented by the current and previous Leaders of the Council. This is land designated as countryside beyond the greenbelt and yet it appears to be given preferential status above that of greenbelt ‘we will seek to limit any development in the countryside unless it can be demonstrated that it is necessary in that location’. Contrast this with all the site allocations and insetting in Normandy and Flexford taken without regard for their proximity to SPA and special protections for habitats and wildlife SNCI status etc or any attempt to justify exceptional circumstances. This is inconsistent and legally unsound.

Heritage Assets

There are other inconsistencies. Policy A36 has a requirement to ensure the Grade II listed building on the site is not harmed. Policy A46 has no requirement to mitigate the harm to the Grade II listed buildings by the site, one within 25m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/17377  Respondent: 8596673 / Peta Malthouse  Agent:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**I object to the proposals for housing in the Town Centre S1 and S2**

I object that the Policy does not include a density figure, or range, for new housing within the urban area of Guildford, or Ash and Tongham. With suitable land so scarce and pressures mounting on open land and Green Belt surely it is time to be pragmatic and realistic by specifying higher densities for building where this can be done without harming the quality of life of the community.

There is a need in the town for more flats which are conveniently located for independent older people that wish to downsize from their current residential accommodation as well as young professional couples and singles.

The development of the former Surrey Advertiser offices on Martyr Road is an example of what is required.

Similarly there is no provision or guidelines for acceptable house types in the greenbelt areas which should be there and enforced to retain openness

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Comment ID:** PSLPP16/17371  **Respondent:** 8596673 / Peta Malthouse  **Agent:**

The Plan is flawed in places and confused. GBC has totally failed to implement the Guidance set out in the NPPF with regard to using Greenbelt land for any development. In recent correspondence dated the 28th June 2016 the Minister Brandon Lewis said inter alia

*The Government has put in place the strongest protections for the Green Belt. The Framework (NPPF) makes it clear that inappropriate development may be allowed only where very special circumstances exist, and that Green Belt boundaries should be adjusted only in exceptional circumstances, through the Local Plan process and with the support of local people. We have been repeatedly clear that demand for housing alone will not change Green Belt boundaries’*

Other guidance has emanated from the Dept. for instance on numerous occasions GBC has had cause to appears before the Planning Inspectorate in respect of land set aside for the Travelling Communities Sites in Normandy were dealt with by way of temporary and personal permissions being given to allow GBC to come up with alternative and suitable sites. In respect of Palm Nurseries a further application was called in by the Minister who made it clear that no further development on the land was acceptable because the land was greenbelt, meeting all of the greenbelt standards but in particular openness.
Recent decisions on the question of sites in Normandy and Flexford are set out below for your ease of reference

- Palm House Nurseries GBC 09/P/01851, Application 12 November 2009 Appeal Ref: APP/Y3615/A/10/2131590 Decision 24 Feb 2011
- Green Lane East GBC 10/P/00507, Application 8 March 2010 Appeal Ref: APP/Y3615/A/10/2140630 Decision 14 June 2011
- North Wyke Farm GBC 14/P/00779, Application 17 April 2014 Appeal Ref: APP/Y3615/W/15/3002308 Decision date: 14 July 2015

1. It is clear from the Plan that an assumption was made from the start that Guildford needed to expand as a Regional Centre and as such the Brownfield sites in the town should be allocated to Commercial and Retail use. That assumption then turned into a presumption that it would need to build on the Green Belt to meet its housing target.

This presumption has led to building on the Green Belt becoming the main focus for development of housing. The Town Centre Plan is incomplete the funding for infrastructure falls far short of what is required to bring about such large scale development and yet the ‘balancing exercise’ of exercising constraints on the building proposed has purportedly been done.

They as such have not followed the NPPF with regard to the Greenbelt as constraint appears not to have been exercised in this regard by any measure The question of ‘exceptionality’ or ‘very special circumstances has not been addressed in respect of any of the sites removing land from greenbelt, either by way of increasing ‘settlement boundaries’ insetting’ or allocating green belt sites to housing. Neither has it been addressed when removing land from urban development areas to create new green belt

1. There appears to be no Heritage Site Assessment rather a MERE LIST OF Grade 1 and 11 listed buildings accessible (in theory) from Surrey County Council’s website. Indeed I found the information almost impossible to find and I am a retired lawyer! I would say that this would be necessary in order to consider any development proposals it is not sufficient to just raise this issue at Planning Permission stage (NPPF 126)

GBC hopes to remain an historic county town and be a centre for technological industry at the same time. In order achieve this it would need to have a top quality medium rise (8-10 story) technological centre, with workplaces, retail, leisure and flats, in an area offset from the town centre, Slyfield or somewhere similar. This would enable people to live and work sustainably.

The historic town centre should be preserved for retail, tourism, housing, particularly more one and two bedroom flats, and leisure. It would be cost-effective and sustainable, as there would be less need for expensive upgrades to transport infrastructure, as people would not be travelling in so much from the villages. The Town Centre would be transformed from being a ‘ghost town’ to one living and breathing with residents enjoying the arts theatre restaurant and cafe culture

Taller buildings in Guildford will have to come, if not in this Plan, then in the next, or the one after.

This would leave the important Green Belt countryside available for farming, wildlife, tourism and leisure. Guildford is as much defined by its historical centre as it is by its greenbelt countryside and the greenbelt should be as carefully preserved as the historic town it surrounds. Much of Guildford history is found in its greenbelt countryside but the Borough Council seem unaware of this. In respect of Normandy and Flexford a very comprehensive assessment was provided as part of the Parish Council response but there is no reference ito it in the plan other than to highlight an area on Policy page A46 which is considered to be of High Archaeological Potential. Certainly no account appears to have been taken of it, One such property ‘Glaziers ‘Grade 11 is within 25 metres of the proposed site at A46

1. A further fundamental flaw is the amount of infrastructure improvement required to deliver the Plan, much of which is unfunded. Some improvements are dependent on external providers, the Highways Agency, Surrey County Council and Network Rail, who may have different priorities. I applaud GBC for attempting to tackle the problems that Guildford has with its transport infrastructure. I am not sure how successful they will prove to be. Guildford is by nature a ‘Gap Town’, a route centre constrained by its geography. Many of the ideas for improvement of major pinch points cannot be delivered either because of this reason or because to do so would require land in an AONB or possible demolition of Heritage property. Further some of the proposals will simply not alleviate the problem
2. Another fundamental flaw is the amount of extra infrastructure developers are expected to fund. The bulk of these costs incurred by developers will be passed on to property buyers, driving house prices higher. A recent example of this type of development is found in the neighbouring Town of Aldershot. There the developer has been made responsible for schools community facilities offices etc and the like. The 3850 properties that will be sold start at £395000 for 2 bed accommodation. 2 bed properties in Aldershot are presently £169,000 to £200,000.

The plan is not sound in other places. I would draw your attention to:

**Duty to co-operate**

I can see no evidence that GBC have co-operated fully with Rushmoor Borough Council and Surrey Heath Borough Council. Both the Aldershot Urban Extension (AUE) in Rushmoor and the Princess Royal Barracks (PB) in Surrey Heath will impact on GBC’s transport strategy and housing numbers. Although both Authorities are mentioned, both in the Transport Strategy and the West Surrey SHMA, it is not clear where data concerning these sites has been fed into either Transport or Housing policies.

**Duty to Consult**

The plan is presented using at times impenetrable language and with confusing contradictory information (eg Settlement Hierarchy and Sustainability report for Normandy Flexford see later)

It is inconsistent in approach for instance see A49. The policy fails to acknowledge that present occupation is temporary and personal only. That the SOS has indicated already this is not an appropriate use of the greenbelt. The Borough has also failed to provide in its policy statement despite having done so in other A Policy documents ‘and must remain in perpetuity as Traveller accommodation whilst there remains an identified need for Traveller accommodation in the borough’.

One can only speculate that this is because they are aware they have failed to enforce the personal permission aspect of the present occupation knowing that the sites have been occupied mainly by eastern European workers who are not members of the travelling community but are mere sub lessees. The point is that it is impossible to find this provision elsewhere and one is left floundering on the question of how to respond and properly object. The Evidence base has changed frequently without highlighting and there are masses of it.

The amount and complexity of the documentation is such that it is not appropriate at this stage to allocate the minimum recommended time to the consultation process of just 6 weeks, especially as for Normandy and Flexford the changes have only been suggested in this plan and not mentioned in previous consultation. Indeed I say that in respect of all of the changes at Normandy and Flexford this consultation should be a S118 consultation not a S19 one.

**Late inclusion of Policies A43 and A46 and Insetting in Normandy and in Flexford**

These sites were not included in the last version of the Plan. They were not announced until April 2016. This is the first time residents have been able to comment on them, and have had very little time to consider their responses. GBC have been aware of A46 since 2014. Cllr Paul Spooner had the opportunity to engage with Normandy residents on A46 when he addressed Normandy residents in April 2016, but chose not to take it. The NPPF is quite clear that there should be early and meaningful engagements with residents.

During the last consultation the vagary of the maps made it impossible to respond to the proposal to ‘inset’ the present homes in Normandy and Flexford to the extent that area has been altered, because it was simply not clear. The Parish Council complained of that but no effort was made to respond and the summary prepared by the GBC of the objections was not full and complete.

**Failure to meet the principles of the NPPF**

There are places where the GBC Submission Local Plan does not meet the principles set out in the NPPF and these are dealt with below in context.
In particular, GBC have not met either its own policies on Biodiversity, found in Policy 14, nor those of the NPPF paragraph 14. There will be a significant net loss of Biodiversity if this Plan goes ahead in full.

Paragraph 119 NPPF is also disregarded with its guidance that “the presumption in favour of sustainable development (paragraph 14) does not apply where development requiring assessment under the Birds or Habitats Directives, is being considered, planned or determined”. Guildford surely needs to recognise this strategic policy in view of its close proximity to the Thames Basin Heaths.

The GBC Spatial Vision states "Over 250ha, equivalent to more than 350 football pitches, will be provided in perpetuity for the use of residents and visitors. This space will also support and improve the borough’s biodiversity". This is disingenuous. GBC plans to use 467ha of land that is either farmland or other green space for building. Against this it is creating 249.8ha of mixed use Suitable Alternative Greenspace (SANG) a net loss 218.2 ha of fields and other green space.

THE EVIDENCE BASE

You ask if the evidence base is adequate, up-to-date and relevant. I have objections to parts of the three documents below.

I also object to the fact that it seems apparent there is no Heritage Sites Assessment (as referred to above), there being 22 such sites in the Administrative area of Normandy. There are also 4 sites of Archaeological potential one of which is of National importance and another still under examination

Transport Strategy and Settlement Hierarchy & Settlement Profiles

In the GBC Transport Strategy I object to;

Local Roads Network Strategy.

Major external developments have not been sufficiently accounted for, leading to flaws in the strategy on Local Roads in the West of the Borough. The AUE, 3,850 homes, and PRB, 1,200 homes, are already under development and significant traffic flows to and from Guildford will result. The AUE is predicated on many residents using the car. Local Roads affected will be the A323, A331, B3411 and also the A31. To this is to be added 1,300 homes in Ash and 1,100 in Normandy. The effect on these local roads will be severe. One has to question whether the additional traffic anticipated by the development in AUE and PRB would lead to gridlock as there are already too many problems experienced on the A323 and A31.

Improvements to the A323 and to Westwood Lane are insufficient and delivery is too late. Judging from the sum to be spent, £6.6m, improvements will be minor. LRN9-LRN 13 and LRN 18-LRN19 will deliver improvements between 2017 and 2026. The A323 is especially vulnerable, being a narrow A road with no opportunity to widen it along its length. Large queues already form at peak time at junctions. The planned improvements will be delivered well after the first commuters travel from the AUE and PRB to Guildford.

There will be resulting pollution and longer journeys, frustration for motorists and inconvenience and potentially health issues from traffic pollution for villagers. GBC has not produced a strategy that deals with the quantum leap in commuters from the new developments in West of the Borough and external developments.

More Information in Annex A

AM4 delivery 2020 - 2024.

The Christmas Pie Trail runs from Wood Street to Farnham. The surface is unmade and unlit. It is muddy in winter and narrow where it passes through woods. There is little scope for lighting and improving the surface at the Wood Street end, as it runs through Broad Street and Backside Commons, which are both SNCIs. It is unsuitable for year round travel.
I object to the housing target in the SHMA

I would have liked to have been able to understand how the housing target is calculated, Requests have been made under FIA for information about the modelling etc but this is not to hand in time for the Consultation process.

I accept that the owner of the model that calculates housing need wishes to protect their intellectual property. I do not believe that GBC should accept the findings of the model just because other Authorities have. I would have liked to have seen the input that GBC submitted for the model. A summary of the test scripts run by the developer to show that the model delivers correct results should have been made available to the Borough Council and to those of us who are in a position to check it.

There have been a number of alternative studies carried out, entirely due to the fact that the GBC have refused to work openly with the community on this issue. The GBC used public funds to commission the work of GL Hearn yet failed to put in place proper checks to allow them to comply with their duties. On that basis I would urge you to rely instead on the study produced by

‘Green Balance’ instructed by Compton Worplesdon Parish Councils and by the CPRE

I do not accept and OBJECT STRONGLY that the numbers produced are an accurate reflection of a truly objective housing need in the Borough.

To what extent have GBC engaged with Rushmoor and Surrey Heath? The AUE is 500m from the Guildford border. Have the AUE and PRB been taken into account when calculating the housing numbers, especially as they are intended in part for people who work in Guildford?

Furthermore I object strongly to the treatment of the students from the University of Surrey. Surrey University have failed to deliver promises to house their students in accommodation built on their extensive land holdings. Manor Farm was removed from the Greenbelt in 2003 with a promise to do so and GBC seems to think it is acceptable to agree they should only house 60% of their students on site. Given Guildford almost traditional role as ‘domatory town’ it should be 100%. There is plenty of room for development. Instead considerable ground is wasted both at the university and on Manor Farm for open car parking.

I object to the flawed nature of the Settlement Hierarchy and Settlement Profiles in respect of Wider Normandy

The Administrative Area of Normandy is made up of five hamlets, of which Normandy is one.

The Settlement Hierarchy and Settlement Profiles;

- Confuse Normandy with Wider Normandy (referred to rather quaintly as Greater Normandy by GBC)
- Ignore two of the hamlets, Willey Green and Pinewoods
- Consider Flexford to be part of Normandy, although they have been informed that this is not the case
- Consider Normandy and Flexford as being one settlement when it suits their case, and as two when not
- Claim that Normandy would benefit from shops, with no proof. How up-to-date is any evidence that GBC are using? Is it pre-superfast Broadband? Why have they ignored the reported result of the Household Survey carried out for Normandy PC
- There are 10 errors/omissions in the Settlement Profile for Normandy/Flexford. For example; GBC state that we have one SNCI in Normandy when there are eight: a Scheduled Ancient Monument of National Importance which lies partly in Flexford is omitted.

I object to the fact that there is no Heritage Sites Assessment

even though there are 22 Grade 11 listed buildings in the area 8 of which are sites on the curtilage of Site 46. One of these was occupied till his death by John Cobbett

There are also 2 sites of high archaeological potential and a site of National importance (mentioned above)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**Comment ID:** SQLP16/2028  **Respondent:** 8596673 / Peta Malthouse  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 5: The examination

Do you consider this section of the document complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1) Although the Parish Council acknowledges that the Borough has published much of their evidence and draft documents, together with providing roadshows and events to which the Parish Council have been invited, these have not been found to be helpful generally both by the Parish Council or by the residents of Normandy. The reason for this is:-

1. The opportunity to attend meetings where information is to be disseminated to parish councillors has almost always been notified too late i.e. within 2 weeks of the appointment.
2. Such meetings have often been fixed to take place during the course of the day.
3. When significant documentation has been put out for public consultation it has been sent out at the end of July with the 12 week period for consultation taking place over the summer holidays. This is traditionally at the time when most Parish Councils do not meet. This last period of consultation has ended on the 22 September leaving Parish Councils with little opportunity to meet and approve their consultation document; most Parish Council meetings are held at the end of the calendar month. Most Parish Clerks take the opportunity over August to take a long holiday. Most Parish Councils have only one clerk and often they are part-time.
4. The documentation supplied has been dense and couched in terminology not accessible to most, scattered throughout with acronyms
5. Requests for more accessible information which could be circulated to our residents were basically ignored until we received 38 copies of the disc and a number of documents including the questionnaire on 6th and 8th September
6. The Borough produces a newspaper which is delivered to every home. Nowhere in that did it out line it’s plans to build 13000 homes the large majority of which would be sited along the A323 corridor Ash into Guildford and A322 both roads which already suffer significant traffic problems Had they done so the residents would have been alerted at an early stage. A summary of proposals would have been useful to all residents throughout the Borough. Instead the newspaper simply placed a PR spin on the process of consultation asking everyone to get involved
7. The questions that the consultees have been asked to address are in some instances almost peripheral to the plans and leave insufficient space and opportunity for consultees to give full answer

2) The Borough Council has failed to communicate effectively with residents because, although inviting them to a number of events, the information that has been given has been put before the residents on the basis of “this is to happen” rather than “we would welcome your comments”.

3) There has been an overreliance and an assumption that the residents of the Borough are IT literate to the extent required by the Borough. Where printed information is sought it is provided at considerable cost

With particular reference to the consultation period that ends on the 22 September 2014
1. The Parish Council have been asked to comment on a draft plan which proposes wide scale development based on a housing number in a SHLA which is presently under review. It is impossible in this Parish Council’s view to respond effectively to the consultation without this essential document being available.

2. The Borough Council seeks to obtain effective consultation on this document despite the fact that the maps provided for each Parish show changes to boundaries against a map that is just a blur of colour. It is impossible for the Parish Councils to assess where the settlement boundaries are to start and finish and how the affect of inset is supposed to affect the village.

3. The Borough Council has failed to indicate what level of density will be applied to the development in the Greenbelt areas. Again, it is impossible to effectively comment upon the proposals of the Borough Council without this information. In the Parish Council’s view it is in the interests of all that these density levels are fixed in the Plan

4. The Borough Council is referred to the consultation code issued by the Government which is attached. 12 weeks is the minimum period over which a consultation should be held

5. The Borough Council published their Sustainability Appraisal and Habitats Regulations Assessment on the 7th August with only a 6 week consultation offered alongside the consultation to which we respond. These are essential evidential documents underpinning the ‘Plan’ and should have been available at the outset

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/2544  Respondent: 8596673 / Peta Malthouse  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A49
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object most strongly to the proposals that Traveller sites in my areas should be ‘inset’

The traveller sites at land to the rear of Palm House Nurseries [Policy A49] plus the travelling show-people site at Whittles Drive, Guildford Road [Policy A50] are proposed for ‘inset’. At present, where such sites are located in the Green Belt, they are subject to the planning restrictions associated with the Green Belt. ‘Insetting’ will create small islands of ‘urban’ land in the Green Belt which is irrational.

The land at Palm House Nurseries and Green Lane East was identified at appeal by the inspector as contributing to the ‘openness’ of the Green Belt and this argues strongly that it should remain ‘washed over’ by the Green Belt, as all other surrounding land in the submission Local Plan is proposed to remain in the Green Belt.

The traveller sites are all assessed as being located in Green Belt land of “high sensitivity” that is quoted as a main reason Policy A46 and A47 were withdrawn (Sustainability Appraisal 2017, Table 10.1: Commentary on proposed Traveller site allocations, including Green Belt sensitivity) indicating a further argument against ‘inset’ boundaries for such small plots being established in this area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/942   Respondent: 8596673 / Peta Malthouse   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P2 Green Belt

- I object to the changes to Policy P2 because they have not addressed many of the very large number of comments made to the 2016 plan.
- I object to the new para (1) “The Metropolitan Green Belt will continue to be protected as shown designated on the Policies Map, against inappropriate development. In accordance with national planning policy, the construction of new development will be considered inappropriate and will not be permitted unless very special circumstances can be demonstrated.” The words “as shown designated on the Policies Map” should be deleted. The Policies Map has effectively ignored huge areas of Green Belt protection and the new para (1) is therefore a mess. I am aware that many others including myself made this point in previous responses to consultation. I can only conclude that the Borough have no ‘very special circumstances’ to demonstrate as they have failed to address this

I object to the proposed change that Normandy settlement, Flexford settlement and Walden Cottages should be inset from the Green Belt due to the fact that:
There is evidence in past planning appeals APP/Y3615/W/15/3002308, APP/Y3615/A/10/ 2140630 and APP/Y3615/A/10/ 2131590 that the land here contributes to the “openness” of the Green Belt

There is evidence in the Sustainability Appraisal para 10.4.7 that the agricultural land between the settlements is of BMV (Grade 3a farmland) quality, exhibits ‘openness’ and contributes to the rural economy

The land in and around the settlements of Normandy and Flexford contributes to views into and from the Surrey Hills AONB (Hog’s Back)*

Policy P2 also fails to appreciate the importance and permanence of the Metropolitan Green Belt and the fact that it needs to be permanently protected. The Green Belt is intended to check the unrestricted sprawl of built up areas; to prevent neighbouring towns from merging into one another; to safeguard the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist with urban regeneration by encouraging the recycling of derelict and other urban land. The land around Normandy Flexford, Christmas Pie, Wyke, Pinefields and Willey Green consists presently of a series of Hamlets washed over by the greenbelt and providing the greenbelt space preventing urban sprawl between Aldershot and Ash (which is a development area) and Guildford

Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. In my area farmland is used for cattle other livestock cereal and rape and corn

It is incorrect to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of land that may be removed from the Green Belt.

I object to the statement in the submission Local Plan under Green Belt Policy P2 (4.3.13) which claims that Normandy, Flexford and a further list of 12 villages are “now inset from the Green Belt”. This statement is untrue as GBC is proposing to “inset” these villages. No decision has been made by an Inspector, therefore the villages remain in the Green Belt.

I object to the changed “insetting” of 15 villages from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages.

I am concerned that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages. This is completely unplanned and unmeasured development outside the OAN.

Many Guildford villages are elongated in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored.

Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID:  pslp171/946  Respondent:  8596673 / Peta Malthouse  Agent:  
Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy P2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

To remove land from the Green Belt, effectively re-drawing the Green Belt boundary, the council must again provide evidence of “exceptional circumstances” as required by NPPF para. 89. The council has provided no such evidence in the proposed submission documents. I am aware that many others including myself made this point in previous responses to consultation. I can only conclude that the Borough have no ‘very special circumstances’ to demonstrate

Although I welcome the Boroughs decision to remove the proposed sites of development at A46 and A47 from proposals for development.. the first because it was accepted to be Grade 3a farmland and the second for reasons to include that it is an area of SNCI ..........my objections to the re designation of Greenbelt land to include insetting in respect of all of the policies in the administrative area of Normandy Parish Council, have not been accepted but they are nevertheless set out again set out above.

I object most strongly to the proposals to inset.

The Borough has no real policy proposals to limit the height and type of construction in the inset areas. We have seen some poorly made decisions recently of properties being built with high roof levels and inappropriate density.

* It is very important to remember that the views from the Hogs Back (ANOB) northwards are uninterrupted to a large degree because most of the property in Flexford is of low roof height and the street lighting is minimal. The openness of the countryside and the trees in ancient woodland act as an effective screen of the existing buildings

Indeed the views remain uninterrupted to Ash Ranges which has SSSI and TBH status..other land between the ANOB and Ash Ranges has SNCI status and yet the insetting will result , if approved , infilling to the point that these protected spaces which adjoin them will be harmed for proximity

These areas are also of huge historical importance and contain 22 Grade 11 listed buildings in their context of open farmland. William Cobbett (Rural Rides) lived and died here

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
please log this as an objection to the current proposal to inset (i.e. remove from the Green Belt) the villages of Chilworth Shalford and Peasmarsh.

I am well aware that this is very likely going to be initially approved and therefore go on to consideration by the Planning Inspectorate and The Courts.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4) Additional Objection
I object to the continued inclusion in the Local Plan of site A35 (land at the former Wisley Airfield, - now known as Three Farm Meadows) Wisley Property Investments Ltd’s outline planning application for development of 2,100 dwellings on Site A35 was unanimously rejected by GBC’s Planning Committee in April 2016, after some 14 months of consideration (and various extensions and amendments), Serious concerns about this site and the proposals were raised by a broad number of authoritative sources across the UK, including Highways England, Surrey County Council, Thames Water, National Air Traffic Services and the Environment Agency.

It is very clear indeed to me that development along the lines proposed in the Draft Local Plan 2016 is completely unsustainable and a betrayal of the Green Belt concept. I, together with many residents do recognize the need for a limited amount of additional housing, but not on the scale set down in the Draft Local Plan. Such homes building, represents inappropriate development in the Green Belt.
There is no alternative for Guildford Council but to
1) investigate the errors in the West Surrey SHMA which if found to be correct will bring a significant drop in the number of homes required to 2033.
2) amend the Local Plan to make greater use of brownfield/previously used land rather than target rural villages for removal from their current ‘washed over’ Green Belt status.
3) identify credible, evidence-based plans for sustainable development sites in the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11645  Respondent: 8597025 / Mr Peter Bennett-Davies  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3. Infrastructure – Transport (Policies I1, I2 and I3)
The words “Roads and Transport Infrastructure” are mentioned in Definitions under Policy I1 (Infrastructure and Delivery), but there no are detailed proposals for the Horsleys in any of the Local Plan documents, including the Infrastructure Delivery Plan. This is extremely surprising, the more so when one reads Thames Water’s advice re its lack of capacity to deal with wastewater, given that the DLP proposes development in the Horsleys in years 1 to 5 of the Plan Period.
a) Infrastructure – Waste Water (Policy I1)
I object to the lack of coherent proposals relating to waste water infrastructure for the Horsleys.
Waste water infrastructure receives a mention in each of the A37 to A41 Site Reviews and in Reasoned Justification under Policy I1, but no detail for the Horsleys has been found in any of the Local Plan documents, including the Infrastructure Delivery Plan.
There are known sewage overflow problems in the Ockham Road North / Green Lane area.
Thames Water has advised Guildford Borough that the area’s wastewater network is unlikely to be able to support the demand anticipated from one or all of the proposed developments. The foul drainage system from West Horsley to the treatment works north of Ripley it is understood will need to be upgraded to cope. Thames Water advises ‘a 2 to 3 years lead-in period’ to install the necessary waste water network and treatment capacity after planning permission for a development site is granted.
b) Policy I3 provides that developers “will be expected” to propose and secure travel plans for their developments and contribute to transport arrangements for the able and disabled. Legally, this is meaningless - this proposed policy lacks ‘teeth’ and is unrealistic where development and major housebuilding companies are involved.
c) Whilst Horsley station has frequent trains to London and Guildford seven days a week, the station car park is normally full on weekdays. An increase in village population will increase pressure on station parking and traffic movements to/from Horsley station, to drop off/ collect travellers to London and school children going to Guildford and Leatherhead.
d) Infrastructure – Schools and Medical Facilities (Policy I1)
I object to the lack of coherent proposals relating to schools and medical facilities for the Horsleys.
There is a continuing lack of state primary school places in the Horsleys. The Raleigh School which serves both East and West Horsley is full every year and this has been the situation for many years. Secondary school places are limited in number at the Howard of Effingham School and other secondary schools involve a much longer journey of time and distance from the Horsleys to reach them. Glenske and Cranmore private schools are well supported by many families living in Guildford and other villages up to 14 miles away. Each of these private schools during term time, receives high volumes of traffic going to and from each school at each end of the school day, on Ockham Road North and the A246 respectively.
Kingston Avenue Medical Centre, serving all of East and West Horsley and areas beyond, is always extremely busy and residents experience difficulty in making appointments. The planned population increase (in excess of Government ONS forecasts) for the borough will require a major extension of the Royal Surrey Hospital to cope.

e) I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). There is too much traffic in our villages already and this plan will give rise to super congestion in East Horsley, West Horsley, West Clandon, Ockham, Normandy, Ripley, Send and Worplesdon with no plans displayed or any stated intent to improve the non A roads. The rural roads in this area are narrow, in poor condition and few have footpaths. 5000 plus houses in such a small area will spawn dangerous and unsustainable traffic growth.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11636  Respondent: 8597025 / Mr Peter Bennett-Davies  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1) Green Belt (Policy P2)
The Green Belt is an extremely important asset not only to Guildford Borough but to all the counties surrounding London. It protects London from urban sprawl; it contributes to air quality; it absorbs rainfall into the ground; it is the open space that millions of people enjoy for recreation within an hour of central London. It is protected now and needs to remain so.

The National Planning Policy Framework para 80 states that Green Belt serves five purposes
• to check the unrestricted sprawl of large built-up areas;
• to prevent neighbouring towns merging into one another;
• to assist in safeguarding the countryside from encroachment;
• to preserve the setting and special character of historic towns; and
• to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

The Draft Local Plan (DLP) puts forward no rational case or justification for building on the Green Belt as it proposes. The National Planning Policy Framework (NPPF) states that the introduction of new Green Belt boundaries (and many are proposed in the DLP) requires the Local Authority to demonstrate that ‘exceptional circumstances’ exist to justify such proposals. Unmet housing need as such is NOT an exceptional circumstance. From my review of the Sites Listed in the DLP between pages on pages 122 to 126, 65% of the proposed housing is planned for land currently in the Green Belt. The NPFF and Government Ministerial statements have emphatically said that Housing need in itself is not an ‘exceptional circumstance’ for protected Green Belt land to being used. Clearly, the Green Belt has not been applied as a constraint. The need for a Local Authority to apply constraints is clearly stated in Government advice, planning policy guidance and the NPPF. Policy P2 is flawed as it fails to meet NPPF policies.

I object to the proposed removal of East and West Horsley from the Green Belt by insetting and in addition extending the 2003 Local Plan Settlement Area boundaries.

No exceptional circumstances exist or other justification is made for these proposals. The Green Belt & Countryside Study is flawed and the Key Evidence document ‘Guildford Borough Economic Strategy 2013-2031’ makes no case for locating large numbers of new homes in East and West Horsley. The number of new dwellings and density of housing proposed would be totally out

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
2. Number of new houses and density (Policies S1, S2, H1 and H2)
I object to the proposals relating to the number of new dwellings and the density of such housing.
A 13,800 homes increase is proposed across the Borough over the Plan Period to 2033, representing a 25% increase approximately in the Borough’s housing stock. This increase is too high and for West Horsley in particular, the proposed increase of 385 homes translates to 35% growth which is grossly disproportionate. For East and West Horsley, the 533 homes proposed to be delivered in the first 5 years of the Plan Period on the six proposed sites (ref A36 to A41) are calculated at much higher densities than currently exist within the villages and if allowed would be totally out of character with the existing mix of different housing styles and layouts within the villages.
The home building proposals for the Horsleys are unsustainable in terms of schooling, drainage, roads capacity, shops, parking and public transport.
I have recently received and thoroughly read two independent Assessments of the West Surrey SHMA’s Objectively Assessed Number (OAN), one prepared by Neil McDonald for a grouping of residents associations and parish councils located in the Borough and the other by Clandon & Horsley Ward Councillor David Reeve. Both studies report on finding the same error in the G L Hearn West Surrey SHMA document. The effect of the error results in an overstatement of the number of homes needed through the Plan Period by a significant quantity, possibly by 2,745 homes. Other independent individuals have stated on numerous occasions to GBC, that the OAN is flawed but the Borough Council has chosen neither to listen nor to scrutinise the SHMA. The population growth assumed, will be excessive and unsustainable for Guildford, a gap town with many environmental, physical and infrastructure constraints.
I object to the disproportionate allocation of housing to (a) East and West Horsley (b) rural villages, particularly on the eastern side of the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the proposed building of 2000 homes and associated development at the Former Wisley airfield.

My reasons are:

The roads in the area are already very busy.

Access to the A3 at Old Lane would lengthen my journey. This is a road that I use at least 4 times a week.

Effingham & Horsley stations are very busy already at peak times.

Para 3.2

Retail provision

The 40% extra retail provision proposed for the High Street and especially North Street is both unnecessary and undesirable. What should be provided instead is more residential development in those areas.

Transport strategy

Additional and more frequent and cheaper public transport is needed throughout the Borough.

Much more renewable energy, especially solar, should be installed throughout the Borough.

Proposed Submission LOCAL PLAN

I write to strongly OBJECT to the Local Plan which has been published for public consultation. Mainly, I do not agree with East and West Horsley being taken out of the Green Belt. Also, the housing needs survey conducted by West Horsley Parish Council showed a much lesser need than has now been proposed and justification of removal from the Green Belt is not argued. If implemented it will destroy the character of the villages, the infrastructure is already overloaded and there are no plans for improvement in line with the proposed increase in housing. The inflated number of houses has been generated by a mathematical model which has not been made available by the sub-contractor, consultant and Guildford Borough Council and cannot therefore be justified.

Infrastructure: Strict application of the policy not to sanction any development which has infrastructure issues is vital. There is some scepticism about the policy and a belief that developers will be able to find ways of getting round these strictures. The Council must ensure that permission for development until road and other infrastructure is in place or guaranteed is not granted.

There appear to be very strong grounds for suspecting the validity of the SHMA on which the Housing Requirement is based and which appears to be inflated by unreasonable estimates of student accommodation requirements. I know the Guildford Residents Association have made representations on this point and their findings appear to hold water. I urge you to review the annual target of 693 dwellings which I believe may be over-inflated.

The strategic sites selected to meet the assessed housing requirement. But the SHMA figure has been challenged. As some of the sites encroach on Green Belt land planning permission for those sites should not be granted unless the SHMA estimates are borne out by actual statistics.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of policy A43 of 7000sq m of industrial warehousing as the Latest Employment Needs Assessment 2015 (ELNA) shows a reduction of 80% in required employment floor space from the previous draft. Slyfield Industrial Estate still has spare capacity and could accommodate any additional warehousing need if required.

Answer (if comment is on questions 1-7 of the questionnaire): ()

In particular, I object on the following basis.

1. I object to the creation of a new 4 way interchange onto the A3 on the A247 (Policy A43A) as this would add to the ever increasing levels of traffic on the A247, A3 and through Send and Clandon. Send would become a through route to and from the A3 and will become gridlocked all day.

2. I object to the impact that Policy A43A will have on the air quality for those living in the surrounding areas and for future generations.

3. I object to the impact on residents that the resulting noise pollution of Policy A43A will have.
4. I object to the inclusion of land at Garlick’s Arch, Burnt Common and the proposed 400 houses and 7000 sq m of industrial warehousing on that site (Policy 43). Policy A43 and A43A were included at the last minute. They were not in the Regulation 18 draft and had not been consulted upon prior to the inclusion 2016 Local Plan.

5. I object to the impact of Policy A43 on ancient woodland on that site, on noise pollution and air pollution levels. The site is also prone to flooding.

6. I object to the impact of Policy A43 and A43A on local infrastructure. Congestion levels on A247 are already increasing at an alarming rate and will be further exacerbated by the development of Garlick's Arch as the residents will have to rely on the use of private cars.

7. I object to the unsustainable nature of the site at Garlick's Arch (Policy 43).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

11. I object to the inclusion of land west of Wind Ridge and Send Hill designated for 40 homes and 2 Travellers' Pitches (Policy A44). The site was not included in Regulation 18 draft and has not been consulted upon prior to the inclusion in the 2016 Local Plan.

12. I object to the impact of Policy A44 on an area of beautiful Green Belt countryside.

13. I object to the impact of Policy A44 as the subsoil of the existing site contains documented unsafe land fill waste which is currently vented.

14. I object to the impact of Policy A44, which includes 2 Traveller's Pitches, on the local infrastructure. The narrow width single track country road provides insufficient access for the pitches.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Objections to the 2016 Local Plan

Following the approval of the revised Local Plan by the full council of Guildford Borough Council on 24th May, I would like to make it clear that I object to the provisions set out in the Local Plan as they threaten to destroy the established nature and identity of our villages by building on Green Belt land and will add considerably to the already unacceptable levels of traffic on the A3, A247 and M25 and any other roads in the borough.

Answer (if comment is on questions 1-7 of the questionnaire): ()
17. I object to the impact of further congestion on local village roads and lanes.

18. I object to the impact of excessive development on the A3 and M25 on air quality. The air quality in many parts of the borough is greater than EU permitted levels and will damage the health of residents and future residents.

19. I object to the fact that 70% of the proposed 13,860 houses are designated on Green Belt land along the A3. This will result in gridlock on the A3, the A247 and the surrounding roads which are already at capacity.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Policy H1 Homes for All**

**Pirbright**

We would support the proposed identification of Pirbright as a village that remains washed over by Green Belt on the Proposals Map. The open and linear nature of the village, centred around the junction of a number of roads at the heart of which is the village green and associated community facilities, forms an essentially open character much of which is also designated as a conservation area. As such, it lacks the required scale and form to support development and is also constrained by the SPA/SAC heathland. These factors are important in maintaining the character and quality of the village.

As such we would also support policies that are proposed to protect the character and quality of the Borough including policies P2 Green Belt, P3 Countryside, P4 Flood Risk, P5 Thames Basin Heaths and D3 Historic Environment.

**The Pirbright Institute**

We are concerned at the proposed boundary of the Pirbright Institute and its insetting from the Green Belt. While we have for many years supported the work undertaken at the institute, it has to be recognised that this is a site that is surrounded by Green Belt and exists within the main core of Green Belt within Guildford Borough. It is not on the margins of the Green Belt or on the edge of a town where it might be appropriate to remove the site from the Green Belt in terms of the form or function of the surrounding land. The Green Belt in this location is essential in providing the setting of the historic village of Pirbright and is on one of the key approaches to the south of the village, between Pirbright and the conservation area in Worplesdon. As such the Green Belt serves to protect the countryside from encroachment, preserve the historic setting of settlements and is important in the separation of villages. The campus style of the existing site keeps the overall impact of the Institute within the character of the wider area. Any intensification that altered this character, which would be likely to follow its release from the Green Belt, would threaten this low density, campus character.

The countryside forming part of the Green Belt in this location is key to the understanding of the matrix of woodland, heathland and open land forming a key part of the character of the area. The site is also visible from its surrounding context and has the potential to have an impact on the Green Belt well beyond its boundaries, including from elevated views within the nearby Commons, including Hangman’s Hill. It is vital that this impact on the wider Green Belt around the site is not prejudiced by more intensive development that might result if the site were removed from the Green Belt and such controls were relaxed. The only basis on which the development of the Institute has been permitted in recent years is as a result of the very special circumstances that have applied that have justified the redevelopment or replacement of buildings at the site. It is important that its primary importance as an international research institute is retained as its principal rationale for development at the site.
If the site is removed from the Green Belt there is nothing to retain its special importance as a research institute and its campus style character and appearance, which in turn limits its impact on the Green Belt and on perceptions of urbanisation of the countryside and setting of the Thames Basin Heaths and villages such as Pirbright.

We therefore, request that the Institute is retained as being an important part of the Green Belt in this location.

Pirbright Parish Council also consequentially, objects to paragraph 4.3.14 of the Local Plan as proposed which incorrectly in our view, concludes that sites that are previously developed within the Green Belt should be excluded from the Green Belt and inset. This is not a logical or necessary interpretation of Government Policy. Several of the sites identified including the Pirbright Institute, are defined in terms of their character by their presence within the Green Belt - they should be treated as previously developed land within the Green Belt under the terms of paragraph 89. As such, importantly, development may be appropriate provided it would not have a greater impact on the openness of the Green Belt and the purpose of including land within it than the existing development.

The Green Belt boundary should not be used simply to exclude any area of previously developed land for these reasons, policy already allows for their redevelopment if it is consistent with the maintenance of the Green Belt function. Local planning authorities with Green Belts in their area should establish Green Belt boundaries in their Local Plans that set the framework for Green Belt and settlement policy and deliver sustainable patterns of development. When drawing up or reviewing Green Belt boundaries local planning authorities should take account of the need to promote sustainable patterns of development. The insetting of the proposed sites is inconsistent with these aims and the maintenance of the character and purposes of including the surrounding areas within the Green Belt and pays no regard to the impact of future intensification of such sites.

**Henley Business Park, Normandy**

While we have concerns over the removal of the site from the Green Belt, since its relationship and impact on the surrounding function of the Green Belt is clear, we note that the site is now largely fully developed and hence there is little further purpose in its removal from the Green Belt. Its status as a protected employment site should be retained whatever its Green Belt status.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

**Policy I1 Infrastructure and Delivery**

Pirbright Parish Council note the very extensive infrastructure requirements associated with the scale of development identified within the proposed Local Plan. It is essential that this infrastructure is delivered in a timely manner to support the development proposed, particularly where those locations are less than ideal at present in terms of their location or the availability of supporting services and infrastructure. Where improvements to rail services, roads, footpaths and cycleways cannot be secured in advance of the population that depend on such services, development should be restricted. In some cases this may mean the principle of development in some locations must be questioned where the roads or other infrastructure cannot be provided at a time and in a manner that can support sustainable living.
We are concerned that inadequate attention has been given to the effects of rural development in and around the villages of Pirbright, Worplesdon and Normandy on the infrastructure of the area, including schools, social infrastructure, sewers, water, roads and rail.

We would note that this is particularly important in rural areas where there isn’t a network of safe cycleways and alternatives to car transport and where villages, such as Pirbright bear the impact of decisions elsewhere. We are concerned that allocations such as A46 and A47 Normandy and Flexford are not sustainably located and would object to the allocation. Even with the small range of services proposed as part of the proposed allocation, most of the new houses will be served by cars travelling to Guildford, Brookwood Station and other locations, imposing a burden on Pirbright and Worplesdon that exacerbates the existing traffic problems experienced by the rural areas. Although this is not as high profile as the congestion within Guildford, it must be recognised that the rural villages such as Pirbright are suffering increasing congestion and the adverse impact of traffic brought about by development (such as Deepcut, Pirbright Institute, Henley Park and now proposals at Normandy/Flexford) and other pressures. The junctions within and around Pirbright, including Fox Corner, Cemetery Pales and Pirbright Arch to Brookwood are under particular peak-hour stress. As the mainline service from Brookwood into London, the roads within the area will suffer further pressure with development to the west in Normandy.

Answer (if comment is on questions 1-7 of the questionnaire): ()
**Policy S2 Borough Wide Strategy and Spatial Vision**

The need to provide for the housing, employment and infrastructure needs of the Borough is understood and supported, which is important in ensuring the quality of life and availability of life chances for all of the Borough’s current and future residents, but given that the effect of this on the environment and quality of life within the Borough, care needs to be taken to ensure that the level of provision is no more than is necessary to meet those needs. Hence Pirbright Parish Council would ask for the housing and other proposals set out within the Plan be further reviewed to ensure that:

- the level of housing and other development proposed is no more than is necessary to meet the needs of the Borough (and the demographic model giving rise to the housing forecasts is fully tested);
- that the scale and location of housing and other development proposed is the most sustainable possible in terms of its location and distribution;
- should ideally be concentrated within and around the main towns to reduce the need for car travel and promote sustainable patterns movement using pedestrian, cycle, bus and rail;
- that preference is given to brownfield sites where they are sustainably located and would otherwise be acceptable;
- should have regard to the need to protect the character and quality of the Borough.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Housing Need. I do not believe that the planned provision for housing over the next 20 years needs to be anything like the figures proposed. Much work has been done on this subject by many people and I was shown a report at an Open Day briefing at the West Horsley Village Hall on the 9 July that supports how most of us feel and makes the need for such numbers unproven.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Beyond the Horsleys. Around the Horsley boundaries there are other sites such as Wisley where huge developments are also proposed. I understand that this Wisley proposal was turned down by the Council unanimously about six weeks before this latest plan was published. Then why is it still in the plan? The council was absolutely right to refuse it there being so many reasons apart from why do we need all these houses? The total lack of infrastructure being another big reason. Horsley and Effingham stations could not cope and that is if they could get to the stations on the roads that can't cope. We have no desire to see traffic lights in our villages either. Move south along the totally overcrowded A3 to Gosden Farm and another huge proposal. They are talking about a new station but will there be the trains to service it? The A3 will not be able to cope, of that there is no doubt because almost every day now there are jams trying to get through Guildford, and if you are in Guildford trying to join in the A3 going south it's a nightmare! All these infrastructure problems for any development must be in place before a development can proceed, but they do not have to proceed as with the Horsley Plan and the incorrect housing numbers, that probably applies to the other Parishes as well.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Infrastructure. Roads, schools, doctors surgeries, hospitals and public transport are all overstretched now let alone with the addition of all these new houses. Roads are busy especially at school times and HGVs of huge sizes use the roads as 'through' roads. Where are all the weight limit signs these days? That would prevent much of the damage that is occurring and save money. The schools are always full, both state and private. Doctors surgeries are always busy and look at the state of the Royal Surrey County Hospital in Guildford at present. Public transport, particularly the railways just now, are in an awful mess and buses don't really count as they are so few and far between.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Green Belt. This should be sacrosanct and indeed I was always brought up to believe it was. Yes there will always be the exceptional situations where planning should be allowed but never the removal of whole areas. It was always meant to be the lungs of London and I am convinced that the Green Belt should be preserved for the very best reasons, not least of which is the Nation's health. I shall return to the Green Belt later.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Back to the Green Belt. The Conservatives have said that they would support the Green Belt and David Cameron made a point of this quite early on in this Parliament, so why is a Conservative Council riding roughshod over this policy? [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature] the production of this dreadful plan gives me little confidence in the Council or the Conservatives.

I believe the Green Belt is the hub of the matter as everyone I talk to is in complete agreement. When I was in Guildford the other day I was looking at the High Street thinking what a great job they are doing with the relaying of the granite blocks to restore the very lovely and historic High Street. The Council are to be commended for taking this action. That I thought, is how they should approach looking after other important parts of the Borough and that includes the Green Belt. The High Street with its lovely buildings and clock would be completely ruined with a nice new smooth tarmac surface, quieter for cars to run on and easier for ladies to walk on. The countryside would equally be ruined with more houses, wider roads, less trees etc etc. Preserve our countryside and wildlife for all to enjoy and for future generations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The changes to the plan appear go against the “Countryside Vision Strategy” adopted by the Borough Council and published in the Summer 2017 edition of “About Guildford”. The strategy talks of protecting the countryside, not insetting large areas from the Green Belt and building houses, traveller pitches and industrial sites on it. The strategy talks of aligning the countryside management with “national policy” - and national planning policy dictates that the Green Belt should be protected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The housing numbers that have been suggested have not been substantiated as requested and therefore most of the suggested development sites should be removed. I am not saying no development but it has to be in line with the facilities and infrastructure that exists. Words to imply that infrastructure will be improved with absolutely no detail or time schedules is quite unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

We have comments regarding the evidence base documents:

- Draft Infrastructure Delivery Plan
- Flood Risk Sequential and Exceptions Test

As these are comments regarding the soundness of the Plan we have submitted them in Question 3: Soundness.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SQLP16/574  Respondent: 8598049 / Environment Agency (Jonathan Fleming)  Agent:

Summary of Soundness

We welcome and support a number of the changes that have been incorporated into the Plan since we reviewed the Draft Guildford Borough Local Plan: strategy and sites dated July 2014. However, we consider the Plan to be UNSOUND in its current form due to issues relating to:

- Infrastructure Delivery Plan – Water quality
- Flood Risk Sequential and Exception Tests - site allocations and the justification for promoting certain sites
- Policy P4 – Flooding, flood risk and groundwater production zones
- Site Allocation Policies – safe access and egress of allocated sites A5 and A13

In its current form the Plan does not meet the tests of soundness in terms of being justified, effective or consistent with national policy. These points are summarised below:

- With regards to water quality the Plan does not reflect the evidence submitted in the Infrastructure Delivery Plan for wastewater capacity issues, which may result in an adverse impact on water quality. The Plan is not consistent with the National Planning Policy Framework (NPPF), paragraph 109, and is not justified by a robust evidence base.
- With regards to the Flood Risk Sequential and Exception Tests, we do not consider that sufficient evidence has been presented in this supporting document to justify the conclusions drawn in the Plan with respect to the allocation of certain sites. Without this evidence the Plan is not justified.
- With regards to Policy P4 we do not consider that sufficient reference has been made to the impacts of climate change on the flood risks associated with development. We consider that without specific mention
of the flood risks associated with climate change that the Plan is not consistent with paragraph 99 of the NPPF.

- With regards to flood risk three of your allocated sites; A5: Jewsons, Walnut Close, Guildford; A13: Kernal Court, Walnut Close, Guildford; and A14: Wey Corner, Walnut Tree Close, Guildford, do not have the evidence on access and egress to support their allocation in the Plan. **Without this evidence the deliverability of these sites is questionable and their inclusion is not consistent with NPPF paragraphs 100-102 of the NPPF.**

Further details regarding these points are within our letter submitted 18 July 2016.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

Answer (if comment is on questions 1-7 of the questionnaire): ()

*I object* to the local plan as a whole, on grounds that the Borough has failed to provide sound evidence of need for much of the development. In just ten minutes reviewing plan documents, I found a consultant report (in the Traveller Accommodation Assessment) dated as having been undertaken in June-July 2012 by Mill Field Services, whom I then discovered had been dissolved in January 2011 (according to the Companies House website). How many other errors or untruths are in the plan?

I believe the Local Plan 2016 is deeply flawed; lacks adequate, unbiased research and evidence of need; lacks infrastructure improvement already needed without there being any further development; and I believe is being rushed through to serve some hidden agenda. It must be properly reviewed under legal requirements using Regulation 19.

| Answer (if comment is on questions 1-7 of the questionnaire): () |
| I object to both these developments as there was improper use of Regulation 18; no local consultation; that Garlick’s Arch is green belt land which includes an area of ancient woodland, and that alteration to the A3 junction at Burnt Common is not appropriate without holistic infrastructure review and consultation. I wrote to the Council to this effect before the Council meeting in which they were included. |

| Answer (if comment is on questions 1-7 of the questionnaire): () |
| I object to removal of Send and other villages from the green belt. This can only be done in exceptional circumstances according to law, for which none exist in this area. Urban development is not an exceptional circumstance, nor is lining the pockets of developers. Any weakening or exceptions made to green belt protection will lead to its ultimate demise, and once it is gone there is no going back. The green belt must be protected in its entirety in perpetuity as the law intended. Developers avoid brown-field sites as the location may be less desirable and cost of development can be higher, resulting in a lower rate of return. There are many such sites in the Borough which it should be mandatory to develop before any other sites are even considered. |
| I will be accused of not wanting development in ‘my own back yard’, but my concerns are more far reaching than my local area. I believe the south east of England is at capacity, and want to see vision and innovation in development practice for the future good of all. Our elected representatives at all levels must conduct themselves with due diligence and integrity, for the long term future of all. |

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Having reviewed the Local Plan I am deeply disturbed that the Council has ignored concerns raised by Borough residents in the 2014 consultation, showing a clear agenda for development at any cost. It shows a complete lack of consideration for the impact of such extensive development in the most densely populated county (Surrey) and most densely populated region (South East) of England.

I object to the Council making last minute, significant changes to the plan, such as the Garlick’s Arch development in Send and addition of a major alteration/enlargement of the junction on the A3 at Burnt Common. There are also many other new sites and changes to the 2014 plan. Therefore, full consultation according to Regulation 18 is required, not the short cut form of Regulation 19.

It is also clear that that Plan’s consultation has been timed when many people take holidays, to minimise residents’ opportunity to fully review the extensive documentation and make any appropriate objections. As a result I have had to limit my comment to my local area rather than the Borough as a whole.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A42 - both to the original 45 homes and the latest increase to 60 homes, on the basisthat it is on green-belt land; that local roads are unsuitable and unable due to existing congestion to take further traffic increases, in particular the A247 Send Road. Tannery Lane is a narrow lane requiring single lane traffic in parts and unsuitable for increased traffic flow. I am also aware as a resident of Send for 14 years, that the proposed site in Tannery Lane is low-lying and subject to flooding, as are a number of other areas in Send and Send Marsh, and hence it is entirely unsuitable for housing.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to policy A58 - on the grounds that again it is part of the green-belt and hence development is not permitted, and further, that such development is inappropriate when other industrial sites in the Borough have empty space (e.g. Slyfield Industrial Estate) and there is no proven need for further industrial space. I object to the wording minimum' replacing maximum' of 7000 sq m, deliberately opening up any approved development to unlimited expansion. This is an appalling abuse of the planning process.

I would add weight to my overall objection to the proposals, identifying that the A247 Send Road is a narrow and residential road, in spite of the fact that it links the A3 and M25 to Woking town centre and its mainline station to London, and coach service to Heathrow Airport. It is congested in peak times, carrying heavy vehicle and commuter traffic through bottle necks of parked cars and the narrow bridge at Broadmeads. This bridge is not wide enough to allow two heavy vehicles to pass over it at the same time. The road is also heavily used by cyclists commuting into Woking, creating further congestion and hazards. It is madness to add to this traffic from hundreds of local houses and industrial sites, plus traffic from other huge proposed developments such as the massive number of houses proposed at Wisley Airport and nearby Ockham, Clandon and Horsley wards, (policies A35, A37, A38, A39 and A40 - at least 2500 homes) is madness.

Currently on a daily basis, the A3 from Burpham to the M25 is almost at a stand-still in both the morning and evening peak times due to the sheer weight of traffic. When there is a major hold up on the M25 or A3, the traffic can back up as far as the A247 at Broadmeads. Adding more commuter and industrial traffic will only exacerbate this, while changing the junction at Burnt Common is unlikely to improve the situation, and may actually add to the problem.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the local plan as a whole, on grounds that much of the development encroaches into the green-belt; that the Borough has failed to provide sound evidence of need or exceptional circumstances for most of the development, and has failed to provide guaranteed and appropriate infrastructure improvement already needed without additional local development.

I object to removal or so called ‘inset' from the Green-belt of Send and other villages in the Borough, or sections of land such as Send Business Park (Policy 2 at paragraph 4.3.15). This can only be done in exceptional circumstances according to law, for which none exist. Urban development is not an exceptional circumstance, and this practice is erosion of the green-belt by stealth. Any weakening or exceptions made to green belt protection will lead to its ultimate demise, and once it is gone there is no going back. All green belt land must be protected in its entirety in perpetuity as the law intended and stands today.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 6: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As Britain prepares to leave the EU, it is entirely possible that the population, especially in the home counties like Surrey, may see a reduction as some EU nationals return home, thus relieving some of the perceived need for increased housing. The Local Plan needs to take this into account. Developers avoid brown-field sites as the cost of development can be higher, resulting in a lower rate of return, while green-belt land is cheap to both purchase and develop to maximise profit. There are many brown-field sites in the Borough, and it must be mandatory to develop these before any other sites are even considered.

I will be accused of not wanting development in my own back yard', but my concerns are more far reaching than my local area, I believe the south east of England is at capacity. and I want to see vision and innovation in development practice for the future good of Britain as a whole. Our elected representatives at all levels must conduct themselves with due diligence and integrity, for the long term future of all, including their own children, not for the short term profit of a few.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to removal of Brownfield sites (A4) from the Plan

  • Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is totally unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A42 change at Clockbarn in Tannery Lane because:

  • It will increase access and traffic problems an Tannery Lane and at the A247 junction
  • It will make erosion of the Green Belt in our village worse
  • It will impact open countryside views from the River Wey Navigation
  • The housing proposed has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states “Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some
cases resulting in significant delays.” And yet there is no proposals to improve the local roads, only to add more
junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

I object to the Policy A43 change at Garlick’s Arch (including the potential of an increase from 400 houses) because:

- It will cause over-development of our village and the number of homes is excessive
- It will generate serious traffic problems at peak times that will block up the local roads of Send and Ripley. We already have serious tailbacks for example on the T junction where Send Marsh Road meets Portsmouth Road
- It ignores the thousands of previous objections made by local people
- The housing targets for the area are unrealistic. If they can only be achieved by erosion of the green belt, then they should not be enforced. The government is imposing these targets whilst at the same time claiming to want to protect the Green Belt. This is highly contradictory and very disappointing for the standards we should expect in this country.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

- The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the extended development in the Green Belt (Policy P2, Site A43)
• I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the unfair imbalance of the Plan across the borough.

• With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the removing Send Business Park from the Green Belt (4.3.15).

- Send Business park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for its removal from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

Comment ID: PSLPA16/936  Respondent: 8599105 / Edwin Road Residents Association (Rhys Beynon)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I write to express my objection to the proposed new Local Plan.

I object, in the strongest possible terms, to the principle of removing West Horsley from the Metropolitan Green Belt. This suggestion above all must be withdrawn from the local Plan. Future generations would see this proposal as a dereliction of Surrey’s duty to protect the health and well-being of the London area and its population.

Having lived in the West Horsley area since 1979 and worked locally I feel I have enough experience of the surrounding area to appreciate the serious detrimental effect the proposed developments would have.

- Our local “infrastructure” is already overstretched.
- Our roads cannot cope with even a small fraction of the likely increase in vehicular movements.
- Our parking areas within the current villages (East and West Horsley) are strictly limited.
- Our population is made up of a high percentage of “retired” folk for whom the car is often the only method they have for getting around the villages so competition for parking places would affect their social mobility with disastrous effect.
- Our local primary school is heavily oversubscribed and may well need to be rebuilt on a new site in an attempt to satisfy the current demand for places.
- Our water table is high in parts of the area and considerable flooding may occur in some of the proposed new developments.
- Our medical services would have to be doubled in size to cope with the likely doubling of our population. A new parking area could not be provided at the current centre in East Horsley and consulting rooms etc. for medical staff would be inadequate for the increased population.

Along with the proposed new housing developments and major infrastructure projects other areas would have to be found for improvements to pavements, road widening, improved junctions, new sewers, services and drains, new parking areas at the railway station at shops and at village halls and at churches.

Our roads cannot cope today with current population/traffic demands and have to be used as “car parks.” With more vehicles trying to use the roads bottle-necks will occur at dozens of places around the villages which were never meant to cope with such numbers.

In my opinion the local plan is applying sticking plaster to try to stem the flow of blood from a major wound.

I'd like to suggest that a way forward be found which would begin with a proper comprehensive plan which begins with the infrastructure necessary to cope with the undoubted need for housing in the area. Building houses wherever one can find a piece of land is NOT the way to cope with today's housing crisis.

I cannot believe that people with professional planning skills and experience cannot see the folly of the proposed local plan.

Surely "cramming a quart into a pint pot" cannot be a serious planning proposal.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. The Objectively Assessed Need for housing is too high, and the SHMA from which it is obtained is flawed. The proposed large developments on greenfield sites should be smaller and designed to suit the landscape and infrastructure of the area, while respecting the Green Belt. Please have a rethink before taking this plan forward.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3. The proposal to increase retail space by 40% in the town centre is too large, and should revised, taking into account current trends in retailing.

4. The majority of these comments concern the transport evidence which was produced very late, being published on the day this consultation started, 6 June 2016. While the evidence is useful, it is incomplete and has raised lots of questions that have yet to be answered. There is an infrastructure deficit in Guildford and in Surrey, as the report on the Surrey Infrastructure Study explains, and the cost of meeting needs over the next 15 years is going to be a major challenge.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Highways and Traffic

5. The highways network is under stress at peak times in many parts of the borough. Queuing is the daily experience of drivers going to and from work. The Plan recognises the problems in para 2.14. Much of the road network is single-carriageway, and junctions act as constraints.

6. The key evidence on future traffic conditions is provided in the Strategic Highway Assessment Report (SHAR) which summarises the results of the tests carried out by SCC at the request of GBC. The analysis was carried out using SINTRAM, SCC’s strategic traffic model. The model has been revalidated, though this was not stated in the SHAR. The latest version contains less traffic than the previous one. This makes it infeasible to compare results with those or the earlier studies for Guildford, namely the Preliminary Growth Scenarios Transport Assessment and the Options Growth Scenarios Transport Assessment.

7. Five scenarios were examined using SCC’s strategic traffic model. Scenario 1 contains all developments and planning permissions in the borough from 2009 to date. It represents today’s circumstances, with the addition of growth in traffic to 2031 outside the borough and in Waverley in line with their plan. The results for this scenario correspond to the current unsatisfactory traffic conditions in peak periods.

8. Scenario 5 represents the position at the end of the plan period, including all development and highways schemes in the Plan. The Scenario 5 results show that there will be widespread congestion in the morning peak hour across the network in 2031. The key strategic routes, the A3 through Guildford NE bound, and the M25 between Junctions 10 and 11 will be at or over capacity. The summary network statistics presented in the SHAR, while useful, require some interpretation because the analysis of vehicle-hours is derived from link speeds only, and does not reflect junction delays and queues. The tables that show the ratio of flow to capacity and level of service are especially helpful to gaining an understanding of the conditions on the network in the forecast. Where the forecast traffic volume is above or close to capacity, flow becomes unstable and there is congestion. The SHAR results provide evidence that congestion will be worse in 2031 than it is today on much of the network.

9. It is the case, as stated in the report that the traffic modelling does not take into account the potential for increased use of other modes but the trip rates used for developments already have built in the typical level of use of other modes, and services will be required to meet that need. It is also the case that the model does not allow additional ‘park and ride’, which would improve matters in the town centre.

10. In order to gain an insight into conditions across the network, it is necessary to combine information from several tables in the SHAR. Table 4.5 shows that the M25 and A3 will be at capacity in Scenario 5. The other roads that will have poor levels of service include those in Table 4.5 but also those in 4.12 (except the A3), and those in Tables 4.3 and 4.4 with levels of service E and F that will not benefit from the improvement of the A3 in Scenario 5. Paras 4.10.3, 4 and 5 point out that there will be increased congestion. Given that the starting point is unsatisfactory, there can be no expectation that the schemes in the Infrastructure Development Plan will provide an overall improvement. There will be some local benefits, such as the Ash rail bridge for example, but in general conditions will be as bad and in many places worse. So the statement in the SHAR para 4.2.5 that ‘the combined mitigation as reflected in Scenario5...indicates that at the strategic level it accommodates the additional PSLP demand’ needs qualifying – ‘at the cost of a lot of queuing in peak periods’.

11. The cumulative effect of the additional traffic generated by the developments in the Plan will be to increase congestion, even with the proposed highway schemes in place. More detailed analysis of the junctions and queuing is required. So I do not accept the conclusion that the developments would have ‘an acceptable impact on the capacity of the highway networks in terms of the policy test set in paragraph 32 of NPPF’.

12. Appendix 3 of the Transport Topic Paper shows the phasing of housing development and transport infrastructure. The major improvement scheme being studied by Highways England for the A3 between the A31 and the A320 is scheduled for delivery in the period 2023/24 to 2027/28. The strategic developments at Blackwell Farm and Gosden Hill Farm are shown as being phased in from 2021/22 onwards. The Garlick’s Arch development is shown as starting in 2019/20. Therefore there will be a period in which the existing A3 will have to carry additional traffic associated with those developments before extra capacity is provided.

The following comments regarding the strategic sites are taken from the SHAR:
Blackwell Farm – there will be congestion at the A31 junction, and the problems at the Tesco junction, and the Egerton road/Gill Avenue junction (para 4.9.5). Traffic is likely to access the Surrey Research Park and the RSCH through the development (para 4.7.3).

Gosden Hill Farm – there will be an increase in traffic through Burpham. There will be pressure on the A3100/B2234 roundabout (paras 4.7.6, 4.7.7 and 4.7.8).

Wisley Airfield – traffic will increase on minor roads to gain access to the A3 (N and S bound) and to other routes (para 4.7.11). The development will add more traffic to the A3. The Burntcommon slips help alleviate the traffic through Ripley according to the model, but queuing on the A3 could mean this does not happen (para 4.7.14).

Normandy/Flexford – the report has little to say about the impact of this large development. The increase in flow on Westwood Lane is noted (para 4.5.7). Tables 4.10 and 4.11 show junction delay reducing at the Westwood Lane, B3000 junction, but increasing at the Puttenham Hill/Millbrook junction.

Ash – development in Ash is not specifically addressed, but there are large increases in traffic on a number of roads. The new rail bridge will bring relief (but traffic will move to the next junction).

Slyfield – there are no remarks relating to SARP, and as there are no additional trips shown in and out of the Slyfield residential zone in Tables 3.3 and 3.4, it is possible that this development has been omitted in error. If so, this means that further tests should be carried out with the extra trips included. There is a significant increase in trips to and from the Slyfield industrial zone, which will impact on the A320 and Clay Lane.

13. The town centre is extremely important for all residents and for the economy of the town. The Plan provides no policy statement relating to transport in the centre, which means that there is no vision set out, in spite of the work that has been carried out for GBC over the past two years. The SHAR has very little to say about the town centre. The model results forecast severe congestion on the approaches to the town centre including A281 Millbrook, the A31 Farnham Road, and A322 Woodbridge Road for example. There are no highway mitigation measures in the PSLP for the centre. In the Transport Strategy, GBC states that the intention is to adopt Allies & Morrison’s Scenario 2 which would have the effect of significantly reducing the capacity of the town centre road system. The implications have not been examined in the SHAR, but all traffic would be severely affected. That using the A281 to access the west of the urban area, as one example, would face having to find alternative routes. The PSLP does include a new park and ride facility at Gosden Hill and the Sustainable Movement Corridor, which are discussed below.

14. The PSLP does not state an objective for congestion. The two strategic objectives that are included for infrastructure refer to supporting sustainable development and delivering a balanced system. However, in para 2.15 there is an aspiration expressed about opportunities ‘to improve the performance of the road networks through transport infrastructure and service improvements’, which taken with the previous paragraph includes reducing congestion. The evidence provided shows that this will not happen.

15. The mitigation proposed is not sufficient to overcome the problems that will be caused by the level of growth in the PSLP. Congestion will worsen. The network will lack resilience and be vulnerable to disruption due to incidents. Minor roads will have to cope with a lot more traffic (47% more than in 2009), to which they are unsuited.

Park and Ride

16. There is one ‘park and ride’ project in the Infrastructure Development Plan which is a new facility at Gosden Hill Farm. This is to be delivered by the developer of the site and the Transport Topic paper states that the intention is that it will operate without any public funding with 500-700 spaces. It is expected that the site will be use by drivers on the A3 southbound heading into Guildford town centre (Transport Topic Paper para 5.60). It is not evident that this ‘mitigates the traffic impact of the Gosden Hill Farm site’ (PSLP App C P&R1), though of course there may be some residents of the new development who may choose to use the P&R bus service. This facility is not related to the proposed new Guildford East Station at Merrow.

17. There is an absence of any park and ride proposal east of the town centre, although the volume of traffic suggests that a facility warrants consideration.

Sustainable Movement Corridor

18. This is an ambitious concept. Policy 13 in the Plan states that the SMC ‘will provide a priority pathway through the urban area of Guildford for buses, pedestrians and cyclists’. It will link the new developments in the west to those in the...
east via the town centre. It is estimated to cost £70-90m, with funding coming from developers and the Local Growth Fund. The recognition of the importance of sustainable travel is welcome. Connecting new developments to the town centre, as in the case of SMC1 and SMC2, is sensible. The case for a ‘corridor’ has not been demonstrated.

19. The latest information on the project has been supplied in a paper ‘Progress Update on the SMC Scheme’ published by GBC on 6 June 2016. This explains that studies have been carried out for sections 1-5 of the proposed route, and further work is needed. The SMC will use existing roads for the majority of its length, so this means that it will affect the allocation of carriageway between road users. This will be challenging because the road width on several sections will limit what can be achieved without a major impact on other traffic. Two design formats have been identified, ‘type 1’ involving separate lanes for the SMC, and ‘type 2’ in which bus priority measures are introduced at ‘congestion sections and interchanges’. The majority of the route is likely to be ‘type 2’ according to Table 1 of the Progress Update.

20. The Plan states, in para 4.6.24, that ‘journeys will be rapid and reliable by bus and safe and direct on foot and by bike’. The ability to deliver rapid bus services in peak periods has not been demonstrated. There has been no quantification of the potential demand to use the SMC. Securing funding from the Local Growth Fund will require an economic justification.

Bus Transport

21. There are two projects in the Plan relating to buses. The first is labelled ‘New Guildford town centre bus facilities’. This is essential and the absence of a site for a bus station in the Plan is a serious weakness. Providing a focus for town centre bus services and the SMC surely should be a key feature of town centre planning. The improvement of bus connections to the station is also needed.

22. The second project is for bus/rail interchange at Effingham Junction station (or Horsley) is desirable if the Wisley Airfield development proceeds...

Active Modes

23. The schemes listed are welcomed.

Rail

24. There six projects listed in the Plan of which four will be delivered by Network Rail as part of their investment programme. The other two are the new stations, Guildford East and West, which will increase rail access to development sites, and the hospital in case of the West station, and are to be welcomed for that reason.

25. The Plan does not deal with the fact that the Portsmouth/London main line is extremely busy in peak periods. Commuters from Guildford to London frequently have to stand, and this is in spite of longer trains having been introduced. Capacity is limited in the area between Surbiton and Waterloo and this is the focus of Network Rail investment (project NR5) that is scheduled to start in 2029. The growth proposed in the Plan for Guildford will undoubtedly mean more people will want to commute, adding to pressure on the already congested services, in the years before the frequency of services can be increased, which is most of the Plan period.

Information Requests

26. I have requested additional information which it was not possible for GBC and SCC to provide in time for this submission. A list of the items requested is included in my response to Question 1 of the questionnaire, in line with the guidance provided in GBC’s email of 30th June 2016.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I am writing to object to the scale of development proposed for Guildford in the PSLP. While wanting the town to be successful and vibrant, this should not be achieved at the expense of sacrificing the character of the town and its surrounding countryside. I endorse the submission made by Guildford Residents Association.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

I have submitted comments on the evidence in statement sent by email. In addition I wish to raise a set of questions on the transport related evidence. These are queries asked during the consultation period which I was advised to submit via this questionnaire.

A Strategic Highway Assessment

A1 In the SINTRAM network, how many kilometres are there of each class of road?

A2 Please provide the totals for trips as follows for the AM and PM peak for 2009, Scenario 1 and Scenario 2

   i) intra-borough ii) external to borough iii) borough to external

A3 There are marked differences between peak arrivals and departures in the AM and PM peaks. Table 3.5 shows for Scenario 2 Am pk arrivals of 1,850 and PM peak departures of 3236. Why the large differences? The response by email on 1 July does not answer the question.

A4 Table 4.13 shows outward cross-boundary impacts. Please provide the equivalent for inbound.

A5 Please tabulate link flows and RFCs for Scenarios 1 and 5 for all the links listed in Tables 4.3, 4.4, 4.5 and 4.12, for the AM and PM peaks

A6 Please tabulate junction delays for all the junctions in Tables 4.8, 4.10 and 4.11 for scenarios 1 and 5 for the AM and PM peaks.

A7 In Scenario 5 the RFC for the M25 J10-11 is 1.0 (Table 4.5) what is the link speed for this case? The A3 has an RFC of 1.10 in Table 5. What is the corresponding link speed?
A8 What is the total number of trips (i.e. 2009) to which the extra trips in Tables 3.5 were added?

A9 There are no additional trips in Tables in 3.3 and 3.5 for zone 552 Slyfield Residential which is a zone with a large housing development in the Plan. Is it that case that extra trips should be added to rectify an omission?

A10 Does the version of TEMPRo used for external growth take account of the planned development in Rushmoor called Wellesley (Aldershot Urban Expansion)?

A11 The trips to and from town centre zones in Scenarios 1 and 2 show a marginal increase over 2009 in the AM peak, and a reduction compared to 2009 in the evening peak. I have classed the following as 'town centre zones': 133, 134, 135, 136, 310, 540, 541, 545, 543, 544, 547, 548, 549, 550. The combined increase in the AM peak trips is 90, and the reduction in the PM peak is -341. This is difficult to reconcile with the scale of growth of the town, including the centre, with increased housing and major retail expansion.

The Strategic Highway Assessment Report explains that the distribution of the additional trips generated and attracted to new developments was based on 2011 Census data, with the exception of Wisley Airfield development.

While this is a pragmatic way of dealing with the matter, it is a simplification in that that the distribution is not influenced by either the new developments of the traffic conditions on the network.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Schemes SRN1 and SRN6 should be reinstated.

The addition of LRN23, LRN24, and LRN25 is supported.

The funding sources for many of the Local Road Schemes have been changed to 'Developer' only. The high authority, Surrey CC, is not proposing any schemes of its own. Is this due to a lack of funds, or a belief that nothing more is needed?

The addition of BT5 and BT6 is supported.

See attached file.

[text of attachment reproduced below]

The changes to paras 2.13, 2.14a, 2.14b and 2.15 are welcome. In para 2.15, the text now says that there are opportunities improve the capacity of the road network, rather than performance. This is more realistic and fits with the plans. However it does not match the ambition of the Transport Strategy to ‘address the historic infrastructure deficit’.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Para 2.3 quotes the ONS population projection for 2033. There should be an addition stating what population the Plan is designed to serve in 2034.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The change from 'will expect' to 'will be required' in point (2) is supported. The similar revised wording in point (7) is also supported.

The lack of specificity about the Sustainable Movement Corridor makes it difficult to make an informed comments on point (3). It is very likely that the claims made for the SMC exceed what can be delivered, and the plan should be based on a realistic forecast and a sound business case.

Point (11) is noted but it is not clear that any of the town centre sites included in the plan would involve additional off-street parking.

In para 4.6.28, the aim of achieving 'a modest modal shift' is noted, and also that the road schemes in the plan will 'mitigate the principal adverse material impacts of this growth in traffic volumes'. it is realistic to recognise that there will be congestion on the road network in peak periods. However, the problem is that better evidence is required of what conditions will be like both half way through the plan period and in 2034. The risk of them being unsatisfactory (perhaps unacceptable) is significant.

Para 4.6.24 states the aim and means of implementing the SMC. The sentence beginning 'The Sustainable Movement Corridor will be implemented...' should be revised at the end to read '...provision for the corridor, subject to a sound business case'.

Doc Ref T12a Addendum to 2016 Strategic Highway Assessment Report: high level review of potential key changes in the Guildford borough PSLP: strategy and sites June 2017

1. This presents a qualitative assessment of the effect of the changes made to the 2016 plan on traffic forecasts. Essentially, because the amount of development in the plan has been reduced, GBC’s argument is that things will be better than estimated in 2016. We can readily agree that where development sites have been removed, notably as in the case of the Normandy/Flexford strategic site, the forecast traffic level will be lower in the vicinity of the development. However, there are some sites where the planned development is now greater than in 2016. There are also potential changes to plans outside the borough to be taken into account, such as Dunsfold Park, which may have significant consequences for Guildford, as was pointed out by SCC and GBC in their submissions to Waverley in response to that planning application. The trip rates used in the forecast assume a level of public transport use and an appropriate level of bus services.

2. On the evidence provided by the SHAR based on the 2031 traffic forecasts using the SCC traffic model, congestion will be widespread in peak periods across much of the highway network, including on strategic routes. The A3 and M25 are forecast to be at or over capacity. The cumulative effect of the additional traffic generated by the developments in the plan will be to increase congestion, even with the proposed highways schemes in place. Interpreting the model results is not straightforward, as was pointed out in response to the 2016 consultation. Table 4.12 is significant – showing the roads with the ten largest ratios of flow to capacity for Scenario 3, which includes all the planned development but not the major strategic route improvements on the A3 and M25. There is no equivalent for Scenario 5 (i.e. with the strategic improvements), but we can infer that all the roads in Table 4.12 will be at or over capacity in Scenario 5.

3. With regard to the comments on Policy A6: North Street redevelopment (page 9), the model used for the Strategic Highway Assessment is not sufficiently detailed to provide a satisfactory assessment of conditions on the town centre road network. This has been recognised by GBC and has led to the commissioning of more detailed analysis using a simulation model. Added to which, there is uncertainty over the highway capacity implications of the Sustainable Movement Corridor in the town centre and possible changes to the town centre gyratory, as discussed in the draft Town Centre Regeneration Strategy, which indicates that the intention is to reduce the capacity of the town centre network. The experimental closure of Walnut Tree Close is already being planned. Taking into account the demand forecast on the A281, the A322 and A31 in Table 4.12, the consequences of such a reduction will be far-reaching.

4. Policy A26: Blackwell Farm has been amended and now the proposed development includes a secondary school with up to six form entry. This will add to morning peak hour traffic which was not included in the 2016 modelling. The SHAR findings indicate that there will be congestion in peak periods on the network that will serve this development. The A3 will be at or over capacity which means that the network will lack resilience, as it does today. The roads connecting to the town centre will continue to be under pressure. The SMC concept is more advanced on this section than elsewhere, but the effect on capacity has yet to be established. There will be queuing on the A31 on the approach to the new signalised junction that will give access to the Blackwell Farm site. The A31 is regarded as a key route by the LEP and LA partners.
5. The improvement to the A3 is obviously critically important to the Gosden Hill Farm development. We do not have the benefit of analysis of the proposed new slip roads giving access off and on to the A3 S-bound carriageway, nor an understanding of the implications of the SMC for the allocation of highway capacity on the local roads. What is self-evident is that the pressure on local roads in Burpham is already intense in peak periods, and these roads are not suited to carrying large volumes of traffic. Under the plan, congestion is very likely to be worse than today. The proposed Policy A24 Slyfield development will also add demand to the A320 and roads in Jacob’s Well.

6. The change to Policy A29: Land to the south and east of Ash and Tongham involving more houses means that there will be more traffic locally. While this will not be ‘major’ in terms of the borough as a whole, it will be significant locally. Ash and its surroundings will be impacted by the large Wellesley expansion in Aldershot. It is not clear to what extent the modelling reported in the SHAR allowed for this development. The pressure on the A331 and the roads connecting Aldershot to Guildford and Woking will increase.

7. The M25 is forecast to be at capacity after the planned improvements have been introduced, as shown both in the SHAR and also in the recently published DfT/HE report on the South West Quadrant. This is relevant to Policy A35 Wisley airfield. It should be noted that RHS Wisley is expanding its facilities with the aim of significantly increasing visitor numbers. The DfT/HE Stage 3 report concludes that the focus should not be on widening the existing road further beyond currently planned schemes but on how to reduce pressures and provide parallel capacity to relieve this part of the network. If the M25 and A3 are at capacity, then the Wisley development will add pressure on local roads that are not well-suited to carrying higher volumes of traffic. This is also relevant to the proposed developments at Burnt Common. The consequences for Ripley are likely to be serious. It is noted that Policy A35 now includes a requirement for mitigation of impacts in Ripley and on surrounding roads, which is some recognition that there will be a problem.

8. A comprehensive up-to-date analysis is required to inform decision-making. This should include analysis of the mid-term stage of the plan, before the A3 improvement is complete, as well as 2034.

**Doct Ref T13 Transport Strategy**

9. Section 1 Overview. The description of existing conditions and challenges is broadly correct and welcome.

10. Section 2 Surface access to airports. The problem is that the improved A3 will be at or over capacity in peak periods under the Plan, and the M25 SW Quadrant study has concluded that the M25 will be overloaded. So surface access to Heathrow from Guildford will continue to be affected by the weaknesses listed in this section.

11. Section 3 Rail. This section is welcome. However, it is noted that Crossrail 2 has not yet been secured.

12. Section 4 Strategic roads. Surely the strategy should be aligned with the position of Highs England set out in the Topic Paper: Transport, where it is evident that the improvement of the A3 will not be completed until 2026/27, or even 2027/28? The removal of schemes SRN1 and SRN6 from the list of key infrastructure for the plan, and redesignating them as ‘aspirational’ is inconsistent with the safety objectives of the borough and surely of Highways England and Surrey County Council (the highway authority). Under the strategy and the Plan, the issues for Beechcroft Drive and the weaving and merging issues on the existing A3 will not be addressed until half way through the plan period.

13. Section 5 Local roads. While welcoming the aspiration to transform the town centre, the traffic implications have not been dealt with in the strategy or the Plan. Section 1 correctly included the issue of “severance of the town and its constituent neighbourhoods resulting from a combination of the A3 trunk road, railway lines and the River Wey”. The case for a new crossing of the river and railway, relieving pressure on the Farnham Road railway bridge and helping to achieve a better environment on town centre roads, should be taken very seriously and examined in depth. There is a real risk that a significant reduction in capacity in the town centre, both the gyratory and Walnut Tree Close, and on routes carrying the SMC, will lead to road users transferring to minor roads around the town that are unsuited to carrying more traffic.

14. The M25 SW Quadrant study report recommends that alternative routes are developed to carry orbital traffic, and this could mean more use of the A31/A331 in Guildford. There are local roads where capacity is already an issue and planned growth will add to problems that are not mentioned in this strategy. The scope of this element of the strategy is not wide enough. The bus transit strategy is welcome. However, there is insufficient information on the Sustainable Movement Corridor to gauge either what it might deliver or its potential impact on road capacity. The statement under ‘Anticipated improvements’ that the New Sustainable Movement Corridor provides rapid and reliable bus journeys in Guildford urban...
area and links...’ has not been demonstrated. Consultants have been carrying out studies but the results have not been made public in time to inform this consultation.

15. A high quality bus station in the town centre is critical for the future of the town. There is a lack of park and ride on the east of the town and not even an aspiration for future provision.

16. The active modes strategy is welcome. However, many roads in the borough are two-lane carriageways of restricted width, with little scope for allocating space for cyclists, and this has to be either accepted or addressed over the long term.

17. Section 6 Air quality. If traffic is going to increase in aggregate, as the forecasts show, even with the measures being proposed, then air quality will continue to be a concern.

18. Section 7 Road safety. The proposals are welcome, but as stated above, the schemes SRN1 and SRN6 should be reinstated in the Plan for safety reasons.

**Topic Paper: Transport**

20. This is a helpful paper providing context and background to the transport aspects of the Plan.

21. The fact the new supplementary technical work is planned to be carried out prior to the submission of the plan to the Secretary of State (para 3.18) is welcome, but it would have been better if the results had been available for this consultation.

22. It is recommended that the wider evidence base should be expanded to include the following:
   - Local Enterprise Partnerships and Local authorities: Influencing Strategic Transport in the South East, WSP, 2016
   - Surrey County Council: Response to Waverley borough Council on WA/15/2395 Dunsfold Park, Dec 2016
   - Guildford Borough Council: Guildford Town Centre Highway assessment –Town Centre Highway Layout Concept Testing, WSP, April 2016

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** (Yes)

The evidence presented on housing need in GLHearn's Guildford Addendum to the SHMA (March 2017) is flawed. The explanation of why it is flawed is set out in the report prepared by Neil McDonald for Guildford Residents Association - Review of GLHearn's Guildford Addendum, July 2017. (This report has been peer reviewed.) There are strong grounds for revising the OAN downwards, which would have fundamental implications for the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
This comment is about one aspect of soundness - making sure that the infrastructure provision in the plan will be sufficient to meet the needs of the increased population and that of the surrounding area. In the case of transport, this is unlikely to be the case. Achieving soundness in this respect would require a lower rate of expansion of housing and more investment in infrastructure.

The assessment of need for housing in the borough over the plan period adopted by the Council is based on flawed analysis, and this undermines the soundness of the plan.

[Text of attachment reproduced below]

1. In terms of its transport aspects the Plan cannot be regarded as sound. GBC has provided vivid descriptions of the conditions on the network today and the evidence is that these will be as poor, and in some cases worse, at the end of the plan period, even with the mitigation measures. Growth and infrastructure have to be better aligned. While the level of growth in homes in this latest draft plan is somewhat lower than that in the 2016 version, it is still substantial and growth is also planned outside the borough. The evidence provided indicates that congestion will be widespread on much of the highway network in peak periods, even with the proposed highway schemes and with the measures to encourage the use of public transport in place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: Q3 Soundness, 20.7.17.pdf (5 KB)
While the text of the final paragraph in the box setting out the spatial vision has not changed, the schemes referred to have. See attached comment.

[text of attachment reproduced below]

The last paragraph in the Spatial Vision statement refers to ‘early targeted improvement schemes to deliver road safety and some congestion relief on the A3 will be delivered within the plan period’. While it is correct that funding has been committed for two improvement schemes – SRN7 (£1.6m) and SRN8 (£2.5m), but the two safety related schemes SRN1 and SRN6, previously regarded as urgent, have been removed from the infrastructure schedule.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

The final sentence of the Spatial Vision should be changed to read as follows:

The rate of delivery of housing in the plan period is conditional on major improvement of the A3 through Guildford and the other highway improvement schemes listed in the Infrastructure Schedule.

Do you consider this section of the document; complies with the Duty to Cooperate? (Yes), is Sound? (No), is Legally Compliant? (Yes)

Answer (if comment is on questions 1-7 of the questionnaire): ()

The number of additional homes to be delivered by 2034 has been changed to 12,426. This number is based on the GLHearn Addendum to the SHMA which is flawed. Further work is needed to arrive at a more soundly based number, but on the assessment made by Neil McDonald, the demographic need is for 404 houses per annum. Allowing for rounding up the calculation for the years to 2034, the provision in the plan should be reduced to 8,000.

Answer (if comment is on questions 1-7 of the questionnaire): ()
The scale of comparison retail floorspace provision in the Norrth Street development has been changed to 41,000 sq m which is a move in the right direction, but not enough. The quantity should be scaled back further, in recognition of the trends in retailing and taking into account the existing retail space in the town centre.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P2 sets out the villages to be inset from the Green Belt and identifies them for limited infilling. However, the NPPF is different from the former PPG2, in that it no longer sets out that villages can be inset and identified for infilling only. The NPPF is concerned with whether a village is either in or out of the Green Belt, and not the type/level of development that may occur.

I hope that you find these comments helpful, but please let me know if any clarification is required.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Thank you for providing this Council with the opportunity to comment on your Proposed Submission Local Plan. The comments below are at officer level; the matter has not been reported to Council members.

Policy S2: The Boroughwide strategy makes provision for 693 dwellings per annum to 2033, and 43 pitches and 6 plots 2012-2017 with an additional 30 pitches and 2 plots to 2017. As such, the policy is meeting economically derived OAN and full identified GTAA needs, as evidenced by the SHMA and the GTAA.

The policy also sets out that housing is needed to support the supply of 3,200 B class jobs, but it is not possible to discover where from the ELR or the Employment topic paper, that this figure has been derived. However, as not in Runnymede’s FEA, this is not a matter of particular concern to us.
Para 4.1.11, as supporting text to Policy S2, states that Table 1 shows development to be delivered between 2018 and 2033, and sums to 10,395 (693 per annum). As such, it has to be assumed that 3,465 (693 per annum) is to be delivered 2013-2018, but there is no identification or breakdown of sites delivered or under construction from 2013 onwards that count towards the target.

Para 4.1.12 states that Table 1 shows that the number of new homes is greater than the target. Table 1 sums to 13,652, which is less than the target, so it is not clear if the 13,652 is for the period 2018-2033 or for 2013-2033.

The list of housing sites sum to 12,630 which, with addition of windfall at 625, gives 13,255. This is less than the figure quoted in Table 1 and the housing target in Policy S2, but the list of sites is not clear if these are for 2018-2033, or if any are under construction.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

It is noted that policy S2, Planning for the borough – our spatial development strategy, of the Local Plan, intends to meet a housing need equivalent to a level of 654 dwellings per annum. This is the figure set out in the Land Availability Assessment (LAA) Addendum (June 2017).

However, it is not the figure set out in the Final West Surrey SHMA (September/October 2015), which identified an overall need for housing over the 2013-33 period for Guildford of 693 homes per annum. This document was prepared by GL Hearn on behalf of Guildford, Waverley and Woking Borough Councils jointly.

Runnymede Borough Council is concerned that Guildford is not proposing to meet its full OAN, with consideration therefore having to be given to the question as to whether the Plan is unsound on that basis, notwithstanding that there has been some joint working with Waverley and Woking in pursuit of the Duty to Co-operate.

Moreover, as Runnymede is not yet in a position to be able to confirm that it is able to meet its own housing needs in its emerging Local Plan, ‘Runnymede 2035’, this Council will continue to request assistance concerning this matter from Guildford (and, indeed, from other Local Planning Authority areas).

Executive Summary

This set of representations are made on behalf of Countryside Properties (UK) Ltd to Guildford Borough Council’s (GBC) Proposed Submission Local Plan: Strategy and Sites. The representations are made in response to the Council’s decision to exclude Land South of New Pond Road Farncombe (Land Availability Assessment Ref: 2241) as a residential allocation in the Regulation 19 Proposed Submission Local Plan. The site was previously identified as part of a residential allocation (number 80) within the 2014 Draft Local Plan.

These representations draw upon the findings of a number of technical reports with regard to the Land South of the New Pond Road, Farncombe, and these reports are attached as appendices. These cover landscape and visual impact, flood risk, sustainability, archaeology, ecology, heritage and transport. We conclude that land to the south of New Pond Road, Farncombe:

- Makes limited contribution to the four assessed purposes of Green Belt and to the (defined) special qualities that are intrinsic to designating an AONB;
- Has no technical constraints preventing the site from being used for residential development;
- Can fully deliver housing in the first 5 years of the plan, thus contributing towards Guildford Borough’s five year land supply; and
- Is sustainable as it is well located to existing local facilities and services, including local public transport infrastructure.

GBC’s strategy relies upon a number of strategic sites, and it is acknowledged that the current backlog of housing provision will not be met within the first five years of the plan. This highlights the critical need to allocate smaller and medium sized sites which are capable of delivering housing in the short term.

NLP have critiqued the West Surrey Strategic Housing Market Assessment (SHMA). The following matters are identified as being of particular concern:

- A failure under the duty to co-operate to address how the housing needs of the West Surrey Housing Market Area (HMA) will be addressed, in particular, with respect to significant unmet housing needs of Woking (which the SHMA identifies as being 3,150 homes between 2013 and 2027);
- A failure to take account of recent London migration patterns which indicate an additional need of 1,200 dwellings across the HMA;
- Market signals and affordable housing demand both point to the need for a substantive uplift being required to the Objectively Assessed Need (OAN) figure; and
- Costly infrastructure requirements (particularly with regard to major road and rail projects) raise doubts about the deliverability of a number of the proposed housing allocations.

The representations also provide a comparison of the New Pond Road site with four similar sites that are proposed housing allocations, and identifies that the New Pond Road site is comparable or preferable in landscape and sustainability terms and should be added to the Local Plan as a residential allocation.

The representations raise concern about the allocation of the land to the south of Normandy and north of Flexford (Policy A46). Key concerns include:

- The site is identified in the Council’s Green Belt and Countryside Study as a highly sensitive land parcel;
- Development would cause considerable harm to the openness of the Green Belt and remove the highly sensitive gap between the two villages; and
Extensive infrastructure provision will be required, and the deliverability of the site is uncertain.

In summary, the representations raise critical concerns about the soundness of the Local Plan as currently drafted, and accordingly Guildford Borough Council are respectfully urged to reconsider the current draft and reinstate the Land South of New Pond Road, Farncombe (LAA Ref 2241) as a residential allocation.

Representation on Policy A46: Land to the South of Normandy and North of Flexford

Introduction

This representation is submitted on behalf of Countryside Properties in response to the Council’s decision to elevate Land to the South of Normandy and North of Flexford (Policy A46) from a safeguarded site in the Regulation 18 Draft Local Plan to a Strategic Site Allocation in the Regulation 19 Proposed Submission Local Plan.

The site is 67 hectares in areas and comprises numerous fields, 4 parcels of ancient woodland and 2 public footpaths which traverse the site. It has been identified in the Submission Local Plan as a residential led mixed use development allocation for:

- Approximately 1,100 homes (C3), including some specialist housing and self-build plots (C3), and
- A nursing or residential care home (C2) with approximately 60 beds, and
- 6 Travelling Showpeople plots (sui generis), and
- Approximately 400 sq m of comparison retail (A1), and
- Approximately 300 sq m of convenience retail (A1), and
- Approximately 400 sq m of services (A2 – A5), and
- Approximately 300 sq m of community facilities (D1), and
- A secondary school (D1) (up to eight form entry), and
- A village green.

Background

In the Issues and Options Consultation (October 2013) the Council identified that it could consider an option to significantly expand an existing village, with possible areas including land between Flexford and Normandy.
In July 2014 the Council undertook a twelve week public consultation on the Draft Guildford Borough Local Plan: Strategy and Sites. Land between Flexford and Normandy was identified in this document as Safeguarded Land (site reference 119) to meet the longer terms development needs stretching beyond the plan period. The Draft Plan proposed that the land be removed from the Green Belt but would only be considered for development through a local plan review.

In this regard, the Council’s Green Belt and Countryside Study (GBCS) Vol II (February 2013) had identified this land parcel (H12) as being of “high sensitivity” to development when considering Green Belt purposes. The GBCS recognised that the land met 3 of the 4 assessed Green Belt purposes, being that it:

Checks sprawl of Normandy and Flexford;
Prevents Normandy and Flexford from merging; and
Assists in safeguarding the countryside from encroachment.

Whilst only safeguarded for future development in the Draft Guildford Local Plan in recognition of its sensitivity, land between Flexford and Normandy has now been identified as a strategic site in the Proposed Submission Local Plan (Policy A46). In this regard, the Committee Report to Full Council (24 May 2016) explains in para 4.12:

“In considering different sites within these spatial options, we have relied upon the findings of the GBCS. The GBCS identifies Potential Development Areas (PDAs) that could potentially be removed from the Green Belt for development, without harming the main purposes of the Green Belt. The draft Local Plan (2014) treated all PDAs as reasonable options for development. However, following the feedback from consultation and the new evidence available, we have reconsidered how Green Belt is used as a constraint. The draft Local Plan seeks to give weight to the sensitivity of the Green Belt parcel within which each PDA is located. Whilst PDAs have been identified on the basis that they would not fundamentally harm the main purposes of the Green Belt, there would nevertheless be, in relative terms, more harm caused by allocating sites within land parcels assessed as contributing more towards the purposes of the Green Belt.”

The Report goes on to explain in para 4.19 that “whilst the Green Belt sensitivity methodology is applicable as a general principle, consideration must be given to wider sustainability factors”, and then goes on to identify “exception” sites on this basis. This includes the land between Normandy and Flexford which “is located in a red (high) sensitivity land parcel”.

To justify its allocation as an exception, the Report explains in para 19 (bullet 3) that the key factors which have determined the site allocation at Normandy are:

“Green Belt – site identified in the GBCS as a potential development area with defensible boundaries.
Site is promoted for mixed use development, is deliverable and viable.
The location is one that would benefit from additional housing. Both Normandy and Flexford have lost local facilities, such as shops and a public house because there are insufficient populations to support them.
Infrastructure
The site will deliver a local centre with community and retail facilities, and a village green.
Provision of specialist accommodation (care home and Travelling Showpeople plots).
Provision of a secondary school to meet future needs of the west area of Guildford borough (both natural population growth and need arising from the planned new housing).
Proximity to the existing rail station and plans to improve the frequency of the service. This would serve both Normandy and Flexford residents and be used by pupils accessing the secondary school.
Capacity of the site is able to accommodate the level of associated infrastructure.
Educational need arising from our spatial strategy for the west of the borough (up to 8 forms of entry). This is principally development at Ash/Tongham, Blackwell Farm, west Guildford town and the Normandy site itself (1 form of entry).

The secondary school is located in an easily accessible location to both Ash/Tongham and Guildford – it is therefore best able to serve the catchment area.

Such a development could make both Normandy and Flexford villages more sustainable.

In the following sections, we consider the soundness of the key factors that have led to the Council making an exception to its key principles when identifying the land between Normandy and Flexford (Site A46) as a Strategic Site.

**Green Belt**

As identified above, the Council’s GBCS identifies that this land parcel is considered to be of high sensitivity to development. It also confirms that its development would inevitably compromise all but one of the five Green Belt purposes identified in the NPPF.

The GBCS goes on, however, to suggest in Vol V (when considering the land as a potential major development area (PMDA)) that the development would not significantly affect the openness of the Green Belt at this location within the Borough. In reaching this conclusion it identifies that the site “is generally enclosed by woodlands, treebelts, hedgerows and the railway line to the south. Woodland at Waldens Copse and Pusseys Copse provides a high level of visual screening within the PMDA.”

We consider that this simplified consideration of ‘openness’ in relation to general views into Site A46 from the wider area fails to take account of the scale of proposed built development across, what is described in the Council’s Landscape Character Assessment as, a peaceful rural landscape, with a gently rolling landform, substantial areas of ancient woodland of high biodiversity value and a sparse settlement pattern. Having visited the site, we agree with the findings of the Landscape Character Assessment, having noted its tranquil nature and scenic quality but also its function as a rural setting to scattered and fragmented built development. We also identified wide open views across the site from Westwood Lane to the northwest, and from the public footpaths crossing the site.

Built development guidelines within the Council’s Landscape Character Assessment advocate the conservation of this fragmented landscape including the surviving areas of open farmland with scattered farmsteads; the retention of individual settlements avoiding merging these through dense linear development along roads, for instance Flexford and Normandy; the retention of gaps in linear development (for instance between Great Westwood and Flexford); avoiding the location of any new large mass of development or bulky structures where overly visually intrusive on this character area; and the conservation of the views south to the rural, unsettled ridge of the Hog's Back. The Council have therefore clearly been inconsistent with the its own build development guidelines in choosing to allocate Site A46.

Recent proposals for much smaller developments on land in the immediate vicinity of Site A46 have been refused by the Council on grounds that the quantum of urban development would be harmful to the openness of the Green Belt and the landscape character of the area. The first application for 90 units has subsequently been considered by an Inspector at appeal and he also concluded that “given the largely undeveloped nature of the site and the scale and nature of the proposed development, it seems to me that the development would have a considerable impact in this respect [openness] and I attach substantial weight to this harm”4. In dismissing the appeal, the Inspector also concluded that the development would be harmful to the character and appearance of the rural settlement.

The conclusions reached in the GBCS with respect to the insignificant impact of Site A46 on the openness of the Green Belt are therefore clearly questionable in view of recent decisions reached by the Council and the Planning Inspectorate for much smaller developments in the immediate vicinity of the site. We therefore consider that the harm to the openness of the Green Belt has been understated in the identification of the site as a Potential Major Development Area in the GBCS.

**Deliverability and Viability, including infrastructure provision**

It is noted from the Council’s Land Availability Assessment (February 2016) that in order to support the development of Site A46, there would need to be a significant investment in infrastructure. The infrastructure requirements identified in the Infrastructure Delivery Plan (2016) include:
Potential upgrades to the capacity of local electricity, water supply and wastewater networks;
A bespoke SANG to mitigate the impact of the development on the SPA;
Improvements to the B3000/A31 junction (est cost £1 million);
A323 Guildford Road traffic management and environmental improvement scheme (est cost £1 million);
Westwood Lane traffic management and environmental improvement scheme (est cost £0.8 million);
Significant bus network improvements to key destinations;
Provision of an offsite cycle network to key destinations;
Flood risk reduction measures in Orchard Close by railway line at Wanborough Station;
Provision of on-site Sustainable Urban Drainage Systems to minimise flood risk (the site adjoins a surface water flooding hotspot area (Flexford) as set out in the Guildford surface water management plan);
Open space including park, playground and playing fields;
Contributions to the expansion of Wyke Primary School to serve the site (construction costs £5m); and
Contributions and provision of serviced land for a 7fe secondary school (construction costs £20m).

The list of infrastructure required to support the development is clearly extensive and the costs will be substantial. Beyond the above, draft Policy A46 also requires the proposed allocation to deliver a local centre with community and retail facilities, a village green, and the provision of specialist accommodation (care home and Travelling Showpeople plots).

This extensive list of infrastructure is required to drastically improve the sustainability credentials of a rural location currently lacking in service provision. It is therefore evident that the timely delivery of infrastructure at Site A46 is essential if the Local Plan’s fundamental objective of delivering Sustainable Development is to be met. Yet, despite this, we are not aware of any viability study that has been undertaken to demonstrate that the strategic allocation is deliverable and viable with the level of infrastructure required.

Sustainability

We’ve noted above that a significant amount of new infrastructure is needed to support the scale of development envisaged by Policy A46 given the existing deficit in the adjacent settlements of Normandy and Flexford. In fact, Normandy and Flexford scored low (score 9) in terms of the total community facilities and was ranked 10th in terms of the sustainability assessments within the Council’s settlement hierarchy.

To consider this further, we have produced a Site Comparison Table (Appendix 5.1) which compares the sustainability credentials of the site with our Client’s land at New Pond Road, Farncombe. This has been informed by the findings of the Sustainability Appraisal (SA) of the Guildford Proposed Submission Local Plan, although we have, where necessary, amended the scorings to address inaccuracies that we have noted with respect to our Client’s site. This includes correcting the distance to the nearest Primary School as the SA suggests this is less than 2km, when in fact it is less than 1km. We have also identified from available MAFF records that our Client’s land contains Grade 3 agricultural land, as opposed to Grade 1 land which is identified in the SA.

Below we set out our key conclusions when comparing Site A46 with our Client’s site:

Site A44 scored poorly (red) in relation to 5 sustainability criteria, whereas our Client’s site only scored poorly in 3 criteria.

Site A44 is further from a key employment site, recreation facilities, a primary school, and secondary school than our Client’s site.
Site A44 is closer to a European Site (SPA and SAC) than our Client’s site.

Our Client’s site scored worse than A44 with respect to flood risk, and its location within the AONB, however we have demonstrated in our site specific representation in relation to our Client’s site (Section 3) that it makes limited to no contribution to the special qualities and features of the Surrey Hills AONB, and that the area of the site within a flood zone has been agreed with the Environment Agency and will be left undeveloped.

In justifying Site A46 as an exemption the Council contend that the development would make both Normandy and Flexford more sustainable. This may be the case, but as noted above it is at the expense of highly sensitive gap between the two settlements. The separate identity of these villages would also be compromised as, in effect, a new settlement would be formed. We note that the promoter of the site submitted a Concept Masterplan (Drawing No. CSa/2516/101 Rev A) in response to the Regulation 18 Local Plan consultation that sought to address this issue through seeking to locate residential blocks at the edges of the site adjacent to the existing parts of the settlements. However, the result of this is a perpetuation of the disjointed nature of the settlement pattern in the area that would fail to achieve a cohesive and sustainable new development. This is demonstrated by drawing 1325.01 enclosed as Appendix 5.2, which highlights the fragmented layout of the blocks of development proposed on the Concept Masterplan.

Furthermore, we contend that the majority of infrastructure required is there to mitigate the effects of the development, rather than enhance the vitality of Normandy and Flexford as rural communities.

A further justification provided by the Council for a strategic allocation in this location is the proximity to the existing rail station and plans to improve the frequency of the service on the North Downs Line.

In this regard, we consider that Council should take note of the findings of a recent report from the Royal Town Planning Institute (RTPI)5 which challenges the assumption that building in the Green Belt around railway stations would see the majority of new residents using the train to get to jobs in London. The RTPI examined commuting data for five medium-sized towns within the existing Metropolitan Green Belt, towns which are centred around railway stations and have direct connections to central London. It found that in these five towns, only 7.4% of commuters actually travel to inner London by train on a regular basis, despite living within easy walking or cycling distance of a station. The majority of commuters (72%) instead travel by private vehicle, mostly driving to jobs within their hometown and to other places not in London.

The study therefore suggests that new settlement developments next to railway stations are not necessarily sustainable and actually add to traffic congestion because only a small proportion of the population use the station to get to work.

Also, the Council’s LAA (February 2016) notes that opportunities to improve the stations facilities, such as parking and cycle storage, would need to be explored alongside improved connectivity to the station. It is questionable whether this is feasible in view of the limited space available surrounding the existing station.

Summary and Conclusion

Despite being described within the Council’s Green Belt and Countryside Study as a highly sensitive land parcel, Site A46 has been identified as an exception by the Council to its general approach of choosing potential development areas that cause least harm to the Green Belt. It has done so on the basis that it considers there to be key factors concerning the deliverability and sustainability credentials of the site. It has also been suggested by the Council that the development would not significantly affect the openness of the Green Belt at this location within the Borough.

We have demonstrated in these representations that the conclusions reached with respect to the insignificant impact of Site A46 on the openness of the Green Belt are clearly questionable in view of recent decisions reached by the Council and the Planning Inspectorate for much smaller developments in the vicinity of the site. We consider that the harm to the openness of the Green Belt has been understated in the identification of the site as a Potential Major Development Area in the GBCS.

We have also noted that an extensive list of infrastructure is required to drastically improve the sustainability credentials of the proposed allocation in view of the significant deficit in service provision in the local area. The timely delivery of this infrastructure is clearly essential to achieve sustainable development, yet we are not aware of any viability study that demonstrates that the strategic allocation is deliverable and viable with the level of infrastructure required.
Lastly, we have questioned the Council’s contention that the development would make both Normandy and Flexford more sustainable. This would be at the expense of highly sensitive gap between the two settlements. The separate identity of these villages would be compromised and the promoters attempt to address this issue instead would result in a perpetuation of the fragmented nature of the settlement pattern in the area that would fail to achieve a cohesive and sustainable new development.

We have also suggested that the majority of infrastructure required is there to mitigate the effects of the development, rather than enhance the vitality of Normandy and Flexford as rural communities, and also challenged the assumption that the presence of the railway station will achieve the level of sustainable transport use that is anticipated.

Test of Soundness

We consider that there is a risk of the Local Plan being found unsound with the proposed allocation of Site A46 because it is not ‘consistent with national policy, as its development will be harmful to the Green Belt and would fail to achieve sustainable development. It will also not be ‘justified’, or ‘effective’, as it does not represent the most appropriate strategy, when considered against the reasonable alternatives, and there is doubt over its deliverability.

Proposed Changes

In view of the above considerations, we believe that the Land to the South of Normandy and North of Flexford (Site A46) should be removed from the Local Plan prior to submission for Examination.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**Representation on Policy H2: Affordable Homes**

**Introduction**

Policy H2 sets out affordable housing requirements for the Borough.

**National Policy**

The affordable housing policy wording needs to be amended in order to reflect the implications for the Local Plan in terms of the Court of Appeal judgment in Secretary of State for Communities and Local Government v West Berkshire District Council and Reading Borough Council [2016] EWCA Civ 441, and the subsequent changes made to the Planning Practice Guidance (PPG) as a result.

**Test of Soundness**

In view of the above considerations, we consider that the Local Plan is not sound, because it is not ‘consistent with national policy. The Plan needs to be updated to accurately reflect the recent change to national policy.

**Proposed Change**

Policy H2 needs to be updated to reflect the outcome of the above Court of Appeal decision, and the subsequent changes made to Planning Practice Guidance.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Representation on Policy S2: Borough Wide Strategy & Table 1 – Proposed Delivery between 2018 -2033**

**Introduction**

This representation relates to the Guildford Borough Proposed Submission Local Plan Strategies and Sites document. Representations were previously submitted at the Regulation 18 stage in November 2013 in relation to the Guildford Borough Local Plan Strategy and Sites Issues and Options document and in September 2014 at the Draft Plan stage.
In terms of Local Plan preparation, the Guildford Borough Draft Local Plan: strategy and sites document (2014) set out the Council’s preferred options for growth. Our client’s site at land south of New Pond Road, Farncombe was identified as part of a residential allocation (number 80) within the Draft Local Plan. It was also proposed that the land be removed from the Green Belt and the Green Belt boundary re-aligned.

The 2014 Draft Plan contained the following reference:

“4.113 In accordance with national policy, Green Belt boundaries need to follow defensible lines that are easily recognisable and likely to be permanent. This includes for instance roads, railway lines, woodlands and hedgerows. We have reviewed and followed the recommendations of the GBCS with the following amendments…:

Farncombe: we have identified a development site that adjoins the settlement of Farncombe and land reserved for future development in Waverley Borough Council’s Local Plan 2002. We will continue to work together to progress this land over the plan period”.

The previously proposed draft allocation comprised of three main parcels of land. The furthest west is the site that is the subject of this representation (Countryside Properties land). To the east is land associated with New Pond Cottage and New Pond Farm. The furthest east is land promoted by Black Onyx on behalf of the Podger Estate. Countryside Properties are cooperating with those with an interest in the land.

Deliverability

Paragraph 14 of the NPPF emphasises that:

“At the heart of the National Planning Policy Framework is a presumption in favour of sustainable development, which should be seen as a golden thread running through both plan-making and decision taking.

For plan-making this means that:

local planning authorities should positively seek opportunities to meet the development needs of their area,

Local Plans should meet objectively assessed needs, with sufficient flexibility to adapt to rapid change, unless:

- Any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole, or

- Specific policies in this framework indicate that development should be restricted…”

Paragraph 47 of the National Planning Policy Framework (NPPF) focuses on the requirement of Local Planning Authorities to significantly boost the supply of housing.

The footnotes associated with paragraph 47 of the NPPF states that for a site to be deliverable, it needs to be available, in a suitable location and viable. It is required that a site is achievable and that there is a realistic prospect of it coming forward in the next five years.

Countryside Properties confirms that the land south of New Pond Road can be delivered within the first five years of the adoption of the Guildford Borough Local Plan and contribute around 90 dwellings to the Borough’s 5 year housing land supply with an estimated average construction rate of about 30 dwellings per annum.

Local Authorities are required to work together to ensure that housing requirements across the whole Housing Market Area are addressed.

The Council identifies the key pieces of evidence base relevant to housing as being:

- West Surrey Strategic Housing Market Assessment (SHMA)
- Green Belt and Countryside Study (GBCS)
- Land Availability Assessment (LAA)
The final joint West Surrey SHMA (September 2015) indicated that the objectively assessed housing need (OAN) for Guildford borough is 693 homes per year, or 13,860 dwellings over the Plan period (2013-2033). The annual figure consists of a demographic requirement of 517 homes with an uplift of 25 homes for student growth, 120 homes for economic growth and 31 homes to address market signals and affordability issues (paragraph 4.3 of the Housing Delivery Topic Paper [HDTP]).

The HDTP states (paragraph 4.4142) that the Council consider it can meet the OAN with flexibility. The total potential provision of new homes across the plan period (including completions since 2013 and outstanding capacity) is 15,844. This is identified as including a buffer of 1,984 dwellings, rather than over-provision. Clearly, not all sites will come forward as expected during the plan period. Furthermore, we believe that in reality the Council lacks the housing supply buffer it claims to exist. We set out further below that we also consider that there are serious deficiencies in the SHMA in terms of the overall OAN identified, and that we consider the actual housing requirement figure to be higher.

Whilst Waverley is currently progressing its Local Plan, which aims to meet its OAN, there is currently unmet need arising within the HMA from Woking Borough Council. It has an adopted housing requirement of 292 dwellings per annum (2010 – 2027) against an OAN of 517. There is therefore a shortfall of 225 homes per year between 2013 and 2027, a total of 3,150 homes (paragraph 4.4 of the Housing Delivery Topic Paper).

NLP – Review and Critique of the West Surrey SHMA

NLP have prepared a review and critique of the West Surrey SHMA. Below we set out the key findings of the assessment. The full report is attached in Section 2 Appendix 1 of our representations.

Paragraph 3.5 of the NLP report refers to the fact that the SHMA models three alternative demographic scenarios as sensitives to the 2012 SNPP (para 4.62)

- a 12 year migration trend,
- a scenario which makes an unattributable population change (UPC) adjustment; and finally
- a scenario which takes into account the London migration patterns planned for in the adopted London Plan (2015).

However, the SHMA discounts the outcomes of these scenarios and concludes on the 2012 SNPP scenario as the demographic starting point for the West Surrey HMA. NLP considered this approach to be wrong.

NLP also concluded that the SHMA fails to properly consider the issue of London migration. It points out that the housing targets within the Adopted London Plan (2015) are based on a ‘central variant’ population projection produced by the Greater London Authority (GLA) which assumed migratory outflows from London will increase by 5% and inflows to London will fall by 3% compared with recent trends over the recessionary period (i.e. those that have informed the 2012-based SNPP). These assumptions have formed the basis for the London Plan, with the Examination Inspector ‘signing off’ these assumptions, inferring that they are likely to happen (paragraph 3.8).

Paragraph 3.9 states that:

“The London Plan (2015) deviates from national projections and, as this assumption influences migration at a national level, this needs to be taken into account. West Surrey’s location within the wider South East means that any assumptions around fewer people moving to London and more people leaving London (some of which to West Surrey) will result in increased population growth and housing need within the HMA as a whole. This will be of most significance to Guildford where historically there has been substantial out migration from Guildford Borough to London. As London is not planning to meet the needs of all of the migrants to London as is currently modelled within the 2012 SNPP, Guildford will have to consider how it will accommodate its current residents who will not be planned for in London. When these assumptions are applied in the London Migration scenario, Guildford has a housing need of 568 per annum (Table 25 of the SHMA),
compared to 517 per annum under the 2012 SNPP scenario. Taking into account the London migration assumptions inherent within the adopted London Plan (2015). Guildford needs to plan for 51 extra dwellings every year, over the plan period this is more than 1,000 homes. For consistency across the HMA, the outcome of this scenario for the HMA as a whole is an additional 60 units per annum over the plan period”.

The above finding is very significant. It demonstrates that over the course of the plan period Guildford would need to find provision for an additional 1,020 dwellings, and that across the HMA as a whole, a further 1,200 dwellings will need to be provided.

The use of different economic scenarios has been questioned by NLP (paragraph 3.21). It has pointed out that a different economic scenario has been used to determine associated housing need in Waverley (recent trends / the LPA’s economic strategy, whereas the economic scenario used for Woking and Guildford is based upon forecasts. As a consequence, the employment growth assumptions are not being made consistently across the HMA.

There is a clear danger that the use of different economic scenarios might result in the failure to ensure that the total number of jobs and their associated housing needs across the HMA are adequately provided for.

NLP states (paragraph 3.25) that it does not consider that the SHMA has suitably addressed the need for a market signals uplift in West Surrey and its adjustment is not compliant with the requirements of the PPG. It reports:

“…To make an uplift for market signals, the SHMA runs a sensitivity scenario to the demographic-led projections whereby the household formation rates amongst the 25-34 age group improves, such that rates return to their 2001 level by 2033 (para 7.53), i.e. it is assumed that more people in this age group will form their own households rather than living with their parents or in house shares. The SHMA concludes that making this adjustment to headship rates would result in the need for an additional 98 dpa on the demographic-led needs or 100 dpa on the economic-led needs (Tables 53-55). In either case this represents a 7% increase/uplift on the starting point across the HMA to address market signals. The SHMA appears to conclude (para 7.58) that this level of uplift is reasonable and would secure an improvement in affordability”.

Reference is made (paragraph 3.30) to the Eastleigh Planning Inspector concluding that a modest uplift of 10% is a reasonable proxy for quantifying an increase demographic based needs to take account of ‘modest’ negatively performing market signals. Whereas, more recently the Canterbury Inspector accepted a 20% uplift for ‘more than modest’ market signals pressure. This represents a more appropriate starting point for considering uplift according to NLP.

It is pointed out in paragraph 3.31 that:

“Based on the cost of housing indicators (house prices, rental values and lower quartile affordability measures), as summarised below in Table 3.2, the market signals pressures in West Surrey are well in excess of those identified in Eastleigh and Canterbury in different respects”.

The report suggests that affordable housing needs equate to an annual housing requirement of 3,106 dwellings per annum to meet affordable housing need in full across the HMA. Whilst it is recognised that delivery of that quantum of housing is unrealistic, the SHMA fails to provide any uplift at all for affordable housing (paragraph 3.39). This is considered to be an incorrect approach. Particularly given that the SHMA is silent upon how the affordability gap might otherwise be narrowed.

Paragraph 4.20 makes mention of the fact that:

“.Paragrah 47 of the NPPF requires that full OAN for market and affordable housing should be met in the HMA, as far as consistent with the policies set out in the Framework. As it stands Guildford are not complying with this requirement because it has not been evidenced that the unmet needs of Woking will be met entirely in Waverley as a result of Guildford taking on none of Woking’s unmet housing needs. Paragraph 14 of the NPPF requires that Local Plans should meet OAN, with sufficient flexibility to adapt to rapid change, unless “any adverse impacts of doing so would significantly and demonstrably outweigh the benefits”. It is not clear from the Guildford SA that this tilted balancing exercise has been undertaken. There is insufficient evidence to show that Guildford meeting even some of Woking’s unmet housing needs would be so significantly and demonstrably outweighed by the negative impacts of doing so. Indeed, the SA itself falls short of concluding that Guildford could fundamentally do no more than its own OAN. It sets out (para 8.2.2 sub-bullet (viii)) its own conclusion that “It is far from clear that Guildford is relatively unconstrained / suited for growth above OAN
in the sub-regional context. This is the finding of the SA work...”; being far from clear cannot be equated to ‘significantly and demonstrably’ outweighing benefits”

In paragraph 5.2 the NLP report concludes that the SHMA significantly underestimates the true scale of housing need in West Surrey and an OAN in excess of 1,729 dpa across the HMA is justified.

Other Considerations

There are a number of constraints which the Council took on board with regard when it sought to determine its ability to accommodate the OAN. This includes:

• The Thames Basins Heath Special Protection Area (SPA) which covers the northern parts of our borough,
• The Surrey Hills Area of Outstanding Natural Beauty (AONB) which covers the southern half of the borough,
• The Metropolitan Green Belt which covers 89 per cent of the borough,
• Flood risk across the borough, and which is high within areas of the town centre,
• Infrastructure capacity where appropriate mitigation is not possible.

Reference is made in paragraph 4.19 of the Housing Delivery Topic Paper to the fact that the southern half of the borough is designated as part of the Surrey Hills Area of Outstanding Natural Beauty (AONB) and that the NPPF affords this land the highest status of protection (paragraph 115).

There is a current commitment by Natural England to undertake an AONB boundary review. A study has been undertaken by landscape consultants Hankinson Duckett Associates, through Surrey County Council, reviewing the Surrey Landscape Character Assessment and looking for candidate areas within the AGLV that contribute to natural beauty. The study identifies a number of recommended additional areas of Surrey Hills AONB and one secondary potential additional Area of Surrey Hills AONB within Guildford borough. However, a review of the AONB will need to consider both areas for inclusion and deletion in order to be considered robust.

In paragraph 4.21 of the Housing Delivery Topic Paper the Council refers to the fact that it has:

“...sought to strengthen the level of protection afforded to the AONB within the Proposed Submission Local Plan. In accordance with the NPPF, we are not proposing any major development unless there is a strong and over-riding justification for doing so. As a result of this, the plan no longer proposes to allocate a site for 100 homes on the edge of Farncombe, at New Pond Road which is located in the AONB”.

Paragraphs 115 and 116 of the NPPF are particularly relevant in terms of the AONB

“Great weight should be given to conserving landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty, which have the highest status of protection in relation to landscape and scenic beauty. The conservation of wildlife and cultural heritage are important considerations in all these areas, and should be given great weight in National Parks and the Broads” (paragraph 115).

“Planning permission should be refused for major developments in these designated areas except in exceptional circumstances and where it can be demonstrated they are in the public interest. Consideration of such applications should include an assessment of:

• the need for the development, including in terms of any national considerations, and the impact of permitting it, or refusing it, upon the local economy;
• the cost of, and scope for, developing elsewhere outside the designated area, or meeting the need for it in some other way; and
• any detrimental effect on the environment, the landscape and recreational opportunities, and the extent to which that could be moderated” (paragraph 116).

Evidently at the previous stage of the Draft Local Plan the Council considered that the proposed allocation of our client’s site in an Area of Outstanding Natural Beauty (AONB) was justified due to the overriding need to meet the overall housing requirement, and due to the fact that development of the site was not deemed harmful to the overall protection of the Surrey
Hills AONB. This position is reinforced by the work conducted by Barton Willmore on behalf of Countryside Properties and included in the site specific representation.

The Council has dropped the proposed allocation in the Pre Submission Local Plan on the basis that it is able to deliver its overall housing requirement without the need to utilise any AONB land. However, as we have indicated above, we do not believe this to be the case as we consider the actual housing requirement figure to be significantly higher than specified in the OAN.

It is the case that the Thames Basin Heath SPA covers a large area across the northern part of the Borough, and the Surrey Hills AONB stretches across its southern parts. It is clearly appropriate for these to be afforded great protection. However, in relation to the latter, reference should be made to the forthcoming AONB Boundaries Review to be undertaken by Natural England. This will need to consider not only what other sites might merit AONB status, but also which sites might no longer warrant such status. This will ensure that it is the most valuable landscape that is afforded the strongest protection.

Urban Capacity Proposals

Guildford town centre is identified in paragraph 4.37 of the HDTP as being likely to be a source of housing supply that will deliver 1,172 dwellings to 2033, with a further 1,570 dwellings being delivered over the wider Guildford urban area (paragraph 4.41).

Guildford’s housing delivery rate has been poor in recent years. Over the recent 7 year period between 2008/9 and 2014/15, housing completions only averaged 202 dwellings per annum. Given this, it seems unrealistic to assume that sites in and around Guildford Town Centre will deliver substantial quantities of housing completions. Whilst it is entirely appropriate for the Council to seek to bolster residential accommodation in and around Guildford Town Centre, any allocations and assumptions concerning future housing land supply must be realistic and based upon likely market demand, rather than on aspirations alone. Furthermore, there are a number of technical and financial constraints, not least flood risk from the River Wey, but also ownership, access and viability (including CIL), which are also likely to impede early delivery.

The unanimous rejection in June 2016 by the Council’s Planning Committee of the £150 million Solum proposal to redevelop Guildford’s railway station and construct a new residential quarter of 445 apartments casts further doubt upon whether the delivery of significant amounts of new town centre housing provision is realistic.

We have submitted a separate representation in respect of proposed housing site allocation Policy A46 (land to the south of Normandy and north of Flexford). We note that the Council states in paragraph 4.130 that:

“…The site is deliverable and is able to deliver more homes in the earlier years than other individual strategic sites, and complete prior to those sites. The quantum of homes provided on this site is needed to contribute towards the OAN – the absence of this site would leave little overall flexibility. As set out above it is important that where sustainable to do so, we seek to boost significantly the supply of housing in the first five years. The delivery of this site is not dependent on A3 infrastructure timescales, and can start to deliver within the first five years following adoption of the Local Plan”.

We believe that there are other better sites, including land at New Pond Road, Farncombe (see our separate site based representation in Section 3) that are better able to contribute towards the OAN and 5 year housing land supply. We do not consider that the development of the Normandy site, which has been identified as being located in a red (high) sensitivity land parcel represents an appropriate strategic housing allocation site. It is apparent that the Council’s motivation for the allocation is that it will deliver a high quantum of housing on a single site, and that sustainability considerations have been put to one side.

Windfalls

The Land Availability Assessment (February 2016) seeks in Appendix D to justify the inclusion of 625 dwellings over the plan period as windfall. The windfall allowance being 50 homes per year in years, 6-10 and 11-15, and 25 homes in years 1-5. However, the justification for this seems to be largely based upon the recent rate of prior approvals. We do not consider that this provides any sound justification for the proposed windfall allowance. Clearly, there has been a rush of applications to convert offices to residential accommodation in the recent past, but suitable sites are likely to dry up
relatively quickly. Furthermore, garden land developments are likely to contribute less towards the windfall allowance than was the case in the past.

Housing Delivery

The following table in the HDTP (paragraph 4.169) shows that housing completion rates over the last decade have been low. It also demonstrates a record of under delivery of new homes against the OAN, leading to a significant backlog accruing over a short period of time.

### Housing Completions

<table>

</table>

The envisaged housing backlog at the point of adoption is 2019 dwellings (HDTP, paragraph 4.156). It is stated in the following paragraph that:

“4.157 Neighbouring authorities cannot meet this backlog, and it cannot be met in the first five years of the plan without significant harm to the Green Belt, and other harm (as considered in the Sustainability Appraisal, Option 5). It can however be met within the first 10 years from adoption, and this is considered the most sustainable approach to development within the borough, whilst not restricting development coming forward earlier, anticipating that accrued backlog will not be met until year 2027/28”.

The Council argues in the HDTP that it would be unreasonable for it to deliver a 5 year housing supply that addresses the current housing backlog, and also provides a 20% buffer to the supply:

“4.171 To take this deficit, plus an additional year’s supply (693, 20% buffer) would require provision of 2712 homes. Add to this the five year requirement (693*5 = 3465) in this period, and this totals a required provision of 6177 homes over a five year period (1235 per year). This is not possible to achieve during this period (2018/19- 2022/2023) without significant harm to the Green Belt and other harm. This would require development of many high sensitivity Green Belt sites, which we do not consider a reasonable option. As set out, the SA has considered an option that seeks to maximise early delivery (option 5)”.

Given the acknowledged fact that housing delivery will be weak in the early years of the Plan period, it will be important to bring forward smaller and medium sized sites such as the site at New Pond Road, Farncombe rather than being dependent upon much larger sites such as proposed housing allocation A46 at Normandy / Flexford, which will need to deliver major new infrastructure. This is demonstrated by the Table below which forms part of Policy S2. It shows that it will take until the late 2020’s before housing delivery rates rise significantly above the OAN target of 696 dpa.

### Annual Housing Target

Annual Housing Target
### Summary and Conclusions

The housing target proposed to meet Guildford’s housing needs based upon the OAN figure identified in the Strategic Housing Market Assessment (SHMA) is inadequate. The NLP report produced for our client has highlighted the following key deficiencies, which suggest that the OAN needs to be increased:

- In-migration from London indicates that more than 1,000 dwellings will be required in Guildford and up to 1,200 dwellings across the West Surrey HMA;
- At least a 20% uplift is required to the initial demographic requirement to take account of market signals;
- No uplift has been made to take account of the very high affordable housing requirement that has been identified; and

Consequently, we consider that ‘Table 1 – Planned delivery between 2018 and 2033’ is deficient in terms of the identified components of housing supply for the reasons set out above. Furthermore, it fails to ensure that the Local Plan delivers a 5 year housing land supply from the outset.

In the case of ‘Normandy and Flexford village expansion (Policy A46) which is identified in the table for 1,100 dwellings, we have submitted separate representations explaining why we consider this to be an unsustainable housing allocation. We have also submitted additional representations in respect of the following proposed housing allocations: A38, A41, A44 & A47.

The identified housing land supply is unlikely to be fully deliverable due to the substantive infrastructure requirements relating to a significant number of proposed housing allocation sites.

As a consequence of the necessity to bring about a step change in housing delivery rates, the Council will need to ensure that it makes provision for necessary Green Belt revisions and the allocation of sites, such as the land to the south of New Pond Road, Farncombe, which can deliver 90 dwellings as part of one of the Council’s preferred allocations in the Draft Local Plan (Regulation 18) in 2014.
Test of Soundness

In view of the above considerations, we consider that the Local Plan is not sound, because it is not ‘consistent with national policy, as it fails to ensure that a 5 year housing land supply is provided from the start of the Plan, it also fails to identify how the wider needs of the Housing Market Area (HMA) will be addressed, and finally its OAN fails to make provision for all relevant housing needs. It is not compliant with the duty to co-operate. It will also not be ‘justified’, or ‘effective’, as it does not represent the most appropriate strategy, when considered against the reasonable alternatives, and there is doubt over its deliverability.

Proposed Changes

The following amendments are proposed:

1. The Plan should identify a 5 year housing land supply from the outset, to which our client’s site at New Pond Road, Farncombe can make a contribution.
2. The Plan needs to specify how the wider unmet needs of the Housing Market Area are being addressed; and
3. The OAN needs to be increased to take account of in-migration from London, market signals and the affordable housing demand.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Introduction

This representation relates to the duty to co-operate which is a legal duty that a local authority has to have fulfilled in order for a Submission Draft Local Plan to be allowed to move forward for Examination.

The Legal Duty

The importance of the ‘Duty to Cooperate’ is highlighted in the PPG in (Reference ID: 9-002-20140306) which states:

“The duty to cooperate is a legal test that requires cooperation between local planning authorities and other public bodies to maximise the effectiveness of policies for strategic matters in Local Plans. It is separate from but related to the Local Plan test of soundness.

The Local Plan examination will test whether a local planning authority has complied with the duty to cooperate. The Inspector will recommend that the Local Plan is not adopted if the duty has not been complied with and the examination will not proceed any further” [our emphasis].
The PPG goes on (Reference ID: 9-008-20140306) to advise that:

“The duty to cooperate seeks to ensure that local planning authorities lead strategic planning effectively through their Local Plans, addressing social, environmental and economic issues that can only be addressed effectively by working with other local planning authorities beyond their own administrative boundaries. For example, housing market and travel to work areas, river catchments and ecological networks may represent a more effective basis on which to plan for housing, transport, infrastructure, flood risk management, climate change mitigation and adaptation, and biodiversity. The aim is to encourage positive, continuous partnership working on issues that go beyond a single local planning authority’s area” [our emphasis].

With regard to what actions constitute effective cooperation under the duty to cooperate, the PPG states (Reference ID: 9-011-20140306):

“…The actions will depend on local needs which will differ, so there is no definitive list of actions that constitute effective cooperation under the duty. Cooperation should produce effective policies on cross boundary strategic matters. This is what local planning authorities and other public bodies should focus on when they are considering how to meet the duty. Local planning authorities should bear in mind that effective cooperation is likely to require sustained joint working with concrete actions and outcomes. It is unlikely to be met by an exchange of correspondence, conversations or consultations between authorities alone.

Authorities should submit robust evidence of the efforts they have made to cooperate on strategic cross boundary matters. This could be in the form of a statement submitted to the examination. Evidence should include details about who the authority has cooperated with, the nature and timing of cooperation and how it has influenced the Local Plan [our emphasis]

Paragraph 159 of the NPPF states that LPAs should collaborate with neighbouring authorities to prepare a SHMA. We comment further in the following section regarding our concerns about the accuracy and findings of the West Surrey SHMA.

Local Authorities are required to demonstrate that they have sought to meet not only their own full objectively assessed housing needs, but also addressed any unmet needs arising from their Housing Market Area or beyond if relevant (e.g. accommodating a proportion of London’s unmet needs). This is obviously a highly important strategic cross boundary matter.

The Council’s Duty to Cooperate Topic Paper (June 2016) refers in paragraphs 4.16 – 4.18 to liaison with the Mayor of London through the Greater London Authority. Mention is made of the fact that the Council has been represented by the Head of Planning Policy from Mole Valley Council on the Strategic Spatial Planning Officer Liaison Group (SSPOLG) which was set up to address strategic planning matters across the wider South-East. It has also been represented on its officer working group successor and also on the Political Steering Group attended by Members.

Whilst it is evident that the Council has engaged with other local authorities by attending meetings and workshops, it is not apparent what specific actions and outcomes have resulted from this co-operation. In the context of London, in terms of whether adequate provision has been made to assist in meeting London’s unmet housing needs, it is clear from reading paragraph 4.33 of the Duty to Co-operate Topic Paper that no uplift has been made to the Council’s overall housing requirement.

The Topic Paper goes on in paragraph 4.42 to state that pursuant to the Memorandum of Understanding (MoU) the three local authorities that constitute the West Sussex HMA (Guildford, Waverley and Woking) are:

“…in the process of agreeing a Statement of Common Ground on housing delivery. This recognises that there is unmet need within the HMA and commits the three authorities to continued future joint working to ensure as far as possible, and subject to the policies in the NPPF, housing needs across the HMA are met in full”.

We note that the Council states in paragraph 4.43 that it does not consider that it can sustainably accommodate any unmet housing need arising from Woking. However, no further justification or explanation of why this is considered to be the
case, is provided. It is apparent that there is currently considerable uncertainty with regard to the final overall housing figure for Guildford, if it will be required to address unmet housing needs from Woking and Waverley. This demonstrates the importance of ensuring that an adequate buffer exists of deliverable housing supply over the course of the Plan period.

Paragraph 4.45 refers to the fact that the delivery of the former Wisley Airfield (2000 dwellings), Gosden Hill (2000 dwellings) and Blackwell Farm (1800 dwellings) are all dependent upon the delivery and timing of key infrastructure requirements on the A3, with the majority of provision expected post 2027.

Furthermore, the Topic Paper states in paragraph 4.65 that the former Wisley airfield site includes land which is allocated in the Surrey Waste Plan 2008 for waste development and safeguarded in the Aggregates Recycling Joint Development Plan Document 2013 as having potential for production of recycled and secondary aggregates, and for an aggregate recycling depot. Surrey County Council submitted comments to the recent planning application for this site (Ref: 15/P/00012) that the proposal would have an unacceptable impact on the provision of such facilities and is therefore contrary to these development plans.

This demonstrates that considerable uncertainty exists regarding the deliverability timescale for a very substantial component of the Council’s overall housing land supply.

We note that the Council has stated its commitment to the future preparation of a Joint Housing Trajectory across the HMA as part of its Land Availability Assessment update work. However, in the absence of this it is difficult to see how the Council is now able to demonstrate the soundness of its Proposed Submission Local Plan.

The Test

The Duty to Co-operate is a legal duty that has to be complied with. It has far more weight and importance than the test of soundness that is applied to individual policies and proposals within a draft Local Plan.

Proposed Change

We consider that in order for the Council to demonstrate that it has complied with the duty to co-operate, the Local Plan must contain a commitment to ensuring that the unmet needs of the Housing Market Area will be addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Vision and ambition

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )
Representation on Spatial Vision

Introduction

The Spatial Vision makes provision for 13,860 dwellings by 2033. Over 2800 units are proposed in the urban areas which take advantage of the existing infrastructure and services, reduce the need to travel and offer alternative modes of transport to the private car.

The Plan also proposes almost 1200 dwellings on non-strategic sites within and around existing villages, some of which are now inset from the Green Belt, and over 750 dwellings as extensions to existing villages.

Reference is made to the fact that the growth proposed in this plan is predicated on the delivery of the necessary infrastructure. The Infrastructure Schedule accompanying the plan (Appendix C) outlines the key infrastructure needed to support the development planned, focussing particularly on the first five years of the plan period and the strategic development sites.

Delivery

It is evident that the delivery of a number of allocation sites will be dependent upon the provision of major new infrastructure such as new railway stations and associated works to boost network capacity, and highway improvements. We note that in terms of the A3 Guildford both the A320 Stoke Interchange Junction to A31 Hog’s Back Junction (SRN2) and the M25 Junction 10 / A3 Wisley Interchange
‘Road Investment Strategy’ (SRN3) are both costed at £100-250 million. We consider that highly expensive infrastructure provision requirements for major allocations means that there will need to be much more of a focus on the allocation of smaller and medium sized sites to ensure housing delivery is boosted over the early years of the Plan period.

Whilst the Vision refers to meeting the identified growth needs of the Borough in terms of housing, employment, retail and leisure, it fails to mention the Duty to Co-operate, and the need to ensure that the unmet housing needs across the wider West Surrey Housing Market Area are met (Guildford, Waverley and Woking), which in the case of Woking, has been identified as being 3,150 homes to 2026/27 (paragraph 4.4, Housing Delivery Topic Paper). It is also worth pointing out that the Guildford Local Plan period will run on for a further 6 years beyond that date, and that additional housing provision will likely be required for this period as well. The Vision must include a commitment to meeting housing need in the housing market area, as required by the NPPF.

The Vision suffers from a failure to articulate the strategic priorities that the Local Plan must address. Furthermore, it fails to specify how these challenges may differ in different parts of the Borough, or how the Vision may respond to different needs within the borough. It is the case that the Thames Basin Heath SPA covers a large area across the northern part of the Borough, and the Surrey Hills AONB stretches across its southern parts. It is clearly appropriate for these to be afforded great protection. However, in relation to the latter, reference should be made to the forthcoming AONB Boundaries Review to be undertaken by Natural England. This will need to consider not only what other sites might merit AONB status, but also which sites might no longer warrant such status. This will ensure that it is the most valuable landscape that is afforded the strongest protection.

Test of Soundness

In view of the above considerations, we consider that the Local Plan Vision is not sound, because it is not ‘consistent with national policy, as it fails to address how the wider needs of the Housing Market Area (HMA) will be addressed. It is not compliant with the duty to co-operate. It will also not be ‘justified’, or ‘effective’, as it does not represent the most appropriate strategy, when considered against the reasonable alternatives, and there is doubt over its deliverability. The vision also needs to be amended to include reference to the future AONB Review.

Proposed Changes

The Spatial Vision needs to be amended by inserting a specific commitment to ensuring that the unmet housing needs across the wider West Surrey Housing Market Area will be properly met.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Introduction

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A34 and policy E3 generally

Little recognition of permitted development rights of B1 etc to residential.

Very little assessment in the Plan as to how the likely contribution to housing stock (and the corresponding diminution of employment space) will be achieved by the exercise of permitted development rights and by the wider changes in shopping practice that will see many more retail areas seeking change of use.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

The evidence base is acceptable.

What is not acceptable is the analysis of that base. In particular the Green Belt and Countryside study assesses GB and its fundamental principles and produces a hierarchy of sites where GB releases might be considered. The policies that you are deriving from this study do not take into account the work of that study. The major releases at Gosden Hill, Wisley, Blackwell Farm and Garlicks Arch will produce a ribbon of development almost the entire length of the Borough. The public perception of the national protection afforded by the London Green Belt (whilst travelling on the A3 for example)
will be of a continuous built up zone. The LAA base reflects developer submissions and not an independent planner led assessment of suitable sites.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In response to the latest draft local plan I comment as follows:-

I object to the latest draft of the local plan which I believe is not fit for purpose.

I object to the lack of transparency in the calculation of the housing numbers. A "secret" formula prepared by property professionals whose interest is in a increasing housing market is not to be relied on without proper scrutiny. This is particularly relevant in the context of the country leaving the EU and changing demand.

I object to the Plan being developed around offers from developers rather than a structured view of how the borough should develop.

I object to GBC's lack of commitment to recognise that that Guildford's location in the green belt presents the need for significant constraints to their policies to limit growth policies and housing numbers to protect the green belt. Housing need is not considered as "special circumstances" to utilise the green belt.
I object to the focus on growth assumptions that focus on regional growth rather than local need.

I object to the proportion of housing proposed in the green belt. By planning just for local need, utilising green belt constraints, using land proposed for retail and industrial uses (where there is no proven demand) it should be possible to present a plan based on the premiss that all local housing can be accommodated without using the greenbelt.

I object to the large scale developments proposed and in particular at Wisley, Burpham and Hogs Back. These proposals cut through the green belt along the A3 corridor, and Wisley in particular is just unsustainable.

Having said that if all other options for saving greenbelt land are exhausted then an urban expansion of Guildford's boundaries seems the more logical and sustainable way forward. Whilst I believe the scale of developments along the A3 are inappropriate and far too large I don't understand why Lord Onslow's proposal at Merrow is not included, at least in part. I suspect big business is sponsoring the other sites and has influenced the Council. If all efforts to avoid green belt development had been exhausted and there remained a local need then a small proportion of the Burpham development and a small proportion of Lord Onslow's Merrow proposal would at least have a chance of being sustainable and could provide an appropriate mix of smaller unit size housing.

I do not believe the Council's promise that development will be limited if the relevant infrastructure is not provided. The current infrastructure can't cope with existing need and there are no firm or deliverable plans to add extra capacity. The National Highways schemes are already well back in the plan and there can be no certainty that the funding will ever arrive for whatever the improvement proposals are.

On a more local level I object you the late introduction of Garlic Arch based on infrastructure "bribes" whereby junctions to the A3 trunk road are offered in exchange for designating green belt land for housing. There are no studies to show the impact on the local road network and no commitment by the highway agencies to support the proposal. Garlic Arch which is agricultural greenbelt land and has ancient woodland, flooding and environmental pollution issues given its proximity to the A3 is not appropriate as a housing site. The site sits between two parishes but it will have the impact of doubling the size of Send Marsh and Burnt Common and changing the rural nature of the villages for ever.

The more logical option of utilising the Burnt Common site, proposed in the last local plan, has been removed. Although the scale and uses that had previously been proposed were inappropriate the Burnt Common site could be considered as having some areas of brown field and therefore makes a far more logical option. Garlic's Arch site should be removed from the plan.

I object to the proposal for a four way junction to the A3 without impact studies on Send and surrounding areas. However safeguarding the land makes sense but this does not mean we have to sacrifice large areas for green belt to "pay" for it. Garlic's Arch is an inappropriate site and GBC should look at their own planning refusal on a part of the site only two years ago for the reasons.

I object to the proposal to remove green belt from the western end of the borough, particularly along the A3, whilst adding it at the eastern end (Councillor Spooner's Parish).

I object to the blanket removal of villages from the green belt. The protection afforded currently does not mean that appropriate infill development can occur but it does allow respect for the fact that the surrounding areas are greenbelt. The removal of greenbelt status from villages will over time change the character of villages to wholly urban environments. Further open spaces within villages need protection, e.g. Send Marsh Green, which currently is protected by greenbelt status.

I believe that behind this draft of the local plan there is a political objective of driving growth at the expense of the green belt. GBC are not supporting the majority view of residents by fighting to protect the green belt but rather responding to national political incentives and developers interests.

Whilst perhaps this version of the local plan might be considered a minor improvement on the last one, once again the Council has failed to put a convincing draft local plan together at considerable expense to the rate payer. GBC need to listen to the people who live in the borough and reissue the draft local plan indicating they are prepared to fight for the borough not responding to regional or national blanket policies.
Although the cost of producing these unacceptable plans is no doubt vast, please try again.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2281  Respondent: 8600929 / Roger Newland  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The latest changes to the proposals to inset villages into the green belt are only minimal whilst the principle of inserting is not adequately substantiated and is objected to in principle. There is no protection for open areas within the villages.
2. The plan continues to be contrary to the principles of the green belt in that it proposes urban spread along the A3 corridor. The proposals at Three Farms Meadows, Wisley; Garlies Arch, Send; Gosden Hill, Burpham/Merrow and the housing towards the Hogs Back will break down the Green Belt along the A3. Any changes are only minor and there remains no special circumstances to support this development.
3. The plan still fails to explain the methodology behind the housing numbers and whilst making minimal changes these in no way reflect the constraints that could be applied given the proportion of green belt within the borough.
4. Policy A42 & Policy 2 para 4.3.15 – I object to these policies as Tannery Lane cannot support additional housing or commerce, it is a narrow country lane set in an attractive green belt area close to the Wey Navigation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2282  Respondent: 8600929 / Roger Newland  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A43 – I object to this policy as -

1. The changes to the current village boundary to create Garlic's Arch are only minor so this housing proposal remains disproportionate and unacceptable.
2. Changes to Garlic's Arch boundary do not address the impact on the infrastructure around Send Marsh, Burnt Common and Send.
3. The development would have a negative impact on the green belt, the ancient woodland, natural water courses and will have a negative effect on the whole area effectively doubling the size of Send Marsh. The proposed
access points to the A3 at Burnt Common takes no account of the impact on the immediately surrounding road network nor the local infrastructure. The junctions will only serve to congest the whole area rather than relieve it and as such can not be seen as a benefit to justify further development.

4. The Garlic's Arch changes do not address the gross over development of the Send Marsh area on a green field site that is an environmentally unsuitable area so close to the A3. As such the site remains unsustainable.

v. There are no special circumstances that justify the loss of this green belt.

1. The provision of traveler/showperson pitches is inappropriate and will be abused. Better to associate the minimum number to an industrial area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2283  Respondent: 8609929 / Roger Newland  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Policy A58 – I object to the proposal to create a large employment area in the Green Belt at Burnt Common which is inappropriate with no identified demand. Setting a minimum square meterage is disingenuous and will lead to developer led spread. Redevelopment of existing brown field industrial sites could be supported especially if it is for small commercial units.

Overall the Council's proposals are deplorable and therefore I object to the plan being submitted to the Inspectorate.

I have not re-addressed the points made previously but they remain relevant making the current iteration Local Plan a travesty which I object to in the strongest terms.

This comment also relates to proposal A43a. While I have no objection to the proposal, which makes a significant contribution to the required housing total, I am disappointed that there is no recognition either here or in the more general documents, of the proximity of Woking, and particularly the Rail Station. There is understandable concern about the generation of increased traffic on the A247 from both the increase in housing and the new slip roads. As was pointed out at the consultative meeting, it is difficult to see how the A247 can be improved, even with the sum of money allocated, to meet this demand. Can there not be more imaginative solutions, in conjunction with Woking Borough Council and Railtrack, leading to

- safe (i.e. separated from vehicles) cycle routes through Send and;
- a park and ride facility to the west of Burnt Common roundabout, on land previously suggested for light industrial and housing?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? (), is Sound? (), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like it known that I object most strongly to the proposed New Local Plan for Guildford Borough specifically relating to the Horsleys and my reasons are as stated below.

- The removal of East and West Horsley villages from the Green Belt. The value of having the Green Belt is immense and to keep areas free of bricks and mortar. The reason we have lived in the area for so long is because we value open spaces and the freedom to walk unhindered in a green, open environment, rather than suburbia which the Horsleys would become.
- The number of properties proposed 533 (with an additional 60+ houses on smaller sites) – an increase of 35% on the current number of homes – is so out of proportion in a village community with inadequate infrastructure – that it is ludicrous and ill thought out.
- The Horsleys do not possess the infrastructure for such intense development: in fact, to date we barely cope. The state primary school in West Horsley is always oversubscribed; parents have great difficulty in getting their children into the nearest state secondary school at Effingham; the doctors’ surgery always has waiting times for appointments, drainage in the area is completely inadequate and during periods of heavy rain the system does not cope – raw sewerage is seen floating down our neighbour’s drive and into the road from overflowing drainage.
system. Traffic is a nightmare and parking near the station and local shops is inadequate and for the increased population proposed with an additional 533 homes and resulting cars, it would become unbearable to travel.

- I would specifically mention the proposed 120 houses at Ockham Road North. We live on this road (the B3029) which has a 40 mile speed limit – I would suggest at least 50% of traffic exceeds this limit all the way from its junction with the A3 to East Lane (where it becomes 30mph). From our driveway to proceed onto this road can prove ‘hair raising’ with bends in the road giving very limited sight lines. The likelihood is that with an additional 120 homes and the prospect of two cars (at least) per household progressing onto this road safety would be a great factor.

- I would also add from a personal viewpoint, I have lived here for almost 60 years with an open environment of trees, fields and open skies. I do not wish for a view of bricks and mortar.

- I would like to know why West Horsley is to be saturated with new building 35% in proportion to its existing number of houses, whereas those in Guildford Town equates to 11% and the Ash/Tongham region 16%.

- There should be more consideration given to building on brown field sites within the Borough and to definitely leave the Green Belt protected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am of course more concerned with the proposed developments in the villages of east and west Horsley partly because that is where I live but equally because the proposal to combine the two and remove them from the green belt would open the door to much further construction leading eventually to a virtual new town. The Horsleys would suffer the greatest percentage increase (35%) totally out of keeping with the area and overwhelming all of the local services.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I wish to object to the local plan on the following grounds -

1. A) Apart from infilling the proposed large scale developments will all utilise much green belt land which was set up many years ago with the express purpose of halting the expansion of the metropolis and to provide green space for relaxation and enjoyment.

1. B) The sites at Wisley Airfield, Garlic Arch and Burpham would each result in vast increases in population numbers which would result in unbearable strains on local services. Rush hour trains are grossly overcrowded and the roads, particularly around Guildford are usually at a standstill during the mornings and evenings and the Royal Surrey Hospital has almost reached full capacity. Many local schools would be totally unable to accept extra pupils with each needing sizeable extension work.

1. C) Much of this land is currently arable and if lost would result in the need for yet more food imports - hardly desirable in view of increased import costs resulting from the country’s EU departure.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the use of inconsistent and inaccurate evidence for housing expansion and transport.

The evidence upon which expansion is advocated in the proposed Local Plan is inaccurate or circumstantial.

Evidence fails to demonstrate the need for so much additional housing – except and unless the officers are planning for massive future inward migration....

Transport evidence is not fit for purpose. Moreover the proposed Local Plan does address past concerns, such as another river crossing and an improved central bus station.

The proposed Local Plan demonstrates reliance on creating many acres of new housing now to pay the bill for inadequate infrastructure plans, whilst ignoring the obvious consequences that large housing developments generate more traffic, air pollution, require more roads, more public transport, increasing demand for health and education services.

It must be observed that, since Guildford Borough Council is not responsible for paying for many of these extra services, it appears that the tenet of general social responsibility has been completely abandoned.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposals for Green Belt development.

I oppose all unjustified development of our precious Green Belt spaces.

The current government is encouraging development of the Green Belt, in particular “nibbling around the edges” and for very dubious reasons.

Guildford Borough Council’s proposed Local Plan includes redevelopment of every remaining green field site, with no thought for the future.

Guildford Borough Council should have policies which enable it to act as guardian of the area’s heritage and should not play into the hands of those who will indirectly or directly profit from destruction of that heritage.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposals to expand Guildford .

The town is large enough already. It cannot support expansion by a quarter or more.

In recent years it has accommodated many thousands of newcomers.

Additional house building will lure even more of these people to the town, placing even greater strain on its infrastructure, which is already buckling under the weight of demand from the influx

Panic responses by an incompetent and suspect central government should not have been taken up with alacrity and reflected in Guildford Borough Council’s sycophantic proposed Local Plan.
It is the professional duty of Guildford’s staff and councillors to resist outside pressures and consider the future good of the town.

This does not include planning towards creation of a new “outer London borough”.

Further housing expansion should be circumscribed and avoided whenever possible.

The character of Guildford and its surrounding countryside should be preserved for present occupants and future generations.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The SHMA and the Calculation of the OAN (Objectively Assessed Need) for future Housing Numbers

The OAN figure of 693 homes per annum is not only double the figure in the previous, 2003 Local Plan (322 homes per annum), it is also based on flawed calculations within the SHMA report:

- by failing to correct for errors in the historical for international migration flows
- by failing to build a separate case for student housing OAN
- by failing to take into account the fact that the “affordability uplift of 321 homes per annum would not result in a noticeable improvement in affordability but simply in more people who can afford high prices moving to the area”
- and by failing to correctly estimate the number of homes required to support future job growth: even before the Brexit vote, evidence suggests that homes to support future jobs should be included in the demographic OAN

These flaws have been thoroughly exposed by a recent report carried out by Neil McDonald, of NMSS, and commissioned by Guildford Residents’ Association1. **NMSS have calculated a more realistic OAN of 510 homes per annum, and claims that if a separate student OAN were also calculated, this figure might even need to be reduced still further.**

We also agree with the findings of NMSS, that it is not enough to simply reduce the OAN in the light of the Brexit decision, but that the flaws in the method of calculation should also be taken into consideration.

2. The OAN figure should also be constrained by a number of factors before the final Housing Target is set:
DOWNSEDGE RA believes that, as well as being reduced to correct for errors (see above), the OAN figure should also be constrained by a number of factors (as per paragraph 14 of the NPFF) to reduce the overall Housing Target, namely:

- the lack of infrastructure (particularly transport infrastructure) affecting road travel and causing serious congestion, within the Borough
- the risk of flooding in a large number of key areas of the Borough
- the large amount of Green Belt land within Guildford Borough, which limits the amount of available land for development (see below)
- the fact that Guildford is both an historic town and a “gap town”, both of which reduce its ability to easily correct the infrastructure deficiencies

The National Planning Policy Framework (NPPF) allows for the Overall Housing Target to be reduced to take into account all of the following before arriving at the final figure:

- Protected wildlife area (e.g. Thames Basin Heath SPA)
- Landscape areas (e.g. Surrey Hills AONB)
- Green Belt
- Flood risk
- And significant infrastructure constraints

All of the above factors could be applied in Guildford Borough, and yet the GBC Housing Target has not been reduced by such constraints in the Submission Local Plan. We note that all other councils in Surrey, apart from Guildford, have applied constraints to reduce their overall housing figures and urge GBC to do the same.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Green Belt land should only be considered for development in Exceptional Circumstances

The Metropolitan Green Belt was originally created, not just for the benefit of its own residents, but for the benefit of residents of the whole of the London Urban area as well as visitors from outside the area. As such, it should not be up to any individual Borough Council to remove any of the Green Belt for development as it benefits a much wider population than simply our own. We are merely the trustees of such land for use by others. This fact was clearly understood by GBC councillors at the time of the 2015 local elections, as suggested by their promises at the time.

The government has already given written guidance to suggest that Green Belt land should only be considered for development “in Exceptional Circumstances and after the use of brownfield urban sites has been fully explored”. **However, this Submission Local Plan suggests building on Green Belt land before exploring all the opportunities to build on brownfield land.** We therefore urge GBC to carefully reconsider this policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:**  Proposed Submission Local Plan: strategy and sites 2017 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E7: Guildford Town Centre Downsedge RA is disappointed that the paragraph describing the Vision for Guildford has been removed, and that the documents entitled “Allies and Morrison, draft Town Centre Vision 2015” and “Allies and Morrison, draft Guildford Town Centre Masterplan 2015” have both been removed as pieces of Key Evidence to the Local Plan. These documents, prepared at considerable expense to Guildford Borough Council, and after considerable lobbying by groups such as the Guildford Vision Group and the Guildford Society, provided an opportunity to plan for our town centre in an imaginative and integrated way, and which could also address the many challenges arising from the developments envisaged in the Local Plan. Although Guildford Borough Council has replaced these two documents with their Draft Guildford Town Centre Regeneration Strategy 2017, this appears to remain a draft document and the conclusions and aspirations do not appear to be comprehensively brought forward into the Local Plan. Without a fully fledged integration, between major housing development on the urban fringe and a substantial redesign of the town centre transport network, as envisaged by Guildford Vision Group and others, Guildford clearly risks becoming permanently blighted by traffic problems.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The new paragraph 2.10a stating that “Pressure on existing infrastructure and additional stress caused by planned growth must be addressed if we are to maintain and enhance the borough's prosperity and quality of life. Many people are attracted to Guildford by the quality of life and environment. This places a high demand on school places and access to amenities such as open spaces. The Local and Strategic road networks, rail network and local facilities in village settlements are also facing increasing pressure.” is to be commended but is not specific enough.

Downsedge RA is concerned that the traffic situation in and around Guildford is already at breaking point (e.g. the A3 regularly jams and results in substantial traffic flows through the town centre). The above paragraph states that “pressure on existing infrastructure and additional stress caused by planned growth must be addressed if we are to maintain……..”. We would have preferred to see a statement such as “pressure on existing infrastructure and additional stress caused by planned growth will be addressed if we are to maintain……..”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

Downsedge Residents’ Association supports the evidence provided by Guildford Residents Association, namely the “Review of GL Hearn’s Guildford addendum to the West Surrey SHMA”, produced by Neil McDonald (attached alongside this document). In particular, we are concerned that:

• The population forecasts produced by the Office for National Statistics (ONS significantly over-estimate the district’s population and hence future housing need, due to the under-recording of students leaving Guildford at the end of their studies. The housing need figures have therefore been over-estimated by the use of invalid population forecast.
Despite the Objectively Assessed Housing Need (OAHN) figure having been reduced from 13,860 homes in total (2013-2033) to 12,426 homes in total (2015-2034), since the earlier draft of the Local Plan, this revised figure, of 654 new dwellings per annum, is still substantially higher than the typical new housing figure achieved for Guildford over recent years.

This ambitious new housing figure also relies on building on Green Belt land at a number of locations, including the strategic sites of Gosden Hill Farm and Blackwell Farm and a new settlement at Wisley.

While we were pleased to see some reduction in scope of both the Gosden Hill Farm and Blackwell Farm developments, we were disappointed that the figure for new homes in the urban areas remains little changed at 3,000 units. We would have preferred to see some improvement in infrastructure take place before the development on these new greenfield sites, in order to address existing issues, especially on transport infrastructure. In relation specifically to transport infrastructure, and the Guildford Borough Transport Strategy, 2017, Downsedge RA has a number of concerns, including:

- If the Dunsfold Park development of 1,800 homes goes ahead, the main access to this site from the north would be the already congested A281, through Guildford town centre. The only improvements to the A281 in the Local Plan are some improvements to the Shalford roundabout (A281 / A248), which are probably required anyway. Downsedge RA would like to see further improvements to the A281 into and through Guildford, in order to reduce the likelihood of increased traffic through Chilworth and into Guildford via Halfpenny Lane, One Tree Hill Road and Tangier Road (a well-known rat run).

- The traffic on the urban section of the A3 through Guildford regularly blocks to a complete standstill, and when it does so, traffic tends to exit either at the A322/A323 Wooden Bridge Roundabout (northbound) or at the Burpham exit (southbound), causing congestion in and around the north and west of Guildford, and often through much of the town centre. Downsedge RA believes that this issue needs to be resolved.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

Downsedge RA notes that the methodology and models used by G L Hearn to calculate the Objectively Assessed Housing Need (OAHN) for Guildford has not been made available to the public, so that others can check it. This OAHN figure is a key input into the calculation of the number of new homes required in the Borough going forward. In order to be legally compliant, we understand that the “Sustainability Appraisal, a tool for appraising the plan to ensure it reflects social, environmental and economic factors, should be made public”. Although a Sustainability Appraisal has been produced and made public, critically it does not contain, the method by which the OAHN has been calculated from the population forecasts.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
**Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 3: Soundness**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

To meet the Test of Soundness, the independent Planning Inspector is required to consider if our Local Plan has been positively prepared, is justified and effective and is consistent with national policy. As the need for the release of Green Belt land is entirely dependent on an over-inflated housing need figure (see above), we would question the justification for the development being proposed for Gosden Hill Farm and Blackwell Farm. According to the National Planning Policy Framework (NPPF), “A local planning authority should regard the construction of new buildings as inappropriate in Green Belt.” (NPPF paragraph 89 – see above, subject to certain exceptions)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

The duty to cooperate is a legal test that requires cooperation between local planning authorities and other public bodies to maximise the effectiveness of policies for strategic matters in Local Plans. It is separate from but related to the Local Plan test of soundness. While there is evidence of some co-operation with both Waverley and Woking Borough Councils during the Local Plan process, notably in relation to Housing need, there seems to be very little acknowledgement of increased traffic flows through Guildford Borough which would arise from potential new large scale developments such as the proposed new development of 1,800 homes at Dunsfold Park (see above).

The Guildford housing market is also strongly related to the London housing market, with a regular flow of families out of London into the Borough. Downsedge RA has seen no evidence of any co-operation with housing authorities within the Greater London area, nor any appraisal of the possible implications of future changes to the London property market.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35**
We object to the removal of the Green Belt land at Wisley Airfield.

We understand that Guildford Borough Council has rejected this scheme as being unsuitable, but it is still in the draft plan. This scheme must be removed from the final plan. In addition to the fact that this scheme involves the building of 2,000 homes on Green Belt land, there are no plans for road improvements and inadequate services.

We object to the plans for building houses and industrial units on the Green Belt land at Garlicks Arch.

Ripley does not have the facilities needed to cope with 400 additional homes. We don’t have sufficient schools, there is already a serious lack of car parking in the village and despite the plans for the a new slip road on to the A3 at Burnt Common, this will increase the traffic through the village in the long term.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to any loss of the green belt.

There should be no building on green belt land as proposed in this plan. We do not believe that there are exceptional circumstances as required by the National Planning Policy, as there is sufficient non Green Belt land (including brown field sites) within the borough. The main aim of the Green Belt policy is to prevent urban sprawl. If these plans were to go ahead, then that is just what we are going to end with – an urban sprawl and the villages would lose their individual identity and just be part of a large suburbia.

1. We object to the removal of Clandon, Wisley, Send and Ripley from the Green Belt

This is totally unnecessary and we believe that this is the thin edge of the wedge. If the villages are removed, then there will be more pressure for building on the green belt land outside the villages, which we totally object to.

I am writing in response to your invitation to comment on the Guildford Borough Proposed Submission Local Plan.

I believe that the numbers which you derived for the Objectively Assessed Housing Need (OAN) and the SHMA have been inflated either in error, or in pursuit of the aims of GBC to expand the borough in an aggressive manner. The requirements of the National Planning Policy do not result in the need to use a population forecast which is in excess of those issued for Guildford by the Office of National Statistics. I realise that the Evidence Base documents are not the subject of this consultation. However, since Policy S2 is based on forecast population numbers which are unsound, I object to Policy S2.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
In addition I would observe that the existing infrastructure in the East and West Horsley area - in particular the roads and drainage - are not functioning in an acceptable manner at the present and the prospect of the addition of the potential number of houses in the villages and close by, with the addition of 2,000 at Ockham, 400 at Burnt Common and 2,000 at Gosden Hill Farm requires more than a passing reference to "traffic management" as a solution to the impractical outcome of adding these large numbers of vehicles. I object to the strategic site proposals indicated and to the larger land areas within the villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the proposal to inset the villages of East and West Horsley from the Green Belt. Nowhere in your documents do you produce evidence to support the existence of exceptional circumstances which would support this being carried out. All the objective evidence seems to derive from the need to release land for building development, and the study carried out by your consultant is inconclusive, subjective, and fails to take adequate note of the fact that the original aims of the Green Belt are still met in the cases of villages like East and West Horsley. This requirement for development is again based on unsound population forecasts.

Similarly, the proposal to change the boundaries of the current settlements of East and West Horsley appears solely aimed at releasing land for development. The arguments for changing specific boundaries are in some cases contradictory, and in some cases fail to meet the test of identifying more sustainable boundaries than those currently defined. I therefore object to the proposal to change the boundaries of the settlements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/11209  Respondent: 8602337 / Cross Group (Mr Colin Cross)  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy D1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy D1 - Making Better Places

I object to GBC not listening to their residents, who know better than GBC what is needed to make their areas better places, as the last consultation clearly showed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/11211  Respondent: 8602337 / Cross Group (Mr Colin Cross)  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy D3 - Historic Environment

I object to GBC not respecting the historic environment of the rural villages when considering inappropriate large developments. These areas need protecting, not destroying due to the effects of increased traffic, parking problems and wholly inappropriate development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Policy E1 - Meeting Employment Needs

Permitted development allows commercial properties to be converted to residential use, but at a loss of employment opportunities. **I object** to development of brownfield sites without some commercial activity being included, proportionate to the size of development, unless exceptional circumstances prevail.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

Policy E2 - Location for New Employment Floorspace

**I object** to excessive commercial development anywhere in the borough when brownfield sites area available in suitable locations.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

Policy E4 - Meeting Employment Needs

**I object** to excessive commercial development anywhere in the borough when brownfield sites area available in suitable locations.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
Policy E4 - Surrey Research Park

I support the Research Park and its specialism, but I object to the current need to expand. The land hungry current ground level car parking for Research Park should be utilised for shared multi-storey or underground parking and the freed-up car parks used for the Park development. All new Research Park development should include underground car parking, as in other countries.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11202  Respondent: 8602337 / Cross Group (Mr Colin Cross)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Policy E7 - Guildford Town Centre

I object that GBC do not accept the town centre as the ideal place for sustainable residential development. Internet shopping has changed the retail landscape and that will continue in the future so limited new shops are required. Guildford has ample opportunity to provide sustainable homes over the Local Plan period on brownfield sites in its centre.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11205  Respondent: 8602337 / Cross Group (Mr Colin Cross)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E8
Policy E8 - District Centres

I object to rural villages becoming District Centres when they are already viable and sustainable local centres. District Centres are preparing the infrastructure for large scale development and ignore the wishes of residents in those local centres.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/11207 Respondent: 8602337 / Cross Group (Mr Colin Cross) Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E9

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E9 - Local Centres

I object to Local Centres being considered for large, inappropriate, developments nearby. Local Centres are rural, not urban and that needs more recognition

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11179 Respondent: 8602337 / Cross Group (Mr Colin Cross) Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H1 - Homes For All

I object to the SHMA including student housing. The university obtained planning permission many years ago to build student accommodation, but has not honoured this. Freeing up private housing in the town currently used for student accommodation would provide affordable housing for local people. A new development at Blackwell Farm (2,000 houses) providing accommodation, including student accommodation, is a selfish move by the university when it still has 1,000’s of units to be built on land it already owns.

After the 1st World War ‘Homes for Hero’s’ were provided countrywide, as was the case for council housing after the 2nd
World War. I believe GBC should adopt the same strategy, even in areas of AONB albeit on a reduced scale, to provide sustainable homes borough-wide and of a proportional nature.

Policy I1 - Infrastructure and Delivery

I object to any development without the necessary strategic infrastructure being put in place prior to development. I object to developments not providing their planned peripheral infrastructure, i.e. schools, health centres as part of the development, prior to properties being sold.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Policy I2 - Supporting the Dept of Transport's Road Investment Strategy

I object to this policy only relating to the strategic road network, the A3/M25, without ensuring any development includes the necessary local road infrastructure being implemented. I object to developers funding road infrastructure which suits their wishes, i.e. south bound slip road and north bound slip roads at the Burnt Common roundabout. Such provision at Burnt Common will not alleviate increased traffic on the local roads and villages should the 2,000+ houses be built at the former Wisley Airfield, as local villages already suffers traffic log-jams on a daily basis without such a development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy 13 - Sustainable Transport for New Developments

I strongly object to any development being built that does not have existing sustainable transport. Blackwell Farm, Wisley Airfield, Gosden Hill and Garlicks Arch do not have such facilities. The former Wisley Airfield is absolutely isolated and can only be accessed by car. Even if a bus service is provided, few will carry shopping, etc., by bus. Walking to Ripley or East Horsley is unrealistic as there are no footpaths, cycle paths or street lighting. (Blackwell Farm and Gosden Hill are in the same situation). New developments should take place alongside existing sustainable transport facilities. The Merrow Golf Club, recently proposed for housing, is adjacent to a Park and Ride and new rail links so that is an example of sustainable transport.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/11186  Respondent: 8602337 / Cross Group (Mr Colin Cross)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P1 - Surrey Hills Area of Outstanding Natural Beauty

I object that the AONB areas are excluded from taking a proportion of new housing developments. Large developments are inappropriate but these areas should provide homes for local people and their families. Policies H2 and H3 should apply throughout the borough, including AONB, but proportionate and sympathetic to each location. Everywhere should be allowed some growth.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11189  Respondent: 8602337 / Cross Group (Mr Colin Cross)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy P2 - Green Belt

I strongly object to GBC considering building strategic new developments of 2,000+ houses in Green Belt. I object to Gosden Hill, Blackwell Farm and the former Wisley Airfield becoming new towns 'dumped' in the Green Belt for reasons of economy and convenience. I particularly object to the former Wisley Airfield being considered for a new town as this is right in the middle of a critical green belt area on the edge of London and totally unsustainable, as accepted by the recent Planning Committee who recently unanimously rejected a planning application on various NPPF and other grounds. This site is far too close to Cobham (1.5km), Pyrford (1.5km) and Woking (2.5km) not to become a suburban sprawl over time which will totally wipe out the Metropolitan Green Belt in this area.

Developments of 2,000+ houses in the Green Belt are exploitation and fulfil developer's dreams who can escape their their affordable homes targets (clause 4.2.40) and provide houses for those from outside the borough. I object to GBC realising those developers’ dreams and ignoring those of the residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/11191  Respondent: 8602337 / Cross Group (Mr Colin Cross)  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P3 - Countryside

I believe brownfield sites in all areas, including AONB, should be utilised and all areas in the borough should provide some affordable and Rural Exception Homes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/11193  Respondent: 8602337 / Cross Group (Mr Colin Cross)  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy P4 - Flood Risk and Water Source Protection Zones

All development sites must have consideration to flood risk, not just on the development, but the effects on the surrounding areas. I object to P4 being used as a blanket reason for taking large tracts of development land out of the system willy-nilly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPP16/11177  Respondent: 8602337 / Cross Group (Mr Colin Cross)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S1 - Presumption in Favour of Sustainable Development

I object to GBC not using sustainable brownfield sites in Guildford town and all the villages in the borough, but wish to use Greenbelt sites to create 3 'new towns' each of approx. 2,000 houses. These sites are not sustainable, but will cause chaos to surrounding areas in terms of lack of infrastructure, i.e. roads, parking, flooding, and will not provide adequate health services, education, shopping/pubs/restaurants/cafes, etc., on-site, as does Dickens Heath, Solihull, of which the GBC Pegasus report cites as its model.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/11175  Respondent: 8602337 / Cross Group (Mr Colin Cross)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to object to the 2016 version of the GBC Draft Local Plan as, even though we are told the 2014 version has been redrafted after 'listening to the people', I cannot see evidence of this. I also object to the PR film at the online form link, claiming to 'represent the people' as it does not. It represents the University of Surrey, the Royal Surrey Hospital and the GBC Executive and has no representation at all for the rural areas of the Borough, therefore is a biased PR exercise. (I wish the above to be recorded as objections).

I also wish it to be noted that the objections below are not to be taken solely as site location objections if sites are mentioned, but general objections to the draft Local Plan.
Policy S2 - Borough Wide Strategy

I object to GBC using SHMA housing figure which are almost double those of Woking and Waverly. I object to these figures as they were prepared by consultants with a property interests, G L Hearn, and the calculation has not been scrutinised by GBC an independent body. Who are all these homes for? Not local people but a nett SE England ‘migration’. There is no generic evidence to back this up but we are told ‘GBC has faith in it’.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We acknowledge the need to build more housing to meet the need of the population, but we must object strongly to the large scale developments planned for Normandy and Flexford.

We are not opposed to in-filling, utilising brown-fill sites or very small scale developments. Young people of the village cannot afford the existing housing and need one or two bedroom properties.

Our objections are based on :-

Geology

Normandy lies on the northern slopes of the Hogs Back. The soil on this side is clay which does not drain well when there are the frequent heavy storms. To add to this problem there are seven springs which mean that the risk of flooding can occur in days after a storm.

At the moment the water table in this area is very high, so exacerbating the flooding issue. The evidence of the high water table is obvious along the south side of the A323 where the trees on the verge are permanently in water. This is a potential danger to traffic using the road, as the roots of the trees are being undermined. They could fall at any time not only blocking the road, but causing an accident by falling on a passing car.
The sewage system in Normandy is under perpetual strain and after heavy rain properties have been flooded not only with water but, with raw sewage. Large scale development and the increased areas under concrete would have repercussions not only for the existing properties, but would cause more disruption to the frequently flooded Wanborough Station which serves the Reading to Gatwick Airport line.

2:- Infrastructure

1. Roads

Normandy is served mainly by two fairly narrow roads, Glaziers Lane and Westwood Lane. The railway crosses both.

Westwood Lane has a low railway bridge with a height restriction, which means that it cannot accommodate double decker buses or high sided lorries.

Glaziers Lane crosses the railway by a road bridge which has a bend on its apex. A potentially dangerous condition exists on the south side of Wanborough Station. Station Road joins Glaziers Lane at an acute angle. Large vehicles cannot turn into the station safely if driving along Glaziers Lane from the A323 direction and cannot turn towards the A323 when leaving the station. Station Road is a blind turning for vehicles driving along Glaziers Lane towards the Hogs Back. The railway bridge has just been repaired after it started to crack from the weight of heavy vehicles travelling over it.

Glaziers Lane would not be suitable for the large vehicles from the proposed Showman site. There is a Showman site at present on the A323 at Worplesdon. They have not been able to negotiate either Glaziers Lane or Westwood Lane with any of their vehicles. The siting of a showman site on the proposed A46 site would be totally impractical.

A sixty bedded residential home would also create problems of parking. Unless staff and visitors arrived by train the only access to the proposed site would be by car, thus more traffic for our already congested roads.

In order to accommodate the increased traffic which would arise from the number of houses, the residential home and the showman site, Normandy's roads would have to be widened and up-graded.

The A323, Aldershot to Guildford Road. This road is always busy, especially at peak times. If there is an accident on either the A31 Hogs Back or the A3. Traffic congestion is a real problem for Normandy.

School Lane and Hunts Hill are used as a "cut through" from the Hogs Back to get to the A324, Pirbright Road. This is a link to Woking and the A322 which connects with the M3 and Bracknell.

Wyke Primary School is situated in School Lane. The school takes pupils from the surrounding areas of Worplesdon and Ash. This means traffic is particularly heavy in the mornings and afternoons because a lot of parents have to drive their children to school.

Hunts Hill is a narrow unlit lane not suitable for large vehicles as it has steep sides and bends.

Any more traffic would put a severe strain on the existing A323. I used to work at the Royal Surrey County Hospital and on days when the A31 Hogs back is blocked, it has taken me over an hour to drive at 7am in the morning before the "rush hour" has even begun. I think, adding potentially to this scenario could prove catastrophic and even life threatening, unless very major improvements to the existing roads in Normandy,

Most residents of Normandy who do not commute by train to Guildford or Aldershot have to use cars. The very reliable bus service from Guildford to Aldershot travels along the A323. The A46 and A47 sites are both over a mile from the nearest bus stop, making the bus travel option impractical. The 520 bus service which passes near to both these sites only runs three times a day on Monday, Tuesday, Thursday and Friday to Guildford and Aldershot. On Wednesday, it goes from Aldershot to Woking. This means that this service could not be used for regular commuting.

To get to any shops, particularly supermarkets, it is necessary to use a car. This also applies to getting to the main Doctors Surgery at Fairlands and the Royal Surrey County Hospital.
1. Trains: Wanborough Station

South West Trains run a local service from Guildford to Aldershot. However this station is not suitable for the disabled as it only has access to the Aldershot side. To get trains to Guildford the disabled have to go to Ash Station in order to access trains to Guildford.

First Great Western Trains use the line for the Reading to Gatwick Airport trains. The trains do not stop at Wanborough Station, and the service is often disrupted by the Station being flooded.

1. Electricity

Most of Normandy's electricity supply is by overhead lines. This means the village is subject to frequent power outages in high winds and stormy weather. The power lines are either cut by falling trees or their branches cause an interruption of current. The developments planned would probably have underground cabling on the sites, but that doesn't mean a more reliable electricity supply as most of the village has overhead lines. To upgrade the electricity supply by underground cabling would be a very major and costly project.

Normandy roads are not well lit.

1. Water supply and sewage

The water supply is metered and the pressure is fairly reliable.

The sewage system, however, is not so reliable. Most houses in Glaziers Lane and Westwood Lane and adjoining roads are on mains sewer. However, after heavy rainfall some houses have been flooded with raw sewage on a regular basis.

The roads are subject to flash floods because road drains are poorly maintained and ditches allowed to be blocked. Wanborough Station is frequently flooded because of the poor maintenance of the road drains and causes major disruption to the railnetwork.

3:- Amenities

1. School

Wyke Primary School is situated in School Lane. It is a single class entry taking children from Normandy and the surrounding areas from rising five years to eleven years.

All children in year six leaving Wyke School have been accommodated in the existing Secondary Schools in the area. There would seem no need for another secondary School in this area as the local existing secondary schools are under subscribed.

1. Doctors

Normandy is lucky to have a branch surgery and dispensary in Glaziers Lane, the main surgery being on the Fairlands estate. However, it is almost impossible to get appointments without having to wait days, sometimes weeks if a patient wishes to see a particular doctor.

1. Normandy Therapy Garden

This is an award winning facility providing courses for disabled and Special-needs students. It does run a shop where produce grown in the garden is sold, however it is limited by the growing season for its vegetables and fruit and of course the weather.

It is the only shop in the Village.
1. c) Manor fruit farm
Normandy has an excellent Village Hall on this site. It has a main Hall with Kitchen, a small hall also with kitchen and a further meeting room on the first floor. Nearly all the village clubs and societies use the hall for their meetings. It is also available for private hire.

The site is also used by the Bowling Club and Archery Club, both have club houses.

1. e) On Normandy common there is a thriving tennis club and a cricket The cricket pitch is unique in that seen from the air it is a complete circle.

4) Environment
Normandy is a Village situated in the Green Belt. It has ancient woodland and grassland areas within the village boundaries. There is varied fauna and flora found in these areas. Surveys within these habitats have revealed a diverse ecology, many of which are rare animals and plants. To have a large development would not only destroy many species, but do away with vital "green corridors" needed by the animals.

The proposed development A47 is situated on a designated SNCI and has been identified as a Water Vole Alert Area. Great crested newts and several species of dragon flies are found in the ancient Linen Pond This pond has existed from medieval times when flax was grown in the surrounding area for the production of linen. It is essential this Social historical site be preserved

Both A46 and A47 sites have populations of hedgehogs, roe and fallow deer, foxes, badgers, water voles, little owls, yellow hammers, sparrow hawks, fieldfares, red kites, slow worms, adders, grass snakes, frogs, toads, great crested newts, as well as many more common species like robin, sparrows, blue-tits, great tits, coal tits, starlings, black birds, collared doves, wood pigeons, house martins and most of the corvid family. The diverse plant life provides habitats for many types of insects, including the endangered stag beetle. Many butterfly and moth species rely on this plant diversity.

Pipistrelle bats are found in both these areas and can be seen in the gardens of Glaziers Lane regularly during the summer evenings.

Normandy's flora is also very diverse and includes many species of orchid, especially the common spotted orchid. Much of the flora found in Normandy, particularly in the two areas A46 and A47 earmarked for large scale development, are plants which need marshy or damp conditions, this, I hope, illustrates the point that geologically, Normandy is not an ideal place for major development as it would exacerbate the problem of further flooding. There are more than fifty different wild flowers and plants found in Normandy. Insects, birds and bees need these plants. If they were to disappear not only would Normandy lose many of its wild plants and trees, but whole species of wild fauna which depend on them.

It would be a "Nature Disaster Area" to lose our fauna and flora.

The present population of Normandy at the 2011 census is 2981. The historical definition of a village is "a collection of houses and associated buildings, larger than a hamlet and smaller than a town situated in a rural area". The proposed large scale developments would probably more than double the population and mean Normandy ceases to be a village and become a commuter suburb of Guildford and so lose its identity.

It has been proved by many studies by psychologists, environmentalists and many of the medical profession that green areas are important for our good health and well-being.

I hope our arguments opposing large scale development within the boundaries of Normandy will be considered by the planning Committee. We are proud to be a village, but any large scale development would have repercussions to the ecology and ambience of Normandy.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/1155  Respondent: 8603201 / Guildford Allotments Society (Andrew Simmonds)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Response to Guildford Proposed Submission Local Plan

This response is on behalf of Guildford Allotments Society, who manage approximately 650 allotment plots within Guildford town, all of them on land leased to us by GBC. There are two issues that concern us.

Firstly, the Local Plan involves building 13,860 homes within the borough by 2033, two thirds of which will be on sites at Ash/Tongham, Blackwell Farm (on the Hogs Back); Gosden Hill Farm, and Wisley airfield. The remainder appear to be smaller developments within Guildford town and the surrounding villages. Yet the plan makes no mention of a need for allotments, nor whether there is a requirement for additional sites. I believe that there is, and that this is a notable omission of the Local Plan. Indeed, GBC has a responsibility under S23 of the Small Holdings and Allotments Act 1908 to provide sufficient allotment plots if there is a demand. We believe that this omission of allotments from the Local Plan is a substantial oversight.

Attached as attachment 1 is our reasoning as to why around 140 additional allotment plots, within some 4.4 hectares in total, should be provided on several new sites within the Borough to ensure that the number of plots is broadly sufficient when these additional houses are built. The sites need to broadly be in the right locations, close to where the tenants live, to comply with your planning policies.

Secondly, our site at Bellfields. It has been suggested that part of this site, along with the neighbouring waste water treatment works, should become a housing development. Yet this does not feature in the plan. I therefore assume that it is beyond the 2033 planning horizon, and I am therefore not discussing the issue further; but for reference, details are set out as attachment 2. Should that for any reason not be the case, there is an opportunity for undertaking a strategic review of our allotment sites and their sizes to ensure that they provide the plots required to meet the demand, in areas accessible to tenants and complying with the policies laid out in the Local Plan. We recognise that there is a need to optimise the location of the additional houses and allotment sites.

Please do not hesitate to contact me should you wish to develop these issues further.

Yours sincerely

Andrew Simmonds

Attachment 1

Issue 1 - Reasoning in support of the additional allotment provision.
Current allotment provision within the Borough is roughly 1 plot for every 100 homes. Currently there are 137 on the waiting list, so arguably the current provision is inadequate; although the waiting list tends to fluctuate between 50 and 250. What is certain is that we are not over-provided for; but this is not an exact science.

The current waiting list is weighted towards Burpham, Merrow and the eastern town centre, and the Westborough / Rydes Hill area. However, we believe that there is no reasonable site available or likely to become available within these areas. Park Barn and Westborough have a higher proportion of allotment holders than the average; our sites at Farnham Road and Aldershot Road (Westborough Allotments) are full, and a number of other tenants resident in these areas are accommodated at Bellfields, our largest site.

With 13,860 additional homes, it seems reasonable to suggest that an additional 140 plots should be made available. In terms of land space, 40 plots require 1.25 hectares (to allow for access paths between plots, storage facilities for equipment, and sheds along the boundaries). Thus 140 plots = 4.4 hectares.

To comply with the policies within the plan; five stand out as being relevant. These are: policies D1 (Making Better Places), D2 (Sustainable Design), I1 (Infrastructure & Delivery), I3 (Sustainable Transport) and I4 (Green and Blue Infrastructure). Together, these infer that the four major development sites should each have their own dedicated allotment spaces within the curtilage of the development – say about 100 plots in all, or about 3.15 hectares in total – and that the remaining additional plots – about 40, or 1.25 hectares – should be identified within the town and surrounding villages broadly relative to the developments. The most important aspect is that the plots need to be on a secure site, readily accessible from people’s homes.

There is a potential for additional demand - in that if the additional houses have small gardens, they will not be large enough for people to grow their own, and hence likely that more residents will want allotments. So maybe the suggested demand above is inadequate.

I do not expect this Society to manage all of these sites; those at Ash/Tongham, and at Wisley, are outside of the area we currently serve; although there is no reason why we should not if it were felt appropriate.

A site at Blackwell Farm would prove popular, both for the new residents there and the additional demand from Park Barn / Westborough. Similarly, a site within the Gosden Hill development would be welcomed; both these sites need to be sized to match the local demand, taking into account current local unmet demand.

**Attachment 2**

Issue 2 - The Bellfields site.

This site is currently the largest we operate, with 109 tenants. Should this site be proposed for housing development, or indeed any other development, the future we believe can comprise of three groups, each roughly a third of the total.

The first third are relatively elderly and live locally, and we believe that this situation will be ongoing. We would wish to retain around a third of the current area in that location, at Bellfields.

A second third live further away, primarily in the Stoughton / Rydes Hill / Westborough areas. There is scope to develop further land at the Aldershot Road (Westborough Allotments) site which is currently unused and outside of our current...
lease from GBC, which could simply relocate these tenants at Bellfields to be closer to their homes; this potential land
swap would involve around a third of the current Bellfields site.

The final third need reprovision elsewhere; ideally close to Stoke Park as being the best area for where our tenants live,
although we cannot identify a suitable site for allotment use. An area of Burpham Court Farm has been suggested as a
potential swap for this final third. Whilst not rejecting the idea, it is not the optimal location in that it is not near to
people’s homes; it is not accessible by public transport; and it is adjoining and would have access via a busy road that will
become busier if/when the link road from Slyfield is built. The Gosden Hill development is likely to further add traffic to
the area, and to Burpham itself. The Burpham Court Farm site simply does not meet the policies set out in the Local Plan,
and our preference would thus be to not move these tenants from the Bellfields site.

Thus in conclusion, unless another site more local to Stoke Park can be identified, our preference would be to retain around
two thirds of the current site at Bellfields, with the other third being released upon development of the unused land at the
Aldershot Road (Westborough Allotments) site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We believe that it is essential that they be included within the Blackwells Farm, and Gosden Hill developments; and whilst that intent would indicate two other sites in Guildford Town Centre should have allotments too, we recognise that may not be achievable in practice. There is a shortage of allotment provision in Guildford Town Centre, and thus additional provision should be made in the Urban Area to compensate for this. Whilst Stoke Park would be an excellent location for additional plots logistically (as you suggest), being close to where our demand is highest, we recognise that in practical terms it may not possible.

With regards to the SARP development, the timescale seems to have slipped. We are experiencing a degree of planning blight already, in that it is the only site we have with a few vacant plots, and no waiting list; people are not keen to take on a plot with limited future. We would welcome the plans to become better defined, and progress plans to relocate some tenants to alternative sites closer to their homes.

Finally, a request to note that in recent years houses have been built with smaller gardens than in earlier times, and more flats have been developed. These have lead to increasing numbers of applicants for allotments in recent years. This trend of smaller gardens is likely to continue. Thus the national standard of 0.25Ha (above) may need to increase, and hence allotment provision need to be increased. This is particularly pertinent to the developments at Blackwells Farm, and Gosden Hill.

We feel we have a good working relationship with GBC, and note that this version of the local plan has incorporated much of the consultation response of last year; we look forward to continuing to work together in a spirit of co-operation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/4352  Respondent: 8603201 / Guildford Allotments Society (Andrew Simmonds)  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We note too the inclusion of allotments in the SARP plans; but whilst there is a note in table 23 of on-site provision of allotments for sites of 250+ homes, there is no mention of allotments in other sites of 250+ homes in Guildford Town Centre or Guildford Urban Area. We believe that it is essential that they be included within the Blackwells Farm, and Gosden Hill developments; and whilst that intent would indicate two other sites in Guildford Town Centre should have allotments too, we recognise that may not be achievable in practice. There is a shortage of allotment provision in Guildford Town Centre, and thus additional provision should be made in the Urban Area to compensate for this. Whilst Stoke Park would be an excellent location for additional plots logistically (as you suggest), being close to where our demand is highest, we recognise that in practical terms it may not possible.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I write to provide an objection from Shackleford Parish Council (SPC) to the inclusion of the proposed Blackwell Farm development in the draft Local Plan (Policy A26).

The development at Blackwell Farm was discussed at the July meeting of the Parish Council and the councillors unanimously decided to object to the proposal.

SPC believes that it will be impossible to minimise the impact of the development on the local road network. Traffic is at a daily standstill where the A3 and A31 enter Guildford. Despite traffic improvement measures included in the proposal, SPC believe the infrastructure and network will not be able to cope with the sheer scale of the proposed development (as independent traffic reports confirm).

Shackleford, Puttenham and Compton in particular already suffer with peak time traffic problems as people access the A3 and A31 or divert from those routes when there is the inevitable daily congestion. Introducing more schools, offices and homes to that area will lead to more ‘rat-running’ through these little villages, whose roads are unsuitable and cannot deal with the congestion. Air pollution in the area is already above safe EU limits and this is due to the volume of traffic and because it is frequently at a standstill.

The site of the proposed development lies within the Green Belt and in an AONB. There are no exceptional circumstances that have been shown to demonstrate the benefits outweigh the harm of the development; therefore there is no exception to the presumption against development in the Green Belt and AONB.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The A2Dominion Group has a ground lease on land within site Policy 16. A2Dominion are supportive of the proposed allocation for Policy A16 and A17. It is a core principle of the Group to continually look to improve their accommodation and services across all of it’s sectors which include key worker, student, social and market accommodation. Policy sites A16 and A17 provide the potential to provide high quality key worker accommodation for the hospital’s need, and much needed market accommodation. The A2Dominion Group in principle would support collaboratively working with Royal Surrey County Hospital to explore opportunities to improve the existing environment within the site.

A proposal that could incorporate strategically relocating existing key worker accommodation for hospital staff, and indeed potentially increasing the quantum of such accommodation is something A2Dominion wholly support, as it
also provides the opportunity to deliver the highest standard of modern accommodation going forward. This is key for attracting and retaining the highest quality of staff for the hospital for the services and care it provides for the local community.

If you are proposing a change to the Proposed Submission Local Plan: strategy Yes No

and sites, do you wish to express an interest in participating at the Examination? Yes

? Why do you wish to participate at the Examination?

It is important that A2Dominion are represented at the Examination in order to support the identification of the site for development, confirm the land is available and developable to enable the allocation to proceed with confidence and provide evidence on any general matters regarding the site which may arise at the Examination.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
My detailed objections are:

1. I object to the Policy A42 change at Clockbarn Tannery Lane because the increase to 60 homes in place of 45 homes is 33% more and too much. It also ignores the hundreds of previous objections made by local people and it will make erosion of the Green Belt in our village even worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

In regard to the final consultation of the Local Plan 2017 I have a number of detailed comments and objections listed below but first I’d like to make three general points. Firstly, our local MP, Sir Paul Beresford, has been re-elected in part on his commitment to the preservation of the Green Belt as expressed in his response to the draft last year and yet, you as a Council, have chosen to ignore not only that but also the views of many many people. You may be trying to play a game by insetting from the Green Belt first and so claiming that any subsequent building is not on the Green Belt, but that is frankly dishonest. Secondly at a time when your overall target homes numbers have reduced you have chosen to increase the allocation to Send in this version of the plan. Thirdly, the central government planning guidance against which your Local Plan should have been prepared includes the following:

"Local planning authorities should seek opportunities to achieve each of the economic, social and environmental dimensions of sustainable development, and net gains across all three. Significant adverse impacts on any of these dimensions should be avoided and, wherever possible, alternative options which reduce or eliminate such impacts should be pursued. " (my emphasis)

The final Plan you have now created, especially in regard to my first two points and my objections below, has significant adverse impacts in respect of at least two of these (social and environmental) and is highly questionable on the third (economic).

I object to the policy A43 change at Garlick's Arch because:

(a) It is beautiful Permanent Green Belt and no "exceptional circumstances" exist
(b) It will cause over-development of our village and the number of homes is excessive
(c) It is exquisite ancient woodland that existed at the time of Elizabeth I
(d) It will join up Ripley and Send and defeat the key purpose of the Green Belt
(e) It will generate excessive traffic that will block up the roads of Send and Ripley
(f) It ignores the thousands of previous objections

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposal to inset Send Business Park from the Green Belt because

(a) It is effectively an old non-conforming user in an area of outstanding countryside adjacent to the historic and beautiful Wey Navigation

(b) There is highly restricted vehicular access along vehicular access along Tannery Lane in both directions

(c) Further expansion or development at this location detracts from the openness of the Green Belt and is inappropriate

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Introduction

We are instructed by Astenbell Ltd to make the following submissions to the Guildford Borough Proposed Submission Local Plan: Strategy and Sites, in respect of two parcels of land in Send that we feel should be safeguarded or allocated as dedicated sites for the Custom and Self Build market in order to satisfy the demand generated for this type of housing in the early stages of the plan.

The first site is known to the council and identified in the GBCS as potential development area B16/A The Vineyard, Tannery Lane, Send and the second site is known to the Council as Hillside Farm, Sandy Lane, Send.

Representations regarding the Tannery Lane site were made to the Head of Planning in the middle of May 2016 but may have been received too late to incorporate into the Proposed Submission Plan.

The recently enacted Housing and Planning Act 2016 places a duty on planning authorities not only to keep a register of interested parties who wish to find plots for custom and self-build but also to ‘give suitable development permission in respect of enough serviced plots of land to meet the demand for self-build and custom housebuilding in the authority’s area arising in each base period’.

We understand that the council’s approach to comply with this requirement is to allocate serviced plots on the four strategic sites as set out in Policies A25, A26, A35 and A46 to satisfy the self-build register. However, we consider there are limitations to this approach in that it doesn’t deliver a wide range of choice as required by the NPPF, and fails to take into account the length of time it is going to take to get the strategic sites to a stage where they can offer plots.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/7634  Respondent: 8605793 / Astenbell Ltd (Nigel Sturgess)  Agent: Vail Williams LLP (Jane Terry)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Introduction

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Our comments in relation to the two sites sought for specific allocation for Custom and Self-build are set out below.

1. The Vineyard, Tannery Lane, Send

The first site is a 5 acre site in Tannery Lane in Send. This site was dropped from the Reg.18 draft in part due to the council’s change to its spatial strategy and also due to the fact that it sat in a land parcel B16 that was deemed to be highly sensitive. Representations on this site were submitted to the council on the 17th May 2016 for a 60% dedicated Self Build site 40% affordable and whilst this was a late submission, the site is not contained within the discounted list of sites in the...
LAA so it is assumed that the Council is still considering the submission. In addition to the 40% affordable, the landowners also expect to contribute towards infrastructure reasonably related to the scheme and necessary to make the scheme acceptable in planning terms.

The site is Suitable, Available and Deliverable.

Planning history of the site

The site was first identified in the Greenbelt and Countryside Study (GBCS) as Potential Development Area B16-A in land parcel B16. The GBCS stated that “Land parcel B10 provides opportunities to accommodate development without significantly compromising the purposes of the Greenbelt” and that PDA B16-A is surrounded by defensible boundaries and unconstrained in terms of environmental capacity.

Potential development area B16-A shown bordered in red, proposed greenbelt in setting boundary shown in green:

[IMAGE 1]

A full sustainability appraisal of the site was carried out as part of the GBCS and the site was ranked no 1 in terms of its sustainability of all the proposed village extension sites that made it through to the Reg. 18 Draft Local Plan consulted on in the Summer of 2014. More importantly the site is more sustainably located than any of the village extension sites proposed in the s19 Draft Local Plan as per the table below:

In 2014 the site was given the reference no. 41 and consulted on as part of the Issues and Options consultation. The site faired well in this: The Parish Councils consultation response was;

“Site 41 is the most sustainably located near to existing shops, schools and public transport. Sites 56, 57 and 58 are not within easy walking distance of shops and schools in either Send or Ripley and would be certain to generate significant traffic movements. Development of these sites would also have a large effect on the visual separation of Send and Sendmarsh along Send Marsh Road - which itself would need significant engineering work to remove the narrowed section of bridge half way along it. Site 59 would seem a sensible development which would provide the opportunity to remove nuisance lorry parking along the old London Road and provide employment opportunities for local people”.

The Councils’ response was: ”We are currently considering options across the borough, to find the most suitable location for the development we need over the next 15 years. Land at Send and Send Marsh/Burnt Common are options under consideration. We note your preference for sites 41 and 59”.

The site however was dropped from the Council’s plans between the Reg. 18 and the Reg. 19 drafts due in part to a greenbelt sensitivity assessment that assessed general land parcels not individual sites. It is worth noting that land parcel B16 is 270 hectares compared to this village infill site of 2.1ha.

**Site Facts**

- Total area 1ha.
- Potential developable area 1ha with defensible greenbelt boundaries as stated in the Green Belt and Countryside Study.
- Detailed in the SHLAA 2014 as being able to accommodate circa 47 homes
- Poor quality Grade 3 Agricultural land (source Magic Map)
- Flood Zone 1 (source Environment Agency mapping)
- “Very Low” risk of flooding from Surface Water (source Environment Agency mapping)
- The site is in single ownership, with no legal covenants restricting development.
- The site is bordered on three sides by the proposed village settlement boundary of Send and is a natural infill village extension
- The site has good road access to Tannery Lane and will be able to contribute to road infrastructure improvements

**Comment on the Greenbelt Sensitivity Analysis**

The Green Belt and Countryside Sensitivity assessed land parcels as to whether they fulfilled the main
purposes of the Green Belt. Land Parcel B16 is shown in the image below bordered in purple. It has an area of 270 hectares and encompasses half of Send, half of Ripley and part of Send Marsh:

The Vineyard sits in the South West Corner of Land Parcel shown bordered in red and has an area of 2.1Ha which represents less than 1% of the land parcels area.

The green line represents the settlement boundary of Send and the blue Lines represent the proposed development sites at Garlicks Arch Copse and Wisley airfield.

Land Parcel B16 was assessed by the GBCS as below:

<table>
<thead>
<tr>
<th>Land Parcel</th>
<th>Purpose 1</th>
<th>Purpose 2</th>
<th>Purpose 3</th>

(page 1193 of 3335)
The Greenbelt and Countryside Study VIII para 12.39 and para 12.41 states: “Land parcels B10 and B16 provide opportunities to accommodate development without significantly compromising the purposes of the Green Belt. However, land parcel B16 scored highly with regards to the Green Belt Purposes Assessment (Score 4). PDAs have been identified to the north and south of Send that would not effect the overall land parcel with regards to the Green Belt purposes as follows:

B16-A is surrounded by defensible boundaries with partial visual enclosure including hedgerows following Tannery Lane and open fields to the north and west; tree cover following May’s Grove to the east; and residential gardens on Send Road to the south. B16-A is relatively unconstrained in terms of environmental capacity terms

B16-A scored 9.75 and was ranked 6th according to current sustainability credentials. The estimated residential development capacity of B16-A is 47 dwellings.”

We agree with this assessment and consider that a well designed residential scheme that respects the transition from town to countryside would not compromise the main purposes of the green belt. Furthermore, In view of the sites exceptionally sustainable location, we have carried out a site specific Green Belt assessment to confirm the conclusions of the GBCS that development at PDA B16-A would not affect the overall land parcel with regards to the Green Belt purposes.

The GBCS used the following definitions to consider what criteria was used to assess the land parcels and we propose to use these same definitions to assess the Vineyard site referred to as PDA B16-A:

**Purpose 1 - Restrict Sprawl of Urban Areas**

- One of the Green Belt purposes is to check the sprawl of built-up a Urban sprawl is seen as the creeping advancement of development beyond a clear physical boundary of a settlement. Where the Green Belt is adjacent to a clear physical boundary defined by built form, the landscape performs a role in safeguarding against unrestricted sprawl (scoring 1). In contrast, a land parcel which lies away from built development within the countryside would contribute less to this purpose (scoring 0). (Pegasus GBCS Volume II chapter 7)

- We consider that PDA B16-A is next adjacent to a clear physical boundary defined by built form and by this definition the PDA B16-A does perform a role in safeguarding the Green Belt against unrestricted sprawl therefore scoring 1 against this purpose

**Purpose 2 - Prevent Towns Merging**

- This purpose is concerned with preventing neighbouring towns from merging into one another and seeks to avoid coalescence of built for Coalescence can be perceived or actual, and physical or visual. Some areas of land contribute more effectively in maintaining separation than others depending on the local environmental or site conditions, such as topography and tree cover. An open, expansive landscape which contributes towards significant separation between two settlements will contribute less in terms of anti-coalescence (scoring 0) whereas a land parcel which forms a narrow gap between two settlements would have a significant anti-coalescence role (scoring 1).

- We consider that there is significant separation distance between PDA B16-A and the nearest neighbouring town of Send Whilst Send and Send Marsh have a small separation distance that needs to be protected the location and infill nature of PDA B16-A means it does not actually protrude any further into the strategic gap than currently exists from existing development. (see image below) The site also has tree cover to its North Eastern boundary that restricts any perceived coalescence and there are other tree belts between Send and Send Marsh. The image above shows the relationship of the site to the strategic gap. The village of Ripley is over 2 miles away and therefore it is not felt there is any danger of actual or perceived coalescence between the PDA and Ripley.

[IMAGE 3]

In conclusion it is not considered that site PDA B16-A acts decisively in preventing actual or perceived coalescence between Send and Send Marsh and as such scores 0 against this purpose.
Purpose 3 - Safeguarding the Countryside from Encroachment

In order to assess whether land parcels perform this purpose, consideration will be given to the extent to which the countryside within a parcel has already been built upon. If the parcel is strongly influenced by built development or urban influences, it will be assumed that this part of the countryside has already been notably encroached by development, and as a result is no longer able to perform this purpose. If however the parcel remains primarily free of development, possessing predominately unspoilt countryside / or uses defined as appropriate in the Green Belt, then it may be considered that encroachment has not yet occurred and the parcel continues to perform the purpose.

The site, whilst not developed itself, is bordered on three sides by development and consequently has as its backdrop the built form of the village of Send. The site is therefore strongly influenced by built development and urban influences and is therefore already noticeably encroached by development.

Purpose 4 - Preserve Setting and Character of Historic Towns

Conservation areas associated with towns and villages within Guildford Borough are considered significant when assessing land parcels against this purpose. In addition, the potential impact upon the setting and special character of historic elements of Guildford, through cross reference to the Landscape Character Assessment (rural / urban fringe assessment 2007) and the likely impact upon Historic Parks and Gardens and Scheduled Monuments, will also be taken into account when assessing whether a parcel performs this purpose. Where a land parcel is considered to notably contribute to the preservation of such historic settings relating to settlements, it will be assumed to serve the purpose.

The nearest conservation area is in Ripley Village over two miles from the PDA. For this reason we believe development of PDA B16-A would not have any effect on the preservation of the Historic Village of Ripley and scores 0 accordingly.

The result of our site specific Green Belt assessment is shown on the table below:

Potential Development area B16-A assessed against the main purposes of the Green Belt

The Proposal (Concept Plan set out at A)
To offer a dedicated scheme of serviced custom build plots with highway access onto Tannery Lane including connections to mains drainage, gas, water and electricity.

- 60% Self Build plots
- 40% Affordable housing
- Public open Space provision
- Improvements to Green infrastructure
- Additional Parking for the existing Residents of Tannery Lane (to ease existing capacity issues)
- Contribution by developer of local infrastructure costs by way of s106 in lieu of lost CIL from Self Build exemptions

Conclusion

The site is sustainably located on the edge of Send village bordered on three sides by built form. It will not have a significant impact on the openness of the surrounding Green Belt; it can come forward quickly and easily in single ownership and will make a significant contribution to the Government’s initiative for custom and self build housing.

The site should therefore be allocated or safeguarded for custom and self build housing as set out in the proposal above.

2. Land at Hillside Farm, Sandy Lane, Send

The second site is land at Hillside Farm, Sandy Lane, Send under the same terms set out above for The Vineyard site. This land would make an ideal self-build site being sustainably located on the edge of Send and sitting within land parcel B10 classified as being of low sensitivity. This was not identified as a PDA in the GBCS and it is believed this was due in part to the designation of some adjoining land as a Site of Nature Conservation Interest (SNCI). Recently Guildford BC has confirmed that the SNCI status on adjoining land is to be removed.

The site is Suitable, Available and Deliverable.

Hillside farm shown bordered in red, proposed greenbelt in setting boundary shown in green

Site Characteristics

- Total area 15 Ha. Potential developable area 4.7Ha
- 80% of the land (5.7 ha) at Hillside Farm was identified as falling within the “Perceived Village Area” by the GBCS.
- The site is well screened from neighbours to the North and East by woodland and hedgerow and to the South by a ridge which would help minimising the visual impact of any development
- The site is not subject to any statutory or non-statutory landscape designations
- The site is not subject to any statutory or non-statutory nature conservation designation
- The SNCI status of the land to the North is being delisted as part of the Local Plan revi
- The site is not subject to any statutory or non-statutory cultural heritage designations
- Poor quality Grade 4 Agricultural land (source Magic Map)
- Flood Zone 1 (source Environment Agency mapping)
- “Very Low” risk of flooding from Surface Water (source Environment Agency mapping)

Relevant facts from the Green Belt and Country Side Study (GBCS)

The site is situated in Land Parcel B10, classified in the GBCS as a 2* (Low Sensitivity) land parcel. This is a relatively small land parcel of 77ha with much of it containing the settlement of Send.

The GBCS states: “The parcel B10 provides opportunities to accommodate development without significantly compromising the purposes of the Green Belt”.

The site is in a very sustainable location. Assessed using the methodology in the GBCS the site scores 10.25 which would rank the site as more sustainably located than any other village extension site in the Reg 18 & 19 Draft Local Plan.

**Total Sustainability score:** 10.25
The Proposal (Appendix B Concept Plan)

To construct a link road between Sandy Lane and Potters Lane including connections to mains drainage, gas, water and electricity to service:

- 60% Self Build plots
- 40% Affordable housing
- 6 Acres of Private Woodland (Currently with no Public Access) handed over to be used for Public Open Space offer blue-green infrastructure improvement
- Additional Parking for the existing Residents of Sandy Lane (to ease existing capacity issues)
- Contribution by developer towards local infrastructure costs by way of s106 in lieu of lost CIL from Self Build exemptions
- Local community benefit from provision of blue-green infrastructure Improvements

Conclusion

The site is sustainably located on the edge of Send village bordered on other side by residential development. It will not have a significant impact on the openness of the surrounding Green Belt; it can come forward quickly and easily being in single ownership and will make a significant contribution to the Government’s initiative for custom and self build housing.

The site should therefore be allocated for custom and self build housing as set out in the proposal above.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp171/1143  Respondent: 8605793 / Astenbell Ltd (Nigel Sturgess)  Agent:
**Demand for self build in Guildford**

Guildford’s self-build register was set up in March 2016.

From March 2016 to 31st October 2016 (8 months) which is the first base period 87 people were entered on the list as being eligible.

From 1st November 2016 to April 30th 2017 (6 Months) a further 57 people were registered.

In total for the first 14 months 144 persons were entered on the list as eligible an average of 10 registrations per month. In a growing market such as self build It would not be unreasonable to expect that by **December 2018 (33 months) at current levels there could be 330 persons eligible on the register.**

**Proposed Provision of plots**

A table analysis of the councils planned provision of plots has been carried out and **for the whole life of the plan up to 2034 we consider provision has only been made for 312 plots. (see table below)**

Information has been extracted from the Guildford borough Proposed Submission Local Plan: strategy and sites document June 2017 together with further data from the Guildford Land Availability Assessment 2016 LAA document as well as the councils current and past planning application web portal.

The councils emerging policy looks to rely on large sites of over 100 dwellings to make 5% of their total homes available and priced and marketed appropriately as self-build or custom build plots for at least 18 months.
The table below summarises the sites and how many self build plots they are expected to provide and information from the LAA has indicated likely timescales.

<table>
<thead>
<tr>
<th>Policy No</th>
<th>The Sites below have been allocated to provide 5% of their plots to be offered as self build plots</th>
<th>Number of Self Build at 5%</th>
<th>Anticipated Self Build Plots delivery timeframes</th>
<th>Estimated delivery</th>
</tr>
</thead>
<tbody>

<tbody>
<tr>
<td><strong>Total provision based on current policy</strong></td>
<td>312</td>
<td>0</td>
<td>161</td>
</tr>
</tbody>
</table>

As can be seen from the table, assuming all the site allocations expected to deliver Self Build plots are granted planning permission then 312 self build plots will be made available over the length of the plan (2017-2034). We feel this number is going to be wholly inadequate to satisfy the growing demand on the register.

It is difficult to estimate delivery of these plots as they are reliant on planning applications coming forward which in turn are reliant on infrastructure improvements. The timeframes for delivery of these plots has been estimated in line with the estimated timelines in the LAA 2016. As per the reasoned justification on strategic development sites, the delivery of a significant proportion of self-build or custom build plots will be expected within the first phase of development.

From the table 161 self build plots might be available in the first 5 years after adoption of the plan, 81 more in the second five years and 70 in the third five years.
There are other sites allocated in the draft over the 100 home threshold but for one reason or other they have not been specifically allocated to provide the 5% self build plots. Many of these are town centre high density flat developments which are planned to be exempt from the requirement to provide plots as reasoned in the justification.

The table below shows these other allocations in the plan over the 100 home threshold.

<table>
<thead>
<tr>
<th>Site Description</th>
<th>Reasons for Discounting Them</th>
</tr>
</thead>
<tbody>
<tr>
<td>Jewsons Walnut Tree Close, Guildford. Flatted development 175 homes</td>
<td>It is not considered that this site is suitable for Self Build plots as it is Town Centre flatted development with an anticipated density of 171dph</td>
</tr>
<tr>
<td>North Street Redevelopment, Guildford. Flatted development 400 homes</td>
<td>It is not considered that this site is suitable for Self Build plots as it is Town Centre mixed use with flats development with an high anticipated densities</td>
</tr>
<tr>
<td>Land and Buildings at Guildford Railway Station Flatted Development 350 homes</td>
<td>It is not considered that this site is suitable for Self Build plots as it is Town Centre high density flatted development scheme with an outstanding appeal pending</td>
</tr>
<tr>
<td>Guildford Car Park Consented Development 160 Homes</td>
<td>This site has already been consented with no provision for self build</td>
</tr>
<tr>
<td>Kernal Court, Walnut Tree Close Flatted Development 100</td>
<td>It is not considered that this site is suitable for Self Build plots as it is a Guildford Urban area flatted development with an anticipated density of 181dph</td>
</tr>
<tr>
<td>Land at Guildford Cathedral 100 houses.</td>
<td>Planning app 15/P/02284 for 134 dwellings on this site was refused in Feb 2017. It is considered that this site could deliver self build plots in any future application however GBC have not included this option in the Policy details</td>
</tr>
<tr>
<td>Land between Gill Avenue and Rosalind Franklin Close 450 homes</td>
<td>It is not considered that this site is suitable for Self Build plots as it is a Guildford Urban area flatted development with an anticipated density of 191dph</td>
</tr>
<tr>
<td>Slyfield Regeneration Project 1000 homes Council land</td>
<td>It is considered that this site could deliver self build plots however GBC the Landowners have not included this option in the Policy details</td>
</tr>
</tbody>
</table>
Out of the allocations in the table above it is only Site A15 and A24 that could realistically offer some self build plots but as these have not been included on the allocation details they have been discounted.

We consider it unlikely that the demand figures will decrease over time as the self build sector gains momentum, however even if demand in this sector were to wane the "over supply" of plots would not cause problems as there is a proposed clause in the policy stating that developers could simply build out any surplus plots after a period of marketing. Undersupply however is likely to cause the Council problems in the future whereby they would have to apply to the Secretary of State for an exemption from the duty to provide serviced plots where demand for serviced plots is high but the supply of land for housing is constrained.

Exemptions are not automatic and there is a test that local demand must be greater than 20% of the total land available to meet an authority’s future housing need. There are time limits when such applications need to be made; and a requirement for evidence to be provided. An exemption only relates to a given base period and does not remove the duty for an authority to have regard to demand on its register when carrying out their housing, planning, land disposal and regeneration functions, as provided for by the 2015 Act.

There would therefore seem to be no downside in over providing for self build plots but plenty of downside for under supply. We therefore believe the most important part of the Councils emerging policy is to make sure that there are enough serviced plots available to satisfy the demand on its register on an ongoing basis.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A26 - Blackwell Farm, Hogs Back, Guildford
We note that the Normandy and Flexford site, which included provision for housing and a new secondary school to serve the west of the borough has been removed from the draft Local Plan. Consequently, we welcome the amendment to Policy A26 which provides for a secondary school within the proposed urban extension at Blackwell Farm. The school is required to meet the county council’s forecasted future need, on the assumption that the development proposed in the Local Plan comes forward. We would like additionally to see it specified that the school is required to be located in the northern part of the site. This is considered to be the most sustainable location in accessibility terms and it would be in accordance with the amendment to SED3.

**Paragraph 4.5.42a** should add (for accuracy) "and Potential." at the end ("The County Archaeologist will be consulted on all planning applications on sites of archaeological importance and potential."). This is an important additional point, as the two areas are distinct (see below) are highlighted differently in the NPPF, and can prompt entirely different management and investigative techniques during development.

**Appendix H (Maps)** We are about to supply GBC with an entirely new series of Areas of High Archaeological Potential and County Sites of Archaeological Importance maps. They will need to ensure that their final plan contains the correct 2017 dataset before its publication.

The Listed Buildings' discussion in the table on page 290 refers to PPG15. This document was rescinded in 2012 - they might wish to bring this reference up-to-date.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()
Policies E1 – E3 – we note that the required provision of new office and research & development floorspace and industrial land has been revised based on the updated Employment Land Needs Assessment and that three additional strategic employment sites have been designated. We support this robust analysis and these policies. We would however still be concerned about the delivery of the economy policies if one or more of the key development sites for employment use were not able to proceed due to transport or other reasons.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The huge number of houses proposed it is said is following government guidelines. Yet I read that a large part is due to GBC deciding to for an exaggerated growth. In my view we do not need more growth here, we need less and put the growth elsewhere where it is needed. This looks like a plan designed by builders.

I have great difficulty with any plan like this one which has no associated costing, especially to the taxpayer. Mention is made of major road construction. Who is paying? There are numerous other areas where one way or another infrastructure cost is implied. No idea is given and this cannot be right.

The same is true of timing. No information. Clearly there will be massive interruption, inconvenience, delays etc from a project even if as it must, spans years. This is not spelt out nor is it clear who pays.
While a document that appeared months ago cannot be expected to take account of any impact of e.g. "Brexit" there is no sign of tests of robustness to unexpected changes in circumstances, economic or other.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The attachment of large numbers of hoses at a high density to communities of completely different character so as to overwhelm the existing communities is not acceptable. Nor is it acceptable to be virtually silent on the infrastructure implications or the timing of providing properly sized infrastructure given that what is there now in terms of roads, lanes, schools, elderly care, medical facilities are already overloaded.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Ref: Policy Nos. P2, A43, 30 ha and A44, 1.9 ha Send.

I am writing to strongly object to the above Policies/Planning Proposals.

Guildford Borough Council have been proposing various developments for housing and gypsy sites in Send for a number of years. I have objected previously on these proposals.

It now seems that GBC are not following due procedure and keep changing the size of proposed developments. They have now added a massive road junction - not previously disclosed.

The proposal for 430 houses in 2014 was reduced in April 2016 to 185. Now GBC have increased the number of houses once again to 485. These changes require full consultation under Regulation 1. GBC are now trying to short cut the consultation via Regulation 19. This action completely invalidates any consultation with residents of Send. I object to GBC trying to impose housing development in Send via such misleading short cut practices.

The evidence GBC are providing for employment needs; industrial space and housing for foreign students is highly questionable. Figures are being manipulated and do not represent current needs. Any new homes can be built of the surplus of brown field sites which would accommodate current needs.

I object once again to the green belt areas of Send being built upon. Policy P2 will ruin the semi rural environment of Send. The current infrastructure of Send cannot cope now with the population. Any increase will have serious adverse effects upon the community.

Our current Surgery, School, shops, flooding problems and particularly traffic congestion will be adversely affected. I struggle to get an appointment with a Doctor as the Surgery is over subscribed. More housing will only increase the problems.

I strongly object to Policy A43, 30ha Land at Garlick's Arch, Burnt Common. Another 400 houses and 7,000 sq. metres of industrial and warehousing which is not needed will have huge detrimental effect upon Send.

We do not need another 400 homes on top of the ridiculous number already proposed of over 13,860. Send cannot cope with such numbers. Each house will double the number of residents at least and if not more. Most homes today own at least 2 cars per household. How on earth are the roads around Send going to cope. We are at near grid lock now at peak times of the day. The A3 is permanently blighted with traffic jams currently.

This proposal is NEW and was not included in the Regulation 18 draft and has not been consulted upon. The area is Green Belt permanently protected by the NPPF which prevents the merging of settlements. The area has conservation sensitivity being covered by ancient woodland dating back to the 16th century.

As the latest Employment Land Needs Assessment 2015 (ELNA) shows there is a reduction of 80% in required employment floor space from the previous draft plan - we do not need an industrial development of another 7,000 sq. m.

I object to the horrendous proposal of a new 4 way interchange onto the A3 at Burnt Common.

This is total madness!! Apart from ruining the environment I green belt the extra traffic and in particular pollution will have a huge impact on Send. All traffic from the M25 wishing to travel to Woking will be routed through Send.

Send is a small village and our main road A247 cannot cope now. There will be total grid lock! As a resident of over 40 years I have seen Send deteriorate. Living in [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] has become a nightmare early in the morning and evening with the lane being used as a "Rat Run" for commuters to and from Woking/Guildford.

I object to Policy No. A44 1.9 ha Land west of Winds Ridge and Send Hill. Another 40 homes on top of the 400 proposed for Burnt Common area is totally unacceptable and not necessary. Brown field sites should be used and the Green Belt
should be retained. The Conservative Party at the last election (GBC being Conservative) promised voters to protect Green Belt land. The current Government and GBC are not fulfilling their promises.

[Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it]

[Summary of redacted paragraph: Travellers should travel and not be provided permanent pitches. The provision of pitches will reduce the value of the properties of the area. Residents have worked hard and paid their taxes to have the homes they have today.]

It is totally unacceptable to pitch such sites in Send. The increase in traffic from these proposed sites via the narrow lane (Send Hill) to the crossroads with Potters Lane, will be extremely dangerous.

There are enough brown field sites. However, I fundamentally disagree with the whole concept of travellers sites. If they want to be part of society - adhere to the rules of society and democracy [Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it]

I am not prepared to standby and watch BGC ruin Send and its surrounding areas to fulfil some brief from the Government who have broken their promises to the people who elected them regarding Green Belt.

I cannot understand why common sense does not prevail within Government and Councils. It is so obvious that the South of England is over populated and at grid lock with traffic and the associated pollution. The infra structure cannot cope, the local surgeries and hospitals are in melt down.

Stop trying to increase the population in this area and think of spreading the load northwards. This will encourage more employment to areas of deprivation in the Midlands and North.

Much more and the South of England will fall into the Channel under the weight of people and traffic and industry.

Please take my above objections into consideration and listen to the residents of Send. We live here!!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A42

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing to file my strong objections to the following amendments made to the Local Plan.

Clockbarn Nursery, Tannery Lane, Policy A42:

I object to Policy A42 as the number of homes planned has been increased from 45 to 60 homes. This is an increase of 33% and ignores all previous objections from local residents.

Tannery Lane is a single track narrow lane which has traffic and access problems onto the A247. Send Business Park traffic is already a problem without increasing this by more homes.

The Policy will erode more Green Belt. As Guildford Borough Council is a Conservative Constituency who promised not to build on Green Belt - this is totally unacceptable.

There is surface water flooding in this area and building homes on this land will add to the problem.

The countryside around Send will be lost and the rural feel of the area which is part of the attraction of Send.

Land at Garlick's Arch, Send Marsh, Policy A43

I strongly object to Policy A43 change at Garlick's Arch as it ignores all previous objections from thousands of local people.

There is no proven need for plots for "Travelling Showpeople". The shear title of these people indicates they should be "travelling" and therefore do not need a permanent plot. The title is misleading - they are not "show people" which indicates some sort of Circus. Circus people keep moving. [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature].

This area is a permanent Green Belt site and there are absolutely no "exceptional circumstances" for this Policy.

The Policy Plan will cause over development of our Village and the number of homes is excessive.

Once again 400 homes will amount to another six to eight hundred cars on the local roads. roads are at virtual grid lock now at peak periods.

This Plan will virtually join Ripley and Send villages thus doing away with the Green Belt. The ancient woodland of this area has existed since the 15th Century and the reign of Elizabeth 1st.

The area is also subject to frequent flooding and is currently in a flood zone 2 allocation. Is this to be ignored as well as the Conservative promise of not building on Green Belt.
The land is contaminated by lead shot accumulated over 50 years. That entering the water table is a potential health hazard.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Land at Burnt Common, London Road, Policy A58

I object to Policy A58 at Burnt Common. This plan was deleted from the 2014 draft due to the volume of objections.

The word "minimum" has been changed from the previous "maximum" in the 2016 plan. Since then there has been a decline in demand for industrial land.

There is no need to build industrial or warehousing on Green Belt. This should be built on Brown Belt not in a rural setting. Slyfield and Guildford still have empty sites and industrial units.

The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole of the Borough not a vast over allocation of 10 hectares at Send on Green Belt.

Once again the increase of traffic from this Policy Plan will cause major traffic congestion in an area which is already suffering.

The pollution will just add to the already existing problem of air quality in the area from the A3, M25 and Heathrow and Gatwick Airports.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposal of Send Business Park being taken out of the Green Belt. It is virtually a non-conforming user in a rural setting by the Wey River.

Further expansion of this location will ruin the Green Belt area and increase traffic along a country lane.

When will Guildford Borough Council and the Conservative Government realise that Send and in fact Surrey and the South East of England are at saturation with too many people, homes and businesses.

The impact of traffic congestion, over population impeding on local services and infra structure is making life intolerable for residents. Already the hospitals and doctors surgeries cannot cope. The schools are over subscribed, there is a huge problem with the elderly and their care, there is not enough housing for purchase or rental and the cause of this has increased prices.

As a Conservative voter my entire life, I am angry that GBC is ignoring their pledge not to build on Green Belt land. These plans, policies and proposals are going to ruin life for local residents who, decided to live in Send and Ripley as rural areas.

I have lived in Send for over 40 years and have seen a deterioration in the area and quality of living.

Potters Lane is now a horrendous "Rat Run" each day in the morning and evening. It is like living on the A3. It has become a very dangerous road and GBC plan will only add to the traffic and pollution of Send and Ripley. How are the schools, Doctors and other infra structure going to cope with all these added homes and industries. It will be become even more intolerable.

Stop adding to the over population of Surrey - ENOUGH IS ENOUGH!!

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Guildford Local Plan – Strategies and Sites June 2016**

Thank you for the opportunity to respond to the Local Plan. I am responding by letter as there are many points which do not fit well into the sections of the questionnaire.

I am very disappointed that the views of myself and a very large number of others from the Horsley and other rural areas surrounding Guildford made during the consultation period following the ‘2014 Draft Plan’ have not been addressed. The Green Belt area of the villages surrounding the urban areas of the Guildford borough is one of its greatest assets. The current plan will destroy the nature of these villages.

I strongly object to the current plan for the following main reasons :-

*‘Green belt’ and Area of Outstanding Natural Beauty (AONB)* - The ‘Green belt is precious. There are five legal reasons for the ‘Green Belt’ and the Surrey ‘Green Belt’ meets them all. The National Planning Policy Framework requires any change in Green Belt boundaries to demonstrate very exceptional circumstances. These ‘exceptional circumstances’ have not been demonstrated. Also I strongly object to the proposed changes in the settlement boundary and the concept of ‘insetting’. The only reason for this would be to allow even further development. This is not a valid reason to change the boundary.

*Scale of development* – An increase of over 385 potential new dwellings is included in the draft plan for West Horsley which currently has just over 1,100 dwellings. This represents an increase of over 35% which is totally disproportionate to the size of the village, and at a density that is significantly above the village at present. This would result in a significant detrimental change in the nature and character of the village. This increase is vastly above the increases in most other areas of the borough. The increase in the urban area of the borough is only planned to be 11%. The pressures on the infrastructure would be completely unmanageable (see further comments below).

*Timing/Speed of development* – I object to the plan that all of the 385 (35%) increase in proposed dwellings are planned to be built within the next 5 years and before the ‘Brown Field’ sites in the urban areas are developed. This will allow no time for any improvements in infra-structure and cause irreversible damage to the Horsleys.

*Evidence Base for housing needs* – The construction of the plan is conceptually flawed as it is based on a supply of land put forward by land-owners/developers. It is not based on a balanced view of the housing needs of the urban area and individual villages. It does not take into account the impact of Britain exiting the EU.
The plan would allow the continued development of large four/five bed-roomed houses on developments of twenty dwellings. However, there is also a natural ‘ratchet’ effect that results in the current stock of homes constantly getting larger as extensions are added and we do not need any more large dwellings. The plan does not address in any detail a better way of prioritising smaller homes for first time buyers and for those downsizing.

**Sustainability and transport** - Allowing significant development in the rural areas of the borough will exacerbate the accepted transport pressures in the area as there will be few jobs in these rural areas causing additional commuting to the urban areas. This would be minimised by more effective development in the urban areas.

**Urban areas and ‘brown field’ sites** – Developments should be made in the current urban and ‘brown field’ sites first before irreversibly destroying green field sites – especially as there is such a large range and uncertainty in the projections of the number of homes needed. The current plan is to develop the easier ‘Green Belt’ areas first and then focus on the ‘Brown Field’ sites. This is the wrong way around. The plan does not effectively exploit the use of the current ‘brown-field sites’, particularly within the urban area of Guildford. For example there is significant scope to enlarge and build more multi-story car-parks in the urban areas which would allow more residential developments.

**Infrastructure** - Current infrastructure in the area is already struggling and needs to be addressed before any additional developments. This Guildford draft plan is meaningless without any Infrastructure Delivery Plan.

The increases in housing proposed in the plan would dramatically increase pressure on schools, medical facilities, roads, railways, drainage, parking etc. In particular, the state primary school is already at capacity, with no room for expansion, and the station car park is virtually full during weekdays. Car parking around the shopping areas is already very restricted, and often full, with little scope for expansion.

There is no evidence in the plan that any required changes to the infrastructure would be in place before any increase in housing/development. This should be addressed in detail within the plan.

**Flexibility** - The plan needs to have significant detail in the short term (5 years) and be very flexible, with a feedback mechanism, in the longer term (6 years and beyond) to allow for i) the uncertainty in the numbers of homes etc. needed and ii) for impact of developments made to be assessed.

For the reasons above I strongly object to the current plan and ask you to reconsider all the proposals concerning Horsley to apply constraints that relate to the very individual village characteristics of West Horsley and change the plan to incorporate a consensus of the views expressed by all Horsley residents and the West Horsley Parish Council.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

---
I am very disappointed that most of the views of myself and a very large number of others from the Horsley and other rural areas surrounding Guildford made during the consultation period following the ‘2014 Draft Plan’ and updated June 2016 Local Plan still have not been addressed. My overlying concern is that the Green Belt area of the villages surrounding the urban areas of the Guildford borough is one of its greatest assets and the current plan will destroy the nature of these villages.

In addition to the comments I laid out in my letter of 5th July 2016 I strongly object to the changes in the current plan for the following main reasons :-

**Scale of development** – This revision the plan now includes an increase of over 295 new dwellings for West Horsley which currently has just over 1,100 dwellings. This represents an increase of 27% which is totally disproportionate to the size of the village, and at a density that is significantly above the village at present. This would result in a significant detrimental change in the nature and character of the village. This increase is vastly above the increases in most other areas of the borough. The increase in the urban area of the borough is only planned to around 11%. The consequent pressures on the village infrastructure would be completely unmanageable. The increases in housing proposed in the plan would dramatically increase pressure on schools, medical facilities, roads, railways, drainage, parking etc. In particular the state primary school is already at capacity, with no room for expansion, and the station car park is virtually full during weekdays. Car parking around the shopping areas is already very restricted, and often full, with little scope for expansion.

There is no evidence in the plan that any required changes to the infrastructure would be in place before any increase in housing/development. This must be addressed in detail.

**Affordable homes** – The wording of Policy H2 Affordable Homes has been weakened to include phrases such as ‘we will also seek affordable homes on sites providing five or more homes ….’. The original wording is much stronger and better and ensures that the affordable homes policy has no ‘wriggle room’. This is essential as ensuring more affordable homes are built is very important.

Comment ID: PSLPS16/7654  Respondent: 8606977 / Mrs Sarah Tipping  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to building houses at Clockbarn because of inadequate access and traffic volume. Tannery Lane is too narrow a winding road to take more traffic. The junction with Send Road is already fairly hazardous for vehicles emerging into the main road. Planning permission has already been given for 64 houses at the Tannery and the marina will generate heavy traffic too. The road cannot take any more.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the development of 40 houses at Send Hill due to its high quality Green Belt amenity within an area of beautiful countryside which would be spoilt. The proposal to include 2 Travellers Pitches is completely inappropriate due to the narrow width single track country road providing insufficient access to the site.

1. Introduction

CPRE Surrey Guildford District welcomes this opportunity to make this submission concerning the draft local plan. CPRE has the third largest county membership in the country and Guildford and Waverley are its two biggest CPRE Districts in Surrey. CPRE is an Advisory Board Member of the Surrey Hills AONB Partnership and also chairs the Surrey Aviation Group. On both a national and local scale, CPRE has had extensive experience over many years in shaping and interpreting planning policy.

1. Background to this Submission

CPRE is concerned at the uncertain background to this GBC consultation which has been characterised by a number of executive and officer changes and also overshadowed by the recent EU referendum with its as yet unpredictable political and economic outcome. It is not possible, for example, at this time to estimate what impact this might have on inward migration. We are dismayed about the inclusion in the draft Local Plan of so many Green Belt development sites which are considered necessary by GBC if they are to meet the unrealistic ‘Objectively Assessed Need’ (OAN) figure of 693 houses per annum (SHMA). What is required instead is a more careful consideration of the many widespread and serious constraints on development within the Borough, and the need to protect and enhance the countryside adjacent to and around the town of Guildford and its villages, rather than undermining this valued resource through the proposal of urban extensions and over large housing sites.
CPRE does not agree that this consultation should be made under Regulation 19 as a number of wholly new items, which we have indicated in this document, have not been consulted upon under Regulation 18. Additionally, many proposals for policy and development sites have not been able to be assessed fully for consultation as the necessary detail for them is absent. Furthermore, some of the ‘evidence’ in the Pegasus Report on the countryside has not been corrected, and has been used in a subjective quality assessment of the Green Belt to justify recommendations for changing boundaries that do not stand up to detailed examination. We have given an example of this in connection with the Blackwell Farm proposal (page 17).

CPRE has had to select only those sections of the draft Local Plan for comment which are primarily concerned with the countryside as the 6 week period for consultation is too short a time to deal with all the material available for study. We have therefore had to concentrate on those omissions and assumptions made about the borough that we consider need to be reviewed more completely in depth.

1. Fundamental Overall Objection

- Green Belt and AONB

It has been made clear by the Government that they remain committed to protection of the rural environment. When asked to comment on the National Planning Policy Framework, the Minister of State for Housing & Planning Brandon Lewis MP made the following declaration in a letter dated 10th June 2016 to Richard Knox-Johnston, Chairman of the London Green Belt Council:

“The Framework makes it clear that inappropriate development may be allowed only where very special circumstances exist and that Green Belt boundaries should be adjusted only in exceptional circumstances through the Local Plan process and with the support of Local people. We have repeatedly made clear that demand for housing alone will not change Green Belt boundaries.”

This clear policy statement is not reflected in the draft Guildford Local Plan which calls for housing development not only on a number of sites in the AONB and the AGLV but also encroaches on the Green Belt in a wide range of other locations. CPRE maintains that this is a misguided approach and renders the current proposal unsound. CPRE OBJECTION.

- Town Centre Capacity

CPRE believes that the draft Local Plan is also unsound because no complete proposal for the Town Centre or for the development of the urban area has been made available in time for this consultation. This is required so that a coherent assessment can be made of the priority given in terms of the extent and type of housing development proposed, its density and location. Town and countryside have to be considered in parallel. CPRE OBJECTION.
Green Balance Review of Objectively Assessed Need (OAN)

CPRE Surrey has commissioned Green Balance to review and supply an independent commercial opinion on the validity of the OAN housing figure of 693 given in the GLH Hearn West Surrey Strategic Housing Market Assessment (SHMA) for Guildford, Waverley and Woking. Their report makes clear that they judge this document to be flawed and the OAN figure for Guildford to be too high. In view of the Green Balance evidence produced, this puts the credibility of the whole draft Local Plan in question. The over estimation of housing need effectively makes the draft Local Plan unsound. CPRE OBJECTION.

Instead of the OAN recommended in the SHMA of 693, an overall reduction is suggested for this figure of 212 which results in a revised OAN of 481. Other areas for further investigation as to the validity of the 693 figure have been suggested. The summary of reductions recommended for the OAN for all 3 districts covered are shown in Table 1 of the enclosed SHMA Review on page 4.

CPRE does not accept that the constraints relating to development in this draft Local Plan have been properly assessed or taken into account. If they were, the OAN would be radically reduced and we estimate that there would be no need to use Green Belt land. GBC has indicated that the OAN figure which GL Hearn has produced takes account of constraints but gives no explanation of how this has been done. This whole topic needs to be investigated further.

CPRE is also not in agreement with the emphasis given to retail sector expansion and office and warehouse development at Guildford at a time of changing conditions in the market-place and a need for more urban housing. CPRE believes that the focus of attention on building in the countryside has been caused by a too high OAN figure and a refusal to allocate sufficient priority to the supply of affordable housing and flats in the town because building development in this category has been sidelined rather than given the attention it requires. CPRE OBJECTION.

CPRE OBJECTION TO POLICY A25 : Gosden Hill Farm, Merrow Lane, Guildford

CPRE has many reasons for considering this proposal unsound which are listed below :

1. The land which is proposed for development is all open Green Belt countryside of an attractive character which it is now suggested should be surrendered to urban sprawl. The NPPF states “the essential characteristics of Green Belts are their openness and their permanence”. Boundary changes to the Green Belt can only be made at the time of a Local Plan consultation in “exceptional circumstances”. The draft Local Plan does not provide sufficient detailed evidence of the strategic development proposed to meet this requirement. The Green Belt between Burpham and West Clandon forms part of the green approach to Guildford and provides a clearly defined boundary to the urban area. Much of the building proposed falls within the Parish of West Clandon but the principal impact of the traffic from the new site will be experienced in Burpham which already suffers badly from congestion and air pollution. It is felt that a better solution to these problems is required.

1. The proposal cannot be considered seriously until Highways England have decided how the A3 infrastructure can best be handled in this sector. No decision is likely to be made by them until at the earliest 2020. Their policy requires that 4 way junctions have to be set at a specified distance apart which at the moment seems to rule out the use of land adjoining Potters Lane.

1. It is equally important that a decision is made about a possible tunnel for Guildford as it will be necessary to decide where provision for access should be made in the vicinity of Burpham. It is not known exactly what route the tunnel will follow but Compton has been mentioned as its possible other entrance. As far as we know, there are only estimates available as to its likely cost and the time that it would take to build. If a tunnel were to be used to link Burpham and Compton, substantial additional road infrastructure would be needed for the B3000 both at Puttenham and Compton.

1. Planning as to whether a railway station at Merrow will be built seems to be uncertain and depends on decisions involving Network Rail. We are informed there is no reference to a railway station at Merrow in the Wessex Plan for future railway development. The station can only therefore be considered in an aspirational category as so few details are available as to its design, exact location, operation, car and bus access and parking provision. Space currently occupied by the Surrey depot in Merrow will we understand be used on one side of the track but there is no information as to the rest of the station layout including a bridge over the lines. Road access for the station will probably require the replacement of the railway bridge over Merrow Lane near its junction with New Inn lane (B2234) where lights control the traffic.

1. Before 2000 houses could be built at the site proposed, water supply, the sewage network, and other infrastructure issues would need to be resolved. We are informed that the electricity pylons near the A3 would also need to be changed owing to a capacity requirement.

1. There has been a history of linear development along the A3 in Burpham, The latest example Wey Lea was promised a range of community facilities which we believe never materialised. Burpham residents do not want this experience to be repeated for the proposed new settlement and are doubtful from past experience that undertakings in this context will be honoured.
1. Plans for a Slyfield Link Road also now appear largely aspirational. There is little confidence either in Burpham at present about the value of plans for a “sustainable movement corridor”. It appears that London Road will form part of the SMC with two way traffic in single lanes plus an additional lane in each direction for buses and cycles. It is felt that this will add to an already difficult traffic situation.

1. The Burpham Community Association issued the following statement at a well attended public meeting on 11th July 2016 regarding development of Gosden Hill Farm and its “huge impact” on Burpham:

“Two thousand homes, offices and industrial sites, a Park and Ride for up to 1,000 cars, two schools and the possibility of a new station at Merrow will put thousands more vehicles on to already very congested roads. Access to the proposed development is by a new A3 southbound off/on slip road and the present slip road to Burpham and Merrow will become two way. This means that all traffic from Gosden Hill wishing to use the northbound A3 will have to drive through Burpham to the Clay Lane slip”.

The BCA goes on to say that “the only sensible solution is a four way intersection around Potters Lane as proposed in the 1980s, which would give north and south bound access to the A3. If it is decided that a tunnel is the only answer to Guildford’s traffic congestion, then it is short-sighted to dump homes and all the associated infrastructure on the most suitable land for a tunnel entrance.”

1. The other A3 entrance to the possible tunnel may need to be located at Compton which also suffers heavily from road traffic congestion and air pollution on the B3000. CPRE does not pretend to have the necessary engineering knowledge as to the practicability of such a solution nor of the possible cost and time needed for its implementation. We do, however, know something about the successful introduction of the Hindhead tunnel in Waverley, and we recall that it was clearly indicated when the decision was taken to go ahead there, that the former traffic congestion at Hindhead would reappear at Guildford a few miles down the A3 once the tunnel was built. This has duly occurred. It would seem logical that if an A3 tunnel is considered desirable at Hindhead to keep the traffic flowing and also protect the countryside, then surely it should at least be considered as a possible solution now at Guildford to reduce congestion and improve the urban environment and quality of life of those living in and visiting the county town.

1. The evidence on future traffic conditions which is produced in the Strategic Highway Assessment Report (SHAR) has been produced late and is unfinished. This vital input has not been available in time for it to inform the draft Local Plan or the subsequent consultation. CPRE considers that this whole proposal is not ready for enclosure in the draft Local Plan and is therefore unsound.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

CPRE OBJECTION TO POLICY A26
BLACKWELL FARM, HOGS BACK, GUILDFORD

We fully endorse and support the comprehensive objection to this site by Green Balance which has been made jointly on behalf of CPRE Surrey and the Save Hogs Back campaign.

1. Description

CPRE objects to this site being described as within the “Guildford Urban Area”. It is in fact within Green Belt countryside in Shalford. We object to the single track driveway to Downs Place with its attractive avenue of trees. This development has been objected to by a wide range of Parish Councils including Artington, Compton, Puttenham, Wanborough, and Worplesdon.

1. Ownership

CPRE does not agree with the categorization of this land as “Private” when it is in fact owned by the University of Surrey, a semi public body.

1. Research Park

The Research Park is owned by the University. It still has room to expand on its existing area which was originally allocated as open space. New offices or other buildings could be built similar in design to the WWF HQ in Woking with parking at ground floor level and offices above.

1. Housing

The amount of housing for this site is 1,800 homes and 6 Traveller pitches, together with a primary school. Added to this is provision for 3,000 additional cars which would further complicate matters in terms of access and sustainability. It is our opinion that heavy existing congestion at the Egerton Road A31 requirement could be achieved by the building of a retirement care home. For some unexplained reason this has been omitted from the plan.

1. Infrastructure
Access to this site from the Egerton Road A3 Roundabout via Gill Avenue will become even more congested were the proposed new road from the A31 to the A3 to become a reality. A technical report by RGP has been prepared concerning this proposed new road link to and from the A31 which questions the viability of the new road with a possible extra bridge would of course be very unsightly. There are also safety considerations that need to be taken into account.

CPRE questions whether the proposals for this junction is a realistic proposition. RGP indicates that the preferred highways solution would have a serious adverse effect on this beautiful natural landscape and protected countryside. This harm will be made even worse at the “exceptional circumstances” required for a Green Belt boundary review which would justify the harm it will cause to this very unique landscape. CPRE OBJECTION.

1. Countryside Harm and Urban Sprawl

From this policy presentation, it is hard to believe that the countryside at stake has been seriously considered. We are talking about an area of beautiful Hogs Back countryside which is recognised by everyone who knows it as a unique landscape location. Its magnificent views stretching away to the North. It would surely be unforgiveable if this were not conserved for the future rather than irretrievably harmed.

The Pegasus Report on Green Belt and the Countryside has taken the totally arbitrary position that this site should be considered only of “medium sensitivity”, and request that the Inspector walk through the site to see for themselves that it will be used by a very large quantity of traffic which will stretch back from the A31/A3 junction and the traffic lights at the A3 and in many areas, that it is premature to submit such an uncertain plan until a better assessment is available of cost and viability.

1. Landscape Evaluation

In 2007 GBC and Land Use Consultants published its Guildford Landscape Character Assessment & Guidance which includes in section 6 the protection of the fragility and beauty of the A31 trunk road along the ridgeline with the visibility of moving vehicles and associated noise. This document includes a detailed description of the protection measures that would need to be undertaken to prevent further harm. This work has already been undertaken by Hankinson-Duckett for Natural England. The Parish Councils of Cobham and Chilworth have a serious adverse effect on this beautiful natural landscape and protected countryside. This harm will be made even worse at the “exceptional circumstances” required for a Green Belt boundary review which would justify the harm it will cause to this very unique landscape. CPRE OBJECTION.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7928  Respondent: 8607169 / CPRE Surrey Branch & Guildford District (Tim Harrold)
Agent:
CPRE OBJECTION TO SITE POLICY A35 : LAND AT FORMER WISLEY AIRFIELD

CPRE objects to the continued inclusion in the draft Local Plan of the Former Wisley Airfield (FWA) now known as the Three Farms Meadows (TFM). This development was rejected unanimously on 8th April 2016 by the GBC Planning Committee when it was submitted as a planning application prior to the draft Local Plan being published. This decision was recommended by GBC Planning Officers. We can see no justifiable grounds for this development to now be reintroduced. The arguments for its refusal as a planning application are still as valid as before. Our objection to the former Wisley Airfield development reflects exactly our overall opposition to the draft Local Plan in which over 70% of new housing is to be built within the Green Belt. The GBC proposal conflicts with promises made to the electorate in this context. In our view there is ample brownfield land available in the urban area which should be used for housing instead of attention being concentrated on unsustainable sites in countryside outside the town. No exceptional circumstances have been established to warrant removing land from the Metropolitan Green Belt, which is characterised by its openness and permanence, to permit urban sprawl to spread onto agricultural land in attractive countryside.

We object in particular to the disproportionate allocation of housing to Green Belt land in this segment of the borough. Over 23% of the draft Local Plan’s new housing is supposed to be provided in the immediate vicinity of Ockham, Ripley, Send and the Horsleys, and of this total 65% is allocated to the former Wisley airfield.

CPRE objects to the way in which the draft Local Plan for this site will overwhelm the historic rural village of Ockham nearby - which has only 159 residential houses - and destroy its attractive character and identity that depends on its many listed properties, an absence of street lighting, and very few pavements. This charming small community which can only be accessed by narrow sinuous lanes will be sacrificed to the proposed new development in its immediate vicinity of more than 2,000 houses with high density urban buildings of up to five storeys in height spread out in an urban sprawl of unattractive new construction in open agricultural countryside.

We object to the statement that the new development will result in a significant shift to cycling and walking as a means of conveyance. It is incorrect to suggest that such an isolated built-up location would reduce reliance on private cars as a means of transport to Guildford and neighbouring villages and railway stations. A proposed development of 2,068 homes will result in an estimated 4,000 additional cars on the roads. The added congestion that this will cause on the narrow country lanes in Ockham and surrounding areas will be a source of increased safety hazard to any cyclists and walkers. This will be made worse by the likely increase in bus and HGV movements from the new location with its additional school traffic. No footpaths or cycle lanes are present along these rural roads.

We object to any increase as a result of the proposed new development to the already severe congestion on the A3 and M25 which will require significant infrastructure enhancements. Work in this context to the A3 South of the site is not expected to be begun until 2019 at the earliest.
We also object to the way in which concern about the harm caused by traffic on the A3 and M25 to Air Quality has been treated with insufficient attention. Air pollution is already known to be a problem in many parts of the borough which needs to be tackled. We understand that for example the A3/M25 junction exceeds EU permitted levels and is comparable to air pollution in Oxford Street in Central London where only diesel traffic is present. The additional congestion that will be generated by the new development and by the proposed expansion of daily visitor attendance at the Royal Horticultural Gardens will only make this problem worse. The relevant authorities are well aware of the adverse impact on the health of local residents and plant life that increased traffic causes in terms of air pollution and will need to give this more urgent priority.

We object to the lack of consideration given to the environmental and ecological value of the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and a Site of Nature Conservation Interest (SNCI) which will all be harmed. Traffic noise disturbance has been shown to have a negative impact on bird life which is of particular concern with regard to the SPA.

CPRE notes that concern has been expressed by a wide range of authoritative organisations about this development including Highways England, Thames Water, NATS and the Environment Agency.

The Minister of State has made it clear in a recent statement that housing need and/or demand is not sufficient grounds for encroaching onto open Green Belt countryside and that it is up to “local people” to express their objection to development of this kind. The proposed Local Plan does not meet the needs and desires of local communities. The two top responses in the Ockham Parish Plan call for:

1. Access to the countryside and clean air
2. The peace and quiet of wide open spaces

Over 90% of the local people in this community wish to see both the village’s historic features maintained and the former Wisley Airfield now known as the Three Farms Meadows protected.

CPRE agrees with them.

Answer (if comment is on questions 1-7 of the questionnaire): ()

CPRE OBJECTION TO HORSLEY SITES A37, A38, A39, A40, & A41

CPRE objects to the proposal for six main development sites in the two attractive communities of East and West Horsley. Altogether these add up to more than some 535 new houses. Both villages are currently washed over by the Green Belt. The new development will be made possible by means of “insetting” which CPRE opposes in the draft Local Plan as it facilitates the growth of communities such as these which are together distinguished by their openness within a rural area. CPRE also objects to the extension of the settlement boundary south of the A246 and the progression of linear development towards Effingham and Ockham where the development of 2,000 houses is being proposed for the former Wisley airfield only some 2 miles away.

There are a range of constraints which have to be taken into account when reviewing these new proposals but have been ignored in the draft local plan. We are informed, for example, that Thames Water has advised GBC that the current wastewater network in this area is unlikely to be able to support the demand anticipated from all this ambitious and unexpected development growth. If this were to go ahead, the foul drainage system all the way to the treatment works North of Ripley will not be able to cope and would have to be upgraded through substantial investment.

The proposed expansion of housing on this scale will lead to major problems in terms of educational school provision. The following schools in the area are already operating at near or full capacity: Raleigh School, the Howard of Effingham School, and the private Glenesk and Cranmore Schools. It should be remembered that children in Ripley are currently having to be sent to schools in Shearwater in Woking and even to Addlestone.

Surrey County Council has published no plans for creating further school places for children of all ages for the Horsleys, or for the traffic management and environmental improvement scheme they have promised between 2019 and 2023.

CPRE objects to the volume of high density new housing proposed for the Horsleys which amounts to some 35% more homes because it will harm the character, identity, and setting of these villages. NPPF requires that new residential development must respect these elements of the community environment which will be entirely lost by building on the scale envisaged and should be limited drastically to take account of the infrastructure deficit.

The heritage buildings at Hatchlands belonging to the National Trust, and at West Horsley Place, where the new proposal for the Grange “Opera in the Woods” has been approved by GBC, must be protected against what appears likely to be unsustainable development which will overwhelm the local community environment for ever. West and East Horsley will be swamped with extra cars and people using the shops, stations, village halls, sports facilities, medical services, parking space and public transport. Paragraph 87 of the NPPF makes clear that inappropriate development is by definition harmful to the Green Belt and should not be approved except in very special circumstances. We do not agree with the draft Local Plan that this community should be a candidate for “insetting” to facilitate development on the scale suggested. We object to what is proposed and will oppose any suggestion that “exceptional circumstances” justify amending the Green Belt boundary in the way described at this draft Local Plan consultation as we consider this approach unsound.
CPRE OBJECTION TO SITES RELATING TO POLICIES A43 & A43a: GARLICK’S ARCH, SEND MARSH BURNT COMMON & RIPLEY

The proposal regarding Garlick’s Arch was only submitted at a very late stage just before the consultation on the draft Local Plan began. It therefore needs to be considered under Regulation 18 rather than Regulation 19 rules.

It appears that an as yet unspecified developer has offered a new North facing slip road with access to the A3 in exchange for approval in principle to build at least 400 homes and an industrial estate on Green Belt land adjacent to this strategic highway for which Highways England are responsible. CPRE considers that a greater degree of transparency is required for this proposal to be assessed properly. It would for example be valuable to know when and how this offer has materialised and whether it is linked in any way with any other current proposal being considered in this locality in connection with the draft local plan.

It seems to us that this application has to be considered alongside several other development proposals which involve the A3 and depend on Highways Agency overview and agreement. These include the Wisley Airfield site (A35) for 2000 homes, which was unanimously refused by GBC at an earlier date before the draft local plan was available, the Gosden Hill site at Clandon/Burpham (A25) for 2,200 houses, the Slyfield Area Regeneration Project (A24) for 1,000 houses, and the Blackwell Farm site (A26) with its A3 and A31 access at the Hogs Back for 1,800 homes. The common element to all these applications is that they depend on the input of the Highways Agency.

Additionally, we should bear in mind that the Royal Horticultural Gardens at Wisley, which is one of the largest tourist attractions in this part of England, have announced their plans to expand visitor attendance from 940,000 to 1,400,000 in the years ahead which will be a further A3 traffic consideration that needs to be addressed. Without clarification from the Highways Agency as to how they intend to improve the traffic flow on the A3, which is already badly affected by peak hours congestion, and manage its various junctions with the M25, the B2251, the B2039, the A247, the A3100 and the A31 in particular, further assessment is premature. Altogether over 7,000 houses are involved which seem certain to cause not only a crippling extra traffic burden for the A3 but also for our local road network.

It is not clear as yet how a 3 or 4 way on/off ramp at Burnt Common would work. It seems unlikely that it would alleviate traffic damage on a major scale for Clandon, Send or Ripley. CPRE therefore objects to this proposal which involves the loss of Green Belt to housing development, and is therefore directly against the Minister’s statement that this would not be acceptable if local people were opposed to this and considered it inappropriate. CPRE OBJECTION.

CPRE further argues that it would be premature to include this proposal in the draft local plan as the overall implications of what is being considered are insufficiently described.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

CPRE OBJECTION TO POLICY A46

LAND TO SOUTH OF NORMANDY & NORTH OF FLEXFORD

1. INTRODUCTION

As Policy A46 was only added to the draft Local Plan at a very late stage and without prior consultation or adequate evidence, CPRE believes that this whole topic should be subject to Regulation 18 rather than Regulation 19 consideration.

It appears that this late addition to the draft Local Plan was accepted as the result of Taylor Wimpey offering a new school for this mixed use development involving 1,100 houses. GBC seems to have acted opportunistically in accepting this proposal without assessing adequately beforehand how it would fit the policies that relate to the open countryside of the Green Belt.

CPRE has attended two packed public meetings since then at which the Guildford Borough and Surrey County Councillors spoke. At one meeting the local MP was also present. It appears that the whole community was totally taken by surprise at this proposed encroachment onto Green Belt countryside for which as residents they had received no advance warning.

CPRE has enjoyed good communication with the former Chair of the Parish Council and with members of the Normandy Action Group (NAG) over many years. We also have regular contact with the local Councillors concerned.

CPRE has established an additional link to the Friends of Normandy Wildlife since the draft Local Plan was published and have as a result become familiar with the issues which most concern them regarding biodiversity and ecology. We have
also visited the proposed development area which is largely made up of Grade 3 agricultural land and some stretches of ancient woodland.

We have subsequently studied the submission that they have made which we consider thorough and professional. We have every confidence that the information in their submission can be considered as an accurate statement as to the current situation with regard to wildlife of all kinds in Normandy and Flexford.

The Treasurer of the Friends of Normandy Wildlife has also made a submission as an individual resident who is a member of CPRE which we have studied and fully endorse. CPRE agrees wholeheartedly with the views she has expressed which we consider accurately indicate that the proposal is unsound on the grounds listed later in this part of our submission.

1. ISSUES RELATING TO STRATEGY

The massive scale of this proposed development of 1,100 houses is unacceptable and inappropriate as it will encroach on the permanence of the Green Belt and damage the openness of the rural environment at this location by the introduction of high density urban sprawl. The Minister has made clear that housing demand is not sufficient grounds for altering the Green Belt boundary and therefore cannot be considered as “exceptional circumstances” justifying change in this context in the draft local plan. CPRE OBJECTION.

The site is overlooked from the South by the Hogs Back ridge which is located in the Surrey Hills Area of Outstanding Natural Beauty (AONB) and is also an Area of Great Landscape Value (AGLV). The Surrey Hills Management Plan to which GBC is a signatory states in Policy LU2 that “Development will respect the special landscape character of the locality, giving particular attention to potential impacts on ridgelines, public views, tranquillity and light pollution.” Policy LU5 states that “development that would spoil the setting of the AONB, by harming public views into or from the AONB, will be resisted.” Natural England are to undertake a boundary review of the AONB at the Hogs Back to evaluate whether adjacent countryside can be rated as equivalent in quality to the AONB and therefore of national importance. This long standing strategy to which GBC has agreed should be observed and not obstructed.

Westwood (C16) and Glaziers (D60) Lanes which will provide access to the site are the rural roads which enclose the proposed development area with the A323 and the railway line. The railway bridge on Westwood Lane reduces traffic flow to a single track. This infrastructure will in our view not be able to cope with the additional traffic which the proposed new development will cause. The draft Local Plan indicates that local highway environmental improvements (which are not specified) would mitigate the transport impact from the development, a statement which we find difficult to believe. However, the Strategic Highway Assessment Report carried out by Surrey County Council on behalf of GBC concludes that the Aldershot Road (A323) which already has little or no spare room for more vehicles at peak times would experience increased traffic congestion. Safety considerations from road accident history do not appear to have been taken into account. Because of development in the Aldershot area in Rushmoor, with more planned for the future, the A323 has had to take steadily increasing traffic as vehicles seek to find a way through to Guildford and the A3. There appears to be no joined-up thinking as to the impact of the proposed Normandy/Flexford development on this deteriorating situation. Proposals regarding more passenger use of the unmanned Wanborough station are over optimistic since passengers wishing to reach London have to change at Guildford. The station can only accommodate a maximum train length of 4 carriages. Access to adequate parking at the station is not at present available.
The sewerage system appears to be already running at capacity and could not cope with the proposed development. Footnote 9 for NPPF policy 14 indicates that development in locations at risk of flooding such as at Normandy/Flexford should be restricted.

The community is not convinced that there is a demand for a secondary school in this part of Guildford. An analysis of vacancies at schools in the Hogs Back area indicates that there is current spare capacity. There appears to be a strategy being promoted in the development sector that building a school in this and other development areas will enable a boundary review to be agreed for the Green Belt on the grounds of “exceptional circumstances”. CPRE rejects this idea which it finds fundamentally unsound. CPRE OBJECTION.

The proposal does not clarify which comes first: the extra housing, the new school, the shops, or the infrastructure. It is a chicken or egg story. It appears that GBC has agreed to remove the Normandy/Flexford proposal from the draft local plan should it be shown that the school is not required. CPRE maintains that this development proposal should not have been submitted in the first place and is in conflict with GBC strategy in many areas. It should be removed from the draft Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H1 Homes for All

We consider that this policy should have a sub heading such as:

“The most efficient use of existing urban and previously developed land”.

Development of brownfield sites is the first priority. We also will need to look at the vexed question of higher density whilst having regard to existing character not only in Guildford but also other sustainable locations such as Ash and Tongham. This extra emphasis is necessary in order to lessen the need for the consideration of open land whether within the Green Belt or the countryside.
We must use all the urban land that is available for housing efficiently. We need to look for previously developed land which is no longer required for business or other employment purposes. One important priority is to identify whether there is a backlog of sites in Guildford Borough, for which planning permission has already been granted but not yet been developed. In the past, a great deal of windfall development has contributed towards our planning targets. CPRE sees no reason why this should not be the pattern for the future as well. Many older buildings survive which are still named after their former use. We believe that change will result in individual sites becoming available with the closure for example of small businesses such as local newsagents, post offices, builders yards, and pubs. We would therefore question whether the estimate made in Policy S2 of 625 dwellings from 2018 to 2033 is accurate and sufficient, bearing in mind past rates of achievement in this category. Every effort should be made to include a realistic figure for windfalls which in the past has proved such a valuable element of the housing provision.

It is important that the University of Surrey meets its commitment to build the multi occupancy student housing on its two campuses that it has promised in the past. CPRE maintains that from now on 100% of new student accommodation should be provided on the University of Surrey’s two campuses, both of which have sufficient space to replace sections of surface parking for this purpose. We object to the figure of only 60% of existing students being accommodated on Stag Hill and Manor Park. We consider that the figure should be higher and the policy wording with its use of the words “we expect” strengthened. This would reduce the problem of students using leased housing for multi occupancy in the town that otherwise would be available for year round use by young families with working parents.

The policy does not indicate the density of housing within urban Guildford which should be the objective for future building. Clearly, this is a sensitive issue which will be affected by a wide range of factors including conservation areas, height and design. All surface parking sites should be carefully assessed to evaluate whether more multi storey facilities or underground parking could be considered which use precious space better. We are aware of many individual garages in rear gardens with access to a road which are neither attractive in appearance nor fulfilling an efficient use of land which could be built on. We object that the Policy does not include a density figure, or range, for new housing within the urban area of Guildford, Ash and Tongham. With suitable land so scarce and pressures mounting on open land and Green Belt surely it is time to be pragmatic and realistic by specifying higher densities for building where this can be done without harming the quality of life of the community.

There is a need in the town for more flats which are conveniently located for independent older people that wish to downsize from their current residential accommodation.

The development of the former Surrey Advertiser offices on Martyr Road is an example of what is required. CPRE objects to the excessive amount of retail proposed in the town centre on land which could be regenerated with housing.

POLICY H2 Affordable homes

Defining exactly what is meant by the word “affordable” is as difficult as asking for a definition of “sustainable”. It is hard to believe that 80% of the market value of a house in Guildford would fit this definition and be considered affordable. We do not think that the extensive glossary definition provided will be valid for long, given the Government’s constant tinkering with this difficult area with its tax and other incentives. We also have difficulty with the enthusiasm in political circles for the “right to buy” concept which we believe will eventually have to be reconsidered.
Developers generally prefer to make more money by building larger mansions which bring in more profit for them than affordable home initiatives. The demand for new housing in this county is almost limitless so the impact of what is proposed in the draft Local Plan will not in our opinion have any effect on house price levels.

We support the proposals made for affordable housing being required for sites of 5 or more houses or sites of 0.17 hectares or more regardless of the number of homes involved. We also agree 40% of these homes should be affordable. We agree with the policy which requires for 70% of the affordable homes supplied to be for rent. We wonder how far these objectives will be achievable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H3 Rural Exception homes

There is no reference to Paragraphs 87 to 89 on pages 20 and 21 of the NPPF which we believe should be included in this policy. It should also be made clear that rural exception homes are not a loophole for those on the Guildford Borough housing list through which to move into the countryside but are made available only to meet local need for people with a village connection that should be monitored and agreed by the Parish Councils concerned.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. Infrastructure

CPRE objects at the failure to supply a satisfactory infrastructure strategy or delivery plan for Guildford in time for this consultation. In the Surrey Infrastructure Study of January 2016 the total infrastructure cost required was assessed to reach £1.162 billion. The total secured funding was given as £75.8 million and the total expected funding was estimated at £568.2 million. This left a funding gap of £518 million which is equivalent to 55% of the total costs budget. CPRE OBJECTION.

CPRE recognises that many major infrastructure decisions affecting Guildford District are outside the control of GBC and that this makes planning ahead for a long period almost impossible, especially at a time when the economic outlook is so uncertain and difficult to predict. Many decisions which can only be outlined as aspirations depend on infrastructure provision being agreed by Highways England (M25 and A3), Historic England, Natural England, Network Rail, the Surrey County Council, and Thames Water. The constraint of providing SANGS in connection with the Thames Basin Heaths has also to be taken into account.

GBC are making ambitious proposals for housing regardless of the lack of adequate infrastructure in support. Without this being provided before development is begun, there will be a real threat of intensified disruption caused by traffic congestion, particularly at peak times, in many communities. CPRE OBJECTION.

Surrey’s motorways already carry 80% more traffic than the average for the South East and our A roads 66% more than the national average. CPRE has been heavily concerned with traffic management issues across the county for many years. We have served on the M25 Orbit Committee and were involved with the consultation on the Hindhead tunnel, the Cobham Motorway Service Area and the Hard Shoulder Running Initiative for the M25 between Junctions 5 and 7. We have also been concerned for a prolonged period with the various AirTrack rail proposals linking Guildford and Woking to Heathrow which are now in abeyance. We expect to become involved in monitoring the North Downs rail proposal linking Reading to Gatwick via Guildford.

We think it unrealistic for Cross Rail 2 to be discussed at this continuing time of likely austerity as a means of freeing up the overburdened rail link to Waterloo from Guildford and Woking. We do have, however, to recognise the planning challenge that the high percentage of commuters travelling to London for work represents, together with a comparable number coming into both Guildford and Woking for daily employment. It is disheartening to see the inadequacy of the Solum proposal for Guildford’s mainline station which did not sufficiently address the issues that concern commuters or residents most. CPRE OBJECTION.

The detrimental impact of traffic congestion on quality of life across Surrey is a topic of importance to everyone. The location of schools and their school runs are of course a daily cause of traffic problems. The proposal for the Hoe Valley school and its associated Leisure and Sporting facilities will be on Green Belt land and will certainly not improve matters on the A320 at Mayford on the road between Guildford and Woking, even if Paragraph 89 of the NPPF allows for greater flexibility to be shown for outdoor sport and recreation within the Green Belt, as long as it does not conflict with its openness. The Woking Traffic Survey acknowledges that this proposed development will have a damaging effect on congestion on the A320 and A322 as well as other local roads. CPRE OBJECTION.

Congestion on A roads leads to the overuse of B roads by speeding traffic that exceeds the relevant limits which are invariably not enforced. The B367 from Ripley to Pyrford is an example of this problem. Speed limits for the Pyrford Conservation Area and elsewhere along this road are not observed except where traffic lights or the narrowness of the road itself, as at Newark lane in Ripley, slows traffic down.

Other roads such as the B380 serve as a link between the A324, the A322 and the A320 and all carry excessive traffic for their size. An example of a C road which is already under severe traffic pressure is Salt Box Road which forms the link between the A320 and the A322 as well as funnelling through traffic between the M3 and the A3. Burdenshot and Goose Rye Road are examples of D roads where safety is a major concern as traffic seeks to find a way through to Worplesdon station which is located within Woking Borough, where a new Park and Ride location is proposed. The question has to be asked in this context as to how this proposal can be considered given the Kemishford bridge access problem and the unsuitability of the bridge near the station at Prey Heath Road with its long history of flooding issues.
CPRE gives these examples of busy roads where house building on the scale envisaged for Guildford and Woking will only make traffic matters much worse. Further analysis is required in both boroughs of the impact of the huge housing projects proposed and the positioning of the school and park and ride facilities they envisage. CPRE OBJECTION.

CPRE questions whether all the development envisaged for Guildford can be considered sustainable and deliverable in the time required. Paying for all this investment will be very hard to achieve through the Community Infrastructure Levy (CIL) which is one of the motivating forces behind GBC’s attempt to accelerate passage of the draft Local Plan and use as much Green Belt land in the process as they can. CPRE again maintains that this approach is misguided as it places too much emphasis on economic priorities at the expense of environmental policies which have served the community well and need to be supported rather than undermined. CPRE OBJECTION.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPP16/17506  **Respondent:** 8607169 / CPRE Surrey Branch & Guildford District (Tim Harrold)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):**

POLICY P1: Surrey Hills Area of Outstanding Natural Beauty (AONB)

The Surrey Hills AONB is countryside of national importance and should therefore be provided with the highest level of protection. The draft policy needs to be strengthened so that it includes a more robust defence of natural beauty which must be conserved and enhanced.

We have decided to express our objection to Policy P1 by suggesting the following alternative wording which we believe would be more readily acceptable:

“POLICY P1: Surrey Hills Area of Outstanding Natural Beauty (AONB) and of Great Landscape Value (AGLV)

4.3.1 The Surrey Hills AONB is countryside of national importance and has equal statutory protection to a National Park. The whole of the AONB is classified as an Area of Great Landscape Value (AGLV) and this extends beyond the AONB boundary with the objective of protecting its distinctive landscape character. AONBs were originally identified via the National Parks and Access to the Countryside Act 1949, with the primary purpose to conserve the natural beauty of the landscape

4.3.2 The Surrey Hills offers some of the most beautiful and accessible countryside in England. The North Downs National Trail runs along their length and is characterised by its important views across distinctive landscape which includes chalk...
grassland, woodland, heaths, commons and agricultural land. An important objective of planning is to conserve and enhance the natural setting of the AONB and to protect its unspoilt character and tranquillity.

4.3.3 Dark skies at night and the lack of air pollution and noise disturbance are for example a feature of the Surrey Hills countryside at the Devil’s Punchbowl near Hindhead since the A3 tunnel with its traffic has gone underground. Protecting a sense of remoteness and natural beauty in the landscape should be reinforced in all parts of the Surrey Hills AONB within Guildford Borough.

4.3.4 Natural England are scheduled to make a review of the AONB boundary with the intention of extending the size of the Surrey Hills. While the AGLV has acted as a buffer to the AONB, it also has its own inherent landscape quality, which contributes to the rural environment in its own right and preserves views from and into the AONB. It should continue to provide long standing protection across the county to important countryside and is to be considered equivalent in quality to the AONB.

POLICY P1: Surrey Hills Area of Outstanding Natural Beauty (AONB) and Area of Great Landscape Value (AGLV)

The Surrey Hills Area of Outstanding Natural Beauty (AONB) will be conserved and enhanced to reinforce its special landscape qualities and protect it from development. All such proposals will be assessed against the provisions of the current Surrey Hills AONB Management Plan. There will be a presumption against major development in the AONB. Proposals within the AGLV will be required to demonstrate that they would not result in harm to the AONB or to the distinctive character of the AGLV itself.

Reasoned Justification

4.3.5 Paragraph 115 of the NPPF makes it clear that AONBs should be afforded the highest level of protection in relation to landscape and scenic beauty. Any and all development proposals within and adjacent to the AONB will be expected to conserve and enhance its special qualities.

4.3.6 Paragraph 116 states that planning permission should be refused for major developments in these designated areas unless exceptional circumstances are demonstrated.

4.3.7 No change will be made to AGLV status pending completion by Natural England of its review of the AONB boundary. The role that the AGLV plays in protecting this nationally important countryside should then be confirmed and its importance in maintaining landscape character and quality recognised both within and outside the AONB boundary.

4.3.8 The policies outlined in the Surrey Hills AONB Management plan apply not only to Guildford but to all relevant districts and boroughs across the county. This document is a key tool in the decision-making process regarding AONB and AGLV countryside. The management Plan is also an important material consideration in determining planning applications within and adjacent to the AONB."
OBJECTION TO DRAFT GUILDFORD LOCAL PLAN : POLICY P2 & D4: GREEN BELT & INSETTING

I wish to object at the way in which so many villages in Guildford Borough are to be inset from the Green Belt presumably when and if the draft Local Plan is approved.

I should like to know why NPPF does not include the definition of “insetting” in its Glossary.

I note, however, that it is included in the draft Guildford Local Plan Glossary which refers to insetting as follows:

“Where a village is excluded from the Green Belt boundary. Currently the villages of Guildford are washed over by the Green Belt and form part of it”.

I feel that this is an insufficient explanation of what is happening. There is no adequate description for example as to the decision process whereby some villages continue to be “washed over” with Green Belt and some not. Nor is it apparent how such a major change can be introduced arbitrarily in this way when NPPF clearly indicates that the characteristics of the Green Belt are its permanence and its openness. We know that NPPF policy states that changes to a Green Belt boundary have to be made at the time of a consultation on a Local Plan and will only be justified in exceptional circumstances. What is not clear is whether so many changes can be justified at one time and whether legitimate “exceptional circumstances” apply on the grounds that the Green Belt is preventing inappropriate development. Surely, this is exactly what it is supposed to be doing. What we are being asked to accept is that because some parts of a village have been built-up in the past then this should be allowed to extend onto additional open areas of the village settlement which Green Belt policy maintains should be kept open.

The Introduction to Policy P2 states in paragraph 4.3.13 on page 48 that :

“The following villages are now inset from the Green Belt : Chilworth, East Horsley, Effingham, Fairlands, Flexford, Jacobs Well, Normandy, Peasmarsh, Ripley, Send, Send Marsh/Burnt Common, Shalford, West Horsley and Wood Street Village”.

In addition paragraph 4.3.15 lists a number of major previously developed sites which are also to be inset from the Green Belt which include the two nationally important AONB sites at Mount Browne and the University of Law, a decision which is subject to objection by Artington PC and CPRE.

Paragraph 4.3.17 also refers to the fact that land at the former Wisley Airfield has been inset as well and will therefore be removed from the Green Belt. CPRE has lodged an overall objection to this development which we consider falls into a totally different category as a strategic site.
It seems apparent that insetting is being used in a number of different areas to change Green Belt boundaries in villages, urban locations, strategic sites and major existing developments such as the Henley Business Park, HM Prison at Send, Pirbright Barracks and the Pirbright Institute.

The way in which this topic has been announced hardly suggests that this is still a matter for consultation as we are told that Regulation 19 now applies. However, we maintain that there has been insufficient transparency on this matter because of how the draft Local Plan has been edited, and that clarity of presentation on this new policy has not been handled adequately.

CPRE has had to spend some time finding the relevant policy references and considers that they are not clearly laid out for easy comprehension as one would normally expect for a policy change of considerable impact and importance. This is a major issue as the failure to clarify the policy in one place in the draft Local Plan will serve to deter investigation and/or understanding by those communities most involved owing to the difficulty of locating all the relevant text concerned.

Surprisingly, one has to turn to paragraph 4.5.50 in Policy D4 on page 106 to obtain further information relating to insetting and the policy which is to be followed in this context in urban and inset village areas. This states that 15 villages are to be affected.

A provisional decision has apparently been made that these villages do not qualify in terms of openness to remain in the Green Belt. This will mean that the Green Belt boundary will have to be amended in no less than 15 communities. However, it is unclear if or when this issue was discussed with Parish Councils and how far Local People in the villages concerned have been involved in the consideration of this decision. Furthermore, so many changes to the Green Belt boundary at one time hardly qualify to be justifiable under “exceptional circumstances” since 15 different individual sites are involved. We also question whether “openness” should be the only consideration to take into account when Green Belt has no less than five other purposes that ought to be met.

It is our concern that the justification for removing villages from being washed over by the Green Belt boils down to a desire to increase development which would formally have been considered “inappropriate” because other unspecified development management policies will apply that are less effective and robust. We are not convinced that many of the villages concerned would welcome this approach. If this proposal were to go ahead, it has been reported that no less than 105 kilometres of new Green Belt boundary would be involved.

We also have serious reservations as to whether these proposed changes stand up to closer examination. We assume that this proposal is based on the “evidence” given in the revised version of volume 4 of the Pegasus Green Belt & Countryside Study upon which we are reluctant to place much weight. We do not have confidence in the “evidence” that this document contains. We also note that an attempt is being made to increase the settlement boundaries of several villages without clarifying clearly what is being done.

So let us have a look at a few examples of what is proposed.

I know Effingham well and am familiar with its Conservation Area and the open land at the King George V playing fields, Browns Field, Effingham Golf Club, Effingham Lodge Farm and Effingham Common. All of these areas are distinguished by their openness as is the land beyond the Little Bookham boundary adjacent to Manor House School. Land to the South of Effingham also includes open countryside. I am not clear whether it is acceptable for Guildford to make changes in the Green Belt at Effingham without first advising Mole Valley Council of what they intend to do just over the borough boundary. It is a community which is already in danger of merging with the villages of Little Bookham and East Horsley through linear development along the A246 and the Lower Road. Surely, we do not wish to weaken the protection afforded by the “washed” over Green Belt provision in the circumstances we have described.

It is easy to point out the openness of the villages of Flexford/Normandy, and the Horsleys as they are today. The problem relates to the inappropriate development that is proposed in the draft Local Plan which is determined to force through what we consider incipient urban sprawl in these communities and transform their current rural environment. This will require an extensive boundary review for the Green Belt to take place so that they can absorb more housing. CPRE has already objected to this elsewhere with respect to these sites. The draft Local Plan is not acceptable because it is seeking to undermine the long established implementation of successful Green Belt policy.
Moreover, we are aware of numerous amendments which have been surreptitiously made to settlement boundaries in order to facilitate further building development for the draft Local Plan. We do not consider that these changes have been made in such a manner that they will be immediately understood by the public because they are not easily “transparent” in the information available.

It seems to us that the draft Local Plan as it stands is unsound because it is based on too high an “Objectively Assessed Need” (OAN) figure for housing, a refusal to deduct constraints, and it consciously seeks to undermine the Green Belt to facilitate the unrealistic achievement of reaching this target. CPRE believes in the value of the Green Belt which it is determined to defend and accordingly adds this objection to the others it has submitted already. We consider that what we have discussed in this letter and the other submissions we have made amounts quite simply to bad planning.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/17507  Respondent: 8607169 / CPRE Surrey Branch & Guildford District (Tim Harrold)

POLICY P2 : Green Belt

CPRE objects to the way in which the draft Local Plan proposes to allow development of the Green Belt which has been so successful in protecting Surrey’s countryside from urban sprawl and suburban encroachment. It is our view that the general public in Guildford regard it as part of their heritage and that this policy should express more clearly its positive support for the role it plays in maintaining openness from development.

The NPPF states clearly in Chapter 9 that it attaches great importance to Green Belts and that “the fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence.”

Paragraph 80 of the NPPF reads as follows:

“Green Belt serves five purposes:
+ to check the unrestricted sprawl of large built-up areas;;
+ to prevent neighbouring towns merging into one another;
+ to assist in safeguarding the countryside from encroachment;
+ to preserve the setting and special character of historic towns;
and to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.”

The draft Guildford Local Plan is in conflict with this list of the five purposes of the Green Belt, and also seeks to challenge the fundamental aim of Green Belt policy which is to prevent urban sprawl by keeping land permanently open. CPRE OBJECTION.

Paragraph 14 makes clear that “the presumption in favour of sustainable development” is to be limited where “specific policies in the framework indicate development should be restricted”. These policies are listed in Footnote 9 to Paragraph 14 and include sites protected under the Birds & Habitats Directives, Sites of Special Scientific Interest, land designated as Green Belt, Areas of Outstanding Natural Beauty, Local Green Space, designated heritage sites and locations at risk of flooding. All of these categories apply to the Guildford District. Constraints should be taken into account in the Housing Need Figure (OAN) and the figure of the Housing Target in the draft Local Plan lowered accordingly.

Paragraph 83 states that “once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan” which is of course the process with which we are now concerned. CPRE maintains that “exceptional circumstances” is a far stronger requirement than the “very special circumstances” referred to in Paragraphs 87 and 88 when considering regular planning applications as to whether they are appropriate or not. The definition of “exceptional” is much more specific and relates to rare occasions which are outside normal policy planning process. “Exceptional circumstances” have to be regarded as not the norm. They are to be characterised as unique and permanent, and the opposite of required general practice which is concerned with planning interpretation and implementation for specific applications. That is one of the reasons that a boundary change can only be considered when a new plan is being prepared and discussed.

It follows that a boundary review of the Green Belt is a unique and rare occurrence which is “exceptional”. The draft Local Plan, however, seeks to make numerous boundary reviews of the Green Belt in many different Guildford borough locations at one time, which clearly infringes the permanence rule which applies to the Green Belt designation. Moreover, the Guildford Borough Local Plan which was adopted in January 2003 agreed to a major change in the Green Belt boundary when the University of Guildford Manor Park campus was permitted. It is clear to us that it was not intended that any further changes to this permanent boundary would be allowed a few years later at a subsequent Local Plan. We maintain that this renders the proposed draft Plan unsound because it follows an incorrect policy approach.

CPRE OBJECTION.

We also do not accept the arbitrary way in which the Pegasus Study has concluded that Green Belt sites which fulfil only 2 of their 4 “purpose assessment tests” are categorised as only of “medium sensitivity” and therefore available for possible development should they meet other policy requirements. This is a fundamentally flawed policy approach which is designed to accelerate erosion of the Green Belt in a totally unacceptable manner for the purposes of housing development and will result in urban sprawl encroaching onto open countryside. CPRE OBJECTION.

CPRE is additionally concerned about how Paragraph 85 of the NPPF should be interpreted with its reference to “defining boundaries” and “safeguarded land between the urban area and the Green Belt”. We support the concept of villages being “washed over” by the Green Belt as part of the approach to be followed in Guildford but it is our impression that the term “safeguarded” is rather the opposite of its normal dictionary definition when it comes to the long term permanent protection of the Green Belt. Nor do we agree with the use of “insitting” in sensitive locations such as at Mount Browne and the University of Law in Artington PC which are within both the Green Belt and the Surrey Hills AONB, or its use in a policy change which will effectively remove 14 villages from any real Green Belt protection. It is important that Local PCs can
reach decisions regarding the openness of their village communities rather than have to accept a centralised judgement on this issue. This extra element in influencing local decision-making is undesirable. CPRE OBJECTION.

Guildford has a Parish Council heritage with a well informed knowledge of the countryside in its local areas. We believe that as the Minister states “local people” will and should be making decisions about the numerous changes proposed in the draft Guildford Plan as regards the settlement boundaries in their communities and not being advised of this “from a distance” which avoids the use of fully informed local input. Changes as well to conservation area boundaries are a sensitive matter that needs careful local attention. Elsewhere in this document, we have referred in addition to the interpretation of draft Policy H3 regarding Rural Exception Homes which we find not tightly defined sufficiently.

It is important that Guildford and its neighbouring communities do not merge into one another through the steady erosion of the Green Belt in the way proposed in the draft Local Plan now under consultation. They should rather be encouraged and seek to retain their separate character, identity and setting. It is essential that these elements of planning are recognised and supported by GBC rather than allowed to be undermined bit by bit. The green gaps between villages should be retained and not succumb to linear “ribbon” development along roads and railways. The green approaches to Guildford’s villages, such as for example Effingham, should be protected so that they remain as far as still possible distinct from their neighbouring communities at Bookham and East Horsley. CPRE objects to the way in which Guildford also is in danger through its draft Local Plan of merging into neighbouring towns such as Godalming. The constant unbalanced emphasis on economic growth will harm the countryside that so many residents and visitors value and cherish. CPRE OBJECTION.

CPRE objects to the continued reliance on the “evidence” in the Pegasus Report for the new draft Local Plan which was shown to be inaccurate in many aspects during an earlier consultation process to which the public expressed their objection in large numbers. We deplore the way in which value judgements made for this discredited report – which has not been changed – are being used for the “traffic light” evaluation of 4 of the 5 Green Belt purposes listed above. We object to this method of approach using these often misinformed evaluations which define the sensitivity value of the Green Belt into the 3 categories of Red, Yellow and Green. This is an unacceptable basis upon which to justify a wide range of Green Belt boundary revisions which cannot be considered adequate for the draft Local Plan with its “exceptional circumstances” requirement. It deliberately ignores the NPPF policy which emphasises the importance of the Metropolitan Green Belt and its permanent nature. The policy also makes clear that its boundaries are designated to prevent urban sprawl by protecting openness. The boundaries of the Green Belt were established for this purpose and are as valid now as they were when first introduced. They were not intended to be altered by an onslaught of changes each time a Local Plan was brought forward for consideration. CPRE therefore objects most strongly to this proposal and believes that the draft Local Plan has to be considered unsound on these grounds. “Exceptional circumstances” by their definition do not encompass a multiplicity of changes along the lines envisaged. CPRE OBJECTION.

IN CONCLUSION

The following information appears on the web site dated June 7th 2016 of Brandon Lewis MP, the Minister of State for Housing and Planning:

“Many people contact me about development on the Green Belt, particularly when it is on land near our villages. I am exceptionally fond of the British countryside. While it is up to local authorities to determine the development of new homes through local plans, I would like to reassure you that the Government is acting to protect the Green Belt from inappropriate development. National planning policy is explicit that key protections such as the Green Belt cannot automatically be overridden by the presumption in favour of sustainable development. Planning Policy also guarantees strong protection for National Parks, Areas of Outstanding Natural Beauty and Sites of Special Scientific Interest. Powers have also been given to councils to resist unwanted garden grabbing and to protect valuable local green spaces from caravan and traveller sites.”

In view of this informal statement of national policy, we should like to see GBC reconsider the draft Local Plan that is now under consultation which undermines and erodes the Green Belt in Guildford Borough extensively. CPRE has major objections to the way in which Green Belt policy is being ignored by GBC using the “Objectively Assessed Need” figure for housing of 693 houses per annum as a justification for their recommendations. We object to this approach since we believe it is linked to evidence that is flawed as indicated by Green Balance and other specialists in this field.

The web site goes on to state that “latest statistics show that the level of Green Belt development is now at its lowest rate since modern records began in 1989.” This is an achievement which underlines the permanence of the Green Belt policy in stark contrast to what is proposed for Guildford. CPRE therefore objects strongly to the draft GBC Local Plan which it finds to be unsound.

POLICY P3 Countryside

CPRE supports the need for a policy that protects countryside outside the Green Belt from development and greater physical and/or visual coalescence between settlements. We also recommend an additional introductory sentence calling
for “the landscape character of the countryside outside the areas covered in Policy P2 to be protected and enhanced, and any new development to be designed and sited to minimise any adverse impact on this character”. This phrasing has been successfully used in another district plan in Surrey to cover the same issue. It is suggested that the policy wording to be used might usefully be discussed with Waverley, if this has not already been done, as they have a far larger area of “land beyond the Green Belt” to consider than Guildford.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P4 Flooding, flood risk and groundwater source production

CPRE is regularly in communication with the National Trust with regard to the Wey Navigation and with CPRE Kent where we have access to expertise on the topic of water supply. We hope that the Brexit decision will not reduce EU input to this sector. CPRE is concerned about the pattern of increased flooding over recent years which seems to be linked with climate change. It appears that storm severity is a factor in increasing water run-off which is partially due to housing growth. It appears to us that many areas of Guildford Borough are being increasingly affected by flooding and that reduced maintenance of rural roads has added to local problems in this context. It is anticipated that should building on the Green Belt countryside proceed as envisaged in the draft Local Plan, flooding problems will increase and the Environment Agency and Thames Water will be put under more intense pressure as they attempt to tackle major infrastructure problems relating to flooding, water supply and sewage issues. This increased activity will start at a moment when manpower cuts at these key organisations in this area are being implemented.

At the same time, the Environment Agency has warned much of Surrey that the balance of water supply and demand is “seriously stressed”. It is important, therefore, that aquifers are not used excessively for water irrigation purposes for the 140 golf courses in the county. Many of the major Guildford housing developments could be affected by water supply problems such as occurred when the National Trust heritage building of Clandon House was burnt down. The scale of housing projects outlined for the years ahead could certainly present a problem in this context.

<tr>
<td>It is a serious mistake that GBC has not taken this constraint into account when arriving at its OAN housing figure.</td>
</tr>
<tr>
<td>CPRE has reservations as to how this policy is working but sees little prospect of any change being introduced as its wording does not really fall within local authority control. The principal difficulty is to do with the system of SANGs that has been developed and the way this is being implemented by GBC and other neighbouring districts. Many SPA sites are still being visited by dog walkers in large numbers even when SANGs are supplied, and if these are located near SPA boundaries, damage is quickly done to any ancient woodland and good agricultural land bordering the protection area such as at Blackwell Farm. We have viewed the income generated in Guildford for SANGs at Chantry Woods in the AONB and the Registered Common at Effingham. Greater transparency is required as to how this money is to be spent and where. A key application is to be heard at Worplesdon on 20th July after a long delay as something of a test case at which a proposed SANG application will be consulted upon in the Planning Committee.</td>

Answer (if comment is on questions 1-7 of the questionnaire): ()

5. Infrastructure

CPRE objects at the failure to supply a satisfactory infrastructure strategy or delivery plan for Guildford in time for this consultation. In the Surrey Infrastructure Study of January 2016 the total infrastructure cost required was assessed to reach £1.162 billion. The total secured funding was given as £75.8 million and the total expected funding was estimated at £568.2 million. This left a funding gap of £518 million which is equivalent to 55% of the total costs budget. CPRE OBJECTION.

CPRE recognises that many major infrastructure decisions affecting Guildford District are outside the control of GBC and that this makes planning ahead for a long period almost impossible, especially at a time when the economic outlook is so uncertain and difficult to predict. Many decisions which can only be outlined as aspirations depend on infrastructure provision being agreed by Highways England (M25 and A3), Historic England, Natural England, Network Rail, the Surrey County Council, and Thames Water. The constraint of providing SANGS in connection with the Thames Basin Heaths has also to be taken into account.

GBC are making ambitious proposals for housing regardless of the lack of adequate infrastructure in support. Without this being provided before development is begun, there will we believe be a real threat of intensified disruption caused by traffic congestion, particularly at peak times, in many communities. CPRE OBJECTION.

Surrey’s motorways already carry 80% more traffic than the average for the South East and our A roads 66% more than the national average. CPRE has been heavily concerned with traffic management issues across the county for many years. We have served on the M25 Orbit Committee and were involved with the consultation on the Hindhead tunnel, the Cobham Motorway Service Area and the Hard Shoulder Running Initiative for the M25 between Junctions 5 and 7. We have also been concerned for a prolonged period with the various AirTrack rail proposals linking Guildford and Woking to Heathrow which are now in abeyance. We expect to become involved in monitoring the North Downs rail proposal linking Reading to Gatwick via Guildford.

We think it unrealistic for Cross Rail 2 to be discussed at this continuing time of likely austerity as a means of freeing up the overburdened rail link to Waterloo from Guildford and Woking. We do have, however, to recognise the planning challenge that the high percentage of commuters travelling to London for work represents, together with a comparable number coming into both Guildford and Woking for daily employment. It is disheartening to see the inadequacy of the Solum proposal for Guildford’s mainline station which did not sufficiently address the issues that concern commuters or residents most. CPRE OBJECTION.

The detrimental impact of traffic congestion on quality of life across Surrey is a topic of importance to everyone. The location of schools and their school runs are of course a daily cause of traffic problems. The proposal for the Hoe Valley school and its associated Leisure and Sporting facilities will be on Green Belt land and will certainly not improve matters on the A320 at Mayford on the road between Guildford and Woking, even if Paragraph 89 of the NPPF allows for greater flexibility to be shown for outdoor sport and recreation within the Green Belt, as long as it does not conflict with its
openness. The Woking Traffic Survey acknowledges that this proposed development will have a damaging effect on congestion on the A320 and A322 as well as other local roads. CPRE OBJECTION.

Congestion on A roads leads to the overuse of B roads by speeding traffic that exceeds the relevant limits which are invariably not enforced. The B367 from Ripley to Pyrford is an example of this problem. Speed limits for the Pyrford Conservation Area and elsewhere along this road are not observed except where traffic lights or the narrowness of the road itself, as at Newark lane in Ripley, slows traffic down.

Other roads such as the B380 serve as a link between the A324, the A322 and the A320 and all carry excessive traffic for their size. An example of a C road which is already under severe traffic pressure is Salt Box Road which forms the link between the A320 and the A322 as well as funnelling through traffic between the M3 and the A3. Burdenshot and Goose Rye Road are examples of D roads where safety is a major concern as traffic seeks to find a way through to Worplesdon station which is located within Woking Borough, where a new Park and Ride location is proposed. The question has to be asked in this context as to how this proposal can be considered given the Kemishford bridge access problem and the unsuitability of the bridge near the station at Prey Heath Road with its long history of flooding issues.

CPRE gives these examples of busy roads where house building on the scale envisaged for Guildford and Woking will only make traffic matters much worse. Further analysis is required in both boroughs of the impact of the huge housing projects proposed and the positioning of the school and park and ride facilities they envisage. CPRE OBJECTION.

CPRE questions whether all the development envisaged for Guildford can be considered sustainable and deliverable in the time required. Paying for all this investment will be very hard to achieve through the Community Infrastructure Levy (CIL) which is one of the motivating forces behind GBC’s attempt to accelerate passage of the draft Local Plan and use as much Green Belt land in the process as they can. CPRE again maintains that this approach is misguided as it places too much emphasis on economic priorities at the expense of environmental policies which have served the community well and need to be supported rather than undermined. CPRE OBJECTION.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy S.2 Borough Wide Strategy

It is difficult for anyone to predict at this stage what the impact of the Brexit decision will be. What we do know is that most of Guildford should be highly protected from development thanks to long established planning policies such as the Green Belt which are defined and understood by the general public as permanent. It appears that this is not the intention in the draft Local Plan. 44% of the nationally important countryside within the Surrey Hills AONB lies within the Green Belt and about 75% of the area of the borough is further protected by the Thames Basin Heath SPA. Other land such as Registered Commons and Ancient Woodland are also not available for development.

CPRE objects to a draft local plan which calls for an increase in the number of residential dwellings by a quarter. This requirement for a housing figure of 13,860 dwellings is based on the West Surrey Strategic Housing Market Assessment (SHMA) prepared by GL Hearn for GBC which is shown to be flawed. Green Balance has prepared for CPRE a review of this document for Guildford, Waverley and Woking Districts which maintains that the annual housing figure upon which the Borough Wide Strategy is based for Guildford is far too high. This renders the whole Local Plan for the District unsound.

GBC has not been able to prepare in time an acceptable plan for the Town Centre and the urban area of Guildford, causing undue emphasis to be switched to building on Green Belt countryside around the town. It is in our view unreasonable to embark on a radical transformation of the borough on the basis of an uncertain housing target which may well prove increasingly unreliable. CPRE OBJECTION.

It is in our view essential to reconsider the proposals made regarding the priority given to retail and office development, which we believe to be overstated, rather than to housing at an appropriate density on brownfield sites in the town. We question the allowance for the provision of other business employment land such as warehousing. It seems to us that retailing is undergoing a transformation illustrated by the loss of Austin Reid and BHS, the incursion of Aldi, M&S foodshops at rail and petrol stations, and on line purchasing and delivery of all kinds.

We maintain that the gap town of Guildford is a “special case” and should be recognised as such from a planning viewpoint because of its widely protected countryside which should be an ongoing constraint on development and preclude major structural change along the lines proposed. We feel obliged to emphasise again the permanence of the Green Belt, the Surrey Hills AONB and the SPA in this district. CPRE OBJECTION.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Fundamental Overall Objection

   • Green Belt and AONB

   It has been made clear by the Government that they remain committed to protection of the rural environment. When asked to comment on the National Planning Policy Framework, the Minister of State for Housing & Planning Brandon Lewis MP made the following declaration in a letter dated 10th June 2016 to Richard Knox-Johnston, Chairman of the London Green Belt Council:

   “The Framework makes it clear that inappropriate development may be allowed only where very special circumstances exist and that Green Belt boundaries should be adjusted only in exceptional circumstances through the Local Plan process and with the support of Local people. We have repeatedly made clear that demand for housing alone will not change Green Belt boundaries.”

   This clear policy statement is not reflected in the draft Guildford Local Plan which calls for housing development not only on a number of sites in the AONB and the AGLV but also encroaches on the Green Belt in a wide range of other locations. CPRE maintains that this is a misguided approach and renders the current proposal unsound. CPRE OBJECTION.

   • Town Centre Capacity

   CPRE believes that the draft Local Plan is also unsound because no complete proposal for the Town Centre or for the development of the urban area has been made available in time for this consultation. This is required so that a coherent assessment can be made of the priority given in terms of the extent and type of housing development proposed, its density and location. Town and countryside have to be considered in parallel. CPRE OBJECTION.

   • Green Balance Review of Objectively Assessed Need (OAN)

   CPRE Surrey has commissioned Green Balance to review and supply an independent commercial opinion on the validity of the OAN housing figure of 693 given in the GLH Hearn West Surrey Strategic Housing Market Assessment (SHMA) for Guildford, Waverley and Woking. Their report makes clear that they judge this document to be flawed and the OAN figure for Guildford to be too high. In view of the Green Balance evidence produced, this puts the credibility of the whole draft Local Plan in question. The over estimation of housing need effectively makes the draft Local Plan unsound. CPRE OBJECTION.
Instead of the OAN recommended in the SHMA of 693, an overall reduction is suggested for this figure of 212 which results in a revised OAN of 481. Other areas for further investigation as to the validity of the 693 figure have been suggested. The summary of reductions recommended for the OAN for all 3 districts covered are shown in Table 1 of the enclosed SHMA Review on page 4.

CPRE does not accept that the constraints relating to development in this draft Local Plan have been properly assessed or taken into account. If they were, the OAN would be radically reduced and we estimate that there would be no need to use Green Belt land. GBC has indicated that the OAN figure which GL Hearn has produced takes account of constraints but gives no explanation of how this has been done. This whole topic needs to be investigated further.

CPRE is also not in agreement with the emphasis given to retail sector expansion and office and warehouse development at Guildford at a time of changing conditions in the market-place and a need for more urban housing. CPRE believes that the focus of attention on building in the countryside has been caused by a too high OAN figure and a refusal to allocate sufficient priority to the supply of affordable housing and flats in the town because building development in this category has been sidelined rather than given the attention it requires. CPRE OBJECTION.

1. Duty to Cooperate

In the past CPRE has been very aware of the requirement for local authorities to demonstrate evidence of having cooperated to plan for issues with cross boundary impacts (NPPF 181). Now NPPF includes a chapter dealing with ‘Planning strategically across local boundaries’ on page 42 and GBC has followed this up with a Topic Paper on ‘Duty to Cooperate’ which explores the implications of this strategy. Sections in the Topic Paper under the headings “Enterprise M3 LEP” and “Meeting Needs” raise a number of issues about the newly established Strategic Economic Plan (SEP) and the choice of Guildford as one of four growth towns which are considered to be key to driving economic expansion across the Enterprise M3 area. As part of preparing the draft Local Plan, GBC has had regard to the SEP by seeking to meet both identified housing and employment needs. The emphasis on a “Sci:Tech Corridor” has also encouraged a focus on research, development and design activities and the provision of valuable knowledge-based employment. This in turn led to the proposed “allocation” of Blackwell Farm, which is owned by the University of Surrey, to be partly used as an extension...
to the Surrey Research Park and for 1,800 houses to be built on Green Belt land in a mixed use development. CPRE has objected to this proposal in its response to Policy A26 on page 17 of this submission. Policy E4 gives further details of the aspirational development concerned.

Little or no account is taken when making the Blackwell Heath proposal of the permanence of the Green Belt, the national importance of the AONB countryside, the problems of traffic congestion, and the lack of adequate infrastructure to provide easy access by either train to a new Guildford West station, or by road to and from the A31 on the Hogs Back. No consideration is given either as regards whether there is really a need to expand the Research Park onto Green Belt land in view of the very low density of buildings on this site, and the generous space allowed for surface parking. Surely, the provision of multi storey and/or underground parking should be given priority so that more space is made available for building this on the Research Park, the other two University campuses and at the Hospital.

- Wider Implications on Meeting Needs

The NPPF now requires that local plans meet objectively assessed needs, and where possible any unmet needs from neighbouring authorities as well where it is reasonable to do so and consistent with achieving sustainable development (NPPF 182).

Although Woking has indicated that it will have a substantial unmet need for housing, GBC has stated that Guildford Borough cannot assist them. Nonetheless CPRE is concerned that this new strategic policy approach suggests that the requirements of the economy are being given an unbalanced cross boundary ascendancy over well established environmental policies that are needed to protect the Green Belt and the Surrey Hills AONB at Guildford. This would seem to be influencing GBC planning in its adoption of the unusually high housing target of 693 from the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) whose recommendations are being questioned as flawed in the enclosed Green Balance review.

We find the draft Local Plan unrealistic not only because of its over ambitious onslaught on Green Belt policy but also because of the £3 billion shortfall in infrastructure backlog across the county which is recorded in the Surrey Infrastructure Study dated January 2016. This backlog has to include infrastructure issues relating to roads, rail, water as a finite resource, waste disposal and sewage treatment, flood issues, air pollution, and a range of other environmental and social considerations.

An example of a cross boundary impact includes the proposed development at Cranleigh and Dunsfold in Waverley which is clearly unsustainable and will cause major congestion problems all along the A281 to Guildford and will affect communities such as Bramley, Chilworth, Shalford, Shamley Green, and Wonersh as well as adding to the severe congestion in Guildford town centre and the junctions of the A3 serving the town. CPRE OBJECTION.

Proposals for development of the North Downs rail line will affect AONB countryside in a number of districts and will need to involve the Surrey Hills AONB Partnership. A range of issues concerning rights of way, level crossings, bridge infrastructure, stations, footpath crossing safety and passenger service will need consultation. The protection and enhancement of nationally important countryside will be a major consideration.
The River Wey Navigation requires that the National Trust is consulted across district boundaries. Agreement is needed not only with Natural England concerning water quality standards but also how the flood plain is protected and not harmed by the proposed housing development in relevant boroughs. The effect of run-off from new building sites and of climate change has to be considered as a priority.

The emphasis on school provision is a repeated feature of the draft local plan in connection with new site proposals within the Green Belt. This has led CPRE to review catchment areas for schools (and the associated road traffic problems) near the borough’s boundaries with Mole Valley, Waverley and Woking. Communities such as Effingham, Leatherhead, Mayford, Ripley and Sheerwater are all affected. The planning for schools on new sites seems to be linked with the flawed concept that this is a means of obtaining Green Belt boundary revision as they represent “exceptional circumstances”. CPRE OBJECTION.

Another current problem relates to the fact that Surrey is already the most overflown county in England and aviation noise disturbance is increasing within the Surrey Hills AONB due to the number of active airports around the county and this affects Guildford. In addition to Gatwick and Heathrow, for which no runway expansion decision appears likely before mid October at the earliest, we refer in particular to proposals for expansion at Biggin Hill, City, and Farnborough. The CAA absolves itself from control of low flying movement below 4,000 feet as this is considered an LPA responsibility. The noise implications of Farnborough’s controlled airspace proposal affects all landing and take-off flight paths in the surrounding area. CAA policies have endorsed the concept of narrower flight paths until recently, and this resulted in severe noise implications for some communities, and harmed the remote character and tranquillity of nationally important countryside. The plans for Farnborough are also of particular concern as they will affect the use of the largest centre for gliding in the country at Lasham. Growth in aviation activity at these airports, whether for passengers or freight, will also lead to yet more road congestion. CPRE OBJECTION.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** pslp172/3882  **Respondent:** 8607169 / CPRE Surrey Branch & Guildford District (Tim Harrold)

**Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

CPRE welcomes the change made to reduce the housing figure to 1700, although this is still far too high, and is in fact a minimum figure and not the end of the story. The text makes clear that the intention is to build at least 300 additional houses, as and when possible, after the plan period.

It appears that little attention has been paid to the criticism expressed over a year ago by many Guildford residents and the Burpham community in particular. CPRE considers that its objections made at that time are still valid and feels obliged to express its additional concern about the subsequent proposals under discussion.

There is no adequate resolution of the complaints about road infrastructure and traffic congestion. Every car driver travelling through Burpham knows that this is frequently one of the worst bottlenecks on the approaches to Guildford with...
its multi roundabout layout. Local residents are even more conscious of the deteriorating traffic situation with the opening of Aldi, and this will not be improved in our opinion by what is now proposed for the Sustainable Movement Corridor. As the Burpham Community Association points out this proposal will not be successful as the roads are too narrow and have pinch points. The prospect of how the London Road will be transformed into having four lanes of traffic where only two exist at present is daunting. It is not enough to recognize that a key consideration may be air pollution from the new building development envisaged. CPRE would like to know how this can be avoided given the additional diesel road traffic consisting not only of slow moving cars but also more HGVs which will service new schools, businesses, shops and a Park & Ride.

CPRE notes that the A3 Tunnel is still an “aspirational” topic in the plan. If this is to be taken seriously, then Gosden Hill Farm cannot be considered for development along the lines proposed as those responsible for planning will have to know first what Highways England intend for the A3, and secondly, where any access points to a new tunnel would need to be located in this vicinity. Planning without this information first would be irresponsible.

All of the land proposed for development in the Policy A25 sector currently falls within the Metropolitan Green Belt at Gosden Hill Farm. CPRE is concerned that any building on the scale envisaged would lead to further congestion problems and additional severe road infrastructure issues.

CPRE is particularly concerned with the need to avoid further linear development along the A3 which amounts to urban sprawl and threatens the eventual merging of Burpham with West Clandon. The attractive open Green Belt countryside on this A3 approach to Guildford, with its clearly defined natural boundary, is a major asset which should be retained and not lost.

CPRE fully endorses the submissions made by the Burpham Community Association and the West Clandon Parish Council in this context.

The two-way junction proposed for Gosden Hill Village does not resolve the problems of Burpham and will add road traffic to the neighbouring communities of both Merrow and West Clandon.

CPRE does not believe that the proposal to add a new railway station at Merrow is a practicable proposition given the presence of existing stops in both Clandon and London Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
CPRE Surrey has worked closely from the outset with Save Hogs Back and Compton and Worplesdon Parish Councils. We fully endorse the additional submission now made by them which concentrates in particular on the questions relating to road infrastructure and traffic congestion. This has been prepared by Green Balance. It is apparent that the Council has not been able to find a convincing solution to these problems. The CPRE objections to the draft local plan in this context have not been in any way overcome. No input of any kind has as yet been supplied from Highways England who are concentrating their main attention exclusively on the M25/A3 junction rather than the A3 connection to Guildford and beyond where it joins the A31 at the Hogs Back. The proposals put forward by the Council for the link road to the A31 through Blackwell Farm are in our view wholly unconvincing.

CPRE is conscious of the already unacceptable degree of congestion on the A31 and A3 at Guildford. The development of any additional traffic on these major roads is likely to promote severe infrastructure difficulties. The continued mention of a possible tunnel solution is only an “aspiration” and therefore outside the current plan consideration, which depends in any case on Highways England assessing what is practicable, and this will be linked to cost viability. CPRE nevertheless were involved in the Hindhead Tunnel decision, which took years to achieve because it was thought too expensive for consideration. The success of this development is generally accepted now and the countryside was saved as a result. No doubt this is still a possible outcome at Blackwell Farm which should not be ruled out entirely.

In the meantime the concern of Compton inhabitants is well justified at their experience of air pollution from slow moving diesel traffic of all kinds. CPRE understands that the levels of Nitrogen Dioxide pollution are consistently well above EU legal limits on the main street in Compton (B3000) and that this problem has been recorded over a period of two years. No wonder then that the community is concerned and has objected so strongly to the proposed Blackwell Farm link road to the A31 which it is anticipated will seriously add to the unacceptable traffic and pollution already being experienced by this community. It is surprising that Guildford itself appears not to have in addition more pollution measurement evidence that can be relied on for evaluation of its crowded road system.

CPRE has also seen the report submitted by Worplesdon Parish Council with regard to Surface Water Flood Risk Assessment which was prepared by JBA Consulting. This was needed to review the impact of the proposed development at Blackwell Farm on the downstream communities of Wood Street Village, Fairlands, and parts of Park Barn which have all previously experienced surface water flooding problems. The JBA conclusion is that past experience suggests that development at Blackwell Farm will represent an additional obstacle in terms of flood water control.

The CPRE Surrey objection to Policy A26 and paragraph 4.1.9 therefore remains. In summary it is based on the following additional points:

- It disregards an expert independent landscape study which demonstrates that part of the of the site merits AONB status following Natural England’s forthcoming boundary review (4.3.8)
- It directs more office space to an extended business park (Policy E4) which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- It ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development (2.14a)
- It will add to air pollution in neighbouring areas such as Compton, which already exceeds safe EU limits for Nitrogen Dioxide.

CPRE Surrey should like to add that the London Green Belt Council has become an active partner with CPRE Guildford in defending the Metropolitan Green Belt against the threat to Blackwell Farm. Their support for CPRE Guildford’s defence of this nationally important countryside reflects the fact that the Green Belt was established on a permanent basis to prevent urban sprawl and protect openness around London and the Home Counties. This reflects too the fact that the Green Belt should act as the lungs of our capital city, where town dwellers can come to breathe fresh air, and that its defence is part of the responsibility of us all including Guildford residents who will benefit from its better protection and enhancement.

The critical importance attached to saving Blackwell Farm and the Hog’s Back is reflected in a short video prepared by CPRE’s National Office that forms an integral element of a national campaign covering different parts of the country.

We stand by the following letter written by Karen Stevens which appeared in the Surrey Advertiser on 30th June 2017:

“The proposed Blackwell Farm development will change the shape and character of the western side of Guildford forever,
transforming it from a beautiful (and historic) rural landscape to a suburban housing estate and low-density business park which will be visible along the Hog’s Back. This site, surrounding one of the former manors of Compton (and later the residence of Lord Dennis) is currently high-grade arable farmland. It is criss-crossed with ancient hedgerows and bounded by ancient woodland to its east, an Area of Outstanding Natural Beauty (AONB) to the south, a Site of Nature Conservation Interest (Broadstreet Common) to the north, and open countryside to the west.” CPRE Surrey wishes to see this recognized by the Local Plan which at the present time is unsound.

Answer (if comment is on questions 1-7 of the questionnaire): ()

CPRE has to point out that these applications were added late to this consultation and are only now being considered for the first time.

Garlick’s Arch and Burnt Common are within the Green Belt and both sites adjoin the A3. If progressed, these proposals would amount to urban sprawl and objectionable linear development.

The 400 houses proposed at Garlick’s Arch involves the loss of Ancient Woodland and would be subject to flooding. The communities at Ripley, Send and West Clandon would all suffer from increased traffic congestion as a result and the rural identity of these villages would be substantially harmed.

CPRE is concerned at the way in which provision is made for Travelling Show people at this site when it is clearly still uncertain as to whether the proposal will advance further. It has been suggested that this development depends on financial support from the developer at the former Wisley Airfield whose planning application was refused unanimously by the GBC Planning Committee and is now the subject of an Appeal in September. CPRE considers it premature to make any proposed development decision at Garlick’s Arch before the Appeal decision is known.

It is also premature to take these policies further before the Highway England plans for the A3 are known. It is only then that it can be reviewed whether “exceptional circumstances” would apply to justify the housing proposed and the provision of the Travelling Show People site on Green Belt land.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Housing Mix (2) : CPRE suggests that the first sentence should be further amended as the use of the word “all” appears inappropriate.

Student accommodation (5) : CPRE would suggest that the word “about” is removed at the start of the second sentence. CPRE argues that all first year students should be accommodated on campus and overall 80% of students should be living there each year rather than the 60% promised figure which has not been met.

Gypsy, Traveller and Travelling Showpeople pitches and plots (6) : CPRE objects to the words “as well as to cater for the potential additional needs of households of unknown planning status” and the sentence “Sites are also allocated within the Local Plan to contribute to meeting the assessed needs of Gypsies, Travellers and Travelling Showpeople who do not meet the Planning Policy for Traveller Sites definition.” We accordingly object to the words in Paragraph 7 “(whether they meet the Planning Policy for Traveller Sites definition or not)”. Reasoned Justification 4.2.3: We suggest that the word “projected” or “estimated” is included in an appropriate location in the first two bullet points.

Density 4.2.8: We object to the removal of this paragraph.

Student accommodations 4.2.18: CPRE believes that the University of Surrey should provide 100% of first year students with accommodation on campus and that the current agreed policy requiring 60% of its overall student accommodation to be on campus should first be met and secondly increased to 80%.

Gypsy, Traveller and Travelling Showpeople 4.2.22 CPRE objects to the wording of the last 2 additional sentences.

Answer (if comment is on questions 1-7 of the questionnaire): ()

CPRE has seen the questionnaire response made by Richard Jarvis on Transport Infrastructure which we endorse with respect to the current plan process. Richard Jarvis is a former senior executive of Atkins with a great deal of experience in this sector. CPRE is confident that his judgement is based on fully up to date information and regular dialogue with those involved at GBC, SCC, and Highways England. He is a member of the Tyting Society Committee and the Guildford Residents Associations Coordination Committee. He is also in regular communication with the Guildford Vision group and the Guildford Society as well as CPRE.
CPRÉ is concerned with planning ahead in the longer term and wishes to make clear that this would involve safeguarding land for projects which are currently listed as aspirational such as a proposed A3 tunnel at Guildford.

CPRÉ was involved in a Committee dealing with Modal Shift and the M25 during the preparation of the former draft South East Plan. More focus should be given to this topic now with regard not only to Guildford’s current road traffic problems, both in town and countryside, but also its rail connections to Gatwick and it is to be hoped eventually Heathrow. The proposal to improve the North Downs line will involve a range of complicated issues regarding the introduction of a surface rail electric supply, level crossings, pedestrian rights of way, bridge maintenance, noise disturbance and air pollution within the Surrey Hills Area of Outstanding Natural Beauty (AONB).

We have been advised of an objection that is to be made by the Beechcroft Drive Residents Association at the omission of any reference in the draft plan to the removal of access for their road to the A3 (Ref SRN1 and SRN6). No alternative access route has yet been proposed. This would probably need to involve the use of a narrow lane running over University of Surrey land to the North which is located near ancient woodland within the Green Belt that is outside the urban area to the West. This topic has been on the agenda for resolution over many years and all stakeholders have recognized that the problem of A3 road access needs addressing, and is essential infrastructure for the Beechcroft Drive community. This is why this topic has always previously been included in the plan. In the CPRÉ view, it should not have been removed. There is in any case general concern about the whole safety aspect regarding Beechcroft Drive access to the A3 which is long overdue to be tackled. It is not just a question of safety for the residents of Beechcroft Drive but also the highway safety of all users of the A3 driving past this junction which is made dangerous by heavy road and HGV traffic with poor visibility speeding past a blind bend. There are more than 100 daily entries and exits into and out of Beechcroft Drive. The risk of a serious accident involving fast moving traffic is therefore repeated approximately 200 times a day. It is apparent that in these circumstances priority must be given to resolving this issue before a fatality occurs. CPRÉ would suggest that an on site visit is called for. This is not an “aspiration” matter.

**Do you consider this section of the document; complies with the Duty to Cooperate?** ( ), **is Sound?** ( ), **is Legally Compliant?** ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

CPRÉ welcomes the inclusion of “Area of Great Landscape Value” in the heading of this Policy.

CPRÉ would like to have seen a reference to the current public objection to development at Newlands Corner. It should be made clear that any proposal for this site from the Surrey County Council, Surrey Wildlife Trust, and the Albury Estate will be subject to review by the GBC Planning Committee and the AONB Board.

No reference is made to the Surrey Hills AONB Board or its Planning Adviser which is regrettable as the Surrey Hills Management Plan for the period 2014-2019 is a material consideration, and approval has to be secured for this plan every 5 years for all relevant districts across Surrey, and not just for Guildford alone.
Part of the AONB countryside value to the community is its tranquility which should be protected against road, rail, and air traffic noise. Nationally important countryside should also benefit from “dark skies at night” which requires strict control over all forms of lighting. For example, any proposal for a roundabout on the Hogs Back would go against policy as it would require street lighting that would be visible over a long distance and undermine nationally important countryside.

CPRE notes the revised housing number for the Blackwell Farm development but still regards the figure as too high and merely sees the reduction as a postponement in timing allowed for completion of the original target figure. Erosion of the Metropolitan Green Belt on such a scale is made even worse by the proposed road link up to the A31 which CPRE considers will be unsightly, harmful to nationally important countryside both by day and by night, and excessively impracticable both in terms of cost and traffic congestion. CPRE endorses the study prepared by Green Balance for Save Hogs Back in this context. We also endorse the submissions made by Artington, Compton and Worplesdon Parish Councils on this topic.

Another remaining point relates to the lack of any reference in P1 to the fact that Mount Browne and the University of Law are both located within the AONB as well as the Green Belt. The policy governing any proposed development for these sites must therefore be considered in an AONB context.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

CPRE expressed its major objections to this Policy on pages 13 to 15 of the submission it made to the draft Local Plan 2016. It appears that no major apparent attention was taken of our views.

CPRE objects again to Policy P2 which demonstrates the frustration that so many of the public feel at the failure of the Council to respond to their submissions or listen to their objections. Such changes as have been made to Policy P2 by the Council amount to only a few words and very minor corrections.

This is in conflict with the repeated references made to the size and implications of the Green Belt on planning, where it is alleged to represent no less than 89% of the total land area of Guildford. This claim does not of course explain that a substantial proportion of the Green Belt in Guildford covers Surrey Hills AONB and AGLV countryside and also other...
notable development constraints such as ancient woodland, heathland, registered commons and MOD land which are protected anyway.

We object that Mount Browne and the University of Law are mentioned as if they were subject to Green Belt policy alone whereas in fact they are within the Surrey Hills AONB. This is presumably a mistake in drafting.

We object also to the addition of Ripley to the list of 12 villages where Limited Infilling will be permitted following the introduction of insetting, a process to which we have already expressed our opposition. Ripley is a village where Green Belt openness is very apparent and is currently working on its Neighbourhood Plan which we feel confident will seek to reinforce Green Belt protection.

It appears that the Green Belt Supplementary Planning Document (SPD) is not as yet available (4.3.20) which we should be reviewing at this juncture as part of the Local Plan consultation process.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

+ CPRE is concerned about the development of countryside beyond the Green Belt. Policy RE4 of the Guildford Borough Local Plan has been progressively disregarded because of the pressure to develop Ash and Ash Vale. We maintain that every effort should be made in particular to protect the village of Ash Green, with its heritage buildings, against the current proposals for its progressive phased development (Application 17/P/00513). We estimate that the existing boundary of the Surrey Hills Area of Outstanding Natural Beauty is less than a mile from the site under consideration and is due for review by Natural England in 2018. Views to and from the AONB are an important material consideration that also needs to be taken into account in this policy.

+ CPRE is concerned about the “relative sustainability” claimed for the road infrastructure in this area (4.3.29). Because of the development of Aldershot and Farnborough in Rushmoor District outside Guildford Borough, and the growth of Ash and Ash Vale, which now is to be extended to include Tongham, we maintain that making this “a strategic location for development” will add unacceptably to existing traffic congestion on the A323 in particular and the A31 Hogs Back as well.

+ CPRE recognizes that the existing policy may need to be amended but does not believe that the policy proposals made are acceptable, and still require further review.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
CPRE objects to the amended policy S2. It is disappointing that the OAN selected is still so high and that no constraints have been applied as required under the NPPF and NPPG. This contrasts with the Woking Core Strategy which has selected a constraint of no less than 50%. It appears that the draft local plan for Guildford has deliberately chosen to ignore the huge opposition of the public to loss of the Green Belt and of other open countryside to housing development. The Council has not given sufficient priority either to the potential for housing and flat development on brownfield sites in the urban part of Guildford, and has not insisted that the University of Surrey honours its commitments to build much more student accommodation on their campuses. CPRE agrees that it is more realistic to follow a phased approach towards development...
as plan fulfillment will have to depend on infrastructure provision. It is unrealistic to talk about the need to meet rapid change as required by the NPPF since planning ahead is virtually impossible when so many of the requirements for development to be successful depend on elements over which the Council has little or no control.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

CPRE remains as concerned as ever about the background to this Guildford Borough consultation which is overshadowed by the EU referendum decision and the recent national election with its as yet unsettled political and economic outcome. It is of course impossible to predict the likely impact of the BREXIT negotiations on a wide range of issues including migration, agriculture, climate change, and other policies regarding economic, environmental and social matters. The fact that the whole of the South East is however subject to water stress remains a constant background to decision-making.

It is very difficult to draw up a local plan when so many decisions depend on independent bodies such as Natural England, Highways England, Thames Water, and the Environment Agency. One also has to add to this list other uncertainties relating to Network Rail, the franchise companies which operate within the Guildford area, and the as yet unresolved future development of both Gatwick and Heathrow airports.

All will be influenced by government budgeting, interest rates, and other factors outside local council control. We also have to take into account the involvement of a new Housing and Planning Minister in this sector. The involvement of Surrey County Council adds a further dimension.

CPRE has already made clear that the ‘Objectively Assessed Need’ (OAN) figure proposed for housing in the draft 2016 version of the GB Local Plan was in our view far too high and was based on inaccurate data that needed further analysis and review involving up to date statistics. The revised proposal now made in the draft 2017 document remains in our view unacceptable. In addition to the work already submitted by Green Balance for CPRE Surrey, CPRE wishes to draw attention to the further analysis by Neil McDonald issued in April 2017 regarding “Waverley Borough Council in response to Inspector’s Questions”, and to the “Review of GL Hearn’s Guildford Addendum to the West Surrey SHMA” in June 2017 which confirm our views.

CPRE feels obliged to repeat our earlier request that a more careful consideration is made of the many widespread and serious constraints on development within the Borough, and the need to observe Green Belt policy which requires that the countryside around the town of Guildford and its villages is protected and enhanced rather than undermined by inappropriate urban extensions, large housing sites and widespread “insetting” in Green Belt villages.

CPRE has also to add to this objection the way in which a number of new proposals relating to Garlick’s Arch, Burnt Common and Gosden Hill have appeared for late consideration, which have not been reviewed previously at the regulation 18 stage. We are particularly concerned about the harm which will be done to the Green Belt by ribbon development along the A3 and the associated impact to traffic in Burpham, Merrow, West Clandon, the Horsleys, Send and Ripley.
CPRE has concentrated its comments and objections in this latest consultation on the issues that most affect the countryside and the Wey Navigation, but feels obliged to point out that we have major reservations about the proposals made for the development of Guildford as a whole. We cannot agree that “rapid change” as required by NPPF, can be envisaged along the lines proposed without a breakdown in road infrastructure. This is especially true with regard to the A3, but also applies to the access routes to Guildford from Cranleigh/Dunsfold (A281/B2128), Farnham (A31), Godalming (A3100), Rushmoor/Aldershot (A323), and Woking (A320). It is apparent that a major issue is the limited funding resources available in this road development context from Highways England, Surrey County Council and Guildford Borough Council itself. There appears to be an over reliance on developers for funding that is influencing decision-making and leading to unsustainable “solutions” at for example Dunsfold, Wisley and elsewhere.

Plans for new railway stations near Guildford and the North Downs line to Gatwick remain largely aspirational at this stage. CPRE supports in principle the new station at Park Barn in proximity to the hospital for obvious reasons. However, the case for a station at Merrow is not so clear cut, especially as Clandon and London Road stations are comparatively nearby.

CPRE recognizes that there is a need for affordable housing in Guildford but believes that this shortfall could be largely overcome if the University of Surrey would give priority to the building on their campuses of the multiple occupancy accommodation for students they have promised. This would free up cheaper priced housing already located within the town and incidentally lead to an increase in tax income for the Council. It is apparent that housing development in Guildford Borough is directed towards supplying larger more expensive dwellings which give a higher return on investment than the provision of lower cost houses. CPRE maintains that priority should be given to the development of brownfield sites for housing which could include land now allocated for surface parking in some urban locations.

The CPRE London Green Belt Council (LGBC) have expressed their objection to the proposed development at Blackwell Farm by the University of Surrey on the grounds of the permanence of the Green Belt and that “exceptional circumstances” do not apply for an additional boundary revision to be made beyond that agreed for the Manor Farm campus in 2003. Their involvement indicates the concern of those who support the Metropolitan Green Belt which was created for the benefit of London inhabitants just as much as for those of Surrey and Guildford. The statement in the Corporate Plan that Guildford is “on London’s doorstep” is hardly reassuring to those in CPRE who do not wish the environment of Guildford put under threat by an attempt to go for economic expansion rather than limit its ambitions to “smart growth” which does not endanger the countryside by the development of rural villages through Green Belt erosion. LGBC has also expressed concern about Green Belt intrusion at Gosden Hill and Three Farms Meadows at the former Wisley airfield site.

SUMMARY LIST OF MAJOR OBJECTIONS

- **Green Belt:**

CPRE is disappointed that the GBC draft local plan continues to insist on further Green Belt erosion. The recent decision made by the Secretary of State (S of S) in this context does not appear to have been taken into account. This decision relates to the dismissal of an appeal at Benfleet, Castle Point in Essex in a letter dated 21st April 2017 (APP/M1520/A/14/2216062). The decision involves a council that does not have a 5 year supply of deliverable housing sites. Whereas the Inspector’s view was that the appeal should be allowed under NPPG, the S of S ruled that it is national policy that personal circumstances and unmet need are unlikely to clearly outweigh harm to the Green Belt, and any other harm, so as to establish “very special circumstances” justifying a boundary review. He therefore disagreed with the Inspector’s view that this is NPPG “guidance” and as a result of his decision, a “policy” has now been established in this context which is directly relevant to Guildford.

- **Town Centre Capacity:**

CPRE has already made clear that it considers this draft Guildford Local Plan unsound because no complete proposal or Master Plan for the Town Centre, or for the development of the urban area, has been made available. This is still required so that a coherent assessment can be made of the priority given in terms of the extent and type of housing development proposed, its density and location. Town and countryside should be considered in parallel in order for a sound plan to be established. CPRE maintains that not enough brownfield sites have been set aside in the town for housing accommodation. Issues relating to bus services within the town and to and from communities in the surrounding countryside remain largely unresolved.
• Reviews of Objectively Assessed Need (OAN):

It is CPRE’s view that the over estimation of housing need makes the draft Local Plan unsound. Green Balance has already submitted a critical review of the GLH Hearn West Surrey Strategic Housing Market Assessment for Guildford, Waverley and Woking. Now Neil McDonald has issued two further studies relating to Waverley (September 2016) and Guildford (April 2017) which question further the soundness of the draft plan submitted. CPRE believes that the focus of attention on building in the Green Belt countryside has been caused by too high an OAN figure and a refusal to allocate sufficient priority to the supply of affordable housing and flats in the town because building development in this category has been sidelined in favour of office, business and retail growth rather than given the attention it deserves. In particular CPRE maintains that more emphasis should have been placed on the use of brownfield sites within the town for higher density housing and the University should supply more accommodation for students on its campuses.

CPRE is particularly concerned about the wide use and large areas of surface car parking in the town which appear to be a waste of valuable space where multi storey or underground parking should be more often considered. The hospital indicated at one stage that the use of multi storey parking was being planned by them but this still remains outstanding. Car parking at the University campuses and the Research Park could be better employed either for multi storey use or under buildings for student or office accommodation. The HQ for the WWF on Brewery Road in Woking is an example of what can be done successfully in the centre of a town and near the river if good architecture is employed. A range of valuable sites of this kind exist and should be investigated in consultation with the Wey Navigation as they are needed in this context. We are disappointed that the proposals for underground parking at Bright’s Hill have been scaled back. This sustainable location is within easy walking distance of the town centre and car parking could we believe be provided underground because of the chalk geology.

Other heritage towns in this country and particularly in the EU recognize the importance of providing underground parking for new development. Priority at Guildford is given to the under utilised Onslow Park & Ride at the University next to land where a commitment to restrict traffic was made which has not been kept. Surely, it is necessary to look again at how we are using precious land space in the town for surface parking so that erosion of the Green Belt is cut back in our countryside.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Localism Act 2011, before Woking made their decision to go ahead with a policy allowing the 50% constraint in question to be introduced.

CPRE expressed its reservations from the outset regarding the way in which the West Surrey SHMA was constituted at a meeting in 2009, when it was pointed out that Guildford, Waverley and Woking did not have much in common as a Market Area. The “Duty to Cooperate” requirement has been made even more difficult by the housing growth now being implemented in other areas outside Guildford such as Rushmoor, Waverley and Woking which appear to be disregarding Green Belt policy. We give below some examples of the problems to be faced in this context.

• DUNSFOLD: We have requested CPRE Waverley to summarise their current assessment of the potential impact of building proposals in Cranleigh and Dunsfold on Guildford. The Waverley Borough Local Plan draft locates 2,600 new houses at Dunsfold Park (the former Dunsfold Aerodrome) which depends on the A281, the only A road in this area. The road is already heavily congested on a daily basis, particularly in the morning and evening peak periods with traffic impacts on Shalford village to the South of Guildford town but within Guildford Borough. In the morning peak period, the traffic congestion is typified by long queues forming in Bramley (within Waverley Borough) at the roundabout in the centre of the village. The delay to pass this point can typically take up to 20 minutes. From here, there is a slow moving column of traffic up to Shalford, a mile to the north, where a further roundabout collects traffic from Cranleigh, Wonersh and Chilworth. Delays here are typically ten minutes for traffic entering from the Cranleigh direction and similar for traffic already on the A281. From Shalford Common, traffic is nose to tail daily up into the Guildford gyratory via Millbrook. The proposal for new housing at Dunsfold Park will add a significant volume of extra traffic to this scenario since the development is likely to be mainly made up of daily commuters seeking to enter Guildford, either as a through route to the A3 and M25 national trunk route or the mainline railway station for the onward journey to London. The scale of the development at 2,600 houses would be likely to generate some 5,200 to 6,500 additional vehicles (assuming 2 to 2.5 cars per household) of which a significant proportion would seek to access Guildford via the A281, and the gyratory system in the centre of the town. Added to this are further proposals within the Waverley Local Plan draft to locate an additional 1,520 houses in Cranleigh, adjacent to the Dunsfold aerodrome, which will again generate significant additional traffic volumes, of which a large proportion would seek to access Guildford via the A281 or the B2128. Waverley Borough are seeking to locate some 40% of their future development in the east of the borough, an area with no close railway access and therefore highly dependent on car transport. With the A281 being the only A class route out of this part of Waverley, it is inevitable that there will be a significant impact on Guildford in terms of congestion and air quality. And in addition to car use, there is also a large quantity of daily HGV traffic from firms such as Axtell and Cranleigh Freight Services to be considered.

• MAYFORD: CPRE is also concerned about the impact of the new Hoe Valley school and athletics facilities and additional housing development at Mayford being built within the Green Belt in the Heathlands District of Woking which will add to the road traffic problems on the A320 in Guildford at Slyfield and the associated Link Road which is designed to facilitate access to the A3. Woking Council seem determined to disregard the policy regarding the Green Belt which we do not repeat here as these have been outlined in our last submission.

• RUSHMOOR: CPRE is further concerned about additional development in Rushmoor in Hampshire at Aldershot and Farnborough which again is causing road infrastructure problems across the boundary in Guildford. BORDON: CPRE Guildford would have expected more attention to have been given to the possibility of assessing with East Hampshire Council the potential of the eco-town Bordon for business and housing development now that the army has left. This is land which is not in the South Downs National Park nor in an Area of Outstanding Natural Beauty (AONB) or within the Metropolitan Green Belt. We would argue in favour of the rail link from Bordon to Bentley being reinstated with a view to reducing commuter road traffic across the boundary to Wrecklesham and Farnham in Waverley and to Guildford via the Hogs Back. A rail connection could make Bordon significantly more attractive for business development and employment potential. This could relieve pressure for expansion of the Research Park at Guildford which should in our view be reserved for businesses associated with research that are linked to the University. Commuting by train to and from Guildford would be further facilitated if a new station is opened at Park Barn.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Submission Local Plan: Strategy and Sites - June 2016

1. Introduction

1.1 Guildford Borough Council are currently consulting Submission Local Plan (Regulation 19) on the Proposed

1.2 Within the document provides list of allocated sites which were considered based on their individual merits

1.3 White and Sons have been employed by The Tyman Pension Scheme to provide general comments on the spatial strategy of the Submission Local Plan in view of further promoting residential development at land at two sites comprising of land north of Gravetts Lane, Guildford and two separate parcels of land at Crickets Farm, Normandy. This letter should be read in conjunction with the attached plan

2. The Guildford Borough Proposed Submission Local Plan: Strategy and sites

2.1 As suggested within the document, it states that the policies and site allocations contained within the Proposed Submission Local Plan are informed by an up-to-date, extensive and robust evidence base. The borough’s specific housing and employment needs have been determined through our published Joint Strategic Housing Market Assessment and Employment Land Needs Assessment.

2.2 The Council’s Land Availability Assessment determines the availability, suitability and viability of sites for development. The evidence base will also continue to be updated throughout the plan period to ensure that the plan remains flexible and adaptable to change.

2.3 We would like to take this opportunity to suggest that the following sites are given consideration during this process. In the interests of comprehensiveness, there is scope to consider other sites at this stage of the Local Plan process. It is understood that the Council at this pre-submission stage propose a housing delivery target of 13,860 new homes to be provided during the plan period which roughly equates to 693 homes every year, when taking the average. Such a figure cannot be achieved on pure reliance on brownfield sites and so it is inevitable that other sites will need to be considered. It also equally bores down to a site’s availability for development.

2.4 The Tyman Pension Scheme have previously put forward sites in Wyke Lane, Normandy and at Gravetts Lane, Guildford for residential development and these remain available for residential development and supporting open space (including SANGs). Justification for these sites is given below.

3. Potential Development Site Allocations

Potential Residential Allocation at Land at Crickets Hill Farm, Normandy
3.1 The proposed submission Local Plan identifies that Normandy and Flexford Village as being capable to accommodating 1,100 new homes under new site allocations A46 and A47.

3.2 It is suggested that the two parcels of land at Crickets Hill Farm, Normandy would help to assist future housing allocations in the area as shown on the enclosed plan. My clients are offering both plo The largest plot measuring 8.7 ha falls to the south of Guildford Road and the other, totalling 2.5 ha, falls to the west of Wyke Lane and shares its northern boundary with housing belonging to Wyke Avenue.

3.3 Both locations are located in the Green Belt and are in this sense in the same designation as the existing local settlements, including the allocated plots covered by policies A46 and A47, located to the west Both allocations require the release of Green Belt in order to meet housing need in the borough and to meet the plans for expansion of Normandy and Flexford.

3.4 It would be appropriate to attach weight to both locations on the basis that the land to the south of Wyke Avenue abuts a sizable estate with the land being bordered by access roads, therefore offering the opportunity to amalgamate development to the same extent to that already observed to the north. It is suggested that the plot would lend well to a repeat density and configuration seen to the north in view of ensuring efficient and effective use of the plot, should it be allocated.

3.5 The larger plot of land carries with it a Site of Nature and Conservation Importance (SNCI) designation together with part of the site being donated to a disused Sewage Station, with the definitions of the previously developed land therefore falling in its favour. The area is largely characterised by sporadic residential development, and whilst this was perhaps how the area has evolved overtime, it sets the precedent to character. Any new development proposed on the larger parcel of land would be sensitive to the site’s biodiversity requirements with the consensus in policy terms being one of enhancement. There would also be opportunities to provide substantial landscaping to promote lower density development to ensure that any built form is screened from the public highway.

3.6 The weighting for a SNCI against the other biodiversity related designations identified by Policy 14 ranks SNCIs below SACs, SPAs and SSSI. It is fully expected that a proposal for development will demonstrate how benefits could be brought about to the land. My client would agree to enhancements of the SNCI should the plot to the south be considered in isolation for development.

3.7 It is suggested that sites which are available should come forward as suitable alternatives to those considered to meet a substantial housing figure in this area. The reliance which is almost solely placed on site A46 is significant. Should it transpire that any of the parcels of land which fall within this designated area are not available for redevelopment, then it would be difficult to implement all the area’s housing requirement. The suggestion that the other sites should be considered is one that carries merit and it is suggested that the allocation of sites being put forward in this instance represent a suitable alternative.

Potential Residential Allocation at Land to the North of Gravetts Lane

3.8 Turning attention to Gravetts Lane, the subject plot site is situated behind existing housing that fronts the lane and measures 4 ha. In general the site is located between Stoughton, to the east and Fairlands to the west However, its distance from both villages would ensure that there is no cohesion between the two with the site being more accessible to Stoughton.

3.9 It is suggested that the land at Gravetts Lane that was also previously proposed for development and shown on the enclosed plan would be clearly linked to these potential residential allocations, and the potential Built Up-Area Boundary (BUAB) of Guildford. It is suggested that there are limited physical/environmental designations affecting the site, although the western boundary of the proposed allocation is considered to be in a Flood Risk Zone 3. There is also an existing vehicular access onto the site.

3.10 As with the sites above, this potential allocation is located within the Green Belt and is also within 400m to 5km of the Thames Basin Heath SPA, where the impact of development can be avoided. In terms of Green Belt policy, the site is partly enclosed to the south and east by residential development along Gravetts Lane, to the north by substantial tree coverage and partially to the west by buildings at Gravetts Lane Farm. If the potential allocations Land north of Keens Lane, Guildford (Policy A22) were to proceed, then this potential allocation would border the BUAB of Guildford to the south and east, such that it would be a modest extension to the town. The A22 site is earmarked as achieving 140 new home
Comparatively, the subject site would offer scope to provide just as many units, based on a mixed provision being brought to the fore. We would suggest that if the aforementioned site allocation were to proceed, then the allocation of this land for residential development should be considered satisfactory, given that the site has permanent physical and defensible boundaries.

3.11 In response to early criticisms that Gravetts Lane might be inappropriate on highway grounds, the site area shows there to be adequate provision to provide access on the outside of bend in the road. This therefore means that it would be highly probable that a safe arrangement could be applied in addition to offering traffic calming measures to reassert any misconception This aspect should not deter the prospect of the site being considered.

3.12 In addition, we would suggest that this land is not readily visible from public highways and is enclosed by existing development substantially to the south and east and partly by buildings to the west Consequently, the land is not necessary to keep the Green Belt permanently open and the release of Green Belt land for residential development should be considered suitable in this location, particularly if considered as part of a larger housing scheme that would include allocation of site A22 of the Submission Local Plan Strategy and Sites.

I trust that the above and enclosed is satisfactory, but if you have any comments or queries, then please do not hesitate to contact me.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents: [GBC Representation letter July 2016 - Tyman Pension Scheme.compressed.pdf](#) (643 KB)
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9]. The proposed Blackwell Farm development will change the shape and character of the western side of Guildford forever, transforming it from a beautiful (and historic) rural landscape to a suburban housing estate and low-density business park, which will be visible along the Hog’s Back.

This site, surrounding one of the former manors of Compton (and later the residence of Lord Dennis), is currently high-grade arable farmland. It is criss-crossed with ancient hedgerows and bounded by ancient woodland to its east, an Area of Outstanding Natural Beauty (AONB) to the south, a Site of Nature Conservation Interest (Broadstreet Common) to the north and open countryside to the west.

Blackwell Farm was supposed to be opened up by the University of Surrey to provide greater public access to the countryside at the 2003 Local Plan when the “permanent” green belt boundary shifted and part of the former Royal Park was swallowed up to allow expansion of the University.

Instead of doing this, the University now has plans to spread Guildford 4km to the west and to build a 3,250-home estate along the Hog’s Back. As part of this, Guildford Borough Council has put forward the site for 1,800 homes in its latest draft Local Plan and has taken the unprecedented step of planning to move the permanent green belt boundary twice in less than 15 years. These plans will be to the detriment of Guildford and should be resisted for the following reasons:

● More roads, but even more traffic:
  ○ The site is dependent on a new access road from the A31 (Hog’s Back) to the Hospital roundabout at Egerton Road, with a new signalised junction on the A31 at Down Place (just east of the A3 slip road).
  ○ An independent traffic study commissioned by Compton Parish Council has shown that this new junction would result in more queuing on the Hog’s Back and on the A3 during the morning peak-hour, and as a result the villages of Puttenham, Compton and Artington would see a surge in traffic numbers as Guildford-bound drivers seek out the fastest route and divert along the B3000 and B3100.
  ○ There would also be more congestion at the Egerton Road (Tesco) roundabout, which would impede access to the Hospital’s A&E unit and cause increased rat running through Onslow Village and Park Barn - This problem was identified by the Planning Inspector who presided over the previous Local Plan and who put a cap on traffic increases in the area of 5%. That cap has been exceeded (despite the University’s claim that construction traffic and buses don’t count). Guildford’s underlying traffic modelling is flawed and simply tweaking the Hospital roundabout and/or providing a new rail halt at Park Barn will not mitigate against the traffic generated by 1,800 homes, two schools, and an extended business park.
  ○ The Local Plan directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas.

● More pollution - Levels of nitrogen oxides that are consistently well above the EU legal limit have been recorded at the A3 end of the B3000 over the past two years (GBC Air Quality Annual Status Report, September 2016). Any traffic intervention that increases traffic levels through Compton (such as the proposed access road to Blackwell Farm), will make this situation worse and potentially have an impact on the health of residents.

● Loss of nationally important countryside - The new access road would cut through the Surrey Hills Area of Outstanding Natural Beauty (AONB), uprooting centuries old trees and scarring the north face of the Hog’s Back. It would also pass through an Area of Great Landscape Value and through, or next to, a belt of ancient woodland. The housing development itself and the proposed extension to the Research Park, would harm the setting to the Surrey Hills AONB (the views into and out of the Hog’s Back ridge). The Local Plan disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
• More flooding - The Hog’s Back acts as a soak-away for surface rainwater. Once its slopes are concreted over, this water will flow north, adding to existing flooding in Wood Street Village, Fairlands and Whitmore Common (an EU protected habitat).

More reasons to protect Blackwell Farm are set out in a document/brochure produced by Save Hogs Back in 2014 (see Annex B).

The provision of low-density executive homes across green fields is an inefficient and highly destructive way to meet housing needs. With more than 10% of Guildford’s population comprising students, I believe that the University should do much more to provide dedicated, purpose-built and safe accommodation for those wanting to study and enjoy living in Guildford. This would free up much needed space for key workers and families in existing homes closer to the town centre, helping to regenerate these areas and avoiding problems with student homes identified by GBC.

Whilst the University of Surrey seeks to improve its standing in the rankings of universities in the UK (it currently stands around 270 worldwide) so it would do well to emulate those at the top of the world league tables, which provide dedicated residences to over 95% of their students. The University of Surrey provides around half of this.

**Traffic**

My overall thoughts on traffic were spelt out in a presentation to Guildford Borough Councillors in the council chamber at Millmead in 2014. My comments made at the time are summarised below:

“Traffic disruption and road congestion is a problem in Guildford and the A3 and the A31 get most of the blame. However congestion on these roads is mostly the symptom of infrastructure problems elsewhere, for example:

- the lack of alternative routes west to east across Surrey, means that most journeys pass through the centre of Guildford,
- cars travelling west to east through Guildford can take one of only 3 routes across the A3 and one of only two routes across the river, and
- the roads and junctions through Guildford itself don’t have sufficient capacity at peak times.

These problems cause congestion and tailbacks onto the A3 and A31. This is a particular issue at the Tesco roundabout - the very point where the proposed entrance for the new Blackwell Farm development will emerge and where ambulance access to A&E is vital.

Extra traffic from this massive development built to the west of Guildford (and on the wrong side of the A3) would make the A3 and the A31 grind to a halt. The whole of Guildford would come to a standstill along with any aspirations for economic growth.

The planning inspector recognised this problem more than 10 years ago when Manor Farm was removed from Green Belt. He stipulated that traffic growth generated on University land should be limited to 5%. Today, there is a general perception that traffic is worse than ever and the proposed new development will add many extra cars - adding to the traffic misery throughout the day.

Unfortunately the proposed road through Blackwell Farm from the A31, won’t help either. It will just allow cars from the west to jump the queue to join the Tesco roundabout and then continue on the same route into Guildford (but now joined by hundreds of more cars).

And if this link is intended to simply make life easier for users of the Research Park then, wouldn’t measures to reduce the reliance on cars be better (as the planning inspector’s 5% threshold was trying to achieve)?
We need links to connect between the west and the east of Guildford, but any major scheme (such as a tunneled southern bypass to the A3) would take many years to materialise. Properties built at a reasonable density above the University’s vast surface car parks would provide extra homes in places which are genuinely walkable. Walkable to the existing train station, to the University, to the Research Park and the town. This would allow the University to provide all the benefits it wants to provide to Guildford - without the loss of beautiful countryside and without as much disruption on the roads.

Building hundreds of new homes on Blackwell Farm simply isn’t the answer.”

None of these fundamental issues has been addressed in different drafts of the Local Plan. Despite more evidence being presented by Save Hog’s Back and Compton Parish Council (including the RGP reports), the Local Plan ignores independent expert traffic studies, which show the adverse impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]. The scheme also adds to air pollution in neighbouring areas, which already exceeds safe EU limits for nitrogen oxides [Policy A26].

Answer (if comment is on questions 1-7 of the questionnaire): ()

Garlick’s Arch is at risk of flooding and is classified by the Environment Agency as being at higher risk than the Council's assessment. I object to development in areas which are at risk of flooding (Policy P4). The original plan had included land at Burnt Common where there was a brownfield site this new site is absolutely wrong as it has ancient woodland and GBC's Green Belt & Countryside Report does not even cover this site (A43)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the lack of planned road infrastructure. (PolicyI1). I live on the Portsmouth Road which runs through Ripley and Send adjacent to Garlick's Arch. We are already coping with large amounts of traffic which is often diverted onto our road when an accident closes the A3. The A3 from the junction north of the village to the M25 is almost at a standstill during the rush hour both going north in the morning and coming south in the evening. All of the above developments are sited along the A3 and with the number of houses proposed probably in the region of an extra 5000 cars will be wishing to use our local roads. Congestion will be even worse and at present Highways England has no plans to start considering improving the A3 before 2020. There should therefore be no development until this has been considered (Policy I2).

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
I object to removing Ripley, Send and Clandon from the Green Belt (Policy P2) together with the proposed development sites at Wisley Airfield and Garlick's Arch. I understand there have to be exceptional circumstances for these areas to be removed as required by National Planning Policy. We are providing large areas of countryside where people can walk and ride cycles and horses and generally enjoy the open air. Why cannot existing brownfield sites such as the one at Burnt Common which was removed from the original plan, be used instead of Green Belt?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Local plan (Policy S1) on the grounds that the development proposed is not sustainable. How on earth can the total development of new houses some 13,860 be accommodated in the borough with no improvements to the infrastructure. We are already at bursting point with access to schools and doctors, inadequate bus services, sewage removal etc. and the road network is fast becoming gridlocked at rush hour.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
These developments will inevitably lead to a merging of all the areas which are at present separate entities, Wisley Airfield, Ripley including Garlick's Arch to Send and on to Clandon and Burpham. We wish to remain villages - we all live here because they are villages. The development is far too concentrated in this part of the borough and GBC has made it a feature of their plan with larger numbers than other Borough Councils in Surrey. I therefore object to the Borough Wide Strategy (Policy S2) and the SHMA figure of 693 houses per year as being too high (Appendix D).

Comment ID: pslp173/635  Respondent: 8608225 / Valerie Jenner  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Send Marsh/ Burnt Common

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object very strongly to the Guildford Borough Proposed Submission Local Plan (June 2017) and in particular to the changes affecting Ripley and Send, which make the Plan even worse than the 2016 proposals.

These are my main reasons:

I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick's Arch (A43) being extended and the resulting urban sprawl, half a mile away from where I live. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Travelling Showpeople sites in A43 Garlick's Arch as the development only includes 400 houses and therefore no provision is necessary as this is not compliant with the minimum of 500 as stated in section 4.2.24 of the plan.

I object to the hiding of development by "deferment" for sites A24, A25, A26 and A43. I object to the potential and ill-defined increase in housing allocation at A43 Garlick's Arch. The potential of an increase at site A43 will be extremely harmful to the rural natures of the surrounding villages of Ripley, Send and Clandon and will cause an urban site as buildings abut local boundaries.

I object to the imbalance of the Plan across the borough. With the removal of site A46 from the Plan and reductions of housing planned in this version of the Plan in other parts of the borough, 40.6% of the 11,350 homes proposed in this Plan are sited within 3 miles of where I live, most of them in the Green Belt. We are already suffering from traffic chaos when accidents or roadworks are causing problems on the A3 or M25. This is grossly unfair on an already overcrowded part of the borough.

The inclusion of site A58 Burnt Common now proposed once again, removes the need for A43 Garlick's Arch, surely only one site is needed, especially as they are so close to one another.

I object to the removal of brownfield sites from the Plan (Sites A4, A34 and A44). The Council claims to have adopted a "brownfield first approach"(page 5 of Plan) but this is clearly not the case and is contrary to national guidelines.
I object to the proposal for a Waste Management Facility in the Green Belt site (Burnt Common A58) which is mentioned but does not allow for full and proper consultation. (More traffic on our road).

I object to the increase in housing proposed in Tannery Lane (site A42) which has been increased by a third since the 2016 version of the Plan. Local rural roads are unable to handle this type of increase in traffic.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to removing Send Business Park from the Green Belt (4.3.15), this is only a small collection of local businesses and there are no exceptional circumstances as required by the NPPF.

I object to the lack of proper infrastructure planning for sites A43 and A42. The lack of any plan for either the physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlick's Arch and the A42 Clockbarn Nursery in Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan and should not go ahead.

I wish these objections to be fully taken into consideration and that the Plan is amended accordingly.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy A21 - WBDRA supports this unreservedly having campaigned for more than 10 years to have this land returned to Allotment Use.

Policy 19 - WBDRA has concerns about this policy as the proposed development could well impact the access of tenants and vehicles to the adjoining allotment site. WBDRA and its members were in favour of housing on this site until we received concerns about restricting or removing allotment tenants' main access gate. At present we cannot support development on this site until both pedestrian & vehicular access and associated car parking guarantees have been resolved.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

WBDRA would like to comment further on this policy.

Yes we are in favour of housing on this site especially as the landowners indicated that the said homes would be smaller scale and possibly affordable homes as opposed to 38 x 3-4 bed homes which the area does not need.

What WBDRA OBJECTS to is the threatened loss of the Allotment Main Access gate which is situated in the Car Park area. Yes there are rights & easements of passage which we hope will be observed and retained BUT it is apparent from discussions between Guildford Borough Council & Guildford Allotment Society that this may not be so. WBRDA
INSISTS that the main Allotment Site gate (often referred to as the "lower gate" will stay where it is with passage remaining for both vehicles and pedestrians

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A19

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to this policy not because of the intended housing development but because of the loss of the Aldershot Road Allotment Site main access gate and our 6 Car Parking Spaces.

Despite what it says in Policy A19, I understand that Guildford Borough Council in tandem with Guildford Allotments Society have plans to remove the gate and relocate the Car Parking spaces as part of the Housing Development Delivery

I and many other Allotment tenants hope this will not be the case but we have seen Council correspondence which suggests it has been or is being considered.

Accordingly I cannot support any Housing development which will deprive a great many Allotment tenants, myself included, of their primary access to the Allotment Site.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

WBDRA COMMENTS that as with other development proposals in the Draft Local Plan, there is an urgent need to implement full infrastructure improvements before any development takes place. Once such improvements have been effected then WBDRA would SUPPORT this development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1015  Respondent: 8608865 / WBDRA. (David Bird)  Agent:

Answer (if comment is on questions 1-7 of the questionnaire): ()

COMMENT

WBDRA in general supports the concept of homes which are reasonably priced and affordable by those who need such housing most in the Borough who are Key Workers and young families.

What WBDRA would like to see is a bold building approach taken by our council in partnership with a developer to build a great number of starter homes - Guildford has the brownfield sites to do this.

The last thing we need in the Borough are more 3/4 bed executive home developments favoured and generally built by developers.
Coupled with this our Council should take a much tougher stance with Surrey University and insist that the University gets on with building the homes for students for which it has planning approval. This would mean all students live on campus which would free up hundreds of family houses for sale or rent to Guildford families.

This policy sounds a reasonable statement of intentions but like most residents groups in Guildford, WBDRA is concerned about the specifics and delivery of much need infrastructure improvements.

Most important of all are Roads and Drainage - what the Council Tax paying residents want is extensive improvements now not to wait until we've added another few hundred house to our already congested roads and overloaded (often overflowing sewage pipes/systems).

There have already been a number of major housing developments in Guildford Borough in the last few years yet no visible improvement to easing the traffic flow is in existence yet. Roads connecting new housing developments to existing roads DO NOT ease traffic flow.

Many parts of the borough experience routine flooding - a combination of (1) inadequate/overloaded drainage systems and (2) increased surface water run-off due to concreting over vast amounts of natural soakaway through the earth.

Several parts of the Borough routinely suffer overflowing sewage both in the streets and in homes (Fairlands Estate is one such example) as the existing pipework and sewage plant cannot cope. This type of Public Health issue must be addressed before even thinking of adding more house to the piped services.

To sum up, Infrastructure improvements first please then the housing development can start.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
WBDRA OBJECTS to this policy as it fails to make clear the pressing need to deliver Infrastructure improvements PRIOR to any further development taking place.

The policy needs redrafting to reflect the urgent requirement to enhance & improve the Borough's Infrastructure as a matter of urgency.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1046  Respondent: 8608865 / WBDRA. (David Bird)  Agent:

WBDRA COMMENTS that all measures to retain Guildford's Green Belt and to limit infilling must be implemented.

Policy P2 must be expanded to include Para 80 of the NPPF.

We OBJECT to any policy or planning initiative allowing the coalescence of the urban areas of Guildford & its surrounding villages with surrounding Boroughs.

Guildford is a medium size market town restricted for major development by its roads, flood plain, AONBs and lack of adequate infrastructure Piped services, sewage etc). The London/Thames Valley Mega City concept is not one WBDRA can support.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

WBDRA is generally supportive of this policy BUT there should be some reference of Para 119 of the NPPF (maybe a footnote?) which says "The presumption in favour of sustainable development (para 14) does not apply where development requiring appropriate assessment under the Birds of Habitats Directives is being considered, planned or determined".

This addition would clarify the issue beyond reasonable doubt!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
WBDRA along with many other Residents Associations and Local Interest Groups in Guildford OBJECTS to the proposed SHMA figures.

We were present at the first public meeting where consultants G L Hearn announced their SHMA findings to a stunned and shocked audience. Their methodology and resultant housing numbers seemed to have been based on the flimsiest of evidence, totally ignoring the high population of transient students in the borough and failing to address known statistical predictions about population movements and the local Housing market.

The slightly modified SHMA figure now offered by GBC has been the subject of much debate and challenge since its publication and GBC have steadfastly refused to publish the bases of calculation for their figure of 690+ homes to be built per annum.

No constraints appear to have been applied such as Flood Plain, Green Belt infrastructure limitations etc etc)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
SITES - POLICIES A1 TO A57

Each of these objections relates to each of the sites in the Green Belt.

1. We object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

1. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

1. Having determined housing need the Council was entitled to consider constraints before determining the housing number. We believe that as well as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as well as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First we believe constraints should have been applied. Secondly we believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

1. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY A25 - Gosden Hill Farm

We object to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds we believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement (see also below).

We object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon-a road which is already under traffic stress (see also below).

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A43 AND A43a – Garlick’s Arch

We object to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

We have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.
It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham school was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, a primary school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY D3 - Historic environment

We object to this policy as it is very weak and we do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which we fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4
POLICY D4 - Development in urban areas and inset villages

We object to this policy:

1. The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

1. The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

POLICY E1 - Meeting employment needs

We object to this policy.

1. We object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development.

1. The site is in any event subject to frequent flooding and unsuitable for development.

1. We object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E2 - Location for new employment floorspace

We object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. We also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E6 - The leisure and visitor experience

We object to this policy. The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/2392  Respondent: 8609217 / West Clandon Parish Council (John Stone)  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7
POLICY E7 Guildford Town Centre We object to this policy.

1. The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.
2. There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.
3. There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.
4. The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. We suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.
5. The policy also fails to provide guidance on design requirements, as required by the NPPF.
6. The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

POLICY H1 – Homes for all We object to this policy.

A greater proportion than 60% of Surrey University students should be housed in university accommodation. The university should be encouraged through this Plan and the planning process to increase provision of university accommodation. It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.
The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinized or evaluated.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H2 – Affordable homes

We object to this policy on the grounds it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY H3 – Rural Exception Homes

We object to this policy for a number of reasons:

1. The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

1. The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations were avail) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

1. The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

1. The policy wording should define small, either in land size or number of u We are concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

1. The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular we believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

1. The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local conn) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

1. The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumsta” The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY I1 - Infrastructure and delivery

We object to this policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY I2 - Supporting the Department of Transport’s “Road Investment Strategy”

We object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY P1 – Surrey Hills Area of Outstanding Natural Beauty

We object to this policy as we are concerned it policy weakens existing protection when it should strengthen it. It is dependent on the Surrey Hills Management Plan. This welcomes housing development. Even major (undefined) development in the AONB would be permitted if exceptional (undefined) circumstances could be demonstrated. It should be tightened up.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

POLICY P2 – Green Belt We object to this policy.

1. It does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

1. The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected are This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt

1. Paragraph 3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of green belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

1. The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exer Within
limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. We believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

1. As mentioned above we note that the Summer 2016 edition of “About Guildford” (published by the Council) on page 5 states that “… the Plan rejects any schemes that would have a detrimental impact on the Green Belt.” This is demonstrably untrue and we consider this to be a deliberate untruth which compromises the consultation. We would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (We assume the document was delivered to most houses in the Borough.) We reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

1. We object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them. We also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the Plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

1. To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan Lond. We cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

1. Paragraph 3.17 states that “the general extent of the Green Belt has been retained.” We believe this should be deleted as an untruth.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/2382  Respondent: 8609217 / West Clandon Parish Council (John Stone)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Comments on specific policies

POLICY S1 – Presumption in favour of sustainable development

We object to this policy. The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
impact on the green belt." This is demonstrably untrue and we consider this to be a deliberate untruth which compromises the consultation process. (We assume the document was delivered to most houses in the Borough.) We reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

General comments

We have serious, general objections to the plan which are summarized below as well as being expanded upon in our comments on numbered policies in the draft plan.

- In common with many others we do not believe the housing figure has been properly calculated and we believe it overstates housing need. The Council has prevented Councillors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
- The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
- We do not believe the draft plan accords with the NPPF policies on protecting the Green Belt.
- Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been do The housing need number is not itself a very special circumstance justifying an indiscriminate removal of sites from the Green Belt. Having properly calculated a housing needs number, constraints should be applied to it to reflect the Green Belt and AONB. Each proposed Green Belt site then needs to be considered on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft plan does not demonstrate that this has been done. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
- Stronger assurances should be included in the plan that development can only commence when required infrastructure improvements have been secured.
- The A247 through Clandon is overburdened by traffic already and is unsuitable as an A road in any event. In parts it is too narrow for two lorries to pass and lorries routinely mount the pavement at speed in a dangerous fashion. We believe the plan should include proposals to provide other routes for traffic to take traffic away from the A247.
- We object to the Gosden Hill proposal. We do not believe very exceptional circumstances have been shown to justify taking this site out of the Green Belt. Even if the Gosden Hill development were to remain in the plan we believe the boundary should be explicitly drawn so as to prevent it being visible from West Clandon. In addition development should be conditional on the A3 improvements and new railway station.
- We object to the Garlick's Arch proposal. This site was removed from consideration before the previous draft of the plan was issued. We do not understand how this site has been brought back into the plan. We do not believe exceptional circumstances have been shown to justify taking this site out of the Green Belt. The site was not discussed in the Green Belt and Countryside study and there seems to have been no consideration of the justification for removing it from the Green Belt.

General Comment on Policies

The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY S2 – Borough Wide Strategy

We object to Policy S2 on a number of grounds.

1. The housing number of 13,860 new homes is excessive. The number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

1. The number is in any event based on an arbitrary and inappropriate Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. Rushmoor is excluded in spite of it being easily reached from Guildford town centre. An HMA should be an area within which a majority of people live, work, shop or study. On any commonsense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton, Haslemere, Reigate and Redhill and Basingstoke but all lie well outside “West Surrey”. Guildford is in the London commuter belt and part of a far wider and more complex housing market.

1. These concerns have been raised repeatedly since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinize it. The absence of a ready alternative, however, does not make “West Surrey” as a Housing market Area reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

1. The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. We have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

1. The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

1. The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,8 So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and
adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN were not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

1. It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

1. The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

1. This policy does not take proper account of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. We believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

1. The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

1. The Plan is out of balance in proposing 36% of all new housing in the three wards of Lovelace, Send and Clandon and Horsley. These are currently rural areas whose identities will be greatly and detrimentally changed by these proposals.

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

1) Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,

2) If this development proceeds, the narrow strip of Green Belt remaining between Guildford and Clandon at this point will again be proposed for development by the same developer who is promoting Gosden Hill.

3) The development will be highly visible from the A3 when approaching Guildford.

4) Together with the developments at Garlick’s Arch and Burnt Common there will be an almost uninterrupted ribbon of development along the A3 extending 5 miles from the centre of Guildford.

5) The development of this site will cause massive congestion in surrounding roads. It will generate many thousands of vehicle movements onto the A3 which is stationary every day during rush hours.

6) The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.

7) The proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A35
The Wisley development of a new village/town with at least 2000 houses, 4-entry form secondary school and employment land will generate large amounts of additional traffic onto the A3. If the slip roads at the A3/A247 junction to relieve the impact of this development on Ripley do get built, traffic on the A247 will increase dramatically.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1) This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.

2) The Plan calls for a minimum of 7000sq. m (previously in the 2016 Plan a maximum figure) but will take 9.26 hectares out of the green belt. There is no proper justification given for taking the additional land.

3) The evidence base does not support this scale of additional industrial space and the justification for placing it in the green belt is not made out. If the quality of some existing industrial provision is not adequate this should cause redevelopment of it not a large encroachment into the green belt. The 2017 Employment Land Need Assessment shows a demand of 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Burnt Common in the green belt.

4) The reference to waste management facilities mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and should not be so casually included for this site.

5) The proposal for light industry, storage, distribution and waste management activities at Burnt Common will generate large amounts of traffic including heavy vehicles on the A247.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp171/785  Respondent: 8609217 / West Clandon Parish Council (John Stone)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1) Our residents are being asked to accept very large amounts of development with little or no detail being provided on measures which would relieve existing congestion and limit future problems.

2) Much is made of the need for new infrastructure to support developments and for this to be in place as needed (listed in App. C to the Plan). Even if this happens the Plan admits …”we forecast that there will also be an absolute increase in overall traffic volumes”. This will be most acutely felt at junctions but these effects have apparently not been analysed so that we don’t know the location or impact.

3) We can be sure however that the cumulative effects of the developments in the North East of Guildford will have a devastating impact on the A247 through our village (and of course on Send). It is hard to see how any of the infrastructure proposals in the Plan (App. C) will do anything to mitigate this impact. GBC has little or no control over the plans of Surrey County Council as the local highways authority and it is well known that they have no money available.

4) The Plan now calls for nearly all infrastructure to be funded by developers (see APP. C). We question how realistic it is to expect developers not only to pay for all the infrastructure but also to have it in place in a timely fashion. The Plan says that planning permission will be refused if timely provision of infrastructure cannot be secured. Such refusals will almost certainly be settled in the courts. Developers’ business models are based on building and selling houses to create the cash required to provide infrastructure. People will be living on the sites well before infrastructure is complete.

5) If development were to be refused the land would still have been removed from the green belt and its future rendered uncertain.

6) All of these developments will draw very large amounts of additional traffic to the A247 through the village. It would be naïve to think that the employment sites and schools will serve only the developments themselves. Apart from the normal movements of residents to and from the new sites there will be considerable additional traffic on the A247 generated by:
   - children from elsewhere being delivered to Gosden Hill schools and collected
   - the employees of the offices and industrial sites getting to work and returning home
   - the vehicle movements generated by distribution and storage activities
   - traffic from Wisley wishing to travel South and returning
   - traffic from Gosden Hill wishing to travel South and returning
   - traffic from Slyfield wishing to travel South and returning
   - private and commercial traffic originating in the South and accessing Gosden Hill, Burnt Common or the A3 and returning (including traffic from Dunsfold)
   - SCC’s business plan for Newlands Corner

We point out that although the A247 is classified as an A road, it has none of the characteristics because it:
   - is less than 2 vehicle wide in places
   - does not have continuous footpaths
   - has several sharp bends
   - has a hump-backed bridge with poor sight lines
   - has a very difficult junction to access the station
   - has a dangerous junction with the Southbound A3 on-slip road
   - is largely unlit
   - has a primary school
   - is already very congested at times

In summary, the A247 is quite unsuited to coping with additional traffic and it is very clear that the developments proposed in the 2017 Local Plan will increase the amount of traffic on this road over and above that in the 2016 draft to which
residents strongly objected. There is nothing in the Infrastructure Schedule which addresses this issue. Indeed several of the infrastructure proposals will themselves lead to significant increases in traffic on the A247.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/786  Respondent: 8609217 / West Clandon Parish Council (John Stone)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan states: “4.3.16 National planning policy requires that Green Belt boundaries are only amended in exceptional circumstances and that this must be undertaken as part of the Local Plan process. We consider that exceptional circumstances exist to justify the amendment of Green Belt boundaries in order to facilitate the development that is needed and promote sustainable patterns of development.”

1) In the introduction to the Policy statement, numerous sites are taken out of the green belt including Gosden Hill, Blackwell Farm, Garlick’s Arch, Burnt Common, the prison and a number of villages. The Plan fails to detail the exceptional circumstances that have been identified for each site that is to be taken from the green belt.

2) It appears therefore that the Plan is based on an assumption that because the housing number cannot be accommodated on brownfield or previously developed land in the green belt, it is legitimate to move the boundaries. A blanket change to green belt boundaries is being made to facilitate development. That is not in accord with the NPPF or ministerial statements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp17q/104  Respondent: 8609217 / West Clandon Parish Council (John Stone)  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

The Local Plan is not sound.

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

1) The Plan does not consider the implications of Surrey County Council’s business plan for Newlands Corner to attract 100,000 more visitors a year. A significant proportion of these can be expected to use the A247.
2) The Plan does not consider the Waverly B. C. approval for the development of 1,800 homes at Dunsfold which has the potential to feed traffic trying to avoid Guildford, onto the A247 to access the A3.

3) The changes in this latest version of the Guildford Local Plan show little or no willingness on the part of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and will bring increasing traffic congestion, pressure on other infrastructure, noise and pollution and a reduction in the quality of life of our residents.

The should be removed from the plan as a possible housing site and the land allocated for possible use in the A3 Tunnel until such time as the viability and route of the Tunnel has been decided.

No mention has been made of a northbound route onto the A3. This would mean all traffic would go through the already congested roads of Burpham.

Very little information has been provided about the Sustainable Movement Corridor [SMC 6]. The little information provided would suggest a Dual carriageway is proposed, wherever possible, through the heart of Burpham. This is dangerous and inappropriate and would prejudice the existing residents of Burpham for the possible benefit of residents of Gosden Hill.

Answer (if comment is on questions 1-7 of the questionnaire): ()

This should be renamed Employment or “Sustainable Employment” defined.

As the majority of the large scale employment is office based and not dependant upon being in Guildford the biggest threat to continuing employment is poor transport provision. If the owners of businesses no longer enjoy being in Guildford they can simply move their operation to a location that has appropriate transport infrastructure and move their jobs with them. The Plan is unsound as it does not address the existing infrastructure problems or provide infrastructure to deal with economic growth.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

The policy is unsound as it does not take into account the change of shopping habits to on-line. Less land should be allocated to retail and more to housing.

The Town Centre Masterplan should be included within the Plan.

The Strategic Highway and Assessment Report (SHAR) has been produced late, has not been consulted upon and is unfinished. Information about traffic congestion – how much will occur and where – has not been given in time to inform Plan proposals or responses. It states the proposal to build 1000+ homes on Slyfield would not generate any additional traffic; omissions like this undermine the Plan and render it and the Plan unsound.

Highways England have stated that improvements to part of the A3 in Guildford will not start until 2020. Developments should be timed accordingly.

The policy states 3 unnamed improvements will be delivered by 2033. Significant housing will have been in place for many many years before this if the plan succeeds. This is clearly unsound bearing in mind the existing acknowledged substantial infrastructure shortfall that already exists.

As the large sites are all in Green Belt they will require substantial infrastructure to make them deliverable. This means new infrastructure will not help to resolve existing problems.

This is very selective in its interpretation of the definition provided with the NPPF and is unsound.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

The housing figure produced by the SMHA is unsound as no constraints have been introduced by GBC unlike Woking and Waverley. There is no rational why the duty to cooperate has not extended to the east and west of the Borough. There is no explanation as to how the numbers of houses will be delivered when for the last 15 years GBC has been unable to deliver half of this figure. A revised SMHA should be undertaken in the light if Brexit.

The SHMA produced by the GRA is more deliverable and deals with other factors more appropriately.

The Plan is unsound as the plan does no deliver the infrastructure needed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am also extremely concerned about site Allocation 46 (Land to the south of Normandy and north of Flexford).

First of all, removing villages from the greenbelt is not a sustainable model for house building because the purpose of the greenbelt is to prevent this urban sprawl which you are proposing. You appear to be changing the rules to suit.

I am sure that you have compiled the local plan on projections for housing requirements based on past trends and data, however, something major has since happened in this country and we will shortly be leaving the EU and as such the uncontrolled movement of people from within the EU will no longer apply to our country. Therefore, any data or modelling you previously carried out cannot be used to project future trends so I think the validity of the local plan is in doubt.

On a practical point, the infrastructure in this area is just not sufficient to cope with such a development. I do not see how any of the roads in Flexford could be improved to cope with such a vast number of additional vehicles; life would just be a misery for current residents and the potential new residents.

I am not aware of any provision for a doctor’s surgery and it is already very difficult to get an appointment at the Fairlands or Glaziers Lane surgery and the last thing we need is extra pressure on an already stretched service.

Overall I am just extremely disappointed with this approach and I feel that no thought has been put into it.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Site A46 Land to South of Normandy and North of Flexford: Mixed used Development 1100

I strongly object to the inclusion of this site within the plan for these reasons:

In my opinion the classification of the two roads that border site A46, Westward Lane and Glaziers Lane, are ill equipped to service a development of this size and the additional traffic. Westwood Lane reduces to a single lane carriageway underneath the railway bridge and Glaziers Lane, a lower classification road than the former is narrower with residential garden boundaries bordering the carriageway. It would seem that the plan hasn't considered a viable transport strategy to implement a development of this scale. As a resident who commutes daily to Walton-on-Thames, I am aware of the already significant traffic congestion within the village at peak times. These two roads are currently roads used to capacity as alternative routes to/from the A3 and as rat runs to/from the Hogs Back, especially when there is a travel incident in Guildford or on the A3 (which is frequent!).

If the development is considered based on the village being served by a railway station, then this service would be immediately be over-stretched. To double the size of the village would be to potentially double the amount of people using the transport links. Wanborough is a small station with a short platform. The railway station car park has only 8 spaces and there is no scope to provide more. It is surrounded by houses and a roofing business thus not making it conducive to
expansion without further investment of developing the field North of the line. The current car park floods terribly whenever it rains and you need wellington boots to access the platforms. This coupled with the lack of parking spaces already forces commuters to park in Culls Road and The Paddocks, so where would additional users of the station park?

Normandy already suffers with low water pressure, how will the usage of another 1100 homes help this?

There is already a significant burden on our Doctors Surgery in Glaziers Lane. You can't currently obtain a bookable appointment for much less than 4 weeks in advance, therefore you are often forced to request an emergency appointment as your healthcare needs become more urgent in this time-frame. I do not see how an increase to the size of the village can improve this situation. Has there been any provision for further healthcare needs of the proposed additional community?

Historically, the land is agricultural. The Greenbelt is for everyone's benefit. There are Grade 2 listed properties backing onto this site and surely this is part of our heritage that we should be working to preserve. Guildford Borough Council is keen to showcase its history, however, this should not be exclusively retained in a museum or in the town centre. We should be proud to see it in our villages and secure its place in our future.

The light pollution of the proposed development would affect the view from the Surrey Hills and have a lasting effect on the ecology of Normandy - less than 5kms from the Thames Heath Basin's Special Protection Area, with many wildlife species that use it, as listed above.

The current plan treats Normandy and Flexford as two separate settlements for the purposes of the greenbelt, however, they are one and the same and gives false suggestion; for which I can only presume is beneficial to planning. I cannot see a logical reason for including this development in the draft plan, only for it to serve the council. Dealing with one developer on a scale such as this would ultimately incur less resource than managing many smaller ones. Is Normandy now to suffer for Guildford Borough Council's shortcomings for not providing adequate housing previously?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the proposed development in Normandy (Site Allocation 46 and Site 47) which is part of the draft GBC Local Plan.

My immediate concern is site Allocation 47 (Land to east of The Paddocks, Flexford).

I have only recently purchased my property and the main reason for purchasing this property was the open fields to which my property looks out on to.

Currently I am not overlooked, I hear hardly any noise (except the railway) and I enjoy the wildlife which the fields bring to the village. If you subject me to look out on to housing (social or otherwise) then this will significantly lower my quality of life. I will not be able to use my garden in the way which I currently do. I have very little fencing or any means of privacy between my property and the adjacent fields.
I moved from an area which was overcrowded and I purposefully sought a location which was semi-rural knowing it was within the greenbelt.

In addition I do believe that this area is a flood risk with significant surface water present throughout the early part of 2013. There is a ditch which runs directly adjacent to my property which was also full of water during this period. I cannot see that building further houses will improve this situation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Site A47 Land East of The Paddocks: Homes C3 Quantity 50

This site is on the direct boundary of my home and I strongly object to the inclusion of this site within the plan for these reason:

From first hand experience I see how easily this site floods. The fields are at saturation levels at all times, even during periods of dry weather. The ditches bordering the fields overflow during the winter and flood water creeps over fields creating large areas of still water; substantial enough for birds and wildlife to sustain new habitats in and the ponies that reside there in dryer months have to be moved to other paddocks. I believe the ground saturation levels would not be suitable for development. If built on where would the water drain to? Our garden floods in the wet weather already.

Amongst the various wildlife I’ve seen, is a pair of Egrets, which are rarely sighted away from Poole and Chichester Harbours. Bats roost nearby as every evening at dusk we see them fly from the direction of the field around our bungalow and back across the field. They continue this lap many times and my understanding is that they are protected by the Wildlife and Countryside Act (1981), which states it is an offence to intentionally disturb a roost. We also see Hedgehogs, Badgers, Common Toads, Barn Owls and Fieldfares. I am aware that both the Barn Owl and Fieldfare are protected by same legislation the Bat, however the Fieldfare is a migratory bird which arrives in its flocks to this site every Autumn is currently on the RSPB’s Red status list, as well. Any development to this site would not only disturb the fragile ecological status but would irrevocably destroy the fragile habitat of these species in our area.

There are also many mature Oak trees on site A47, one of which is a particular veteran and stands almost central to the site. Flexford borders the site of the Ancient Springs at Wanborough and the Area of Outstanding Natural Beauty on the Surrey Hills. It is less than 5kms away from the Thames Heath Basin’s Special Protection Area at Ash Ranges. The greenbelt is there to prevent the urban sprawl. Being located 3 miles out of Guildford it is vital to retain the boundary for social and ecological purposes. Previously this was ‘protected greenbelt’, so why has the status changed?

Furthermore, my husband and I chose to buy our home adjacent to this site over any other property we viewed purely because of its location and outlook from the kitchen and garden, not because of size or style or because it was up to a certain stand of living. We moved there 3 years ago and have sacrificed and purchase it. We have invested time and money to have a new boiler and central heating, new electrics and plumbing. The property isn’t large but it will take us many years to complete the renovations whilst there is general maintenance work to pay-out for. We are not seeking to
extend. We consider this to be our forever home and would be devastated if we were to be surrounded on all sides by dwellings and our outlook was to change. It would destroy our sanctuary.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I am writing to OBJECT against the planning for development in Normandy and in particular to site A46 which proposes a development of 1100 and a secondary school. I highlight my reasons below.

Firstly this area is recognised as highly sensitive Greenbelt. In the meeting held in Feb 2016 Mr Spooner, head of GBC even advised that Normandy would not be built on unless there was a case for exceptional circumstances. He did not mention any school until asked directly by a member of the public, at which stage he said that the building of a school would indeed TRUMP the Greenbelt. I believe that Mr Spooner was already fully aware of a developers proposal, Taylor Wimpey, which included the building of a 7 form entry secondary school.

As my horses live on a parcel of land I have been fully aware of the developers comings and goings so since 2014 and the offers made to landowners in the form of 'options'.

Originally the parcel of land A46 was highlighted to be put into the new local plan as 'safe guarded' but seeing as this plan has never been approved, this land cannot therefore be classified as safeguarded and has in fact gone straight into the latest plan, as a bit of a late entry. I think that the developers have seen this as an easy opportunity to grab a large portion of land and little or NO thought has been given to this properly by the council. The land is mostly owned by 4 parties, 2 of which do not live locally and the other 2 embroiled in a bitter divorce - of course all parties would be keen to sell. Taylor Wimpey and another developer Kitewood have been aggressive with the offers of options and all by about 7 acres have options on them.

We have been advised by Mr Spooner that following the executive meeting in early June 2016, if there is no school on parcel A46 then there will be no building.

I firmly OBJECT to the building of the school for the following reasons:-

1. There is no need for a secondary school. With local schools, namely Ash Manor, Kings college, Christ college all underscribed and also offering space for development on their own sites, should need arise, there is NO need for an additional school here. New schools is Hoebridge offer further capacity and a further institution at Guildford Technical college taking children of 14 upwards offers even more places.

The likelihood of starter homes and affordable housing producing such a volume of secondary school children is totally unrealistic and in a poll of 300 people held on 22/6/16 only 4 people had a child of secondary age.

I would also like to highlight that if a school should be built, would it include a sixth form? It is very difficult to get to any
sixth form from Normandy but at the same time, for sixth form students, the location of Normandy is unappealing as during their free periods mid day - and they get a lot of these, there is nowhere for them to socialise/shop etc. My 3 children have travelled further afield to attend sixth forms that offer a social side as well as academic. They have all coped well with this and broadened friendship circles.

Next the transport to and from site A46 between the C16 and the D60 road ... Both LANES. Westwood Lane and Glaziers Lane. Both dangerous roads, with one pavement on one side and both having dangerous bridges. In this year alone there have been 5 accidents involving bicycles, 2 serious and one fatality on the A323 involving a motorbike. Children as young as 16, year 11, can ride a moped and these roads are far too dangerous for these vehicles. There is no significant budget made for improving Westwood Lane or Glaziers Lane, the minimal £3m that Taylor Wimpey has projected for road infrastructure won't even adjust the railway bridge in Westwood lane which is tricky at the best of times. The bridge in Westwood Lane is single traffic only, with a blind spot leading out of Beech lane and cannot take a double decker bus .... Not that we really have a bus service anyway!

Next the railway .... A teeny weeny unmanned station with no way of purchasing a weekly child subsidised ticket. I know this for fact as I have this problem every week for my youngest daughter journey to Farnborough sixth form. The station mainly serves great western trains and SW trains. You cannot preorder students tickets at Ash either because you have to buy them after 12pm for next day and the ticket office closes at 12! If there is any increase in train services then there is no chance of ever getting through Ash as the level crossing barriers, which are currently down more often than they are up, will be permanently shut. This level crossing, although a bridge is proposed for 2024, this needs addressing before any building anywhere is undertaken.

If the children are expected to travel from the proposed developers at Blackwell farm you may also wish to address the Christmas pie trail, it frequently floods and is dark and woody, not safe for children to walk or cycle on their own. I would never let my children use this path as parts of it are very remote.

Next the environment. I KNOW Site A46 well, my horses live on the land. It's is arable farming land, used for cattle and hay. The soil is clay, meaning it is rock hard in the summer and a quagmire in the winter. My horses stand knee deep in mud from October to April. If it rains in the summer, the water cannot run off fast enough and it DOES experience flooding. I have offered Mr Spooner to spend a day on the roads and the farm to witness it himself, sadly he is too busy. It is crucial to keep the ditches within this area clear to prevent flooding further down in the village towards the Guildford road and it was due to flooding in summer 2007 that the foot and mouth spread, the prime site of foot and mouth was indeed behind Peakmead farm with the cattle based on the footpath that runs right through the middle.

My house has also been flooded in 2006 when a flash flood caused the water runs of course to burst and us and a number of houses on the A323 Guildford road lost the contents of the whole if the downstairs. This brings me on to parcel of land directly behind our house, it had been rejected as a cemetery due to the flooding issues but still showing as residential in the plan, I OBJECT to this being included too ..... Unless you wish to build the houses on stilts!

How can anyone dispute that there isn't wildfire in these beautiful fields. It is a haven for hedgehogs, badgers, rabbits, skylarks and swallows, buzzards, frogs and newts and the secretive dormice. Taylor Wimpey are running a dormice survey but unfortunately have set the traps at such an angle that the dormice would need climbing harnesses to get in and stay in the traps. It has a number of ancient oak trees and is truly beautiful. These picture were taken in a sunny day in May, however in the winter, other than the footpath, the whole area is a marsh. In an seriously concerned that the concreting over of this area will lead to massive flooding in Normandy as the water will have nowhere to soak away. Wanborough station already floods after even a few showers.

Sewage is another issue, Normandy already suffers from inadequate sewer removed facilities and it is know that Pirbright is already concerned at how they will cope should the new development go ahead as our sewerage travel and is processed by them. In 2014 a main sewer pipe collapsed in Glaziers lane causing the road to shut on and off for several weeks. On a wet day, we can smell drains in our house and in Glaziers lane sewerage frequently backs up and leaks. Internet has recently been addressed but we are still poor compared to other villages and it is a lottery as to how close you are to a magic green broadband box as to how got your service will be. Normandy is also a black spot for mobile service. We have very limited reception in our house.

So here are a number of reasons for my strong OBJECTION, not to mention that we live in a democratic society and this is our village, and as the residents we should be listened to. In. The recent meeting on 22 June 2016, not a single person out of the 300 attendees wanted your plan in Normandy. Do we not deserve to be listened to?
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Normandy and Flexford

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Removal of sites Policies 46/47

I am greatly relieved that common sense has prevailed – not to double the size of Normandy and Flexford by building 1,100 houses and a school in our precious Green Belt: it’s the wrong place, fed by country lanes, with dangerous railway bridges, is a floodplain and also… Green Belt!

So I support this changes to the plan.

Change to the Green Belt coverage of Normandy and Flexford

I am not clear why GBC have ignored the policy of the Green Belt and seem keen to try to find ‘exceptional circumstances’ where it can to build its unsubstantiated housing target.

I object to the change in the plan to remove the Green Belt coverage in settlements in Normandy, Flexford and Walden Cottages marked on the maps in Appendix H. There is no evidence to prove why these random areas have been selected as all contribute, as do the settlement areas not selected, to the openness of the Green Belt and no ‘exceptional circumstances’ have been proved. This openness has in fact been stated by the planning inspectorate in previous planning appeals. The area around these selected settlements do also contribute to the rural economy. They also are close enough to the Surrey Hills ANOB given the geography of the land allowing views that fulfil the Green Belt obligations. The area has already been identified as one of ‘high sensitivity’ yet that doesn’t seem to count when this insetting has been proposed. If this was allowed to happen then there will be pressure in the future to join up the resultant ‘urban islands’ into a wider urban area.

The Green Belt was created to prevent urban sprawl and should be permanently protected.

I also object to the statement under Green Belt Policy P2 (4.3.13) that claims Normandy and Flexford (and many other villages) are now inset from the Green Belt. Its in the Plan to do that very thing - so cannot be right. I also object to any of these villages being changed to be inset from the Green Belt.

Infrastructure improvements

With all the current development and proposed around the area – especially in the sacrificial lamb Ash – the pressure on roads, Doctors etc will only get worse.
It is vital that the infrastructure is agreed and implemented before any large scale development takes place.

The most key are LRN17 Puttenham Hill/A31, LRN24 A323/324 Junction and LNR21 Ash Railway Station flyover and I support the plans - although the ‘likely cost and funding source’ don’t appear to be very robust.

**Traveller Sites in Normandy and Flexford**

Like the settlement areas in Normandy, Flexford and Walden Cottages, the sites at Palm House Nurseries (Policy 49) and Whittles Drive (Policy A50) are proposed to be inset.

I object to this as it will remove the development restrictions in an area sensitive to residents in the village of Normandy and Flexford and no evidence has been provided for ‘exceptional circumstances’. I can forsee that it will result in even less respect for the planning law.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** (Yes)

**Paragraph 4.3.13 and Inset Plan for West Horsley (south)**

The Insetting of the villages as set out in Paragraph 4.3.13 and as identified on the Inset Plan for West Horsley is fully supported for the following reasons:

1. Guidance in the NPPF (paragraph 86) makes it clear that villages should only be included within the Green Belt in circumstances where the open character of the village makes a contribution to the openness of the Green Belt. Since there are many villages within the Borough where this does not apply, it is right and proper that as part of the evidence base for the Local Plan, each of the villages should be appraised for the contribution that they make to maintaining the objectives of Green Belt. Accordingly, the Green Belt and Countryside Study relating to the insetting of villages is supported in general terms.

2. More specifically, the assessment and conclusions of the Green Belt and Countryside Study in respect of West Horsley (South) are supported. This concluded that the village should be inset with the Green Belt. As noted in the study, the majority of the village is considered to exhibit an enclosed character due to tree cover and topography surrounding the village; areas of open land within the wider Green Belt are not frequently visible within or beyond the perceived village area and it is generally contained by a number of recognisable and defensible boundaries that would permit the provision of new Green Belt boundaries, as shown on the Stage 2 Map. This analysis is correct and, as such, the conclusion that the village should inset into the Green Belt is supported.

3. Guidance in the NPPF (paragraph 85) deals with defining boundaries and advises local planning authorities that they should be clear, using physical features that are readily recognisable and likely to be permanent. The preparation of the Local Plan provides an opportunity for the existing defined boundary of the settlement to be reviewed. It is considered that this is necessary due to existing inconsistencies in the way that the 2003 Settlement Boundary is drawn and the need for the new defined settlement boundary to accord with the proposed new status of the village as being Inset within the Green Belt.
4. For the above reasons, the identification of a defined boundary for specified villages in which appropriate development or redevelopment will be allowed is fully supported. In particular, the inclusion of West Horsley (South) as one of these settlements is supported. For the same reasons, the Horsley Plan showing the proposed Settlement Boundary is also supported.

<td>I object to the Settlement Boundary which has been imposed on East Clandon without any consultation. This imposition provides no protection to further development outside of the settlement boundary (Policy P2 para 4.3.25) and is deemed by me as being unnecessary in an already tightly developed ancient and rural conservation village with high archaeological merit. I demand that this proposal be removed as it will endanger the openness of the Green Belt, the views in and out of the AONB (protection of the AONB Policy P1) and the character of our village.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Policy P2 – Green Belt: I object to this significant erosion of the Green Belt with the proposals for large towns being developed on Green Belt land thereby removing the openness of the Green Belt. I note in particular the huge developments proposed for the North East quadrant of the borough which will adversely affect our amenity, but also unfairly targets our tranquil rural villages because we can provide ‘dormitory’ facilities for commuters to London. The developments directly affecting our villages are the proposals for Wisley Airfield, Gosden Hill Farm, various farms and tracts in the Horsleys and Garlicks Arch at Send.

Further, on the erosion of Green Belt and I object that Policy P2 is not met where it states that Green Belt should be protected. I object to the disproportionate use of Green Belt land for housing – some 65% of the housing proposed is on Green Belt and with little consideration being given to redevelopment of brown field sites.

I object to building on the Green Belt because the essential characteristic of Green Belt is its openness and permanence (National Planning Policy Framework paragraph 79).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object that GBC are contravening the NPPF framework stipulation in paragraph 87 with the proposed developments at Gosden Hill Farm, Ripley, East and West Horsley and Garlicks Arch, Send. Paragraph 87 states “As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances.” and GBC have not proven any special circumstance for developing on these Green Belt areas.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/12576  Respondent: 8627009 / East Clandon Parish Council (Sibylla Tindale)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to Policy S1 not offering sustainable development as regards roads and rail infrastructure which currently does not cope with demand, congestion on the A3 in particular, but also other A roads in the area such as the A247, the A246 and then there is the already overcrowded and slow train system for those currently living in the borough and needing to commute to London. No pre-emptive planning has been made to alleviate these real problems which will be much exacerbated by any large increases in housing.

I specifically want you to note the winding, narrow and dangerous route via the A247 through West Clandon which then drives people to use a short-cut the even narrower rural road, the Ripley Road, through East Clandon to and from the A3. This will be much exacerbated with the large increase in housing twinned with large increase in cars and travel.

Continuing with Policy S1 (Presumption in favour of Sustainable Development) I object that this is not being met and that GBC are contravening this when it is clear that no fixed plans are available to improve the provision of shops, medical facilities, schools in our immediate area (besides roads and rail already mentioned) to service us. If the GBC were serious about improving the infrastructure and sustainability of our communities, they would have secured plans and funding to ensure these facilities are available and not just at the behest and hoped-for goodwill from the developers. Further, how will developers be held accountable to their promises to build infrastructure? Stories are legion of developers reneging on commitments as the ‘money runs out’ even though vast profits will be made from turning agricultural and Green Belt land into highly valuable housing land.

I have lived in East Clandon for 13 years. As such, I have a strong view about the proposed Local Plan.

I object to the 2016 Draft Local Plan as a whole and in particular I object to the specific issues (listed below). I believe that this deeply flawed Local Plan will have a direct and detrimental effect on the amenity currently enjoyed by my family and other residents of East Clandon and to the even greater detriment to our neighbouring villages of West Clandon, Ripley, West and East Horsley. It erodes the openness of the Green Belt and endangers the beauty and views in and out of the Surrey Hills AONB.

I object to Policy S2 for the proposed provision of the very high overall housing numbers of 13,800 new homes (690 new dwellings being built every year for 20 years) and I object on two grounds; these housing numbers have been imposed on the borough with no real consultation being undertaken with the residents of East Clandon and the borough as a whole. Secondly, the housing numbers are based on a high-growth economic development plan which in itself has had no consultation with us and this combined with estimated demand from London residents will turn Guildford into a dormitory town for London.

Further, I object to the fact that no real economic or housing demand factors have been provided by the borough planners to substantiate the very high housing target of 13,800 new dwellings over the next 20 years. This is in direct contravention of the NPPF’s requirement for the planning authority to provide meaningful consultation.
I object to all other strategic sites in the Local Plan, Blackwell Farm, 3 Farms Meadows, Garlick’s Arch, West Horsley and Hog’s Back. All are out of proportion to the surrounding area and none qualify for the exceptional circumstances required to take them out of the Green Belt.

---

I object to the fact that GBC have not met the requirements of the NPPF Paragraph 155 which imposes an explicit obligation to have early and meaningful consultation. This has not been met in a number of areas by GBC. We have not had a meaningful consultation on imposing a settlement boundary on East Clandon, on the absence of meaningful economic and population growth figures for Guildford showing various scenarios with high, medium and low growth scenarios being offered.

I note that there were over 20,000 responses objecting to the 2014 draft Plan and therefore I object that the Consultation Process has not been properly followed for this Plan which is not materially different from that plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Section 1: Introduction and Assumptions

1.1 As identified in para 1.8 of the Submission Local Plan (“the Plan”) it is “also based on a collection of research and information documents called the Evidence Base”. Our principal concern with the plan is that the Evidence Base, principally the Land Availability Assessment (“LAA”), the West Surrey Strategic Housing Market Assessment (“SHMA”) and the Green Belt and Countryside Study (“GBCS”) must now be challenged as no longer being appropriate since the Referendum result of 23rd June 2016 which will lead to the United Kingdom leaving the European Union. We have already seen a major fall in the value of the £ sterling, informed reports of 80,000 City of London jobs going to other European financial centres, and the fundamental question that we face is the free movement of labour within the UK and Europe, putting the economic future of the United Kingdom into a period of substantial uncertainty. Against this background the population growth figures in the SHMA, being 21,179 from 2013 to 2033 in para 4.12, resulting in a requirement for 693 new households per annum can only be described as highly questionable.

1.2 In particular in looking at para 4.16 of the SHMA, it states that 51% of the West Surrey population growth in the period is forecast to be natural (births v deaths), and 49% will arise from net migration. In looking further at GBC in para 4.24, Table 17 shows internal net migration as negative at a rate of 812 per annum, whilst international net migration is positive at a rate of 1229 per annum for the period. Thus net international migration exceeds the total forecast population growth in GBC for the period 2013-2033, being 24,580 (1229 x 20 years) compared with forecast overall growth of 21,179. Given the result of the referendum we feel that the GL Hearn SHMA must be re-addressed as it no longer has any credibility and thus the Submission Local Plan is flawed and should be revisited.

1.3 Whilst preparing this response to the Plan we have received two substantive and excellent reports on the SHMA from GBC Cllr Reeve and Mr Niels Laub together with a report (the NMSS report) from Neil McDonald commissioned by Guildford Residents Association. The credentials of Mr McDonald and his experience at DCLG are unquestioned and the NMSS report together with those of Cllr Reeve and Mr Laub clearly demonstrate that the SHMA must be revisited and the Plan be substantially amended before it is submitted to the Inspectorate. The NMSS report concludes that the “Objectively Assessed Need for housing should be taken as 510 homes a year over the period 2013-33, not the 693 homes a year suggested by the SHMA” . It would appear that the authors of the SHMA were unable to interpret the historic data on international migration and student movements, and in particular could not find a definitive answer to the extraordinarily large negative Unattributable Population Change (“UPC”) of 717 pa throughout the period 2001-2011 (see SHMA para 4.32). As GL Hearn state in para 4.32. of the SHMA “it is unknown why this difference has occurred” and that this large UPC would “suggest an overestimation of population growth in the components of change date”.

1.4 Whilst we understand that the task of analysis of the historic data is complex and difficult, we are very concerned that the Plan has been based on what can only be described as guesstimates rather than estimates of population growth. The analyses of Messrs Reeve, Laub and McDonald challenge the conclusions of the SHMA and this excludes the need to re-visit the economic growth and migration aspects resulting from the Brexit vote. We have chosen to emphasise the above point as a preface to our other comments, which seek to address the Plan as it stands and looks at certain details which are relevant to Shalford parish. However we hope that the Borough and the Inspectorate will reflect on the new reality post the Referendum and, frustratingly for all concerned, re-cast the Plan with appropriate new assumptions as the basis of the Evidence Base.

1.5 It is the belief of the Parish Council expressed in the earlier consultation that the method used to identify the quantity of land needed to meet the housing requirement of the borough is questionable, and goes against the guidance of the NPPF. This states that
“Local plans should meet objectively assessed needs with sufficient flexibility to adapt to rapid change unless any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; or

specific policies in this Framework indicate development should be restricted.”

The footnote to the NPPF lists specific policies including designated Green Belt, AONB, SSSI and sites liable to flooding or protected by the Birds and Habitats Directive. Guildford BC is proud to promote the fact that 89% of the borough is designated as Green Belt yet on this occasion chooses to disregard this very significant point. The NPPF states that only one of the above criteria needs to be met in order to justify a lower level of housing provision than the assessed need. However we consider that both criteria could be applied to the Local Plan because of the impact on the existing infrastructure and the local environment. The Borough Council is currently proposing over 13,860 dwellings, resulting in a need for 693 dpa over the 20 year period 2013-2033 (or well over 800 dpa if calculated over the 15 year period in which the new plan will be in operation). This figure needs to be reviewed with regard to balancing the housing need against the impact on the Green Belt, the AONB, AGLV and other local protections as well as the ability of the existing infrastructure to cope with such development. The infrastructure proposals which have been published with regard to supporting this level of development across the borough, show that most of the proposed infrastructure work is in the latter stages of the plan period and the funding and execution of these works must be questioned. In our view the improved infrastructure must precede the development rather than follow it.

1.6 The Borough Council is keen to promote the theme of sustainability across its work yet seems to ignore this worthy principle in developing a Local Plan and focuses purely on Market Housing for which there is significant demand, not just from within the borough. Again the government guidance is that market housing numbers should be assessed to ensure that it does not conflict with policies within the NPPF. Looking forward it is clearly an argument that by ignoring the need for sustainability, the future of the very attractive borough that exists today and the quality of life offered to the current population will be lost for generations still to come. The Green Belt is such an attractive place for people to live that the Borough Council could not possibly hope to meet the demand for houses here in any sustainable way. One must also ask whether the Council should attempt to do this, so making homes more inaccessible for people who have lived in the borough for their whole lives. Like many other parts of the borough Shalford Parish Council recognises the problems facing local people looking for a home and would accept that perhaps this would be a justifiable use of Green Belt land. Likewise it acknowledges the suggestion that levels of Affordable Housing should be higher than the national requirement in new development and hopes that this could ease the pressure on Green Belt sites.

1.7 There have been recent examples of neighbouring authorities experiencing problems with their Local Plan submissions to the Inspectorate. As a result GBC’s focus seems to be purely on ensuring that the housing need number is robust enough to satisfy the scrutiny of the Inspector and there is little acknowledgement of the special circumstances of the borough mentioned above that allow for the reduction of this figure. As a result, it is possible that the Inspectorate could view the plan as showing inadequate regard to the Green Belt, AONB, AGLV and other protections of which the borough is rightly proud.

Assessing need

1.8 The proposed growth in population in the Plan as stated in para 2.3 from 137,183 in 2011 to 162,188 in 2033 is 18.2% over 22 years (approx 0.8%p.a.) as compared to growth from 124,900 in 1980 to 137,183 in 2011 which was 9.8% over 31 years (approx 0.32%p.a.). If this rate of growth were to be extrapolated forward it is clear to see that it is unsustainable in the context of the NPPF taking account of the constraints of Green Belt protection, and physical infrastructure limitations of the Borough. Such unrestrained development will affect the quality of life of future generations.

1.9 We fail to understand why 13860 new homes are required in the plan period to meet a population increase of 21,179. The population growth number is from para 4.2 of the SHMA (162,188 less 141,009). At the 2011 census 137,183 people were housed in 56,400 homes at a density of 2.43 per home. At the same population density of 2.43 it would appear that 8716 new homes would be required to house the anticipated growth of 21,179 and this would suggest only 436 new homes per annum. We understand that there is hidden homelessness at the moment but such an increase in housing stock cannot be explained by this factor alone. It appears that there is an over-reliance on the various consultants’ reports and that no-one has used basic arithmetic to check that the conclusion is sound.

**Policy A34 Broadford Business Park – 100 homes**

We are concerned about the development of this site for the following reasons;

3.1.1 As compared to the existing traffic volumes from the Business Park users it would seem that 100 homes would create a major increase in traffic movements from Broadford Park with a consequent knock-on effect to the T-junction of that road where it meets the A281 (already noted above for its severe congestion problems – see 2.1 above). It should also be noted that the exit/entrance to the site is very close to a blind bend on the Broadford Road.

3.1.2 As a residential site there is inadequate pedestrian access from the site to the school, railway station, bus stop and shops. There is no safe walking route from Broadford Road along the A281, because there is no pavement on the west side of that road and it is not permitted to construct one on Common land. There are paths over the Common but not of an all-weather nature, although the main path across the Common via Juniper Terrace has been newly relaid. If some of these issues could be resolved we would suggest that the site could possibly support a smaller development of mixed flats and small houses, or even sheltered housing to cater for the elderly and so help to release larger properties for younger families.

3.1.3 The risk of flooding is a concern as parts of the site are identified as Zone 2 and 3 flood zones. We wish to emphasise our concern that any affordable housing provided here should be at no greater risk of flooding than any market property located on the site.

3.1.4 The River Wey is a significant part of the Parish’s “blue infrastructure” and as such would need sensitive development of the site with appropriate screening and due regard for National Trust guidelines. This stretch of water is popular with users of narrow boats and is therefore a valuable tourist attraction for the whole borough. In consequence, it is particularly important that any development of this site does not have an adverse impact on the peace and tranquillity of the water meadows on the opposite bank.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We note and support the following policies in the Plan

7.2 Policy H1, Homes for all states that

“New residential development is required to deliver a wide choice of homes to meet a range of accommodation needs…..and…..provide a mix of housing tenures, types and sizes appropriate to the site, size, characteristics and location”

We welcome this statement and hope that this aspect of the policy will reduce the number of new developments for large “executive “ homes which do not meet local need.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
We note and support the following policies in the Plan:

7.3 Policy H2 on Affordable Homes and H3 Rural Exception Homes

7.3.1 We strongly support the proposed lower threshold for affordable housing on sites providing 5 or more homes of which at least 40% must be affordable.

7.3.2 As a village parish we are acutely aware of the problem of local families being unable to stay living within the area in which they have grown up. The attractiveness of the whole borough means that the pressure on property availability and price is immense. The Settlement Hierarchy document indicates that Chilworth has a shortage of three-bedroom accommodation, the impact of which is to break-up the local community. Similarly the nature of property in Shalford is such that young people who have grown up in the village are unlikely to be able to afford property in the area when they leave home. We would urge GBC to acknowledge the needs of local people as an integral part of any long-term plan for the borough.

7.3.3 Following our Shalford Housing Needs Survey (September 2012), we have worked with the Affordable Housing Team to identify potential rural exception sites in order to provide affordable housing specifically for those with genuine local connections. This simply emphasised the difficulty in finding areas acceptable for development, but the Parish Council is committed to following this project through to fruition and there may be some parcels of land (possibly owned by GBC), which we will wish to review with the Council.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Section 2: Infrastructure

2.1 The most frequently expressed concern of residents within the parish is that the current traffic congestion is a major concern which will clearly only be increased by any further development. The A281 is regularly congested from Bramley to Guildford and the roundabout in Shalford where it is joined by the A248 is often congested back into Chilworth and Wonersh from the east and into Peasmarsh along the Broadford Road to the west. The fundamental issues here are:

- the inability of the gyratory system in Guildford to handle the volume of traffic entering and passing through this “gap” town; and
- the potential for bottlenecks created by junctions on major roads to the south of Guildford, such as the roundabouts at Shalford and Bramley and the junction at Rice’s Corner in Chilworth.

Recent and proposed major development in Waverley will only add to the problem with Guildford being a major employer for all these areas as well as a hub for entertainment and communication. We note that the traffic flows on A roads in Surrey already have 64% higher volumes than the UK averages and some roads are already operating beyond their design capacity.

2.2 We note that the Settlement Hierarchy (2014) document assessment of whether both Chilworth and Shalford are “well connected’ grades both villages as ‘poor or neutral’, and this certainly accords with views expressed by residents about the existing rail and local bus services.

2.3 We welcome the Infrastructure Policies within the Plan and in particular under Policy I1 the fact that “where the timely provision of necessary supporting infrastructure is not secured, development may be phased to reflect infrastructure delivery, or will be refused”. We remain concerned that funding from Highways England and SCC may be delayed or reduced and would re-iterate that the Transport Infrastructure is currently not adequate for the borough. We note with concern that there are no proposals to improve the A281 which is the main congested artery through the parish.

2.4 The other most frequently stated concern of residents is that any future development will increase the existing pressure which they already experience on schools, medical services and the utility providers. Whilst there may be availability at certain schools within Guildford Borough or its neighbours, this would result in an increased need to travel, with resulting further traffic congestion during school terms.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We note and support the following policies in the Plan:

**Policy I4 Green and Blue infrastructure**

7.5.1 We welcome GBC’s recognition of the importance of preserving and enhancing green spaces and stretches of open water, and looks forward to the Green and Blue Infrastructure Supplementary Planning Document (“SPD”).

In that context we would encourage GBC to incorporate within the Local Plan the proposal by parish residents, working with Surrey Wildlife, to develop the Stonebridge site as a Wildlife Refuge.

7.5.2 We welcome the aspect of the Policy with regard to Open Space and note the inclusion of Shalford as having a “shortfall of park and rec (public combined), children’s play space and youth provision” (page 81) in the Guildford Open Space, Sports and Recreation Assessment 2016-2033 prepared by Ethos Environmental Planning in June 2016.

7.5.3 We further note in the Assessment of Sites of Amenity Value produced by Ethos Environmental Planning in May 2016 that, on page 118, the land to the south of the Village Hall was identified as a site of High Amenity Value GIS ETH_088 and that “the site is in an elevated position and offers aesthetic value”. It should be noted that the site could be accessible to the public with a public footpath on the western boundary and the public village hall to the north.

7.5.4 The Policies Map for Shalford (south) on page 364 of the Plan now clearly identifies the site as Open Space which under NPPF paragraph 74 means that it “should not be built on except in specified circumstances”. We welcome this protection if it is determined ultimately that the land falls within the proposed revised settlement boundary for Shalford.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
maintaining the AGLV and Green Belt status of the sites behind Shalford Village Hall and Christmas Hill (see Sections 5 and 6), and by reviewing its proposals to inset the Tillingbourne Valley villages of Chilworth and Shalford (see Section 4).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Section 5: Settlement Boundaries**

**Shalford Settlement Boundary**

5.1 Fields behind the Village Hall and at Christmas Hill: The insetting proposals include a re-drawn settlement boundary which encloses a piece of land to the south of the Shalford Village Hall, and a further triangular strip to the east behind the houses on Kings Road in Christmas Hill, both of which would in consequence lose their current Green Belt protection. We oppose this proposal for the following reasons:

5.1.1 Both tracts of land are in a relatively elevated position within the village and as such form a very visible part of the open character of the village and its connections to the Green Belt. Any development of this land will significantly diminish the open aspect as viewed from Kings Road, the Common and surrounding areas.

5.1.2 Any development on the land to the south of the Village Hall would be particularly harmful to the Village Hall and its surroundings, which lie directly below the site. The land rises steeply behind the hall, and building on such an elevated site directly adjoining the village tennis courts and bowling green would have a marked impact on this important communal area, in both visual and practical terms. We know that our Tennis Club and Bowls Club, as well as their individual members, have responded to the proposed Plan detailing the practical effects which development of this site would have on their facilities.

5.1.3 The triangle of land behind and to the south of Christmas Hill is also in an elevated position and forms a very visible part of the open character of the village and its connection to the Green Belt. It appears that the re-drawn boundary as proposed has more to do with a neat line on a map rather than any proper evaluation of the land. We see no justification for this particular amendment to the settlement boundary which should not be so amended and this land should remain as Green Belt.

5.1.4 The land in question is all classified as AGLV. The proposed Policy P18 on Surrey Hills AONB, which we very much welcome, states that

"the AGLV will be retained until such time as there has been a review of the AONB boundary. Proposals within the AGLV will be required to demonstrate that they would not result in harm to the AONB or the distinctive character of the AGLV itself"

Given this policy it is clear that the redrawn settlement boundary affecting the land behind the Village Hall and Christmas Hill should not have included any of this open grassland, and that it should have been retained as Green Belt.
5.1.5 It appears that Shalford is the only village in the Borough in which a proposed change of a settlement boundary brings areas of AGLV into an inset village and deprives them of their Green Belt protection.

5.1.6 The existing settlement boundary is defensible with already existing established hedges which have been there for over 50 years. These hedges and fences clearly mark the edge of the current boundary between settlement and open AGLV land. However, it is understood and accepted that the settlement boundary should be amended to embrace the Upper Village Hall, tennis courts and bowling green.

5.1.7 We understand that the Plan has now designated the land to the south of the Village Hall as Open Space as shown on the policies map for Shalford south on page 364 of the Plan. Whilst this is a welcome proposal and appears to give strong protection to the retention of the land as Open Space we are aware that the land is under option to a developer who is contracted to pursue development of this land and is likely to make representation to the Inspectorate regarding the Plan. At this stage we feel that if the current settlement boundary were to be retained, the land in question would still be part of the Green Belt and as such would enjoy greater protection from any risk of long term development. As we, as a Council, are not planning experts we would ask that the Inspectorate give consideration to the strongest form of protection for this land which is of great concern to the parish residents. It is more than worthy of note that the land on which the Village Hall and clubs are now sited was originally given by Mr Edgar Wigan in 1962 “for the use of the inhabitants of Shalford and the neighbourhood…..in particular for the use of meetings, classes and other forms of recreation and leisure time occupation, with the object of improving the conditions of life for the said inhabitants” Further we understand that there is reason to believe that the donor, who also owned the fields behind the village hall, intended them to remain open and undeveloped.

5.2 Common Land in Shalford

5.2 The re-drawn settlement boundary as proposed has incorrectly included Common land within Shalford. In particular the Common land abutting the Horsham Road together with a triangle of land opposite Snooty’s Groceries, and a triangle of land in Chinthurst Lane have been included within the new settlement boundary. The Common land in Chinthurst Lane extends to the south-east towards Wonersh for a considerable distance on both sides of the lane. None of the land should be shown as being within the settlement boundary as to do so implies that it does not enjoy the protection of the Green Belt even though it is still Common land. For the avoidance of doubt for future generations of planners and citizens this error should be corrected.

5.3 Chilworth Settlement Boundary

5.3 There are two proposed changes to the settlement boundary in Chilworth within the parish and we do not support them.

5.3.1 Firstly, there appears to be no justification to include the land adjacent to Old Manor Farm, other than it being perceived as “tidying up” the boundary and has poor access, as it falls to the river Tillingbourne. It is our understanding that this land remains as part of the AGLV.

5.3.2 The other proposed boundary change extends the settlement to include Tillingbourne Junior School and playing fields. We have been advised school playing fields have specific statutory protection under Schedule 14 to the Education Act, but that does not allay our concern. We are aware that many councils have sold playing fields for development over recent decades and, despite statutory protection, are continuing to do so. We consider that it is important that the Tillingbourne School playing fields remain outside the Chilworth settlement boundary and retain their Green Belt protection.

Peasmarsh Settlement Boundary

5.4 We have received no representations from residents on the proposed settlement boundary.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/18629  Respondent: 8627201 / Shalford Parish Council (Nuala Livesey)  Agent:
Section 4: Insetting of Villages- Policy D4

4.1 In response to the Issues and Options document (2013) we raised concern at the process by which the review of current Green Belt boundaries was undertaken. The process described in the Report (Green Belt and Countryside Survey Vol IV Insetting of villages and defining new Green Belt boundaries) involved a number of assessments: ‘assessing the degree of openness’, ‘assessing the location of Green Belt boundaries within the surroundings of each village’ and ‘assessing the suitability of each village for insetting’. We have never found any details of the criteria on which such assessments were based and, despite having been advised by a senior officer within GBC Planning Office that this process is objective, it continues to appear to us to be highly subjective and considerably flawed.

4.2 We note that the objective/subjective assessment process has resulted in 15 of the 24 villages within the borough being recommended for insetting. In consequence of this, certain villages in the Tillingbourne valley, with the exception of Albury, Gomshall and Shere stand to lose their Green Belt protection.

4.3 A key element in determining whether a village should be inset appears to be the perception of whether it is ‘open’ or ‘closed’. We believe that the vast majority of residents and visitors to the villages of the Tillingbourne valley would regard their character as open, as there are extensive visual connections throughout all these villages to the open countryside of the Green Belt.

4.4 In our view it would be highly undesirable to inset any of the Tillingbourne villages. They all lie between the North Downs and the greensand area to the south, and are visually connected to and from the Surrey Hills AONB. They form part of a unique industrial and landscape heritage (detailed in the 2013 application to the Heritage Lottery Fund, led by the Surrey Hills Board). We believe that all the villages in the valley should be regarded as being open and the insetting process needs to be re-evaluated. In our view this is essential if these villages are to preserve their long-term attractiveness and serve to develop the tourism business which GBC wishes to promote.

4.5 Specific issues about insetting villages of Chilworth and Shalford

4.5.1 We note that page 82 of the Report on the Insetting of Villages (Green Belt and Countryside Study Vol IV) states that ‘the settlement of Shalford contains two distinctive areas: one north and one south of the Kings Road and open Common land’. Furthermore ‘it is close to the urban area of Guildford yet has a Common, rivers and streams converging that make it seem like the countryside’. In addition the Report states: ‘Shalford is situated in the Shalford Gravel Terrace landscape’, ‘the villages of Shalford and Chilworth cover much of the area’ and ‘the landscape strategy for Shalford gravel terrace is to conserve the Commons and the pastoral farmland, the historic village centres and the characteristic relationship of the buildings edging the Common’. We note that the proposed insetting of the villages of Shalford and Chilworth is in conflict with this landscape strategy.

4.5.2 With respect to the village of Shalford we note that the part of the village to the north of Christmas Hill up to the railway line and going east to Bradstone Brook which is clearly “low density” has been omitted from the perceived Village Area identified within the Green Belt – this omission increases the percentage of built development to open land with a clear impact on the proposal that Shalford should be determined as a “closed” village. It also seems illogical to totally exclude the Common land which is in the centre of the village between two settlements from the assessment of “the degree of openness” as any observer would have a very clear impression of the village as having a substantial degree of openness.

4.5.3 As detailed above, we feel that the proposed insetting of the village of Shalford is inappropriate because the settlement shows open characteristics and in particular the southern portion of the village has relatively low density. We also question the ‘perceived Village Area within the Green Belt’, which produces a higher density of developed land than would be calculated if this ‘perceived Village Area’ were redrawn to reflect the village correctly and in particular included
the Common land. This matter should be re-addressed by the consultants in conjunction with the local residents who know their village, and we urge GBC to undertake this review as a matter of urgency.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We note and support the following policies in the Plan:

Policy P1 Surrey Hills AONB and Policy P2 Green Belt  We are delighted to see that GBC understands the importance of protecting the Surrey Hills AONB and appreciates “the high quality of AGLV in its own right” together with the presumption against development within the Green Belt. We strongly urge GBC to respect the principles of this policy by maintaining the AGLV and Green Belt status of the sites behind Shalford Village Hall and Christmas Hill (see Sections 5 and 6), and by reviewing its proposals to inset the Tillingbourne Valley villages of Chilworth and Shalford (see Section 4).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Section 6: Land Availability Assessment (“LAA”) 2016

We have reviewed the LAA being one of the major elements of the Evidence Base and we have the following observations relating to Shalford Parish.

6.1 Sites within Villages: We note that 8 sites have been identified within the LAA which would fall within the existing settlement boundaries of the villages of Chilworth and Shalford and could provide 59 new homes. If the inset proposal goes ahead as planned by GBC these sites will no longer be within the Green Belt and any such planning application will be addressed as and when they arise and we will have to rely on the provisos in Policy D4 to resist any applications which we feel to be unacceptable.
6.2 Land proposed to be inset: There is only one such site within the LAA which arises from the proposed re-drawing of settlement boundaries being Site 2286 Land at Old Manor Farm, Chilworth. We have commented on this is para 5.3.1

6.3 We note that site reference 1264 being land to the rear of Greenhill/Burnside has been discounted due to Suitability Concerns and its designation as protected Open Space in the Plan. This is very much welcomed, but in addition we would equally welcome a decision that this land should retain its Green Belt status outside the settlement boundary.

6.4 We note that site reference 2295 Chinthurst Farm, Chinthurst Lane has been discounted as “not sufficient evidence base to demonstrate that it is Previously Developed Land”. This is very much welcomed.

6.5 We also note and welcome the substantial number of “discounted sites” listed on page 544 of the LAA

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Appendix C

Infrastructure Schedule. We note the proposed road works, LRN25, being A281 Horsham Road/A248 Kings Road/A248 Broadford Road junction improvement schemes to be delivered between 2021 and 2023 by SCC at a likely cost of £2.5 - £5 million funded by the developer of Dunsfold Park. We have opposed the Dunsfold Park application due to the increased traffic volumes which will result throughout this parish and we would likely be opposed to these improvements if planning permission were to be granted after the Public Inquiry. We are opposed to any loss of Common land and believe that local residents will also be strongly opposed to the losses which would result from these proposed road improvements.
1. We support the views of Artington Parish Council that the B3000 to the east of Compton already operates well above its capacity and is subject to grid lock. This is exacerbated by the narrow humpbacked railway bridge which has barely room for the passing of the heavy goods vehicles which constantly use the B3000 between the A3 and Godalming or Guildford. It is disappointing that the opportunity has not been taken to improve this part of the road when the bridge is replaced in 2018 instead of simply replacing it with ‘like for like’ at the same width. Beyond the railway bridge the B3000 joins the A3100 at an extremely busy roundabout (Guildford Crematorium roundabout) which has frequent tail-backs.

2. The Shalford north map has a redrawn boundary of the Local Shopping Centre and this new boundary excludes 5 existing retail outlets along Kings Road to the east of the reduced new boundary. We believe that this primary shopping area should continue to extend along the Kings Road to the east as far as the Guildford Wine Shop. The reduction in the area will put the sustainability of the village at risk by limiting the Local Shopping Centre.

3. In looking at any new developments we do not see, in Policy D4, that there is any policy on light pollution. This is a general national concern and Guildford Borough Council could take a lead by introducing some constraints on light pollution for all new developments throughout the borough and perhaps look further to a policy on light pollution on existing properties. We have no further comments other than those previously submitted on the earlier version of the Local Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

In our response to the July 2016 Submission Local Plan we expressed concern in Section 1 of our response that the OAN, following the Brexit vote, needed to be re-assessed and GBC duly did so. We note the resultant decrease in the OAN but we continue to question whether the revised number is appropriate as the Brexit negotiations for the UK's exit from the EU are still at a very early stage and the impact on UK economic growth and net international immigration is totally uncertain.

We note the phased implementation of the housing units but believe that the OAN should be re-evaluated after the Brexit negotiations are complete and our economic future is a little more predictable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

2. Para 2.13. This states that "facilities to assist pedestrians in crossing roads are commonplace". Whilst it is difficult to argue with this statement we feel that they are insufficient and further crossings are certainly required in this parish on the A 248 and the A 281 for the use of both young and elderly residents. We also believe that changes in speed limits through the villages make it difficult for all road users to travel safely.
Wanborough Parish Council has reviewed the proposed revisions to the Local Plan. In general we are supportive of the revisions made, many of which appear to have taken into account the comments and suggestions submitted in respect of previous Local Plan consultations, by local organisations and residents.

In particular we welcome the additional focus on Guildford town centre residential development, the objective of greater containment of student accommodation on Surrey University Campus land (thus reducing pressure on lower cost residential property elsewhere) and a clearer acknowledgement in the Local Plan of the severe existing traffic congestion and road infrastructure and access problems associated with the A3 and A31. Unfortunately however, there appears to be no regional solution or funding in sight to resolve this infrastructure issue.

We believe the A3 / A31 road infrastructure problem is so severe, as evidenced by the daily rush hour traffic jams and local road gridlock in the event of the smallest of accidents on the A3 (or any of its slip roads), that we remain firmly against the proposed Blackwell Farm residential development (Policy A26). For this reason, Wanborough Parish Council is supporting the submission of Compton Parish Council against the development of this specific site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comments on Guildford Borough Transport Strategy

The description of the current transport networks in Guildford is a good one, though it excludes the poor bus network present in Guildford as well as the pedestrian environment.

Whilst the improvements are nice to have, some of them are not in the control of GBC, such as rail and strategic road improvements. There is a need to better explain some of the improvements, such as “local traffic management and environmental schemes” what are these and would these be sufficient to mitigate the expected increase in traffic numbers. These schemes should have been identified in the iterative use of the strategic transport model to identify, maybe not the detail, but the level of magnitude that these schemes would be.

Looking at the indicative programme and costs, some of the costs seem to be an underestimate of the likely cost of the scheme and there is no indication on who would foot the bill. It is not sufficient for the developer’s to foot the bill as these schemes would be added to the cost of development, together with affordable housing etc, and would affect the viability of any development. There is no guarantee that the developers would end up paying for any highway scheme.

In conclusion, this strategy is very aspirational, with no guarantee for delivery.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Comments on Strategic Highway Assessment

This work was carried out by Surrey CC on behalf of GBC using their county wide traffic model. This model is widely used in Surrey and therefore I have no comments on the principles and objectives behind the model.

According to the report, Guildford is made up of 68 zones mainly concentrated in the town itself with larger zones representing the outlying areas. For a countryside model this would be sufficient. However, to assess the impacts of the proposed draft Local Plan it would have been expected that the outlying zones are subdivided to better represent the population in the area, eg: Worplesdon is represented by 1 zone however there are 3 large villages (Wood Street, Fairlands and Jacobs Well) each of these having traffic on the road network in the peak periods. This is similar in the other outlying areas.

This being said, the assessment has been along acceptable lines, it would have been expected that the Base 2009 flows be included in this assessment for comparison purposes only. With reference to the 2009 flows in the model, these are some 7 years old and would normally be out of date. It would have been expected that an assessment should have been carried out to ensure that these flows were still relevant. This appears not to have been done. Although, looking at the DfT counts for the A322 and A323, the Annual Average Daily Flow (AADF) appears to have little or no growth from 2000. Sample checks have been made of the DfT traffic survey sites in Guildford and a similar pattern can be found. This would appear to suggest that the level of traffic at AADF level supports the use of 2009.
Information on Waverley development sites and the growth rates from the surrounding Boroughs should have been included. In addition Woking and Mole Valley development should have been identified for inclusion rather than using the general DfT growth rate.

All growth rates sites and trip generation information should have been included in the report. This being said the total vehicles generated appear to be of the right order.

The vehicle trip distribution adopted for this assessment followed an acceptable methodology for this type of strategic assessment. As this is a strategic assessment of a local plan, and little detail is known, only the accesses to the strategic sites should have been included. This would enable a more accurate assessment of the traffic impacts of these sites and hence would better inform the infrastructure assessment. It is an iterative process. Little is known as to whether the proposed mitigations would be sufficient to cater for current, future or future with development flows.

The Level of Service assessment is an acceptable methodology in transport assessments and gives a comparative assessment between the 6 categories.

The conclusion indicates that there would not be a severe impact on the highway network in Guildford for the local plan quantum of development and the major highway improvements (Highways England). This may be true when looking at Guildford as a whole, however there are pockets of severe congestion problems now which would get far worse with development. As stated previously this should have been an iterative process which should have identified areas for further work and assessment.

On a final note, it appears that the draft Local Plan housing numbers need the Highways England improvements.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Comments on Topic Paper: Transport

Whilst it is true that the government has committed to long term funding to support delivery of the Highways England Schemes, it is well known that as governments change, funding commitments can change, or there is a review of government spending. Therefore, it would be prudent not to base development plans just on these major schemes. Indeed the strategic transport assessment indicated that without these schemes the impact of the proposed development on the highway network would be far worse than the assessment concluded.

While more sustainable transport is always an acceptable ideal, the infrastructure for this transport has to be provided at an early stage of development and going to places people wish to go. Without this in place people will not be persuaded to get out of their cars and use sustainable transport. An example of this is that currently cyclists have to use the current road network, there is little space on these roads to provide cycle lanes. This implies that the whole picture has to be looked at.

The Reasoned Justification at paragraph 4.6.23 of the Proposed Submission Local Plan now states that:
“The Sustainable Movement Corridor will be implemented in sections during the plan period, largely on existing roads and with the urban extensions at Blackwell Farm, SARP and Gosden Hill Farm, and some sites in the town centre, required to make provision for the corridor.”

This is not acceptable as there is no guarantee that the route will ever be completed. The route should be built through Guildford first and then extended if and once development comes along.

Whilst rail and strategic road schemes are welcomed, these cannot be delivered by GBC and are in the control of other institutions who will have other pressures on the available capital and elsewhere on the network. Therefore while it is acceptable that they are included in the draft Local Plan, these should be caveated that these may or may not be delivered during the plan period and that these should not form the basis of development quantum.

Surrey County Council prepared the Options Growth Scenarios Transport Assessment Report (OGSTAR) (January 2014) for Guildford Borough Council in advance of the Regulation 18 public consultation in 2014. The report identified a number of highway “hotspots” relating to the various scenarios assessed. Whilst the baseline would be useful for the Reg19 consultation, the other scenarios should not be used for this. The Strategic Assessment report looked at the top 30 and this document only looks at the top 10.

The document sets out where the sustainable corridor will be. The extent of the corridor and its purpose is acceptable, though the seven wards should have been named. However, parts of the corridor depend on delivery by developers. This could lead to holes in the corridor as developments come along at different times. This corridor should be delivered as a whole to serve existing residents. With extensions as and when new developments come on stream.

There is nothing in this document about supporting existing bus networks. Having a good public transport network could encourage existing car users out of their cars into buses. A good sustainable network would be required to ensure any expansion to meet the needs of new developments has a good foundation to build on.

The same can be said of cycle and pedestrian networks. If a good base network is not present then it would be difficult to build a sustainable network to meet development needs.

Before any new park and ride site is proposed, an in depth analysis of existing sites will need to be carried out. This, together with the users of car parks in the town centre would lead to a better understanding of whether or not a new site would be viable.

Comment ID:  PSLPA16/2364  Respondent:  8627393 / Worplesdon Parish Council (Gaynor White)  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Worplesdon

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The following existing employment land within Worplesdon parish should be protected:

- The Pines Industrial Estate, Broad Street
- Oak Hill, Wood Street Village
- Hunts Farm and Frosbury Farm, Gravetts Lane
- 148 Oak Hill, Wood Street Village
- Cheesman Bros, Broad Street
- Sandiacre Nurseries, Frog Grove Lane
- Frog Grove Farm, Frog Grove Lane
- Clasford Farm, Aldershot Road
- Sylvester’s Garage, Aldershot Road
- The Guildford Flooring Co. Aldershot Road
- Russell Place Farm, Frog Grove Lane
- Riverside Business Park, Clay Lane
- Woodlands Farm Nursery & Reclamation, Wood Street Village
- Fairlands Farm

Russell Place Farm – The inclusion of Russell Place Farm as a SANG in the Local Plan on page 296, in our opinion amounts to pre-determination of planning application no: 13/P/01453, which has not yet been decided by the Borough Council despite the application being submitted almost three years ago. A site visit was undertaken on 16 June 2016 after the s19 public consultation period has commenced.

With respect to all Traveller pitches we would expect DCLG Planning Policy for Traveller Sites August 2015 to apply.

The inset map for Wood Street Village is incorrect as it does not show the common land on Oak Hill. See attached map.

Conclusion:  Worplesdon Parish Council believes that the Submission Local Plan: Strategy and Sites is unsound.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
| A22 | Land north of Keens Lane – 140 homes and a care home with approximately 60 beds | OBJECT as there is a current lack of infrastructure, including waste water infrastructure, to support development on this site. The narrow road cannot be widened due to the house called “Timbers” (of local heritage interest). Impact on the Grade II listed building called “Pitch Place House”. Proximity to Whitmoor Common SPA/SSSI. Bats, owls, moths. Worplesdon Parish Council objects to the proposed relocation of the urban boundary at this point. |
| A23 | Land north of Salt Box Road – Allocated as a burial ground | Support subject to full infrastructure improvements being provided to allow safe access for all users. Concern about access both vehicular and pedestrian. Proximity to Britten’s Pond, which forms part of the ordinary watercourse leading to the River Wey from which drinking water is abstracted. The suitability of the site is for the Env. Agency to decide. Worplesdon Parish Council objects to the proposed relocation of the urban boundary at this point as it is not necessary to facilitate a cemetery in accordance with para 89 of the NPPF. |

</tbody>
</table>

Lack of infrastructure and increased surface water run-off would affect Wood Street Village (particularly Pound Lane/Baird Drive) and Fairlands. The proposed accesses from the A31 and Gill Avenue would be inadequate to support such a development. Indeed access onto the A31 would be in the AONB. In addition there would be an adverse impact on the following Ancient Woodland, Strawberry Grove, Dean Bottom, Manor Copse and a strip of Ancient woodland at Wildfield Copse. The Infrastructure Study para 3.10 states there is insufficient waste water infrastructure for this site.

1. Introduction

Land Management Services Ltd was commissioned by Compton and Worplesdon Parish Councils to undertake a Natural Beauty Evaluation of land to the east of Flexford, in the vicinity of Blackwell Farm, Down Place and Homestead Farm to the north of the Hog’s Back. This evaluation is linked to the ongoing Surrey Hills Area of Outstanding Natural Beauty (AONB) and Surrey County Area of Great Landscape Value (AGLV) boundary review. A report prepared by HDA titled Surrey County Council LCA Phase 2, Surrey Hills AONB Areas of Search, Natural Beauty Evaluation (October 2013) included a natural beauty evaluation of land to the north of the Hog’s Back, as part of the County wide AONB/AGLV boundary review. This review describes Areas of Search extending to the full AGLV boundary with recommended areas for inclusion within a revised AONB boundary based on the findings of the evaluation. The evaluation was undertaken in accordance with ‘Guidance for assessing landscapes for designation as National Park or area of Outstanding Natural Beauty in England (Natural England 2 March 2011).

The HDA report recommends extension of the AONB boundary to the north of the Hog’s Back to include an area described as ‘Area of Wooded Rolling Claylands extending down from the chalk ridge’ (Area 12-1). A copy of the relevant extract from the HDA report including the Natural Beauty Evaluation for Area 12-1 against the Natural England criteria and mapping showing the original Area of Search and recommended area for inclusion within the AONB as part of the boundary review, are included in Appendix 1 to this report.

The 2013 HDA report recommends inclusion of land to the north of the Hog’s Back chalk ridge with a northern boundary broadly defined by West Flexford Lane between the village of Flexford and land on the western edge of Guildford. The conclusions to the evaluation for Area 12-1 state:

‘There is a gently sloping transition northwards from the top of the dip slope, but vegetated roadides, hedged/treed field boundaries and woodland blocks form a relatively robust east-west northern boundary, beyond which urban influence increase(s) in places’

This evaluation prepared by Land Management Services Ltd has been prepared on behalf of Compton and Worplesdon Parish Councils (with additional support from Wanborough) in order to:

• Provide a more detailed Natural Beauty Evaluation of the areas excluded from Area 12-1 in the HDA October 2013 Report
• Assess the degree to which the excluded areas contribute to the natural beauty and setting of the Hog’s Back
• Provide a comparative assessment of the areas within the original Area of Search included and excluded in Area 12-1

This evaluation has been carried out in accordance with the ‘Guidance for assessing landscapes for designation as National Park or Area of Outstanding Natural Beauty in England’ (Natural England, 2 March 2011). Appendix 1 of the Guidance provides an Evaluation Framework for

Natural Beauty Criterion. This describes six criterion or factors with associated sub-factors and example indicators to inform a Natural Beauty Evaluation. The six ‘Factors’ or criteria are:

• Landscape Quality
• Scenic Beauty
• Relative wildness
• Relative tranquillity
• Natural heritage features
• Cultural heritage

The October 2013 HDA evaluation was carried out in accordance with the Natural England methodology and also includes a brief concluding section titled ‘Specific Issues addressed when identifying extent of Area 12-1’.

For ease of comparison the study area evaluation covered by this report is set out to an identical layout to the Study Area sheets within the HDA report (see Appendix 1).

Preparation of this report has involved the following:
• Desk top review of the HDA report, and other earlier landscape assessment reports which have contributed to the boundary review, principally:
  ◦ Review of Landscape Assessments within the AONB (Alison Farmer Associates, March 2012)
  ◦ Surrey Hills AGLV Review (Chris Burnett Associates, 2007)
• Desk top review of County and Borough Landscape Character Assessments:
  ◦ Guildford Landscape Character Assessment and Guidance (Land Use Consultants January 2007)
  ◦ Surrey Landscape Character Assessment – Guildford Borough (HDA April 2015)
• Desk top review of other relevant documentation, principally:
  ◦ Surrey Hills AONB Management Plan 2014-2019
  ◦ Guildford Borough Core Strategy and Local Plan documentation
• Site visit on 28th April 2016

We have also reviewed the Surrey History Centre Historical Maps for the evaluation area, principally the Ordnance Survey 1897 and 1934 editions.

This report is set out as follows:

1. Baseline Landscape Character Assessments
2. Landscape Policy Context
3. The Surrey Hills AONB
4. Evaluation against Natural Beauty Criterion
5. Conclusions and Recommendations

2. Baseline Landscape Character Assessments

Full descriptions and key characteristics for each of the character areas are given in the respective 2007 Guildford and 2015 Surrey LCAs. The Guildford Assessment also includes an Evaluation and overall Landscape Strategy together with Landscape and Built Development Guidance. The recently published Surrey LCA largely adopts the same two principal landscape character areas as described in the Guildford LCA for the land covered by this evaluation. These are:

• Wanborough Wooded Rolling Clayland(s)
• Hog’s Back Chalk Ridge

The Guildford LCA also includes a Rural-Urban Fringe Assessment which describes two sub character areas on the western edge of Guildford:

• Wanborough Wooded Clay Lowlands: Rydeshill-Fairlands Rural-Urban Fringe
• Hog’s Back Rural-Urban Fringe

2.1 Wanborough Wooded Rolling Clayland(s)

The majority of the land covered by this evaluation is located within the Wanborough Wooded Rolling Claylands Character Area. The description of the character area in the Guildford LCA includes this reference to the land in the vicinity of Down Place:

‘There are many mature hedgerow trees and occasional field trees, often oaks, the remnants of former hedgerows and woodlands or of 18th century parkland for instance at ... Down Place to the far south east of the area’

The Guildford LCA also references the twelfth century deer park including the remnant features of ‘Strawberry Grove and hedgerow boundaries representing the former extent of the park’, on the western edge of Guildford. The Surrey LCA references ‘historic landscape patterns’ as a key characteristic.

The Guildford LCA also highlights the importance of ‘Views to the unsettled chalk ridge of the Hog’s Back form a rural backdrop to the area’.

This attribute is also identified in the Surrey LCA
These aspects combined with a ‘peaceful rural character’ are identified as some of the key attributes of the Wanborough Wooded Rolling Claylands Character Area.

The Rydeshill-Fairlands Rural-Urban Fringe assessment (described in the Guildford LCA) identifies the importance of the land on the western edges of Guildford in ‘containing residential sprawl and creating the sense of a quick transition from the town to rural landscape.

The southern-most section of the area covered by this evaluation falls just within the Hog’s Back Chalk Ridge.

2.2 Hog’s Back Chalk Ridge

Both the Guildford and Surrey LCAs identify the drama of the chalk ridge and the panoramic views, north and south as defining characteristics of the Hog’s Back. Both the Surrey and Guildford LCAs identify the significance of views to and from the ridge. The more regular field pattern associated with the chalk downland is identified in both assessments. The Guildford LCA also references the importance of the historic parkland, with remnant parkland trees associated with Down Place, Flexford House and Poyle Park. Both assessments identify the noise and visual impacts associated with the A31 as detracting features.

The Guildford LCA Hog’s Back Rural Urban Fringe assessment references the importance of the land in providing ‘the setting to and views from Guildford’ and the desire to maintain the ‘essentially undeveloped rural character’ of the land. The assessment notes that:

The setting of Guildford and the AONB are both highly sensitive to any small scale incremental change.

3. Landscape Policy Context

Paragraph 115 of the National Planning Policy Framework (NPPF) states:

Great weight should be given to conserving landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty, which have the highest status of protection in relation to landscape and scenic beauty.

This principle is taken forward in planning policy at a local level in the Guildford Local Development Framework and Local Plan. The Guildford Planning documents also reference the relative importance and weight to be attached to land within the AGLV, subject to the AONB boundary review.

4. Surrey Hills AONB

The Surrey Hills AONB is described in the AONB Management Plan as ‘an intriguingly diverse landscape characterised by hills and valleys, traditional mixed farming, a patchwork of chalk grassland and heathland, sunken lanes, picturesque villages and market towns’. The AONB encompasses both the North Downs and Greensand Hills with intervening lowlands and valleys. It is a landscape with a diverse underlying geology and as, a consequence, enormous diversity in the features which define and characterise the AONB. The definition of Natural Beauty as referenced in the AONB Management Plan also recognises the influence of human intervention and management on the beauty of the AONB:

‘Natural Beauty is not just the look of the landscape but includes landform and geology, plants and animals, landscape features and the rich history of human settlement over the centuries’

Areas of Outstanding Natural Beauty: A Guide for AONB Partnership Members, Countryside Agency, 2001 (CA 24) These are important considerations in this Natural Beauty Evaluation, since in assessing whether land within the AGLV merits inclusion within the AONB, this should be evaluated against all landscape typologies or characteristics associated with the whole of the AONB, not just the landscape feature immediately adjoining the land, in this case the chalk ridge of the Hog’s Back.

5. Evaluation against Natural Beauty Criterion

The HDA recommended area for inclusion within the AONB (Area 12-1), as described in the HDA October 2013 report, is shown on the extract from the supporting plan to the report below (Figure 1). The full Area of Search and proposed area for
inclusion within the revised AONB boundary are shown on the drawing included with Appendix 1. Figure 2 (overleaf) shows the current AONB Boundary, Area 12-1 and the five sub character areas identified as part of this evaluation. The remainder of this section includes a Natural Beauty Evaluation of a series sub character areas identified as part of this evaluation, against the Natural England Criteria, together with photographs illustrating the character and condition of the landscape. These are presented in the form of a table consistent with the HDA evaluation. The final section of each table includes an assessment of the key qualities of each sub character area and an assessment of the relationship between the sub character area with the adjoining areas within Area 12-1. This section also assesses the natural and scenic beauty of the landscape in the context of key characteristics associated with the whole of the Surrey Hills AONB and concludes whether each sub character area should have been included as part of Area 12-1. Representative viewpoint locations included in the evaluation are shown on Figure 4 (Appendix 2).

Figure 1: Extracts from HDA Plans showing the Area of Search (left plan) and proposed Area 12-1 for inclusion within the revised AONB (right plan)

Figure 2 LMS Sub Character Areas

<table>
<thead>
<tr>
<th>Location/Sub Character Area</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Area 1 Land to the east of Flexford</td>
<td>Stronger urban influence on fringes of Flexford. Planted woodlands and field boundaries in variable but mainly good condition. Landscape pattern typical of smaller field pattern around Flexford and Wanborough. Few large woodland blocks. No ancient woodland.</td>
</tr>
</tbody>
</table>

| Scenic Quality                          | Less distinct character than land south of West Flexford Lane which has strong visual and physical relationship with chalk ridge of the Hog’s Back. Lane provides physical and visual separation. Properties influence rural character on the edge of the settlement and along the lane. |

| Relative Wildness                      | Settlement edge and traffic noise. Managed arable landscape. |

| Relative Tranquillity                 | Traffic noise from A31 evident but not intrusive. Other influences associated with settlement edge. |

| Natural Heritage Features            | Relatively indistinct natural landscape pattern or irregular fields bordered by hedges with few strong or defining landscape features. No larger woodland blocks of ancient woodland. |
### Cultural Heritage

No known major cultural heritage associations.

### Relationship with Area 12-1 and Conclusions

This sub character area is visually and physically distinct from Area 12-1. The landscape lacks a strong or defining character and bears little relationship with Area 12-1 and is not significant in views to and from the Hog’s Back.

Agree with the boundary to Area 12-1 as shown. Area does not merit inclusion within the AONB.

---

#### Viewpoint 1:
View east from the village of Flexford showing land within Area 12-1 and land excluded to the north of West Flexford Lane

#### Location/Sub Character Area

Area 2 Land to the east of Pond Hill

#### Landscape Quality

Declining influence of settlement on landscape character. A few isolated properties on west Flexford Lane. Landscape of larger fields with broad views to both the north and south. Landscape character and pattern and land use very similar north and south of the lane. No ancient woodland.

#### Scenic Quality

Large field pattern, but with wide expansive views to the, mainly to the south. Few significant landscape features or defining characteristics.

#### Relative Wildness

Managed arable landscape, but declining influence of settlement edge. Broad views with few visual detractors such as pylons or incongruous built development.

#### Relative Tranquillity

Traffic noise from A31 evident but not intrusive.

#### Natural Heritage Features

Large fields with indistinct field pattern. Woodland fringes to east associated with Wildfield Copse.

| Relative Tranquillity |
Greater sense of tranquillity relative to land to the east and south east due to the declining influence of the A31.

Natural Heritage Features

Strong landscape pattern with origins dating back largely to 18th century parkland associated with Down Place. A number of substantial woodland blocks including smaller areas of Ancient Woodland associated with Wildfield Copse.

Cultural Heritage

Former parkland associated with Down Place.

Relationship with Area 12-1 and Conclusions

The landscape has a distinct parkland character with high landscape and scenic qualities. In many respects the relative wildness and tranquillity are assessed as being greater than adjacent land within Area 12-1. The landscape shares many defining characteristics and attributes associated with lowland estates elsewhere within the Surrey Hills AONB. The boundary to Area 12-1 cuts across this landscape and does not seem to follow any clear landscape features or reflect a defining change in landscape character, quality and scenic quality.

Area does merit inclusion within the AONB on the basis of distinctive landscape character and scenic qualities. It is recommended that the boundary to Area 12-1 be reviewed to follow the southern edge of Wildfield Copse.

Viewpoint 4: View south east from public footpath to the south of Wildfield Copse. The parkland landscape shown in this view currently lies outside Area 12-1.

Viewpoint 5: View north from the southern edge of sub character Area 3. The proposed boundary to area 12-1 runs through the centre of the field.

Location/Sub Character Area

Area 4: Land to the east of Down Place and in the vicinity of Blackwell Farm

Landscape Quality

There is a strong visual and physical relationship between this sub character area and the chalk ridge of the Hog’s Back, which extends to the woodland bordering the railway line. Viewpoint 6 shows the southernmost section of this character which forms the lower sections of the dip slope to the Hog’s Back and the boundary with the AONB. This is a classic downland landscape of comparable landscape quality to the areas to the west which have been included in Area 12-1. The land further north maintains this distinctive character (see Viewpoint 7) and as illustrated in Viewpoint 11 is critical to the landscape setting of the Hog’s Back chalk ridge. This character area also includes one of the largest blocks of Ancient Woodland associated with the Hog’s Back in the form of Strawberry Copse and Manor Copse.
### Scenic Quality

A distinctive downland landscape of comparable landscape and scenic quality to land within the existing AONB boundary. The northern areas are critical to the landscape setting of the chalk ridge and are therefore considered integral to the character and scenic quality of the AONB.

### Relative Wildness

Characteristic managed arable landscape. The impact of the A31 is more significant in the southerly sections on the fringes of the existing AONB boundary. The relative wildness of this area increase further north as the influence of the A31 declines. There are limited visual, noise and landscape character impacts associated with the western edge of Guildford, despite the relatively close proximity of development and the size of the settlement (see also Sub Character Area 5).

### Relative Tranquillity

Greater sense of tranquillity to the north as a consequence of the declining influence of the A31.

### Natural Heritage Features

The southern sections provide a typical downland landscape. To the north the landscape patterns reflects origins dating back to 18th century parkland associated with Down Place. This sub character area also includes significant areas of Ancient Woodland.

### Cultural Heritage

In addition to the former parkland associated with Down Place, the land lies on the western fringes of the former medieval deer park.

### Relationship with Area 12-1 and Conclusions

The landscape has a strong physical and visual relationship with the existing AONB and is considered critical in maintaining the rural character and quality of views from the Hog’s Back (see Viewpoint 11). Much of the landscape is typical of downland on the dip slope to the Hog’s Back of comparable landscape and scenic quality to much of the land included within Area 12-1 further west (see Viewpoint 10). The landscape shares many defining characteristics and attributes associated with chalk downland within the Surrey Hills AONB.

This area merits inclusion within the AONB on the basis of distinctive landscape character and scenic qualities and the strong visual relationship with land within the existing AONB. It is recommended that the boundary to Area 12-1 be reviewed to follow the western edge of Wildfield Copse and the narrow woodland screen bordering the railway line to the north.

*image 9*

Viewpoint 6: View west from the area of publicly accessible land north of Manor Copse showing the southernmost section of sub character area 4, on the dip slope to the Hog’s Back. The existing AONB boundary is located just below the wooded ridge line (the dashed line shows the approximate line of the existing AONB boundary). The lower slopes are not proposed for inclusion within Area 12-1.
Viewpoint 7: View south from the southern edge of sub character area 4 towards the Hog’s Back

Location/Sub Character Area

Area 5: Guildford Settlement Edge

Landscape Quality

The landscape, in particular to the north (see Viewpoint 8), retains a strong rural character despite the proximity of urban development on the western edge of Guildford. Urban development and influence of the A31 are more significant to the south (see Viewpoint 9), although this area is assessed as being of particular importance to the setting of the AONB with dramatic views to and from the chalk ridge (see Viewpoints 6 and 11). The distinctive character and rural qualities diminish in the eastern sections of this sub character area, but this forms an important buffer and transitional area on the western edge of Guildford.

Scenic Quality

The principal scenic qualities associated with this sub character area lie in the outward views towards the Hog’s Back and rural land to the east. The northern sections retain something of a rural downland character, but this is not considered a landscape of high scenic quality.

Relative Wildness

Despite the proximity of the settlement edge, the northern sections retain a degree of wildness which is comparable with the more rural areas further west.

Relative Tranquillity

Similar to the assessment of relative wildness, there is a greater sense of tranquillity to the north as a consequence of the declining influence of the A31. There are surprisingly limited effects on tranquillity as a result of the proximity to Guildford, with much of the built development largely screened and limited associated noise impacts. There is some evidence of fly tipping and other activities which detract from rural character and sense of place.

Natural Heritage Features

The principal natural heritage features of interest are associated with the ancient woodland at Strawberry and manor copses.

Cultural Heritage

The land lies within the area covered by the former deer park and features such as deer leaps can be observed.

Relationship with Area 12-1 and Conclusions
The landscape forms an important buffer and transitional area on the western edge of Guildford. Although the overall landscape and scenic quality would not necessarily merit inclusion within a revised AONB boundary, the landform and woodland cover significantly reduce the potential impact of Guildford on the land further west, including views from the eastern end of the Hog’s Back.

This area does not merit inclusion within the AONB, but provides an important buffer and transitional landscape on the western edge of Guildford. It is recommended that the boundary to Area 12-1 follows the western edge of this sub character area but includes Strawberry and Manor Copses. The semi-rural transitional character of this landscape should be retained in order to conserve the currently limited impact of Guildford on the AONB and other rural land to the west.

Viewpoint 8: View south east towards Guildford from the northern edge of sub character area 5.

Viewpoint 9: View west towards Guildford from land in the southern part of sub character area 5

1. Conclusions and Recommendations

This Natural Beauty Evaluation has been carried out in accordance with the guidance produced by Natural England. Five landscape sub character areas have been identified as part of this study, based on an assessment of existing landscape character. These five sub character areas have been evaluated against the Natural England criteria and compared against the qualities and character of the adjoining land, in particular those areas proposed for inclusion within the revised AONB boundary as Area 12-1. The section below provides an overview of the Natural Beauty Evaluation for the study area and includes recommendations for revisions to the current proposed AONB boundary in the eastern part of the study area, in the vicinity of Down Place and Blackwell Farm. The current AONB boundary, proposed Area 12-1 and the recommended AONB boundary extension as part of this evaluation are shown on Figure 3 (above).

This report agrees with the conclusions of the HDA evaluation with regard to the proposed revised AONB boundary to the east of Flexford (sub character areas 1 and 2), although it is noted that land within sub character area 2 is broadly similar in terms of quality, character, condition and appearance to land south of West Flexford Lane (included within Area 12-1). This evaluation concludes that the landscape quality of the land north of the lane does not, however, merit AONB designation and is not of particular significance to the setting of the Hog’s Back, in terms of both landscape character and views to and from the chalk ridge.

This evaluation does, however, conclude that land to the south and east of Wildfield Copse, in the vicinity of Down Place and Blackwell Farm (sub character areas 3 and 4), is of a landscape and scenic quality, character and condition which should merit inclusion within a revised AONB boundary. The landscape represents many of the defining characteristics of landscapes within the Surrey Hills AONB. These two sub character areas include land on the upper slopes of the Hog’s Back ridge which is representative of classic chalk downland and areas on the lower slopes typical of former parkland estates, with field patterns and mature trees and large blocks of ancient woodland providing strong evidence of the landscape and cultural heritage of the local area. This landscape is therefore considered integral to the AONB and critical to the conservation of rural views to the north of equal if not greater importance to land to the west of Down Place included in Area 12-1 (see comparative Viewpoints 10 and 11).

The proposed boundary to Area 12-1 between Misley Copse and Down Place and between Down Place and the current AONB boundary and does not follow any defined landscape features (such as a ridge line, woodland edges, or prominent field boundary) or reflect a decline in landscape and scenic quality or changes in landscape character (for instance increased urban influences) which might justify exclusion. This evaluation recommends that the proposed AONB boundary should be reviewed in this location and re-aligned as recommended in this report (see Figure 3). Failure to do so could enable
opportunities for development which would result in significant harm to the setting of the existing AONB and the loss of landscape which is of a character and quality which merits inclusion within a revised AONB boundary.

Although not recommended for inclusion in the revised AONB boundary this evaluation notes the importance of the eastern most sections (sub character area 5) in providing the setting to Guildford and an important transitional landscape.

**image 14**

Viewpoint 10: View north west from Footpath 480 from just below the crest of the Hog’s Back ridge. The existing AONB boundary runs east to west approximately through the centre of this field at the base of the steeper areas of the dip slope. The area proposed for inclusion within the AONB as part of the HDA evaluation (Area 12-1) extends beyond the lower field boundary to include substantial areas further north (shown approximately by the dashed lines).

**image 15**

Viewpoint 11: View north east from Footpath 480 from just below the crest of the Hog’s Back Ridge. The existing AONB boundary runs east to west approximately through the centre of this field at the base of the steeper areas of the dip slope (the small clump of pines lies within the existing AONB). The area proposed for inclusion within the AONB as part of the HDA evaluation (Area 12-1) extends this to include the land around Down Place. The proposed areas for inclusion within the AONB as part of this report would include the fields beyond Down Place, enclosed by woodland and land further east (see Viewpoint 6). The dashed lines indicate the approximate boundaries of the existing AONB, Area 12-1 and the LMS recommended AONB extension.

Appendix 1: Extracts from Surrey County Council LCA Phase 2 Surrey Hills AONB Areas of Search Natural Beauty Evaluation (HDA October 2013)

**6.1.11 Chalk Ridge and Wooded Rolling Claylands RECOMMENDED ADDITIONAL AREA 12-1**

Area of Wooded Rolling Claylands extending down from the Chalk Ridge.

**LANDSCAPE TYPE: E – Wooded Rolling Claylands**

**CHARACTER AREA: E1 – Wanborough Wooded Rolling Claylands**

**NATURAL BEAUTY CRITERIA**

**Landscape Quality**

Includes large blocks of ancient woodland, such as Wanborough Wood. Field sizes are relatively large and continuous, following gentle slopes down from the Hog’s Back. Occasional glimpses of traffic on the A31 along the Hog’s Back, but no significant incongruous elements present in the vicinity.

**Scenic Quality**

Patchwork of fields and woodland rising gently up the dip slope towards the ridge, form an appealing pattern which can be appreciated as one travels through the landscape, either from the Hog’s Back, or from footpaths, tracks and roads to the north.

**Relative Wildness**

There are few roads, very limited settlement and large areas where access is limited to tracks. This lack of activity, combined with a number of woodland blocks results in a sense of remoteness in most parts. Filtered urban influence from Flexford and Ash Green reduce remoteness slightly to the north.
Relative Tranquillity

Contributors to tranquillity such as birdsong, peace and quiet, and natural-looking woodland dominate minor detractors such as glimpses of vehicles on the A31, to result in a substantially tranquil area.

Natural Heritage Features

Woodland on the gently rising dip slop contributes to the scenic quality of the area.

Cultural Heritage

Historic vernacular buildings at Wanborough Manor.

SPECIFIC ISSUES ADDRESSED WHEN IDENTIFYING EXTENT OF AREA 12-1

Largely unsettled (with the exception of Wanborough Manor area), sloping dip slope of the chalk ridge to the south. There is a gently sloping transition northwards from the top of the dip slope, but vegetated roadsides, hedged/treed field boundaries, and woodland blocks form a relatively robust east-west northern boundary, beyond which urban influence increase in places.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
A29 Land to the south and east of Ash and Tongham

OBJECT to the level of development in Ash due to the increased impact of traffic on the highway network through Worplesdon. The Strategic Highway Assessment Report carried out by Surrey County Council, on behalf of GBC concludes that the Aldershot Road (A323) would experience increased traffic congestion and have a level of service indicator which would be at least unstable or where there would be no spare capacity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/4533  Respondent: 8627393 / Worplesdon Parish Council (Gaynor White)  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A30

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

A30 Ash Road bridge

Comment: Whilst we welcome the improvement to the rail crossing for safety reasons. We are concerned about the flow rate onto the Aldershot Road into Guildford through Worplesdon. The Strategic Highway Assessment Report carried out by Surrey County Council, on behalf of GBC concludes that the Aldershot Road (A323) would experience increased traffic congestion and have a level of service indicator which would be at least unstable or where there would be no spare capacity. Therefore, some means of controlling the traffic would need to be introduced to mitigate the increased impact of traffic on the highway network through Worplesdon and the impact on accesses onto Aldershot Road (A323).

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
A46 Land to the south of Normandy and north of Flexford

**OBJECT** to the inappropriate size of the development in Normandy. Westwood Lane and Glaziers Lane, which are unclassified rural roads, as well as the two railway bridges, are unsuitable to an increase in traffic from such a development. The draft Local Plan indicates that local highway environmental improvements (these are not specified) would mitigate the transport impact from this development.

However, the Strategic Highway Assessment Report carried out by Surrey County Council, on behalf of GBC concludes that the Aldershot Road (A323) would experience increased traffic congestion and have a level of service indicator which would be at least unstable or where there would be no spare capacity. This implies that far more traffic mitigation would be required. The sewerage system is already running at capacity and could not cope with the proposed development. The parish is not convinced that there is a demand for a secondary school in this part of Guildford.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**General comments:**

Infrastructure must come first and the correct delivery sequence must be complied with. Worplesdon Parish Council supports development of the town centre (including Walnut Tree Close) which is a more sustainable location. There should be less retail and more residential development in the town centre providing the correct infrastructure is in place.

Following the precedent set by a nearby local planning authority, the parish council believes that all major developments must install all necessary infrastructure for the complete development at commencement.

Improved sewage works, enhanced transport infrastructure and improved air quality are a prerequisite to any future development.

Paragraph 3.6 of the Infrastructure Study is incorrect. The Hockford Sewage works have been omitted in error.

Locally the following infrastructure improvements would be required:

- Pedestrian facilities to meet proposed development, including a pedestrian crossing on the A323 near Hunts Farm.
- Improved cycling facilities throughout the parish and improved junctions to have the capacity to cater for existing and future traffic levels.
- Worplesdon Parish Council supports the upgrade of the pedestrian bridge between the railway station and the town to fully integrate the station with the town.
- Healthcare

Answer (if comment is on questions 1-7 of the questionnaire): ()

OBJECT as there is a current lack of infrastructure, including waste water infrastructure, to support development on this site. The narrow road cannot be widened due to the house called “Timbers” (of local heritage interest). Impact on the Grade II listed building called “Pitch Place House”. Proximity to Whitmoor Common SPA/SSSI. In part this site is within 400m of the SPA/SSSI.

Increased traffic will correspondingly increase vehicular particulates and nitrous oxide emissions, which will have a detrimental impact on Whitmoor Common SPA/SSSI contrary to the Habitats Directive, the Birds Directive and the Habitats Regulations - See Judicial Review Case No: CO/3796/2013 (21.2.2014) Ashdown Forest Economic Development LLP Claimant - and - (1) Secretary of State for Communities and Local Government (2) Wealden District Council (3) South Downs National Park Authority

This site provides an important wildlife corridor between Whitmoor Common SPA/SSSI/LNR and Chitty’s Common, Rydes Hill Common, Littlefield Common (SNCI) and Broad Street and Backside Commons (SNCI).

When assessing the suitability of this site constraints should be applied as per paragraph 119 of the NPPF.

Worplesdon Parish Council objects to the proposed relocation of the urban boundary at this point.

Support subject to the appropriate infrastructure prior to development commencing to mitigate the impact on this part of Guildford. Land for the railway station to be secured and brought in at the earliest opportunity for the benefit of the wider community.

Support the additional opportunities proposed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
OBJECT the majority of this land should be designated AONB

- Most of Blackwell Farm and the land in its vicinity is of a landscape and scenic quality, character and condition that should merit inclusion within a revised AONB boundary.

- The landscape is critical to the setting of the Hog’s Back ridge and in the conservation of rural views to the north of equal, if not greater importance, than land to the west of Down Place, which has been included in the boundary proposed by the Surrey Hills AONB Board.

- Two fields at the very eastern edge of the Blackwell Farm/Manor Farm site did not meet the AONB criteria. However, these were acknowledged to be important in providing the setting to Guildford and an important transitional landscape.

- The boundary put forward by Surrey Hills AONB Board between Misley Copse and Down Place and between Down Place and the current AONB boundary does not follow any defined landscape features (such as a ridge line, woodland edges, or prominent field boundary) or reflect a decline in landscape and scenic quality or changes in landscape character that might justify exclusion.

- The proposed AONB boundary should be reviewed at this location and realigned according to the recommendations made by Land Management Services Ltd – As per their report entitled “Hogs Back Natural Beauty Evaluation” dated May 2016, as attached.

- Failure to realign the boundary according to Land Management Services Ltd.’s recommendations could enable opportunities for development which would result in significant harm to the setting of the existing AONB and the loss of landscape which is of a character and quality which merits inclusion within a revised AONB boundary.

Lack of infrastructure and increased surface water run-off would affect Wood Street Village (particularly Pound Lane/Baird Drive) and Fairlands. The proposed accesses from the A31 and Gill Avenue would be inadequate to support such a development. Indeed access onto the A31 would be in the AONB. In addition there would be an adverse impact on the following Ancient Woodland, Strawberry Grove, Dean Bottom, Manor Copse and a strip of Ancient woodland at Wildfield Copse. The Infrastructure Study para 3.10 states there is insufficient waste water infrastructure for this site.

The Expansion of the Research Park and the proposed development at Blackwell Farm should be separate projects.

Paragraph 112 of the NPPF states Local Authorities should take into account the economic and other benefits of the best and most versatile agricultural land. Whilst the proposal to reduce the number of dwellings to 1,800 is noted, the proposed development area includes land assessed to be Grade 2, Grade 3a and Grade 3b as previously acknowledged by Guildford Borough Council.

The Parish Council wishes to express concern about how the link road will be controlled and how access and egress will be managed and refer to RGP’s Technical Note Ref: SHBL/16/3174/TN02 dated June 2017, which was jointly commissioned by Compton Parish Council and Worplesdon Parish Council, as attached. Additional accesses are required despite the number of dwellings being reduced.

For any Research Park development the surface water drainage needs to be fully attenuated within the proposed development to protect existing communities. In addition any changes that will affect the hydrology of Whitmoor Common SPA/SSSI need to be carefully assessed.
Also submitted is a Surface Water Flood Risk Assessment from JBA Consulting dated July 2017 which concludes that risk from surface water run-off as a result of the proposed change from agricultural to urban use WILL increase in Wood Street Village, Fairlands, The Research Park and Park Barn area of Guildford in the event this site is taken forward within the Draft Local Plan. Policies P4 and P5 refer.

Worplesdon Parish Council fully supports the s19 submission made by Green Balance on behalf of Compton Parish Council, as attached.

Support.

In principle this policy is supported however we would suggest the following additions:

Point 4 In terms of vehicular parking for new developments: (a) in Controlled Parking Zones, or component areas thereof, in which the demand for on-street parking by residents of existing dwellings and, where allowed, ‘pay and display’ visitor parking exceeds the supply of designated on-street parking spaces, planning permission for new residential development resulting in a net increase in dwellings will be subject to a planning obligation to require that future occupants will not be eligible for on-street residents parking permits, with the exception of disabled people who will be eligible (to be secured through the s106 agreement), and (b) for residential new development in all other areas, and for all nonresidential new development in the borough, off-street vehicle parking should be provided such that the level of any resulting parking on the public highway does not adversely impact road safety or the movement of other road users.

Point 8 Planning applications for new development will have regard to the Infrastructure Schedule at Appendix C which sets out the key infrastructure requirements on which the delivery of the Plan depends, or any updates in the latest Guildford borough Infrastructure Delivery Plan and wherever possible, there is early delivery of such infrastructure to provide early benefit to the Borough.

Point 9 Provision of suitable access and transport infrastructure and services will be achieved through direct improvements and/or schemes funded through Section 278 agreements, Section 106 contributions and/or the Community Infrastructure Levy (CIL), to which will address impacts in the wider area including across the borough boundary.

4.6.24 The Sustainable Movement Corridor will provide a priority pathway through the urban area of Guildford for buses, pedestrians and cyclists, serving the new communities at Blackwell Farm, SARP and Gosden Hill Farm including the new Park and Ride site, the new Guildford West (Park Barn) and Guildford East (Merrow) rail stations, the Onslow Park and Ride, both of the University of Surrey’s campuses, the town centre and Guildford rail station. The aim is for journeys to be rapid and reliable by bus and safe and direct on foot and by bike whilst not having an adverse impact on the existing highway network.

OBJECT to the proposed SHMA figures – which have been challenged in “A Review of the West Surrey SHMA as it relates to the Objectively Assessed Housing Needs of Guildford” by Neil McDonald dated June 2016. Updated June 2017, as attached. In accordance with para 166 of the NPPF the appropriate constraints MUST be applied by the Borough Council. In the dwelling stock estimates by local authority district: 2001 – 2015 (DCLG) the amount of new houses in Guildford has increased on average 250 per year far shorter than objectively assessed housing need figure contained in the draft local plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to policy A25 Gosden HillThere is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.Gosden Hill is located entirely within the green belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacityThe Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds WEbelieve the narrow strip of Green. Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained. WEobject to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below). The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints. Blackwell Farm is located entirely within the green belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Blackwell Farm performs all five functions of green belt, and fulfils purposes 1, 3 and 5 very strongly.  

1.1.1 Purpose 1 - “checking the unrestricted sprawl of large built-up areas”. There is huge pressure to develop on the western edge of Guildford; the University of Surrey has stated publicly that its key objective is to develop the whole of its landholdings, stretching west to Flexford Farm. This, combined with the indefensible boundary being proposed (a hedgerow rather than the existing belt of ancient woodland), will put more of the green belt and the Surrey Hills Area of Outstanding Natural Beauty (AONB) at risk of future development.  

1.1.2 Purpose 3 “assists in safeguarding the countryside from encroachment” - the proposed movement of the green belt boundary on the west of Guildford to allow for development of the University in 2004 resulted in the encroachment on countryside and the loss of working farmland (including some Grade 2) at Manor Farm. The proposed future change in the boundary would result in further encroachment and the loss of farmland including further Grade 2. The proposed road development with access road from the A31 would also effectively cut off farm access to the south of the development area leading to further urban influence on this countryside. The University’s stated key objective is to develop land which includes Chalkpit and Wildfield farms leading to the risk of further boundary change and further encroachment in future years.  

1.1.3 Purpose 5 - “assists in urban regeneration by encouraging the recycling of derelict and other urban land” Whilst all green belt assists towards this purpose, the ownership of this land by the University of Surrey with its extensive landholdings within the urban boundary (including land it leases to the Hospital and Holiday Inn, the Surrey Research Park, Hazel Farm as well as two large campuses) means that the location of Blackwell Farm within the green belt plays an even greater and direct role in encouraging the more efficient usage of urban land. Stopping development on Blackwell Farm would result in the University of Surrey investing in and regenerating, land in its ownership and delivering its commitments following the 2003 boundary review (including 270 homes for key workers, 3,125 student residences and releasing further accommodation at Hazel Farm). The University has 17 hectares of surface car parking that could be built over with offices and flats. This is a more sustainable option than building over open farmland (largely grade 2 and 3a) within the green belt. The Blackwell Farm development would result in harm to the Surrey Hills Area of Outstanding Natural Beauty (AONB), harm to an Area of Great Landscape Value (AGLV), and harm to the setting to the AONB. (Blackwell Farm forms the views into and out of the Hogs Back ridge). The NPPF is clear that AONBs should be afforded the highest level of protection in relation to landscape and scenic beauty. All development proposals within and adjacent to the AONB must conserve or enhance its special qualities. The NPPF also makes it clear that applications for major development in the AONB will be refused unless exceptional circumstances are demonstrated and the development is proven to be in the public’s interest. Guildford Borough Council has not shown that the proposed housing development or the extension of the Research Park, or the proposed link road from the A31 to Gill Avenue, is in the wider public interest. Indeed, the increased traffic through the already congested Egerton Road/Gill Avenue junction, which would result from the development, would impede emergency vehicles travelling to the Hospital and this would be very much against public interest. GBC’s Policy P1 states that, “The Surrey Hills Area of Outstanding Natural Beauty (AONB) will be conserved and enhanced to maximise its special landscape qualities and protect it from
inappropriate development. All proposals will be considered against whether they conserve and/or enhance the setting and views of the AONB”. We question how the proposal to carve a new two-lane carriageway through the AONB fits this policy, or meets para 115 of the NPPF? Finally, nearly the whole site has been identified as a “candidate area” for AONB status in the Landscape Evaluation Study commissioned by Compton, Worpleston and Wanborough parish councils. Therefore, the entire site should be treated as though it is within the AONB during this local planning process. The access to the proposed Blackwell Farm site will put additional peak hour pressure on two of Guildford’s worst congestion “hot spots”: the A31 (Hog’s Back) and the Tesco Roundabout on Gill Avenue. GBC’s proposal to create a new major route into Guildford from the west at, or close to, the Down Place private driveway, and to make this the main access to the planned Blackwell Farm development, does not appear to have been thought through. There are queues stretching back from the Farnham Road Bridge as far as the Down Place driveway entrance most weekday mornings and any traffic generated by the new development would not be able to clear the junction. In order to accommodate the volume of traffic using the new junction (generated by residents of the new housing estate, employees at the Surrey Research Park, Hospital and University, and visitors to the new school/supermarket), there would almost certainly need to be a roundabout (rather than the proposed traffic-light controlled junction) and GBC has ruled out a roundabout on grounds of landscape impact and traffic. The secondary access to the site at Gill Avenue also presents problems, and as GBC states in its Transport Assessment (14.9.5), changes planned for the Tesco roundabout will not mitigate against the increased level of traffic through the junction as a result of the Blackwell Farm development, and this in turn will impact on the Egerton Road/Gill Avenue junction, which services the Royal Surrey County Hospital. We question whether it is responsible to allow a development that would impede emergency access to an A&E department and a major incident unit. The traffic impact resulting from the development of Blackwell Farm on the strategic road network would not appear to be properly assessed but it would be alleviated in part (but not completely) by widening the A3. However, timing and funding for this work is unclear so there would be many years of traffic chaos before any widening took place (if indeed it does). More significantly, the widening of the A3 would create noise and environmental impact on the neighbouring residential areas of Onslow Village and Beechcroft Drive and a six-lane highway would cause greater severance between Guildford and Blackwell Farm and areas to the west. The NPPF states in Section 6 para 47 that local authorities should “identify a supply of specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15”. In a footnote to this, it further adds, “To be considered developable, sites should be in a suitable location for housing development and there should be a reasonable prospect that the site is available and could be viably developed at the point envisaged.” We consider that the proposed access arrangements to Blackwell Farm are wholly inadequate for a development of this scale and thus the site cannot be “viably developed”.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4794  Respondent: 8640353 / Julian Cranwell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Policy A35 Wisley

We object to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the
planning decision – a clear signal to the developers to try again. There is in any case no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

This is not an NPPF “presumption in favour of sustainable development” but a predetermined bias in favour of specific applicants, who had already been given many additional months to refine their application before it was rejected. Residents are disturbed by apparent political links between the ruling Conservative group on the Council and individuals connected to the developers, a shadowy Cayman Islands company. Policy A35 should be deleted from the plan for all the reasons the development was rejected by the Planning Committee, including:

1. Green Belt location and absence of “exceptional circumstances”.
2. Misrepresentation of the site as brownfield land: 17ha (less than 15%) is brownfield, it is adjacent to the SPA and therefore within the 400m exclusion zone for housing. The remains of the runway (14ha) are a habitat for rare flora and fauna and has never had any buildings on it.
4. Absence of adequate traffic data.
5. Further harm to air quality both onsite and nearby (e.g. the Cobham AQMA) and disregard for the health of children at the proposed secondary school.
6. Loss of high-quality agricultural land (55% of the site), in breach of national policy.
7. Disproportion of locating of over 2,000 dwellings within the ancient village of Ockham with just 159 households.
9. Cost of infrastructure required to the detriment of alternative more favourable sites.
10. Lack of local transport possibilities owing to country lanes with no footpaths or cycle ways and the distance to railway stations which have no spare parking capacity.
11. Impact on listed buildings.
12. Difficulty of SANG siting and inability to divert residents and their pets away from the SPA.
13. Extreme housing density with tiny garden spaces.
14. Damage to neighbouring communities of creating a settlement of 5,000 residents, equivalent to East and West Horsley combined, with worse light pollution, noise and traffic, and competition for local amenities and infrastructure.
15. Insufficient information about the impact on the local water table and run-off (see comments on flooding in Horsley above), and the possible aggravation of downstream flooding towards the Thames (e.g. Thames Ditton, which was under water during the winter of 2013/14). 19
16. Failure to evaluate the cumulative impact of this and nearby development sites on the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to policy A42 Clockbarn Nursery There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints. The site is part of the permanent Green Belt at Send and should remain undeveloped in order to preserve the amenity of the surrounding area. The site has very restricted access along Tannery Lane which is narrow and for most its length only capable of providing access for cars in one direction. Development of the site is not therefore sustainable or practical. Tannery Lane already provides access to a Business Park which generates a considerable amount of traffic at all times of the day including lorries. This narrow country lane cannot cope with any more traffic. Planning consent has already been granted, rather unwisely given the access problems, for 84 flats and a marina. Anymore development at this location would not be sustainable. The junction with Send Road has poor visibility and is dangerous for traffic entering and leaving Tannery Lane.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4796  Respondent: 8640353 / Julian Cranwell  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to policy A43 Garlick’s Arch There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result. We object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in Send, Ripley and Clandon will result in the character of these villages being lost and the countryside encroached. We object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well we are aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-
infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure removal of this land from the Green Belt (Policy P2). It is clear that with this site being added at the 11th hours no general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), and their health. We object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads. Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. We object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces. Many of the affected villages, such as Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems. With some 5000 houses being proposed close to the village of Send and Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians. We object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. We have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways. Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services. Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable. We object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. We have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse. We object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health. We object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2). It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to the inclusion of the land for new on/off ramps at Burnt Common (A43a). The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved. We object to the proposed Infrastructure Schedule (Appendix C). The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to policy A44 Send Hill. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints. The proposed development is not sustainable because of poor infrastructure. Send Hill is a single track country road and too narrow to provide sufficient access to the site for travellers or accommodate the potential new levels of traffic the proposed development would bring. The site is a high quality green belt amenity area within beautiful surrounding countryside and would be spoilt by the development. A Wasteland Solutions environmental report on Send Hill dated March 2004 gave evidence of past ponding of water in the excavated area. Further development would disturb the water table and increase risk of flooding to surrounding properties. The site was used as a GBC registered landfill site and shown on the 1963-8 Ordnance Survey maps as “refuse and slag heap”. It is therefore unsuitable for such a development on health reasons. On the 1971 Ordnance Survey the site is shown as a “refuse tip” prior to when proper
licensing/registration was required. The date of the landfill works predates the 1999 EU Landfill Directive regulations. We therefore believe that there is a danger that any disturbance would be health hazard due to the unknown materials. GBC has installed gas monitoring wells on site since July 2000. One well recording methane gas discharge. A Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005 - Identifies the proposed site as GBC recorded landfill site Ref GU/11/LLC with type of waste not identified. The date of the landfill works predates the 1999 EU Landfill Directive regulations. We therefore believe that there is a danger that any disturbance would be health hazard due to the unknown materials. A Southern County Searches (Sitescope Ltd) report E.2978.SN_HCP dated 5th January 2005 - Identifies proposed site GBC recorded landfill site Ref GU/12 with type of waste identified as "unrestricted". This causes concern as to what it does contain and the dangers if disturbed. An Envirosearch Report RS1100201_1_1 dated 17th February 2004 and historical map data and information from GBC has identified the site as landfill and has "areas of potentially contaminative industrial activities” and “potential risk from landfill gas migrations”. Development of this site would be a health hazard.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to policy A46 land to the south of Normandy There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints. There is unproven demand for secondary school places in the west wards that is being proposed as "exceptional circumstances" to redraw the Green Belt boundary. There is strong research evidence from SCC Education which proves existing under-utilisation in long term of secondary places in the west of the borough. There is an incorrect calculation of bespoke SANG since only 10 ha are proposed within site but the new population requires 21 ha. This will impact viability if contained in site (65 ha approx) - there is not an additional 10 ha in currently proposed SANG pre-allocated schedule in infrastructure report (Russell Place Farm) There is an incorrect evaluation of contribution of land within and between settlements to Green Belt "openness" - the previous PINS decisions in three appeals asserts "openness". GBC state there is no "openness" yet all land parcels in the site are "red" sensitivity in GBCS Vol 2 Addendum 1 & 2 and all contribute to the 3 key purposes of the Green Belt. There is a failure to engage with Rushmoor under the duty to co-operate rules in regards of traffic impact from Aldershot Urban Extension (3,800 homes) The increased commuting to Guildford plus new local vehicles (1,375 estimated) will take the A323 to over design capacity and produce perpetual congestion. The one railway bridge in Glaziers Lane + 1 railway tunnel in Westwood Lane on North Downs line are restricted (tunnel single lane) with poor geometry and have poor safety records with one fatality in last 15 years and there is no plan in the infrastructure report to widen bridge or replace tunnel (Network Rail). This will lock traffic from new development within site to the north of Flexford. C and D class roads are not designed for volumes indicated in Scenario 5. The flood risk will be significantly increased when land is developed. The site lies on the Hogs Back spring line and the land is natural SuDS. There is a stream running through the site with flood risk 3a. Civil engineering mitigation is unlikely to be effective. The site will introduce 300+ dogs and 250+ cats within 1km of TBHSPA and SANG will not stop increased disturbance and predation on the SPA.

We object to Policy D1 Making better places

We object to the absence of any reference to vernacular or historic design guidelines, even in Conservation Areas. Most of the borough, especially the rural areas, has vernacular design guidelines that are available to give suggestions as to appropriate design. These should have mandatory planning force. The monitoring of this policy is inappropriate. Why should this policy result in a reduction of the number of appeals for poor design? Should it not result in better-designed buildings?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

We object to Policy D2 Sustainable design, construction and energy

Sustainability should be an overarching ambition, conditioning the whole local plan and running through it, as claimed in the NPPF, “like a golden thread”. It should be set out clearly in Policy S1, not buried away as a minor detail in Policy D2. This policy amounts to “greenwashing”, expounding aspirational environmental targets while ignoring the plan to build dormitory towns across the Green Belt that are environmentally and socially unsustainable. These settlements will bring vastly increased car use and will lead to unacceptable traffic congestion, overstretched social infrastructure, and more greenhouse gas emissions, noise and light pollution. This policy should not be just about saving energy but about preserving the borough’s stock of natural capital, especially the countryside, from futile attempts to rig the housing market. This policy’s emphasis on Combined Cooling Heating and Power and communal heating networks is meaningless, since no such networks are available locally.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
We object to policy D3 Historic Environment. This policy clashes with the strongly pro-development agenda of the rest of the plan and fails to address the contradiction. History is unamenable to improvement, so the policy should commit the Council firmly to protecting and preserving our heritage assets from development. Instead, the specific policy pledge to “support development” that might “enhance” heritage assets leaves wide scope for abuse in the form of destructive commercialisation and financial leveraging of relevant sites. This policy is based on the false premise that Guildford’s heritage is inherently in decay. This is a developer’s charter – a short step away from the idea that the historic environment needs to pay its way to be preserved. The Council’s aggressive reviews of Guildford Museum and the Electric Theatre support this interpretation. Whatever the “reasoned justification”, the actual policy wording in the blue box leaves too many loopholes. Development close to historical assets is harmful and should be expressly prohibited. This policy fails to meet the requirements of NPPF paragraphs 126 and 131-133.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Urban development

There is a fundamental flaw in the draft Local Plan, in that there are not enough dwellings planned in urban areas, in particular, Guildford town centre. This is where the demand for affordable homes is most acute, a fact which is recognised in much of the draft Local Plan. Yet the plan then envisages that most dwellings will be built outside the urban area, so there is no continuity in the plan – if the demand for affordable homes is most acute within the town, then is where these dwellings should be built. There are sites available, for example, various sites in Woodbridge Meadows, Walnut Tree Close (including the area around the station) and North Street. Yet the focus in these areas is to provide a very limited number of dwellings, with the emphasis on additional retail space and more commercial premises. Given the profound changes in traditional retail, this is not a sustainable policy. There have been many examples of bankruptcies amongst traditional retailers, the most recent examples being BHS and Austin Reed, and previously Woolworths, Comet, etc. The British Retail Consortium forecast that by 2020 up to one third of those now employed in traditional retail could lose their jobs, due to a combination of the move to the internet and higher costs, from business rates and increases in the minimum wage. Recent figures show that online sales are still growing quickly, with more than 13% of total retail sales now made over the internet. Nor does an expansion in traditional retail chime with the objective of attracting highly paid jobs to the area – the majority of jobs in retail are low paid, with zero hours contracts and usually a pay rate based on the minimum wage. So any expansion in traditional bricks and mortar retail would create a greater demand for affordable and social housing – exactly the reverse of what is needed.

Even the major grocery retail chains have been affected by changes in retail habits – Tesco, Sainsburys, Morrisons, etc are closing some stores, with no major large stores planned. Banks and other financial institutions are still closing some branches, so changes in town centres still have some way to go – but none of these changes are recognised in the draft Local Plan, which envisages no limit to traditional retail.

There is another reason why the retail sector is unlikely to exhibit long term growth, and this is consumer debt, which has reached a level that the Bank of England have said could contribute to economic stability. This is likely to have a greater destabilising effect in the event of an economic downturn – and there will certainly be at least two of these during the life of the Local Plan. Retail spending simply cannot be maintained indefinitely at its current rate, and to plan for a large increase in consumer spending is irresponsible.

So there has to be a reappraisal of the urban development plans, with more homes provided in urban areas, in particular in the centre of Guildford, before there is any consideration of building outside the urban area. These are not separate policies to be considered separately, but hang together as part of a holistic plan. As the council own many sites in the centre, these could be made available for development within the first 5 years of the plan, with mixed housing on these sites, including new social housing, which is sorely needed. Affordable housing is simply not affordable to anyone on the minimum wage, there is a need for a considerable expansion of social housing, a need that is not adequately recognised in the draft Local Plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
We object to policy D4 Development in urban areas and inset villages

Summary

There are effectively two separate parts to this policy, both are flawed, and in the case on insetting, fatally flawed. In the case of urban development there are numerous flaws, including:

- The plan envisages a large expansion of the traditional “bricks and mortar” retail sector, but this is a sector in long term decline.
- The plan envisages that 40% of homes built will be affordable, but this does not provide any accommodation for low paid workers, for example, those on the minimum wage, who cannot afford to buy “affordable” homes, not can they pay the so-called “affordable” rent. There is a great need for an expansion in social housing, especially in urban areas, where there is a greater concentration of low paid workers such as those employed in the retail, warehousing and distribution sectors.
- The number of homes planned in the urban area is too low – there is a need for regeneration in some areas, but this is ignored and instead the plan concentrates on building homes on green field sites, which does not meet the needs for housing within the town, especially with the centre. This is not a sustainable policy as building outside the town has a disproportionate effect on road traffic.

In the case of insetting, the policy is fatally flawed, for two separate reasons.

- Firstly, it is based on an erroneous assumption. GBC justify the policy (in para 4.5.50) by suggesting, without any supporting data, that development in villages washed over by the green belt is at a lower rate than within Guildford town. This is not the case, and statistics from the ONS censuses of 2001 and 2011 show that this is assumption is incorrect. These statistics show that the growth rate in housing was higher in, for example, Effingham, a village washed over by the green belt than Merrow, a suburb of Guildford which is not washed over by the green belt. In fact, the rate of increase in housing stock in Effingham was faster than the average for the borough.
- Insetting has been based on the assumptions set out in the Green Belt and Countryside Study, but this is not referred to as part of the Evidence base. The analysis in this document was flawed to the extent that it is valueless. It has serious flaws in its methodology, includes subjective judgements, and thus its conclusions are flawed. These flaws are so serious that it should be removed from the evidence base that supports the Local Plan. However, removing the reference but retaining the decision process means that the decisions are based on flawed assumptions.

Urban development

There is a fundamental flaw in the draft Local Plan, in that there are not enough dwellings planned in urban areas, in particular, Guildford town centre. This is where the demand for affordable homes is most acute, a fact which is recognised in much of the draft Local Plan. Yet the plan then envisages that most dwellings will be built outside the urban area, so there is no continuity in the plan – if the demand for affordable homes is most acute within the town, then is where these dwellings should be built. There are sites available, for example, various sites in Woodbridge Meadows, Walnut Tree Close (including the area around the station) and North Street. Yet the focus in these areas is to provide a very limited number of dwellings, with the emphasis on additional retail space and more commercial premises. Given the profound changes in traditional retail, this is not a sustainable policy. There have been many examples of bankruptcies amongst traditional retailers, the most recent examples being BHS and Austin Reed, and previously Woolworths, Comet, etc. The British Retail Consortium forecast that by 2020 up to one third of those now employed in traditional retail could lose their jobs, due to a combination of the move to the internet and higher costs, from business rates and increases in the minimum wage. Recent figures show that online sales are still growing quickly, with more than 13% of total retail sales now made over the internet. Nor does an expansion in traditional retail chime with the objective of attracting highly paid jobs to the area – the majority of jobs in retail are low paid, with zero hours contracts and usually a pay rate based on the minimum wage. So any expansion in traditional bricks and mortar retail would create a greater demand for affordable and social housing – exactly the reverse of what is needed.

Even the major grocery retail chains have been affected by changes in retail habits – Tesco, Sainsburys, Morrisons, etc are closing some stores, with no major large stores planned. Banks and other financial institutions are still closing some
branches, so changes in town centres still have some way to go – but none of these changes are recognised in the draft Local Plan, which envisages no limit to traditional retail.

There is another reason why the retail sector is unlikely to exhibit long term growth, and this is consumer debt, which has reached a level that the Bank of England have said could contribute to economic stability. This is likely to have a greater destabilising effect in the event of an economic downturn – and there will certainly be at least two of these during the life of the Local Plan. Retail spending simply cannot be maintained indefinitely at its current rate, and to plan for a large increase in consumer spending is irresponsible.

So there has to be a reappraisal of the urban development plans, with more homes provided in urban areas, in particular in the centre of Guildford, before there is any consideration of building outside the urban area. These are not separate policies to be considered separately, but hang together as part of a holistic plan. As the council own many sites in the centre, these could be made available for development within the first 5 years of the plan, with mixed housing on these sites, including new social housing, which is sorely needed. Affordable housing is simply not affordable to anyone on the minimum wage, there is a need for a considerable expansion of social housing, a need that is not adequately recognised in the draft Local Plan.

In the detail of Policy D4, it suggests that in urban areas and inset villages planning permission will be granted provided that a proposed development:

• “Ensures that the layout, scale, form, massing, height of buildings and structures, and materials relate to the site context and its surroundings;” ....

There are several other criteria listed and the Policy then goes on to elaborate criteria specific to inset villages, as follows:

“In addition to the above, proposals for new development within inset village areas will have particular regard to:

• The distinctive settlement pattern of the village and the important relationship between the built development and the surrounding landscape;
• Important views of the village from the surrounding landscape;
• Views within the village of local landmarks.”

There are numerous development sites proposed that mean that the first criterion cannot be met, as the developments proposed do not relate to the scale, form or massing of the site surroundings. For example, in West Horsley and East Horsley, there are number of sites where this does not apply. It is proposed that a total of 3.6 km² should be removed from the green belt, with a total of 533 houses proposed on sites in East and West Horsley on a total of 29.1 ha, an average density of 18 dwellings/ha. These proposed developments are not in scale or proportion to the existing villages, and the housing density is considerably higher than existing housing density. Effectively, if these developments were to proceed, East and West Horsley would merge and become a large urban area in the green belt, totally different in character to the existing settlements, with the existing settlement pattern completely lost. Similar considerations apply to other proposed development sites, such as Flexford and Normandy. In this case, 1.3 km² would be removed from the green belt and a total of 1100 dwellings proposed on 67 ha, with an average density of 16.4 dwellings/ha. Again, the scale and form would overwhelm existing hamlets and villages, merging these to form another urban area in the heart of the green belt, with no consideration of the views of the settlements from the surrounding countryside, much of which has been given AONB status.

Thus the words of the policy statement D4 do not match the proposals contained in the draft local plan.

The “Reasoned Justification” for the policy consists of five paragraphs, 4.5.48 to 4.5.52. Of these, 4.5.48 and 4.5.49, 4.5.51 and 4.5.52 are not justifications for the policy, they are simply statements or further information. Paragraph 4.5.50 is the only attempted justification for this policy, but in fact this applies only to insetting. Paragraph 4.5.50 is factually wrong and so the justification for this policy does nor bear close examination. Parts of this paragraph are taken in turn below, to show the inaccuracies this paragraph contains.

“Historically, development has been focused in the urban areas of Guildford, and Ash and Tongham only. Development in the villages has been very limited due to the Green Belt designation which previously washed over all but one of the villages.”
This depends on how development is measured. In terms of raw numbers, this may be true, but this would ignore the fact that urban area of Guildford town contains much of the housing in the borough. Taking the increase in housing stock between the censuses of 2001 and 2011 in a specific wards reveals a much more complex picture. The village and ward of Effingham, for example, had a higher rate of adding dwellings than the average for the borough and for at least some of the Guildford urban wards. Using census data collected by the ONS, between 2001 and 2011, the number of dwellings in Effingham increased by 6.6%, whereas for the borough as a whole it increased by 5.0%. Over the same period in Merrow, a ward within the urban area of Guildford, the number of dwellings increased by only 1.2%, whilst in Normandy ward the increase was 2.6%. This analysis has not been exhaustive, but it is sufficient to show that the opening statement in paragraph 4.5.47 is incorrect, and that in some cases, proportionally, considerably more development has occurred in green belt villages. It must be incumbent on GBC to assess the facts before making false statements such as this. Opinions are not facts. ONS statistics are open to all.

In the first three months of 2016, planning applications for 11 additional dwellings in Effingham have been made, in a village of approximately 525 dwellings. One of these applications has been reduced from 6 to 4 dwellings, whilst the other 5 have been approved. This shows clearly that development within villages washed over by the green belt can occur, and that organic growth is possible. There is no necessity for insetting.

“Fifteen villages are now inset from the Green Belt meaning that development is no longer, by definition, considered inappropriate”.

Guildford’s Green Belt boundaries were established in the Guildford Borough Local Plan 1987, so are well established. There has not been any justification for the extensive green belt review that accompanies the insetting of villages, or for the removal of these villages from the green belt. According to the NPPF, paragraph 83, green belt boundary changes should be made only in exceptional circumstances, as follows

“Local planning authorities with Green Belts in their area should establish Green Belt boundaries in their Local Plans which set the framework for Green Belt and settlement policy. Once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. At that time, authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period.”

No exceptional circumstances have been demonstrated, with none given as justification in Policy D4 for the policy of insetting. Proposed green belt boundary changes are on a very large scale, as it is proposed to remove more than 6% of the existing area designated as green belt, and to create new green belt boundaries extending to more than 105 km. This is not a simple revision to the green belt, and a demonstration of exceptional circumstances is required for each change. This has not been done, not for a single proposed change.

Although Guildford Borough Council are in the process of producing a new Local Plan, this in itself is not enough to change Green Belt boundaries; the requirement to demonstrate exceptional circumstances still applies. According to a High Court judgement, Gallagher vs Solihull, issued March 30th, 2014, Case No. CO/17668/2013, there is still a requirement to prove exceptional circumstances – quotations below are from paragraph 125 of this judgement:

“However, it is not arguable that the mere process of preparing a new local plan could itself be regarded as an exceptional circumstance justifying an alteration to a Green Belt boundary. National guidance has always dealt with revisions of the Green Belt in the context of reviews of local plans…… and has always required “exceptional circumstances” to justify a revision. The NPPF makes no change to this.”

“Exceptional circumstances are required for any revision of the boundary, whether the proposal is to extend or diminish the Green Belt.”

Whilst each case is fact-sensitive and the question of whether circumstances are exceptional for these purposes requires an exercise of planning judgment, what is capable of amounting to exceptional circumstances is a matter of law, and a planner may err in law if he fails to adopt a lawful approach to exceptional circumstances. Once a Green Belt has been established and approved, it requires more than general planning concepts to justify an alteration.

Each and every proposed change to the green belt boundary requires that exceptional circumstances be demonstrated, otherwise the changes are not lawful. This has not been done by GBC, not for any proposed change.
From paragraph 130 of this judgement

"In other words, something must have occurred subsequent to the definition of the Green Belt boundary that justifies a change. The fact that, after the definition of the Green Belt boundary, the local authority or an inspector may form a different view on where the boundary should lie, however cogent that view on planning grounds, that cannot of itself constitute an exceptional circumstance which necessitates and therefore justifies a change."

"…..That, in his judgment, may now be so: but that falls very far short of the stringent test for exceptional circumstances that any revision of the Green Belt boundary must satisfy. There is nothing in this case that suggests that any of the assumptions upon which the Green Belt boundary was set has proved unfounded, nor has anything occurred since the Green Belt boundary was set that might justify the redefinition of the boundary.”

No changes that would warrant an alteration to green belt boundaries have been demonstrated by GBC, their so called “sensitivity analysis” is shallow and subjective, and changes that may have occurred since the boundary was established was discussed. The changes proposed do not meet the standards set in this judgement. Instead, GBC maintain that it is housing need that creates blanket exceptional circumstances for changes proposed to the green belt. However, this is not the case. Following a meeting with local councillors and MPs in early 2014, Nick Boles wrote to Anne Milton MP to clarify the issue of exceptional circumstances and in this letter said:

“The written Ministerial Statement of 1 July 2013 set out the Government’s concern that some recent planning decisions have not accorded the Green Belt the level of protection that was the explicit policy intent of Ministers. It made clear that the single issue of unmet need – whether for conventional housing or for travellers sites – is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development in the Green Belt.”

These quotations show that the insetting process has considerable hurdles to overcome, including as it does the revision to Green Belt boundaries that accompanies insetting. Thus the most important questions are – did the flawed Pegasus “Guildford Borough Green belt and Countryside Study” show unequivocally that villages to be inset are not open villages, making no or a minimal contribution to the openness of the Green Belt; and that there were exceptional circumstances (other than unmet housing need) that justify a change to the Green Belt, creating a new boundary around all these villages – more than 105 km of new boundary? The Pegasus study did not do this, and this was just one of its many flaws (cf Annexe XX)

As shown above, development has occurred within villages, and the NPPF made it easier for additional development to take place within the green belt, via the provisions of paragraph 89, which specifically makes it easier for limited infill to occur and on a larger scale, for affordable housing to be built within villages washed over by the green belt. These provisions came into effect in 2012, when the NPPF was adopted and so the rate of increase in housing within villages is very likely to increase beyond that observed in the period between the 2001 and 2011 censuses.

It is clear from the most recent figures for planning applications to GBC in 2016 in Effingham that the pace of development within villages is changing, even with continued green belt protection. There is no requirement for insetting villages within the green belt, and the desire to increase development within the villages is not an adequate basis for insetting.

The final part of paragraph 4.5.47 is

“In accordance with national policy, the important character of these inset villages should instead be protected using other development management policies”.

This is not national policy, national planning policy is provided by the NPPF, and paragraph 86 of the NPPF is the relevant paragraph, which reads

“If it is necessary to prevent development in a village primarily because of the important contribution which the open character of the village makes to the openness of the Green Belt, the village should be included in the Green Belt. If, however, the character of the village needs to be protected for other reasons, other means should be used, such as conservation area or normal development management policies, and the village should be excluded from the Green Belt.”
There is thus no national policy that requires insetting. Instead, a judgement should be made for each village based on its contribution to the openness of the green belt. In fact, many of the villages proposed for insetting exhibit an open pattern of development, and so make an important contribution to the openness of the green belt, for example, Effingham. This has not been considered, other than in the flawed Pegasus report, and the examination of their approach reveals how this analysis was flawed. No further consideration has been given by GBC, and so GBC’s policy of wholesale insetting does not accord with national policy, as claimed.

In itself, there are many issues with insetting, and these include:

- According to the previous draft of the Local Plan, subject to the Regulation 18 consultation during summer 2014, insetting is based largely on the findings of the Pegasus study, “Guildford Borough Green Belt and Countryside Study. This report was very poor and various parts of the study criticised by many, including some borough councillors. It is perverse to continue with any recommendations of this study. In particular, a detailed review of this report for Effingham village showed that it was inaccurate and subjective.
- The settlement hierarchy was also subject to a detailed review and again this showed that scoring methods used were inaccurate and subjective.
- Boundary changes are arbitrary, without an adequate detailed survey. There are no checks and balances to this, even though the positioning of the line can change the price of an acre of land from about £15,000 to over £1 million. There is no process to it, simply someone using a computer and a mouse – literally a mouse click can turn some land owners into millionaires. In some cases, the proposed boundary divides semi-detached houses, so that one is still inside the green belt and the other outside. In other cases, the boundary divides gardens, so that part of a garden is in, part out of the green belt. Due care and attention has not been given to producing proposed boundaries.
- In many cases, boundaries proposed do not comply with the requirements of the NPPF, which is given in the NPPF, paragraph 85, final bullet point, which states “define boundaries clearly, using physical features that are readily recognisable and likely to be permanent”.

Given this NPPF definition, treelines, hedgerows, woodlands, etc should not be considered as potential Green Belt boundaries. In fact, in some cases proposed boundaries cross open fields, with no discernible features whatsoever. These are entirely inappropriate as a green belt boundary.

It should also be noted that GBC implicitly recognise that insetting is likely to lead to more development within villages on sites that are not identified in the draft Local Plan. But there is no recognition of this in the housing target. As is noted, insetting would mean that the rate of windfall development would increase, but GBC have not provided a proper analysis of windfall development (such as that provided by Mole Valley District Council) and they have failed to recognise a higher rate of windfall development in showing how the housing target will be met – even though, via Policy D4, they are planning for it. Windfalls should be deducted from the housing target, and the need for additional sites would thus be substantially reduced. Windfall development should be properly assessed and identified within the housing target, with an appropriate increase in the rate of windfalls in any villages that are inset.1 THE BROWNFIELD OPPORTUNITY

Yes, we need a new Local Plan for our borough in order to provide a development strategy within which we can accommodate our local housing, economic and environmental needs. We do not consider that the target of 1,172 homes in the town centre takes account of the need and demand for housing or the opportunities that brownfield sites present for increasing the residential development in the core of the town which will in itself help to sustain the retail core...
by increased economic impact. The Town Centre policy needs to maximise the potential for residential development on brownfield and include as an absolute minimum the 2,551 units proposed in by Allies and Morrison for the town centre included in the masterplan 2015 which has recently been adopted by GBC. The reality is that the Town Centre has the capacity for at least 5,000 homes. The additional target capacity of 5,000 could easily be provided within the following urban sites which have the capacity for 7,500 homes:

- 2,500 homes detailed in Masterplan 2015 including Woodbridge Meadows which can itself be increased substantially
- 500 homes at North Street
- 1000 homes on current GBC car parks (25 acres) and at the station
- 1000 homes saved in the urban area if 100% of students are accommodated on Surrey University campus (17 ha of car parks)
- 1000 homes at Slyfield on the 40 ha regeneration site
- 1000 windfall infill (50 per annum)
- 500 homes on brownfield sites in villages on sites of max 1ha which do not impact Green Belt

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy E1: Sustainable employment

Response

Summary

I OBJECT because:

- the evidence base is unreliable
- there is unclear differentiation between B class uses
- only high added-value business uses are desirable, not low grade, low employment warehousing which is land hungry
- industrial and commercial businesses must be concentrated in the urban area, or existing business parks (eg Slyfield) not in the rural environment which the infrastructure is unable to support
the rural environment must support micro or high tech businesses, agricultural industries, and tourism, and these sectors must not be damaged by general industrial development which is inappropriate

**Detailed response:**

I OBJECT to this policy.

I need to distinguish between wanting to increase the added value of the economy and physical expansion, especially given the scarcity of land in Guildford. Guildford is not the place for large space hungry businesses. I believe Guildford should target high added-value small and medium sized enterprises or the headquarters of larger corporations, but not provide low added value warehousing and industrial space.

GBC appear to fail to appreciate the fundamental rationale of the Use Classes Order as a planning tool in terms of useful property market research or forward planning.

No proper analysis has been made of data held by GBC in respect of different B classes in terms of planning applications granted or evidence gathered by the economic development function at GBC without any attempt at real market demand apart from vague references to freely available market research undertaken by commercial estate agents. (See definitions of B classes at end of this policy response).

What I are left with is a fairly clumsy and poorly informed plan which clusters B classes without any appreciation of widely different employment impact and economic sustainability. E.g. B1 (mostly local office use/R&D) generates at least 5 times as much employment as B8 (distribution and warehousing).

This draft Local Plan is partly based on new findings by Aecom in the latest ELNA 2015 [Employment Land Needs Assessment 2015]. This includes the recasting of the ELNA by Aecom in 2015 which updated the ELNA 2013 prepared by GBC. I have had regard to the evidence base provided by Aecom in the 2015 ELNA and find it a more reliable evidence base for overall projected employment in the borough over the plan period in overall numbers than done previously by GBC in 2013. However, I have concern that the survey work by Lambert Smith Hampton is in the form of high level free property research that is used for the purposes of marketing their services over a wide area not specifically commissioned for the borough of Guildford and undertaken for ELNA purposes.

However, I am concerned that the research undertaken by Aecom is generally superficial and lacks sufficient detail and analysis between B1a, B1b, B1c, B2 and B8 use classes and that no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of office, research and development, light industrial, general industrial and warehousing and distribution floor space.

The lack of appreciation by GBC as to the opportunity for widely different uses being generated within B class clusters defeats the whole point of proper planning of employment uses and can significantly endanger previously good planning put forward in the previous 2003 plan. I support the concept of seeking increased investment in our local knowledge-based, high technology economy. This will provide well paid, creative jobs and generate the wealth necessary to fund the infrastructure and environment this sort of industry requires.

I need to promote the idea of new knowledge transfer in incubator units and small premises for new start up enterprises. We need to be on the wave of innovative new technology as opposed to older established businesses. High value-added industry is desirable; low tech, land-hungry older businesses which will increase congestion are not desirable.

I have concern as to the ill-informed clustering of all B classes. This is unclear in terms of market evidence required to inform effective planning. There is a failure to provide a clear understanding of business needs within the relevant area as required under Section 160 of the NPPF.

Little regard has been given in the plan to the economic reality of falling demand for B2 industrial space which is clustered with other B classes almost randomly throughout the plan.
Little regard is had to the opportunity of B1 b space as an opportunity for research and development which needs to be nurtured and preserved without the detrimental and confused clustering with other B classes both in terms of planning and promotion of a research hub.

I do not support the policy of creating Strategic Employment sites outside the urban centres.
