We object to the straightening up of the village boundary at the back of Silkmore Lane/Ripley Lane (image left) to allow building on this land would be of huge detriment to the character of the village and the pastoral scene enjoyed by all residents and visitors alike for the sake of lining the pockets of a property developer. The open fields are enjoyed by so many with the public footpath leading across the fields beyond to Ripley Lane and visitors to Hatchtands House and parkland. Orchard Cottage is a prime example of how ruthless property developers can be in putting their own, interests before those of the whole community. See image below of the house that replaced the pretty Victorian cottage- an absolute monstrosity which blights the countryside and is seen for miles and of a size and architectural style totally inappropriate for the village, particuarly given its open location. Why was this ever allowed? This could happen to the acres of land that you propose to include into the village settlement area by straightening the village boundary. Please seriously reconsider extending out the village boundary. Thank you.

3. Sustainability for West Horsley
It appears that nothing has been put forward since last year's consultation to improve the sustainability of West Horsley development sites and thus meet national policy requirements.

4 New Homes - these should be built in the towns where there is work not in the countryside. Apartments and social Housing is required particularly in Guildford. Shopping space is not a priority for Guildford town centre with the increasing trend for shopping online etc. Housing is.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Thank you for inviting me to comment on the local plan.

I am very strongly against the building of so many new houses. When the local roads are already far too full, why are we trying to make the situation even worse by bringing in more people and cars. The schools are already too full – I understand it is quite difficult to get the school of one’s choice for our children. It gets more difficult to make appointments with doctors and we are rapidly losing our green and pleasant land and our attractive villages will lose their identity.

I think it would be much more sensible to stop the ever increasing immigration figures so that all these new houses will not be needed.

Page 2084 of 3335
I would like to object to some of the plans for East Horsley on the following grounds.

1. Including The Warren and Park Horsley inside the village boundary. If Infilling was allowed, it would mean increased traffic onto the A246 from building lorries and new residents, onto what is an extremely dangerous part of the road, and where accidents occur with monotonous regularity. The Highways dept has, in the past, recommended refusal to new properties on those grounds. They are also in the Green Belt.

2. Developing Thatchers site. Thatchers is also on a very dangerous bend. Plus, we need an hotel in the village. Plus it gives employment.

3. Other sites planned for development are on flood areas, and would mean increased flooding on the roundabout onto the A3, which also occurs regularly.

4. Infrastructure in already under great strain, and the council recently stated that development would not happen unless infrastructure could cope. Already the Station car park is full, with people missing trains due to nowhere to park. The car park behind the shops is also frequently full, ditto the Village Hall and Doctor's. The schools are full and so are the doctors.

5. 3 of your proposed sights, Thatchers, Carlians and Bell and Colville, are local employers. Your stated desire to increase local employment, 4.4.1 shows that you should be encouraging local economy, not removing it for the sake of a few houses.

6. Removal of areas from the Green Belt. The Prime Minister, no less, promised that no housing would be built on Green Belt. It should be sacrosanct, previous generations fought hard for us to have it.

7. Guildford has enough brownfield sites for building, and already builds more houses than suggested by government. We really cannot cope with much more.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
With regard to any future development of planning, Normandy and Flexford’s need and priorities have not been decided by the residents. National Planning Policy Framework (NPPF) 1 ‘provides a framework within which local people and their parish councils can produce their own distinctive local and neighbourhood plans reflecting their needs and priorities of their communities.’ Evidence has shown that at least 2 years ago, documentation for A46 was submitted on behalf of Taylor Wimpey to Guildford Borough Council Planning Policy. At this stage, NO ‘Meaningful engagement was made or requested from local people’, despite NPPF 155 clearly stating that ‘early and meaningful’ engagement and collaboration with neighbourhoods and local organisations being essential.

There is no proven need for a secondary school in Normandy, yet this is one of the primary reasons and rationale as to why sites A48 and A47 (due to A47 site’s ‘close proximity to the proposed new secondary school’) have been identified as proposed sites for planning permission and building in the Guildford Borough Local Plan. Indeed, the birth rate has fallen in the last 2 years and secondary schools to the west of the Borough are under subscribed by 736. Another 480 places will be available at the new Technical College (2018) and there are approved expansions at Guildford County and St Peters. The New Hoe Valley school will have 120 places available per year, 25 places this year not taken (no catchment areas). Blackwell Farm was suggested to be a more accessible option for a school. With no proven need for a secondary school in the Normandy and Flexford area, comes no development requirement.

I purchased [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] in 2012, moving in to the property in September of that year. The property backs onto the proposed site (A47). During the process of purchasing the property, I conducted (via my solicitor) all the necessary searches as well as conducting my own due diligence. The biggest concern surrounded site A47 and whether this would ever be built upon. We were sufficiently satisfied that site A47 was in fact green belt (and privately owned) and could not and would not be built upon. As such we purchased the property.

You can imagine our surprise and immense concern on discovering the plans set out by Guildford Borough Council in relation to building on this beautiful piece of green belt land. My understanding of green belt is that, "it is a policy for controlling urban growth; the idea is for a ring of countryside where urbanisation will be resisted for the foreseeable future, maintaining an area where agriculture, forestry and outdoor leisure can be expected to prevail. The fundamental aim of green belt policy is to prevent urban sprawl by keeping land permanently open and consequently the most important attribute of green belts is their openness."

Privacy is of paramount importance to us. As things stand, we are not overlooked at any side of our property (a key reason why we purchased the property) and are afforded privacy by the trees on site A47, immediately at the back of our house, (another key reason why we purchased the property).

In fact, so magnificent are the views at the back of my property (looking onto site A47) that I have retained an open wire fence to allow me to enjoy the views and nature that site A47 supports year round. I regularly see and watch a broad spectrum of animals and birds on site A47 including, herons, blue tits, robins, wood peckers, starlings, wood pigeons, black birds, magpies, chaffinches, sparrows, owls and bats. Additionally, I see hedgehogs and toads. I also enjoy watching the 2 horses that currently reside on site A47. I’d point out also that, this proposed planning permission would bring a threat to the Thames Basin Heath Special Protection Area (TBHSPA), being within the 400m – 5km zone of protection.

As I’m sure you are aware site A47 is also a floodplain which had significant surface water on it throughout the early part of 2013 and more recently in 2015. A ditch runs directly adjacent (on site A47) to my property and the ditch was also flooded during this period and most times there is any medium to heavy rainfall. Building further properties on site A47 will not improve this situation and could ultimately cause more problems in a village with a history of flooding.

I currently reside in a cul de sac (which was a key reason for purchasing the property) and as such am not subject to any through traffic. I appreciate that one of the possible access points to any development on site A47 could be between numbers [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998]. This would mean that my property would reside on a through road, that there would be constant traffic (in both development and after completion), that my currently peaceful road would become increasing noisy, the potential for increased crime in the area, polluted with exhaust fumes and would result in my general privacy being infringed. Myself and my wife moved to Normandy with the hope that we may start a family in the future and that any children we have would be able to play freely and safely in the cul de sac. It angers me that this may not be an
option for them or any other children or grandchildren that neighbours may have. An additional point is that we moved from an overcrowded area and deliberately sought out a peaceful, semi-rural cul de sac.

I would also like to highlight my objection to the likely massive increase in traffic on both Flexford Road and Glaziers Lane as possible access points. Even if the site access is not via The Paddocks, surely a significant increase in construction traffic (and thereafter residential traffic) will cause me and my fellow Paddocks residents increased disruption in our travels in and around Normandy. Glaziers Lane is called ‘Lane’ for a reason – it does not provide adequate pavement or road infrastructure for the increased road and pedestrian traffic which both a new school and increased population in the village of at least 1100 new homes would bring.

I would also like to make the point that I am opposed to our lovely village of Normandy being cherry picked for so much unnecessary development. At least 1100 new dwellings (some of which will be social housing) would nearly double the size and population of Normandy. This would obviously put increased stress on existing infrastructure for water, sewage, gas, electricity, telephones and broadband services. As mentioned above, this would also add a massive increase in traffic which will require extensive and costly urbanisation of local roads. It would remove and destroy the rural character of the village and make Normandy a large (and probably ugly) commuter dormitory for Guildford. I do not want this.

To conclude, unsurprisingly, I will fight this proposal for housing (of any kind, including social housing). I will work in unison with my fellow neighbours and ensure that this proposal does not go ahead. For all the reasons given above, it angers me that you are even considering it as an option.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the ‘insetting’ in the Green Belt of the three most settled areas of Normandy and Flexford for 2 reasons.
   1. Firstly, no case has been made on the grounds of ‘exceptional circumstances’ for removing this land from the Green Belt, and by so doing, GBC will make it easier for further attrition of the Green Belt to take place in future as a result of extensions to the settlement area on adjacent Green Belt land (Traveller site at Palm House Nurseries (Policy/Site A50).
   2. Secondly, all three settlements contribute to the openness of the Green Belt and should therefore remain ‘washed over’ by it. This view has been supported by Planning Inspectors, who have indicated while rejecting recent appeal decisions that the land at Flexford and Normandy contributes to the openness of the Green Belt. ‘Insetting’ will make it much harder to sustain this crucial openness in future.

With regard to the 10,000 homes that will likely be built within a 10 mile radius of Normandy as a result of various Local Plans, this will put more pressure on our roads and will have a detrimental impact on our village along with other rural communities. I would urge GBC to commit to the improvements that are necessary to the roads and other infrastructure for the scale of these developments ahead of construction, such as the new road bridge and footbridge at Ash to enable the closure of the level crossing (ref. LRN21).
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

• disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
• directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A47

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I support the removal of sites A46 and A47 from the 2017 Plan, which were strongly opposed by Councillors and other Normandy residents due to the fact that they would have significantly and irretrievably destroyed the character of Normandy and Flexford. Additionally, a significant burden would have been placed on the local transport and other infrastructure.

I am pleased that Guildford Borough Council (GBC) have taken note of the many objections to these proposed sites and also of the findings of the revised Sustainability Appraisal 2017 and removed them from the Plan.
With regard to A47, as the reason for this amendment highlighted in the summary of key changes to the Proposed Submission Local Plan, ‘the site continues to meet the criteria for a Site of Nature Conservation Interest (SNCI), which is incompatible with development.’

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the removal from the Green Belt of homes in Guildford Road, the northern end of Glaziers Lane, Flexford, Walden Cottages and Palm House Nurseries Traveller site. Placing these houses outside the Green Belt could enable development within these areas at a much higher density and will give greater success for planning applications. I believe that this is the wrong decision as these areas contribute to the “openness of the Green Belt”.

I am pleased to see the reversion of the Green Belt boundaries to similar to their existing levels (with the exception of ‘insetting’) as a consequence of the withdrawal of the previously proposed strategic sites (A46 and A47). In particular, I welcome the protection this offers to our countryside. Specifically, I welcome and support the acknowledgement that the land lying between Normandy and Flexford (the previous site A46) is particularly sensitive in Green Belt terms as it contributes significantly to the ‘openness’ of the Green Belt in this area, as well as being of high grade agriculturally and therefore of importance in terms of the rural economy.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
This email registers my strong objection to the proposed Local Plan, particularly as respect to the Horsleys. I note in horror that you propose to withdraw the villages from the Green Belt and, entirely wrongly and as a “flag of convenience” for your Plan, redefine them as semi urban. I am sure you are well aware of the Planning Practice Guide but, since your Plan seems to ignore at least part of them, they are set out below for your convenience.

**Once established, Green Belt boundaries should only be altered in exceptional circumstances.**

When considering any planning application, local planning authorities should ensure that substantial weight is given to any harm to the Green Belt. ‘Very special circumstances’ will not exist unless the potential harm to the Green Belt by reason of inappropriateness, and any other harm, is clearly outweighed by other considerations.

I recognise that there is a housing need in the Borough. I also recognise that Guildford has to respect the NPPF. Further, I recognise that certain of the brown field sites proposed in the Horsleys - Thatcher’s Hotel and Bell and Colvill - have some measure of rationality in terms of size and scope.

However, I totally disagree that destruction of Green Belt and extraordinary levels of proposed development in two villages (which would indeed become semi urban if your ill thought out Plan is executed) is in any way necessary at this juncture.

You make it plain in your presentation that your considerations were first for urban development, then for brownfield sites, then for areas of infill and finally for Green Belt. This again makes sense.

It is, however, at this point, that it stops making sense because it was represented clearly to me by the planning officer that this is, of course, a whole Plan. In other words, you are seeking to pass the Plan in its entirety. Once accepted, you will be seeking quick wins. What will be quicker than building on green fields? So much easier than an urban development. When challenged, the planning officer agreed with my assessment. In other words, the nonsense about Green Belt being the last to be considered is totally misleading. In fact, it will likely be the FIRST to be developed. That is a travesty.

It may well be that we need the number of houses in the Borough by 2033 that we envisage today, but equally it may well not. Such is the political uncertainty that realistic projections are well nigh impossible. To build on Green Belt way, way ahead of any necessity to do so is borderline criminal vandalism. The Council is perfectly well aware that, once the Horsleys are removed from the Green Belt, there will be a deluge of planning applications which, given the extraordinary scale of your awful current Plan, will be almost impossible to resist. The utter ruination of two wonderful VILLAGES (that is what they are) would be an appalling misuse of your power.

I urge the Council to think again. The Plan absolutely MUST be altered to a structure whereby housing is built in the same order as was assessed: urban, brown field, infill and finally, and only when absolutely necessary AT THAT TIME AND NOT BEFORE, Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

**Comment ID:** PSLPA16/3640  **Respondent:** 8731361 / Caroline Robertson  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Normandy and Flexford

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing to strongly object to the proposed planning permission for sites A47 (land to the east of the Paddocks) and A46 (land to the south of Normandy and north of Flexford) within the Guildford Borough Local Plan.

A46 was not proposed or considered as a strategic site in the first consultation. In fact, in the 2014 consultation, this site was ‘safeguarded’ and was not removed from the Metropolitan Greenbelt. ‘Exceptional circumstances’ have not been demonstrated or approved by the inspectorate. In the Solihull ruling, boundary cannot be drawn around sections of land and urbanised, (A46/A47).

With regard to any future development of planning, Normandy and Flexford’s need and priorities have not been decided by the residents. National Planning Policy Framework (NPPF) 1 ‘provides a framework within which local people and their parish councils can produce their own distinctive local and neighbourhood plans reflecting their needs and priorities of their communities.’ Evidence has shown that at least 2 years ago, documentation for A46 was submitted on behalf of Taylor Wimpey to Guildford Borough Council Planning Policy. At this stage, NO ‘Meaningful engagement was made or requested from local people’, despite NPPF 155 clearly stating that ‘early and meaningful’ engagement and collaboration with neighbourhoods and local organisations being essential.

There is no proven need for a secondary school in Normandy, yet this is one of the primary reasons and rationale as to why sites A46 and A47 (due to A47 site’s ‘close proximity to the proposed new secondary school’) have been identified as proposed sites for planning permission and building in the Guildford Borough Local Plan. Indeed, the birth rate has fallen in the last 2 years and secondary schools to the west of the Borough are under subscribed by 736. Another 480 places will be available at the new Technical College (2018) and there are approved expansions at Guildford County and St Peters. The New Hoe Valley school will have 120 places available per year, 25 places this year not taken (no catchment areas). Blackwell Farm was suggested to be a more accessible option for a school. With no proven need for a secondary school in the Normandy and Flexford area, comes no development requirement.

I purchased 36 The Paddocks in 2012, moving in to the property in September of that year. The property backs onto the proposed site (A47). During the process of purchasing the property, I conducted (via my solicitor) all the necessary searches as well as conducting my own due diligence. The biggest concern surrounded site A47 and whether this would ever be built upon. We were sufficiently satisfied that site A47 was in fact green belt (and privately owned) and could not and would not be built upon. As such we purchased the property.

Privacy is of paramount importance to us. As things stand, we are not overlooked at any side of our property (a key reason why we purchased the property) and are afforded privacy by the trees on site A47, immediately at the back of our house, (another key reason why we purchased the property).

You can imagine our surprise and immense concern on discovering the plans set out by Guildford Borough Council in relation to building on this beautiful piece of green belt land. My understanding of green belt is that, "it is a policy for controlling urban growth; the idea is for a ring of countryside where urbanisation will be resisted for the foreseeable future, maintaining an area where agriculture, forestry and outdoor leisure can be expected to prevail. The fundamental aim of green belt policy is to prevent urban sprawl by keeping land permanently open and consequently the most important attribute of green belts is their openness."

In fact, so magnificent are the views at the back of my property (looking onto site A47) that I have retained an open wire fence to allow me to enjoy the views and nature that site A47 supports year round. I regularly see and watch a broad spectrum of animals and birds on site A47 including, herons, blue tits, robins, wood peckers, starlings, wood pigeons, black birds, magpies, chaffinches, sparrows, owls and bats. Additionally, I see hedgehogs and toads. I also enjoy watching the 2 horses that currently reside on site A47. I’d point out also that, this proposed planning permission would bring a threat to the Thames Basin Heath Special Protection Area (TBHSPA), being within the 400m – 5km zone of protection.

As I'm sure you are aware site A47 is also a floodplain which had significant surface water on it throughout the early part of 2013 and more recently in 2015. Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. APPENDIX C

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

2. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

3. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY A25 - Gosden Hill Farm**

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 – 2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  
Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).
The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council’s eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.
Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. **POLICY D4**

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

---

1. **POLICY E1**

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E2

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. **POLICY E5**

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

1. **POLICY E6**

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E7

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H1

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY H2**

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY H3**

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.
The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. **POLICY I1**

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1. **POLICY I2**

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

#### 1. POLICY ID3

I OBJECT to poor air quality concerns (Policy ID3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

#### 1. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.
The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires
there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

1. **SITES - POLICIES A1 TO A57**

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P4
I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Re: Responses to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objections to specific policies and matters within the Plan.

1. **POLICY S1**

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)
The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY S2

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these
adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN Ire not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Questions posed by Guildford Borough Council as part of its consultation.

Questions from GBC

24.A. Question 1: The evidence base and submission documents

The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence. The evidence base documents contributing to the preparation of the plan are listed in Appendix D and can be found on our website (links open in a new window).

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

ANSWER

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up-to-date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
24.B. Question 2: Legal Compliance

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole is legally compliant? Please provide the following information being as precise as possible:

• why you consider it is or is not legally compliant and
• what change(s) (if any) you consider necessary to make it legally compliant, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

24.C. Question 3: Soundness

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound? Please provide the following information being as precise as possible:

• why you consider it is or is not sound and
• what change(s) (if any) you consider necessary to make it sound, explaining why this is the case.

ANSWER
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

5. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

6. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

7. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

8. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

9. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation.

10. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.

11. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound.

12. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018.

13. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars.

14. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.

15. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

16. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

17. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and...
foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I trust that the objections made above are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to removal of Brownfield sites (A4) from the Plan

Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is totally unacceptable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the extended development in the Green Belt (Policy P2, Site A43)

I object to Garlick’s Arch (A43) being extended and the resulting urban sprawl. There are no exceptional circumstances for this site being removed from the Green Belt, as required by the National Planning Policy.

I object to the allocation of 6 Traveling Showpeople sites in A34 Garlick’s Arch

The allocation of 6 Travelling Showpeople plots is the designated formula for 1500-1999 homes on the same site according to the 2017 Local Plan. There should be no inclusion of any Travelling Showpeople plots in A43 Garlicks Arch as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

I object to the potential and ill-defined increase in housing allocation at A43 Garlick’s Arch

The potential of an increase from 400 houses at site A43 Garlick’s Arch will be extremely harmful to the rural nature of the surrounding villages of Ripley, Send and Clandon and will cause coalescence of these villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the unfair imbalance of the Plan across the borough.

With the removal of site A46 from the Plan (with its proposed 1100 houses) and reductions of housing planned in this version of the Plan in other parts of the borough the Plan has become even more biased against the North East of the borough. Guildford Borough is over 100 square miles. Of the11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **The Plan is self-inconsistent in respect of traveller sites.**
   A50 Whittles Drive, Normandy, shows on the Site details: “Allocation: The site is allocated for approximately 14 Travelling Showpeople plots ...” Clearly A50 more than covers the total “need” of 8, (page 40, 4.2.22.) and so no “need” exists for this in site A43. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/1033  Respondent: 8731649 / Ian Slater  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **The inclusion of site A58 Burt Common, removes the need for A43 Garlick’s Arch)**

GBC’s own reasons for including Garlick’s Arch A43 in the 2016 version were

1. a)The site [A43] location affords greater separation between Send Marsh/Burnt Common and the proposed site allocation at Gosden Hill Farm, … (site allocation A25) [ than the Burnt Common site did ]”
2. b)The site [A43] provides the employment floorspace needed in the plan to help meet identified needs”

Since A58 Burnt Common is now in the Plan (2017) the separation issue is clearly being ignored as BOTH sites (which are almost contiguous) are in the plan; therefore GBC are not following their own guidelines and objectives.

Since A58 Burnt Common is now in the Plan (2017) more than the “required” industrial space is available there, so there is no reason for Garlick’s Arch to be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp171/122  Respondent: 8731649 / Ian Slater  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H2
I object the change in policy on affordable homes (Policy 4.2.23)

The previous version of the plan stated that “Developers will be expected to provide land for affordable homes at nil value”.

The 2017 version says: Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.”

So the developer doesn’t even have to provide any ‘affordable’ homes, just to make a negotiated payment to the Council. This is very unlikely to result in the construction of these ‘affordable’ homes.

Furthermore, the 2016 Plan used to state (section 4.2.40) “In general, a need to make profit over and above the standard developer’s profit in order to fund other community benefits will not be accepted as an abnormal cost [i.e. a reason for not delivering affordable houses]. That has now been removed, thereby accepting that needing to make greater than normal profit is to be an acceptable reason not to deliver affordable homes. This is a shocking sop to the developers.

I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

“We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan”.

The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlicks Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object removing Send Business Park from the Green Belt (4.3.15).
Send Business park is a very small collection of local businesses in a very rural area in the Green Belt. There can be no justification for it’s insetting (removal) from the Green Belt, and indeed GBC have not even attempted one. Therefore no “exceptional circumstances”, as required by the NPPF can be claimed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Council's intention to declassify large areas of Green Belt in and around the borough and, in particular, the proposed excessive number of houses earmarked for Send and adjacent parishes. My reasons for objecting are as follows:-

- the housing numbers have been calculated on flawed data
- it will result in urban sprawl which is precisely what the Green Belt was designed to protect
- in addition to the earmarked sites, removal of Green Belt status will open the floodgates for further planning applications from developers and local landowners
- there is insufficient infrastructure to support such wholesale development
- local schools are at capacity now
- roads are at a standstill at peak times already and building on this scale will add hundreds more vehicles
- the Villages Medical Centre is already running to stand still
The plan has been fraught with controversy from its first airing and, despite overwhelming opposition to most of its proposals, planning councilors have completely ignored the 20,000 odd written objections. I object most strongly to the plan and trust that if Guildford Borough Council doesn't rethink its position, the planning inspector will reject it altogether.

Comment ID: pslp171/114  Respondent: 8732321 / John Freeland  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H1
Use of Land - Policy H13 the wording relating to density of housing in Policy H1 has been removed, leaving the door open for developers to use land inefficiently or inappropriately.

This plan seems to have been drawn up entirely for the benefit of avaricious developers, supported by a few greedy landowners, most of whom do not reside in this area and are therefore totally unconcerned at its destruction. The evidence base is heavily flawed, misleading by error/omission and skewed completely towards housing development in the Green Belt at any price to the local environment, and complete disregard for the aspirations of local residents.

Quite simply, if this plan is allowed to go ahead it will be an absolute disaster for the local community and I sincerely trust there will be sufficient objection to force the council to re-think its position.

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Wish to register objections to the local plan job 13,860 new proposed houses, as not sustainable.

>>> There will be damage to local communities, these will not be villages any more.

>>> We need to check unrestricted sprawl of large buildup areas, We need

>>> to protect our Green Belt land and fields.

>>> We live here because it is a village and surrounded by green fields and farmland.

>>> We like the village atmosphere, knowing our neighbours and meeting them in our villages, being part of a small community.

97% of comments are against this policy, and the damage to local communities, there will not be any villages any more, an unrestricted sprawl of large built up areas.

We need to encourage development of urban land.
Leave some of our villages in Green Belt areas, we must preserve our countryside for future generations.

>>> I OBJECT

>>> To the huge influx of traffic this planning will cause.

>>> Our little country roads cannot cope with the traffic as it is. The condition of our local roads is Appalling! Pot holes everywhere, causing dangerous driving, trying to avoid the holes, damaging cars.

>>> We have narrow country roads, not suitable for hundreds more ‘large family cars’.

>>> We don’t want yellow/white lines all over our village and road signs, which are quite unnecessary, which will only increase with your planning proposals.

The footpaths are few and far between, and narrow. We don’t want huge expansion of roads and paths to accommodate thousands more people just because they will have thousands more cars!

>>> I OBJECT

>>> To the lack of facilities suitable for thousands more people using our Doctors Surgery.

>>> We cannot get an appointment within a week as it is, there is nowhere to expand the Surgery, are you planning to build another?

>>> The local hospital The Royal Surrey is overcrowded already, there is nowhere else for us in our villages fro go

To the influx of thousands more families with school age children, when our local junior school, The Raleigh, is full and they want to move to a larger site now! If they took one of your sites and you took over their 2 sites, at least the planners would have a few hundred more houses and the school would be able to accommodate more new children, but only a few! Not the hundreds you propose to bring into our little villages.

>>> We cannot accommodate these new children into the local Senior schools either. Where do you propose to build these new schools?

>>> We are villages, people want to move here, as we did because of the quiet, the fields, the village atmosphere, and the safety of a village.

>>> I OBJECT

>>> there is no infrastructure which has been confirmed.

>>> The flood plans in these areas get flooded every winter. West Horsley is known for being a flood plain area, totally unsuitable for hundreds more houses.

>>> Thames Water has advised that the current wastewater network is unlikely to support the demand from all these developments!

>>> I OBJECT

>>> To the overcrowding at our shops, we have two little parades of shops for the use of the two villages, not thousands more people using them. There is only limited parking, only one little supermarket, Budgens, and no access to any larger Supermarket.

>>> The train does not take us into Cobham centre, only Stoke D’Abernen, miles away from the Cobham town Centre, how do all these new people get to ships?
>>> We have no bus which has a regular timetable to Cobham, our nearest town, there would have to be in place public transport regularly into Cobham and Guildford.

>>> I OBJECT

>>> To the state of our roads when thousands more people will be using them. The Drift, which is a narrow lane from West Horsley to Effingham, is already used by lorries, coaches from the schools, and many local businesses, it is full job potholes from constant use, how is that going to cope?

>>> All our roads are narrow, we are a village, the drainage is already a problem through the village every winter.

>>> BROWNFIELD ARE BEING IGNORED

>>> We need more houses in the centre of towns, not out in our villages, therefore using more cars, more pollution, more congestion on our already crowded roads.

>>> Recycle derelict and urban land.

No exceptional circumstances have been disclosed to Green Belt boundaries should not be changed through the planning process

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Again no infrastructure : Transport?

>>> No regular busses to take people to the only 2 train stations near by, being Horsley or Effingham, which are both totally unsuitable for thousands more commuters either from the Wisley site or from the Horsley proposed sites.

>>> These train stations are small and serve the villagers at the moment, but could not accommodate thousands more commuters.

>>> The Wisley site needs busses to take the population to Guildford, Cobham.

>>> They would need a Doctors Surgery, schools, junior and senior as all the local schools are over subscribed in the surrounding areas

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

APPENDIX C

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially

Page 2137 of 3335
confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A25 - Gosden Hill Farm

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 – 2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highecotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.
The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.
It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.
I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY D3

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY D3

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY D4

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Attached documents:

Comment ID: PSLPP16/13922  Respondent: 8732993 / Michael Weber  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E1

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E2

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional
circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY E5

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY E6

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )
POLICY E7

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H1

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.
Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Comment ID: PSLPP16/13931  Respondent: 8732993 / Michael Weber  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2
I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

**POLICY H3**

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150
homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium
development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I
believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued
to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected
to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity -
only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers
under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy
mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that
cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including
the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear
market housing cannot be included.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY II

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy II)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy, as it is, is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.
There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY I2

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY I3

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement.
assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/13943  Respondent: 8732993 / Michael Weber  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2  

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )  

Answer (if comment is on questions 1-7 of the questionnaire): ( )
I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. **The plan says that “allocating these sites does not grant planning permission for development.”** However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant...
infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I
assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Answer (if comment is on questions 1-7 of the questionnaire): ()
**POLICY P4**

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY S1**

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1).

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including
Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

In addition to the increase in congestion that would inevitably occur, there would be a human cost in increase traffic accidents.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**POLICY S2**

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

*The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.*

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or
study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.
This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I rented a full sized allotment for 9 years on this, the Aldershot Road site. I had to give it up due to bad knees and my husband was suffering with prostate cancer and I was finding I couldn't devote the time to cultivate such a large plot of land. I did miss it but late last year was offered as much as I thought I could realistically cultivate on what was being set up as a "Community Plot", The idea was to bring people like me back into the allotment community or to let people rent a piece of land which was manageable for tem. My little quarter plot has really given me an escape as I am a carer for my husband who has various metal and physical health issues. I is of a size where I don't have to disappear for an entire day to keep it cultivated.....2 hours is just nice without leaving me feeling guilty and if I can get there in the morning I can do my work and get back home before hubby wakes up!. I also means I can grow fresh vg for my family. I have a large garden but most is unsuitable for veg growing.
This allotment site has been there since before the First World War so is of historical value. They must be protected at all costs and should be included in the list of green spaces within the definition of “green and blue infrastructure” in para 4.6.31 of the draft plan (page 116).

The site also boasts a self help group (WASHA) which runs an educational program for local school children and novice gardeners.

This site must stay and holders also require adequate vehicular access and parking, especially if those who will be loosing their plots on the Bellfields site (also for housing!) wish to relocate to ours.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
9] I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10] I object to the continued inclusion of a site (the former Wisley Airfield - known as Three Farm Meadows - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/3193  Respondent: 8733857 / Tony Edwards  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
6] I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

7] I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8] I object to the fact that air quality concerns have all but been ignored. Air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3189  Respondent: 8733857 / Tony Edwards  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2
Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 houses

I object to the draft Local Plan for 10 fundamental reasons:

1. I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2. I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban sprawl stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Employment land – POLICY E1, E2

Contrary to national trends, too much potential development land within the town centre is being allocated for retail or commercial development rather than housing. High added value businesses are welcome in the borough, but much of the employment land is designated for retail or low added value employment floorspace, which only exacerbates current issues such as lack of low cost housing and heavy traffic. Sites such as the Burnt Common Triangle, currently in the Green Belt, are inappropriate for heavy industry,

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/550  Respondent: 8733857 / Tony Edwards  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
**Use of land – density POLICY H13.**

The paragraphs relating to density in Policy H1 have been deleted. To ensure developments make optimal use of space there must be a policy to cover minimum and maximum densities. Without a policy to cover density, there is a risk that developers will use land inefficiently, putting additional pressure on the countryside and undeveloped land. This deletion is inappropriate.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**AONB – POLICY P1 and POLICY E5**

The policy relating to AONB weakens the protections offered, and (unlike previously) does not have restrictions on non-major development. This is a move in the wrong direction. Previously all proposals were considered against the 5 key tests – now development in the AONB seems to be more acceptable. This is weaker, not stronger, and is contrary to huge responses from the public in previous consultations and the weight of protection given to AONB in the NPPF.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**Green Belt – POLICY P2, POLICY P3, POLICY E5 and sites**

Exceptional circumstances must be demonstrated in order to develop Greenbelt yet despite the weight of public opinion against weakening of this policy, 70% of new housing development will be in the countryside, of which, 58% will be in Greenbelt. By definition, this is not an exception and no attempt is made to demonstrate exceptional circumstances, in line with the requirements of the NPPF. Insetting villages is of concern since restrictions within the settlement boundary raises concerns over loss of character.
The Rural Economic Strategy covered in 4.51a, promoting affordable homes everywhere in the countryside including the AONB as a main aim, is a mechanism for promoting overdevelopment in our countryside. It has not been subject to full public consultation and is based on data, which is not up-to-date.

Three major strategic sites – Blackwell Farm, the former Wisley Airfield [Three Farms Meadows] and Gosden Hill Farm – are in the Green Belt. Previous consultations show that, in line with the NPPF, the public would prefer to use brownfield land in the urban area first.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Housing number – POLICY S2

The housing target proposed, of 12,426 is based on assumptions that have not been made public and includes flaws that have not been corrected in the modified SHMA (verified by professional analyst Neil MacDonald of NMSS who concluded that an annual housing figure of 400 per year would meet Guildford's overall need). The phased approach (more homes built towards the end of the plan period) is appropriate in order to permit necessary infrastructure but open-ended targets where an unknown figure is held back until after the plan period is not a reduction but a postponement and does not allow for optimal planning or transparency.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Points that need to be addressed include:

Provision of nursery and school places - Schools in the area are already heavily oversubscribed, with no additional schools where will the influx of children be educated? Nurseries are already at maximum capacity - parents of young children will not have the choice of going to work if they cannot find affordable child care facilities in the local area.

Rail Travel - Those living in Horsley and the surrounding villages, who need to work in London, need viable transport options to commute into work. Peak rail services are already at maximum capacity and over crowded. Minor problems on
the network regularly cause huge difficulties for commuters getting to and from work. Car parks at Effingham Junction and Horsley stations are already full most days and cycling is positively dangerous in the dark given the very poor state of the roads and lack of street lighting. Given the distance of these new developments from the station, lack of paths and lighting, walking is not realistic for most.

**Roads** - No new roads are identified in the plan. Roads in the Horsleys are already inadequately sized, in a dreadful state and continually subject to roadworks and repair which regularly cause delays. Roads are very busy at peak times and could not take the inevitable significant increase in work and school traffic that would result. This would lead to gridlock at rush hour and significant noise and air pollution. Limited traffic controls also mean that speeding is a common problem - the number of accidents and injuries will continue to increase.

**Utilities** - Roads in the area are continually being dug up by utility companies due to deficiencies in the existing infrastructure. These need to be upgraded to cope with the increased demand. Water pressure in many parts is already too low and broadband speeds are not great. There appear to be no plans to roll out fibre based communications in Horsley and so the extra demand on existing telecoms infrastructure will just slow down access for everyone. This will put a stop to any home working aspirations residents might have.

Many people have chosen to live in the area due to its village nature and heritage which makes it special. The surrounding countryside is also a huge benefit to the quality of life and health of local residents and London visitors who flocked to the area in the recent 2012 Olympics. This quality of life is something that should not be under estimated and therefore protected at all costs.

In summary, the plan is not fit for purpose. It does not make sense from an environment and economic perspective to keep adding homes to local villages without consideration for the infrastructure which will slowly erode the viability of the village. That plan is poorly thought through and everyone will suffer. Do we really want or even need the Guildford borough population to be subject to uncontrolled increase year on year?

There are also many other options which should be considered first before the easier and higher profit option of bulldozing green field sites. There are numerous brownfield sites which could be identified with a little effort and developed using innovative solutions. Poorly utilised existing sites such as sprawling car parks around Guildford town centre which could be more efficiently utilised. London is also not very far away and is better sized to accommodate the population numbers proposed.

I object to proposals to put up large swathes of Green Belt land up for development due to the irreparable damage that will be caused. I hope you are able to give my comments the attention they deserve and urge you to rethink the proposals outlined in the plan.

I would urge you to remember that once our outstandingly beautiful countryside and Greenbelt land has been bulldozed to make way for homes, it will be gone forever, for us and our generations to come.

I am compelled to write after having read the latest version of the Guildford local plan. It shocks me that Guildford council, who has been voted in to look after the needs of local residents, could put such a set of concerning proposals forward and has still not taken on board the numerous concerns of its residents. If adopted, the repercussions will be regretted by all of us and our generations to come.

I object to the proposal to remove the Horsleys from the Green Belt and in turn destroy large amounts of Green Belt land around London - the exceptional circumstances required have not been demonstrated. This land was put in place to stop the inevitable urban sprawl and control pollution levels. This land should be considered sacrosanct and protected for local residents and visitors to enjoy, as an area of outstanding natural beauty and as an important habitat for local wildlife.

I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Keens Lane development plans are inappropriate.

This is Green Belt area.

Vehicle volumes are already a problem and the infrastructure just cannot cope. A narrow road and even if work done at local junctions it just extends the problem to Rydeshill, Saltbox or other congested junctions.

The near vicinity of Whitmoor common means there will be an inevitable impact on wildlife, in particular as is a wildlife corridor between Whitmoor and Broadstreet Commons

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to

14,000 (690 per year) is unjustified, unproven and been subject to scrutiny.

The number excludes currently granted permissions and potential windfall sites which extends this number even higher.

This number is too high and is leading to numerous issues around lack of infrastructure and inevitable encroachment on Green Belt; there is lack of protection for our countryside.
At this level there are certain to be delays that will create problems down the line with pressure to bring in locations currently excluded.

There is no specific policy in the Local Plan to prevent inappropriate development within current communities such as Fairlands, e.g. garden grabbing. Which the government has stipulated should not be part of development plans. As above delays elsewhere will lend weight to such applications in order to meet the excessively high number. There needs to be a specific policy.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Plans A25, A42, A43, A43a, A44

I object to all the above plans as they are an unconstitutional attack on the local Green Belt & based on unsubstantiated housing needs

I also object on the grounds that they are a disproportionate development in our area of the borough.

They do not take into consideration the lack of schools & medical facilities but above all they will have a devastating effect on the A247. Plans already agreed – ie the Send Marina, & the additional houses on the Vision Engineering plot will be more than enough to bring this road to rush hour standstill & the Tannery Lane crossroads, already difficult for large commercial vehicles will become an even more hazardous accident spot.

The short section of the A247 between the Burnt Common roundabout & the new north & south A3 slip roads will have to absorb all this new local traffic but it will also attract those who currently go through Ripley.

A traffic survey of current levels would surely confirm that there are certain times of the day when we can take several minutes to gain access to the road.

I most strongly object to the inevitable increase in air pollution & noise. It is worrying to think that we would have to endure even higher levels of both, a further increase will be a serious threat to health & well above acceptable levels.

Comment ID: PSLPA16/3966  Respondent: 8734785 / Bill Houghton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North
I object to all the above plans as they are an attack on the local green belt and are based on unsubstantiated housing needs. I also object on the grounds that they are a disproportionate development in our area of the borough.

They do not take into consideration the lack of schools and medical facilities but above all they will have a devastating effect on the A247. Plans already agreed – ie the Send Marina, and the additional houses on the Vision Engineering plot will be more than enough to bring this road to rush hour standstill and the Tannery Lane crossroads, already difficult for large commercial vehicles will become an even more hazardous accident spot. Plan A42, the Clockbarn Nursery development will be especially detrimental at that spot.

The short section of the A247 between the Burnt Common roundabout and the new north & south A3 slip roads will have to absorb all this new local traffic but it will also attract those who currently go through Ripley.

A traffic survey of current levels would surely confirm that there are certain times of the day when we can take several minutes to gain access to the road.

I most strongly object to the inevitable increase in air pollution and noise.

It is sad to think that we would have to endure even higher levels of both when in our gardens, any further increase will be a threat to health and too much to bear.

To me it is transparently obvious that all the developments are blatant attempts to make money at others expense. The people behind them will make money by making all the local residents' lives less enjoyable. Traffic problems are already bad. It is difficult to leave the house and turn left in the morning. Turning right would be unthinkable.

If the plans are allowed to go ahead this will be a triumph of greed and conspiracy of greedy people against the common good.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the policy A42 change at Clockharn in Tannery Lane because it will add a further burden to the A247 especially at its junction with Tannery Lane. This will have an worsening affect on traffic flow from the Old Woking t-junction all the way up to Clandon. It will also destroy the Green Belt nature of this area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I object to the policy A43 change at Garlick's Arch as: This is a precious natural barrier between Ripley & Send, It has long been established as an ancient woodland, It is an area susceptible to flooding, It will add extra traffic to existing roads which are already carrying more than are manageable at busy times of the day.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I object to the policy A58 at Burnt Common because

a. The new proposal refers to a 'minimum' development whereas the original proposal asked for a 'maximum' allocation. In other words no set limit. Any requirement for industrial or warehousing should be part of the Slyfield site & should in no way encroach on our Green Belt.

b. The 2017 Land Need Assessment made it clear that a reduction in demand for such development was envisaged

c. This would have a disastrous affect on local traffic flow, the short section of the A247 between Burnt Common roundabout & the bridge over the A3 already creates real & dangerous problems at busy times of the day when trying to join the almost continuous flow of traffic.

We object to Guildford Borough Council’s draft Local Plan Proposals to build 1800 houses, an industrial park and a highway on the slopes of the Hog’s Back at Blackwell Far, which will:
- Destroy views from the Hog’s Back ridge of a nationally designated Area of Outstanding Natural Beauty
- Remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
- Increase tailbacks on the A31 and traffic congestion
- Result in rat-running through local roads
- Add to Guildford’s pollution

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.
The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.
The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)
It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/12939  Respondent: 8735873 / David and Gillian Allan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/12965  Respondent: 8735873 / David and Gillian Allan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  PSLPP16/12932  Respondent:  8735873 / David and Gillian Allan  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/12937  Respondent: 8735873 / David and Gillian Allan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/12972  Respondent: 8735873 / David and Gillian Allan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of...
of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.
The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

Comment ID: PSLPP16/12944  Respondent: 8735873 / David and Gillian Allan  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.
Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The
fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.
There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as III as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as III as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it
cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

</tbody>
</table>

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a
“plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN Ire not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is disproportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

2. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.
1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation.

2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.

3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound.

4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018.

5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars.

6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.

7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

8. The proposal for Garlick's Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

<td></td>
<td></td>
</tr>
</tbody>
</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I am writing to object most strongly to the above building proposal, it would make the biggest traffic jam every morning and evening, that Guildford has ever seen, local services would not be able to sustain the increase in extra population surge, and who are these houses for? Because local people would not be able to afford them, unless of course you can give them a 100 per cent mortgage.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

DISPROPORTIONATE NUMBERS OF NEW HOUSING IN EAST HORSLEY I OBJECT to 533 new houses. This is a disproportionate number for this part of the borough. 23% of the Plan's new housing is in the area of the Horsleys, Ockham, Ripley and Send, a rural area that has only 0.3% of GBC population. The infrastructure will collapse under the strain and chaos will ensue.

SITES

1. SITES IN EAST AND WEST HORSLEY

I OBJECT to Sites A36 to 41 inclusive. They will effectively destroy these historic villages. New housing will put intolerable strain on facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewerage and surface drainage to name but a few. The housing density is inappropriate and far greater than anywhere in the locale at present.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
2. THREE FARMS MEADOWS SITE (Wisley Airfield) Policy A35 I STRONGLY OBJECT to the plonking down of a new town of some 2000 new houses in the middle of the greenbelt in the middle of nowhere. This planning application was unanimously rejected by the GBC planning committee recently on 14 separate grounds. The site is miles away from any public transport, is on a site that floods regularly and is surrounded by narrow, muddy, winding, unlit country lanes. The addition of at least 4000 cars will cause a constant gridlock throughout the area. An assumption that residents will walk or cycle to reach amenities is totally unrealistic. An infirm pensioner cannot be asked to walk along these narrow lanes to the doctor and to expect them to cycle is madness. There is no employment nearby which would result in a huge growth of commuter traffic on the A3 and nearby country lanes causing more pollution and traffic jams.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

LEISURE AND VISITOR EXPERIENCE. Policy E6 I OBJECT to this policy, the Guildford area does not need "new" attractions, the whole point of the attraction of Guildford is its historic nature and quirkiness. The countryside, purely as it is, in its natural state is a big tourist attraction, to add "attractions" is completely missing the point, the countryside is what people want to enjoy, not some man made thing with a huge concrete car park.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

GUILDFORD TOWN CENTRE? Policy E7

I OBJECT to this policy, more residential use of land should be provided within the town centre, which is where the young and less well off would much rather live - ease of access and no travel costs and existing infrastructure and facilities. The greenbelt should not be built on just because it's easier for developers to do that, regenerate and reuse in these times of being eco friendly.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

INFRASTRUCTURE AND DELIVERY. Policy 11

I OBJECT, infrastructure is already hopelessly congested and cannot cope with even organic growth. The policy does not seem to mention roads and traffic which is the major cause of congestion, anyone who drives either up or down the A3 at any time of day will tell you how congested it is. Adequate infrastructure MUST be a pre condition of sustainable development. Greenfield sites present huge infrastructure problems and brownfield sites already have it in place, so it is much more sensible to use brownfield sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

SUSTAINABLE TRANSPORT FOR NEW DEVELOPMENTS. Policy 13 I OBJECT, as often the proposed sites are remote from existing bus stops, stations and even roads with pavements. This assumes that people will stop using cars as transport methods. This assumption is unrealistic as has been proved time and time again in new developments resulting in parking chaos around the developments as residents try and park near home and traffic snarl ups.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

PERCENTAGE OF NEW HOUSING ON GREENBELT Policy P2 I OBJECT to the large percentage of new Borough housing being built in the current greenbelt. There are more than enough brownfield sites and urban area that require re-development. Those should be used before destroying greenbelt which is an accessible amenity for all.

EAST AND WEST HORSLEY BEING REMOVED FROM THE GREENBELT Policy P2 I OBJECT to East and West Horsley being taken out of the greenbelt. These are green, rural villages with narrow country lanes running through them and contribute to the openness of the greenbelt.

GREENBELT Policy P2

I OBJECT to the wording and content of this policy which states "the general extent of the greenbelt has been retained" we are losing nearly 7% of the greenbelt when including insetting, my filling and increasing settlement boundaries.

VILLAGE BOUNDARIES Policy P2

I OBJECT to East and West Horsley's boundaries being greatly enlarged. This will ruin the rural nature of both villages and cause them to become soulless dormitory towns with no heart.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

Damage will be caused to the ancient woodland of oak trees at Garlicks Arch site (A43) proposal, and the loss of green space and amenity

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the congestion that development will cause to the trunk roads A3/M25 (Policy12)

Both the A3 and M25 need improvements before any developments commence. This is clearly not going to happen in the timescales of the plan, so the proposed developments at Wisley Airfield (A35), Garlicks Arch (A43) and Gosden Hill (A25) should NOT take place.

Please record these objections individually against the relevant sections of the plan and ensure that they are submitted to the Planning Inspectorate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to poor air quality concerns (Policy 13)

The increased congestion that will arise from the massive proposed developments will in turn lead to increased air pollution which will have damaging effect on local residents and their health.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to not protecting the Green Belt (Policy P2)

I object to removing Ripley, Send and Clandon from the Green Belt, in addition to Wisley Airfield (site A35) and Garlicks Arch (site A43) There are no exceptional circumstances (as required by the National Planning Policy) for these villages and sites being removed. We are unique and sustainable villages and removal will serve to blur our identities and enable development which will be harmful for our futures and our legacy to future generations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I am disappointed to have to Object to the 2016 draft local plan, despite promises that the initial responses had been taken into account, for the following reasons:

I object to the local plan as the development proposed is not sustainable (Policy S1)

The scale of the proposed housing will damage local communities especially Ripley, Send and Clandon and is not sustainable due to lack of infrastructure. There are no rail stations near the proposed developments and no plans to improve the local roads. What about primary schools, doctors and dentists? Where are the thousands of extra cars going to go with no possibility of significant improvements to local roads? We already have problems with not being in the catchment area
of a single secondary school where children from our village can continue as a community to be together. There are waiting lists for all of our health services and our bus service is continually being cut.

**Answer (if comment is on questions 1-7 of the questionnaire):** ( )

**I object to the Borough Wide Strategy (Policy S2)**

There is too much proposed development in a small part of the borough in Wisley (A35) Ripley/Send (A43) and Clandon (A25). The plan is unbalanced with over 5,000 houses proposed between the M25 and Burpham, which will merge all the villages and their identities.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

Comment ID: pslp172/4733  **Respondent:** 8741761 / June Yorath  **Agent:**

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ( )

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in
conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.

7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).

8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4734  Respondent: 8741761 / June Yorath  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
4. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
5. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
6. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
7. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
8. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35),...
Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4736  Respondent: 8741761 / June Yorath  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the very high number of homes required to be built year by year for the duration of the Local Plan.

My reasons are that for every home built there will inevitably be, at least one car per household, and the traffic congestion in this area will of consequence be increased to the point of standstill for long periods during the day, this has happened in the past years.

The increase in traffic congestion is also occasioned by an accident on the Farnham to Guildford road (The Hog's Back), and diverted traffic uses the A323 Aldershot to Guildford road, which runs past the fairlands Estate.

I object to the lack of information about the infrastructure necessary to accomodate the establishment of such a large volume of housing, surely, infrastructure should take priority.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1588  Respondent: 8742369 / Evelynne Gunn  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

We refer to our letter dated 23'd June and would ask you please to note our further objection/comment as follows -

1. We are of the view that the proposal to create the equivalent of a new town development on the former Wisley Airfield site (Paragraph 4.3.17 and Policy A35) and to remove the area from the Green Belt amounts to an unjustified incursion into the Metropolitan Green Belt and a contravention of the existing Green Belt regime. Kindly note our objection therefore to this item of the plan.

A further and related factor, we believe, is that even allowing for the target housebuilding programme proposed in the Plan, there seems to be insufficient infrastructure projects to support the increased population envisaged in way of schools, transport and health facilities.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The plan rightly endorses GBC’s stated support for the preservation of the Green Belt and the countryside within the Borough but makes no case for the serious encroachments into the Green Belt proposed by the removal of Green Belt status/ insetting of villages and the redefinition of existing Green Belt boundaries for which we see no need or justification.

We have as a consequence the following objections to/requests for the Proposed Local Plan-

1. We object to the insetting of villages and in particular to the insetting of East Horsley in the Green Belt (4.3.13) and request that East Horsley continue to be washed over by the Green Belt as at present.

2. We object to the Settlement Boundary changes proposed for East Horsley (4.3.16 and Proposals Map).

We have carefully considered the new version of the Local Plan and recognise the significant time and expense that has been incurred in preparing it for public consultation.

Having done so however, we take the view that the essential basis of the Plan is open to question because, it seems to us that the total number of new houses and dwellings stated as required during the period of the plan is seriously over estimated.

The immediate result of this over estimate is the need to locate numerous potential development sites in areas presently situate in the Green Belt.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We remain of the opinion previously expressed that the essential basis of the plan is open to question as there seem good grounds to consider that the number of new houses and dwellings stated to be required is seriously over estimated. One reason for this, as can be seen in East Horsley, is the increased willingness of GBC planners to permit the demolition of older smaller houses and bungalows in favour of larger modern houses that are frequently out of keeping with the local amenity and significantly reduce the opportunity for existing residents who wish to stay in the area. to "downsize".

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to support the Guildford Plan but feel that improvements need to be made to it before it is approved. I fully except that home need to be built and a certain amount of green belt land will need to be surrendered over the timespan of the plan to meet the housing numbers. It is important that Guildford Borough Council looks at all of the brownfield sites within the greenbelt that could be used before agricultural land is developed on. In Normandy a huge greenfield development is proposed that will substantially change the village for the worse. I feel it would better suit the village to build on our 10 acre brownfield land at Strawberry Farm. Our business has operated from this site in Normandy for - lover 50 years, but, because of the nature of the business with its many heavy lorry movements per day it has not always met with the approval of many of the residents. Removing this business from this site and replacing it with houses I am sure it would be viewed by villagers as a positive development.

So with this in mind I am proposing that this site be included in the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
No evidence has been provided to justify the need for 14,000 new houses to be built in the Borough. Guildford Borough Council have refused to release the data on which this housing need is based and sought to withhold it from wider scrutiny under the premise that it is the intellectual property of a third party and is commercially sensitive. If GBC genuinely believes this housing figure is accurate then they should have the confidence to release the data upon which the figure is based. Not doing so is cowardly, deceitful and only increases the general public’s distrust of politicians.

The referendum result means the data used to derive the need for 14,000 new dwellings must be revisited. One of the assumptions behind whatever model has been used to arrive at a housing need of 14,000 dwellings must have been that the UK would remain in the European Union. Given the country has voted to leave the EU it must mean that any population growth or immigration forecast assumptions used are redundant and will continue to be so until such time as we get a better understanding of what leaving will actually mean vis-a-vis the principle of freedom of movement.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The Wisley Airfield site should be removed from the Plan. It is astonishing that this site has been included in the proposed Plan given that its planning application was unanimously rejected by GBC’s Planning Committee. This site should remain in the Green Belt as it serves a vital role in protecting against urban sprawl from London. Again, there are no exceptional circumstances to justify its removal from the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

• The Wisley Airfield site should be removed from the Plan. It is astonishing that this site has been included in the proposed Plan given that its planning application was unanimously rejected by GBC’s Planning Committee. This site should remain in the Green Belt as it serves a vital role in protecting against urban sprawl from London. Again, there are no exceptional circumstances to justify its removal from the Green Belt.

To conclude, it is my opinion that the Local Plan is flawed, and is riddled with inaccuracies and unsubstantiated conclusions. It is a development-led, not needs based Plan, and has been devised using an overinflated housing target either by design or through incompetence. It is clear that the same type of errors and deceits are being repeated as with the 2014 Draft Local Plan despite the changes to the senior personnel responsible for the Plan.

I urge GBC to stop the current process and set about producing a Plan that is focused on housing need, not economic or commercial growth, and which is based on sound and transparent data.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
• **Insufficient/inappropriate focus on developing Brown Field sites.** The expansion of urban areas to accommodate more commercial real estate indicates the Council is not interested in maximising Brown Field sites for housing purposes. For example, under Policy E7: Guildford Town Centre, it is suggested that 45,000 sq m of land at North Street should be assigned for retail uses not housing.

Online retail is set to account for 21.5% of total retail sales by 2018 from 12.7% in 2013, the highest online retail share in the world according to the Centre for Retail Research. In March 2016, online sales rose 12.3%, and it was the third consecutive month in which more than 20% of all non-food shopping took place online according to the British Retail Consortium and accounting firm KPMG. With such a high swing to online purchasing, retailers will need 70 high street stores to create a national presence compared to 250 in the mid 2000’s. An expansion on such a scale is negligent when the Council claims to be in such desperate need for housing. Retail is a declining industry and should not be invested in by the Borough at the expense of housing in the most sustainable urban locations, near employment and transport hubs.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (

• The proposed housing need is unsustainable. Overdevelopment will damage local communities, especially West Horsley, East Horsley, Normandy, Ockham, Ripley, Send and Clandon. These communities do not need the housing numbers proposed. The Key Evidence document "Guildford Borough Economic Strategy 2013 – 2031 makes no case for locating large numbers of dwellings in West and East Horsley or in neighbouring villages. Over 23% of the Plan’s new housing is proposed for the localities of Ripley, Ockham, Send and the Horsleys.

Development on the scale proposed in the Plan will require huge levels of investment to provide the infrastructure to support the resulting influx of thousands of new residents. Currently, the provision of primary and secondary education within the area is under considerable strain with local schools being oversubscribed for places. Children who are unfortunate enough to live outside the catchment areas for these schools must travel considerable distances to receive their education. There is only a vague reference to school provision in the Plan despite the potential for hundreds of new homes falling within its catchment areas. This raises the question as to where GBC thinks the thousands of new children will go to receive their education?

There is one GP surgery serving the Horsleys currently. The Infrastructure Delivery Plan suggests a possible extension to the Kingston Avenue Medical Practice. However, here is no evidence to suggest that development of the scale proposed in the Plan will lead to additional GP provision within the timescales of the new development. As such the existing surgery would quite literally be swamped and be unable to provide anything like an adequate service.

The construction of 2,500 homes in the Ockham and Horsleys area will substantially increase the congestion on what are poorly maintained “B” and “C” category roads. It is also fair to conclude that the accompanying increase in traffic volume from such a massive population increase will accelerate the speed that these roads deteriorate and therefore, the frequency and cost of maintaining them. In addition the knock on effect of having thousands of new traffic journeys per day will quite literally gridlock the area, and will directly impact on the traffic flow on both the north and southbound A3 carriageways, and quite probably the M25/A3 junction.

Whilst Horsley station has frequent trains to London and Guildford, it is highly unlikely that the current or future train service provider will improve its peak time service to accommodate the increase in commuters.

Attached documents:

The Greenbelt should be protected and its boundaries unchanged. There are no exceptional circumstances to justify building on the Green Belt or to change the boundaries of the Green Belt. As a reminder the purpose of the Green Belt is to:

- Check the unrestricted sprawl of large built up areas
- Prevent neighbouring towns merging into one another
- Assist in safeguarding the countryside from encroachment
- Preserve the setting and special character of historic towns
- Assist in urban regeneration by encouraging the cycling of derelict and other urban land.

To recommend that 70% of the proposed 14,000 houses should be built in the Green Belt is a seriously flawed policy and in no way complies with the legal principles by which the Green Belt is protected.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

It is disappointing to see that the Council continues to persist with its misguided and unjustified approach towards housing development in the Borough. The latest draft of the Plan has changed very little from the previous version suggesting that Council officials have paid lip service to last year’s consultation process and that the Council is hell bent on ignoring the opposition of thousands of borough residents to the proposed plan.

Whilst the new plan has made some minor reductions to its proposed housing in the Green Belt as compared to its 2016 version, what remains is still excessive and unjustified housing development. The Council has still not justified its proposed housing figure and has shown no interest in protecting the Green Belt from excessive development. The new Plan’s “objectively” assessed housing target whilst lower than in last year’s plan, will still mean that by the end of the Plan’s period Guildford will be 25% bigger than it is today. This is nearly double the ONS forecast for the same period for Guildford. The Council continues to ignore retail marketing data indicating that online retail is the driving force, not
footfall in physical shops - Guildford Town centre does not need more shopping space, it requires more residential apartment type property.

The housing numbers proposed are for nearly 14,000 homes over 15 years from 2016 to 2031. This number is too high. The model used to calculate the number has not been seen or the assumptions tested by the council or any of its officers. It has been, on numerous occasions shown to be flawed by various 3rd parties. This housing target will result in the borough’s permanent resident population increasing at **4.5 times the rate of population increase during the period 2001 to 2011**. This population growth, by definition, is excessive and unsustainable for a gap town with many environmental, physical and infrastructure constraints.

Over 70% of the proposed housing is planned for land currently in the Green Belt. Housing need is not a reason in law for protected green belt land being used. It is perverse for so much housing to be planned for the green belt. Clearly, the green belt has not been used as a constraint as clearly set out in Government advice, planning policy guidance, the NPPF, case law, election manifestos and Ministerial letters to MPs.

For the West Horsley this is reflected in a 35% increase in the number of houses within 3-5 years of a plan being adopted.

Answer (if comment is on questions 1-7 of the questionnaire): ()

5,036 houses are proposed between the M25 and Burpham (about 5 miles) which will obviously lead to a merging urbanisation of identities the villages. There is too much traffic in our villages already and this plan will cause more congestion in West Horsley, East Horsley, Normandy, Ockham, Ripley, Send and Clandon, with no plan to improve that. The rural roads in this area are narrow, in poor condition and have no footpaths. 5000 more houses in such a small area means dangerous and unsustainable traffic.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Our drains, our water supply, our medical facilities and our roads cannot cope with the proposed
number of new homes. Building this number of homes will lead to flood risk here and downstream
(along the Wey and Thames). The planned development on Green Belt is therefore unsustainable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The A3 or M25 would have to be improved before any development is done. Highways England has no plans to even start
considering improving the A3 before 2020. Under the current economic climate post Brexit, it is unlikely any additional
funding will be made available for new capital projects. Clearly no real improvements are possible in the timeframe of this
Plan so the developments at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), should not take place

Answer (if comment is on questions 1-7 of the questionnaire): ()

The huge developments being proposed, particularly in the north east of the borough will lead to considerable further
congestion and to greater levels of air pollution, which will have a detrimental effect on local residents and their health. It
has been shown that Wisley already has NOX levels above the EU legal limits and by law a school cannot be located in this
area as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

| Comment ID: PSLPP16/13872  | Respondent: 8743137 / Ben Woodford  | Agent: |
Our Green Belt is precious. It is what protects London from urban sprawl; it preserves air quality; it prevents flooding; it is the city’s playground. It is for us to conserve and protect it. There are 5 legal purposes for Green Belt, and it meets them all:

- To check the unrestricted sprawl of large built up areas
- To prevent neighbouring towns merging into one another
- To assist in safeguarding the countryside from encroachment
- To preserve the setting and special character of historic towns
- To assist in urban regeneration by encouraging the recycling of derelict and other urban land.

This policy is flawed and should have been amended. In the last consultation just six individuals, out of the c. 7,000 of those who took part in the consultation, supported the policy. Another 20 comments of support were from organisations such as: the University of Surrey, local councils (including Guildford), consultants (e.g. Savills) or landowners. But of the 1,371 who commented on the green belt policy 1,332 (97%) were against.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
13,860 new houses proposed is not sustainable – it will damage local communities by over development, especially West Horsley, East Horsley, Normandy, Ockham, Ripley, Send and Clandon. The local communities don’t need these houses. Wisley Airfield (A35) and Garlick’s Arch (A43) have no railway stations and inadequate bus services, so almost every adult will have to have a car.

The development should be in urban areas where there is sustainable transport. West Horsley for example will see the number of housing increased by 35% within 3-5 years of the plan being adopted. The number and density of housing is not in keeping with the local area and is therefore against policies within the NPPF.

The number and density of housing is not in keeping with the local area and is therefore against policies within the NPPF.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The schools are already full, visits to the surgery require a wait of many days, the station car park is full to bursting, the rush hour traffic is horrendous, the village halls have to limit entry on occasions and the car parking there is very inadequate. Our roads are full of potholes, electricity cables need renewing, as I know from personal experience, and the bus service is neither here nor there. I have no knowledge of the state of the gas or water supply, let alone the sewerage system but in view of the annual growth of population over recent years imagine it must already be under pressure.

To propose building another 500+ houses when current residents are already under strain from lack of the above facilities appears to be sheer folly. And I understand that there is still the possibility of adding to the chaos by developing Wisley airfield. The mind boggles and a great big red flag for danger should be waving over this part of the borough to alert the council, and anyone thinking of moving to this area.

More houses - yes, if really essential, but far less of them and with increased infrastructure to support them and us.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I understand that more houses are needed in the South East - in my opinion a great deal more should be done to make the North East and other areas with comparatively low population growth, more attractive for expansion, but that's another story. However, I am dismayed at the proposed density and number of houses on the proposed sites. This is not only for aesthetic reasons but principally because it appears that absolutely no thought has been given to the impact this will have on the lives of those currently living in The Horsleys.
We, the residents, chose to live in a village, not a town and so we do not expect the facilities which a town has to offer. But what is proposed in terms of population growth is a town with none of the amenities. In fact the proposal will detract from those amenities which we do currently have.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

   • The “objectively assessed need” figure of 693 homes a year is too high.
   • A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
   • The current SHMA inflates the proposed housing figure due to
     ◦ failure to correct for errors in the historical data for international migration flows,
     ◦ issues with the way it considers students and affordability and
     ◦ flaws in the method for estimating the number of homes needed to support job growth.
   • It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.
Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1819  Respondent: 8744161 / Michael Bridge  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)
It is clear that with this site being added at the 11th hour no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3927  Respondent: 8744161 / Michael Bridge  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3922  Respondent: 8744161 / Michael Bridge  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.
Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3 – Rural Exception Homes

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3918  Respondent: 8744161 / Michael Bridge  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

1. I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

1. I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

1. I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the
flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objections to specific policies and matters within the Plan.

1. I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Borough Wide Strategy (Policy S2)
   a. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.
   b. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.
   c. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

   These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

   It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

   The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

   What changes (2016)/further amendments (2017) do you suggest should be made to the document?

   Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/1095  Respondent: 8744257 / Mary E Bridge  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

1. **I OBJECT** to Gosden Hill developement being in the Local Plan The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.
The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1828  Respondent: 8744257 / Mary E Bridge  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.
National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

Do you consider this section of the document complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/3948  Respondent: 8744257 / Mary E Bridge  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3 – Rural Exception Homes

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

1. I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

<tr>
<td>1. <strong>I OBJECT to development in areas which are at risk of flooding (Policy P4)</strong></td>
</tr>
<tr>
<td>National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.</td>
</tr>
<tr>
<td>The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.</td>
</tr>
</tbody>
</table>
| The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the
flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objections to specific policies and matters within the Plan.

1. I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Borough Wide Strategy (Policy S2)

   a. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

   b. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

   c. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

   These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

   It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

   The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

   What changes (2016)/further amendments (2017) do you suggest should be made to the document?

   Attached documents:

---

Comment ID: PSLPA16/2201  Respondent: 8744417 / Mark & Gillie Hammersley  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule
I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/2209  Respondent: 8744417 / Mark & Gillie Hammersley  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix F: Policies overview map

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. **The plan says that “allocating these sites does not grant planning permission for development.”** However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 – 2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.
I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.
Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**Comment ID:** PSLPS16/4314  **Respondent:** 8744417 / Mark & Gillie Hammersley  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.
Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

**I OBJECT** to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floor space will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

I OBJECT to the location for new employment floorspace (Policy E2)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.
I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
### I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.
I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London. Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations were available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being “closely related”. In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.
The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear that market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/9303  Respondent: 8744417 / Mark & Gillie Hammersley  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment.
without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/9315  Respondent: 8744417 / Mark & Gillie Hammersley  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/9267  Respondent: 8744417 / Mark & Gillie Hammersley  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I
cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood
risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/9253  Respondent: 8744417 / Mark & Gillie Hammersley  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including
Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/9260  Respondent: 8744417 / Mark & Gillie Hammersley  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”.

Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with
only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This
distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated
housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by
Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden,
protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious
doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims
their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not
transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated
on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical
because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable
because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local
and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in
due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent
years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the
land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more
important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning
permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these
adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be
planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan”
that fails to propose a target number that takes all the standard constraints and adjustments realistically into account,
leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline
figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of
Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA).
Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible
change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the
housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would
remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the
plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's
commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than
elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase
availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere.
Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter
belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green
Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints.
It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to
have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is
needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up
urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable
development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and
surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the
local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The
edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the
area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated...
an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councillors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H2 Affordable Homes
In the absence of a national plan to redistribute growth away from London I doubt whether the proposed homes can remain affordable, or will built where needed, for those who are genuinely in need. GBC has not taken account of the differences in need for low cost housing across the Borough. A significant amount of low cost housing is likely to built where it is not required. In East Horsley this is likely to result in their quick resale for profit and then being unaffordable to low income workers. We would be losing countryside for no social benefit. I object to this policy.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policies I1, I2, I3: Infrastructure Policies
As a long term resident I believe the Borough's infrastructure is already stretched, and that the enormous building programme proposed by GBC would serve to worsen existing problems. East Horsley has country lanes not roads. These are unsuited to the volumes of traffic using them already.

Any commitment to a massive housing expansion ahead of a plan and finance for the required transport network would make our traffic congestion even worse. A very significant traffic constraint should be applied to the local plan.

Furthermore, there are insufficient school spaces already and the medical centre is already at capacity in terms of its number of patients. I object to the infrastructure proposals on the grounds that they fail to meet the needs of the proposed plan, which is it itself a product of inflated forecasts of immigration that are not accurate, necessary or welcome.

and finance for the required transport network would make our traffic congestion even worse. A very significant traffic constraint should be applied to the local plan. Furthermore, there are insufficient school spaces already and the medical centre is already at capacity in terms of its number of patients. I object to the infrastructure proposals on the grounds that they fail to meet the needs of the proposed plan, which is it itself a product of inflated forecasts of immigration that are not accurate, necessary or welcome.

Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As advised previously, my objections to the draft plan are that it would make our county and our village, an extension of
Greater London. This is based upon estimates of the need for housing, due to inflated forecasts of immigration rates that are probably inaccurate, and certainly unnecessary and unwelcome at this scale.

In prioritising the massive construction implied by these migration forecasts, the draft fails to protect the Green Belt and productive agricultural land and the rural landscapes and character of the county. It fails to address the road and rail congestion and demand for schools and public services should it be implemented. It all but ignores the environmental impacts, such as local air quality, noise and light pollution, road safety, biodiversity loss and climate change. These problems are all too apparent in those parts of the world where urbanisation is unchecked.

In the national context the draft is unable to address the need to promote economic growth in the rest of our country, away from the southeast. But without a national effort to redistribute growth and wealth, any additional housing provided in Surrey would not remain affordable for long, and its provision would only consolidate the economic dominance of London at the expense of our countryside. England has over 45,000 ha previously developed land, enough for at least 1 million homes, but mainly outside London and the southeast (CPRE 2014: From wasted space to living spaces).

Given this availability, no compelling case or "exceptional circumstance" for the sacrifice of the Metropolitan Green Belt is possible. Green Belts have protected our land from urban sprawl for seventy years, and there remains adequate brownfield land for housing nationally. Instead this draft implicitly accepts a high immigration rate as a given, without consideration of
ways to manage it. By catering to London's needs, it perpetuates problems of national importance with respect to immigration, the north-south divide, social mobility and environmental harm.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P2 Green Belt
I fully support the statement that "we (GBC) will continue to support the Green Belt". However I object to this draft that shows 65% of the construction would take place on the Green Belt! I object strongly to the proposal to inset East Horsley from the Green Belt and request that this proposal be dropped. I also object to the proposed boundary changes for East Horsley. I am concerned that infilling will result. Green Belt rules make it clear that unfulfilled housing need is not considered to be an exceptional circumstance. If it were then the Green Belt would have been built over decades ago. The overriding requirements of the NPPF, especially NPPF 87, 88 and 89, must apply so that there is no harm to the Green Belt from housing development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the following proposals specifically:

Policy S2 Borough Wide Strategy
As stated above, I object to the enormous scale of the proposed building programme, which far exceeds the local housing needs. ONS forecast a sustained UK net immigration rate of 200,000 each year from 2014 to 2039. This is already high, and at least double the target, and will account for half of the UK's long term population growth. The current rate is higher still. The ONS also show that of Surrey's population forecast, some two thirds is due to net immigration. The draft plan seeks to build far in excess of local needs. It is not a local Borough plan but instead presents a threat to our county because of our national failure to manage our numbers sensibly. I believe two wrongs do not make a right.

Answer (if comment is on questions 1-7 of the questionnaire): ()

It appears to me that the draft plan is little changed in scope from the previous version of 2014. I believe local people should be consulted and heeded; but it seems instead our views are needed as a box ticking exercise in this process, and then ignored.

As advised previously, my objections to the draft plan are that it would make our county and our village, an extension of Greater London. This is based upon estimates of the need for housing, due to inflated forecasts of immigration rates that are probably inaccurate, and certainly unnecessary and unwelcome at this scale.
In prioritising the massive construction implied by these migration forecasts, the draft fails to protect the Green Belt and productive agricultural land and the rural landscapes and character of the county. What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Attached documents:
We object to the changes to Policies A36 to A41 (East and West Horsley)

1. The number of potential development sites has been reduced by two (A36 and A41, representing a total of 138 dwellings). This leaves four sites (A27-40) which still represent a total of 395 new dwellings.
2. Marginal changes such as these would still leave 70% of all new development in the borough built on Green Belt sites. No “exceptional circumstances” or any other justification is advanced for this strange imbalance.
3. The deletion of two Horsley sites fails to correct the issue of relative overdevelopment in East and West Horsley, which is both excessive in absolute terms and disproportionate in relation to the rest of the borough.
4. No attempt is made to assess the cumulative impact on the Horsleys – either of the four sites now proposed, or of Site A35 (Three Farms Meadow, alias “Wisley Airfield”), with over 2,000 new homes only 2 miles away. This piecemeal approach leaves the future of the Horsleys at the mercy of ad hoc planning applications, which is the opposite of what a Local Plan should intend.
5. The new plan Policies put greater emphasis on the need for adequate facilities and infrastructure to underpin development. But this is not reflected in any new wording on the Horsley sites, thus leaving most local objections unaddressed. Again, this defect curtails the plan’s usefulness as a practical planning tool at a site level and undermines its credibility among residents.
6. The plan fails to mention most of the known sustainability issues and infrastructure constraints affecting the Horsley sites, including public transport, traffic, road safety, parking, schooling, medical facilities, sewage, flooding/surface drainage and shops. These were fully set out in responses to last year’s public consultation.
7. The density of new housing on the four Horsley sites too is inappropriate, being greater than anywhere in the locality at present.
8. Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries. The plan presents no arguments for this which, contrary to NPPF paragraph 79, will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.
9. Collectively, the four Horsley sites breach NPPF paragraph 81’s encouragement of access to the Green Belt and its amenity and recreation value. This has been an outstanding success story in the Horsleys, as detailed in response to the last consultation. Assets include a dense public footpath network, parish parks, sports fields, a campsite of international standard, Britain’s newest rural opera theatre and the popular Olympic cycle route. These examples of positive planning depend on a Local Plan that protects the Green Belt, maintains its openness and beauty and avoids urbanisation and traffic congestion. Sites A35-41 are hostile to this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Contrary to national trends, too much potential development land within the town centre is being allocated for retail or commercial development rather than housing. High added value businesses are welcome in the borough, but much of the employment land is designated for retail or low added value employment floorspace, which only exacerbates current issues such as lack of low cost housing and heavy traffic. Sites such as the Burnt Common Triangle, currently in the Green Belt, are inappropriate for heavy industry.

The paragraphs relating to density in Policy H1 have been deleted. To ensure developments make optimal use of space there must be a policy to cover minimum and maximum densities. Without a policy to cover density, there is a risk that developers will use land inefficiently, putting additional pressure on the countryside and un-developed land. This deletion is inappropriate.

The policy relating to AONB weakens the protections offered, and (unlike previously) does not have restrictions on non-major development. This is a move in the wrong direction. Previously all proposals were considered against the 5 key tests – now development in the AONB seems to be more acceptable. This is weaker, not stronger, and is contrary to huge responses from the public in previous consultations and the weight of protection given to AONB in the NPPF.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

Exceptional circumstances must be demonstrated in order to develop Greenbelt yet despite the weight of public opinion against weakening of this policy, 70% of new housing development will be in the countryside, of which, 58% will be in Greenbelt. By definition, this is not an exception and no attempt is made to demonstrate exceptional circumstances, in line with the requirements of the NPPF. Insetting villages is of concern since restrictions within the settlement boundary raises concerns over loss of character. The Rural Economic Strategy covered in 4.51a, promoting affordable homes everywhere in the countryside including the AONB as a main aim, is a mechanism for promoting overdevelopment in our countryside. It has not been subject to full public consultation and is based on data, which is not up-to-date.

Three major strategic sites – Blackwell Farm, Wisley Airfield and Gosden Hill Farm – are in the Green Belt. Previous consultations show that, in line with the NPPF, the public would prefer to use brownfield land in the urban area first.

The housing target proposed, of 12,426 is based on assumptions that have not been made public and includes flaws that have not been corrected in the modified SHMA (verified by professional analyst Neil MacDonald of NMSS who concluded that an annual housing figure of 400 per year would meet Guildford's overall need). The phased approach (more homes built towards the end of the plan period) is appropriate in order to permit necessary infrastructure but open-ended targets where an unknown figure is held back until after the plan period is not a reduction but a postponement and does not allow for optimal planning or transparency.

4.1.8 The inclusion of Ash and Tongham as 'countryside beyond the Green Belt' in the New Local Plan has the effect of changing a rural area into an urban one. I am referring in particular to Amendments 1-9 Ash and Tongham i.e. additional land parcels at A28 and A29. This means that Ash Green Road could potentially be surrounded by new developments on all sides. To the north, the development at Ash Manor would destroy a gap between Ash Green (historically a village in its own right separate from Ash) and to the south in Drovers Way, development would back on to properties on that road. Housing density would be exceptionally high and urban sprawl would spread from Ash Station up to the southern end of White Lane, taking into account existing developments in planning (at White Lane/Hazel Road). The creation of the Ash and Tongham Urban Area appears to be swamping us and it seems to me that small sites have been selected in an indiscriminate manner which does not protect and preserve the rural and historical character of Ash Green.

I object to 45 houses at Clockbarn Nursery.

I object to this site because of the inadequate access and traffic volume. In one direction Tannery Lane is very narrow and twisty, being reduced to single lane traffic in many spots with passing places only; in the other junction onto Send Road is very dangerous and inadequate. Planning permission has already been given for a marina and 64 apartments which will increase the traffic greatly. I request that my comments are shown to the Planning inspector who will decide on the Plan and also please confirm that you have received my objections. Thank you.
I object to the 4-way intersection.

I object to the fact that the road infrastructure through Send has not been thought about and the consequences of putting a large interchange on this site would cause gridlock. The amount of traffic this will create through Send is unfeasible as there is only one two way street that goes through the centre of the village. The intersection would have to take traffic from the proposed 2000 new houses in Wisley Airfield, 2000 new houses in Gosden Hill and 1850 new houses at Blackwell Farm. The traffic form Woking heading to and from the A3 and M25 would come through Send. The traffic, congestion is one aspect but there other considerations such as noise pollution, air pollution levels, weight of traffic on country roads and the damage that will be caused not to mention the destruction of the village and the way of life here.

I object to the proposal to build 400 houses and 7000sqm of industrial space at Garlick's Arch.

This site was not included in the Regulation 18 Draft Local Plan so has not: had full consultation. The manor in which it has been slipped into the Plan is underhand and unfair. The site is subject to flooding and is covered by ancient woodland. The industrial space is not needed here and any extra space required should be included in the existing industrial site of Slyfield. The projected housing figures understand to have been exaggerated, so there is no need for this number of houses to be built in and around Send.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the development of land west of Winds ridge and send hill.

This site was not included in the Regulation 18 draft local plan so has not had full consultation. The site to my knowledge contains documented unsafe landfill waste which was registered with Guildford borough council.

I am writing to register my objections to the New Local Plan.

The Plan does not seem to have a clear design for the whole area. If it does it certainly is not making it clear. Firstly the Transport Plan has been produced very late in the day (only released on the day of publication) and without this infrastructure, none of the developments should take place. It seems that Guildford Borough Council is planning a series of large developments along the A3 corridor but has not thoroughly looked at the impact of the is for the surrounding villages. The villages on both sides of the A3 have very inadequate roads to cope with the anticipated amount of traffic and the roads available cannot be improved to the point that will ease the expected congestion. There are many other worries as well; such as environmental concerns, noise pollution, air pollution levels, flood risks, the sheer quantity of housing and industrial units supposedly required, the list goes on ...

I object to Send being removed from the Green Belt.

The village Send provides a green buffer between Woking and Guildford. To develop in the Green Belt requires 'special circumstances' there are none to justify developing the land in and around Send so Guildford Borough Council have come up with another plan, to remove Send from the Green Belt therefore freeing up the and for development. Guildford Borough Council should not be allowed to abuse the Green Belt in this way in order to just suit themselves. The Green Belt was set up to control urban growth front unscrupulous Council's and Developers permanently. If this is is not protected then all of the land in and around the village will be vulnerable to development. This would destroy the character of the village of Send.

Guildford would merge with Woking through a series of urban estates.

Comment ID: PSLPP16/2669  Respondent: 8746753 / Miles Hackett  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Council not following due process.

Since the last draft Local Plan every site in the village of Send has been changed. Not only locations but also in housing numbers. Even as recently as 5th April 2016 there was a document. released giving information on the new local Plan with links to maps and now there are massive changes, even since the publication of this document. My understanding is that following the rejection of the Draft Local Plan the Council could only push forward under Regulation 19 if there was not significant changes. In Send, None of the 485 new homes was included, the site at Garlick's Arch was not included, the land west of Winds Ridge and send hill was not included and the removal Send from the Green Belt was not included. These are major changes to the plan for the village of Send. If this amount of change is to be proposed then we need to go back and have a full consultation under Regulation 18.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
It is proposed that around 40% of the new development in the Borough is to be in and around Send and bearing in mind that we represent only 11% of the Borough this seems to be excessive. The main reason for my objection is that it will destroy the Green Belt. Additionally, the layout, infrastructure, facilities and local requirements have not been planned which will potentially lead to an unstructured, chaotic new town and it seems that some high level local politicians have a vested interest in doing just this. This must be formally investigated by the Planning Inspectorate before any further Green Belt land is allowed to be destroyed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to Policy 2 paragraph 4.3.15, Green Belt to inset Send Business Park from the Green Belt because as already stated above, Tannery Lane is a country lane which is unsuitable for heavy traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to strongly object to site A46 Flexford/Normandy

This proposed development would cause traffic chaos. Westwood lane and Glaziers lane are small country roads. I live right next to the railway bridge in Westwood lane and already have to dice with death pulling out blind into fast oncoming traffic.

The additional vehicles 1100 houses, a school, shops and visitors will bring will cause a traffic funnel where the road is single lane under the bridge and residents accessing from beach lane will never get out without the increased chance of a lethal accident. To say that nothing will come this way from the north of the village is ridiculous. I understand that Surrey county councils own traffic simulations show that even present levels of traffic are above the capacity our roads were designed for.

The small Doctors surgery is straining under existing levels of need. Waiting times for appointments now are 3 weeks so this defiantly can't support 4 or 5 thousand more patients.

This development will exasperate the drain problem which the council know from the previous development in Beach lane planning process.

Building this development will deprive us of land that drains away rain water that the present sewer system can't cope with all ready resulting in flooding.

My bungalow's s drains back up in bad weather making it impossible to use the loo or washing machine till it subsides, documented by Thames water. This development cannot join the mains drains without devastating effects.

I understand the need for housing and small pockets were expected over the borough but this large proposal ion green belt land s not acceptable or sustainable. It wasn't in the 2014 plan in fact it was positively disregarded. What changed? Other options need exploring.

There is a proposal for a development not in the local plan which should be considered at land off Epsom road west Horsley adjacent to the A246. This land is surrounded by existing development, on a strategic highway route, is low quality green belt land, visually self contained all of which normandy is not.

The development is being "sold" by the developers if they build a school as a bribe. This development is developer driven and not local need driven and needs reassessing after the discussion to leave the E.U as demand will fall for housing in light if future reduced immigration.

This school is not required as plenty of capacity locally exists as proven by Surrey county councillor Kieth Witham so build it where it is required.

You cannot believe the proposals will not change the character, structure, nature wildlife, and openness separating the village. This green belt land separates different parts of the village and stops urban sprawl making it a town.

None of the village wants or needs such a large development. We don't want a park barn.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Normandy and Flexford

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I support the withdrawal of policies A46 and A47 for reasons already stated in my response to the last local plan.

I strongly object to any insitting of greenbelt land at Flexford and Normandy as that will make it easier for developers to gain planning permission to build on what is now greenbelt land.

This would make small islands in the greenbelt which is there to to stop built up area joining onto each other forming bigger built up areas.

There has been no proven case to inset this land and it should remain "washed over" by greenbelt. The basic character of this area needs to remain the same as I've seen the results if land being changed like this and built on in other areas.

Answer (if comment is on questions 1-7 of the questionnaire): ()

STRATEGIC SITE A46 – NORMANDY/FLEXFORD

1. MAIN OBJECTION

I wish to object in the strongest possible terms to Strategic Site A46 (Normandy/Flexford) being taken out of the Green Belt in order to build 1,100 homes, together with a Secondary School and other facilities. This site was not one of the seven sites that were included in the Pegasus Planning Group’s ‘Green Belt and Countryside Study’ as a specified location for development. I understand that these other sites are still in the evidence base and I believe that they should now be reconsidered, in place of strategic site A46.

It appears that the developer, Taylor Wimpey, may have funded the reviews of flooding, drainage, ecology, landscape, transport and community infrastructure on this site and, if this is so, this clearly lacks any objectivity, which should not be allowed. The developer claims that this scheme for the land at Normandy provides the opportunity to create a more sustainable neighbourhood for the existing village as well as the new residents of the proposed development and yet I do not believe that these arguments will stand up to scrutiny without the empirical evidence from the ‘Green Belt and Countryside Study’. Also, the National Planning Policy Framework (NPPF) states that there should be early and
meaningful engagement and collaboration with neighbourhoods regarding the needs and priorities of the village. This has not happened in spite of the fact that at least two years ago the developer submitted documentation to Guildford Borough Council (GBC) regarding this site. The only ‘early and meaningful engagement and collaboration’ seems to have been between the developer and the Council. This surely is in breach of the NPFF.

The argument that this is an “enabling development” is circular as the claim that the school is needed rests on the argument for building additional houses on this and other sites. But the houses on this site can only be built if the school is allowed to be built. So it amounts to putting up houses to justify a school that would not be needed if the houses were not built. This becomes a circular argument and therefore the justification for development is considerably weakened. In any case, in the draft Plan, the need for the school is said to arise from the housing allocation, but GBC has not justified the development of the housing by reference to any “exceptional circumstances”.

My other reasons for objecting are related to the road network around the site, the inclusion of a school, sustainability & sensitivity, the Strategic Housing Market Assessment, infrastructure issues and the Thames Basin Heath Special Protection Area, as described below

1. **THE ROAD NETWORK**

The road network in Normandy will not be able to sustain the volume of traffic that a development with 1,100 homes would create and there are no highway improvements that can conceivably be made to these country lanes to convert them to the A-class roads needed to serve such a development. The proposed site is boxed in by an unclassified road (Glaziers Lane D60) on the east, a C-class road (Westwood Lane C16) on the west, a railway line to the south and the A323 to the north. Both Glaziers Lane and Westwood Lane struggle to cope with the existing volume of traffic, let alone the increased traffic from an 1,100 home development and road traffic to and from the proposed school. There is a narrow humpback bridge on Glaziers Lane to negotiate, which is on a deceptive double bend and has very limited sight lines, as well as a right angled bend where the Lane meets another unclassified road, Flexford Lane. There is also an extremely dangerous, single-lane chicane under a railway bridge on Westwood Lane which also has a deceptive double bend and a height limit of 14’-3” under which a double-decker bus is not able to pass. There are also dangerous junctions where these roads meet the A323 Guildford to Aldershot road at their northern ends. At rush hour this road is already congested and is identified in GBC’s ‘Options Growth Scenario Transport Assessment Report’ as being at full capacity already. The entry and exit from the A31 ‘Hogs Back’ on to the B3000 to travel to and from the development site via Wanborough Hill is a ‘bottle neck’ at most times of the day, and would be likely to ‘grid lock’ with the increased volume of traffic to and from the site and the school. No amount of improvements to the road system will enable these rural roads to cope with the increased volume of traffic, let alone the construction traffic that would disrupt this fragile infrastructure over possibly a fifteen year period. The ‘Infrastructure Schedule’ shows that just £2.8m has been earmarked to improve these dangerous junctions through developer contributions, but this amount would be totally inadequate.

**Glaziers Lane**

Glaziers Lane is an unclassified road (D60) and is unsuitable for the volume of traffic that the proposed development would generate together with additional traffic going to and from the school. The Lane is a rural, residential road, just 6 metres wide at the widest point, with a 30mph speed limit throughout its length. The Lane is a busy commuter route for cars, commercial vehicles, lorries, multi-axle heavy goods vehicles and articulated lorries cutting through between the A323 Guildford to Aldershot Road and the A3 and A31. Many of these vehicles fail to adhere to the speed limit. To my knowledge there have been two fatal road traffic accidents in the Lane.

Parked vehicles are mostly parked on the pavement owing to the narrowness of the rural Lane. This means that pedestrians, those in wheelchairs and parents/carers with pushchairs or prams, have to walk in the road and are at risk from passing vehicles. There is a nursery school close to the potential vehicular access point in Glaziers Lane shown on the developer’s concept masterplan, and at drop off and pick up times of the day parents’ parked cars reduce the Lane to a single track, with the added dangers of young children being taken from and secured into the vehicles.

The street lighting in Glaziers Lane is poor and could at best be described as footpath lighting. Towards the southern end of the Lane is a humpback road bridge over the railway line, which has a sharp incline and decline so that on approach there is no view of the other side of the bridge. The bridge is also on a slight, but deceptive, double bend in the road. At this point the Lane narrows to 5.5 metres, slightly under in places. This is an especially dangerous part of the Lane as cars speed
towards the bridge from both directions, with no view of the other side. The roadway of the bridge is badly sunken on both sides due to the weight of the heavy goods vehicles crossing the bridge. This bridge would be hazardous for cyclists travelling to and from the school and, because of the narrowness of the bridge, no dedicated cycle lane could be installed. At the northern end of the Lane is the junction with the A323 Guildford to Aldershot Road, where Glaziers Lane crosses over to Hunts Hill Road. This is a difficult junction to negotiate owing to the amount of traffic travelling along the main road, and also because there are cars turning right out of Glaziers Lane on to the main road, cutting across the path of cars coming across from Hunts Hill Road, with both sets of drivers attempting to find a gap in the main road traffic. There is often a tail-back of traffic in Glaziers Lane waiting to exit.

The single footpath along the Lane is not continuous, changing from side to side of the road along its length. This means that pedestrians have to cross the road at various points in order to remain on the footpath, with two exceptionally dangerous crossing points which are poorly maintained by Surrey County Council (SCC). One is by the stream just south of no. 35 Glaziers Lane, on a sharp bend, which means that pedestrians have a poor view of vehicles approaching in both directions along the Lane, and drivers of these vehicles cannot clearly see the pedestrians until the last moment. The other dangerous crossing point is on the north of the road bridge that crosses the railway line, as vehicles approaching from the south only have a short stopping distance after crossing the summit of the ‘blind’ bridge before arriving at the crossing point. These crossing points are especially dangerous for those in wheelchairs, the elderly and infirm, and parents/carers with pushchairs or prams, who require more time to cross the road. At some points the footpath is reduced to a width of much less than a metre, due to the outward growth of hedges meaning that passing pedestrians often have to walk in the road. A build-up of debris where the kerbs are lowered at the crossing points also means that pedestrians have to move on to the road to avoid the mud.

The railway station is situated close to the southern side of the humpback bridge and has a limited car park, which regularly floods, and which will be insufficient for the anticipated increase in vehicle numbers. Cars parked instead on Glaziers Lane would add to the hazards that already exist. Traffic exiting the station car park and turning north has a tight turning circle in order to keep on the correct side of the road and is vulnerable to vehicles speeding over the bridge south-bound with limited views of the approaching traffic. The increased volume of cars using the station car park would add considerably to the dangers.

**Westwood Lane**

Westwood Lane is classified as a C Class road (C16) and is unsuitable for the volume of traffic that the proposed development would generate as well as additional traffic going to and from the school. The Lane is a rural, residential road, with a 30mph speed limit along the southern residential part of the road up to the railway bridge, and a 40mph limit up to the northern end of the road along which there are no street lights. The Lane is a busy commuter route for cars, commercial vehicles, lorries, multi-axle heavy goods vehicles and articulated lorries travelling between the A323 Guildford to Aldershot Road and the A3 and A31. Many of these vehicles fail to adhere to the speed limits. The street lighting is poor and there is no street lighting on the long 40mph stretch of the road. There is a hill from Flexford Road (an unclassified road), at the southern end of Westwood Lane, to the railway bridge down which vehicles speed.

The road under the railway bridge is a single track chicane on a deceptive double bend, with priority given to vehicles travelling south. There has already been one fatality at this bridge and many accidents. There is a 14’ 3” height restriction on the bridge which means that a double decker bus would not be able to pass under (which would considerably restrict transporting pupils to and from the school). Immediately on the southern side of the bridge travelling north, on the nearside, is a road exit at Beech Lane. Vehicles turning left under the bridge travelling north cannot be seen by vehicles that have priority travelling south, and a greater volume of traffic will only increase the inherent dangers at this bridge. This bridge would be hazardous for cyclists travelling to and from the school, and a major congestion point for the increased traffic that an 1,100 housing development would bring.

At the northern end of the Lane is the junction with the A323 Guildford to Aldershot. This is an extremely dangerous junction with traffic from Westwood Lane attempting to turn both ways onto the busy A323, while traffic from the A323 is attempting to turn into Westwood Lane. There was a recent fatality very close to the junction with Westwood Lane. This junction is already a ‘bottle neck’ at busy times of the day. There is the added danger that only a few yards to the west is School Lane, along which Wyke Primary school is located. There is a nearby crossing point ‘island’ on the A323 which is hazardous for pupils and their parent to use and cars have already mounted this island demolishing the street sign. Many parents who drop off and meet their children park alongside the churchyard in Westwood Lane and negotiate this busy
crossing point ‘island’ to get to School Lane. This crossing point will become even more dangerous if an additional form of entry is added to the school, and there is increased traffic entering and exiting Westwood Lane to and from the 1,100 home development, and the secondary school.

The footpath is on both sides of Westwood Lane as far north as the railway bridge but from there to the northern end of the road there is a narrow path only on the east side, totally inadequate for the number of pupils at an 8FE secondary school to safely use.

**B3000 entry/exit to the A31 and Wanborough Hill**

The entry and exit from the A31 ‘Hogs Back’ on to the B3000 to travel to and from the development site via Wanborough Hill (C16) is a ‘bottle neck’ at most times of the day, and would be likely to ‘grid lock’ with the increased volume of traffic to and from the proposed development site and the school. There is no pavement nor street lighting from Wanborough Hill until the road reaches Normandy.

Because of the above points, I believe that the poor road infrastructure bordering the strategic site and beyond does not make it a suitable location for 1,100 homes, a secondary school, and the other planned facilities, and so I wish to object to the proposal on the grounds given.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents: LOCAL PLAN OBJECTION from Mr A J Burchett.docx (72 KB)

---

**STRATEGIC SITE A46 – NORMANDY/FLEXFORD**

1. **SECONDARY SCHOOL**

There is no justification for a new secondary school in Normandy and I would question the decision-making process that has led GBC to eliminate other potential sites for a secondary school in West Guildford, for example the site at Roker’s Farm. The proposed school did not even feature in the 2014 version of the Local Plan but suddenly appeared in early 2016. This is strange given that SCC’s ‘School Organisation Plan’ of December 2015 contains no reference to the need for additional school places in the west of the Borough. It appears that the only reason that this school is proposed in Normandy is because the developer has managed to obtain an option on most of the land in question and has proposed to the Council that, in return for being allowed to build 1,100 homes, it will provide the serviced land to allow the Council to put a secondary school on the site. The inclusion of a secondary school on this site is merely a ‘Trojan horse’ provided by the developer to have this site taken out of the Green Belt. The Leader of GBC has stated publicly that the inclusion of a school on this site “trumps” any Green Belt protection, allowing a school to be built on this sensitive red Green Belt land but I cannot find any evidence that this is the case.

There appear to be double standards in use by GBC when deciding on the most appropriate site for a school and it seems that they are manipulating the criteria to suit the desired outcome. In the document “Secondary Schools Borough Wide Discounted Sites”, the site to the east of the Borough at Howard of Effingham is described as “zoned as ‘sensitive’ red Green Belt land and there are therefore preferable sites to this on which to accommodate future school needs.” It is

---

Page 2329 of 3335
perverse that in the document there is no mention of site A46 being ‘sensitive red Green Belt land’, which the Leader of the Council has declared it to be, but is instead found to be suitable because of the number of houses that can be built there and the fact that it has a station. It appears that there is no desire on the part of GBC to find more preferable sites for the secondary school in relation to site A46, because it suits their need to have a school on the site to justify the housing.

It is inconceivable that a decision would be taken to place a school anywhere without serious consideration being given to the most suitable location, and a location that is supported by a safe road network. However, in conversation with the School Commissioning Officer for SCC it is clear that only “informal discussions” have taken place between SCC and the developer with regard to this being a suitable site. Just as worrying, through a Freedom of Information (FOI) request, SCC has stated that they “have not undertaken any specific research on ... the ability of local roads to cope with traffic that may be associated with a new school”.

In its official response to GBC in July 2014 to the previous draft Local Plan, SCC said, “A site within the proposed urban extension at Blackwell Farm, with all necessary access infrastructure built in and a catchment surrounding the site, would be a more sustainable location in transport terms for a new secondary school to serve the western side of Guildford.” It is concerning that GBC has not heeded this advice.

GBC has to show that the provision of a school constitutes the “exceptional circumstances” that are required to redraw the boundary on this sensitive Green Belt site, thus removing the site from the Green Belt in advance of development. As is shown on the following pages there has been no serious pre-planning by GBC nor SCC (as the Commissioner for school places), to establish:

- the actual need for a new Secondary school to the west of Guildford
- if this is the most preferable site for a secondary school
- what the Published Admission Number (PAN) should be so that the intake can be established
- whether existing schools can be enlarged or the PAN of these schools increased
- whether the funding to build the school would be forthcoming from the Department for Education (DfE)
- if sponsors or proposers can be found for the school
- whether the road infrastructure can support a new school and is safe to do so
- whether there is the infrastructure to allow pupils to cycle or walk to the school safely from sites to the east and west

The FOI responses have basically stated that this will all be looked at as part of the planning application process. Therefore there is a presumption that the Local Plan will be accepted with a school on this site and that matters will proceed naturally as part of the planning process. So, if it is decided that there are insufficient reasons to place a school on site A46, the land will have been removed from the Green Belt without any justification whatsoever, allowing developers to build houses on what should have remained a Green Belt site.

Therefore I do not believe that the “exceptional circumstances” have been shown and certainly the ‘Sustainability Appraisal’ of the draft Plan does not explain any exceptional circumstance justifying release from the Green Belt. The only circumstance that has been exposed is that the developer wishes to make a huge profit with this ‘Trojan horse’ of a school. It is of great detrimental effect to the village to lose its Green Belt, but of enormous financial benefit to the developer.

Appendix C of the Local Plan, Infrastructure Schedule SED3, states the need for, “A 7-form entry (7FE) secondary school at the Normandy / Flexford strategic development site. Only 1 FE would be needed to serve the strategic development site itself, the remaining capacity would serve the wider area, including Blackwell Farm strategic site.”

It is clear, therefore, that there is no need for a secondary school simply to serve the proposed housing on this site, as a 1FE school would not be viable.

To support this, a FOI request to SCC (as the Commissioner of school places) shows that, without the demand created by the housing development, a new school is not needed.

SCC was asked:
What considerations have taken place with regard specifically to the need for a new secondary school in the area west of Guildford, taking into account projected housing completions but not taking into account any additional housing created by the Guildford Local Plan.

SCC responded:

“Without taking into account any additional housing created by the Guildford Local Plan, there are no proposals for a new secondary school in the area west of Guildford, therefore no such considerations have taken place.”

The GBC Local Plan: Strategy & Sites 2016 – Part 2: Sites, states that the site will include a secondary school up to 8 form entry. Yet when a FOI request was made to SCC:

What is the published admission number (PAN) of the proposed new school in Normandy, their response was:

“It is too early to define the admission number of the proposed school in Normandy. This would be largely dependent on the number of housing developments progressed for which a new school may serve, taking into consideration any capacity in existing schools closer to the time when the places are needed. The provisional size is up to 7FE in order to ensure sufficient provision is considered in line with possible housing.”

The GBC Local Plan: Strategy & Sites 2016 – Part 2: Sites, also states that “Secondary educational needs will be reassessed at the time a planning application is made at which time any recent new secondary school provision will be taken into account.”

These responses clearly shows that SCC has no idea of the number of pupils that will require a place at the school, nor if existing schools could accommodate the pupils instead of building a new school. If fewer developments are progressed than expected the PAN of the school may well fall below 150, which SCC has stated is the minimum number required to make a school viable. Therefore it does not make sense to progress with a school if there is a possibility that there will be insufficient pupils to make the school viable. The land will be removed prematurely from the Green Belt without any assurance that the school will ever be built.

Given the poor road links to and from the development site, it would be dangerous to transport in a further possible 840 children a day, with all the inherent dangers at drop off and pick up time. Alternatives should be looked at, such as enlarging Ash Manor school, or others, to take this 1FE (30 children), which would be a much cheaper option. The possibility of enlarging other secondary schools in Guildford should also be looked at as an alternative, as none of these schools is anywhere near approaching the PAN of 360 pupils, which the SCC School Organisation Plan states is the maximum in order to be viable. The overall PAN for all 7 secondary schools is only 1426, or an average of 204 (or 211 taking into account the proposed increased numbers at St Peter’s and Guildford County), whereas the School Organisation Plan states that the viable number is between 150 and 360. Alternatively, GBC should seek another site for the school that has safe transport links and does not destroy this sensitive red Green Belt site. Or approaches should be sought from Academies or Free Schools to sponsor new secondary school/schools in the Guildford borough. The ‘New Schools Network’ states, “Free schools are expected to open in existing buildings and it is unlikely that the Department for Education will allow schools to open in new buildings “, which is what is anticipated with the school on this site.

The expansion of existing schools would better keep pace with the demand from new housing, and also take account of the declining birth rate which has already been noted. If this development did take place, unless the school was built first, or in stages, children would have to go to a secondary school somewhere else, and this would reduce the PAN below what is viable (SCC has stated that this development would yield 157 pupils a year and that the minimum PAN needed to make a school viable is 150). Building a school in stages over a number of years is not practical as facilities such as PE, Science, Technology, Art etc. will be needed from day 1, as well as general teaching spaces, playgrounds, sports pitches etc. The idea of the concept masterplan is fine, but it shows the actual completed development, with the children from all the houses attending their local secondary school, and this may not be reality until 2033. It is especially concerning that in Appendix C, the Infrastructure Study, there is no delivery date against the completion of the school, which indicates that this school may not be constructed until after the housing is built. The developer will want to make as much profit as possible from the housing, before constructing the school. In the meantime the children of secondary school age will have been placed in secondary schools elsewhere, and the school will not be needed. If the school is not needed the Green Belt must be protected.
From responses to FOI requests (see below) it is clear that there has been no serious attempt by GBC nor SCC (as the Commissioner of school places), to establish the need for a new Secondary school to the west of Guildford, nor to ascertain whether the funding to build the school would be forthcoming from the DfE. To include a proposal in the Local Plan that seeks to justify building 1,100 houses in the Green Belt on the back of an unsubstantiated need for a school, rather than on an objective analysis, seems highly irresponsible. The land would be removed from the Green Belt without any assurance that the school would ever be built.

The Leader of GBC maintained that, before the Extraordinary Meeting of the Council on 24 May 2016, SCC had reaffirmed the need for a school in the west of Guildford, although it transpired that this was purely on the basis of “informal discussions”. These informal discussions were confirmed in a conversation I had with the School Commissioning Officer. In other words, a new strategic site, A46, which had not featured as such in the previous consultation, was included in the Submission Local Plan on the basis of nothing more than informal consultations about the likely future requirements for secondary school places. This hardly constitutes the serious decision making that would be expected to define the “exceptional circumstances” that are required to redraw the boundary on this sensitive Green Belt site.

Additional information relating to the secondary school

Ref. the document: “DfE Guidance for decision-makers”

Statutory guidance for decision-makers deciding prescribed alteration and establishment and discontinuance proposals

April 2016

“Demand v need

This states, “Where a Local Authority (LA) identifies the need for a new school, to meet basic need, section 6A of EIA 2006 places the LA under a duty to seek proposals to establish a free school via the ‘free school presumption’. However it is still possible to publish proposals for new maintained schools outside of the competitive arrangements, at any time, in order to meet demand for a specific type of place e.g. places to meet demand from those of a particular faith.”

FOI requests to GBC and SCC show that no approaches have been made to sponsors or proposers to set up a Free School.

SCC was asked:

With regard to the proposed new secondary school in Normandy, can you please tell me which Academy or Free School has approached the County Council proposing sponsorship arrangement for the new school. If neither has made the approach can you please advise me on what basis an approach has been made, and by whom, and how this fits with Government legislation regarding new schools

SCC responded:

“The County Council has not received any approaches regarding sponsorship arrangements for the new school. It has not invited any such approaches as it would be too early to do so at this stage. If and when the new school is progressed, the process to do so would be aligned with the Department for Education’s guidance on the establishment of new schools.”

So, SCC admits that no planning has yet taken place about approaching sponsors or proposers to set up a Free School and this would only happen when “the new school is progressed”. Therefore the land could be taken out of the Green Belt on the assumption that a sponsor or proposer may be found, but this may not happen. By then the land would have been removed from the Green Belt and the school may never be built.

As no sponsor or proposer has been sought I question the legality of the school being included in the proposal for the site.

The document “DfE Guidance for decision-makers” continues:

This states, “The decision-maker should take into account the quality and popularity of the schools in which spare capacity exists and evidence of parents’ aspirations for a new school or for places in a school proposed for expansion.”
I can find no evidence in the Local Plan that GBC or SCC have sought “evidence of parents’ aspirations for a new school”. FOI requests were made to GBC and SCC to ascertain what considerations had been given to enlarging existing schools.

SCC (GBC referred me to SCC) was asked:

**What consideration has been given to enlarging existing schools rather than building a new school?**

SCC responded (and with GBC’s knowledge):

“Excluding possible demand from the draft Local Plan, two expansions are planned to meet the existing demographic demand. 20 additional places per year are being provided at Guildford County and 30 places per year at St Peters from September 2017. Including demand from the draft Local Plan, further options to expand existing schools are limited, would not provide for the level of demand from the Local Plan and locations of existing schools would not necessarily serve the developments proposed in the Local Plan.”

In a conversation with the School Commissioning Officer for SCC I was told that “there is limited scope to enlarge existing schools or increase rolls”. SCC was asked:

**Please provide me with information that shows the published admission number of the proposed new school in Normandy (how many forms of entry), and how this has been calculated.**

SCC responded:

“It is too early to define the admission number of the proposed school in Normandy. This would be largely dependent on the number of housing developments progressed for which a new school may serve, taking into consideration any capacity in existing schools closer to the time when the places are needed.”

So they say that this “takes into consideration any capacity in existing schools closer to the time when places are needed”. This contradicts the earlier answer where they state “further options to expand existing schools are limited and would not provide for the level of demand from the Local Plan.” It appears that SCC does, in fact, accept that there is spare capacity in existing schools.

SCC was asked:

1. **What formal meetings or conversations have taken place between Councillors or Officers of Surrey County Council and Headteachers/Chairs of Governors of secondary schools in Guildford Borough, including those just over the County Boundary in Hampshire, regarding:**
   - strategies for increasing the intake, if their school is undersubscribed
   - increasing the published admission numbers for their school
   - enlarging their school premises to increase their admission number as opposed to building a new secondary school in the west of the Borough

1. **Any financial calculations that have been made to compare the cost of enlarging existing schools in Guildford Borough to cope with increased numbers of pupils arising from the local plan with the cost of building a new school at Normandy, assuming that the serviced land will be provided by the developer**
2. **The concern that Headteachers and Chairs of Governors have about a new school reducing the intake to their school**

The School Commissioning Officer for SCC told me that there are often discussions with schools regarding their intake and spare places. However, she was unable to confirm that any formal discussions on these issues had taken place related to the current draft Local Plan. She confirmed that, because SCC does not believe that it is possible to expand existing schools, no calculations have been made to compare the costs of enlarging existing schools with the cost of building a new school. It
was also clear that there have not been any discussions with Headteachers or Governors about the impact that a new school may have on the rolls of existing schools.

However, research by the village’s County Councillor has shown that the responses from SCC may not accurately reflect the situation, as many existing schools are actually undersubscribed and others would be happy to expand, with the existing capacity making a new school unnecessary, taking into account the planned expansions at Guildford County and St Peters. Headteachers and Governors of these other schools are concerned that a secondary school in Normandy would take pupils from their schools, reducing their numbers.

The County Councillor’s research shows:

- Kings College is currently 57% undersubscribed. The capacity at the school is 900 pupils, and there are only 389 on the school roll (43% utilised) with 511 vacancies. There is capacity on that site to further expand the school, to accommodate more pupils well into the 2020’s if then needed
- The Headteacher of Kings College says, "There is absolutely no need for another school in Guildford; its crystal clear"
- The New Guildford University Technical College, due to open in 2018, will take 240 pupils from the age of 14 in its first year, and that will double to 480 places, relieving pressure on other schools
- Christs College is already taking 30 more pupils a year than its admission number, because it has the space and capacity to do so, and is willing to take still more as it has further capacity
- Ash Manor, Ash, has a capacity of 1,050 and it has 940 pupils, so is undersubscribed by 110 places. The Governors are supportive of the school being expanded to take more pupils by 30 places a year (so a total of an extra 150).
- The Head and Governors of Ash Manor School have very strong concerns about a new school in Normandy, just three miles away, and the possible negative effects on their intake. Other Headteachers must have the same fears
- Connaught School, just over the County Boundary in Hampshire, is also undersubscribed by 90 places and is available to Surrey children
- Hoe Valley Free School, Woking, has an intake of 120 per year, with currently 95 pupils, so is undersubscribed in its first year by 25 and welcomes applications from Guildford parents. It will build up with 120 new places available every year for 7 years - making a total capacity of 840. It has no catchment area, and although it will mainly serve Woking, it will welcome applications from Guildford parents

So, there are currently 736 vacancies at the nearest secondary schools serving the western parishes - not accounting for the 480 extra at the new Technical College to open in 2018, and GBC is already providing 20 additional places a year at Guildford County and 30 places per year at St Peters from September 2017.

The above vacancies are the equivalent of more than a whole secondary school, which negates the need to build a new school at this strategic site. Coupled with this, the birth-rate in Guildford has fallen over the past two years, and whilst it is too early to know if that trend will continue, it is another factor to urge caution, and not to proceed to build a new secondary school at this time.

Appendix C of the Local Plan, Infrastructure Schedule SED3, states the need for, "A 7-form entry (7FE) secondary school at the Normandy / Flexford strategic development site. Only 1 FE would be needed to serve the strategic development site itself; the remaining capacity would serve the wider area, including Blackwell Farm strategic site."

The GBC Local Plan: Strategy & Sites 2016 – Part 2: Sites, shows that the Blackwell Farm site could potentially accommodate 1,800 houses and have a need for a 2FE Primary school. This would project into 2FE that would need secondary school accommodation from Year 7.

Therefore, there is a need shown between the Normandy/Flexford and Blackwell Farm sites for 3 forms of entry. This leaves 4 forms of entry to "serve the wider area".

A FOI response from SCC stated that "The proposed secondary school in Normandy would serve Normandy, Blackwell Farm and Ash, which could be around 4,366 homes. This number of dwellings could yield around 785 secondary aged children. This estimate is based on formulae that calculate the likely average yield from new developments."
If the Normandy/Flexford and Blackwell Farm sites produce 3 forms of entry from 2,900 homes, this means that the remaining 4 forms of entry would come from 1,466 homes, so somehow the maths does not add up here and shows yet again that GBC does not know the number of pupils that will require a place, but are happy to remove the land from the Green Belt without any assurance that the school will be built as the number of pupils requiring a place may not make the school viable.

The document “DfE Guidance for decision-makers” continues:

“Travel and accessibility”

This states, “Decision-makers should satisfy themselves that accessibility planning has been properly taken into account and the proposed changes should not adversely impact on disadvantaged groups.

The decision-maker should bear in mind that a proposal should not unreasonably extend journey times or increase transport costs, or result in too many children being prevented from travelling sustainably due to unsuitable walking or cycling routes.

A proposal should also be considered on the basis of how it will support and contribute to the LA’s duty to promote the use of sustainable travel and transport to school.”

Further information is available in the statutory “Home to school travel and transport guidance for LAs” dated July 2014. This makes it clear that the 1996 Education Act “places a general duty on local authorities to promote the use of sustainable travel and transport.” With regard to school travel plans the guidance states that “Effective plans (should) reduce car use .... reducing congestion caused by school runs”. It also states that “Specific school routes audits are considered good practice.”

The guidance stresses repeatedly the message that “Local walking, cycling and bus strategies should inform the local authority’s duty to promote sustainable school travel” and “the sustainable school travel should .... provide health benefits for children .... through active journeys, such as walking and cycling”.

Appendix C of the Local Plan, Infrastructure Schedule AM5, states the need for an “Off-site cycle network from the land to the south of Normandy and to north of Flexford site to key destinations including Wanborough railway station and to the Christmas Pie Trail, with improvements to a level that would be attractive and safe for the average cyclist.”

This will not be delivered until 2021/2033, is not costed and will be paid for by the developer. It could be that the cycle network is not completed until 2033, 17 years in the future, which would preclude its use as a means of getting to school for a generation of cyclists.

The Christmas Pie trail itself is not mentioned in the Infrastructure Schedule for improvement, and is a convoluted route both west and east, which is unlit, muddy, often flooded and passes through dense woodland and is most definitely not a child-safe route. A FOI response from GBC confirms that no planning has been carried out regarding the suitability and safety of this trail for schoolchildren who may wish to use this route.

The humpback bridge in Glaziers Lane would be hazardous for cyclists travelling to and from the school and, because of the narrowness of the bridge, no dedicated cycle lane could be installed. Similarly, the single track road under the railway bridge in Westwood Lane would be extremely dangerous for cyclists travelling to and from the school.

There is no information in the Draft Local Plan about any proposals for safe walking routes from the Blackwell Farm development or from the Ash direction to this strategic site.

As there will not be safe cycling and walking routes from either the west or the east of the site, parents will undoubtedly bring their children to school by car. No pre-planning has been carried out on the road infrastructure to ensure that these journeys will be safe, as shown below.

Under FOI GBC and SCC were asked (GBC referred me to SCC):
What research has taken place to see how the local rural roads will cope with the increase in traffic that the new school will bring, especially with regards to the railway bridge in Westwood Lane which only accepts one-way traffic and has a height limit, and the dangerous hump-back bridge in Glaziers Lane which has a weight limit

and:

What road safety issues concerning parents parking on Glaziers Lane and Westwood Lane to drop off and pick up their children have been considered?

SCC responded:

“As Surrey have not undertaken any specific research on either the ability of local roads to cope with traffic that may be associated with a new school, or on road safety issues specifically related to parents parking on Glaziers and Westwood Lanes, there is no information to provide on these two points. This would be looked at as part of the planning application process.”

In a conversation with the School Commissioning Officer for SCC it was confirmed that her department had not carried out any surveys to ensure that the supporting road infrastructure could safely service a large secondary school on this site.

So SCC (and with GBC’s knowledge) admits that no planning has taken place about whether the local roads provide a safe infrastructure for the school or could cope with the increased traffic that a new school would bring alongside the traffic from a new 1,100 home development. Neither have they considered the road safety issues of parents parking in the narrow country lanes around the development to drop off or collect their children from the school. Therefore, it could be decided at a later stage that the roads are not safe and are not able to cope with the increased traffic, but by then it would be too late to prevent the construction of 1,100 homes as the site would already have been taken out of the Green Belt.

FOI requests to GBC and SCC show that little or no consideration has been given to accessibility planning for a new school.

SCC was asked (GBC referred me to SCC):

*How will pupils be transported to this secondary school?*

SCC responded:

“This will be determined and planned in detail at a later stage. The draft local plan includes appropriate train routes.”

So SCC (and with GBC’s knowledge) admits that no planning has yet taken place about the transportation of pupils to the school. The response also indicates that the land could be taken out of the Green Belt before any decisions have been made about the safe transportation of pupils to the school. Therefore, it could be decided at a later stage that this would not be a safe site for a school, but by then the land would have been removed from the Green Belt.

The response above that “The draft local plan includes appropriate train routes” is misleading as the station from the Blackwell Farm development (Guildford West – Park Barn) may not be completed until 2029, 13 years in the future, although the school on the Normandy Flexford site would be expecting take 300 children from the Blackwell Farm development, without train, cycle or pedestrian links.

In the outline planning application for the site at Roker’s Farm, which includes a 5FE Secondary School, the “Framework School Travel Plan” and the “Transport Assessment” are models of good practice. Its action plan shows that much thought has been given to the travel plan strategy to ensure that the site has good accessibility by a range of safe transport modes, including on foot and by cycle, as well as roads and pavements that are safe for young people to use, and dedicated drop-off and pick-up spaces for parents to use. This is in contrast to the total lack of forethought or planning that has been given with regard to the school on the Normandy/Flexford site, where the rural roads and footpaths are totally inadequate to support a large school and there are no safe walking or cycling routes. SCC says that these issues will all be looked at as part of the planning application process. Therefore there is a presumption that the Local Plan will be accepted with a school on this site and that matters will proceed naturally as part of the planning process. So, if it is decided that there are
insufficient reasons to place a school on site A46, the land will have been removed from the Green Belt without any justification whatsoever, allowing developers to build houses on what should have remained a Green Belt site.

The document “DfE Guidance for decision-makers” continues:

“Funding”

This states, “The decision-maker should be satisfied that any land, premises or necessary funding required to implement the proposal will be available and that all relevant local parties (e.g. trustees or religious authority) have given their agreement. A proposal cannot be approved conditionally upon funding being made available.

Where proposers are relying on the department as the source of capital funding, there can be no assumption that the approval of a proposal will trigger the release of capital funds from the department, unless the department has previously confirmed in writing that such resources will be available; nor can any allocation ‘in principle’ be increased. In such circumstances the proposal should be rejected, or consideration deferred until it is clear that the capital necessary to implement the proposal will be provided.”

Ref. the document: “New Schools Network” (Newschoolsnetwork.org)

Premises – Finding the right school for you

“The DfE have said that they expect all Free Schools to open in existing buildings, which can be refurbished or extended in order for them to function as schools. The DfE will be unlikely to allow schools to open in a new building. They will only grant Free Schools a ‘new build’ where there is no other viable option in the local area but the advantages of the proposed school outweigh the cost of building. You should not assume that you will be able to open your Free School in a new building. Where Free Schools do occupy new premises, these will be built under much tighter financial constraints than previous government building programmes, such as ‘Building Schools for the Future’ and will most likely be of a modular construction.”

However, GBC has included a new-build school on the plans for this strategic site, in spite of the fact that the DfE may well not allow this to happen.

The LAA makes it clear that funding will be needed for the construction of the school as it is stated that “The site will provide land for a 7FE secondary school.” An FOI request to GBC and SCC shows that no consideration has been given to funding for a new school.

GBC and SCC were asked:

What capital funding is being provided by the Department for Education for a new Secondary School on the strategic site between Normandy and Flexford that is mentioned in the draft Guildford Local Plan. This is to include any confirmation in writing from the DfE that such resources will be available for the new school.

SCC responded (GBC claimed they did not hold the information requested):

“It is too early for considerations to have taken place with regard to this enquiry; therefore no such documents are available.”

So, if the proposal for the new school has to be rejected because capital funding for the construction has not been approved, or there is no confirmation that resources will be available, then surely the school shown on the strategic site has to be removed from the plans, as GBC and SCC have not confirmed that funding will be available. If the school is removed so are the “exceptional circumstances”, and so the Green Belt should be protected, otherwise the land will be removed from the Green Belt without any assurance that the school will ever be built.

As no funding for the school has been approved I question the legality of the school being included in the proposal for the site.
Because of the above points, I believe that GBC’s lack of planning, with regard to the provision of a new school on this sensitive site, has not shown that this is an “enabling development” nor that there any “exceptional circumstances” that would allow the site to be removed from the Green Belt, and I therefore wish to object to the proposal on the grounds given.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

STRATEGIC SITE A46 – NORMANDY/FLEXFORD

1. SUSTAINABILITY & SENSITIVITY

I believe that GBC has incorrectly used data to show the sustainability of Flexford and Normandy and therefore its suitability for development. My rationale is given below.

Two of the key concepts that underpin the local plan are ‘sustainability’ and ‘sensitivity’. Individual settlements are ranked on both counts, and development is favoured in the most ‘sustainable’ ones; conversely, the barrier is higher in the most ‘sensitive’ ones. What is significant is that for the purposes of assessing ‘sustainability’ Normandy and Flexford have been treated by GBC as one settlement, whereas for ‘sensitivity’ they have been treated separately. This could almost have been designed to give us the outcome we have, as in terms of ‘sustainability’ all the assets from the two settlements are aggregated - which maximises its score on this count – but in terms of Green Belt ‘sensitivity’ the open area between the two settlements is disregarded – which reduces our score there. GBC has not been consistent here.

Sustainability

With regard to the Briefing Note that the Councillors had at their meeting on 13 April, para 3.4 says that since the last version of the plan the Council had commissioned further work on the Green Belt and Countryside Study and on a new Green Belt Sensitivity Map. The Summary of the Briefing Note (para 8.2) states that while the new plan claims to give more protection to the Green Belt (one of the major strands of the consultation feedback last time) we are an exception to this approach. To quote from the paper:

“Three exceptions to this approach demonstrate it has not been slavishly followed. The new strategic site at Normandy and Flexford, which was previously safeguarded for future development, has been allocated for 1100 units and will contain a 7 form entry secondary school. The sustainability of the site is further increased through the rail station and the critical mass created to help the existing villages support day to day services and facilities.”

In other words, GBC has gone against its approach towards ‘sensitivity’ for reasons related to ‘sustainability’. That is why putting together Normandy and Flexford for the purposes of the latter, while keeping them separate for the purposes of assessing the former, is so significant.
The July 2013 document ‘Guildford Borough Settlement Profiles’, page 47 (section 16.0) states that Normandy and Flexford are treated jointly; the section is headed “Normandy and Flexford - the local community consider Flexford to be a part of Normandy” and, further on it is stated: “Normandy Parish Council considers Flexford and Normandy to be one village. We have therefore assessed and scored it on this basis.”

What this means is that, for example, the bus that serves Normandy is treated as an asset to Flexford, and the train that serves Flexford an asset to Normandy. All of this contributes to a conclusion (still in section 16) that includes the statement: “it is clear that more development here (i.e. Flexford) incorporating a mix of uses could improve the sustainability of the existing settlement and that of nearby Normandy.”

This thought is repeated in the May 2014 document “Guildford Borough Settlement Hierarchy”. In para 6.4 this states: “There are other settlements that have been identified through the evidence gathering such as...Flexford and Normandy which would benefit from future development and improved access to key services for local residents.”

In other words, Normandy and Flexford together are seen as a suitable site for future development. In this connection it is significant that the tender document produced by GBC regarding further work to be done on the Green Belt and Countryside Study includes the statement, under the heading “Significantly expand a village”, “An initial assessment based on previous consultation, desk-top research and our settlement hierarchy suggests that areas with greatest potential include the countryside such as land between the villages of Normandy and Flexford... Significantly expanding or merging villages would utilise more effectively the services and facilities that are already present there whilst at the same time be of sufficient scale to enable additional supporting infrastructure.”

So, as far back as a year ago at least, GBC was suggesting that a merged settlement of Normandy and Flexford was a prime candidate for ‘significant expansion’. I understand that the developer has been working on this proposal for quite some time, certainly since before the publication of the latest version of the plan, and at least as far back as 2014.

Sensitivity

However, another criterion that has to be met is that of ‘sensitivity’ in terms of the Green Belt, and here GBC commissioned a new document to consider which villages might be ‘inset’ from the Green Belt. With reference to the National Planning Policy Framework (NPPF) the document examines the case for either leaving individual villages within the Green Belt or taking them out. It quotes the relevant part of the NPPF as follows:

“NPPF paragraph 86 notes that if the open character of the village makes an important contribution to the openness of the Green Belt, the village should remain washed over by the Green Belt.”

I understand this to mean that if a village is bounded by natural or man-made features it is deemed not to have an ‘open’ character and therefore does not contribute to the openness of the Green Belt. The document considers – separately – the villages of Normandy and Flexford and concludes that they are both self-contained and therefore are not ‘open’ in the sense explained above.

In the case of Flexford the significant comment is: “In summary, it is considered that Flexford to the south of the railway line should be inset within the Green Belt due to: The difference in open character to the north and south of the railway line, with high density development and enclosure more evident to south of the railway line in comparison to the north”

There is a distinction between Flexford south of the railway line and Flexford to the north of it, and the explicit acknowledgement of the openness of the area to the north – which is now designated to accommodate 1100 homes plus a secondary school!

Nothing could demonstrate better the false logic of considering Normandy and Flexford as a single settlement for purposes of ‘sustainability’ but as separate ones for the purposes of Green Belt ‘sensitivity’. On the map in Appendix 8 – Village Insetting Boundaries Map, the green lines enclosing the two settlement areas that it is proposed to ‘inset’ from the Green Belt, separated by a vast area of open land, can be seen. In other words, if you treat Normandy and Flexford as a single settlement as per the ‘Settlement Hierarchy’ it is clear that the open spaces between the two parts of the settlement do “contribute significantly to the openness of the Green Belt” and that, as per the NPPF, the whole area should remain
So, what we have is one set of criteria applied to achieve one purpose (establishing the ‘sustainability’ of Normandy/Flexford and therefore its suitability for development) while a contradictory set of criteria is applied to achieve another (the disqualification of a ‘Green Belt’ defence against development). I believe that this demonstrates a major flaw in the GBC Local Plan, and so I wish to object to the proposal on the grounds given.

1. THE STRATEGIC HOUSING MARKET ASSESSMENT

I believe that the Strategic Housing Market Assessment (SHMA) is seriously flawed and overestimates the objectively assessed housing needs (OAN) in the borough up to 2033. It is of great concern that the analysis supporting the conclusions reached in the SHMA, which was published in September 2015, have not been made available for public review, nor has it been reviewed in detail by GBC, or by the Overview and Scrutiny Committee.

My main concerns regarding the SHMA are:

- The 2012 based Subnational Population Projection (SNPP), which G L Hearn claim is a robust starting point, is significantly distorted by an unusual increase in the number of overseas students attending the University of Surrey between 2006 and 2011.
- The 2012 based SNPP forecasts the population to decline by 1,800 by 2033. Therefore the overall projected increase in Guildford’s population to 161,300 is entirely due to the projected growth in net international migration of 23,000 of which, according to the ONS, 57% are foreign students who would normally be expected to move away from Guildford at the end of their studies. The Government has already announced that foreign students will no longer be counted as immigrants, as students come and go.
- Un-attributable Population Change (UPC) shows that between 2001 and 2011 the population of Guildford decreased by 717. It is assumed that this is because of foreign students returning home. However, G L Hearn has declined to make any adjustments for UPC.
- The 2011 Census measured the term time address of students as being their main place of residence, when in reality they will not become heads of households as most will move away at the end of their studies. This has a major and disproportionate effect on projecting household formations.
- GBC has included unoccupied houses in its housing targets. The NPPF states that this should not happen.
- There is no justification to include 25 houses a year to accommodate students as the University forecasts a much smaller increase in student population from 2013 to 2033.
- 120 houses per annum are included in the SHMA to support economic growth. This growth cannot be forecast with any degree of certainty as it depends on so many variables and it is not clear how this figure of 120 has been arrived at. Some of this growth will probably arise from construction work necessary to build homes for the workers who form part of the original economic growth. Serious consideration is required to avoid this “chicken and egg” situation.
- The impact of the European Referendum on projected migration up to 2033 should be assessed.
- GBC should investigate whether there has been any “policy on” intervention that has had the effect of promoting housing in Guildford in excess of the “policy off” needs, and should issue a specific statement accordingly. If applicable, housing need assessments should be repeated accordingly.

I wish to object to the Local Plan as I believe the SHMA is seriously flawed and the objectively assessed housing need is based on false information or information that is not up-to-date. The SHMA should be open to review by all parties and the housing needs assessment repeated using correct and up-to-date data.

1. INFRASTRUCTURE

Wastewater and flooding

Appendix C ‘Infrastructure Schedule’ WCT5 proposes an “upgrade to wastewater infrastructure if assessment (at developer’s cost) shows that additional capacity is needed to provide for Normandy/Flexford.” This to be delivered in years 1 – 15, by Thames Water, with the cost still to be decided, but paid for by the developer and Thames Water.
There has been sewer flooding in Glaziers Lane for decades. My own garden has been covered in sewage on two occasions during severe storm conditions, and other gardens locally have been similarly affected. In 2014 Glaziers Lane was closed for over 2 weeks when sewer reconstruction work took place owing to blockage problems. Last year sewer work was carried out for weeks along the main road in the village (A323) owing to the inability of the system to cope with the sewage from the homes. The current sewer at times cannot cope with sewage from the existing volume of homes without occasionally ‘backing up, and overflowing into gardens, let alone an additional 1,100 homes.

Surrey County Council is the Lead Flood Authority for Surrey, and as such keeps records of all reports made to it of localised flooding problems and they record a high concentration of flooding problems in the roads surrounding site A46. Over several years, the Normandy Flood Forum has been coordinating action with not only SCC and GBC, but the Environment Agency, Thames Water and other agencies to alleviate these issues. The proposed building of over 1,100 additional new homes and a secondary school would overshadow all previous issues in terms of potential flooding risks. Parts of Normandy, including the area next to the Hoe stream, have been and are subject to severe flooding problems, and the associated release of sewage into people’s properties and into the Hoe stream which would cut across the development. The Hoe stream also floods, which affects Glaziers Lane at the bridge crossing the stream, and sewage has been released into it, causing a health hazard.

The site currently allows natural drainage through the soil. If this area is built on the resultant run off of surface water would overwhelm the present system, causing even more flooding in the local area.

Thames Water is well aware of the problem of sewer flooding. In their response to a very recent planning application for just 30 homes in Glaziers Lane they stated “Thames Water has identified an inability of the existing waste water infrastructure to accommodate the needs of this application….. the development may lead to sewage flooding” and this could be for 15 years if the delivery date to upgrade the sewage system is delayed. Whatever any proposed solutions there may be, I am very concerned that it will not be possible to cope with the increased amount of water and resulting flooding and sewage if this site is developed with 1,100 homes.

It is clear, therefore, that the wastewater infrastructure already requires an “upgrade”, and this will be an extremely expensive undertaking for 1,100 homes, with the cost still unknown, but to be borne in part by the developer. I wish to object to the proposal to build 1,100 homes on strategic site A46 on the grounds that:

- the existing wastewater infrastructure will be unable to cope with 1,100 extra homes
- no costings have been carried out to upgrade the wastewater infrastructure to accommodate 1,100 extra homes, nor to ascertain if the developer will be able to meet these costs.

Electricity Supply

Appendix C ‘Infrastructure Schedule’ EG6 proposes to “upgrade electricity supply should capacity assessment conclude it necessary at Normandy/Flexford site.” This to be delivered in years 1 – 15, by UKPN, with the cost still to be decided, but paid for by the developer and UKPN.

The electricity supply in Normandy is notoriously unreliable and households suffer from frequent power cuts, especially in storm conditions. This situation could be exacerbated for 15 years if the delivery date to upgrade the system is delayed.

It is clear, therefore, that the electricity supply would need an “upgrade” and this will be an extremely expensive undertaking for 1,100 homes, with the cost still unknown, but to be borne in part by the developer. I wish to object to the proposal to build 1,100 homes on strategic site A46 on the grounds that:

- the existing electricity supply will be unable to cope with 1,100 extra homes
- no costings have been carried out to upgrade the electricity supply to accommodate 1,100 extra homes, nor to ascertain if the developer will be able to meet these costs.

Healthcare

Appendix C ‘Infrastructure Schedule’ does not include any improvements to Healthcare to go alongside the inclusion of 1,100 homes on strategic site A46 as well as a 60-bed nursing home.
The local doctors’ surgery is already overstretched and nationally it is accepted that the recruitment of GPs is extremely difficult. It is clear that no planning has taken place as to how the existing healthcare facilities in the village, or beyond, could cope with at least 2,500 extra residents, as well as the needy residents in a 60-bed nursing home.

I wish to object to the proposal to build 1,100 homes on strategic site A46 on the grounds that the existing healthcare facilities would be unable to cope with the increased population, and that no planning has taken place to ensure that acceptable medical care would be provided for the new residents.

The Village Green

The GBC Local Plan: Strategy & Sites 2016 – Part 2: Sites, states that “The village green will be in a central location within the development site and form a focus for the community.”

The NPPF states that there should be early and meaningful engagement and collaboration with neighbourhoods regarding the needs and priorities of the village. This has not happened with regard to the village green and other facilities. Had such engagement and collaboration occurred, GBC would have been told by villagers that we do not need another village green as we already have one on Manor Fruit Farm, which is the hub of the village for sport and leisure. Here there is the Village Hall and large car park, playground facilities, adult fitness “green gym”, a bowls club, an archery club, the Therapy Garden, and extensive green spaces for recreation and walking. Shortly there will also be a “trim trail” around the perimeter of Manor Fruit Farm to encourage villagers to exercise. It is planned for senior and junior football, baseball, rounders and softball teams to move to Manor Fruit farm in the future, and there are plans to build a new pavilion here with changing facilities. A little further away in Hunts Hill Road are play facilities for older children and the village’s tennis club. A new village green would divide the village, not “form a focus for the community”. Again, this is clearly a developer-led initiative, planned from a distant desk, without any understanding of what the village does or does not need.

I wish to object to the proposal to build 1,100 homes on strategic site A46 on the grounds that there has been no engagement or collaboration between GBC and the neighbourhood regarding an additional village green that is not required, nor for any of the other “facilities” that are planned, as required by the NPPF.

Developer’s contributions to improve the infrastructure

It is astonishing that developer contributions are allocated within the ‘Infrastructure Schedule’ without any idea of the cost of some of these, which include:

- Major road improvements £2.8m
- Improvements to the bus network TBD
- Improvements to the cycle network TBD
- Upgrade to the electricity supply TBD
- Upgrade to the water supply TBD
- Upgrade to the wastewater infrastructure TBD
- Provision of SANG TBD
- Serviced land for a 7FE secondary school (cost unknown)
- Expansion of Wyke secondary school TBD

It is of further concern that, since the vote to leave the European Union, shares in housebuilders, including Taylor Wimpey, have plummeted. There must be a concern at GBC that in the future this developer may be unable to fulfil its commitment to build the homes, provide the land for the school or make the developer contributions that are expected. Perhaps GBC should take a pragmatic view not to put all its eggs in one developer’s basket when maybe smaller developments are more viable for developers.

I wish to object to the proposal to build 1,100 homes on strategic site A46 on the grounds that the land could be removed prematurely from the Green Belt without any assurance that the developer will be able to meet these unspecified and cumulative costs, nor to provide the serviced land required for the school.

1. THE THAMES BASIN HEATH SPECIAL PROTECTION AREA (TBHSPA)
The strategic site A46 is situated only 800 metres away from the Thames Basin Heath Special Protection Area and so is within the 400m – 5km zone of protection. The TBHSPA contains a Site of Special Scientific Interest (SSSI) recognised as one of the key Natura 2000 European sites...

I wish to object to the Local Plan on the ground that the ecology and wildlife of the area will be threatened by the damaging impact of pollution from the increase in traffic that an 1,100 home development will bring, no matter what avoidance or mitigation measures are implemented.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

LOCAL PLAN OBJECTION from Mr A J Burchett (1).docx (76 KB)

Comment ID:  pslp173/118  Respondent:  8747969 / Alan Burchett  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Normandy and Flexford

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing in support of Guildford Borough Council’s decision to remove Strategic Sites A46 (Land to the south of Normandy and north of Flexford) and A47 (Land to the east of the Paddocks, Flexford) from the Local Plan. My reasons are that the infrastructure would have been unable to cope with developments of the size previously planned, and that these sites are within the Green Belt and should remain washed over.

I am also writing to object to the insetting of parts of Normandy and Flexford as this land contributes to the openness of the Green Belt and should therefore remain washed over. There is evidence in past appeal decisions by Planning Inspectors that the land at Flexford and Normandy contributes to the openness of the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  PSLPA16/456  Respondent:  8748545 / Frank Webster  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Shalford (south)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing to object to the proposal in the latest version of the Guildford Local Plan to move the green belt boundary to exclude the fields behind Shalford Village Hall and to extend the village settlement boundary to include these fields. The existing boundaries have been in place for a long time and the only reason for moving them is to permit the development of the land in due course.

The reasons for my objections are

- This is the highest land in the local area and any housing built on it would tower over the village facilities as well as the surrounding area, damaging the open character of the village.
- Access to the site would be via Chinthurst Lane, which is already very congested at peak times, especially at its north end where it serves as a de facto car park for Shalford Station, as well as in the single lane parts to the south. I have seen cars drive across Shalford Common to escape gridlock in the Lane, and this sort of problem would become more frequent if more traffic was generated by development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
There are two railway bridges that constrain the free movement of traffic. One on Westwood Lane where traffic is limited to one lane to pass the bridge. Plus one on Glaziers Lane, there are two lanes here, but they are narrow and angled slightly from the main road direction. At some point a lorry or other large vehicle will cause a major accident here as they, due to the angle find it almost impossible to stay on the their side of the road as they cross the bridge. I’m sure we’d all prefer to avoid such an incident rather than perhaps an innocent pedestrian walking to the station being hit.

In addition there is a 90 degree right hand bend where Flexford Road and Glaziers Lane join, another narrow, dangerous, unsighted corner where larger vehicles can only get around it on the wrong side of the road.

The north end of Glaziers Lane is also very narrow, if you stood on the corner for 10 minutes at pretty much any time of the day you will witness cars unable to keep to their side of the road as they come around the corner. Worse still buses or lorries entering the road cannot turn the corner without veering onto the wrong side of the road as there is no room, many a time you have to stop in advance of the junction to let a large vehicle negotiate the road entrance. Something that will only get worse if the level of traffic increases.

The road cannot be expanded as there are houses on both sides of the corner, and it is also very close to two bus stops so pedestrians will also be on the pavement near these corners another unassessed risk.

At peak traffic times the road already has extensive queues which will only be exacerbated by adding in 1,100 houses and at a conservative level 1,500 cars. This will have a knock on impact on the Aldershot Road and traffic into and out of Guildford, as well as encouraging yet more traffic to clog the Northern and Southern access points of the village.

Adding a School will only bring more cars into the area causing even more chaos and further be compounded by the fact that Westwood and Glaziers Lane have no parking areas other than in the road and so just maintaining a flow of traffic is likely to be an issue, something we’ve seen here the last couple of months with a couple of small road works that have been in place, and the resulting traffic queues.

There appears to be no provision for expanded or additional roads to ease the congestion in this proposal, and even if there were it is likely that such improvements will encourage more drivers off of the Hogs Back and creates even more of an issue for the Aldershot Road.

- Our rural environment will be massively impacted by this, the last swathe of green between Guildford and Aldershot. We moved here to be in a more rural area, with a better quality of air, less noise and light pollution. As of today we can walk from our house in almost any direction into green fields. All of this will be irrevocably changed by such a proposal.

Noise and light pollution will increase significantly as will exhaust gasses damaging the countryside and therefore driving our wildlife away.

Wildlife in the area will be forced away by the building process and the loss of natural habit, once lost it will never return. We regularly get hedgehogs, bats, 2 different types of woodpecker, foxes to name but a few animals in garden, all of this will be changed by such a development. It is inevitably going to have an impact on them, not least the loss of their natural habitat.

The land in this area is supposed to be safeguarded, how can it now suddenly not be so?

As Grade 3 arable and pastoral land this should be protected.

It’s also an area where water naturally settles from the Hogs back and the North as Normandy is the low point of the area. Fields regularly get water logged and flooded in the winter. Adding yet more houses will have a knock on impact on not just this water table (forcing it into a smaller space and no doubt causing it to rise further as it has less space to occupy), but also overloading the local sewage system that is already stretched to capacity and issue for some houses in Glaziers Lane with one way valves needed to protect the houses at times of wetter weather.

There is increasing high density urbanisation around Ash and Pirbright Heath we need to protect our green space as supported by planning inspectors as our green fields contribute to the “openness” of the Green belt and from the Hogs back maintain the panoramic view of our green field, as a part of the Surrey Hills AONB.
On this basis I would urge you please to removal from the local plan the proposal to develop Normandy’s Green Belt. Please rather look to the conversion of empty offices in Guildford to flats, or develop brown field sites before green belt land is irrevocably lost.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp173/547  Respondent: 8748801 / N J Norton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Habits Regulations Assessment 2017
I object to all references to “Appropriate Assessment” being replaced by reference to “HRA” (Habits Regulations Assessment). Appropriate Assessment has a specific application in planning guidance and should be used appropriately in this document to avoid confusion now and in the future. I propose all references the HRA per site be replaced by the phrase “Appropriate Assessment”

2.5 Air Quality Impact Assessment
I object to this section of the HRA 2017 document. At no point is any evidence of actual measured levels of NOx or CO2 at the locations identified in Table 4: Location of Link Roads analysed within 200m of the Thames Basin Heaths SPA. There is total reliance on Surrey County Council Transport department modelling.

The modelled levels are then treated as if they are actual measurements in Table 5: The Critical Load for the Target Habitats of the Thames Basin Heaths SPA. This can form no rational measured basis of future assessment of policy failure or success. I propose that this section of the document should be rejected and can form no part of policy formation in relation to Appropriate Assessment of sites until actual monitoring data for NOx and CO2 deposition levels are presented in relation to the locations identified in Table 4.

3.3 Recreational pressure
I object to this section of the HRA 2017 document. In paragraphs 3.3.6 and 3.3.7 the authors make negative assertions regarding the validity of scientific studies of disturbance and predation without presenting contrasting evidence. Under these circumstances, such assertions are merely hearsay and can make no contribution to the veracity of the scientific evidence.

I propose paragraphs 3.3.6 and 3.3.7 are either withdrawn from the document or their assertions ignored. I object to paragraph 3.3.9. It fails to recognise and include reference to the Natural England follow-up study published in 2014 [Natural England Commissioned Report NECR136 Results of the 2012/13 visitor survey on the Thames Basin Heaths Special Protection Area (SPA) First published 13 February 2014] that shows a 10% increase in visitor numbers to the Thames Basin Heaths SPA. I propose that paragraph 3.3.9 should be treated with caution unless and until it is revised to carry a reference to the 2014 published NE follow up study [Natural England Commissioned Report NECR136 Results of the 2012/13 visitor survey on the Thames Basin Heaths Special Protection Area (SPA) First published 13 February 2014], I object to paragraph 3.3.4 and its simple-minded reliance on Dept of Transport generic presentation of deposition of roadside pollutants Figure 2: Traffic contribution to concentrations of pollutants at different distances from a road (Source: DfT). Once more illustrating a naïve acceptance rather than carrying out actual roadside measurements at provable sampling points around the TBHSPA perimeter where roads such as the A322 run directly alongside the land in question. I
propose that until such data from actual roadside measurement in the SPA is available paragraph 3.3.4 should be treated with caution.

4 HRA Screening of Policies within the Guildford Local Plan Strategy and Sites Submission Version from 2016
I object to the assessment of Policy H1 Homes for All as having no HRA implications in Table 7: HRA Screening of the Policies within Guildford Local Plan Strategy and Sites Submission Version for Effects on Thames Basin Heaths SPA. The whole local plan that is to provide homes for borough residents determines approximately 6,500 new homes will be built within the 400m-5km mitigation zone of TBHSPA. How can this be brushed aside simply on the basis that the Policy H1 makes no reference to a quantum of housing? I propose that this assessment of Policy H1 be disregarded.

9.4 SANG Provision Assessment
I object to the continued inclusion of “Policy A46: Land to the south of Normandy and north of Flexford” in para 9.4.6 p55. This site is no longer part of the Local Plan. I propose the removal of “Policy A46: Land to the south of Normandy and north of Flexford” from para 9.4.6

9.5 Summary of Recommendations
I object to the continued inclusion of “Policy A46: Land to the south of Normandy and north of Flexford” in Table 13: Table identifying recommendations relating to SANG provision I propose the removal of “Policy A46: Land to the south of Normandy and north of Flexford” from Table 13

11.4 Recommendations relating to SANG provision
I object to the continued inclusion of “Policy A46: Land to the south of Normandy and north of Flexford” in Table 16 Summary of recommendations relating to SANG provision. I propose the removal of “Policy A46: Land to the south of Normandy and north of Flexford” from Table 16

12.2 Update April 2017 Modifications: SANG Assessment
I object to the content of Para 12.2.3. The wording demonstrates the council has no answer to Natural England’s outstanding question regarding how financial contributions provided in Policy P5: Thames Basin Heath SPA would be secured.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - Normandy and Flexford

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Appendix H Maps H-P, page 24 Normandy & Flexford amendments 3-8
I object to the boundary changes that insert Green Belt boundaries around Flexford and Normandy settlements and Walden Cottages (p24 Amendments 3-8), ‘insetting’ them from the Green Belt. At the detail presented, even when ‘zoomed in’ the new map boundaries are indistinct and provide no basis to distinguish in low-level detail between the 2003 Local Plan established settlement boundaries and where the proposed ‘inset’ boundaries will lie to reveal what new Green Belt land will be included within the ‘inset’ boundaries, for which proof of ‘exceptional circumstances’ (NPPF para 89) is required but not provided by the council in the Evidence Base.
I propose the Green Belt boundaries for Flexford, Normandy and Walden Cottages ‘inseting’ them from the Green Belt be removed from the map on page 24 and that the settlement areas remain “washed over” to contribute to the “openness” of the Green Belt preventing the coalescence of Ash South & Tongham with Normandy. Further, maintaining the “openness” of Flexford and Normandy contributes positively to views into and from the Surrey Hills Area of Outstanding Beauty from the Hogs Back.

I object to the assertion in Policy P2, para 4.3.13 that Normandy and Flexford “are now inset from the Green Belt”. To remove land from the Green Belt, effectively re-drawing the Green Belt boundary, the council must provide evidence of “exceptional circumstances” as required by NPPF para. 89. The council has provided no such evidence in the proposed submission documents or previous or new Evidence Base documents. No such decision has been taken by a Planning Inspector, therefore the settlements remain in the Green Belt.

I propose the words “are now inset from the Green Belt” in para 4.3.13 are removed and replaced by “are proposed to be inset from the Green Belt”. There is evidence in past appeal decisions by planning inspectors that Flexford and Normandy land contributes to the ‘openness’ of the Green Belt, a key test for remaining ‘washed over’. In particular, the final decision at North Wyke Farm [GBC Application 14/P/00779, PINS Appeal APP/Y3615/W/15/3002308] recognised that Normandy settlement land contributed to the ‘openness’ of the Green Belt. I require my previous comments to the first Regulation 19 consultation to be taken into account. This adds to comments supporting ‘openness’ made in the decisions to grant temporary planning permission for Gypsy pitches at Green Lane East [GBC Application 10/P/00507, PINS Appeal APP/Y3615/A/10/2140630] and Palm House Nurseries, Glaziers Lane [GBC Application 09/P/01851, PINS Appeal APP/Y3615/A/10/2131590].

I object to Sustainability Appraisal 2017 para 10.4.7, where it is asserted that Policy D4 (Character and design of new development), which refers specifically to design considerations within villages, and a new designation of Open Space (Policy ID4) “that policy is in place to protect open space and village character, which is known to be important to rural communities”. This is no substitute for being ‘washed over’ by the Green Belt and appears instead to knowingly be a sop to the impact of ‘inset’. I propose the removal of the text “that policy is in place to protect open space and village character, which is known to be important to rural communities” from Sustainability Appraisal 2017 para 10.4.7

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/2000  Respondent: 8748801 / N J Norton  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

H1 Blue Policy Box

I object to the removal of the following paragraph, page 33 from the Policy statement box:

"Density
New residential development is required to make the most efficient use of land whilst responding to local character, context and distinctiveness. Residential densities will vary dependent upon the local area context and character and the sustainability of the location. Higher density development will be supported in Guildford town centre."

I propose the reinstatement of the following paragraph to the Policy H1 Policy Blue Box:
"Density
New residential development is required to make the most efficient use of land whilst responding to local character, context and distinctiveness. Residential densities will vary dependent upon the local area context and character and the sustainability of the location. Higher density development will be supported in Guildford town centre."

Para 4.2.8
I object to the removal of the following paragraph, page 38 para 4.2.8 as follows:

"Density
4.2.8 We have a responsibility to use our natural resources, such as land, wisely. Efficient use of land is essential. Housing density describes the number of homes developed within a particular site area. It is usually calculated by the number of dwellings per hectare (dph). Increasing densities can help to reduce the land needed for new homes and make development more sustainable. It can also support more facilities and services. Certain areas can accommodate higher densities provided there is no adverse impact on the character of the area and the infrastructure is able to cope. Planning applications will be assessed on a case-by-case basis having regard to the local context, character of the surrounding local area and the sustainability of the location. This will include consideration of established street patterns, plot sizes, spaces around buildings, and relationship with nearby buildings as well as form, massing, height of existing buildings and structures, and materials."

I propose this paragraph be re-instated. Without recognition of density requirements, Policy H1 will fail monitoring and any future assessment.

It is essential to recognise and state in Policy H1 that different sites will sustain different dwelling densities for effective use of land and local sustainability. Removal threatens inappropriate densities in smaller rural communities and under-delivery of high-density development in Guildford town centre. Lower densities in rural locations threatens to increase sprawl that is otherwise prevented by Green Belt protections, higher density would be inappropriate in rural locations; lower densities in Guildford town threatens to reverse the benefits of the emerging brownfield register requirement and failure to deliver the sought for "sustainable development" and "modal shift" by encouraging high density urban development within walking and cycling distance of major transport hubs and local services.

Para 4.2.21
Policy H1, Gypsy, Traveller & Travelling Showpeople pitches & plots
I object to the changes in paragraph 4.2.21, page 40, particularly the removal of a definition of site size where originally "We support small-scale traveller sites (up to nine pitches or plots)" has been changed to "Small-scale traveller sites are supported". I live within 600 metres of a 6-pitch private Gypsy & Traveller site. The traffic generated is of vehicle types from private cars to vans, 7.5 tonne trucks and civil engineering equipment, of high frequency and at all times of day and night. A site with a higher number of pitches would have the capacity to generate a level of traffic and disturbance unacceptable to any settled resident within a 500 metre radius.

I propose the reinstatement of the original sentence as below but with a lower number of pitches as this provides certainty for the settled community, removes the capacity of the council to vary its idea of "small" at any time, provides certainty to the gypsy & traveller community, [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature] and provide a simple incremental measurement of the success of this part of Policy H1.

"We support small-scale traveller sites (up to six pitches or plots)".

Para 4.2.24
I object to revised paragraph 4.2.24, page 40 which states "The loss of pitches or plots will be strongly resisted."

This council has been dilatory over the last 25 years I have been resident in Normandy in attempting to initiate new Gypsy & Traveller pitches due to political expediency. This statement is typical of a current "have cake and eat it" attitude. Should Gypsy & Traveller sites in the Green Belt have permanent planning permission rejected at appeal for legitimate planning reasons, local politicians and planning professionals in the council have only themselves to blame.

I propose this sentence "The loss of pitches or plots will be strongly resisted." should be removed from paragraph 4.2.24.
It is a hidden threat to the settled community and represents an attempt to manipulate the rights of the settled community in a negative way via planning policy.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H3 Blue Policy Box

I object to the insertion of the word "affordable" in all locations in the blue policy box. Planning guidance defines "affordable" as 80% of local rental levels or 80% of average house price. The latest South West Surrey SHMA for the Guildford housing market sets the average house price at approx £465,000 of which 80% is approx £365,000; this is not "affordable" to those essential service workers such as nurses, local authority employees, public transport employees, fire service employees. This will simply provide further opportunity to private housebuilders to flood local villages with more market homes under the guise of being "affordable".

I propose the removal of all references to "affordable" in the Policy H3 blue policy box.

Para 4.2.49

I object to the phrase "This includes a cascade approach to the allocation of rural exception housing." being removed from paragraph 4.2.49, page 49 as it links to provisions in the removed paragraph 4.2.54.

I propose the phrase "This includes a cascade approach to the allocation of rural exception housing." is reinstated in paragraph 4.2.49, page 49.

Para 4.2.54

I object to the removal of paragraph 4.2.54, page 49 as follows:

"To ensure that the housing is secured permanently to meet local affordable housing needs, we will require the affordable housing provider to enter into a planning obligation with cascade provisions. This requires the housing to be allocated to people with a local connection to the parish (through residence, employment or close family), followed by those with a local connection to adjacent parishes within the borough who meet the criteria, and finally those with a connection to the borough of Guildford in accordance with its published scheme Guildford Homechoice (or equivalent scheme)."

It is essential that housing delivered by Policy H3 is for those identified with loca connections. We have already suffered from the council pushing those from the general housing list into housing association properties built in Normandy under the auspices of being for those identified in a local housing needs survey.

I propose the re-instatement of paragraph 4.2.54, page 49 as follows:

"To ensure that the housing is secured permanently to meet local affordable housing needs, we will require the affordable
housing provider to enter into a planning obligation with cascade provisions. This requires the housing to be allocated to people with a local connection to the parish (through residence, employment or close family), followed by those with a local connection to adjacent parishes within the borough who meet the criteria, and finally those with a connection to the borough of Guildford in accordance with its published scheme Guildford Homechoice (or equivalent scheme)."

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P1 Blue Policy Box
I object to all additions and removal of text from the Policy P1 blue policy box.

The Policies Map is an inadequate representation at all levels of detail of the protections required by the Surrey Hills AONB and locally designated AGLV land.
I propose the contents of the blue policy box for Policy P1 revert to their previous content as follows:

"(1) The Surrey Hills Area of Outstanding Natural Beauty (AONB) will be conserved and enhanced to maximise its special landscape qualities and protect it from inappropriate development. All proposals will be considered against whether they:

• conserve and/or enhance the setting and views of the AONB
• conserve wildlife, historic objects or natural phenomena within it
• promote its enjoyment by the community and visitors to the area
• support the rural economy of the Surrey Hills area
• provide or maintain public access to the AONB.

(2) In accordance with national planning policy, there will be a presumption against major development in the AONB except in exceptional circumstances and where it can be demonstrated to be in the public interest.

(3) High priority will be given to the conservation and enhancement of the natural beauty of the AONB and development proposals must have regard to protecting its setting.

(4) Development proposals will also be assessed against the provisions of the current Surrey Hills AONB Management Plan.

(5) The AGLV will be retained until such time as there has been a review of the AONB boundary. Development proposals within the AGLV will be required to demonstrate that they would not result in harm the setting of to the AONB or the distinctive character of the AGLV itself."

Para 4.3.5
I object to the removal of the text of paragraph 4.3.5, page 52
"As the local planning authority we have a duty and an opportunity to ensure that this is achieved." The removal of this text illustrates the complete abrogation of public duty encompassed by the current leadership of this council. I propose the sentence "As the local planning authority we have a duty and an opportunity to ensure that this is achieved." is returned to paragraph 4.3.5, page 52.

Para 4.3.6
I object to the removal of the text of paragraph 4.3.6, page 52 as follows:
"Applications for major development in the AONB will be refused unless exceptional circumstances are demonstrated and the development is proven to be in the public's interest."

Apart from illiterate use of the apostrophe, this is a further attempt by the council to avoid its statutory duty to protect the AONB from inappropriate development, leaving it open to any housing or commercial development.

I propose paragraph 4.3.6 is returned to its original content as follows:
"Applications for major development in the AONB will be refused unless exceptional circumstances are demonstrated and the development is proven to be in the public's interest. In considering major applications in the AONB, the Council will have regard to the principles outlined in Policy 8 and Paragraph 116 of the NPPF. Whilst there remains a lack of national guidance, the Council will define ‘major development’ on a case-by-case basis, taking into account relevant factors such as the size, scale and setting of the proposed development."

Para 4.3.8
I object to the changes to paragraph 4.3.8, page 53.
I propose the reinstatement of paragraph 4.3.8 to its original content as follows:
"4.3.8 Natural England has subsequently agreed to undertake a review of the AONB boundary and will consider further evidence presented to them. The review is not anticipated to commence until 2018 at the earliest. In the meantime, the candidate areas identified will retain their current status as AGLV."

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Para 4.3.18
I object to the changes to paragraph 4.3.18, page 56 as follows:
“The exceptions listed include development such as new buildings for agriculture and forestry, and the redevelopment of previously developed land subject to the impact on the openness of the Green Belt.” This wording weakens Green Belt protection.
I propose returning paragraph 4.3.18 to its original content as follows:
“The exceptions listed include development such as new buildings for agriculture and forestry, and the redevelopment of previously developed land where it would not have a greater impact on the openness of the Green Belt.”

Policy P2 Green Key Evidence Box
I object to the removal of the "National Policy Planning Framework" as a source of evidence in the green Key Evidence box, page 58.
I propose the reinstatement of "National Policy Planning Framework" as a source of evidence in the green Key Evidence box.
I object to the inclusion of the renamed document "Settlement Hierarchy (Guildford Borough Council, 2014)" in the green Key Evidence box.

The Settlement Hierarchy document has little if anything to do with Green Belt policy. It was castigated in all previous rounds of consultation as a flawed analysis based on specious presentation to parish councils as a community survey without explanation that it would have future use in the Local Plan process. Its ability to define the services and facilities
of communities of various sizes has no bearing on Green Belt policy development or delivery. I propose reference to the "Settlement Hierarchy" document should be removed from the green Key Evidence box of Policy P2. I propose the references in the green Key Evidence box for Policy P2 should appear as follows:

Key Evidence

National Planning Policy Framework
Green Belt and Countryside Study Volumes I – VI (Guildford Borough Council, 2011 and 2014)

Answer (if comment is on questions 1-7 of the questionnaire): ()

Paras 4.3.28 – 4.3.31

I object to all changes in Introduction, p59, paragraphs 4.3.28, 4.3.29, 4.3.30 and 4.3.31 as they ease the path to more intensive development rather than maintaining a degree of protection to countryside that contributes to views into and out of the Surrey Hills AONB area of the Hogs Back.

I propose paragraphs 4.3.28, 4.3.29, 4.3.30 and 4.3.31 revert to their original content as follows:

"4.3.28 The borough has areas of countryside near Ash and Tongham that is not designated Green Belt. Whilst this land does not carry the same weight in national planning policy as Green Belt in terms of resisting development, it is nevertheless important that we seek to manage change growth in this area. 4.3.29 Originally consisting of the three small rural villages of Ash, Ash Vale and Tongham, the Ash and Tongham urban area has grown considerably in size and now forms Guildford borough’s second urban area. The sustainability of this area combined with its preference in the spatial hierarchy means a further extension of the urban area, using some countryside, is allocated for development. 4.3.30 We do however wish to ensure that whilst accommodating this growth, we are able to protect the remaining countryside around it from inappropriate development in order to protect its intrinsic character and preserve the role it plays in maintaining the separate identify of Ash and Tongham.

4.3.31 The countryside lies immediately to the west and south of the urban area and forms the natural boundary of the Blackwater Valley. The Blackwater Valley contains the A331, which connects the A31 and Tongham in the south with Ash Vale in the north and Frimley beyond. It also provides an important open gap between Ash and Tongham, and the town of Aldershot to the west."

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P5 Blue Policy Box

I object to all changes of text in the blue policy box of Policy P5. The changes set out to deliberately weaken assessment of development proposals within the mitigation zone of the Special Protection Area. The only remedy should be mitigation, not avoidance. Mitigation requires a commitment from the council and any applicant to provide either land as SANG or an S.106 payment. A programme of SAMM activity has no proven benefit. Natural England can provide no evidence that SAMM activity has any impact on visitor behaviour to the SPA, therefore it cannot support an avoidance strategy. The only protection therefore is mitigation.

I propose all references to “avoidance” and “SAMM” activity should be removed from Policy P5 and its Definitions in pp65-69.

I propose the text in the blue policy box for Policy P5 should be as follows:

“POLICY P5: Thames Basin Heaths Special Protection Areas

(1) Permission will not be granted for development proposals unless it can be demonstrated that doing so would not give rise to adverse effects on the ecological integrity of the Thames Basin Heaths Special Protection Area (SPA), whether alone or in combination with other development. Where one or more adverse effects on the SPA are likely, measures to avoid and mitigate these effects must be delivered and secured in perpetuity. These measures must be agreed with Natural England.

(2) The following principles apply:

(a) There is an “exclusion zone” set at 400m linear distance from the SPA boundary. Permission will not be granted for development that results in a net increase in residential units within this zone. Proposals for other types of development within this zone must undertake Appropriate Assessment to demonstrate that they will not harm the integrity of the SPA.

(b) There is a “zone of influence” between 400m and 5km linear distance from the SPA boundary. Where net new residential development is proposed within the zone of influence, mitigation measures must be delivered prior to occupation of new dwellings and in perpetuity. Measures must be based on the provision, improvement and/or maintenance of Suitable Alternative Natural Greenspace (SANG).

(c) Residential development of at least 50 net new dwellings that falls between five and seven kilometres from the SPA may be required to provide mitigation measures. This will be assessed on a case-by-case basis and agreed with Natural England.

(3) The following principles apply to the provision of SANG:

(a) A minimum of 8 hectares of SANG land (after discounting to account for current access and capacity) should be provided per 1,000 new occupants.

(b) Developments must fall within the catchment of the SANG that provides mitigation, except developments of fewer than 10 net new residential units.

(c) The Council will collect developer contributions towards mitigation measures, including SANG (unless bespoke SANG mitigation is provided).
(d) Developments may secure or provide bespoke SANG. Proposals for new SANGs will not be acceptable unless approved by Natural England. Large developments may be required to provide bespoke SANG mitigation.

(4) Where further evidence demonstrates that the integrity of the SPA can be protected using different linear thresholds or with alternative mitigation measures (including standards of SANG provision different to those set out in this policy) these must be agreed with Natural England.”

Para 4.3.50c

I object to the insertion of paragraph 4.3.50c, page 66. All proposed developments within the up-to-7km mitigation zones of the SPA should undergo Appropriate Assessment irrespective.

I propose the complete removal of paragraph 4.3.50c.

Para 4.3.52

I object to the change in paragraph 4.3.52, p67 where the word "impacts" is removed and replaces by the word "pressures". I propose the reversion to the word "impacts".

Para 4.3.53

I object to the removal of paragraph 4.3.53, page 67. This paragraph provides strong determination of the need for Appropriate Assessment of all applications for planning permission in the SPA exclusion zone.

I propose the reinsertion of paragraph 4.3.53 as follows:

"Applications for planning permission for all development in the exclusion zone should be subject to a full Appropriate Assessment to demonstrate no adverse effect on the SPA and/or the acceptability of any avoidance measures provided."

Para 4.3.54

I object to the removal of the following text from paragraph 4.3.54 "ensure that new residential development will not lead to increased recreational pressure on the SPA" and its replacement by "avoid this impact". The substitute text is weak and requires no assessment of impact by the council.

I object to the insertion of the following text into paragraph 4.3.54 "and other types of permanent accommodation not listed in paragraph 4.3.51" as this presents an open door for any type of housing development to be considered for the SPA exclusion zone that might have a severe impact via disturbance and invasion on the protected species and habitat. Paragraph 4.3.51 is now very specific as to the allowable accommodation types, intended to deliver close control over potential impacts on the SPA.

I object to the replacement of the word "mitigation" in paragraph 4.3.54 with the word "avoidance" for previously defined reasons. The word "avoidance" should be removed and revert to "mitigation".

I propose paragraph 4.3.54, page 67 should revert as follows:

"In the zone of influence, beyond the exclusion zone and up to 5km (linear) from the SPA, a net increase in the number of residential units is likely to lead to increased recreational use of the SPA visitor surveys produced by Natural England demonstrate that 70 per cent of visitors to the SPA come from within this distance. In order to ensure that new residential development will not lead to increased recreational pressure on the SPA, net new residential development must secure or provide Suitable Alternative Natural Greenspace (SANG). Proposals for student accommodation may not need to provide mitigation and mitigation measures. This will be assessed on a case by case basis."

Para 4.3.55 I object to the substitution of the phrase "at least" with the word "over" in paragraph 4.3.55, page 67. I propose the word "over" revert to the phrase "at least"
Para 4.3.56 I object to the replacement of the word "mitigation" in paragraph 4.3.56, page 67 with the word "avoidance" for previously defined reasons. I propose the word "avoidance" should be removed and revert to "mitigation".

Para 4.3.57 I object to the replacement of the word "mitigate" with the word "avoid" and the word "mitigation" with the word "avoidance" in paragraph 4.3.57 for previously defined reasons. I propose the words "avoid" and "avoidance" should be removed and revert to "mitigate" and "mitigation" respectively.

Para 4.3.58 I object to the replacement of the word "mitigation" in paragraph 4.3.58, page 68 with the word "avoidance" for previously defined reasons. I propose the word "avoidance" should be removed and revert to "mitigation".

Para 4.3.60 I object to the replacement of the word "mitigation" in paragraph 4.3.60, page 68 with the word "avoidance" for previously defined reasons. I propose the word "avoidance" should be removed and revert to "mitigation". I object to the word "agreed" in the same paragraph. I propose the word "agreed" should revert to "approved".

Para 4.3.64 I object to the replacement of the word "mitigation" in paragraph 4.3.64, page 68 with the word "avoidance" for previously defined reasons. I propose the word "avoidance" should be removed and reverted to "mitigation".

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S1 Sustainable Development
Para 4.1.1
I object to the change in Policy S1, Introduction, page 27, para 4.1.1 where the text "unless any adverse impacts of doing so would significantly outweigh the benefits or specific policies in the NPPF suggest that development should be restricted." has been added. The final sentence is badly drafted and makes no literal sense; it is also devoid of detail and rigour that would enable positive future assessment of the policy impact. NPPF para 14 footnote 9 "including land designated as Green Belt" already positively permits development to be restricted, it does not "suggest that development should be restricted". Much of Guildford Borough lies within 5km of the Natura 2000/SAC/SSSI site Thames Basin Heaths Special Protection Area and requires mitigation under the Birds & Habitats Directives as enabled in UK law by The Conservation of Habitats and Species Regulations 2010. Furthermore, as recognised in this document, 89% of Guildford Borough land is designated as Metropolitan Green Belt. Both these designations of Guildford Borough land have widespread impact and the NPPF provides opportunity for the council to recognise opportunities to restrict or mitigate development. Failure to do so in Policy S1 flies in the face of the reality of such land designation in the borough. Guildford being defined as a "growth bub" in the Enterprise M3 LEP economic plan at the prompting of DBIS with no appropriate evidence brought forward, as is required in Local Plan development, is no basis on which to ignore such land designations (i.e. Green Belt) and in policy description.

I propose that the final sentence in para 4.1.1 should be amended as follows: "This means that Local Plans must positively seek opportunities that meet the area’s objectively assessed development needs and be flexible enough to adapt to rapid change unless the adverse impacts of doing so would significantly outweigh the benefits or specific policies in the NPPF where it suggests, as in NPPF para 14 footnote 9 'sites protected under the
```
Birds and Habitats Directives (see NPPF para 119 where the presumption in favour of sustainable development (NPPF para 14) does not apply where development requiring appropriate assessment under the Birds or Habitats Directives is being considered, planned or determined) and/or designated as Sites of Special Scientific Interest; land designated as Green Belt, Local Green Space, an Area of Outstanding Natural Beauty; designated heritage assets; and locations at risk of flooding, that development should be restricted."

Para 4.1.4

I object to the additional wording added to page 28 para 4.1.4 "When implementing Policy S1, local circumstances will be taken into account to respond to different opportunities for achieving sustainable development." Once again, it is too flexible an interpretation of NPPF para 14 lacking the rigour that would enable positive future assessment of the impact of Policy S1.

I propose that the wording of the second sentence in para 4.1.4 should be amended as follows:

"When implementing Policy S1, local circumstances that match those described in NPPF para 14 footnote 9 and NPPF para 119 (see following) will be taken into account to restrict opportunities for sustainable development."

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We are clear that we do need a revised plan ready for implementation in the quickest possible time. However, we are deeply concerned with some of the basic flaws to date not least of which is that the SHMA is somewhat light weight and within that the impact of Student movement in our community has not been given the weight of consideration it requires. Additionally, and as identified above, we question the thinking concerning protection of the Green Belt and the characteristics of our Borough which make it eminently desirable to live in as well as the important considerations required to deal with transport traffic and general infrastructure now and into the future,

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
It is our view that this is not a robust piece of work. Some of the assumptions have been withheld and we would suggest key elements are missing or the assumptions flawed. A prime example heroes that we would suggest that the Housing Market Assumptions exaggerate the demand, The Greenbelt and Countryside Study approach is suspect and the Transport evidence is much too late and lacking in essential features to contribute to a sound and comprehensive local plan.

The OAN has also not been produced to the desired standard and we would suggest that in this regard a figure of 693 dwellings per annum is too high. Again, we would refer you to the work carried out by the GRA whose independent report came up with a figure if 500 dwellings pa which appears to be more realistic. This report also concludes that there were errors in the SHMA. For example the changes in population shift in Guildford are not the same as for other boroughs in Surrey given the student base and that it would be sensible for student movement to have been considered separately.

It is also extremely surprising and certainly disappointing that the current and increasingly poor traffic problems in Guildford, given the forecast population growth, has been given such scant regard in the Submission Plan. There is no doubt, in our mind, that failure to take a more meticulous and well thought through approach to our traffic issues will cause significant constraints in the growth of high skilled jobs and a boost to our economy in the high tech sector. In summary our town’s infrastructure as currently planned, will just not support the growth in future housing. Lastly, whilst on the subject of traffic, we find it hard to understand what, if any measures, are being taken to actively manage “pollution” problems both in terms of emissions and the noise level from the traffic on the A3 which has become an increasing blight to residents.

One of the reasons we chose to live in Guildford was not only the historic nature of the town but also its setting in the Surrey countryside. The plan as currently drawn up will certainly impinge on these desirable characteristics with the Green Belt boundaries being redrawn yet again and insufficient account has been taken of the “fundamental aim” of the Metropolitan Green Belt.

To our mind Guildford is more than adequately provided for in the provision of retail. It is our view that further development in this area should be scrapped in favour of more appropriate residential units in the town centre which would provide a more conducive environment for residents and visitors alike.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

In our opinion the Submission Plan development process has taken insufficient account national policy which we believe stresses the importance of the “openness” and “permanence” of the Green Belt. While we fully understand and empathise with the need to provide development for more dwellings, nevertheless we believe that the criteria adopted for “exceptional circumstances” has not been given the required level of consideration at a strategic level.

We would question the suggestion that the Green Belt is being treated as permanent when as recently as 2003 boundary changes were included as part of the Local Plan Review.

It is our understanding that the National Policy Framework requires that objectively assessed needs should be met unless “…any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the
policies in this Framework taken as a whole “ etc. Our interpretation of this suggests that there are a number of items which are of particular relevance to Guildford particularly with regards to the eco system relating to birds and wildlife, areas of outstanding local beauty, heritage sites and those areas particularly venerable to flood risk. We would have thought that the Appraisal must include these factors.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

My wife and I have been residents of Guildford for over 25 years and in a variety of ways involved with local community activities. In this regard my wife was a founder Board Member of Abbotswood Residents Association and we have both maintained a keen interest in local developments particularly with regards to the “Local Pan.” Whilst our comments as appended below represent our joint views, it is worth emphasising here that to a great extent these have been shaped by the views and submissions made at various stages by the GRA and Guildford Society and residents who have been deeply involved in the community and its future for a significant amount of time and who are well versed in the subject matter.

Along with other residents with whom we have discussed the issues, we have regrettably come to the view that the standard of scrutiny applied to the Local Plan falls significantly short of the rigour which would be applied in the corporate sector and other large private and public entities. Clearly, the development of a a Local Plan for Guildford is of paramount importance, Equally, having one in place as soon as possible is essential if Guildford is to avoid inappropriate local development of which there are numerous examples

Answer (if comment is on questions 1-7 of the questionnaire): ()
Objections re evidence base especially Guildford and West Surrey Strategic Housing Market Assessments (SHMA)

Failure to disclose Justin Gardner demographic housing model

Failure to procure the SHMA on open and transparent terms in accordance with the Guildford Codes of Conduct

Objectively Assessed Housing Need (OAN) fails to meet the definition of objective because it cannot be replicated by third parties, because GBC has failed in its public duty to obtain a copy of the model and its assumptions and to test the assumptions for alternative scenarios

OAN

Paragraph 2.19 of the local plan states:

"The NPPF requires councils to identify the housing needs of their area and respond positively to wider opportunities for growth. The document instructs us to use our evidence base to ensure that our Local Plan meets the full, objectively assessed needs for market and affordable homes in the housing market area, as far as is consistent with the policies set out in the NPPF."

GBC has not explicitly set out the OAN in the Local Plan. Nor has it explicitly reconciled that OAN to the Housing Target. Instead it is implied that i) the Housing Target and the OAN are synonymous and ii) the Housing Target will diverge over time if constraints emerge which show that the OAN cannot be achieved. The figure of 693 houses per annum appears nowhere in the Local Plan.

This is not an open and transparent manner of proceeding. The OAN should be expressly set out and its consistency with the policies set out in the NPPF explicitly discussed and tested to arrive at a Housing Target. To imply that the OAN and the Housing Target are currently the same but may diverge over time is to set out a false and misleading prospectus. The public is entitled to know NOW what the constraints are. It is not satisfactory that the public should embark upon an open ended process during which constraints may or may not emerge. GBC was capable of completing Transport, Environment and Heritage studies before submitting a local plan but has not done so. The public consultation is therefore premature and the public is asked to form a view of a project that is still in course of construction. There are no grounds for trusting that GBC will gather the evidence impartially or undertake diligent and conscientious analysis in the future.

SHMA and OAN evidence basis is not sound

The NPPF requires a local planning authority to make estimates of its Objectively Assessed Housing Need (OAN). It further requires an authority to assess its Housing Target in relation to its OAN by taking into account constraints - such as environmental, transport and heritage constraints.

GBC commissioned GL Hearn to prepare a Strategic Housing Market Assessment for the borough. In July, 2014 I made a Freedom of Information request to obtain a copy of the demographic housing model which was the basis of the housing need identified in the SHMA. The sequence of events was as follows:

1. GL Hearn published their Guildford SHMA
2. July, 2014 I made a FOi request to GBC to see the housing projections model (attached)
3. GBC failed to respond. I complained to the Information commissioner. On 26 September GBC supplied a copy of the model - in which only values had been pasted into the cells and all of the formulae had been removed
4. I asked to see the formulae. I considered that the exclusion of the formulae was equivalent to redacting the model - which was wholly unjustified because it was a model for a public purpose and process required for public consultation.

5 On 2 October, 2014 GBC stated:

"As you are aware, the model was produced for Guildford Borough Council by a third party and is not held by the Council. The model is the intellectual property of that third party and is commercially sensitive. They do not want to make the model publicly available. On that basis, the information is exempt under the EIR and I am therefore upholding the decision to only provide the information that was originally supplied in the Council's response of 12 September." (see attached email)
I asked GBC to procure the model—since it had paid for it—responded that the model was not held by GL Hearn either (!). A subconsultant, Justin Gardner Consulting (JGC) created the model. GBC argued that JGC had intellectual property in the model which justified it not disclosing the model. It showed no evidence that it had even asked JGC for the model.

I appealed to the Information Commissioners' Office. It held, on the basis of discussions with GBC, that GBC did not hold the information.

I appealed to the First Tier Tribunal on the basis that ‘possession’ is not limited to physical possession but must include ownership and control. I submitted that the Council paid for the model, that its contract stated that it owned the copyright and that therefore it had the right to demand to have the model. The case was heard in my absence. GBC made private submissions to the Tribunal which were not disclosed to me. The Tribunal found that ‘on the balance of probabilities’ GBC did not hold the information.

On 11 January, 2016 following publication of the West Surrey SHMA I subsequently made a Freedom of Information request to see the model supporting the West Surrey SHMA. I was informed that GBC did not hold it. It did not offer to supply even the redacted version of the Excel spreadsheet. I made similar requests to Waverley and Woking Borough Councils—which jointly commissioned the West Surrey SHMA. They each replied that they did not hold the information as the work was commissioned by Guildford.

In January, 2016 I set up a public petition on Change.org to request the information. The Petition reads:

"Councils must publicly disclose housing need calculations in Guildford and across England"

To date the petition has collected over 1,000 signatures. The list of signatories is attached. The comments made are also attached.

Justin Gardner Consulting's website is here:

http://www.justingardnerconsulting.co.uk/index.php?page=test-page

The links to the Information Commissioner's decision are here

It speaks volumes that as soon as Mr Spooner was alerted to the existence of the petition GBC changed its petition rules so that petitions organized via Change.org (which had previously been accepted) were deemed no longer acceptable.

I wrote to the Surrey Advertiser concerning the petition on 16 May drawing attention to

- The report of the House of Commons Committee on Local Plans
- The report of the Local Plan Expert Group
- The Planning Advisory Service’s ‘10 Principles for Owning your Housing Number’

The Interim Director of Development of GBC later wrote a letter to the Surrey Advertiser to claim that GBC was ‘entirely reasonable’ in not supplying the information. He also claimed that I had asked for a copy of the algorithms which made the modelling tool work. I had not asked for such algorithms—only for the missing formulae in the Excel spreadsheet which had been deliberately omitted.

On 10 June I made a formal complaint to GBC concerning the factual inaccuracies in the Interim Director’s letter to the Surrey Advertiser.

Implications and inferences

It is a travesty that a model upon which the housing need forecast for this borough for the next 15 years cannot be seen by the public. The model was commissioned for a public purpose by a public body using public money as part of a process which explicitly is subject to public consultation. How then can it not be disclosable? It is all the more puzzling because Justin Gardner’s website stated that its model could be used by Council officials to change assumptions and look at...
different scenarios. Despite this GBC claims never to have received a copy. That claim is not credible - not least because it has been able to disclose the model in Excel formal without the formulae - which suggests that a) it holds a copy and whoever copied the model into Excel had the formulae.

The demographic projections for Guildford are known to contain anomalies caused, for example, by the presence of a university. This causes a bulge in the 18-23 age bracket. Ordinarily demographers project the growth of the population across time by moving the age cohorts forwards in time. A bulge in the 18-23 age range would imply that in ten year's time those people would be requiring additional housing. However, since these are university students - a very large proportion of whom do not originate in the borough - they are unlikely to cause a proportionate increase in demand for housing.

The housing projections imply a required growth in housing of some 20% of the housing stock in only 15 years. Unless this is broken down into the different components of demand it is impossible to challenge the projections except in the most general terms. The implication that GBC has no intention of opening itself up to scrutiny and debate is hard to escape.

There are two main drivers of the housing model: demographic change and economic growth. It is known that the raw ONS figures project a fall in the population of the borough if net international migration is excluded. It is known that the largest component of population growth is 'Unattributed Population change'. To embark on the greatest building boom in the history of the borough on the basis of statistics which are incomplete and unscrutinised is an abdication of responsibility. What is the Council for if not to scrutinize these figures?

The Scrutiny Cttee was persuaded not to scrutinize the SHMA on the basis of advice from Council Officials - including the Interim Director of Development. The Interim Director of Development, Mr Neil Taylor told the Scrutiny Committee on 15 March:

"The problem is that we cannot start tampering with the Objectively Assessed Need Evidence Base....The Objectively Assessed Need has already been signed off as an evidence base document. I don't think the SHMA is a matter for scrutiny. It's too late. And the opportunity is long, long gone."

He later told the committee:

"The Objectively Assessed need (OAN), the Housing Target, the local plan the allocation the whole lot is subject to market forces. If those houses are not needed and they are not going to sell the developers won't build them. And that's the way it is. They won't over build so that house prices come tumbling down.

The wont build houses that won't sell they're in the profit making business. If the whole thing turned out to be completely wrong and there was a property crash tomorrow they just wouldn't be built. The market will always dictate." (His comments can be seen on the Guildford Borough council webcast of the debate at 2hours and 7mins into the webcast http://www.guildford.public.tv/core/portal/webcast_interactive/215454)

Isn't that just an abdication of responsibility? If the market does it all why do we even need civil servants? Not even Margaret Thatcher believed the market was that perfect. It is ironic that Mr Taylor has now left GBC and so will never be held to account for the Local Plan which he promoted.

We the public are now asked to express an opinion on a Local Plan which does not even explicitly set out the Housing Requirement, or the arithmetic showing how it is derived from the Objectively Assessed Need. And the OAN itself has never been scrutinised by the Scrutiny Committee. NO ONE in the council has ever seen, let alone critically examined, the housing projections model. The Council is supposed to be subject to the rule of law - and part of the role of the civil service is to make sure that the politicians are not a law unto themselves.

The fact that neither Woking BC nor Waverley BC are able to scrutinise the housing projections model means that the projections for the whole of West Surrey are effectively a secret.

It appears that the Council has deliberately exaggerated the economic growth projections and projected population growth on the basis of a short unrepresentative period of international migration in order to maximize the housing need forecast. The motivation appears to have been driven by a desire to use housing as an 'exceptional circumstance ' to justify building on certain sensitive Green Belt sites.
The very close association of the GBC with certain developers - in particular Surrey University and Wisley Property Investments Ltd with whom it has collaborated extremely closely over the past three years - appears to be the motivation for GBC proceed on the basis of exaggerated housing need numbers in order to facilitate removing those developers's sites from the Green Belt.

The closeness of GBC to development interests is amply illustrated by the promotional video produced for the local plan which can currently be seen on the GBC website. Rarely have I seen a more one-sided presentation of an argument. The video features a succession of speakers for interested parties and vested interests - such as Surrey University - all speaking in favour of the local plan.

The proposition that house prices are a function of supply of houses is plainly false. The annual supply of houses has seldom approached as much as 2% of the housing stock. Supply is therefore not the major determinant of prices - which are more plausibly explained by factors such as

- international investment demand
- quantitative easing by the Bank of England and its effects on mortgage lending
- Bank of England interest rates at 0.5% - the lowest in centuries - if not ever

The evidence that there is a housing shortage is not self evident. The ratio of population to housing in the borough is very roughly two people for every house - which does not obviously demonstrate a housing shortage. The greatest shortage of housing is in fact in social housing. This is largely the creation of government policy. GBC had not built any council houses for twenty years until the past couple of years. And its rate of construction is still smaller than the quantity of council houses sold each year. The total number of council houses owned by GBC has fallen some 15% since 2000 and continues to fall. The shortage has not been taken up by Housing Associations.

The basis on which the Local Plan has been prepared is not even amateur. It is shoddy and unprofessional. The evidence base obviously suffers from selection bias. The analysis is so feeble it cannot for the most part be disclosed. It is a charter for developers such as Surrey University and Wisley Property Investments Ltd, the nature of whose relationship with GBC and its Councillor is a matter of concern. Blatant political bias is apparent in, for example, the desire to create new Green Belt near the ward of the Lead Councillor for the Local Plan whilst destroying its elsewhere. A Council which seeks to set off the biggest building boom in the borough's history has a duty to justify its proposals with proper evidence and reasoned argument. Instead it has sought to use its large majority to ignore real public concerns.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The legal requirements

The Planning and Compulsory Purchase Act 2004 (the Act) states at s39 regarding Sustainable development:

1. Statutory requirements regarding sustainability

2) The person or body must exercise the function with the objective of contributing to the achievement of sustainable development.

- For the purposes of subsection (2) the person or body must have regard to national policies and advice contained in guidance issued by-
- the secretary of State for the purposes of subsection (1)(a) and (b);
- The National Assembly for Wales for the purposes of subsection (1)(c).

National policies which the Act requires CBC to have regard include those set out in the National Planning Policy Framework (NPPF) at, for example, paras 10, 14, and 17.

Para 10 states "Plan s and decisions need to take local circumstances into account, so that they respond to the different opportunities for achieving sustainable development in different areas".

Para 14 states "Local Plans should meet objectively assessed needs... unless, any adverse impacts of doing so would significantly and demonstrably outweigh the benefits,

When assessed against the policies in this Framework taken as a whole; or - specific policies in this Framework indicate development should be restricted."

Para 17 sets out 12 core planning principles. These include

Be genuinely plan-led, empowering local people to shape their surroundings, with succinct local and neighbourhood plans setting out a positive vision for the future of the area.

Take account of the different roles and character of different areas,
promoting the vitality of our main urban areas, protecting the Green Belts around them, recognising the intrinsic character and beauty of the countryside and supporting thriving rural communities within it;

Contribute to conserving and enhancing the natural environment and reducing pollution. Allocations of land for development should prefer land of lesser environmental value, where consistent with other policies in this Framework;

conserve heritage assets in a manner appropriate to their significance, so that they can be enjoyed for their contribution to the quality of life of this and future generations;

actively manage patterns of growth to make the fullest possible use of public transport, walking and cycling, and focus significant development in locations which are or can be made sustainable; and

Take account of and support local strategies to improve health, social and cultural wellbeing for all, and deliver sufficient community and cultural facilities and services to meet local needs.

Support the transition to a low carbon future in a changing climate,

• Failure to apply or to apply properly the legal requirements concerning the conservation of the land at the former Wisley airfield, the Parish of Ockham and the Ward of
• The evidence base contains errors regarding this site.

For example, the settlement hierarchy gives a wholly inadequate and inaccurate description of the village of Ockham. Ockham is not a nuclear village with one village center. It is a collection of agricultural settlements distributed around the Parish.

This YouTube video provides a more accurate and fuller picture of the Parish of Ockham and the place of the land at the former Wisley airfield within it:–

http://youtu.beNVnUUDSxKJk

• No legal argument or relevant facts are produced to justify taking the land out of the Green Belt

GBC engaged Pegasus Consulting to carry out a 'Green Belt and Countryside Study'. However, the question of whether there exist 'exceptional circumstances' for changing the Green Belt boundaries as required by NPPF 83 is expressly not included in Pegasus's remit.

The Green Belt and Countryside Study therefore does not produce relevant evidence. It does not answer the logically prior question. Without first knowing the answer to the logically prior question, it cannot be known if Pegasus' work is required.

S 22 of Vol V of the Green Belt and Countryside study seeks to analyse whether or not this site meets the purposes of the Green Belt. However, this is not a relevant argument. There must logically be a presumption that the land satisfies the purposes otherwise it would not have been put into the Green Belt in the first place or have survived through successive local plans.

If no exceptional circumstances exist to justify removing this site from the Green Belt then the Pegasus report is a waste of public money. The various misdescriptions of the site would still be irrelevant even if they were accurate. For example, Pegasus states that the land is an Airfield. That is not correct. No planes have flown from this site since 1972. 75% of the site is countryside - either actively cultivated or wood and grassland. But even if the site were an airfield it would make no difference to its Green Belt status.

Pegasus purports to analyse whether the land meets the 'purposes' of the Green Belt. This analysis is motivated by a desire to show that the land should not be in the Green Belt. But Pegasus is applying the wrong test. The correct test is whether there are 'exceptional circumstances' - a test which Pegasus excludes from its remit.
The Judge in the COPPAS case stated: 'I would hold that the requisite necessity in a PPG 2 paragraph 2.7 case like the present - where the revision proposed is to increase the Green Belt - cannot be adjudged to arise unless some fundamental assumption which caused tile land initially to be excluded from the Green Belt is thereafter clearly and permanently falsified by a later event. Only then could the continuing exclusion of the land from the Green Belt properly be characterised as "an incongruous anomaly". The test applies symmetrically if the intention is to remove land from the Green Belt.

Nowhere docs the local plan makes the argument that some fundamental assumption has been clearly and permanently falsified or produces evidence to support it. Far from some fundamental assumption which caused this land to be included in the Green Belt being falsified - the subsequent development of the surrounding towns and cities has in fact fortified rather than weakened the original assumptions.

Pegasus uses the purposes of the Green Belt which are defined in the NPPF to test the Green Belt in the borough of Guildford. Pegasus makes a presupposition that the NPPF definition is the only determinant of the value of any particular part of the Green Belt. The definitions in the NPPF are necessarily general because they must apply to all Green Belts across the entire country. The tests chosen by Pegasus are not logically the only tests or even the most relevant tests. Apart from look ing at the most general definition of a Green Belt in the NPPF it is also legitimate, indeed essential, to consider the purposes of the specific Green Belt under consideration. The Green Belt in the borough of Guildford was not established to protect Guildford but to serve the Metropolis of London. A highly relevant consideration or test is whether part of that Green Belt serves the Metropolis. Pegasus fails to consider this at all. Whether the land serves the Metropolitan Green Belt is, nonetheless, the single most important consideration. Does the land at the former Wisley airfield serve the overriding purpose of the Metropolitan Green Belt? Any disinterested evaluation must conclude that it does.

Just to demonstrate how self-serving and prejudiced the Pegasus report is it is worth looking at its statements about whether this land meets the purposes of the Green Belt:

Purpose 1: to check the unrestricted sprawl of large built-up areas

Pegasus state: Due to the airfield site not adjoining the main urban areas within the borough, it does not offer the opportunity for such urban areas to sprawl with in it. As a result the Green Belt does not serve this purpose in this location.

This statement is not correct in several respects. The site is not, for the most part, even an 'airfield'. The land does not have to 'adjoin' an urban area to serve the purpose of separating urban areas. Nor are the only relevant 'urban areas' within the borough of Guildford. Adjoining boroughs are also relevant. Cobham, Woking/Pyrford, Byfleet, Ripley and Horsley are all 'large built up areas' and the land is centrally placed between all three developed areas. The logic of the argument is fallacious. Taken to its logical conclusion only the last blade of grass between two settlements would serve to separate them - a ludicrous proposition.

Moreover the land serves to separate London and its suburbs to the North from Guildford and its suburbs to the South.

Purpose 2: to prevent neighboring towns merging into one another

Pegasus state: Land parcel C 18 did not include any settlements, as a result there was not the potential for development within this part of the Green Belt to result in coalescence between existing neighboring towns, and the land parcel was not considered to serve this purpose accordingly in Volume II.

Rather than set out an argument Pegasus refers to another Volume of their study, which is hardly helpful. Only the most pedantic and literal of interpretations can deny that the land separates Ripley Cobham, Byfleet, Woking and the Horsley’s.

The map below from Surrey County Council shows how the land at the former Wisley airfield ('Three Farms Meadow') is strategically positioned on the watershed between two river valleys and separates Cobham, Horsley, Ripley, Woking and Byfleet:

The land preserves the setting of the ancient settlements of Ripley and Ockham and Cobham.

Purpose 3 to assist in safeguarding the countryside from encroachment
S22 concedes that the land serves this purpose. It could not do otherwise. The land *is* countryside.

Purpose 4: to preserve the setting and special character of historic towns;

S22 argues that there are no historic towns nearby. Ripley is nothing if not an historic town situated on the main route between London and the Royal Navy in Portsmouth. Ockham and Wisley are nothing if not historic villages.

Purpose 5: to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

Pegasus' comments are incoherent. All Green Belt land serves this purpose by obliging developers to look to brownfield land first.

In short the consultants employed by GBC seek to undermine the land's Green Belt status in order to remove its protections from development. This approach is a waste of time and money. The logically prior question of whether or not 'exceptional circumstances' exist should have been asked and answered first.

- the land is not a sustainable site for a new town

The site does not meet GBC's own criteria for sustainability. The s 22-report states

'At present the Wisley Airfield PMDA C18-A would score very poorly in sustainability terms because there are no facilities and services in place.'

- Infrastructure

The evidence base gives inadequate consideration to whether local infrastructure has any spare capacity for more houses - beyond what is needed to meet local demand. Para 162 of the N PPF is not properly complied with.

2.3.1 School capacity is in the area is already at capacity and the hypothetical capacity which is mooted for the site is insufficient

The s22 report conjectures that *provided* the site is sufficiently large and attracts a sufficiently large population the site may attract services and facilities:

"For these reasons it is not considered helpful to provide a specific potential sustainability score for the site, but instead provide a range of scoring that would appear feasible, the centre point of which is based upon the following assumptions."...

"In accordance with the IHT 'desirable' walking distances identified within Volume II, Table 5.3, the following could realistically be provided:

- Primary School - 500m or less
- Nursery - 500m or less
- Healthcare facility - 500m or less
- Local Centre - 200m or less
- Community Centre - 400m or less"

This analysis is completely arbitrary. An analysis which is limited to 'walking distances' is completely trivial. No serious examination of the existing school capacity in the rest of the ward and borough is made. Any new provision which might become available at a 'new town' is unlikely to be viable for many years. In the interim the residents of the new town would be completely dependent on facilities in other neighbouring settlements. At present there is a substantial shortage of available school capacity in the area. The main primary school, The Raleigh in West Horsley is overflowing to the extent that its playground is now completely filled with temporary classrooms. The nearest secondary school is in Effingham and is unable to cope with existing demand. The next nearest secondary schools are in Guildford and Woking. Travel times from this area to Guildford and Woking are not appropriate for school children.

- Road transport access is inadequate/nonexistent Access via Elm Corner
The site currently has an access via the hamlet of Elm Corner -which forms part of the Parish of Ockham. Elm Corner does have an access onto the A3. But it has no acceleration and deceleration lane. It is consequently very dangerous. The Highways authority tolerate this situation because a) it has been there since before the A3 was turned into a three-lane motorway b) the number of cars entering and leaving Elm Corner is very low -as there are so few houses. However the Highways Authority has in the past refused permission for filming projects to access this site from Elm Corner on the grounds that large flows of daily traffic would impede the flow of traffic on the A3 and cause a traffic hazard. Given this, it is absolutely inconceivable that the Highways Authority would ever permit access to a 'new town' of 2,500 houses via Elm Corner.

Access via a planned new road onto the roundabout at Ockham Road North/Stamford Brook

This roundabout provides an exit for southbound traffic on the A3 to Ripley and the Horsley’s. It also provides access to the northbound lane of the A3. It provides no access to the southbound carriageway of the A3 going to Guildford/Portsmouth.

Wharf Land , from which WPI purchased the site, received permission to use 17 out of 17ha of the site as a waste processing facility. They won this permission on appeal to a planning inspector. They got permission subject to over twenty different conditions and because the Inspector accepted that the Surrey Waste Plan was short of waste sites.

That permission cites as a condition the building of a new access from the southbound carriageway of the A3. Permission for an access for a waste site does NOT constitute 'permissioned access' for a new town. The new town and the waste disposal site are mutually exclusive projects: they cannot both proceed as the new town proposes to use the acreage set aside for the waste plant.

The permission to access the A3 is exclusively for a waste site. The permission is not transferable to a new town proposal. First WPI need permission from SCC to relinquish the 17ha now set aside for waste processing. That permission is not a foregone conclusion. Second, WPI needs to re-apply for permission to build an access for a 2,100-house new town. That is not a foregone conclusion either.

- Local roads already at capacity

The A3 is already at capacity. Every morning the A3 slows to a standstill or to a crawl between the Ripley turn off and the M25 on the northbound carriageway. Traffic through Cobham High Street (A245), Ockham Road North through East Horsley (B2039) and Byfleet Road (A245) are already at capacity during the rush hour. Everyone who uses these roads knows that very long tail back are already a regular occurrence.

SCC Options Growth Scenarios Transport Assessment Report confirms that a new town would take traffic conditions to a state of flow breakdowns

GBC has commissioned SCC to do a traffic analysis -of the impact of ALL of the proposals in the Local Plan.

This analysis is set out in the Local Plan 'Evidence Base'.

The WPI new town is a small part of the overall analysis -which itself is subject to some major provisos:

1. It is based on 'trip analysis' data derived from an out of date census in 2001 - at least 10 years
2. It is based on data provided by GBC -and not disclosed or It is understood this data is from 2009 - ie during a recession.
3. It is top down:
SCC wrote: 'This study was undertaken at a strategic scale and consequently not all impacts of developments have been identified. However, developments of, and above, a certain scale will require individual transport assessments to be commissioned ...'

**Projected Level of Service (LOS)**

SCC use LOS to measure road capacity. The scale runs from A to F.

A is 'Free Flow'.

F is 'Every vehicle moves in lock step with the vehicle in front of it, with frequent slowing required. Travel time cannot be predicted, with generally more demand than capacity.'

Is there sufficient spare capacity to accommodate a 'new town'? No. Under 'scenario 5' (the relevant scenario) 'A3 northbound between Ockham and Wisley is rated, guess what, F!'

**Ratio of Flow to Capacity (RFC)**

The other tool SCC uses to measure the performance of a stretch of road is RFC.

'An RFC value greater than 1 means that the stretch of road or turning movement has a higher level of traffic flow than its theoretical capacity. As a result flow breakdown and extensive queues can be expected'

What is the RFC value for the A3 between Ockham and Wisley under scenario 5?

It is 1.02.

Remember that is based on out of date census data.

**What is the traffic like now?**

Anyone who uses the A3 knows that between Ripley and Junction 10 of the M25 the A3 slows to a standstill EVERY MORNING. (Our children go to school in Guildford. We see this every morning.)

That is the situation today.

**Strategic thinking**

One of Guildford's strategic advantages is its location between London, Heathrow and Gatwick.

If the traffic on the M25 between Heathrow and Gatwick gets worse - or gets an RFC score of over 85% then Guildford will have shot itself in the foot and destroyed one of its present competitive advantages.

**Proposed road closures**

To enable a new town at A35 Surrey County Council has proposed the following measures:

- Closure of Ockham lane near Upton Farm
- Closure of Plough Lane
- Old Lane to be one way from the J3
- Guileshill Lane to be one way from Ripley

The closure of these ancient routes would have a devastating effect on the amenity of existing residents. Journey times from Martyr's Green to shop in Cobham or Ripley would double. Access to the A3 would take many times longer.
The drastic measures suggested illustrate perfectly that a new town on this site is not sustainable.

New works to facilitate a new town

The developer states that new works on the M25 and A3 would facilitate a new town on this site. They would not. They are required merely to relieve at least in some part the existing congestion. Plans to build a new lane on the M25 between J10 and J14 using the hard shoulder are mere speculation. Even if built a new lane would only supply much needed current capacity - not capacity for new towns.

- Public transport

WPI promote the site as having access to NINE mainline stations within 5 miles. As usual WPJ’s statements are at best promotional and at worst just false.

They are Woking, West Byfleet, Byfleet & New Haw and Weybridge on the Woking line and Clandon, East Horsley, Effingham Jnctn and Stoke D’Abemon on the Guildford branch line.

It is a stretch to call the Effingham line a 'main line'. It is a suburban stopping service. The Woking line is, indeed, a main line. But you’ll only get on a fast train in Woking or Weybridge.

The distance from Elm Corner at the former Wisley Airfield to Woking is shown as 6 miles on Google maps and over 11 miles for the return journey

Anyone who has ever made this journey will know that it is rare that the journey can be done in less than half an hour especially in rush hour when it can easily take 40 minutes or more.

The distance from Elm Corner to Weybridge is shown as 6.9 miles on Google maps. If you don't get stuck on Byfleet Road in the rush hour you'd be lucky to do the journey in less than 40 minutes.

WPI claims that buses will run with a 10-minute frequency. None currently exists in Ripley Horsley or Cobham. This is pure marketing puff.

- The site is too small to be sustainable on the basis of the evidence provided

Pegasus state that a site area of at least 110 ha is required to support a 'sustainable' site. GBC included neighbouring land in the site without consulting the landowners. That indicates a clear bias in favour of development.

When those landowners wrote to GBC to state that their land was not available and would not be sold, GBC continued to include their land in the site until challenged in writing with an opinion from Leading Counsel.

After receiving Leading Counsel’s opinion GBC reduced the size of the site to 69ha. The number of houses is reduced from 2,500 to 2,100. This represents a site density of 33 houses per hectares without allowing any land for the proposed facilities such as schools and shops and the necessary roads and car parking.

The Issues and Options paper stated that land opposite this site at the Royal Horticultural Society was NOT suitable for development as being a) reliant on car transport b) requiring inappropriate housing densities and c) being too close to the Special Protection Area (SPA) around Ockham Common. Identical arguments apply to this site. The failure to apply the same logical to sites within a few hundred metres of each other is yet another indication of prejudice.

- Environmental limits

The UK Sustainable Development Strategy 2005 states that development should have regard to ‘Living within environmental limits’. This local plan gives no consideration to these. The sustainability appraisal is not complete. The requirement of NPPF para 165 has not been met.

Habitats Regulations Assessment
When the consultation process for the first draft of the local plan began GBC did not have a Sustainability Assessment. The HRA was not completed until AFTER the draft local plan was sent out to consultation. The consideration given to A35 in the HRA is perfunctory. It merely 'parks' the issues:

Development of a new settlement could lead to effects on the Thames Basin Heaths SPA, through reduced air quality from associated transport movements and increased recreational pressure.

Other comments are wrong and/or banal:

Release and designation of Green Belt land in itself does not have HRA implications; however, a strategic approach to support the integrity of the Thames Basin Heaths management strategy would be beneficial.

The serious problems of attracting more visitors to the SPA/SSSI at Ockham Common are mentioned but not seriously addressed:

Increased access to the countryside needs to be managed in a way that does not lead to increased recreational pressures on the Thames Basin Heaths.

The evidence suggests that GBC could not be trusted to provide the necessary 'management'

Ockham is not discussed at all in the document. It appears in a list of 'Hamlets' and there is a statement that a 'settlement hierarchy' designation does not have HRA implications. That statement is not self-evidently true - especially in relation to creating a new town in the centre of Ockham which would be the third largest settlement in the entire borough.

SNCI

The available evidence for Sites of Nature Conservation Interest is nine years out of date. The whole of the land owned by Wisley Property Investments Ltd within AJ5 has been proposed as an SNCI:

If the new town comprises 2,100 houses and if their pet populations follow the national averages then the new town will bring approximately 350 new cats and some 500 new dogs to the area immediately adjacent to the SPA. It is not credible that it will be possible to exclude these from the SPA.

This site is too close to the SPA. Part of the site is an SNCI which the local plan proposes to build on. The SNCI is part of the 'living landscape' and forms an essential corridor through which wildlife can migrate to and from Ockham and Wisley Commons.

The local plan proposes using a substantial proportion of the site as a Suitable Alternative Natural Greenspace or SANG. The purpose of a SANG is to attract the public AWAY from the SPA. A SANG adjacent to the SPA is likely to have the opposite effect. The choice of location for the SANG is driven purely by expediency (for the developer) and is otherwise irrational.

Information about the wildlife on Ockham Common can be found in this YouTube video:

Heritage Assets

The evidence base for this is nonexistent. The Council has had years to consider this. It has carried out some Conservation Area Character appraisals. Unsurprisingly it has not done one for Ockham and Ripley. Without such an appraisal how can the Council claim seriously to have properly evaluated whether Ockham is a suitable and sustainable site for the third largest town in the borough?

There are several Conservation Areas in the ward - the largest being Ripley Village
itself. There are 49 Listed Buildings in Ripley, 29 in Ockham and 6 in Ripley. Despite this no assessment of the heritage assets in Ripley Ockham and Wisley has been completed. This is contrary to the requirements of The Listed Building and Conservation Areas Act 1990 and NPPF para 126 and 132.

Information about the Heritage of the Parish of Ockham can be found in this YouTube video:

http://youtu.be/Pb0I6Jgbst0

- Rural economy

It is a core principle of the NPPF (set out in para 17) that planning should support thriving rural communities. Ockham has thriving rural communities with several businesses based on agriculture and horse riding and stabling. The removal of up to 14ha of land which is currently actively farmed will cause irreparable harm to the local rural economy and is likely to result in permanent job destruction.

nowhere does the local plan make any consideration of this.

This local plan should be condemned for failing to follow the planning principles set out in NPPF para 17 and failing to set out all the required evidence and to justify its proposals. GBC is culpable for

- putting this site into the local plan without legal or factual This has wasted everyone’s time and money
- putting the site into the local plan before critical parts of the evidence base are available or complete - as described above
- seeking to draw conclusions about the development potential of the site which are not justified by the facts
- not taking account of public feedback from the Issues and Options consultation
- collusion with the developer - to the extent of ‘regulatory capture’

The attempt to take this site out of the Green Belt in collusion with the developer without relevant evidence or legal argument is a disgrace.

The definition most widely accepted globally is the 1987 United Nations one from the Brundtland Report: “Development that meets the needs of the present without compromising the ability of future generations to meet their own needs”. Developing this site is not consistent with the principle of sustainability.

OBJECTION

No legal argument or relevant evidence to support the development of this Green Belt site has been presented.

Development of the site contravenes the NPPF para 83 and para 89, inter alia.

1. The references to site allocation A35 in the local plan

There are a limited number of references to this site in the Local Plan Strategy and Sites document, specifically in

- section 3 (SpatialVision) where it is stated that a new settlement will be created at this site,
- Policy S2,
- para 3.17 where it states "Whilst the general extent of the Green Belt has been retained, land has been removed from the Green Belt in order to enable development around Guildford urban area, selected villages, and at the former Wisley airfield. The Green Belt boundary has also been extended between Ash Green village and the Ash and Tongham urban area in order to prevent coalescence."

- Appendix C on infrastructure.'

Policy P2 Green Belt

Policy P2 - inside the Blue Box does not mention site A35. The policy states, "We will continue to protect the Metropolitan Green Belt, as shown on the proposals map, against inappropriate development. In accordance with national planning policy, the construction of new development will be considered inappropriate and will not be permitted unless very special circumstances can be demonstrated."

Since the former Wisley airfield is designated Green Belt one might at first sight conclude that it was protected by Policy P2 which 'will continue to protect the Metropolitan Green Belt ....against inappropriate development. ...'.

However the promise is qualified by reference to the 'proposals map' - which one supposes must refer to the 'Policies Map'.

[1]

However the former Wisley airfield is mentioned in the supporting paragraphs to Policy P2:

4.3.16 National planning policy requires that Green Belt boundaries are only amended in exceptional circumstances and that this must be undertaken as part of the Local Plan process. We consider that exceptional circumstances exist to justify
the amendment of Green Belt boundaries in order to facilitate the development that is needed and promote sustainable patterns of development.

4.3.17 Whilst the general extent of the Green Belt has been retained, land has been removed from the Green Belt in order to enable development around Guildford urban area, selected villages, and at the former Wisley airfield. The Green Belt boundary has also been extended between Ash Green village and the Ash and Tongham urban area in order to prevent coalescence.

Site A35 is also mentioned in Policy 14 'Green and Blue Infrastructure' where it is mentioned as a previously developed site, and at Policy S2 'Borough wide strategy' where it is mentioned as contributing 2,000 houses.

A word search confirms that there are no other references to this site in the Strategies and Sites document.

2. The local plan is devoid of legal argument or relevant evidence to support the development of the former Wisley airfield

All the references to the former Wisley airfield in the Strategies and Sites document are cited in part or in full above. It is remarkable that not one legal argument and not one piece of relevant evidence is evinced to support the proposition that this Green Belt site should be developed.

The complete absence of any attempt to provide legal argument and relevant evidence is so remarkable as to be astonishing and extraordinary.

Far from providing positive legal argument and relevant evidence to support development nothing is advanced to counter objections arising from the obvious and multiple contraventions of the NPPF.

Since no positive legal arguments are advanced the public is unable to refute them. It is faced with the administrative injustice of being asked to respond to a consultation about a governmental decision that has not yet been made and a potential action that is contingent on future argument.

In case the argument is run that the legal justification for changing the Green Belt boundaries is set out elsewhere in the evidence base, it should be noted that the authors of the Green Belt and Countryside Study explicitly and expressly state that it was NOT part of their remit to consider whether exceptional circumstances exist. On page 3 of Vol V Pegasus expressly state that evaluation of exceptional circumstances is not within their remit:

18.4 Whether exceptional circumstances exist will depend not only on the site specific circumstances but the wider background also. For example, if it is established that suitable temporary appropriate locations can come forward to provide for the necessary level of housing for the borough, then it is possible that exceptional circumstances will exist subject to the assessment of other considerations put forward in paragraph 116 of the NPPF.

18.5 It is not within the remit of this Study to assess whether exceptional circumstances exist to enable major development, and there is clearly some uncertainty over what GUILDFORD BOROUGH GREEN BELT AND COUNTRYSIDE STUDY 4 should be classed as major development in such instances. As a result, any PDAs that are identified in this Study within the AONB would require closer scrutiny by the Cot.nnc1 prior to any allocation being made. This would take account of the latest information at the time before conclusions can be drawn on, firstly whether exceptional circumstances need to be demonstrated, and secondly if they can be.
In the absence of any positive legal case being presented for changing the Green Belt boundary at site A35 no further consideration should need to be given to this matter. The proposition is self evidently contrary to the NPPF and it is an abuse of administrative power to force this site into the draft local plan and oblige the public to consider a completely hypothetical and unsupported proposition.

3. Proposed development of site A35 would contravene the NPPF’s protection of the Green Belt -set out at para 83.

Most obviously the NPPF protects the Green Belt against inappropriate development. Since the former Wisley airfield is in the Green Belt all development of it is by definition inappropriate.

Para 83 NPPF states:

83. Local planning authorities with Green Belts in their area should establish Green Belt boundaries in their Local Plans which set the framework for Green Belt and settlement policy. Once estab Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. At that time. authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period.

The local plan omits to mention ANY exceptional circumstances. GBC has not properly set out coherent legal argument and relevant evidence to show that exceptional circumstances justify altering the Green Belt boundaries to exclude this land from the Green Belt. I attach GBC’s disclosure of its understanding of the meaning of exceptional circumstances. This is not consistent with the more stringent definition of the meaning of the words set out in the legal precedents laid down by the courts, in particular the Court of Appeal. For the avoidance of any doubt, the courts have held that the mere process of creating a local plan does NOT itself constitute an 'exceptional circumstance'.

Advice given by Mr David Vickery (of the Planning Inspectorate) to St Albans in 2009 stated:

5) The numbers of houses presently needed on Green Belt land and their approximate locations should be stated. The exceptional circumstances that require this course of action should be stated. Any suggested location should be sustainable and have as little effect as possible on the Green Belt. If possible, the need for Green Belt release should be phased to the end of the plan period so that the detail of the sites and their boundaries could be devolved down later Site Allocatons DPD using regional and national guidance for selection, together with any local criteria that may be appropriate to state in the CS. The CS would also have to say (or delegate the task to a later DPD) what would be the mechanism or circumstances that would trigger the release of Green Belt land for housing.

I attach the full note of Mr Yickery's advice to St Albans.

GBC’s draft local plan does not adhere to this advice because this site (site A35) is in the Green Belt and the exceptional circumstances that require building on it have not been stated. Moreover the site is demonstrably NOT sustainable.
3. Proposed development of site A35 contravenes declared government policy.

Eric Pickles wrote to Sir Paul Beresford MP on 4 August, 2014 as follows:

Our National Planning Policy Framework asks local authorities to plan to meet locally assessed housing needs in full. It is up to each local authority to decide how best to meet its objectively assessed housing need (and other development needs), whether through a Green Belt review or not. However, there has been no weakening of policy in this area: the Framework is quite clear that permanence is one of the essential characteristics of Green Belt, and it emphasises that Green Belt boundaries may be altered only in exceptional circumstances. If a local authority considers that adjustments to such a boundary are essential, they can be taken forward only through the Local Plan process. We have also made clear that it must always be transparent that it is an authority itself that has proposed reviewing its Green Belt.

Nick Boles wrote to Sir Paul on 7 February, 2014:

Green Belt protection

My letter to you emphasised the importance we continue to attach to Green Belt as a way to prevent sprawl and encroachment on open countryside. The National Planning Policy framework provides strong protection: It states that permanence is an essential characteristic of Green Belt, that inappropriate development in Green Belt should not be approved except in very special circumstances, and that a Green Belt boundary may be adjusted only in exceptional circumstances, using the Local Plan process of consultation followed by independent examination.

4. Proposed development of site A35 is not eligible for any of the exceptions in NPPF para 89

GBC do not advance the argument that the site may be developed under any of the exceptions provided for in para 89 of the NPPF.

It is correct not to do so.

It is dubious whether much if any of the site meets the definition of 'previously developed land'.

The NPPF definition of previously developed land is:

Previously developed land: Land which is or was occupied by a permanent structure, including the curtilage of the developed land (although it should not be assumed that the whole of the curtilage should be developed) and any associated fixed surface infrastructure. This excludes: land that is or has been occupied by agricultural or forestry buildings; land that has been developed for minerals extraction or waste disposal by landfill purposes where provision for restoration has been made through development control procedures; land in built-up areas such as private residential gardens, parks, recreation grounds and allotments; and land that was previously-developed but where the remains of the permanent structure or fixed surface structure have blended into the landscape in the process of time.

The land was previously used for war-time purposes and 'provision for restoration was explicitly made'. War time purposes do not come into the NPPF definition of previously developed land. But in all justice they should - especially where provision for restoration was made by HM Government and then subsequently reneged upon.

Even if reliance is not placed on the implied exemption for land for which 'provision for restoration' was made, it is the case that the former Wisley airfield falls into the exclusion (to the exception) set out in the definition, namely 'the remains of the permanent structure or fixed surface have blended into the landscape in the process of time.'
The original structures were ALL removed when the land was sold back to its original owner under the Crichtel Down code provisions as agricultural land in 1980. The runway was not removed for reasons of cost. It is not accepted that the runway falls within the meaning of 'fixed surface structure'. But even were it to be accepted purely for the purpose of argument it has blended into the landscape in the process of time. The present development proposals envisage NO reuse of any part of the original structures.

Para 89 NPPF states

89. A local planning authority should regard the construction of new buildings as inappropriate in Green Belt Exceptions to this are:

- buildings for agriculture and forestry;
- provision of appropriate facilities for outdoor sport, outdoor recreation and for cemeteries, as long as it preserves the openness of the Green Belt and does not conflict with the purposes of including land within it;
- the extension or alteration of a building provided that it does not result in disproportionate additions over and above the size of the original building;
- the replacement of a building, provided the new building is in the same use and not materially larger than the one it replaces;
- limited infilling in villages, and limited affordable housing for local community needs under policies set out in the Local Plan; or
- limited infilling or the partial or complete redevelopment of previously developed sites (brownfield land), whether redundant or in continuing use (excluding temporary buildings) which would not have a greater impact on the openness of the Green Belt and the purpose of including land within it than the existing development.

Para 89 provides for previously developed sites in Green Belt to be redeveloped provided that the development ‘would not have a greater impact on the openness of the Green Belt and the purpose of including land within it than the existing development.’

There is no ‘existing development’. But even supposing for the sake of argument that the former runway were deemed to be development despite there being no structures, redevelopment as a ‘new settlement’ of 2,100 houses could not possibly be considered to have no greater impact than the existing runway.

No more than a very small part of the site could be considered ‘previously developed’ The developer's website describes the land as follows:

[2]

The majority of the land is agricultural and that land does not and never has met the definition of ‘previously developed’. So by definition development is inappropriate and no exceptions under para 89 are available.

On these figures less than 26% of the site is ‘concrete’. However the area of concrete exaggerates the extent of the land which could conceivably be considered ‘previously developed’, if any. This is because the only part of the concrete which had structures on it, namely the area of the aircraft hangars, is much smaller than 74 hectares. It may amount to less than 30 acres.
Moreover, that area which was formerly covered by aircraft hangars is already subject to a development proposal which has received planning permission for an 'In Vessel Composting Facility' covering some 17 hectares (c50 acres) out of the total land area of 114 hectares. That land is presently not available for house building. If that land is excluded then it appears that none of the land could conceivably be previously developed.

**Exceptional circumstances**

The Gallagher v Solihull case (April, 2014 High Court England & Wales) clarifies that the NPPF has not changed the previous definition of 'exceptional circumstances'. The judge stated:

'However it is not arguable that the mere process of preparing a new local plan could itself be regarded as an exceptional circumstance justifying an alteration to a Green Belt boundary. National guidance has always dealt with revisions of the Green Belt in the context of reviews of Local Plans ... and has always required 'exceptional circumstances'.

Whilst each case is fact-sensitive and the question of whether circumstances are exceptional for these purposes requires an exercise of planning judgment, what is capable of amounting to exceptional circumstances is a matter of law and the plan maker may err in law if he fails to adopt a lawful approach to exceptional circumstances. Once a Green Belt has been established and approved, it requires more than general planning concepts to justify an alteration.'

In Carpets of Worth v Wyre Forest District Council (1991) ('Carpets of Worth') March, 1991 (Court of Appeal) the judge stated:

'As it directly prejudices landowners in the otherwise proper development of their land, an extension to the green belt should not be brought into effect unless it can be justified directly by those purposes for which the green belt is designed. There must, therefore, be an inhibition in extending a green belt so as to avoid sterilising unnecessarily neighbouring land ... just as much as reduction in the boundaries of the green belt, which would prejudice the purposes of that green belt. must be made only in exceptional circumstances. On this basis I think that the general concept of the advice in the circulars is that once a green belt has been established and approved as a result of all the normal statutory processes it must require exceptional circumstances rather than general planning concepts to justify an alteration. Whichever way the boundary is altered there must be serious prejudice one way or the other to the parties involved.'

The Local Plan proposes to change the Green Belt boundary in Ockham. It does not set out this change clearly and unambiguously in prose. It is done by reference to a 'Policies Map' from which one is supposed to infer the change.

The change is to make my garden hedge the new Green Belt boundary. An organic feature such as a hedge is impermanent and is not therefore a 'defensible' Green Belt boundary. Moreover the change in the boundary is a serious prejudice to me as a neighbouring landowner. My property has been in the Green Belt for 50 years and my development rights have been restricted accordingly - as have the rights of all the neighbouring landowners. I have been obliged to maintain the open character of the Green Belt. But now my neighbour, Wisley Property Investments Ltd, is to be suddenly freed from the constraints of the Green Belt and to be allowed to construct the third largest town in the borough within metres of my property around some 240 yards of my hedge and utterly change forever the setting of my house, a Grade II fifteenth century farmhouse and garden laid out in 1975 by Russell Page.
GBC is proposing to make this change without making a proper demonstration that the agricultural land adjacent to my property is a sustainable site for a new town and without setting forth ANY exceptional circumstances. This procedural irregularity shows complete disregard for planning law.

Summary

This letter sets out only a few of the many valid objections to the development of the site. It is little short of astonishing that this site has been taken forward into the local plan despite the numerous legally argued and factually evidenced objections already received by GBC as part of the Issues and Options consultation process.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

OBJECTION: evidence base shows no sequential testing of alternative sites

Before selecting a site in the Green Belt for development the promoter, Wisley Property Investments Ltd, a Caymans company, and Guildford Borough Council have an obligation to establish that there are not other more suitable sites to develop outside the Green Belt. In other words, the developer and Guildford Borough Council should apply a 'sequential test'.

The evidence base does not evaluate alternative sites or show that agricultural land at the former Wisley airfield in the centre of the Parish of Ockham is suitable for development and 'sustainable'.

It is instructive to compare site 56, near Ash, with site 66 (agricultural land at the former Wisley airfield). Although the gross area of land at site 66 is much greater, on a net basis, after allowing for land which must be set aside for SANGS, for the Surrey Waste Plan allocation, and for roads and amenities it is in fact the same size or smaller than site 56. Despite the site being of comparable size when compared on a net basis the number of houses planned for at site 66 is over 2000 while only some 400 houses have been given permission at site 56. This illustrates both the potential for more housing at site 56 and the ridiculously high density of housing required at site 66 to cram over 2000 houses into such a small net area.

I set out below a comparison of the two sites. Any rational analysis of the two sites shows that site 56 is far more sustainable than site 66. For example site 56 is adjacent to a railway station, has existing access to several A and B roads. In addition there are a number of primary and secondary schools within walking or cycling distance of the site. This is one of many reasons for objecting to this local plan.

Opportunities/commentary

Whilst this area of land is within multiple land ownership, and may come forward for development at different times within the plan period, we expect significant regard to be had to the impact of development on the existing character of the area, and the infrastructure needs. New homes could be provided in this area (of which 45% will be affordable homes*).

*The planning permission granted for up to 400 new homes in this area will contribute 40% affordable housing.

OBJECTION Site allocation A35: 'land at former Wisley Airfield'

- Failure to comply with GBC's Probit in Planning Code of Conduct and the Nolan Principles
- Regulatory Capture: colluding with the owner of this site in order to change local planning law by including this site in the draft local plan without justification on the basis of sound planning principles, in contravention of planning law, and in contravention of GBC's Probit in Planning Code
- Misrepresentation of the facts concerning this site
- Predetermination of the decision to promote this site in the Local Plan and to remove it from the Green Belt

1. Failure to comply with GBC's Probit in Planning Code of Conduct and the Nolan Principles

During the compilation of the draft local plan there have been multiple and serious breaches of GBC's Codes of Conduct.

It is astonishing that a developer has managed to achieve pride of place for its site in both the Issues and Options paper and in the local plan as a site for a new town - despite relevant evidence and legal argument in support of that site being against inclusion.

The owner of Site A35 is a Cayman Islands Company called Wisley Properties investments - which is a holding company for various subsidiaries. [Response has been redacted due to statements being considered potentially defamatory, derogatory, inflammatory or offensive in nature.] WPI is fronted by a conservative Councilor from the Vale of White Horse called Michael Murray.

The Probit in Planning Code of Conduct can be found here:

The Code deals explicitly with 'Pre-Application Discussions (page 4)'. The first three bullets define a clear process.

Councilors will only be involved (primarily for fact-finding) in pre-application discussions on major schemes when a specific forum has been arranged by officers for that purpose.

- In complex or contentious cases, at least one planning officer will be

- A meeting note will be taken by planning officers and placed on the relevant file. In some cases, this might be a previous planning file, in others it might be the general file for the area. Some pre-application discussions are undertaken on a confidential basis and these will be placed in a confidential envelope on the appropriate file.

- It will be made clear that the planning officers are giving provisional views (based on the development plan and up-to-date government guidance) ; that no decisions are being made and that decision-making rests with councilors at Planning Committee or by the relevant officer under delegated powers.

- Similar issues apply to the development of planning policy. There may be occasions where owners, developers or other interested parties will wish to discuss with councilors aspects of emerging policy in the development plan and other policy
In July, 2014 I requested disclosure of the minutes of meetings between GBC and WP! pursuant to the GBC's Probity in Planning Code of Conduct. No response was forthcoming. I therefore complained to the Information Commissioner. Following that complaint, I received a response over six months later dated 17 February, 2015 (attached). The council chose to use a public interest defense in order not to disclose the information. It appears that GBC officials themselves took minutes of the meetings - as required by the Probity Code.

There remains no explanation of how the Council managed the conflicts of interest involved in providing pre-application advice and also in acting at a statutory planning authority with quasi-judicial powers. For example, no information has been given as to whether the same personnel were involved in giving the applicant advice and also involved in making recommendations concerning whether the application site was sustainable or whether a subsequent planning application should be refused or recommended.

The Probity in Planning Code of Conduct states that Councilors should 'restrict pre-application advice to procedures and policies only'. It is clear that Council officials went far beyond restricting pre-application advice to procedures and policies only.

At best I suspect procedural irregularities and at worst breaches of the Codes of Conduct. Subsequent to the publication of planning application 15/P/00012 I requested copies of the minutes of the meetings attended by Savills on behalf of WP! as detailed in the planning application. Pursuant to that request I received copies of some but not all of the relevant minutes. Those minutes show that GBC and WP! engaged in a joint strategy to include the site in the local plan with a view to making development possible. GBC officials also advised on where to hold public consultations (in Guildford rather than in Ockham) and how to approach other public bodies such as Natural England.

1. Regulatory capture: colluding with the owner of this site in order to change local planning law by including this site in the draft local plan without justification on the basis of sound planning principles, in contravention of planning law, and in contravention of GBC's Probity in Planning Code.

A35 has been promoted as, inter alia, the 'only' site in the Guildford Green Belt which does not satisfy the criteria for inclusion in the Green Belt and the only sustainable site for a new town in the entire borough. The basis for these statements is not set out in the draft local plan and the evidence base is not consistent with these statements.

GBC has neither maintained a proper distance between itself and the developer nor adopted a critical attitude to the developer's promotional claims.

The objectivity and impartiality of the planning department in relation to this site is in question. I am reliably informed by a local resident who was present that when the Local Plan proposals were 'road showed' to the public that Mr Michael Murray was allowed to promote the concept of a new settlement on the site to the public. The blatant conflicts of interest between the developer as promoter and GBC as regulator were not disclosed to participants.

GBC's conduct appears to be a classic example of 'regulatory capture'. The quote below from Wikipedia regarding 'regulatory capture' and 'captured agencies' is relevant:

Regulatory capture

From Wikipedia the free encyclopedia

Regulatory capture is a form of political corruption that occurs when a regulatory agency, created to act in the public interest, instead acts in favor of certain organizations that have the means to dominate the industry or sector it is charged with regulating. Regulatory capture creates an opening for firms to behave in ways injurious to the public (e.g., producing negative externalities). The agencies are called "captured agencies".

The planning dept of GBC appears to be colluding with the developer to have this site included in the local plan without any proper analysis of a) the need for a new town b) the relative suitability of other sites in the borough c) the sustainability of this site d) the effect on the SPA at Ockham Common e) the effect on the Heritage of Ockham.

3. Deliberate misrepresentation of the facts concerning this site.
The facts about this site have not been accurately presented. Important elements have not been subject to proper analysis.

The effect of the proposed 'new town' on the environment and natural environment has either not been considered at all or adequately. This is contrary to the requirements of paras 109 to 125 of the NPPF.

The effect on the Heritage and Heritage assets of Ripley Ockham and Wisley has either not been considered at all or adequately. This is contrary to the requirements of The Listed Building and Conservation Areas Act 1990 and NPPF para 126 and 132.

The effect on local infrastructure has either not been considered at all or adequately. The evidence base gives inadequate consideration to whether local infrastructure has any spare capacity for more houses - beyond what is needed to meet local demand. Para 162 of the NPPF is not properly complied with.

4. Predetermination

On 12 May, 2016 the Leader of the Council, Mr Paul Spooner, was directly quoted in an article in the Surrey Advertiser headed 'Encouragement for developer working to clear airfield hurdles' as follows:

"for us it is simple. Do we, during the plan period of twenty years 2013 to 2033 believe that a sustainable community can be delivered in Wisley? If the answer is yes it will stay in the local plan, if the answer is no it has to come out. I am convinced subject to a whole bunch of things coming together we should be able to deliver a sustainable community at that site to assist in terms of the objectively assessed need. The application that came forward from Wisley (WPI) clearly for me and all the other members did not deliver on that aspiration and hence, as an application, it failed. If they come back with one or two tweaks, it would fail again. So I think there is a fundamental need in terms of improvement to that application, but will they do that during the plan period? If they don't, I believe someone else will."

That article appeared after 15/P/00012 was unanimously refused by the Planning Committee on 6 April. In the same edition of the Surrey Advertiser the developer took out double full page advertisements promoting a new town on the site.

The Probity in Planning Code of Conduct states that 'Council/ ors should avoid making it known in advance of the Committee or similar meeting whether they support or oppose the proposal'.

Mr Spooner's comments express a strong opinion that the obstacles to developing a new town on this site can be overcome and will be overcome over the next twenty years. That strong expression of opinion is clearly contrary to the recommendations of the Probity in Planning Code of Conduct. The use of the pronoun 'we' in the sentence 'we will be able to deliver a sustainable community' and the use of the word 'aspiration' suggesting that it is GBC's aspiration - at best shows an inappropriate lack of impartiality and at worst a clear desire as Leader or the Council and Lead Member for the Local Plan to promote development on the site.

Of the 'whole bunch of things coming together' one critical pre-condition is the removal of the site from the Green Belt - which was one of the reasons for refusing application 15/P/00012. The statements follow the clear collaboration shown in the minutes of the meetings between Savills and GBC to use the local plan process and the OAN as the necessary 'exceptional circumstances' required to justify removing the site from the Green Belt.

Taken together with GBC's conduct over the past three years the statements are further evidence that GBC has predetermined that this site should be removed from the Green Belt and deliberately commissioned consultants to produce reports which could be used as evidence to further that objective.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Local Plan Consultation

Site allocation A35 formerly referenced as site no 66: 'land at former Wisley Airfield'

OBJECTION: Evidence base shows no sequential testing of alternative sites

Before selecting a site in the Green Belt for development the promoter, Wisley Property Investments Ltd, a Caymans company, and Guildford Borough Council have an obligation to establish that there are not other more suitable sites to develop outside the Green Belt. In other words, the developer and Guildford Borough Council should apply a 'sequential test'.

The evidence base does not evaluate alternative sites or show that agricultural land at the former Wisley airfield in the centre of the Parish of Ockham is suitable for development and 'sustainable'.

It is instructive to compare site 56, near Ash, with site 66 (agricultural land at the former Wisley airfield). Although the gross area of land at site 66 is much greater, on a net basis, after allowing for land which must be set aside for SANGS, for the Surrey Waste Plan allocation, and for roads and amenities it is in fact the same size or smaller than site 56. Despite the site being of comparable size when compared on a net basis the number of houses planned for at site 66 is over 2000 while only some 400 houses have been given permission at site 56. This illustrates both the potential for more housing at site 56 and the ridiculously high density of housing required at site 66 to cram over 2000 houses into such a small net area.

I set out below a comparison of the two sites. Any rational analysis of the two sites shows that site 56 is far more sustainable than site 66. For example site 56 is adjacent to a railway station, has existing access to several A and B roads. In addition there are a number of primary and secondary schools within walking or cycling distance of the site. This is one of many reasons for objecting to this local plan.

Comparison of sites 56 and 66: Land in Ash & Tongham vs Land at former Wisley Airfield

### Allocation
- Housing (C3), Traveller pitches (sui generis), Employment use (as a designated strategic employment site)
  - Offices (B1a), Research and development (B1b), Light industrial (B1c), General industrial (B2), Storage and distribution (B3), Education, community and health services buildings (D1), Open space.
- 16.98ha in the northwest corner of the site is allocated for waste use in Surrey Waste Plan 2008.

### Timescales
- 1-5, 6-10 and 11-15 years

### Opportunities / commentary
This is a strategic development site that can accommodate a mix of uses, primarily residential (up to 2,100 homes, including at least 40-45% affordable homes, and eight Traveller pitches), creating a mixed sustainable community.

Part of the site will be designated as a strategic employment site and is expected to deliver a significant amount of employment use.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Complaint
I am writing to draw your attention to this double page advertisement in the Surrey Advertiser and to complain that

- The advertisement headline is misleading
- many of the written statements are factually inaccurate or false
• the diagrams/graphics/photos are false and/or misleading
• overall, the advertisement presents a false and misleading impression of i) the existing site

ii) proposed new development

• the sustainability of the new

1. Timing and context of the advertisement

The advertisement has been placed in the interval between the unanimous rejection of the advertiser's application for planning consent by Guildford Borough Council's (GBC) Planning Committee on 6 April this year and the issue of a new draft local plan by the Council.

GBC's reference number for the planning application is 15/p/00012. The application documents and well in excess of 2,000 objections can be found on GBC's planning website: http://www2.guildford.gov.uk/publicaccess/

The applicant is now seeking to persuade Councillors to retain its site within the draft local plan. The advertisement is clearly an attempt to influence decision makers (ie borough councilors) by means outside the regulated planning process at a particularly sensitive time.

1. Factual inaccuracies

The following written statements in the advertisement are factually wrong and/or misleading:

- "It has a consented direct connection to the A311 [this is the advertiser's bold lettering - in green in the advert]

Planning application 15/p/00012 applied for permission to access the A3. That application was unanimously rejected by the planning committee.

The only vehicular access to the site at present is via an entrance on Ockham Lane. That entrance was created primarily for farm vehicles for farming purposes. There are no buildings or premises on the site. That entrance is kept locked. Ockham Lane is an HGV restricted minor road.

The former vehicular access at Elm Lane - which leads from the A3 has been permanently closed with a bund for many years.

Access via Elm Lane to and from the A3 for large volumes of traffic has consistently been refused by the Highways Agency because of the dangers caused by traffic emerging onto the fast flowing three lane strategic road network. In short there is currently NO access the site to or from the A3 via Elm Lane. This can be verified by visiting the site and viewing the bund and by asking Highways England.

So the only 'consented direct connection to the A3' that the advertisement can relate to is that in the report of the Planning Inspectorate in 2010 granting permission to use some 16ha of the site for a waste composting facility. The Inspectors report is attached for your information. The permission was subject to the 37 conditions set out in Annex 3 of the attached document. Relevant parts of the document are highlighted in yellow. Note in particular conditions 10-15 concerning highways and access. These conditions explicitly state that the waste composting development may not proceed unless and until an access to the A3 via the Ockham interchange has been built. Neither the development in question nor its road access have ever been built.

The statement in the advertisement is that 'it', meaning in the context of the advertisement the whole of 'Wisley Airfield', "has a consented direct connection with the A3". That is false and misleading. The whole site does not have any consented direct connection:

1. The consented connection is exclusively for a waste composting facility - covering at most some 16ha out of a total of 115ha
2. The consented connection is not "direct". It is a connection via a new road connected in the first instance to the roundabout below the That roundabout affords access to ONLY the northbound carriageway of the A3, not to the whole A3 ie both the northbound and southbound carriageways

- The consented connection is for a very limited number of vehicles. These are specifically HGVs serving the facilities and the movements must not exceed 36 two way movements per day. The planning application, by contrast, proposed to build 2,068 dwellings.

It is reasonable to assume an average of two cars per household. If further traffic is added to the total for access two and from two schools and still further traffic caused by the closure of four local lanes the volume of traffic ensuing from this development is very material. It is highly misleading to imply that the whole site has 'consented direction connection to the A3' for in excess of 5,000 cars when currently there is no access whatsoever and the only permission is to access a small part of the site for a specific purpose by no more than 36 HGV's per day. The statement in the advertisement is therefore false and misleading.

The advertiser's website (to which readers are drawn by the advertisement) makes further exaggerated or false claims regarding the transport links to this site:

The Airfield is very well connected. It's got a direct, consented connection to the A3 and is within five miles of nine mainline railway stations. Effingham junction is just a six minute cycle away.

As set out above, the airfield, which is not an airfield and has not been since 1980, has NOT "got a direct consented connection to the A3".

Nor is it "within five miles of nine mainline railway stations". The only mainline railway stations are Woking and Guildford.

Elm Lane to Woking railway station via A367: distance by road Gmiles; return distance by road via A367 8.8m (All distances from Google maps)

Elm Lane to Guildford railway station via A3:8.8m; return journey 11.1m

Secondary railway stations for slow, stopping trains are Effingham Junction, Stoke D'Abernon, East Horsley and Clandon - all on the same branch line; and Worplesdon and West Byfleet on the Woking line.

Elm Lane to Effingham Junction by car: 3.4m Elm Lane to Stoke D'Abernon by car:6.3m Elm Lane to East Horsley by car: 3.8m

The statement about the site's distance from nine mainline stations or any stations at all is false and misleading. In fact, given the number of suburban railway stations in this part of Surrey it is not legitimate to argue that it is located any closer to railway stations in general than thousands of other sites.

Nor is the site a 6 minute bicycle ride away from Effingham Junction - the nearest station. The site is at least 2.8miles from the nearest railway station, Effingham Junction. The route has a significant hill and takes at least 19 minutes by bicycle. Below I attach a screen print from the Surrey Interactive Map website. The relevant distance is 2.87 miles.

If one cycled at an average of 6mph it would take 29 minutes to cycle to Effingham Junction station:

2.87/6 mph x 60mins = 29 minutes
Supposing one cycled it at Omph - it would still take 17 minutes. To do it in 6 minutes one would have to go an average speed of 28.7mph. It is not credible for an ordinary or average cyclist to make that journey in normal conditions in just six minutes. I attach an article written by the Surrey Advertiser. For that article the Surrey Advertiser sent its photographer to the site and he followed me from the middle of the site to Effingham Junction station and verified a) that I did not stop or diverge from the route b) bicycle slowly c) take less than the stated time.

3.2 The site is described as containing the "biggest brownfield site in the Guildford Green Belt". The analysis of the area of the site in a brochure produced by the advertiser is as follows:

Note that the total area of the site is over 283 acres or some 114.7ha. The area of concrete and hardstanding is therefore only 24% of the total. The planning application contains expert reports on the quality of the agricultural land which I state conclusively that it is all good quality land of Grade 3 and above, most of it being Grade 3a and Grade 2.

It is misleading to describe the totality of the site by reference to only 24% of it - when the remainder of the site comprises 45 ha (112 acres) of 'Best and Most Versatile' agricultural land which has never been developed and which has been farmed continuously for hundreds of years.

"Brownfield" is a synonym in planning terminology for 'previously developed land', a term defined in the National Planning Policy Framework.

The advertiser's website states:

Wisley Airfield has a long and distinguished past as a fully operational military and civilian airfield.

This is misleading. It has never been a civilian airfield. Throughout its period of operation it was leased by Vickers/British Aircraft Corporation/Bae for the purposes of testing and transporting planes from its factories near Weybridge. In 1980 there was a public enquiry to decide whether the runway could be used as a civilian airfield. The proposal was decisively rejected.

Even the statement that it was a 'fully operational military airfield' is misleading because the airfield was never an RAF base or used directly by the armed forces. It was an airfield used by a military aerospace contractor - Vickers - an aircraft manufacturer not an operator of a military capability.

The land at the former Wisley airfield was requisitioned in 1942 for 'wartime purposes' on condition it was restored to its prewar agricultural use after the war. (My grandmother was among the leaseholders who gave up part of the land within her lease.) The wartime purpose was to serve as a grass airstrip for Vickers to use to fly out aeroplanes it was building near Weybridge. Agriculture around the grass airstrip continued throughout the remainder of the war. After the War the land was not immediately relinquished and Vickers continued to use it to test and fly out planes it was building, building a concrete runway in 1950. All flying ceased in 1972 and the site was sold back to its pre-war owner - the Ockham Park Estate - in 1980. It was never an RAF base. It was never a public airfield. It is not correct to describe the land as a 'derelict' airfield. The use of the land for aerospace purposes by Vickers and its successor companies (finally British Aerospace) ended in 1972. When it was sold to its pre-war owner in 1980 it was totally decommissioned. All the hangars were removed. No buildings remain. The runway should have been removed but was allowed to remain solely to save HM Government the cost of removing it.

The remaining runway is crisscrossed by multiple public rights of way - all restored when the airfield was decommissioned. These could not exist if the runway served any remaining aerospace use.

3.3 "[the site] ...is just minutes from local train stations using one of the planned frequent bus services" bold lettering used by the advertiser - in green in the advert.

The nearest train station is at Effingham Junction, which is 2.6 miles from the centre of the site. There are no public footpaths and no bus services along any of the road connecting the site and the railway station.
The site is described as 'just minutes from local railway stations'. In fact the site is 2.6 miles from the nearest railway station, Effingham Junction. Evidence to support the viability of a planned frequent bus service does not exist. No bus operator has agreed to operate any such route on a current or prospective basis.

The statement that the site is 'just minutes away from local railway stations' is at best a gross exaggeration. At worst it is completely misleading - because there is currently no spare parking capacity at any local railway stations and current services to London are at or near capacity.

3.4 "Over 50% of the site will be green space"

This statement is especially misleading. 'Over 50% of the site will be green space' creates the misleading impression that this will be a low density development. In fact because half the site is within 400m of a Special Protection A rea for endangered species, half the site must be set aside for a Site of Alternative Natural Greenspace or SANG. The number of dwellings per hectare on the remainder of the site is extremely high at up to 100 dwellings per hectare, similar to those found in the most densely populated parts of London like Islington.

The green space proposed for the development is described as

"a huge new parkland bigger than the County Showground, Stoke Park". The advertisement states:

"Creates the biggest park in Guildford Borough". [Bold lettering used by the advertiser.]

This is a highly misleading statement. A SANG is a defined term. It is defined in the legislation creating the SPA. Attached is a Natural England document setting out SANG guidelines. There are material constraints on the use of a SANG which do not apply to an ordinary public park in a town. It is highly misleading to describe a SANG as a park and to compare it to a park in central Guildford surrounded on all sides by development.

Compare the plan in the advertisement with the plan shown on the linked website and proposed to GBC:

The plan in the advertisement is cut in vertically in half (roughly but not exactly by area). However the actual development is divided roughly horizontally ie from West to East. The horizontal division of the site is caused by the northern half of the site being adjacent to the SPA. The narrow shape of the develop-able site together with the density of dwellings was expressly mentioned as one of the factors in refusing planning consent for 15/p/00012.

The diagram presented in the advertisement is particularly misleading because the northern half of the site cannot be developed at all.

• The Advertisement headline states:

"A sustainable new community for Surrey"

This headline is also misleading. It presents the development as 'sustainable'. However planning permission for a development on the site has just been unanimously refused in large part because the proposal was NOT sustainable. For example Highways England stated that the development was likely to have a severe negative impact on the Strategic Road Network.
The entire site is situated exclusively within the Parish of Ockham. The site is not in or part of Wisley and does not communicate with Wisley in any way. The Settlement Hierarchy in the Guildford draft local plan lists Ockham as the second least sustainable site for a new development in the whole borough. Ockham does not have a shop or any significant facilities. A new development in the centre of Ockham would be completely dependent on car transport - yet the local roads are entirely unsuitable for a development of this size - which would be third largest in the borough after Guildford and Ash & Tongham.

3.7 The advertisement states:
"Delivers more than 2,000 new homes, fast" [bold lettering as used by the advertiser - in green in the advert]

It is incorrect and misleading to state that 'more than 2000 new homes' can or will be delivered "fast". Thames Water, for example has stated (its letter is on the GBC website) that there is insufficient sewage processing capacity, that up to three years' lead time would be required and that all works would be subject to funding. It is also likely that development could not begin until road access to the A3 had been completed. All these factors make it extremely unlikely that houses could be provided quickly or at all within a 5 year horizon. It is certain that the entire figure of 2,000 homes would not be developed 'fast' because the plans attaching to 15/p/00012 proposed to spread the development over 15 years. The use of the adjective 'fast' in relation to all 2,000 homes is highly misleading in the context of a development which might not start for five years and might not complete in less than 15 years.

It shows that cumulative housing delivery by 2020 is only 377 houses. That figure itself is aspirational rather than realistic or contracted. No planning permission has been achieved and is unlikely to be achieved before the Local Plan process is complete - which is unlikely to be before the end of 2017.

Political influence

This development is promoted by a local politician called Mr Michael Murray, who is borough councillor in Oxfordshire. His details can be found on the Vale of White Horse website which shows that he is responsible for its Local Plan. Mr Murray is also an officer of Causeway land - the promoter of the development.

The purpose of the advertisement is clearly to influence the political process of adopting a new local plan in Guildford. As such it was important that the public and Guildford Borough Councillors should have been given accurate facts in the advertisement presented in a fair manner taking full account of the context and the constraints on the site. Instead the advertisement shows a casual disregard for the true facts.

The photographs of the site are deliberately unflattering. The main photographs are taken from a very considerable height in the air. These give a misleading impression of the site - because the runway cannot be seen from any of the adjacent land - except from a small area on Hatchford Hill. The photos give no indication of the designations of the adjacent land. They do not mark the Special Protection Area, The Site of Special Scientific Interest, The Sites of Nature Conservation Interest or the Conservation Areas and Listed Building adjacent or near to the site. They do not show the part of the site which has planning permission for a waste composting facility and which is set aside for the Surrey Waste plan. The photos imply that the whole site could be built on. The advertisement implies that the developer is somehow generously electing, out of its innate sense of public service and beneficence, to dedicate half the site to the purpose of providing the lucky citizens of Surrey with the biggest 'park' in the county. Nothing could be further from the truth. In fact the developer is not creating a 'park' at all. It is creating a SANG as a legal obligation in order to comply with environmental legislation.

This map (below), taken from the Surrey Interactive Maps website, shows relevant features which the advertiser has chosen to ignore. Note in particular the proportion of the site allocated to the Surrey Waste Plan, which cannot be used for housing, and the SSSI and the footpaths.
Note that no access to the A3 exists or is shown on the map. This land is no different in terms of access to the A3 from any other farmland adjacent to the A3 along its length from London to Portsmouth - except of course for the fact that it is designated as part of London's Green Belt.

2. Conclusions

The advertisement contains a number of false and misleading statements regarding the access of the site to and from the A3. It describes the whole site as derelict and brownfield when at the very most 24% of the land could be so described. It gives the impression that all of the 'brownfield' land could be developed for housing. In fact some 15% out of 24% is some 60% of it is already allocated for the Surrey Waste Plan - and so is not available for housing. And a significant proportion of that is in any case within 400m of the SPA and so by Jaw impossible to develop for housing. The advertisement states that half the land will be turned into a public park - when in fact it will be land used to create a SANG to protect the SPA to the north. It states that the site will create a 'sustainable community' when in fact the site is far from sustainable, has no community and will not have a meaningful community for several decades.

The editorial department of the Surrey Advertiser is well aware of the issues surrounding the description of the site. It has published many articles and letters on the subject over the last two years. It would appear that the commercial interests of taking advertising revenue have over ridden an obligation to fair and accurate information. In view of this the Surrey Advertiser should make available space for Ockham Parish Council and other local interest groups to correct the false and misleading impression created by this advertisement.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

<table>
<thead>
<tr>
<th>1. The obligations of GBC to regulate development</th>
</tr>
</thead>
<tbody>
<tr>
<td>◦ requirements of the National Planning Policy Framework (NPPF)</td>
</tr>
</tbody>
</table>

Conservation of heritage assets 'in a manner appropriate to their significance, so that they can be enjoyed for their contribution to the quality of life of this and future generations' is a 'Core Planning Principle' set out in NPPF para 17. 'Housing should be located where it will enhance or maintain the vitality of rural communities' - NPPF para 55. The LPA 'should require an applicant to describe the significance of any heritage assets affected, including any contribution made to their setting' (NPPF 128). The LPA should 'avoid or minimize conflict between the heritage asset's conservation and any aspect of the proposal (NPPF 129). 'Substantial harm to or loss of a grade II listed building, park or garden should be exceptional' (NPPF 132).

#### 1.1 English Heritage Guidance: The Setting of Heritage Assets

English Heritage has published guidance on the setting of Heritage Assets from which the extracts below are taken:

2. **Physical setting and context**

The designation of site A35 as a strategic development site has profound implications for the character, setting and context of Ockharn, itself a heritage asset, and for the individual heritage assets within it. The proposed development would do the parish and its heritage assets substantial and permanent harm. There are no measures significantly to reduce that harm.

The designation implies that development on this site is 'sustainable'. The principal argument made for its sustainability is its size. The planning statement for the planning application 15/P/000 12 states at para 1.14 "to demonstrate the critical mass created, on completion, the new village settlement **will be the third largest settlement in the borough**, exceeded only by Ash/Tongham and Guildford Town."

However the size of the development is the factor that causes most of the harm to the parish and its heritage assets. The imperative for size, without which the development is unsustainable on GBCs criteria (see s22 of Vol. V of the Green Belt and Countryside Study), causes the development to encroach on most of the constituent settlements that make up the parish of Ockham - especially Martyr's Green, Elm Corner and Bridge End. Rather than address this issue the proposal merely denies the existence of the problem. In a sense it has no choice but to ignore the problem because it can provide no remedy apart from making the development smaller which, in turn, would make it unsustainable. The developer cannot acknowledge that the site is too small because that invalidates the core hypothesis that the development is 'sustainable'. The developer cannot acknowledge that the development is too large because that validates the harm that the development causes to the heritage of Ockham and the Special Protection Area (SPA). The facts conflict with the application thesis and the exegesis is intellectually dishonest. The site is too small for development to be sustainable and allows no possible scope for future expansion.
2.2 The setting of Ockham and its parish

Rather than address the historical and geographical reality of Ockham as an integrated whole, the planning application seeks to split it into small units and then to claim that the units are either not part of or connected with Ockham (e.g. Martyr's Green) or that the effect on various of the parts has no effect on the whole (e.g. the Ockham Conservation areas). This false picture is accentuated by the constant repetition of various claims that present a misleading picture of the site. It is constantly repeated that the site is in Wisley whereas all of it stands in the parish of Ockham, that it is an 'airfield' (although all flying ceased in 1972 over forty years ago) and that it is 'brownfield' (even though only a small part (c27ha of which 7ha is already set aside for the Surrey Waste Plan) of it meets that definition). Other so-called facts are presented in a misleading way. It is claimed on the one hand that there is 'permissioned access' for the development onto the A3 while on the other hand such permission as exists is for a completely different project (a waste processing project) and this application expressly states that the applicant will seek to cancel the historic permission. Real facts such as the existence of the historic bridle ways and footpaths are distorted into justifying tenuous claims to sustainability. The fact that the footpaths mainly link the settlements of Ockham with each other and with their Common and that the proposed new 'urban feature' between all the settlements will do them great violence are all ignored.

The historic landscape characterisation is not considered [by Savills] to be of intrinsic significance or to contribute to the significance of the heritage assets with which it is associated:

Historic Landscape Characterisation

- The Application Site lies in an Historic Landscape Character area which is characterised by the Surrey Historic Landscape Characterisation survey as lying mainly within disused airfield with small parts of the south-western area lying within miscellaneous valley floor fields and pastures and medium to large regular fields with wavy boundaries (late medieval to 17th/18th century enclosure). The historic landscape character of the Application Site and its surroundings is not considered to be of intrinsic significance, or to contribute to the significance of the heritage assets with which it is associated.

- Historic Landscape Characterisation
  - The Application Site lies in an Historic Landscape Character area which is characterised by the Surrey Historic Landscape Characterisation survey as lying mainly within disused airfield with small parts of the south-western area lying within miscellaneous valley floor fields and pastures and medium to large regular fields with wavy boundaries (late medieval to 17th/18th century enclosure). The historic landscape character of the Application Site and its surroundings is not considered to be of intrinsic significance, or to contribute to the significance of the heritage assets with which it is associated.

This assessment ignores multiple elements of the Landscape including:

- The public footpaths which exist in order to connect the various settlements of Ockham with each other and with their Common
  - There is a very good reason why the historic settlements of Ockham are located south of the Application It is that the Application Site is high ground and extremely exposed to the prevailing south westerly winds. Historic settlers have therefore sought the shelter of lower ground or tree cover.
  - The interconnectedness of the Heritage Assets with the land which has been shaped by the people who lived in these farm houses over the centuries
  - The fact that the former runway (which is considered to 'degrade' the site) has no visual impact on the heritage assets and cannot be seen from outside the airfield except from the
  - The fact that the runway is a small part of the overall land parcel - as little as 15% of the
  - The description of the former airfield land is self-contradictory:

11.3.43. Due to the historic use of the Application Site, the existing land use does not relate to the other rural pressures, however there is some evidence of fragmentation and subd1vs1on of fields for equestrian use immediately south of the Application Site.

11.3.46 The setting of Ockham end its relationship to the surrounding countryside should be retained.
The long open character of the airfield contrasts with the surrounding parkland and agricultural landscape as result of the removal of all traditional boundary hedges and trees during the airfield construction. The Application Site subsequently has few of the key characteristic features of the Ockham and Clandon Wooded Rolling Claylands Character. The linear Application Site is well enclosed by woodland across its north, west and southwest boundaries. with weaker hedges bordering the east and southeast boundaries with Old Lane and Ockham Lane. Its scale, linear and featureless characteristics contrast with the typical smaller scale enclosed field patterns of the surrounding countryside.

- The application as a whole seeks to represent the airfield land as disconnected from the adjacent This misrepresents the reality
- The cause of the dilapidations of the hedges around the land at the former airfield is the direct responsibility of the developer and its predecessors in title which have failed to maintain them.

Ockham does not have one central nucleus like many villages. It is a dispersed group of farming settlements historically unified by the Ockham Park Estate and Ockham Church.

1. The setting of Yarne and Ockham End in Martyr's Green

- Historical geography of the property

Yarne, like Upton Farm, is a fifteenth century farm house. For many years until its sale at auction in 1958 Yarne formed part of the Ockham Park Estate. Until 1900 the property was a farm known as Lara Farm working the adjacent land which formed part of the Estate. Around 1905 the property was extensively modernised by the Estate: a northern extension was added and the southern front was substantially modified on plans thought to have been drawn up by Lutyens.

The historical setting of Yarne and the other farmhouses at Martyr's Green - Upton Farm, Pound Farm and Blackmoor Farm - is rural and agricultural. Farming and common historical ownership within the Ockham Park Estate over many centuries is an integrating and unifying factor creating a common setting for all these heritage assets.

Martyr's Green and May's Green have formed part of the parish of Ockham for many centuries. Closure of Ockham Lane and the introduction of the third largest urban concentration of houses in the borough will destroy Ockham's heritage and geographical integrity.

The geographical and cultural setting of the property is closely tied to the land. The current curtilage and much of the garden was established before WW 1. The house is positioned with its narrow end facing the southwest. The first builders oriented the house like this to minimise exposure to the strong south westerly winds blowing across the open landscape to the west. The predominant feature of the setting and the garden is its openness with views of the western horizon extending across twenty miles over and beyond Woking. These views have existed since the land was first cleared for farming - before the Norman Conquest. This extensive east-west aspect formed by a sandy ridge and the fortuitous crash landing of a bomber in WW2 were the reason it was chosen as the location of a grass airstrip in WW2.

Before WW2 the property was let by Ockham Park Estate with adjacent land to the West as shown by the pink shaded area on the 1927 lease plan:

My grandmother took over the lease of the property in 1932 and continued to hold the field to the west until it was commandeered with other parts of the Ockham Park Estate to form the grass runway along the ridge of the land several hundred metres further west. It was a condition of the requisition of the land that it would be restored to its previous agricultural use after the war.
I have known this agricultural land all my life and to my certain knowledge the adjacent agricultural has never been 'previously developed'.

When the airfield was sold under the provisions of the Crichel Down Code in 1980 to the heir of the original freeholder (the Ockham Park Estate) the leaseholders did not recover their leases.

In 1975 the garden at Yarne was re-designed by Russel Page, perhaps the most renowned twentieth century British garden designers. The back (North) garden was designed with a Westward facing aspect - directly towards the application site. The uninterrupted Westerly views across the application site towards Little Upton, Bridge End Farm and Woking would be completely obliterated by the creation of a new town.

- **Assessment of the setting of Yarne in planning application 15/P/00012**

Sections 10 and 11 of Environmental Statement (prepared by Savills) attached to the planning application refer to the setting of Yarne and to the impact of the development on Yarne.

In para 10.3.62 it is stated that, 'The application site is considered to make a minor contribution to the setting of Grade II listed Yarne...'. The consideration given to the setting of Yarne is wholly inadequate and misleading.

1. The western boundary of Yarne is *immediately* alongside the development site. The western boundary with the site is some 200 yards long. The northern boundary is 40 yards long. This may be the longest boundary of curtilage of any heritage asset with the development site. *Nowhere* is this set out in planning application S/P/00012. This was drawn to the attention of the developer's representative, Mr Michael MmTay, a conservative councillor, at the roadshow on the runway intended to promote the development. He offered to provide screening for any properties along the northern edge of the Application Site but refused to give any explanation as to why no screening was proposed for Yarne.

The planning application seeks to minimise the effect of the development on Yarne and Martyr's Green. For example at para 11.3.28 it states:

11.3.28. The northern extents of Martyr's Green lie o further 400m east.

This is a blatant falsehood. Yarne's curtilage is right next to the development. The property itself is within 30 yards of the development. The field known as Martyr's Green is less than 100 yards from the development.

1. There are extensive views across the whole of the development site from Yarne from the ground floor, from first floor and from the

1. The development property will commence immediately beside Yarne with a path/roadway within metres of the

No attempt has been made to separate the development from the heritage asset.

1. No attempt has been made to form a realistic view of effect of the development on the setting of Yarne and its

Architects drawings are included in the application showing the line of sight between various heritage assets and the proposed building in the development:

No line of site drawings are included in respect of Yarne. This is extraordinary given that Yarne is the heritage asset closest to the development and has the longest boundary with the development. It amounts to deliberate adverse selection of the facts in a blatant attempt to misrepresent the effect of the development on Yarne.
3.3 Views from Yarne onto and across the Application Site

The views to and from Yarne are described in section 11 of the Environment Statement Vol 1. While it is claimed in para 11.3.216 that 'hedgerows ...screen ground floor views' the reality is that 240 yards of housing on the development site will front the western and northern boundaries of Yarne. It is further stated that 'Upper storey views are directed along the southern boundary of the site with some additional filtering by boundary trees.' That is misleading.

A defining characteristic of the house is its position in open countryside near the top of a long incline with panoramic views to the west.

The contour map from the planning application confirms that Yarne stands at the highest point of the Application Site. The only higher ground nearby is at the top of Hatchford Hill about 400m to the east.

In para 11.4.63 it is stated, 'Views towards the Application site are restricted to upper storeys'. [That is a blatant falsehood.] 'Construction impacts will be notable from Neighbourhood 2 increasing in significance to major/moderate as Neighbourhood 4 is completed adjacent to the properties boundaries. Once completed, the impact will reduce slightly due to the reduction in movement and construction activities within the view, however the outlook will change considerable from an open, albeit degraded, landscape to close distance urban frontage.'

The statement in 11.4.65 concerning the views from Ratchford Cottage and Forge Cottage are also false. These cottages stand near the crest of Hatchford Hill. They therefore enjoy panoramic views over the Application Site to and beyond Woking and all a long the North Downs.

The application alleges that the runway 'degrades' the view from Yarne. The statement is manifestly false. It is impossible by definition for something which has zero height to 'degrade' a view. Something of no height cannot obstruct any line of sight. The claim is just another of the many false and misleading claims made by the developer. The runway is not visible from Yarne except from the most northerly part of the garden and it makes no impact there because it has no height. It is also alleged that the navigation beacon 'degrades' the view. This is an absurd statement. It applies completely asymmetrical tests to the factors which run against the development and those that run for it. The beacon is a structure which is not much more than one storey high. It is built as a steel frame and it is possible to see through the framework. Yet this tiny structure 'degrades' the landscape view whereas the highest density development in the borough enhances the environment ! Perfectionism is required for Yarne to be worthy of protection and any standard can be applied in order to justify development. The consultant to my knowledge has never looked at the view from Yarne - at least not from within the property with the owner's permission. The statement that the view is degraded by the runway impugns the professionalism and integrity of the consultancy which made it. You could say with as much justice that Sophia Loren's face was degraded by her lips because they are imperfectly large.

The development immediately beside Yarne will start some 10m or so from the boundary and will be up to three storeys high. The houses will therefore be visible from every part of the property, from within the ground floor, from the first floor and from every part of the garden. Taller five storey buildings will be situated further from the boundary. A townscape will be substituted for a landscape. This will destroy the setting of the Parish of Ockham and its heritage assets including this fifteenth century farmhouse.

3.4 Inter visibility

The houses along the southern side of the Application Site are all situated along a spring line. All these houses sourced water from their own wells and it is believed they were not connected to the water mains by the East Surrey Water Company until after 1900.
Yarne, Little Upton, Old Farm and Bridge End Fann all enjoy indivisibility. There is also indivisibility of Yarne with the dwellings at the top of Ratchford Hill (Forge and Hatchford Cottages, inter alia). The reciprocal views would be permanently destroyed by the new town.

- Connected, living landscape

The open countryside forms a connected landscape between the SPA to the north and the land to the south. Deer, other mammals, birds and insects continuously travel between the SPA and woodlands to the south (Tanner's Copse and the woods at Effingham and Beckham down to the North Downs). The introduction of an alien 'urban feature' will cut off the ancient conduits used by these insects and fauna. It will destroy the habitats which support many endangered bird species, especially the ground nesting Skylarks. The building of an urban settlement along the crest of the sandstone ridge will cut off the SPA from the land to the south causing permanent and irreparable harm to the ecological setting of the parish. It is ridiculous to suggest that a few bird boxes on a housing estate will satisfactorily compensate for a lost landscape.

3.5 Relationship of Ockham with Ockham Common

Ockham and its common form an integrated historical and ecological whole. The interaction of human beings, animals and geology have created the rare lowland heath on Ockham Common, which Surrey Wildlife Trust describes as 'rarer than rainforest'.

The many miles of interconnecting local footpaths testify to the connectedness of the settlements of Ockham with their Common.

The creation of a new urban settlement, described as 'garden city' in style, is harmful to the fragile local ecology and to the local rural economy which depends on horse riding, arable farming, and pheasant shooting.

The application alleges that the agricultural land on the Application Site is poor grade 4 land or non-agricultural land. During the Summer of 2014 the agricultural Land Agent for the land (Knight Frank Rural Consultancy in Hungerford) advertised the land as Grade 3 land i.e. as good agricultural land.

3.7 Closure of Ockham Lane

The application proposes to close Ockham Lane and Plough Lane and to make Old Lane and Guiles Hill Lane one way.

Closing Ockham Lane, a public right of way for hundreds of years, will cut Martyr's Green, May's Green and Hatchford End off from the rest of Ockham.

The proposal made in the application that Ockham Lane should become a pedestrian route from the new town to the Black Swan public house will adversely affect the setting of Yame, Oakmead and Red and White Rose Cottages which can be expected to suffer from increases in littering and antisocial behavior.

Conclusions

The developer has fundamentally misrepresented the heritage of Ockham, its ecology and economy.

It is stated for example, that the land 'contains the largest previously developed site within the GB part of the Metropolitan Green Belt'. The previously developed element of the land is a fraction of the whole. It is a misrepresentation to propose that all the surrounding farmland is part of the previously developed element.

It is stated 'The land is subject to recommended release from the Green Belt as part of the emerging Guildford Borough Local Plan'. That is clearly false. The draft local plan makes no such recommendation, nor does any of the evidence base.

It is stated 'the principle of a new settlement at Wisley attracts local policy support. The site has been identified as a new settlement and hence removed from the Green Belt within the emerging GBLP, as justified by the Borough Council's evidence base.' The land has NOT been removed from the Green Belt. Nor does inclusion in the draft local plan without
any proper evaluation or sequential testing amount to 'local policy support'. It amounts to a procedural irregularity which calls in question whether a proper professional and arm 's length relationship exists between Guildford Borough Council and the developer.

It is stated: 'The housing situation in Guildford Borough ...points to a critical situation which requires redress via the most suitable, available and sustainable sites.' The statement is one of opinion and not fact. The Objectively Assessed Housing Need has not been publicly scrutinised. So far as local housing need is concerned, the Royal Horticultural Society at Wisley owns some seventy properties -almost all of the village. Of these some fifty houses stand empty. That suggests that there is no shortage of houses in this ward. While there is a shortage of social housing that is a direct result of council policy. It has not built any council houses for twenty years. The average number of persons per house in the borough stands at approximately 2.4. That does not indicate a 'critical' situation. If the situation were truly critical then the average per house would be significantly higher.

The proposal does great violence to the heritage of Ockham and its heritage assets and to the local ecology of Ockham Common. The site is completely inappropriate for a 'new urban feature'. City and urban features are wholly out of place in this geographically constrained and ecologically threatened corner of Surrey.

While the proposal pays lip service to the requirements of planning regulations it does not seek to understand Ockham or its historical context. Rather than consider the parish as an integrated geographic, economic, ecological and legal whole it prefers to focus on the 30 or so hectares of disused runway to the neglect of all other elements.

Rather than acknowledge the consequential harm caused by the proposal, the application seeks merely to deny the existence of harm and/or its extent by claiming falsely that the development site is discrete and disconnected from the rest of the parish. Since the premises of connectedness and harm are denied the proposal contains no meaningful mitigation measures. Indeed since the proposal is so fundamentally incompatible with the parish and its surroundings there are no possible mitigations. This is all the more the case because the core thesis supporting the proposal is that it is 'sustainable'. The logic supporting this hypothesis is that the project is sufficiently large to be able to stand alone and that as a result of its size it will attract sufficient facilities to make it sustainable. This logic flies in the face of the fact that there are no existing facilities at site which justify its selection as a suitable site for development. In short the logic is self serving, intellectually dishonest, and completely at variance with the facts.

The reality is that an outsized development of some 2,100 dwellings is being shoehorned into a site scarcely bigger than half a square kilometre or roughly 700m x 700m. This development is described as the third largest concentration of housing in the borough behind only Guildford Town itself and Ash and Tongham. Whereas Guildford Town and Ash and Tongham have extensive facilities and are not immediately affected by Special Protection Areas, Ockham has no facilities and its ecology is already threatened.

The harm caused to Ockham is substantial, adverse and permanent. The so-called mitigation measures are an undersized sticking plaster which do not begin to cover the gaping wound which this development would leave. If allowed the development will devastate the parish of Ockham and its surrounding villages.

The proposed new town is many orders of magnitude greater in its impact on the Green Belt that the existing 'development' (the disused runway). It is therefore incomprehensible why the planning application should have proceeded this far.

The map below demonstrates that the Application Site is slap bang in the middle of the Green Belt separating Woking, Byfleet, Cobham, Effingham, the Horsleys, Ripley and Send. Development of this site is a dagger pointed at the heart of the Green Belt. If the applicant succeeds the future of the Green Belt in this area will be fatally jeopardised.

Regulatory Capture, lack of transparency and disclosure

There is no evidence that any 'sequential tests' were carried out to try to identify the most suitable sites for new towns in the borough. This creates the suspicion that the inclusion of the site in the local plan was highly improper and the result of the 'regulatory capture' of the local authority by the developer. Inclusion within the draft local plan should not pre-determine the outcome of the planning argument.
There is also a risk that the planning department has a grave conflict of interest insofar as it has provided very extensive (and undisclosed) pre-application advice to the developer on how to present its application. The public has no assurance that GBC has implemented proper 'Chinese walls' between those officials advising the developer and those officials responsible for preparing the local plan.

This may be still another example of the confusion between GBC's role as planning regulator and its role as adviser to the applicant. The public has reason to believe that the regulator has been captured by the applicant. Application 15/P/00012 was held open for a year to enable the applicant to amend it.

It is of particular and grave concern that this site remains in the local plan despite Application 15/P/00012 being unanimously refused by the planning committee of GBC.

This was no doubt the purpose of the previous application was to build an in-vessel composting facility. That facility was granted permission on the basis that the Surrey Waste Plan constituted a 'very special circumstance'. Despite the purported 'specialness' of the circumstance the applicant has not lifted a finger to build the facility in the subsequent years. And in Application 15/P/00012 it says that the waste plant is no longer required by the Waste Plan. So the circumstances are now considered by the applicant itself to be no longer special. This reveals the cynicism of the applicant which is prepared to make any claim, regardless of whether it intends to act on it and regard less of the long term plausibility or reality of the claims made in order to achieve permission. The public was duped by the waste plant application. Part of the Green Belt was intended to be permanently sacrificed in the interests of a proposal for a waste plant. But the viability of the waste plant has not endured beyond six or so years. The Inspector was clearly taken in. The waste plant proposal was so much 'vapour ware'. And the applicant suffers no sanction for making misleading claims. It is ridiculous to claim that the site has 'permissioned' access when the permission was granted for a very different development and developer states in 15/P/00012 that it is seeking to revoke the very same permission: 'the applicant proposes to commit to not deliver the extant consent for a Waste Facility'.

Indefensible Green Belt boundary

The NPPF states that the Green Belt should be permanent. Para 83 states:

"Local planning authorities with Green Belts in the ir area should establish Green Belt boundaries in their Local Plans which set the framework for Green Belt and settlement policy. Once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. At that time, authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period."

The new local plan seeks to establish the garden of Yarne as the Green Belt boundary. It is an arbitrary line marked by a hedge. It is not indefensible. A road or a railway line would be indefensible. But an organic feature marking the edge of a garden hardly qualifies as a 'defensible' boundary. It is an example of the inconsistent and arbitrary manner in which GBC applies the planning rules. There is one interpretation for residents and another entirely for developers that propose to build whole new towns.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Objection to the removal of Three Farms Meadow in Ockham from the Metropolitan Green Belt

Objection to the systematic promotion of this site for development by the owners and Guildford Borough Council on the basis of false information

Policy A35 proposes Land at the former Wisley airfield in Ockham as a Strategic Development Site for a new town. The town is to comprise some 2,000 houses and would be the third biggest settlement in the borough.

In order to develop this site the owner has persuaded Guildford Borough Council (GBC) to propose the removal of the land from the Green Belt. It has pursued this policy of courting GBC since 2007 when the current owner purchased the site for some £23m.

History of the site

The site has been farmed for many centuries by tenants of the Ockham Park Estate- which was originally owned by the King family. During WW2 the site was acquired by HM Government for ‘war time purposes’ on the understanding that it would be returned to its former agricultural use after the war. During the war in 1943 a grass airstrip was created on the land which was used to fly out aeroplanes being built by Vickers in its factories at Brooklands. Agriculture continued
around the grass airstrip during the war. After the war Vickers continued to build aeroplanes at Brooklands and requested an extension of the lease. Aeroplanes propelled by jet engines caused the grass runway to catch fire and so in about 1952 a concrete runway was put down. Vickers was subsequently subsumed within what is now BAe and all flying ceased in 1972. In 1980 the government sold the land back to the inheritor of the Ockham Park Estate for its agricultural land value (some £300,000). Permission to re-use the aircraft hangars for intensive farming purposes was refused. Later an application to create a private airport was the subject of a long public enquiry[2] and was also refused. GBC and SCC both opposed all applications to develop the land. All the buildings were removed prior to the sale back to the pre-war owner. The whole site is within the Metropolitan Green Belt. The original lessees whose leases were annulled during the war never recovered the land which they had formerly leased.

Current ownership

In 2007 a Jersey company called Wharf Land Investments Ltd purchased the land from Legal and General. The land parcel comprised some 114.7ha. Of that area some 63ha is good quality agricultural land – of which some 45.4ha is ‘Best and Most Versatile’ land. Some 24.6ha is non agricultural land – comprising scrub, woodland and grass. Some 27.1ha comprises the concrete runway and former hangar area. Of the 27.1ha of concrete some 17ha has been set aside for the Surrey Waste Plan. Therefore only 10ha of the concrete area within the site can be considered to be ‘brownfield’ or previously developed. 10ha out of 114.7ha constitutes less than 10% of the total area. Moreover of that 10ha a significant proportion stands within 400m of the Special Protection Area for endangered species at Ockham and Wisley Commons and therefore may not be used for new residential housing.

The new owners were well aware of the land’s Green Belt and agricultural land designations when they purchased. An Agricultural Land Classification was carried out in August 1979 and is filed at Natural England. It shows all the agricultural land as Grade 3a and 3b. A more recent classification filed with planning application 15/P/00012 provides more detail and shows a proportion of the land as Grade 2.

Once it acquired the land Wharf Land, owned by Douglas Maggs and David Mellor (the former Conservative Cabinet Minister), set about achieving a change of use of the land. It applied for planning permission to build a waste composting facility, which was granted on appeal in 2010 subject to a list of 23 conditions which included limiting the maximum tonnage of waste per annum, the number of lorry movements and the hours of use. This development was never actioned by Wharf Land but was not allowed to lapse after some soil was imported to the site in the week before expiry of the permission.

Wharf Land was sued in Jersey[3] by one of its investors for making ten payments amounting to some £1.5 million to persons unknown without providing any details. The largest payment exceeded £1 million and was paid to a Gibraltar company called Shoehorn Ltd. Disclosure of the parties to whom the payments were made were never disclosed after shareholders voted to approve the transactions. Whether any of these payments were ultimately received as inducements for working towards a change of use of the land is not known.

In 2013 Wharf Land was sued in the High Court[4] in England by a Russian investor called Lisitsin. The court awarded Lisitsin some £1.4 million in damages and the judge said the defendants were ‘knowingly complicit in fraudulent misrepresentation’.

Before the trial had concluded Douglas Maggs put Wharf Land into administration. Its assets were acquired by a new Caymans company called Wisley Property Investments Ltd, (WPIL) the current owners. The ownership of WPIL is not disclosed but is thought to include Lisitsin and RAB Capital Special Situations Fund, a hedge fund. GBC has refused to exercise its right to enquire into the ownership. WPIL is represented in England by Mr Michael Murray, a Conservative Councillor at the Vale of White Horse in Oxfordshire, where he is responsible for their local plan.

WPIL has put in a number of planning applications. Two planning applications sought permission to use the land to make films. One was withdrawn by the applicant after very considerable public protest. The second was refused, appealed and refused again on appeal. The latest application, in December 2014 was for a new town of 2,100 houses. The application was held open for an entire year while further information was collected and finally submitted in December, 2015. The application was finally heard by the planning committee in March, 2015 and unanimously rejected.

Factual misrepresentations by the applicant
WPIL has consistently repeated a number of gross factual inaccuracies regarding this site. It has claimed that the site is poor quality agricultural land. Application 15/P/00012 states that the agricultural land is Grade 4, whereas it is in fact all Grade 3 and above. The application states that the site has ‘permissioned access to the A3’. At best that is misleading and at worst it is a deliberate lie. The site has no access to the A3 for a new town of 2,100 houses. Such permission as it has for a waste processing facility is hedged by 23 conditions which limit hours of access and numbers of lorries per day. The applicant has claimed that the site has good connections to railways, whereas it is about as far from railways as it is possible to get in this part of Surrey. The claim that it is possible to cycle to Effingham Junction station in six minutes is demonstrably false. These and other bogus claims are made in planning application 15/P/00012 despite the application containing a statement as to the truth and accuracy of its details.

**Role of GBC**

It may be expected that an applicant might promote its site with ‘no holds barred’ because of the very substantial development profits at stake – possibly in the region of £500 million. As the local planning authority performing a quasi judicial role it might be expected, however, that GBC would have taken a more fastidious approach to the facts. However, GBC has been far from impartial. Mr Murray participated in public roadshows to promote the draft Guildford Local Plan. GBC included this site in both the Issues and Options Paper and in the draft Local Plan – led my the former Lead Member for Planning, Ms Monika Juneja who was subsequently convicted of forgery and fraud in relation to her professional qualifications. WPIL paid GBC for pre-application advice. Minutes of meetings with WPIL’s adviser, Savills, to the extent that they have been disclosed, reveal that GBC advised WPIL to conduct public meetings in Guildford rather than in Ockham to minimize dissent. GBC has taken no apparent steps to correct the blatant falsehoods contained in 15/P/00012.

There is evidence which suggests that GBC has sought to predetermine the outcome of any enquiry into whether the site could be developed by advising the applicant on the timing of its application and by including it in the draft local plan as a site for removal from the Green Belt without showing any exceptional circumstances justifying its removal. The applicant in 15/P/00012 cites the inclusion of the site in the draft local plan as itself being an exceptional circumstance. It would appear the GBC also believed that the mere inclusion of the site in the local plan was a sufficient exceptional circumstance.

**Advertising campaign**

Subsequent to the refusal of 15/P/00012 WPIL has run an advertising campaign in the local press in particular in the Surrey Advertiser. It has also run trailers in local cinemas (eg The Ambassador Cinema in Woking) promoting development the site for a new town. The same false and misleading information which WPIL used in planning application 15/P/0012 and on its website is repeated. The advertising campaign is intended to sway public opinion and presumably to influence borough councilors and the planning committee which may in the future be required to adjudicate another planning application.

**Complaint**

The factual basis on which this site has been promoted for inclusion in the local plan as set out by the applicant in its promotional material and its website is materially false in a number of very important respects. GBC has done nothing to insist that these errors of fact are corrected. Its impartiality as a planning authority is in doubt. I attach my recent complaint to the Advertising Standards Authority about the advertisements appearing in the Surrey Advertiser (attached). I am concerned that GBC has been swayed by a number of these false claims. In particular it has gone from a longstanding position that the site was not suitable for development to seeking to assist the developer have the site removed from the Green Belt. My complaint to the ASA would not have been necessary if GBC had upheld the standards of probity in planning applications and planning matters generally that the public has a right to expect.

[1] See Attached History of former Wisley Airfield

Objection to the systematic promotion of this site for development by the owners and Guildford Borough Council on the basis of false information.

Policy A35 proposes Land at the former Wisley airfield in Ockham as a Strategic Development Site for a new town. The town is to comprise some 2,000 houses and would be the third biggest settlement in the borough.

In order to develop this site the owner has persuaded Guildford Borough Council (GBC) to propose the removal of the land from the Green Belt. It has pursued this policy of courting GBC since 2007 when the current owner purchased the site for some £23m.

**History of the site:**

The site has been farmed for many centuries by tenants of the Ockham Park Estate - which was originally owned by the King family. During WW2 the site was acquired by HM Government for 'war time purposes' on the understanding that it would be returned to its former agricultural use after the war. During the war in 1943 a grass airstrip was created on the land which was used to fly out aeroplanes being built by Vickers in its factories at Brooklands. Agriculture continued around the grass airstrip during the war. After the war Vickers continued to build aeroplanes at Brooklands and requested an extension of the lease. Aeroplanes propelled by jet engines caused the grass runway to catch fire and so in about 1952 a concrete runway was put down. Vickers was subsequently subsumed within what is now BAe and all flying ceased in 1972. In 1980 the government sold the land back to the inheritor of the Ockham Park Estate for its agricultural land value (some £300,000). Permission to re-use the aircraft hangars for intensive farming purposes was refused. Later an application to create a private airport was the subject of a long public enquiry and was also refused. GBC and sec both opposed all applications to develop the land. All the buildings were removed prior to the sale back to the pre-war owner. The whole site is within the Metropolitan Green Belt. The original lessees whose leases were annulled during the war never recovered the land which they had formerly leased.

**Current ownership:**
In 2007 a Jersey company called Wharf Land Investments Ltd purchased the land from Legal and General. The land parcel comprised some 114.7ha. Of that area some 63ha is good quality agricultural land - of which some 45.4ha is 'Best and Most Versatile' land. Some 24.6ha is non agricultural land - comprising scrub, woodland and grass. Some 27.1ha comprises the concrete runway and former hangar area. Of the 27.1ha of concrete some 17ha has been set aside for the Surrey Waste Plan. Therefore only 10ha of the concrete area within the site can be considered to be 'brownfield' or previously developed. Oha out of 114.7ha constitutes less than 10% of the total area. Moreover of that Oha a significant proportion stands within 400m of the Special Protection Area for endangered species at Ockham and Wisley Commons and therefore may not be used for new residential housing.

The new owners were well aware of the land's Green Belt and agricultural land designations when they purchased. An Agricultural Land Classification was carried out in August 1979 and is filed at Natural England. It shows all the agricultural land as Grade 3a and 3b. A more recent classification filed with planning application 15/P/00012 provides more detail and shows a proportion of the land as Grade 2.

Once it acquired the land Wharf Land, owned by Douglas Maggs and David Mellor (the former Conservative Cabinet Minister), set about achieving a change of use of the land. It applied for planning permission to build a waste composting facility, which was granted on appeal in 2010 subject to a list waste per annum, the number of lorry movements and the hours of use. This development was never actioned by Wharf Land but was not allowed to lapse after some soil was imported to the site in the week before expiry of the permission.

Wharf Land was sued in Jersey by one of its investors for making ten payments amounting to some £1.5 million to persons unknown without providing any details. The largest payment exceeded £1 million and was paid to a Gibraltar company called Shoehorn Ltd. Disclosure of the parties to whom the payments were made were never disclosed after shareholders voted to approve the transactions. Whether any of these payments were ultimately received as inducements for working towards a change of use of the land is not known.

In 2013 Wharf Land was sued in the High Court in England by a Russian investor called Lisitsin. The court awarded Lisitsin some £1.4 million in damages and the judge said the defendants were 'knowingly complicit in fraudulent misrepresentation'.

Before the trial had concluded Douglas Maggs put Wharf Land into administration. Its assets were acquired by a new Caymans company called Wisley Property Investments Ltd, (WPIL) the current owners. The ownership of WPIL is not disclosed but is thought to include Lisitsin and RAB Capital Special Situations Fund, a hedge fund. GBC has refused to exercise its right to enquire into the ownership. WPIL is represented in England by Mr Michael Murray, a Conservative Councillor at the Vale of White Horse in Oxfordshire, where he is responsible for their local plan.

WPIL has put in a number of planning applications. Two planning applications sought permission to use the land to make films. One was withdrawn by the applicant after very considerable public protest. The second was refused, appealed and refused again on appeal. The latest application, in December 2014 was for a new town of 2,100 houses. The application was held open for an entire year while further information was collected and finally submitted in December, 2015. The application was finally heard by the planning committee in March, 2015 and unanimously rejected.

**Factual misrepresentations by the applicant**

WPIL has consistently repeated a number of gross factual inaccuracies regarding this site. It has claimed that the site is poor quality agricultural land. Application 15/P/00012 states that the agricultural land is Grade 4, whereas it is in fact all Grade 3 and above. The application states that the site has 'permissioned access to the A3'. At best that is misleading and at worst it is a deliberate lie. The site has no access to the A3 for a new town of 2,100 houses. Such permission as it has for a waste processing facility is hedged by 23 conditions which limit hours of access and numbers of lorries per day. The applicant has claimed that the site has good connections to railways, whereas it is about as far from railways as it is possible to get in this part of Surrey. The claim that it is possible to cycle to Effingham Junction station in six minutes is demonstrably false. These and other bogus claims are made in planning application 15/P/00012 despite the application containing a statement as to the truth and accuracy of its details.
Role of GBC

It may be expected that an applicant might promote its site with ‘no holds barred’ because of the very substantial development profits at stake - possibly in the region of £500 million. As the local planning authority performing a quasi judicial role it might be expected, however, that GBC would have taken a more fastidious approach to the facts. However, GBC has been far from impartial. Mr Murray participated in public roadshows to promote the draft Guildford Local Plan. GBC included this site in both the Issues and Options Paper and in the draft Local Plan - led my the former Lead Member for Planning, Ms Monika Juneja who was subsequently convicted of forgery and fraud in relation to her professional qualifications. WPIL paid GBC for pre-application advice. Minutes of meetings with WPIL’s adviser, Savills, to the extent that they have been disclosed, reveal that GBC advised WPIL to conduct public meetings in Guildford rather than in Ockham to minimize dissent. GBC has taken no apparent steps to correct the blatant falsehoods contained in 15/P/00012. There is evidence which suggests that GBC has sought to predetermine the outcome of any enquiry into whether the site could be developed by advising the applicant on the timing of its application and by including it in the draft local plan as a site for removal from the Green Belt without showing any exceptional circumstances justifying its removal. The applicant in 15/P/00012 cites the inclusion of the site in the draft local plan as itself being an exceptional circumstance. It would appear the GBC also believed that the mere inclusion of the site in the local plan was a sufficient exceptional circumstance.

Advertising campaign

Subsequent to the refusal of 15/P/00012 WPIL has run an advertising campaign in the local press in particular in the Surrey Advertiser. It has also run trailers in local cinemas (eg The Ambassador Cinema in Woking) promoting development the site for a new town. The same false and misleading information which WPIL used in planning application 15/P/00012 and on its website is repeated. The advertising campaign is intended to sway public opinion and presumably to influence borough councilors and the planning committee which may in the future be required to adjudicate another planning application.

Complaint

The factual basis on which this site has been promoted for inclusion in the local plan as set out by the applicant in its promotional material and its website is materially false in a number of very important respects. GBC has done nothing to insist that these errors of fact are corrected. Its impartiality as a planning authority is in doubt. I attach my recent complaint to the Advertising Standards Authority about the advertisements appearing in the Surrey Advertiser (attached). I am concerned that GBC has been swayed by a number of these false claims. In particular it has gone from a longstanding position that the site was not suitable for development to seeking to assist the developer have the site removed from the Green Belt. My complaint to the ASA would not have been necessary if GBC had upheld the standards of probity in planning applications and planning matters generally that the public has a right to expect.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)
The evidence base is in many respects out of date. The SNCI and Landscape Character Assessments both date from 2007. Neither address the critical strategic sites in this local plan. They are therefore almost useless. The HRA was commenced after the first draft was issued and remains superficial and incomplete. Again it does not address the critical strategic sites in the local plan. It sweeps these aside with *ex cathedra* comments that the HRA is not relevant to issues such as the Green Belt. The Thames Basin Heaths document had actually expired - running out in 2014. Instead of re-visiting the issues the Council simply re-dated it. The engagement with Natural England has been superficial - and simply seeks NE's endorsement rather than seeking to form an authentically evidenced and reasoned perspective.

The Green Belt and Countryside Study is out of date. Moreover it was commissioned with an explicit intention to roll back the Green Belt to facilitate the political intention to turn Guildford into a 'growth hub'. The underlying workings for the demographic growth projections are not included - ie the model is not disclosed. This non disclosure has been justified on the grounds that the information is 'commercially sensitive' (to the consultant) and that the consultant has 'intellectual property' in the model. Neither statement is evidenced, challenged or tested - despite being so implausible as to have no credibility whatsoever.

Such evidence as has been produced has typically been produced by third party consultants as a 'box-ticking' exercise. Councillors themselves do not appear to have got to grips with the issues - they merely wish to be advised by so-called 'experts' so they can have an easy life and enjoy power without responsibility.

1. The Council's choice of certain strategic sites was determined several years ago. In the interval it has sought only to justify the choices it made then. This amounts to predetermination. The developer purchase pre-application advice. Over the course of the advisory period (several years) GBC succumbed to 'regulatory capture': [https://en.wikipedia.org/wiki/Regulatory_capture](https://en.wikipedia.org/wiki/Regulatory_capture)

2. Changing Green Belt boundaries prejudices the property rights of property owners whose property is 're-allocated'. Instead of addressing this serious issue in a professional and disinterested manner, GBC has acted to promote the interests of developers and shown complete disregard for anyone whose property rights have been prejudiced. This is evidenced by a complete failure to i) write to the property owners affected, explain the significance of the proposed changes and seek comment/opinion ii) set out the exceptional circumstances which justify the Green Belt changes iii) justify the new Green Belt boundaries. The local plan does not explicitly address these issues. Instead it merely refers readers to a large scale and rather inaccurate map.

3. Rather than put together the evidence in advance of public consultation and reach a properly documented conclusion GBC has gone ahead without gathering all the necessary information -such as a Transport Plan. It has left itself the opportunity of changing the local plan as new evidence comes in. That makes a mockery of the consultation.

4. [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature] This proposal appears to run contrary to established legal precedent eg the COPAS and Carpets of Worth cases.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

NOT sound

1) out of date or irrelevant evidence base
2) secret undisclosed evidence eg model behind the OAN workings
3) failure to set out the proposals clearly in terms the public can understand eg no summary of how the OAN was arrived at
4) failure to apply ANY constraints to the OAN
5) political predetermination outcomes ie selection of certain sites several years ago under the Mansbridge/Juneja leadership
6) failure to set out the exceptional circumstances justifying removal of sites from the Green Belt

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)
NON COMPLIANCE

1. failure to collaborate with Elmbridge regarding the implications of choosing site A35 which stands on the Elmbridge border

2. failure to complete traffic studies in collaboration with SCC and HE

3. failure to disclose details of collaboration with SCC and HE over highways matters - the so-called 'mitigation' for the effects of the exaggerated housing proposals

4. failure to collaborate with Woking and Waverley on the SHMA. Neither Woking nor Waverley have a copy of the demographic housing model prepared by Justin Gardner Consulting. Without the model there can be no meaningful dialogue let alone 'collaboration'

Comment ID: SQLP16/471  Respondent: 8749121 / George Paton  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 5: The examination

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

1. Why has the demographic model commissioned using public money from Justin Gardner Consulting for the SHMA not been FULLY disclosed to the public. Without it the manner in which the OAN has been arrived at is opaque. The SHMA model is a black box and the calculations are incapable of replication by third parties. It therefore fails to meet the most basic test of objectivity.

2. Why has the sustainability of the strategic development sites in the local plan not been publicly examined, scrutinised, challenged and tested? Why in particular has a site in the middle of the parish of Ockham - the second least sustainable parish in the borough according to the settlement hierarchy - been selected for the site of a new town which will be the third largest settlement in the borough?

3. Why have the exceptional circumstances justifying the moving of Green Belt boundaries - in particular in Ockham - not been properly set out and justified in the local plan?

4. Why has my garden hedge been chosen as the new Green Belt boundary in Ockham? How is it a defensible Green Belt boundary? How does it satisfy the requirement to be permanent and defensible?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

The propaganda video on the GBC website promoting the local plan is a disgrace. It would never pass any test of impartiality. It is flagrantly biased. Like the local plan the video is a developer's charter.

The Green Belt and Countryside Study is likewise completely unprofessional. The evidence base is a collection of consultants' reports many of which the Council has never scrutinised. The supporting models in many of these reports - eg the SHMA and Transport Assessment have not even been properly appraised by council officials.

The conduct of the local plan has been directed to serve the narrow interests of the Executive of the Council which has extraordinarily proposed a new Green Belt in Ash whilst destroying Green Belt elsewhere.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Ash and Tongham

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Ash Vale is full. Apart from the Keogh barracks site, which is brownfield anyway, there is no more room in Ash Vale for any further developments.

Unfortunately the proposals put forward in the plan indicate that any remaining green area in the Ash Wharf ward (which isn’t much) is designated to be built over with great swathes of Ash South and Tongham going the same way. The only saving grace is the proposal at policy P2 (4.3.17) to extend the Green Belt boundary between Ash Green village and the Ash South and Tongham urban area to prevent coalescence. However disappointingly there is nothing proposed to prevent further coalescence of Ash South and Tongham, the latter until recently having been an entirely separate village. In fact it still retains its own Parish Council. It would have been pleasing to have some attempt made to allow Tongham to retain its own individual identity and not just for Ash South and Tongham to be amalgamated as part of the urban sprawl which the area is fast becoming. It appears that what the plan is indicating is that the urban area of Ash South and Tongham (which includes the fast dwindling green space remaining in Ash Wharf ward) will ultimately begin from Harpers Road and extend right through Ash and Tongham almost as far as the Blackwater Valley relief road.

Specifically with reference to Harpers Road there has until now been a small community of residences which are part of Ash but which are somewhat separate from the main urban area – a sort of tiny “village” on the outskirts of the Parish. It would appear that this small pocket of individuality will ultimately be lost if this part of the strategic site at A29 remains as it stands. Whilst it could be argued that this should not stand in the way of development it is disheartening that this housing microcosm could not be protected to some degree.
Until the advent of the NPPF the Ash area maintained some protection from development having been designated as Countryside beyond the Green Belt. Once the NPPF came into existence the protection ceased to have any meaningful application and Ash and Tongham became the target for a multitude of development applications (see below).

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Reference Policy 11 – Infrastructure, page 108 et seq

Also with regard to sustainability it should be mentioned that of the homes which have already received approval no CIL contributions have been received due to the lack of an up to date plan. Consequently no funds have been made available to provide/maintain necessary infrastructure. Policy 11 at 4.6.1 of the Plan states “We will use CIL receipts towards providing infrastructure to support development and will facilitate the spending of up to one quarter of CIL receipts originating from each Parish........on local priorities to support development”. It seems that to a greater or lesser extent - no doubt the former – Ash and Tongham will already have been disadvantaged in this respect due to the recent wave of planning applications received and approved. Obviously no retrospection would be available but it does seem grossly unfair that by taking an early hit with developments the area is not benefiting in any meaningful way. However there may be scope for redressing the balance somewhat with the implementation of the provisions of 4.6.7 regarding the use of CIL contributions by GBC “to increase the capacity of existing infrastructure or to repair failing existing infrastructure, if that is necessary to support development”. Further details of how this would work out in practice will no doubt follow in due course. Hopefully Ash and Tongham area will receive favourable consideration in this area when future developments come forward as they surely will. Presumably any such use of CIL contributions by GBC under these particular provisions will be additional to the allocation to the Parish Council of the “neighbourhood” portion referred to at 4.6.10.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Reference Policy P3 – Countryside, page 52 et seq

At 4.3.29 it states that due to “the sustainability of the area......... a further extension of the urban area, using some countryside (my emphasis), is allocated for development”. It is not some countryside – it is a substantial part of the countryside remaining in the area which is being earmarked for potential development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Reference Policy P4 – Flood risk and water source protection zones, page 55 et seq

With regard to the provision of SuDS paragraph 4.3.48 states that “to ensure effective use over their life course, the Council will require appropriate management and maintenance requirements to be put in place”. It would be reassuring to know what robust arrangements the Council has to enforce this requirement and who would actually be responsible for the management and maintenance once the developments have been completed and the properties sold. This is of particular importance in the Ash area where the potential flooding issue has been raised time and again as of great concern when planning applications have been considered.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Reference page 28 Table 1 (Planned Delivery between 2018 and 2033)

The table shows the following increase in homes in the area over the period of the plan:

- Ash and Tongham
- Ash and Tongham Strategic location of growth
- Village extensions (including Ash Green southern site)

2418
Since 2013 the following residential developments have been approved:

03/11/15  26 dwellings Spoil Lane
16/07/15  55 dwellings at Grange Farm
21/04/16  56 dwellings at Guildford Road
18/12/13  39 dwellings at The Croft
30/12/13  26 dwellings at Foreman Road
30/12/13  35 dwellings at Poyle Road
30/04/13  60 dwellings at Ash Green Lane West
20/03/14  400 dwellings at Ash Lodge Drive
15/06/16  55 dwellings at Spoil Lane
14/06/16  21 dwellings at South Lane
May 2016  7 dwellings at Wandle Close

Possible and, no doubt, probable:

Under immediate consideration and recommended for approval by GBC:

58 dwellings at Warren Farm
11 dwellings at rear of 57 Manor Road, Tongham

Currently under appeal with the Planning Inspector:

6 dwellings at South Lane

It is possible that not all of the developments approved in recent years have been included above but if just those shown are added up a grand total of 849 dwellings is achieved (this excludes the application at South Lane currently with the Planning Inspector).

If this inordinate amount of development already agreed for the area is considered against the numbers put forward in the draft plan, Ash and Tongham is already well on the way to satisfying their allocation and the Plan hasn’t even been finally agreed yet! This comment is of course based on the premise that the figures mooted in the Plan do actually take into account the developments, or at least some of the developments, mentioned above and that the area will not be expected to absorb a further 1,300+ dwellings up to 2033.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

</tbody>
</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
• Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015
• 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays

Surrey Fire and Rescue deployed.

2016
• 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
• 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
• 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size. Electricity supply is also inadequate and would require a big infrastructure development.
The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY A43 AND A43a – Garlick’s Arch**

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.
I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)
Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

| Answer (if comment is on questions 1-7 of the questionnaire): () |

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

| Answer (if comment is on questions 1-7 of the questionnaire): () |
I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and
general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy E5 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable
forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”
The wording of the policy is far too wide and drives a coach and horses through all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations were available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/12309  Respondent: 8749473 / Charlotte Beckett  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause...
greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.
Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from...
the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Comment ID: PSLPP16/12302  Respondent: 8749473 / Charlotte Beckett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/12299  Respondent: 8749473 / Charlotte Beckett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be
taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )
I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible
change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brownfield sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as III as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as III as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:
1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

1. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

2. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

3. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

1. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

2. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

3. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars

Page 2442 of 3335
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.

7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.
Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to OBJECT to the Local Plan which is currently out for consultation. I will be writing to OBJECT to various sites but my attention has been drawn to one aspect of the New Local Plan which I find particularly insidious. That is the re drawing of the Green belt around East and West Horsley villages. I believe that the intention of redrawing the boundary is so that more housing can be built within the villages so it cannot be said (by developers etc) that the building is within the Green belt. In my opinion this is verging on the dishonest. There is absolutely no need to change the boundaries in the way proposed.

Please record my objection.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Re: Guildford Borough Proposed Submission Local Plan (“Draft Local Plan”) – reply to consultation

I am writing to OBJECT to the Draft Local Plan (DLP). I OBJECT to many of the proposals in the latest Plan but the fact that I have not specifically objected to a policy set out in the Plan should not be taken as my agreement to that policy.

General observations

As a resident of West Horsley my over-arching objection to the DLP is the fact that if the DLP is adopted it will result in houses being built on land which is part of the Green Belt. In my view this negates all that the Green Belt represents, namely an area around London designed to prevent over development. The Green Belt was instituted precisely to prevent the kind of development being proposed by the DLP.

I draw your attention to the letter dated 18th June 2014 from Nick Boles MP (Parliamentary Under Secretary of State (Planning) to our MP, Sir Paul Beresford, in which the Minister states that the Government has an on-going commitment to national Green Belt protection, reflecting what Ministers have regularly told Parliament. The letter states that the national policy on the Green Belt is set out in the National Planning Policy Framework (NPPF). The NPPF makes clear that “most development in the Green Belt is inappropriate and should be approved only in very special circumstances. Planning guidance, updated in March 2014, also states that “unmet housing need (including traveller sites) is unlikely to outweigh the harm to the Green Belt to constitute the very special circumstances justifying inappropriate development in the Green Belt”.

I also commend to your attention the paragraphs from the NPPF referred to in that letter which state that when plan-making, Local Plans should meet objectively assessed needs, unless specific policies in this Framework indicate development should be restricted; these policies include the Green Belt and AONB. My emphasis.

Furthermore Paragraph 17 of the NPPF notes that “the core planning principles that underpin plan-making include both protecting the Green Belts and recognising the intrinsic character and beauty of the countryside”.

There are other paragraphs referred to in the letter which point to the need to retain the Green Belt as currently defined. Paragraph 80 notes the various purposes of the Green Belt in particular assisting in safeguarding the countryside from encroachment.

I am happy to provide a copy of this letter in the (unlikely) event you have not had the opportunity to peruse it.

Insofar as the DLP proposals involve building additional houses on greenfield sites within the Green Belt they drive a coach and horses through the objectives of the Green Belt.

OBJECTION: Insetting of villages and moving of greenbelt boundaries

The removal of the village of West Horsley from the protection of the greenbelt is to be deplored and I OBJECT to this proposed action. Furthermore I object to the moving of the existing green belt boundaries to take land outside the greenbelt when currently it enjoys green belt protection. In my view the latter proposal borders on deceitful being intended to facilitate development in the existing greenbelt as it frees what is currently protected greenbelt land from protection. I can see that in some limited cases it is sensible to move the boundary to ensure that part of a person’s garden is either wholly inside or wholly outside the boundary but I do not agree that whole fields should be taken outside the greenbelt boundary as they then become targets for developers. Accordingly, if one takes Silkmore Lane as an example, the existing greenbelt boundary protects all the green fields to the west of the Lane but if the greenbelt boundary is moved as proposed, a large area of the fields will lose their greenbelt protection. That is also the case behind allocated site A37 where the effect of moving the greenbelt boundary is to open up more of site A37 to development.

OBJECTION: The GLP Housing proposals lack proportionality.
Research by West Horsley Parish Council indicates that the majority (about 75%) of housebuilding proposed by GBC will take place on Greenbelt land in the Eastern and Western rural areas of the Borough. The remaining 25% of building will take place on brownfield and urban land in Ash and Tongham together with Guildford town centre. This use of greenfield land instead of using brownfield land is disproportionate. I object to this “skewing” of building on previously greenfield sites when it is not clear that brownfield sites in rural areas have been given sufficient prominence. It is well known that developers prefer to build on greenfield land and I suggest that GBC are deliberately choosing greenfield sites (in the greenbelt) in order to facilitate developers at the expense of the lives of residents.

A further OBJECTION on the grounds of proportionality is that the proposals from GBC will involve an increase of 35% of new homes in the village of West Horsley. A huge increase in itself but again disproportionate when compared with the much smaller increase in housing in Ash & Tongham (16%) and Guildford Town (11%). Putting those percentages into figures, it is worth noting the enormity of GBC’s plan – 533 houses on large sites in the Horsleys, 60 houses on small sites in the Horsleys, 2000 houses on Wisley Airfield, 400 houses on Burnt Common and 2000 houses at Gosden Hill Farm (on the A3 this side of Burpham).

This makes a total of 4,993 houses within a 5-mile radius of Horsley, not including many smaller sites in nearby villages!!! At the moment there are 2808 houses in the Horsleys (EH 1697, WH 1111). The implications of these numbers are staggering and in my view show the lack of proportionality in the proposals. As a former lawyer I suggest that these numbers alone make the proposals in the plan capable of being challenged in Court.

OBJECTION: The housing numbers put forward by GBC are not accurate and are far in excess of what may be required, especially in a “post-Brexit” environment.

It seems to me that the starting point for deciding how many houses should be built is the figure determined by the objectively agreed housing need (OAN). Work carried out by GL Hearn on behalf of GBC to calculate the OAN came up with a figure of a housing need of 693 houses per annum over the period of the Plan. However the work by the Consultancy, NMSS, commissioned by the Guildford Residents Association has come up with a figure of 510 houses per annum. This figure is significantly less than the figure advanced by GBC. If the NMSS figure is more robust than the GL Hearn figure, I suggest that further work needs to be done by GBC to arrive at a figure for OAN on which we can all agree.

The housing figures being used by GBC have never been the subject of proper debate by Councillors nor “stress-tested” by other independent consultants. The Leader of the Council does not appear to countenance the fact that the GL Hearn figure is wrong or indeed needs review.

Such work that has been done (see Councillor David Reeves letter with attached report) to Councillor Paul Spooner of 4th July 2016, indicates that a much lower figure for new houses than GBC propose, is required. This work is consistent with the work done by NMSS.

OBJECTION: Roads and Transport Infrastructure: Sustainable transport for new developments

The expansion of the houses in the village of West Horsley by a figure of 35% is not sustainable. There is only one shop, no post office and a very limited bus service through the village on weekdays only – the village cannot accept high volumes of new housing development of the scale of that proposed.

Even with the present levels of housing there is excessive traffic travelling through the village at peak times. The areas around the schools (Raleigh, Glenesk and Cranmore) are particularly busy with the “school run”. The proposed increase in development will put even more pressure on schools and medical services which are already stretched.

There is no mention of the provision of additional schools, roads and transport for West Horsley which development on the scale proposed requires.
Whilst Horsley station has frequent trains to London and Guildford 7 days a week there is an inadequate number of parking spaces at the station with the car park often being full during the week. An increase of housing in the villages of East and West Horsley will increase pressure on station parking and traffic movements to and from the station. Getting to the station is difficult at the best of times as Glenesk school is on the main road leading to the station and people dropping off children at the school frequently block the road thereby adding to the traffic congestion. An increase in development will only make this situation worse.

The number of extra cars on the roads which would result also means an increase in undesirable exhaust emissions.

**Affordable homes**

The proposed development of 385 homes on the allocated Green Belt sites at much higher densities than currently exist in the village settlement would be totally out of character with the existing mix of different housing styles and layout of the village.

The so-called need for new houses in West Horsley is not proven – the 2014 Housing Survey carried out by the West Horsley Parish Council showed a limited need for up to 20 affordable homes for local people who want to remain in the village. Those are young people and also older people who want to downsize to a smaller property. The definition of “affordable housing” is that the price of an “affordable house” should be 80% of the market value. Given that the average price for houses in the Horsleys must be close to £1 million, it is difficult to see how building even “affordable housing” in the Horsleys is going to solve the housing shortage.

**Where are the jobs?**

I note that GBC has not identified any jobs for West Horsley. When I looked at GBC’s maps at the Horsley Cricket Club event in 2014, I noticed that the jobs were west of Guildford. It seems to me that housing should be concentrated in the areas where there are jobs. Building houses in West Horsley will exacerbate the traffic congestion and pollution as workers will need to drive from the villages to get to work. Furthermore, residents who work away from their homes will create dormitory clusters which will be of little value to the village.

**Jobs – chicken and egg**

As I understand the reasoning behind the need for more housing and what drives the housing numbers, is the quest for more economic growth. But there is a fundamental flaw in the GBC thinking which is that a proportion of the jobs identified by GBC comes from the construction of the new houses. And it is these jobs which are responsible for increasing the figures quoted as Objectively Assessed Housing Need. A true “chicken and egg” situation.

**Who gets the benefit of these proposals?**

It is not clear to me why this plan has been drawn up in the way it has. It is difficult to see a more destructive approach to our countryside. I suggest that the only people who will benefit from the developments proposed by GBC are the developers!

No one in the villages will benefit one iota! Quite the contrary – our lives will be made a misery both while the development takes place and when it is finished. There is nothing in the DLP which gives me or my family any benefit whatsoever. I am left with the clear impression that this whole exercise is being done for the glorification of the Council and to help developers make money. Indeed, the whole thrust of the Council’s policy is wrong – we should be developing business and jobs in areas of the country which require regeneration and whose infrastructure can handle increased development.

**Conclusion**

I very much hope that you will take my objections into account when you consider why and whether it is necessary to build on green field sites which will break up the Green Belt as it is currently drawn.

I am not opposed to all development but I feel strongly that if you build on the countryside as we know it, future generations will no longer have it to enjoy. Once it is built on it is gone forever.
Please let me know if I can be of further assistance.

**Answer (if comment is on questions 1-7 of the questionnaire):**

---

It is proposed that the village of West Horsley will be inset into the Green Belt thereby leading to development within the village which will affect the character of the village and mean more building within what is presently Green Belt. Such developments are unlikely to lead to homes which young people will be able to afford to buy as builders want to build “executive” homes. Such houses will simply encourage more overspill from London.

I object to the village of West Horsley being inset in the way proposed by the draft Local Plan.

I also object to the “straightening” of the boundary behind the houses on the west side of Silkmore Lane. This will take out of the protection of the Green Belt all the paddocks behind the houses on the west side of Silkmore Lane and open up this area for development. Such development will spoil the rural character of the area and impinge on the environs of Hatchlands, a National Trust property. It will have a deleterious effect on the view from Ripley Road and ruin the landscape for no good and valid reason.

**Answer (if comment is on questions 1-7 of the questionnaire):**

---

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location.
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   - The associated traffic increase from the RHS has not been taken into account.
   - The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account
8. There is insufficient employment available onsite or nearby so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
10. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”
11. Opportunity (3) should be common to all sites and is not unique to this site
12. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm, negatively impacting the setting of this building.
13. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
14. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16)
15. I object to the removal of additional 3.1 ha from the green belt without any justification
16. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact
17. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3
18. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
19. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees. It is outrageous that local public opinion is being ignored in this way.
20. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
21. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
22. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
23. I object to the extension of the plan period by 1 year as it has not been identified as a major change
24. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
25. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
26. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
27. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
28. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
29. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
30. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.
31. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
32. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.

33. I object to the quantity of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

I consider for the reasons listed above and numerous other reasons that this plan is unsound and not fit for purpose. All in all I object to this development as I believe that there is is no justification for a development of this size in the Green Belt. There are no exceptional circumstances which justify the development.

I object to the proposed redevelopment of the Howard of Effingham and the proposal to build 445 houses in order to fund that redevelopment.

- A new school building should not be contingent on the wholesale loss of the greenbelt that was specifically designed to halt villages becoming joined into an urban sprawl. This development will effectively merge Effingham and Bookham into an urban conurbation.
- Schools should be funded through taxation and not used as a vehicle for profit
- The plan calls for the demolition of St Lawrence to allow for more houses - this school is a vital part of the village; its destruction in the name of profit would be shameful. GBC should remember that it represents the residents of the borough and not the interests of the private sector.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the new draft local plan inclusion of the Wisley Airfield development:

- The proposed scale of the site is out of all proportion to the surrounding area. It will in effect create a new town that will dwarf the existing village of Ripley.
- The impact on local roads of the additional traffic will be significant and negative in terms of congestion and pollution; the existing road network will not be able to cope. The impact on public transport will also be significant; the carpark at Effingham Junction is already full and will not be able to absorb the inevitable increase in demand.
- Residents of this new town will be situated adjacent to the A3 which means placing schools and houses in an area that will inevitably have poor air quality.
- This is clearly an attempt by GBC to meet a significant proportion of their designated building target in a single hit rather than organically place houses in a more sensitive manner.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly object to the Draft Local Plan for the following reasons

1/ The SHMAA is set at too high a figure for the needs of the Borough. The methodology used to arrive at this figure of 693 houses per year has not been revealed to public scrutiny and so cannot be a checked or even considered as a valid figure. Especially considering the previous house building figure which was half. Furthermore insufficient consideration has be made of constraints such as the high percentage of green belt within the Borough.

Answer (if comment is on questions 1-7 of the questionnaire): ()

5/ I object to the lack of infrastructure planning and funding. There are no committed funds to support healthcare, policing, road building or public transport in the rural areas proposed for new communities in the Plan.

6/ For the above reasons I object in particular to

a) allocation A35 Three Farm Meadows

b) allocation A43 Garlicks Arch

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

8/ I object to the lack of definition between this draft and the previous, withdrawn, draft. There is no clear indication of the changes to accommodate the 20,000 comments. The inadequate and often subjective documents tendered are full of inconsistencies such as the Green Belt and Countryside Study. We are given only weeks to study and comment on a huge amount of documents which GBC have had 2 years to prepare.

In summary this local plan takes no account of local needs (especially housing), local responses to the previous plan and disregards the imperatives of the Green Belt policies, the NPPF and Government advise on transparency and clarity. The fundamental premises upon which it is founded are factually incorrect, based on mysterious modelling and do not include any policies which do not fit its solution. To build an effective Local Plan on such poor foundations will ensure its collapse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/853  Respondent: 8750593 / Nigel Tyler  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Shalford (south)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the proposal, by Guildford Borough Council in the latest version of the Local Plan, to move the Green Belt boundary to exclude the fields behind Shalford Village Hall from the Green Belt. Under this proposal these fields would be included within the village settlement boundary. My reasons for objecting to this proposal are.

1. The expressed views of the local residents is to protect these fields from development and consequently they should remain within the Green Belt and outside the village settlement boundary. The Green Belt boundary has been in place for a long time and there is no valid reason to change it. Over 700 residents signed a petition last year objecting to the proposed settlement boundary change.
2. The land on which these fields are situated contributes to the open character of the village. Any housing development built on this land would tower over the village community facilities, as it is the highest point in the local area.
3. Access to this land is via Chinthurst Lane which is an already heavily congested, and in certain places single track, road.

I look forward to hearing from you and very much hope that there is no change to the Green Belt boundary and these fields remain within the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to Gosden Hill developement being in the Local Plan The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.
Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/4075  Respondent: 8751105 / Amanda Harris  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8582  Respondent: 8751105 / Amanda Harris  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8583  Respondent: 8751105 / Amanda Harris  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8584  Respondent: 8751105 / Amanda Harris  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8591  Respondent: 8751105 / Amanda Harris  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.
4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID:  PSLPP16/8589  Respondent:  8751105 / Amanda Harris  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

1. POLICY H3 – Rural Exception Homes

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

<td></td>
</tr>
</tbody>
</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and
with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

1. I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/8587  Respondent: 8751105 / Amanda Harris  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 &
M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and
the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

1. **I OBJECT to development in areas which are at risk of flooding (Policy P4)**

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**
Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan.

1. I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

2. I OBJECT to the Borough Wide Strategy (Policy S2)

a. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

b. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

c. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or
study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I have lived in Horsley for 20 years and I write to strongly object to the above proposed new local plan and in particular to the proposals to take land out of the green belt for future housing development in the villages East and West of Horsley.

This is completely unacceptable to everyone that lives in East and West Horsley, we treasure our village environment and it is completely unnecessary to seek to increase our village, by over 500 residential units against an existing supply of circa 1,000 residential units.

I have not met anyone in these villages who are in agreement with amending the green belt and it is simply unacceptable that this is even being considered.
It will have a devastating effect on our homes and our lives. Any consultations on these plans and the objection of local people should not be ignored.

You will be quite aware that the Horsley villages do not have the infrastructure or facilities for its population to be doubled. The one school is oversubscribed and it is already impossible to get an appointment at the medical centre.

The identification of the various sites has been undertaken in an incredibly unprofessional way with little thought to access/egress, topography or risks of flooding.

I therefore strongly object to your proposals. I would also stress the following:-

• Exceptional circumstances are required for any changes to Green Belt boundaries;
• Unmet housing need is not such a circumstance;
• Green Belt and AONB are reasons for not meeting objectively assessed housing need;
• These issues have been drawn to the Planning Inspectorate's attention.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Chinthurst Lane is not wide enough to accommodate more traffic. It is already busy and if we are to preserve the character of the roads and lanes that form the boundaries of this area we must avoid erosion of the private verges and common land which would be inevitable if attempts were made to widen it. Upgrading, widening and imposition of formal highways, street lighting and fences would suburbanise a rural part of the Village.

The fields were intended to be left for the benefit of the people of Shalford and the Local Community and were subject to covenants to that effect. It is believed these covenants were released by the parish council in the belief that Green Belt and AGLV status and that they were outside the settlement boundary would afford the requisite protection against development.

We have been informed that the intention is to designate the fields as “Open Space” however there is no definition of what this means and therefore it is impossible to consult on something where the consequences are unknown.

I am writing to object to the proposed changes to the Green Belt and the change to the Shalford Settlement Boundary with regard to the fields behind the Shalford Village Hall.

It is my view that the proposal to alter the Shalford settlement boundary to include this area is inappropriate and it would be better to retain the current boundary which follows clearly defined boundaries and ensure that this land and other open land is excluded from the settlement area.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I strongly oppose any development on these fields and am concerned that the proposed changes to their status would open the door to developers who might wish to build on them. These fields contribute to the open character of the Village. Due to the height of the land, buildings of any height would change the skyline of Shalford and tower over and detract from the enjoyment of the many users of the Tennis and Bowls Clubs and the Village Hall.

Answer (if comment is on questions 1-7 of the questionnaire): ()
This consultation process is not the first and residents in Guildford have been subject to a number of previous consultations in recent years. I do not believe that previous objections made about these matters have changed nor have they become irrelevant. I fear that on this occasion an element of consultation fatigue will have set in and/or people will feel that their previous objections will be taken into account. I therefore urge you to remember the petition signed by over 700 local residents objecting to changes to the settlement boundary and changes to the Green Belt that was sent to you in 2014.

Answer (if comment is on questions 1-7 of the questionnaire): ()

OBJECTION to the Proposed Submission Local Plan

I have considered the Proposed Submission Local Plan and once again find it entirely unacceptable. It is an unsubstantiated, aggressive expansionist proposal that would have a substantial impact across the region to the gross detriment to the residents of this borough. I support the details in the submission made by East Horsley Parish Council and offer the following additional comments:

The scale of development is disproportionate to the needs of the community and the assumptions on which it is based are fundamentally flawed, particularly following the recent decision to leave the EU and stem the levels of migration into the UK and the impact of negative economic growth forecasts.

On this basis I reject the ONS data as the assumptions on which it is based made are no longer valid and the projected population increases of some 15% for Guildford Borough over this period are grossly overstated.
Therefore the proposed scale of this building programme representing an increase of 25% in the housing stock is, at best, outrageous given also that the majority of it is within the Green belt in breach of planning policy.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to all of the proposals to make changes to boundaries and in particular those in regard to the Green Belt. I understand that NPPF rules state that Green Belt boundaries should only be changed in exceptional circumstances and none meeting this definition have been provided.

I strongly object to the proposal to inset East Horsley as it is a rural village that is pleasant to visit and makes a significant contribution to the character of the area and the Green Belt.

Finally I am very concerned about the belligerence of Guildford Borough Council’s planning department in continuing to favour such an aggressive expansionist policy that is to the gross detriment of the residents of this borough. To my knowledge this expansionist policy has not been made explicit by the council or any of its elected representatives and hence I do not believe that it has a sufficient mandate to support any part of it.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Environmental Impact of Proposed Housing in Horsley: Flood Risk

Building the large numbers of houses proposed in the Draft Local Plan will significantly increase the risk of flooding. I strongly object to the proposal in the Draft Local Plan for housing development in Ockham Road North, adjacent to Horsley station. This housing would be located in a floodplain. Housing on this site will adversely affect local drainage patterns, having a knock on effect further down the drainage basin. Increase in the volume of run-off due to paving over of arable land, coupled with higher incidence of flash-flooding caused by Global warming, will result in a greater frequency of abnormal fluvial discharge events, beyond the capacity of the existing drainage system. This will increase the likelihood of homes in the vicinity being flooded.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

The Impact of Additional Residential Housing and Population Increase on Local Facilities

I strongly disagree with the premise in the GBC Local Plan 2016 that Okham and the Horsleys are a suitable location for a large number of additional new houses. The housing numbers proposed for Guildford Borough are for 13040 homes over 15 years from 2016 to 2031. This number is too high. The number is based on a Strategic Housing Market Assessment (SHMA), which the council required to be amended by the Head of Planning. This amendment has not taken place and therefore the number of new builds proposed in the Draft Local Plan has no basis. I object to Guildford Council proposing a Draft Local Plan on the basis of flawed evidence.

As an inhabitant of West Horsley I know at first hand the existing population pressure on local facilities. The primary school in our neighbourhood (The Raleigh) is oversubscribed, in common with the local secondary school, the Howard of Effingham. Indeed, in spite of being a Horsley resident, I was not able to secure a place for my daughter in either school. The local medical centre is also filled to capacity. Residents of adjacent villages e.g., Ripley, East and West Clandon also use the centre. As a consequence, new residents to the village are known to register with alternative practices e.g., Bookham. In conclusion, the village services that currently exist in the Horsleys are already filled to capacity and do not have the facilities to accommodate the large number of new residents which would result from the increase in residential housing proposed in the Local Plan.
Impact of Increased Residential Population on Transport

An increase in the number of residents would result in a heavy increase in both construction-related traffic and subsequent traffic arising from an increase in local population.

Most residents of the Horsleys work outside the villages. They either commute into London or Guildford by train, or travel by road to places of work and education. There are very few indigenous employment opportunities in the Horsleys. Essentially they are commuter dormitories. The residents of proposed additional housing are unlikely to be employed in the immediate vicinity of the Horsleys. They will therefore join existing commuters travelling either by road or rail. Horsley station car park is already filled to capacity, and there is no option to extend the car parking facilities for the station. The land is not available for expansion. Likewise, at Effingham Junction, there is little land to spare for additional parking facilities. I would conclude, therefore, there is limited potential for additional commuters to park at the local stations and commute by train. I might add, that Horsley station already serves as a rail hub for adjacent villages (e.g., Shere and Ripley), resulting in heavy road usage at peak commuting time. The housing development proposed in the Local Plan will increase the traffic volume through the village, resulting in additional air and noise pollution.

Key road links to the Horsleys focus on the A246, from Leatherhead to Guildford, and additional rural (narrow and winding) roads linking the villages to Ripley, Cobham and the A3/M25. The A246 currently carries a very high volume of commuter traffic at peak periods creating bottle necks and traffic congestion at both the Givens Grove roundabout on the Leatherhead bypass, and the Merrow roundabout on the outskirts of Guildford. The A3 likewise carries a heavy flow of traffic both into Guildford and north to the M25 at peak hours, with stationary traffic a frequent occurrence. The construction of additional housing in a rural area, which by its location and nature, requires inhabitants to travel predominantly by car, will exacerbate an already congested road network. This will clearly have safety implications, as more congested narrow, rural roads will result in a greater frequency of road traffic accidents and undoubtedly loss of life. It will also increase traffic congestion in local employment hotspots such as Guildford, and Leatherhead.

It makes much more sense to redevelop brownfield sites in Guildford and Woking to accommodate additional housing needs. This would have the advantage of providing new residents with the option of using the existing public transport network, or walking or cycling to work or school. They would also have a full range of urban facilities on their doorstep.

In conclusion, I strongly object to the new housing proposals outlined in the Draft Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I would like to register objections to Guildford Borough Council Proposed Local Plan (June 2016) and inclusion in the plan of proposed multiple development sites in the Horsleys:

Urbanisation of the Green Belt

I strongly object to removal of the land areas in the vicinity of the Horsleys from the Green Belt. The Green Belt prevents urban sprawl and retains important wildlife corridors in proximity to the highly urbanized areas of outer London. It helps maintain clean air quality and provides recreational areas for urban dwellers from both Greater London and adjacent conurbations.

There are five legal reasons for protection of land assigned as Green Belt:

1. To check the unrestricted sprawl of large built up areas 2. To prevent neighbouring towns merging into one another
2. To assist in safeguarding the countryside from encroachment
3. To preserve the setting and special character of historic towns
4. To assist in urban regeneration by encouraging the recycling of derelict and other urban land.

The provision of the Green Belt in the vicinity of the Horsleys meets the criteria listed above. The National Planning Policy Framework (NPPF) requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Unmet housing need is not an exceptional circumstance in law. In addition the existence of the Green Belt/AONB is a reason for not meeting objectively assessed housing need (i.e., such protected land is a legal constraint against any such development). The proposed Local Plan has not demonstrated exceptional circumstances requiring additional housing in the vicinity of East and West Horsley.

Removal of Villages from the Green Belt

I strongly disagree with and object to the assumption made in the Proposed Submission Plan that it is reasonable to remove villages such as West and East Horsley from the Green Belt. It seems remarkable that a single act of Parliament by the current Government can undo the good work for the provision of the Green Belt and protection of rural England laid out in the Town and Country Planning Act of 1947. The rationale behind the need to protect rural areas in close proximity to ever growing metropolitan areas is more relevant today than ever, in light of the projected growth in UK population.

I object to the method of defining settlement hierarchy as described in the Proposed Submission Local Plan. In particular, I take exception to the "classification" of East Horsley as a "Semi Urban village" and question the basis for this classification. Horsley lacks most of the infrastructure and community facilities taken for granted in an urban area. The key charm and attraction of Horsley is essentially its rural character.

To accrete large numbers of new houses to the Horsley - Okham area would change the character of these ancient villages permanently, resulting in a detrimental impact on the environmental and village character. I therefore object to the proposed settlement boundary changes in East and West Horsley.

In summary, I strongly object to the proposal in the Proposed Submission Local Plan to take the following villages out of the Green Belt: East Horsley and West Horsley (North), Effingham, Ripley, Shere and West Horsley (South).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Site A28 (Land to east of White Lane, Ash Green) should be removed from the Local Plan since it violates the policy of maintaining a separation between the Ash urban area and Ash Green village. The geographic feature of the disused railway line forms a natural southern boundary for the Ash urban area and urban sprawl should not be allowed south of this line.

If a major development is allowed at this site, the separation is reduced to a couple of hundred metres, encouraging coalescing between the urban area and the village.

The access onto White Lane is also problematic, due to the proximity of the bridge over the disused railway line with its hump back zig-zag construction restricting sight lines for oncoming traffic. It is unlikely that an access could be constructed that would meet the Surrey County Council's Highways Department's requirements for 65 metres clear sight lines at 2 metres in from the kerb.

Also the trees forming the boundary between the proposed site and White Lane form part of the Ancient Woodland and they are all covered by a blanket TPO. Obtaining permission to clear these trees, which are part of the Green Belt, would be difficult.

The site should be included in the new area of Green Belt surrounding Ash Green village and should be used as open space (SANG) for the residents of the 1,200 homes proposed for site A29 to the north of the disused railway line.

---

Site A30 Ash railway new bridge scheme.

The section of Foreman Road between Grange Road and the railway station is narrow and has no footpath. It is extremely dangerous for the residents of Ash Green (and the new residents of homes to be build on site A29) to walk from their homes to the station.

The opportunity should be taken to use the new bridge scheme to construct a footpath along this section of Foreman Road. The site plan should extend southwards to the junction with Grange Road, to allow for this as part of the scheme. The cost should be covered by the developers of site A29.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I fully support the policy (4.3.17) of designating Green Belt between Ash Green Village and the Ash and Tongham urban areas to prevent coalescence. The geographic feature of the disused railway line provides natural boundary line for the southern extent of the Ash urban area.

Unfortunately the proposed Local Plan immediately violates the principles of Green Belt to prevent urban sprawl (4.3.11) by designating a major development site (A28) in what should be the area of separation. If this site is allowed to be developed, the separation between the Ash urban area and Ash Green village will be reduced to only a couple of hundred metres, encouraging coalescence.

Site A28 should be removed from the Local Plan and the area should be left as open space (SANG), to be used by the residents of the 1,200 homes proposed for the adjacent site A29.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I wish to comment on the proposed site A28 in the revised draft Local Plan.

1. The address of the site should be "Land to the east of White Lane, Ash Green." This area is and always has been Ash Green, not Ash.
2. The southern boundary has been moved south to include an area of ancient woodland in which every tree is subject to a TPO. Since it is inconceivable that planning permission would be granted for this area of ancient woodland, the southern boundary should remain along the northern edge of the woodland as shown in the previous draft.
3. The western boundary has been moved to the west of White Lane, thereby including the road in the potential development site. It also includes the line of trees along the eastern edge of White Lane. These are also part of the ancient woodland and all the trees in this strip are subject to TPOs. The boundary should remain to the east of this woodland as shown in the previous draft.

4. It is the stated policy in the draft local plan that Ash Green should be protected from the sprawl of the Ash and Tongham Urban Area by the creation of new Green Belt to the North and West of the village. This site violates that Local Plan principle and leave virtually no protection for the village from urban spread from the north.

5. If some development of this site has to take place in should to provide facilities for the village of Ash Green, including a village Hall. It should also be used to provide open space (recreational ground or SANG) for the developments around Ash Manor in site A29.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not believe that the evidence base is correctly calculated. The growth predictions for the borough are not in keeping with the rest of the country or the historical growth. There are assumptions that this areas MUST take this amount of growth and I do not agree that this is correct. The greenbelt policy clearly states that it should only be altered in exceptional circumstances and not where demand for housing is the only factor.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)
"the green belt should ONLY be altered in exceptional circumstances through the local plan process and with the SUPPORT of the local people" “Demand for housing alone will not change the green belt”.

It is clear from all local feedback in previous polls that there is NO support for this (apart from with borough councillors).

I believe that sites have been selected randomly according to the population count likely to object (high green belt = low number of people).

I believe that the rejection of previous applications e.g. at Wisley and elsewhere in the country show that this enormous change to the Green Belt policy is one which would require the courts to decide.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not believe that this plan in any way sound. I would challenge the proposed evidence base (much to large population count for this area), I would challenge the assumptions for infrastructure, even though the borough councillors stated that the infrastructure must come first at the recent council meeting, I do not believe that this would ever be the case and even with investment would not support the huge growth predicted for Horsley's, Clandon, Normandy, Send and Ripley.

The roads are currently under huge pressure (traffic and state of surfaces, speeds and parking), the schools are under huge pressure, Horsley have had a constant battle to remain part of the catchment for the Howard - their only local school, places are very tight already. The local health facilities are bursting at the seams, it takes days to get crucial appointments and I have just waited 10 hours at A&E for treatment.

I believe that the way in which this plan has made assumptions about "insetting" of villages and changing village boundaries then to propose building on green belt land is absolutely astonishing (stronger words would normally be required).

The new sites added in this recent plan to West Horsley have taken local people by surprise, many of my neighbours do not even know of the intention to do so. The nature of these changes proposed to East and West Horsley as well as Clandon would change our villages forever. We have a very strong village and enjoy green countryside, and chose to live here rather than Cobham or other villages which are built up and rapidly becoming additions to London.

The new site proposed for Garlick's arch appears to have been added without any consultation having listened to your recent borough council meeting. I was astonished to hear "its just ancient woodland so it will die out soon anyway". This is an areas of outstanding beauty and with this new site and access to the A3 we will decimate any of the beauty it currently has.
The site proposed for Wisley has already been rejected in recent proposals - mainly due to infrastructure. I consider this to be an irresponsible proposal considering its position, the current traffic, the proximity of small neighbouring villages whose character will be forever changed (and having only a small voice due to their small populations). Rail links although new ones are proposed will not fix the current overload on Effingham and Horsley stations and lack of carriages.

I am a local business owner, I do not believe that the proposals made in this plan are supportive of local businesses other than potentially retailers. Transport, infrastructure, delivery, halls and spaces to work, storage premises are all high on the list of my local business, these have all be provided to the development of the local Horsley plan, this has not yet been considered in this local plan. I wonder how the local people actually have a say in this process if this is the case?

My final point is about this plan process. I have spent hours listening to your borough meetings, with complete dismay. The local people voted for a council that would protect our Green Belt. I wonder where those people have gone? I was also dismayed at the behaviours of other councillors towards those who did try to respect this in your meeting by talking down and dismissing suggestions. I fear that this process is not in good hands, and not truly representing what the local residents require or support.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Please let us leave a green and pleasant legacy for our children. I strongly believe that in addressing the basis for the plan and identifying brownfield sites as well as business opportunities and transport opportunities this plan could be one that most could feel would deliver this.

It is my understanding that proposed changes will remove the field's current protected status and leave them more open for housing development.

I have been informed that professional Chartered Land Surveyors have undertaken measurements from various places to the fields behind the Village Hall. From the Village Hall to the fields there is a rise of over 25 feet and from King's Road it is over 32 feet. Add on to this houses of potentially 25 feet plus and it will be a very imposing development looming over the Common and Shalford as a whole and out of character with this part of Shalford.

The land surrounding the Shalford Village settlement boundary includes the Surrey Wildlife Trust beauty spot of Chinthurst Hill – any development on the land behind the village hall would be clearly visible from this area too and much of the area around the hill. This area not only provides beautiful walking paths and recreational areas for the local population, but also for walkers and nature lovers from all over the County.

As a resident I am particularly concerned about the increased traffic volumes that will result if access to future housing development is via Chinthurst Lane. The road is already used as a “rat run” during peak hours as drivers seek to avoid the extreme congestion on the main Cranleigh / Guildford road, backing up from the Shalford roundabout. Chinthurst Lane is single carriageway along most of its length and it is not designed to take the traffic it currently does, let alone additional vehicles. Recent redevelopment of the Railway station car park has also resulted in an increased number of cars parking down Chinthurst Lane during the day and reducing the width of the carriageway further.

This land contributes to the open character of the village and provides an attractive setting for the village's community facilities.

I believe that any development of this land would undermine the character of the village and also add to the pressures on the limited infrastructure that already exists.

Green Belt and AGLV designations are there to protect our beautiful landscape and to protect the open character of this land for the enjoyment of current and future generations, not to be withdrawn as and when the GBC deem appropriate. I am very concerned that if this loss of Green Belt and AGLV goes ahead, it will set a precedent for future development on AGLV in the heart of the village.
Shalford as a village, as we know it, will cease to exist if all the proposals for building go ahead. The essential nature of Shalford will be undermined, which conflicts with another Council policy of retaining the character of the villages that surround Guildford. These fields should remain outside the settlement boundary and remain green belt and AGLV designated.

As a resident of Shalford Village, living in Chinthurst Lane, I strongly object to the repositioning proposal and to any resulting planning application that may result in the development of housing on this Green Belt and AGLV land.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I’m writing to strongly object to the proposal to remove Chilworth from the ‘green Belt’. The whole point of the green belt was to prevent ‘urban sprawl’ and once removed the village would have no protection against development. The traffic problems getting in and out of the village currently are a nightmare so adding even more houses would render it virtually impassable at certain times of the day.

People move to the Surrey villages because they want to live in and enjoy the countryside and they pay a premium to do so, it’s very short sighted to think that by allowing development on the green belt and concreting over the countryside that people come here in large numbers to enjoy will somehow enhance the area, shame on you for even considering it.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing to express the strongest opposition to the proposals, set out in the recent Guildford Borough Council Draft Local Plan document, to support development of 533 new houses in Horsley, of which 385 will be within West Horsley. Additionally, I oppose the extension of the village boundaries for East and West Horsley, and removal of the village areas within these boundaries from the protection of the Green Belt. In addition, I object to the inclusion of the Wisley Airfield site as a potential development site.

I believe that the proposals are extremely misguided, and would be highly damaging to the existing communities of East and West Horsley. In addition, they are strongly opposed by the residents of the area, and therefore the plans are at odds with the localism agenda.

I am a Chartered Surveyor with 15 years experience in commercial real estate and over 4 years experience working in urban regeneration. As such, I have a clear professional understanding of the issues involved and also of the economics of development. I have lived in West Horsley for over six years and intend to be a long term resident, and therefore am deeply concerned about the proposals set out in the draft plan.

My opposition can be summarised under the following headings, which I will consider in turn:

1. Concern over overall level of housing development for Guildford Borough.
2. Disproportionate housing development for West Horsley, compared with other settlements in the Borough.
   1. Effect of the Proposals on West Horsley.
   2. Effect of the Proposals on the Green Belt.
   3. Effect of the Proposals on the Surrey Hills AONB.
   4. Specific Comments on Potential Development Area at Waterlooo Farm/ Ockham Road North.
   5. Views of the Local Community in West Horsley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Disproportionate Level of Housing Development in West Horsley.

Not only do I oppose the level of green field housing development for the Borough as a whole, I also feel that the levels of housing proposed for West Horsley are disproportionate. The draft plan proposes 385 houses in major sites at West Horsley, with another 148 in close proximity within East Horsley. Additional "infill" developments are also proposed. West Horsley is a parish of 1,111 homes, but there are only 723 houses within the main settlement area of West Horsley (ie within the village boundaries). Therefore, the proposals for major sites alone would add 53% to the housing stock of the village, and 35% to the housing stock of the parish as a whole.

This is grossly disproportionate and beyond the level proposed for other settlements around the Borough- and particularly for Guildford itself, which does not seem to be taking its fair share of the proposed development.
West Horsley Parish Council has carried out a Housing Need Assessment, which showed a requirement for just 20 affordable homes. The proposals are therefore totally out of line with the requirements of the local community.

**Effect of the Proposals on West Horsley.**

I believe that the plans would have a severely detrimental effect on the character of the village. Given the profits to be made by housing development within Surrey, once sites are designated for future development, that development will surely be brought forward quickly, and to the maximum density permitted.

Specific comments are as follows:

- Several of the proposed development sites (particularly Manor Farm, ref A3 8/ID 15 and East Lane, ref A41/ ID 2063) would have the effect of contributing to a merged settlement of East and West Horsley, when I believe that the open character of the countryside here should be protected by safeguarding the countryside along East Lane, Long Reach and Green Lane which continues to separate the two settlements and which contributes to the rural character of West Horsley. I understand that there is a proposal for the Raleigh School to develop a new site on the East Lane site, which again I object to for the same reason of impact on rural character.

- The suggested density of housing is totally out of character with the rest of West Horsley. Building to this increased density is particularly inappropriate in the peripheral locations which are planned for development.

- The proposed development sites are on the outer edge of the village and so would reasonably be expected to generate considerable additional traffic, as the development will be some distance from the station and the centre of the village. Anyone who has spent any time in and around the village could tell you that the network of rural roads and lanes which surround the village simply do not have the capacity to serve this level of proposed additional development, and any extension of the road network would not only destroy the character of the village, but also the surrounding roads which would continue to pass through Green Belt land.

- I have strong concerns over the capacity of infrastructure such as drainage and sewerage.

- Localised flooding and poor surface water drainage is already a significant problem in the area. I have witnessed first hand flooding along Ockham Road North, Green Lane and Ripley Lane. This has occurred on one or more occasions each winter in recent years and therefore is clearly not a "once in a decade" or "once in a lifetime" event. The fields planned for development must play a role in helping to drain this area, and additional development would both remove this drainage capacity and create additional issues of surface drainage.

- Additional development of any significant scale will cause significant strain on the village school and doctors surgery (the later located in East Horsley), which are running close to capacity. Adding extra capacity to these services cannot easily be resolved, even if possible through entirely developer funded schemes, without fundamentally altering the geographic make-up of the village as there is little or no land in the core of the village to accommodate any additional services. Developing these facilities on the periphery of the village (which as noted above is now proposed for a potential extension of the Raleigh School) would once again fundamentally alter its character and position in its rural context.

- East and West Horsley are thriving villages, which do not need artificial support through rapid expansion of population.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Views of the Local Community in West Horsley.

The strength of feeling throughout the village against the proposed relaxation of the planning guidance is considerable. This opposition is shared by all of the local residents that I have spoken to, as well as by the West Horsley Parish Council. I believe that the views of those who have chosen to make their homes within the community should be paramount when making decisions which will have such a radical and irreversible impact on the village.

Indeed my view is supported by recent planning guidance which supports greater involvement of local communities in the planning process. If localism is to mean anything, Guildford Borough Council should be listening to the views of the local community whose lives and wellbeing would be so adversely affected by the plans.

Removing East and West Horsley from the Green Belt, and encouraging additional development on such a scale would exclude and ignore the strong feelings of the local community.

Conclusion.

In summary, I strongly oppose the current drafting of the Guildford Borough Council Local Plan in relation to West and East Horsley. In particular, I oppose the removal of West Horsley and East Horsley from the Green Belt, the extension of the village boundaries beyond their current extent, and plans for 533 houses across the two villages (of which 385 are planned for West Horsley), all of which are at unsuitably high densities, out of keeping with the current character of the villages.

So far as I am aware, no 'exceptional circumstances' have been put forward, let alone proved, in order to justify this development in the Green Belt.

I feel that the plans for West and East Horsley contained within the Local Plan are inappropriate, and ill-considered and would be deeply damaging to our community.

I urge you to listen to the views of the local community and also to place more value on the exceptional quality of the rural spaces and villages of the Borough.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A40

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Specific Comments on Potential Development Area Ref A40/ID 975 (Land at Waterloo Farm/ Ockham Road North)

I am making detailed comments only about this site because it is in close proximity to where I live, and therefore I have a greater level of understanding of some of the detailed issues. I am sure that similar concerns will be raised by other locals in connection with each of the other potential development areas, and my opposition is to all of the potential development are as around West Horsley, as well as the redesignation of Green Belt Boundaries, rather than just this site.
With reference to this site, I believe that development on this site would cause an unacceptable increase in the risk of surface water flooding affecting existing houses in areas such as Ockham Road North and Nightingale Avenue. These are already designated as Flood Zone 2 and 3 (medium and high risk) as is part of this development site and as mentioned above, surface water flooding has been an issue here in recent years.

I also have concerns about how this site could be accessed. Both Green Lane and the current small access road to the Camping and Caravan Site do not provide good road access for a development of this size and junction access onto the Ockham Road would be dangerous. Any access through Nightingale Avenue (for example created by an additional access point at the North of the road) would also not be suitable. Once again, the junction onto Nightingale Avenue would not safely carry additional traffic, and the road network is already under particular strain during the school run. This route is also not suitable or safe for additional pedestrian access (and pedestrian access down Ockham Road North is also challenging as it requires crossing the road several times). At present there are no footpaths along Nightingale Avenue and it is not possible to widen what is a small residential road in order to allow safe access.

Whilst partially enclosed by housing, especially to the East, this site comprises pleasant fields which help to contribute to the rural character of the village, and to the semi-rural character of the housing stock along Ockham Road North. This proposed development would therefore sit on a gateway into the village. At present the village gradually becomes more developed as one drives down the Ockham Road and enters East Horsley, or turns into East Lane to continue through West Horsley. Significant development here, with attendant infrastructure such as highway improvements or pedestrian crossings, would significantly alter the rural context of the village by creating a far more stark and harsh boundary to the village.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Effect of the Proposals on the Surrey Hills Area of Outstanding Natural Beauty.

West Horsley is adjacent to the Surrey Hills Area of Outstanding Natural Beauty, which as you will be aware was designated in 1958 in order to preserve and safeguard the outstanding countryside for the benefit of all. As such, West Horsley forms an important part of the context for the AONB. The AONB boundary runs just to the South of the A246, within around 1 mile from the village.

The proposed inset of the village within the Green Belt means that further intensive development will be possible right up to the AONB boundary, and additionally the proposed development site adjacent to the "Bell and Colvill" Garage at West Horsley, for which 40 houses are planned, would bring unsuitable intense development to a site which is far closer to the boundary of the AONB, and which is adjacent to a site of Great Landscape Value.

Development on the scale proposed would have a significant impact on the AONB. Through changing the character of the surrounding landscape and increasing pressure on wildlife habitats, such development, both of the individual parcels identified and on the overall scale proposed in the plans, would reasonably be expected to give rise to additional traffic past and through the AONB which in turn would erode the character of the rural roads in the area, and have a detrimental impact on the AONB.

I feel that a more suitable approach would be to further strengthen the protections afforded to East and West Horsley and neighbouring villages along the A246 (including Clandon, Effingham and Bookham), rather than encouraging additional development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

As such, West Horsley forms an important part of the context or the AONB. The AONB boundary runs just to the South of the A246, within around 1 mile from the village.

The proposed inset of the village within the Green Belt means that further intensive development will be possible right up to the AONB boundary, and additionally the proposed development site adjacent to the "Bell and Colvill" Garage at West Horsley, for which 40 houses are planned, would bring unsuitable intense development to a site which is far closer to the boundary of the AONB, and which is adjacent to a site of Great Landscape Value.

Development on the scale proposed would have a significant impact on the AONB, through changing the character of the surrounding landscape and increasing pressure on wildlife habitats. Such development, both of the individual parcels identified and on the overall scale proposed in the plans, would reasonably be expected to give rise to additional traffic past and through the AONB which in turn would erode the character of the rural roads in the area, and have a detrimental impact on the AONB.

I feel that a more suitable approach would be to further strengthen the protections afforded to East and West Horsley and neighbouring villages along the A246 (including Clandon, Effingham and Bookham), rather than encouraging additional development.

Comment ID: PSLPP16/7318  Respondent: 8768161 / Adam Johnson  Agent:

Effect of the Proposal on the Green Belt.

I believe that it is vital to retain the integrity of the Green Belt within Surrey against development pressure. for the following reasons:

-Prevention of urban sprawl.

-Protection of valuable countryside.
- Green Belt aids urban regeneration by encouraging the reuse of derelict land within towns and cities.

- Provision of a valuable resource of open space to those living in London and other towns and cities.

Section 9 of the National Planning Policy Framework, published in March 2012 specifically states that "Once established, Green Belt boundaries should only be altered in exceptional circumstances". I cannot see why pressure to meet housing targets constitutes such an exceptional circumstance. The fact that the Green Belt is under such pressure to be developed is to me a sign that its protection should be enhanced, in order for it to continue to meet its original intention for future generations.

Recent research carried out by the CPRE shows that there are enough brownfield sites available in the UK to build 1,494,070 new homes, with the supply of these sites increasing. In this context, I would question the need for development on the Green Belt in any but the most exceptional case.

I know from direct experience within the real estate industry that there is a strong financial incentive to secure development rights and planning permission in the Green Belt because it is so much cheaper and requires less effort and skill, to develop a greenfield rather than brownfield site. In addition, developing greenfield land on the edge of existing settlements means that profits can be maximised by avoiding major investments in infrastructure which may be required in either brownfield or a true greenfield development. As a result of these financial drivers, I am sure that there will be powerful lobby groups intent on securing development rights, within the Green Belt of Surrey in order to maximise short-term profit. I cannot agree that this is in the best interests of the Borough as a whole.

The identified West Horsley development sites set out in the Document make a significant contribution to the open character of the village and its context within its rural surroundings and the Green Belt. The sites are generally located on the outskirts of the village, and so development upon them will affect the context and character of the village. When considering the effect on the Green Belt countryside of the area, there is a significant difference between infill development within the geographical boundaries of the village, and development significantly extending its borders.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to express the strongest opposition to the proposals set out in the recent Guildford Borough Council Draft Local Plan document, to support development of 533 new houses in Horsley, of which 385 will be within West Horsley. Additionally, I oppose the extension of the village boundaries for East and West Horsley and removal of the village areas within these boundaries from the protection of the Green Belt. In addition, I object to the inclusion of the Wisley Airfield site as a potential development site.

I believe that the proposals are extremely misguided, and would be highly damaging to the existing communities of East and West Horsley. In addition, they are strongly opposed by the residents of the area, and therefore the plans are at odds with the localism agenda.

I am a Chartered Surveyor with 15 years experience in commercial real estate and over 4 years experience working in urban regeneration. As such, I have a clear professional understanding of the issues involved and also of the economics of
development. I have lived in West Horsley for over six years and intend to be a long term resident and therefore am deeply concerned about the proposals set out in the draft plan.

My opposition can be summarised under the following headings, which I will consider in turn:

1. Concern over overall level of housing development for Guildford Borough.
2. Disproportionate housing development for West Horsley, compared with other settlements in the Borough.
3. Effect of the Proposals on West Horsley.
4. Effect of the Proposals on the Green Belt.
5. Effect of the Proposals on the Surrey Hills AONB
6. Specific Comments on Potential Development Area at Waterloo Farm/ Ockham Road North.
7. Views of the Local Community in West Horsley.

Overall Level of Housing Development proposed for Guildford Borough.

I am extremely concerned about the overall level and type of housing development which is proposed for the Borough. My understanding is that the overall level of new housing proposed is far in excess of that proposed by other similar neighbouring authorities.

I have seen no clear rationale for the growth projections which underpin the housing calculations. Indeed, the number of new houses proposed for the Borough has increased from the 653 per annum proposed in the 2014 draft document to 693 per annum in the current proposals.

Of the 12,498 new homes proposed within specific sites, 65% are within the Green Belt. This percentage is far too high and will have a damaging impact across the Borough.

Disproportionate Level of Housing development in West Horsley.

Not only do I oppose the level of green field housing development for the Borough as a whole, I also feel that the levels of housing proposed for West Horsley are disproportionate. The draft plan proposes 385 houses in major sites at West Horsley, with another 148 in close proximity within East Horsley. Additional "infill" developments are also proposed. West Horsley is a parish of 1,111 homes, but there are only 723 houses within the main settlement area of West Horsley (i.e. within the village boundaries). Therefore, the proposals for major sites alone would add 53% to the housing stock of the village, and 35% to the housing stock of the parish as a whole.

This is grossly disproportionate and beyond the level proposed for other settlements around the Borough-and particularly for Guildford itself, which does not seem to be taking its fair share of the proposed development.

West Horsley Parish Council has carried out a Housing Need Assessment, which showed a requirement for just 20 affordable homes. The proposals are therefore totally out of line with the requirements of the local community.

Conclusion.

In summary, I strongly oppose the current drafting of the Guildford Borough Council Local Plan in relation to West and East Horsley. In particular, I oppose the removal of West Horsley and East Horsley from the Green Belt, the extension of the village boundaries beyond their current extent, and plans for 533 houses across the two villages (of which 385 are planned for West Horsley), all of which are at unsuitably high densities. out of keeping with the current character of the villages.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the level of housing development proposed for West Horsley. Not only do I oppose the level of green field housing development for the Borough as a whole, I also feel that the levels of housing proposed for West Horsley are disproportionate. The draft plan proposes 295 houses in major sites at West Horsley, with another 100 in close proximity within East Horsley. Additional "infill" developments are also proposed. West Horsley is a parish of 1,111 homes, but there are only 723 houses within the main settlement area of West Horsley (ie within the village boundaries). Therefore, the proposals for major sites alone would add over 40% to the housing stock of the village, and 26% to the housing stock of the parish as a whole. This is grossly disproportionate and beyond the level proposed for other settlements around the Borough- and particularly for Guildford itself, which does not seem to be taking its fair share of the proposed development.

West Horsley Parish Council has carried out a Housing Need Assessment, which showed a requirement for just 29 affordable homes. The proposals are therefore totally out of line with the requirements of local residents.

I object to the plans which would have a severely detrimental effect on the character of the village.

Specific comments are as follows:
• I continue to object to West and East Horsley being inset from the Green Belt. This proposal has not changed since the 2016 consultation.
• The suggested density of housing is totally out of character with the rest of West Horsley. Building to this increased density is particularly inappropriate in the peripheral locations which are planned for development.
The proposed development sites are on the outer edge of the village and so would generate considerable additional traffic, as the development will be some distance from the station and the centre of the villages. The network of rural roads and lanes which surrounds the village simply do not have the capacity to serve this level of proposed additional development, and any extension of the road network would not only destroy the character of the village, but also the surrounding roads which would continue to pass through Green Belt land.

The proposed development site at Manor Farm (ref A38) would have the effect of contributing to a merged settlement of East and West Horsley. I believe that the open character of the countryside here should be protected by safeguarding the countryside along East Lane, Long Reach and Green Lane which continues to separate the two settlements and which contributes to the rural character of West Horsley.

I have strong concerns over the capacity of infrastructure such as drainage and sewerage. Localised flooding and poor surface water drainage is already a significant problem in the area. Since moving to the area I have witnessed first hand flooding along Ockham Road North, Green Lane and Ripley Lane. This has occurred on one or more occasions each winter in recent years and therefore is clearly not a "once in a decade" or "once in a lifetime" event. The fields planned for development must play a role at present in helping to drain this area, and additional development would both remove this drainage capacity and create additional issues of surface drainage.

Additional development of any significant scale will cause significant strain on the village school and doctors surgery (the later located in East Horsley), which are running close to capacity. Adding extra capacity to these services cannot easily be resolved, as there is little or no land in the core of the village to accommodate any additional services. Developing these facilities on the periphery of the village would once again fundamentally alter its character and position in its rural context.

East and West Horsley are thriving villages, which do not need artificial support through rapid expansion of population.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The strength of feeling throughout the village against the proposed relaxation of the planning guidance is considerable. This opposition is shared by all of the local residents that I have spoken to, as well as by the West Horsley Parish Council. I believe that the views of those who have chosen to make their homes within the community should be paramount when making decisions which will have such a radical and irreversible impact on the village. Removing East and West Horsley from the Green Belt, and encouraging additional development on such a scale, would exclude and ignore the strong feelings of the local community. Overall, I understand that the 2016 Local Plan Draft received over 30,000 objections, and these seem to have been largely disregarded in the current draft. It seems a case of the Borough Council continuing to publish the same document with minor changes, rather than addressing the very real concerns which local residents have over the proposals.

In summary, I strongly oppose the current drafting of the Proposed Submission Guildford Borough Council Local Plan. In particular, I oppose the removal of West Horsley and East Horsley from the Green Belt, the extension of development beyond the current village boundaries, and plans for 395 houses across the two villages (of which 295 are planned for West Horsley).

I also object because all of the development sites are proposed to be at unsuitably high densities, out of keeping with the current character of the villages.
So far as I am aware, no "exceptional circumstances" have been put forward, let alone proved, in order to justify this development in the Green Belt.

I remain of the view that the plans for West and East Horsley contained within the Draft Local Plan are inappropriate, misguided, and would be deeply damaging to our community.

I urge you to listen to the views of the local community and to protect the exceptional quality of the rural spaces and villages of the Borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the effect of the local plan on the Metropolitan Green Belt in this area. I believe that it is vital to retain the integrity of the Green Belt within Surrey against development pressure. Section 9 of the National Planning Policy Framework specifically states that "Once established, Green Belt boundaries should only be altered in exceptional circumstances". I cannot see why pressure to meet housing targets constitutes such an exceptional circumstance. The fact that the Green Belt is under such pressure to be developed is to me a sign that its protection should be enhanced, in order for it to continue to meet its original intention for future generations. The identified West Horsley development sites set out in the Document make a significant contribution to the open character of the village and its context within its rural surroundings and the Green Belt. The sites are generally located on the outskirts of the village, and so development upon them will affect the context and character of the village. When considering the effect on the Green Belt countryside of the area, there is a significant difference between infill development within the geographical boundaries of the village, and development significantly extending its borders. In addition, the proposals taken as a whole would have an adverse effect on the Surrey Hills Area of Outstanding Natural Beauty, which is located adjacent to West Horsley. The proposed development site adjacent to the "Bell and Colvill" Garage at West Horsley, for which 40 houses are planned, would bring unsuitable intense development to a site which is far closer to the boundary of the AONB, and which is adjacent to a site of Great Landscape Value.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing to express the strongest opposition to the proposals, set out in the recent Guildford Borough Council Proposed Submission Local Plan document, to support development of 395 new houses in Horsley, of which 295 will be within West Horsley. Additionally, I oppose the removal of the village areas within the boundaries from the protection of the Green Belt. Whilst the scale of development has been reduced somewhat since the previous 2016 Draft Local Plan, I still believe that the proposals are extremely misguided, and would be highly damaging to the existing community of East and West Horsley. In addition, they are strongly opposed by the residents of the area. The small changes to the draft plan do not alter my fundamental objection to key elements of the plan. I have lived in West Horsley since 2009 and intend to be a long term resident, and therefore am deeply concerned about the proposals set out in the draft plan. I am also a Chartered Surveyor with 16 years of experience and so have a clear professional understanding of the issues involved. My objections are as follows.

Overall Level of Housing Development proposed for Guildford Borough. I object to overall level and type of housing development which is proposed for the Borough. I have seen no clear rationale for the considerable growth projections which underpin the housing calculations. The revised proposals show a modest reduction in new homes per annum compared with the 2016 draft plan, but to a level of 654 homes which is almost identical to what was originally proposed in 2014. The overall housing growth figures suggested are close to double the Office for National Statistics prediction for the growth of Guildford. Generally, I feel that far too many of the proposed development sites are located within the Metropolitan Green Belt. This will have a damaging effect on the quality of life across the Borough.

We object to Guildford Borough Council’s draft Local Plan proposals to build 1,800 houses, an industrial park and a highway on the slopes of the Hog’s Back at Blackwell Farm, which will:

- Destroy views from the Hog’s Back ridge – a nationally designated Area of Outstanding Natural Beauty
- Remove 72 hectares of scenic farmland and additional woodland from the green belt
- Increase tailbacks on the A31 and traffic congestion
- Result in rat running through local roads
- Add to Guildford’s pollution.

Answer (if comment is on questions 1-7 of the questionnaire): ()

MY OBJECTIONS ARE THESE:

1) BUILDING A SECONDARY SCHOOL:

I've done a bit of investigating, and I understand that Ash Manor (Ash/Tongham) and King's College (Park Barn / West of Guildford) are undersubscribed and potentially failing schools.

Under current legislation with the Department of Education, surely these schools could be run directly by the government in order to improve standards. Change the management / teachers and so forth.

The facts are that both schools are in highly populated areas, with a pool of students to continually draw from.

Also, surely it is eco-friendly and safer for all the obvious reasons to have children living close to their schools.

There’s also a huge assumption that the proposed new school:

1. Will draw from the proposed development of new homes + of course the existing population in Normandy. One has no idea who will buy these homes. It is perfectly possible that these children could go to a wide number of private schools in the surrounding areas, or, other state schools.
2. There is absolutely no guarantee that a new school will be a “great” school. Reputations take time to build, and the staff need to be attracted and retained.

Pro-active Alternative Plan: For King’s College:

I recommend a new site over the railway from within Surrey Research Park (where a new station could be built, easing pressures on Guildford town centre).

There's also access to Surrey Sports Park to keep the children fit, and maybe an experiment with University of Surrey to work from Primary through Secondary School to ensure children have the key skills from an early age. This could be a breakthrough partnership.

I know the BIG issue is funding. Surely a creative partnership involving Guildford Businesses and the new schools could provide the employees of the future, along with lifelong learning initiatives.

Also, there has to be alternative funding to a builder's profits. We need to get benefactors interested. Companies who want to sponsor etc. I totally understand the squeeze on Council finances, but that is no excuse to bulldoze through a village forever.

2) INFRASTRUCTURE & ENVIRONMENT:

Normandy has well-documented issues with:

- 2 railway bridges that are frankly dangerous - and that Network Rail know this as fact. This could be catastrophic in the future as previous repairs have never resolved the structural problems.

- Roads that have poor access: Glaziers Lane / Flexford Road & Westwood Lane in particular:

1. a) There's a very dangerous junction at Guildford Road / Westwood Lane & School Lane, which is absolute chaos at opening/closing time for Wyke Primary School in Normandy.
1. b) There’s also the crossroads of Westwood Lane & Flexford Road – a site which has seen many serious accidents over the past 30 years. This could increase exponentially if the new development goes ahead.

1. A323: Over the years there has been increasing traffic-flow on this road due to the development of the A31 upgrade & A331. Both for peak-time traffic, and specifically when there are accidents on these roads, which happen frequently. For instance, a bridge would need to be constructed at Ash railway station to ease congestion. Westwood Lane is also a “rat run” for the A331 to the Hog’s Back when there’s an accident on that dual carriageway. So, with a school being built + the traffic from an incremental 1,100 houses being built, there would be gridlock.

• **High Flood Plain:** throughout the proposed development area. This will have catastrophic consequences if land is developed. There’s a Flood Forum already in place as issues are already widely known.

• **Insufficient Sewage / Drainage:** highlighted by “in-fill” developments in Beech Lane within past 5 years. This is a potential health-risk.

• **Threat to Thames Basin Heath Special Protection Area (TBHSPA):** Normandy is home to extensive wildlife colonies and sites of Special Scientific Interest (SSI). Also, it must be pointed out that there was an exceptional incident at the government’s Merial Animal Health Facility in Pirbright, Surrey a few years ago, which released poisons into the river stream. The re-percussions were felt in Normandy, due to the interlinked drainage / river systems. If there’s future development in Normandy, this could be catastrophic.

3) **GREEN BELT:**

I have always believed that Surrey County Council / Guildford Borough Council MUST:

1. a) Build on brownfield sites FIRST, and overcome the challenges of these sites.
2. b) Re-cycle empty & under-used buildings & office blocks. Revitalise town centres (do we REALLY need that many shops?).
3. c) Re-use state owned assets (like what will be happening in Aldershot for instance).
4. d) In-fill sensitively. In Normandy we've built about 100 properties in the past 15 years. Same again is feasible. I do also think a sheltered housing proposition would be ideal, given the many people in the village who are elderly and want to downsize. This could re-cycle the “housing stock”.

It will be a blot on the reputation of Guildford Borough council if such a project were to go ahead because it was "legally" acceptable. Building on protected Green Belt land will set a very dangerous precedence for the future.

Once land is gone, it cannot come back into use. More farmland is needed for a growing population.

Decisions affect people / environments and quality of life.

4) **NO MORE TRAVELLERS’ SITES:**

Over the last 20-25 years, Normandy has become home to more than its fair share of travellers [Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it].

There are ample sites throughout the borough elsewhere.

Specifically, we have at least 3 sites already.

5) **LEGAL ISSUES:**

I'm far from a legal expert. But I simply believe if it was NO for Normandy in 2014's Local Plan. I just don't see how the "legal context" has changed so drastically in two years. This is Green Belt Robbery - at a time when the country needs to be
more sustainable and grow more of our own foods of all kinds. If anything, Normandy needs an entrepreneurial farmer who can revitalise our underutilised farmland.

At no time has there ever been any early and meaningful engagement and collaboration with our village. Taylor Wimpey have bypassed all protocols in submitting their 2014 plans.

IN SUMMARY:

Thank you for reviewing my reasons why I cannot countenance ripping out the heart of Normandy into the unknown. Coupled with the chaos it will bring to thousands of people's lives for many, many years.

Carefully thought through, the existing secondary schools in Ash & Park Barn can survive & flourish under new management. I've worked in many turnarounds / relaunches in my business career. The same can be done for these schools.

There are many major environmental, infrastructure, “quality of life” issues and day-to-day practicalities that are flatly ignored by Strategic Site A46’s proposed development of Normandy. Let alone all the legal & procedural protocols that have not been followed or adhered to.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/3245  Respondent: 8768417 / Casper Gorniok  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A46
We fully support the removal of site allocation A46. It was proved beyond all doubt that there was no strategic case for the secondary school to be sited in Normandy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

We object in the strongest possible terms with regards to including a plot to the South West of Flexford. As mentioned in our objection to Amendment 2 - Normandy simply doesn't have the infrastructure to cope with increased traffic. Plus, we are very aware of the desires to build on land towards the Hog's Back which is totally and utterly unacceptable. We thought that The Surrey Hills (which this is part of), was exempt from any house building whatsoever.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

We support the removal of site allocation A47. As is always the case with Normandy, we have significant infrastructure issues (local roads, very old railway bridges etc) which simply cannot cope with more traffic. Day-to-day is bad enough when there are issues with the A31 dual carriageway and traffic is diverted through the village to the A323. It is only a matter of time before more serious accidents occur.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

4. There are not enough jobs in Guildford for all the potential new residents so most will be commuting in all directions but particularly to London. There is no infrastructure in place. There may be a new station but there are not enough trains possible to be run on the existing lines. Already no seats available on morning or evening trains on the main line and branch lines to Waterloo. Traffic on the A3 is excessive and the roads in Guildford Centre and around cannot cope now, it only needs one small event to cause havoc to thousands and delays of hours. Park and ride is affected by any road problems and doesn't run long enough hours for commuters to and from London.

5. The Wisley Junction 10 where the A3 meets the M25 is already an accident black spot.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s draft Local Plan proposals to build 1800 houses, an industrial park and a highway on the slopes of the Hog’s Back at Blackwell Farm, which will:

- Destroy views form the Hog’s Back ridge – a nationally designated Area of Outstanding Natural Beauty
- Remove 72 hectares of scenic farmland and additional ancient woodland from the green belt
- Increase tailbacks on the A31 and traffic congestion
- Result in rat-running through local roads
- Add to Guildford’s pollution

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I object to so much development in one area of the borough. While I accept the need for more housing it seems bad planning to create so much housing in one area because this will have a dramatic increase in traffic especially on The Street in West Clandon.

We live at [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998] and everyday at around 6pm there is a slow moving traffic jam back from the traffic lights at the junction with the A246. The Street is too narrow and windy to take more traffic, every year there are accidents on this road. There was a car crash just last week on the 12 July and this year alone two cars have crashed through our fence and into our garden. More cars resulting from the housing you are proposing will increase the dangers of further collisions and to pedestrians.

I object to all erosion of the greenbelt. Unless we keep the greenbelt there is a danger villages such as West Clandon will lose their identity as has already happened to Merrow, which has become part of the Guildford urban sprawl.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
We have to believe there are insufficient homes and therefore we have to believe homes are required. We have to believe the number of homes needed. It is important to choose carefully where these homes are to be built - either as tagged on to existing or create new home areas. It is important to provide the correct design of easy to maintain homes - which the young can afford to purchase or rent. It is important to build on land which is Surface Water Managed and suitable highway/transport provided - i.e. Highway speed controlled, ample traffic filtering (traffic lights) and adequate parking facilities. It is important to provide reasonable space for each dwelling for healthy living - i.e. do not over-develop with density of build. There are dwellings and land in a neglected state that could be redeveloped into affordable flats/first time buys.

There are roads/junctions that could be redesigned to filter traffic/ease congestion. There are businesses that could be moved so to provide parking. The impact on our highways needs some forethought with changes before development, rather than deal with gridlock. So much time is wasted now due to congestion and the lack of traffic control/filtering. Facilities such as wastewater treatment should be put in place before demand is increased.

We cannot afford sustainability now due to the lack of funds. We are having to accept low standards now - how long can this be tolerated?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. SITES - POLICIES A1 TO A57

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/3020  Respondent: 8769793 / Laura Richards  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. **APPENDIX D**

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY A25 - Gosden Hill Farm**

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development
proceeds I believe the narrow strip of Green. Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.
Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

### 1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.
Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. **POLICY D3**

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. POLICY D4

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E1

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I OBJECT to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E2

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

Page 2516 of 3335
1. **POLICY E5**

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

---

1. **POLICY E6**

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Attached documents:

Comment ID: PSLPP16/12545  Respondent: 8769793 / Laura Richards  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E7

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H2

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.
The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses through all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related.” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. POLICY II

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy II)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy II. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy II requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am a long term resident of West Clandon, having grown up here myself, and now bringing up my own young children in the village.

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objections to specific policies and matters within the Plan and would make in addition one key point upfront regarding traffic – I have seen first-hand over the years the increase in traffic through the village on a road (the A247) which simply cannot cope with it. The pavements are narrow, the road is narrow and there are difficult bends and twists. The cars and large lorries travel far too fast through the village and there are too many of them. Only this week there was a serious accident causing 2 cars to fully mount the pavement, and this happened just minutes after a group of children passed by that point walking to school. It can surely only be a matter of time before there is a tragic loss of life on this road and as such I object in the strongest possible terms to any further development which leads to even more traffic passing through West Clandon – including the proposed developments at both Gosden Hill Farm and Garlicks Arch.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. POLICY I3

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/12531  Respondent: 8769793 / Laura Richards  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is
the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt.” This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I OBJECT to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I ALSO OBJECT to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

gbc’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
### 1. POLICY P4

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

### 1. POLICY S1

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.
The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

1. **POLICY S2**

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.
It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.
1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

17.1 OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/1270  
Respondent: 8770177 / Phil Attwood  
Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
18.I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology I believe is inaccurate; inflating the needs of the borough by distorting student numbers. It is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land: all requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow,
winding road through West Clandon, a road where large lorries mount the pavement every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2301  Respondent: 8770177 / Phil Attwood  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
15.I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site.

Why was a brownfield site removed and replaced with a Greenfield site?

There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. Development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Page 2537 of 3335
16.1 OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition of north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Answer (if comment is on questions 1-7 of the questionnaire): ()
5.1 OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

6.1 OBJECT to the location for new employment floor space at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floor space will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floor space to be located at Garlick’s Arch, when just to the south, at Burnt Common, there is existing industrial development, with surplus land that could accommodate further development of 7,000 sq m.

Answer (if comment is on questions 1-7 of the questionnaire): ()
7.1 OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E6 - The leisure and visitor experience

I OBJECT Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for “overdevelopment”. Heritage sites and the Green Belt are particularly vulnerable. Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWestTrains travel card for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust the objections made above are fully considered and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford Borough already has a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

POLICY H3 – Rural Exception Homes

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.
The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances."

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**9.I OBJECT** due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages already suffer from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on local roads.

Many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

**I OBJECT** to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, West Clandon included, already suffer from traffic congestion. Development around these villages will result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become ever popular, particularly at weekends with hundreds of cyclists passing through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements, as they often need to.

**10.I OBJECT** to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
Despite the Garlick’s Arch site (A43) being significant for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents will see their quality of life significantly deteriorate.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send, will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is not sustainable.

There is no provision for the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
12.1 OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

3.1 OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’) and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and neighbouring villages merging into each other. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
4.1 OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. I am aware that this site often floods during winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objections to specific policies and matters within the Plan.

1.1 OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a lasting detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will not be able to cope with the proposed level of development. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's
Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**2.1 OBJECT** to the Borough Wide Strategy (Policy S2)

1. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

2. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

3. The Housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any commonsense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of...
the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4677  Respondent: 8770177 / Phil Attwood  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon.
The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.
9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.
10. The impact on small surrounding roads will create traffic gridlock.
11. It will join up existing villages and defeat the purpose of the Green Belt.
12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.
13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.
14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **APPENDIX C**

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

2. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

3. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document: complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **APPENDIX D**

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY A25 - Gosden Hill Farm

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  
  Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).
The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.
Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY D3

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY D3

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4899  Respondent: 8771233 / Ranald Mackinnon  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. POLICY D4

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4888  Respondent: 8771233 / Ranald Mackinnon  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E1

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E2

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/4890  Respondent: 8771233 / Ranald Mackinnon  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. **POLICY E5**

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

1. **POLICY E6**

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY E7**

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H1

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/4896  Respondent: 8771233 / Ranald Mackinnon  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2
1. **POLICY H2**

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

1. **POLICY H3**

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.
The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations were available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire):** ()
1. POLICY II

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy II).

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular pastime, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy II. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy II requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY I2**

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY ID3

I OBJECT to poor air quality concerns (Policy ID3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.
The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires...
there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY P4**

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

---

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Re: Responses to Guildford Borough Proposed Submission Local Plan (June 2016)

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objections to specific policies and matters within the Plan.

1. **POLICY S1**

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)
The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY S2

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these
adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN Ire not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Questions posed by Guildford Borough Council as part of its consultation.

Questions from GBC

24.A. Question 1: The evidence base and submission documents

The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence. The evidence base documents contributing to the preparation of the plan are listed in Appendix D and can be found on our website (links open in a new window).

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

ANSWER

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up-to-date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
24.B. Question 2: Legal Compliance

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole is legally compliant? Please provide the following information being as precise as possible:

- why you consider it is or is not legally compliant and
- what change(s) (if any) you consider necessary to make it legally compliant, explaining why this is the case.

**ANSWER**

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: SQLP16/854  Respondent: 8771233 / Ranald Mackinnon  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

24.C. Question 3: Soundness

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound? Please provide the following information being as precise as possible:

- why you consider it is or is not sound and
- what change(s) (if any) you consider necessary to make it sound, explaining why this is the case.

**ANSWER**
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites— which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and
foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

**24.D. Question 4: Duty to cooperate**

Do you consider the Proposed Submission Local Plan: strategy and sites **as a whole** has complied with the Duty to cooperate? Please provide the following information being as precise as possible:

- why you consider it has or has not complied with the Duty to cooperate and
- what change(s) (if any) you consider necessary to make it comply with the duty to cooperate, explaining why this is the case.

**ANSWER**

I do not consider the Proposed Submission Local Plan: strategy and sites **as a whole** has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.
The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I trust that the objections made above are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

<tbody>
<tr>
<td>Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Gosden Hill development of 1700 houses. Reference to a potential link road from the development to the A247. The clear implication is for an access from the development to the A247 with enormous traffic implications for the A247.

South bound off- and on- slip roads to service the development and replace the existing off- slip road to Burpham. The only North bound access to the A3 will be via the existing slip road off Clay Lane. (See later, Burnt Common).

A 4-entry form secondary school, a primary school, a retail centre and a park and ride for up to 700 cars.

When developed, the new employment site at the north side of Gosden Hill Farm (site allocation A25) will be treated as an Office and Research & Development Strategic Employment Site (7000sq.m). This could mean several hundred employees.

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce competing one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Garlick’s Arch development of 400+ houses and facilities for travelling showmen (implies storage yards and long vehicles). This will generate traffic on the A247.

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy 11). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists pass through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Burnt Common strategic industrial employment site for light industry, storage and distribution activities. It is to be designated an Industrial Strategic Employment Site which means that it is a preferred site for industrial development including waste management facilities. The site is 9ha which it is stated allows for considerable future expansion. This will generate large amounts of traffic including heavy vehicles on the A247.

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.
9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.
10. The impact on small surrounding roads will create traffic gridlock.
11. It will join up existing villages and defeat the purpose of the Green Belt.
12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.
13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.
14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Although much is made of the need for new infrastructure to support these developments and for this to be in place as needed, the Plan admits …”we forecast that there will also be an absolute increase in overall traffic volumes” and this is assuming all the infrastructure (listed in App. C to the Plan) is in place in a timely fashion. GBC has little or no control over the plans of Surrey County Council as the local highways authority and Highways England for trunk roads. Worryingly, the Plan now has less substantive information about improvements to the A3 South of the M25 from Highways England and it appears that their plans are not yet formed (Policy ID2). In the absence of such information, the infrastructure proposed is specific to each proposed development and does not address cumulative effects. What would be the case with regard to planning approval if SCC and/or HE do not provide timely infrastructure?

The Plan now calls for nearly all infrastructure to be funded by developers (see APP. C). We question how realistic it is to expect developers not only to pay for all the infrastructure but also to have it in place in a timely fashion. The Plan says that planning permission will be refused if timely provision of infrastructure cannot be secured. Such refusals will almost certainly be settled in the courts. Developers’ business models are based on building and selling houses to create the cash to provide infrastructure. People will be living on the sites well before infrastructure is complete. Will GBC prevent development of Gosden Hill until slip roads etc. are provided off and onto the A3? Again, the infrastructure is site specific and does not address cumulative effects.

If development were to be refused the land would still have been removed from the green belt and its future rendered uncertain.

Residents are being asked to accept very large amounts of development with little or no detail being provided on measures which would relieve existing congestion and limit future problems. The cumulative effects of the developments listed below are certain to have a devastating effect on the A247 through our village (and of course on Send) and it is hard to see how any of the infrastructure proposed in the Plan (App. C) will do anything to mitigate the effects of these developments on the A247 and hence our village.

Summary of the Impacts on the A247 – My Objections

All of these developments will draw additional traffic to the A247 through the village. It would be naïve to think that the employment sites and schools will serve only the developments themselves. Apart from the normal movements of residents to and from the new sites there will be considerable additional traffic on the A247 generated by:

- children from elsewhere being delivered to schools and collected
- the employees of the offices and industrial sites getting to work and returning home
- the vehicle movements generated by distribution and storage activities
- traffic from Wisley wishing to travel South and returning
- traffic from Gosden Hill wishing to travel South and returning
- traffic from Slyfield wishing to travel South and returning
- private and commercial traffic originating in the South and accessing Gosden Hill, Burnt Common or the A3 and returning (including traffic from Dunsfold)
The A247 although an A road:
-is less than 2 vehicle wide in places
-does not have continuous footpaths
-has several sharp bends
-has a hump-backed bridge with poor site lines
-has a very difficult junction to access the station
-is largely unlit
-has a primary school
-is already very congested at times

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Non-plan Items– My Objections

Surrey County Council’s business plan for Newlands Corner (not referenced in the Local Plan) to attract 100,000 more visitors a year. A significant proportion of these can be expected to use the A247.

Waverly B. C. has approved the development of 1,800 homes at Dunsfold which has the potential to feed traffic trying to avoid Guildford, onto the A247 to access the A3 (not referenced in the Local Plan).

Cumulative impact of changes – My Objections

Changes to the Plan have done nothing to alleviate the problems (particularly of traffic and congestion) raised in residents’ previous responses. Indeed it is now clear that the problems will be made much worse. There do not appear to be any changes which would be of benefit to the Clandons and indeed the cumulative effect of what is in the Plan and some external factors not in the Plan will have a much worse impact on the A247 through West Clandon and Send than the 2016 draft. Note that the A247 is the only road over the Guildford to Waterloo railway, North of Guildford that doesn’t involve travelling through the town centre.

Duty to Cooperate – My Objections

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as
possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. APPENDIX C

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

2. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

3. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/1396  Respondent: 8771265 / H C MacKinnon  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. APPENDIX D

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.
The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

1. **POLICY A25 - Gosden Hill Farm**

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcots Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents
2015

• 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays

Surrey Fire and Rescue deployed.

2016

• 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
• 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
• 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.
The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)
The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

1. POLICY D3

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY D4

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/5583   Respondent: 8771265 / H C MacKinnon   Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. **POLICY E1**

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

1. **POLICY E2**

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.
There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

**Answer (if comment is on questions 1-7 of the questionnaire):** ( )

1. **POLICY E5**

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

**Answer (if comment is on questions 1-7 of the questionnaire):** ( )

1. **POLICY E6**

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For
example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/"Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E7

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable
residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

1. POLICY H1

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.
It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H2

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (

1. POLICY H3

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY I1

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable
(and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY I2

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).
Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY I3**

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.
This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site. Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

| Document:   | Proposed Submission Local Plan: strategy and sites 2016 / Policy P2 |

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. SITES - POLICIES A1 TO A57

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. **POLICY P4**

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

1. **POLICY S1**

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary. 

I set out below my objections to specific policies and matters within the Plan.

1. **POLICY S1**
I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY S2

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these
adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN Ire not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Questions posed by Guildford Borough Council as part of its consultation.

Questions from GBC

24. Question 1: The evidence base and submission documents

The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence. The evidence base documents contributing to the preparation of the plan are listed in Appendix D and can be found on our website (links open in a new window).

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

ANSWER

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up-to-date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
24.B. Question 2: Legal Compliance

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole is legally compliant? Please provide the following information being as precise as possible:

- why you consider it is or is not legally compliant and
- what change(s) (if any) you consider necessary to make it legally compliant, explaining why this is the case.

**ANSWER**

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: SQLP16/931  Respondent: 8771265 / H C MacKinnon  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justified in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation.

2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.

3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound.

4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018.

5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars.

6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.

7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and
foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

24.D. Question 4: Duty to cooperate

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate? Please provide the following information being as precise as possible:

- why you consider it has or has not complied with the Duty to cooperate and
- what change(s) (if any) you consider necessary to make it comply with the duty to cooperate, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.
The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I trust that the objections made above are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - East Horsley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to make clear my objections to the six main development sites in East and West Horsley.

To build this many new buildings in our area will completely ruin our village atmosphere and put unacceptable pressure on the roads and amenities.

In my mind Green Belt means the land is protected against unwanted building and this is why we chose to live in this lovely area, and paid a premium to do so.

NO to 533 new homes in the Horsleys !

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/641  Respondent: 8772289 / Sheila Mellstrom  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North
I would like to register my heartfelt objection to your "new local plan" for East and West Horsley.

1) Our 2 villages are over crowded already. We have congestion on our narrow roads through the villages especially at certain times of the day when schools open and close. With the 533 proposed new houses we could have at least 1000 more cars trying to use the Ockham Road, East Lane and The Street, as well as the A246.

2) Commuters cannot find parking spaces at the station already and it is often difficult to park at the shops.

3) Our medical centre is already over stretched with several weeks waiting time to see a doctor

4) Our 2 local state schools are full to capacity - where are all the poor children going to find school places and how, as our Borough Council, can you sort that out?

5) In addition to all this there is a proposal to build 2000 houses on Wisley airfield.

6) Have any of the planners given any thought to how all this could cause flooding, pollution, not to mention ruin the lives of the people who already live here?

7) Finally, we were promised categorically by the Government that the Green Belt would be [text unreadable]. I was at a meeting when Paul Beresford made that promise. What has happened to that promise?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - East Horsley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Despite there having been 30,000 objections to the plans to build new homes on 6 sites in the Horsleys, the amended plans have only removed 2 of those proposed sites!!

Anyone who drives out on the local roads at rush hour will agree that there are already far too many cars for the size, width and capacity of our village roads. We simply cannot cope with any additional traffic.

Our local schools, trains and station and station car park, surgery and infrastructure cannot cope with the additional amount of people such a scheme will produce

Whilst acceptable there are bound to be some limited amount of new houses, such as “fill-ins” and on brownfield sites, we nevertheless reject the demands to make us into a “New Town” instead of a village and above all to remove any of the Green Belt.
It seems iniquitous that after receiving 30,000 protests against these proposals, our Guildford Borough Council, does not support us, and can go on bombarding us with amendments. Do we have no right to a rural village life, protected by the Green Belt which we chose when we came to live in the Horsleys?

I wish to comment on the Guildford Local Plan. My main "objections" are to the proposed developments at site allocation A26 Blackwell Farm and site allocation A35 th former Wisley Airfield.

Blackwell Farm is sited off the Hogs Back and the proposed development would totally ruin the scenery/ views from the Hogs Back. The area is a green space for horse riders and ramblers and a "breathing space". A development of this size would create huge traffic problems. It would totally spoil the character of Guildford.

Likewise Wisley Airfield is situated in an area where the proposed development would create traffic problems. The existing surrounding roads are too narrow for increased traffic and large vehicles eg buses, causing difficulties in getting to local railway stations. Wisley Common, next to the airfield, is a site of scientific interest.

There is already enough concreting over the south east of England without any more. There could be further problems with flooding. The M25 and A3 are often congested and more traffic joining them will not help matters.

We need green spaces for peace of mind! I am also against taking land out of the green belt. The green belt was put in place to prevent urban sprawl and we should think of future generations. Once it is gone, it is gone!

I have kept my objections brief but feel that I have to comment on such an important issue. I accept that some additional housing is needed but not in the numbers these two sites are proposed. I have commented on these sites as I know them both well.

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.
Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

</table>
I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a) The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved. This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H3 – Rural Exception Homes

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.
The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and
the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no
evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common,
with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including
factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the
range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide
development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the
document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s
identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the
exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a
river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood
risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual
probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the
flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-
commissioned to accurately reflect the actual flooding risks of each site.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Borough Wide Strategy (Policy S2)

a. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

b. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

c. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere;
 Unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt.
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity.
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.

7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).

8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/4564  Respondent: 8772801 / David French  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt
is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.
24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately.
half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Answer (if comment is on questions 1-7 of the questionnaire): (

I object to the Policy A42 change at Clockbarn in Tannery Lane because:

• The increase to 60 homes in place of 45 homes is 33% more and too much
• It ignores all the hundreds of previous objections made by local people
• It will worsen access and traffic problems in Tannery Lane and at the A247 junction
• It will make erosion of the Green Belt in our village worse
• It will make surface water flooding, which is already bad, even worse
• It will impact open countryside views from the River Wey Navigation.

object to the Policy A43 change at Garlick’s Arch because:

- It ignores all the thousands of previous objections made by local people
- There is no proven demand for Travelling Showpeople plots in this location
- It is beautiful permanent Green Belt and no “exceptional circumstances” exist
- It will cause over-development of our village and the number of homes is excessive
- It is exquisite ancient woodland that existed at the time of Elizabeth 1
- It will join up Ripley and Send and defeat the key purpose of Green Belt
- It is subject to frequent flooding and is currently a flood zone 2 allocation
- It is contaminated by lead shot accumulated over fifty years
- It will generate excessive traffic that will block up the local roads of Send and Ripley.

It is with a very heavy heart that I find myself yet again having to complain and object to the most unbelievably stupid proposals featured in the current Proposed Local Plan.

We are a Green Belt village. It is then, by definition, a rural village. The idea of removing us from the Green Belt is hideous and wholly unjustified. Quite apart from the significant environmental impact of such an event, there can be no justification for it based on the flawed evidence on which this proposal has been made.

It seems there is a need, if the plan is to be believed, for huge numbers of houses to be built in our village. A recent local survey (taken in 2014) found, in fact, that we had a need for possibly no more than 20 or 30 houses (max) of one and two bedrooms. Possibly including a handful of three bedroomed homes too. I acknowledge that such development might indeed have to happen. But we might, surely, be able to find areas of brown-field sites within our village to allow such building to have minimum impact on our community.

Our need is for a small number of SMALL homes. Guildford has consistently ignored the small swelling principle which has exacerbated our local situation. Small dwellings have been allowed to be knocked down to be replaced by five bedroomed “Des Res”. Our small dwelling stock has been “raped” and with it some of our architectural history and all for greedy development of which we have no need.

Given that we are situated at a convenient distance from London, ANY housing would be instantly swallowed up by those who wish to move out of the city to live in a quieter, more rural environment. Of course, the rural environment would be gradually whittled away and within the six years in which it is proposed to build 600+ in our village, we would no longer be rural, but distinctly urban. The proposal is ill-conceived and foolish. indeed it is environmentally criminal.

Such development, were it allowed to happen, would be change enough but given that our roads are very dangerous because of serious surface damage and too many motorists, the whole area would become a nightmare in which to move around. There is no mention of infrastructure in the plan except that it might be something that developers would be expected to contribute to in return for the right to build. No mention either of flood control. We suffer considerably from long lengths of road which become flooded and impassable with even a modest rainfall. If we have flash flooding, it is sometimes impossible to move in or out of the village.

Our schools are just about able to cope with the current population of our village and so it is with the medical centre and the car parking in the station in the adjacent village of East Horsley.

Movement through the village is difficult at peak times. Walking is not a safe option especially for unaccompanied young children because the pavements are irregular, uneven and very narrow. There is no way of widening either road or pavement and absolutely no possibility of introducing safe cycling routes.

An obvious answer would be better public transport, but that is not an option either, since subsidies to bus companies have been reduced and we have but a skeleton bus service which is absolutely useless to the work force as the buses do not in any way coincide with times when the work force needs them.

Much mention is made of the need for “Affordable Housing”. In the mind of many, this equates with cheaper housing. How can this be when affordability is based on 80% of the average house price, which in this area is somewhere in the region of £375,000/ £400,000? Anyway, the rules which demand that developers should provide a percentage of “Affordable Housing” in any development are far too flimsy and vague and left to the pleading power of greedy developers.

Despite the pages of dense prose and miles of "difficult to get your head around" statistics, there is no doubt whatever that this Local Plan is ill-considered, ill-conceived, inaccurate and flawed. It is wholly unacceptable that the very council which should be protecting the environment for its residents is now turned major facilitator of a cruel destruction of the kind of
landscape and lifestyle that makes our borough desirable as a tourist and visitor destination. We stand to see our borough scarred beyond recognition, and we will also find our economic wellbeing seriously damaged.

The greatest insult of all is that this proposed plan is to be inflicted upon us by a Conservative council, whose government pledged to protect the Green Belt!!!!!!

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Ripley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The threat that the Local Plan poses to my village of Ockham and the subsequent detrimental impact on its property.

The horrific impact such development would have on transport bearing in mind the narrow unlit lanes which are dangerous enough already. This would increase the volume of car traffic to an estimated 4000 additional cars plus wider vehicles like buses resulting in congestion both in the villages and the A3 and M25. There are no cycling paths and few pavements which would further compromise the safety of cyclists and pedestrians.

There is a lack of public transport and Horsley and Effingham stations are full to capacity already as are the station car parks.

There is insufficient consideration given to the environmental and ecological value of the site.

Air pollution in many parts of the borough is in excess of EU permitted levels, especially at the M25/A3 junction.

Answer (if comment is on questions 1-7 of the questionnaire): ()
The removal of the Former Wisley Airfield from the Green Belt which will result in an urban corridor stretching from London to Guildford.

Finally, I object in the strongest possible terms to the continued inclusion of the Former Wisley Airfield now known as Three Farm Meadows where the planning application has already been unanimously rejected by GBC’s Planning Committee. Many authoritative sources across the UK have indicated concern to such a development on this site (eg Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield now known as Three Farms Meadows Allocation A35, is removed from the Local Plan with immediate effect.

Comment ID: PSLPA16/3107  Respondent: 8773377 / Anthony & Anne Bond  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Appx d- The evidence for just excessive expansion is flawed. A report by the GRA lays out the case that the plan exaggerate the need for such development.

Appx d- Finally, in light of the decision to leave Europe, I feel strongly that we should pause and consider what course this country takes in such issues as immigration and growth.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/12860  Respondent: 8773377 / Anthony & Anne Bond  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Brownfield development opportunities are being ignored. We need more homes for students and the elderly in the centre, not more retail space.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/12858  Respondent: 8773377 / Anthony & Anne Bond  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Guildford, unlike towns around us, will see unconstrained housing growth. We already have a congested town, with unresolved issues surrounding traffic flow in the centre of the town.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/14454  Respondent: 8773377 / Anthony & Anne Bond  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Guildford is already extremely congested and there is little evidence that sufficient improvement to the town centre infrastructure is part of this inadequate plan

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/12859  Respondent: 8773377 / Anthony & Anne Bond  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Allowing unjustified Green Belt development (yet another broken promise) to pay for transport schemes will just generate more traffic from more homes, causing yet more congestion.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/14453  Respondent: 8773377 / Anthony & Anne Bond  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

development on this scale on Green Belt is a betrayal and indicates that Brownfield alternatives are being ignored.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/12857  Respondent: 8773377 / Anthony & Anne Bond  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to register a strong objection to the proposal that Guildford add an astonishing 13,860 new homes accompanied by a 40% increase in retail space.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/12861  Respondent: 8773377 / Anthony & Anne Bond  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The plan that you are proposing will completely ruin the nature of Guildford, so I suggest that you reconsider.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Any business development in rural areas must be limited to businesses with maximum 100 m2 floor space such as high tech businesses and be confined within the current village boundaries. High speed broadband should be made available to these sites. It is important to continue to support all forms of agricultural business.

I object to this policy as currently worded. A policy to conserve the AONB is welcome but it must be clearer and firmer about restricting any new developments in this area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6413  Respondent: 8773953 / Robin Garnett  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

I object to this policy. The presumption of 13,860 new homes required by 2033 is unsubstantiated and highly unlikely in view of the Brexit decision which is likely to reduce economic growth and the demand for housing in the area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/6403  Respondent: 8773953 / Robin Garnett  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Vision and ambition

I object to the plan being based on an assumed requirement for 13,860 new homes by 2033. This assumes a much greater rate of population increase than seen in the last ten years. In view of Guildford's position in the Green Belt I believe that it is inappropriate to try and develop it into a larger industrial centre when there are other areas in the UK that have far greater need to develop industries and provide employment. Also the uncertain future due to the Brexit decision may well lead to reduced growth and demand for housing.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: pslp171/1777  Respondent: 8773953 / Robin Garnett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the deletion of paragraph 4.2.8 regarding Density of housing. It is important that the housing density is appropriate to the area. Brown field sites should be used for high density housing while any developments in rural areas should be in keeping with the existing communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

Comment ID: pslp171/1776  Respondent: 8773953 / Robin Garnett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the deletion of the following tests that all proposed developments were to be judged against.

- Conserve or enhance the setting and views of the AONB
- Conserve wildlife, historic objects or natural phenomena within it
- Promote its enjoyment by the community and visitors to the area
- Support the rural economy of the Surrey Hills area
- Provide and maintain public access to the AONB

I also OBJECT to the deletion of ‘protect it from inappropriate development’ in paragraph (1) and the inclusion of paragraph (2). These changes weaken the protection of the AONB.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPA16/1916  Respondent: 8774113 / Ian Elliott  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I totally disagree for the plan to remove the Horsleys from the Green Belt. There is no corresponding plan for infra-structure and this is currently over-loaded as it is. This means schools, roads including speeding cars and the lack of Surrey CC money to do anything about any of it. The rail station car park is full.

The proposals are totally out of kilter in terms of proportionate increase.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Guildford BC need to listen to what people want and react accordingly. We all know what happened when the Government didn’t listen regarding Europe.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

---

**Comment ID:** pslp172/2176  **Respondent:** 8774113 / Ian Elliott  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A36

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

Overall comment – the local plan has adopted a ‘lazy’ policy of developing green belt at the expense of sourcing and maximising brownfield sites in urban areas.

Specific comment – Horsley area - the removal of the A36 ‘Thatchers’ hotel site makes no planning sense and causes an adverse knock-on effect to other local areas. As a previously developed ‘brownfield’ site this is a perfect location to add housing at little detriment. It is unclear why this site has been removed.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:

---

**Comment ID:** pslp172/2177  **Respondent:** 8774113 / Ian Elliott  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A41

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

The removal of the site A41 which would have been used as a sustainable location for a new school is short sighted and indicates that the council have little feel for the needs of local people. In turn the development of the present school site would have alleviated the pressure on other more contentious sites.

---

**Comment ID:** PSLPA16/2007  **Respondent:** 8774369 / Gary Cooper  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Send
I object to the proposal to remove Send and Ripley from the Green Belt.

Removal of Send and Ripley from the Green Belt is almost certain to result in one massive development area on both sides of the A3 road, all the way from the M25, down to the North Downs. The villages will be entirely swallowed up to become like those to our North East at Surbiton, New Maldon, Worcester Park and all the way through to Sutton and beyond.

For Guildford to retain its current charm, it is vital that the village environments should be maintained for future generations.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I support the development of Wisley Airfield

There is no doubt we have to provide some new homes and they have to go somewhere. Wisley airfield is in my view suitable, but only if the site is provided with direct access to junction 10 of the M25

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the inclusion of Garlick's Arch site.

This proposal has been included at a very late stage and has not been consulted upon previously. It was not included in the Regulation 18 draft.

There are no exceptional circumstances to warrant the development, but there are such circumstances which make it unacceptable, such as its conservation sensitivity, being covered with ancient woodland, with trees dating back to the 16th century.

According to the Land Needs Assessment 2015 (ELNA) required employment space has reduced by 80% since the previous draft plan, so is no need for the proposed 7000 sq m of industrial development on this site. If there is eventually such need, it should be situated at Slyfield.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to the proposed new 4 way A3 junction

The proposed new junction could help parts of the area such as the centre of Ripley, but that benefit is entirely outweighed by the hitherto unimaginable volumes of traffic which would cause gridlock at Burnt Common roundabout as well as on the entire section of A247 from West Clandon to Woking. With these areas gridlocked, traffic would need to find alternative routes and the previously little known lanes around the area would be ruined also. This one singular act of folly would cause immeasurable damage to a wide area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

I object to the overall strategy.

The proposal to develop 693 new homes per year for the next 15 years is unsustainable, given that this area is densely populated and the infrastructure is already creaking at the seams. Even half of the proposed number would be difficult to accommodate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the 2016 draft local plan for the following reasons

I object to the overall strategy

The proposal to develop 693 new homes per year for the next 15 years is unsustainable, given that this area is densely populated and the infrastructure is already creaking at the seams. Even half of the proposed number would be difficult to accommodate.

I object to the proposal to remove Send and Ripley from the green belt

Removal of Send and Ripley from the Green Belt is almost certain to result in one massive development area on both sides of the A3 road, all the way from the M25, down to the North Downs. The villages will be entirely swallowed up to become like those to our North East at Surbiton, New Maldon, Worcester Park and all the way through to Sutton and beyond.

For Guildford to retain its current charm, it is vital that the village environments should be maintained for future generations.

I object to the inclusion of the Garlick's Arch site

This proposal has been included at a very late stage and has not been consulted upon previously. It was not included in the Regulation 18 draft.

There are no exceptional circumstances to warrant the development, but there are such circumstances which make it unacceptable, such as its conservation sensitivity, being covered with ancient woodland, with trees dating back to the 16th century.

According to the Land Needs Assessment 2015 (ELNA) required employment space has reduced by 80% since the previous draft plan, so is no need for the proposed 7000 sq m of industrial development on this site. If there is eventually such need, it should be situated at Slyfield.

I object to the proposed new 4 way A3 junction

The proposed new junction could help parts of the area such as the centre of Ripley, but that benefit is entirely outweighed by the hitherto unimaginable volumes of traffic which would cause gridlock at Burnt Common roundabout as well as on the entire section of A247 from West Clandon to Woking. With these areas gridlocked, traffic would need to find alternative routes and the previously little known lanes around the area would be ruined also. This one singular act of folly would cause immeasurable damage to a wide area.
I support the development of Wisley Airfield

There is no doubt we have to provide some new homes and they have to go somewhere. Wisley airfield is in my view suitable, but only if the site is provided with direct access to junction 10 of the M25.

Your consideration of the above points would be appreciated

Attached documents:

---

Comment ID: PSLPS16/467  Respondent: 8774593 / Rod & Jan Gerrard  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I strongly object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them). The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCl).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Hi Neville. My computer is playing up—I hope that you can decipher my objections to Blackwell farm being built on. Apart having a town being built on attractive countryside—there is absolutely no sense in increasing traffic to Guildford’s roads. As everybody knows the roads here cannot take any more traffic as they are at standstill much of the time. Why does Guildford need 1800 new houses? Just to satisfy the University’s greedy ambitions attracting more and more foreign students. The more foreign students we train—the better their work force will be in the future—to the detriment of our work force. So should we be keen to attract too many foreign students here?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

• disregards an independent expert landscape study, which demonstrates that part of the site merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
• directs more office space to an extended business park [Policy E4], which will increase peak time congestion—particularly around the hospital and A&E—and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing to object to the Local Plan proposals for West Horsley on the following grounds:

1. **Objection to Removing West Horsley from the Green Belt**

   The Local Plan states the “we will continue to protect the Metropolitan Green Belt” yet the Local Plan is taking West Horsley out of the Green Belt. West Horsley is a distinctive rural village and its green belt status is essential to ensuring the character of the village remains.

   What is the exceptional circumstance for removing the village from the green belt as required under government guidelines? It cannot be justified on the basis of unfulfilled housing. There is no explanation as to why West Horsley has been chosen to be removed and no justification for doing so.

2. **Objection to the Number of Houses being built in the 4 Proposed Sites (Policy A41/Policy A40/Policy A38 and Policy A37)**

   The Local Plan has suggested a 35% increase in housing for West Horsley by 2022. What is the justification for this?

   The Guildford Borough Economic Strategy document makes no case for locating large numbers of new homes in West Horsley – this is a village with no shops, no post office, no petrol station, no train station, no medical centre and a very limited bus service. It also offers no employment opportunities for residents. The National Planning Policy Framework requires that new residential development must be limited in quantity by the availability of infrastructure and local facilities – this policy has been ignored in the Local Plan.

   The density of houses on the proposed sites is completely out of keeping with the rest of the village and will change the character of the village forever. The National Planning Policy Framework requires that new residential development must respect the character and density of housing in the area – this policy has been ignored in the Local Plan.

   My house is currently backed by open fields and looks over open fields. If the new plan is implemented I will have 135 homes built at the bottom of my garden and 90 across the road from my front door – this will be like living in a completely different community in a different area of the country and is a step too far. It definitely will not be respecting “the character and density of housing in this area”.

3. **Specific Objection to Policy A41**

   I am horrified that the Local Plan has included this new site with a proposal to build 90 homes on the open fields (green belt land) of West Horsley (Policy A41).

   This new site – Policy A41 – is one of the most important rural aspects of the village and if allowed to continue will totally destroy the character of West Horsley. West Horsley is a rural village and one of its main features is that on the entry roads to the village (mainly Long Reach in this instance) there is a vista across fields as there is only development on one side of the road. These fields do not abut the currently defined village settlement on any side and so cannot be considered an extension of the settlement or infill at all. I cannot understand why this piece of land would have been picked for development at all as it does not satisfy any of the criteria for development. If allowed to develop 90 homes on a current site of open fields surrounded by undeveloped countryside it makes a mockery of the consultation process and the government’s guidelines on building in the green belt.

   I trust you will take these objections seriously and reconsider your plans for West Horsley.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The specific areas that I object to are as follows:

1) I strongly object to the increased housing estates and buildings on Green Belt land. I brought my house in this area for this specific reason that the local area would not be build on and don't want to move. It is simply wrong to build on this land that is established green belt area.

I have lived in both Ripley Village and Send the whole essence and feel of a village is based on the quality of the space. The very special area that is Ripley and Send needs to be retained as it is. I understand the issues with housing however there are many other options and it does not have to be built on our doorsteps!! Please keep our green belt intact.

Comment ID: PSLPA16/193  Respondent: 8775169 / Shaun Cheyne  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Needs assessment:

I questioned the scale of housing demand on which the revised draft local plan was based when first published. With the recent decision to leave the EU, and better control over immigration being a key argument in favour of this, I cannot see how the current demand forecasts are remotely reliable. I trust the study will need to be revised in light of the Brexit decision.

Evidence base and Infrastructure:

GBC have failed to provide sound evidence in terms of the Employment Land Needs Assessment 2015 (ELNA) which shows c. 80% reduction in employment space from the previous ELNA carried out by GBC in 2013. I simply cannot see why industrial space is needed at Burnt Common. With the proximity of the housing and industrial sites to the motorway, I expect that these will not serve the local community but rather be suited to those commuting in (to work) and out (if housed) of Send. This does not fit the objectives of providing housing for future requirements of the local community.

I want to point out that the GBC’s Transport Assessment was not available to Councillors for the vote taken on 24 May 2016, being published on 6 June. The plan does not have enough consideration for infrastructure overload. The road network in the Send area, particularly Send Marsh Road and the A247 linking Portsmouth Road and the A3 to Woking cannot handle any more that it already does. It is impossible at the moment particularly during peak times. The proposal of a 4 way interchange onto the A3 would mean that the roads through Send Marsh and Send would become the main link between the A3 and Woking, completely changing the village into a thoroughfare.

Attached documents:

Comment ID: PSLPS16/264  Respondent: 8775169 / Shaun Cheyne  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Specific objections to Policy A43 and A43a: Garlick’s Arch / Burnt Common / North Facing Slip Roads:

The proposal is for 400 houses and 7,000 sq m of industrial and warehousing space. I object to this proposal on the basis of the following:

- This site has appeared very recently, it was not included in the Regulation 18 Draft and has not previously been consulted upon
- It falls within green belt permanently protected by the NPPF which prevents merging of settlements
- The site is particularly sensitive from a conservation stand point, as it has ancient woodland with trees dating back to the 16th century.

- This will add significant traffic to the local road infrastructure around Send and Send Marsh; these roads are already heavily over loaded, and there is no space to widen given the residential surrounds.

No amount of expert studies can replace personal experience; I urge anyone considering these proposals to try and travel on the A247 road through Send at peak times to see how impossible it already is to travel between the A3 and Woking. The B368 through Send Marsh is used as an alternative when the A247 is overloaded, and this will become the next constraint. The surrounding proposed developments such as Gosden Hill Farm will without doubt also want to use the slip road and increase traffic through these already constrained and overloaded village roads.

- Services such as doctors are already overloaded in the Send / Send Marsh / Ripley area. It is close to impossible to get a doctor’s appointment within a 3 – 4 day window at the Villages Medical Practice as it stands with current population; where has this been considered, what is the plan to provide services to this significant addition of people?

- Flood risk: Over recent years the flooding in Send Marsh has become progressively worse with changing weather conditions. As example I quote winter of 2013 / 2014. Adding such as significant amount of development can only make this situation more severe.

- Nature of the village will be forever changed; Send and Send Marsh will no longer be rural villages given the scale of this development.

If there is a need for more industrial space (which I still question particularly in light of Brexit), then why would this not be an extension of the existing Slyfield Industrial Estate?

I trust my objections will be considered.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

(1) I object to the Policy A42 change at Clockbarn in Tannery Lane because:

The latest draft plan proposes 60 homes in place of 45 homes is 33% more than previously proposed. This shows a completed disregard for the previous comments and objections of the community.

Now more homes than previously proposed means all impacts previously stated will be greater, including:

1. This is an area with prolific birds and wildlife
2. Future access and traffic problems in Tannery Lane and at the A247 junction
3. Erosion of the Green Belt in our village
4. Surface water flooding, which is already a problem, will become even worse
5. It will impact open countryside views from the River Wey Navigation

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

(2) I object to the Policy A43 change at Garlick’s Arch because:

This again is an increase in number of houses and now inclusion of 6 Travelling Showpeople plots.

1. This is an area with prolific birds and wildlife
2. There is no proven demand for Travelling Showpeople plots in this location
3. It is beautiful permanent Green Belt and no “exceptional circumstances” have been stated or proven
4. Separation of villages is a key objective of the green belt. This development will join up Ripley and Send and defeat the key purpose of Green Belt
5. It is subject to frequent flooding and is currently a flood zone 2 allocation; I personally experienced this during heavy rains on recent years where the entire area is left flooded for days afterward.

6. It will generate excessive traffic in an area that is already struggling to cope with the volume of cars on the road.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

(3) I object to Policy A 58 at Burnt Common because:

This proposal was previously deleted from the 2014 draft as a result of the objections. I’m unclear as to why these have now been ignored. I object to these changes in the latest draft local plan on the basis that:

1. This is an area with prolific birds and wildlife
2. There is no need to build industrial or warehouse development in the middle of the Green Belt when only a few miles away Slyfield and Guildford are under utilised (they still have empty sites and industrial units)

1. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough. The proposal is out of kilter with this demand.
2. The impact on small surrounding roads will create more traffic problems in an area already struggling
3. It will join up existing villages and defeat the purpose of the Green Belt

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I wish to register objections to the Local Plan due to the number of homes (SHMA) to be built according to the Local plan. The number of homes (SHMA) to be built according to the plan is nearly 14,000 (690 per year for the duration of the plan). This number excludes any permissions that have already been granted, as well as windfall sites.

My objections are based on a number of reasons:

1. The SHMA number is resulting in Guildford Borough Council encroaching into the Greenbelt without special circumstances.
2. There is no justification of the figure or how it has been calculated.
3. The growth value is too high
4. Guildford Borough Council has not applied any constraints to the SHMA figure to allow for the lack of appropriate infrastructure or to protect our countryside from development.

With reference to the number of issues I have listed above it is clear that the number of homes (SHMA) included within the plan is far too high and needs reviewing by Guildford Borough Council As Soon As Possible.

Please acknowledge receipt of my letter

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The number of homes (SHMA) to be built according to the plan is nearly 14,000 (690 per year for the duration of the plan). This excludes any permissions that have already been granted, as well as windfall sites.

I object for a number of reasons:

1. There is no justification of the figure whatsoever
2. The growth is too high
3. Guildford Borough Council has not applied any constraints to this figure to allow for the lack of appropriate infrastructure or to protect our countryside from development.
4. This number is resulting in Guildford Borough Council encroaching into the Greenbelt without special circumstances.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The existing infrastructure of the villages is already overloaded. The roads already inadequate for the traffic using them now and are in poor condition, with many potholes. Many drains are blocked or in poor condition, while the pavements are narrow and in poor condition.

There is insufficient parking space at the shops, village hall, surgery and station.

The number of new houses proposed can be expected to add some 1500 more people to the numbers in the villages and generate an equal number of vehicle movements daily. The majority will not be employed locally, thus adding further to the commuter congestion.

There are insufficient school spaces for the number of local children needing them, forcing them to add to the road congestion by travelling to schools some distance away from Horsley.

The Medical Centre in East Horsley is already full in terms of patient numbers.

The proposals to alleviate these infrastructure problems appear to be more of a "Wish List" than a positive action list and, unless the many objections are heeded, the existing residents, plus the incoming new residents, will just be expected to put up with the problems arising while an existing pair of villages will have been despoiled for the short term gain and the long term future.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to submit my objections to the Proposed Submission Local Plan as it relates to The Horsleys on the following grounds:

Firstly and foremost, the greater majority of the proposed developments encroach on existing green belt land. This land should be sacrosanct, but once it has been developed in the manner suggested it will be lost to the green belt forever. Furthermore, once this principle has been set aside there can never be valid objection to further encroachment this green belt in the future.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/6182  Respondent: 8776257 / Euan Harkness  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield, now known as Three Farms Meadows – Allocation A35 – for the phased development of a new settlement of up to 2100 dwellings.

My objections to the draft Local Plan read as follows:-

The proposal that over 70% of new housing be built within the Green Belt rather than utilising brownfield land in urban areas needing regeneration.

The removal of the Former Wisley Airfield from the Green Belt which will result in an urban corridor stretching from London to Guildford.

The proposed number of 693 houses per year which is far too high and double the figure used in previous plans.

The threat that the Local Plan poses to my village of Ockham and the subsequent detrimental impact on its property.

The horrific impact such development would have on transport bearing in mind the narrow unlit lanes which are dangerous enough already. This would increase the volume of car traffic to an estimated 4000 additional cars plus wider vehicles like buses resulting in congestion both in the villages and the A3 and M25. There are no cycling paths and few pavements which would further compromise the safety of cyclists and pedestrians.
There is a lack of public transport and Horsley and Effingham stations are full to capacity already as are the station car parks.

To develop this site would involve a massive infrastructure project.

The current owners have zero intention of developing the site and are telling their investors they will immediately sell the property for a substantial profit once they have planning permission. As a consequence we would then have to go through the whole process with the new owners.

The property is registered in the Cayman Islands for secrecy and tax reasons this does not deter our representatives GBC.

There is insufficient consideration given to the environmental and ecological value of the site.

Air pollution in many parts of the borough is in excess of EU permitted levels, especially at the M25/A3 junction.

Finally, I object in the strongest possible terms to the continued inclusion of the Former Wisley Airfield now known as Three Farm Meadows where the planning application has already been unanimously rejected by GBC’s Planning Committee. Many authoritative sources across the UK have indicated concern to such a development on this site (eg Highways England, Thames Water, NATS and the Environment Agency).

I trust that these objections will be fully considered and that the Former Wisley Airfield now known as Three Farms Meadows Allocation A35, is removed from the Local Plan with immediate effect.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

My other concern is that the Green Belt is no longer being protected and by developing these areas not only are these green sites lost for ever but by their very position yet more traffic is created. The distinctive nature of Guildford with its green spaces and views across the town are what sets Guildford apart from the urban sprawl inside the M25. This is what has attracted so many to choose Guildford to live in. Please do not allow this to be ruined.

Answer (if comment is on questions 1-7 of the questionnaire): ()

My overriding concern is that at the **unacceptably high level of expansion**. Why are constraints to the overall housing target not being applied so as to protect the character of Guildford? The severe levels of traffic congestion, insufficient parking in Guildford town and pressures on services are already causing problems and strains without the addition of such an extreme number of houses.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I find it unacceptable that unlike other towns and areas, Guildford is not choosing to constrain its overall housing growth. Roads such as the A25/A246 Epsom Road, the A25 Boxgrove Road, A3100 London Road and A25 Ladymead are congested and at a standstill on an almost daily basis. The pressure of so many new homes outside the centre of the town will make this unbearable even with the highway schemes in the Plan. Please can a reduced and more realistic housing target be set.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
10. I am unhappy about the proposed highway schemes that involve demolishing property and road-widening in residential areas to solve the resultant congestion. The A3 improvements are not guaranteed to take place but they are being used to justify removing large areas from the Green Belt before detailed traffic assessments have taken place. Improvements and changes to the Junction 10/Heathrow stretch of the M25, will also take years to agree and complete. The draft plan, however, commits to building massive housing estates in the countryside before any road improvements are in place. Transport cannot be an afterthought. The proposed sites are often miles from the nearest railway station. Bus services even in the largest villages are almost non-existent and rural buses are too slow anyway for busy people. Many roads flood badly and have no footpaths making walking an dangerous option. The proposed permanent road closures and diversions will create longer journey times and increase the carbon footprint which is becoming increasingly bad with the number of vehicles using Ockham Road.

I hope you will give careful consideration to the draft proposal before leaping in and enabling irreversible change when other areas can be explored first.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The proposal to build 13,860 new homes is based on pre-Brexit projections for economic and population growth, including migration which now need to be revised downwards. It should also be noted that many people (looking at research statistics) work further afield thus the need for local housing becomes unimportant for the local population. We need development that meets the needs of the present and that does not compromise future generations. Local people should be empowered to shape their surroundings, understanding the character of their own unique areas (eg protecting the Green Belt). What about constraints and density?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The figure of 13,860 new homes is unsubstantiated. Guildford proposes to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. I

It should be noted that, the number of homes proposed, plus existing planning permission, plus expected “windfall” sites, exceeds the total of 13,860 which undermines the validity of the consultation. There is no clear Housing Target.

1. Tourism and visitors do not depend on new visitor “attractions”.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. We live in the Surrey Hills Area of Outstanding Natural Beauty and as such, any developments should be carefully considered and alternatives taken where possible. Rather than building upon a new site, Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking. I understand that new homes are needed for University students but Surrey University, has failed to use its existing planning consents (dating from 2004) to accommodate 3,000 students or development its campus (e.g. build on its extensive and underused car parks). If students were accommodated in this way, 2,000 homes would be freed up in town Building more homes in Guildford cannot make houses more affordable, given the proximity of the London market.

2. Local people should be consulted and not ignored. Villages need protecting in terms of both design and scale.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the Local Plan for a number of reasons.

1. No definition of “sustainable development” is given. The policy does not outline the long-term impact on economic, social and environmental issues in the area. Under this policy, any development will qualify as “sustainable”. The Green Belt is an example of sustainable development in practice and should be protected. It would be a major and irreversible change, if the Green Belt is built upon and would turn our fairly rural borough into an urban/suburban one like Woking. Once gone it is gone forever and it is not the Council’s right to give it away.

Comment ID: PSLPS16/512  Respondent: 8787297 / Alison Bird  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A21

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I support the Policy 21 that this site is allocated for extra allotments.

I think this is important because

• it encourages healthy exercise
• it provides a community and so helps to combat loneliness
• it encourages healthy eating
• it helps with positive mental health
• it increases biodiversity
• it provides an outdoor space for people to cultivate who do not have their own garden
• school children use a plot on the site which educates them in growing plants, an important skill for the future as food production will need to increase to provide food for an expanding population.
• encourages good relations with people of all ages, cultures and backgrounds.
• decreases 'food miles'

I have personally benefited from having an allotment. It gives a sense of relaxation and achievement when I grow something successfully. It also helps me feel part of a community.

It is important to me that vehicular access and parking for the allotments is retained at the bottom of the site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPA16/4129  Respondent: 8787969 / K Britton  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule
I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

2. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

3. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.
The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/7699   Respondent: 8787969 / K Britton   Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.
Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/”Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Answer (if comment is on questions 1-7 of the questionnaire): ()

Page 2687 of 3335
I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

Comment ID: PSLPP16/17030  Respondent: 8787969 / K Britton  Agent: PSLPP16/17030

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.
Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/17031  Respondent: 8787969 / K Britton  Agent:  

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations were available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure
will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways. Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have
considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public
consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt.
There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least
one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.
The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN were not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere.
Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:
1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites **as a whole** to be sound, because, but not limited to, the following reasons:

1. "Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt." Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

**Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing number is not justication in itself according to published ministerial statements** Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SQLP16/1883   Respondent: 8787969 / K Britton   Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? (), is Sound? (), is Legally Compliant? ()

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.
Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding
is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-
commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site
will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4580  Respondent: 8787969 / K Britton Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.
9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.
10. The impact on small surrounding roads will create traffic gridlock.
11. It will join up existing villages and defeat the purpose of the Green Belt.
12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I support the Guildford Residents Association response and oppose the expansion of Guildford.

I do not agree that there is an inherent need for so many additional homes, as I said in my earlier feedback.

The demand for homes is due to Guildford being a desirable place to live, and I wish to keep it that way. 25% increase will not keep it that way, will not protect the character of the town.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I attended the meeting on 8th April regarding The Wisley Property Investments Ltd (WPIL) planning application of January 2015 (Ref: 15/P/00012) and this was unanimously rejected by GBC following the recommendation of the GBC Planning Officers.

The reasons for the refusal of the application were many but included that the proposed development:
(a) was an inappropriate development within the Green Belt;
(b) would have a clear and substantial detrimental impact on the openness of the Green Belt and conflict with the purposes of including land within the Green Belt;
(c) failed to demonstrate that the benefits amounted to very special circumstances such as to clearly outweigh the harm to the Green Belt and the other harm identified;
(d) failed to comply with the objectives of policy RE2 of the Guildford Borough Local Plan 2003 (as saved by CLG Direction dated 24/09/2007) and chapter 9 of the National Planning Policy Framework;
(e) was within the 0 -400m and the 400m to 5km zones of the Thames Basin Heaths Special Protection Area, etc.
(f) would have a severe adverse impact on the safe and efficient operation of the strategic road network, and a severe impact on the efficient operation of the local road network;
(g) failed to deliver the required transport sustainability measures;
(h) failed to secure an appropriate provision of affordable housing;
(i) was detrimental to the viability and vitality of the existing district and local centres in the vicinity of the site;
(j) would result in loss of the safeguarded waste site;
(k) presented a dense and urban form of development owing to its quantum and scale;
(l) had an adverse impact on the setting and significance of a designated heritage asset;
(m) had an unacceptable air quality impact;
(n) impacted on education infrastructure;
(o) impacted on policing infrastructure;
(p) impacted on health infrastructure;

So I was completely baffled when we went to the next meeting at the GBC Millmead, on 24th May, to be told that they were going to go ahead with the plan anyway!! So why are we continually writing our objections when they are completely ignored?

Anyway, I object very strongly to the submission of the local plan, specifically for The Three Farm Meadows (the former Wisley Airfield). I could rewrite my objections from all my previous emails/letters, but I cannot see that they will make a difference!!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I would like to object to GBC’s Proposed Submission Local Plan unreservedly. As a local resident I have objected to all the proposals the GBC has put forward along with thousands of others in our area. It really is appalling that our objections have been completely ignored and the Local Plan has failed in the number of key areas to take into account or to answer our valid comments and criticisms submitted by thousands of residents and organisations in respect of the previous 2013 Draft Local Plan. What is the point of us all objecting whole-heartedly if we are just ignored. I have to say that in my opinion it raises questions about your governance and vested interests.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to object to the plans on the following bases:

The Green Belt was set up in law to provide for the maintenance and care of an area of countryside between villages to maintain not only the countryside but the individualism of the villages. If this is changed then the spread of conurbations will clearly mean the Surrey area ends up being a further extension of the London suburbs.

The well being of the countryside is paramount to the health, economy and lifestyle of many thousands of people now and in the future in Surrey. The loss of habitat will be irreversible and has huge consequences for the ecology of the remaining countryside.

The village of West Horsley in particular will not cater for large numbers of extra houses being added to it. There is only one over-subscribed State Primary School, a heavily over-subscribed Health Centre and youth facilities are few. The infrastructure of roads is already poorly maintained and certainly will be unable to cope with much more traffic without considerable change. Changes would be difficult since there is linear development of housing along many of the roads preventing widening.

The increase in the provision of low cost housing maybe a worthy ideal in theory but in practice it would put even greater pressure on the health and educational facilities of the village since these families would be the very ones most likely to use the educational facilities in particular. At least if the housing were of the more typical market range in Horsley the numbers would be less and the use of facilities would be less onerous.

The land in the Northern section of West Horsley (A40) is a most unsuitable site for development.

The southerly portion of it is in fact used and rented by me for my sheep and I have maintained it for the 20 years I have lived here in the house that was the former farmhouse attached to this land.
I can verify that this land is poorly drained and that the inclusion of this in Flood Zone 1 (low risk) is potentially an under assessment of the risk to it. Every year I have lived here the fields, particularly towards the northern sector of the half I use are both splashy and muddy for many winter months. I have attached photos showing a quite typical outcome of heavy rains, and these are in the southern sector where my house is.

You will note that my front drive that leads off the end of Nightingale Avenue receives the bulk of the run-off water from the road and many of the gardens. The field clearly acts as a sump and drainage area for this to soak away and infiltrate but development of the fields would aggravate that very drainage effect creating further problems for my garden, and possibly house, and ultimately others in the lower portion of the road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The proposed plan also includes for the development of Wisley airfield. This would have serious adverse effects on the surrounding villages;
   - The additional 5,000 residents is the equivalent of doubling the population of East and West Horsley combined
   - The proposed housing density is completely out of keeping with the surrounding rural area – five storey buildings are not appropriate in a rural environment
   - The resulting impact on light pollution, traffic and infrastructure has been gravely underestimated and proposed mitigation measures are totally inadequate
   - The cumulative impact of development in the borough and in the neighbouring boroughs of Woking, Waverley and Elmbridge has not been taken into account
   - The air quality surrounding the site gives grave cause for concern as levels of NO2 already exceed the EU limit
   - There is insufficient information on the impact on the water table and flooding in the area – the whole of the surrounding area is prone to flooding, and the impact of the River Mole is considerable.
   - Additional traffic will have a negative impact and cause irreparable damage to historic houses and other buildings in Ockham, Ripley, Downside and further afielde.
   - The development will impact the listed buildings adjacent to it such as Yarne, Bridge End House and Upton Farm
   - The closure of a number of local roads coupled with a massive increase in traffic will impact a large number of road users from Cranleigh to Cobham and everywhere in between.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Draft plan does not include for any upgrade of infrastructure, and the current infrastructure will not be able to cope with the proposed increase in housing. Horsley has insufficient infrastructure to cope with the additional housing and people who would move into the area – roads, buses, schools, shops, and medical facilities are limited in the area as it is. Any increase in population would put an impossible load on these local services.

The increase in proposed homes in the area from 1111 to 1644, represents a 67% increase in dwellings for a small village. This kind of development will put an unreasonable strain on roads, drainage, utilities, parking at the station etc. which will not be able to cope.

Roads are generally in poor condition as it is with considerable damage during the past winter which has still not been effectively repaired some 8 months later – particularly East Lane and Ockham Road North and South. These are heavily trafficked as it is and a 67% increase in traffic will mean roads will soon collapse. There was extensive flooding in the area last winter – not only will that have detrimental effect on the roads but on the proposed houses too.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. The railway station whilst providing a good service, already has a good sized car park, which is always full during the week. As many people commute to London, a 67% increase in population will almost certainly lead to more people using the station. If this was in proportion, then the car park would not be able to cope. Also there is no scope to increase the size of this car park.

1. Public transport in the area is limited – the bus service is infrequent and would not be able to cope with an increase in public using the service.

1. It is likely though that most people will have a car, or more than one car. This will generate a huge increase in traffic and will have a knock on effect to other villages nearby such as Ockham, Clandon, and Effingham.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/760  Respondent: 8790529 / Nigel Carter  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to object to the proposed development of the East and West Horsley areas, and proposal to create 821 homes in the next 5 years.

My reasons for objecting are;

1. The Plan suggests that a significant area of East and West Horsley are removed from the Green Belt area, which is intended to limit development to preserve the natural environment and beauty of the countryside. I have yet to see any convincing argument that removing Green Belt status is in the best interests of the residents Guildford Borough Council or the environment for which we are all responsible, when other options for development have not been more fully explored within the borough, which would negate the need to move the boundaries of the Green Belt.

2. In most cases for development a Business case would have to prove a Need, and then options to meet that need. I do not believe that Guildford Borough Council has satisfactorily explored all options for development within the Borough excluding the requirement to redraw the boundaries of Green Belt land. Neither do I believe that the Need has been properly defined – merely it is a theoretical quota that GBC thinks it should apply – this is inadequate for a robust business case.

3. The boundaries of the Green Belt should be preserved – there is no case proven for this to be changed.

4. Horsley, being within the Green Belt, is also adjacent to the Surrey Hills, an Area of Outstanding Natural Beauty. Any change to the Green Belt status, and possible future development will have a detrimental knock on effect to the surrounding countryside.

1. Guildford BC should consider other brownfield sites, and sites within existing towns, rather than villages, where infrastructure, transport and communications can more easily cope.

1. Finally there is little or no mention of the One Public Estate initiative backed by the Cabinet Office. This initiative seeks to aid Local Authorities to make more efficient use of its buildings and land. It aims to increase efficiencies, reduce footprint and release surplus land and buildings back to the community for housing.

Guildford Council needs to explore this potential before pushing forward with any changes to the Green Belt.

For these reasons, I urge the Council to maintain the Green Belt status and retain the current boundaries, and reject this proposed development plan, and re-examine the options outside of Horsley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing to object to the local plan, and the proposed development in East and West Horsley.

- Green Belt - the proposed policy re the green belt is totally inappropriate. The Green belt forms the cornerstone of the region, and should be used a basis of planning. We should be celebrating it, it is one of the highlights of the region, not trying to destroy it. The villages are a huge part of that, and there should be no removal of the villages, particularly the Horsleys, from the Green Belt. No ‘exceptional circumstances’ concerning this have been demonstrated, and I totally oppose the plan to inset the villages.

- Extending the boundaries of the settlement area is unjustified. No sound, evidence-based reasons have been given for this, and this seems only to be used to earmark land for a totally inappropirate amount fo additional development.
  - The Horsleys offer a rich and varied mix of well established low housing density settlements with a considerable number of historic buildings.
  - Positioned on the north side of the North Downs, partly in the Surrey Hills AONB, it attracts a considerable number of recreational visitors (walkers and cyclists) through the seasons each year.
  - This is also a reason why many of the residents have chosen the area in the first place, and the proposals would destroy the communities and countryside loved and nurtured by residents.

- I believe the evidence for the proposal is flawed.
  - For example, the key Evidence document ‘Guildford Borough Economic Strategy 2013-2031’ makes no case for locating large numbers of homes in West and East Horsley or neighbouring villages.
  - Station Parade is designated as a “District Centre” This classification results form a complete misreading of the character and nature of facilities in the (very small) vilage centre, and would inappropriately target the area for future urban development. I think some of the figures, eg the number of post offices used to come to this conclusion were just wrong
  - The inflated number of houses proposed, flows from a Strategic Housing Market Assessment, the modelling of which is not revealed to the public, nor I believe to GBC. The target is then further inflated by GBC to give a population growth over 2/3 higher than official national population estimates for population growth in the Borough. Can you review these numbers?

- Flooding: The site behind Ockham Road North in East Horsley is partially a level 3 flood risk area, and local residents are well aware of how much standing water there is in their gardens after rain. Building on such land will only exacerbate the problem. We already know what happens to local roads when it rains – the drains can’t cope

- Pollution: The large increase in volume of traffic will cause an increase in nitrogen dioxide and particulates in the environment – already a cause for concern in several areas in the Borough

- The impact on infrastructure and facilities, which are already stretched to breaking point, does not appear to have been considered.
  - Local Road Network: The impact does not appear to have been considered, for example int he case of the Wisley Airfield the SCC report states that “consequently, it indicates that further thought may have to be given to managing traffic in this area as part of a transport assessment should the development be progressed”. Surely the infratsrue and any changes need to be considered before signing off a development proposal
  - Traffic and parking: Assuming that every new house has at least 2 cars, this means potentially 6,000 more cars within a three mile radius of the villages. The impact on local roads will be tremendous. Parking at Horsley & Effingham junction stations (which are already full), at the shops , at the medical centre and at the village hall will all be affected.
  - Schools: Local schools are already at capacity – where will newcomers go to school? No extra places are planned in the Horsleys, and the school places proposed at Wisley Airfield will not planned until many years into the project.
  - Medical facilities: Similar situation to the schools.
The total number of houses proposed in the Horsleys, over 500, is on such a vast scale compared with the size of the villages currently. Surely, a reexamination of the number and proposed sites is required. If it wasn’t so sad, it would be laughable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Development of over 2000 houses (former Wisley Airfield), would have a huge and detrimental impact on the Horsleys, The mixed development, including retail, commercial and traveller development, would have a huge impact on the character and infrastructure of the Horsleys. They would inevitably get sucked into a kind of urbanization by the back door.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am 21 years old and I have lived in Horsley all my life and I write to object to the above proposed local plan and what you propose to do within taking land out of the green belt for future housing in East and West Horsley.

This is totally unfair for everyone that lives in East and West Horsley, I love my village and it is completely unnecessary to seek to increase our village by over 500 residential homes. These proposals will have a massive detrimental effect on our homes and our lives. All the initial consultation on the strategy and the various objections appear to have been ignored.

East and West Horsley as villages do not have the facilities for their population to be doubled. Our school is oversubscribed and so is our medical centre.
I therefore strongly object to your proposals.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have lived with my parents in Horsley for number of years and I write to object to the revisions to the new local plan and taking the I lorsleys out of the Green Belt. I note that with the amended 2017 plan that four of the original proposed housing developments sites remain. This is unacceptable to increase our village, by nearly 400 proposed residential units against an existing supply of circa 1,000 residential units. The evidence that exists is exaggerating the need for expansion as shown clearly by the GRA report on housing. Exceptional circumstances must be demonstrated in order to develop in the Green Belt and this is not an exception. It is wrong to take these sites out of the Green Belt in a single plan. What about our future generations such as mine? In addition why is Guildford choosing not to constrain its overall housing growth unlike other local authorities?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have lived in Horsley with my husband for 20 years and I write to object to the above proposed new local plan and you proposals to enlarge the boundaries of the villages of East and West Horsley and for the village areas inside these boundaries to be removed from the Green Belt.

This is unacceptable to all the existing residents who live in East and West Horsley, we treasure and enjoy our village environment and it is completely ridiculous to consider increasing our village by approximately 533 residential homes against an existing supply of circa 1,000 residential homes.

No-one in our village is in agreement with amending the green belt and it is simply unacceptable and undemocratic that this is even being considered.

It will have a detrimental effect on our homes and our lives. And any consultation to date has been ignored. Your proposed Local Plan is also contrary to Central Government Policy on how the Green Belt should be treated. It has been stated by Nick Boles the minister formerly responsible for planning that exceptional circumstances are required for any changes to Green Belt boundaries

- unmet housing need is not such a circumstance.

West Horsley as you are aware does not have the infrastructure or facilities for its population to be doubled. The only school is oversubscribed and it is impossible to make an appointment at the village medical centre because there are too many people in the village already.
The identification of the various sites has been undertaken in a very amateur way - with little thought to access/egress, topography or risk of flooding.

I therefore strongly object to your proposals.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have lived in Horsley for most of my life and I am writing to object to the above proposed local plan and in particular to the proposals for future housing in West Horsley involving taking land out of the green belt.

This is unacceptable to all who live in West Horsley, we love our village environment and we are not prepared to accept an increase of potentially 400 residential homes, a massive increase in the size of our village.

No-one in the village wants this nor does anyone living locally want the village removed from the Green Belt, it is unacceptable and undemocratic that this is even being considered.

This will have a terrible effect on our homes and our lives. You need to listen to the views of local people, it is our village and we are not going to accept these proposals.

West Horsley as a village does not have the infrastructure or facilities for its population to be increased like this. The school is full and it is impossible to make an appointment at the medical centre.

The identification of the various sites has been undertaken in a cavalier unprofessional fashion with no thought to access/egress, topography or risks of flooding.

I therefore strongly object to your proposals.

Comment ID: PSLPA16/49  Respondent: 8791521 / Richard McClean  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Ripley

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I have followed the recent development plan in some detail. I was therefore very surprised when Ripley was proposed to be removed from the Green belt and the latest proposal to Build Some 400 houses near Burnt Common. Why is it that after so many hours of work has been put in to the major plan that this new proposal suddenly is put forward?

I have lived in the Ripley area for many years and have seen its development which have I believe generally been very sympathetic to the Green Belt. However you will know that the infrastructure is already incapable of handling further major housing developments. Anyone who tries to commute find schools, let alone park a car at our stations knows only too well of the problem.

I believe there are sufficient brown field sites in the Guildford area for several hundred houses and I do not include the Wisley proposal now "put back on in the plan" if this is true why are you not using these sites? I am against the Wisley proposal from its Cayman Islands Owner and to remove Ripley from a green belt status is quite unacceptable. Is this a political decision from no 10? if it is many of us will despair of the democratic process but will continue to fight for Ripley to remain in the Green Belt.

Finally I would like to know why Wisley has been put back into the plan, and why the committee feels it appropriate to remove Ripley's status. I would like to see the minutes of the meeting that took this decision, that probably would be too much to hope for.

I had expected better of the council I voted for and am profoundly disappointed with this latest proposal that you have slipped in.

Ref The Proposed Submissive Local Plan

1. I would like to express my concerns about a number of the proposals in this revised Local Plan, and the evidence and assumptions on which it is based. In particular, I am concerned over the number of homes proposed over the period of the plan. The Plan calls for a 25% increase in the housing stock across the borough. This is set against the Office of National Statistics (“ONS”) projections of a population increase of only 15% for Guildford Borough over this same period.

2. Statement by all political parties and candidates in last year's election said that “We will continue to protect the Metropolitan Green Belt” this has proved clearly not to be the case. That view was fully supported by the now majority party. A similar statement is still retained in the “proposed plan”. However, GBC appears now to be totally disregarding these undertakings, with the policies it has set out in the Local Plan, whereby some 65% (see Appendix A) of proposed new developments will take place on land which is currently Green Belt. The infrastructure proposals education, transport, waste water treatment, to support this level of development are completely inadequate even to meet the needs of what is there at the moment, as a result of underinvestment in the past let alone the proposed new developments.

3. I therefore OBJECT to the Local Plan as a whole.

In order to expand upon and emphasise points a more detail analysis is provided in the following paragraphs, together with a number of other more detailed points of particular concerns.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Strategic Highway Assessment Reports

The comments set out below relate to the above report. All heading and numbers relate to that document. The text in black is taken from Strategic Highways Assessment Report, the text in blue are my comments and or objections.

1.1.1 Guildford Borough Council (GBC) has prepared a Guildford borough Proposed Submission Local Plan: strategy and sites (June 2016), hereafter referred to as the Proposed Submission Local Plan. Given the similar timescales, a joint modelling assessment was undertaken by Surrey County Council (SCC), GBC and Waverley Borough Council. The absence of any cooperation, involvement, with other Boroughs mainly those to the East including Elmbridge and Mole Valley it is impossible to determine the true impact of traffic flows through the Borough. For example how much of the traffic entering Guildford from the east flows through the borough, or end it journey in the borough. In a similar way how much traffic entering from Waverley flow through the borough and or end it journey in the borough. This may have been
captured in respect to Waverley but is not clearly identified from the east. The impact of the Wisley development will have significant impact on SRN & LRN in other boroughs on Guildford north east borders.

1.1.3 The assessment made use of SCC’s strategic transport model, SINTRAM. It has been acknowledged by SCC that the SINTRAM model is not suited for measuring the detailed impact of developments on traffic on SRN or LRN in a localised area. It even has some limitations when used on a county wide basis. It is not fit for purpose in the local planning scenarios; This has been pointed out by a number of transport consultants including one who prepared a recent report for Waverley.

1.1.4 This document sets out details of the transport model, the forecasting methodology, as well as the results and analysis of the traffic impacts of the potential development sites and future highway mitigation proposals.

If you are to achieve the objective set out in 1.1.4 how can you make the statement below?

1.1.5 This study does not consider aspects such as:

• Accessibility to facilities and services by either car or non-car modes from the potential development sites;
• The impact on existing public transport services such as passenger overcrowding and possible delays to services as a result of increased traffic congestion;
• What opportunities there might be for reducing the number of car trips to and from any potential new developments by enhancing sustainable transport facilities and services; and Perhaps this one is best discounted as perceived mode changes expectations are now being discredited by a number of recent studies.
• What additional highway mitigation might be required to address the identified impacts?

1.1.6 Accessibility issues and impacts on public transport services might have to be considered in separate study work. The consideration of increasing sustainable travel and identifying additional highway mitigation could be done at a later stage, potentially to support submission to the Secretary of State or Examination in Public. This report will act as useful starting point for undertaking such additional study work.

Without the above work in 1.1.5 and 1.1.6 the Guildford Borough Proposed Submission Local Plan in is not fit for purpose as there is no evidence to suggest it is deliverable. And it is questionable that it even identifies what is needed. The evidence to support its deliverability has to be part of the public consultation now, not in the future.

2.1.4 This makes SINTRAM a suitable tool for Guildford Borough Proposed Submission Local Plan assessing the potential traffic impacts of the potential developments and future highway mitigation proposals at this initial review stage. It is the assessing of the potential traffic impacts of potential developments that in the local context SINTRAM is unable to do. It is at best a ball park assessment tool.

3.2.3 Proposed improvements

• A3 southbound off slip and northbound on slip at Burnt common accompanied by traffic management through Ripley.

The junction at which the most disruptive impact will be felt as a result of the Wisley site is in Ripley and this is "dismissed with a traffic management solution". The developers of Wisley and their various consultants together with SCC have not been able to come up with a satisfactory solution in over 3 years of discussion!! Could it be that there is no viable solution!!

Old Lane converted to one-way northbound between the Wisley access and Common car park; This proposal has been objected to by local residents and would require separate consultation. The conversion of old lane to one way will place an increased load on Painshill roundabout which already causes tailbacks onto the A3. More traffic going into Cobham and increased in traffic on Horsley Road which is classified the same as Old Lane. If this proposal were to go ahead it would simple move an even greater problem somewhere else. This will not benefit local residents in any way.

• A3 Ockham Interchange improvements;
The details produced for these improvements were not approved by HE or SCC. as there were road safety issues.

Figure 3.1a: Outline of scenarios

The defined development has changed from those defined for scenario 2 in 3.2.1 with no satisfactory explanation as to why.

3.2.8 The potential future development sites that have been identified by GBC have been captured in 2031 scenario 2 onwards.

Not consistent with fig 3.1a. which definition is correct?

3.4.1 Vehicle trips generated by each committed and potential development site were calculated using the information contained within the pro-forma and the Trip Rate Information Computer System (TRICS) version 2012(b) 6.10.2. But no information is provided on the comparable locations in TRICS. This is critical particularly when dealing with new town isolated developments that are not regarded as urban extensions. The ones chosen by the developer for Wisley were totally inappropriate and not accepted by SCC. who requested a 20 % uplift was required.

3.4.8 A cumulative summary of the trip generation for the scenarios and time periods for the whole of Guildford borough has also been provided in Table 3.5.

Page 2726 of 3335
It is noted that the zone definitions have changed from those set out in table 3.5 zone 119 North Horsley & Effingham

2.5.2 The borough of Guildford is split into 68 zones

119: East Horsley & Effingham borough of Guildford zones

502: Horsley – West Horsley –

There is no such location as North Horsley. Development is planned to take place in both East & West Horsley.

It is also interesting to note that more traffic is generated in zone 119 in scenario 1 than when development takes place in scenario 2 see table above. How can this be the case?

The high level of arrivals in West Horsley am in scenario 1 could be accounted for by school runs but again why do they reduce by nearly 100% when the developments are built?

The two railway station at Effingham and East Horsley will serve the Wisley development yet the scenario 2 AM traffic arrivals in zone 119 and 502 both show lower level of traffic than scenario 1 with no development. How can this be the case?

Table 3.3: 2031 scenario 2, weekday average AM peak hour (1600 – 1900) correction 0700- 1000 or are they in fact the PM figures they might make more sense if they were.

3.6.1 The origin and destinations of trips travelling to and from the development sites, known as trip distribution, were derived from the 2011 Census journey to work dataset. However, GBC instructed SCC to apply a different distribution for the proposed development at Wisley Airfield, specifically the distribution developed for the site specific transport assessment as documented in ‘Wisley Airfield Transport Assessment’ (WSP, December 2014).
How can GBC justify instructing SCC to apply a different basis for determining trip origin and trip destinations? How can they justify using a third party assessment with a vested interest in the outcome. SCC had questioned the outcome and methodology of the original TA submitted by WSP

3.6.4 Table 3.6 details the modelled zones that formed the six distributions.

Separate average distributions were developed for each of these areas using the journey to work dataset.

It is unclear why Zone 119 was not included in the journey to work dataset used in the analysis East Horsley with two railway stations and little if any internalisation (little of no local employment) was not used as it would have shown unique profile compared to other locations, This is a serious omission.

4.1.5 The strategic highway assessment therefore accounts for the transport demand from all planned development proposed in the Proposed Submission Local Plan in the period to 2033, including the new homes, employment space, retail space and schools. It also accounts for all planned development proposed in Waverley Borough Council’s forthcoming draft Local Plan in the period to 2032, and all transport demand in the rest of the United Kingdom to 2031.

This is not true as the trip generation used for the Wisley development is not correct nor has it been agreed with SCC it does not included the school and have used unsupported internalisation data.

4.1.7 firstly, in Scenario 3, those key highway schemes providing access to the large development sites and local highway schemes in both Guildford and Waverley boroughs, are tested;

This is not correct as it does not include the works associated with the Wisley development and Wisley should be regarded as a large development.

4.1.8...... The strategic highway assessment also makes no allowance for any internalisation of trips within the larger sites. The figures used for trip generation on the Wisley site TA did take account of an internalisation adjustments of 20%. So how it is the trip figure you using that does not include internalisation are currently is lower than that in the TA. Also on the Wisley site no account was taken for trip generation to the secondary school from the catchment area off site

4.1.11 More detailed modelled forecast traffic impacts for the average PM peak hour can be set out in an addendum report at a later date. This is not acceptable with your current knowledge of the sensitivities surrounding existing traffic flow close to the Wisley site The detailed analysis is required now. It is acknowledged that the SINTRAM modelling is a broad brush tool that requires more in-depth work before the full impact locally of development can be assessed. If the Local Plan is approved in its current format planning permission would be presumed as approved with little incentive to agree or consult over detail. Developer's lawyers will be doing cartwheel and back flaps in anticipation.

Figure 4.1: Initial assessment: assigning Local Plan related average AM peak hour trips to an uncongested network to show preferred routes of travel.

4.1.3 However, it should be noted that this assessment assumes all drivers will follow the least cost route as perceived in uncongested conditions. Furthermore it assumes that there is no highway mitigation in place. Why have no alternative scenarios been modelled e.g. drivers following the quickest route, or least congested.

4.2.1 Tables 4.1a and 4.1b show the network summary statistics for highways in the study area of Guildford borough only, for the weekday average AM and PM peak hours, broken down by road type for each model scenario. The potential traffic impacts are reflected in changes in vehicle kilometres travelled vehicle hours and average speed.

The conclusions reached cannot be validated or relied upon as the above tables 4.1a and 4.1b contains over 100 arithmetical and computing errors this is clearly the result of cutting and pasting spreadsheet results from numerous runs of data resulting in a mismatch of inconclusive and unreliable data.

I would like to add to these comments following a more in-depth analysis of the numerical data.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
5.5.POLICY A35: Land at former Wisley Airfield

5.5.1. Proposes approximately 2,000 homes to be built on the site of the former Wisley Airfield. This will lead to the creation of the largest settlement in Guildford Borough outside of Guildford town. In effect it is proposing to create a New Town in the heart of the Surrey Green Belt.

5.5.2. I have major concerns about this proposed development and have objected against both recent planning applications. I consider this proposed development to be a severe contravention of Metropolitan Green Belt policy. It will result in a New Town being created of very low sustainability. It will have a major adverse impact on infrastructure across a widespread area, including East Horsley. Above all it will create a devastating impact on traffic on both LRN & SRN in the area and irreversible destruction to the character of one of the most picturesque and historic areas of the country. Development at the proposed density and building mass that will create an urban enclave in the countryside visible from mile. Yet for those who have to live there no private open space, gardens or allotments miles from any social entertainment, miles from any employment. Everybody jumping into car to overcome the isolation how does that fit with the NPPF. There is no evidence that travel mode changes will prevent that happening.

5.5.3. I would like to record my objection to the inclusion of Wisley site within the local plan as a potential housing site the planning application 15/P/00012 | AMENDED DESCRIPTION: was rightly turned down because it was in the green belt and that the developer had failed to satisfy the HE and Surrey County Councils over this development likely impact on the road network. Nothing in the Local Plan has changed that position.

5.5.4. A Local Authority cannot rely on future investment commitment by third parties to deliver the infrastructure requirements that are required to support their Plan. Without that certainty A Local Authority under the latest updates in the Housing and Planning Bill could leave themselves with an obligation to provide the required infrastructure simply because the site was included in the local plan with presumed approval. This was previously the case when planning permission was granted a developer could for example requisition a sewer and a Water Authority was obliged to provide said sewer at their cost.

5.5.5. The same could apply where a site if included in a LP (with its presumed approved status) the LA would need to have the supporting infrastructure either in place or fully designed and costed proposals in place to support any development. Clearly this is not the case with GBC local Plan there is no proof, evidence that for example the transport infrastructure proposed will let alone work, can be delivered, or have been fully costed. In the plan are costing for some projects range from £100m to £250m hardly a well thought out budget planning advanced for a programme of work. 58 Projects out with only 4 committed!! How can a local plan go forward with so much uncertainty? Developments, more importantly people will be dependent on all packages being delivered. It like saying to somebody, you have the car now but the wheels will come next year. You acknowledge what underinvestment in infrastructure has done in the past. You plan will provide the same result as in the past, caused by the very same reasons, pushing forward with growth and homes
without the infrastructure being there to support it. Get the infrastructure in place first the rest will follow the funding can still be obtained from the developers at least by that time you will know the full cost.

5.5.6. The comments made by Natural England and there apparent approval of Air Quality issues on this site are being legally challenged.

5.5.7. The proposed one way restriction on Old Lane south of the A3 as proposed in the TA from the developer and seemingly repeated in the local plan evidence base is apparently acceptable to the Highways Agency. This restriction will however not occur adjacent to the A3 but some distance from the slip road. The impact of this closure to southbound traffic will impact on minor roads in the area not controlled by HE but by SCC and no closure notice is approved nor have SCC approved such a restriction.

Answer (if comment is on questions I-7 of the questionnaire): ()

5 Site Allocation Policies

5.1. There are 5 East Horsley sites identified in the LAA, two of which are allocated under Local Plan policies, whilst the adjacent parish of West Horsley has 6 sites identified in the LAA, four of which are allocated in the Local Plan. I would comments on these site policies are as follows:

5.2. Policy A36 Hotel, Guildford Road proposes to re-develop the current Thatcher’s Hotel for housing. Whilst I do not object to housing development on this landmark site located at the entrance of the village, it is absolutely essential that it is developed in a manner that is in keeping with its prominent location. The site is close to the East Horsley Conservation Area and housing designs and site configuration must reflect the sensitivity of this setting. There is some concern over the loss of employment of which there is very little in the village and the also the loss of the hotel as a base for tourists. My principal concern is over the number of houses proposed for this site - approximately 48 dwellings. (Original SHLA said 32)At 48 units it gives an implied gross housing density of 37 dwellings per hectare, which is exceptionally high for this site. The average housing density across the East Horsley Settlement Area is 8.1 dwellings per hectare and the highest density found in any of the roads around this location is 13 dwellings per hectare and that included some semi-detached homes. Less than 30 units would be more appropriate for this location

Answer (if comment is on questions 1-7 of the questionnaire): ()

### 5.4.Policies A37, A38, A40 & A41 in West Horsley

5.4.1. The LAA has identified 6 sites in West Horsley for potential development, the four largest having allocation policies within the Local Plan. The total housing number arising from these 6 sites is 405 homes in total. For a village which had 1,124 dwellings at the 2011 Census, this represents a significant increase of 36% over the plan period, an enormous proportional increase by any standards.

5.4.2. The four policy sites are all located within the Green Belt. One is a partly Brownfield development but the other three sites are all open fields used for agriculture and all lie within the current Green Belt at the edge of the Settlement Area. The reasons presented by the consultants, Pegasus, in the Green Belt & Countryside Study to justify these Settlement Boundary movements appear highly questionable and in no way meet the requirements of the NPPF that such boundary movements are only to be made in exceptional circumstances. These movements clearly represent a deliberate pushing back of Settlement Boundaries in order to provide more Greenfield sites for housing development.

5.4.3. The only point in favour relates two of the sites one being partly brown field and back infill of earlier ribbon development and the other are small paddocks used for grazing horses. It is stretching the rules nevertheless to justify removing them from the Green belt. The infilling proposed will create a hard edge interface with the countryside for which there could be little justification or mitigation.

Answer (if comment is on questions 1-7 of the questionnaire): ()

### 5.3.Policy A39: Land behind Ockham Road North, near Horsley railway station.

Proposes a housing development of some 100 dwellings on a 5.7 hectare site that is well hidden behind the houses on the western side of Ockham Road North. Access is to be secured by demolishing the first two houses next to the railway bridge. This site will provide a good location for housing including affordable homes as it is centrally located in the village close to shops and railway station. The site is partly in flood zone 3 and would restrict numbers of units built. Because of its central location it could provide some employment opportunities in the form of offices and as an extension to the station car park.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Housing

Policy H2 Affordable Homes

2.1. Whilst I support the principle that developers and landowners should be required to contribute part of their profit or windfall towards the cost of social housing in the borough. However, there is a ‘one-size-fits-all’ policy that is seriously flawed and likely to prove highly inefficient, if not unworkable, in the longer term. As mentioned above the DCLG advice to those assessing need was to not just consider need in the old way ("it is not an old style needs survey") formed part of the advice given. It asked for the survey to take in viability, deliverability of both market and affordable homes. GBC commissioned a study on affordable housing needs and viability the study undertaken by consultants who had access to a stakeholder's panel of mainly those with a vested interest in some of the outcomes. It is hardly surprising it did not come up with the best results as there would have been too much influence from the development lobby lead to the following mix for affordable housing and a level of 40% on all developments. This does not mean that affordable homes have to be built on every site but that a contribution towards affordable homes has to be provided on every site. They can be built elsewhere a route taken my many local authorities who see it as an opportunity to build homes where they are most needed.

2.2. The Local Plan also indicates that 40% of all new affordable homes should be 1 bedroom. Now if the same question is put to those seeking affordable homes only 26% are looking for 1 bed. The information taken from Home Choice indicates what the customer wants. Between 46% & 50% say they want 2 bed accommodation. The information contained in the local plan is what the developer wants to deliver

<table>

<td>51</td>
</tr>
<tr>
<td>3 bedroom</td>
<td>25</td>
<td>20</td>
<td></td>
<td>16</td>
</tr>
<tr>
<td>4+ bedroom</td>
<td>5</td>
<td>8</td>
<td></td>
<td>8</td>
</tr>
</tbody>
</table>
2.3. Whilst the consultants who undertook the SHMA and the Viability Study were given access to GBC waiting list it is not known by senior housing management staff if this information was taken into account in the conclusion reached. It has subsequently been confirmed by GBC own Housing Management that **2bed accommodation is the one most needed**. So why does the plan say more 1 bed are required **are GBC happy to allow the developer to determine the mix?**

2.4. Also in this policy GBC have taken no account whatsoever of the differences in affordable housing need across the borough. It is to be applied at 40% in all locations, ok to get the money for 40% but why build them where they are not required. This policy and it inflexibility has significant consequences in East Horsley, whilst scoring high in the sustainability hierarchy is the area with the lowest demand for affordable housing in the borough. I support the building of a few affordable homes in East Horsley and other rural areas, however, East Horsley is not protected as a ‘rural area’ under the 1997 Housing Order and therefore is not exempt from the right to acquire or enfranchise entitlement. In other words tenants can acquire,( buy) or enfranchise any affordable properties built in the village– a factor which may limit the number of housing associations wishing to take on new affordable properties in our village. Housing Association whose tenants do exercise the right to buy their housing association property this will be funded by GBC having to selling off some of its own more expensive properties. This sounds like a loose - loose rather than a win - win situation if cash payment in lieu are maximised and land is bought and homes were built in areas where they are most needed. A large number of GBC own properties in East Horsley have already been bought by tenants.

2.5. Under Policy H2, 40% of all but the smallest development sites less than 10 units in East Horsley will be required to have affordable housing built upon them, irrespective of whether they are in an appropriate location and irrespective of whether there is actually a demand for more social housing in that area. As a result of this policy, a significant volume of social housing is likely to be built in places where it is not needed and offered to tenants who do not want to live there nor have jobs near that location. Research undertaken at Oxford University has indicated that people who are housed in remote rural communities migrate back to urban areas for recreation and work. This involves the increased reliance on a motor vehicle and increase traffic results something the NPPF rejects as unacceptable.

2.6. Policy H2 thereby fails the test of sustainability and should be radically revised. If not, the outcome will be serious ineffective in the provision of social housing in the borough. In an area such as East Horsley this is likely to be manifested in a buying-up of properties for investment purposes, quick re-sale or to re let at market rent all of which point to these homes become lost to the affordable market sector.

2.7. There is a problem in East Horsley with average house prices exceeding £1m a shortage of smaller homes and I would support any policy that would prevent any new development containing 5 bed homes with developers encouraged to build more 2&3 bed market homes for young families and downsizers, the latter currently house blocking many 4, 5, 6 bed homes which they no longer need.

2.8. I therefore **OBJECT to policy H2.**

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()
1. **Infrastructure and delivery**

4.1. The Infrastructure and delivery section of the Local Plan sets out that the fundamental rationale of what is proposed to support the delivery of the Local Plan and in particular it is about the provision of the infrastructure needed to support the development. There are however serious deficiencies in the infrastructure as it is. The infrastructure does not adequately support what is already here.

4.2. In East Horsley:

4.2.1. The roads are in poor condition with many potholes, and are generally unable to sustain the current levels of traffic, particularly the increasing levels of HGV traffic;

4.2.2. The principal through roads traversing the village are narrow and winding, have a series of pinch points, have sections without any pavements and are generally unlit. As a senior SCC councillor remarked at a recent public meeting in the village hall: “East Horsley has lanes, not roads.” East Horsley’s ‘lanes’ are totally unsuitable for high volumes of traffic, in particular for the volume of HGV’s now using them;

4.2.3. Many of the drains are blocked or otherwise in poor condition giving rise to frequent surface water or flooding when it rains;

4.2.4. The pavements are in poor condition. As well as being narrow, they are often uneven and/or cracked making it difficult for example for people with pushchairs or prams or in wheelchairs; Because of poor road drainage road edges become flooded or turn into min streams and pedestrian are regularly covered in water as traffic passes by.

4.2.5. There are insufficient school spaces for the number of local children needing to go to both Primary and Secondary schools with the result that children are often allocated to schools some significant distance away such as Dorking; Merrow; or Leatherhead

4.2.6. The Medical Centre in East Horsley is already at capacity in terms of its number of patients.

4.3. It is recognised that, as stated in the Local Plan, that maintenance of adequate infrastructure and its expansion to meet growing needs is the responsibility of the relevant infrastructure provider. This is often not Guildford Borough Council itself but is for example Surrey County Council or utility companies.

4.4. In respect of East Horsley, there are only two specific proposals in Appendix C: LRN 25 - East Horsley and West Horsley traffic management and environmental improvement scheme. It is not clear what is proposed here, and its timing and funding have to be considered uncertain. It is stated that funding will, at least in part, come from developer contribution. However, it is not at all clear what development is likely to give rise to such a contribution, but it certainly implies that funding could only come if there were a development; and

4.5. HSC 5 - Expansion of East Horsley Medical Centre to provide additional capacity and services for future population in years 5 – 15 of the plan.

4.6. There are no proposals in respect of all the existing problems with for example roads, pavements, drainage, and schools. Furthermore, it is inevitable that the proposed developments in East Horsley itself and nearby, particularly in West Horsley and the proposals for Wisley, will put further strain on the existing infrastructure. There are no proposals at all to cater for this.

4.7. The issue of local primary schooling illustrates the issue very clearly. The 11 sites identified in the LAA for East and West Horsley taken together would result in the building of 593 new houses in the two parishes, which are today served by a single primary school, i.e. The Raleigh, in West Horsley. Planning guides suggest that this number will require the provision of around 150 new primary school places to accommodate such a population increase. Yet today there is no capacity at The Raleigh at all and no proposals are made in the Local Plan to provide for any more schooling in the Horsley’s. It was suggested in a local planning application that primary school children will be expected to travel to Merrow for schooling yet even more traffic on the roads

More comment is made on the transport implication of the Local plan under a separate heading.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Protecting POLICY P2: Green Belt

3.1. Local Plan Policy P2 states that “We will continue to protect the Metropolitan Green Belt”. I fully and support this policy which I believe was in the manifesto of all the candidates in last year’s local election. It is also the policy of the current government. Unfortunately GBC appears to think it should not apply to them. Through their housing policies as set out in the Local Plan, they plan some 65% of new developments to be on land which is currently

3.2. Green Belt – the table at Appendix A sets out these figure.

3.3. There are a number of other issues in the detailed implementation of this policy to which I also object, as set out below:

3.3.1. Paragraph 4.3.13: Proposal to inset East Horsley from the Green Belt Policy P2

3.3.2. East Horsley is in a rural location and the village has the look and feel of a rural village. Its Green Belt status has been a key factor in preserving that character. Being washed over by the Green Belt has been a constraint on the urbanisation of the village, it has prevented excessive infilling unlike Cobham where 3 or 4 new homes in gated communities have replaced 1 larger property.

3.3.3. GBC argues the need to inset East Horsley is based on a NPPF requirements, arguing that the test for insetting is that the village should make an important contribution to the openness of the Green Belt. This is not judged by viewing the village from Google Earth or on local maps. It is more than that, no less than 37% of East Horsley is composed of woodlands. When driving through the village the size of village is not evident, the scale of the development is not evident. When you pass by houses you can see between them when you do you do not see more houses but trees and openness.
Within the settlement area there is an average housing density of just 8.1 dwellings per hectare (‘dph’). Woodlands and larger than average residential gardens make a vital contribution towards bio-diversity, provide wildlife corridors, and provide those open spaces that are vital to the character of the greenbelt. East Horsley was regarded by the majority of residents as a small village in a recent survey that is how it is seen it has openness it has few if any hard edges and its irregular boundary helps to soften its profile with the countryside. Being washed over by the Green Belt has preserved the rural character and openness of this village.

3.3.4. Today East Horsley is a picturesque and flourishing rural community, which has and continues to experience a steady incremental growth with new properties being built on mainly Brownfield sites. I would encourage this to continue but with some restriction on the size of new homes with a focus on 2,3& 4 bed on any new of over 5 units. This can all be achieved with East Horsley still being washed over by the Greenbelt. There are no reasons to make any change as I can see no benefit from EH being inset within the green belt.

3.3.5. GBC are proposing to make a number of changes to the Settlement Boundaries of East Horsley and so expand the Settlement Area, as set out in the Proposals Map, with the justifications provided in the Green Belt & Countryside Study prepared by the consultants, Pegasus.

3.4. I comment on the proposed boundary changes, as follows:

3.4.1. There is a proposal to move the East Horsley Settlement Boundary westwards from behind the houses on the west side of Ockham Road North up to the eastern boundary of Lollesworth Wood. This proposal removes over 5 hectares of an isolated agricultural fields from the Green Belt. The present boundary line is defined by a deep and well-maintained drainage ditch which is classified by the Environment Agency as a ‘main river line’ and needs to be well maintained as it is in a flood zone 3. It ongoing ease of maintenance could be compromised if it were to become individual gardens. I am not opposed to moving this boundary west to the edge of woodland but am unsure of the ‘exceptional circumstances’ that justify the move.

3.4.2. There is also a proposal to move the East Horsley Settlement Boundary westwards from behind the houses on the west side of Kingston Avenue up to a tree line running along the Parish Boundary at the western edge of Kingston Meadows. The result is to take all of Kingston Meadows out of the Green Belt. Kingston Meadows is the main public recreational space of East Horsley, comprising various sports facilities and playing fields. The present Settlement Boundary is clearly defined by a deep and well-maintained drainage ditch running along its eastern side. It therefore represents a very defensible Green Belt boundary. Moving this boundary westwards to the edge of woodland in no way improves its defensibility. Under NPPF rules Green Belt boundaries should only be changed in ‘exceptional circumstances’. I cannot believe there are an exceptional circumstance that justify any change I it current defensible position it protect the openness of the greenbelt, the village, by presenting an irregular profile to the western edge of the village there is significant green indents to the western boundary and by having an irregular rather than a straight line softens the edge.

3.4.3. The same argument applies to the field north of Framgate Manor Farm a site included in the LAA which serves the same purpose of a fragmented profile to the western boundary which will be lost if developed with housing that will harden the edge to the village which will no longer meld with countryside.

3.4.4. As such I OBJECT to this proposed boundary change at Framgate Manor Farm and Kingston Meadows.

3.4.5. Proposal to remove Wisley Airfield from the Green Belt and to build 2000 Homes I OBJECTS to the proposal to remove Wisley Airfield from the Green Belt. The only justification for this proposed change is unfulfilled housing need which is not considered an exceptional circumstance. The proposed Wisley development is discussed further below.

3.5. d) POLICY P2: Limited In-filling

3.5.1. A new planning designation has been introduced called ‘the identified boundary of the village’. For East Horsley this covers a number of roads south of the A246. It is a sizeable area, covering 45 hectares, the equivalent of 23% of the present Settlement Area of the village. I find it difficult to understand why this is required it would appear that on the one hand East Horsley will be inset in the Green Belt and the area to the south of the A246 will be given similar protection currently enjoyed by the rest of East Horsley. This is sizeable area that if included within the settlement boundary leaving the whole
of the village washed over by the Green Belt. In my opinion there is no justification to inset East Horsley in the Greenbelt being washed over does not prevent limited infilling. Including the area to the south of the A246 within the settlement boundary could be justified providing the whole of East Horsley still remains washed over by the Greenbelt...

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1.0 Strategic

1.1. Policy S2: Borough Wide Strategy

1.2. Policy S2 sets out the objective of adding 13,860 new homes to Guildford Borough over the 2013-2033 period of the Local Plan, equating to an annual build of 693 new homes per annum.

1.3. I have concerns about the enormous scale of this building program, represents, as already mentions above a net 25% increase in the housing stock of Guildford Borough, a remarkable rate of increase even for a borough in the English Home Counties. This is against a background projection of the Office of National Statistics (“ONS”) of a population growth of only 15% for Guildford Borough over this same period.

1.4. Some explanation for this mismatch may partly be found in the conclusion of the West Surrey Strategic Housing Market Assessment, (“SHMA”), which looks at how the annual housing target of 693 homes is comprised. It estimates that 517 homes per annum arise from ‘the demographic starting point’ – effectively what the official statisticians at the ONS and the Department of Communities and Local Government (“DLCG”) are predicting Guildford actually requires. To this is added in the SHMA another 120 homes per annum in order to ‘support economic growth’, a further 31 homes per annum to ‘improve affordability’ and 25 homes due to ‘student growth’, all of which totals up to 693 homes per annum target.

1.5. Economic growth is already factored into the statistics produced by ONS and DLCG, so what GBC are proposing actually comes on top of the official household growth forecasts for the borough.

1.6. Furthermore, DLCG research has concluded that there is on average a 97% correlation between population growth and household formation. Therefore, if GBC’s target of a 25% increase in housing stock were actually realised, effectively it would mean that Guildford Borough would see its population rise by around 25% over this period. This would mean that the actual population growth rate for Guildford Borough would actually come out at a level that is 67% above official forecasts.

1.7. Another concerns in reviewing the Local Plan is that the impression is conveyed to the reader that GBC’s housing targets are effectively needed to fulfil NPPF requirements, or because of central government policy – in other words that GBC has no real choice but to put forward these expansionists projections, unpalatable though they might be because they are being forced to do so. However, the reality is very different. GBC has voluntarily chosen to pursue a policy of massive civic and economic expansion – one might perhaps term it a policy of ‘Imposed Growth’ – in order to underpin all of the
housing policies in the Local Plan. In short, the difference between the official statisticians’ forecasts and GBC’s target of a 25% increase in housing stock is entirely down to a choice made by GBC for which it has no mandate.

1.8. The SHMA set out to establish the objectively assessed need and guidance from DCLG was that it was not just another 'needs survey' but it was to look at market and affordable need. I will come back to this point in relation to affordable housing in a separate item. The other key point set out by DCLG was that in undertaking the assessment they were to ignore any constraints like Greenbelt, AONB, land availability and land cost etc. The idea was to get the best information on need LA were then expected to take into account matters of constraint in determining the number to go forward with in their Local Plans

1.9. There is no indication in the "Proposed Submission Local Plan" that they have taken any note of the constraints of the Greenbelt, land availability in fact they have added to the numbers in total disregard to their undertaking to protect at all cost the Greenbelt. The Expansionist Growth policy of the GBC and it proposals in this policy documents were not made clearly and explicitly to majority at the election.

1.10. I therefore OBJECT to the Expansionist Growth Policy and to the borough housing targets set out in Policy S2.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy Site 36 Land Former Thatchers Hotel East Horsley site no longer in Local Plan

I support the removal of this site for housing development.

- It could if re developed with housing [as pointed by the inspector] result in the over development of a key edge of village site.
- There is a case for retaining the current use as a Hotel.

Attached documents:

Comment ID: pslp171/3290  Respondent: 8792193 / Brian Wolfe  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy H2: Affordable homes

- The policy states that GBC will seek affordable on sites providing five or more homes or on sites of 0.17 ha or more, regardless of the number of homes. GBC will seek at least 40 per cent of the homes as affordable homes.
- **I object to the above policy**

**Justification**

- The government following a high court ruling in their favour have changed the threshold from 5 or more to more than 10 homes before the 40 % provision of affordable is required.
- GBC insistence of using the 5 or more figure are reducing the viability of small developments and therefore preventing or delaying the development of housing on small site.
- Many sites contained in the SLAA in Guildford urban areas did not make it through LAA or to the plan because they were regarded as unviable because of the 5 unit rule. Many of the sites were assessed as only suitable for houses, when flats would have been more appropriate. This was a deliberate attempt to reduce the number of viable site in Guildford urban areas for inclusion within the plan.
- Affordable housing at the level suggested built in East Horsley would soon be lost to the market by right to buy or enfranchise. It would be more appropriate to seek payment in lieu.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

POLICY H3: Rural exception homes

- The policy states small affordable housing developments, including pitches for travellers, will be permitted to meet identified local affordable housing needs provided that:
  - (a) the site adjoins or is closely related to, and in safe and easy reasonable walking distance of a defined or a non-defined rural settlement, and
  - (b) the number, size and tenure of homes would be appropriate to meet, or to contribute to meeting, the identified local affordable housing needs of the local community, and
  - (c) The affordable homes are all secured as affordable homes in perpetuity

**GBC justification statement**

- States that there are fewer opportunities to build new homes in our small rural settlements surrounded by, or designated as Green Belt than there are in and around the towns of Guildford, and Ash and Tongham due to more restrictive policies on housing in countryside and particularly in the Green Belt. Reflecting this reduced opportunity, legislation enables us to secure affordable housing in perpetuity in and around most of the villages in the borough. In the villages and parishes listed in the legislation we can secure rural exception housing in perpetuity, secured by planning obligation. In the parishes of East Horsley and Send, rural exception housing may be delivered providing the protection is in place to secure these permanently as affordable housing
I object to the wording of the Policy H3 and the wording of GBC justification statement 4.2.47 as they are not only confusing but are factually incorrect.

Justification

- In GBC justification it makes reference to legislation that enables GBC to secure housing in perpetuity as affordable. The legislation referred to I suspect is the statutory instrument The Order Housing (Right to Enfranchise) (Designated Protected Areas) (England) Order 2009 No 2098. Under schedule 11 part 7 is a list of villages in Surrey where the whole village is protected from the right to enfranchise. Under schedule 12 part 7 it shows those village in Surrey that are only partly protected and the areas protected are identified on a map. The protection status are also used to identify village where the right to buy is also not permitted.
- As correctly stated East Horsley is not protected from the right to buy or right to enfranchise. However GBC have failed to notice that a major part of West Horsley (north) is also not protected and is listed under schedule 12 part 7. This legislation does not relate to rural exception housing.
- There appears some lack of clarity and/or understanding over “protected areas” and “rural exception housing” they are not the same and both cover different issues. For example any social housing built in protected areas (villages) is protected from the right to buy or enfranchise and can be retained in perpetuity as such, it is not “Rural exception housing.”
- “Rural exception housing” is a definition given to a special form of affordable housing that can be provided in small rural communities and on land that would not normally be considered for housing it is often outside a village settlement on the green belt. Housing built can be protected in perpetuity and not lost to the market. They are also designed specifically for local people or somebody who works in the village.
- This means however that all social housing built in East Horsley and West Horsley (north) would be subject to such the right to buy or enfranchise. It cannot be protected in perpetuity by and planning directive. If however, housing were to be built outside the village settlement boundary and as “rural exception housing” it would then be possible for it to be protected in perpetuity by a planning directive.
- The concern here in East Horsley is that any new affordable housing could rapidly be lost to the market. With East Horsley being the least popular area in the borough for tenants of social housing and has the lowest level of applicants. An in lieu contribution from a developer would be better payback in the long term.
- The wording in GBC Policy is not correct and needs to be thought through more carefully. This also has a link to their Policy P2 which is bent on expanding the village settlement.
- The final sentence in 4.2.47 is also wrong. Rural exception housing cannot be delivered in East Horsley it can only be provided if the site is outside the parish boundary. Then and only then would it be protected in perpetuity.
- Two current affordable housing sites in East Horsley at Chown Court and Frenchlands Gate are rural exception development. They are both outside the settlement boundary. I am not sure of their status if the settlement boundary is moved.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. Policy P2 Transfer

I object to:-The Green Belt policy P2 in the Local Plan states that “The Metropolitan Green Belt will continue to be protected”.

Justification for objection

- Under Paragraph 4.3.13 which proposes to inset the village of East Horsley from the Green Belt. Whilst some village will now no longer be inset, into the green belt, East Horsley is proposed to be inset. It is suggested in NPPF that where a village is currently washed over by the green belt it can be inset where they makes no contribution to the openness of the greenbelt. As most of the studies of the greenbelt would appear to have been made from looking at map or sitting at a desk one can see why some very important issues have been missed. A recent survey of residents in East Horsley resulted in the majority of residents referring to East Horsley as small village. With over 4000 residents it can hardly be regarded as small but to those living in the village and for those who passing through the ‘built form’ does not dominate, it is not what leaves an impression. The predominance of trees hedgerows and the low density of housing add to it rural feel its openness. The current settlement boundary is irregular allowing fields and woods to enter the village and allowing trees rather than roofs to dominate. The insetting of the village will destroy it current character and it openness by allowing greater infill and creating an urbanized hard edge to the village.

- It is also proposed to revise settlement boundaries many of them becoming straight line resulting in gaps being filled and yet another urbanized hard edge. By insetting villages, re defining settlement boundaries GBC are ignoring the latest planning guidance and recent amendments that the re defining of green belt boundaries and changing the lands status can only be done in ‘very special circumstances’. No compliant justification has been put forward by GBC in their plan for these undertakings. The Green Belt & Countryside Study produced for GBC by the consultants Pegasus proposes numerous changes in Green Belt boundaries prior to these planning changes and therefore without due justification or the ‘very special circumstances’ now required. The exercise undertaken by Pegasus was to deliver land for housing to use in the Local Plan. Pegasus suggested that because East Horsley was surrounded by trees was a justification for it not contributing to the openness of the greenbelt. How they reached such a ludicrous conclusion is unclear. It is the many trees that act as a screen that maintain the rural feel and openness in the surrounding countryside. The fact that you are unable to see East Horsley from surrounding field because of trees is in its favour and does contribute to the openness of the greenbelt. This would be in stark contrast to the hard edge likely to result from insetting and the resultant urbanisation of the village.

- The loss of greenbelt cannot be justified when it only involves moving the boundary for no other reason than from one equally defensible position to another.

- A further concern is the fact that a significant portion of building land identified in the Local plan is located in the eastern part of the borough. This is at the opposite end of the borough from where most employment and commercial growth is anticipated. There are therefore serious questions over it long term sustainability unless you have a car. It is also land that is closer to London, and represents the most vital part of the Green Belt needed to prevent the encroachment of the Metropolitan sprawl. Throughout the Local Plan consultations many thousands of residents across the borough have written to object to GBC’s approach towards this fundamental issue, there were over 25,000 comments in the 2016 consultation, mostly opposing the plan. Judging by the revised 2017 Local Plan now proposed by GBC it seems that these voices have once again been ignored.

- Amendment 4 in Appendix H maps Policy P2 There has been no earlier consultation on the proposed change to the designation of the land south of the A246. Change made to the proposed settlement boundaries of East Horsley under the revised 2017 local plan, as Appendix 4 H maps for East Horsley (South).

The Amendment 4 on this map shows land south of the A246 as part of the village and is designated as being within ‘the identified boundary of the village’ and designated Green Belt land outside of the settlement Boundary. Under Amendment 4 the settlement boundary is to be extended in this area. This is land which is close to and in some parts directly adjacent to the Surrey Hills AONB. It is a very low density part of the village located in a highly distinctive rural setting including in Chalk Lane a sunken single track road lined with chalk slopes and which dates back many hundreds of years. To bring such land within the settlement area of the village is not in any way justifiable and is very likely to lead to development that is
inappropriate to the Green Belt. This area of the village has benefitted from Green Belt protection for many years but this proposed change would have a significant adverse impact and lead to the destruction on its character.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the borough housing targets set out in Policy S2.

The revised policy proposes a target for new housing in Guildford borough of 12,426 homes, a reduction from 13,860 homes proposed an annualised figure of 654 dwellings per annum a reduction of only 5.6% because of the different time periods considered by the revised plan.

I consider this revised target for the borough housing target as still very high and should be reduced significantly further.

The main reasons for this are set out below:

The conclusions drawn from the revised SHMA are seriously flawed. The West Surrey Strategic Housing Market Assessment: Guildford Addendum Report, 2017 ['SHMA Addendum'] issued by consultants GL Hearn in March 2017 provides an update on the previous SHMA issued in 2016. [This was in itself also flawed]. Much has happened in those 12 months, particularly the imminent prospect of Brexit, which is likely to result in major changes in economic growth, population trends, and migration patterns requiring a far more cautious approach than that currently put forward in the revised Local Plan.

Justification for objection

GL Hearn presented four alternative scenarios for their models, based upon different assumptions on the population projections. Their four scenarios resulted in projections of overall growth of Guildford borough housing needs over the plan period based on demographic trends of between 10.4% and 15.3% dependent upon the scenario used. Whilst the lowest of the figures, 10.4%, uses projections based upon a 10 year migration trend and making an UPC adjustment as proposed by the ONS in order to take account of various statistical anomalies in sampling sizes, etc. This growth of 10.4% provides a housing need for Guildford borough estimated at 521 dwellings per annum. GL Hearn recommends that GBC adopt the higher end figure of their scenarios, but no reasoning is given for this assumption this has resulted in a proposed, and now questionable ‘demographically-based’ housing need of 559 dwellings per annum, this figure is used as the base figure in the Local Plan.

GL Hearn [as in their 2016 SHMA report], proceeded to raise this figure further with a series of adjustments to reflect higher levels of projected economic growth, additional student housing and also an adjustment for affordable housing. In my earlier comments to GBC, I was critical of this approach, pointing out this is highly speculative, as these factors of economic growth are already included within the household growth projections put forward by the Department of Communities & Local Government. Whilst GL Hearn have made some minimal adjustment to their tuning of economic growth in projections of housing need, possibly to adjust for Brexit. They are still effectively double counting. They have
increased their proposed overall housing need figure to 654 dwellings per annum, an increase of 95 dwelling above their own top end demographic trend figure. Whilst it is acceptable for adjustments to be made to the base SHMA. I make the following observations and would challenge their weak arguments

**Affordability** GL Hearn in the SHMA notes that housing in Guildford is significantly less affordable than in England as a whole and therefore made an adjustment for extra homes each year to reflect this. However, the Government’s Planning Practice Guidance [PPG] notes say that, “Prices or rents rising faster than the national/local average may well indicate particular market undersupply relative to demand.” The issue here being, is not whether prices are high but whether that they are rising faster than elsewhere. The data for the affordability of homes in Guildford relative to earnings suggests that it is no worse than other parts of Surrey and it has not seen a faster deterioration than in other boroughs in Surrey. There are some that have seen a worse deterioration. By increasing housing supply beyond the level suggested by the demographic OAN would not result in any noticeable improvement in affordability but simply in more people who can afford high prices homes moving to the area. On this basis affordability uplift for Guildford would not be justified.

**Students** The other reason GL Hearn felt warranted an upward adjustment was to increase the provision for student housing. However, extra student homes are already included in the official projections and at a level that is possibly more than will be needed. There is evidence in the SNPP of a significant upward blip at age [18/19] that the student age group in Guildford has distorted the population projections and this distortion has fed through into the DCLG household projections. Given that there are reasons to believe that the SHMA’s calculation may overestimate the homes needed for students, there is not a case for adding additional student housing. Indeed, there is a possibility that the adjustment for students should be negative, not positive i.e. that too many student households have been included in the projections. This analysis of the impact of potential increases in student numbers may have on the overall housing needs of Guildford is complex and I guess would be best carried out separately from a general demographic analysis that has been used.

**Economic Growth** GL Hearn’s analysis is an adjusted projected housing need of 654 homes per annum, which if built would represent an overall increase of 22% in the housing stock of the borough. This compares to the ONS projection of 521 homes 10.4% GBC in their Local Plan are therefore proposing a housing figure which is more than twice this level of projected population growth. The final nail in the coffin of these projections by GL Hearn whilst acknowledging the influence of UPC when they used the latest 2014 Sub-national Population Projections they did not identify and take into account any Unattributable Population Change UPC which has been estimated to reduce the final number by up to 80 units.

Now is not the time to be double a commitment to future growth. GBC have chosen to adopt the highest forecasts on offer.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
• Strategic Housing Market Assessments [SHMA] are relatively new in that it looks at the needs for all tenures of housing as opposed to the earlier Housing Needs Assessment which only looked at Social Housing Need.
• Guidance given to Plan Makers made it clear that the SHMA needed to be an objective assessment of need based on facts and unbiased evidence. That Plan Makers should not apply constraints to the overall assessment of need, such as limitations imposed by the supply of land for new development, greenbelt, historic under performance, infrastructure or environmental constraints.
• It went on to state that these considerations will need to be addressed when bringing the evidence bases together to identify specific policies within the development plans. i.e. the housing policy targets. So GBC are supposed to take the SHMA and then set it against any constraints that apply within the borough.
• GBC have failed to make or document any adjustments to accommodate for planning constraints, in particularly, the Green Belt, supply of land, AONB and flooding etc. The housing need projections of GL Hearn have been taken by GBC directly as the housing targets figure for the Local Plan.
• They therefore fail to take into account any of the significant and relevant constraints which do limit the supply of housing land across the borough, in particular the large proportion of land which currently falls within the Metropolitan Green Belt.
• We find nevertheless that over 58% of proposed development plan proposes to build on Greenbelt Land. That does not include areas in villages inset from the greenbelt that will be open to greater infill and wind fold type development.
• They have also failed to allow for limitation imposed by the already overstretched infrastructure including transport issues by using inappropriate and discredited transport assessments.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Surrey Chambers has supported the Borough throughout the process of securing a sound plan. This note is to extend that support by writing to again to re-enforce the Chamber’s support for the current pre submission plan in its final Section 19 consultation.

Guildford is an important town in Surrey, termed a growth town by the EMj LEP, where the University of Surrey and its Park are located that are an important part of the economy. The Borough needs to secure an adopted plan to enable its business community to continue to have a clear planning landscape to ensure that they can lay down investment plans.

I am writing on behalf of the Chamber to add to our existing support for the Borough in delivery of its plan. In specific terms, this support is for:

- Planning the provision of 13,680 houses across a range of tariffs and tenures
- Improvement of the transport infrastructure in the town
• Help in supporting the educational base in the town
• Provision of additional land for the growth of employment
• Recognition of the importance of the employment base in the Borough which needs support if its strategic role is to be met fully

A plan which
• Meets national planning policy
• Has been subject to intense scrutiny
• Has the support of the elected members of the council
• It is important to put in place a sound plan that can be used by the community at large, organisations such as the LEP and by business themselves to support further investment in the town
