The land abuts the East Clandon Stream which floods most winters. The land is bordered on one side by the A3 and this very busy road would not make a good neighbour. The proposal is to place 400 houses on one part of the land and a range of industrial buildings to be placed on the rest. Furthermore, with so many buildings being added the run off the land onto the stream will be aggravated. I understand that the site is built on London Clay. This means that every time there is the potential for the stream to raise, the land floods. In addition the trees that are being removed will also exacerbate the problem. The copse is home to and regular visiting place for deer, foxes, owls, bats, rabbits, hares not to mention a carpet of bluebells in spring.

The wooded part of this land contains ancient oaks. Many of these oaks are hundreds of years old. The land is bordered on other sides by Kiln Lane and Burnt Common Lane, both are narrow residential lanes and totally unsuitable for large amounts of traffic. Both lanes exit onto the B2215 Portsmouth Road. This road is a feeder road to the A3 and M25 which is heavily congested both night and morning.

Policy A43a This policy relates to a four way junction giving North and South bound entrances and exits to the A3. Whilst many local people would welcome easier access to the A3, the local feeder roads are all narrow and already congested. The Clandon Road A247 is again already heavily congested night and morning. When the road reaches the village of West Clandon where it becomes The Street, it narrows down even further. It is totally unsuitable as an access to the A3.

The Northbound access would run over a piece of Manorial land owned by the Manor of Dedswell and Papworth, surely such land should be preserved.

The implications for traffic are dramatic. Every day Portsmouth Road is stacked back from the M25 to the Send traffic lights on the A247 from 8.00am to about 9.15am every day and then the flow is reversed in the evening. As there are no improvement planned for the A247 and other surrounding feeder roads this is an unsuitable change.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Policy A44 Land to the west of Winds ridge and Send Hill

It is proposed to build forty houses and two traveller pitches.

This land is predominantly an infilled sand and gravel pit. It was filled over several years and still has venting points. The land is now partly farmed and grazed. It is a beautiful site which affords distant view from Potters Lane, Send. These lovely views would be totally altered. From the Send Hill side footpath there are distant views of the Surrey Hills. It probably represents backland development.

Send Hill is a very narrow lane and access to a small estate would be unsuitable. The site is not a sensible place for traveller pitches either as the access would be even worse for long vehicles. It is a mile from the village shops and bus stops.

Insetting the settlement boundary at both the St Bedes School site and the Wey Navigation at Send Road is totally unreasonable. This change would remove both areas from the Green Belt and render it open to permitting even more development in the village.

The land adjacent to Heath Drive is also part of the Wey Navigation Corridor. It is currently home to a great deal of wildlife. Fox, deer, badgers, owls and many other birds are found here on a frequent basis. The pleasant views when cruising on the Navigation will be totally lost if this change takes place.

The land at St Bedes School off of Bush Lane will be prime development land if this is allowed to happen. Again a valuable piece of Green Belt is involved here. A footpath runs through and allows the sight of nature in the wild. Buzzards, Kites, Skylarks and many other species along with deer, foxes etc., can be seen here. The time expired Junior school is currently being rebuilt on a nearby site and the current Junior school plan states it is to be returned to a green field. There is no exceptional reason for this to be changed.

I am disappointed that these sites have been included in the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

OBJECTION

Whilst I accept that every village has to grow and evolve, the proposals for Send Village are enormous and far reaching. Until about 10 days before the proposed Local Plan was launched the proposals for Send Village were comparatively low and with a few exceptions could possibly have been supported. However, as stated, 10 days before the approval a site was withdrawn and another, Garlick’s Arch (Policy 43a) was substituted. This adjusted the number of proposed houses from 185 to 485. This is almost a 25% increase over the current number of houses in the village. This vast change cannot be tolerated or justified.

We object to Guildford Borough Council's draft Local Plan proposals 10 build 1,800 houses, an industrial park and a highway on the slopes of the Hog's Back at Blackwell Farm, which will:

- destroy views from the Hog's Back ridge – a nationally designated Area of Outstanding Natural Beauty
- remove 72 hectares of scenic farmland and additional ancient woodland from the green bell
- increase tailbacks on the A31 and traffic congestion
- result in rat-running through local roads
- add to Guildford's pollution.

- I object to the development of Garlick's Arch off the Portsmouth Road to include the building of 400 houses and 7000 m2 of industrial space. This site floods on occasion and is covered by ancient woodland, including trees dating from the 16th century.

The 'Housing Delivery' document in the draft local plan suggests that this site is required to facilitate the provision of a northbound on and a southbound off slip road onto the A3 from the A247, which will provide significant improvements to the highway network and is fully supported by Surrey County Council. This document then goes on to state that 'On this basis we consider that the benefits of developing this site outweigh the harm that may be caused by removing this land from medium sensitivity Green Belt. This constitutes the exceptional circumstances required to amend Green Belt boundaries...' The addition of two slip roads providing access to and from the A3 does not constitute 'exceptional circumstances' and I object to Guildford Borough Council using this as a justification to modify the Green Belt in this area.

- I object to the area at Garlick's Arch having an additional 7000m2 of industrial space added as the latest Employment Lands Needs Assessment 2015 shows a reduction in required floorspace of 80% from the previous plan made in 2013. If any additional floorspace is required this should be located at Slyfield Industrial Estate which has had valid plans to expand since 2014.

I object to the creation of a new interchange between the A247 and the A3 at Burnt Common. Whilst this is seen as providing access to the A3 for the new development at Wisley, it will inevitably provide easier access from the developments at Wisley, and Gosden Hill to Woking, thereby significantly increasing traffic through Send in to Old Woking on the A247, a route that is already very congested and not able to cope during peak periods. Noise and pollution levels will exceed the already high levels.

I object to the insetting of the villages of Send, Send Marsh / Burnt Common and Ripley and their resulting removal from the Green Belt. The NPPF (paragraph 80) sets out five main purposes of the Green Belt, including:

- To check the unrestricted sprawl of large built-up areas,
- To prevent neighbouring towns merging into one another,
- To assist in safeguarding the countryside from encroachment

The three villages of Send, Send Marsh / Burnt Common and Ripley both together and including the green spaces in between ensures that there is a buffer against the towns of Guildford and Woking becoming one continuous conurbation. The insetting of these villages would make it far easier to make future developments in and around these villages, thereby making the future merging of Woking and Guildford conurbations more likely, and thereby going against the main reasons for having the Green Belt in the first place. There are no obvious special circumstances given in the Local Plan to justify removing this restriction.

I object to the lack of due process that Guildford Borough Council have followed in reaching the decision to add the development of Garlick's Arch at the last minute, prior to including in the latest draft Local Plan. Since 2014 every proposed major development in Send and Send Marsh has been changed, with the original proposal for an additional 430 houses in 2014 being reduced to 185 by April 2016, and suddenly being increased to 485 in May 2016. Such large changes require full consultation under Regulation 19 of the planning process - this process has not been followed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I am writing to object to the Local Plan re proposal to build 1100 houses at Normandy, because it seems to ignore several local factors. It does not seem sustainable, as the area is already struggling.

The roads in Normandy are in a very bad state of disrepair, and are not coping with the existing traffic, so extra housing will make this even worse. A31 from Puttenham to Guildford is almost at stand still from 7.00am to 9.30am each weekday. There seems to be no plan to repair or upgrade the roads. There are 2 buses a day from Flexford, (& these are to be cut from September), so it is essential to run a car, meaning probably at least another 2200 cars on the local roads!

There are no shops in Normandy, so another reason why a car is a necessity.

The GP surgery has not been able to cope with the local population for some time, and this is getting worse. One cannot get an appointment within 3 weeks, so one may be better (or dead) by that time. There is no capacity for an increase in population.

The suggested reason for building 1100 new homes is the need to build a new secondary school. How is this necessary when most of the secondary schools in the area are far from full? Also, it is increasingly difficult to recruit secondary school teachers in Surrey area, so how will a new school be staffed?

Has anyone consulted the utility companies about supplying so many extra homes? Water and electricity are essentials.

We have fought hard to get a reasonable broadband speed in Normandy. Will this be maintained to us as well as the new houses?

While accepting that people need somewhere to live, I cannot accept that 1100 new houses in a small village is a practical option, and I urge you to reconsider all the factors listed above.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Just to say that I am very pleased and relieved to learn that site A46 has been removed from the Guildford Local Plan.

The proposal to build over 1000 new houses in the Normandy/Flexford area was horrific because the roads, Gp surgeries, utilities etc do not cope with the current population.

Increasing the population would take facilities beyond breaking point.

However, I understand there is still a commitment to build 10,000 homes in the Guildford area, and I urge you to carefully consider what improvements will be needed (roads, GPs, utilities etc) to support this, BEFORE agreement is given to go ahead with building.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Comment ID:** PSLPA16/3982  **Respondent:** 8794753 / Andrew Beckett  **Agent:**  
**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

2. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

3. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.
The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the
borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe
inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially
confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and
it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected
wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant
infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored
these factors.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford.
Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development
proceeds I believe the narrow strip of Green. Belt remaining between Guildford and Clandon at this point will be too
narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching
Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from
Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the
Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of
West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too
narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015
21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays

Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.
The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPS16/7419  Respondent: 8794753 / Andrew Beckett  Agent: 

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)
The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.
This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16498  Respondent: 8794753 / Andrew Beckett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16506  Respondent: 8794753 / Andrew Beckett  Agent:
I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the
south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in...
London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of
unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations were available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150
homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be "closely related" Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16499  Respondent: 8794753 / Andrew Beckett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and
with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Comment ID: PSLPP16/16500  Respondent: 8794753 / Andrew Beckett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16501  Respondent: 8794753 / Andrew Beckett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.
I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. **The plan says that “allocating these sites does not grant planning permission for development.”** However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

Page 2773 of 3335
The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighbouring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.
The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up-to-date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

**Comment ID:** SQLP16/1830  **Respondent:** 8794753 / Andrew Beckett  **Agent:**

**Document:**  Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
1. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

2. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

3. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Policy A29

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the increase from 1200 to 1750 homes as this would result in the coalescence of the Ash & Tongham Urban Area and Ash Green Village. This is contrary to Policy P3 (Countryside). Therefore Requirement 6 of this Policy, which attempts to protect the “historic location of Ash Green”, is inadequate and would need rewording to prevent this increased potential for coalescence.

“Development proposals in the vicinity of Ash Green to have recognition of the historic location of Ash Green village and...”
the intrinsic rural character of its countryside location. The properties along Ash Green Road have historically been considered to form part of Ash Green village. Whilst this land is now proposed to be included within the Ash and Tongham urban area, Proposals for the land west of this road and to the south east of Foreman Road / White Lane should must respect the historical context of this area by preventing the coalescence of Ash, Tongham and Ash Green. Any development as a whole will not be of a size and scale that would detract from the character of the rural landscape. This should must include the provision of a green buffer that seeks to maintain a sense of separation between the any proposed new development and the properties fronting onto Ash Green Road, Foreman Road and White Lane. This will also help soften the edges of the strategic development location and provide a transition between the built up area and the countryside beyond.”

Requirement 8 does not sufficiently protect Ash Manor, a historical farmstead of three listed buildings including a medieval hall house and should be amended as follows:
“Sensitive design at site boundaries with the adjacent complex of listed buildings at Ash Manor. Views to and from this heritage asset, including their approach from White Lane, must be protected.”
• Infrastructure before development. Requirement 9 (Land and provision for a new road bridge at Ash Station to enable closure of the level crossing) must be competed before any development of Policy A29 commences.
• Requirement 9 fails to address the other significant transport infrastructure improvements that are required to cope with the increases in traffic generated by Policy A29. Therefore solutions to the following areas are also required before any development of A29 is permitted.
  a) The Street in Tongham
  b) A331/A323 intersection
  c) A31/White Lane junction
• Ash Green is not part of the Ash & Tongham Urban Area and therefore the ATUA boundary must not extend south of Ash Green Road and Foreman Road.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

In regards to the draft Local Plan and for the following key reasons:

1) I object to the use of Green Belt land for development. Green Belt areas should not be reduced by development for any reasons as once taken, they are gone forever and this allows a dangerous precedent that will proceed to render the principle and overarching natural, cultural, health, tourist and environmental benefits that it currently provides. Housing ‘need’ in a Borough must not be seen as a justification for ‘exceptional circumstances.’ Green Belt is critical to the region as a whole and needs to remain intact.
2) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There are ample infill sites within cities, towns and villages including a rich resource of brownfield land in the urban areas, which needs to be regenerated, without the need to encroach into protected Green Belt land.

3) I object to the proposed removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt and for consideration for its development. The site serves a vital role in protecting against urban sprawl from London. Development on the site will help develop an urban corridor stretching from London to Guildford. Under the NPPF, no ‘exceptional circumstances’ have been established to warrant removing the land from the Metropolitan Green Belt.

4) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

5) I object to the disproportionate allocation of housing in this particular part of the borough. Over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC). I see the inclusion of FWA/TFM as pure political development providing a massive amount of a wayward and misleading housing target.

6) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

7) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   a. Severe negative impact on rural life and character, forever changing the makeup of the area to that of a suburb.
   b. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars.
   c. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.
   d. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.
   e. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).
   f. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.
   g. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

8) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

9) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

10) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

11) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) for its development. The site serves a vital role in protecting against urban sprawl from London. Development on the site would add additional congestion at the A3 and M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I did not work hard and chose carefully to take residency in this unique, beautiful, special area to have it ruined by a Plan, which is clearly being promoted by development minded politicians and investors. Please redraft the Plan to spend my hard-earned taxes on developing housing on appropriate sites within cities and towns with existing infrastructure and...
the appropriate urban character and not by the misleading, convenient rationalisation of handing our irreplaceable countryside and cherished Green Belt to irresponsible developers who have no invested interest whatsoever in this region or its intrinsic value, which we must maintain at all costs for generations to come. Once precedent would be set to take Green Belt, it would not cease until Green Belt itself is gone. This cannot happen. I trust that these objections will be fully considered, the Plan altered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, removed from the Local Plan with immediate effect.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object because the SHMA figure of 693 houses per annum is too high. The figure has been show to be flawed and the housing target would result in the population increasing at more than 4 times the rate of population increase between 2001 and 2011. This is completely unsustainable.

I object because the Green Belt needs to be protected. Policy P2 is completely flawed. Almost no one was in support at the last consultation and those that were, were organisations with their own business interests at heart.

No exceptional circumstances. No exceptional circumstances (a requirement by the NPPF for any change of Green Belt boundaries) have been demonstrated for the building of new homes on Green Belt land.

I object to the Local Plan for the following reasons.

I object because The proposed development is not sustainable. The volume of proposed new houses will damage local communities which have no need for these houses. Public transport is totally inadequate, meaning a huge increase in the number of cars. Why not develop in urban areas, on brownfield sites?

Answer (if comment is on questions 1-7 of the questionnaire): (No)
This new plan does not adequately take into account the feedback on the previous draft. Feedback from hundreds of residents has been unashamedly ignored. In particular there was widespread objection to the construction of a new town at Ockham (referred to as Wisley airfield in the plan) and significant new development at East and West Horsley.

If the huge new town at Ockham is ever built this would represent unprecedented destruction of green belt land and alter forever the character of our borough. The council has understated the strain a new town would place on infrastructure and services in the Borough - many of these problems were identified by the borough's own Planning Department in its refusal to grant permission for a new town at Ockham earlier this year.

The planned development of East and West Horsley would swamp these two villages with new housing and ruin their rural character.

In summary the new local plan is a bitter disappointment.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policies A37, A38, A40 and A41. There are four policies proposed for development sites in West Horsley involving the potential construction of 405 homes in total and resulting in an increase in the village housing stock of 36%. All of these four sites are currently in the Green Belt. This proposal is totally excessive for a small rural village. It will lead to the total destruction of the character of this pretty and historic village and pose an enormous strain on local infrastructure. Accordingly, I OBJECT to these four policies.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy A35, Land at former Wisley Airfield. I OBJECT to this policy. This policy will lead to the creation of a new settlement, the largest in the borough outside of Guildford town, to be set in the heart of picturesque Surrey countryside, surrounded by small villages of charm, character and history. This proposal shows town planning at its very worst. A previous planning application for this site was rejected by GBC earlier this year and the fact that GBC have kept this policy within the Local Plan is atrocious. Development at this site is totally contrary to the rules and spirit of the Metropolitan Green Belt, the site has very low sustainability (the worst ranked of any of the larger sites in the Local Plan), it will have a major adverse impact on local infrastructure, it will cause harm to protected wildlife within the SSSI next to this site and it will involve the creation of a high-density high-rise settlement that is total alien to this part of rural Surrey. This site has no redeeming features and should be consigned to the dust-bin. The fact that UK law allows such a large site to be proposed on an effectively anonymous basis is a sad testimony to English planning law. Accordingly, I OBJECT to this policy. I strongly encourage GBC to withdraw its draft Local Plan in the light of the Brexit vote and re-cast a substantially less ambitious plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A39

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy A39: Land behind Ockham Road North, near Horsley railway station. I OBJECT to this policy. The movement in Green Belt boundaries needed to bring this site within the Settlement Area is not valid. There are no exceptional circumstances to justify it, the boundary move proposed is to shift from a 'main river line' to the edge of a piece of woodland - effectively moving from a strong defensive barrier to a weaker one. The proposed policy also involves the loss of prime agricultural land. Moreover, around 30% of this site is designated as Flood Zone 3. Accordingly, this move is not supportable and this site should be dropped as a policy from the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/1438  Respondent: 8795553 / Robert Taylor  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy H2: I OBJECT to this policy. It is seriously flawed since it fails to take into account the differences in the need for affordable housing across different parts of the Borough. GBC's 'one-size-fits-all' solution will merely see the wrong kind of affordable homes being built in the wrong areas and used to house the wrong people. GBC should totally re-think this policy which as it stands will lead to wholesale inefficiencies in the supply of social housing.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/1439  Respondent: 8795553 / Robert Taylor  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P2: I OBJECT to this policy. Although GBC professes to protect the Green Belt it utterly fails to do so. Fully 65% of the housing development proposed in the Local Plan is to be built on land that is currently Green Belt. I also OBJECT to a number of the details given within this plan as follows:

Para 4.3.13  I OBJECT to the proposal to inset East Horsley from the Green Belt. The Green Belt rules have protected East Horsley and allowed it to flourish as a rural village whilst retaining its sense of openness. This policy will change that. It is an unnecessary policy and one that will impact negatively on the village of East Horsley.

Para 4.3.16  GBC is proposing to make 8 changes in the Settlement Boundaries of East Horsley. I OBJECT to all of these changes. There are no exceptional circumstances to justify any of these boundary movements and in not a single case is the
defensive nature of the Green Belt boundary enhanced. All these changes are motivated solely by the desire to bring more land into the settlement area so that it may be developed for housing.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to give my comments on the Proposed Submission Local Plan, issued June 2016, as a part of GBC's consultation process.

I OBJECT to the Local Plan overall. My reasons are that the housing targets proposed for Guildford Borough are much too high. In my opinion they represent an overly aggressive plan that has no real foundation. The supporting analyses given as justification for these proposals are seriously flawed. Moreover, I do not believe that the proposed policy of aggressive expansion in Guildford Borough's housing stock is supported by a majority of its residents.

My objections to specific policies within the Local Plan are detailed below:

Policy S2: I OBJECT to the Borough wide housing target which is set out in this policy. The ONS population growth projections for Guildford Borough are for a 15% growth over the plan period but GBC proposes a 25% growth in its housing stock. This is unjustified. It also completely fails to take into account the constraints of the Green Belt which prevents such expansion from taking place other than by the wholesale consumption of Green Belt land. GBC justify their additional housing proposal based upon the need to support the high levels of economic growth expected in the Borough, on the need to house more students and on the need for more affordable housing. Firstly, economic growth at official projections is already included in the ONS population projections; secondly, there is ample affordable housing proposed in GBC's affordable housing policy; thirdly, following the Brexit vote it is clear that official government population and household projections will need to be seriously reduced, as will official economic forecasts, nationally and within the borough. GBC should either withdraw its Local Plan proposal entirely in the face of this important new factor, or else it should make its own estimates for the reduction needed to take account of the Brexit factor. My suggestion would be to cut the Borough's housing target by 50% from that indicated in the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Policy A35  Land at former Wisley airfield

There are some minor changes proposed in the revised draft Local Plan to Site Policy A35, land at the former Wisley airfield. However, these changes do not address the many fundamental weaknesses of this proposed site for development, including its very poor sustainability, its total lack of transport sustainability, its destructive impact on local wildlife and ecology, the illegal air quality, the major destruction of the Green Belt at a critical location outside the M25 circle, the severe harm caused to local traffic and traffic on the A3, and the major impact on already over-stretched social infrastructure in the locality.

The proposed urban-style high-density development would be inserted in the midst of five rural villages and be totally incongruous to the character of this historic rural area, which would suffer irreparable harm.

In the revised draft 2017 Local Plan GBC a number of sites which removed which had been in the 2016 plan. As such I seriously question the site selection criteria which has been employed by GBC and that results in a number of major sites being removed whilst a site such as Wisley remains - a site with such poor site sustainability and many other major deficiencies.

For the reasons above therefore: **I OBJECT TO SITE POLICY A35, LAND AT FORMER WISLEY AIRFIELD**

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Policy P2 Green Belt Policy

The revised Policy P2 totally fails to protect the Green Belt, with 57% of the new housing developments proposed in the local plan being located on land currently designated as Green Belt. To remove such large areas from the Green Belt and then propose a policy which states “*The Metropolitan Green Belt will continue to be protected*” is simple hypocrisy.

Paragraph 4.3.13 of this policy proposes to ‘inset’ the East Horsley settlement area from the Green Belt. This move will change the applicable planning policies in operation for new developments within East Horsley and will fundamentally impact on the character of this countryside village. East Horsley is a low density rural village which contributes importantly to the openness, biodiversity and variety of the Green Belt. The insetting of the village will harm all of this.

For the reasons above therefore: **I OBJECT TO THE INSETTING OF EAST HORLSEY FROM THE GREEN BELT AS PROPOSED UNDER POLICY P2.**

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S2 Borough wide strategy

The housing targets for the borough set out in the plan are still much too high, despite the small reduction of 5.6% made in the annual housing target in the revised plan. The SHMA which underpins this target number is seriously flawed and fails to give due recognition to the impact of Brexit on future population forecasts. Despite considering a range of different methods for assessing future forecasts the SHMA study by GL Hearn dismisses the more conservative ONS projection based on a 10 year population trend analysis, (one which gives a projected population increase of 10.4% over the plan period), and makes a series of unjustifiable adjustments above the demographically-derived projection. This results in a proposed housing target which would see an increase of 22% in the overall housing stock of the borough. This increase is more than double the ONS population growth forecast. Given the strong likelihood that following Brexit the population growth will be further reduced this proposed target is not justifiable.

In my opinion the high housing targets proposed appear to reflect the political objectives of certain officers in GBC, more than the needs of Guildford borough residents or the views of over 30,000 residents who have registered their previous opposition to the target housing numbers proposed in the previous local plan.

The scale and locations proposed for new housing also fail to take into account the many constraints on development across the borough, in particular the major impact of Green Belt restrictions and the inadequacies of borough infrastructure.

For the reasons above therefore: I OBJECT TO THE HOUSING TARGETS SET IN POLICY S2

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows)- where the planning application has already been unanimously rejected by GBC's Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 13th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is immediately removed from the Local Plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the Continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM)-

AllocationA35- for the phased development of a newsettlement of up to 2100 dwellings

I object to the draft local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the GreenBelt. There is ample brownfield land in the urban are as which needs to be regenerated, without the need to encroach on protected GreenBelt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:

a. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
b. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads.

c. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements.

d. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

e. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

f. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously-air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and their reversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC's Planning Committee. After 14 months of consideration and various extensions and amendments, Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I wish to object to the removal of the Airfield from the Green Belt, in order to build 2000+ dwellings there. I consider that available urban brown field land should be used.

I wish to object because:

1. The local roads near Ockham are too narrow to take increased traffic.
   1. The A3 and M25 are inadequate for more heavy
   2. Local facilities - schools, doctors, shops, - would be seriously Cobham already has daily parking problems and there is at present no site for a secondary school in Cobham.
   3. Air pollution near Wisley RHS gardens would be further

I hope the planning department is able to find a more acceptable solution to the need for housing in Guildford.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

9. Policy D4: I object to the insetting of villages (meaning in fact, removal of villages from Green Belt protections) and the fact that they will suffer from higher density development and the resulting increase in traffic, increased use of infrastructure which is already under pressure. I object in particular to the insetting of West Clandon, Send and the Horsleys. This will have a detrimental impact on Green Belt openness and the views in and out of the AONB in direct contravention of Policy P1 and P2.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

3. Policy P2 – Green Belt: I object to this significant erosion of the Green Belt with the proposals for large towns being developed on Green Belt land thereby removing the openness of the Green Belt. I note in particular the huge developments proposed for the North East quadrant of the borough which will adversely affect our amenity, but also unfairly targets our tranquil rural villages because we can provide ‘dormitory’ facilities for commuters to London. The developments directly affecting our villages are the proposals for Wisley Airfield, Gosden Hill Farm, various farms and tracts in the Horsleys and Garlicks Arch at Send.

4. Further, on the erosion of Green Belt and I object that Policy P2 is not met where it states that Green Belt should be protected. I object to the disproportionate use of Green Belt land for housing – some 65% of the housing proposed is on Green Belt and with little consideration being given to redevelopment of brown field sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

5. I object to Policy S1 not offering sustainable development as regards roads and rail infrastructure which currently does not cope with demand, congestion on the A3 in particular, but also other A roads in the area such as the A247, the A246 and then there is the already overcrowded and slow train system for those currently living in the borough and needing to commute to London. No pre-emptive planning has been made to alleviate these real problems which will be much exacerbated by any large increases in housing.

I specifically want you to note the winding, narrow and dangerous route via the A247 through West Clandon which then drives people to use a short-cut the even narrower rural road, the Ripley Road, through East Clandon to and from the A3. This will be much exacerbated with the large increase in housing twinned with large increase in cars and travel.
6. Continuing with Policy S1 (Presumption in favour of Sustainable Development) I object that this is not being met and that GBC are contravening this when it is clear that no fixed plans are available to improve the provision of shops, medical facilities, schools in our immediate area (besides roads and rail already mentioned) to service us. If the GBC were serious about improving the infrastructure and sustainability of our communities, they would have secured plans and funding to ensure these facilities are available and not just at the behest and hoped-for goodwill from the developers. Further, how will developers be held accountable to their promises to build infrastructure? Stories are legion of developers reneging on commitments as the ‘money runs out’ even though vast profits will be made from turning agricultural and Green Belt land into highly valuable housing land.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to the Guildford 2016 Local Plan

I am currently overseas so am writing to you by email in respect of the above. Accordingly this letter will not be hand signed.

I object to the 2016 Draft Local Plan as a whole and in particular I object to the specific issues (listed below). I believe that this deeply flawed Local Plan will have a direct and detrimental effect on the amenity currently enjoyed by my family and other residents of East Clandon and to the even greater detriment to our neighbouring villages of West Clandon, Ripley, West and East Horsley. It erodes the openness of the Green Belt and endangers the beauty and views in and out of the Surrey Hills AONB.

My specific points are:

1. I object to Policy S2 for the proposed provision of the very high overall housing numbers of 13,800 new homes (690 new dwellings being built every year for 20 years) and I object on two grounds; these housing numbers have been imposed on the borough with no real consultation being undertaken with the residents of East Clandon and the borough as a whole. Secondly, the housing numbers are based on a high-growth economic development plan which in itself has had no consultation with us and this combined with estimated demand from London residents will turn Guildford into a dormitory town for London.

Further, I object to the fact that no real economic or housing demand factors have been provided by the borough planners to substantiate the very high housing target of 13,800 new dwellings over the next 20 years. This is in direct contravention of the NPPF’s requirement for the planning authority to provide meaningful consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SQLP16/683  Respondent: 8796321 / Nick Etches  Agent:
7. I **object** to the fact that GBC have not met the requirements of the NPPF Paragraph 155 which imposes an explicit obligation to have early and meaningful consultation. This has not been met in a number of areas by GBC. We have not had a meaningful consultation on imposing a settlement boundary on East Clandon, on the absence of meaningful economic and population growth figures for Guildford showing various scenarios with high, medium and low growth scenarios being offered.

Answer (if comment is on questions 1-7 of the questionnaire): ()

In policies SRN9 and SRN10 I note the change in responsibility for delivering new A3 slip roads at Burnt Common from Surrey County Council to either Highways England or developer. I have concerns that if delivered by Highways England alone there would be no local level control over if/when/how the scheme was delivered. This is an existing concern for other schemes including SRN2 and SRN3 (Stoke interchange and M25 J10/A3 interchange), where Highways England have sole responsibility.

</table>

I object to site A58 Burnt Common, which has now become a 'Strategic Employment Site'. The overall burden on Send (and West Clandon) of the minimum of 7000sq m of industrial space (i.e. could be much larger) is greater than the now deleted up-to 7000 sq m from the neighbouring site A43 Garlick’s Arch. This is a net gain in traffic and congestion in this area. The proposed insetting of Send Business Park from the Green Belt indicates GBC’s increased emphasis and ambition for growth of this village.

I also have concerns over the changes in funding in policies SRN2 and SRN3. While I strongly welcome developer ‘funded’ (which implies more financial commitment than ‘contribution’) for road network improvements which are required as a direct result of new housing, I am concerned this may lead to a reduction of the affordable housing percentage delivered (which should be 40% in most cases). This concern is in part due to a change in Section 4.2.40, where there is in my view some softening of the language around the issue of developers needing to demonstrate lack of economic viability of affordable homes in order to reduce their standard quota (40%). This concern applies to other developer funded projects including Wisley cycle networks.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to POLICY P2 (6), specifically the new phrasing ‘Limited infilling may also be appropriate outside the inset or identified settlement boundaries, where it can be demonstrated that the site is as a matter of fact on the ground within the village’ referring to Ockham and Wisley, and by extension to other villages with settlement boundaries. I feel this change in language creates less clarity around the purpose of settlement boundaries as regards development policy. This objection is made in the context of the fact that there is no change to POLICY P2 (5), the intention for East Clandon to have a settlement boundary for the first time, which I have previously and still object to.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object that GBC are contravening the NPPF framework stipulation in paragraph 87 which states “As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances.” (Policy P2, P3, E5). The Guildford Green Belt Group have stated that 70% of new housing will be in countryside and 58% of this is on Green Belt (Gosden Hill, Wisley, Blackwell Farm). This is exceptional in size and thus does not meet the criteria to demonstrate exceptional circumstances. I support instead developing and densification of brown belt and urban areas. According to Policy H13, developments should have a maximum (and...
minimum) densification policy to prevent developers from using land inefficiently which leads to countryside erosion and ineffective use of brownfield sites.

I object to Policy S2 for the proposed provision of the very high overall housing numbers of 12,426 new homes, which is only a small reduction on the previous figure of 13,860. These numbers are still based on an overly high-growth economic development plan which in itself has had no direct consultation. They remain too high as shown by an objective assessment made by the report made for the Guildford Residents Association (GRA) by Neil MacDonald (independent adviser and commentator on housing demographics).

Also in Policy S2 housing numbers, I object to the fact that downward economic pressures (including Brexit) have not been adequately accounted for. Additionally in Policy E1, E2 there is too much emphasis on providing retail and commercial space in Guildford town centre, when the pattern of business is changing and more town centre housing is needed rather than retail. This would ease the pressure on housing on the Green Belt.

Furthermore, I object to Policy S2 because I believe the 12,426 homes includes estimated demand from London, and also now possibly from Woking’s perceived unmet need, and I feel Guildford will become a dormitory town for London and the surrounding areas, rather than meeting the needs of residents of Guildford Borough.

I object to the fact that in Policy S2, despite the afore-mentioned slight apparent reduction in overall housing numbers and industrial space; the reduction is mostly in Normandy/Flexford and the load on the East of the borough is still disproportionate and has even increased.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Objection to Guildford Borough Council proposed Local Plan (June 2016)

I object most strongly to the Guildford Borough Council proposed Local Plan (June 2016). The plan is unworkable and unsustainable and seems to have several errors.

I object to the SHMA numbers. The figures for housing needs are pre-Brexit and so need to be adjusted, however we have not been able to scrutinise the methodology used to establish the numbers so question their validity.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the building of a new junction at Send/Burnt common. I cannot see how this could possibly be proposed when it was turned down a few years ago, by the council and highways, when requested by the Newark Lane Residents Association, for its detrimental effects on the traffic on the A3- how have these effects changed? This junction can only have a detrimental effect on Ripley, pulling in traffic from Woking, Shere and many surrounding areas. The Street in West Clandon and Ripley High Street along with the road from Send will become congested rat runs.

There seems to be little that I agree with in this plan. Presumably because of Brexit it will need to be rethought and I do hope that the comments made to this and the previous draft will receive more thorough consideration.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the planned changes to the Green Belt. How can it be justified to take many villages, including Ripley, out of the green belt? The green belt is the envy of many countries and is there to protect our green areas in perpetuity. England is the most densely populated county in Europe and Surrey is the most densely populated county in England, the green belt was established for very sound reasons, which have not changed. Once lost the Green belt is never to be regained, the council should protect the Green Belt for our children and future generations.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to register my continued objection to the inclusion of Policy A35, Three Farm Meadows in the Draft Local Plan for many reasons.

1. I object to the change of boundaries which are identified incorrectly on the plan.
2. I strongly object to the removal of an additional 3.1 ha from the green belt – this is completely lacking in justification.
3. I object to the council not listening to previous representations and wasting tax payers time and money.
4. I object to the disregard of constraints of designated green belt land, infrastructure, air quality etc.
5. I object on the grounds that this site is the furthest from railway stations than any other possible site identified.
6. I object in relation to traffic associated with the RHS site opposite – the increases in traffic associated with this tourist attraction have not been taken into consideration.
7. There is a lack of employment on site – so most residents will travel to work. This will mean an increase in traffic – people will not regularly walk/cycle.
8. Local roads are at capacity and there are regular hold ups already.
9. I object to the lack of consideration regarding the damage caused by high pollution levels and nitrogen deposition.
10. I object to the lack of explanation regarding the change in the original time frame for the plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

---

I object to the increase in housing proposed in Tannery Lane, A42. The housing at this site has been increased by a third since the 2016 plan. There are no proposed to improve the local road network (only to add more junctions with the A3). This region is already VERY congested and the failure to consider how to improve and support the local road network in relation to this increase in housing is senseless. This increase in housing should not be allowed.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

---

1. I object to the extensions to the development of the Green Belt. I object the the extension of Garlick’s’s Arch site (A43). Green Belt should NOT be built on and this extension is UNACCEPTABLE.
2. There is significant confusion within the plan as to the reason for including Garlick’s Arch A43 in the plan. Reasons of separation between Send Marsh/Burnt Common are being ignored as BOTH sites are in the plan. The proposed changes to this plan are poorly thought out.
3. I object to the increase in housing at Garlick’s Arch A43. The potential increase in housing at Garlicks Arch will be extremely harmful to the rural nature of Ripley, Send and Clandon. These villages, as I’m sure you know, have a great rural history and this will be destroyed.
4. I object to the allocation of 6 travelling show people sites in A34 Garlicks Arch. There should be no inclusion of Travelling show people plots as this development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
Plan is self-inconsistent in respect of traveller sites. A50 Whittles Drive, Normandy, shows on the Site details: “Allocation: The site is allocated for approximately 14 Travelling Showpeople plots ...” Clearly A50 more than covers the total "need" of 8, (page 40, 4.2.22.) and so no “need” exists for this in site A43. This and other inconsistencies in the Plan mean no decision can be made on the basis of this document.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposal for a waste management facility in Green Belt at site A58. Transparency is greatly lacking in the plan regarding this waste management facility. It is very unclear in policy 4.423a and this does not allow for proper consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the change in policy on affordable homes – Policy 4.2.23 – whilst the first plan demads that “Developers will be expected to provide land for affordable homes at nil value,” the 2017 version says: Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site.” This means that the developer no longer has to provide any ‘affordable’ homes but has to make a payment to the council. So whilst the housing that we need must be affordable, it is unlikely that this development will result in many affordable homes at all.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the lack of planning for appropriate infrastructure for sites A43 and A42. Whilst there is clearly a need for better infrastructure for these developments, as acknowledged by the borough council, there is a complete lack of infrastructure improvements for both sites. Whilst the plan states that’s that the provision of infrastructure is ‘a key theme of our local plan’ this inconsistency completely undermines the plan and the development therefore should not go ahead.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/829  Respondent: 8796481 / Sally Erhardt  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P2

I object removing Send Business Park from the Green Belt – 4.3.15 – There can be no justification for removing (insetting) this site from the green belt and therefore no ‘exceptional circumstances’ as required by the NPPF can be claimed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp171/830  Respondent: 8796481 / Sally Erhardt  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

I object to the unfair burden on the North East of the borough for this development. The new plan has become even more unbalanced toward the North East of the Borough – why is 40.6% of the homes proposed within 3 miles of Send Marsh? This area has already had its fair share of development and it is very unfair that this region should face most of the development and the extended development proposed by the new plan

I object to the concealment of development through ‘deferment’ at sites A24, A25, A26, A43. - This deferment is designed to hide the number of houses being built. I object to this.
POLICY A35, land at former Wisley Airfield, Ockham

This proposed development of over 2000 homes will have major adverse consequences on the local infrastructure, in particular:

- High volumes of traffic on local narrow lanes in all surrounding villages.
- Unmanageable traffic flows onto an already busy A3 and Junction 10 of the M25.
- Additional traffic forced through Ripley and Cobham as a result of proposed road closures and junction changes. Particularly in the rush hour and school arrival and departure times these two towns are virtually impassable.

In addition

- As a result of the A3 an M25 junctions, levels of Nitrous Oxide around this area are already high and will be added to by the approximately 4000 additional vehicles from the site. This will be dangerous for new residents.
- The site is important for wildlife, being a Site of Special Scientific Importance. This was set up to provide protection for rare and threatened birdlife in certain lowland heath locations.
- There is currently no infrastructure at all on this site, meaning that all water, gas, electricity and telephone will need to be installed.

For the above reasons I OBJECT to the above-named Policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY A39, located in East Horsley

This site is for 100 dwellings and has been added since the 2014 local plan. This site is unsuitable for this number of houses as it will have very limited access onto Ockham Road South which is right up against the northern side of a railway bridge with a busy vet and a restaurant on the southern side.

The site is also prone to flooding in certain areas.

In addition, as a result of the additional dwellings, the local infrastructure will be unable to cope; in particular:

- The local schools, both primary and secondary, are already completely full and would not be able to take additional children. This matter is not addressed in the local plan.
- Public transport is currently inadequate with poor bus services and station car parks that are already full.
- Local roads are also unfit for purpose being very busy and in poor condition.
- The nearest medical centre, in East Horsley, is totally overstretched with appointments being difficult to obtain.
- There are only a couple of small shops in West Horsley with most residents doing their shopping in East Horsley village. Traffic and parking in East Horsley Village is already too great for the facilities.

For the above reasons I OBJECT to the above-named Policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3690  Respondent: 8796609 / Rupert Pye  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

POLICIES A37, A38, A40 and A41, located in West Horsley

All these sites are located within Green Belt. These sites, plus two others, are proposing 405 homes in total. The village as a whole had 1124 dwellings in the 2011 Census and the proposed developments represent an increase of 36% over the plan period, an enormous expansion by any standards. This will completely adversely alter the nature of the village as a whole and will change it from a low density housing area.

As a result of the additional dwellings, the local infrastructure will be unable to cope; in particular:
The local schools, both primary and secondary, are already completely full and would not be able to take additional children. This matter is not addressed in the local plan.

Public transport is currently inadequate with poor bus services and station car parks that are already full.

Local roads are also unfit for purpose being very busy and in poor condition.

There are only a couple of small shops in West Horsley with most residents doing their shopping in East Horsley village. Traffic and parking in East Horsley Village is already too great for the facilities.

For the above reasons I OBJECT to the above-named Policies.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I am writing to OBJECT to the overall number of properties scheduled for development in the Guildford 2016 local plan which takes no account of the fact that a substantial part of the Guildford area is covered by the Surrey Hills Area of Outstanding Natural Beauty (AONB). Quite rightly this is not to be developed which means that the same number of proposed properties are to be built on a far smaller area of land than is covered by the total Guildford area. The total number of properties should be reduced to take account of the proportion of land taken by the AONB; as it is, the density of new developments is approximately twice what it should be.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I also OBJECT to the fact that 76% of the proposed developments are on high quality Green Belt with only 24% being on Brownfield or Urban areas (Ash, Tongham and Guildford). It is also Government policy that Metropolitan Green Belt should only be built on in exceptional circumstances and that in this context housing need alone is not an exceptional circumstance; I therefore OBJECT to the revised local plan as a whole.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to make the following comments and objections on the above-mentioned Local Plan:

1. The reduction in the proposed number of new homes in West Horsley, at 90, is an insult to all those who previously objected to the Guildford Local Plan. It does nothing to reduce the very large number of dwellings proposed on Green Belt.
2. The eastern side of the Borough is now scheduled to take an even greater proportion of new homes in the Green Belt.
3. It is totally unacceptable that Guildford is choosing not to constrain its overall housing growth, as many other Councils have done, to protect Green Belt. The objectively assessed housing target will mean that, at the end of the Plan Period, Guildford has grown by nearly 25%, nearly double the Office for National Statistics prediction for the growth of Guildford.
4. Nothing has been put forward since last year's Consultation to improve the sustainability of the West Horsley development sites and thus meet National policy requirements. The local infrastructure will not be capable of coping with the extra volume of traffic and demand for services arising from the proposed new dwellings.
5. Flawed evidence continues to be relied upon to justify overexpansion.
6. More homes are needed on brown field sites in Guildford town centre, which is where these are needed, rather than on Green Belt around our villages.
7. Finally, I OBJECT MOST STRONGLY TO NO CHANGES BEING PROPOSED SINCE THE 2016 CONSULTATION TO INSETTING WEST AND EAST HORSLEY FROM THE GREEN BELT.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.
Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1403  Respondent: 8796673 / Suzanne Burroughs  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)
It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/2989  Respondent: 8796673 / Suzanne Burroughs  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.
Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3 – Rural Exception Homes

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Page 2827 of 3335
1. I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians. There is a particular problem near the school which is being increased in size so perhaps more children will be walking and there will also be more cars at the south end of west clandon village.

Where the A247 is restricted in its width outside the house called “Summers” vehicles regularly go on to the pavement and often wing mirrors are also clipped by two vehicles passing.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

1. I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

The summer of 2016 has been wet and so we have had no hosepipe bans. I worry that there is not sufficient water in the southeast area to supply more houses.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.
There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2985  Respondent: 8796673 / Suzanne Burroughs  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

I am already aware that there is pollution from vehicles when I am working near the road behind my hedge in my garden.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

1. I OBJECT to not protecting the Green Belt (Policy P2). Why do we have a greenbelt policy if it is not respected. It seems to me that GBC are completely ignoring our green belt.

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt. Once taken the green belt is lost forever. And are the housing numbers correct? As we have no access to the consultants work it is not possible to check.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Objections to Guildford Borough Proposed Submission Local Plan (June 2016)

I am aware that this e-mail attachment has been prepared by villagers but I have added some extra comments and I do feel that GBC has not listened to us previously.

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objection to specific policies and matters within the Plan.

1. I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.
The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result. It would make sense to me to use any brownfield sites in the town centre for residential use rather than more shopping or business use as the internet has reduced the number of pedestrian shoppers and a lot of “hot/sharing of desks” now takes place.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the Borough Wide Strategy (Policy S2)

   a. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

   b. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

   c. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any commonsense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open
countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

</tbody>
</table>

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity.
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river
20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.
25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.
9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.
10. The impact on small surrounding roads will create traffic gridlock.
11. It will join up existing villages and defeat the purpose of the Green Belt.
12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.
13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.
14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policies A37, A38, A40 and A41, located in West Horsley

These proposed developments are all within Green Belt and between them there are around another 400 more proposed houses. This along with the proposed 100 new houses in Policy A39, and a few other new houses within West Horsley make a 36% increase in the number of houses within the village. This kind of expansion would be to the total detriment of the village and alter it's nature beyond recognition. Therefore the impact of the Policies A37, A38, A40 and A41 are unsuitable for the following reasons,

- again the areas are within the Green belt
- again the surrounding are has inadequate infrastructure to cope with such a large number of new houses
- again the local roads can hardly cope with the existing traffic let alone any extra traffic generated by new developments
- again the local Medical Centre in East Horsley is already overstretched
- again the local schools have no more capacity for additional pupils
- again the public transport in the local area is inadequate

For these reasons I OBJECT strongly to Policies A37, A38, A40 and A41.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy A35 - Land at former Wisley Airfield, Ockham

The proposed new settlement at the Wisley Airfield Site was unanimously refused by the Planning Committee in May yet it appears in the Local Plan again. The site forms part of the Metropolitan Green Belt and therefore development is only permitted under 'very special circumstances' under the NPPF. The impact of such a large development would have a huge detrimental affect upon the surrounding area for the following reasons,

- the area is within the Metropolitan Green Belt and no special circumstances have been shown to allow the building of 2000+ houses
- there is a Site of Special Scientific Importance (SSSI) which is to provide protection for the wildlife in lowland heath locations and it provides part of a buffer to the ever encroaching urban sprawl of London
- there is no infrastructure on the Wisley Airfield site so all of this would need to be put in place to support such a large number of new house
- the already congested junction of the A3/M25 would not be able to cope with a vast increase in the number of cars such a development would generate
- the increase of extra traffic would have an adverse affect on the air quality in the area surrounding the site which would be detrimental both to people and the countryside
- the local roads in the surrounding area are already congested and are not suitable to cope with the huge number of extra cars generated by a proposed development of 2000+ new houses
- the schools in the surrounding area are already over subscribed and therefore cannot support an increase in pupil numbers from the proposed development at Wisley Airfield
- the Medical Centre in East Horsley is operating to capacity and making an appointment is already difficult but this would become even more frustrating if numbers at the surgery increased
- the shopping centre in East Horsley thrives and very often it's difficult to park so this would be increasingly difficult with the extra cars using the shopping centre
- the number of people commuting to London or Guildford would increase and the station car park has insufficient capacity for many more cars

For these reasons I **OBJECT** strongly to Policy A35.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
This proposed development wasn't included in the Local Plan in 2014 but now the field which is in the Green Belt is being proposed as the site for the building of 100 houses with the entrance to the new development being by the railway bridge in East Horsley. The impact of Policy A39 on the surrounding area would be unsuitable because,

- the access to this site is next to a railway bridge and an area of road very prone to flooding
- the access is also next to a vet and a restaurant all of which have cars coming and going on to an already busy road
- the access to and from the site is close to the steps down from the station and is where many people cross when returning home
- the area is within the Green Belt
- the surrounding area's infrastructure is insufficient to cope with the additional 100 houses
- the roads are unfit for purpose being narrow and poorly maintained with many local roads having no paths
- the local Medical Centre in East Horsley is already overstretched with difficulties obtaining appointments at present
- the schools in the local area are already over subscribed so would not have the capacity to admit new pupils
- the public transport in the area is inadequate

For these reasons I OBJECT strongly to Policy A39.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Local Plan has been drafted with the view that we need a certain number of new houses within the borough, but with half the borough designated as the Surrey Hills Area of Outstanding Natural Beauty (AONB) this large number of houses has to be accommodated within the other half of the borough. Much of this other half of the borough is Green Belt and the Local Plan then allocates 76% of the proposed new houses to be built on Green Belt land leaving the remaining 24% to be built on Brownfield and Urban land, namely in Ash and Tongham and Guildford. Our elected Council promised to protect our Green Belt in Surrey and have totally failed the people of Surrey with their revised Local Plan, as after the huge number of objections to the Local Plan of 2014 by the public the Council promised it would listen to the comments made. We were told they would be taken in to account in the revised Local Plan and I see very little evidence of them having done so, and indeed there has been an increase, including 100 new houses in Policy A39, in the number of proposed houses to be built with a higher housing density that will forever change the character of our villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am very disappointed that our local Conservative Councillors voted in favour of so many of the various Policies within the Local Plan. We have a Conservative Council in Guildford because they were voted in on the basis that we were being offered policies that would help protect our unique countryside in Surrey. We see more of the beautiful countryside threatened with being concreted over and we will become just another part of the ever growing urban sprawl of London, the London Borough of Guildford maybe?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I am writing to **OBJECT** most strongly to the new revised Guildford Local Plan, in particular to the Policies that affect West Horsley, but also to those in East Horsley and all the villages that the Local Plan has proposed to remove from the Green Belt. Most land in our borough no longer appears to be safe and designating various areas as Green Belt, SSSI's or for any other type of conservation seems to count for nothing. The proposed number of houses the Guildford Borough Council wishes to build in our villages will change the villages that their residents know and love. The proposal is for an overall increase of 36% in the number of houses in West Horsley alone and there's a distinct feeling that West and East Horsley have been 'allocated rather more than their fair share' compared to other areas of the borough. It has even been proposed that our local facilities such as the Horsley Tennis and Cricket Club and the East Horsley Kingston Meadows, which also has tennis courts, could possibly be considered for development. These are places that are a huge asset to the people who live in the Horsleys and are an integral part of village life which are enjoyed by many. The open spaces we have within our villages are a part of what makes our villages a special place to live.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I wish to strongly object to the proposals in the Local Plan for the Horsleys, particularly West Horsley. The very slight reduction in the number of proposed houses in West Horsley is welcome but it is insignificant compared to the number still proposed in the Local Plan for Green Belt land in West Horsley.

2. Guildford Borough Council's new Local Plan doesn't address the reduction in the objectively assessed housing target as many other councils have done in order to protect Green Belt. It has not listened to the opinions of Surrey residents who object most strongly to the number of proposed houses to be built on the Green Belt.

3. The belief that local residents will adopt cycling or walking rather than their cars to travel to the local facilities is a fallacy. Cycling on many of our local roads is a risk and for many walking is not always an easy option. The Local Plan 2017 still doesn't address the problems of lack of infrastructure such as a large number of proposed houses in West Horsley would necessitate.

4. I object to no changes having been proposed since the 2016 consultation to insetting West and East Horsley from the Green Belt.

Our elected Government has continued to inform the public that our Green Belt is safe in their hands. Our Guildford Borough Council has shown us this not the case as by insetting West and East Horsley it would allow more houses to be built without objection as they wouldn't be built on Green Belt.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I again send in another request for you to think even more closely about your horrific plans for developing the horsleys. You well know these villages cant take any more houses, from the point of narrow roads, very little parking for shops, over stressed doctors and over full schools. Please do not do this to our villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**With reference to the plan for the Horsleys**

I object to this new plan because the councillors promised to **protect the Green Belt**. Did the political candidates just say this to get votes and then ignore their promise once elected thinking there will be nothing the public can do? This is third world stuff and not worthy of Guildford Borough Council. Shame on you.

I object to the **shear number of extra houses** proposed for Horsley, West Horsley in particular. I think a little in-filling might be acceptable **IF** the need for extra houses has been shown now, which it has not been in the near past. The character of the village will change. The additional **percentage increase** is totally unreasonable.

I object to the lack of common sense being applied to this suggested plan insofar as our infrastructure cannot take many more houses. Schools are full, car parks are full already and the doctors’ surgery has a long appointment wait time. Also, what about the flooding in Horsley, at the moment not under control?

When I lived in Cobham I sometimes could not park at the shops and drove home again empty-handed. This is a sorry way to live.

I object to the suggestion of “traffic managing” in the Horsley area as with maybe 5000 more cars on the local roads we need full access to all the present roads to spread the traffic over the whole area not funnel everyone down the same route.

Think again if you wish to retain your council seat. You will not be voted for again.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Drains are blocked, giving rise to local flooding.

The villages of East/West Horsley need a new school site. Traffic and parking for residents must be terrible during the school year, even people in the village cannot get places at the present time, it needs a 3 form entry school with better sports facilities available for the local residents to enjoy, and enhance the children’s learning experience.

The Medical centre is totally inadequate for the village. Only today I tried for an appointment at the surgery.....2 weeks to wait.

We need more parking for the Village Hall, too many commuters use it to avoid high charges in the car park at the station.

Another few hundred houses will swamp the already very well used businesses, although we have 3 hairdressers, 3 Estate agents, please no more of these given permission to start up.

A36 I hope the mail Chown building at Thatchers Hotel will be preserved when you build on that site, it is part of village history.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

A41 The removal of this site from the revised local plan is short sighted to say the least.

The site A41 was given to the school to build a school fit for purpose, at the moment there are approx 430 pupils in a school build for 200 max children with 18 in a class currently there are 32 in each class almost double.

A waiting list of 96 currently.

The outdoor area is totally insufficient for 430 children.

Sports facilities in the school are just not viable on safety grounds.

Quality of life in classrooms in hot/cold weather is unacceptable.

Windows are single glazed in upstairs rooms, already a bird flew into one and the glass smashed..not acceptable.

The parking is inadequate and causes problems between the school and residents.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - East Horsley
I have recently looked at the new Local Plan put forward by Guildford Borough Council and wish to object to the proposals on the following grounds:

Whilst accepting that new houses will have to be built in both East and West Horsley, I feel that the total number proposed is simply too many as we do not have the infrastructure to deal with the increased population development on this scale would bring.

Many of the roads, for example the one in which live, are in dreadful condition and we understand the County has insufficient resources to carry out all the necessary repairs.

Flooding is common in many parts of the two Parishes making road travel difficult when heavy or prolonged rain occurs.

Our local schools and medical facilities are already under pressure and would not be able to cope with additional large numbers.

Car parking for shops, village halls, Doctors' Surgery and railway station is very limited indeed and there is no available space in which to extend these facilities.

In addition, I am totally opposed to these two Parishes being taken out of the Green Belt. The villages will cease to be individual entities and simply become part of the apparent plan to concrete over every available green space.

Proposed development that is strictly "in-fill" might be acceptable in smaller numbers but some of the proposals will totally alter the look and nature of the villages and cannot be acceptable to residents. I feel that proposals to alter the village boundaries in order to give more scope for "in-filling" are also unacceptable.

I realise that planning practice seems to put forward plans that do not include additional schools, shops, medical facilities, etc. as these would be included at a later date. Presumably these would require yet more green spaces numbers but some of the proposals will totally alter the look and nature of the villages and cannot be acceptable to residents. I feel that proposals to alter the village boundaries in order to give more scope for "in-filling" are also unacceptable.

I realise that planning practice seems to put forward plans that do not include additional schools, shops, medical facilities, etc. as these would be included at a later date. Presumably these would require yet more green spaces being built on, and to ask people to accept plans that do not show these additional works suggests the council is being less than open with residents.

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to express my objection to the Guildford plan proposals for West and East Horsley on the following grounds:

1. The developments would require the green belt boundaries to be changed which is totally contrary to Policy P2: Green Belt and the Countryside which states that the green belt will be protected against “inappropriate development” and I argue with my points below that the development proposals are inappropriate.
2. The density of the proposed developments is totally out of character with the rest of the villages – being much higher than the existing density and the number of proposed homes would swamp and forever alter the character of the existing villages.
3. The road network cannot cope with the volume of traffic at rush hour – adding this number of houses would cause complete gridlock. In addition the state of the roads would become far worse due to the inevitable increase in traffic once the houses are built. The heavy lorries which will come during the building phase will also cause considerable further damage.
4. There is insufficient school space at nursery, primary and secondary levels. The Raleigh School is already looking for a new site as it is too small for the existing children in the village and special provision has had to be made for Horsley children to attend the Howard secondary school. Any news homes will just make a bad situation worse.
5. Medical and dental facilities: - the current provision is too small for the existing communities. It is very hard to get a Doctor’s appointment and almost impossible to get on a list for a National Health Service Dentist. Additional homes would put extra stress on the existing facilities
6. The existing bus service is barely adequate – more homes will not alleviate the issue, just compound it
7. Shops and local services – West Horsley has but one shop and no provision is made in the plans for additional shops and services alongside the new homes. The parking for the shops and services in East Horsley could not cope with the influx of new homes/residents.
8. The waste water facilities would be unable to cope with any additional homes – it can’t cope with the number of homes that are already in the village, overflowing in Oakham Road North Green lane area.
9. Some of the proposed sites have inadequate surface water drainage – the land gets flooded. Building on land liable to flooding is frankly ridiculous.

In summary the development is inappropriate and the infrastructure would not be able to handle the additional homes / population and should therefore be rejected

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/2195  Respondent: 8798689 / Julian Allen  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
• The removal of site A46 from the Plan (with its proposed 1100 houses) has left the Plan even further unbalanced against the North East of the Borough with over 40% of the development proposed in this small area of Green Belt, all within just 3 miles of Send Marsh
• The potential for a substantial increase in industrial floorspace from 7000 sq m to an unspecified amount at the site A58 Burnt Common does not provide local residents with enough information for a full and proper consultation given the ambiguity and lack of detail within the document
• The potential for a Waste Management Facility at site A58 Burnt Common is briefly mentioned, obscurely in policy 4.423a and does not allow for full and proper consultation
• The increase in housing numbers from 45 to 60 at Site A42 in Tannery Lane, Send will have a significant impact on the already highly congested local rural road network around and within Ripley. This is in contradiction to section 2.14a of the Plan which states “Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays.” And yet there is no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.
• Brownfield sites A4 and A34 have been removed from the Local Plan – meaning there is more pressure on Green Belt sites to meet the so-called housing “need”.
• On Affordable Homes, the previous version of the plan (Policy 4.2.23) stated that Developers will be expected to provide land for affordable homes at nil value. Now it just says “Off-site provision or payment in lieu is expected to enable the same amount of additional affordable housing as would have been delivered on site. Developers don’t even have to build any affordable homes which defeats the point.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I live in West Clandon and I hereby register my opposition to the 2016 Guildford Draft Local Plan.

Just generally, and in common with many others, I do not believe the suggested housing figures have been calculated properly.

It appears to overstate the housing need.

The Council has prevented Councillors and others from properly considering the SHMA by refusing to make public the basis upon which it was drawn up.

When properly recalculated, the housing figure should be subject to constraints to reflect Guildford’ circumstances, including in particular the Green Belt and road infrastructures.

National policy permits such restraints to be applied and I feel it is inappropriate of you not to consider the need to do this.

With regard to specific policies they appear to be so vague, general and carelessly formed that they commit the Council to very little at all. I object to all of the policies in this 2016 Guildford Plan.

All the data collected was done pre Brexit and is therefore invalid.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire):()

I don’t believe the draft plan accords with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be clearly shown to justify removing areas from the Green Belt. This has not been done.

The need for housing and “a number” is not itself a very special circumstance justifying indiscriminate removal of sites from the Green Belt. Having properly calculated a housing needs number, constraints should be applied to it to reflect the Green Belt and the AONB. Each Green Belt site needs to considered on its own merits. You have not done this. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft plan does not demonstrate that this has been done.
Even once a housing number has been calculated it cannot be used to justify taking out Green Belt land on a wholesale basis.

No exceptional circumstances have been presented which would permit any of the sites in this 2016 Plan to be taken out of the Green Belt.

I object to the Plan itself and all the specific policies therein. All aspects of this Plan will lead to uncontrolled destruction of Green Belt land.

The Green Belt is a long term government policy protected by law.

The Green Belt is already a living example of sustainable development in practice and it is not acknowledged in these policies nor in this 2016 plan.

The Council is not committed to any of this.

I urge you to reject this plan and respect the wishes of the people of West Clandon and all right thinking residents of Surrey who are against any building on the Green Belt.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. **The plan says that “allocating these sites does not grant planning permission for development.”** However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that
specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays

Surrey Fire and Rescue deployed.
2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 June 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.
If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council’s eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing
the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.
I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the
south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/7558  Respondent: 8798849 / David Williams  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/7562  Respondent: 8798849 / David Williams  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/7598  Respondent: 8798849 / David Williams  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in...
London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID:  PSLPP16/7583  Respondent:  8798849 / David Williams  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of
unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150
homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and
with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.
I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least
one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.
The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinised by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere.
Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

---
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. "Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt." Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

1. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
2. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
3. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
4. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
5. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.
Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policies A37, 38, 40, 42, 44 & 45 – My Objections

- Some 295 houses in various smaller developments in West Horsley, 100 in Send and 15 in Ripley. These will generate traffic on the A 247 to access the A3.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp172/1958  Respondent: 8798849 / David Williams  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
• Gosden Hill development of 1700 houses. Reference to a potential link road from the development to the A247. The clear implication is for an access from the development to the A247 with enormous traffic implications for the A247.

• South bound off- and on- slip roads to service the development and replace the existing off-slip road to Burpham. The only North bound access to the A3 will be via the existing slip road off Clay Lane. (See later, Burnt Common).

• A 4-entry form secondary school, a primary school, a retail centre and a park and ride for up to 700 cars.

• When developed, the new employment site at the north side of Gosden Hill Farm (site allocation A25) will be treated as an Office and Research & Development Strategic Employment Site (7000sq.m). This could mean several hundred employees.

• I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.

• There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.

• Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,

• The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity.

• The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.

• The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.

• I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).

• The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/1959  Respondent: 8798849 / David Williams  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
• Garlick’s Arch development of 400+ houses and facilities for travelling showmen (implies storage yards and long vehicles). This will generate traffic on the A247.
• I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
• It ignores all the thousands of previous objections made by local people
• There is no proven demand for travelling show people plots in this location
• There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
• The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
• This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
• The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
• Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
• The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
• I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
• I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
• I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
• I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
• I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
• Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.
• Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

• With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

• The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

• I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

• Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

• Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

• Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

• I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

• I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

• I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

• It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Burnt Common strategic industrial employment site for light industry, storage and distribution activities. It is to be designated an Industrial Strategic Employment Site which means that it is a preferred site for industrial development including waste management facilities. The site is 9ha which it is stated allows for considerable future expansion. This will generate large amounts of traffic including heavy vehicles on the A247.

• I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
• This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
• The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
• There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
• There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
• The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
• The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
• 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.
• The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.
• The impact on small surrounding roads will create traffic gridlock.
• It will join up existing villages and defeat the purpose of the Green Belt.
• The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.
• The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.
• The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
**Policies ID1 & ID2 Infrastructure – My Objections**

Although much is made of the need for new infrastructure to support these developments and for this to be in place as needed, the Plan admits “…*we forecast that there will also be an absolute increase in overall traffic volumes*** and this is assuming all the infrastructure (listed in **App. C** to the Plan) is in place in a timely fashion. GBC has little or no control over the plans of Surrey County Council as the local highways authority and Highways England for trunk roads. Worryingly, the Plan now has less substantive information about improvements to the A3 South of the M25 from Highways England and it appears that their plans are not yet formed (**Policy ID2**). In the absence of such information, the infrastructure proposed is specific to each proposed development and does not address cumulative effects. What would be the case with regard to planning approval if SCC and/or HE do not provide timely infrastructure?

The Plan now calls for nearly all infrastructure to be funded by developers (see **APP. C**). We question how realistic it is to expect developers not only to pay for all the infrastructure but also to have it in place in a timely fashion. The Plan says that planning permission will be refused if timely provision of infrastructure cannot be secured. Such refusals will almost certainly be settled in the courts. Developers’ business models are based on building and selling houses to create the cash to provide infrastructure. People will be living on the sites well before infrastructure is complete. Will GBC prevent development of Gosden Hill until slip roads etc. are provided off and onto the A3? Again, the infrastructure is site specific and does not address cumulative effects.

If development were to be refused the land would still have been removed from the green belt and its future rendered uncertain.

Residents are being asked to accept very large amounts of development with little or no detail being provided on measures which would relieve existing congestion and limit future problems. The cumulative effects of the developments listed below are certain to have a devastating effect on the A247 through our village (and of course on Send) and it is hard to see how any of the infrastructure proposed in the Plan (**App. C**) will do anything to mitigate the effects of these developments on the A247 and hence our village.

**Summary of the Impacts on the A247 – My Objections**

All of these developments will draw additional traffic to the A247 through the village. It would be naïve to think that the employment sites and schools will serve only the developments themselves. Apart from the normal movements of residents to and from the new sites there will be considerable additional traffic on the A247 generated by:

- children from elsewhere being delivered to schools and collected
- the employees of the offices and industrial sites getting to work and returning home
- the vehicle movements generated by distribution and storage activities
- traffic from Wisley wishing to travel South and returning
- traffic from Gosden Hill wishing to travel South and returning
- traffic from Slyfield wishing to travel South and returning
- private and commercial traffic originating in the South and accessing Gosden Hill, Burnt Common or the A3 and returning (including traffic from Dunsfold)

The A247 although an A road:
- is less than 2 vehicle wide in places
- does not have continuous footpaths
- has several sharp bends
- has a hump-backed bridge with poor site lines
- has a very difficult junction to access the station
- is largely unlit
- has a primary school
- is already very congested at times

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Non-plan Items– My Objections

- Surrey County Council’s business plan for Newlands Corner (not referenced in the Local Plan) to attract 100,000 more visitors a year. A significant proportion of these can be expected to use the A247.

- Waverly B. C. has approved the development of 1,800 homes at Dunsfold which has the potential to feed traffic trying to avoid Guildford, onto the A247 to access the A3 (not referenced in the Local Plan)

Cumulative impact of changes – My Objections

Changes to the Plan have done nothing to alleviate the problems (particularly of traffic and congestion) raised in residents’ previous responses. Indeed it is now clear that the problems will be made much worse. There do not appear to be any changes which would be of benefit to the Clandons and indeed the cumulative effect of what is in the Plan and some external factors not in the Plan will have a much worse impact on the A247 through West Clandon and Send than the 2016 draft. Note that the A247 is the only road over the Guildford to Waterloo railway, North of Guildford that doesn’t involve travelling through the town centre.

Duty to Cooperate – My Objections
The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: PSLPA16/809  Respondent: 8798881 / H L Cousins  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

° The “objectively assessed need” figure of 693 homes a year is too high.

° A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.

° The current SHMA inflates the proposed housing figure due to

° failure to correct for errors in the historical data for international migration flows,

° issues with the way it considers students and affordability and

° flaws in the method for estimating the number of homes needed to support job growth.

° It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to Gosden Hill development being in the Local Plan The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.
The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/1334  Respondent: 8798881 / H L Cousins  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2733  Respondent: 8798881 / H L Cousins  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the location for new employment floorspace at Garlick’s Arch – Site A43 (Policy E2)

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2742 Respondent: 8798881 / H L Cousins Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.
4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

1. **I OBJECT (POLICY H1 – Homes for all)** Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3 – Rural Exception Homes

I OBJECT This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objections to specific policies and matters within the Plan.

1. I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example The Street in West Clandon and Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and West Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to the lack of proper infrastructure planning for sites (Policy I1)

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

<td>There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 &amp;</td>
<td></td>
</tr>
</tbody>
</table>
M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from severe traffic congestion. Much of West Clandon is deemed by Guildford Borough Council to be a Conservation Area and we residents are required to abide by those rules. Is not GBC also duty bound to protect and conserve the area? Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon, The Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles have, of necessity, to mount the pavement. With a primary school, two pubs and a children’s playground, quite clearly the village should be protected from, and not be forced to take yet more, traffic.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2730  Respondent: 8798881 / H L Cousins  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

4. I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick’s Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’) and the land to be taken from the Green Belt. Once taken Green Belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

</thead>
<tbody>
<tr>
<td>National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.</td>
</tr>
<tr>
<td>The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.</td>
</tr>
<tr>
<td>The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.</td>

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Borough Wide Strategy (Policy S2)

1. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

2. The Housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

3. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only
about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated
between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of
the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the
borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a
disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of
these communities.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

E. Policy S1 Presumption in favour of Sustainable Development– Our Objections

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies
relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest
(SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty,
designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for
urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One
of the important specific purposes of the green belt is to prevent urban sprawl.

Answer (if comment is on questions 1-7 of the questionnaire): ()
G. Duty to Cooperate – Our Objections

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to cooperate with the wishes of its own electorate.

Despite the thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the latest Local Plan.

The reasons for this are as follows:

1) I strongly object to the local area being taken out of the Greenbelt and the turning of our villages into an A3 urbanised corridor. The greenbelt should be protected at all costs. It is an easy option to give over hundreds of acres for building before exploring other avenues. Three Farm Meadows is in all but name, not a brownfield site, it should be designated greenbelt as it has been part of our rural environment for years. It is totally inappropriate to build over this land which has become a natural habitat of so much flora and fauna. Our villages wish to remain villages. Our children need green space to grow and flourish. It would be tantamount to an act of vandalism to carve through our beautiful countryside for developments which would be better located elsewhere on land already occupied by empty office blocks and disused buildings.

2) The road network is not supportive of so many building projects - especially Three Farm Meadows. How are all the people who live in these houses going to travel to work, school and local amenities. Already the A3 is solid every weekday morning. Junction 10-12 of the M25 are the busiest junctions on the M25 with traffic queuing back for miles every rushhour. Already the Horsleys face an overwhelming amount of traffic diverting from Junction 9 at Leatherhead and travelling through the village to get to further up the M25. Juggernauts and large busses travel through our village at astonishing levels. These roads are narrow and ill equipped to deal with such traffic. The huge increase in traffic which would be created by developments cannot possibly be supported by our local roads and lanes.

The local train stations carparks (Effingham and Horsley) are full every morning. Where are more travellers going to park? Where is the local public transport network? Last week I witnessed a bus grounding itself twice coming out of station approach. There just isn’t the space and capacity to deal with yet more commuting traffic.

Schools and Surgery - The local schools and doctors surgery cannot support a bigger intake. Already our villages have children who are unable to access their local school despite living in the catchment area. Carparks at the surgery are full to capacity. The Doctors are overworked and the national problem of recruiting GPs does not bode well for being able to cope with a large increase in local residents.
3) The water table in this area is higher than average. The roads are continually flooding and driving is hazardous with some roads, such as East Lane/The Street, frequently closing during heavy downpours. We have cheap road surfacing (such as that which was completed in Forest Road recently) which doesn’t last and the number of potholes frequently opening up is horrendous.

4) The current use of our roads by hundreds of cyclists needs to be taken into account. Cyclists flock to our area throughout the year training for Ride London and wanting to experience the Olympic route. Although not a problem in themselves, this should be taken into account when assessing the impact of any new developments on road usage. We continually have cycle teams and clubs riding through our roads - sometimes strings of 30/40 and the impact of these on local residents cannot be understated. Most residents are perfectly tolerant but more traffic would certainly involve more danger.

5) Air pollution is a real concern for anyone living in close proximity to the M25 and A3. This will also be a concern for residents of any new development at 3 Farm Meadows and may affect the rationale of building a school on that site. With child asthma and breathing related illnesses on the increase and parents choosing to move to the countryside to avoid the risk of their children developing these, it seems to be totally contrary to health guidelines to build a new village so close to one of the busiest junctions on the M25 and take away so much of the green space that is such a health benefit to so many.

6) Affordable housing - I have yet to see any affordable housing in the Horsleys and surrounding area. I wonder what is meant by affordable. My son is a primary school teacher. On a salary of £21,000/annum could you guarantee he will be able to afford a house in the area. There have been opportunities to build such houses but instead I see mansion after mansion being erected and small bungalows being turned into huge detached houses. This is not joined up thinking. There is a lot of talk, but not much action in this area. I feel developers are not really interested in supporting the local communities but more concerned with financial investment.

7) The development at Three Farm Meadows has already been rejected by GBC. I wonder why the developers are still permitted to put plans forward. I believe it should be completely taken out of the plan. The amount of time, effort and work for councillors to continually assess the viability of this plan, when it has already been rejected on environmental grounds, which have not and cannot be changed, seems ridiculous. It is a waste of our money to have this project continually submitted and debated.

In summary I totally object to Horsley and the surrounding area being targeted for an unsustainable number of housing projects. To build on Greenbelt land would be a travesty and an unjust act undertaken by the council. Once our precious countryside is built on, it can never be returned to what it was. There is no need for it and housing needs can and should be met through other projects in areas which already have the infrastructure to support them.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Wisley Airfield

We don’t think this is a suitable site for a large new development since it suffers from considerable noise and air pollution from the traffic around the A3/M25 junction. In our opinion this site is not convenient for commuting to London from ‘local’ train stations and would put many more car journeys on our hard-pressed roads. We note that the developers are hoping that bus services will provide some help; we don’t believe the local bus companies are viable enough to support their current rural routes let alone add to them. Basically any development in this area cannot rely on public transport and will generate an enormous number of extra car journeys which the local roads and infrastructure cannot support.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

A further cause for concern is the level of street lighting. A rural area like this doesn’t need much street lighting at all.

We all accept the inevitability of change, however, the rate of change is a critical element. Changes must be assimilated whilst retaining the essential character of the area. We contend that the rate of change during the last twenty years has been too fast and we are now confronted with a step change. If the plan proceeds in its current form the essential character of the area will be lost for ever.

Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

There has also been a relentless amount of infilling and house extension work. In particular, many bungalows and small houses have been torn down to make way for large houses. This should never have been permitted because older people end up living in large under-occupied houses or are being forced out of the area completely and this affects the character of the village.

Answer (if comment is on questions 1-7 of the questionnaire): ()

We are writing to register our objection to a number of elements of the Guildford Local Plan Proposals concerning the Horsleys.

General concerns

My wife and I have lived in East Horsley for over twenty years and during this time we have witnessed a change from a rural environment to one more like an urban environment.

There has been a been a significant increase in traffic. This has put an immense strain on the roads and drains which now need constant attention and are always in a poor state of repair and are sometimes dangerous.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Green Belt

We object strongly to the removal of the Horsleys from the Green Belt status because this protects the area from excessive development and loss of character. We don’t believe that the protection provided by Conservation Area status is good enough to prevent expansion of the villages in the same way that the Green Belt status has done. We do not believe we are faced with “exceptional circumstances” which would permit the re-designation of Green Belt land. We also object to the extension of the Settlement areas of Horsley which appear to have the sole aim of converting Green Belt land to potential building sites.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick's Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/3078  Respondent: 8800545 / Bill Taylor  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base
I object to the Strategic Housing Market Assessment (SHMA) figure of 693 houses per annum in the borough being too high (Appendix D).

I consider the "objectively assessed need" figure of 693 homes a year is too high.

- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes.
- The current SHMA inflates the proposed housing figure due to a failure to correct for errors in the historical data for international migration flows, issues with the way it considers students and affordability and flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld by the council and treated in secrecy by the council and cannot be checked making the process unaccountable.

The Plan's proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers.

However, it is based on "commercially confidential" modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g., Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford. The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt. The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement putting pedestrians at risk. Note that young families use the pavement to access Clandon school and everyday during rush hour traffic they put their lives in danger as no workable traffic calming measures have been implemented that prevent vehicles from mounting the pavement to pass each other at pinch points in the road or to manage the excessive speed of vehicles passing through the village.

I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed way junction at Burnt Common. This has the potential to generate large volumes of traffic including commercial vehicles on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham. No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England's requirement of 2km. Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy A43 and A43a on Garlick's Arch.

The site was inserted in the draft plan at a late stage just before publication of the consultation draft. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys.

Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt. I have seen no evidence in the proposed local plan that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council may have been offered the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land, if needed, could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick's Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site. Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current "soft" edge approach to Guildford.

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site?
There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4). This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11) Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

I object to the inclusion of the land for new on/off ramps at Burnt Common (A43a) The addition of north facing ramps to the A3 at Burnt Common would be a significant negative impact for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of 'through' traffic.

Page 19 of 25
William Taylor- Objection to Local Plan
The route from London/M25 to Woking would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to these areas on small roads which cannot be improved and which were never designed for the current traffic levels let alone increases in traffic levels that would result if the proposal to build new on/off access to the A3 at Burnt common (A43a) were to proceed. The proposed Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the damage to the historic environment as a result of the scale of the proposed development (Policy D3); I object to the local plan based on the impact it will have on the special countryside of the borough. The proposed development at Garlick's Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/12745  Respondent: 8800545 / Bill Taylor  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of a strategic employment site at Gosden Hill Farm (Policy A25). Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.
I object to the inclusion of a strategic employment site at Garlick's Arch (Policy A43). It is in a non sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development. The site is in any event subject to frequent flooding and unsuitable for development. If developed, the new employment site at Garlick's Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick's Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick's Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the location for new employment floorspace (Policy E2)

I object to this policy, It would be more sensible to confine new office and research and development floor space to the urban Guildford area, I also oppose the policy of expanding the Research Park onto Blackwell Farm, No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick's Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick's Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises,

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many "leisure and visitor attractions" already. The case for creating more is not made and no examples are given. Instead, the plan's explicit priorities should be:

1. To protect the borough's prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An "English town break" (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in...
London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

3. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy E7 Guildford Town Centre

The policy "vision" describes protecting the Guildford's unique setting and historical character and sets out some of the ways this will be done.

However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area. The policy does not address any of the major issues raised by the Council's own Town Centre Master Plan, the Guildford Vision Group's proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF. The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford's character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford town centre.)

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy HI - Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set niles on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated. I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council's timidity is a case of "regulatory capture" by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build new housing on the Hog's Back.

Page 8 of 17
NJ Taylor - Objection to local Plan
It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant.
The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand. In addition the definition of an 'affordable home' is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to Policy H3 - Rural Exception Home.

It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the "mix" this can include "market" housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances."

The wording of the policy is far too wide and as currently drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments. The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within
which sites will be argued to be "closely related" Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances." The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Our villages are already suffering from severe congestion for much of the day) for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces. Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians. The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough's infrastructure is already heavily strained.
However the plan's determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number. The policy wording says nothing about roads and traffic. The Council's methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

William Taylor - Objection to local Plan

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy 11. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough's infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of house building as if by magic. It makes implementation critically dependent on providers outside the Council's control and on the vagaries of CIL income.

It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy 11 requires the delivery of improvements to infrastructure in conjunction with development. I have concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all. Despite the Garlick's Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents in the locality will see their quality of life significantly deteriorate in many ways. Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick's Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed.

Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years after any housing or industrial space is built and the required infrastructure may never be put in place. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network.

The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I object to poor air quality concerns (Policy 13)

Paragraph 4.6.27 of the Plan states that "Development must also mitigate its traffic impacts, including its environmental Impacts and impacts on amenity and health." The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to not protecting the Green Belt (Policy P2).

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council's to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation.

Paragraph 4.3.16 only states that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified within the local plan. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise.

Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council's growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned.

I object to the "insetting" of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the "openness" of the Green Belt, a term which neither the plan nor the NPPF defines.

To "inset" two-thirds of the borough's rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough's location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed "insetting" and boundary extensions go ahead.

I object to the proposals to remove from the Green Belt the so called 'strategic sites' of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick's Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. The local plan fails to demonstrate any exceptional circumstances for these sites and villages (as mere housing need does not constitute a 'special circumstance') to be taken from the Green Belt. Once taken from the green belt they will be lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another.
The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC's Green Belt & Countryside Report does not address Garlick's Arch (Policy A43 and A43a), so there is no evidence base to support including this site. Rather than developing Garlick's Arch, there is an existing brownfield site just to the south off the site at Burnt Common, with surplus land that could accommodate a further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/12758  Respondent: 8800545 / Bill Taylor  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that "allocating these sites does not grant planning permission for development." However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether "exceptional circumstances" existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as well as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as III as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless "exceptional circumstances" for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-tenn considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to development in areas which are at risk of flooding (policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough's identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick's Arch (Policy A43) is identified on the Environment Agency's flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council's SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to this Policy as the development proposed will not be sustainable (policy S1)

The NPPF states that the presumption in favour of sustainable development "should be seen as a golden thread running through both plan-making and decision-taking." As the first policy in the Plan, Policy 81 ought to set a clear framework. Instead, no definition of "sustainable development" is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

Policy S1 is deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions.

The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications "wherever possible" and "without delay" reveals the pro-development bias of the plan.

Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy largely disregards the 12 Core Planning Principles set out in NPPF paragraph 17. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy. The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Borough Wide Strategy (policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards in light of the Brexit decision. The housing number is based on an arbitrary Housing Market Area (HMA): the "West Surrey" tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, "West Surrey" is much too small. Half of Guildford borough's residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside "West Surrey".

Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the triborough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has to date failed to revisit the data to validate that it is correct despite overwhelming concerns raised by borough residents. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make "West Surrey" reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour's "need", Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey's 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is "deliverable" and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council's cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt,44%AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the
need to build on Green Belt
or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done? The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas. The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick's Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send Page 3of 17
NJ Taylor- Objection to Local Plan border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards.

Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result in coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:
1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest 'value creation' areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

2. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (e.g. from Guildford Residents' Association and Councillor David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant. In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account. The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councilors before being adopted.
2. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Bell, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
3. The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.
4. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
5. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
6. Much of the infrastructure required to support the level of development proposed is outside the Council's control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences.

This is utterly unrealistic and indicates a lack of knowledge of developer's business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
7. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.
8. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation.
9. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.
10. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018.
11. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars.
12. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.
13. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.
14. The proposal for Garlick's Arch was added to the draft Local Plan without any prior consultation under Regulation.
15. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

16. No adequate explanation is given as to how the asp rational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

17. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councillors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

18. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

19. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

20. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

21. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council's refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement 'Conservatives Say Green Belt To Stay', the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition. In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

I object to the late inclusion of the new site known as Garlick’s Arch and the proposal to build hundreds of houses and thousands of square feet of industrial units on that land. No exceptional circumstances exist, there is ancient woodland and industrial development should be located and restricted to the current industrial development at Slyfield, where there is room for further development

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of the new site known as Land West of Winds Ridge and Send Hill for both housing and travellers sites. This countryside is inappropriate for housing, it has an area of unsafe, vented land fill and the siting of travellers where there is a narrow width single track country road is impractical at best.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I fundamentally object to the removal of Send and Ripley from the Green Belt as this will lead to the destruction of these villages and their countryside features forever. The result of this will also be the complete urbanisation of the land between Guildford and Woking, which is bad planning, bad for the environment and bad for those who have chosen to live outside the urban sprawl.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I would like to object to the local plan and specifically the plan proposed by Dandara and their proposal to place a number of homes on the field adjacent to the A246. I feel that this is wrong for the following reasons

- impact on the local schools ie Cranmore, Raleigh and the Howard. Currently the A246 is used as a route to all of these and in the morning is heavily congested with school traffic, by allowing these houses then the traffic will be delayed making the lives of both the school children and commuters suffer.

- the area is already deemed as both a green belt and outstanding natural beauty. By allowing it then is this going to allow other people who live up Shere road to place disproportionate increases on their houses.

- this will result in the loss of the green belt and outstanding natural beauty for all of Shere road including Sheapleas.

- access onto the A246 will cause chaos as the influx of around 120 cars , assuming that each house has 3, to the already congested road will delay all commuters.

- water supply is currently provided from a tank at the top of the hill and the extra would cause an unnecessary burden on the infrastructure

- there are also slow worms on the site. As you should know these are protected and the land they are resident on is therefore protected.

**General to a number of these proposals**
- unsupportable burden on the current drainage which is currently creaking
- the school places, there does not seem to be any plan to increase the number of school places in either primary or secondary. As the council has already turned down the planning by the Howard what is the plan?
- the support services such as the medical facilities are inadequate and the extra houses will result in these to cease to function, currently it is difficult to get an appointment to see a doctor, about 1 week, and almost impossible to get an appointment with your registered doctor. This means that you need to explain the symptoms multiple times for those who suffering with a long term illness.
- there does not seem any reason why boundaries of the Horsleys are due to increased barring to allow further development.
- the shops in the centre of east horsley have been falsely classified as a District Centre and would be inappropriate for the development proposed, the result of this is that the inhabitants would need to go the Cobham or Burpham for shopping therefore creating extra traffic.
- there appears to be a Strategic Housing Market Assessment (SHMA) with some mathematical model which we are unable to see and do not believe that the local borough knows how it produced the numbers.
- the density suggested will result in the Horsleys being of a greater than other proposals.
- there does not seem to be any mention of using brown field sites which should be the first consideration.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Keens Lane is too narrow to have two-way traffic.

Additional traffic accessing Keens Lane will cause further congestion on the Worplesdon Rd.

The roundabout currently at the top of Keens Lane is dangerous as users treat it as a chicane.

The congestion on the Worplesdon Road especially at peak times is currently unacceptable, adding more housing in the area will significantly increase the traffic.

Comment ID: pslp172/4499  Respondent: 8801505 / Paul Edwards  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.

11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp172/4501  Respondent: 8801505 / Paul Edwards  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to
build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.

4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”

5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.

7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I am extremely concerned about the amount of new housing proposed and the infringements onto the current Green Belt, which will result in a significant increase in traffic and pollution in the area and the road through West Clandon becoming even busier and resulting in traffic accidents, more injuries and deaths. I attach two photographs taken in the last year which demonstrate very clearly how narrow the A247 is in parts – one is taken outside Summers and the other outside the Clandon Village school. In both cases lorries have mounted the pavement to pass each other - no further explanation needed. Increased housing will increase the amount of lorries passing through the village and on completion an increase in traffic in general.

Once the green spaces are taken, they can never be brought back and our country will forever be poorer and a less pleasant place to live.

I do not understand why the government cannot encourage more development and extra housing outside of the South East of England to ‘spread the load’ and discourage more and more people wanting to come to London and the South East. This should also ease the price and affordability of housing in the South East.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I trust that the objections made above are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,.
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.

7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).

8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4543  Respondent: 8801665 / Charlotte Edwards  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt
I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.
24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Protection for the AONB should be strengthened, not weakened. Guildford’s position on the North Downs, with its view of green fields from the High St., and rich biodiversity, is what makes it so valuable to residents and visitors and must be preserved. I object to any weakening of the protection. We cannot tell what changes may come in leaving the EC, and may find that there is less need for housing in the future. If we let the chalk grassland go, or weaken its links, we can never get it back again.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy P2, P3 & E5. I object that 58% of new housing development will be in the Green Belt, this is far too high. I particularly object to proposed development at Blackwell Farm, as this is an invaluable refuge for wildlife, eg. birds and butterflies, along the ridge of the North Downs. We must not destroy our heritage, please.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Finally, I object in particular to development of sites A36 to A41 (East and West Horsley). Building 533 new houses on these sites, plus at least another 90 on small sites is excessive and disproportionate relative to plans for the rest of the borough. The total number of homes in West Horsley will increase by 35%. The rural character of both villages will be destroyed. The Horsleys feel victimised by this plan, which has been engineered by Council leaders representing Ash and Tongham, at the other end of the borough, where, in an astonishing case of political double standards, the Green Belt is actually being extended under Policy P3! Under the plan, rural West Horsley will take 35% of new homes, urban Ash and Tongham 16%, and Guildford urban area only 11%. Such an increase will put unsustainable strain on local facilities and infrastructure, including public transport, parking, schools, medical facilities, sewage, surface drainage and shops.

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY D2

I object because sustainability should run through the whole local plan, as claimed in the NPPF, “like a golden thread”. It should be set out clearly in Policy S1, not as minor detail in Policy D2. This policy amounts to “greenwashing”: expounding aspirational environmental targets while ignoring the fact that building so many new homes across the Green Belt will be environmentally and socially unsustainable (bringing unacceptable traffic congestion, overstretched schools and medical facilities, and more pollution)

Answer (if comment is on questions 1-7 of the questionnaire): ()

**POLICY E6**

I object because the Plan’s priority should be to protect Guildford’s prime leisure and tourism asset, namely, its countryside, from inappropriate development. Visitors do not depend on new attractions and the most valuable forms of tourism, such as walking and cycling, require no new development

Answer (if comment is on questions 1-7 of the questionnaire): ()

**I object to infrastructure policies set out in I1, I2 and I3**

Infrastructure improvement proposals are inadequate even to meet current needs, let alone the new developments proposed in the Plan

In West Horsley, roads are in poor condition with frequent potholes. Many are unable to sustain even the current levels of traffic, particularly increasing levels of HGVs and online delivery vehicles. The principal roads through the village are narrow, winding lanes, with pinch points, sections without pavements, and are generally unlit. Many of the drains are blocked causing frequent surface water flooding when it rains. Pavements are in poor condition, often narrow, uneven and overgrown by adjacent vegetation. Local schools and the Medical Centre in neighbouring East Horsley are already operating at capacity

I sincerely request that GBC that radically reassess its own policy objectives rather than force through a Plan which clearly does not have the wider support of the residents of Guildford Borough.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the removal of villages including West Horsley from the Green Belt by insetting and to extending the Settlement Area boundaries set out in Policy P2

GBC states in the first line of Policy P2, “We will continue to protect the Metropolitan Green Belt against inappropriate development”. This is blatantly untrue when around 65% of the proposed developments will be made on land that is currently in the Green Belt, and no “exceptional circumstances” or other reasons are provided to support the proposals for new Green Belt boundaries

The Key Evidence document “Guildford Borough Economic Strategy 2013-2031” makes no case for locating large numbers of new homes in West Horsley or its neighbouring villages, and proposed new economic development sites are on the opposite side of the Borough to West Horsley

West Horsley is a rural village in a rural location. Its Green Belt status should be preserved: it has been a key factor maintaining the character of the village, with its open green spaces, woodlands and large residential gardens, which make a vital contribution towards bio-diversity and providing wildlife corridors. Yet that same Green Belt status has not been a serious constraint on development within the village

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY P2

I object because:

- The statement that “the general extent of the Green Belt has been retained” is a bare-faced lie
- The policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor was irregularly commissioned by Council officers without the authority of Councillors
- It is a matter of law, morality and national and local policy, that the Green Belt should be protected in perpetuity

I particularly object to insetting of villages from the Green Belt and extending settlement boundaries in many villages

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY S1

I object because:

- The policy does not give any definition of “sustainable development”
- It ignores most of the 12 Core Planning Principles set out in NPPF paragraph 17
- It promises “development that secures the economic, social and environmental conditions in the area” without any recognition that these factors often conflict
- It fails to commit to uphold Green Belt boundaries and protections

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
As a resident of West Horsley, I am writing to object to the Guildford Borough Proposed Submission Local Plan.

I reject and object to many parts of the Plan. Much is based on flawed evidence and inadequate consultation with local people. More than 20,000 responses to the previous draft Local Plan in 2014 were opposed to many of its proposals, yet GBC has made relatively few changes, and certainly none of any consequence. Its aggressive and unjustified target of increasing housing stock by 25% would create an intolerable strain on both land and infrastructure in this already congested part of the country, and its assertion in Policy P2 that “We will continue to protect the Metropolitan Green Belt” is frankly laughable in light of its proposals for insetting and settlement boundary changes proposed for so many of its rural villages. The reality seems to be that it is adopting an implicit forced growth policy for the Borough – one that is not supported by the majority of its electorate.

**I object to the borough housing targets set out in Policy S2**

The predicted population increase is unsubstantiated: it is in excess of Government ONS forecasts. Policy S2 states that provision will be made for 13,800 new homes between 2013 and 2033. The number of homes is too high and unsustainable in Guildford’s villages. The target outlined represents a 25% increase in the housing stock of the borough, while ONS projects a population increase of some 15% for Guildford Borough over this same period. And in light of the Brexit vote, GBC’s predictions are possibly even more questionable. I agree with East Horsley Parish Council’s very reasoned analysis of how and why GBC has come to such an over-inflated target for housing growth in its response to the Plan.

**I object to the development of 385 homes on the 4 proposed sites in West Horsley set out in Policies S1 Presumption in favour of Sustainable Development, S2 Borough Wide Strategy, H1 Homes for all, H2 Affordable Homes**

The need for so many houses to be built in West Horsley and at much higher densities than currently exist in the village over the first 5 years of the Plan period is totally unproven.

The expansion of West Horsley with the proposed high volumes of new housing development is unsustainable in terms of provision of school places and medical services, drainage, road capacity, public transport, shops, and parking for essential services (especially in East Horsley for shops, the library and the station).

The West Horsley Parish Council and Surrey Community Action Housing Survey: May 2014, identified only a limited need for some 20 affordable homes for local people who want to remain in the village (for young people and for elderly people who wish downsize to a smaller home).

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY S2

I object because:

- Concerns about the Plan’s predicted increase in population and housing needs have been raised since 2014, but the Council has chosen not to seek better data
- The population and housing needs numbers are based on pre-Brexit projections, so probably need to be revised downwards, possibly quite dramatically

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy P1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object most strongly to the changes that have been made in the policy for building and developments in AONB.

There was previous protection and key tests to be considered for proposals of development, which included conservation of wildlife, conservation of beauty and views in AONB, to ensure there was support for the rural economy, to provide public access to AONB. These protections must be kept in place.

Villages in the Surrey Hills have had a great increase in housing numbers in recent years, Gomshall probably more than most, yet there has been no change in the infrastructure. Public transport has DECREASED, this putting more cars on the road, the Medical facility is under increasing pressure to cope with many more new residents, there is a shortage of school places especially from 11 upwards and roads are in appaling condition, and not maintained. There has to be an infrastructure policy before any new building is approved.

Finally, as before, why not use the many brownfield sites first?

The changes being made from the policy previously put forward are not acceptable and therefore I register my objection.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Infrastructure Policies I1, I2 and I3: I object to these policies because they do not actually provide adequate planning for the improvement of infrastructure in and around East and West Horsley. I have particular concerns about the inadequacy of the narrow, winding lanes, the poor drainage and frequent flooding of these lanes, the pavements in poor condition and the low arched bridge on Ockham Road North which is regularly struck by large lorries. Local schools are already at capacity and there are no proposals to deal with this. The Medical Centre is also full and the proposal to expand it will not happen early enough. The station car parks are full every day. I do not believe that the infrastructure policies are adequate for the enormous scale of the proposed housing development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Policy P2: I object to the Draft Local Plan's infringement of the Green Belt. Despite saying 'We will continue to protect the Metropolitan Green Belt' GBC plans to build 65% of its new homes on land currently within the Green Belt while using brownfield sites in Guildford for commercial purposes. I do not understand the logic behind the decision to use available brownfield sites in Guildford for commercial buildings instead of for the high density housing (particularly flats) that could provide homes for the many people who already work in Guildford but can't live there. Under NPPF rules, GBC could use the protection of the Green Belt as a constraint to the delivery of new housing, but they have voluntarily chosen not to, in direct breach of the Conservatives' promise to the electorate ('You can trust us with the Green Belt') before the elections.

- Para 3.13 proposes that East Horsley should be inset from the Green Belt, implying that it does not make an important contribution to the Green Belt. I object and contest this: East Horsley is composed of woodland,
narrow, winding, tree-lined lanes and houses with large gardens and hedges. It is a rural village and its being in the Green Belt has preserved its character while still allowing housing stock (149 new homes in the village between 2000 and 2015).

- Para 4.16 proposes changes to the settlement boundaries of East and West Horsley. I object to Policy A39 which proposes moving the settlement boundary along the deep ditch ('classified by the Environment Agency as a 'main river line') behind the houses on the west side of Ockham Road North to the eastern boundary of Lollesworth Wood, removing five hectares of land from the Green Belt Under NPPF rules Green Belt boundaries may only be changed in exceptional circumstances, and housing does not constitute such a circumstance. Another serious objection to this land being used for housing is its liability to flooding and part of it has been designated Level Three flood risk which is the highest risk of anywhere in East Horsley.

- I object to the settlement boundary being moved and Kingston Meadows being removed from the Green Belt. This is the main recreational space in East Horsley (the village green, in effect) and is used by families, fitness enthusiasts, children at play, footballers, dog walkers daily, and sometimes for community events such as the recent Queen's Birthday Party. I resent GBC's PR machine telling us how they and the Local Plan promote healthy living and exercise while they are actually threatening a valuable resource in East Horsley.

- Para 3.17: I object to the proposal to remove Wisley Airfield from the Green Belt. This tract of farmland is an important part of the Green Belt and is totally unsuitable for high density housing for many reasons, including traffic density, local infrastructure and poor air quality. Councillors voted unanimously against the recent development proposal so I do not understand why it is still included in the new draft Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/5078  Respondent: 8802369 / Penny Panman  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy S2: I object to the enormous scale of the proposed building plan. The Office for National Statistics and the Department of Communities and Local Government predict that, based on their population and household forecasts, 517 homes per annum will be required. But the Strategic Housing Market Assessment has for some reason added another 120 homes per annum in order to 'support economic growth', 31 to 'improve affordability' and 25 due to 'student growth' which brings the total up to 693 homes per annum. Guildford Borough Council tries to blame central government policy for the housing targets, but I believe they are actually due to GBC's own aggressive policy of civic and economic expansion. This is a political choice made by GBC without being honestly or transparently explained and I do not believe it is supported by the majority of the electorate. Doubt has consistently been thrown on GL Hearn's methodology in reaching the 693 homes per annum, and this has been reinforced by Councillor David Reeve's and another independent source's recent exhaustive research and mathematical modelling. The whole draft local plan is being built on shaky foundations. We deserve better.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

To summarise: despite Guildford Borough Council's promise that they have listened to local concerns about the previous draft local plan, I believe they have continued to tread exactly the same path as before, except that they have proposed an even greater number of homes while refusing to share the methodology behind reaching this number and they have taken even more land out of the Green Belt. Yet again the electorate is being treated with contempt. I object to this draft local plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the planned proposal for the development of West Horsley as set out in the Guildford Plan.

I have been resident in West Horsley since February 2013 and have a 9 year old daughter at The Raleigh School. West Horsley is a delightful village where residents made us feel welcome when moving here.

I grew up in Essex in an area that was within the Green Belt - it was like West Horsley a delightful village surrounded by farmland. The area was removed from the Green Belt and has over the past 15 years been developed and built on removing character, history and atmosphere. The original residents have gradually relocated as my old village is now a commercialised sprawl and extension of local Urban towns. I do not want to see this happen to West Horsley!

Looking at the planed number of homes in the proposal I cannot understand how local infrastructure of Roads, Public Transport, Doctors, Schools, Drain and Sewerage systems can support this number of houses. The roads in West Horsley are narrow and subject to frequent flooding. In several locations there are no pavements or only one side of the road is paved making walking or using a buggie dangerous. This is acceptable based on the current number of residents but should you increase the population of West Horsely as per the plans how do you intend to cater for local residents 'traffic' to the local shops, schools and station etc.

I accept there is the need for some affordable housing within the area for local residents but feel that the proposed addition of 385 houses to be build within a few square miles will make West Horsley into a 'New Town' taking away the attributes that make it special. I cannot comprehend why it would not be more suitable to build this number of houses on a site nearer to an urban town i.e. Guildford where some of the infrastructure is already in place i.e. roads, public transport etc.

I really hope that you take my objections along with the objections of all Horsely residents into consideration before taking the decision to build in our village - a decision that once made and carried out cannot be retracted.
As a resident of East Horsley for the past 20 years, I am writing to express deep concern about the general thrust of the New GBC Local Plan, and in particular about the proposed assault on the existing Green Belt. A very large target number of new houses are being proposed – an actual increase from the previous plan, in spite of objections – and the knock-on effects of such development on a village that is already under severe pressure as regards traffic and parking, and access to local amenities, will materially damage the quality of life for its residents – and leisure visitors. There are, however, two aspects of the new plan which I particularly wish to highlight.

First, the increased traffic implicit in a significant number of additional new houses. Over the period I have lived in East Horsley, the experience of walking down Ockham Road North and Ockham Road South to the station or the shops has become increasingly fraught, as more and more traffic, including heavy vehicles as well as domestic vehicles, charge by unrelentingly. These roads are narrow and the speed and heavyweight of traffic currently using them act as a severe deterrent to many people who would otherwise go out on foot rather than by car. The significant numbers of new houses currently being proposed under the new plan would only intensify this situation, and would seem designed further to discourage pedestrians, and make the roads – and of course, the parking at both ends of East Horsley – even more congested and unviable.
Second, the issue of the Green Belt. I am deeply disturbed to see that both East and West Horsley villages are to be taken out of the Green Belt. And I understand that 65 per cent of the new houses being proposed would be built on land that is currently in the Green Belt. These proposals are completely unacceptable as, once destroyed, these previously protected and increasingly valuable green belt amenities can never be recovered. Their importance, not just to the residents of the Horsleys, but more widely as essential national resources in an increasingly built-up environment, cannot be overstated.

I therefore urge the Council to take a step back and radically reassess their current plans, which threaten enormous damage to this vulnerable area.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

As a resident of Sime Close, I would comment on the summer 2016 local plan as follows:

A22 Land north of Keens Lane, Guildford – homes (C3) and care home (C2)

1. Planning issues

   1. The autumn 2013 issues and options document designated several areas (including plot A22) as poor for housing, yet the summer 2014 and 2016 local plans indicate plot A22 still for development. I do not understand this significant change in opinion and would seek proof from professionals that the areas are suitable for housing.
1. The GBC leader has tweeted that the Strategic House Marketing Assessment (SHMA) should be revisited following Brexit. The number of housing units will then be reduced significantly from the current 690 and would negate the need to use Green Belt as housing.

1. The site is currently categorised as Green Belt land, yet the local plan moves the boundary to exclude it from the Green Belt. I have a fundamental issue with GBC taking such improper action and not making this clear in the local plan. As such, no development should be carried out. It’s critical that Green Belt land is protected for both the survival of wildlife and human social and leisure use. The countryside is part of Britain’s heritage and it needs to be conserved. This version of the local plan appears to have been made without due consideration of these factors.

1. Brownfield sites should always be considered for development ahead of Greenfield. This site is designated as Greenfield.

1. Environmental and safety issues

1. The need to maintain the wildlife corridor between Whitmor and Broadstreet Commons as per the government guidance in the National Planning Policy Framework (NPPF paras 113 & 117).

1. Horses are ridden or led along the surrounding roads including Tangle Lane, Gravetts Lane and Keens Lane. The significant increase of travel in the area, introduced by the proposed development, will undoubtedly lead to fatalities.

1. The site provides nesting habitat for deer and birds of all kinds from sparrows, robins, cuckoos to parrots, kestrels, heron, great-creased newts (protected species) and sparrow hawks.

1. The loss of an area, including local flora and fauna, existing as a green lung separating Guildford and Worplesdon.

1. There is a brook running parallel with the footpath that connects Keens Lane with Liddington Hall Drive and this attracts bats from the local area as a feeding area during the twilight hours of the spring, summer and autumn. All bats and their roosts are protected by law, therefore the Statutory Nature Conservation Organisation (SNCO) must be consulted if there is any threat to this protected species. This brook is in addition to a watercourse that runs on the east side of Gravetts Lane. Water voles are also present.

1. There is a water feature on this plot which provides habitat for herons and other water birds.

2. Deer and foxes have been seen crossing the site from east to west and vice versa, and should be considered in the possible use of the site.

1. Have the increased pollution levels been considered in light of the proposed building of c. 140 houses and care home i.e. approximately 350 additional cars?

1. Infrastructure issues

1. Parts of Tangle Lane, Keens Lane and Gravetts Lane are single track, and not suitable for the significant increase in traffic that would be created by circa 350 additional cars.

1. The main roads linking the above lanes i.e. the A320, A322 and A323 are already heavily congested in both the morning and evening rush hours. There will also be consequential adverse effects on the Guildford city traffic. Salt Box Road is also heavily congested linking the A320 and A322. This road is currently dangerous for cyclists and motorists due to poor visibility as a result of the poor width and numerous bends. This road is also very prone to ice during winter, making driving conditions hazardous. In addition, deer are present on both sides of this road. No doubt, there will be increased accidents and fatalities as a result of housing and care home development.
1. The current drainage systems over both sites cannot cope. e.g. Gravetts Lane with raw sewage evident on 23rd June 2016; Sime Close with frequent incidences of flooding at entrance, adversely impacting properties and access to the Close. These systems will cease to operate with the building of c. 140 houses and care home once fields are replaced with concrete.

1. The flood risk, although stated at zone 1 (low risk), will greatly increase with the proposed development of c.140 houses and a care home. What flood risk zone will this increase to, and is it appropriate for the existing residents of the local area?

1. There does not appear to be any provision of local amenities: shops, schools, parks, public transport and there will be an increasing burden on County Council, police and hospital services: has this been considered and additional resources to be available? The current resources are already restricted e.g. infrequent bus service and no stops near residences in Keens Lane/Sime Close etc. The street lighting is almost non-existent in Keens Lane, Gravett’s Lane and Tangle Lane. It currently takes at least 3 weeks to get a doctors’ appointment at Fairlands Surgery which is already an untenable situation without adding +300 patients to the area.

1. Why is another care home needed very close to the recently built care home on the A322? There is no provision for residents to walk to local shops and public transport is limited.

1. There is insufficient power in the area therefore gas and electricity systems would require upgrading.

1. The Broadband service in the area is very poor and not suitable for the number of residents in situ from the proposed development.

1. **Summary**

Plot A22 is Green Belt and should be preserved as such and therefore I would urge Guildford Borough Councillors to uphold its Green Belt status and not proceed with its planned development.

The draft local plan will also have a catastrophic effect on both residents and wildlife, nor are there adequate infrastructure needs to support the planned development of Plot A22. I conclude that the local plan is without merit and I strongly oppose its future progress.

As a resident of Sime Close, I would comment on the summer 2017 local plan as follows:

**A22 Land north of Keens Lane, Guildford – homes and care home**

- The Broadband service in the area is very poor and not suitable for the number of residents in situ from the proposed development.
• Why is another care home needed very close to the recently built care home on the A322? There is no provision for residents to walk to local shops and public transport is limited.
• The flood risk, although stated at zone 1 (low risk), will greatly increase with the proposed development of c.150 houses and a care home. What flood risk zone will this increase to, and is it appropriate for the existing residents of the local area?
• The current drainage systems over both sites cannot cope. e.g. Gravetts Lane with raw sewage evident on 23rd June 2016; Sime Close with frequent incidences of flooding at entrance, adversely impacting properties and access to the Close. These systems will cease to operate with the building of c. 150 houses and care home once fields are replaced with concrete.
• Parts of Tangley Lane, Keens Lane and Gravetts Lane are single track, and not suitable for the significant increase in traffic that would be created by circa 350 additional cars.

Infrastructure issues

• Deer and foxes have been seen crossing the site from east to west and vice versa, and should be considered in the possible use of the site.
• There is a water feature on this plot which provides habitat for herons and other water birds.
• The loss of an area, including local flora and fauna, existing as a green lung separating Guildford and Worplesdon.
• The site provides nesting habitat for deer and birds of all kinds from sparrows, robins, cuckoos to parrots, kestrels, heron, great-creased newts (protected species) and sparrow hawks.
• The need to maintain the wildlife corridor between Whitmor and Broadstreet Commons as per the government guidance in the National Planning Policy Framework (NPPF paras 113 & 117).

Environmental and safety issues

• The GBC leader has tweeted that the Strategic House Marketing Assessment (SHMA) should be revisited following Brexit. The number of housing units will then be reduced significantly from the current 690 and would negate the need to use Green Belt as housing.

Planning issues

• The autumn 2013 issues and options document designated several areas (including plot A22) as poor for housing, yet the summer 2014, 2016 and 2017 local plans indicate plot A22 still for development. I do not understand this significant change in opinion and would seek proof from professionals that the areas are suitable for housing.
• The site is currently categorised as Green Belt land, yet the local plan moves the boundary to exclude it from the Green Belt. I have a fundamental issue with GBC taking such improper action and not making this clear in the local plan. As such, no development should be carried out. It’s critical that Green Belt land is protected for both the survival of wildlife and human social and leisure use. The countryside is part of Britain’s heritage and it needs to be conserved. This version of the local plan appears to have been made without due consideration of these factors.
• Brownfield sites should always be considered for development ahead of Greenfield. This site is designated as Greenfield.
• Horses are ridden or led along the surrounding roads including Tangley Lane, Gravetts Lane and Keens Lane. The significant increase of travel in the area, introduced by the proposed development, will undoubtedly lead to fatalities.
• There is a brook running parallel with the footpath that connects Keens Lane with Liddington Hall Drive and this attracts bats from the local area as a feeding area during the twilight hours of the spring, summer and autumn. All bats and their roosts are protected by law, therefore the Statutory Nature Conservation Organisation (SNCO) must be consulted if there is any threat to this protected species. This brook is in addition to a watercourse that runs on the east side of Gravetts Lane. Water voles are also present.
• Have the increased pollution levels been considered in light of the proposed building of c. 150 houses and care home i.e. approximately 350 additional cars?
• The main roads linking the above lanes i.e. the A320, A322 and A323 are already heavily congested in both the morning and evening rush hours. There will also be consequential adverse effects on the Guildford city traffic. Salt Box Road is also heavily congested linking the A320 and A322. This road is currently dangerous for cyclists
and motorists due to poor visibility as a result of the poor width and numerous bends. This road is also very prone to ice during winter, making driving conditions hazardous. In addition, deer are present on both sides of this road. No doubt, there will be increased accidents and fatalities as a result of housing and care home development.

- There does not appear to be any provision of local amenities: shops, schools, parks, public transport and there will be an increasing burden on County Council, police and hospital services: has this been considered and additional resources to be available? The current resources are already restricted e.g. infrequent bus service and no stops near residences in Keens Lane/Sime Close etc. The street lighting is almost non-existent in Keens Lane, Gravett’s Lane and Tangle Lane. It currently takes at least 3 weeks to get a doctors’ appointment at Fairlands Surgery which is already an untenable situation without adding +300 patients to the area.
- There is insufficient power in the area therefore gas and electricity systems would require upgrading.

**Summary**

- Plot A22 is Green Belt and should be preserved as such and therefore I would urge Guildford Borough Councillors to uphold its Green Belt status and not proceed with its planned development.
- The draft local plan will also have a catastrophic effect on both residents and wildlife, nor are there adequate infrastructure needs to support the planned development of Plot A22. I conclude that the local plan is without merit and I strongly oppose its future progress.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object strongly to Guildford Borough Council's latest proposed Local Plan.

As a resident of West Horsley I am very concerned about the irreversible impact that so many new houses will have on the character of the village and the strain it will place on the existing infrastructure.

I believe that the original Green Belt legislation was designed to prevent such urban sprawl as the Local Plan is seeking to create, and it should be vehemently protected. Under no circumstances should villages be removed from the Green Belt by 'insetting'.

In order to support the proposed scale of housing development, massive changes would have to be made to the local infrastructure, which would have a further detrimental effect on the environment.

The solution to the country's housing shortage needs to be tackled at a national level. There is huge dissatisfaction in the North, as has become evident during the recent Brexit fiasco. The government needs to channel more resources into regenerating northern counties, making these areas more affluent and attractive to business, drawing development away from the South and alleviating the pressure around London.

There is no need for so much housing to be built in and around cities such as Guildford. The development needs to happen across the country to redress the balance between north and south and heal the seismic rift in the population which currently exists.
The proposals outlined in Guildford Borough's latest Local Plan for development on Green Belt land cannot and must not be permitted to proceed. The damage caused to villages and natural environments would be irreparable. Development should be restricted to existing brownfield sites and, as I have already stated, spread out across the country.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

As a resident of West Horsley I would like to object to the planned removal of the Horsleys from the Green belt. The "exceptional circumstances" required before taking this action have not been demonstrated.

The proposed number of houses for West Horsley is completely out of proportion with the current size of the village, with 385 new homes being built in West Horsley- a 35% increase on the current housing number of 1,111.

The whole character of the village will be completely change forever, plus the infrastructure is not present to support this number of new people and cars. Local and roads are already overloaded, schools are already full, drainage is inadequate.

Whilst agreeing that some new housing is required in West Horsley, this massive development is not the answer and I hope that you will consider the feelings of local residents.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Dear Sir or Madam

As a long term resident of West Clandon, I must register my very grave concerns with regard to the unacceptable and highly detrimental impact which this plan will have on our small village. I have registered concerns before, and I am upset that, once again, the Council seems determined to press ahead with changes which will damage our local environment for ever.

West Clandon is a village and I, like all residents, want to see that status preserved physically as well as through bodies like the parish council. As such, whilst I do not object to small scale residential building on infill sites etc, I object very strongly to what is proposed at Gosden Hill Farm which will erode the tract of countryside between West Clandon and Guildford. I do not find this acceptable at all - in no time at all West Clandon will have gone the same way as Burpham and Merrow.

Quite apart from the impact on the village atmosphere we currently enjoy, I am also deeply worried about the impact of the proposals on our local infrastructure. Traffic through West Clandon on the A247 is already significant; this road, despite its 'A' status, is only small, and yet we have high volumes speeding through at all times of day. It cannot be acceptable to be proposing plans which will add to this problem.

For this reason, as well as objecting to Gosden Hill, I must express dismay at plans to build a major junction north of the village centre at the A3 / A247 interchange. This, along with extra housing, will place an intolerable burden on West Clandon and the already overstretched local infrastructure.

I ask the Council to reflect on these points; if sustainability really does matter then please let's see a plan that respects the concerns of local residents and council tax payers and not ride roughshod over them. The current proposals diminish West Clandon in many different ways and, as such, are wholly unacceptable to me and many others.

Yours faithfully

Paul Baxter

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I'm a resident of Horsley Village and I would like to strongly object to your plans to build extensively on the area. The proposed plans will directly affect me and my family. I have two children who go to a nearby school and from drop off I commute to my work place via the A3. The traffic is appalling, the roads are dreadful and the sheer volume of work you're proposing just doesn't stack up given the infrastructure of our peaceful and beautiful village. My family and I moved here for it's connection with the "country life" whilst being accessible. But I would never have imagined that you would even entertain a proposition that would destroy everything Horsley and the nearby villages stand for. As an example of lack of infrastructure to support the plans...We called the doctors before 9am to get a same day appointment (appointments are released on the day) but none were available. This happened first hand TODAY! I took the train to work last week and the carpark was full as was the early train. People were standing as there were no seats available a few stops on. How do you expect to support an influx on people demanding these services. You will ruin this area and our lives as we know it if this goes ahead, even if chopped in half. I strongly urge you to reconsider.

Francesca Milone

2.2 A43 Land at Garlick’s Arch

I object to this site. It was not identified until June 2016 as a potential site for development. It had previously been rejected in the 2014 draft and no evidence has been produced to support the development of this site. The provision of 400 house totally distorts the Burn Common community and is massive addition to the population but with no addition amenities planned. There is one convenience store within walking distance. The schools and surgeries in Send and Ripley are too far to walk and in any case they are full in Send. The site contains ancient woodland of which there is very little in the parish of Send and the development has potential negative impact on this. The land is subject to flooding and the flood risk will be heightened by housing and industrial development. No case has been made for the industrial and commercial use of this site in preference to the alternative site at Burn Common which was the preferred option from the draft plan in 2014 and up to and including the May2016. Development of this site will have negative visual impact on the AE and for views from the south of the A3 including the North Downs. The combination of Garlick’s Arch and Gosden Farm development will significantly alter the character of Guildford from a compact to county town to a sprawling urban conurbation.

2.3 A43A Land for North Facing Slip Roads on A3 at Burnt Common

I object to this development. No necessity for this new North facing junction was identified in previous versions of the local plan. The main justification is to improve access to the proposed Wisley Airfield redevelopment. It is difficult to justify this as that site is 6 kilometres away and can only be accessed through the already stressed local roads. In addition, GBC has recently rejected the latest planning application for the Wisley Site. New infrastructure should only be approved when the final nature of the Wisley development is known. Providing a northbound A3 access at Send will have a very negative effect on the A247 which has the problems already described above. The new junction will certainly attract commercial traffic from South Woking which currently accesses the A3 via the inadequate A245 or via the narrow Newark Lane. A new Woking to A3 access road was proposed when we moved to Send in 1981 and we are still waiting.

2.4 A44 Lands at Winds Ridge.

I object to this development. This land is unsuitable for development being land fill with active waste management still in place. The site will have a negative visual impact being clearly visible from the Wey Navigation Corridor and Potter’s Lane. Access to the site is very poor being single lane from Potters lane and very narrow from May’s Corner traffic lights with cars frequently parked restricting access.

2. Proposed developments on Sites A42, A43, A43A, A44.

I wish to object to the proposed developments on these sites. The combination of these new housing proposals gives rise to population increase of over 25%. This is a clear overdevelopment of the three settlements. The lack of infrastructure has already been noted. In particular, the A247, the main artery through Send is extremely congested. Send is a classic linear village and most of the house along the A247 were constructed before the car era and lack off-road parking facilities and in consequence many cars are permanently parked on road. This is a source of traffic congestion with long tailbacks in the morning and evening rush hours and delays at other times when large vehicles traverse the village. The situation will be exacerbated later this year when the new St Bede’s school opens (Planning application 16/P/00033 Approved GBC 31st March 2016) as access to both infants and junior school will now be from the A247 effected doubling the number of pupils arriving in that way. While the planning application included a School Green Travel Plan to minimise car journeys to the school the mitigation measures of increased cycling and walking are difficult to implement as footpaths and cycle paths are inadequate. Public transport is not an option as no buses pass the school. Inevitably increased car use will result giving more congestion with increased risks to children.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I submit the following objections to proposals in the Local plan affecting the settlements of Send/ Send Marsh/ Burnt Common.

1. Insetting Of the Send village within the green be

I wish to object to this proposal as it makes available for development a significant number sites in addition to those specifically identified in the Local Plan. Sites such as the land behind Heath Drive and soon to be redundant ST Bede’s school buildings could be used for housing. This will significantly change the nature of the village from a rural setting to an urban environment. Furthermore, this will place additional strain on the already limited infrastructure where the village schools are full with no additional capacity. The Village Medical Centre is also full and the roads are already over capacity. Public transport is already very limited with no late evening or Sunday service. Further development in the village will visually impact the Wey Navigation Corridor, a major local and national asset.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to object to the following policies affecting Send.

Site A42 -an increase of 15 new houses on the site

The demand for housing overall has decreased in the Local plan yet the number of houses in Send has increased. This site is down a single track lane with no pedestrian or cycle provision and is already busy with heavy vehicles attending the Send Business Centre.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Site A58- Land around Burnt Common warehouse.

This site had previously been found unsuitable for development in earlier versions of the plan. Development will be continuous with the Gosden Farm site on the other side of the A3 giving a ribbon development of Guildford along the A3. This together with Garlick’s Arch development therefore gives a continuous urban development from Ockham Road North to Onslow Village and this is approximately 7.5 miles of urbanisation. This is a significant degradation of the Guildford environment in contradiction to the stated development criteria in the Local Plan.

Insetting the Send Business Centre within the green belt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Insetting the Send Business Centre within the green belt.

Send has suffered significant erosion of its greenbelt through the approval of the marina in Tannery Lane and the Vision Engineering factory in Send. Additional development at the Send business centre would significantly alter the character of the village. The poor quality of Tannery Lane has been noted above. Access for large vehicles from Send Road continues to be a major hazard. The A247 through Send is narrow and already overloaded. It cannot sustain additional traffic movements of Tannery Lane and to the new sites at Garlick’s Arch and the Burnt Common proposed industrial development. Improvement to the road is very difficult given the narrowness of the road from Sandy Lane to Mays Corners and the mini roundabout in Old Woking is also a bottleneck.

The proposed developments taken in total destroy Send and Send Marsh Burnt Common as a pleasant semi-rural village and create a congested urban sprawl.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the plan to add any significant number of home to the area, let alone 385. There is no infrastructure to cope with developments of this nature in either West, East Horsley, Ockham or Ripley, as follows:

- No room for extra kids at the local schools at infant, junior or senior level.
- The drainage is bad enough already without more homes to cope with. Thames Water has already advised GBC that it would not be able to cope.
- The roads could not cope with more traffic in rush hours – the Ockham Road is very busy with traffic using it to get to the A3 and M25. The A3 northbound is often totally jammed in the mornings with traffic coming onto it from this road. This then clogs up the M25 in both directions. I get stuck in it every morning so I should know! The Local Plan (including the proposed Wisley Development) seems to completely ignore this issue.

I object to the alteration of the boundary of the Green Belt so as to exclude this site of 89 hectares, the existing use of which is farmland and to the allocation for 1300 houses and 700 flats.

The exceptional circumstances required under NPPF para 83 for alteration of the Green Belt boundary are not identified in the Policy A25. Under the Introduction to Policy P2: Green Belt it is stated,

"4.3.16 ... We consider that exceptional circumstances exist to justify the amendment of Green Belt boundaries in order to facilitate the development that is needed and promote sustainable patterns of development. 4.3.17 Whilst the general extent of the Green Belt has been retained, land has been removed from the Green Belt in order to enable development around Guildford urban area ..."

Apart from these assertions no details are given of the circumstances said to exist in relation to the site or to those covered by Policies A43 and A43a unless these are hidden in the evidence base.
The revisions on 6 October 2014 to the National Planning Policy Guide ("NPPG") state that the NPPF should be read as a whole and that "need alone is not the only factor to be considered when drawing up a Local Plan". The NPPF is clear that planning authorities should meet objectively assessed needs, unless any adverse impacts of doing so would significantly and demonstrably outweigh the benefits when assessed against the policies in the NPPF taken as a whole or unless specific policies in the NPPF indicate that development should be restricted. Such policies include land designated as Green Belt. The Strategic Housing Land Availability Assessment should under the NPPG take account of constraints such as the Green Belt. If this has been done, it is not apparent. This is notwithstanding that at page 154 of the Regulation 18 Consultation Statement it is stated, "We therefore do need to consider each site on its own merits within this overall balancing act."

The failure to specify the circumstances for excluding sites from the Green Belt prevents the "meaningful and proactive engagement" of the community required under NPPF para 155.

The exclusion of Gosden Hill Farm from the Green Belt has the effect of extending the sprawl of Guildford, a large built-up area, and extends the ribbon development along the old Portsmouth Road (B2215) from the old gates to Ockham Park on the north side of Ripley, through Ripley, Send Marsh, Burnt Common and the area around Ewbank's, to Burgham and Guildford, which ribbon development has very small open spaces apart from Gosden Hill itself and the land around Garlick's Arch copse. It does the very reverse of safeguarding the countryside from encroachment.

In spite of the station envisaged as Guildford East (Merrow) and the Park and Ride site the development allocated under Policy A25 including the strategic employment site will inevitably add to the already excessive traffic through West Clandon.

Policy A25 is not legally compliant for the reasons set out in my comments on question 2. Policy A25 is not sound for the reasons set out in my comments on question 3.

My answers to Question 4 apply to Policy A25.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/3121  Respondent: 8803841 / Wellesley Theodore Wallace  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the removal of this land from the Green Belt and to its allocation for approximately 400 homes (260 houses and 140 flats) and up to 7,000 square metres for industrial or storage and distribution uses and slips roads to and from the A3.

The comments in relation to Policy A25 as to the Green Belt also apply to these sites.

These Policies make no mention of the traffic impact on the A247 through West Clandon all of which is in the Green Belt. That impact will be severe. Appendix B of the comments by Surrey County Council on the 2014 Draft Plan included the following:

"...the A247 [which] is a very heavily trafficked A class road and carries a heavy proportion of HGVs".

Sec also observed that there was "a very limited bus route".
Buses on route 463 run between Guildford and Woking via West Clandon. There are five buses a day to Woking running at intervals of two hours or more, the last passing Clandon station at 1740 hours; only one of these services runs through Ripley. There are seven buses a day to Guildford at intervals varying from 1½ to over 2 hours, the last passing Clandon Station at 1902 hours. There has been a recent consultation on a reduction of bus services but no decision has yet been announced.

The Land Availability Assessment 2016 in relation to the site stated correctly that the closest railway station is Clandon, that the pedestrian footway along the A247 is narrow in places, that it switches to different sides of the road and that there are bus stops close to the station. It made no mention of the infrequency of buses.

It is inevitable that a substantial proportion of residents at Garlick's Arch would need to use Clandon Station to get to and from work and would travel by car since the station is about 1½ miles away. The station car park has spaces for 150 cars and is already used to full capacity. A number of people use Clandon station because of the difficulty of parking at other stations on the line, including Effingham. Rail users travelling when the car park is likely to be full are often dropped and picked up on return thus generating additional trips. In addition to those living at Garlick's Arch, there would be persons travelling to work at Garlick's Arch as well as commercial traffic generated, some of which would use the A247 through West Clandon.

The Strategic Highway Assessment Report ("SHAR") prepared by SCC this year based on data provided by Guildford BC calculates the number and distribution of vehicle trips to and from each development site based on various scenarios. Table 3.3 gives the weekday average AM trips on Scenario 2 which adds development to 2031 of the most likely strategic sites under the Local Plan (but without mitigation schemes) to trips on Scenario 1 which consists of background growth plus developments for which there is already permitted development.

The total Scenario 1 figure in Table 3.3 for Garlick's Arch is zero, there being no permitted development. Under Scenario 2, 116 weekday average AM peak hour departures are forecast, consisting of 100 cars, 13 LGVs and 3 HGVs and 44 vehicle arrivals are forecast, 38 being cars. The peak hours are wrongly shown on page 20 as 1600 - 1900 whereas they should be 0700 - 1000 (see page 7). The average peak hour must be the total for the three hours divided by three and clearly understates the actual peak hour which will be much more concentrated. For reasons which are not explained, although Scenario 2 adds to the Do-minimum Scenario 1, seven AM departure trips are shown for Clandon in Table 3.2 covering Scenario 1 but zero departures are shown in Table 3.3

At para 4.2.2 of SHAR it is stated that Scenario 2 traffic demand for all development proposed in the Local Plan "shows a marked deterioration in the performance of the network when compared with Scenario 1".

Table 4.1 forecasts that under Scenario 3, which includes mitigation measures among which are the slip roads under Policy 43a at Burnt common, there would be an increase in southbound traffic along the A247 Clandon Road at an average AM peak hour from 936 vehicles per hour under Scenario 1 to 1269 vph which is 36%. That Table shows the ratio of traffic flow to theoretical capacity ("RFC") under Scenario 3 as 1.1, as a result of which "flow breakdown and extensive queues can be expected"; the level of service ("LOS") is shown as "F" which indicates "every vehicle moves in lockstep with the vehicle in front of it with frequent slowing required ".

At para 5.1.7 it is stated that the results of the assessment indicate that if the schemes in the Department of Transport's Road Investment Strategy ("RIS") are not forthcoming the residual cumulative impact of the Local Plan on the highway network could be considered severe. This is of course viewing the highway network in the borough as a whole. It must follow that the effect of particular developments on specific roads such as the A247 would be more severe.

The SHAR is a statistical exercise based on differing scenarios and does not consider any features of particular roads such as the A247. I have already referred above to the comments of Surrey County Council on the A247 in respect of the 2014 Draft Plan and to the Land Availability Assessment 2016 which mentioned the narrowness of the footpath in places and the switches to different sides of the road.

Table 4.4 which I have referred to above estimates the southbound traffic on the A247 at an average AM peak hour as 936 vehicles on Scenario 3. The flow of northbound traffic along the A247 going towards the A3, London via Ripley and Woking may if anything be greater. Although the weight of traffic slows speeds at peak hours, at other times the 30mph limit is regularly ignored by lorries and cars also. The width of the A247 varies, being quite narrow in places, and the sight
lines are poor particularly at the hump backed bridge over the railway (a photograph of which I provided with my comments in 2014), outside the church, outside the school, beside Summers and at Lime Grove. There is a particular problem when lorries or buses pass each other. It is not possible to see any scope for mitigation of the traffic problems on the A247. The traffic lights at the junction between the A247 and the A246 have caused problems of their own. The existing traffic problems on the A247 in Clandon are serious, Policies A43, and much more so A43a, would make them severe.

Policies A43 and A43a are not legally compliant in particular for the for the reasons set out in answer to question 2. The evidence base and submission documents are so extensive and difficult to access that it has not been possible to consider most of their content in any detail within the short time limit allowed. The passage cited from the judgement of Webster J applies here but has not been observed.

Policies A43 and A43a are not sound for the reasons given in my answer to question 3 coupled with the matters set out in my comments above on those policies.

My comments on question 4 apply to Policies A43 and A43a.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Part 6 of the Local Planning Regulations 2012 requires consultation and public participation. In R (Association of Municipal Authorities) v Secretary of State for Social Services [1986] 1 All E R 164 Mr Justice Webster said this at page 167, "in any context the essence of consultation is the communication of a genuine invitation to give advice and a genuine consideration of that advice. In my view it must go without saying that to achieve consultation sufficient information must be supplied by the consulting party to the consulted party."

Although that was not a planning case, this was clearly a statement of a general principle which must apply here: Webster J cited the decision of the Court of Appeal Rollo v Minister of Town and Country Planning [1948] I All E R 13. In the present case in Local Plan is not legally compliant.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Question 3: Soundness.

The Local Plan is not sound. It does not meet objectively assessed development and infrastructure requirements, specifically in respect of housing need and transport infrastructure. It is not based on proportionate evidence. It is very doubtful that it is effective. It is not consistent with NPPF policies in particular with section 9 thereof.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Apart from exceptional circumstances which should be considered on a site by site bases being assessed against the purposes of the Green Belts view NPPF ss 80, no consideration has been given as to why the existing Green Belt boundaries are not capable of enduring beyond the plan period.

The inclusion of Gosden Hill Farm in the Guildford Urban Area undoubtedly extends the sprawl of Guildford. A58 is only separated from A25 by Nutbourne Fruit Farm, the dual carriage A3 and [unclear text], and from A43 by A247 Clandon Road and the horses along it. Virtually the whole of the land from A43 through Ripley to the gates of Ockham Park are developed apart from a small amount od land between Kiln Lane and Blore Heath off the B2215.
The development on A48 effectively extends the sprawl of the large built up area of Guildford to Ripley, Clandon and Send.

In Redhill Aerodrome [2015] 1 P&CR 3, Sullivan LJ said that ‘far from there being any indication that placing the presumption in favour of sustainable development at the heart of the framework is intended to effect a change in Green Belt policy, there is a clear statement [in footnote 9] to the contrary.’

The map on p391 of Guildford Urban Area is wholly inadequate to cover Policy A25 in particular the infrastructure requirements and opportunities (3) and (4).

No details are given even now of the exceptional circumstances view NPPF for altering the Green Belt boundary to exclude A25. No consideration appears to have been given to the traffic impact on the A247 in Clandon which remains part of the Green Belt; the additional traffic would be an encroachment on the Green Belt and its openness, see Legoland Windsor Park Ltd v Windsor and Maidenhead RBC [2016] PAD 6 and R (Newsmith stainless Ltd) v Secretary of State [2001] ENHC Admin 74

The changes to the 2016 plan are so exclusive and inadequately explained that the limitation on comments permitted makes the consultation almost valueless.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

A proper map should be provided for A25 if only to show clearly the surrounding roads; the map at p391 is wholly inadequate.

Although the Planning Policy for Traveller Sites (2015) states at para 17 that land removed from the Green Belt to meet an identified need for a traveller site should be specifically allocated in the plan as a traveller site only, no specific allocation has been made. Requirement (7) refers to 'village' in the singular without specifying which village. It is quite likely that several large vehicles with trailers will liaise in convoy to the same destination, creating an additional problem is using the A247.

Leave the existing Green Belt boundary unchanged.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

Comment ID: pslp172/4017  Respondent: 8803841 / Wellesley Theodore Wallace  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

This replaces A48 at Effingham and is probably mistakenly numbered; alternatively it should come after A57.

Policy A58 is entirely new having been added to the map of Send Marsh/Burnt Common on 19th May 2017.

The only access and exit is the existing access to the Ewbank's premises from the B2215 London Road from the Burnt Common roundabout with A247 road. Although allocated for a minimum of 7000 M2 of light or general industrial use and storage distribution, no details are given of likely employment numbers; these are likely to involve considerate traffic. Burnt Common roundabout is already congested bunching traffic on the A247 in both directions and adding to delays at the roundabout with the southbound A3 and Tithebarnes Lane. No details are given of the potential all movements junction at Policy A25, infrastructure (2), the connector road at infrastructure (3) and the slip roads at A43a. If proper consideration has been given to the transport access and the effect on the A247 and the Green Belt it has not been given.

The document should be amended either to remove the allocation or to provide adequate details of the transport connections to enable meaning consultation to take place.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)
The SHAR is not up to date, the model base years being 2009. Development under the plan would generate significant extra traffic on the A247 through West Clandon, the only road between London Road, Guildford, and the M25 with a bridge over the railway via Cobham. Congestion at the A3/M25 intersection at Wisley causes many vehicles to use the A247 to avoid the M25. There should be a traffic census on the A247.

The Green Belt study (2013-15) states that Send Marsh and Burnt Common has a good bus service; the bus service from there through West Clandon including Clandon Station was reduced in Sept 2016; there are now only six buses a day mostly at two hour intervals. There is no longer a no. 40 bus. Only 100 vehicles leaving 400 houses at Garlicks Arch at AM peak is not audible. (SHAR Take 3.3)

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 2: Legal Compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

The questionnaire invites representations on the 'proposed changes' in the 2017 proposed plan, asking questions about the proposed changes 'as a whole'. It states 'comments must relate to proposed changes only'. The forward to the 2017 plan states that the consultation period 'offers another opportunity to have your views heard'. Cllr Spooner does not confine this to the latest changes. Many of the changes impact on policies and site allocations which are unchanged. The limitation in this consultation conflicts with NPPF para 155. Farther, it is difficult to see how it could comply with the as yet unpublished statement of community involvement. It does not help that no consultation statement has yet been published on the responses to the 2016 draft plan. The restriction to changes is not legally compliant.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

Dear Sirs

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) - Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

- I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored. Further, it is an inter generational covenant (enshrined in primary legislation) to protect green areas in perpetuity. It is the envy of the world and the proposals to raid these precious areas is nothing short of outrageous.
- I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.
- I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.
- I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan's new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).
- I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.
- I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
  1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
  2. The increased volume of car A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
  3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements

---

Page 2982 of 3335
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them).

5. The increase in the already severe congestion on the Strategic Road Network of the A3 and A further planning application at RH5 Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest.

6. The lack of suitable public transport stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity.

- I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
- I object to the fact that air quality concerns have not been taken seriously - air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.
- I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village's green spaces, including the FWA/TFM, protected.
- I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC's Planning. After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd's (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter. Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.
- I would point out that the number of new homes has been based on pre-Brexit projections for economic and population growth, including migration which now needs to be revised downwards, possibly quite seriously.
- Most of the borough's infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. The plan's commitment to build housing across the Guildford countryside will mean either major infrastructure investment, which no one will believe will happen and for which there are no funds, or else a catastrophic collapse in transport, educational, medical, energy, water and communication services.
- Finally I object to the proposal to build 533 houses on 6 sites in the Horsleys as it is plainly both excessive in absolute terms and disproportionate relative to the rest of the It will destroy the rural character of these communities.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object most strongly to the proposal to remove West Horsley and East Horsley from the Green Belt. The Green Belt was created to form a lung for our increasingly crowded cities and to create space between villages to allow them to maintain their character; to build on it would be an entirely retrograde and irrevocable step.

West Horsley, where I live, seems to be a target for development to a far greater extent than other areas in the Guildford Plan and I can see no legitimate reason for an increase of housing in this area of at least 35%. Most of this proposed development would lie outside the current settlement areas and would have an immense and detrimental impact on what is, currently, a rural and peaceful village on the edge of an Area of Outstanding Natural Beauty. The village contains a substantial number of historic buildings, particularly in the Conservation Area, many of which are listed and have no foundations and the inevitable increase in traffic caused by building on this scale would without doubt cause major problems for many of these ancient buildings. Additionally, if the Wisley Airfield development goes ahead (despite being unanimously refused I understand that this is, extraordinarily, still a serious possibility), the suggested road scheme would inundate the Horsleys with traffic turning the area into a racetrack.

The proposed number of houses suggested for West Horsley is entirely unsustainable and will entirely change the character of this village. Nor does there appear to be any provision for our already overstretched infrastructure: we have a junior school which is bursting at the seams, a doctor's surgery which is totally overstretched, drains which cause regular problems due to over capacity and flooding issues on the roads (The Street and Ripley Lane in particular are frequently impassable in the winter), we have a derisory bus service and a station car park which is full by 9am each day. Add to this the fact that West Horsley's Post Office has closed and the shop is shortly to follow it and you have a picture of a village which is not suitable for non drivers and which would not in any way be able to accommodate the numbers of new inhabitants suggested by the plan.

I have objected twice before in writing to the local plan consultations, as I know have thousands of others. There seems to be no attempt by the planners to listen to these opinions as they just rehash with the same ideas. As I said in my previous letter, I believe GBC planners should look more closely at the idea of 'urban regeneration' which is suggested in the National Planning Policy Framework. Small scale development could be acceptable in the village of West Horsley - more affordable housing is needed and some homes for the growing population of older people. What we do not need is a high density housing which is developer driven in order to turn a large profit. Concreting over the countryside cannot be sustainable or sensible and must not be allowed to happen.

I am absolutely opposed to the local plan with which we have been presented.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. Wisley/Ockham development

The proposal for over 2000 dwellings with traveller, retail and commercial sites, under 2 miles away from the Horsleys, would be an environmental and social disaster for the Horsleys, putting an impossible and unacceptable pressure on the village facilities, including the transportation links (rail and road).

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

1. Thatchers Hotel - proposed replacement by 48 dwellings

This is unacceptable. GBC themselves have already rejected the planning proposal previously submitted by the owners of Thatchers. I live directly behind Thatchers, and proposed development would adversely affect my wellbeing, and my right to peaceful enjoyment of my life (under the provisions of the Human Rights Act) by virtue of increased noise and light pollution. In addition public safety would be compromised and adversely affected - the entrance/exit to Thatchers is already a safety hazard, opening as it does on to the busy A246 on a bend; the additional and more frequent traffic from 48 houses would make it positively dangerous.

Comment ID: PSLPP16/4275  Respondent: 8804417 / Vivian and Philip Markley  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Infrastructure overload

Infrastructure in the Horsleys is already under pressure - schools are full, roads and parking are overloaded, drainage is inadequate, the medical centre is already at capacity.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4272  Respondent: 8804417 / Vivian and Philip Markley  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I refer to the proposed submission for the Guildford Local Plan.

I object to the plan for the following reasons:

1. Green belt changes

The Horsleys should not be removed from the Green belt. There are no valid "exceptional circumstances" which could or should permit this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/4273  Respondent: 8804417 / Vivian and Philip Markley  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. Extension of the boundaries of the settlement areas of the Horsleys

No cogent reasons have been given for the proposed changes and they should be dismissed. There should be no "open door" for additional future development of the Horsleys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: SQLP16/778  Respondent: 8804417 / Vivian and Philip Markley  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Housing Numbers

The plan for new houses is based on a flawed assessment based around a Strategic Housing Market Assessment (SHMA) which itself is incorrect. If it were to be enacted it would mean a population increase more than 70% higher than the official national estimates for population growth in the borough. This must be rejected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/276  Respondent: 8804513 / Ian Buchanan  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Normandy and Flexford

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

NO NEED FOR A SECONDARY SCHOOL

I work at Guildford Grove Primary School which is next to Kings College. I have grave concerns for the future of the pupils in my school as the falling numbers at Kings College puts their local school at risk. The GBC plans would make it far worse. There can be no justification in planning a secondary school in Normandy when all the secondary schools in the surrounding areas are under subscribed and have many places. Money should be invested in the current schools and not try and remove children from those schools in order to fill a school in Normandy. There are very few primary and secondary age children currently living in the village.
TRANSPORT AND ROADS

Many commuters use Normandy to cut through when the A3 and A31 have traffic congestion, which happens most mornings. This then affects Glaziers lane with a restricted weight bridge and Westwood Lane with a restricted lane under a restricted height bridge. The GBC plan will increase the traffic on both lanes significantly.

ENVIRONMENTAL DAMAGE

The proposed development will negatively impact on or destroy habitats of numerous species. Surrey Hills is an area of outstanding beauty not to be scarred buy a huge housing development adding to light and air pollution (with all the extra cars). The area is also next to the Thames basin which protects birds. The green belt includes the land between Flexford and Normandy. In March 2013 Surrey County Council boasted about creating and keeping green belt area and had promised to preserve the green belt. Building on green belt areas defeats the object and reasons for having green belt areas.

Flooding is a concern with streams. Building on this land will contribute to more flooding as the land can’t absorb the rain as it flows over built areas into roads and drains that can’t cope with the flow. The road by the train station is an example, regular flooding making it impossible to even walk through without wellington boots.

It would be so much fairer if the plan was to build 50 to 100 houses in each village NOT over a 1000 in one village! This is a politically led plan in the hope that there will be less political come back however we care too much for our village and environment for this plan to be forced on us.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I’d like to register my complaint that the above development is being considered. There are so many reason why this is not a good idea but allow me to outline a few:

1. This is greenbelt area and there are no exceptional circumstances that have not been approved by the inspectorate
2. the flood risk will become a major issue as this development concretes over vast amounts of wetlands
3. Habitats for wildlife are supposed to be protected but this development will damage what little habitat they still have
4. We need to safeguard the countryside from the sprall of urbanisation. This only increases the sprall
5. there is no need for a secondary school in the area given that 3 major secondary schools in the area are way below capacity
6. We seem to value space for park and rides but not for nature and peace and quiet. This development will only exacerbate the problem.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/3562  Respondent: 8804897 / Alan Goodfellow  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to OBJECT to the draft local Plan.

I OBJECT to the taking of East Horsley, West Horsley and all other villages in the borough out of the Green Belt. In your response to the e-petition “Keep the Green Belt” dated 13 December 2013 it was stated that “The council also notes the essential characteristics of the Green Belt as being its OPENNESS and PERMANENCE, and that the Green Belt boundaries should only be altered in exceptional circumstances.” I do not believe that such circumstances exist and therefore the existing boundaries should be maintained thus protecting the villages from undesirable development, which would change the entire character of the villages which currently have great community feeling and this I feel would be destroyed. We have a duty to leave a legacy to future generations and this community feeling would be lost through over development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/3563  Respondent: 8804897 / Alan Goodfellow  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the volume of housing proposed in the Local Plan for the Horsleys, currently standing at 533 on the main sites proposed plus a further 90 on other small sites. This scale of development cannot be sustained without major infrastructure changes and improvements. Currently our roads (which are mainly country lanes) are choked with traffic, parking at the shops is impossible, parking at the station is only just sufficient, it is very difficult to obtain an appointment at the surgery and the schools are already full to overflowing. “With a further 500 plus families life would be impossible and that is without the development at Wisley. Should all this volume of development be done then the area would become an urbanised area. Do we want to leave this as a legacy for future generations or do we want to leave the pleasant green land that we have known and enjoyed ourselves?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()
**Schools**

There is only ONE state primary school in West Horsley and NO state secondary schools. The Raleigh School is already oversubscribed and many children living in West Horsley were NOT offered places at their local school in the last few years. There is already a problem here with a lack of places and this already needs resolving WITHOUT adding another 533 homes. How do you propose to deal with this??

**Medical services**

It is already difficult to get an appointment at Kingston Avenue Medical Centre, the ONLY surgery in East and West Horsley. You cannot dilute this service any more.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

**Traffic**

The increase in traffic on East Lane, in particular, will be intolerable with the proposal of over 345 new households impacting on this road (potentially up to 750 more cars?). It is already congested during school times from Nightingale Avenue and Northcote Road. This will have a massive impact on our day-to-day lives.

2000 houses are being planned for Wisley Airfield. Many of these potential residents will be driving in and out of Horsley to use the station and shops. We simply DO NOT have the capacity for additional parking at Horsley Station and local shops. The Station car park is currently full every weekday as it is. It will become impossible to use the train as there is no alternative parking.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Green Belt

You seem determined not to respect the green belt. How can you possibly consider removing these villages from the green belt??

We moved to West Horsley nearly three years ago and chose this area specifically because we wanted a village environment to bring up our daughter.

We wanted to get away from traffic and congestion and enjoy the green belt around us.

The proposed development of homes on green belt sites at much higher densities than currently exist would be totally out of character with existing housing. It is also unsustainable in terms of drainage, road capacity, schools, shops, medical facilities, parking and public transport.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/130  Respondent: 8804929 / Helen Beckett  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Drainage and Flooding

There are known sewage overflow problems in Ockham Road North and Green Lane. There will be serious capacity issues with the sewer network in the village going right through to the treatment works if the large numbers of dwellings proposed are constructed.

The amount of flooding experienced a couple of years ago meant many main roads were closed for weeks on end. We were forced to use small lanes to exit the village. By doubling the number of cars in the village, this issue will be exacerbated.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
It is with relief that my wife and I, residents of Normandy for nearly 50 years, see that some of the threats to West Surrey and North East Hampshire proposed in the earlier discredited plan, have been withdrawn, especially policies A46 and A47. There remain however in the revised proposals other threats to the Green Belt which by its existence in its current form helps to prevent the degeneration of the region into a continuous urban sprawl to everybody's, not only local residents,' detriment.

I object to the 'insetting' of settlements at Normandy and Flexford and Walden Cottages as well as the Travellers' sites at Palm House Nurseries and Whittles Drive. Such 'insetting' would represent a serious erosion of the Green Belt and could and most probably would be used further to erode the Green Belt, one of our country's most valuable assets, especially in this part of the South East.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
10) I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
   1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
   2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the Guildford Borough Council Proposed Local Plan (June 2016) and, in particular to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings, and the erosion of greenbelt land in East and West Horsley.

I object to the draft Local Plan for the following key reasons in respect of Three Farms Meadows:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

There are some small changes made in the revised Local Plan to Site Policy A35, Land at Wisley airfield in Ockham. However, these changes do not provide any justification for continuing to include this site within the revised Local Plan.

Having made a downward revision to its housing targets in the revised 2017 Local Plan draft, GBC is proposing to remove a number of development sites that were included in the 2016 version of the plan. The largest site removed is addressed by Site Policy No. 46 located in Normandy (‘Land to the south of Normandy and north of Flexford’) where a mixed used development of 1,100 homes had previously been proposed.

In rejecting a 2015 planning application for development at the Wisley site (proposed in advance of the Local Plan) GBC identified no less than 14 reasons to justify their rejection of the planning application, only one of which was the issue of it being in the Green Belt. The reminder highlighted a long list of deficiencies associated with this proposed development including its major impact on traffic flows, its severe environmental impacts, its total lack of existing transport and other infrastructure, as well as many other factors. According to GBC’s consultation website, a total of 1,429 comments were
registered in the 2016 Local Plan consultation about the Wisley airfield site – 97% of them were against its development. And yet GBC chooses to maintain Wisley airfield as a policy site in the 2017 revised Local Plan.

With a planning appeal due to be heard in September 2017, I trust that if the planning inspector decides to reject the appeal of Wisley Property Investments, then GBC will finally listen to the views of so many of its residents, accept the AECOM sustainability conclusions on the deficiencies of this site and remove Wisley airfield entirely from the Local Plan.

I OBJECT to Site Policy A35, the creation of a new settlement at the former Wisley airfield.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A39

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Although small changes have been made to Site Policy A39, these are not material and GBC is still proposing to include this Green Belt site within the revised Local Plan.

In particular the change in the inset boundary proposed in the Pegasus Green Belt & Countryside Study for this site has no merit whatsoever. This study proposes the movement of the settlement boundary westwards from behind the houses on the western side of Ockham Road North up to the eastern boundary of Lollesworth Wood, thereby removing over 5 hectares of agricultural fields from the Green Belt. The present Green Belt boundary line is defined by a deep and well-maintained drainage ditch classified by the Environment Agency as a ‘river line’. As such, this river line represents a highly defensible Green Belt boundary. Therefore, I believe the justification for moving this boundary under current Green Belt rules is unsound.

The site also has other serious deficiencies for development with nearly a third of the land being classified as Flood Zone 3. The site is also directly adjacent to an important SNCI, as GBC’s revised policy has now belatedly recognised.

I OBJECTS to Site Policy A39, land near Horsley railway station

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Policy D1 provides the general policy framework for infrastructure development in the borough proposed in the local plan, including the accompanying Infrastructure Schedule set out in Appendix C. Other than a few specific changes consequential on the removal of certain projects in the light of the reduced housing target, there are only minor changes made to the infrastructure proposals in the 2017 version of the GBC Local Plan. These changes totally fail to address the inadequacies of the existing infrastructure, nor meet the stated objective of providing infrastructure to support the proposed developments. Accordingly:

I OBJECT to the inadequate provision of infrastructure investment across the borough provided for in the local plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

The revised Green Belt Policy P2 continues to make the hollow promise that “The Metropolitan Green Belt will continue to be protected”. However, despite minor changes it has failed to revise Paragraph 4.3.13 which proposes to inset the village of East Horsley from the Green Belt.

There is no justification for this approach. East Horsley is a rural village of very low housing density. Within the current settlement area the average density of housing is just 8 dwellings per hectare. Most houses lying within the current settlement area have large gardens that are filled with trees, shrubs and open lawns. As a result East Horsley makes an important contribution to the Green Belt of this area, providing openness, picturesque green spaces and wildlife corridors which support a rich biodiversity – for example, there are currently an estimated 43 different protected species of wildlife to be found in East Horsley.

If East Horsley is inset from the Green Belt, as proposed in the revised Local Plan under Policy P2, then important Green Belt planning protection will be lost over land currently within the settlement area. This will inevitably lead to increased development within this area and the loss of openness, destruction of trees and hedgerows, diminished biodiversity and the impairment of picturesque views of this rural village.

It is also important to recognise that the locality of East and West Horsley represents one of the first lines of defence against Metropolitan urban encroachment outside of the M25 circle. To inset East and West Horsley from the Green Belt would therefore represent a further weakening of this important Green Belt barrier. Accordingly:

I OBJECT to the insetting of East Horsley proposed as part of Policy P2.

I also note one new change made to the proposed settlement boundaries of East Horsley under the revised 2017 local plan, as detailed in the accompanying Appendix H maps for East Horsley (South). The Amendment 4 on this map addresses land in the southern part of the village designated as being within ‘the identified boundary of the village’ and which is currently Green Belt land outside of the settlement area. However, under Amendment 4 the settlement boundary is to be extended further south to encompass all of this area.
This is land which is close to and in some parts directly adjacent to the Surrey Hills AONB. It is a very low density part of the village located in a highly distinctive rural setting including in Chalk Lane a sunken single track road lined with chalk slopes and which dates back many hundreds of years. To bring such land within the settlement area of the village is not in any way justifiable and is very likely to lead to development that is inappropriate to the Green Belt. This area of the village has benefitted from Green Belt protection for many years but this proposed change would have a significant adverse impact and lead to the destruction on its character. Accordingly:

I OBJECT to the movement of the settlement boundary proposed under Amendment 4 in Appendix H map of East Horsley (South), proposed as part of Policy P2.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The revised policy proposes a target for new housing in Guildford borough of 12,426 homes.

However I believe this revised target for borough housing is still excessively high and should be reduced much further. This is due to the following:

a) The conclusions of the revised SHMA are seriously flawed

The West Surrey Strategic Housing Market Assessment: Guildford Addendum Report, 2017 (‘SHMA Addendum’) issued by consultants GL Hearn in March 2017 provides an update on the previous SHMA issued in 2016. Much has happened in those 12 months, particularly the imminent prospect of Brexit, which is likely to result in major changes in population trends, migration patterns and the economic development of the UK.

b) GBC fails to make any allowance for planning constraints, particularly the Green Belt

The housing need projections of GL Hearn are taken by GBC directly as the housing targets proposed in the Local Plan. They therefore fail to take into account any of the significant constraints which limit the supply of housing across the borough, in particular the large proportion of land which currently falls within the Metropolitan Green Belt. They also fail to allow for the already overstretched infrastructure.

Other local plans across the country have adjusted their housing targets to reflect such constraints. However, GBC chooses to ignore them. This is despite having a revised Green Belt policy P2 in the Local Plan which states that “The Metropolitan Green Belt will continue to be protected”.

In order to meet its high housing targets, GBC proposes to remove large swathes of land from the Green Belt for use as housing. This is contrary to ministerial guidance and planning inspectorate decisions which continue to support the position that unfulfilled housing need does not constitute the ‘very special circumstances’ needed to justify building on Green Belt land. This is achieved because the Green Belt & Countryside Study produced for GBC by the consultants Pegasus proposes numerous changes in Green Belt boundaries without due justification in order to deliver land for housing use in the Local Plan. The many apparent justifications given by Pegasus in their Green Belt & Countryside Study are extraordinarily weak
and in many cases fail to meet the planning criteria required for moving long established defensible Green Belt boundaries. In East Horsley this applies to the Green Belt movement proposed at Kingston Meadow (a movement away from a river line) and at Lollesworth Fields, as discussed further in Section 2 below.

The majority of the land being proposed by GBC for development under the revised Local Plan is currently part of the Metropolitan Green Belt. Indeed the Guildford Green Belt group have estimated that some 57% of all the new housing proposed in the 2017 GBC Local Plan is to be built on land which is currently Green Belt.

A further concern is the fact that the Green Belt land selected by GBC in the local plan is predominantly located in the north eastern part of the borough. Therefore it is land closest to London, which represents that most vital part of the Green Belt needed to prevent the encroachment of the Metropolitan conurbation.

Throughout the Local Plan consultations many thousands of residents across the borough have written to object to GBC’s approach towards this fundamental issue – there were over 25,000 comments in the 2016 consultation, mostly opposing the plan. Judging by the revised 2017 Local Plan now proposed by GBC it seems that these voices have once again been ignored.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

**I STRONGLY OBJECT to the proposed development of site A46 in Normandy.**

I object on the following grounds:

1) the plan does not demonstrate exceptional circumstances to justify that the proposed development area (A46) is removed from the green belt, and what effect removing this area from the green belt will have on the local area.

2) the need for a new secondary school is not proven and research into the number of vacant places in other nearby secondary schools shows that they are undersubscribed. You cannot justify the need for a school based on development of houses in this area.

3) the increase in traffic could not be supported by the road system and it is unfeasible that people moving to the area would all use the train, most people living in this type of location do have cars. The roads are already saturated with traffic with a large number of cars using the A323 to commute from Aldershot/Camberley/Farnborough to and from Guildford. When there are problems on the A31 (frequent) or A3 (also frequent) then the A323 takes a large amount of the traffic away from these roads.

4) the impact on the environment and local sustainability have not been addressed. Normandy is an important natural area and if removed then Guildford is in danger of merging with Aldershot/Camberley/Farnborough and creating urban sprawl.

5) the local population have not been kept fully informed of this proposal from the earliest time possible.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Policy A42. Clockbarn Nursery, Tannery Lane, Send. Allocated for 60 houses in place of the previous 45 houses. Apart from being lined both sides with green fields for much of its length, Tannery Lane is a narrow route turning off from the middle of Send and where it turns off there is existing development either side adding to the traffic turning into it will cause further delays through the middle of the village and require a significant amount of infrastructure work.

Policy A 58. 9.26 hectares at Burnt Common, for an initial minimum of 7,000m2 of industrial space. This is by far the biggest potential problem with the latest round of changes. GBC have changed two little letters here - ‘maximum’ becomes ‘minimum’ and the possibility is thus opened up of a huge new development on Green Belt land, in a location where there is actually, according to recent research, reduced demand for industrial space. Such industrial development will cause very heavy additional traffic on the surrounding roads, where there are already long queues in the rush hour. I’m genuinely baffled by what passes through the heads of GBC on this issue: they must have cars, they must sometimes sit for long periods as we do in jams going up the hill past the university on the A3 or indeed on the A3 northbound past the Potter’s Lane and Ripley turn-offs; or find their routes to school or work are solid due to the smallest roadworks; and yet they’re quite happy to say they’re addressing the problem of accommodation for people working in schools and hospitals in Guildford not by providing houses in the immediate vicinity of the town but by building a mini-commuter belt in Wisley, Horsley, Send etc., from which people will need to climb into their cars by the thousand and head off into the complete gridlock the Plan will have created. Except of course that most of the new housing won’t be affordable, as above, so most of the cars may be heading the other way, into London.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 6: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I am writing to object in the strongest possible terms to the latest draft of the Guildford Borough Council Local Plan - as I have written to object to previous drafts, apparently with no effect other than to redouble the Council’s determination to dump punitive and badly thought-through levels of proposed development on our village.

The Council’s approach to the process of consultation is deeply cynical. Rather than responding to the legitimate opposition of local residents to the disproportionate share of development allocated to Send in the first Draft Plan, subsequent drafts have added insult to injury, apparently taking the view that far from having a democratically enshrined right to have their voice heard on decisions with a potentially devastating effect on the future of their community, residents are being a damned nuisance by not letting GBC and their developer friends build whatever, whenever and wherever they like.

The plan as it relates to Send is flawed on three levels:

- the calculation of housing requirement for the Borough as a whole is extremely spurious, based on wrong assumptions about industrial demand, classification of university students and the indiscriminate imposition of national-level requirements on individual regions

- the share of the burden of development to be placed on Send and its environs has been from the first draft suggestive of a very poor attitude to complying with the demands of government. Rather than 'how can we spread this requirement fairly across the Borough', the Council appear to be asking 'which few parishes can we sacrifice in the interests of keeping the others relatively happy'. More important in my view, the Council's disregard for the Green Belt has been shocking: the Act requires 'exceptional circumstances' for areas to be removed from the Belt, while the current justifications for development are the most unexceptional imaginable - ongoing pressure of population and increasing demand for housing. This is exactly what previous governments committed not to doing.

In spite of this, we see the Plan focusing on new build in areas such as Send, Ripley and Wisley where it's easy and cheap to carve up the countryside, rather than making a serious attempt to use the Borough’s extensive brownfield capacity to cover a high proportion of the development. The official line seems to be to talk about affordable housing and insinuate that those objecting are NIMBYs: but given the choice of sites (highly unpopular but the most profitable for development) and the decision to make a minimum of only 40 percent of houses built on land freed up for development 'affordable' (equivalent to perhaps 25 percent of the land thus freed up) - leaving developers rubbing their hands over the other 75 percent, it’s hard to keep faith in the Council's having any other motive than greed.

- most specifically, the effect on Send of the proposed developments will be to cripple the already creaking road system, massively overload schools and medical facilities, undermine the environment and - in short - ruin the village. It’s far from perfect at the moment but I can say hand on heart that it’s quite a nice place to live. It seems likely to be a truly grim place to live if the current Plan goes through.
It’s the third of these I want to focus on for the remainder of this email, and as instructed I shall focus on changes made since the previous draft - but please note none of the objections raised previously have been addressed and you should still give these full consideration.

In view of new evidence which shows that Guildford’s projections for population growth is flawed and is predicting much higher growth than is likely, PLEASE can you reconsider your plan to build so many homes and especially on Green Belt land. There is evidence that Guildford's proposal for more than 12,426 homes (plus a buffer of 1,155 homes) is excessive and will result in needless loss of Green Belt and increased traffic congestion. It cannot be justified in what is already a highly congested borough.

There is evidence that Guildford’s population growth predictions are overestimated by about 40% because of under-recording of students leaving at the end of their studies.

Please LISTEN to the evidence and re-calculate your projections based on up-to-date evidence.

Once Green Belt land is gone - it is gone for ever. What will you say to your Grandchildren when they ask why Guildford is so busy and congested and horrid to live in?

Insetting of Villages – Chilworth

I note from the proposed Local Plan that it is intended to remove Chilworth’s Green Belt protection status (known as ‘insetting’).

I object to the proposal most strongly because:-

1. The village is close to and overlooked by the Surrey Hills AONB and any development will have a detrimental effect on the enjoyment of this beautiful area.
2. The road network around Chilworth is overused already and queues, frequently through most of the New Road section of the village, develop at peak times, especially at school closing time at Tillingbourne School when parents collecting children park outside the school.
3. Most houses on New Road do not have off street parking so traffic is often clogged up by parked cars, exacerbating the problem at Item 1 above.
4. Although there are a shop and post office in the village they can’t supply everything for living so people will have to travel to Guildford, Godalming or elsewhere for shopping.
5. Assuming most people will work in surrounding towns or in London public transport won’t be able to cope, hence increasing traffic problems.
6. Is the infrastructure adequate for increased housing including water supply, sewerage, gas and electricity?
7. There are two schools in the village but it is doubtful if they would be adequate for an increase in population.

These are just a few points of some importance and I urge you to take them into account.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I would like to register an objection to the inclusion of the Keens Lane development on the the local plan for the following reasons:

1. This is green belt land.
2. Keens Lane is too narrow to cope with the increased predicted traffic and the road cannot be widened due to the proximity of a house called Timbers.
3. The land is next to a listed building and within proximity of a site of SSI. (Whitmoor Common)

I hope you will consider these points when making your decisions.

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPS16/2168  Respondent: 8806209 / Jane Halliwell  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) – Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I live within a few hundred metres of the proposed development at Three Farm Meadows.

I object to the continued inclusion of a site (the former Wisley Airfield, now known as Three Farm Meadows) in the Local Plan. A planning application for this site has already been unanimously rejected by GBC’s Planning Committee. After 14 months of consideration the planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

I object to the fact that air quality concerns have not been taken seriously. Air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, and cause further problems on roads locally and through Ripley Village.

I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).
I object to the lack of consideration for the need for good public transport to service this and the other developments in the immediate area. The railway stations at Effingham Junction and Horsley will not be able to cope with the increased need for transport to London and Guildford and the car parks are already at capacity. Cycling would not be a safe option since the roads in the area are narrow, have no pavements and no space to provide cycle lanes.

I object to the fact that a large proportion the proposed new housing appears to be in the immediate localities of Ockham, Ripley, Send and the Horsleys.

I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Having read the council’s Local Plan Strategy document and seen the proposals for building up to 593 houses in The Horsley in the next 5 years, I would like to raise my strong objections and concerns.

Extension of the Horsleys Settlement Boundaries - No sound reasons are apparent in the broader document as to why the settlement boundaries should change apart from the desire to build additional housing.

Housing – My objections are based on the points below;

• The very large number of new build houses identified for West Horsley would negatively transform the village beyond recognition as it would increase the village size by over 35%. This is significantly higher than any other area in the borough.
• The housing density envisaged per site appears significantly higher than is presently the case in the village. This is totally out of keeping with the existing character and layout of the village that comprises low density housing with a considerable mix of ages and housing styles
• The need for so many houses in Guildford Borough, never mind West Horsley, has not been proved in the Consultation documents
• Why are Brownfield sites not being used ahead of taking land out of the Greenbelt for housing development? Surely this should be the more sustainable priority?

Housing number calculation - The mathematical model used by the consultants used to derive the high number of house requirements in the SHMA has not been revealed. It surely cannot be acceptable that affected areas such as the Horsleys should just accept data without being able to test that data for accuracy or applicability?

Infrastructure – My objections relating to the Horsleys’ broader infrastructure are further
magnified by the proposal to build over 2000 houses on the former Wisley Airfield.
• Roads – Traffic generation from the proposed new housing would be considerable particularly as most households would have two to three cars. The present narrow lanes in and around the Horsleys would not be able to cope without major redevelopment. Additionally the private schools in the area are well supported by families living in Guildford and other villages. These private schools produces significant traffic problems on Ockham Road North and the A246
• Drainage and sewage – Road drainage is a continued concern that will be exacerbated by the runoff from the additional housing. Winter road flooding is an ongoing problem. Additionally, there may be a serious under capacity of existing sewers and the treatment works to cope with the large numbers of dwellings proposed

Village facilities
• West Horsley has very limited facilities with only a single small shop at the southern end of the village with very limited parking
• I object to the shopping parade in East Horsley being defined as a “Rural District Centre”. It presently suffers from severe parking constraints and the facilities are too limited in scope to deal with a sizable increase in the local population

Schools – My objections relate to the following;
• A lack of state primary school places in the village. The Raleigh school which serves both East and West Horsley is full every year
• Secondary school places are limited in number at the Howard of Effingham School and other secondary schools are a greater travelling distance from the village. Any rise in population will severely impact issues like road traffic
• Glenesk and Crammore are both private schools. However the fees would be well beyond the means of many of the new homeowners putting additional pressure on schools like the Raleigh

Medical
• I object strongly that the only Doctors Medical Practice that serves all of East and West Horsley plus areas beyond the villages will be placed under even more pressure. It is always extremely busy and appointments difficulty to get

Transport – My objections in this regard surround the limited transport infrastructure
• Horsley station - parking at this station is limited and often full on a weekday. An increase in village population will increase pressure on station parking and traffic movement to / from Horsley station. There is no land available for more parking
• West Horsley’s bus service through the village is extremely limited.
• The bus service operating from Guildford to Leatherhead travels along the A246 at the southern end of the village and really is only of use to residents living within a maximum of 8 to 10 minutes walk from the bus stops at the Bell & Colvill roundabout

Of significant concern to me is how much further land would the village have to sacrifice in terms of new road layouts, additional parking spaces and enlarged facilities such as schools, shops, medical facilities to cater for this population growth?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley South

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I wish to express my objections to the Local Plan Strategy document specifically in relation to the removal of the Horsleys from the Green Belt and the proposal to build up to 593 houses in the two villages over a five-year period.

Exclusion from the Green Belt – In objecting to this proposal in relation to West Horsley (and the other villages similarly threatened in Surrey), I do not believe that the Council in its strategy document has demonstrated that there are exceptional circumstances as defined by the National Planning Policy Framework (NPPF) to justify these changes to the Green Belt boundaries.

I believe that the removing of West Horsley from the Green Belt is challengeable for each of the 5 legal purposes of the Green Belt. These are;

• To check the unrestricted sprawl of large built up areas
• To prevent neighboring towns merging into one another
• To assist in safeguarding the countryside from encroachment
• To preserve the setting and special character of historic towns
• To assist in urban regeneration by encouraging the recycling of derelict and other urban land.

Increasing the size of the village by over 35% in 5 years can only be seen as a significant encroachment on the countryside as well as increasing urban sprawl. Most of all, such a large number of new-build houses will destroy the setting and special character of this village.

Note: Meeting unmet housing needs cannot legally be considered to be an exceptional circumstance. Furthermore, the justification that forms the basis for this change appears to be at odds with the Guildford Borough Economic Strategy 2013-2031 where no case was made for large-scale development in either West or East Horsley.

Housing number calculation and methodology - I object to the fact that I am unable to review the mathematical model used by the council’s consultants to arrive at the high number of houses proposed for the Horsleys. It cannot be acceptable for this to remain confidential.

Infrastructure – My objections relate to the fact that the council has failed to demonstrate in its Plan how it plans to deal with infrastructure issues especially as it plans to have 593 houses erected in the Horsleys in a five-year period. Of concern is that;

1. There is no Strategic Environmental Assessment included
2. There is no sustainability assessment presented for any of the sites
3. There is no infrastructure document present.

Therefore there is no account as how the council plans to deal with issues such as;
• Road and Transportation – Traffic generation from the proposed new housing would be considerable and the present narrow lanes and roads would need major redevelopment. This would be compounded by the limited public transportation in West Horsley with a bus service through the village. Horsley station and surrounding roads would also see a significant increase in traffic movement. It has a difficult access and parking is limited and often full on a weekday. There is no scope to increase parking.
• Drainage and sewage – Road drainage and winter flooding are continued concerns for the village. Increased runoff from the additional housing will add to the problem especially as some of the sites are prone to flooding in any event. Sewage systems will need major rebuilding and there is no supporting documentation explaining how such infrastructure will cope in the future.
• Schools – There is a lack of capacity at local state schooling at both primary (The
Raleigh) and secondary (The Howard of Effingham School) level. With no increased capacity in the Local Plan, there will be a need for families to travel greater distances from the village. This will further impact road traffic and road infrastructure. Additionally the Glenesk and Cranmore schools are already well supported by families living in Guildford and other villages and result in significant traffic problems at each at the end of the school day on Ockham Road North and the A246 respectively.

• Medical – Currently there is severe pressure on the only Medical Practice serving East and West Horsley plus areas beyond the villages. It would not be able to cope with such a large population especially within the timeframe envisaged.
• Village facilities – Using the description that the shopping parade in East Horsley is a “Rural District Centre” to support the Council’s justification for locating large numbers of housing is totally inaccurate. The range and size of the shops is limited and the parade experiences severe parking constraints. The single small shop at the southern end of West Horsley would not be able to support the additional housing at the Bell& Colvill site. Parking can only cope with 5 cars at a time.

Note - The impact of 2000 houses proposed for the old Wisley airfield at Ockham on the broader Horsley infrastructure will be equally as dramatic as it is only 2 miles away.

Exclusion from the Green Belt – My objection to this proposal is that the case for the removal of the Horsleys from the Green Belt is not substantiated in the strategy document. Specifically, the National Planning Policy Framework (NPPF) requires any change of Green Belt boundaries to demonstrate exceptional circumstances. Unmet housing need is NOT an exceptional circumstance in law. Furthermore, the justification that forms the basis for this change appears to be at odds with the Guildford Borough Economic Strategy 2013-2031 where no case was made for large-scale development in either West or East Horsley.

The scale of proposed development growth plan will do significant damage to the character of the village by extending urban sprawl. This is doing exactly what the Green Belt sets out to protect the countryside from. The environmental impact to the surrounding Green Belt will be significantly increased by this proposal.

2. Sites in East and West Horsley

I OBJECT in particular to including Sites A36-41 (East and West Horsley). This is a back-door way to create a mega-village – essentially, a soulless new dormitory town.

Whatever their merits as development sites, the 6 Horsley sites should not be considered individually but for their cumulative impact on the contiguous villages of East and West Horsley.

Building 533 new houses on these 6 sites, plus at least another 90 on small sites is (a) excessive in absolute terms and (b) disproportionate relative to the rest of the borough. It will destroy the rural character of these communities.

Under the plan, rural West Horsley will take 35% of new homes, urban Ash and Tongham 16% and Guildford urban area only 11%. The total number of homes in West Horsley will increase by 35%, which is disproportionate when measured against the overall increase in housing across the borough and particularly in Guildford town. If the Council have justifiable reasons to transform a particular community so radically, the plan should present a case rather than putting forward site proposals as a fait accompli.

These sites will put unsustainable strain on local facilities and infrastructure, including public transport, parking, schooling, medical facilities, sewage, surface drainage and shops. For instance:

- Thames Water have advised the Council that the current wastewater network will not cope and that the foul drainage system all the way to the treatment works North of Ripley will need to be upgraded.
- Guildford Council’s Education Review says “expansion options may need to be considered for primary” education in the Horsley area within the first 5 years of the plan, but Surrey County Council have no plans to do so. The Raleigh School is already full. The private Glenesk and Cranmore schools are also at or near to full capacity. The suggestion that schools in Ripley can be used contradicts the plan’s stated intention to reduce traffic on the A3 and strategic aim that primary schools should be within walking distance.
- The plan’s Infrastructure Schedule (Appendix C) imagines an “East Horsley and West Horsley traffic management and environmental improvement scheme between 2019 and 2023 by Surrey CC” but gives no details. This scheme is just wishful thinking. The proposed housing can only harm the local environment, not “improve” it.

The density of new housing on the 6 Horsley sites is inappropriate, being greater than anywhere in the locality at present.

Sites situated on the periphery of existing development in the Horsleys encroach on surrounding open fields and require the extension of settlement boundaries for which the plan presents no arguments. Contrary to NPPF paragraph 79, this will contribute to creeping urbanisation by attenuating the Green Belt corridors separating the Horsleys from neighbouring settlements.

Collectively, these 6 sites militate against NPPF paragraph 81’s encouragement of access to the Green Belt and its amenity and recreation value. This has been a success story in the Horsleys, with the creation of an amenity wood and community garden, the purchase of adjacent fields (on the eastern side of Ockham Road North) by local residents in order to preserve their open aspect, well-maintained pitches for local football and cricket clubs, public tennis courts, open space for a high-quality campsite (at Waterloo Farm) used by many foreign tourists and the approval of plans for a “Theatre in the Woods” – making West Horsley the only village in Surrey with an opera house. The open nature of West Horsley determined that a long portion of the 2012 Olympic cycle races passed through the village. This route has since been adopted by cyclists as a permanent asset, including the annual Prudential cycle race. These and future examples of “positive planning” depend on protecting the Green Belt to maintain the openness and attractiveness of the local landscape and avoiding the urbanisation and traffic congestion that Sites A36-41 will bring.
By surrounding Waterloo Farm campsite with 120 new houses, Policy A40 on land to the North of West Horsley will make this rural tourism amenity unviable. This may accord with developers’ plans, since the site would then be vulnerable to infilling with yet more housing.

Site A40 is subject to an unacceptable flood risk from a combination of a high groundwater table and the lack of surface water run-off. This is flat, clay land on the downhill side of the Horsleys where floodwater from new development will accumulate and back up onto existing properties nearby. I can provide photographs proving how badly these fields already flood at present. These problems will only get worse with the increase in extreme weather events associated with climate change. The “appropriate mitigation” suggested in Policy A40 exists only as an abstract notion. It should not overrule the need for Green Belt “exceptional circumstances”.

Policy A40 underestimates the problems of safe access and egress. Firstly, Ockham Road North was closed for several weeks in 2014 because of flooding, and still floods regularly. Secondly, access problems are not confined to flooding and are not addressed by the proposal to extend the existing 30mph zone past the site entrance. Repeated attempts made by Ockham Road North residents to extend this zone have been turned down by the local authorities, Highways England and Surrey Police, even though data collected in 2015 show that traffic has doubled over the last 15 years and that the average speed in the 40mph section of this road is 52mph, with maximum recorded speeds of over 80mph. No traffic calming measures have so far been achieved. Additional housing will add to several hazards along this stretch of road, including:

- Its use by pedestrians, especially children (using the Raleigh and Glensk schools and catching school buses to Guildford and Howard of Effingham), pensioners living in the string of bungalows at the northern end of the road, and visitors from the Waterloo campsite who are unfamiliar with the area.
- The existence of a narrow footpath on only one side of the road in any one spot. The layout means that walking half a mile between Green Land and East Lane requires crossing the road twice.
- The road’s increasing use by recreational cyclists (see above).
- Its winding nature, poor sight lines (especially when interrupted by summer vegetation) and dangerous, concealed driveways. Most of these were built in the 1930s. Some have been widened but many are too narrow for modern traffic. Since a deep ditch runs along most of the road, vehicles have to swing out dangerously when entering or leaving.
- The prospect of additional traffic, including 19,000 HGV movements (90 a day over a long period) if Surrey County Council approves the Drift Golf Course’s planning application to re-landscape its site using bulk waste transported from London.

Answer (if comment is on questions 1-7 of the questionnaire): ()

3. Three Farms Meadow site

I OBJECT to the re-inclusion in the plan of Policy A35 (land at Three Farms Meadow, alias the former Wisley airfield, Ockham). Following a huge public outcry, Guildford Planning Committee have unanimously rejected a recent planning application for precisely this development on 14 separate grounds. This deceived many residents into thinking that it has...
been defeated. Scandalously, the site had been reinserted into the new draft local plan published just 24 hours before the planning decision – a clear signal to the developers to try again.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

POLICY D4 - Development in urban areas and inset villages

I OBJECT. This does not address any of the obvious practical issues already touched on above:

- The plan envisages that 40% of homes built will be “affordable”, but this does not provide any accommodation for low-paid workers, for example, those on the minimum wage, who cannot afford to buy so-called “affordable” homes or pay an “affordable” rent. There is a need for some expansion in social housing, especially in urban areas, where there is a greater concentration of low-paid workers such as those employed in the retail, warehousing and distribution sectors (all of which this plan aspires to expand).
- The number of homes planned in the urban area is too low. There is a glaring need for regeneration in many urban areas, but this is ignored in favour building homes on green-field sites instead. This will not address urban housing needs. It is also unsustainable, since building outside the town does disproportionate harm to road traffic, air quality and overstretched infrastructure.
- The plan envisages a large expansion of the traditional “bricks and mortar” retail sector, but this is a sector in rapid and continuous decline.
- All the stated policy aims for “inset” villages will be negated by the excessive weight of new housing development proposed which would radically change their character forever. Against this disruptive background, it is barely relevant to talk about preserving views!

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY E1 - Meeting employment needs

I OBJECT because:

- The evidence base is unreliable;
- There is unclear differentiation between B class uses;
- Only high value-added business uses, contributing to a modern “knowledge economy”, are desirable, not low-grade, low-employment warehousing which is also land hungry;
- Industrial and commercial businesses must be concentrated in the urban area or existing business parks (e.g. Slyfield) not in the rural environment which the infrastructure is unable to support;
- The rural environment must support micro- or high-tech businesses, agricultural industries, and tourism, and these sectors must not be damaged by general industrial development which is inappropriate.

POLICY E2 - Location for new employment floor space

I OBJECT. It would be more sensible to confine all new office and research and development (use Class B1a and B1b) floor space to Guildford town centre. I oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

POLICY E3 - Maintaining employment capacity and improving employment floor space

I OBJECT. The policy of resisting change of use from B1a to residential flies in the face of positive property market solutions for the regeneration of brownfield land and is contrary to national Government policy, recently reconfirmed, which permits changes of use from B1a (offices) to C3 (residential).

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E4 - Surrey Research Park

I OBJECT. The Council are required by the NPPF to facilitate commercial science and technology clusters. But, as with Policies H1 and E2 above, this policy seems to be dictated more by the ambitions of Surrey University than the public interest. In an extremely tangled sentence, it says that the Research Park will be “protected for business use… in any science… that is complementary to the activities of the University of Surrey.”

This fails to distinguish adequately between the University’s public role as a state-funded, academic institution and its private, financial interest in profit-making business spin-offs. It ignores enterprises that might be commercial rivals of the University. And it fails to consider the public harm done by turning the Research Park into a larger Business Park, such as the loss of Green Belt social and environmental capital.

B1b should be the primary use class for the Research Park and applications for B1a should be resisted given the danger of diluting the core purpose and reputation of the park. The inclusion of B1c uses is inappropriate and unnecessary.

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY E5 - Rural economy

I OBJECT. Use of rural areas for town centre uses without applying the sequential approach is against the principles of localism that require local people to be consulted and heeded, not ignored. Villages need protecting in terms of both design and scale.

Most of the economic activities listed in 4.4.44 depend on maintaining the rural character of our villages which would be endangered by the wholesale “insetting”, boundary expansion and house building proposed in other parts of the plan. This applies also to new and projected enterprises in the Green Belt (e.g. Grange Park Opera’s Theatre in the Woods in West Horsley, which requires a protected, rustic setting to be a success, not housing estates and congested roads). Policy E5 is incompatible with the high housing numbers proposed.

Previous commitments to improved high-speed broadband and mobile phone coverage have now been diluted, despite general support. This disregards the responses from the 2014 public consultation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E8

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E8 - District centres

I OBJECT to the proposal that sites “on the edge” of District Centres should be considered for retail developments. This is another Trojan horse policy, allowing retail hubs to be vastly expanded in order to smooth the way for vast new housing estates outside in the countryside (e.g. to meet the “everyday shopping and service needs” of the roughly 1,500 people living in the 600 new homes planned for the Horsleys).

This is a case of back-to-front priorities. Expanded local retail hubs are being proposed in order to justify more housebuilding in the villages, and in a forlorn attempt to mitigate the serious traffic and infrastructure problems this will bring. The Council have no business preparing the way for new supermarkets in the Green Belt. Rural retail capacity should be left to local demand.

The policy proposes not a single measure to support existing rural shops and services that are the lifeblood of village communities, e.g. using business rates and other levers at the Council’s disposal.

Do you consider this section of the document complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E9 - Local centres

I OBJECT (for the reasons given under Policy E8 above) to the proposal for retail development adjacent to the 6 rural centres, and sites on the edge of designated centres. This is creeping urbanisation, damaging to the Green Belt and to Guildford town revival as a thriving urban hub. It will contribute to local urban decay and depopulation, just as expansion of the suburbs did to mid-20th century London.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2352  Respondent: 8806305 / Laurence Cook  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H1 – Homes for all

I OBJECT. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set any rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to de-humanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and underused surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough already has a higher proportion of traveller sites than most comparable boroughs. Overprovision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
POLICY H2 – Affordable homes

I OBJECT. “Affordable” homes, under national definitions, means homes that are sold or rented at 80% of market value. Even if 70% of these are rented as proposed, the level of market prices in the South-East means (even post-Brexit) that these homes will remain well beyond most people’s means and that starter homes will not become available for local people.

In addition, the viability clause (4.2.40) means that in practice the policy could be unenforceable. Private financial viability has no place in a public policy and should be removed. It is a get-out-of-jail-free card for developers that will sacrifice countryside for no local benefit.

I question the assumptions that seem to underlie this policy: that people have a right (rather than a legitimate aspiration) to own a home; that they should be encouraged to live locally (contradicting the Government’s policy of encouraging labour mobility and development in poorer regions, where homes are cheaper anyway); that increasing local house-building will reduce overcrowding and congestion (rather than simply suck more people into the borough); and that it will stem the rise in house prices (even though 13,860 new homes will be a drop in the ocean, given that prices are determined by an infinite demand-pull from London, whose population is increasing by 100,000 a year, and by the currently low cost of capital for overseas and other buyers). The weak mechanisms proposed in the plan might influence the market in a more remote part of the UK, but not here.

This policy’s version of “affordability” is just a smokescreen for pushing through more development generally.

Building more homes in Guildford cannot increase real affordability given the overhang of the London market.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
POLICY H3 – Rural Exception Homes

I OBJECT. This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix”, this can include “market” housing – i.e. normal commercial development which in Guildford usually means large executive homes. This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY I1 - Infrastructure and delivery

I OBJECT. Most of the borough’s infrastructure is antiquated, congested and straining to accommodate even current needs and organic growth. Yet this plan’s commitment to building housing estates across the Guildford countryside will mean either major infrastructure investment that no-one is prepared to pay for or else a catastrophic and simultaneous collapse in transport, educational, medical, energy, water and communications services.

The plan targets greenfield sites – requiring heavy infrastructure investment – in order to generate CIL income necessary to meet an infrastructure shortfall that is already serious. This is not sensible. The current draft CIL scale also encourages development on greenfield sites rather than brownfield.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing infrastructure needs in this area is inadequate, identifying only the tip of an iceberg of existing congestion. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that involve demolishing property and road-widening in residential areas to solve the resultant congestion. The A3 improvements are not guaranteed to take place but they are being used to justify removing large areas from the Green Belt before detailed traffic assessments have taken place. These detailed investigations are being deferred until the planning application stage and will be left to developers to prepare. If a site then proves to be unsustainable its Green Belt protection will have been lost for no reason and unsuitable development will take place by a more insidious process.
Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritising greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognising this as a key issue, the plan is based on a wing and a prayer.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY I2 - Supporting the Department of Transport’s “Road Investment Strategy”

I OBJECT. This policy is too vague and optimistic. Decisions by Highways England on improving the strategic road network (the M25 and A3) are still years off. The Council have suggested a very expensive tunnel under Guildford, but this is no more than a dream. Even if Highways England accepted this (which is highly unlikely in the post-Brexit public spending climate) it would not be built until the end of the plan period at the earliest. Other, less expensive A3 improvements, and changes to the Junction 10/Heathrow stretch of the M25, will also take years to agree and complete.

The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is foolhardy. Surrey is the most congested county in England, with 683 people per square kilometre, compared with an English average of 413. This policy will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone). This is a major development constraint that should have been applied to the OAN before this consultation, and not left up in the air.

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY 13 - Sustainable transport for new developments

I OBJECT. This is another vaguely aspirational policy, based on wishful thinking and not grounded in the practical realities of daily life. It consists of a standard, box-ticking list of local government measures unrelated to the specifics of the plan. Like infrastructure, transport appears to be an afterthought; the policy fails in its essential job of guiding planning decisions, since it assumes development of any kind can be supported by sustainable transport.

The sustainability of the dormitory settlements which the Council want built across the countryside depends on a general “modal shift” from private car use to walking, cycling and public transport. This is unrealistic. The proposed sites are often miles away from the nearest railway station. Bus services even in the largest villages are almost non-existent – just one bus to and from Guildford each day in the Horsleys and none at weekends. Since bus services depend on profitability, they cannot be expanded and the Council are not proposing to subsidise new ones. Rural buses are too slow anyway for busy people. Most rural roads in the borough are narrow, winding, hilly, potholed, muddy and unlit. Many flood badly and have no footpaths.

The desired modal shift would require a comprehensive co-ordination of bus and train timetables with services every few minutes, seven days a week, to stops within walking distance of every home in the borough. This kind of integrated public transport system has been achieved in Switzerland, for instance, but only at huge public cost and thanks to a political consensus supporting state ownership of trains, buses and the post office, which delivers rural passengers as well as mail. There is absolutely no chance of this in the UK.

The vast majority of the borough’s residents are not, in practice, able to cycle. This includes children, the elderly, commuters who have to look smart, the infirm, the unfit and people carrying goods or shopping of any kind. Dependence on walking and cycling discriminates against these groups, which include some of the most vulnerable members of the community. It is socially unjust.

One in two working people in Guildford commute for up to 3 hours a day. They will not leave their cars for even part of their journey if it means longer travel times.

Park-and-rides are a welcome part of the transport mix but are too slow for commuters and others on a tight schedule. Well-off pensioners seem to be the main beneficiaries. For an adult couple going shopping it is still cheaper to park in town.

Forget about water buses. The Wey is too narrow and, with a river speed limit of 4mph, boats are too slow for anything but recreation. Except on the tideway, not even the Thames has such services.

The addition of two new stations appears attractive but will slow down train journeys, which are already slower than at any time since the 1930s. Knock-on effects on localities where the new stations are built have not been worked out or presented.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
POLICY P1 – Surrey Hills Area of Outstanding Natural Beauty

I OBJECT. This policy weakens existing protection when it should strengthen it. It is dependent on the Surrey Hills Management Plan. The latter welcomes housing development. Even major (undefined) development in the AONB would be permitted if exceptional (undefined) circumstances could be demonstrated.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY P2 – Green Belt

I OBJECT. This policy states, “the general extent of the Green Belt has been retained.” This is a lie.

The policy wording is tepid in support of the Metropolitan Green Belt even though the latter forms 89% of the borough and should be the cornerstone of all local planning policy. It is precious beyond the short-term demands of the present Government’s policy or a 15-year local plan. As noted under Policy S1 above, it is a solemn legacy to future generations – an asset and amenity that belongs as much to Londoners and the whole nation as to the people who live in it. It is an inalienable public good. Once gone it is gone forever. It is not the Council’s to give away.

Policy P2 omits any assessment of the Green Belt’s value. The Green Belt is not just empty space but is an inhabited, working environment that safeguards a certain stock of natural capital. Building on it involves high opportunity costs, including an irreversible loss of:

• Agricultural production
• Rural leisure and tourism amenities
• Water catchment
• Flood control
• Biodiversity
• Natural heritage
• A carbon sink for air pollution
• Room for public facilities such as parks and burial grounds
• Profitable film locations (e.g. Shere)
• Future economic potential such as mineral extraction (even fracking)
• Natural beauty, landmarks, open space, rural views and sight lines
• Benefits to public health and wellbeing, physical and psychological (as well expressed in the NPPF)

As a matter of law, morality and national and local policy, these assets should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultations.

It is disreputable to argue, as the Council do, that the plan would involve the loss of “only” 1.6% of the borough’s Green Belt. In reality the figure is nearer 7% when insetting, infilling and settlement boundary extensions are included. More
importantly, there is no “acceptable” percentage (in the NPPF or anywhere else) of Green Belt that may be sold. No-one argues that we should sell 1.6% of the Crown jewels in order to build houses.

I am not opposed to appropriate development in the Green Belt and recently supported a major planning application in my own village. But I fail to see why a system of fair burden-sharing of new development cannot be applied to the borough’s existing settlements in proportion to their size. This alternative would minimise the strain on infrastructure and maximise the chances of retaining the character of each settlement through gradual growth. It is reasonable to ask urban Guildford, with $x$ times the population of semi-rural East Horsley for instance, to accommodate $x$ times the number of new homes over the plan period. Parish councils could be asked, and will no doubt be willing, to propose where their quota of houses should go. Most rural residents are reasonable people who, if not alienated by top-down planners, will support realistic numbers of new houses in their neighbourhoods. Unfortunately, this democratic, bottom-up approach has not been attempted.

Instead, while developers flip and land-bank urban sites as a financial speculation, this plan will dump most new development on greenfield sites where building costs are lower, covering the Green Belt with dozens of housing estates that few residents want. 8,086 new houses are planned for the Green Belt but only 1,135 for Guildford urban area. This is disruptive, socially inequitable and unnecessary. It will not only destroy countryside but will also delay and disincentivise much-needed urban regeneration. The remarkable revival and repopulation of central London shows that building dormitory satellite settlements is an out-of-date approach to planning.

I particularly protest at the “insetting” of 14 villages from the Green Belt, and at “infilling” 12 of the borough’s Green Belt villages. I am deeply disturbed that settlement boundaries are to be hugely extended in many villages and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are “leggy” in outline, reflecting the effect of ribbon development (often along just one side of existing roads) permitted between the Wars. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development.

I believe this policy is based on a flawed Green Belt and Countryside Study that, according to one Conservative Councillor, was irregularly commissioned by Council officers without the authority of Councillors. To “inset” two thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, although they would quickly destroy them if the proposed “insetting” and boundary extensions go ahead. This policy is wildly disproportionate in terms of any foreseeable development need (especially post-Brexit) and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Answer (if comment is on questions 1-7 of the questionnaire): ()
SITES1. Green Belt sites

I OBJECT to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development, however, it does identify the principle of development and uses.” This ignores the tens of thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. This amounts to a war of attrition by the Council in conjunction with developers, since many busy residents are sick and tired of repeating the same comments to deaf ears. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. Some residents have concluded that commenting is a waste of time.

All Green Belt sites should be removed from the plan until “exceptional circumstances” for development are proven, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established.

Answer (if comment is on questions 1-7 of the questionnaire): ()

**POLICY P4 – Flood risk and water source protection zones**

I OBJECT. Urban development on existing hardstanding would not create additional flood risk, especially where there is scope for improved flood resistance measures to be included in the design. Sites such as the Arriva bus depot, on the River Wey bank, are potential high-value brownfield sites that would not be available for housing if this policy is implemented. It is not the footprint of existing buildings that should limit future development, but the extent of existing hardstanding. Tarmac and concrete do not act as functional floodplain, and some land with hard standing close to the river, within the town centre and within easy walking distance of the railway station, provides an excellent opportunity for real urban regeneration that could protect the surrounding countryside.

Answer (if comment is on questions 1-7 of the questionnaire): ()
POLICY P5 - Thames Basin Heath Special Protection Areas

I OBJECT. This policy is weak. The mitigation (cash compensation) offered for development in the special protection area is so small as to be meaningless.

SANG (Suitable Alternative Natural Greenspace) is not beneficial since the sites identified or targeted are already green space. This is just using agricultural or wooded land as recreation land in order to justify building on other green spaces nearby. There is no actual increase in open space or environmental protection; instead, it is a ploy designed to permit building on otherwise protected areas. SANG – in part used to prevent dogs and cats attacking nesting birds – must also ensure that it is not using land which is adjacent to the Special Protection Areas.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY S1 – Presumption in favour of sustainable development

I OBJECT. The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” Standing at the head of the draft plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The promise “to secure development that secures the economic, social and environmental conditions in the area” omits to recognise that economic growth, social justice and environmental protection often conflict. It does not say how each element is to be weighted or conflicts resolved. As a practical guide to the tough choices Councillors will face, it is useless. Under this policy, any development will qualify as “sustainable”, thereby failing to apply the NPPF’s most important guideline.

The most gaping hole in Policy S1 is the Green Belt. As an inter-generational covenant (enshrined in primary legislation) to protect green areas in perpetuity, the Green Belt is a living example of sustainable development in practice. It is the envy of the world. Policy S1 should commit to uphold Green Belt boundaries and protections, setting at least one clear boundary to planning decisions. The plan’s contempt for Green Belt constraints is amply demonstrated in later policies.

The commitment to approve planning applications “wherever possible” and “without delay” reveals this draft plan’s pro-development bias. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17. In my view Policy S1 is a non-policy.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT. I have 5 objections to the proposal to build 13,860 new homes:

1. The number is based on pre-Brexit projections for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

2. The number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half the people who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent districts of Rushmoor and Mole Valley, minutes from Guildford town, are outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere. Unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and is part of a far wider and more complex housing market.

3. These concerns have been raised since 2014 but the Council have failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so the housing numbers derived from it are unreliable. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county (none in Mole Valley, for instance). This highly lopsided distribution is unexplained.

4. The figure of 13,860 new homes is unsubstantiated. It has not been scrutinised by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by commercial sub-contractor used in preparing the SHMA. The Council say we should trust the contractors’ model because it is used by a large number of other local authorities. Wide usage, however, does not confer objectivity. Guildford’s OAN would fail the basic transparency test even if the methodology used were a universally admired ‘gold standard’. But it is not: it belongs to consultants whose website openly proclaim their pro-development agenda, provoking reasonable suspicion that the figures are inflated. External experts and members of the public have provided detailed critiques of the model. Its most fatal flaw, however, is that it has not been disclosed – not even to the authors of the plan, who have taken it on trust. This is irrational and unsound.

5. The status of the 13,860 figure is ambiguous. The plan fails to set a Housing Target of new homes to be built, or explain how this relates to the “Objectively Assessed Number” (OAN) for housing need. Elsewhere, the Council have said that the two are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted, but in the same breath say that infrastructure or other constraints may in due course affect deliverability. Despite the NPPF, the plan fails to address these constraints. In any case, the number of homes proposed, plus existing planning permission, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how can anything else be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a Housing Target that takes normal constraints and adjustments credibly into account, and which leaves the Council to set one at any level without further consultation. Even if the OAN were not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.
It is irrational to embark on a radical transformation of the borough without a clear Housing Target. Most of Guildford borough is theoretically protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the existing number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

**Proposed Submission Local Plan: Strategies and Sites 2016 – West Horsley**

- I am writing to express my very strong objections to the proposals set out for West Horsley.

First; I object to the proposal to remove any part of the village from the Green Belt.

Second; I object because the sum of all the proposals is seriously out of proportion (adding nearly 40% to the village) and will put all local amenities and infrastructure under severe pressure.

Proposals A37 to A 41 taken together would increase the number of houses in the village by nearly 50% and would alter its rural nature. The average proposed density is about 7 houses per acre which is a suburban, rather than a rural, density.

There is very limited employment in the village and the road and rail routes to employment elsewhere are already reaching capacity.

The same is true of the schools provision and the plan does not appear to include land for any new school.

Parking facilities are already inadequate. Extra demand will swamp them and lead to unwelcome, unruly and obstructive parking on the local roads and streets which will further amplify our traffic problems and sour community relations.

Is there an ‘objectively assessed’ need for so much development? Does it define the types and quantities of housing needed?

Other proposed local developments – there are major schemes proposed in Wisley, Effingham and Bookham and these are all likely to add significant extra through traffic to our already crowded roads and parking facilities.

The traffic implications of these proposals are clear - and they are clearly unacceptable.
Site A40 is remote from most village amenities and most residents will use a car to reach them – so this development would probably add another 500 – 1000 daily vehicle movements on and off busy Ockham Road North at the inadequate Green Lane junction.

Sites A38 and A41. These two sites, in particular, will seriously impact the rural nature of the village. They are also remote from most village amenities and most residents will use a car to reach them – so this development would probably add another 1000 – 2000 daily vehicle movements on and off East Lane. Much of this will use the junction with Ockham Road North. Currently traffic at this difficult junction can approach 1000 vehicle movements per hour in rush hour – and at this level it is already fully loaded and queuing occurs.

Site A39 has the advantage of proximity to shops, station and surgery but 100 new houses are still likely to generate several hundred daily vehicle movements to and from Ockham Road North – access presumably being close to the railway bridge. This is a hazardous location, particularly at rush hour, when there is a high volume of fast moving two way traffic on this relatively narrow road.

Walking from here is also hazardous because;

1. the footway is narrow and fast moving north bound traffic is often running within a few inches of the kerb line. Pedestrians have been struck by passing vehicles!
2. On wet days the road acts as an extra storm water drain and pedestrians are liable to drenching spray from vehicles passing very close to them.

A public footway running north from this development and away from Ockham Road North and through Weston Lea to East Lane and the Raleigh and Glenesk primary schools would be welcomed by many.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have strong objections as follows;

• ONS predictions suggest that the proposed degree of expansion is not necessary

• The proposed number of houses to be constructed to the east of Guildford has gone up significantly since the 2016 proposal. There are also possible developments in Effingham, the Bookham area of Mole Valley DC, and at Wisley and taken together these will overload all local roads and other infrastructure.

• There is no proposed change since the 2016 Consultation to insetting East and West Horsley from the green belt. This is very unpopular and likely to change the character of the area.

• The concentration of new houses proposed for West Horsley will create significant extra traffic on East Lane and Ockham Road North. These roads are already overloaded at some times of day and walking or cycling along them is often hazardous.

• The concentration of new houses proposed for West Horsley will overload other local infrastructure – particularly schooling and the Medical Practice.
I feel that these proposals could change the character of West Horsley from rural to suburban and I object strongly to that.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Shalford (south)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The fields behind Shalford Village Hall should be retained within the existing Green Belt Boundary and be kept outside the village settlement boundary. There is no valid reason for change. The land helps to contribute to the open nature of the village, providing an attractive setting for the community buildings. Importantly Chinthurst Lane is already congested and this rural lane would provide access to this land.

I strongly object to this proposed development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the inclusion of many of the documents in this "Evidence Base".

In particular, I object to the inclusion of

The Green Belt and Countryside Study, which is subjective and exhibits examples of predetermination in its conclusions. It is a very shoddy piece of work

The SHMA which did not objectively research the housing market and reached a housing needs number which is grossly exaggerated because the authors demonstrated they did not have the skill required to properly assess the underlying factors behind the population growth numbers produced by the ONS

The Employment Land Needs Assessment 2015, especially for the unambitious targets for efficiency of land use and its selective use of statistics.

These poor quality of these reports (and probably others) no doubt has been influenced by the lack of continuity in producing the plan, with an extraordinarily rapid turnover of council officers and consultants associated with the production of the plan, coupled with the turnover of Councilors responsible for the plan - 3 in 3 years is a poor record. No doubt too that the consultants were responding to the council objective, which was declared to be "to roll back the Green Belt". There can be no doubt that this objective was made clear to consultants when they sat in meetings to plan the production of their reports.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Firstly, I want to pint out that this site is not in the Guildford urban area, it is a Green Belt site, as is Blackwell farm, which is also listed as being in Guildford's urban area. this is untrue.

Development on this site will cause great harm to the Green Belt, and as has been made clear, housing need alone does not permit Green Belt boundary changes.

There will also be an increase in road traffic associated with this development and an increase in air pollution. My attachment provides more details.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the choice of this site.

It is a green belt site, close to areas of AONB and GLV, and new roads would cut through these areas. This area should have been incorporated in its entirety into the AONB or at least into the AGLV. The views across this land down into Guildford Town and from Guildford centre to the AONB are among the most iconic in the borough. To destroy them would be municipal vandalism on an enormous scale. This site includes high quality agricultural land that should not be developed.

Building on this area would cause great harm to the green belt and this is considered in more detail in the attachment, as is sustainability.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to comment on this site, but please note my comments also apply to Sites A37, A39, A40 and A41.

These sites are all Green Belt sites and their development will cause great harm to the Green Belt. There are no special circumstances that outweigh the harm that will be done to the green belt. Thus this policy is not lawful.

This is covered in more detail in the attachment.

the development of this site (and A39, A40 and A41) will cause the merger of the villages of East Horsley and West Horsley. This is clearly the councils intention, as it seeks to inset these villages from the Green Belt, with a total of 363 ha (3.6 square kilometres) to be removed from the Green belt, with little regard given to the quality of the new proposed Green belt boundaries. These large housing developments will submerge the pattern of development in these villages as the housing density is much higher than housing already present, and the style will be little boxes, so loved by developers. The NPPF specifically states that one of the purposes of the Green Belt is to stop the merger of towns - but in fact this is a deliberate policy of GBC. There is a recognition of the need to prevent towns from merging, as this draft local plan includes a proposal to create new Green Belt around Ash Green village, to prevent it merging with Ash and Tongham. It is a remarkable contradiction that on the hand GBC seek to promote the merger of neighbouring villages, but on the other hand seek to prevent. In one case the policy to ensure the merger happens is to remove the villages from the green belt, with the addition of large numbers of new dwellings, but on the other hand, to create new green belt to halt housing development to prevent Ash Green village from merging with its neighbours. These different proposals are in the same plan - and the contradiction in them seems lost on the architects of the local plan.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()
This site is in the Green Belt - developing it will cause great harm to the Green Belt. No special circumstances have been given for this development, other than the need for houses, which is not an adequate reason. This is covered in more detail in the attachment.

The sequential test has not been employed at this site and so its flood risk should prevent its development.

Nor is there any need for extra employment land. This is solely because AECOM, who produced the Employment Land Needs Assessment adopted an unambitious target for land use efficiency. This target was just to be the same as the national average. But because land in the borough is expensive and 89% of the borough is Green belt, there is a need for a much more ambitious land use efficiency, so land use efficiency is better than the best. This would eliminate the need for employment land on this site.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( No ), is Legally Compliant? ( No )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to this site

Building on this site will result in the merger of the villages of Flexford and Normandy, which is contrary to the policies in paragraph 80 of the NPPF. Although the NPPF uses the words neighbouring towns, the aim is clear - and this is recognised by GBC in that they want to prevent the village of Ash Green merging with Ash and Tongham. How they then find it lawful to propose to deliberately merge Normandy and Flexford is confusing.

This inappropriate development will cause great harm to the green belt, and create more traffic and air pollution. these are covered in more detail in the attachment.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Submission Summary
There are effectively two separate parts to this policy, both are flawed, and in the case of insetting, fatally flawed. In the case of urban development there are numerous flaws, including:

- The plan envisages a large expansion of the traditional “bricks and mortar” retail sector, but this is a sector in long term decline, and so is not sustainable even in the medium term.
- The plan envisages that 40% of homes built will be affordable, but these will not provide appropriate accommodation for low paid workers, for example, those on the minimum wage, who cannot afford to buy “affordable” homes, nor can they pay so-called “affordable” rent. There is a great need for an expansion in social housing, especially in urban areas, where there is a greater concentration of low paid workers such as those employed in the retail, warehousing and distribution sectors.
- The number of homes planned in the urban area is too low – there is a need for regeneration in some areas of Guildford, but this is ignored and instead the plan concentrates on building homes on greenfield sites, which does not meet the needs for housing within the town, especially within the centre. This is not a sustainable policy as building outside the town has a disproportionate effect on road traffic. The analysis in Annexe 1 shows this to be the case when alternative methods of travel to work are analysed for two separate areas, one in the town centre and the second in a rural village.

In the case of insetting, the policy is fatally flawed, for three separate reasons.

- Firstly, it is based on an erroneous assumption. GBC justify the policy (in para 4.5.47) by suggesting, without any supporting data, that development in villages washed over by the green belt has been at a lower rate than within Guildford town. This was not the case, and statistics from the ONS censuses of 2001 and 2011 show that this assumption is incorrect. These statistics show that the growth rate in housing was higher in Effingham, a village washed over by the green belt, than in Merrow, which is not washed over by the green belt. In fact, the rate of increase in housing stock in Effingham was faster than the average for the borough.
- Secondly, insetting has been based on the Green Belt and Countryside Study, but the analysis in this document was flawed to the extent that it is valueless. It has serious flaws in its methodology, includes subjective judgements, and thus its conclusions are flawed - see Annexe 2 for detailed analysis These flaws are so serious that this study should be removed from the evidence base that supports the Local Plan.
- Finally, although a flawed justification was provided for the insetting of villages, this does not apply to all the areas selected for insetting, many of which are not “villages”, such as Pirbright Barracks. These sites are listed in the text below. No attempt has been made to justify the insetting of these sites, and in the absence of any justification they should remain in the Green Belt.

Urban development
There is a fundamental flaw in the draft Local Plan, in that there are not enough dwellings planned in urban areas, in particular, Guildford town centre. This is where the demand for affordable homes is most acute, a fact which is recognised in much of the draft Local Plan. Yet the plan then envisages that most dwellings will be built outside the urban area, so there is no continuity in the plan – if the demand for affordable homes is most acute within the town, then is where these dwellings should be built. There are sites available, for example, various sites in Woodbridge Meadows, Walnut Tree Close (including the area around the station) and North Street. Yet the focus in these areas is to provide a very limited number of dwellings, with the emphasis on additional retail space and more commercial premises. Given the profound changes in traditional retail, this is not a sustainable policy. There have been many examples of bankruptcies amongst traditional retailers, the most recent examples being BHS and Austin Reed, and previously Woolworths, Comet, etc. The British Retail Consortium forecast that by 2025 up to one third of those now employed in traditional retail could lose their jobs, due to a combination of factors. These included the continuation of the move to shopping via the internet and higher costs, from business rates and the introduction of the “living” wage. Recent figures show that online sales are still growing quickly, with more than 13% of total retail sales now made over the internet. Nor does an expansion in traditional retail chime with the objective of attracting highly paid jobs to the area – the majority of jobs in retail are low paid, and zero hours contracts are common. So any expansion in traditional bricks and mortar retail would create a greater demand for affordable and social housing – exactly the reverse of what is needed.

Even the major grocery retail chains have been affected by changes in retail habits – Tesco, Sainsbury’s, Morrisons, etc are closing some stores, with no major large stores planned. Banks and other financial institutions are still closing some branches, so changes in town centres still have some way to go – but none of these changes are recognised in the draft Local Plan, which envisages no limit to traditional retail.
There is another reason why the retail sector is unlikely to exhibit strong long term growth, and this is consumer debt, which has reached a level that the Bank of England has said could contribute to economic stability. This is likely to have a greater destabilising effect in the event of an economic downturn – and there will certainly be at least two of these during the life of the Local Plan. Consumer spending simply cannot be maintained indefinitely at its current rate, and to plan for a large increase is irresponsible.

Building the majority of homes outside urban areas is contrary to the advice of planners such as Lord Rogers, who has detailed the many advantages of increasing housing density in urban areas. The housing policy in this plan will result in a greater number of commuter journeys, creating more congestion, with an increase in air pollution across the borough. This is examined in detail in Annexe 1.

So there has to be a reappraisal of urban development plans, with more homes provided in urban areas, in particular in the centre of Guildford. As the council own many sites in the centre, these could be made available for development within the first 5 years of the plan, with mixed housing on these sites, including new social housing, which is sorely needed. Affordable housing is simply not affordable to anyone on the minimum wage, there is a need for a considerable expansion of social housing, a need that is not adequately recognised in the draft Local Plan.

In the detail of Policy D4, it is suggested that in urban areas and inset villages, planning permission will be granted provided that a proposed development:

- “Ensures that the layout, scale, form, massing, height of buildings and structures, and materials relate to the site context and its surroundings;” ..... There are several other criteria listed and the Policy then goes on to elaborate criteria specific to inset villages, as follows:
  - In addition to the above, proposals for new development within inset village areas will have particular regard to:
    - The distinctive settlement pattern of the village and the important relationship between the built development and the surrounding landscape;
    - Important views of the village from the surrounding landscape;
    - Views within the village of local landmarks.”

There are numerous development sites proposed that mean that the first criterion cannot be met, as the developments proposed do not relate to the scale, form or massing of the site surroundings. For example, the Horsleys. Here it is proposed that a total of 3.6 km² should be removed from the green belt, with a total of 533 houses proposed on sites in East and West Horsley on a total of 29.1 ha, an average density of 18 dwellings/ha. These proposed developments are not in scale or proportion to the existing villages, and the housing density is considerably higher than existing housing density. Effectively, if these developments were to proceed, East and West Horsley would merge and become a large urban area in the green belt, totally different in character to the existing villages, and the housing density pattern completely lost. Similar considerations apply to other proposed development sites, such as Flexford and Normandy. In this case, 1.3 km² would be removed from the green belt with a total of 1,100 dwellings proposed on 67 ha, an average density of 16.4 dwellings/ha. Again, the scale and form of new development would overwhelm existing hamlets and villages, merging these to form another urban area in the heart of the green belt, with no consideration of the views of the settlements from the surrounding countryside, much of which has been given AONB status.

Thus the words of the policy statement D4 do not match the proposals contained in the draft local plan. The “Reasoned Justification” for the policy consists of five paragraphs, 4.5.45 to 4.5.49. Of these, 4.5.45 and 4.5.46, 4.5.48 and 4.5.49 are not justifications for the policy, they are simply statements or further information. Paragraph 4.5.47 is the only attempted justification for this policy, but in fact this applies only to insetting. Paragraph 4.5.47 is factually wrong and so the justification for this policy does not bear close examination. Parts of this paragraph are taken in turn below, to show the inaccuracies this paragraph contains.

“Historically, development has been focused in the urban areas of Guildford, and Ash and Tongham only. Development in the villages has been very limited due to the Green Belt designation which previously washed over all but one of the villages.”

This depends on how development is measured. In terms of raw numbers, this may be true, but this would ignore the fact that urban area of Guildford town contains much of the housing in the borough. Taking the increase in housing stock between the censuses of 2001 and 2011 in specific wards reveals a much more complex picture. Effingham, for example, had a higher rate of adding dwellings than the average for the borough and some of Guildford’s urban wards. Using census data collected by the ONS, between 2001 and 2011, the number of dwellings in Effingham increased by 6.6%, whereas for
the borough as a whole it increased by 5.0%. Over the same period in Merrow, a ward within the urban area of Guildford, the number of dwellings increased by only 1.2%, whilst in Normandy ward the increase was 2.6%. This analysis has not been exhaustive, but it is sufficient to show that the opening statement in paragraph 4.5.47 is incorrect, and that in some cases, proportionally, considerable development has occurred in green belt villages. It should be incumbent on GBC to assess the facts before making inaccurate statements such as this. ONS statistics are open to all.

In the first three months of 2016, planning applications for 12 additional dwellings in Effingham have been made, in a village of approximately 525 dwellings. Although one of these applications has been reduced from 6 to 4 dwellings, another 5 have been approved which shows clearly that development within villages washed over by the green belt can occur, and that organic growth is possible. There is no necessity for insetting.

“Fifteen villages are now inset from the Green Belt meaning that development is no longer, by definition, considered inappropriate”.

Guildford’s Green Belt boundaries were established in the Guildford Borough Local Plan 1987, so are well established. There has not been any justification for the extensive green belt review that accompanies the insetting of villages, or for the removal of these villages from the green belt. According to the NPPF, paragraph 83, green belt boundary changes should be made only in exceptional circumstances, as follows:

“No exceptional circumstances have been demonstrated, with none given as justification in Policy D4 for the policy of insetting. Proposed green belt boundary changes are on a very large scale, as it is proposed to remove 14.4 km2 from the Green Belt, more than 6% of the existing area designated as green belt, and to create new green belt boundaries extending to more than 105 km. This is not a simple revision to the Green Belt, and a demonstration of exceptional circumstances is required for each and every change. This has not been done, not for a single proposed change.

Although Guildford Borough Council are in the process of producing a new Local Plan, this in itself is not enough to change Green Belt boundaries; the requirement to demonstrate exceptional circumstances still applies. According to a High Court judgement, Gallagher vs Solihull, issued March 30th, 2014, Case No. CO/17668/2013, there is still a requirement to prove exceptional circumstances – quotations below are from paragraph 125 of this judgement:

“However, it is not arguable that the mere process of preparing a new local plan could itself be regarded as an exceptional circumstance justifying an alteration to a Green Belt boundary. National guidance has always dealt with revisions of the Green Belt in the context of reviews of local plans…… and has always required “exceptional circumstances” to justify a revision. The NPPF makes no change to this.”

“Exceptional circumstances are required for any revision of the boundary, whether the proposal is to extend or diminish the Green Belt.”

Whilst each case is fact-sensitive and the question of whether circumstances are exceptional for these purposes requires an exercise of planning judgment, what is capable of amounting to exceptional circumstances is a matter of law, and a planner may err in law if he fails to adopt a lawful approach to exceptional circumstances. Once a Green Belt has been established and approved, it requires more than general planning concepts to justify an alteration.”

Each and every proposed change to the green belt boundary requires that exceptional circumstances be demonstrated, otherwise the changes are not lawful. This has not been done by GBC, not for any proposed change.

From paragraph 130 of this judgement:

“In other words, something must have occurred subsequent to the definition of the Green Belt boundary that justifies a change. The fact that, after the definition of the Green Belt boundary, the local authority or an inspector may form a different view on where the boundary should lie, however cogent that view on planning grounds, that cannot of itself constitute an exceptional circumstance which necessitates and therefore justifies a change.”

“…..That, in his judgment, may now be so: but that falls very far short of the stringent test for exceptional circumstances that any revision of the Green Belt boundary must satisfy. There is nothing in this case that suggests that any of the assumptions upon which the Green Belt boundary was set has proved unfounded, nor has anything occurred since the Green Belt boundary was set that might justify the redefinition of the boundary.”

No changes that would warrant an alteration to green belt boundaries have been demonstrated by GBC, their so called “sensitivity analysis” was shallow and subjective, and no changes that may have occurred since the boundary was established were discussed. The changes proposed do not meet the standards set in this judgement. Instead, GBC maintain that it is housing need that creates blanket exceptional circumstances for changes proposed to the green belt. However, this is not the case. Following a meeting with local councillors and MPs in early 2014, Nick Boles wrote to Anne Milton MP to
clarify the issue of exceptional circumstances and in this letter said:

“The written Ministerial Statement of 1 July 2013 set out the Government’s concern that some recent planning decisions have not accorded the Green Belt the level of protection that was the explicit policy intent of Ministers. It made clear that the single issue of unmet need – whether for conventional housing or for travellers sites – is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development in the Green Belt.”

This was reaffirmed more recently in a letter from Brandon Lewis to all English MPs, dated 07/06/2016. In this letter, Brandon Lewis said

“The Government has put in place the strongest protection for the Green Belt. The Framework makes it clear than inappropriate development may be allowed only where very special circumstances exist, and that Green belt boundaries should be adjusted only where very special circumstances exist, through the Local Plan process and with the support of local people. We have been repeatedly clear that demand for housing alone will not change Green Belt boundaries.”

These quotations show that the insetting process has considerable hurdles to overcome, including as it does the revision to Green Belt boundaries that accompanies insetting. Thus the most important questions are – did the flawed Pegasus “Guildford Borough Green belt and Countryside Study” show unequivocally that villages to be inset are not open villages, making no or a minimal contribution to the openness of the Green Belt; and that there were exceptional circumstances (other than unmet housing need) that justify a change to the Green Belt, creating a new boundary around all these villages – more than 105 km of new boundary? The Pegasus study did not do this, and this was just one of its many flaws. Some of these flaws are discussed in detail in Annexe 2.

As shown above, development has occurred within villages, and the NPPF made it easier for additional development to take place within the green belt, via the provisions of paragraph 89, which specifically makes it easier for limited infill to occur and on a larger scale, for affordable housing to be built within villages washed over by the Green Belt. These provisions came into effect in 2012 when the NPPF was adopted and so the rate of increase in housing within villages is very likely to increase beyond that observed in the period between the 2001 and 2011 censuses.

It is clear from the most recent figures for planning applications to GBC in 2016 in Effingham that the pace of development within villages is changing, even with continued green belt protection. There is no requirement for insetting villages within the green belt, and a desire to increase development within the villages is not an adequate basis for changing green belt boundaries to permit insetting.

The final part of paragraph 4.5.47 is

“In accordance with national policy, the important character of these inset villages should instead be protected using other development management policies”.

This is not national policy, national planning policy is provided by the NPPF, and paragraph 86 of the NPPF is the relevant paragraph, which reads

“If it is necessary to prevent development in a village primarily because of the important contribution which the open character of the village makes to the openness of the Green Belt, the village should be included in the Green Belt. If, however, the character of the village needs to be protected for other reasons, other means should be used, such as conservation area or normal development management policies, and the village should be excluded from the Green Belt.”

There is thus no national policy that requires insetting. Instead, a judgement should be made for each village based on whether the village is open, and if it makes a contribution to the openness of the Green Belt. In fact, many of the villages proposed for insetting exhibit an open pattern of development, and make an important contribution to the openness of the green belt, for example, Effingham. This has not been considered, other than in the flawed Pegasus report, and the examination of their approach included in Annexe 2 reveals how this analysis was flawed. No further consideration has been given by GBC to insetting, and so GBC’s policy of wholesale insetting does not accord with a national policy, real or imagined, as claimed.

In itself, there are many issues with insetting, and these include:

- According to the draft Local Plan, insetting is based largely on the findings of the Pegasus study, “Guildford Borough Green Belt and Countryside Study. This report was very poor and various parts of the study criticised by many, including some borough councillors. It is perverse to continue with any recommendations of this study. In particular, a detailed review of this report for Effingham village showed that it was inaccurate and subjective. This review is attached as Annex 2.

- The settlement hierarchy was also subject to a detailed review and again this showed that scoring methods used were inaccurate and subjective.

- Proposed boundary changes are arbitrary, without an adequate detailed survey. There are no checks and balances to this, even though the positioning of the boundary line can change the price of an acre of land from about
£15,000 to over £1 million. There is no process to it, simply someone using a computer and a mouse – literally a mouse click can turn some land owners into millionaires. In some cases, the proposed boundary divides semi-detached houses, so that one is still inside the green belt and the other outside. In other cases, the boundary divides gardens, so that part of a garden is in, part out of the green belt. Due care and attention has not been given to producing proposed boundaries.

- In many cases, boundaries proposed do not comply with the requirements of the NPPF, which is given in the NPPF, paragraph 85, final bullet point, which states “define boundaries clearly, using physical features that are readily recognisable and likely to be permanent”. Given this NPPF definition, treelines, hedgerows, woodlands, etc should not be considered as potential Green Belt boundaries. In fact, in some cases proposed boundaries cross open fields, with no discernible features whatsoever. These are entirely inappropriate as a green belt boundary. The boundary proposed for Effingham village is reviewed in Annex 3.

It should also be noted that GBC implicitly recognise that insetting is likely to lead to more development within villages on sites that are not identified in the draft Local Plan. But there is no recognition of this in the housing target. As is noted, insetting would mean that the rate of windfall development would increase, but GBC have not provided a proper analysis of windfall development (such as that provided by Mole Valley District Council) and they have failed to recognise a higher rate of windfall development in showing how the housing target will be met – even though, via Policy D4, they are planning for it. Windfalls should be deducted from the housing target, and the need for additional sites would thus be substantially reduced. Windfall development should be properly assessed and identified within the housing target, with an appropriate increase in the rate of windfalls in any villages that are inset.

Although a flawed justification was provided for the insetting of villages, this does not apply to all the areas selected for insetting, many of which are not “villages”. Some of these are adjacent to an Area of Outstanding Natural beauty (AONB) and in at least one case some areas of AONB have been included in the inset area. These areas include:
- HM Prison, Ripley Road, Send
- Keogh Barracks
- Pirbright Barracks (small areas of AONB included in inset area)
- Pirbright Institute
- Henley Business Park
- Garlick Arch

No attempt has been made to justify the insetting of these sites. In the absence of any attempt at justification there is no reason to inset these areas.

I OBJECT to this policy.

Submission Summary

There are effectively two separate parts to this policy, both are flawed, and in the case of insetting, fatally flawed. In the case of urban development there are numerous flaws, including:

- The plan envisions a large expansion of the traditional “bricks and mortar” retail sector, but this is a sector in long term decline, and so is not sustainable even in the medium term.
- The plan envisions that 40% of homes built will be affordable, but these will not provide appropriate accommodation for low paid workers, for example, those on the minimum wage, who cannot afford to buy “affordable” homes, nor can they pay so-called “affordable” rent. There is a great need for an expansion in social housing, especially in urban areas, where there is a greater concentration of low paid workers such as those employed in the retail, warehousing and distribution sectors.
- The number of homes planned in the urban area is too low – there is a need for regeneration in some areas of Guildford, but this is ignored and instead the plan concentrates on building homes on greenfield sites, which does not meet the needs for housing within the town, especially within the centre. This is not a sustainable policy as building outside the town has a disproportionate effect on road traffic. The analysis in Annexe 1 shows this to be the case when alternative methods of travel to work are analysed for two separate areas, one in the town centre and the second in a rural village.

In the case of insetting, the policy is fatally flawed, for three separate reasons.

- Firstly, it is based on an erroneous assumption. GBC justify the policy (in para 4.5.47) by suggesting, without any supporting data, that development in villages washed over by the green belt has been at a lower rate than within Guildford town. This was not the case, and statistics from the ONS censuses of 2001 and 2011 show that this assumption is incorrect. These statistics show that the growth rate in housing was higher in Effingham, a village washed over by the green belt, than in Merrow, which is not washed over by the green belt. In fact, the rate of increase in housing stock in Effingham was faster than the average for the borough.
- Secondly, insetting has been based on the Green Belt and Countryside Study, but the analysis in this document was flawed to the extent that it is valueless. It has serious flaws in its methodology, includes subjective judgements, and thus its conclusions are flawed - see Annexe 2 for detailed analysis These flaws are so serious that this study should be removed from the evidence base that supports the Local Plan.
- Finally, although a flawed justification was provided for the insetting of villages, this does not apply to all the areas selected for insetting, many of which are not “villages”, such as Pirbright Barracks. These sites are listed in the text below. No attempt has been made to justify the insetting of these sites, and in the absence of any justification they should remain in the Green Belt.

Urban development

There is a fundamental flaw in the draft Local Plan, in that there are not enough dwellings planned in urban areas, in particular, Guildford town centre. This is where the demand for affordable homes is most acute, a fact which is recognised in much of the draft Local Plan. Yet the plan then envisions that most dwellings will be built outside the urban area, so there is no continuity in the plan – if the demand for affordable homes is most acute within the town, then is where these dwellings should be built. There are sites available, for example, various sites in Woodbridge Meadows, Walnut Tree Close (including the area around the station) and North Street. Yet the focus in these areas is to provide a very limited number of dwellings, with the emphasis on additional retail space and more commercial premises. Given the profound changes in traditional retail, this is not a sustainable policy. There have been many examples of bankruptcies amongst traditional retailers, the most recent examples being BHS and Austin Reed, and previously Woolworths, Comet, etc. The British Retail Consortium forecast that by 2025 up to one third of those now employed in traditional retail could lose their jobs, due to a combination of factors. These included the continuation of the move to shopping via the internet and higher costs, from business rates and the introduction of the “living” wage. Recent figures show that online sales are still growing quickly, with more than 13% of total retail sales now made over the internet. Nor does an expansion in traditional retail chime with the objective of attracting highly paid jobs to the area – the majority of jobs in retail are low paid, and zero hours contracts are common. So any expansion in traditional bricks and mortar retail would create a greater demand for affordable and social housing – exactly the reverse of what is needed.
Even the major grocery retail chains have been affected by changes in retail habits – Tesco, Sainsbury's, Morrisons, etc are closing some stores, with no major large stores planned. Banks and other financial institutions are still closing some branches, so changes in town centres still have some way to go – but none of these changes are recognised in the draft Local Plan, which envisages no limit to traditional retail.

There is another reason why the retail sector is unlikely to exhibit strong long term growth, and this is consumer debt, which has reached a level that the Bank of England has said could contribute to economic stability. This is likely to have a greater destabilising effect in the event of an economic downturn – and there will certainly be at least two of these during the life of the Local Plan. Consumer spending simply cannot be maintained indefinitely at its current rate, and to plan for a large increase is irresponsible.

Building the majority of homes outside urban areas is contrary to the advice of planners such as Lord Rogers, who has detailed the many advantages of increasing housing density in urban areas. The housing policy in this plan will result in a greater number of commuter journeys, creating more congestion, with an increase in air pollution across the borough. This is examined in detail in Annexe 1.

So there has to be a reappraisal of urban development plans, with more homes provided in urban areas, in particular in the centre of Guildford. As the council own many sites in the centre, these could be made available for development within the first 5 years of the plan, with mixed housing on these sites, including new social housing, which is sorely needed. Affordable housing is simply not affordable to anyone on the minimum wage, there is a need for a considerable expansion of social housing, a need that is not adequately recognised in the draft Local Plan.

In the detail of Policy D4, it is suggested that in urban areas and inset villages, planning permission will be granted provided that a proposed development:

- “Ensures that the layout, scale, form, massing, height of buildings and structures, and materials relate to the site context and its surroundings;”.....

There are several other criteria listed and the Policy then goes on to elaborate criteria specific to inset villages, as follows: “In addition to the above, proposals for new development within inset village areas will have particular regard to:

- The distinctive settlement pattern of the village and the important relationship between the built development and the surrounding landscape;
- Important views of the village from the surrounding landscape;
- Views within the village of local landmarks.”

There are numerous development sites proposed that mean that the first criterion cannot be met, as the developments proposed do not relate to the scale, form or massing of the site surroundings. For example, the Horsleys. Here it is proposed that a total of 3.6 km² should be removed from the green belt, with a total of 533 houses proposed on sites in East and West Horsley on a total of 29.1 ha, an average density of 18 dwellings/ha. These proposed developments are not in scale or proportion to the existing villages, and the housing density is considerably higher than existing housing density. Effectively, if these developments were to proceed, East and West Horsley would merge and become a large urban area in the green belt, totally different in character to the existing villages, with the existing settlement pattern completely lost. Similar considerations apply to other proposed development sites, such as Flexford and Normandy. In this case, 1.3 km² would be removed from the green belt with a total of 1,100 dwellings proposed on 67 ha, an average density of 16.4 dwellings/ha. Again, the scale and form of new development would overwhelm existing hamlets and villages, merging these to form another urban area in the heart of the green belt, with no consideration of the views of the settlements from the surrounding countryside, much of which has been given AONB status.

Thus the words of the policy statement D4 do not match the proposals contained in the draft local plan.

The “Reasoned Justification” for the policy consists of five paragraphs, 4.5.45 to 4.5.49. Of these, 4.5.45 and 4.5.46, 4.5.48 and 4.5.49 are not justifications for the policy, they are simply statements or further information. Paragraph 4.5.47 is the only attempted justification for this policy, but in fact this applies only to insetting. Paragraph 4.5.47 is factually wrong and so the justification for this policy does not bear close examination. Parts of this paragraph are taken in turn below, to show the inaccuracies this paragraph contains.
“Historically, development has been focused in the urban areas of Guildford, and Ash and Tongham only. Development in the villages has been very limited due to the Green Belt designation which previously washed over all but one of the villages.”

This depends on how development is measured. In terms of raw numbers, this may be true, but this would ignore the fact that urban area of Guildford town contains much of the housing in the borough. Taking the increase in housing stock between the censuses of 2001 and 2011 in specific wards reveals a much more complex picture. Effingham, for example, had a higher rate of adding dwellings than the average for the borough and some of Guildford’s urban wards. Using census data collected by the ONS, between 2001 and 2011, the number of dwellings in Effingham increased by 6.6%, whereas for the borough as a whole it increased by 5.0%. Over the same period in Merrow, a ward within the urban area of Guildford, the number of dwellings increased by only 1.2%, whilst in Normandy ward the increase was 2.6%. This analysis has not been exhaustive, but it is sufficient to show that the opening statement in paragraph 4.5.47 is incorrect, and that in some cases, proportionally, considerable development has occurred in green belt villages. It should be incumbent on GBC to assess the facts before making inaccurate statements such as this. ONS statistics are open to all.

In the first three months of 2016, planning applications for 12 additional dwellings in Effingham have been made, in a village of approximately 525 dwellings. Although one of these applications has been reduced from 6 to 4 dwellings, another 5 have been approved which shows clearly that development within villages washed over by the green belt can occur, and that organic growth is possible. There is no necessity for insetting.

“Fifteen villages are now inset from the Green Belt meaning that development is no longer, by definition, considered inappropriate”.

Guildford’s Green Belt boundaries were established in the Guildford Borough Local Plan 1987, so are well established. There has not been any justification for the extensive green belt review that accompanies the insetting of villages, or for the removal of these villages from the green belt. According to the NPPF, paragraph 83, green belt boundary changes should be made only in exceptional circumstances, as follows

“Local planning authorities with Green Belts in their area should establish Green Belt boundaries in their Local Plans which set the framework for Green Belt and settlement policy. Once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. At that time, authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period.”

No exceptional circumstances have been demonstrated, with none given as justification in Policy D4 for the policy of insetting. Proposed green belt boundary changes are on a very large scale, as it is proposed to remove 14.4 km2 from the Green Belt, more than 6% of the existing area designated as green belt, and to create new green belt boundaries extending to more than 105 km. This is not a simple revision to the Green Belt, and a demonstration of exceptional circumstances is required for each and every change. This has not been done, not for a single proposed change.

Although Guildford Borough Council are in the process of producing a new Local Plan, this in itself is not enough to change Green Belt boundaries; the requirement to demonstrate exceptional circumstances still applies. According to a High Court judgement, Gallagher vs Solihull, issued March 30th, 2014, Case No. CO/17668/2013, there is still a requirement to prove exceptional circumstances – quotations below are from paragraph 125 of this judgement:

“However, it is not arguable that the mere process of preparing a new local plan could itself be regarded as an exceptional circumstance justifying an alteration to a Green Belt boundary. National guidance has always dealt with revisions of the Green Belt in the context of reviews of local plans…… and has always required “exceptional circumstances” to justify a revision. The NPPF makes no change to this.”

“Exceptional circumstances are required for any revision of the boundary, whether the proposal is to extend or diminish the Green Belt.”

Whilst each case is fact-sensitive and the question of whether circumstances are exceptional for these purposes requires an exercise of planning judgment, what is capable of amounting to exceptional circumstances is a matter of law, and a planner may err in law if he fails to adopt a lawful approach to exceptional circumstances. Once a Green Belt has been established and approved, it requires more than general planning concepts to justify an alteration.”
Each and every proposed change to the green belt boundary requires that exceptional circumstances be demonstrated, otherwise the changes are not lawful. This has not been done by GBC, not for any proposed change.

From paragraph 130 of this judgement

“In other words, something must have occurred subsequent to the definition of the Green Belt boundary that justifies a change. The fact that, after the definition of the Green Belt boundary, the local authority or an inspector may form a different view on where the boundary should lie, however cogent that view on planning grounds, that cannot of itself constitute an exceptional circumstance which necessitates and therefore justifies a change.”

“…..That, in his judgment, may now be so: but that falls very far short of the stringent test for exceptional circumstances that any revision of the Green Belt boundary must satisfy. There is nothing in this case that suggests that any of the assumptions upon which the Green Belt boundary was set has proved unfounded, nor has anything occurred since the Green Belt boundary was set that might justify the redefinition of the boundary.”

No changes that would warrant an alteration to green belt boundaries have been demonstrated by GBC, their so called “sensitivity analysis” was shallow and subjective, and no changes that may have occurred since the boundary was established were discussed. The changes proposed do not meet the standards set in this judgement. Instead, GBC maintain that it is housing need that creates blanket exceptional circumstances for changes proposed to the green belt. However, this is not the case. Following a meeting with local councillors and MPs in early 2014, Nick Boles wrote to Anne Milton MP to clarify the issue of exceptional circumstances and in this letter said:

“The written Ministerial Statement of 1 July 2013 set out the Government’s concern that some recent planning decisions have not accorded the Green Belt the level of protection that was the explicit policy intent of Ministers. It made clear that the single issue of unmet need – whether for conventional housing or for travellers sites – is unlikely to outweigh the harm to the Green Belt and other harm to constitute the “very special circumstances” justifying inappropriate development in the Green Belt.”

This was reaffirmed more recently in a letter from Brandon Lewis to all English MPs, dated 07/06/2016. In this letter, Brandon Lewis said

“The Government has put in place the strongest protection for the Green Belt. The Framework makes it clear than inappropriate development may be allowed only where very special circumstances exist, and that Green belt boundaries should be adjusted only where very special circumstances exist, through the Local Plan process and with the support of local people. We have been repeatedly clear that demand for housing alone will not change Green Belt boundaries.”

These quotations show that the insetting process has considerable hurdles to overcome, including as it does the revision to Green Belt boundaries that accompanies insetting. Thus the most important questions are – did the flawed Pegasus “Guildford Borough Green belt and Countryside Study” show unequivocally that villages to be inset are not open villages, making no or a minimal contribution to the openness of the Green Belt; and that there were exceptional circumstances (other than unmet housing need) that justify a change to the Green Belt, creating a new boundary around all these villages – more than 105 km of new boundary? The Pegasus study did not do this, and this was just one of its many flaws. Some of these flaws are discussed in detail in Annexe 2.

As shown above, development has occurred within villages, and the NPPF made it easier for additional development to take place within the green belt, via the provisions of paragraph 89, which specifically makes it easier for limited infill to occur and on a larger scale, for affordable housing to be built within villages washed over by the Green Belt. These provisions came into effect in 2012 when the NPPF was adopted and so the rate of increase in housing within villages is very likely to increase beyond that observed in the period between the 2001 and 2011 censuses.

It is clear from the most recent figures for planning applications to GBC in 2016 in Effingham that the pace of development within villages is changing, even with continued green belt protection. There is no requirement for insetting villages within the green belt, and a desire to increase development within the villages is not an adequate basis for changing green belt boundaries to permit insetting.

The final part of paragraph 4.5.47 is

“In accordance with national policy, the important character of these inset villages should instead be protected using other development management policies”.
This is not national policy, national planning policy is provided by the NPPF, and paragraph 86 of the NPPF is the relevant paragraph, which reads

“If it is necessary to prevent development in a village primarily because of the important contribution which the open character of the village makes to the openness of the Green Belt, the village should be included in the Green Belt. If, however, the character of the village needs to be protected for other reasons, other means should be used, such as conservation area or normal development management policies, and the village should be excluded from the Green Belt.”

There is thus no national policy that requires insetting. Instead, a judgement should be made for each village based on whether the village is open, and if it makes a contribution to the openness of the Green Belt. In fact, many of the villages proposed for insetting exhibit an open pattern of development, and make an important contribution to the openness of the green belt, for example, Effingham. This has not been considered, other than in the flawed Pegasus report, and the examination of their approach included in Annex 2 reveals how this analysis was flawed. No further consideration has been given by GBC to insetting, and so GBC’s policy of wholesale insetting does not accord with a national policy, real or imagined, as claimed.

In itself, there are many issues with insetting, and these include:

- According to the draft Local Plan, insetting is based largely on the findings of the Pegasus study, “ Guildford Borough Green Belt and Countryside Study. This report was very poor and various parts of the study criticised by many, including some borough councillors. It is perverse to continue with any recommendations of this study. In particular, a detailed review of this report for Effingham village showed that it was inaccurate and subjective. This review is attached as Annex 2.
- The settlement hierarchy was also subject to a detailed review and again this showed that scoring methods used were inaccurate and subjective.
- Proposed boundary changes are arbitrary, without an adequate detailed survey. There are no checks and balances to this, even though the positioning of the boundary line can change the price of an acre of land from about £15,000 to over £1 million. There is no process to it, simply someone using a computer and a mouse – literally a mouse click can turn some land owners into millionaires. In some cases, the proposed boundary divides semi-detached houses, so that one is still inside the green belt and the other outside. In other cases, the boundary divides gardens, so that part of a garden is in, part out of the green belt. Due care and attention has not been given to producing proposed boundaries.
- In many cases, boundaries proposed do not comply with the requirements of the NPPF, which is given in the NPPF, paragraph 85, final bullet point, which states “define boundaries clearly, using physical features that are readily recognisable and likely to be permanent”. Given this NPPF definition, treelines, hedgerows, woodlands, etc should not be considered as potential Green Belt boundaries. In fact, in some cases proposed boundaries cross open fields, with no discernible features whatsoever. These are entirely inappropriate as a green belt boundary. The boundary proposed for Effingham village is reviewed in Annex 3.

It should also be noted that GBC implicitly recognise that insetting is likely to lead to more development within villages on sites that are not identified in the draft Local Plan. But there is no recognition of this in the housing target. As is noted, insetting would mean that the rate of windfall development would increase, but GBC have not provided a proper analysis of windfall development (such as that provided by Mole Valley District Council) and they have failed to recognise a higher rate of windfall development in showing how the housing target will be met – even though, via Policy D4, they are planning for it. Windfalls should be deducted from the housing target, and the need for additional sites would thus be substantially reduced. Windfall development should be properly assessed and identified within the housing target, with an appropriate increase in the rate of windfalls in any villages that are inset.

Although a flawed justification was provided for the insetting of villages, this does not apply to all the areas selected for insetting, many of which are not “villages”. Some of these are adjacent to an Area of Outstanding Natural beauty (AONB) and in at least one case some areas of AONB have been included in the inset area. These areas include:

- HM Prision, Ripley Road, Send
- Keogh Barracks
- Pirbright Barracks (small areas of AONB included in inset area)
No attempt has been made to justify the insetting of these sites. In the absence of any attempt at justification there is no reason to inset these areas.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

---

I object to this policy.

The Employment Land assessment was poor. It did not recognise the huge change that building on this scale would cause to the employment market. Building 693 new houses a year would mean that there would be about 1200 people on average, each year, entering the employment market. Guildford's economy has never grown at the rate that it would need to grow at to absorb these numbers of employees - for a period of 15 years, which is likely to include two downturns/recessions. What will happen is that more residents will commute out of the area to jobs outside the borough, creating more congestion on roads and overcrowding on trains.

AECOM, who produced this study presented an exaggerated view of the health of the local economy, through the selective use of statistics. A more careful review shows that whilst the local economy is strong, it is not as strong as the AECOM report suggests.

When it came to land use, the assumption by AECOM was very unambitious. In section 6.11.2 of their report, land use was considered, and the need for new land was justified. This was done by using an average derived from national averages. AECOM used this average to forecast the demand for employment land - but it was not appropriate to use an average, There was (and is) a need to be much more ambitious in the efficiency of land use in the borough as the borough has a high proportion of green belt land, and relative to other areas of the country, land is costly, so there was a need to be more ambitious in land use efficiency. It would have been appropriate to set a target above the national average, in fact a target at the highest level of land use efficiency, to be better than the best. This was not done, so consequently it was concluded that additional employment land was needed. Had a higher land use efficiency ratio been adopted, this additional employment land would not be needed. A high land efficiency, to be better than the best, could be achieved by ensuring that all future developments had to have associated car parking underground, underneath the buildings. This was not even suggested, so an opportunity to be ambitious was wasted.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to this policy.

There is no need for additional employment land. The need arose only because AECOM adopted an unambitious target for land use efficiency - the target to have a land use efficiency no better than national averages. The borough should be more ambitious in its land use efficiency than this, given that 89% of the borough is green belt and that land costs are high.

I object to this policy.

How can GBC prevent the vacancy rate from increasing? There is a marked shift away from traditional retail, and it has been predicted by the BRC that up to one third of people employed in traditional retail will lose their jobs by 2015. Given this background, how can GBC possibly stop the vacancy rate from rising?

This is a King Canute policy.

I object to this policy.

Given the high housing target this is accurately described as "homes for all" - homes for anyone from anywhere, so long as they can afford it. It is not a housing plan for local people, so it is not legally compliant. How could it be homes for all local residents when there is no mention of social housing and or this will be expanded to meet the needs of local people? There is a total reliance on the private sector, for both market housing and for rental. GBC have no control over the private sector, it can and will do what is right for themselves, not for others, not for the borough. This reliance on the private sector is extraordinarily short sighted. Private sector "affordable" housing for rent is much more costly than social housing. How will low paid workers afford "affordable" housing? So this is not a "homes for all" policy, it is a recipe for a huge increase in the cost of housing benefits for the nation. Then when this is too costly the government will change the rules and scale back benefits - so what will happen to private sector rentals then? There is a need for more social housing.

Using land efficiently is not just about housing density. Surface car parks are unsightly as well as being a very inefficient use of one of our most scarce resources - land. Large existing surface car parks, including those at the university, should be replaced by multi level car parks that include several underground levels, so as to limit the bulk of the car park above ground. Areas freed up could be used for housing, and in the case of the university, much needed on campus student accommodation.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
so that they remain profitable for builders. But when house prices and rents are high, so-called affordable homes are not affordable to those with low paid jobs or on benefits. “Affordable” homes are not the same as social housing, or old style council housing, and are not a replacement for any social housing that is sold off. Across the borough, according to the most recent data from the ONS, in Feb 2016, there were 5,696 housing benefit claimants. These “affordable” homes will be of no use to these people, or others on benefits, or on low wages. There is nothing in this policy for these people, many of whom need social housing, which historically has been truly affordable.

The Policy Statement (blue text in the Strategy and Sites document) refers to working “to increase the number of affordable homes in the borough and meeting identified needs.” But there is nothing in this plan that will meet the needs of those on benefits, or on low wages.

The Policy goes on to say that on sites “providing five or more homes, or sites of 0.17 ha regardless of the number of homes, at least 40% of the homes must be affordable homes.” A site of 0.17 ha is only 0.4 acre, and many single homes are built on plots of this size. This is a very low threshold. No exemptions are given – for example, what about self-build housing, or shared ownership, etc? This policy does nothing to encourage various paths to property ownership, other than the affordable housing route – which for many people is simply not an option. It is poorly thought out and is based on data which is not accurate, including the West Surrey SHMA, which in any case should be revised because of the poor understanding of the borough’s population statistics that underpin the study and the Brexit vote.

In the wording of the text supporting this Policy there are many errors of fact, errors through omission and exaggerations in the introductory text to this policy. As an affordable homes policy should be a cornerstone of the Local Plan, some of these are reviewed in depth below.

**Paragraph 4.2.30**

The final sentence of this paragraph reads: “High demand and limited supply have resulted in one of the least affordable areas of the country to live in.”

This is a profound statement, but one that was made without any supporting analysis, so it appears to be based on supposition, not on fact. Relevant analysis would consist of looking at demand for housing through, for example, population growth; then at the supply of new homes and the balance between these – and then compare this with property price increases. Then a similar analysis should examine other areas too, to assess if Guildford Borough is different from other local authorities within the south east. Obviously, this type of detailed analysis is not possible in a submission on the draft Local Plan, but the fact that this statement was made in paragraph 4.2.30 without any supporting information is a major concern, as this unsupported statement in itself could be considered to be the driver for housing policies within this draft Local Plan.

There is no question that property prices are high within the borough, but this is largely a consequence of being close to London, with a reasonably fast train connection. A Local Plan is supposed to focus on local needs, not the needs of those who wish to move out from London. All of Surrey and the home counties have high prices and recent statistics show that the rate of price increases in the East has been higher than in the South East. High prices are not a phenomenon unique to Guildford. This is shown in Figure 1, which shows that price increases in Guildford are mirrored in Woking and Dorking, which are in neighbouring boroughs. In fact, this shows that over the last two years price increases in Dorking have been higher than in Guildford. This figure was generated on the Zoopla website.

[see attachments]

It is also incorrect to suggest that high prices are a consequence of an imbalance between supply and demand – there are many factors that have an impact on property prices; the supply and demand balance is only one of these. Although it is not appropriate to have a detailed critique of why housing costs are high, as one of the declared goals of the Local Plan is to increase affordability it is appropriate to comment on other factors that affect house prices, and this has been done in Annex 1. This also provides a borough wide analysis of the supply of housing between 2001 and 2011 and the demand for new housing, using census data.

This shows that the population of the borough increased by 7,482 persons, of whom 3,723 were full time students aged 18 and over. A few of these may have been Guildford residents but the vast majority would be new to the area. Some students find accommodation in student halls, and as this accommodation expanded during this time period, it has been assumed about 40% of the increase in student population would find accommodation in student halls, leaving 2,234 that would need accommodation in the town. With 4 students per house, this need would be equivalent to 559 houses.
Census data for 2011 revealed that the average household in the borough was 2.42 persons, so the increase in demand for housing caused by the increase in population (excluding students), assuming 2.42 persons/household, was 1,553 new houses.

Thus the total number of new dwellings required by Guildford’s population increase between 2001 and 2011 was 2,112 (559 plus 1,553). In fact, the census reveals that the number of new dwellings was 2,692 – so supply actually exceeded demand by a considerable margin, about 28%. Yet over this period Land Registry data shows the average house price in Guildford borough almost doubled. As supply exceeded demand, other factors beyond the supply and demand balance affected house prices. This means that the underlying premise behind the Local Plan is incorrect; house prices have not increased because of a supply/demand imbalance. At the very least this means that the 31 houses added to the housing target to promote affordability should not be included, but in fact the whole of the SHMA and Local Plan should be revised, to include a more accurate picture of the housing market, especially to examine the implications of Brexit.

However, there has been no detailed analysis by GBC of housing needs, this was contracted out to a consultant, and the housing model used by that consultant has not been subject to any scrutiny. The SHMA did not examine fundamental reasons for house price increases, nor did it properly examine the historic supply and demand balance across the area. Consequently, the SHMA is not fit for purpose, as no understanding of the fundamental workings of the housing market was shown in this study. Had a proper analysis been carried out it would have shown that in 2015/6 across the borough there were 2,510 housing transactions, and analysed the price bands of sales. Of these, 713 housing transactions were below £300,000, which is approximately what a couple on average earnings in the borough could borrow. A more detailed breakdown is given in Annexe 1.

**Paragraph 4.2.31**

In paragraph 4.2.31, the text of the opening sentence reads “The West Surrey Strategic Market Assessment 2015 indicates that approximately half of the Guildford households over the plan period will not be able to afford to buy or rent a home that meets their needs on the open market without subsidy.”

This sentence is plainly nonsense. The census data of 2011 showed that 66.6% of Guildford households either already owned or were in the process of buying their home. If the sentence refers to new households being formed in Guildford during the plan period, it should say so. If that were the case, it would not be surprising – the statistics on which the housing projections were based included a large increase in the number of full time students, a fact which was ultimately overlooked by GBC consultants, despite this being noted in several places in the SHMA. As shown in Annexe 1, census data shows 50% of the increase in population from 2001 to 2011 were students – and very few of these would be seeking to buy in Guildford, but are unlikely to take up a place at the university unless they had adequate funding, including the means to pay their rent.

**Paragraph 4.2.32**

Paragraph 4.2.32 discusses affordability in more depth and provides the ratio used by GBC to assess affordability. There are many definitions of affordability in use by different organisations and frequently this is a ratio between pay and house prices. GBC have decided to use a ratio which is of very limited value – the ratio of the lowest 25% of earnings to the lowest 25% of house prices. The higher this ratio, the less affordable the housing. This is a remarkable ratio as at the peak of home ownership in the UK, home ownership was just over 70% of total households. This is not because the remaining 30% did not want to own a house, although some did, but because in many cases home ownership was not a suitable option. This would apply to students, to migrant workers who wish only to work in the UK for a short time; people who do not want the responsibilities that comes with home ownership; people with temporary employment contracts, armed forces personnel, etc, etc. But GBC have chosen to consider affordability using the lowest paid – a group that have never been able to afford home ownership, or who may have no desire for home ownership. It is a bizarre ratio to use and is completely inappropriate to assess affordability in the borough.

It is more normal to consider the ratio between average pay and average property prices, though this is not an especially good ratio either, as average pay gives a certain weight to the lowest paid, who have never been able to afford home ownership. Average house prices are not a good measure either, as the sales of a few high cost properties will tend to push up average prices and distort the affordability ratio. It is much better to use the median property price in an affordability ratio. Another more relevant ratio is to use the average pay of first time buyers and the median price of properties purchased.
The text in the paragraph goes on to use government figures from 2013, quoting GBCs affordability ratio (bottom 25% of wages to bottom 25% of house prices) of 10.92 which was said to be “higher than Surrey’s ratio of 10.89”.

The difference between these two ratios was 0.03, or in percentage terms, 0.28%. In others words, given that affordability ratios are estimates, there is no significant difference between these numbers. So it was nonsense to infer that property in the borough was less affordable in 2013 than in the rest of Surrey.

The text also states that the most recent data for this affordability ratio is from 2013, but in fact up to date information is provided by way of an interactive map2 which shows that Guildford Borough has a better affordability ratio than all but one of its neighbouring boroughs. In other words, housing is more affordable in Guildford than in most neighbouring boroughs. Data provided by the ONS was from Q3 2014 to Q3 2015, as full details for 2015 were not available. This map (and a supporting spreadsheet) provides 2 ratios, for median earnings to median house prices and GBC’s preferred measure, lower quartile earnings to lower quartile house prices. These are given in Figure 1, and on GBC’s preferred lower quartile measure, Guildford is the most affordable of 6 of the 7 authorities listed, with only Rushmoor more affordable. On the more appropriate ratio of median pay to median property prices Guildford and Surrey Heath were essentially the same, with only Rushmoor again more affordable.

This data shows clearly that GBC were incorrect to say that up to date affordability data was not available and more importantly, that of the local authorities that share a boundary with Guildford Borough, housing in Guildford Borough is actually more affordable than in almost all neighbouring local authorities.
Another indication of Guildford’s relative affordability was provided by an article in the Daily Telegraph. This was about a couple who had been resident in London, but had moved to Guildford so that they could save for a deposit, but who were considering a move back to London. A comparison was made of the costs of living in Guildford or London, including travel costs to work in London, which showed that annual costs in Guildford were lower by an estimated £3,052; about 16% cheaper living in Guildford than in London. This is why people are moving from London to Guildford – and is why if houses were built as per the Local Plan target, they would mostly be bought or rented by Londoners, not by residents of the borough.

Paragraph 4.2.23

This paragraph refers to sufficient housing to meet the needs of the borough’s population – but the proposed minimum of 693 dwellings a year is well in excess of the needs of the borough’s residents. The data used in the SHMA ignored the effect of full time students and so the housing number is very considerably in excess of the needs of the resident population. If this housing is delivered it will cause an increase in Guildford’s population that is considerably more than recent population growth – almost 5 times the rate of population growth during the period between the censuses of 2001 and 2011. The final part of the paragraph is nonsense “…..ensuring people with a wide variety of occupations in the borough and potentially reducing travel to work journeys.”

3 Daily Telegraph “Helping young renters get on the ladder” June 14, 2016

Housing proposed in the Local Plan is mostly in the countryside, with about 70% of the housing proposed on land that is currently in the Green Belt. These locations are some considerable distance from employment centres, many of which are located in central Guildford – so journeys to work will increase, not reduce, and congestion will get much worse. This issue is considered in detail in Annexe 2, which shows clearly that building new homes in the countryside will result in many more traffic movements than building homes within the urban areas of Guildford town.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Annexe 1

Housing Supply and Demand Balance Analysis in Guildford Borough: 2001 to 2011
As census data is considered by the Office for National Statistics (ONS) to be their “gold standard” this analysis uses only census data. Although data for subsequent years is available, this is based on many estimates and so analysis is more subjective. Across the borough, during the 10 year period between the two most recent censuses, the number of dwellings in the borough increased by 2,692, an average of 269 dwellings per year. During the same period, the population of the borough increased by 7,482 persons, but a high percentage of these were full time students, aged 18 and over. Some of these students may have been local, but as this was probably a small number, it was ignored. This data is summarised in Table 2, below.

Table 2 Census Data for Guildford Borough
Some of the increase in students would have found accommodation in students halls of residence (for example, the development in Manor Park opened in 2005) it is assumed that about 40% of the increase in student numbers were in student halls of residence, leaving 2,234 to find accommodation elsewhere. The majority of these would have found rooms in privately rented houses, categorised as “Homes of Multiple Occupation”. Assuming 4 students per house, the increase in student numbers would have needed 559 extra houses. The remainder of the population increase, the “permanent” resident population of Guildford, increased by 3,759 people. As the average number of people per household was 2.42 in 2011, a further 1,553 dwellings were needed for this increase in population. So to house the overall increase in population, including students, about 2,112 additional houses were needed – but 2,692 were built. Thus the number of houses needed in Guildford to house the population increase was actually substantially lower than the supply available; so the balance between supply and demand was not responsible for the increase in house prices over this period, when average property transaction prices across the borough almost doubled.

During the financial years 2001 to 2011, average property transaction prices across the borough are shown in Table 3. This includes average and median property prices for transactions in the years shown. In any given year there may be several high priced transactions which distort an average, and so the median price is also given – the median is the mid-range price, so that 50% of transactions were below this price with 50% above. It is a better indicator of the movement of prices than averages. Also shown is the number of transactions for each year.

Table 3 Land Registry Property Prices in Guildford Borough
The data in Table 3 shows that prices increased very rapidly from 2001/2 to 2007/8, and that the number of transactions was quite constant, at about 3,050±200. This represented a turnover of about 5.6% of all of the dwellings in the borough (53,388 in the 2001 census). Then in 2008/9, prices fell, and stayed low for two years. If the balance between supply and demand were the only factor influencing house prices this would suggest a huge increase in supply – but this did not occur. It can be seen from this that the balance between supply and demand must have had a minor impact on house prices. In fact, determining factors were the availability and cost of credit, and the demand for housing outside London. Credit was freely available and credit costs (in real terms) were low, consequently house prices increased rapidly from 2001/2 to 2007/8.

Data from Table 3 is shown in graphical form in Figure 2, and the impact of the recession of 2008/9 is clear. It interrupted the increase in property prices – but the reduction in interest rates that accompanied this recession, which provided very low credit costs, resulted in property prices increasing again in 2010/11. Credit costs continue to be very low and when combined with the huge expansion in credit from quantitative easing, the price of fixed assets, including housing, increased sharply. Again, this had little, if anything, to do with the supply and demand balance for housing.

This picture of supply of housing exceeding demand across the borough is similar to the national picture. According to an article in the Guardian newspaper, across the nation between the years of 1997 and 2007, “the housing stock grew by 10%, but the population only grew by 5%. If house prices were a function of supply and demand, they should have fallen slightly over this period. They didn’t. They rose by more than 300%.” So the issue of high prices is a national issue, not confined to Guildford Borough, and is not solely because of the supply and demand balance. Building more houses to increase affordability within the borough will not have the desired effect. This conclusion (based on data) is at variance with the Local Plan, and shows clearly that the evidence base underpinning the Local Plan is suspect, and that the analysis in much of this data base, especially the West Surrey SHMA, is inadequate.

The cursory analysis above also indicates the severe impact of having an additional 693 dwellings coming onto the housing market. At the beginning of the recession, in 2008/9, there were only 1,481 property transactions across the borough. Adding 693 dwellings to this would create many problems for any existing householders who wished to sell. As new build housing would be attractive to anyone moving from London, and is more expensive than equivalent “used” housing, the average price for housing would probably not fall – but householders would be forced to reduce their selling price in order to sell. Given that the number of domestic property transactions in 2015/16 was 2,510, adding 693 houses to this mix would mean that redevelopment projects would not proceed. Existing run down areas of Guildford would become more run down – there would be no incentive to revitalise them under this proposed plan. Green field sites outside Guildford would provide the bulk of new dwellings – so large areas of Guildford would simply be left to decay. This is contrary to policies within the NPPF, specifically those policies that protect the Green Belt.

Figure 2 also shows that the median price is increasing more slowly than the average price, a clear illustration that the average price is not a good indicator of the housing market, due to the impact of a limited number of high value

A true picture of the housing market has not been presented in this Local Plan. A more accurate picture (for 2015/16) is given in Table 4, which shows, for example, that there were 183 housing transactions at a price equal to or lower than £200,000 during 2015/16.

According to other ONS statistics, average earnings for Guildford residents in 2015 was £33,557 per year. A couple, with both on average earnings, using a multiple of 4.5 times earnings, could take out a mortgage for just over £300,000.

According to the 2015/16 Land Registry data they would have had a choice during 2015/16 of at least 713 properties. This suggests that the affordability issue in Guildford has been exaggerated in order to promote a pro-development agenda.

Factors that Affect House Prices and Affordability

Across the UK, much of the planned increase in house building is related to the issues of high house prices and affordability – building more houses to increase the supply has been the approach adopted by the government, even though this policy is high risk, for example, consider the collapse of the housing markets in Spain, Ireland, etc in 2008/9 as a consequence of their massive house building programmes. There has been no risk analysis associated with the policy, either nationally or locally in the borough. House building appears to have been put in place as a strategy to drive economic growth, so that a great deal of effort (and government subsidy) has been devoted to this policy, to the detriment of other important policies, such as regional and industrial.

Affordability is not just a question of increasing housing supply, it is much more complex and a proper analysis should examine associated questions such as: why have real wages in the UK increased so slowly? Slow growth in wages means that house prices have outstripped the growth in real wages, and so affordability ratios have fallen. A sound, sustainable economy will not be built by housebuilding alone and to pursue this path is to embark on a policy that could well end in ignominious failure, with a housing bust similar in scale to that experienced in Spain and Ireland. But what other factors are important in determining house prices and affordability?

When considering this issue of affordability, and the approach of building more dwellings, there is an implicit assumption that the only determinant of house prices is the balance between supply and demand. But this is a nonsensical assumption. In 2008, when house prices in many regions of the UK (and across the world) started to crash, this was not because of a sudden massive increase in supply. Many other factors were clearly at work. Other factors that are important in determining house prices include:

- The cost of credit – the interest rate: effectively this is set by government policy via the Treasury and then by the Bank of England. This has been extremely low for 5 years, and is set to remain low for the foreseeable future.
Even before the reduction in the Bank of England rate to 0.5%, the real cost of credit had been low for many years – largely because the governments preferred measure of inflation, the CPI, does not include a measure of housing costs. The current very low cost of credit means that mortgage payments as a percentage of take home pay are lower for first time buyers than during previous property booms of 2005-7 and 1989-90. House prices are set by what people can afford to pay, and so property prices have climbed.

- The availability of credit. At the very least this is regulated by government, but in practice it is effectively set by government policy, for example, quantitative easing has resulted in huge credit expansion leading to asset price inflation, including house price inflation. Current high house prices are a direct consequence of the economic policies of successive governments, spanning a period of at least 20 years.
- Various schemes to assist buyers such as “Help to Buy” have enabled house builders to increase or maintain prices, so that much of the subsidies government pays ends up as builders profits. This is because, for example, equity loans are available only on new build properties.
- Housing subsidies paid by the government. In 2015, about £24 billion was paid out as housing benefit, of which about £8.8 billion was paid to private landlords. Consequently, housing benefit has largely driven the buy to let boom. With a secure rental income, buy to let landlords can bid up the price of houses, beyond the reach of other buyers.
- The growth of “buy to leave”, which is driven largely by money from overseas, some of which comes from the black economy and illegal activities in overseas countries. Overseas buyers effectively use a house in the UK (predominantly London and its environs) as a safe deposit box in the sky. This has led to a significant number of properties in London being sold to overseas buyers, who have no intention of living there – but their investment is safe and likely to appreciate in value. In the years 2014 and 2015, Asian buyers alone paid $24 billion for UK property, of which $20 billion was in London. This forces London residents to move out to the suburbs and beyond, pushing up prices across the whole of the south east. Brexit and associated financial instability is likely to have an impact on this, and it may create a downturn in the London housing market.
- Taxes – not just stamp duty but other taxes contribute to the high final cost of a house. Taxes and levies on the excavation of raw materials from quarrying coupled with high landfill taxes increase the final cost of every house built, so that stamp duty is just another layer of tax – the icing on the taxation cake for government. What extraction taxes and energy policies have done is force the closure of British brick plants, cement makers, etc, etc. Now that there is a construction boom, building materials are being imported from all over Europe – bricks from Germany and further afield, roof tiles from Belgium, cement from France, etc. This leads to large increases in prices when there is an increase in construction – over the 5 years to 2016 brick prices increased by 25%, cement by 17%. The living wage will increase the pay of unskilled workers, such as labourers. Even in the recent past, a construction boom was a major stimulus for the British economy, but this is no longer the case because so much building material (and workers) are now imported. In 2015, the value of total imports of building materials from EU countries was £4.9 billion. In addition, the Landfill Tax ensures that land is not used efficiently – it is cheaper to build large surface area car parks than to excavate and build car parks underground so that even when multi-level car parks are built, they generally have no basement – because of the high cost of excavation due to high landfill taxes. Guildford town is a classic example of inefficient land use, with large surface car parks at the university; park and ride car parks, at the railway station, and at employers throughout the town. This is a grossly inefficient use of land, but this inefficient land use is a consequence of government policy.
- Profit margins of developers, which are currently somewhere between 20 to 30% on the cost of a house, even after high, exorbitant salaries are extracted from the companies for company executives. As an example, Berkeley Homes has in place the most generous bonus system ever put in place by a British company, with £1 billion due to be distributed to company executives if certain targets are met – and the company is on route to meet these targets, mainly because of its ability to set and maintain high house prices. The chairman of Berkeley Homes was one of the highest paid persons in the UK in 2015, with his benefits amounting to more than £22 million for the year. Profit margins enjoyed by housebuilders would not be tolerated in government regulated industries such as utility companies, or in food retailers, etc. It applies to the most expensive purchase the vast majority of purchasers will ever make, and it shows clearly that the housing market model used by the government (supply by the private sector only) is working only to benefit developers. It is functioning as a free market – but it is not a true free market because of the other factors that determine house prices such as government subsidies, including housing benefit. These create a win:win housing market for developers. The ability of developers to control housing supply is a major problem with the housing market – it is not the planning system that limits the supply of new dwellings, it is developers ensuring that they can maximise their profit margins by drip feeding new builds onto
the market. The Local Government Association stated that there are potentially 400,000 dwellings with planning permission but construction had not been started. So the problem is in the operation of the market, not in the planning process. Reforms to the way that the housing market operates are long overdue, for example, through a large social housing programme, managed by a national housing executive.

• Government regional policies also have an impact on house prices. This is evident in the way that property prices have or have not recovered after the property price crash in 2008. Not all regions currently have higher house prices than their 2007 peak values: This is clear evidence of an ineffective regional policy, and shows the publicity around creating a “northern powerhouse” is hyperbole. One strand of an effective regional policy would ensure that a genuine free market was allowed to run its course, so that as building in London and the south east became more difficult and expensive (due to strong planning policies protecting the Green Belt and countryside) development would be pushed to other regions, ensuring these regions grew. Instead, the government seek to make it easier for developers to build in areas with the highest growth, by weakening planning policies, so that development is concentrated in London and the south east, especially in the countryside. The effect of this policy (in reality the lack of an effective regional policy) means that demand for development of all types continues to grow in and around London, so that house prices can be increased and controlled by developers. This increases the wealth gap between the London plus the south east and other regions, and limits employment growth in these areas.

• Immigration has a major role in the supply and demand equation – if the rate of immigration were not so high, the demand for housing would be substantially lower. Migration Watch have estimated that at least 40% of the housing demand is due to immigration, but their estimate was based on a lower number of migrants than the current level of immigration, and does not include the impact of the children of migrants, nor does it include the demand from illegal immigration. Thus the government’s immigration policies have had a major impact on the demand for housing. Immigration also has an impact on pay – it helps keep pay levels low, so that employers are not forced to pay more to help with recruitment. This has an impact on affordability ratios. Although there is a construction boom, with a supposed shortage of skilled workers, pay within the construction industry has not increased as rapidly as it has done in the past. This is because employers can recruit immigrants, who will work for lower rates of pay, for example, 50% of sub-contractors working for Berkeley Homes are from eastern Europe. So not only does this policy have an impact on the supply part of the housing equation, but it also has an impact on the ability to afford housing by keeping pay rates lower than they would otherwise have been. A recent estimate by employers was that pay rates for skilled workers in construction have increased by 6%. Historically, this is a very low increase for pay rates in the middle of a construction boom. If immigration policies change as a consequence of the Brexit vote, the pressure placed on housing supply by immigrants will fall, and this should be reflected in revised housing policies.

Annexe 2
Contribution to Traffic Movements and Air Pollution
The Local Plan proposes building a minimum of 693 houses per year, of which 2,400 (17%) will be built within Guildford. The remainder (83%) will be built in the countryside. This is very much against advice from the Institute for Air Quality Management. Intuitively, it seems likely that this spatial distribution of housing would increase car and van journeys with a consequential increase in air pollution that is related primarily to vehicle emissions. This paper examines statistical evidence to assess the impact on vehicle journeys within the borough.

Spatial Vision
The spatial “vision” proposed in the Local Plan is the reverse of that recommended by the Institute for Air Quality Management, who said

“The pattern of land use determines the need for travel, which is in turn a major influence on transport related emissions. Decisions made on the allocation of land use will dictate future emissions, as many people and businesses will make significant use of road transport for journeys between places that form part of their daily lives.”

This has not been recognised in the spatial planning within this plan, which proposes that a large majority of new dwellings should be in rural areas, some considerable distance from the urban centre and employment centres. It is a plan that could have been written specifically to increase road traffic.

This report also suggested that:
“Ideally, air quality should be a prime consideration for long term planning, so that land is used and allocated in ways that minimise emissions and that reduce the exposure of people to air pollution.”

This has not been part of spatial planning, but it should have been, even though there is no statutory requirement to do so. However, there is a statutory requirement to declare an air quality management area (AQMA) in areas that are known to have high pollution levels, but this has not been done within the borough. This is despite requests to the council to set up an AQMA following air quality tests that show high pollution levels in at least one village which has high traffic levels.

**Sustainability**

To examine the claim that the draft Local Plan contributes to sustainability several areas could be analysed. One of these is the impact on traffic, to assess the impact of adding additional housing in the countryside rather than in Guildford centre. This can be gauged by comparing the likely impact on car ownership of building housing in a rural location as opposed to an urban area of Guildford. Effingham has been chosen for this, but it could be any of the rural villages in the borough, and the impact of additional housing in this village is compared with additional housing in an urban area, Walnut Tree Close/Station area. This can be done using census details, taken from the Office for National Statistics (ONS) publications, so that availability of cars and vans can be compared as well as methods of travelling to work.

What have traffic levels to do with sustainability?

Traffic is a major contributor to air pollution, and air pollution has a significant effect on health. In April 2014, Public Health England produced a report that reconfirmed the estimate by the Committee on the Medical Effects of Air Pollutants that approximately 29,000 deaths per year in the UK could be caused by pollution from man-made particulate matter. This report estimated that there were 55 deaths per year in the borough attributable to air pollution. Particulates are very small air borne particles and transport is the single largest contributor to particulate pollution.

But air pollution is not limited to air borne particles - it includes many other pollutants, and one group that affects human health, especially that of children, is the gaseous oxides of nitrogen, nitrogen dioxide (NO2) and nitrogen monoxide (NO). When taken together these are usually called NOX. Nationally, almost half of these gases are produced by transport. In a submission to the House of Commons Report “Action on Air Quality” published in November 2014, Dr Ian Mudway of King’s College, London said:

“We have also found effects on infant mortality rates, on pre-term birth and on cognitive performance in children. There is some interesting data emerging on traffic proximity, diesel emissions and traffic potentially autism spectrum disorders… The evidence over the last three or four years that children growing up near traffic in areas with high NO2 and primary particle emissions have stunted and impaired lung development is incredibly strong.”

As well as health aspects, road safety is also important – increased traffic levels means more congestion, more delays, more stress, and inevitably, more accidents.

Areas in London exceed the EU limits for various air-borne pollutants, in particular, NOx. This has been on a scale that will result in the imposition of substantial fines on the UK government – and the UK government has expressed a desire for this to be passed to local government in areas that are out of compliance. Although Guildford Borough has a very limited air pollution monitoring regime they have one station that regularly exceeds limits – that at Wisley. Even though this is very poorly sited (meaning that the actual NOx concentration in this area is considerably higher than that being recorded) it has consistently been above EU limits. Thus the borough’s taxpayers may have to share in the costs of the EU fine.

Since traffic has a major impact on air pollution, and as air pollution has a significant on health, especially that of children, it is an important element in sustainability – so the impact on traffic levels of housing policies should be assessed, in detail, before making claims that housing policies are “sustainable”.

**Detailed Traffic Comparisons**

Levels of car ownership vary substantially, as can be seen from the figure, taken from the data in Table 5. This data is taken from 2011 ONS Census data, as published in the series “Neighbourhood Statistics”. The average number of cars or vans per household is highest in Effingham, with an average of 1.9 cars or vans per
household in Effingham in 2011, compared to an average of 0.93 cars or vans per household in Woodbridge Meadows/Walnut the Station. This suggests that plans for high levels of development in the countryside go against all the ideals of achieving sustainable developments as car and van availability is an indicator of how often those vehicles will be used.

</tbody>
</table>

In Effingham, there are very few households that do not have a car or van available, at 4.7% of total households, compared to 34.2% in Woodbridge Meadows, Walnut Tree Close and the Station. Given the limited range of shops and services available in rural villages this should not be surprising. Most residents have to drive to be able to access basic health services, and for all but the most basic of shopping needs, employment opportunities, etc. This shows very clearly that it is very likely that there would be increased traffic on the roads throughout the borough as a consequence of additional housing in the countryside, and that this increase in traffic would be lower if additional housing were built in the centre of Guildford.

Experienced city planners such as Lord Rogers have called for increased density in towns and cities as a way to provide extra housing, provided increased density is accompanied by improved amenities and sensible traffic management plans. This is because of the benefits of increased density – towns and cities work better, with better public transport, better access to services, and a reduction in car journeys. Woodbridge Meadows, Walnut Tree Close and the Station are ideal locations for increased population density – the railway station is within walking distance, as is much of the town centre. This is recognised to a limited extent by the Masterplan prepared for Guildford Borough Council, but does not seem to have been recognised in the 2016 draft Local Plan.

As the 2011 census had details of the methods used to travel to work, it is possible to test if traffic implications are in line with these expectations. Methods of travel to work illustrate differing patterns of car and van use, with the details given in Table 6. In Effingham, only 14% of employed people who travel to work use public transport and almost 75% travel to work by car or van. Only 8% of those who travel to work walk or use a bicycle in Effingham, whereas in the Woodbridge Meadows/Station area the comparable figure is almost 33%.
Differences are illustrated in the figure showing the proportion of people who travel to work using public transport, walk or by bike. Building more houses in the countryside will result in many more car journeys – just to get to work. Many more would also be necessary, for residents to shop, to access financial and health services, etc. This shows clearly that car journeys would be minimised if new housing was concentrated in urban areas of Guildford. Sensible planning should seek to improve the ability to use these modes of transport and the impact on the number of car or van journeys is very clear from the comparisons made here. This type of analysis should be a feature when choosing to claim an option is “sustainable”, but it has not been a feature of the draft Local Plan. Claims made that building housing in rural areas is a sustainable option do not stand up to simple scrutiny, even without the consideration that it is proposed to build housing on the limited resource that is farmland. Conclusions
The spatial planning in this draft plan will increase traffic movements and consequently, air pollution. Air quality should be a constraint used to limit the housing target. Even with a lower housing target, instead of what is proposed a higher proportion of housing developments should be within Guildford town. This could be achieved by recognising that an expansion in retail and warehousing and distribution within the urban area is not sustainable, and the land set aside in the town centre for these used instead to provide housing. GBC should also have used the local plan to set targets for air quality, with proposals to reduce noxious emissions, for example, through the use of LPG fuelled public service vehicles, as is happening in other areas, such as Birmingham. This has not been done; there is no proposal to tackle existing air pollution or to alleviate the pollution caused by adding approximately 24,000 cars and vans to those already in use within the borough, based on car ownership levels in a rural village and an urban area in Guildford. This is the approximate number of vehicles that the proposed housing additions would bring, thought his number would vary, dependent on where
the additional houses are located. If all the proposed housing were within Guildford, then instead of 24,000 about 13,000 cars and vans would be added to the existing total. In the census of 2011, the total across the borough was just under 54,000 cars and vans.

The comparisons made above show that traffic and air quality has not been considered in the spatial allocation of housing. Sustainability claims have not been analysed in drawing up the housing proposals featured in the draft Local Plan. A simple comparison of only one aspect of sustainability, car use (with its associated air pollution), shows very clearly that building extra housing in Effingham (a typical rural area village) is the least sustainable option. As a method of travel to work, car use in Effingham was shown to be much higher than in an urban area of Guildford, so to limit increases in traffic and emissions from traffic, housing should be provided in areas closer to employment opportunities and with access to good public transport. This does not mean that no additional housing should be provided in the countryside, but this housing should be limited in quantity, in keeping with its Green Belt status.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to this policy.

It is a Trojan Horse policy. It will lead to more housing under the guise of being for local people.

Not only that, but the legality of being able to say that houses must be kept in perpetuity for local people is questionable.

Answer (if comment is on questions 1-7 of the questionnaire): ()
Whilst I agree with this policy, the reality is that the designation of the AONB is being weakened by the development proposals put forward within the Local Plan, specifically the development at Blackwell farm. A large area of this farm should have been placed under the AONB designation, but the review required to do this has left out areas that should have been in the review and slowed down reporting so that the designation has not been given as it should. Nevertheless, the AONB should Blackwell Farm be developed as is proposed, the view from the AONB would be negatively affected, as would the view of the AONB from Guildford.

In addition, the proposed new green belt boundaries include some small areas from AONB - so that these areas of AONB will no longer have green belt protection. Why is this being done? It is wholly unnecessary, and I object to it.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to this policy.

My objections are detailed in the attachment.

Firstly, there is no national policy to remove villages from the green belt, this is a fallacy. National planning policy is set by the NPPF. The relevant paragraph is paragraph 86, which reads

"If it is necessary to prevent development in a village primarily because of the important contribution which the open character of the village makes to the openness of the Green Belt, then the village should be included in the Green Belt. If, however, the character of the village needs to be protected for other reasons, other means should be used, such as conservation area or normal development management policies, and the village should be excluded from the Green Belt"

It is inconceivable than none of the 15 villages to be inset make an important contribution to the openness of the Green Belt. The Key Evidence to justify this policy includes the Green Belt and Countryside Study, by Pegasus, which was a simple terrible study. Predetermination is evident in their approach, in the manipulation of data then produced, followed by dropping this data as it clearly showed the reverse of what they claimed. It was based entirely on subjective judgements and these should play no part in a policy which effects such radical change. There should be a transparent, objective process for assessing villages and this has not been done.

I especially object to the statement in the opening line of the Policy

"We will continue to protect the Metropolitan Green Belt..." Since when has protection included removing more than 6% of the land designated as green belt from that designation? What a peculiar form of protection - protect it by building on it. Death by a thousand cuts. This could have been written by George Orwell's Ministry of Truth, which appears to have taken up residence in Millmead.

Answer (if comment is on questions 1-7 of the questionnaire): ()

There is no definition of sustainable, so how can anyone judge whether or not any development proposed meets the sustainable criteria used GBC - not even a definition if we are told what those criteria are. So we have to judge sustainability for ourselves, using our own personal sustainability criteria. For myself, my sustainability criterion is very simple, and is "Will the changes proposed mean a better place for those who follow me?" Against this yardstick, this plan fails. If implemented, it would have a profound and long lasting negative impact on the countryside within the borough - a countryside that makes England unique, and here in GBC, we have some of the very best of the English countryside. The views that we take for granted have evolved over centuries, as has land uses for the land in the borough. But with very little thought, GBC can destroy them. Consider what the countryside will look like if all the developments planned are completed - Blackwell Farm would be lost and with it some of the most iconic views in the borough, both into the town and out from the town. Driving along the A3 from the M25 junction into Guildford there would be a large, high density urban area at Wisley, another a few miles further on at Garlick Arch, and then yet another at Goden Hill Farm. A large urban area will be created by the forced amalgamation of East and West Horsley, and another by the forced merger of Normandy and Flexford. But all will be well because Ash Green will be prevented from merging with Ash and Tongham! The wanton destruction of a countryside that took centuries to develop, and that is loved by thousands of residents and visitors alike And this is called "sustainable" - what nonsense!

The additional 25,000 to 30,000 cars that the developments will generate will increase air pollution very considerably - and this has not even been considered in the plan. This is roughly a 50% increase in the number of cars and vans within the borough. Across the borough there are areas that are already above legal limits - but Guildford has no AQMAs, and no action plan of any description to deal with existing levels of poor air quality - so what of the future? How can it be called sustainable to ignore a problem that already kills about 55 residents a year - how many more will die because of this extra pollution load? How many more children will have stunted brain and lung development because of the additional air pollution this extra traffic will bring? Does anyone within GBC even care? Apparently not, there is no policy to tackle air pollution within the plan. However, this means the plan is not legally compliant.

And what of the high quality farmland that is being lost - at Wisley, at Blackwell Farm and at other locations across the borough. The UK already imports 40% of food consumed (net) - but building on farmland means that our ability to feed ourselves will diminish even more. And yet GBC call this plan sustainable.

So, on behalf of those who will follow me, I am forced to say that this plan is not sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
There is a major difference between the borough wide housing delivery strategy given here (in Policy S2) and that given in the LAA. Why? In the LAA, housing delivery in the first five years of the plan is given as 3,288 dwellings, plus a further 1,342 from outstanding permissions, a total of 4,630 over the first 5 years of the plan. Yet in the S2 Policy Statement above, the total is only 2,950, a difference of 1,680 dwellings per year over these five years. Which is correct? Why is there such a difference between documents, so much confusion? Given this confusion, why should I have faith in any of the documents produced or endorsed by GBC?

The simple truth is that housing need in the SHMA was grossly inflated. This local plan is supposed to provide housing for local residents - but how can this be so? Over the period of the plan, (if implemented) based on the average dwelling occupancy in the last census, the population of Guildford will increase at 4.5 times the rate seen between the two most recent censuses of 2001 and 2011. How could this housing be for local residents? Has there been an explosion in the local birth rate? Does the water supply of Guildford include an additive to ensure the delivery of triplets on every conceivable occasion? The answer to these questions is no - and so this is not a plan for local residents. This means the plan is legally non-compliant, Local plans are supposed to be for local residents. This plan is not.

This section of the plan is not sound, as it is clear the housing need has been grossly inflated. Not only has the housing need been exaggerated, but so too has the need for employees to feed the local economy, which is predicted to grow at a rate not seen in living memory. According to this, there will be boom but no busts, just a long continuous boom - a dream that even Gordon Brown in his most evangelical trance dared not enunciate. GBC have done what Gordon Brown failed to do - they have abolished busts, and so Guildford's economy will grow, grow, grow - for 15 solid years. What a fantasy.

The AECOM report on Guildford's economy propagated such a vision, sadly wholly false. It is astonishing to suggest, as the draft Local Plan does, that jobs can be created each and every year over a 15 year period at a rate never seen by Guildford in its past. The housing target of a minimum of 693 dwellings/yr will mean that there will be about an additional 1200 employees available per year - each and every year. Guildford would have to supply an additional 18,000 jobs over a 15 year period. To justify this, AECOM produced a report that included a selective use of statistics, used averaging when it was totally inappropriate, and had very limited ambition when it came to land use efficiency. But the best that they could suggest for GBC with regard to land use efficiency was that they should match the average land use efficiency of the country - in an area where land costs are high and green belt was 89% of the borough. Greater ambition would have been much more appropriate. So the section of the report that deals with the need for employment floor space is no better than the SHMA, or the Green Belt and Countryside Study. Any plan based on these documents could not be sound.

Supposedly, in meeting their duty to co-operate, GBC have engaged with two other local authorities. Yet 6 local authorities share a boundary with GBC. How can a housing report shared with 2 others adequately reflect the reality of the local housing market? The duty to co-operate has been glossed over.

Another reason for my objection is that this plan will do nothing for those dependent on social housing. It is fixated on home ownership, despite this not being a suitable option for a large percentage of the population. At the home ownership peak, locally, about 25% of homes were rented. Since then, wage rates have declined in real terms, and now, nationally, about 35% of residents rent. There is nothing in this plan for those whose only realistic option is to rent, whatever their circumstances or ambition. There is a need for a substantial expansion of social housing, but this is not recognised in this plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

The evidence base is poor, with the results of various studies being produced to favour a pro development agenda, in line with the councils stated policy of "rolling back the green belt". One study that was particularly bad was the Green Belt and Countryside Study by Pegasus, especially Vol IV. The attempt at an update to this following earlier criticism was a charade. It was an entirely subjective report, and for a topic as important as this, objective methods should have been used. Green belt boundaries elected for inset areas were weak, and do not meet the requirements of the NPPF. This report has no place in the evidence base, it should be in the recycle bin.

Similarly, the AECOM report Employment Land needs Assessment was poor. It showed a selective use of statistics, to exaggerate the growth of Guildford's economy. It concentrated on only two employment sectors and barely commented on the predicted substantial decline in employment in retail and the impact this would have on overall employment. Worst of all, it was entirely unambitious in the use of employment land, suggesting Guildford should only use employment land with an average (across the country) efficiency. Guildford needs to be much more ambitious in its use of all land, not just employment land. The addition of 120 houses to the housing target to supply workers for the expected increase in employment in Guildford is a fantasy, and these should be removed.

Another report that was very poor was the SHMA. GL Hearn may have produced a large number of reports on this topic, but it seems this has made them complacent. They paid no attention to the suggestion that the ONS make concerning the use of their projections when producing housing estimates - that the underlying trends be understood. In Guildford's case this should have meant that the increase in student numbers was recognised and this effect removed from their calculations. As GL Hearn did not do this, the result was an estimated housing need which was grossly exaggerated - and to add an additional 25 houses for students to the target showed a complete lack of understanding of the basic numbers, as students were responsible for more than 50% of the population increase over the period measured by the ONS. Finally, the addition of 31 houses to promote affordability shows a total lack of understanding of the housing market. High prices are not just a consequence of supply and demand. In the 10 years, 2001 to 2011, the local supply of houses was greater than the demand for houses in the borough (based on the population increase) but house prices almost doubled during this period. High prices are a consequence of many factors. This report was poor quality.

Overall, the quality of the reports in the evidence base is poor and represents poor value for money - they were paid for by local council tax payers. There needs to be a recognition that reports should be properly scrutinised before they are accepted, or introduced into the evidence base. These poor quality reports should not be the cornerstone of the Local Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
No, I do not think the plan is legally compliant.

There is no adequate basis given for changing green belt boundaries, which although a complex issue is clear - there is a need for special special circumstances for each and every change and housing need alone is not an adequate basis for a green belt boundary change. In addition, there is a need for local support for boundary changes and this has not been tested. Many of the boundaries selected are weak and do not comply with the requirements of the NPPF. In at least one area, Effingham, residents have made clear their objection to boundary changes in surveys conducted by the Residents Association.

The draft Plan does not comply with Air Quality standards, there is no plan to introduce air quality management areas, despite some areas being outside legal limits. Under these circumstances there is a legal requirement to introduce an AQMA. This has not been done. There is also a lack of understanding regarding the need for an AQMA at Wisley. GBC maintain this is not needed as there are no residential properties close to the sensor. However, there is a need for an AQMA when the public have open access to the area, and this is the case. In fact, there are several people who are exposed to this pollution on a daily basis as they work in the cafe in the car park, almost directly opposite the sensor.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I believe that the duty to co-operate has not been fulfilled. Guildford shares its boundary with 6 neighbouring authorities, yet has consulted with only two. The West Surrey SHMA is a totally artificial construct, as the true housing area is much wider than just 3 authorities - Dorking in Mole Valley is a town that is just a few miles away from Guildford, but its housing market and that of Mole Valley was not considered.

In addition, in the Green Belt and Countryside Study, Vol IV (amended version) there is a recommendation that Mole Valley District Council be consulted before Effingham (which has a boundary with MVDC) was inset from the green belt. No evidence has been presented that shows that this has been done.

Comment ID: SQLP16/464  Respondent: 8806849 / Roland McKinney  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 5: The examination

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (Yes)

I would like to participate so that I can explain why I believe the quality of the Green Belt and Countryside study is such that it should not be admitted to the evidence base, and that the policy of insetting villages should not be based on this study. As it also recommends new green belt boundaries I would like to have the opportunity to show why large sections of the boundary proposed by Pegasus, the authors of this report, do not meet the requirements for new green belt boundaries as laid down in the NPPF with specific reference to the proposed green belt boundary around Effingham. Much of this boundary was recommended by Pegasus in their report.

It would also give me an opportunity to comment on other reports in the evidence base that I consider to be poor quality, to show why house prices in the borough is not driven just by the balance between supply and demand, and that in fact, house prices in Guildford are not less affordable than many of the surrounding boroughs and to comment on the proposals for affordable housing.

I would also like to express my concern to the inspector that the approach to risk in the local plan is complacent - there has been no risk assessment regarding housing policies (what happens if there is a housing bust?) or what happens if infrastructure such as the planned railway stations, or sewerage treatment, water supplies etc are not actually completed in line with housing policies? It seems that numerous complacent assumptions about the delivery of infrastructure have been made and that the risk of non-delivery has not adequately been considered. The lack of an effective monitoring policy for infrastructure delivery is also a source of risk.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The quality of this plan does not approach the quality of the 2003 plan. It is very sad that Guildford Borough Council's planning has been reduced to such a low level, especially when a template of a good plan was readily available.

Many Councillors demonstrate no real understanding of the issues and there is an astonishing level of turnover of officers who are involved in producing or are responsible for producing the plan. Despite having a very large planning department, GBC use consultants to produce evidence base documents, and there is no proper scrutiny of these documents when they are produced, either by officers or Councillors. This must create confusion in producing the various iterations of the local plan, and a high level of confusion is evident in the text, which if anything, is even worse than the previous iteration.

Anyone concerned with producing it should hang their heads in shame at the untruths and distortions that surround it, for example, "we will protect the green belt" - "we will only use 1.6% of green belt for housing" - when the truth is that there is no protection for the green belt, with more than 6% of land to be taken out of the green belt.

Vision and Ambition

I object to the lack of vision and ambition in this plan. The vision is to build 693 dwellings a year, an inflated housing target, produced by using a “black box” model that takes no account of anomalies in the ONS statistics for the borough that underpin this model. One such anomaly is the increase in the number of university students during the base years used to generate ONS population projections. Consultants used by GBC ignored this, so the housing target is far in excess of the needs of residents. This housing target will result in the boroughs permanent resident population increasing at 4.5 times the rate of population increase during the period 2001 to
2011, as measured by the censuses in these years. Given the existing strain on infrastructure in the borough the “vision” in this plan will create a nightmare for existing residents.

The only ambition in this plan is to build on a scale across the borough never before seen, driven by the ambition to “roll back the green belt”. There is no regeneration programme for urban areas of Guildford, and instead of using the Local Plan as an opportunity for redevelopment within Guildford’s deprived areas, the focus is on large developments outside Guildford, mostly in green belt. The plan has nothing for low paid workers in Guildford, and very little for young people who wish to live in the town. It is a plan to benefit developers, not residents; a plan rooted in the past, but one that has not learned the lessons of the past.

There are many contradictions within this draft Local Plan, and a few of examples of these are given below:

- The plan proposes a major increase in traditional “bricks and mortar” retail in the town centre, as well as an expansion in warehousing and distribution. Workers in these sectors tend to be among the lowest paid, at or just above the minimum wage. The plan places an emphasis on the provision of “affordable” housing, but those on the minimum wage cannot afford “affordable” housing, this a misnomer. Workers in these sectors need social housing, but there are no plans for a significant expansion in Guildford’s social housing.
- As well as an increase in town centre retail, etc it is proposed to locate new employment sites in or close to the urban area of Guildford. Only 20% of the housing proposed is to be within the town, with the remainder outside Guildford town. This means that if employers take up the buildings in the centre of the town (this is a big if, as in surveys many employers complain about congestion) workers in these employment centres will have to live outside the town. Inevitably this means they will rely on cars and vans to get to their place of work. This is not sustainable, Guildford already has a problem with congestion and air pollution.
- The rate of growth (averaging more than 693 dwellings a year to 2031) means if employment is to be provided locally (for about 1,200 new adult residents a year) Guildford’s economy would have to expand at a rate well above anything seen in the recent past, and be sustained at this rate for 16 years – a period when history indicates there will be at least two national/international economic downturns. This sustained growth would be unprecedented. Without this huge expansion in local employment, Guildford will become a dormitory town for workers commuting long distances to other areas. This is not sustainable.
- The delivery of housing is entirely in the hands of private companies that currently enjoy record profits due to their control of the delivery of new homes. These companies will simply not build if anything has a major impact on their profitability, be it a global economic downturn or a local oversupply of housing, whatever.
- Similarly, much of the infrastructure required has to be built by private companies, such as Thames Water and Network Rail, companies over which GBC have no powers. In effect, GBC are proposing a Local Plan over which they have minimal control. They have no powers to force the delivery of their targets in that plan. This means the plan is an exercise in fantasy, but a fantasy that currently blights the lives of thousands of people, especially those who live close to proposed development areas, and if implemented will blight the lives of thousands more.
- GBC have assumed the delivery of all vital infrastructure, but this is unwise. No risk assessment has been done to assess the risk and effect of the non-delivery of vital infrastructure within the time frame of this plan. These examples serve to illustrate inconsistencies within the plan. Other specific points addressing the declared “Vision and Ambition” are detailed below.

Spatial Vision

A plan that will increase car journeys as much as this one will, especially in an area that already suffers from heavy congestion with associated high levels of air pollution, could not be described as a “vision”. It is more of a nightmare than a vision. The Metropolitan Green Belt was established to prevent the urban sprawl that has blighted many countries, such as the USA, but the goal of this plan is to set aside the protection offered by the Green Belt, and to create urban sprawl, with large extensions to the urban area of Guildford and the creation of urban areas in the countryside, even where this is protected by its green belt status.

A contributor to the nightmare vision is the ongoing lack of investment in infrastructure, which will be exacerbated by this plan. In terms of infrastructure, the Surrey County Council Infrastructure Plan estimated that the borough would need
investment totalling £2.5 billion, based on the provision of about 9,300 dwellings through the period of the plan. GBC plan for at least 13,860 dwellings, most of them outside the urban areas of Guildford and so infrastructure needs will be higher than estimated. Of the £2.5 billion, SCC estimated that £2 billion would be available from various sources, leaving a shortfall of £0.5 billion. In an address to a council meeting, Mike Murray, speaking on behalf of Wisley Property Investments estimated that the developments outlined in the Local Plan would raise £100 million for infrastructure investment. This leaves an obvious shortfall of £400 million – but in fact the shortfall will be much greater than this, due to the housing target in the Local Plan being about 50% higher than in the Surrey County Council estimate, and because of probable changes to the Community Infrastructure Levy. This means that the borough cannot possibly meet its infrastructure needs, which is not recognised in the infrastructure plan that forms part of the evidence base of this Local Plan.

Another contributor to the nightmare vision is the lack of recognition of the air quality problem in some areas of the borough. That there is an air quality issue is illustrated by nitrogen dioxide (NO2) concentrations that are higher than the legal maximum. One of the proposed development sites is close to one of the “official” NO2 measuring stations, at Wisley, and this reveals that nitrogen dioxide concentrations have been higher than the legal maximum of an annual average of 40μg/m3 for several years. Other measurements have been made in villages that have roads that serve the A3 and have high traffic levels, and these have shown concentrations well in excess of the legal maximum concentrations, to the extent that one village has formally requested that their village be designated as an air quality management area. This has not been put into effect, and the whole issue of air quality has been entirely ignored in the Local Plan, specifically in the spatial vision. The spatial “vision” proposed in this plan is the reverse of that recommended by the Institute for Air Quality Management, who said “The pattern of land use determines the need for travel, which is in turn a major influence on transport related emissions. Decisions made on the allocation of land use will dictate future emissions, as many people and businesses will make significant use of road transport for journeys between places that form part of their daily lives.”

This has not been recognised in the spatial planning within this plan, which proposes that a large majority of new dwellings should be in rural areas, some considerable distance from the urban centre and employment centres. It is a plan that could have been written specifically to increase journeys by road, by cars and vans.

This report also suggested that:

“Ideally, air quality should be a prime consideration for long term planning, so that land is used and allocated in ways that minimise emissions and that reduce the exposure of people to air pollution, so that land is used and allocated in ways that minimise emissions and that reduce the exposure of people to air pollution.”

This has not been part of spatial planning, but it should have been, even though there is no statutory requirement to do so. However, there is a statutory requirement to declare an air quality management area (AQMA) in areas that are known to have high pollution levels, but this has not been done. The spatial planning in this draft plan will expose more people to air pollution. Instead of what is proposed, more housing developments should be within Guildford town, which could be achieved by recognising that an expansion in retail and warehousing and distribution is not sustainable, and the land set aside in the town centre for these used instead to provide housing. GBC should also have used the local plan to set targets for air quality planning, with proposals to reduce noxious emissions, for example, through the use of electric and LPG fuelled public service vehicles, as is happening in other areas, such as Birmingham. This has not been done; there is no proposal to tackle existing air pollution or to alleviate the pollution caused by adding approximately 30,000 cars and vans to those already in use within the borough. This is the approximate number of vehicles that the proposed housing additions would bring.

There are many areas where the text within the “spatial vision” section does not accord with reality, and a few examples are given below:
The opening text of the Spatial Vision reads

1 Land_Use Planning & Development Control: Planning for Air Quality, April 2015.

“The Local Plan: strategy and sites makes provision to meet the identified growth needs of the borough in terms of housing, employment and retail and leisure. This is achieved by maintaining the extent and function of the Green Belt in such a way as to protect the existing character of the borough through maintaining the clear distinction between urban and rural areas and safeguarding the natural built and historic environment”.

If this were what is planned, there would be little room for complaint. In fact, the clear distinction between urban and rural areas will be very considerably blurred with large holes punched into the green belt. More than 6% of the Green Belt will lose that designation.

The plan calls for a very large, high density development at Wisley, close to the boundary of the borough, in what is currently open countryside in the Green Belt. Another large development in the green belt is planned at Garlicks Arch, less than 3km south on the A3, and within another 3 km another at Gosden Hill Farm, both of which are in the Green Belt. When considering the view from the A3 the current appearance of open countryside from the junction with the M25 to Guildford along the A3 will be lost, replaced by two large developments in open countryside and a large extension to the urban area of Guildford, extending into the countryside. Thus the extent of the Green Belt will not be protected.

Two of the villages to be removed from the Green Belt are East Horsley and West Horsley, with a total of 363 ha (3.6 km2) to be removed from the Green Belt. The justification for insetting of villages is given in Policy D4, and this is to increase housing density within villages. From some of the plans given in the Local Plan showing proposed sites it is clear that it is expected that the provision of a number of development sites and the insetting of these villages is designed to lead to the coalescence of villages, such as East and West Horsley, and Normandy and Flexford. As the housing layout and style in these villages is an open pattern of development, they both make an important contribution to the openness of the green belt, and this will be lost because the housing density for the developments proposed (averaging approximately 18 dwellings/ha) is considerably higher than the average density in these settlements.

It is not clear why new green belt will be created in and around Ash and Tongham to prevent Ash and Tongham merging with the village of Ash Green, when the result of removing East and West Horsley from the Green Belt together with several new development sites will be their coalescence. If it was important to prevent existing villages from merging then both East and West Horsley would remain in the Green Belt, and proposed developments would be smaller, in proportion to the existing villages.

Similar considerations apply to the settlements of Flexford and Normandy. The area to be inset is approximately 134 ha (1.3 km2) including a very large 67 ha development site, located between the two settlements. This will result in the coalescence of the settlements of Normandy and Flexford. As both make an important contribution to the openness of the Green Belt, they should not be inset, and this development site is inappropriate development in the Green Belt. Again, if it is important to prevent existing settlements of Ash and Tongham merging with Ash Green, then similar considerations should apply to these settlements, especially given that they are washed over by the green belt, whereas Ash and Tongham are not.

The Spatial Vision goes on to say:

“The plan provides for the delivery of 13,860 homes by 2033. The preferred location for this development is existing brownfield sites. Over 2,800 units are proposed in the urban areas to take advantage of the existing infrastructure and services, reduce the need to travel and offer alternatives modes of transport to the private car.”

Or, to put it another way: 11,060 homes are proposed on sites which cannot take advantage of the existing infrastructure and services, which will increase the need to travel and which cannot offer alternatives modes of transport to the private car.

The low proportion of housing within the urban centre is because there is so much emphasis on providing employment sites within the urban area, for example, by expanding retail premises, etc but not enough on using these sites for housing – to take advantage of the benefits defined in the above quotation. There is no emphasis on using land in the urban area efficiently, for example, by replacing existing land hungry surface car parks with multiple level car parks, thus freeing up land for housing development. A few employment centres have multi-level car parks and this should be encouraged in other centres, and all new employment centres should be required to have multi- level car parks, ideally with several levels underground. Steps such as this would increase the availability of brownfield land within the urban area, and permit higher levels of housing provision. Another step would be to encourage the University of Surrey to do the same, to be more efficient in their land use, and to house a much higher proportion of students within the university campus – as they
The Local Plan includes the provision of additional sites and premises to meet employment needs across the borough, as well as 120 houses per year for new workers for new employers in the borough. However, the rosy picture painted in the employment report by the authors AECOM does not adequately reflect the actual condition of the local economy. The strength of the local economy as painted in the Employment Land Assessment Report 2 was exaggerated through the careful selection of supporting statistics. As an example, in the section with the heading Policy and Socio-Economics (page 1) the increase in employment within the borough was given as 4.1% during the period 2010 - 2013. This was a period when Guildford was still emerging from a recession, and so employment growth was strong, but not typical of a full business cycle. Employment growth over a longer period should have been given, to give a more accurate picture of the local economy. Using NOMIS statistics the number of residents employed in 2005 averaged 68,000 and this had increased to an average of 68,500 in 2015, so that the growth in employment of residents over this 10 year period was less than 1%. Note too that the average employment in 2015 was considerably lower than peak employment reached in 2007, when it was 74,400. According to NOMIS statistics there has been very considerable variations in the number of residents employed and this is not captured by the Employment Land Assessment report. Although the NOMIS statistics refer to employment by residents of the borough rather than jobs within the borough (a similar time series for these is not readily available), jobs available locally should be reflected in the employment of residents. In fact, NOMIS statistics also reveal that the average weekly pay of residents in the borough is significantly higher (6% higher in 2015) than pay for those employed within the borough, suggesting the local economy is weaker than neighbouring economies. Residents commute outside the borough to get higher pay.

It is astonishing that the Local Plan suggests that jobs can be created over a 15 year period at a rate well in excess of anything that Guildford has seen in the past. It is simply a nonsense to add an additional 120 houses so that additional workers will come to the borough. The housing target of a minimum of 693 per year will result in an additional adult population of about 1,200 potential employees per year, and the local economy will not be able to supply employment for these people. Historical employment data provides no evidence that over a 15 year period an additional 18,000 jobs will be created within the borough, given that the number of residents in employment increased by only 0.7% in the 10 years from 2005 to 2015. Consequently, a large majority of new residents will be forced to commute out of the borough to find employment, adding enormously to traffic congestion and air pollution.

There are many other instances of selective use of statistics in the Employment Land Assessment Report, far too many to elaborate on. As the report concludes there is a need for additional land for employment premises, and because a large part of this land set aside for employment is within Guildford town, it is worth commenting on a few more instances of the use of statistics. This is because this land should be used for housing within the town, which is where the need for housing is, not in the countryside beyond the town. In Section 6.6 of this report2, an explanation of employment forecasts were given. Data was used by AECOM from 3 separate forecasting organisations for employment growth between 2015 to 2033, namely

- Cambridge Econometrics
- Experian
- Oxford Economics

Guildford Borough Employment Land Assessment Report, AECOM, September 2015

These forecasts exhibited a very wide range – in the case of office employment the range was 0.55% to 1.18% per annum, so the highest forecast was 2.1 times the lowest. This may be acceptable in a short range forecast, but is wholly unacceptable for long range use. Similarly, the forecast for employment in the industrial/storage category ranged from 0.58% to 1.14%, so in this case the highest forecast was 2.0 times the lowest. Again, this range should be unacceptable for
use in long range forecasts. These individual forecasts were averaged by AECOM to provide a number used to project the requirement for floor space for these respective employment categories. In this case, with forecasts from various sources exhibiting such a wide range, averaging is not appropriate. As an example of the dangers of averaging consider a human with half of their body in a deep freeze, at about -25°C, and the other half in an oven at 100°C. Their average temperature would be 37.5°C – an ideal body temperature, but that would be irrelevant because they would be dead. Averaging must take account of the range, etc and this has not been done. In fact, the variation given in these separate forecasts indicate that the quality of the forecasts is very debateable, given that they are all for the same variable, and over an extended period of time each forecast would result in a very different outcome. Averaging them is not a robust approach.

In addition, the emphasis on just these two employment categories is unwise as the total employment market is important – it is likely employment in some employment categories will fall, so if there is growth in any employment category it must serve to mop up those unemployed as a consequence of business closures, as well as create new opportunities. Concentrating on just two employment categories weakens this report, and lessens the credibility of its conclusions. Finally, statistics given for actual changes within Guildford cover the period 2004 to 2012 – but this should be unacceptable for a report published in September 2015, data up to and including 2014 must have been available at the time of publication.

A final example of the selective use of statistics is from section 6.11.2, in which the OPDM Employment Land Reviews Guidance Note is quoted. This was used to provide a ratio used in producing forecasts for land requirements, namely 1:0.45. However, using an average of the medians was inappropriate in Guildford – land costs are high in the borough, and a large part of the borough (89%) is designated green belt and so using this average ratio betrayed a lack of ambition to use land efficiently. An ambitious goal would be to do better than the best, and this would be provided by using an average ratio slightly beyond the range given, for example, 1:0.60. This could be achieved, for example, by ensuring that all car parking was provided by underground parking, beneath buildings, so that open space could be retained, and by building several storeys above ground where this is possible. Surface car parking and single storey buildings are inefficient in their land use. Using an average land to premises ratio, as AECOM did, showed a total lack of ambition to use land efficiently. Using land efficiently would mean there would be no requirement for additional land to be set aside for employment purposes – and this land could be used instead for housing.

Overall, the Employment Land Assessment displayed a selective use of statistics to give an inaccurate overoptimistic picture of the growth potential in local economy as well as displaying a complete lack of ambition to use land efficiently. Consequently, its conclusions regarding land requirements for employment use should be disregarded. In the paragraphs devoted to transport, there is a statement “During the plan period Guildford will experience significant improvements to transport infrastructure including new stations at Guildford West (Park Barn) and Guildford East (Merrow). This is presented as a factual statement. However, Network Rail has made no commitment to approval of these stations, despite having recently published a study that examines investment needs on this route up to 2043. In this study, the possibility of these new stations is mentioned, but only as a response to the consultation that preceded the publication of the report. Details given of proposed projects that will be included in their next spending plans (to cover the period 2019 to 2024) include no provision of any description for these new stations, and in fact the emphasis is on increasing the number of trains per hour during peak periods. Adding a further two stops would reduce the ability to add additional trains, and so goes against the need to increase capacity on the line by adding trains. Thus it seems highly unlikely that these new stations would be provided within the time frame of this Local Plan, if ever. In addition, it is clear from the Network Rail report that changes to platforms in Guildford Station will not be made in the next budget period (up to 2024) and that the inclusion of this project in the next budget period (after 2024) is dependent on further studies. Similar timing constraints apply to the electrification of the North Downs Railway. So the delivery of many of the infrastructure improvements, particularly new stations, within the timeframe of the Local Plan is, at best, doubtful. To present their provision as a certainty was simply dishonest.
Finally, according to the Spatial Vision, the delivery of housing as described in the plan is predicated on the delivery of infrastructure, yet there is no monitoring system in place to ensure that infrastructure is delivered, with necessary services provided. As an example, consider the need for GP services. It is possible to build a doctor’s surgery, but there is a national shortage of GPs, so there are considerable problems in recruiting doctors needed to man existing surgeries. Thus building premises are no guarantee that services will follow, even assuming funds are available. No monitoring systems or programmes are described in this spatial vision and so one has to assume there are none in place to monitor this programme to ensure that services, as part of necessary infrastructure, are actually delivered. No red lines for specific developments have been provided, so that it is clear exactly what infrastructure must be provided before a specific development can be started. As no monitoring systems are in place, there is nothing in this vision to suggest that the promise made by Councillors, that infrastructure will be delivered before additional housing is built, will be honoured.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A26

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
- directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
- ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
- adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.
- We object

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
2.1. Policy S2: Planning for the Borough
I object to this policy. Specifically, I object to the housing target of 12,426 as this has been developed using a model that uses assumptions that have not been made public. Essentially the model uses population statistics that are developed over a 5-year period, but these are projected forward to 2034. Population statistics should not be used in this way unless accompanied by an analysis of underlying factors that could cause changes to current population trends. Factors such as changes in death rates or changes in immigration levels have not been considered. A more thorough analysis was performed by Neil MacDonald of NMSS and his conclusion was that a lower housing target would be appropriate for the borough.

2.2. Policy H1 (and H13): Homes For All
I object to policy H1 as it fails to adequately consider the provision of social housing which is desperately needed. A paragraph (4.2.8) that considered housing density has been deleted from the previous iteration of the draft plan, but densification of housing within Guildford town is an alternative to building on Green Belt sites. Lord Rodgers and many other planners make cogent arguments for the densification of towns and cities, but these have been ignored. It is essential that land is used efficiently, especially previously developed land. A further objection is to the housing target for students – one objective should be to provide accommodation on the campus for all first-year students as well as for at least 60% of other students. This would make more housing available within the town.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp17q/413  Respondent: 8806849 / Roland McKinney  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): (No)

1. I object to the draft Local Plan because overall the draft Plan is not sound, and the changes made have not improved it. There are many reasons for believing the plan is not sound, and I have given some of these below. I have given others in objections previously made, and these should be considered with those given below as there is a great deal of detail relevant to this draft Local Plan in my previous submissions.

1.2. This draft Local Plan does not comply with the planning guidelines given in the NPPF, for example, it does not provide exceptional circumstances that are required to be shown before building in the Green Belt can be approved. It contravenes NPPF policies in many other ways, for example, one of the purposes of the Green Belt is to ensure that recycling of previously developed land will occur, and this draft Plan does not do that, about 70% of the dwellings proposed are to be built on green fields, most of which are part of the Green Belt.

1.3. There has been no application of constraints to the housing target. There are many appropriate constraints, such as the existing heavy burden on local infrastructure, which will be further overloaded if the proposed housing target is adopted. One symptom of the infrastructure overload is heavily congested roads across the borough, which gives rise to serious air pollution - but this is not recognised within the draft Plan. There is a need to adopt policies that will improve air quality and ignoring air quality issues is a serious defect in the draft Plan, and so it should be rejected.

1.4. This draft Plan lacks credibility in that it proposes to expand retail space within the town, despite the fact that there are already many unoccupied retail shops within the town. Current retail trends include an ongoing move to internet shopping and home delivery, reducing the importance of bricks and mortar retail outlets. This move is likely to be accelerated by
rapidly increasing costs associated with fixed retail premises, such as government mandated increases in labour costs (increases in the minimum wage, auto-enrolment pensions, apprentice levy, etc) and higher business rates. Given increasing costs, it is possible that current trends in retail will impact on leisure outlets, with a growing emphasis on the home delivery of, for example, meals, leading to the closure of some food outlets. The draft Plan does not take account of current trends, nor does it examine the future impact of these trends and means the current draft Plan is not fit for purpose.

1.5. Risk analysis within the plan is inadequate, for example, the risk associated with building too many dwellings has not been considered. That there is a risk associated with a high housing target was shown by the examples of the national housing markets in, for example, Spain and Ireland, in the period 2007 to 2009. It was also noteworthy that the house building programmes in these two countries provided dwellings well in excess of actual need. Despite this being obvious, the price of housing actually increased – until the financial markets crashed in 2007. This was followed by house price crashes that caused great hardship to many households in both countries. It is simply folly to adopt a housing target that is greatly in excess of previously delivered housing without the concomitant consideration of the risks associated with this policy.

1.6. The social housing policy within the draft plan is inadequate and relies on the private sector to deliver “affordable” housing. One of the lessons from the Grenfell Tower disaster is that the current management of social housing is inadequate – witness the installation across the country of external panels that are now deemed to fail flammability tests. This shows the need to re-examine social housing provision and management at both a national and local level. In the specific case of Grenfell, the management company apparently ignored residents’ concerns regarding fire safety equipment and policies. This failure undoubtedly contributed to the disaster. Up to now, Guildford Borough Council have ignored valid concerns regarding their Local Plan, and this bodes ill for the future. The draft Local Plan should be rejected and the council told to think again regarding the provision and management of social housing.

1.7. The draft Plan assumes that house prices are simply a consequence of the balance between supply and demand, and that supplying more houses will result in lower prices. Examples previously cited – Spain and Ireland show that this is not the case. Even though there was a glut of houses, prices in these countries did not fall until after the financial crash. High house prices in the borough (and nationally) are a result of many factors, it is too simplistic to assume prices are determined only by supply. Note that nationally and locally house prices fell or were stagnant during 2008 and 2009 – but this was not because of a huge expansion in the supply of housing. The monetary policies of successive national governments have resulted in an unprecedented period of low interest rates and have fuelled an asset price boom, especially in housing. To compound the effects of asset price inflation, real wages have fallen during the last 10 years – the Office of National Statistics estimated that real wages have fallen by 3.1% since May 2008. This means that the affordability ratio between house prices and wages is very high – but this is not just a supply/demand issue. The draft Plan should be rejected because it is unrealistic to assume house prices are a consequence of only the balance between supply and demand. It should recognise the importance of other factors, with due consideration given to these.

1.8. Guildford Borough needs a large expansion in dwellings for first time buyers and in social housing. Ideally, these would be located close to transport hubs, to reduce the reliance on motor vehicles – and transport hubs are within Guildford Town. Yet much of the housing proposed will be outside the town, with only approximately 10% of the housing proposed inside the town centre. Residents in sites located at some distance from transport hubs will be reliant on motor vehicles – resulting in increased congestion and air pollution. This draft Plan should be rejected because of poor spatial planning.

1.9. Yet another weakness in the draft plan is the lack of the consideration of alternatives, such as using more brownfield sites within the town for housing. The absence of any reasoning for arriving at a plan that proposes building about 70% of housing outside the town on countryside and Green Belt sites suggests that alternatives have not been adequately considered, and so the draft Plan should be rejected.

1.10. Many of the studies and reports that make up the evidence base are weak, with some being indefensible, such as the Green Belt and Countryside Study. Many councillors have commented negatively on this study, yet the conclusions from it have been used to shape the draft plan. There are other examples of poor studies, such as those that underpin the housing target and the Employment Needs Assessment. A plan based on a weak evidence base is bound to be fatally flawed and so the draft Plan should be rejected.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I am writing to object to the proposed local plan for Normandy and the scale of new development being considered.

I was very surprised to learn that it is being planned to increase the number of homes in Normandy by 100% - adding 1,100 new homes, plus a secondary school for 1,500 pupils, and 6 traveller pitches.

I am well aware that there is a housing shortage, and that we should be prepared to expect a level of new homes in Normandy, but to double the number of homes will be an excessive intrusion in a mainly rural area, and must surely be against planning policies and principles.

The land between Normandy and Flexford is, I am told, Grade 3 arable and pastoral land, and this plan will cover this entire area with housing. As this is the only remaining open rural area in the Thames Basin Heaths Special Protection Area, then surely the area requires special protection itself.

The TBHSPA is designed to protect rare species, but if we continue to break up large open areas then even common species are likely to become rare.

To add such a large number of houses, suddenly filling in an area that was not urbanised and largely open rural land, is bound to have a much higher impact on the areas needing protection than if the same number were added to the edge of an existing highly urbanised area, or to a brownfield site.

We are lucky in Normandy not to have many street lights, we can actually sleep in the dark, and see the stars at night. I doubt that such a large development would be allowed without a lot more street lighting being required to meet modern standards. This increased light will be unwelcome not just for the people living in and Normandy and Flexford, but also for the wildlife.

We already have two very difficult junctions at the bottom of Glaziers Lane and Westwood Lane (particularly this one), and these will only get more difficult and dangerous with the significant increase in cars (approx 2 per home), plus all the extra traffic that a school for 1,500 pupils will create. The local roads are not designed for such a volume of traffic.

Just because someone says they will build a school should not be a good enough reason for excessive new development in green belt and open fields. There is no need for a school here, and to build so many homes to provide pupils for a school that wasn’t needed is ridiculous. Research says there are enough brownfield sites in Surrey for well over a million homes. So surely there will be a brownfield site on the outskirts of Guildford that can provide that school where it’s needed – not in the middle of nowhere. Not only that but if Ash Manor and Kings college are undersubscribed then where is the so called need for a school between the two.
I have also seen it mentioned that there would be much needed new retail space provided as part of this development, as if the people of Normandy and Flexford were suffering from a lack of shops. These days it’s unnecessary to have shops on the doorstep as the supermarket will deliver almost anything you could need at anytime – if we needed the luxury of local shops, we wouldn’t choose to live here in the first place.

Please don’t break the election promise to always protect the green belt

Additionally, there is not the infrastructure to support the numbers of people and cars you suggest and I very much doubt the council or the developers will do anything meaningful that will make a difference to accommodate these increases and putting traffic lights up does not count as meaningful. To expect the wonderful words such as “appropriate”, “sustainable”, “less reliant on cars” to actually happen is just naïve.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Attached documents:
I live near an already overwhelmed choke point at the cross roads between Effingham common road and Forest Road, near Effingham Junction station. In the morning and evening this is clogged, the idea that building another 2,000 homes on Wisley airfield, many of who’s owners will drive to the station, will not have a significant detrimental impact on the lives of the current population is incorrect. The idea that putting in traffic controls will be sufficient to cover this up is incorrect.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

It is often difficult to park in Guildford and approaches impossible during the winter months.

We do not have the infrastructure to cope with any more building. Do we not have brown field sites which are not used? We build office spaces we don’t need, why not build affordable houses. But we don’t need or want whole new towns or villages.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I have lived in the Guildford area for most of my life. During that time London has spread right out to the M25 and its impact beyond. I drive 16 miles to work and it usually takes me about an hour and can easily take longer. And it doesn’t take a great deal and the whole of Guildford can be backed up with traffic. We are clearly not coping with the number of people who live here already.

You have been elected to look after our best interests and I do not believe anyone locally believes that getting rid of the green belt is either in our interests or should be within your remit without a vote. And I do not believe that anyone who lives locally wants further urban sprawl here.

We are looking to you to stand up to demands which are unreasonable and not wanted by the majority of local people.

You can take this email as a NO to taking any local villages out of the Greenbelt.

Many thanks. I appreciate the privilege we have of living in a democracy and being able to express our concerns.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
Policy D4: I object to the insetting of villages (meaning in fact, removal of villages from Green Belt protections) and the fact that they will be suffer from higher density development and the resulting increase in traffic, use of infrastructure which is already under pressure. We object in particular to the insetting of West Clandon, Send and the Horsleys. This will have a detrimental impact on Green Belt openness and the views in and out of the AONB in direct contravention of Policy P1 and P2.

Objection to the Guildford 2016 Local Plan

I object to the 2016 Draft Local Plan as a whole and in particular we object to the specific issues (listed below). I believe that this deeply flawed Local Plan will have a direct and detrimental effect on the amenity currently enjoyed by residents of East Clandon and to the even greater detriment to our neighbouring villages of West Clandon, Ripley, West and East Horsley. It erodes the openness of the Green Belt and endangers the beauty and views in and out of the Surrey Hills AONB.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the Settlement Boundary which has been imposed on East Clandon without any consultation. This imposition provides no protection to further development outside of the settlement boundary (Policy P2 para 4.3.25) and is deemed by us as being unnecessary in an already tightly developed ancient and rural conservation village with high archaeological potential. We demand that this proposal be removed as it will endanger the openness of the Green Belt, the views in and out of the AONB (protection of the AONB Policy P1) and the character of our village.

1. Policy P2 – Green Belt: I object to this significant erosion of the Green Belt with the proposals for large towns being developed on Green Belt land thereby removing the openness of the Green Belt. We note in particular the huge developments proposed for the North East quadrant of the borough which will adversely affect our amenity, but also unfairly targets our tranquil rural villages because we can provide ‘dormitory’ facilities for commuters to London. These developments directly affecting our villages are the proposals for Wisley Airfield, Gosden Hill Farm, various farms and tracts in the Horsleys and Garlicks Arch at Send.

Further, on the erosion of Green Belt and we object that Policy P2 is not met where it states that Green Belt should be protected. I object to the disproportionate use of Green Belt land for housing – some 65% of the housing proposed is on Green Belt and with little consideration being given to redevelopment of brown field sites.

Answer (if comment is on questions 1-7 of the questionnaire): ( )
I object that GBC are contravening the NPPF framework stipulation in paragraph 87 with the proposed developments at Gosden Hill Farm, Ripley, East and West Horsley and Garlicks Arch, Send. Paragraph 87 states “As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances.” and GBC have not proven any special circumstance for developing on these Green Belt areas.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy S1 not offering sustainable development as regards roads and rail infrastructure which currently does not cope with demand, congestion on the A3 in particular, but also other A roads in the area such as the A247, the A246 and then there is the already overcrowded and slow train system for those already living in the borough and needing to commute to London. No pre-emptive planning has been made to alleviate these real problems which will be much exacerbated by large increases in housing.

I specifically want you to note the winding, narrow and dangerous route via the A247 through West Clandon which then drives people to use a cut-out with the even narrower rural road, the Ripley Road, through East Clandon to and from the A3. This will be much exacerbated with the large increase in housing twinned with large increase in cars and travel.

Continuing with Policy S1 (Presumption in favour of Sustainable Development) I object that this is not being met and that GBC are contravening this when it is clear that no fixed plans are available to improve the provision of shops, medical facilities, schools in our immediate area (besides roads and rail already mentioned) to service us. If the GBC were serious about improving the infrastructure and sustainability of our communities, they would have secured plans and funding to ensure these facilities are available and not just at the behest and hoped-for goodwill from the developers. Further, how will developers be held accountable to their promises to build infrastructure? Stories are legion of developers reneging on commitments as the ‘money runs out’ even though vast profits will be made from turning agricultural and Green Belt land into highly valuable housing land.

Comment ID: PSLPP16/3621  Respondent: 8808321 / Ian Peacock  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
My specific points are:

1. I object to Policy S2 for the proposed provision of the very high overall housing numbers of 13,800 new homes (690 new dwellings being built every year for 20 years) and we object on two grounds: these housing numbers have been imposed on us with no real consultation being undertaken with the residents of East Clandon and the borough as a whole. Secondly, the housing numbers are based on a high-growth economic development plan which in itself has had no consultation with us and this combined with estimated demand from London residents will turn Guildford into a dormitory town for London.

Further, I object to the fact that no real economic or housing demand factors have been provided by the borough planners to substantiate the very high housing target of 13,800 new dwellings over the next 20 years. This is in direct contravention of the NPPF’s requirement for the planning authority to provide meaningful consultation.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the fact that GBC have not met the requirements of the NPPF Paragraph 155 which imposes an explicit obligation to have early and meaningful consultation. This has not been met in a number of areas by GBC. We have not had a meaningful consultation on imposing a settlement boundary on East Clandon, on the absence of meaningful economic and population growth figures for Guildford showing various scenarios with high, medium and low growth scenarios being offered.

I demand that there should be a significant challenge to the GBC scenario planning and the housing and growth numbers should be revised and especially in the light of uncertainty and change which will accompany Britain’s withdrawal from the EU.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

There are NO exceptional circumstances or justification for removing much of West Horsley and other villages from the Green Belt. W. Horsley has many listed and historic bldgs. and a ‘country feel’ which is why most people who live in the area do so.

The roads and infrastructure are already at full capacity as indeed are most of this part of the S.E.. Witness the appalling misery on the M25 and A3, & Cobham roundabout. If you had a vital journey (say to the airport) you would not take the chance by using the main roads. Even the ‘rat-runs’ are getting impossible. This is seriously affecting the quality of life in...
the area, for which GBC is largely responsible. The parking in the villages is already insufficient, and there are long queues for the Surgeries. A&E in G'ford is already often unable to cope.

The Green Belt was sensibly devised to control urban sprawl, and it is at times like these that it should be strengthened.

There is often flooding on local roads, and one sees people driving round wasting fuel etc. to cope with these problems.

I would like to make some comments about the draft plan. We note that A41 was removed from the list of sites in the previous plan which is very good news, but we also understand that much of the site is being retained for the possible rebuilding of a local school. We would object most strongly as it is part of an 'open' area backing on to West Horsley Place which is a Grade one property. The AONB in the S part of Horsley would look over this area, and clearly most of West Horsley should be left in the Green Belt. There are many listed properties and many rural views to be retained. It seems that the Borough Council continues to pursue it's reckless 2014 decision to take many of the rural villages out of the Green Belt, which policy is almost unanimously hated

The Policy is not Sound in that a satisfactory explanation and clear reasoning and evidence is not shown as to how the Council has allocated Site A22 and its surrounds.

The selected site does not use all the land that is ready and available for housing.

Some 2 ha of land immediately to the north of the site and shown coloured green on the attached Plan (known as Tangle Place Farm south and bounded by Tangle Lane to the West and the boundary of the 400m SPA zone to the North) ) is fully available for housing purposes and shares exactly the same planning considerations as the allocated site A22.

The Council has submitted no clear reasoning and evidence why this site should be excluded for development. Indeed the published evidence base in the GBCS expressly indicates that the land is within a Projected Development Area (SITE J3).

Based on the Councils density guidelines some 80 new dwellings could be built here.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy site A22 : Keens Lane

The Amendment no 7 on the Plan appendix describes a change to this Policy as "incorrect GB boundary" I cannot see where any change is being made. The increase in the number of units is not justified in any way.

The incursion of the site into the 400m SPA zone is not justified and is dependent on further approval by Natural England. As such it cannot be relied on as an allocation at this stage.

This site remains poorly drawn and illogical and not reflective of the character of the Green Belt hereabouts.

I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. You are well aware from previous correspondence that there are numerous specific reasons why the proposed development on this site is unsuitable and you yourselves refused the development proposal unanimously very recently. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

I object most strongly to your proposals for wholesale changes to the Green Belt around Ockham, Ripley and Send. This serves the purpose of providing a buffer between the urban sprawl of London and Guildford itself. There are brownfield sites where housing can be provided without encroaching on the Green Belt.

I object to the disproportionate allocation of housing in this particular part of the borough. Over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys, an area that at present has only 0.3% of the population of GBC.

Reference 16/P/01397 Fairlands Farm

I also object to this application.

Again the land is Green Belt. The reason given for dropping the nearby Liddington Hall and Fairlands sites from the Draft Local Plan was because of the "high sensitivity Green Belt". The same should apply to the Fairlands Farm site. The arguments in the application that there are "highly exceptional" reasons is nonsense. The community benefits are slight and Fairlands already has a thriving community centre and playing fields. The community benefits are arguably greater as the development exists today. To argue that Guildford does not have five years of housing supply is to disregard the Regulation 19 consultation that ends this month. The legislation cannot have intended to allow this sort of opportunism.

I also object on the grounds of increased traffic as per my objection to the Keens Lane development.

I confirm that I am happy for my comments to be made public & require an acknowledgement of this objection

Answer (if comment is on questions 1-7 of the questionnaire): ()

Site A22

I strongly object to the inclusion of land off Keens Lane, Worplesdon (Site A22) in the GBC Draft Local Plan for the proposed development of 140 homes and a care home and believe this is inappropriate for three main reasons:

1. The area is Green Belt, which should be retained and not built on. Surrey County Council is historically the creator of the Green Belt and has previously agreed to:

   To use its power to protect Surrey's Green Belt.

   1a To support the National Planning Policy Framework (section 9 - paragraphs 79 to 92) and the Government's policy of protecting the Green Belt.

   1b To make Surrey's MPs and the County's Districts and Boroughs aware of this resolution.

   1c That any Green Belt development in the County is in line with the needs and wishes of Surrey residents.

ON THIS POINT ALONE THIS DEVELOPMENT MUST NOT BE INCLUDED INTO THE PLAN AND ANY DEVELOPMENT APPROVED.

1. Keens Lane is a narrow lane and building more homes leading onto the already over busy Worplesdon Road and Aldershot Road via Gravetts Part. Parts of these lanes are little more than single track and used widely by walkers and horse riders. To increase traffic levels will potentially endanger human life.

2. The proposed development site is close to Whitmoor Common and a Site of Special Scientific Interest, and would have a damaging effect on ecology and it is also bounded by Broadstreet Common. The open nature of Worplesdon should be retained. The land is part of the important wildlife corridor between Whitmoor and Broadstreet Commons. As such, developing the site would conflict with NPPF paras 113, 117, 118, and 119.

Historical previous applications in the area have been turned down by the inspectorate for the following reasons:

The proposed development, in my opinion, would further impair the efficiency of both the A323 and A322 which, as principal roads connecting Guildford to the M3 and the major growth area, must be safeguarded..."

In 1983, the County Engineer wrote to the then MP concerning the Surrey Structure Plan: "Accordingly the County Council as Highway Authority will seek to prevent the grant of any planning permission which would significantly increase traffic to the south of Liddington Hall". In 1985, in spite of the above, an attempt was made by the County Council to build on Liddington Hall Farm, which at that time they owned. The Inspector recommended: "In my judgement, the discharge to A3222/A323 of traffic from 700 dwellings additional to that arising from expected development at Tilehouse, Stoughton and from general growth of traffic would add unacceptably to prevailing congestion and danger on the main framework roads."

In 2003, the Officer Report to the Executive on the Deposit Draft Surrey Structure Plan 2002 stated:

"The findings thusfar suggest that the transport impacts associated with the north west community [the Liddington Hall site] would be significant and difficult to resolve."

The traffic on our local roads has increased significantly over the past few years making these comments in my opinion even more relevant.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to object to the Guildford Plan Planning Policy (Local Plan Consultation) The huge number of homes proposed takes insufficient account of major transport and infrastructure problems. The numbers used are far too high as evidenced by the data gathered and published by the Guildford Residents Association. Evidence gathered prior to Brexit which should also be factored shows the figure for new home should be 510 per year from 2013 to 2033.

Guildford Borough Council needs to be transparent about the calculations used to produce their figures.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy A22: Land north of Keens Lane, Guildford - OBJECT
I object most strongly to the increase of housing provision for this site in the revised 2017 Local Plan. The site is totally unsuitable for this type of development anyway and any increase in housing numbers will just compound the problems. The adverse factors are so strong that I find it amazing the site is being put forward for an increase of any size. Some of them are listed below:

a) It is good Green Belt. The reason given for dropping the neighbouring Liddington Hall site is because of the "high sensitivity Green Belt". The same should apply to the Keens Lane site.

b) It is part of the important wildlife corridor between Whitmoor and Broadstreet Commons. As such, developing the site would conflict with NPPF paras 113, 117, 118, and 119.
c) It is very close to the SPA of Whitmoor Common and the damage to the Common from the development could not be gainsaid (see the comment on Policy 5). None of the SANGs that have been suggested would offer anything like an alternative.

d) It would add to the chronic traffic congestion in the sector. Traffic is a major factor that has been cited in the rulings in the rejection of three previous proposed developments in this immediate area:

In 1976, the inspector recommended: "The proposed development, in my opinion, would further impair the efficiency of both the A323 and A322 which, as principal roads connecting Guildford to the M3 and the major growth area, must be safeguarded ...".

In 1983, the County Engineer wrote to the then MP concerning the Surrey Structure Plan: "Accordingly the County Council as Highway Authority will seek to prevent the grant of any planning permission which would significantly increase traffic to the south of Liddington Hall". In 1985, in spite of the above, an attempt was made by the County Council to build on Liddington Hall Farm, which at that time they owned. The Inspector recommended: "In my judgement, the discharge to A322/A323 of traffic from 700 dwellings additional to that arising from expected development at Tilehouse, Stoughton and from general growth of traffic would add unacceptably to prevailing congestion and danger on the main framework roads."

In 2003, the Officer Report to the Executive on the Deposit Draft Surrey Structure Plan 2002 stated: "The findings thus far suggest that the transport impacts associated with the north west community the Liddington Hall site] would be significant and difficult to resolve."

The only thing that has changed is that the traffic levels have increased hugely. These previous rulings are vital and cannot be ignored.

e) Keens Lane & Tangley Lane are too narrow largely for two cars to pass each other, mostly without pavement, partly with high banks & are used widely by horse riders and walkers and the increase in traffic generated by the development (or any development here) presents a hazard.

f) Both the land and lanes are often flooded in winter months due to a high water table. Further development will exacerbate this problem.

All in all this development should not be allowed to go ahead.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

2. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as well as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as well as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard my objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

3. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

Answer (if comment is on questions 1-7 of the questionnaire): ()
1. APPENDIX D

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY A25 - Gosden Hill Farm

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.
The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Higheotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.
The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

1. POLICY A43 AND A43a – Garlick’s Arch

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council’s eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brownfield site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).
The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic. The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

8. POLICY D3

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
1. **POLICY D3**

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

1. **POLICY D4**

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

---
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/5272  Respondent: 8810113 / Louise Stewart  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E1

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/5273  Respondent: 8810113 / Louise Stewart  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E2
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY E2**

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/5274  Respondent: 8810113 / Louise Stewart  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **POLICY E5**

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/5288  Respondent: 8810113 / Louise Stewart  Agent:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY E6

I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognise that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/“Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the Borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/5281  Respondent: 8810113 / Louise Stewart  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7
I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. POLICY H1

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students are accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university’s ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H2

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale value of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.
It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY H3

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150
homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY II

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy II)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and
with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritising greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the Borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognising this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY I2

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 and M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the fact that the infrastructure has not been properly assessed and is inadequate to deal with current housing levels, with such a large increase in housing the roads will not be able to accommodate the huge increase in traffic. There are currently serious delays on all roads during the rush hour and they are busy at all times of the day.

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY I3

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to building on the Green Belt because the essential characteristic of Green Belt is its openness and permanence (National Planning Policy Framework paragraph 79).

I set out below my objections to specific policies and matters within the Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
### 1. POLICY P2

I OBJECT to not protecting the Green Belt (Policy P2)

This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development,
claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

**Answer (if comment is on questions 1-7 of the questionnaire):** ()
1. SITES - POLICIES A1 TO A57

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. The plan says that “allocating these sites does not grant planning permission for development.” However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

4. POLICY P4

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

1. POLICY S1

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognise that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact on existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. POLICY S2

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 homes being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinised by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not
transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN are not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London’s commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighbouring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of
identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. **Questions posed by Guildford Borough Council as part of its consultation.**

Questions from GBC

24.A. **Question 1: The evidence base and submission documents**

The Proposed Submission Local Plan: strategy and sites is based on up-to-date evidence. The evidence base documents contributing to the preparation of the plan are listed in Appendix D and can be found on our website (links open in a new window).

Do you agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant?

**ANSWER**

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.
In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

24.B. Question 2: Legal Compliance

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole is legally compliant? Please provide the following information being as precise as possible:

- why you consider it is or is not legally compliant and
- what change(s) (if any) you consider necessary to make it legally compliant, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

24.C. Question 3: Soundness

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound? Please provide the following information being as precise as possible:

- why you consider it is or is not sound and
- what change(s) (if any) you consider necessary to make it sound, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. "Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt." Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.
2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.
3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt.

Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.
3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.
4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.
5. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation.
6. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation.

7. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound.

8. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018.

9. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars.

10. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.

11. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

12. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

13. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

14. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

15. In common with many others I do not believe the housing figure has been properly calculated and believe it overstates housing need. The Council has prevented councilors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

16. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

17. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

18. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

19. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
24.D. Question 4: Duty to cooperate

Do you consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate? Please provide the following information being as precise as possible:

- why you consider it has or has not complied with the Duty to cooperate and
- what change(s) (if any) you consider necessary to make it comply with the duty to cooperate, explaining why this is the case.

ANSWER

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

I trust that the objections made above are fully taken into consideration and that the 2016 draft Local Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the fact that new sites have been proposed in this consultation which have not previously been considered, which is not appropriate at this stage.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object to the development of a 1800 home development and a new business Park on the beautiful Blackwell Farm.

Apart from the stunning views that the Hogs Back provides, the area is classified as the Surrey Hills, which I believe is a ANOB and should be protected.

The wildlife of which there is many would be destroyed and the additional traffic would be a nightmare. The area does not have the infrastructure for this development.

It should be on brownfield land and it would destroy tourism who like to walk in the area.

I totally object to this development.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A46

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

To whom it may concern:

I am writing to object to the proposed development at Normandy, Surrey for the following reasons:

I gather GBC are required to demonstrate ‘exceptional circumstances’ to justify the release of Site A46 from the Green Belt. There is NO clear evidence of any exceptional circumstances within the Local Plan that justify this. It does not take into account the red sensitivity status of the site, and there is no evidence why such a vast development needs to be developed on this sensitive area, as opposed to other more well suited locations.

I gather the whole reason this development is being proposed is because of the ‘so called’ need for a Secondary school in the area, otherwise this site would not even be considered. However councillor Keith Witham I believe has conducted an extensive survey which highlighted that within the local secondary schools there are currently 736 vacancies at the nearest secondary schools serving the Western parishes – not accounting for the 480 extra at the new Technical College to open in 2018 – a combined capacity of 1,216. In addition I believe SCC has already approved expansions at the County School, Guildford and St Peters. In addition to this, the birth-rate in Guildford has fallen over the past two years, so this is another reason why deciding to proceed now, could be a devastating waste of our countryside. The case for the need for a new secondary school in Normandy is therefore not proven or needed and therefore I believe this development should not go ahead.

TRANSPORT & ROADS

The roads surrounding the proposed site are already full of traffic, and roads such as Westwood Lane and Glaziers Lane, are just not designed for the volume of traffic proposed. The huge lorries that we currently have to cope with, along with cars travelling too fast, I’ve already had two cats killed within a year on Glaziers Lane, they can’t cope with the volume of traffic as it currently stands, let alone any further development. Cars don’t stick to the speed limit and young children are already vulnerable on these roads, let alone if lots of other cars were to come along. The railway bridges are old and won’t cope with the additional cars and the headroom of the Westwood Lane bridge would prohibit double decker buses from accessing the proposed school.

ENVIRONMENTAL CONSIDERATIONS
A development on this scale, would kill off thousands of beautiful wildlife that surround the area. This is an environment-sensitive location next to one of the component SSSIs of the Thames Basin Heaths Special Protection Area for birds.

There are many vitally important ecological networks that surround the proposed development area namely Ancient and Semi-natural Woodland, Veteran Trees, Hedgerows, Semi-improved Grassland, Farmland and a Stream, this proposed development would destroy a number of these habitats including Semi-natural Woodland, Veteran and Mature Trees, Hedgerows, Farmland and Semi-improved Grassland, plus would have indirect effects on Ancient Woodland habitat and the Stream through pollution (light, noise, litter and diffuse land and road runoff). A number of protected species have been recorded within either the proposed development site or 500m to 1km of the proposed development site. These include Hedgehogs, Dormice, Great Crested Newts, Barn Owls, Stag Beetles, Skylarks, Common Toads, Common Lizards, Grass Snakes, Adders, Slow worms, Badgers and Bats (including potential roosts within a number of veteran and mature oaks and other trees across the proposed development site and within the woodland blocks).

Light pollution from this proposed development on this scale would be starkly visible from Surrey Hills Area of Outstanding Natural Beauty (AONB).

Effect on surrounding woodland and stream habitats that adjoin these roads including the SNCI’s of Normandy Common, Normandy Pond and Wyke Churchyard.

I also think the pollution levels of the increased traffic in the area, could well be damaging for people’s health, particularly those of the elderly and young, of which, Normandy has many.

**INFRASTRUCTURE**
The local roads, Church, Primary School, Doctors and Library just can’t cope with such a huge development planned.

**To SUM UP**

I moved to Normandy nine years ago, as I loved the open green fields and rural and small village like feel. Having the green open fields provide a great environment for enjoying the benefits of fresh air and exercise, both for me and my children. It’s a great place for children to learn and enjoy the wildlife, to see a deer bouncing along, or a rabbit running past or looking at all the colours on a Jay. It’s a great environment and one that is likely to be ruined if a huge concrete development was to be placed into the heart of the community.

While I understand that **SOME** development might need to take place, I do not feel that Normandy is a suitable place for such a vast development to be considered. Especially when there is no **EVIDENCE** that shows we have a need for it. **PLEASE do not destroy the beautiful area that I live in and the habitat of so much wildlife**

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I object to the proposed development sites A37, A38, A40, A41 & A 39.

The cumulative impact on these development site would immense. The number of houses proposed is excessive & disproportionate in relation to the rest of the borough. It will destroy the rural character of the communities.

These sites will put unsustainbale strain on already stretched local facilities & infrastructure, including, public transport, parking, schooling, medical facilities, sewage, surface drainage (already prone to flooding) & shops.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to GBC’s proposal for the following reasons:

- Over 700 residents signed a petition last year objecting to the proposed settlement boundary change. This issue has united the community with widespread support from local clubs and organisations. I cannot imagine their views will have changed.
- If GBC support the expressed views of the local residents to protect the fields from development they should retain them within the current green belt boundary and keep them outside the village settlement boundary. The boundaries have been there a long time SO THERE IS NO VALID REASON TO CHANGE THEM.
- The elevation of this land which is 32 feet above King’s Road is the highest in the local area and any housing development built on it would tower over the village community facilities and the surrounding area.
- The land contributes to the open character of the village and provides a green and pleasant setting.
- Lastly- access to this land is via Chinthurst I stress the word Lane which already suffers from fast and through traffic to the detriment and often danger of local residents and pedestrians. This Lane does not need more traffic.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT in the strongest possible terms to the above plan. As a retired person I do not have the facilities or the resources to enter into every aspect of this plan. But I particularly OBJECT to those sections listed below appertaining to the area of West Horsley and the adjacent areas proposals.

I OBJECT in detail and in general to this plan

I particularly OBJECT to the method whereby this plan has regurgitated inaccurate, badly researched and unjustified information and is an obvious ploy to get around the previous objections voiced within West Horsley and, indeed, in all the villages affected.

I OBJECT to being forced to undertake this exercise again and that my previous OBJECTIONS have been put aside. This cannot be democratic.

I OBJECT to Policy Q: Green Belt and the Countryside: Surrey Hills Area of Outstanding Natural Beauty (AONB)

I am totally opposed to the plan affecting all the Guildford Villages and to West Horsley’s removal from the Green Belt by insetting and extending the 2003 boundaries. There are no exceptional circumstances or other justification for the new Green Belt boundaries that will result from the proposed insetting. This study is flawed.

The West Horsley Parish is well established with low housing density settlements with a considerable number of historic buildings and the Council fails to make a case for locating large numbers of homes in the Horsley or neighbouring villages.

I OBJECT to the Polices S1 Presumption in favour of Sustainable Development, Borough Wide Strategy, HI Homes for all, H2 Affordable Homes.

No accurate or acceptable case has been made for provision for 13,800 new homes over the period 2013 to 2033. The number of homes is too high and unsustainable in Guildford’s villages. The current infrastructure is strained and at breaking point and there are no plans for addressing the infrastructure

The proposals for West Horsley are clearly unsustainable for the proposed high volumes of new housing development

I OBJECT to the development of 385 homes on the proposed sites in West Horsley. The proposals are at much higher densities than currently in the village and will be totally out of character with the existing mix of different housing styles and the layout of the village.

I OBJECT particularly to the proposals for site A40 in that this is the area I know best. The A40 site is unsuitable for development and the Guildford Council has several times rejected applications to build on the site. It has a high water table, is prone to flooding in even medium rain fall and in high rainfall there are problems with flooding of the roads and the overflow of sewage. The work to make such a site suitable for development, even for a third of the homes specified would be out of proportion to any return on capital invested.

The drainage affects are acknowledged by the water authorities who point out that the downstream effects are sizeable and probably uneconomic.

Importantly this is an area of calm, peace and quiet within the green belt and I am reliably informed that there are several species of orchids growing and the land is full of wild life which needs preservation.
The development proposals throughout the village- and also in terms of the knock on effect of the Wisely Airfield proposals- are unsustainable in terms of schooling, drainage, roads capacity, shopping and Rail Station parking, and lack of public transport.

The roads are already at capacity and breaking up under the strain. Traffic uses Ockham Road North as a cut through/rat run when the A3 and M25 are busy or blocked (frequently these days) and this is acknowledged by Surrey County Council roads authority.

There is a major strain on schooling in the area and on medical services. There are few jobs in the area and the practicalities of commuting to London or, indeed to Guildford are heavily affected by the plan.

The strain on the current rail service is obvious and it all but impossible to park at the Horsley rail Station where the parking even after extension work is problematical.

I OBJECT on the grounds that there is no proven need for so many houses to be built in Horsley. It is totally unproven and risks the formation of a dormitory township devoid of infrastructure that could manage such an influx of people and cars.

Any forecast of housing needs is also rendered out of date by the current Referendum related to immigration which will lead to a much lower demand for housing in the future.

It is my understanding that in West Horsley the recent survey of the village in 2014, identified a limited need for only 20 affordable homes.

In summary: Guildford Council’s plans are highly suspect and need investigating in depth. Inquiries should be made into the reasons for the document which, for example, must have been completed before the democratic decision, widely applauded, to refuse planning for the Wiseley Airfield site proposal. Yet this proposal appeared again in the council’s plan. The allocation of developments to the various villages are dubious.

Why build on the Green Belt when there is room and land for development within the immediate area of the town of Guildford where it is likely there could be an increased demand.

The National Planning Policy Framework requires that new residential development must respect the character and density of housing in any areas and be limited in quantity by the availability of infrastructure and local facilities.

I couple with that the need and the desire of the people of the area to preserve the GREEN BELT.

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

° The “objectively assessed need” figure of 693 homes a year is too high.
° A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
The current SHMA inflates the proposed housing figure due to

- failure to correct for errors in the historical data for international migration flows,
- issues with the way it considers students and affordability and
- flaws in the method for estimating the number of homes needed to support job growth.

- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.
A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community
Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1)

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E6

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY E6 - The leisure and visitor experience

I OBJECT. Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/Disneyfication. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.
2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.
3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a SouthWest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.
4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

I OBJECT (POLICY H1 – Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY H3 – Rural Exception Homes

I OBJECT  This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested.

These narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians AND you have given no consideration to this point.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPP16/16542  Respondent: 8810849 / Charles Lee  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1
I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

1. I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy II)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

1. I OBJECT to the lack of proper infrastructure planning for sites (Policy II)

Policy II requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Answer (if comment is on questions 1-7 of the questionnaire): ( )

I OBJECT to not protecting the Green Belt (Policy P2)

I OBJECT to any proposal to take land out of the Greenbelt as is suggested with villages such as Ripley, Send and Clandon as well as sites of Wisley Airfield (A35) and Garlick’s Arch (A43). The National Planning Policy states clearly that it requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt and that housing need is not such an exceptional circumstance.
There are no exceptional circumstances for these villages (as mere housing need does not constitute a ‘special circumstance’ and the land to be taken from the Green Belt.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to the Local Plan as the development proposed will not be sustainable (Policy S1)

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is no way sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Borough Wide Strategy (Policy S2)

a. The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

b. The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.
These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick’s Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river
I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.
25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4460  Respondent: 8810849 / Charles Lee  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.
4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”
5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.
6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.
7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”
8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.
9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.
10. The impact on small surrounding roads will create traffic gridlock.
11. It will join up existing villages and defeat the purpose of the Green Belt.
12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.
13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.
14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

**Document:** Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

| We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which: |
| • disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8] |
• directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Introduction

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have sever concerns about the proposals for over 500 new home in Horsley.

In particular sites A36 A37 and A39

which will all bring extra traffic directly onto Ockham Road South/North which is already too busy and too narrow for existing traffic flows and will also be exacerbated by all the other proposed extra house building in the nearby areas eg Wisley airfield.

The station car park is often full already and has no spare capacity.

The Medical centre and schools are already under pressure and I think it is entirely inappropriate to increase the local population

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The “objectively assessed need” figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
- It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. **The plan says that “allocating these sites does not grant planning permission for development.”** However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

2. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

3. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

4. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.
I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the Green Belt.

The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 – 2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcotts Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  
  Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.
The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.

The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement- often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current “soft” edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.
Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

**I OBJECT** to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I OBJECT to the damage to the historic environment as a result of the scale of the proposed development (Policy D3)

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick’s Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy D3 - Historic environment

I object to this policy as it is very weak and I do not think it is clear enough in its support for the conservation of the historic environment. It provides for development which will “enhance” heritage assets which I fear is a developer’s charter as it leaves plenty of room for abuse.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D4

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy D4 - Development in urban areas and inset villages

The policy should place much greater emphasis on residential development in the existing urban centres. In this way housing needs can be met without resorting to large developments in the Green Belt. There are urban areas in need of regeneration but these are ignored in favour of Green Belt development.

The policy should not be applied to the villages which should remain in the Green Belt. Unrestricted application of this policy to the villages intended to be inset will change their characters radically and for the worse. The development it encourages will increase traffic and congestion disproportionately.

Comment ID: PSLPP16/9278  Respondent: 8812097 / Clare Benzikie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E2

**I OBJECT** to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

**I OBJECT** to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

**Comment ID:** PSLPP16/9357  **Respondent:** 8812097 / Clare Benzikie  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy E6
I OBJECT to Policy E6 - The leisure and visitor experience.

The policy should acknowledge that whilst in some areas new and enhanced leisure facilities are valuable (for example the new Opera House at West Horsley Place Towers), much tourism depends on the undeveloped nature of Green Belt areas surrounding Guildford. Accordingly the policy should recognize that in many rural areas new and enhanced visitor facilities may be unnecessary and counterproductive, particularly away from existing buildings and development. For example the attraction of Newlands Corner is its undeveloped nature. Significant development of visitor facilities there is likely to diminish rather than increase its attractions. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment. Heritage sites and the Green Belt are particularly vulnerable to harm.

Tourism and visitors do not depend on new visitor “attractions” and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/"Disneyfication”. Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many “leisure and visitor attractions” already. The case for creating more is not made and no examples are given. Instead, the plan’s explicit priorities should be:

1. To protect the borough’s prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford’s river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To help private providers market local tourism. This need not involve extra spending. The Council could, for instance, help co-ordinate ready-made, local tourism packages under a distinctive brand at an all-in price. An “English town break” (including B&B accommodation, a walking tour of Guildford, a pub lunch in the Surrey Hills, a visit to Wisley Gardens and a National Trust property and a Southwest Trains travelcard for a day out in London) would be highly attractive to many European visitors who currently by-pass Guildford to go to Bath, Oxford or Cambridge instead.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E7

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in Guildford.)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/9320  Respondent: 8812097 / Clare Benzikie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University,
which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or other university sites. The plan should take account of the university's ability to house its own students and reduce the housing number accordingly.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

**I OBJECT** to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

| Comment ID:  | PSLPP16/9351  | Respondent:  | 8812097 / Clare Benzikie  | Agent: |
I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations were available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being “closely related”. In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ( )**

I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure
will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/9308  Respondent: 8812097 / Clare Benzikie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2)

I object to this policy as it is too vague and optimistic. Significant improvements to the road infrastructure are like to be many years away even if they ever happen. The draft plan, however, commits to building massive housing estates in the countryside before any of these road improvements are in place. This is inappropriate and will lead to massive traffic disruption during the construction phase and will add permanently to an already congested network (about 3,000 private cars from the 2,100 new homes at Wisley Airfield alone).

Road infrastructure represents a major constraint that should have been applied to the housing target at a much earlier stage in the plan process and not left as an unresolved difficulty in the draft plan.

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have
considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

<td>Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.</td>

consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.

Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt.
There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):**

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

**Comment ID:** PSLPP16/9252  **Respondent:** 8812097 / Clare Benzikie  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy S1
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.

Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ) , is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”.

Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guilford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

---

Page 3184 of 3335
The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is "deliverable" and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council's cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered "deliverable". In addition, the number of homes proposed, plus existing planning permissions, plus expected "windfall" sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a "plan" that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN were not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London's commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.
The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 1: The evidence base and submission documents

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: SQLP16/1274  Respondent: 8812097 / Clare Benzikie  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. “Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt.” Summer 2016 edition of “About Guildford” (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites-which amount to 65% of the proposed housing number.

1. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.
2. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

3. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

4. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

5. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation
6. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation
7. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound
8. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018
9. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
10. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham
11. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework
12. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.
13. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.
14. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens
15. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councillors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.
16. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford's circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.
17. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.
18. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.
19. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.

Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

There is also a lack of any real evidence for the need for these massive housing developments. They will not significantly reduce the cost of local housing for local people because in the main they will attract people from outside of the area and our local people in need of housing won't be able to afford them.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
Comment ID: PSLPS16/5983  Respondent: 8812833 / Simon P Hill  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to site A25 Gosden Hill Farm. This is a massive over development of 2000 homes in the Green Belt.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5984  Respondent: 8812833 / Simon P Hill  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to site A35 Wisley Airfield. Yet another massive 2000 home development that is inappropriate and unsustainable and again in the Green Belt.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate?  ( ), is Sound?  ( ), is Legally Compliant?  ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to site A43a the on and off ramp at Burnt Common / Clandon as this will make the traffic problems currently suffered by Ripley and Send far worse, attracting vehicles from a wide area into trying to access the A3 and M25. When there is an accident or breakdown on the A3 or M25 the villages and surrounding become grid locked, this proposal will cause this to happen even sooner.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

<td>I write to object to the above Submission. We have lived in West Horsley for 6 years, locating here from another rural area for job purposes. This area is not only an area of outstanding beauty, it is also a protected Greenbelt site, implemented following the war. To get rid of this protection, is to give away part of the values so many people fought for, and will be taken from our children.</td>

Although I understand the need for more jobs and housing, there are areas in the UK desperate for development to improve income in the area, such as parts of Wales that have lost local industry. Countries such as India have managed to develop business and technology sites in new areas, and it is very short-sighted if we cannot develop similar infrastructure. Over-developing one area will increase division in the UK. Some development is needed, but it must retain the village feel in rural areas and therefore should be based on small developments, that use brown sites where possible, or small areas of land that will not impact greatly on local roads and services. The A246 for example, blocks as soon as there is a problem on the A3. Large developments will cause further traffic problems/congestion, as well as put further pressure on schools and health centres. If we are not careful, London/Guildford will become an urban sprawl, with loss of access to the countryside for everyone.

We need to support local communities to develop their own relationships and support networks. Developing large estates where people commute to work in other areas does not promote this process. In-fill of development of 4-12 houses across a few small sites supports local families and jobs, without turning the villages into a suburb where no-one knows anyone, with a loss of access to countryside and ways of life. At present, West and East Horsl both have strong communities and support networks.

There are people in other areas of the country desperate for opportunities to work and to develop their communities, and they are not being heard as each borough focusses on their local target, and not the wider picture. Industry needs encouragement to support this process, and I hope others can see and support this.

The numbers of houses suggested in East and West Horsley are too large for the size of the villages, would put further pressure on roads and services, and reduce Greenbelt, land meant to be protected for generations. In the time we have lived here, we have seen re-introduction of live-stock, both sheep and cows to local land, which is a fantastic achievement. The forested areas help manage pollution, a growing problem in the area.

I understand the challenges ahead are hard, but once rural areas are lost, they cannot be regained. I hope that these views can be considered.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Draft Local Plan: Strategies and Sites June 2016

I’m writing to set out my objections to the above plan as follows

- Here in Green Lane we have had raw sewage spewing from the manhole cover in inclement weather presenting a health risk. If the 120 extra houses off Green Lane/Ockham Road North were built this would be much worse. I note again that after last week’s rain the manhole cover in Green Lane appears to be caving in again.
- Thames Water has advised Guildford Borough that the area’s wastewater network is unlikely to be able to support the demand anticipated from all the proposed developments.
- There is a continuing lack of state primary school places in the village. The Raleigh school which serves both East and West Horsley is full every year and this has been the situation for many years. I understand Cranmore and Glenesk are also nearly full (not that private education would be an option for those in “affordable” housing).
- Secondary school places are limited in number at the Howard of Effingham School and other secondary schools involve a much longer journey of time and distance from the village to reach them, indeed 11 years ago we were doubtful about getting our son into the Howard.
- Where are all these extra people going to work? There would seem few employment opportunities in the immediate area and limited transport links elsewhere – very limited parking at Horsley and Effingham station and a long, dark walk for some, particularly the proposed 120 houses at the site nearest this address.
- Shouldn’t government be concentrating on brownfield development as a priority rather than ruining the green belt and all the social, health and wildlife benefit the green belt brings. There should be no need to build on any green fields if brownfield (previously developed) land is used efficiently. (That does not mean garden-grabbing!).
- As a working man, I find it extremely difficult to get any convenient appointments at the Horsley Medical Centre – how will it cope with an even larger village population?
- Due to the lack of public transport in this area, owning a car is vital, so each new household would have at least one car which would congest the local roads (already in poor condition) even more.

All in all, this is an unsatisfactory plan for the village and representation should be made to keep East & West Horsley firmly in the Green Belt and resist this excessive housing plan.

All of the above would apply in the event of the ridiculous development at Wisley Airfield should go ahead. How can this even be considered in the Local Plan if it was recently rejected.

Perhaps Parliament should consider the effects of net migration in the UK and honour its pledge to reduce this – that would cut the need for so many houses and reducing the Green Belt!

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I have grave doubts over the proposed number of new houses arising from the SHMA. This number was generated by a Consultants mathematical model which has not been revealed in the Plan nor I believe to GBC. Never the less GBC, without factual evidence justifying their decision increased the target number of houses by some 70% higher than the national estimates of population growth in the Borough. Before any final decisions on numbers are made I feel it incumbent upon GBC to give an adequate reason for their decision making.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I refer to the proposal to build 593 new houses in the Horsleys and would make the following comments and objections:

1. In order to carry out the proposed build programme The Horsleys are to be removed from the Green Belt. As I understand it such actions can only be taken in the most exceptional circumstances. What are these exceptional circumstances? As far as I can see such circumstances have not been demonstrated and therefore may be unlawful

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The proposers of the Plan have failed to provide sound reasons for the extension of the boundaries of the “Settlement Areas” of the Horsleys other than to increase the land available for future development. If these changes are allowed such a precedent would be a disaster for all rural areas.

This letter is regarding the proposed developments in the Parish of West Clandon. Namely Gosden Hill, Burntcommon and 4 way A3 Junction.

We have been residents of West Clandon for twenty three years. We moved to this village because of its rural location and we would be very disappointed to see West Clandon lose its village atmosphere and become a suburb of Guildford. One of the attractions of the local area for residents and tourists is the concept of an historic town like Guildford surrounded by quaint and attractive villages. It would be such a shame to see the area become a sprawling metropolis. Environmentally and aesthetically it would be a crime to destroy the green belt. Also any dent to the Green Belt philosophy is harmful. Small or large or least painful it does not matter as it can only lead down the slippery path, ie where would it end?

The main criticism that can be made about West Clandon is the traffic on the main road running through the village on the A247. West Clandon Road is a narrow two lane road and both lorries and cars hurtle down the road at high speeds. Our house literally shakes on occasions. There is a very narrow section of the road where we are frequently forced up onto the curb by oncoming traffic on the opposite side. Our car has been damaged by being side-swiped at this narrow section. The increase in vehicles that would occur should any of the proposed developments take place would be devastating to the local community resulting in more traffic jams, pollution and risk to human life.

In addition any development would place a burden on existing services in the parish such as rubbish collection and general maintenance of the village to name a few problem areas.

We understand that Central Government may feel that they have to pressurise local authorities to increase the building of homes and schools and a travellers site but the impact of such developments in the local community is immense.

For this reason we sincerely hope that the proposed developments will be considered in light of the impact on the existing community and the proposals denied.

Thank you for your consideration of our concerns.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt,
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: pslp172/4789  Respondent: 8813409 / P Trusler  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A43

Do you consider this section of the document; complies with the Duty to Cooperate? (), is Sound? (), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
11. I object to the development at Garlick's Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming even more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.
20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site
2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.
3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to
build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.

4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”

5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.

7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposed Infrastructure Schedule.

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick's Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: PSLPA16/820  Respondent: 8813601 / Gaenor Richards  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough as being too high.

- The "objectively assessed need" figure of 693 homes a year is too high.
- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects.
- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability and
  - flaws in the method for estimating the number of homes needed to support job growth.
  - It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked making the process unaccountable.
The Plan's proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT strongly to the Gosden Hill development (A25) being in the Local Plan at all. The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. These are all requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the Doomsday Book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is already stationary every day during rush hours. The linking of the A3100, 62215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day (potentially threatening the lives of the village's residents and children walking to school) and through Send and Ripley which are also already severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.

Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.
Burpham's sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost. There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size. Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England's requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an "aspiration" in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and on the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

---

I OBJECT to the inclusion in the Local Plan of the land at Garlick's Arch, Send Marsh/Burnt Common and Ripley (A43)

Garlick's Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick's Arch site. There was no proper consultation in relation to the inclusion of this site.
Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council's own Green Belt & Countryside Report does not address Garlick's Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy 13).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy 14)

It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy 11)

Furthermore, several electricity pylons run through the site, which will have the potential to be a health hazard for any residents.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of 'through' traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

---

Page 3212 of 3335
This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy D3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the damage to the historic environment as a result of the scale of the proposed development.

I OBJECT to the local plan based on the impact it will have on the special countryside of the borough.

The proposed development at Garlick's Arch (A43) will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the sustainable employment policy.

If developed, the new employment site at Garlick's Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (BB) at Garlick's Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick's Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.
What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the location for new employment floorspace at Garlick's Arch -Site A43.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick's Arch, when just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the loss of rural employment.

Policy ES supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT. Tourism and visitors do not depend on new visitor "attractions" and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment/"Disneyfication". Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many "leisure and visitor attractions" already. The case for creating more is not made and no examples are given.

Instead, the plan's explicit priorities should be:

1. To protect the borough's prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and the Continent, in that order. Rural residents are its custodians and require no Council interference. Economically, the most valuable forms of tourism, such as walking and cycling, require no new development. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

2. To help make Guildford's river landscape less off-putting and support town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

3. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT policy H1 (Homes for all).

Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high rise buildings that developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should be provided for 100% of new students and more than 60% of existing students, which would free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council’s timidity is a case of "regulatory capture" by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s Back.

Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2785  Respondent: 8813601 / Gaenor Richards  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy H3

I OBJECT - This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the "mix" this can include "market" housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.
The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances."

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy ID1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the local plan, due to the congestion that development will cause to the local village roads and the lack of road infrastructure.

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon the street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/2767  Respondent: 8813601 / Gaenor Richards  Agent:
I OBJECT to the lack of proper infrastructure planning for sites.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick's Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick's Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
I OBJECT to poor air quality concerns.

Paragraph 4.6.27 of the Plan states that "Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health." The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can even result in premature death.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I OBJECT to not protecting the Green Belt.

I OBJECT strongly to the proposals to remove the villages of Ripley, Send and Clandon from the Green Belt, together with sites of Wisley Airfield (A35) and Garlick's Arch (A43). National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or for development on Green Belt. There are no exceptional circumstances for these villages and the land to be taken from the Green Belt. Mere housing need does not constitute a 'special circumstance'. And once taken the green belt is lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached. GBC's Green Belt and Countryside Report does not address Garlick's Arch, so there is no evidence base to support including this site.
Rather than developing Garlick's Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to development in areas which are at risk of flooding.

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough's identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick's Arch (A43) is identified on the Environment Agency's flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council's SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding.

Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

Page 3220 of 3335
As a long term resident of West Clandon, a village in which my children have grown up, and my grandchildren are now
growing up, I have given this issue considerable thought. As a result, please find below my objections to Guildford
Borough Proposed Submission Local Plan (June 2016).

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016) overall.
This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

Furthermore, I set out below my objection to specific policies and matters within the Plan.

1. I OBJECT to the Local Plan as the development proposed will not be sustainable.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National
Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact
on existing local communities by over-development, particularly for the villages between Guildford and the M25, including
Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development
proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25) are in unsustainable locations. The
former two sites do not benefit from railway stations within easy walking distance and bus services across rural
villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are just
unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure
for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should
be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable
transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further
vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will
suffer as a result.

1. I OBJECT to the Borough Wide Strategy

A - The borough wide strategy is poorly It proposes 13,860 housing being developed across the borough and does
not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This
approach differs from all the other Borough Councils in Surrey.

B - The Housing number is based on pre-Brexit data for economic and population growth, including migration.
These now need to be revised downwards, possibly quite significantly.

C - The housing number is based on an arbitrary Housing Market Area (HMA): the "West Surrey" tri-borough
area of Guildford, Woking and Waverly. An HMA should be an area within which a majority of people live,
work, shop or study. On any common sense view, "West Surrey" is much too small. Half of Guildford borough's
residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the
borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to
the West; but all lie well outside "West Surrey". Puzzlingly, the adjacent district of Rushmoor, minutes from
Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in
the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is
in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public
consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however,
does not make "West Surrey" reliable. The area is artificial, and so therefore are the housing numbers derived from it. For
instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open
countryside to meet its bigger, urban neighbour's "need". Guildford wants to build 7 sites of over 500 units, compared with
only 4 across Surrey's 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick's Arch (Ripley/Send border) (A43) and Gosden Hill (Clandon) (AZS) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. This will result in undesired coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages and a permanently detrimental impact on each of these currently distinct communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

C.i. Policy 25 Gosden Hill – My Objections

1. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
2. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
3. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity.
4. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
6. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt.
7. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green. Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
8. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

| 1. | I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches |
| 2. | It ignores all the thousands of previous objections made by local people |
| 3. | There is no proven demand for travelling show people plots in this location |
| 4. | There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints. |
| 5. | The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required. |
| 6. | This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it. |
| 7. | The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy. |
| 8. | Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided. |
| 9. | The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result. |
| 10. | I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached. |
| 11. | I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed |
as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river 
flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding 
is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-
commissioned to accurately reflect the actual flooding risks of each site.

12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of 
four existing successful rural businesses, which have been in existence for over 30 years and another two 
businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their 
premises.

13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will 
have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs 
centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.

14. I object due to the congestion that development will cause to the local village roads and the lack of road 
infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for 
example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. 
The proposed development under the plan will cause greater congestion in and around our villages. The Plan 
does not provide an achievable strategy for improving capacity on these local roads.

15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are 
narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I 
object to the development proposed in the local plan, which will result in more traffic using these narrow roads 
and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking 
problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, 
the roads serving the village will become even more congested. Cycling has become a popular past time, 
particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no 
proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being 
generated from these developments there is a real danger that there will be an increase in road accidents 
involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development 
will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of 
improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the 
infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have 
been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, 
the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to 
capacity, such as the electrical network and sewers. No plans to improve these services should mean no 
development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the 
Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are 
already at capacity and suffering from funding cuts or freezes. Any further development without funding will 
place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no 
certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion 
during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have 
considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), 
Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk 
road network. The A3 & M25 are already at capacity during peak hours and any development prior to 
improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also 
mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The 
significant level of development being proposed, particularly in the north east of the borough will lead to 
considerable further congestion, despite any attempts to mitigate this through travel plans. This will be 
particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have 
a detrimental effect on local residents and their health.
25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

C.iii. Policy A58 Burnt Common – My Objections

1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site

2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.

3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.

4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented."

5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.

7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607
sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2017 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Policy S1 Presumption in favour of Sustainable Development– My Objections

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send.

One of the important specific purposes of the green belt is to prevent urban sprawl.

Comment ID: pslp17q/642  Respondent: 8813601 / Gaenor Richards  Agent: 

Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. Duty to Cooperate – My Objections

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision.

Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I am writing to raise my concerns about the local plan for the Horsleys. The scale of new housing is disproportionate to the village, and would add to the current problems with overloaded infrastructure: roads, parking, schools, the medical centre. All of these are problems at the moment, so it is not realistic to suggest that the village can cope with a further 600 new homes.

The Horsleys are villages, with a unique village character and the plan would destroy this. Furthermore the Horsleys are currently in the green belt and I don't believe it is correct to change this status.

Finally the Wisley development would also have a huge knock on impact on our infrastructure, in particular roads and parking.

I object to the principle of loading such a high amount of additional housing into this green belt area, and I think more work should be done to reconsider whether all these homes are necessary, and to look at brownfield and urban sites.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I am writing yet again to object to the proposed removal of East and West Horsley from the Green Belt because the “exceptional circumstances” required before taking this action have not been demonstrated. The Metropolitan Green belt was promised to us after the war and it was to prevent urban sprawl by keeping this land open. To build a large number of houses in the Horsleys would completely change the character of the villages. Furthermore, this latest Plan is based on the use of out of date estimates of population growth. The population projections used to underpin this entire local plan were recognizably wrong at the outset and there major doubt concerning housing numbers.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/5860  Respondent: 8814689 / Sarah Tait  Agent:

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Objections to Guildford Borough Council Proposed Local Plan (June 2016) and to the continued inclusion in the plan of the Former Wisley Airfield (FWA), now known as Three Farms Meadows (TFM) –

Allocation A35 - for the phased development of a new settlement of up to 2100 dwellings

I object to the draft Local Plan for the following key reasons:

1) I object to a plan which proposes that over 70% of new housing be built within the Green Belt. There is ample brownfield land in the urban areas which needs to be regenerated, without the need to encroach on protected Green Belt land. Election manifesto promises to the electorate are being ignored.

2) I object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

3) I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

4) I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

5) I object to the threat the Local Plan poses to the historic rural village of Ockham and the blight on properties there. The plan calls for a village of 159 residences (with narrow lanes, no streetlights, very few pavements and many listed houses) to be subsumed into a 2,000+ dwelling development, with urban-style buildings up to five storeys high and a population density higher than most London boroughs.

6) I object to the detrimental impact on transport, local roads and road safety. I specifically object to:
1. The assertion that the development will result in a meaningful shift to cycling and walking. The development is too isolated, and even within the development itself too spread out to anticipate a reduced reliance on private cars
2. The increased volume of car traffic. A proposed development of 2,068 homes would result in an estimated 4,000 additional cars on the roads
3. The congestion this traffic will cause on the narrow rural roads in Ockham and the surrounding areas, exacerbated by wide vehicles including increased bus and HGV movements
4. The danger this traffic will be to local cyclists and pedestrians, due to the absence of any cycling paths and the lack of pedestrian footpaths (and the space to provide them)
5. The increase in the already severe congestion on the Strategic Road Network of the A3 and M25. A further planning application at RHS Wisley (with a significant increase in visitor traffic) and a proposed 600 pupil secondary school on the site would add additional congestion at the M25/A3 junction as well as local roads. No development can proceed without significant infrastructure enhancements to the A3 and M25. Partial improvement works on the A3 south of the site are not due to start until 2019 at the earliest
6. The lack of suitable public transport. The local rail stations of Effingham and Horsley cannot cope with the proposed increase in passenger traffic and car parking is already at capacity

7) I object to the fact that insufficient consideration has been given to the environmental and ecological value of the site, in relation to the Thames Basin Heaths Special Protection Area (SPA), Sites of Special Scientific Interest (SSSI) and Site of Nature Conservation Interest (SNCI).

8) I object to the fact that air quality concerns have not been taken seriously – air pollution in many parts of the borough, and particularly at the M25/A3 junction, is in excess of EU-permitted levels. Additional traffic will exacerbate this situation, impacting the health of all current and future residents. No account is being taken of the acid deposition on the Thames Basin Heaths SPA and the irreversible impact of the habitat degradation.

9) I object to the fact that the proposed plan does not meet the needs and desires of local communities, as evidenced through the Ockham Parish Plan. The top two responses as to why local residents enjoy life in Ockham are (1) access to the countryside and clean air and (2) the peace and quiet afforded by wide open spaces. Over 90% wish to see both the historic features of the village maintained and the village’s green spaces, including the FWA/TFM, protected.

10) I object to the continued inclusion of a site (the former Wisley Airfield, - now known as Three Farm Meadows) - where the planning application has already been unanimously rejected by GBC’s Planning Committee.

After 14 months of consideration (and various extensions and amendments), Wisley Property Investments Ltd’s (WPIL) planning application was unanimously rejected by GBC on 8th April 2016 on the recommendation of GBC Planning Officers, who cited the same grave concerns highlighted in this letter.

Serious concerns about this site have also been raised by a broad number of authoritative sources across the UK, including Highways England, Thames Water, NATS and the Environment Agency.

I trust that these objections will be fully considered and that the Former Wisley Airfield (Three Farms Meadows), Allocation A35, is removed from the Local Plan with immediate effect.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Stated Government policy is that areas should only be taken out of the Green Belt in exceptional circumstances and you have not demonstrated that those circumstances apply in the case of the Horsleys. It is accepted that on your planning watch you have permitted some infill development in the main East Horsley village, but south of the A246 there have been no extra dwellings in decades. Indeed, you have previously advised me that the Warren and Rowbarns Way are in an Area of Outstanding Natural Beauty - i.e. the Surrey Hills. In the circumstances, how can you possibly permit a re-designation from AONB status to a planning free-for-all; that would be an act of quite inexcusable planning vandalism?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing regarding the revised local plan you have recently published which, despite its volume (no doubt designed to befuddle those who elect you), appears to wholly ignore earlier feedback and to contain fatal flaws.

Firstly, as regards likely population demands, your projections (such as they are) need to be re-visited in the light of Brexit. Your proposal for up to 533 new homes in the Horsleys with possibly another 2,000 on the Wisley site (under two miles away) would represent a disgraceful urbanisation of what is still a predominantly countryside area, with little thought given to the infrastructure consequences and certainly no guarantees that these will all be addressed in advance of any building.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Your papers also contain comments on the type of housing that you would wish to see in the Horsleys. Here again your approach is flawed as 533 new homes of the type you describe would be wholly out of keeping with the village. It is an observable fact that many Horsley houses are large and on large plots and that is why people have bought them. Furthermore, you reflect this fact in the heavy Council tax bills we pay from which Horsley residents derive few benefits.

I write to strongly object to the G.B.C. suggesting removal of Send and local villages from the green belt.

How sad, if we should finish up as gridlocked corridor from Guildford to Woking – another Camberley Frimley, Farnborough and Cove scenario. Over development in our villages leaves us desperately under catered for, for schooling, doctors, transport, roads etc.

Here in Send we are so lucky to still have some farm land, water meadows and open space. This supports wildlife, plants and animals and gives pleasure to local people and visitors.

Be careful what you vote to ruin for us all.

I OBJECT to the inclusion of strategic site Policy(A43 Garlick's Arch and its late substitution in the Local Plan with no prior consultation with the local community. This site should be protected as it is agricultural land that is previously undeveloped and within the Green Belt. There is no sound reasoning as to why the Garlick's Arch site was substituted at the last minute on 24th May 2016 in preference to the original site A43 Land at Burnt Common Warehouse which is an existing brownfield site with industrial space, provision for at least a further 7000sqm of industrial employment space and an additional 100 homes which is more in keeping with the acceptable growth in housing numbers for the residents of Send, Burnt Common, Send Marsh and Ripley. The development of 400 homes at the Garlick's Arch site will cause coalescence with Send, Send Marsh, Burnt Common and Ripley thus losing forever the independent identity of each village and hamlet.

I object to the 400 houses and travellers sight on Garlicks Arch.

This bis much too many houses the only reason they will be affordable is because of the travellers sight.

We are a very quirt village with areas of greenbelt all around and it will be detrimental to the environment wild life and services to the villagers as the doctors surgeries hospital appointments and school places are all in short supply now

Greenbelt Policy 2 Paragraph 4.3.15.

Further expansion of the Send Business Park means more large vehicles entering the lane and beyond the Tannery the lane becomes rural and is unsuitable for large lorries that come from Polesdon Lane on their Sat Nav getting stuck and lost by the time they reach the Papercourt Farm.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We have noted the amendments, however the proposed mitigation in Requirements (4) and Policy 43a below is totally inadequate to avoid excessive traffic on the existing country lanes – please see Para 3 (d) of Ref A. Planning application 15/P00012 was refused by GBC for very good reasons and it is unreasonable to retain Policy A35 in the Draft Local Plan. There could be more appropriate uses for the land, such as sports and leisure facilities, including minimal staff housing.

Regrettably, while Guildford Borough Council continues to claim that it is defending the Green Belt, it is still attempting to impose excessive housing density therein. The residents of East Horsley feel very strongly about the potential impact of the changes proposed in the plan and deplore the removal of its green belt status by making it an ‘inset’ within the Green Belt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the removal of Send from the Green Belt because the village and its countryside provides a necessary space between Woking and Guildford.

I object to all proposals to build on the Green Belt at Send and elsewhere in the borough because all the development that is really needed can be accommodated in Guildford’s urban brownfield areas much closer to existing transport hubs.

I object to the building on the Green Belt at Send at Garlick’s Arch, Clockharn Nurseries and Send Hill because it is not justified by any special circumstances and the fact that Green Belt is meant to be permanent and not continually reduced.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” Standing at the head of the draft plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

I object to the fact that 70% of the proposed 13,860 houses are targeted at the Green Belt strung along the A3 which will destroy the open amenity of the borough and produce gridlock on the A3 and surrounding roads including the A247 which are all already at 100% capacity.

I object to the complete failure of GBC to identify sufficient brownfield sites within the urban area which should be targeted first for development before the open countryside and the Green Belt and the failure to include the Town Centre Masterplan 2015 within the plan.

</table>

I am a resident in Flexford (which is one of 6 distinctly separate hamlets within Normandy Parish) and I have lived here for 5 years. I am a fully qualified ecologist who is a full member of the Chartered Institute of Ecology and Environmental Management (CIEEM) and I have work as an ecological consultant for 11 years and for a number of clients, many of which are developers. I am therefore fully aware of the needs for housing.
However, as a local resident I object to the Guildford Borough Council Draft Local Plan with the proposed developments on sites A46 and A47 in Normandy and Flexford on the following number of issues;

1. Effect on Biodiversity including loss of and damage to habitats which act as wildlife corridors and impact on the Thames Basin Heaths Special Protection Area (TBH SPA).
2. Development on Green Belt
3. Insufficient evidence on the need for new schools on Site A46 and therefore the justification for 1,100 homes with associated retail units and residential/care
4. Increased road traffic along a series of local roads that do not have the capacity to sustain this increase in traffic. This is both during the development with site traffic and post development with increase in vehicles due to the new schools, retail area, housing and residential/care home.
5. Limited capacity of rail services serving Wanborough Station and also the current limited capacity for Wanborough Station to serve an increase in passengers from the proposed developments in Sites A46 and A47, due to platform size, no disabled access and limited car and cycle use.
6. Flooding issues on both proposed development Sites A46 and A47 and also within the Normandy and Flexford areas, such as the approach to Wanborough Station itself.

Taking each issue in turn I shall elaborate below.

1. Effect on Biodiversity including loss of and damage to habitats which act as wildlife corridors

Background

There are a number of nationally and locally important sites for nature conservation within and adjoining the Parish of Normandy.

Normandy Parish includes a large part of Ash Ranges which form part of the Thames Basin Heaths Special Protection Area (TBH SPA), which is a statutory designated site and designated for its rare birds, specifically woodlark, nightjar and Dartford warbler, under the EC Birds Directive. This site also forms part of the Thursley, Ash, Pirbright and Chobham Special Area of Conservation (SAC), also a statutory designated site and designated for its North Atlantic wet heaths, European dry heaths and peat bogs.

Ash Ranges also form part of the Ash to Brookwood Heaths Site of Special Scientific Interest (SSSI), which is a statutory designated site and designated for its dry heathland, wet heathland and bog, bryophytes (lichens and mosses), invertebrates (such as the scarce bog bush cricket and tiger beetle), birds (such as hobby, stonechat, yellowhammer, reed bunting, tree pipit, meadow pipit and the previously mentioned SPA bird species), and reptiles (all six native species including the European Protected Species sand lizard and smooth snake).

Within a radius of 2 km from site A47 there are eight non-statutory designated sites. These sites are known as Sites of Nature Conservation Importance (SNCIs) and are selected for the habitats and flora/fauna they support. They are of County or local wildlife importance.

The proposed development site (site A46) contains several areas of ancient woodland. Ancient woodland is defined by Natural England as a site that has had continuous woodland cover since at least 1600 AD. It is a Habitat of Principal Importance (HPI) and is an irreplaceable, wildlife-rich habitat known to support more biodiversity than any other UK land habitat.

The two main areas in or bordering site A46 in the Draft Plan are Pussey’s and Walden's Copses. In addition, there are two smaller areas, the offset east-west trending belt of woodland west of Pussey’s Copse and the smaller north-south trending belt south of Walden's Copse. This woodland is clearly ancient (as identified from associated ground flora such as wood sorrel, primroses, bluebells, wood anemones and early purple orchids), but is not included in the Surrey Ancient Woodland Inventory because it is slightly under the minimum registration size of two hectares. Regardless of the size, I strongly believe this valuable and irreplaceable woodland should be treated as if it was protected and therefore be left intact. The
current developer plan shows a road bisecting this woodland; which if implemented would destroy a precious wildlife corridor.

There is an avenue of mature pedunculate oak trees towards the centre of the footpath that crosses site A46, which are registered on the Ancient Tree Inventory, and other individual trees on the site which the Woodland Trust regards as valuable in terms of conservation. I have undertaken bat activity surveys (following the latest Bat Conservation Trust (BCT) Bat Survey Guidelines) of this avenue of mature pedunculated oaks and also the mature trees that border Fiddlers with the footpath across site A46 and have recorded a high amount of foraging activity from common pipistrelle bats. Judging by the amount of activity within 30 minutes after sunset this indicates that a bat roost is close by, possibly in one of the many cracks, crevices, splits and woodpecker holes within the trees. The loss of these trees or even any disturbance from lighting would have an impact on those bats and their roosts.

Site A46 falls within 4 one kilometre grid squares (SU9250, SU9350, SU9251 and SU9351) which combine to form a tetrad. From bird records obtained by surveys from Friends of Normandy Wildlife (of which I am a member) and BirdTrack (a collaborative online recording package from the British Trust for Ornithology, RSPB and BirdWatch Ireland) 15 Red listed birds, based on Birds of Conservation Concern4; 2015 (BoCC4), have been recorded from the A46 tetrad. These birds include: woodcock, cuckoo, starling, fieldfare, song thrush, mistle thrush, redwing, house sparrow, linnet, skylark, yellowhammer, lesser redpoll, wood warbler (not recorded for 5+ years), tree pipit (not recorded for 5+ years) and herring gull.

As well as these Red listed birds a further 18 species occurring on the Amber list (BoCC4) have been recorded from the tetrad, including mute swan, mallard, common sandpiper, black- headed gull, common gull, stock dove, tawny owl, swift, kingfisher, kestrel, house martin, willow warbler, dunnock, meadow pipit, bullfinch, reed bunting and greylag goose. Barn owl and red kite have been recorded hunting and possibly nesting on site A46. Skylark has been recorded by myself nesting in a field adjoining site A47 and from personal observation great white egrets and grey heron’s forage on site A47 in winter.

A resident backing onto Pussey’s Copse and site A46 has reportedly seen a dormouse (European Protected Species) using a dormouse nest box in their garden (the description given to me seem unlikely to another small mammal specis) and, since these animals are known to occupy ancient woodland more frequently than recent woodland, we feel that there is every chance they are present on site A46 and the surrounding woodlands and hedgerows.

Normandy and Flexford are important areas for breeding and foraging hedgehogs, which are in serious decline nationally. Hedgehogs are a Species of Principal Importance and predominantly rely on woodlands and hedgerows (a number of which are on or adjoin site A46 as previously stated) to forage, shelter and breed and use those areas and adjoining gardens as wildlife corridors. An increase in traffic and disturbance by people and pets will have a negative impact on the hedgehog population in Normandy and Flexford.

All the habitats within or adjoining the proposed development site of A46 and some of site A47 are Priority Habitats of Principal Importance under the NERC Act, plus a number

of protected species (European Protected Species, Species of Principal Importance and those protected under The Wildlife and Countryside Act (1981) as amended) have been recorded within either the proposed development site or 500m to 1km of the proposed development site. These include hedgehogs, dormice, great crested newts, common toads, barn owls, skylarks, stag beetles, common lizards, grass snakes, adders, slow worms, badgers and bats.

The proposed development of site A46 would destroy a number of these habitats including Semi-natural Woodland, Veteran and Mature Trees, Hedgerows, Farmland and Semi- improved Grassland, plus would have indirect effects on Ancient Woodland habitat and the Stream through pollution (light, noise, litter and diffuse land and road runoff), predation and disturbance by increased number of cats and dogs (187 cats (cat ownership being 17/100 households) and 264 dogs (dog ownership being 24/100 households) and by people (potential fires and vandalism of trees).
Site A47 is a Site of Nature Conservation Importance (Little Flexford SNCI), which was selected for its botanical interest and for records of water voles within the stream that runs through the site, and the Flax Pond. Water voles are UK’s fastest declining mammal species and are a highly important local species and indicator of a healthy freshwater ecosystem.

Surrey Wildlife Trust have identified the Normandy and Flexford areas as a ‘Water Vole Alert Area’. The Flax Pond has anecdotal records of great crested newts (European Protected Species).

The National Planning Policy Framework (NPPF) states that “The purpose of planning is to help to achieve sustainable development” and it describes three “dimensions” relevant to this aim: economic, social and environmental. The explanation for how the environmental aspect plays a role includes the statement “…..helping to improve biodiversity, use natural resources prudently…..” (see point 7 of the section in the NPPF dealing with achieving sustainable development).

In section 11 of the NPPF headed “Conserving and enhancing the natural environment”, it is stated that planning policy should protect and enhance valued landscapes and minimise impacts on biodiversity, providing net gains in biodiversity wherever possible to halt the overall decline in biodiversity, by promoting “the preservation, restoration and re-creation of priority habitats, ecological networks and the protection and recovery of priority species populations…..”.

Guildford Borough Council (GBC) interprets the NPPF through their ‘Policy I4’ which emphasises the commitment to biodiversity stating: "The Council will conserve and enhance biodiversity and will seek opportunities for habitat restoration and creation, particularly within and adjacent to Biodiversity Opportunity Areas (BOAs)”. BOAs are set out by Surrey Nature Partnership.

Proposals for development must demonstrate how they will deliver appropriate net gains in biodiversity. Where proposals fall within or adjacent to a BOA, biodiversity measures should support that BOA’s objectives. The Supplementary Planning Document (SPD) will set out guidance on how this can be achieved. European sites designated as Special Protection Areas (SPAs) and Special Areas of Conservation (SACs), National Sites of Special Scientific Interest (SSSIs), local SNCIs and Local Nature Reserves are all shown on the Policies Map or as subsequently updated.

Policy I4 goes on to say that "Permission will not be granted for proposals that are likely to materially harm the nature conservation interests of local sites unless clear justification is provided that the need for development clearly outweighs the impact on biodiversity."

It is clear that the proposals for development in Normandy and Flexford directly conflict with these policies and I strongly object to these development proposals as Guildford Borough Council have failed to show how they will conserve and enhance biodiversity.

The effect from the proposed development on Thames Basin Heaths Special Protection Area (TBH SPA).

I strongly believe that the Plan is unsound in relation to site A46 as the Habitats Regulations Assessment prepared for Guilford Borough Council does not take sufficient account of the impact that this huge proposed development specifically will have upon the TBH SPA which is a European Site as defined under the Habitats Directive and Conservation of Habitats and Species Regulations 2010 (as amended).

The proposed development is considerably less than five kilometres away from the TBH SPA and not much beyond the 400m exclusion zone, occupying an area between under 1km, to just over 2km, from the TBH SPA. It has been indicated that the cumulative effect of further residential development up to 5km from protected heathlands will have a significant adverse effect on the heaths. Furthermore, Natural England believes that recreational use of the heaths arising from housing developments up to 5km away from a SPA will create disturbance to rare bird populations. As stated previously the TBH SPA is an internationally important habitat for three rare species of bird - the Dartford warbler, nightjar and woodlark. The latter two are ground nesting and therefore particularly susceptible to disturbance from people and animals.
The results of a survey in 2008 showed that more than 83% of visitors to the TBH SPA arrived by car and that 70% of those had come from within 5km of its access point. A very large proportion of the TBH SPA visitors are dog walkers, many of whom visit a particular site on a regular basis. Two hundred and sixty-four dogs are likely to come with the proposed development, the current ratio of dogs per household being 24/100, so this could potentially attract between 26 and 132 extra dog-walkers a day.

In order to deter dog-walkers from visiting the TBH SPA, any Suitable Alternative Green Space (SANG) in the proposed development would have to be of exceptional quality, as the Nightingale Road and Dolley's Hill entrances to the TBH SPA are only either 5 minutes away by car, or 20 minutes on foot. Whatever the size, the SANG would be a very small area in which to exercise 264 dogs. A small number of irresponsible dog owners, who do not scoop the poop, will make such a small area unattractive for walk and play, and potentially create a health risk. This is already a problem on Normandy Common SNCI.

Another factor is that some areas where a SANG might be located are muddy in wet weather and throughout the winter, whereas many of the tracks on the TBH SPA are dry in wet weather, (including the winter). For those dissatisfied with the proposed SANG for whatever reason, or those wanting a longer walk, the natural alternative is the TBH SPA. If only 10% of dog owners use the TBH SPA, there would be 26 extra dogs a day using the TBH SPA; if 50% do, it would be an extra 132 dogs a day.

There is currently little evidence to suggest that SANGs have any net gain benefit for biodiversity, as often they are used as open recreation sites for dog walkers rather than creation of and protection of habitats as mitigation for those lost through development of which the SANG is proposed for.

1. Development on Green Belt

According to the NPPF "the essential characteristics of Green Belts are their openness and their permanence". Paragraph 4.3.1.2 of the Plan (under Policy P2) states that "only those villages whose open character makes an important contribution to the Green Belt should be included in the Green Belt". I strongly believe that the land in both sites A46 and A47 makes an unparalleled contribution to the Green Belt which stretches from Guildford in the east to Ash and Tongham in the west. If this area is inset and built upon in the manner proposed it will be the beginning of urban sprawl across this stretch of countryside which Green Belt policy was designed to prevent.

It will break up wildlife corridors and degrade habitats. The Government have indicated that Green Belt is supposed to be protected, but Guildford Borough Council are trying to justify development in this area when they themselves designated it as having a 'Red' status under their system for quantifying sensitivity (red being the most sensitive and least likely to be developed). Guildford Borough Council have therefore totally ignored all policies on Biodiversity when proposing to inset these areas.

Site A46 was not previously proposed in an earlier consultation and is not appropriate development at this stage in the 2016 local plan consultation. In 2014’s consultation it was ‘safeguarded’. It was not removed from the Metropolitan Green Belt. And ‘Exceptional circumstances’ have not been demonstrated or approved by the inspectorate. In the Solihull ruling, a boundary cannot be drawn around sections of land and urbanised. This also includes site A47.

Policy D4 states that ‘new development within inset villages will have particular regard to ‘important’ views of the village from the surrounding landscape’. The urbanisation of the site A46 proposal will impact on views from the Surrey Hills Area of Outstanding Natural Beauty (AONB), during daylight hours and from light pollution during darkness.

Green Belt in planning practice guidance states, ‘Unmet housing need (including for traveller sites) is unlikely to outweigh the harm to the Green Belt and other harm to constitute the ‘Exceptional Circumstances’ justifying inappropriate development on a site within Green Belt (NPPF).
1. Insufficient evidence on the need for new schools on Site A46 and therefore the justification for 1,100 homes with associated retail units and residential/care.

There is no proven need for a secondary school and a primary school for site A46. In its last submission to Guildford Borough Council (July 2014), Surrey County Council, in its official response, said: "A site within the proposed urban extension at Blackwell Farm, with all necessary access infrastructure built in and a catchment surrounding the site, would be a more sustainable location in transport terms for a new secondary school to serve the western side of Guildford."

Why has Guildford Borough Council not heeded this advice from Surrey County Council?

The birth rate has fallen in the past 2 years and secondary schools to the west of the Borough are undersubscribed as stated below from direct research by Councillor Keith Witham of Surrey County Council.

Undersubscribed Secondary Schools

**Kings College, Guildford.**

The school is currently **57% undersubscribed**. The capacity at the school is 900 pupils, and there are only 389 on the school roll (43% utilised) with 511 vacancies. Kate Carriett, Principal at Kings College has said very clearly and I quote: "There is absolutely no need for another school in Guildford, its crystal clear". She also said that when Kings College is fully subscribed, there is capacity on that site to further expand the school, to accommodate more pupils well into the 2020's if then needed.

The New Guildford University Technical College

This is due to open in 2018, and will take 240 pupils from the age of 14 in its first year, and that will double to 480 places, relieving pressure on other schools.

**Christ's College** is already taking 30 more pupils a year than its admission number, because it has the space and capacity to do so, and is willing to take more still as it has further capacity.

Ash Manor, Ash

The capacity of the school is 1,050 and it has 940 pupils, so is **undersubscribed by 110 places**. When Cllr Keith Witham met the Head Teacher and Chairman of Governors he was told that if needed they are supportive of the school being expanded to take more pupils by 30 places a year (so a total of an extra 150). They also expressed very strong concerns about a new school in Normandy and Flexford, just three miles from their front door, and the possible negative effects on Ash Manor.

Connaught School

This is near Ash, just over the County Boundary in Hampshire - but is also **undersubscribed by 90 places** and available to Surrey children.
Hoe Valley Free School, Woking.

This brand new Secondary school only opened last September. It has an intake of 120 per year, with currently 95 pupils, so is undersubscribed in its first year by 25. But it will build up with 120 new places available every year for 7 years - making a total capacity of 840. It has no catchment area, and although will mainly serve Woking, will welcome applications from Guildford parents.

So there are currently 736 vacancies at the nearest secondary schools serving the western parishes - not accounting for the 480 extra at the new Technical College to open in 2018 - a combined capacity of 1,216. And in addition to those Surrey County Council has already approved expansions at the County School, Guildford and St Peters.

Normandy and Flexford’s ‘needs and priorities have not been decided by the resident’s’, NPPF 1 ‘provides a framework within which local people and their parish councils can produce their own distinctive local and neighbourhood plans reflecting their needs and priorities of their communities’.

Site A46 is an inappropriate use of a rural area for ‘town uses’.

Planning Policy and a developer (Taylor Wimpey) led building proposal (urban centre) have decided Normandy and Flexford’s ‘needs and priorities’ of which include 715 homes, 385 flats/apartments, 1,500 place secondary school, a primary school for 420 pupils, residential or care home, parade of shops, and the Borough’s allocation of 6 showman pitches, 8 flats by Wanborough Railway Station, 8 flats in Glazier’s Lane by new access, and 4,700 sq metres of retail which will permanently destroy Normandy and Flexford’s rural environment.

NPPF 155 states ‘early and meaningful engagement and collaboration with neighbourhoods, local organisations is essential’ This has clearly not happened. Evidence has indeed shown that at least 2 years ago documentation for site A46 was submitted on behalf of Taylor Wimpey to Guildford Borough Council Planning Policy. At this stage No ‘meaningful engagement’ was made or requested from the local people.

I strongly believe that Guildford Borough Council have breached the NPPF and are being led by a developer namely Taylor Wimpey. Interestingly, Taylor Wimpey have close associations with Normandy and Flexford through family members of the founding business directors of Taylor Woodrow.

1. Increased road traffic along a series of local roads that do not have the capacity to sustain this increase in This is both during the development with site traffic and post development with increase in vehicles due to the new schools, retail area, housing and care home.

If the proposed development goes ahead, there will be an increase in pollution with respect to air quality, noise and light levels, particularly where cars have to queue at junctions or obstructions. The transport strategy proposed by Guildford Borough Council for this strategic site contains no scheduled improvements for Glaziers Lane (D60 classified road) and very few for Wanborough Hill and Westwood Lane (C16 classified road), which are rural lanes. The A323 Guildford/ Aldershot Road to the north of the site will also be affected, and very few improvements to that road are planned.

There would be access issues relating to visibility and safety for pedestrians and cyclists, which could be difficult to resolve given that the roads are fundamentally rural roads, and the existing structures of the Westwood Lane Railway bridge and the Glaziers Lane Railway Road bridge. The restricted headroom of the Westwood Lane bridge would also prohibit double decker buses from accessing the proposed school.
This will affect not only the people living in the area but also local wildlife. Natural England addressed this issue in: "The ecological effects of air pollution from road transport" (2016) which states that: "Biodiversity 2020 identifies air pollution as a direct threat to biodiversity in England. Many habitats of nature conservation importance in the UK are adapted to low nutrient conditions and/or are vulnerable to acidification, and are sensitive to additional airborne nitrogen oxides (NOx), sulphur dioxide (SO2) and ammonia (NH3), as well as to nitrogen deposition and acid deposition." In addition, noise from traffic can result in hearing loss in animals. It masks important environmental clues and animal signals. It can result in stress and induce behavioural effects, such as abandonment of territory. With regard to light, predators use light to hunt, and prey species use darkness as cover. Thus increased light at night alters the predator/prey balance and can also affect breeding behaviour in many species, including bats, birds, badgers and amphibians.

The environment and the wildlife in and around the four designated SNCIs on the A323 in Normandy i.e. Wyke Churchyard SNCI, Normandy Common SNCI, Wanborough and Normandy Woods SNCI (northernmost wood) and Wyke School Woods SNCI, all of which border the road, will be adversely affected by increased traffic and associated pollution. The UK BAP and Habitat of Principal Importance Traditional Orchard Habitat in Glaziers Lane will also be affected. The Normandy Traditional Community Orchard is home to a number of species and some of these are Notable Rare or Scarce species.

Another road where traffic will also be significantly increased is the A324. This borders the Thames Basin Heaths Special Protection Area and increased traffic and pollution will therefore have an adverse effect on the heathland and acid grassland.

The increase in volume of traffic resulting from the proposed A46 development will reduce Biodiversity and harm wildlife. The transport strategy for the area does nothing to mitigate for this and does little to reduce the number of additional motorised vehicles on the roads around the site.

The potential combination of A3 road improvements and major site work on site A46 and A47 over the next 15 years would be catastrophic for Normandy and Flexford’s link up roads (namely Wanborough Hill and Westwood Lane C16, and Glazier’s Lane D60). The construction traffic, continual noise and pollution generated by the developer will be excessive. Planning Policy has not fully considered the location of the site and traffic impact that site A46 and A47 will have on this rural community.

Scenario 5 demonstrates that if Flexford and Normandy is fully developed approximately 800 traffic movements will occur every hour.

Research has shown that 5% of the population die from premature death caused by inadequate air quality from traffic pollution. This will lead to significant health issues, especially for residents who border the three sides of the proposed developments of site A46 and the railway embankment bordering the south, plus those residents in The Paddocks who border the proposed development of site A47. No regard has been given for the well-being of residents. I strongly believe this development is ‘unsustainable’.

1. Limited capacity of rail services serving Wanborough Station and also the current limited capacity for Wanborough Station to serve an increase in passengers from the proposed developments in Sites A46 and A47, due to platform size, no disabled access and limited car and cycle

Although Guildford Borough Council state that the proposed developments of sites A46 and A47 are sustainable due to the close proximity of rail services serving Wanborough Station, there is little public evidence to suggest that Network Rail or indeed South West Trains have been consulted on whether there are plans to improve Wanborough Station or indeed provide additional train services serving Wanborough Station in order to cope with an increase in passengers. There is currently no disabled access to the Guildford bound line. The current platform size is insufficient to cope with an increase in passengers and there is limited car and cycle spaces outside the station entrance.

1. Flooding issues on both proposed development sites A46 and A47 and also within the Normandy and Flexford areas, such as the approach to Wanborough Station itself.
As site A46 is within 5km of the Thames Basin Heaths Special Protection Area (Policy 1: Sustainable Development), Guildford Borough Council should have considered the Habitats Regulations (NPPF) ‘water stress’. This has not been considered. Guildford Borough Council’s Surface Water Management Plan (SWMP) has excluded the land north of site A46, flood risk 3a and 3b (identified on the Environment Agency’s flood risk map). Loss of 3b an ‘effective flood-plain’ will severely impact on the surrounding areas on the SWMP.

The approach to the Wanborough Station is often flooded during often regular persistant or heavy rain to the extent that it is impassable by pedestrians and cyclists. I have not seen any evidence of flood improvement measures being proposed for this road. Surely this will have an impact on the increased usage of Wanborough Station and rail services if the proposed development in sites A46 and A47 go ahead.

Sites A46 and A47 are regularly flooded, particularly A47 which makes the very idea of using those sites for housing and schools, residential or care home and retail units as completely nonsensical as there is a serious risk to lives and damage to properties in those areas that regularly flood.

Although my comments relate to the proposed development sites A46 and A47 in Normandy and Flexford. I do have wider concerns over Guildford Borough Council’s Draft Local Plan.

The proposed ‘Growth’ indicated in this Draft Local Plan is based on the Strategic Housing Market Assessment (SHMA). The SHMA is the evidence base which Guildford Borough Council housing targets are based on. The SHMA statistics are distorted by large numbers from University of Surrey (Guildford) and has disproportionately increased the ‘need’ for houses. The Office for National Statistics (ONS) downgraded Guildford’s population growth.

The confidential commercial model used to calculate the SHMA numbers cannot be checked (Guildford Borough Council do not hold the model), and this has been taken on trust which I strongly believe is not satisfactory. Indeed on the 24th May 2016, some Councillors raised these concerns regarding the SHMA produced by G.L. Hearn, (this is the most critical piece of evidence in the Draft Local Plan) but the majority vote indicated that the full council meeting was satisfied that the SHMA was ‘a professional document’.

I object to Policy E2.

I believe that all new office and research and development (use Class B1a and B1b) floor space should be within Guildford town centre.

I object to the policy of expanding the Research Park onto Blackwell Farm and do not believe there are exceptional circumstances to justify incursion into this permanent and high quality area of Green Belt. The proposal to expand the 65,000 sq m by 9,000 sq m (existing allocation) with an additional 35,000 sq m amounts to an increase of 67% of the Research Park which is not required.

Although, Guildford Borough Council refused the last planning application for proposed housing ‘new village’ development at Wisley Airfield, I remain concerned that this site still remains with the 2016 Guildford Borough Council Draft Local Plan as a potential site for development. I object to this site being developed as I strongly believe it will lead to the loss of biodiversity on the site and adjacent habitats, including the SNCI and have a negative impact on the SPA of Wisley and Ockham Commons. There would also be a serious impact on road infrastructure on both the A3/M25 Junction and local roads into Ockham.

I do hope that my opinions in this consultation are considered seriously.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2200  Respondent: 8817505 / Michael Hughes  Agent:
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I wish to object to areas of the proposed Local Plan with respect to Site A46 Normandy and Flexfords Strategic Site.

Firstly this was not considered as a strategic site in the first consultation and is not only now being considered for development but being urbanised which is in conflict with the Solihull ruling.

There is indeed a need for some development within the village in particular for affordable housing of a standard and size which would allow residents to downsize as their circumstances change and for young people to either rent or purchase a home. There is also a need for sheltered housing. Both this and the opportunity to downsize would free up larger housing units for those wishing to purchase this type of accommodation.

These needs were shown in a survey which was taken within Normandy some years ago. GBC have certainly not engaged with the local residents concerning their needs. The size of the planned development will completely change the nature of Normandy. It seems likely that many of the proposed dwellings would not be purchased by local people or even Guildford residents but by people working in London and wishing to avoid the high cost of housing in the city by moving to an area outside the city but with good transport links. In which case there would be little benefit to Normandy residents.

There also appears to be some confusion in the language being used to justify the development of this land. It has been stated that the only reason for developing this site is because of the intention to build a school here whilst at the same time it is being claimed that the school is necessary here because of the number of pupils likely to be generated by the development of 1000 homes.

Whilst I agree that a further school will be required in the west of the GBC area, the Roker site would be far more suitable due both its position and the better links with the local bus system as well as the links which could be established with Merrist Wood College.

The question remains as to why when Taylor Wimpey submitted a plan for this development over 2 years ago no 'meaningful engagement' was made with the local community regarding the plan, most finding out only with the presentation of the final draft to the local plan. This is certainly not up to the standard of transparency in local government which should be expected and which would allow a full and meaningful dialogue regarding local residents needs.

The development as planned would require major upgrades to infrastructure in the area. Both sewage and drainage systems require investment now and this need would be far more extensive than presently required to support the level of housing suggested. The local road system is already overloaded yet the draft plan was voted through without the Strategic Transport Report having been made available and scrutinized, surely a most important document considering the traffic chaos which already exists in the Borough.

The draft plans, proposal to build 693 housing units per year is way beyond Guildfords needs and is more in line with London’s intentions which appear to be to turn all surrounding towns into suburbs. Proposals already having been submitted for rail services to Guildford and others to come under TFL.

There is no proof of 'Exceptional Circumstances' existing which would allow Normandy and Flexford's boundaries to be changed.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
The proposed change to 'Inset' of Flexford, Walden Cottages, homes in Guildford road and Northern end of Glaziers Lane and The Palm House Nurseries Travellers Site and its should not be completed and these should remain washed over by the Green Belt. The small pockets of what would become urban land could be more densely developed including the practice of Garden grabbing which can ruin the area. Development could also gradually be extended on the edges of these areas gradually eroding the openness of the Green Belt.

There are also the problems concerning infrastructure in the area which is already stretched. The main sewage system is already too small in diameter and would need considerable upgrade if any large scale development is made. This also applies to water supply, electricity and broadband which is already struggling to maintain an adequate service. The problems with road transport and the large number of heavy goods vehicles in the area are already well known by GBC. The removal of the plan for 50 homes A47 is also welcome as that area is prone to flooding and as such should not be developed as per national policy as well as the above reasons.

The housing which is required in the area are small developments of rental and truly affordable housing such as the cottages in Szarbo Crescent which which allow older residents to downsize, freeing larger housing and are also suitable as starter homes.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
The removal of the plan for 1100 homes on site A46 is welcomed however should other proposals in the draft be carried out the danger is that this land will gradually be developed should developers put forward a convincing argument to GBC. The worst scenario would be the piecemeal development of the area over an extended period which would create housing but no appropriate facilities. This land has been noted by inspectors as essential for the openness of the green belt in the area and this is even more important with the new developments which are proposed, and some approved in the Ash and Tongham area which are gradually reducing the area of open land separating Aldershot and its attached conurbation from Guildford.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to including the Wisley Airfield (A35) site in the Local Plan as the GBC Planning committee have already unanimously voted rejecting the proposed plan of 2,000 homes etc.

I object to including the Wisley Airfield (A35) site in the Local Plan as concerns have already been raised by authoritative sources such as Highways England, Thames Water, NATS and the Environment Agency.

I object to the huge development plans for the Wisley Airfield (A35) site as the surrounding infrastructure is unable to cope as it stands right now and would definitely fail with the addition of 2,000 houses etc. producing extra cars on the road, people at stations, children in schools, patients at health care units.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I object to the proposed site allocation of Garlick’s Arch (A43) as it is an ancient woodland in a Green Belt protected area and should stay as such. Once destroyed it can never be replaced.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

I object to the infrastructure requirements being ignored in the Send, Ripley, Clandon, Wisley and Gosden Hill areas. All the roads, medical facilities, public transport, schools etc. are already at full capacity and cannot be stretched any further.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the last minute site allocation A43a for a new on/off slip roads onto the A3 as the local roads already have a congestion problem. All the local small roads would be at daily gridlock due to the HUGE influx of through traffic.

I object to the danger of the increased volume of traffic that will arise from the A43a on/off ramps to pedestrians and cyclists. Many of our small local roads do not have pavements and very few cycle lanes.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

I object to the building of 40 houses and travellers pitches on A44 Send Hill site as the small single track road is not capable of being used regularly by increased traffic of any kind and it is not possible to make it any bigger.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**

---

I object to site allocation A25 Gosden Farm as the impact of the extra traffic through Send and Ripley to access the A3/M25 would be vast.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Attached documents:**
**Comment ID:** PSLPP16/4028  **Respondent:** 8817537 / Kim Meredith  **Agent:**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I object to the additional load that will be caused to public transport in the Send, Ripley, Clandon, Wisley and Gosden Farm areas with increased population. There is a lack of public transport. Local stations are already overcrowded. Car parks already overflow into neighbouring residential roads. Bus services in the area have recently been reduced.

I object to health suffering due to vastly increased air, noise and light pollution of all the additional traffic that would pass through the Send, Ripley and Clandon areas. The A3/M25 pollution is already in excess of permitted levels and building 2,000 extra homes with their extra vehicles at Wisley Airfield (A35) will only increase this.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy ID3

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I object to building 45 houses at Clockbarn Nursery Send (A42) because of inadequate access and traffic volume. Tannery Lane is too small a narrow country lane to take any more traffic. The junction with Send Road is already very hazardous for vehicles emerging into the main road. There is already planning permission for 64 houses at the Tannery and the building of a marina which will already exacerbate the congestion issue. The lane was not built for heavy use.

I wish my objections to be fully taken into consideration and that the Local Plan is amended accordingly.

I object to the proposed removal of the villages of Send, Ripley and Clandon from the Green Belt. There are no ‘exceptional circumstances’ for the boundaries of these villages to be altered in any way.

I object to the proposed removal of Garlick’s Arch (A43) and Wisley Airfield (A35) for the Green Belt as again there are no ‘exceptional circumstances’ to do so.

I object that this statement has been totally ignored in the Local Plan - “The fundamental aim of the Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belt are their openness and their permanence.” GBC seem to want to destroy the Green Belt not keep it.

I object that the proposed Local Plan does not meet the needs and desires of local communities who enjoy access to the countryside, clean air and peace and quiet afforded by wide open spaces.

**Re: Objections to Guildford Borough Council Proposed Submission Local Plan (June 2016)**

I object most vehemently to the Guildford Borough Proposed Submission Local Plan (June 2016).

I list below the reasons why.

I object to GBC not following the correct process when amending the Local Plan. I believe another full consultation under Regulation 18 is required as changes have been significant. Some sites have been added at the very last minute without proper consultation.

Site A4 in Guildford has been removed. This is a perfectly good housing site, within the town centre and therefore with sustainable infrastructure, and would make use of a brownfield site that is in need of redevelopment. The Plan has removed housing from this site, in favour of commercial retail – thereby effectively substituting Green Belt land for retail development, which is totally unacceptable.

Site A44 in Broadford Business Park has also been removed. This is another brownfield site that has already been developed. The Council’s claims to “have adopted a ‘brownfield first’ approach” (page 5) but this is clearly not the case, and is contrary to national guidelines.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A42 change at Clockbarn Nursery in Tannery Lane for the following reasons:

1. There has been an increase in proposed building of houses from 45 to 60 – this is ridiculously too many for our area.
2. This totally ignores hundreds of previous objections by local residents.
3. Access to Tannery Lane at the A247 junction is not viable for the amount of traffic that will be incurred.
4. Tannery Lane itself if not capable of being used by large or numerous vehicles – it is a Lane.
5. This will be eroding even more of the Green Belt.
6. There is already bad surface water flooding in this area. This can only increase the problem.
7. This has been increased by a third since the 2016 version of the Plan. This will have a significant impact on the already highly congested local rural road network around Send. This is in contradiction to section 2.14a of the Plan which states "Whilst most local roads are single carriageway, with a lane in each direction, it is at their junctions that the free flow of traffic is most often impeded during peak periods, in some cases resulting in significant delays." And yet there are no proposals to improve the local roads, only to add more junctions with the A3, thereby increasing congestion on the Trunk and Local road network.

I object to the lack of proper infrastructure planning for sites (A43 and A42)

The Foreword to the plan by Paul Spooner includes on page 5:

"We recognise that significant infrastructure upgrades are required to support existing communities and the planned growth of the borough. The delivery of sites allocated in this plan is contingent upon the provision of new infrastructure, which is a key theme of our Local Plan".
The lack of any plan for either physical or green infrastructure improvement clearly contradicts this in respect of both A43 Garlick’s Arch and A42 Clockbarn Nursery, Tannery Lane, Send. Development of these sites without the contingent infrastructure would therefore be contrary to the stated aims and themes of the Plan, and should not go ahead.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I object to the Policy A43, land at Garlick’s Arch, Send Marsh for the following reasons:

1. This totally ignores hundreds of previous objections by local residents.
2. There are no ‘exceptional circumstances’ as required by the National Planning Policy to take this area out of the Green Belt.
3. This will remove ancient woodland which cannot ever by regained.
4. Ripley and Send villages will merge, therefore defeating the purpose of the Green Belt.
5. The number of homes proposed is excessive. Send is a village. This is over-development to the extreme.
6. The area is subject to frequent flooding and is currently a Flood Zone 2 allocation.
7. The excessive traffic that will be generated will totally cause mayhem on the Send and Ripley roads. Already whenever there is a road closure nearby or traffic accident (almost a daily occurrence on the A3/M25) in the vicinity – the main Ripley, Send Marsh and Send roads are ridiculously congested or at a total standstill.
8. There is no proven demand for Travelling Show people sites in this location. This development site is for 400 homes and so is not compliant with the minimum of 500 in as stated in section 4.2.24 of the Plan.
9. Guildford Borough is over 100 square miles. Of the 11350 homes proposed in the Plan, 40.6% (4613) are within 3 miles of Send Marsh, most of them on Green Belt. This is grossly unfair on an already overcrowded part of the borough.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A58

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object to the Policy A58, land at Burnt Common, London Road for the following reasons:

1. This was deleted from the 2014 draft plan because of all the objections previously made – therefore why has it been included again?
2. There has been a decline in demand for industrial land since the previous draft plan but the 2016 version uses the word ‘maximum’ a change from ‘minimum’ within it – this does not make sense.
3. There are already empty sites and units at Slyfield and Guildford and therefore no need to build new industrial and warehouse developments in our area. I can only envisage these will end up being empty too.
4. The 2017 Employment Land Need Assessment shows a reduction in demand for industrial land for the whole borough to 3.9 hectares. This policy is a huge allocation of 10 hectares for Send alone. Totally unacceptable.
5. The small roads around this area are already often at gridlock. This can only make the problem worse.
6. The merging of existing villages (which will occur) defeats the purpose of the Green Belt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
The increase in house prices is not solely due to increased population demand but a range of temporary one off factors that include historically very low interest rates and the increase in household income following the growth in double income families. Interest rates in the medium to long term will rise to normal levels and the number of two income families will stabilise. Both these changes will lead to UK house prices becoming lower relatively. House prices have also been recently increased temporarily by high levels of overseas investment in UK property. However, recent changes to housing taxation have already reduced this overseas investment.

Recent UK population growth should also not be assumed to continue; this growth has been driven largely by high levels of EU immigration in the last 10 to 15 years. Following the EU referendum, immigration from the EU is likely to fall rapidly and indeed given the fall in the £, many recent migrants may well return home. The assumptions behind the projections need to be brought up to date once the BREXIT terms become clearer and the projections recalculated before the Local Plan is finalised.

Answer (if comment is on questions 1-7 of the questionnaire): ()

RE: Objections to the Guildford Borough Council Local Plan Proposals for West Horsley

I strongly OBJECT to the current proposals on the following grounds:-

As the country has voted to leave the EU, the Guildford Borough Council's Local Plan proposals are now void as the large numbers of legal immigrants from within the EU will now be greatly reduced. Therefore the evidence base that has been used is now incorrect due to the decrease in the number of people that will settle in this country in the future.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: SQLP16/724  Respondent: 8817601 / A. L Thain  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 7: Any other comments?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. A new larger replacement school for the Raleigh should be constructed on the site (built and paid for by the developers) and the old Raleigh school can then be demolished and replaced by new housing.
2. The site would have the main road entrance via a new roundabout constructed in East Lane.
3. To reduce traffic congestion a pedestrian tunnel should be built under the railway line embankment opposite the Horsley Surgery. This will enable safe, easy access to shops, railway station, doctors and East Horsley village hall. It will also allow residence of East Horsley a safe pedestrian route to the new school which would also reduce traffic.
4. By having just one large site this will also make the provision of utility services easier, which will reduce the number of surrounding roads that will have to be dug up to provide new sewers, ducts and cables to be laid as most of the existing infrastructure cannot cope with such a large increase in demand. It will also contain all construction traffic to one site accessed off the main village road thereby reducing disruption.
Limited development of a very small number of individual houses on sensible sites around the village can still be allowed to enable the village to evolve slowly over time.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/597  Respondent: 8817729 / Roger and Helen Mayes  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - Shalford (south)

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

We write to object to the proposed change to the settlement boundary to include fields behind Shalford Village Hall and Christmas Hill. The Green Belt and Settlement Boundaries have been in place for a long time and we see no good reason to change them. The only purpose for such a change would be to facilitate the development of the land involved and such development is highly likely to have a negative effect on the open character of this area of the village. As frequent visitors to the Village Halls, we are acutely aware of how much the land rises up and any development here would be likely to dominate these facilities. The green and rural nature of the land provides a very agreeable and visible backdrop to the village. In our view, the land should remain under the protection afforded by Green Belt and AGLV designation with other planned large scale local developments meeting the forecast future housing needs.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/1516  Respondent: 8817953 / Sheena Ewen  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick's Arch (A43) which is not mentioned.

It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)

- The "objectively assessed need" figure of 693 homes a year is too high.

- A professional review by NMSS has concluded that, even basing the calculations on a period of stronger economic and student growth, the housing need figure should be revised down to 510 homes a year and the method changed to consider student housing need separately due to the distorting effects

- The current SHMA inflates the proposed housing figure due to
  - failure to correct for errors in the historical data for international migration flows,
  - issues with the way it considers students and affordability, and~
  - flaws in the method for estimating the number of homes needed to support job growth.

- It is unacceptable that demographic and economic model assumptions have been withheld from scrutiny and therefore cannot be checked making the process unaccountable.

The Plan's proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the borough, it is more than double the figure of 322 used in previous plans. The SHMA report methodology is I believe inaccurate; it inflates the needs of the borough by distorted student numbers. It is based on commercially confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?
I OBJECT to Gosden Hill development being in the Local Plan. The land in Gosden Hill currently does exactly what the
Greenbelt was designed to. It provides a green buffer between the Guildford Urban Area and West Clandon and other
villages and gives Burpham a defined green boundary and breathing space.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with
paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from
encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. These are all
requirements of the NPPF.

The scale of the Gosden Hill development is out of proportion to West Clandon. It would have four times the amount of
housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a
history going back to the doomsday book and beyond.

While no connection is currently shown between Gosden Hill and A247 (save an already overloaded A3) the developer will
almost certainly seek to introduce such a connection and bring major new traffic into the village and the problematic A247.

Gosden Hill is the most obvious location for the north end of an aspirational A3 tunnel to bypass Guildford. It has rising
ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will add to the burden on to the A3 which is already
stationary every day during rush hours. The linking of the A3106 through Burpham, B2215 through Ripley and A247
through West Clandon would channel thousands of cars, delivery vehicles and construction vehicles through the narrow,
winding (A247) road through West Clandon. This is already a road where large lorries mount the pavement virtually every
day.

The enhanced volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build
two schools.

Without major as yet unplanned modifications, the existing two way north facing junction at the site would require vehicles
wanting to go north on the A3 to go through Burpham which is grid-locked every day. There is no south facing slip and
traffic would need pass through Merrow and Ladymead to access the A3 / A31 southbound. A new on-slip at Burpham
would only be 1.8km from the on-slip at Burnt Common which is against Highway England's requirement of 2km.

Burpham's sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.
There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.
Electricity supply is also inadequate and would require a major infrastructure development.

A proposed railway station was previously rejected by Guildford Borough Council in 1984 because it feared Gosden Hill
would become a dormitory estate for London. This has not changed but we are more dependent than ever on motor cars to
access the station.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it
wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be
uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West
Clandon towards East Clandon and Wisley.
If the Strategic Sites are all developed, the north of Guildford will deliver 36% of demand, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

Development and improvement of the A3 is not even slated to start until after 2020. The building of a tunnel, which is only an "aspiration" in the Local Plan is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill and may have health and safety issues.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPS16/2803  Respondent: 8817953 / Sheena Ewen  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy A43a

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The proposed north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is minimal requirement for existing local traffic to access and egress the A3 to the north save to mitigate loads through Ripley, but the addition could draw in a huge amount of 'through' traffic. There has been no impact assessment for this last minute inclusion.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy E5

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

---

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick's Arch (A43) would result in the loss of four existing successful rural businesses which have been in existence for over 30 years, and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT. Tourism and visitors do not depend on new visitor "attractions" and could actually be damaged by them, as compellingly argued in the current debate over Newlands Corner. In this policy, the presumption in favour of development runs the risk of becoming an excuse for overdevelopment / "Disneyfication". Heritage sites and the Green Belt are particularly vulnerable to harm.

Guildford has many "leisure and visitor attractions" already. The case for creating more is not made and no examples are given. Instead, the plan's explicit priorities should be:

1. To protect the borough's prime leisure and tourism asset, its countryside, from inappropriate development. This is all the more valuable because of its accessibility from London, the rest of Britain and from overseas.

2. The most valuable forms of tourism, such as walking and cycling, require no new investment. In the overcrowded South-East of England, lack of development is a leisure and tourism asset, not a liability.

3. To enhance and promote Guildford's river landscape and to seed-corn town-break packages for high-value tourists. To achieve this, the policy needs to define what leverage, if any, Council planners have to influence normal tourism market mechanisms.

4. To rule out the redevelopment of scarce rural hotel sites (e.g. Thatchers, East Horsley, earmarked for 40 new houses under Site A37 of the plan yet just a short walk from the new opera house).

I trust that the objections made above are fully taken into consideration and that the Plan is amended accordingly.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT (POLICY H1- Homes for all) Numbers aside, all the policy in the blue box says is that the Council will encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not been scrutinised or evaluated.

I support higher density development in the urban area to suit the aspirations of town dwellers. Much of Guildford town could usefully be regenerated with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.
Student accommodation should be provided for 100% of new students and more than 60% of existing students. This would free up family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages than those proposed in the plan. In my view, the Council's timidity is a case of "regulatory capture" by Surrey University, which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students were accommodated in this way, up to 2,000 homes would be freed up in town.

Guildford borough already has a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H3. This is a Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the "mix" this can include "market" housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove "exceptional circumstances."

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure.

The proposed development under the plan will cause greater congestion in and around our villages. Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley. The A247 through West Clandon is a real issue of concern as an "A" road with inadequate width, inadequate lighting and inadequate speed control.

Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists pass through the villages on the way to the Surrey Hills. There are no proper cycle lanes on the narrow local roads surrounding the villages and with greater vehicle traffic being generated from the proposed developments there is a real danger that there will be an increase in road accidents involving cyclists directly as a result of the development proposed under the local plan.

The Plan does not provide an achievable strategy for improving capacity on these local roads. To wilfully add traffic load would be quite irresponsible.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added pollution and risk to injury of the public. In the case of West Clandon, The Street (A247) generally only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements as has happened most recently on 12th July 2016.

I OBJECT to the lack of proper infrastructure planning for sites.

Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents in the locality will see their quality of life significantly deteriorate in many ways. Without proper planning and funding for healthcare and other facilities, local services will be overwhelmed.
Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no consideration of provision of the increased capacity of Guildford hospital.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT due to the congestion that development will cause to the trunk roads, A3/M25 (Policy 12)

There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick's Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity and even standstill during peak hours and any development prior to improvement of these roads will exacerbate the situation further.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns (Policy 13)

Paragraph 4.6.27 of the Plan states: "Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health." The significant level of development being proposed, particularly in the north east of the borough will lead to further highways congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute as traffic spills onto roads in built up residential areas and will lead to greater levels of air pollution, which in turn will have a detrimental effect on local residents and their health and can result in early death.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary. There is a lack of transparency in the underlying assessment of needs which is completely unacceptable. The effects on traffic would be woeful and a suitable solution is not apparent in the plan.

I set out below my objection to specific policies and matters within the Plan.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am at a loss to understand the need for all these houses in Horsley. Our local population has not gone up, birth rate is stable. Therefore, where are all these people coming from?

This is a Green Belt area also a SSI area, and must be preserved. We elected Guildford Council to consider and abide by the wishes of its residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/378  Respondent: 8818337 / Susan Stratford  Agent:

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I object very strongly to the Guildford Plan, for these reasons:-

1. a) The removal of West Horsley from the Green Belt is unlawful, and morally indefensible.
2. b) The proposed new Settlement Area for the village would considerably widen the village boundaries. This would encourage even further development in the future.
3. c) The proposals are for 385 new homes in a village of 1,111 homes, an increase of 35%.
4. d) The infrastructure in the village is already under severe strain:-

the Raleigh primary School is already at more then full capacity and simply could not find space on its site for an additional entry form.

the Horsley station carpark is already full on weekdays, with commuters' cars,

the roads are choked at school times along Ockham Road North by Glenesk school,

and it is almost impossible to turn out of the Street at the Bell & Colvill roundabout near Cranmore School

after heavy rain the Street in West Horsley is impassable due to floodwater under the railway bridge, and Ripley Lane runs with water like a river

1. d) We are told that there is an urgent need for new homes for key workers, for young people who wish to stay in the village where they have grown up, and for opportunities for the elderly to downsize within their village.

BUT West Horsley house prices are much higher than the national average. How can the proposed new homes be made affordable? Is some shared ownership scheme proposed? Will there be a points system to determine who is eligible for these new homes? Will a certain percentage be reserved for key workers?

The Guildford Plan proposals for West Horsley cannot be supported by the existing infrastructure. There is absolutely no guarantee, in a free market, that the new housing would go to those for whom it is intended.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

A visit to the village would clearly demonstrate that our present roads are failing to meet current traffic requirements. In particular the A247 has pinch points in the centre of West Clandon village that requires lorries travelling in opposite direction to mount the pavement to pass. The present reply to a constructive local petition to address this problem effectively acknowledges the problem but says short of a "Black Water By Pass,, compulsory purchase order scheme nothing meaning full can be done! Many of us agree and it flies inthe face of all logical thought for the 2016 Plan to suggest further development in this area and in particular Burnt Common and West Clandon parish.
I strongly object to the 2016 Local Plan for the Guildford area as it is flawed at many levels and I demand that it be withdrawn and re-written to reflect the real requirements of both the local community and our national needs. The draft sets out a policy of green belt destruction to meet a set of questionable targets that bears no relationship to the requirements of the local community. Instead it attempts to impose on us the ambitious aspirations of a few local individuals and in some instances councillors who threaten us with even greater destruction of our communities and countryside if we do not adopt this plan.

Guilford is fortunate in having an area of outstanding natural beauty to the west and thankfully this is protected. The Green belt to the east is of equal importance and I strongly object to plans to destroy it through urban sprawl and industrial zoning. The planned growth figures were questionable before the EU referendum and are now a substantial over estimate given the national governments own forecast for the economy for the next decade. Consequently a significant reduction in the number of new homes should be adopted and conditioned by the opportunity to develop them on existing brown field sites in the Borough. Destruction of the green belt to the east of Guildford is indefensible not only because it would be an irretrievable loss to future generations but because its infrastructure which is already under extreme pressure could not cope with further development.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
In summary the plan needs to be re-examined once again post Brexit and the growth plan focused on redevelopment of brown field sites in the Borough. We have no right to destroy the Green Belt, it's the property of future generations!

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

1. I object to the changed policy A25 Gosden Hill for the development of 1700 homes which is still far too much.
2. There is no need for housing on this site because the local plan housing target is incorrect and inflated and ignores constraints.
3. Gosden Hill is located entirely within the Green Belt. No exceptional circumstances have been demonstrated for building on this site and therefore development here does not meet paragraphs 87-89 of the NPPF. Furthermore, Gosden Hill performs all five functions of green belt.
4. The site has no provision for foul or surface water sewerage and adjoining sewerage is at capacity.
5. The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford. Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too narrow and will come under further pressure. It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from Send through to Guildford.
6. The development of this site cannot be sustainable and will cause massive congestion onto surrounding roads. The development will generate in the region of 6,000 vehicles which will exit straight on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon.
7. I object to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through Send and West Clandon - a road which is already under traffic stress (see below).
8. The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
9. A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. I object to the changed policy A43 Garlick’s Arch for 400 homes and 6 travelling show people pitches
2. It ignores all the thousands of previous objections made by local people
3. There is no proven demand for travelling show people plots in this location
4. There is no need for putting houses on this site because the local plan housing target is incorrect and inflated and ignores constraints.
5. The allocation of 28.9 ha is an excessive land grab into the Green Belt. If we take a normal density of 30 homes per ha and it is at the end of the day proven that there is a need for 400 homes in this location the land requirement is 13 ha not 28.9 ha which is more than double. This replicates a similar over land grab at Burnt Common where the factor is 7 times the land required.
6. This confirms the worrying impression that GBC have a pre-determined policy of building on the Green Belt at every opportunity. The arithmetic does not stack up. One would have thought that they would as custodians of the green Belt be intent on conserving it rather than exploiting it.
7. The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.
8. Garlick’s Arch (A43) is in an unsustainable location. It does not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. The site is unsuitable due to lack of access to sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick’s Arch in the Infrastructure Plan. Residents will be dependent on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.
9. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.
10. I object to the proposal to remove Garlick’s Arch from the Green Belt. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for this land to be taken from the Green Belt. Once taken the green belt is lost forever. There is a real danger that the loss of this Green Belt will result in urban sprawl and the neighbouring villages merging into one another. The significant development in West Clandon, Send and Ripley will result in the character of these villages being lost and the countryside encroached.
11. I object to the development at Garlick’s Arch because of flood risk. The site at Garlick’s Arch is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.
12. I object to the loss of rural employment on the site. The development at Garlick’s Arch would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises.
13. I object to the potential loss of Ancient Woodland on the site. The proposed development at Garlick’s Arch will have a permanent impact on the character of the Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600.
14. I object due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1). Our villages are already suffering from severe congestion for much of the day, for example the Newark Road and Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.
15. Furthermore, many of the country lanes around the villages of West Clandon, East Clandon, Ripley, and Send are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition. I object to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

16. Many of the affected villages, such as West Clandon, East Clandon, Send and Ripley, already suffer from parking problems. Further development around these villages will only result in more traffic and more parking problems.

17. With some 5000 houses being proposed close to the villages of West Clandon, East Clandon, Send and Ripley, the roads serving the village will become even more congested. Cycling has become a popular past time, particularly at weekends hundreds of cyclists past through the village on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

18. The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the roads becoming ever more dangerous for pedestrians.

19. I object to the lack of proper infrastructure planning for sites (Policy I1). Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

20. Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

21. Many of the utilities in the West Clandon, East Clandon, Burpham, Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

22. Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

23. I object due to the congestion that development will cause to the trunk roads, A3/M25 (Policy I2). There is no certainty that either the A3 or M25 in the borough will be improved to increase capacity and reduce congestion during the Plan period. Highways England has no plans to even examine improving the A3 before 2020. I have considerable concerns that development of the large residential sites identified at Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25), will take place before any improvements are made to the trunk road network. The A3 & M25 are already at capacity during peak hours and any development prior to improvement of these roads will only make the situations worse.

24. I object to poor air quality concerns (Policy I3). Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health.

25. I object to the inclusion of the land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley (A43). Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

26. It is clear that with this site being added at the eleventh hour and no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
1. I object to Policy A 58 at Burnt Common and to the proposed inclusion of Burnt Common as an Industrial Strategic Employment Site.

2. This previous allocation for B1c, B2 and B8 development was removed from the 2014 draft due to all the objections made previously.

3. The word “minimum” is a change from the previous “maximum” in the 2016 plan and since that time there has been a decline in demand for industrial land. This change alone is unacceptable since even if there was a need to build 7,000 sq m at Burnt Common this development would only require 1.4 ha at a standard plot ratio density of 50% not 9.26 ha. There is no justification for zoning an additional 7.86 ha in the Green Belt.

4. There is in fact no justification for building any more industrial development in the borough particularly at Burnt Common. The current industrial pipeline of granted consents of 38,357sqm in B1c, B2 or B8 use class space is double the 19,000 sq m said to be needed by Aecom who justify the need for new space on top of the existing pipeline by a completely unsubstantiated suggestion that “there is the possibility that some pipeline developments may not come forward at all, or be developed in different quantities by use class than has been consented.”

5. There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

6. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 9.26 hectares at Send in the Green Belt.

7. The Employment Land Needs Assessment update 2017 (ELNA) states “that the pipeline for employment floorspace defined by planning permissions yet to be implemented and prior approvals suggests the potential for an additional 33,607sqm of B use class floorspace to come forward. This figure comprises a net loss of 4,750sqm of B1a use class floorspace and a net gain of 38,357sqm in B1c, B2 or B8 use class space.”

8. 38,357 sq m of B1c, B2 or B8 use class is quite sufficient supply for the plan period and is in fact more space than the 3.9 ha of industrial land that is said to be needed for the plan period by Aecom. Since if you were to develop 3.9 ha at a plot ratio of 50% it would provide new industrial development of 19,000 sq m approximately half of current planning permissions granted. This does not justify the need for new development of industrial space on the Green Belt in such areas as Burnt Common.

9. The reality of demand for industrial space is that it is both nationally and locally in decline and this is evidenced by old existing permissions that have not been taken up and developed. The ELNA alludes incorrectly to the poor quality of existing space being a “constraint” on supply and fails to acknowledge that this assertion cannot apply to potential newly developed space e.g. the undeveloped pipeline of 38,357sqm.

10. The impact on small surrounding roads will create traffic gridlock.

11. It will join up existing villages and defeat the purpose of the Green Belt.

12. The ongoing poor quality of the updated research undertaken by Aecom in the Employment Land Needs Assessment 2017 does not support industrial development on land in the Green Belt at Burnt Common.

13. The Aecom research is generally superficial and lacks sufficient detail and analysis between B1c, B2 and B8 use classes and no reliable individual analysis has been undertaken of the widely different supply and demand dynamics of light industrial, general industrial and warehousing and distribution floor space.

14. The potential inclusion of a waste management facility mentioned at paragraph 4.4.23a lacks enough detail for proper consultation and is completely inappropriate.
Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The Plan now states: “the presumption in favour of sustainable development will not automatically apply to policies relating to sites protected under the Birds and Habitats Directives and/or designated as Sites of Special Scientific Interest (SSSIs), land designated as Green Belt, Local Green Space, the Surrey Hills Area of Outstanding Natural Beauty, designated heritage assets and locations identified as at risk of flooding.”

Gosden Hill and Blackwell Farm (both currently in the green belt) are called “urban extensions” surely a euphemism for urban sprawl? Garlick’s Arch and Burnt Common developments take land from the green belt to extend Ripley/Send. One of the important specific purposes of the green belt is to prevent urban sprawl.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Comment ID: pslp17q/638  Respondent: 8818433 / Julian Masters  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2017 / Question 4: Duty to cooperate

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

The NPPF states para 155: “Early and meaningful engagement and collaboration with neighbourhoods, local organisations and businesses is essential. A wide section of the community should be proactively engaged, so that Local Plans, as far as possible, reflect a collective vision and a set of agreed priorities for the sustainable development of the area, including those contained in any neighbourhood plans that have been made.”

The changes in this latest version of the Guildford Local Plan show little or no willingness of Guildford Borough Council to reflect a collective vision. Despite the many thousands of responses to previous versions of the Plan which overwhelmingly rejected building on Green Belt land this latest version has as much, if not more, building on the Green Belt and increased problems of infrastructure and traffic which will bring increased noise and air pollution and danger to residents.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPA16/3958  Respondent: 8818625 / Beth and Frank Fuller  Agent:
Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix C: Infrastructure Schedule
I OBJECT to the proposed Infrastructure Schedule (Appendix C)

The Infrastructure Schedule sets out the key infrastructure requirements on which the delivery of the plan depends. For each of the Key Allocated Sites in the borough it identifies infrastructure projects that are required, except for Garlick’s Arch (A43) which is not mentioned. It is clear that the Plan takes no account of the infrastructure required for this site and is therefore not fit for purpose.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix D: Evidence base

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

1. The housing needs assessment is flawed in various respects and overstates housing need. In addition since it was produced, the referendum Brexit decision has almost certainly reduced future housing need and rendered the previous assessment seriously out of date. As a result any assessment of Green Belt sites which took place to consider whether “exceptional circumstances” existed to outweigh the harm to the Green Belt was based on false premises and should be reconsidered.

2. Having determined housing need the Council was entitled to consider constraints before determining the housing number. I believe that as Ill as being entitled to do this the Council was required to give proper consideration to constraints. The scarcity of sites outside the Green Belt as Ill as infrastructure (most notable roads) considerations all represented constraints which should have been taken into account in determining the final housing number. Accordingly in this regard our objection to the allocation of Green Belt sites is twofold. First I believe constraints should have been applied. Secondly I believe the Council did not properly consider constraints and that their decision making process was flawed and thus subject to being set aside by the Inspector.

3. Even if having properly applied constraints there is a need to develop in the Green Belt then specific Green Belt sites should not be included in the plan unless “exceptional circumstances” for development are proven in relation to that specific site, as stipulated repeatedly in the NPPF. The Green Belt should trump short-term considerations such as perceived housing need, as case law has established. There needs to be a specific balancing exercise conducted on each Green Belt site weighing the harm to the Green Belt against the very special circumstances which are argued in favour of development at that particular site. There is no evidence this has been done. Instead the council have appeared to say that having chosen a housing needs figure and decided it cannot be met without building on Green Belt then there is no need for any further consideration and any convenient Green Belt site can be allocated for building at will.

I OBJECT to the Strategic Housing Market Assessment SHMA figure of 693 houses per annum in the borough being too high (Appendix D)
• The “objectively assessed need” figure of 693 homes a year is too high.
• A professional review by NMSS has concluded that, even basing the calculations on a period of stronger
economic and student growth, the housing need figure should be revised down to 510 homes a year and the
method changed to consider student housing need separately due to the distorting effects.
• The current SHMA inflates the proposed housing figure due to
  ◦ failure to correct for errors in the historical data for international migration flows,
  ◦ issues with the way it considers students and affordability and
  ◦ flaws in the method for estimating the number of homes needed to support job growth.
• It is unacceptable that demographic and economic model assumptions have been withheld and cannot be checked
making the process unaccountable.

The Plan’s proposed growth is based on the SHMA report. This concludes that 693 homes a year are required by the
borough, it is over double the previous figure of 322 used in previous plans. The SHMA report methodology is I believe
inaccurate; it inflates the needs of the borough by distorted student numbers. However, it is based on commercially
confidential modelling assumptions that cannot be checked or reviewed. There is no transparency to this evidence base and
it is therefore impossible to assess its accuracy. This is not democratic and is not appropriate for consultation of the Plan.

The National Planning Policy Framework allows the overall housing target to be reduced to take account of protected
wildlife areas (e.g. Thames Basin Heath SPA), landscape areas (Surrey Hills AONB), Green Belt, flood risk and significant
infrastructure constraints, all of which apply to Guildford. This local plan and the SHMA number have completely ignored
these factors.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Document:  Proposed Submission Local Plan: strategy and sites 2016 / Policy A25

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

POLICY A25 - Gosden Hill Farm

I OBJECT to Policy A25 with proposals for Gosden Hill Farm.

The Green Belt at this point serves the important function of separating West Clandon from the edge of urban Guildford.
Development here will cause the two to coalesce defeating one of the objectives of the Green Belt. If this development
proceeds I believe the narrow strip of Green Belt remaining between Guildford and Clandon at this point will be too
narrow and will come under further pressure.

It will represent an undesirable ribbon development along the A3. It will be highly visible from the A3 when approaching
Guildford and will, in conjunction with A43a at Garlick's Arch give the appearance of almost continuous development from
Send through to Guildford.

The Plan does not put forward any evidence that exceptional circumstances exist to justify removing this site from the
Green Belt.
The development will overburden the local road network and increase congestion on the A3 and A247 through the centre of West Clandon. This is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement.

Note the following accident data:

2010 –2014 from Crashmap data

- Clandon Cross Roads Area to Bulls Head - 17 incidents
- Bulls Heads Head to Bennett Way - 8 incidents
- Bennett Way to Highcote Lane - 15 incidents
- Tithebarn Lane to Portsmouth Road Birch Close - 8 incidents

2015

- 21 Oct 2015 – A247 near shell garage - Three vehicles collided causing delays
  Surrey Fire and Rescue deployed.

2016

- 15 April 2016 12 year old boy injured in The Street – A247 closed in both directions
- 28 April 2016 A3 West Clandon London bound between A247 Tythebarns Lane (Burntcommon and M25J10 (Wisley Interchange) congestion on A3 to A3100 Clay Lane Burpham
- 30 6 2016 Motorcyclists with injuries airlifted to hospital  Send Marsh Road

Attempts have been made over many years to reduce traffic, traffic speeds and accident risks through West Clandon, however little has been achieved as the road cannot be widened and SCC is reluctant to impose further speed limits as congestion is already very high.

I object most strongly to the proposal for a link road to bring traffic from the Gosden Hill development to the proposed 4 way junction at Burnt Common. This has the potential to generate large volumes of traffic (including commercial vehicles) on the A247 through West Clandon - a road which is already under traffic stress (see below).

The land in Gosden Hill does exactly what the Greenbelt was designed to achieve. It provides a green buffer between the Guildford Urban Area and West Clandon, gives Burpham a defined green boundary and breathing space and it hides Guildford town from visitors until they pass the off-slip to Burpham.

No exceptional circumstances have been demonstrated for building on this site and therefore it does not comply with paragraphs 87-89 of the NPPF. It stops the sprawl of Guildford town, assists in safeguarding the countryside from encroachment and assists in urban regeneration by encouraging the recycling of derelict and other urban land. All of these are requirements of the NPPF.

The scale of Gosden Hill is out of proportion to West Clandon. It would have four times the amount of housing plus shops, offices/factories, GP surgery, schools. Development on this scale would blight a historic village with a history going back to the doomsday book and beyond.

Gosden Hill is the most obvious location for the north end of an A3 tunnel. It has rising ground and is situated just before the urban area. If it is built on, it will be very difficult to construct a tunnel.

The development will generate in the region of 6,000 vehicles which will pour on to the A3 which is stationary every day during rush hours. The linking of the A3100, B2215 and A247 would channel thousands of cars through the narrow, winding road through West Clandon, a road where large lorries mount the pavement virtually every day and through Send and Ripley which are also severely constrained.

The volume of traffic will greatly increase air pollution which is particularly critical given the proposal to build two schools.
Currently, a two way junction at the site would require vehicles wanting to go north on the A3 to go through Burpham which is grid-locked every day.

Burpham’s sewers are at capacity. Sewage would have to be pumped to Slyfield for processing, a project of enormous cost.

There is inadequate fresh water in Guildford and current supplies could not meet the needs of a development of this size.

Electricity supply is also inadequate and would require a big infrastructure development.

The railway station was rejected by Guildford Borough Council in 1984 because it feared Gosden Hill would become a dormitory estate for London.

The wording of the Local Plan with regard to Gosden Hill is so loose that the developer could virtually do whatever it wants.

The remaining agricultural land between Gosden Hill and West Clandon is so small that it is highly likely to be uneconomic and therefore a prime candidate for further development which would roll the Guildford Urban Area over West Clandon towards East Clandon and Wisley.

If the Strategic Sites are developed, the north of Guildford will deliver 36%, 5,036 houses towards the total of around 14,000. The infrastructures of the existing villages and the A3 will be overwhelmed by the scale of development.

A new on-slip at Burpham would only be 1.8km from the on-slip at Burnt Common which is against Highway England’s requirement of 2km.

Development of the A3 at best will not start until after 2020 and the building of a tunnel, which is only an “aspiration” in the Local Plan, is likely to be many years after. In the meantime given that developers build houses to provide cash-flow for infrastructure, Gosden Hill will have a crippling effect on villages like West Clandon and the A3.

Gosden Hill already has surface water problems. Merrow Stream crosses the site. No hydrological survey has been carried out to assess the implications. Electricity pylons run through the centre of Gosden Hill which have health and safety issues.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**

I OBJECT to Policy A43 and A43a on Garlick’s Arch.

The site was only inserted in the draft plan at a late stage just before publication of the consultation draft which is a shabby way for the Council to proceed. The site is not a sustainable site being far from any infrastructure facilities and transport links. The bus service is infrequent and it is almost certain any future residents will rely almost entirely on cars for journeys. Similarly any employees at the employment areas will almost undoubtedly arrive and leave by car.

The site is susceptible to flooding and will not make a suitable site.
The Green Belt at this point serves the important function of separating West Clandon from Send. Building here will cause the two to coalesce defeating one of the objectives of the Green Belt.

I have seen no evidence that exceptional circumstances exist to justify removing this site from the Green Belt or that this important issue has been addressed. The Green Belt and Countryside study did not even consider this site.

It is understood the Council's eyes may have been turned by the possibility of receiving for free the land which might be used for new A3 slip roads in return for allowing this development, thus justifying it as some form of enabling development. However the slip road land if needed could be safeguarded in the plan and acquired by compulsory purchase when required. Lack of current funding for the slip road is not a justification for allowing the development of this site. If the slip road is genuinely needed then government funding will be available for it. (One of the reasons for turning down the so called enabling development proposal intended to fund the rebuilding of the Howard of Effingham School was that the redevelopment of the school was not essential. As and when it became essential Government funding would become available. Accordingly enabling development was not necessary. The same principle applies here.)

The A247 running south past this site through the centre of West Clandon is already very heavily used whilst being unsuitable for designation as an A road. In places it is too narrow for two lorries to pass causing them to mount the pavement often at speed. It has narrow bends with poor sight lines, an infants school and a hump-backed bridge concealing the entrance road to the station for southward traffic. In addition, there are no continuous footpaths which forces pedestrians to cross and re-cross the road. Development at Garlick’s Arch will only exacerbate the problem and make the road even more congested and unsafe for pedestrians.

The development will cause harm to the ancient woodland on and by the site.

Taken together with the Gosden Hill site, there will be a ribbon of development along the A3 in contrast to the current "soft" edge approach to Guildford.

Garlick’s Arch has previously been protected from development as Green Belt. Under the Plan it is proposed that the site will be developed for approximately 400 homes (C3) and up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8). There are no exceptional circumstances which allow for the removal of this land from the Green Belt (Policy P2).

The Plan states the preference is to making the best use of previously developed land. Yet at the 11th hour a perfectly acceptable brown field site at Burnt Common, capable of accommodating approximately 100 houses, was removed from the Plan and replaced with the Garlick’s Arch site. There was no proper consultation in relation to the inclusion of this site. Why was a brownfield site removed and replaced with a Greenfield site? There is no evidence that Section 18 of the Planning and Compulsory Purchase Act 2004, which requires local planning authorities to produce a Statement of Community Involvement, has been complied with for this site. This only came to light for local residents following a Council meeting on 11th May 2016.

Moreover, Guildford Borough Council’s own Green Belt & Countryside Report does not address Garlick’s Arch at all, so there is no evidence base to support the inclusion of this site.

National Planning Policy promotes sustainable developments, with sustainable transport. With ever reducing bus services in the area and no train station within reasonable walking distance it is impossible for any development on this site to offer a sustainable transport solution. Development on this site is wholly inappropriate (Policy I3).

The stream, which runs through the site, is identified as having a high risk of flooding by the Environment Agency. There are other sites that do not flood that can be developed and therefore this site should be removed from the Plan (Policy P4).

This site is bordered by Ancient Woodland and within it a number of trees are protected by Tree Preservation Orders (Policy D3).

The site has an abundance of wildlife, some of which are protected. It is home to many types of owls and bats, with the woods having cuckoos and woodpeckers. In addition there are regular sightings of badgers, deer and red kites. The development of the site will result in the loss of habitat. No wildlife report has been conducted on the site. (Policy I4)
It is clear that with this site being added at the 11th hours no infrastructure planning has been undertaken. The Infrastructure Schedule makes no provision for any infrastructure improvements for this site. How will the local services such as schools and doctors cope, many of which are already at capacity? (Policy I1)

Furthermore, several electricity pylon runs through the site, which will have the potential to be a health hazard for any residents.

I OBJECT to the inclusion of the land for new on/off ramps at Burnt Common (A43a)

The addition north facing ramps to the A3 at Burnt Common would be a disaster for local communities. There is no requirement for local traffic to access the A3 to the north, but the addition will draw in a huge amount of ‘through’ traffic.

The route from London/M25 to Woking or would now be through Burnt Common and Send. Equally traffic from the east of Guildford (Merrow etc) and the A25 will now go through West Clandon and Burnt Common. This will cause immense damage to those areas on small roads which cannot be improved.

This Plan does not address the needs of local communities or the Borough in this regard. There has again been no Section 18 consultation on this.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

</table>
I OBJECT to the sustainable employment policy (Policy E1)

I object to the inclusion of a strategic employment site at Gosden Hill Farm. Employment sites should be concentrated on previously developed land in more sustainable locations with good transport links where the infrastructure can support development. Warehousing, distribution and industrial premises cause considerable commercial traffic, noise, pollution and general disruption. They are not good neighbours for schools and 2000 houses. Many of the jobs will be taken by people outside the area leading to additional congestion in Burpham and on the A3.

I object to the inclusion of a strategic employment site at Garlick’s Arch. It is in a non-sustainable location remote from any facilities of any kind and with poor public transport links. It is unlikely jobs there will be taken by local residents and it is likely all travel to and from work will be by car adding to local congestion. Employment sites should be concentrated on previously developed land in more sustainable location with good transport links where the infrastructure can support development.

The site is in any event subject to frequent flooding and unsuitable for development.

If developed, the new employment site at Garlick’s Arch, Send Marsh/Burnt Common (A43), would be treated as a Strategic Employment Site.

The proposed development of up to 7,000 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) at Garlick’s Arch (A43) is in the scheme of industrial development relatively small. Just to the south of the site at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m. The Garlick’s Arch site which is in the Green Belt should not be developed as a Strategic Employment Site when there is a suitable alternative brownfield site very close by, which is far more sustainable.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )  
Answer (if comment is on questions 1-7 of the questionnaire): ()  

I OBJECT to the location for new employment floorspace (Policy E2)

I object to this policy. It would be more sensible to confine new office and research and development floor space to the urban Guildford area. I also oppose the policy of expanding the Research Park onto Blackwell Farm. No exceptional circumstances, as defined under the NPPF, have been advanced to justify incursion into this permanent and high-quality area of Green Belt.

Proposals for new industrial, warehousing and storage (use Class B1c, B2 and B8) floorspace will be directed to the Industrial Strategic Employment Sites.

There is no need for the new employment floorspace to be located at Garlick’s Arch or Gosden Hill Farm, when near to these sites at Burnt Common there is an existing industrial development, with ample surplus land that could accommodate a further development of 7,000 sq m.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to the loss of rural employment (Policy E5)

Policy E5 supports the retention and development of local services and community facilities in our inset and identified villages. Yet the development at Garlick’s Arch (A43) would result in the loss of four existing successful rural businesses, which have been in existence for over 30 years and another two businesses for over 9 years. These businesses employ dozens of people; none of them want to leave their premises. The Plan does not promote rural employment; rather it will result in the loss of existing local rural businesses.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.
The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations were available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy E7 Guildford Town Centre

The policy “vision” describes protecting the Guildford’s unique setting and historical character and sets out some of the ways this will be done. However none of this is included in the formal Policy wording in the blue box. I suspect the Vision wording is effectively of little or any force. These principles should be included in the formal policy.

There should be a much greater focus on residential use of the town centre where many people would like to live and where the necessary amenities and infrastructure exist. The policy misses the opportunity to propose forward looking sustainable residential development plans in, for example the Walnut Tree Close area, where very significant numbers of new homes
could be provided. Such town centre sites could meet much of the housing need over the plan period without harming the
countryside.

There is an urgent need for a strategy to focus on brownfield redevelopment before considering development outside the
existing urban area.

The policy does not address any of the major issues raised by the Council’s own Town Centre Master Plan, the Guildford
Vision Group’s proposal for new river and rail crossings or plans for the redevelopment of Guildford Station, all of which
are already the subject of public discussion.

The policy also fails to provide guidance on design requirements, as required by the NPPF.

The policy and surrounding text concentrates too much on shopping without regard to its nature which risks a proliferation
of dull high-street chain stores. The policy should seek to enhance Guildford’s character and encourage a wider variety of
small shops including locally owned businesses and shops of use to consumers. (For example there is no butcher in
Guildford.)

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy H1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally
Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to Policy H1 – Homes for all. Numbers aside, all the policy in the blue box says is that the Council will
encourage building over the plan period. It fails to set rules on important issues such as constraints and density, and is not
specific enough to provide a practical framework for planning decisions.

The housing mix is based on out-of-date, pre-Brexit projections and on assumptions set out in a flawed SHMA that has not
been scrutinised or evaluated.

I support higher density development in the urban area, without resorting to dehumanising, high-rise buildings that
developers commonly claim are necessary for financial viability. Much of Guildford town could usefully be regenerated
with 4-5 storey blocks with landscaping and underground parking, as often seen on the Continent and, recently, in London.

Student accommodation should provided for 100% of new students and more than 60% of existing students, which would
free up ideal family accommodation in the urban area. Other university cities (e.g. Oxford) insist on higher percentages
than those proposed in the plan. In my view, the Council’s timidity is a case of “regulatory capture” by Surrey University,
which has failed to use its existing planning permissions (dating from 2004) to accommodate 3,000 students or to improve
the efficient development of its campus (e.g. by building on its extensive and under-used surface car parks). If all students
Ire accommodated in this way, 2,000 homes would be freed up in town and there would be no need to build on the Hog’s
Back.

It is not appropriate to release Green Belt land to house students who could be accommodated on the Surrey campus or
other university sites. The plan should take account of the university's ability to house its own students and reduce the
housing number accordingly.
Guildford borough has already a higher proportion of traveller sites than most comparable boroughs. Over-provision is inappropriate given other constraints.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this policy on affordable homes (Policy H2) on the grounds of feasibility and that it should be more firm and explicit on unviability in paragraph 4.2.40.

In particular a scheme is only unviable if the value of developing the land (including some allowance for development risk and a normal level of profit) falls below the sale vale of the land for alternative non-premium uses such as agriculture. The price paid for the land is not relevant. The possibility of avoiding the affordable housing obligation through use of unviability arguments only serves to inflate land values. It will become clear that developments are unviable when developers start selling land for alternative non-development uses.

It should be noted in the plan that because of Guildford's relative popularity as a place to live combined with its location close to others towns and within the London Commuter belt no amount of building will meet demand. Similarly no amount of affordable housing will ever meet demand.

In addition the definition of an ‘affordable home’ is 80% of market value. With even a 2 bedroom flat in Guildford now having a market value of +£360,000 the discounted price is still not going to be affordable to anyone on a normal income.

And at what point will ‘affordable homes’ be able to go onto the market at full market price?

As we have seen with council houses it is not long before the discounted property is sold at full market value with the original owner simply pocketing the profit.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
I OBJECT to Policy H3 – Rural Exception Homes as this Trojan horse policy. It says that homes can be built anywhere near a settlement of any form (including agricultural land and the AONB). These homes are meant for people with a village connection, but they could be for anyone on the Guildford borough housing list. To make the housing viable, or to improve the “mix” this can include “market” housing (i.e. normal commercial development which in Guildford usually means large executive homes). This policy means building anywhere, and ignoring all historic planning restrictions.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.”

The wording of the policy is far too wide and drives a coach and horses though all other aspects of planning policy. As drafted the planning authority could be obliged to grant permission for inappropriate and unsuitable developments.

The wording provides no ability to balance the desirability of the development against other considerations including harm to the Green Belt or the AONB. (If the housing would meet identified need and adjoins a settlement under this policy wording permission would have to be granted even in the most sensitive AONB location, even if more suitable locations are available.) The policy should include the need for a balancing exercise including consideration whether more suitable locations exist.

The policy wording should not allow market housing. The ability to include market housing is likely to inflate land values, leading to a self-perpetuating need to include market housing. It may lead to spurious developer led proposals which will be difficult to resist.

The policy wording should define small, either in land size or number of units. I am concerned that if small is left undefined the policy could be used to justify significant developments. In the context of the plan a development of 150 homes might be argued as small. (If Wisley at 2,500 homes is a big development then 500 homes might be a medium development and 150 could be small.)

The policy wording should be restricted to adjoining sites or define the concept of being "closely related". In particular I believe adding the concept of safe and easy walking distance extends the potential radius within which sites will be argued to be “closely related” Many people would regard a mile or so as an easy walking distance. (School children are expected to walk further than that before being eligible for free school travel.)

The wording of the policy itself does not require the local connection requirement for tenants to be secured in perpetuity - only the affordability must be secured in perpetuity. (For example housing could be built for retired Cabinet Ministers under this policy so long as the first tenant was required to have a local connection.) The introduction to the policy mentions this point, but it is not part of the policy itself and may carry little weight at appeal.

The blue-box policy wording needs explicitly to limit rural exception to cases of demonstrable, unfilled, local need that cannot otherwise be met. It also needs to make it clear that the NPPF (especially paragraphs 87-89) fully applies, including the need to prove “exceptional circumstances.” The size and location of sites should be better defined and it should be clear market housing cannot be included.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )
I OBJECT, due to the congestion that development will cause to the local village roads and the lack of road infrastructure (Policy I1)

Our villages are already suffering from severe congestion for much of the day, for example the Newark Road & Rose Lane junction in the centre of Ripley and the A247 through West Clandon. The proposed development under the plan will cause greater congestion in and around our villages. The Plan does not provide an achievable strategy for improving capacity on these local roads.

Furthermore, many of the country lanes around the villages of Ripley, Send and Clandon are narrow and wide enough for only one vehicle at a time. In addition, the road surfaces are in a poor condition.

I OBJECT to the development proposed in the local plan, which will result in more traffic using these narrow roads and a further deterioration in the road surfaces.

Many of the affected villages, such as West Clandon, already suffer from traffic congestion. Further development around these villages will only result in more traffic and more parking problems.

With some 5,000 houses being proposed close to the village of Ripley, the roads serving the village will become even more congested. Cycling has become an ever popular past time, particularly at weekends hundreds of cyclists past through the villages on the way to the Surrey Hills. With no proper cycle lanes on the narrow local roads surrounding the village and with greater vehicle traffic being generated from these developments there is a real danger that there will be an increase in road accidents involving cyclists as a result of the development proposed under the local plan.

The narrow rural roads do not have proper pedestrian footpaths. The proposed significant levels of development will result in the road becoming ever more dangerous for pedestrians.

The council has a statutory obligation to protect the public and the additional traffic flows will bring added accidents, noise, pollution and injury of the public. In the case of West Clandon the Street often only has a narrow footpath on one side of the road making it very dangerous, especially when vehicles mount the pavements.

This policy as it is inappropriate and inadequate and fails to respond to the challenges raised by the proposed significant Green belt developments. The borough’s infrastructure is already heavily strained. However the plan’s determination to build large housing estates across the Guildford countryside significantly increases the need for infrastructure investment without securing the means for its provision. Placing housing in the established urban areas would reduce the need for enhanced infrastructure as would a more realistic housing number.

The policy wording says nothing about roads and traffic. The Council’s methodology for assessing traffic congestion - averaging it over periods of several hours and ignoring the effects of junctions - simply hides the problem, which will get worse as development proceeds. The schemes referred to in this policy will not solve existing congestion and the local road network has not been given sufficient consideration. Some proposed development locations would require highway schemes that are unlikely ever to happen.

Adequate infrastructure provision is a pre-condition of sustainable development. But in this plan it is an afterthought buried away in Policy I1. By prioritizing greenfield over urban, brownfield regeneration, the plan creates insurmountable (and unnecessary) obstacles for itself. Common sense suggests a local plan should first assess the borough’s infrastructure capacity for sustainable development, and then tailor development accordingly. This plan, however, assumes infrastructure will follow on the heels of housebuilding as if by magic. It makes implementation critically dependent on providers outside the Council’s control and on the vagaries of CIL income. Instead of recognizing this as a key constraint, the plan is based on hope. It is also highly likely that developers faced with the imposition of large infrastructure requirements will go to court to invoke the NPPF provision that prevents authorities from imposing conditions that make a development non-viable.
Policy I1 requires the delivery of improvements to infrastructure in conjunction with development. I have grave concerns over the planning of the infrastructure requirements and that the projects identified will be implemented when required, if at all.

Despite the Garlick’s Arch site (A43) being a significant site for development, no infrastructure projects have been identified in the Infrastructure Schedule. Without improvements to the infrastructure prior to development, the existing residents’ in the locality will see their quality of life significantly deteriorate in many ways.

Many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers. No plans to improve these services should mean no development of the Garlick’s Arch site.

Without proper planning and a commitment to fund new healthcare facilities, existing services such as the Villages Medical Centre, Send will have their services stretched and overwhelmed. Many of these services are already at capacity and suffering from funding cuts or freezes. Any further development without funding will place further stress upon existing health services.

Police services are seeing funding reduced. The development of the proposed 13,860 homes during the plan period will stretch the police services further and is unsustainable.

There is no provision of the increased capacity of Guildford hospital, where is this assessed and remedied?

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to poor air quality concerns (Policy I3)

Paragraph 4.6.27 of the Plan states that “Development must also mitigate its traffic impacts, including its environmental impacts and impacts on amenity and health.” The significant level of development being proposed, particularly in the north east of the borough will lead to considerable further congestion, despite any attempts to mitigate this through travel plans. This will be particularly acute in built up residential areas and will only lead to greater levels of air pollution, which will have a detrimental effect on local residents and their health and can result in early death.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT in the strongest possible terms to the Guildford Borough Proposed Submission Local Plan (June 2016). This Plan is unsustainable, unworkable and, in many provisions, unnecessary.

I set out below my objections to specific policies and matters within the Plan.

To summarise my personal key objection, firstly, the Green Belt. What is the point of a Green Belt if its status can be significantly changed by a local group? We, as a generation, (and I am in my sixties) are always being accused of ruining the future for the following generation. To remove Green Belt status and to build on it is a serious issue – let us not make a big mistake which can never be undone. I OBJECT to any significant alteration to the Green Belt.

I OBJECT to not protecting the Green Belt (Policy P2)
This policy does not sufficiently safeguard the Green Belt even though Green Belt constitutes 89% of the borough and should be the cornerstone of all local planning policy. The Green Belt is not the Council’s to give away and once it is gone it is gone forever. Sacrificing areas of the Green Belt to a developer influenced growth agenda is a betrayal of future generations and does not constitute sustainable development.

The Green Belt should be protected in perpetuity, but Policy P2 seeks to justify excessive development in supposedly protected areas. This is in breach of party manifesto commitments and contrary to previous responses to public consultation. It is disreputable to argue, as the Council does, that the Plan would involve the loss of “only” 1.6% of the borough’s Green Belt. Leaving aside the reliability of that statistic, the NPPF does not set an “acceptable” percentage. The fact remains that the plan proposes that 65% of the housing plus industrial development be built on land to be taken out of the Green Belt.

Paragraph 4.3.16 is seriously deficient in simply stating that the Council considers that exceptional circumstances exist to justify amendment of Green Belt boundaries. The exceptional circumstances are not identified. It is clear from national guidance that unmet housing need is not on its own an exceptional circumstance. Even to the extent that exceptional circumstances exist, these have to be balanced against the harm to the Green Belt in the specific sites proposed to be taken out of the Green Belt. This balancing exercise appears not to have been done.

The Countryside Study which the Council may argue fulfilled the need to demonstrate the exceptional circumstances required to justify removal of areas from the Green Belt was a simplistic tick box exercise. Within limits it may have answered certain questions about different attributes of different areas of Green Belt but it did not carry out the balancing exercise needed to determine whether specific exceptional circumstances justified removal of specific areas of land from the Green Belt. I believe that each of the identified Green Belt site proposed to be removed from the Green Belt should be carefully assessed against any exceptional circumstances in deciding whether it should be removed from the Green Belt in the final plan. This exercise should bear in mind that housing need in itself is not an exceptional circumstance and nor is the Council’s growth aspiration. An important consideration is that more housing need could be met on urban sites than is currently planned. The Plan has fallen into the developers’ hands and developers prefer building on undeveloped land rather than brown field sites.

I note that the Summer 2016 edition of "About Guildford" (published by the Council) on page 5 states that "... the Plan rejects any schemes that would have a detrimental impact on the Green Belt." This is demonstrably untrue and I consider this to be a deliberate untruth which compromises the consultation process. I would ask that this untruth be corrected and the consultation period restarted after the correction has been given the same distribution as the original statement. (I assume the document was delivered to most houses in the Borough.) I reserve the right to argue before the inspector that the consultation process was flawed and ineffective because of this.

I object to the “insetting” of 14 villages from the Green Belt. Contrary to assertions made in the Plan process many of these villages do contribute to the openness of the Green Belt and there is no need to inset them.

I also object to the wholesale extensions to the settlement boundaries in many villages to allow for infilling and that infilling is also proposed outside the settlement boundaries of 11 further villages. Many Guildford villages are linear. It is all too easy to square off boundaries by including countryside bounded on only one or two sides by existing development, claiming it contributes nothing to the “openness” of the Green Belt, a term which neither the plan nor the NPPF defines. The NPPF’s other 4 tests of Green Belt status, including the prevention of urban sprawl, are ignored. Effectively, this policy makes all villages within the Green Belt vulnerable to large blocks of new development and seems almost calculated to secure the rejection of the plan as a whole.

To “inset” two-thirds of the borough’s rural villages on the grounds that they no longer contribute to the purposes of the Green Belt is extreme and inherently implausible, given the borough’s location on the edge of Metropolitan London. I cannot see how such extensive areas fail to contribute to the purposes of the Green Belt under the NPPF, but this could quickly be the case if the proposed “insetting” and boundary extensions go ahead.

This policy is wildly disproportionate in terms of any foreseeable development need and has caused tidal waves of opposition from residents. It flies in the face of NPPF paragraph 17’s aim of “empowering local people to shape their surroundings” and other NPPF provisions.
Paragraph 4.3.17 states that “the general extent of the Green Belt has been retained.” I believe this should be deleted as an untruth.

In addition I OBJECT to the proposals to remove from the Green Belt the so called ‘strategic sites’ of Wisley Airfield (A35), Gosden Hill Farm (A25) and Garlick’s Arch (A43) and all other strategic sites. National Planning Policy requires there to be an exceptional circumstance for the Green Belt boundaries to be altered, or the development on Green Belt. There are no exceptional circumstances for these sites and villages (as mere housing need does not constitute a ‘special circumstance’) to be taken from the Green Belt. Once taken from the green belt they will be lost forever.

There is a real danger that the loss of this Green Belt will result in urban sprawl and these neighbouring villages merging into one another. The significant development in these villages will result in the character of these villages being lost and the countryside encroached.

GBC’s Green Belt & Countryside Report does not address Garlick’s Arch, so there is no evidence base to support including this site.

Rather than developing Garlick’s Arch, there is an existing brownfield site just to the south of the site at Burnt Common, with surplus land that could accommodate a further development.

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to all strategic sites proposed in the draft Plan to be built in the Green Belt.

1. I object to the identification and allocation of sites in this plan without regard to Green Belt, infrastructure or other constraints. **The plan says that “allocating these sites does not grant planning permission for development.”** However, each of the sites will be removed from the Green Belt and will be available in principle for development and non-Green Belt uses. The inclusion of these sites without detailed site by site justification shows contempt for the thousands of detailed comments the Council have received about individual sites ever since the Issues and Options consultation in 2013. The plan has hardly changed since the Council received 20,000 objections to its first draft plan in 2014. The Inspector considering the plan may conclude that the consultation has not been properly conducted.

I OBJECT to development in areas which are at risk of flooding (Policy P4)

National Planning Policy states that Local Plans should take account of climate change over the longer term, including factors such as flood risk. It goes on to say that new development should be planned to avoid increased vulnerability to the range of impacts arising from climate change.

The Plan states that in accordance with national planning practice guidance, the Level 1 SFRA has been used to guide development towards areas at the lowest risk of flooding and identify areas unsuitable for development. However, the document concludes that land outside of the area of flood risk is not capable of accommodating all of the borough’s identified development needs. A Level 2 SFRA has therefore also been produced and will help the Council apply the exceptions test (as described in the NPPG) as necessary to development proposals in areas at risk of flooding.

The site at Garlick’s Arch (A43) is identified on the Environment Agency’s flood map as being in a flood Zone 3 from a river. This means that it has a 1 in 100 or greater chance of flooding each year, the highest risk category. Despite this flood risk, the site has been assessed as part of the Council’s SFRA as a Flood Zone 2 - having between a 1% and 0.1% annual probability of river flooding. Knowing the area well I am aware that this site often floods during the winter months and the flooding is made worse by the soil being heavy clay. Clearly the SFRA is not fit for purpose and it needs to be re-commissioned to accurately reflect the actual flooding risks of each site.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/16436  Respondent: 8818625 / Beth and Frank Fuller  Agent:  
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S1

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I OBJECT to this Policy as the development proposed will not be sustainable (Policy S1)

The NPPF states that the presumption in favour of sustainable development “should be seen as a golden thread running through both plan-making and decision-taking.” As the first policy in the Plan, Policy S1 ought to set a clear framework. Instead, no definition of “sustainable development” is given. The policy also fails to set out any principles for applying sustainable development in practice to local planning decisions, which often have serious long-term impacts.

The policy states that it aims “to secure development that secures the economic, social and environmental conditions in the area”. This fails to recognize that economic growth, social justice and environmental protection often conflict. The policy does not say how each element is to be weighted or conflicts resolved. As a practical guide to the planning decision to be taken in the Plan period it is seriously deficient. The policy is likely to be used by developers to justify inappropriate developments on economic grounds. Under this policy, virtually any development will qualify as “sustainable”, in breach of the NPPF’s most important guideline.
Policy S1 is also seriously deficient in making no mention of the Green Belt. The Green Belt is a long term Government policy enshrined in primary legislation to protect green areas in perpetuity. The Green Belt is a living example of sustainable development in practice and is one of the most important factors affecting sustainable development in the area covered by the Plan and should be acknowledged in this policy. Policy S1 should include a commitment to protect the Green Belt from inappropriate development and to uphold Green Belt boundaries and protections. This would set at least one clear boundary to planning decisions. The Plan and the Council have treated the Green Belt as a developable land bank rather than as a constraint to development.

The commitment to approve planning applications “wherever possible” and “without delay” reveals the pro-development bias of the plan. Countervailing references to sustainability are so vague that the NPPF presumption in favour of sustainable development becomes a presumption in favour of any development at all.

This policy also ignores, as if they are inconvenient constraints, most of the 12 Core Planning Principles set out in NPPF paragraph 17.

The purpose of the planning system is to contribute to the achievement of sustainable development, as stated by National Planning Policy.

The development of 13,860 homes during the Plan period is not sustainable. It will have a permanently detrimental impact existing local communities by over-development, particularly for the villages between Guildford and the M25, including Ripley, Send and West Clandon. The services in these villages will be unable to cope with the level of development proposed. The proposed developments do not meet the needs of the local communities.

The strategic sites of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill Farm (A25) are in unsustainable locations. The former two sites do not benefit from railway stations within easy walking distance and bus services across rural villages are forever reducing. Residents will have few options, but to be reliant on motor vehicles. These sites are also unsuitable due to being unable to access sustainable transport. Furthermore, there are no plans to improve the infrastructure for Garlick's Arch in the Infrastructure Plan. Residents will be reliant on the car for transport. Greater consideration should be given to increasing the density of development in urban areas, such as Guildford, where more practical sustainable transport options can be provided.

The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. Further vehicle movements will result in even more acute congestion and greater pollution. Residents and the environment will suffer as a result.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I OBJECT to the Borough Wide Strategy (Policy S2)

The borough wide strategy is poorly considered. It proposes 13,860 housing being developed across the borough and does not apply any constraints to reduce the overall housing figure, which would be very reasonable and sensible. This approach differs from all the other Borough Councils in Surrey.

The housing number is based on pre-Brexit data for economic and population growth, including migration. These now need to be revised downwards, possibly quite seriously.

The housing number is based on an arbitrary Housing Market Area (HMA): the “West Surrey” tri-borough area of Guildford, Woking and Waverley. An HMA should be an area within which a majority of people live, work, shop or study. On any common sense view, “West Surrey” is much too small. Half of Guildford borough’s residents work elsewhere, and half who work here live outside the borough. A short, half-hour commute puts the borough within reach of Surbiton to the North, Haslemere to the South, Reigate to the East and Basingstoke to the West; but all lie well outside “West Surrey”. Puzzlingly, the adjacent district of Rushmoor, minutes from Guildford town centre, is outside the HMA. It is no justification to say that the tri-borough area has been used in the past, or that a similar approach is used elsewhere; unlike (say) Carlisle, Norwich or Shrewsbury, Guildford is in the London commuter belt and part of a far wider and more complex housing market.

These concerns have been raised since 2014 but the Council has failed to seek better market data. There was no public consultation on the SHMA and Councillors were not allowed to scrutinise it. The absence of a ready alternative, however, does not make “West Surrey” reliable. The area is artificial, and so therefore are the housing numbers derived from it. For instance, by juxtaposing Guildford with Woking it appears that Guildford residents are being asked to build homes on open countryside to meet its bigger, urban neighbour’s “need”. Guildford wants to build 7 sites of over 500 units, compared with only 4 across Surrey’s 10 other districts, and 26 sites over 100 units, compared with 53 across the rest of the county. This distribution is unbalanced.

The assumptions and calculations in the SHMA are widely regarded as flawed and even before Brexit, produced an inflated housing needs number. The figure of 13,860 new homes is completely unsubstantiated. It has not been scrutinized by Councillors despite repeated requests for debate. The assumptions and calculations underlying the model are hidden, protected by a claim to intellectual property by a commercial sub-contractor used in preparing the SHMA. I have serious doubts about the objectivity of the SHMA because it has been produced by consultants whose website openly proclaims their pro-development agenda leading to reasonable suspicion that the figures are inflated. Guildford’s OAN is not transparent but has been taken on trust by the authors of the plan. Given that almost every element of the plan is predicated on this OAN, the plan as a whole cannot be considered “sound”.

The status of the 13,860 figure is ambiguous. The Council has said that the housing number and the OAN are identical because the OAN is “deliverable” and is by definition objective and cannot be contradicted. The OAN is only deliverable because of the Council’s cavalier approach to the Green Belt in contravention of the NPPF, ministerial statements and local and national Conservative Party manifesto commitments. The plan also states that infrastructure or other constraints may in due course affect deliverability. It is also unlikely that the number of houses can be built at the rate proposed. In recent years, housing starts have on average been less than half the proposed rate. This is not because developers do not have the land or cannot get planning permission. Constraints in the supply chain and maintaining profit levels have been more important.

The plan cannot be considered “deliverable”. In addition, the number of homes proposed, plus existing planning permissions, plus expected “windfall” sites, exceeds the total of 13,860. So how many homes (taking account of these adjustments) do the Council want built? The plan does not say. Without this figure it is hard to see how anything else can be planned. This undermines the validity of the whole consultation. It is unreasonable to ask the public to approve a “plan” that fails to propose a target number that takes all the standard constraints and adjustments realistically into account, leaving the Council to set one without further consultation. Even if the OAN is not flawed, it is at best only a baseline figure and should not be passed off as a policy proposal.

It is unreasonable to embark on a radical transformation of the borough on the basis of an unclear housing target. Most of Guildford Borough is highly protected from development (89% Green Belt, 44% AONB and about 75% protected by SPA). Whether or not increasing the number of dwellings by up to a quarter is desirable, it would be a major and irreversible
change, arguably turning a largely rural borough into a mainly urban or suburban one like Woking. The scale of the housing number increases the onus for it to be seen to be sound. A substantially lower number, on the other hand, would remove the need to build on Green Belt or open countryside, and instantly meet the single biggest public objection to the plan as a whole.

The Plan in general and this policy in particular does not address the point that Guildford exists as part of London's commuter belt. Any increase in supply of housing in Guildford, particularly if the increase is proportionately greater than elsewhere in the commuter belt, will simply result in a shift of population into the area. It will not reduce prices or increase availability except imperceptibly. The Plan also ignores the point that many of those working in the area live elsewhere. Accordingly in considering the housing number the Plan should take into account that in this part of London’s commuter belt, demand for housing is, in practical terms, unlimited.

This policy does not take proper accounts of the constraints to development which exist, principally posed by the Green Belt and by infrastructure limitations. I believe the Council is under a duty to properly consider applying these constraints. It is clear the Council has failed to do this. This approach differs from all the other boroughs in Surrey. The Plan appears to have deliberately been manipulated towards a growth agenda without disclosing why this is being done. The housing that is needed should be concentrated on urban brown field sites and through increasing the housing density of existing built up urban areas.

The development of 13,860 homes in the Plan period with 65% in the Green Belt does not constitute sustainable development. It will have a permanently detrimental impact on the Borough in general and on West Clandon and surrounding area in particular. The developments at Garlick’s Arch and Gosden Hill Farm do not meet the needs of the local communities. The road infrastructure in and around West Clandon will be unable to cope with additional demand. The edge of urban Guildford will creep that much closer to West Clandon, thus negating the purposes of the Green Belt in the area which include safeguarding the countryside from encroachment, checking the unrestricted sprawl of large built up areas and preventing neighboring towns merging into one another.

It is clear that the strategy adopted in the Plan is out of balance, with disproportionate development in the north east of the borough resulting from the allocation Wisley Airfield (A35), Garlick’s Arch (Ripley/Send border) (A43) and Gosden Hill Farm (Clandon) (A25) as major residential sites. The allocation of sites in the Plan will result in 36% of all new housing being located in the three Wards of Lovelace, Send and Clandon & Horsley. Whilst at present these three Wards represent only about 11% of the existing housing in the borough, they are very much rural Wards. Some 5,036 houses are being allocated between the M25 and Burpham, a distance of only about 5 miles. It will result coalescence and a merging of identities of the surrounding villages. The Plan is completely unbalanced and does not reflect the current spread of housing across the borough.

The proposed development of Wisley Airfield (A35), Garlick’s Arch (A43) and Gosden Hill (A25) will have a disproportionate impact on the surrounding local villages. They will have a permanently detrimental impact on each of these communities.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

|Answer (if comment is on questions 1-7 of the questionnaire): () |
I do not agree that the evidence used for the Proposed Submission Local Plan Strategy and Sites is adequate, up-to-date and relevant.

The fundamental driving forces for much of the development proposed in the Plan (particularly that on Green Belt land) are based on:

1. An excessive ambition to expand the local economy which is neither warranted nor wanted by the local population. Guildford is already one of the highest ‘value creation’ areas in the country and has one of the lowest unemployment rates. There is no evidence that massive and accelerated expansion is required.

1. SHMA figures which are neither transparent nor justifiable, especially in view of previous figures set. Independent assessments of the SHMA (eg from Guildford Residents’ Association and David Reeve) show it is set far too high and so cannot be said to be adequate, up to date or relevant.

In addition the recent vote to leave the EU and the impact this will have on the economy and migration have not been taken into account.

The Plan should be re-assessed and the methodology for arriving at housing need figures should be fully transparent.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 2: Legal compliance

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be legally compliant because it mainly ignores the consultation process for the 2014 draft Plan it is claimed to be based on.

That consultation process was absolutely clear by some +20,000 responses that that Plan was flawed and no development should be carried out on Green Belt land.

Instead this 2016 draft Plan actually increases the number of dwellings being built on the Green Belt, in direct contradiction to the consultation process, yet is stated to be a Regulation 19 proposal.

As a result I do not see how the 2016 draft Plan can be Legally Compliant.

The 2016 draft Plan should be re-assessed and should take into account the views of the majority of responses from the consultation process for the 2014 draft Plan.

### Document: Proposed Submission Local Plan: strategy and sites 2016 / Question 3: Soundness

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole to be sound, because, but not limited to, the following reasons:

1. "Only sites that propose sustainable solutions have been included in the Plan and the Plan rejects any schemes that would have a detrimental effect on the green belt." Summer 2016 edition of "About Guildford" (published by the Council) on page 5. This is demonstrably untrue and appears designed to bias the consultation process.

2. The housing OAN figure has been calculated by a process which is not transparent. It has not been properly examined by Councillors before being adopted.

3. The OAN has been adopted as the housing number without the application of any constraints to take account of Guildford's circumstances, including in particular the Green Belt, AONB and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

4. The draft Plan does not accord with the NPPF policies on protecting the Green Belt. Exceptional circumstances need to be shown to justify removing areas from the Green Belt and this has not been done. The housing need number is not justification in itself according to published ministerial statements. Having properly calculated an OAN, constraints should be applied to it to reflect the Green Belt, AONB and infrastructure. Each proposed Green Belt site then needs to be justified on its own merits. The benefits of the proposed development need to be identified together with the harm to the Green Belt. Only if there are exceptional circumstances and following a proper balancing exercise demonstrating that these exceptional circumstances outweigh the harm to the Green Belt can the proposal proceed. The draft Plan does not demonstrate that this has been done. The housing number has been used as a blanket justification for all Green Belt sites—which amount to 65% of the proposed housing number.

5. Whatever the justification for the assumptions made in calculating the OAN, those assumptions are now almost certainly incorrect following the referendum.

6. The housing number is at least twice the achieved rate of building in the Borough over the last few years. There is no evidence in the Plan to show that this rate is achievable and sustainable.

7. Much of the infrastructure required to support the level of development proposed is outside the Council’s control. The Infrastructure Plan is long on possibilities and aspirations and very short on commitments. The infrastructure requirements placed on developers are supposed to be in place before development commences. This is utterly unrealistic and indicates a lack of knowledge of developer’s business models which depend on positive cash flow. It seems very clear that at best, infrastructure provision will seriously lag development and leave higher levels of congestion than now. This will reduce the quality of life for residents through congestion and disruption.

8. The 40-45% requirement for affordable homes together with infrastructure such as railway stations, park and ride facilities, schools and roads is highly likely to be challenged on a site by site basis by developers using the NPPF provision that Councils cannot impose conditions which make development non-viable.

9. GBC has not included details of its Town Centre Master Plan and urban development proposals in time for and as a part of the Guildford Local Plan consultation

10. GBC has failed to provide an Infrastructure Report in time for and as a part of the Guildford Local Plan consultation

11. GBC has proposed an OAN of 693 houses per annum in the GL Hearn West Surrey Strategic Housing Market Assessment (SHMA) which many, including independent assessors, consider unsound

12. Highways England will not start to consider what it intends to do as regards the A3 in the vicinity of Guildford until 2018

13. Network Rail have not made available for the public consultation any plans for a new railway station at Merrow with an adjacent Park & Ride for 1,000 cars
6. The GBC proposals for Gosden Hill Farm do not appear to be in coordination with the Neighbourhood Plan for Burpham.

7. The draft Local Plan will cause further linear development along the A3 between Burpham and West Clandon PC and encroachment onto open Green Belt countryside in clear conflict with the National Planning Policy Framework.

8. The proposal for Garlick’s Arch was added to the draft Local Plan without any prior consultation under Regulation 18.

9. The Land Availability Assessment (LAA) indicates a range of planning difficulties for Gosden Hill Farm and Burpham which have to be met by the developer involved. These include Electricity Grid supply problems and foul sewage and surface water issues that suggest the development proposed cannot easily be implemented both technically and financially.

10. No adequate explanation is given as to how the aspirational proposal for a tunnel will be used to overcome traffic issues relating to the quality of life and amenity of Burpham, West Clandon, Send and Ripley citizens.

11. In common with many others I do not believe the housing figure has been properly calculated and I believe it overstates housing need. The Council has prevented councillors or others from properly considering the SHMA by refusing to make public the basis on which it was drawn up.

12. The housing figure, when properly recalculated, should be subject to constraints to reflect Guildford’s circumstances, including in particular the Green Belt and road infrastructure. National policy permits such constraints to be applied and it is inappropriate not to consider the need to do this.

13. Even once a housing number has been calculated it cannot be used to justify taking land out of the Green Belt on a wholesale basis.

14. Cast iron commitment should be included in the plan that development can only commence when required infrastructure improvements have been secured.

15. The status of the text which accompanies each policy box is not clear. If the accompanying text does not have the force of policy a number of the policies (i.e. the text in blue) are so vague and general that they commit the Council to very little.

The draft Plan should be re-assessed with housing on brownfield sites made a priority over commercial development and Greenfield sites and each of the above points addressed.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Question 4: Duty to cooperate

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire):** ()

I do not consider the Proposed Submission Local Plan: strategy and sites as a whole has complied with the Duty to cooperate.

This 2016 draft of the Local Plan clearly demonstrates Guildford Borough Council’s refusal to co-operate with the wishes and requirements of the vast majority of the residents in its Borough.

The Council has failed to co-operate with the results of the consultation process for the 2014 draft Plan which was meant to inform and guide this 2016 draft Plan.
Despite campaigning on a clear statement ‘Conservatives Say Green Belt To Stay’, the ruling party on GBC is now intent on pushing through a Plan which will devastate Green Belt land and extend the Guildford Urban Area to further merge into surrounding rural villages.

This is not cooperation by any definition.

In addition the Council has failed to cooperate in providing any transparency to the housing need figures commissioned by the Council from GL Hearn.

The 2016 draft Local Plan should be reassessed with a reviewed and transparent SHMA and revised to reflect the views of the residents of the Borough, who pay for Guildford Borough Council to act in their interests, and not those of developers and central government.

Document: Proposed Submission Local Plan: strategy and sites 2016 / Appendix H: Maps - West Horsley North

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am writing to object in the strongest possible terms to the details contained in the latest draft local plan pertaining to the villages of East and West Horsley. I am deeply concerned that Guildford Borough Council Members and Officers seem to have more-or-less completely ignored the many well-argued objections raised to the last version of the plan for this area and created another proposal that seems hell-bent on destroying these beautiful villages. Of course I understand that the Horsleys are not part of the local ANOB, but they are directly adjacent to some of the finest landscape in the South East – rightly protected (I hope!) as ANOB – and the magnificent Lovelace architecture of East Horsley and the remarkable number of Tudor and other ancient houses in West Horsley are without doubt significant contributors to the amenity value of the entire area. The fact that the plan proposes more than 500 houses actually within the villages will significantly damage this.

**What changes (2016)/further amendments (2017) do you suggest should be made to the document?**
And that brings me to the elephant in the room; the proposals for Wisley airfield. All of the objections raised above also apply there, but multiplied by four times as many proposed houses with a couple of miles of the Horsleys. Once again, no provision for schools, medical facilities, public transport, roads etc etc.

This is a disastrous proposal that risks irreversibly damaging a truly beautiful part of Guildford borough. There is no evidence that the real impact has been thought through adequately, and those elected members and officers involved need to take a long, hard look at themselves and their motivations for putting forward what is so obviously a badly flawed plan. Instead, I urge you to revisit the possibility of brown field development, finding locations in the borough that offer the opportunity for local jobs, education and medical capacity, and transport infrastructure. This is not nimby-ism, this is simply asking you to address the GBC local plan in such a way that provides sustainable development without throwing up houses on unsuitable pieces of land, simply because they appear to be 'underdeveloped'.

You will have seen my letter raises a number of direct questions. I look forward to a detailed response to these so that I can better understand why GBC are promoting what appears to me, as a local resident, to be a simply terrible plan.

I can find no evidence in the plan that GBC have considered the infrastructure requirements necessary for such a dramatic increase in the local population. All local primary schools are fully subscribed, and I can see no proposals to create further capacity. I understand the current plans to redevelop the Howard of Effingham secondary school will only just provide sufficient additional capacity for the local children already making their way through the demographic profile towards secondary education. How many more children will 500+ new homes bring? 250? 500? 1000? Whatever the number, it is clearly going to be a large one and there is nowhere to educate them – and putting additional cars/coaches on the road to transport them elsewhere to school will probably gridlock our local roads. Why not build the houses where the capacity for education exists in the borough? The same applies to doctors and medical facilities. Where in the plan is there a proposal to enhance local services? How will people access these services if they are not local? In addition to children requiring education, the proposed new houses will contain adults requiring work. Where in the Horsley do the jobs for these people exist? Perhaps the planners think that they will be commuters. If so the planners haven’t attempted to travel from Horsley or Effingham Station in the rush hour. The station car parks are already full and the trains crowded even before they pull into our stations. There simply isn’t the room for hundreds more people. Perhaps the planners think that these new residents will drive to work and I understand that there is a proposal to build an additional A3 intersection in the area; perhaps the planners have included this in their proposals in an attempt to alleviate the local gridlock that the additional home owners will create trying to drive their children to non-existent local schools or themselves to work in jobs that aren’t in the area. If so, then these planners clearly haven’t travelled on the A3 northbound towards London or southbound towards Guildford recently, where the traffic is already at a crawl throughout the rush hour periods, even if it is on a rare day when the M25 is flowing adequately. And that brings me to the elephant in the room; the proposals for Wisley airfield. Answer (if comment is on questions 1-7 of the questionnaire): ()

The fact that the plan proposes to take the Horsleys out of the Green Belt makes my blood run cold. Almost one third of the houses proposed in the plan for Horsley are to be built on Green Belt land, which is simply disgraceful. And once these are completed how can GBC possibly justify the risk of opening the door to further unrestrained development.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I write with comments on the new plan.

Whilst i do appreciated the need for some new housing within the Horsleys i believe that the redefinition of the Green Belt does not recognise the limitations imposed by the access routes particularly via the already over used B2039 north/south. This is the only route to Horsley Station where new home owners are highly likely to use for employment .This area is already congested and often difficult to use .

At the recent planning application for Wisley Airfield it was clear that this and other nearby sites at Waterloo Farm, Manor Farm, East Lane and Ockham Road North are unsuited to any significant development that adds to the already limited access via the B2039.
For this reason I do not oppose the developments proposed at Bell Colville or Thatchers Hotel given their proximity to the A246.

Wisley Airfield site needs to be resolved first as a less concentrated development of say 200 homes could provide the key to the plan. Perhaps also a site for the expanded Howard of Effingham releasing their existing site adjacent to the A246 for housing?

Not a bad idea?

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

---

I do object to the removal of the extended village area from the Green Belt and the density of the Wisley Airfield proposal. They remain against all the evidence of the ability of the local area to sustain access, transport and employment.

Even with planned new facilities accompanying this proposal is clear that the neither the A3 or the B 2039 can accommodate any more traffic.

Imagine the vehicles needed by 2000 plus homes on the Wisley site seeking employment outside the immediate area and their impact on a road network already over crowded.

The proposed density of the Wisley plan is therefore grossly out of proportion to the character of the villages of Ockham and Horsleys.

I do object to the removal of the extended village area from the Green Belt and the density of the Wisley Airfield proposal. They remain against all the evidence of the ability of the local area to sustain access, transport and employment.

Even with planned new facilities accompanying this proposal is clear that the neither the A3 or the B 2039 can accommodate any more traffic.

Imagine the vehicles needed by 2000 plus homes on the Wisley site seeking employment outside the immediate area and their impact on a road network already over crowded.

The proposed density of the Wisley plan is therefore grossly out of proportion to the character of the villages of Ockham and Horsleys.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
• I object to the housing number of 693 houses per year from the West Surrey Strategic Market Housing Assessment (SHMA) as far too high. This assessment and calculation process has been far from transparent and indeed is more than double the figure used in previous plans.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

• I strongly object to the removal of the Former Wisley Airfield (FWA/TFM) from the Green Belt. The site serves a vital role in protecting against urban sprawl from London. Development on the site will create an urban corridor stretching from London to Guildford. Under the NPPF, no exceptional circumstances have been established to warrant removing the land from the Metropolitan Green Belt.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

- The Council has allowed many existing houses, which would be ideal for first time buyers and those with families, to be turned into houses of multiple occupation, in order to house students, who make no contribution to Council Tax, and who are a wholly transient population. The University should be made to house their students in Halls of Residence within the purlieu of its own considerable land holdings, thereby releasing much needed housing stock.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
• I object to the disproportionate allocation of housing in this particular part of the borough. Indeed, over 23% of the Plan’s new housing is proposed in the immediate localities of Ockham, Ripley, Send and the Horsleys (of which 65% is allocated to FWA/TFM, an area that at present has only 0.3% of the population of GBC).

Comment ID: pslp172/3960  Respondent: 8819265 / Alan Robertson  Agent:

Document: Proposed Submission Local Plan: strategy and sites 2017 / Policy A35

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I am deeply concerned that the Council has produced such a poor quality document for discussion, submission plan is unsound due to the number of errors in the plan, try fails to address the concerns of resident, which have been clearly aired on numerous occasions, it lacks transparency in the evidence base, the accessibility of the evidence base, including the fact that huge files have again been used and these are not accessible to those with poor internet connections. There is also considerable lack of clarity and coherence. Whether this is just very poor work or deliberate obfuscation remains to be uncovered.

I am also seriously concerned about the Council’s past track record of making inappropriate decisions, its willingness to be manipulated by property developers and builders and the scope for corruption and considerable financial gain for unworthy individuals.

I require confirmation that all of these comments together with all my previous comments are passed to the Inspector. I reserve my right to appear at the inquiry and present my evidence.

I continue to object to the inclusion of policy A35, Three Farms Meadows in the draft Local Plan for many reasons including:

1. It is the least sustainable strategic site identified in both this version and in previous versions of the plan because of the constraints on the site and the physical location
2. It is further from railway stations than any other identified strategic site.
3. It is adjacent to the most congested stretch of strategic road network in the county and close to one the most congested junction in the country (J10)
4. Local roads are at capacity particularly when the SRN is not free-flowing (accidents, diversions, roadworks etc)
5. Any public transport provision such as bus services to/from Guildford will have to negotiate the over-crowded SRN and will therefore be unreliable and subject to frequent delays.
6. Any public transport (bus services) provision to Horsley will impact the safety of the local road network as the lanes are not wide enough to accommodate PSVs, particularly as sustainable methods of travel such as cycling and walking are being promoted at the same time. This is totally unrealistic and unsafe.
7. It is adjacent to the most popular visitor attraction in the south-east, the RHS at Wisley where visitor numbers will increase by 500,000/annum.
   - The associated traffic increase from the RHS has not been taken into account.
   - The regular events at the RHS which attract 1000’s more visitors several times a year and the resultant traffic has not been taken into account
8. There is insufficient employment available onsite so that almost all residents will have to travel to work. It is unrealistic and unsafe to assume people will walk/cycle on narrow unlit local roads on a regular basis.
9. The identified mitigation to address the impact of increased traffic will not address the commuters travelling to Woking rail station.
10. It remains unclear when/if the Ockham DVOR/DME will be decommissioned as the timetable has already slipped. This constrains the site significantly in terms of building heights etc.
11. The changed “Opportunities” listed in this policy reinforce why this site is totally inappropriate talking of “good urban design”.
12. Opportunity (3) should be common to all sites and is not unique to this site.
13. I object to the increased area of the site as this now abuts another heritage asset, Upton Farm negatively impacting the setting of this building.
14. I object to the fact that the increased area, being on the south of the site facing the Surrey Hills AONB will increase the negative impact of the views from the AONB.
15. I object to the change of site boundaries as these are not identified correctly on the plan (Appendix H p16).
16. I object to the removal of additional 3.1 ha from the green belt without any justification.
17. I object to the change in green belt boundary to the eastern end of the site as this now encloses an area of high archaeological impact.
18. I object to para 21 which “limits” development in flood zone 2 and 3. Development should be excluded in flood zone 2 and 3.
19. I object to para 22 as this does not reflect the impact of the buildings on the surrounding area.
20. I object to the fact that the council has failed to remove this site from the local plan despite receiving 1000’s of objection from local residents and statutory consultees.
21. I object to the proposed Submission Local Plan because the significant modifications made to the plan mean that this should not be a Regulation 19 consultation. A regulation 19 consultation needs to be on the totality of the plan rather than the proposed changes.
22. I object to the fact that there has been no clear explanation why the council think it is appropriate to have a regulation 19 consultation when the changes are major.
23. I object to the fact that there is no clear justification for the removal of one strategic site over site A35.
24. I object to the inclusion of A35 as it will not contribute to the 5-year housing projection due to constraints notably in the provision of sewerage capacity.
25. I object to the extension of the plan period by 1 year as it has not been identified as a major change.
26. I object to the fact that the Council have not explained why the Plan is unsound within the original time frame.
27. I object to the Council wasting tax payers and residents’ time and money not following due process and indeed ignoring previous representations.
28. I object to the inclusion of a 10% buffer in the housing number over the plan period. This is unnecessary.
29. I object to the evidence base especially the West Surrey SHMA and the Guildford addendum 2017 which is not transparent and has been challenged by other experts including NMSS.
30. I object to the transport evidence base including the SHAR 2016 Highways assessment report which has been criticised by Mouchel for using out of date modelling software and is therefore unreliable.
31. I object to the fact that the Council appear to have directed the transport assessment to use prescribed vehicle movements from this site with no justification.
32. I object to the housing number and particularly the fact that the Council have not, as required used any constraints such as green belt, infrastructure, air quality, AONB, TBHSPA etc. I believe that the housing number is unsound and open to legal challenge.
33. I object to the apparent disregard for the impact of in-combination development on the TBHSPA, particularly the damage caused by nitrogen deposition and high pollution levels.
34. I object to policy S2 where it states “the figures set out in the Annual Housing Target table sum to a total of 12,426” yet the figures in the table add up to 9,810 – what is the significance of the missing 2,616? This is one of a number of glaring examples of why the plan is not sound.
35. I object to the ratio of space allocated for retail in the town centre. This could be much better used for residential development. I particularly object to the reliance on the Carter Jonas study update 2017 which includes “demand” for retail space from companies already in administration.

Additionally, the Council has failed to ensure that Surrey University needs to provide student accommodation on its own land, rather than losing valuable, appropriately situated housing stock for Homes of Multiple Occupation, which are the temporary residences of a transient population of students who have no commitment to the communities in which they live, and who make demands on Council services whilst not paying any Council Tax.
I consider for the reasons listed above and numerous other reasons that this plan is unsound and thoroughly unfit for purpose.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy A36

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

I therefore object to the following policies:

**Policy A36 - Hotel, Guildford Road,** which is proposing a housing density of 37 dwellings per hectare. An added factor to object to is the loss of a local amenity.

This land is within the Green Belt and I object to this proposal

Policies A37, A38, A40 and A41-Land in West Horsley. All areas within the Green Belt and which would represent an increase in housing of 36%. This would lead to the destruction of the village character and have enormous impact on the infrastructure of both East and West Horsley. I therefore object to these policies.

Policy A35 - Land at former Wisley Airfield. This proposes a new town in the heart of the Surrey Green Belt. It would have a major impact on the local villages and roads and would contravene Metropolitan Green Belt policy. I therefore object to it.

I have only commented specifically on policies that affect East and West Horsley as these are the villages that I know. I am sure that people in other villages will be making their thoughts known about their particular areas. However, I reiterate that I object to the Proposed Submission Local Plan for the whole of the Guildford Borough because I consider the reasoning behind the need for 25% increase in housing to be flawed. I also consider that the Council has not taken the wishes of its electorate into consideration.

**Document:** Proposed Submission Local Plan: strategy and sites 2016 / Policy P2

---
I object to Policy \textit{S2}. This allows for 25\% increase in housing stock in Guildford Borough Council whilst population increase is estimated by official statisticians' forecast to be 15\%. Is this because Guildford Borough Council has decided to pursue a policy of aggressive expansion? I am not aware that the local electorate has been asked if it wants this. I object to Guildford Borough Council’s policy of excessive growth.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
I object to the proposed development of the above site for the following reasons.

Normandy Parish Council are very much opposed to any such development, as are our County and Guildford Borough Councillors. In a recent joint communication, Keith Witham (SCC) and David Bilbe (our representative at GBC) said “We need to be clear that this is far from a done deal. The number proposed is simply too high and we need to challenge the empirical logic and evidence.”

In a letter to our constituency MP, Jonathan Lord, even the Leader of GBC Council has stated, “In all honesty if it was not for the education provision I would not have agreed to this site being included in the plan.” The need for a new school in this area is very dubious (see below.) In a personal letter to me Jonathan Lord, our MP, states, “I'm extremely sympathetic to your concerns and am myself appalled and aghast at the proposals.”

It appears that not only are the villagers of Normandy opposed to this proposal, we have the backing of all our democratically elected representatives and even doubts within the Council.

My own objections to this proposal, which I have already made known to the Executive, are as follows:

1.) This land is currently in the Green Belt and should be protected as such both now and in the future. Green Belt status has not been removed from this site. Prime Minister, David Cameron is on record as having declared that “there are no plans to relax the strong protections that prevent inappropriate development on the Green Belt.” And again, “We will always protect the green belt and make sure planning decisions are made by local people.” I take it that this means people who actually live in the vicinity of any proposed development.

I attended a meeting at Normandy Village Hall in February this year where villagers were assured by GBC Councillors that this particular piece of land was considered a sensitive site and, therefore, there were no plans to develop it.

We now know that a major construction company had already produced plans for a massive development of this site on a scale that would double the size of Normandy. GBC Planners were well aware of this proposal in advance of the February meeting.

I understand that there are exceptional circumstances in which certain areas of Green Belt land can lose their status in favour of important development. One of these exceptional circumstances might be the provision of a school although there seems to be no legal evidence that this is true. The inclusion of a new Secondary School on this site was obviously part of the original proposal and is included in order to justify the loss of Green Belt status.

However, the need for this school is extremely dubious given that two of the local secondary schools that serve Normandy, namely Ash Manor and King's College, are under-subscribed. Other secondary schools serving Normandy are being extended to cope with Guildford's ever increasing needs, although these needs themselves are dubious and are based on GBC's unsustainable housing quota.

The need for a new secondary school must be incontrovertibly demonstrated before any such loss of Green Belt land can considered.

2.) Before any Green Belt land is destroyed by development, full consideration should be given to the existence of Brown Field Sites, (that is previously developed land.) There are sites within the urban areas of Guildford, with its main line station and very good infrastructure, which are far better suited for development. Indeed, with far more on-line shopping now being carried out, buildings in the Town Centre itself will become vacant and ideally suited to change of use to dwellings.

3.) As a member of the Campaign for the Protection of Rural England, I would draw your attention to CPRE's recently expressed view that “developers already have planning permissions outstanding for 650,000 homes and there are brown
field sites available for another one million homes. We have to stop the over development now, before we wreck our green spaces for ever. Building on brown field sites can mean regeneration; building on open fields is destructive and environmentally disastrous.” I would urge Guildford Councillors to resist pressure from Central Government to ruin our beautiful British countryside. It should also be noted that this site is close both to Sites of Special Scientific Interest and an Area of Outstanding Natural Beauty. In the past planning inspectors have recognised that Normandy's green fields contribute to the openness of the green belt and the panoramic view of our green areas to the Surrey Hills AONB.

4.) A particular potential problem that concerns me personally is the matter of drainage. Surface water from the whole of Beech Lane and copses to the west of my property is discharged beneath the railway track, crosses Westwood Lane and is ditched across the land the subject of this proposal, towards Glazier's Lane and beyond. In the event of excessive rainfall, this discharge backs-up and causes extensive flooding in Beech Lane. This is evident not only in Beech Lane, but in flooding in Westwood Lane where the surface water is piped beneath the highway. My property has been flooded internally on two occasions due to this back-up and this has been exacerbated by the flooded sewer discharging contaminated water into my property. A personal and financial disaster!

The current system for the disposal of surface and foul water from Beech Lane is grossly inadequate and any interference to it would be wholly unacceptable.

5.) This development would result in the loss of sustainable Agricultural Land.

This is valuable Grade 3 arable pasture land and any destruction of it will have a devastating effect on wildlife and destroy our rural environment.

6.) This site is bounded on two sides by minor roads, both of which are currently congested during busy periods especially when there are traffic problems on the A31 Hog's Back and vehicles are redirected through our village.

The busy Aldershot/ Guildford road to the north of the site is currently even more congested. To add to this just one vehicle per proposed household (an unrealistic figure) together with cars dropping off and collecting numerous school children will cause unacceptable chaos and pollution in Normandy.

I shall be grateful if all members of the Council will take these points into consideration when discussing the GBC Local Plan and reject any proposal for the development of this site.

We object to Guildford Borough Council’s changes to the draft Local Plan and the inclusion of Blackwell Farm as a development site [Policy A26 & para. 4.1.9], which:

- disregards an independent expert landscape study, which demonstrates that part of the sites merits Area of Outstanding Natural Beauty status following Natural England’s forthcoming boundary review [para. 4.3.8]
• directs more office space to an extended business park [Policy E4], which will increase peak time congestion – particularly around the hospital and A&E – and will also encourage rat-running through residential areas
• ignores independent expert traffic studies, which show the impact of development at Blackwell Farm on the local network and question the viability of the development [2.14a]
• adds to air pollution in neighbouring areas, which already exceed safe EU limits for Nitrous Oxide.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy P2. Green Belt Land.

I welcome the removal of Sites A46 and A47 from the Local Plan, as this land is in the Green Belt and I fully support the intention to “check the unrestricted sprawl of large, built-up areas,” “prevent neighbouring towns from merging into each other” and “safeguarding the countryside from encroachment.” As most of Normandy and Flexford lie within the Green Belt, this also applies to other sites in the village. I am concerned that some areas have been removed from the Green Belt; these include Guildford Road at the northern end of Glazier’s Lane, Walden Cottages and Palm House Nurseries. Any development of these areas may well create a precedent for higher density housing, encouraging planning applications and the potential loss of even further valuable Green Belt land.

I would urge GBC to concentrate on approving plans to build on Brown Field Sites before any consideration is made to accommodate the loss of even more Green Belt Land.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:

Comment ID: PSLPP16/582  Respondent: 8819457 / Howard Turner  Agent: 
Document: Proposed Submission Local Plan: strategy and sites 2016 / Policy S2

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()
Please note that I hereby formally object to:

[Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the Data Protection Act 1998]

- The number of homes that the Plan intends to deliver over the 20 year period 2013-2033 (policy S2). The annual target of 693 is significantly higher than the 652 that the Council proposed last year and disregards the constraints which should have been imposed by the high proportion of the borough's designated Green Belt land and the capacity of the roads, schools, doctors, hospitals and other infrastructure to support such an increase in the population.

- The new boundaries proposed for insetting the villages of Send and Send Marsh/Burnt Common from the Green Belt (policy P2). The boundaries drawn enclose huge areas of open spaces that should be retained as Green Belt land and not developed at any time in the future. The village boundaries should be much more closely circumscribed to prevent urban sprawl and retain their village identity. With a presumption for development within these 'inset' areas, the proposed enclosures would encourage over-development and expansion of the villages in the future and completely ruin their essentially rural nature.

- Garlick's Arch (policy A43)

  The proposal to build 400 houses and 7,000sq.m. employment space (light industrial/storage, warehousing) on virgin Green Belt land, lying outside the Send Marsh/Burnt Common village boundary, defies all logic. This area which includes ancient woodland is a refuge for deer and other wildlife. It was never considered as a Potential Development Area within the Council's 'Issues and Options report' or identified for development in the 2014 consultation. In 2014 the Council rejected a planning application from 'Oldlands' to build 25 houses in this location on sound planning grounds, so how is can now be considered apt to construct 400 houses and 7,000sq.metres of employment space there? Apart from the fact that this is all Green Belt land, the infrastructure just cannot support such a development. Send Marsh/Burnt Common has one just shop (Waitrose), no doctors' surgery, no schools and the local roads are already filled to capacity. Any development at all in this area world be totally inappropriate and would be to the very substantial detriment of Send Marsh/Burnt Common as a village. The housing proposal alone would add 960 to the existing population of 2,341, an increase of 41 %.

  The proposed light industrial/storage facility would significantly detract from the open countryside aspect and add dramatically to the existing road use. 11 is totally inappropriate and would destroy the village's demarcation from Ripley, creating urban sprawl. This very late and very major change to the Local Plan proposals does appear to have not followed the correct due process and therefore shall, if approved by your Council, be subject to immediate legal challenge.

- New north and southbound slip-roads to and from the A3 to the A 247 Clandon Road (policy A43a)

  This proposal would encourage additional traffic along the very narrow, winding A247 Clandon Road and the Send Barns Lane/Send Road leading to Woking, the traffic along both of which are already at capacity. Send village is a ribbon development of housing along both sides of Send Road, so there is no scope to widen it, and where it ends at the Old Woking roundabout none of the connecting roads can be widened to ease congestion because of the existing surrounding buildings.

**Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )**

**Answer (if comment is on questions 1-7 of the questionnaire): ()**
Policy A 25 - Gosden Hill Farm
I have previously objected to the previous intention to construct 2,000 homes on this site and consider that the new Plan's proposal to reduce the number of dwellings to 1,700 homes would not materially reduce the very detrimental impact that the scheme could have upon the A3 and other local roads. I object to this revised proposal on the grounds that the number of houses proposed or this area is still far too high and, unless the development is totally concealed from the A3, it would detrimentally affect the appearance of the borough as a predominantly rural area.

I am very disappointed to see that despite the massive number of valid objections raised by our villages' local residents within the 2016 consultation, the Borough Council has deemed it fitting to increase the housing, Travelling/showpeople pitches and industrial development allocations in the villages despite a reduction in the borough's overall target. With the proposed proposals for 3,700 homes at (Gosden Hill Farm and Wisley airfield (Policy A35) in the immediate vicinity and the specific proposals for the villages of Send and Send Marsh/Burnt Common to accommodate an extra 500 houses, 10 travellers pitches, 7,000+ sq.m of industrial development and slip roads to the A3. I hereby strongly object to every single one of these proposals on the grounds of their severe and adverse environmental (including atmospheric pollution from the increased traffic) impact and the unjustified sacrifice of prime agricultural Green Belt land and historic woodland.

Please ensure that this letter of objections is brought to the attention of the Government's planning inspectorate and, unlike the June 2016 process, make this consultation orth of its name.

Policy A43 - Garlick's Arch
I have previously objected to the proposed development of 400 houses on this Green Belt and good agricultural land. The new policy A43 adds 8 travelling/showpeople pitches to this development rendering the policy even more inappropriate for the area. The Borough Council is reminded that less than 3 years ago it refused a planning application from 'Oldlands' to build just 25 houses in the same location. The Council cannot therefore incorporate this policy within the Plan and still maintain that it applies consistent and good practice.

This policy would increase the population of the Send Marsh/Burnt Common village by 49% and totally destroy its rural character.

I therefore strongly object to the revised proposal on the grounds that:

a) the village has no shops or other infrastructure to support the development;
b) the additional traffic generated would create major congestion on the already busy roads throughout the villages of Send, Send Marsh/Burnt Common and Ripley;
c) no exceptional circumstances exist to destroy this Green Belt land or the ancient woodland it contains;
d) there is no proven demand for travelling/showpeople pitches in this location, and
e) it would join up and destroy the distinct character of the villages of Send Marsh/Burnt Common and Ripley.

Do you consider this section of the document; complies with the Duty to Cooperate? ( ), is Sound? ( ), is Legally Compliant? ( )

Answer (if comment is on questions 1-7 of the questionnaire): ()

New policy A58 - Land around Burnt Common warehouse, London Road, Send P2 and A58.
I have previously objected to the proposed enclosure of huge areas of Green Belt open space within 'inset boundaries' around the villages of Send and Send Marsh/Burnt Common where there will be a presumption in favour of development. The new policy A58 seeks to increase the area of land to be extracted from the Green Belt for a minimum of 7,000 sq.m of 'employment floorspace.
I therefore object to this proposal on the grounds that there is no proven need to allocate any Green Belt land within the Borough for industrial/warehouse development and the fact that, at this particular location, it would have a very severe and adverse environmental impact not only on the two villages, but throughout the whole surrounding area. overdeveloping the local rural communities and creating major traffic problems.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Answer (if comment is on questions 1-7 of the questionnaire): ()

Policy'S2 - The 12,426 (654 per year) number of homes that the Plan intends to deliver over the 19 year period 2015-2034. Although the target for housing has now been reduced from 693 to 654 per year, it is still far too high and falls to take account of the constraints which should have been imposed by the high proportion of the boroughs designated Green Belt land and the capacity of the roads, schools, doctors, hospitals and other infrastructure to Support such an increase in the population.
I therefore object to the calculation of assessed need for housing and other development in the area and the grossly disproportionate impact oldie Local Plan's proposals on its more northerly communities of the borough.

I am writing to you to express my views on the proposed local plan. I am horrified to read of the amount of housing that you are planning to build in the beautiful GREEN BELT area of East and West Horsley.

I have lived in this area for 50 years and have enjoyed the wonderful countryside and I am hoping that other generations would also be able to have the same experience.

TRAFFIC Since 1970 the traffic on the roads has increased so much that often I am not able to get out of my house for at least 10 minutes and with the building of so many houses, with perhaps 2 or 3 cars per household will make the roads even more congested. The roads were not built for large lorries and the state of the roads deteriorates each winter.

VILLAGES We are small villages that generations have and will appreciate, with friendly faces, small shops, good schools and where everyone can find help and advice. The Doctor’s surgery cannot take anymore patients, the schools are full and parking can be very difficult when shopping locally. The station car park can get full and people using the trains later in the day have nowhere to park. A few houses for downsizing and the young could be built in the character of the villages.

GREEN BELT How can it be beneficial to get rid of the green belt. We need the oxygen from these spaces, the wild life should be left to enjoy the peace and quiet and the local people can enjoy wonderful walks, views and get away from the noise and pollution in the towns.

Why cannot the new builds be made on brown fields.

If we build so many more houses in this area we will be losing part of England that will be beneficial to generations to come. We have many visitors from other parts of Britain and the world who come to this area and cannot believe that we will allow it to be changed forever.

Small villages must be allowed to stay in the Green Belt instead of becoming urban areas to the large towns.

I worry about the infrastructure; how will the villages cope with sewage and water, the disruption on our small roads with any building works will be dreadful for the community, forcing people to take longer routes to work and to their homes, foul noise and pollution.

I strenuously object to the Guildford Local Plan 2016 for both East and West Horsley.

What changes (2016)/further amendments (2017) do you suggest should be made to the document?

Attached documents:
As a resident of West Horsley I believe that for the following reasons the Council need to rethink its proposals for the Horsleys

Once again those responsible for the development and approval of the Local Plan have failed to demonstrate that the very clear guideline that development of Green Belt land should be restricted to exceptional circumstances has been followed. This is particularly apparent in the case of West Horsley where the proposal to build 385 new homes on the Green Belt in a community of just over 1100 existing homes is clearly inappropriate and demonstrates a blatant disregard for the guidelines and the clearly expressed wishes of the inhabitants of the village. It represents an increase 35% which is the highest percentage increase of any community in the whole of the borough and is grossly unfair when (even if the need for the number of new homes in the borough was correct) these could be more evenly distributed throughout the borough. The timescale of just 5 years in which they should be built further demonstrates the total disregard for the feelings of the village and the disruption they would cause.

The proposal document fails to give a credible explanation of how the calculation of new homes required was made. To most outside of the Council it appears to be significantly overstated, one estimate being that the proposal represents a population increase 70% in excess of official national estimates. In the case of West Horsley the Parish Council survey identified the need for less than 30 homes to meet the requirements of local residents. Given the scale of objections made to the original proposals one would have expected a much better rationale for the need for so many new homes in this particular locality which is being so heavily targeted. None has been provided.

In addition the plan proposes an additional 148 homes in East Horsley, the adjoining village where most the local community amenities are situated. This together with the planned development of Wisley Airfield, and the developments at Ripley, Send and Burpham totals over 5,000 new homes in a relatively small wedge of land between the A3 and the A246 will destroy vast sections of Green Belt and Metropolitan Belt land to the North East of the borough. This imbalance is unacceptable and should be re-examined.

Unfortunately the problem is multiplied by the inadequate reasons as to why the Settlement areas for the villages of West and East Horsley should be changed. One can only conjecture that it is a device which will allow further land for future development as housing within the extended borders.

The proposals make little reference to how the local infrastructure is to be improved to cope with this enormous percentage increase in the population. The size of the individual sites means that there will be little or no assistance available from developers and even if budgets for drainage, schooling provision, parking facilities, road improvements, medical services, shops and community buildings etc were made available this would swallow up even more of the Green Belt which only compounds the problem. This scale of development is unsustainable particularly within the very short time frame proposed.

It would appear that the Borough Council is intent on destroying the character and beauty of this ancient village. The National Panning Policy Framework requires that new residential development MUST respect the character and density of housing in the area. Guildford Council seem determined to ignore this requirement and proceed with plans that are unsupportable by the infrastructure and facilities in the village.

Answer (if comment is on questions 1-7 of the questionnaire): ()

Please take the following as my official response to the draft Guildford Plan 2016:

Disproportional Development of West Horsley

This plan calls for an increase of at least 35% in the number of houses in West Horsley, almost exclusively on Green Belt land. This is entirely out of proportion with all other areas and will result in West Horsley totally losing its rural character. A 35% increase will completely change the character of one of Surrey's rural villages with the few remaining ancient dwellings. It will simply become another built over area. It certainly does not have the infrastructure, road system, health or schooling to cater for such an increase.

Green Belt

The overwhelming majority of new housing is proposed on existing Green Belt land. Brownfield sites are being reserved for retail/commercial. This is exactly the opposite of national guidelines.

Previous plan

The revised plan seems to have completely ignored all previous comments. the number of houses in West Horsley has actually gone up.
